Citation

This Periodical is brought to you for free and open access by the Catalog of Studies at ScholarWorks@UARK. It has been accepted for inclusion in Undergraduate Catalog of Studies by an authorized administrator of ScholarWorks@UARK. For more information, please contact scholar@uark.edu.
Welcome to the University of Arkansas

This catalog of studies is a comprehensive reference for your years of study – a list of degrees and courses offered at the University of Arkansas. In addition, it gives you valuable information such as suggested and required degree plans and information about costs, scholarships and financial assistance, and campus resources. Read it with pleasure and with care.

Take every opportunity to consult your academic adviser to ensure that you are taking advantage of courses and University resources that will help you reach your educational and career goals and graduate on time. If you are not sure where to find your academic adviser, contact the dean’s office of your college; the phone numbers are listed on the preceding page. If your major is “undecided,” contact the advising office in the J. William Fulbright College of Arts and Sciences at 479-575-3307. Otherwise, call the dean’s office in the college or school of your interest.

Remember, the University of Arkansas is committed to your success. The faculty and staff are here to support you as you work to achieve your goals. Ask for help and advice whenever you need it.

The University of Arkansas is committed to the policy of providing educational opportunities to all qualified students regardless of their economic or social status and will not discriminate on the basis of race, color, sex, creed, sexual orientation, disability, veteran’s status, age, marital or parental status, or national origin.
Fayetteville, Arkansas

Published one time each summer by University Relations and the Office of Academic Affairs.

Volume 99
Print Date: June 2005

This catalog is available online at http://catalogofstudies.uark.edu/.

A limited number of copies may be available through the Office of Admissions, University of Arkansas, 200 Hunt Hall, Fayetteville, AR 72701, or may be purchased at the University Book Store in the Arkansas Union.

Students who enter a college within the University of Arkansas in the academic year of this catalog generally may expect to follow the graduation requirements set forth by that college in this catalog. Because the faculty of each college reserves the right to change graduation requirements, students should meet with their college advisers regularly to be certain that they are aware of any changes in graduation requirements that may apply to them.

Acceptance of registration by the University of Arkansas and admission to any educational program of the University does not constitute a contract or warranty that the University will continue indefinitely to offer the program in which a student is enrolled. The University expressly reserves the right to change, phase out, or discontinue any program.

The listing of courses contained in any University bulletin, catalog, or schedule is by way of announcement only and shall not be regarded as an offer of contract. The University expressly reserves the right to 1) add or delete courses or programs from its offerings, 2) change times or locations of courses or programs, 3) change academic calendars without notice, 4) cancel any course for insufficient registrations, or 5) revise or change rules, charges, fees, schedules, courses, requirements for degrees and any other policy or regulation affecting students, including, but not limited to, evaluation standards, whenever the same is considered to be in the best interests of the University of Arkansas.

The University’s official five-year academic calendar is located on the World Wide Web at http://www.uark.edu/classes/CalCover.html.
2006 Academic Calendar

SPRING 2006 (73 CLASS DAYS; 43 MWF, 30 TT)
January 11-23  Open Registration
January 16  Martin Luther King Holiday
January 17  Classes begin
January 23  Last day to register, add a course, or change from audit to credit
January 30  Last day to drop without a mark of “W” or change from credit to audit
March 20-24  Spring Break Week
March 24  Last day to drop a spring semester class
May 4  Last day to officially withdraw from all classes
May 5  Dead Day
May 6-12  Final exams
May 13  All-University Commencement
May 20  Law School Commencement

SUMMER SESSION I 2006 (29 CLASS DAYS)
May 22  Classes begin
May 29  Memorial Day Holiday
June 30  Last day of classes for Session I

SUMMER SESSION II 2006 (29 CLASS DAYS)
July 3  Classes begin
July 4  Independence Day Holiday
August 11  Last day of classes for Session II

SUMMER SESSION III 2006 (58 CLASS DAYS)
May 22  Classes begin
July 4  Independence Day Holiday
August 11  Last day of classes for Session III

SUMMER SESSION IV 2006 (49 CLASS DAYS)
June 5  Classes begin
July 4  Independence Day Holiday
August 11  Last day of classes for Session IV

SUMMER SESSION V 2006 (24 CLASS DAYS)
June 5  Classes begin
July 4  Independence Day Holiday
July 7  Last day of classes for Session V

SUMMER SESSION VI 2006 (25 CLASS DAYS)
July 10  Classes begin
August 11  Last day of classes for Session VI

FALL 2006 (73 CLASS DAYS; 43 MWF, 30 TT)
August 21  Classes begin
September 4  Labor Day Holiday
November 22  Fall Break (administrative offices will be open.)
November 23-24  Thanksgiving Holiday
December 5  Last day of classes for fall semester
December 6  Dead Day
December 7-13  Final exams

Graduate School  Collis R. Geren, B.S., M.S., Ph.D.
University Libraries  Carolyn Henderson Allen, B.S., M.S.
As you move into and through your college career, I invite you to join the University of Arkansas community and to share in our vision for the University of Arkansas to emerge as a nationally competitive, student-centered research university serving Arkansas and the world. With help from our innovative and devoted faculty and bright, hard-working students like you, the University of Arkansas moves closer to realizing this vision with each passing year. Ever-mindful of the vision, we strive to make progress toward five institutional goals:

- Strengthening academic quality and reputation by enhancing and developing programs of excellence in teaching, research, and outreach;
- Increasing the size and quality of our student body;
- Enhancing diversity among our faculty, students, and staff;
- Increasing public financial support, particularly that provided by the state and federal government;
- Increasing private gift support from alumni, friends, corporations, foundations, and other organizations.

The University of Arkansas is building on a proud, 134-year history, one that has produced more than 125,000 graduates. And while the University already is well-known for its teaching, research, and outreach, the future promises to bring even greater renown to the University of Arkansas. In 2002, the Walton Family Charitable Support Foundation gave the largest gift ever to an American public research university—$300 million to the University of Arkansas. From that gift, $100 million endowed the University of Arkansas graduate school. The remaining $200 million established and endowed the University of Arkansas Honors College.

The effects are already in evidence. The graduate school is attracting talented graduate scholars in record numbers. The Honors College also is prospering, with nearly 1,800 students currently enrolled and taking advantage of a rigorous academic program at the University, which will prepare them for a future of leadership, service, and success in their communities and professions. They and many other students are taking advantage of study abroad opportunities, pursuing research projects, or benefiting from the many scholarships and fellowships available to undergraduates at the U of A. Whether in the Honors College or in any of the fine departments and programs interspersed throughout the University, all students are encouraged to strive for their highest level of achievement.

I invite you to use this catalog of the University of Arkansas and become better acquainted with who we are and where we’re going. On behalf of the University community, I wish you all the best, and I hope this catalog encourages you to take advantage of the lifetime of opportunities waiting for you at the University of Arkansas.

Sincerely,

John A. White
Chancellor
University Profile

VISION
The University of Arkansas is a nationally competitive, student-centered research university serving Arkansas and the world.

HISTORY
Founded as a land-grant college and state university in 1871, the University of Arkansas opened its doors to students on January 22, 1872. Under the Morrill Land-Grant College Act of 1862, federal land sales provided funds for the new university, which was charged with teaching “agricultural and the mechanic arts,” “scientific and classical studies,” and “military tactics” to Arkansas scholars.

Statewide elections, held to establish voting bonds to help finance the University, eventually determined the school’s location. Washington County and the City of Fayetteville submitted the highest bid, a total of $130,000, to which was added a $50,000 state appropriation for the benefit of the institution and $135,000 from the sale of federal lands. With $12,000 of this money, the University purchased a 160-acre farm, the homestead of William McIlroy, and established its campus on a hilltop overlooking the Ozark Mountains.

There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for classes in 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century. Over the past 130 years, the University has developed into a mature institution with nine schools and colleges, nearly 850 faculty members, and 17,269 students. It serves as the major provider of graduate-level instruction in Arkansas. The research and scholarly endeavors of its faculty make it an economic and cultural engine for the state. And its public service activities reach every county in Arkansas, throughout the nation, and around the world.

MISSION
As a land-grant university, the University of Arkansas strives to fulfill a three-fold mission of teaching, research, and service. In addition, as the flagship campus of the University of Arkansas System, the U of A in Fayetteville serves as the state’s major center of liberal and professional education and as Arkansas’ main source of theoretical and applied research.

Students pursue a broad spectrum of academic programs leading to baccalaureate, master’s, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

The University of Arkansas houses more than 200 academic programs and offers 83 bachelor’s degrees in 74 fields of study. Students may also pursue a wide range of graduate degrees, including the Master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy. Information about graduate programs can be found in the Graduate School Catalog or on the World Wide Web at http://www.uark.edu/depts/gradinfo/.

The Carnegie Foundation categorizes the University of Arkansas as a “Research Extensive” institution, placing the U of A in the top 10 percent of universities nationwide and in a class by itself within the state of Arkansas. In its 2005 edition, U.S. News and World Report ranked the University in the top tier of institutions of higher education. Faculty members perform cutting-edge research for which they annually win prestigious grants and awards, and the University encourages undergraduates to participate in the research process. Such opportunities enhance the learning process by providing hands-on experience in lab and research techniques, by developing students’ abilities to implement, experiment, discover and teach, and by fostering a mentoring relationship early in students’ academic careers.

Research programs involving both faculty and students serve as vital sources of information on the economic and social needs of Arkansas. In many fields, research performed at the University of Arkansas reaches beyond the state to provide insight and guidance on issues of national and international concern. The University provides extensive technical and professional services to varied groups and individuals throughout the state, helping to further Arkansas’ economic growth. The University operates nationally respected high school and college-level correspondence programs; it assists other institutions in developing educational programs; it offers graduate programs, both cooperatively and singly, throughout the state; and it makes specialized campus resources such as computing services and library holdings available to other institutions in the state.

LOCATION
A thriving city in the northwest corner of the state, Fayetteville is home to the 345 acres and 130 buildings that comprise the University of Arkansas campus. In the heart of the Ozark Mountains, the city boasts a lively cultural scene and easy access to outdoor recreation. In 2003, Outside magazine named Fayetteville 23rd out of the top 40 college towns in America. With a population of 60,000, Fayetteville was heralded as one of Business Week’s 2002 “Dazzling Dozen” small cities in the U.S. Northwest Arkansas is the sixth-fastest-growing region in the nation, according to the U.S. Census, and was recently included among the top four “Best Places for Work” by CNN/Money. The Milken Institute rates the regional economy as the strongest in the country. Fayetteville’s temperate climate ensures beautiful seasons year-long, and it is central to larger metropolitan areas, including Dallas, Kansas City, Little Rock, Memphis, St. Louis, and Tulsa.
The academic units of the University of Arkansas, Fayetteville, include nine colleges and schools and two military departments: the Dale Bumpers College of Agricultural, Food and Life Sciences, which includes the School of Human Environmental Sciences; the School of Architecture; the J. William Fulbright College of Arts and Sciences, which includes the School of Social Work; the Sam M. Walton College of Business; the College of Education and Health Professions, which includes the Eleanor Mann School of Nursing; the College of Engineering; the School of Law; the Graduate School; the Honors College; and the Departments of Army and Air Force ROTC. In addition, the Division of Continuing Education offers non-credit course work, correspondence courses for credit, and off-campus credit courses in cooperation with colleges and schools at Fayetteville.

The School of Law and the Graduate School offer professional and graduate degrees.

**FIELDS OF STUDY BY COLLEGE AND SCHOOL**

Following is a list of fields of undergraduate study offered at the University of Arkansas, Fayetteville.

**Dale Bumpers College of Agricultural, Food and Life Sciences**
- Agricultural Economic and Agribusiness
- Agricultural Education, Communication and Technology
- Animal Science
  - Biological Engineering (joint program with the College of Engineering)
- Crop Management
- Environmental, Soil, and Water Science
- Food Science
- Horticulture
- Poultry Science
- Turf and Landscape Horticulture

**School of Human Environmental Sciences**
- Apparel Studies
- Foods, Human Nutrition, and Hospitality
- General Human Environmental Sciences
- Human Development, Family Sciences, and Rural Sociology
- Interior Design

**School of Architecture**
- Architecture
- Architectural Studies
- Landscape Architecture
- Landscape Architectural Studies

**J. William Fulbright College of Arts and Sciences**
- American Studies
- Anthropology
- Art
- Biology
- Chemistry
- Classical Studies
- Communication
- Computer Science (B.A.)
- Criminal Justice
- Drama
- Earth Science
- Economics
- English
- French
- Geography
- Geology
- German
- History
- International Relations
- Journalism
- Mathematics
- Medical Sciences
- Music
- Philosophy
- Physics
- Political Science
- Psychology
- Public Administration (B.S.)

**School of Social Work**
- Sociology
- Spanish

**Second (or dependent) Majors***
- African American Studies
- European Studies
- Latin American Studies
- Middle East Studies
- Russian Studies

* A second (or dependent) major must be earned in a degree program in which the first major is one authorized to be given independently.
Programs in law, medicine, dentistry, optometry, medical technology, chiropractic, physical therapy, pharmacy, dental hygiene, occupational therapy, social work, and theology. The Dale Bumpers College of Agricultural, Food and Life Sciences coordinates the pre-veterinary medicine program.

**PRE-PROFESSIONAL PROGRAMS**

**Pre-Law**

The University of Arkansas School of Law does not prescribe a specific pre-law curriculum and does not require any single “pre-law major.” Instead, prospective students are encouraged to select baccalaureate majors best suited to individual interests and abilities. However, writing courses are often very valuable.

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Dale Bumpers College of Agricultural, Food and Life Sciences or the Fulbright College of Arts and Sciences who are admitted to the special six-year program. All applicants for admission are required to take the Law School Admission Test.

**Other Pre-Professional Programs**

Fulbright College offers pre-professional programs and advisers in law, medicine, dentistry, optometry, medical technology, chiropractic, physical therapy, pharmacy, dental hygiene, occupational therapy, social work, and theology. The Dale Bumpers College of Agricultural, Food and Life Sciences coordinates the pre-veterinary medicine program.
hood education is in compliance with the standards of the National Association for the Education of Young Children. The M.A.T. program in middle school education is in compliance with the standards of the National Middle School Association. The various M.A.T. licensure programs in secondary education are in compliance with the standards of the specialty organizations including National Council of Teachers of English, National Council of Teachers of Mathematics, National Science Teachers Association, and National Council for the Social Studies. The Master of Science degree program in speech pathology-audiology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the National League for Nursing Accrediting Commission (61 Broadway Street, New York, NY 10006, 212-363-5555, Ext. 153) and is approved by the Arkansas State Board of Nursing. The Bachelor of Science in Education (B.S.E.) degree program in health science, kinesiology, recreation, and dance is accredited by the Council on Accreditation of the National Recreation and Park Association. The Master of Science degree in rehabilitation counseling is accredited by the Council on Rehabilitation Education.

College of Engineering

Accreditation has been approved by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for the following degree programs in the College of Engineering: Bachelor of Science in Biological Engineering (B.S.B.E.), Bachelor of Science in Chemical Engineering (B.S.Ch.E.), Bachelor of Science in Civil Engineering (B.S.C.E.), Bachelor of Science in Computer Engineering (B.S.Cmp.E.), Bachelor of Science in Electrical Engineering (B.S.E.E.), Bachelor of Science in Industrial Engineering (B.S.I.E.), and Bachelor of Science in Mechanical Engineering (B.S.M.E.), Master of Science in Environmental Engineering (M.S.En.E.), Master of Science in Transportation Engineering (M.S.T.E.).

School of Law

The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.

SPECIAL PROGRAMS AND OPPORTUNITIES

Honors Studies

Interested students should write to the Director of Honors Program in the appropriate college.

The Bumpers College of Agricultural, Food and Life Sciences honors program provides students with opportunities for intellectual enrichment beyond the traditional undergraduate experience. This is accomplished through special honors courses, completion of an undergraduate honors thesis and other significant activities including interactions with students in honors programs in other colleges. The results of the student’s original research or creative project are published in Discovery, the college undergraduate research journal. In support of these efforts, participants in the Honors Program are eligible to receive an honors stipend in support of their research projects. The transcript and diploma of each honors graduate will designate the student as an honors graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia and have the title of their honors thesis and their mentors’ names listed in the graduation program. Students must maintain a GPA of 3.25 to remain in the program. Students who do not participate in the program may also graduate with honors designation. For additional information, see the Bumpers College section of this catalog.

The Departments of Architecture and Landscape Architecture in the School of Architecture provide opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education by participating in the School’s honors programs. Please contact the School’s Academic Advising Center for specific requirements.

To create an intellectual environment that will challenge the best of students, the J. William Fulbright College of Arts and Sciences provides a comprehensive program of honor studies. From the first year to the senior year, an honors student is provided the opportunity to study with other superior students in small distinctive classes taught by highly motivated and skilled faculty members. There are also opportunities for independent study so that students learn to work on their own and to develop their abilities and interests in ways that are not normally possible in regular college course work. Students participating in a program of honors studies also receive special academic counseling to satisfy their future career objectives. Students are offered every opportunity to achieve a high level of intellectual maturity and accomplishment. For additional information, see the Fulbright College section of this catalog.

The Sam M. Walton College of Business honors program is offered to high-achieving students interested in obtaining an outstanding business education at the University of Arkansas. Students who participate in the program will take honors classes in the University core as well as honors colloquia in the Walton College offered exclusively to honors students. The subject matter of these colloquia varies from year to year and focuses on current business issues. Students in the Walton Scholars Program will be offered a capstone course in the senior year involving actual consultation with an Arkansas business. Honors students also will complete a thesis in the senior year. Students in the honors program are entitled to register on the first day of registration week, have exclusive access to an honors computer lab/study area, and will be given priority consideration in such programs as the Arkansas Cooperative Education Program. For further information, see the Walton College section of this catalog.

The College of Education and Health Professions honors program is designed to enable undergraduate students who have demonstrated potential for outstanding scholarship achievement an opportunity to broaden and deepen their liberal and professional education. Honors students participate in honors seminars, leadership skills development and a required undergraduate thesis/project. Students are provided opportunities to enhance their learning experience through critical thinking, leadership skills development, and independent study. For additional information, see the College of Education and Health Professions section of this catalog.

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research-related careers that require considerable critical and original independent thinking. Students must formally apply for admission to the Engineering Honors Program. Once accepted into the program, honors students take a minimum of 12 hours of honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To retain status in the Honors Program, a student must maintain a minimum cumulative GPA (for all course work, computed at the end of the spring semester) of 3.25. To receive an honors Latin designation at graduation, a student must hold a cumulative GPA of 3.50 or better (for all course work, computed at graduation). Students with a GPA between 3.25 and 3.50 do not receive a Latin designation at graduation. For more information, see the College of Engineering chapter of this catalog.
Campuswide Academic Honor Societies

For other academic honor societies, see the various school and college sections of this catalog.

Golden Key is an academic honor society open to selected juniors and seniors who have a minimum 3.50 grade-point average (GPA).

Order of Omega honor society is exclusive to members of the Greek community on the University campus. Selection of members is based upon leadership in the inter-Greek activities, academic honors, and contributions to the University community. A 2.50 GPA is necessary for membership consideration.

Phi Eta Sigma is an academic honor society for freshman students. Membership is selected in the spring each year, and the only requirement is a 3.50 minimum GPA or better for the first semester of the freshman year.

Phi Kappa Phi is a national honor society whose primary objective is the recognition and encouragement of superior scholarship in all academic disciplines. Junior and senior undergraduate students who have a minimum GPA of 3.85 are eligible for membership. Also eligible are graduate students, registered for one year, who have a 3.85 minimum GPA.

Tau Alpha Upsilon is an honor society that honors outstanding students who live in the University of Arkansas Residence Hall system.

Who’s Who, a general honor society, honors students who have excelled in scholarship, leadership, and campus activities throughout their college careers. Membership requirements are a 2.00 minimum cumulative GPA, completion of 85 credit hours, and at least two full semesters attendance at the University of Arkansas, Fayetteville, prior to application.

Campuswide Leadership Honor Societies

Blue Key is a service-oriented honor fraternity that recognizes outstanding scholarship, leadership, and involvement in campus activities. Applicants must be classified as juniors and meet a 2.75 minimum GPA for membership consideration.

Cardinal Key is a junior service-oriented honor society whose membership selection is based on scholarship, leadership, and community and campus activities. A 3.00 GPA requirement must be met in order to be considered for membership at the end of the sophomore year.

Cardinal XXX is a service-oriented honor society whose membership consists of a select group of sophomores. Membership selection is based on scholarship, leadership, and community and campus service. A 3.00 GPA is required for consideration, and selection is made at the end of the freshman year.

Gamma Beta Phi is a service-oriented honor society established to recognize and encourage excellence in education. Membership in the organization is open to students who are in the top 20 percent of their class.

Mortar Board is a senior honor society that considers outstanding scholarship, leadership, and service to the campus and community when selecting members. Applicants must have a 3.00 GPA in order to be eligible for consideration.

Graduate and Professional Study

The University of Arkansas is the major center for comprehensive graduate-level instruction in the state, offering students the opportunity to continue their studies or to specialize in a particular field through the Graduate School. The University offers a wide range of graduate degrees, including the master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy. Non-degree graduate certificates are also offered. Information about graduate programs may be found in the Graduate School Catalog or on the World Wide Web at http://www.uark.edu/grad/.

The School of Law on the Fayetteville campus offers a juris doctor degree program for qualified students with a bachelor’s degree and offers the nation’s only master’s program in agricultural law for students with a law degree. Further information concerning professional study may be obtained by contacting the School of Law dean’s office for a copy of the current catalog: University of Arkansas School of Law, Leflar Law Center, Waterman Hall 107, Fayetteville, AR 72701, 479-575-3102. The World Wide Web address is http://law.uark.edu/.

Reserve Officer Training Corps

A true job training program, ROTC is offered at the University of Arkansas through both the U.S. Air Force and the U.S. Army. Each department provides a unique, career-oriented set of courses relevant to future leadership positions within its particular branch. In addition to studying Aerospace Education or Military Science, students interact with one another in a practical setting as they examine and apply the dynamics of leadership, management, ethics, communication, and teamwork. Participants are given the background and comprehensive building blocks to become commissioned officers in the U.S. military, if qualified. Physical activities and summer orientation programs are enhanced with continually updated curriculums. Classes are taught by military personnel, ensuring realistic perspectives on the military professions.

In the finest traditions of the University of Arkansas and the ROTC programs, students are challenged to grow, develop, and assume responsibilities throughout their academic years. Underlying that teaching is a foundation of service, integrity, and excellence – expected and demanded of all officer candidates. Scholarships and details of the two programs are found in the ROTC chapter of this catalog. Army ROTC is located in the Army ROTC building, 479-575-4251 or toll free 1-866-891-5538, http://www.uark.edu/army-hog/. Air Force ROTC is located in Memorial Hall, Room 319, 479-575-3651, http://www.uark.edu/~afrotc/.

Cooperative Education Program

Cooperative Education is a unique program offered by the Office of Career Services that allows students to alternate between going to school and working in their chosen vocation. In addition, the program allows employers the opportunity to train and evaluate future employees before offering them positions.

Employment assignments are diversified to provide students with a variety of experiences related to their major field and with work of increasing difficulty and responsibility. Although the primary objective is to supplement theoretical knowledge with practical experience, students earn full-time pay while on work assignments. This benefit produces welcome income while the students are still pursuing a degree.

Positions are available to students in many disciplines, primarily engineering, architecture and landscape architecture, business, agriculture, natural science, and mathematics. Co-op students must be in good academic standing, must be at least 18 years of age, must be making normal progress toward a degree, and must meet the specific requirements of their college (for example: the College of Engineering and Dale Bumpers College of Agricultural, Food and Life Sciences require completion of the freshman year; Fulbright College of Arts and Sciences requires 45 credit hours and a 2.5 grade-point average; the Walton College of Business requires completion of pre-business program requirements; and the School of Architecture requires completion of the junior year). In addition, employers may establish their own academic criteria for selecting students.

For further information contact the Career Development Center, 607 Arkansas Union, telephone 479-575-2805.
Introduction

Study Abroad

The University encourages the expansion of students’ educational experiences through study abroad. Student exchange programs have been established with Kansai University and Shimane University (Japan), Hankuk University (Korea), Al-Akhawayn University (Morocco), University of Graz (Austria), University of Essex (England), University of Maine (France), and Carlos III University of Madrid (Spain). Other UA study abroad programs include summer/semester/year-long programs in Austria, England, Scotland, Costa Rica, Ireland, France, Germany, Italy, Mexico, and Spain.

A limited number of scholarships and travel grants are available each year for these programs.

For more information about study, work, and travel abroad, contact the Office of Study Abroad, a division of Fulbright College, 722 W. Maple, 479-575-7582. Students in the Bumpers College of Agricultural, Food and Life Sciences may contact International Agricultural Programs, HOTZ 307, 479-575-6727. Students in the Walton College of Business may contact the Undergraduate Programs Office at 479-575-4622.
Undergraduate Admission

Any person who intends to register for a course at the University of Arkansas must first be admitted to the University. Students returning to the University after an absence of a fall or spring semester must also complete an application.

For students with disabilities, the University offers a variety of services to those students with physical or learning disabilities through our Center for Students with Disabilities (CSD). Students with any type of physical or learning disability are strongly encouraged to contact that office in Room 104 in the Arkansas Union, or call 479-575-3104 (TDD/Voice) to learn more about the specific nature of their services and the overall accessibility of the University. The University reserves the right to modify admission requirements. Application forms and the most current information about admission requirements are available from the Office of Admissions. Please send all application materials and supporting documents to the following address:

Office of Admissions
232 Silas H. Hunt Hall
University of Arkansas
Fayetteville, AR 72701
Telephone: 479-575-5346 or 1-800-377-8632
http://admissions.uark.edu/

When to Apply

Students interested in applying to the University of Arkansas for the fall semester are urged to apply by the November 15 preferential deadline. Early applicants are given priority when applying for New Student Orientation and University Housing. The preferential application deadline for the spring term is November 1. To be considered for freshman scholarships, the completed admission application, scholarship information sheet, all required transcripts, test scores and application fee must be received by the Office of Admissions by February 15.

Deadlines for Admission Consideration

Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:

- Fall – August 15
- Spring – December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

International students should refer to “Admission of International Students” in this chapter for application deadlines, procedures, and requirements.

How to Apply

2. Request that all required transcripts be sent to the Office of Admissions. Only official transcripts will be accepted. Transcripts are not considered official unless submitted in a sealed, stamped envelope or faxed directly from the previous institution. Questionable or unreadable transcripts may be refused.
3. All new freshmen and transfer students with fewer than 24 transferable semester hours. A preliminary admission will be provided to high school seniors on the basis of sixth- or seventh-semester transcripts. However, a final transcript showing all high school course work and certifying actual graduation must be submitted before a student may register for a second term.
4. All students born after January 1, 1957, must return the immunization form enclosed with the offer of admission. Immunization proof is required prior to first registration.
5. English Proficiency: Applicants whose native language is not English must submit a Test of English as a Foreign Language (TOEFL) score of at least 550 (paper based), 213 (computer based), or a minimum score of 6.5 on the IELTS (writing) taken within the preceding two years. Students who have completed grades 10-12 at a U.S. accredited high school and have a satisfactory ACT English sub score may request a review for waiver of this requirement. For more information about the
TOEFL, you may write to TOEFL Services, ETS, PO Box 899, Princeton, New Jersey 08541 or visit the World Wide Web at http://www.TOEFL.org/.

6. The University shall admit only those applicants whose enrollment will not be detrimental to the quality of life and the educational programs of the University. The Faculty Committee on Admissions and Transfer of Credit has authority to interpret University admission or transfer policy and to grant a variance. The Third Level Administrative Committee has the final authority in admission and transfer policy. An applicant who has withheld pertinent information regarding educational background or who has falsified information or credentials may be denied admission to the University or, if enrolled, may be immediately withdrawn.

PREPARATORY CURRICULUM FOR ENTERING FRESHMEN, ACADEMIC YEAR 2005-2006

Applications are reviewed on an individual basis with consideration given to the applicant’s overall grade-point average (GPA), core GPA, class rank, standardized test scores, and a personal essay. New freshmen and those transfer students with fewer than 24 transferable semester hours should have taken or been completing the following college preparatory curriculum in high school:

<table>
<thead>
<tr>
<th>English</th>
<th>Social Studies</th>
<th>Natural Sciences</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 units</td>
<td>3 units</td>
<td>3 units</td>
</tr>
</tbody>
</table>

1 unit general sciences – 2 units lab sciences
(Choose two courses from biology, chemistry, and physics laboratory. Two years of principles of technology will meet one unit of natural sciences [physics]. Two years of applied biology/chemistry will meet one unit of natural sciences [biology].)

Mathematics ............................................................................. 4 units
(Units must be equivalent or of a higher level than Algebra I)

Electives ............................................................................. 2 units
(To be chosen from English, foreign languages, oral communication, mathematics, computer science, natural sciences, and social studies.) As you choose your electives, residents of Arkansas please remember that to be eligible for Arkansas Department of Higher Education scholarships (i.e. Governor’s or Challenge) students must also have 2 years of the same foreign language.

Total ............................................................................. 16 units

Students who have taken these course requirements and who have a high school overall GPA of at least 3.00 and an ACT of 20 (or SAT of 930) or better will be admitted automatically. Those who do not may be admitted on the basis of individual review of their application materials. The admission decision will be based on evidence of ability to graduate from the University of Arkansas. Students who are eligible to graduate early and have met all of the requirements will be automatically admitted.

Accelerated Admission

Superior high school students who have completed a rigorous college preparatory curriculum may seek admission to the freshman class at the end of their junior year of high school. Applicants for accelerated admission are required to complete certain required subjects during three years of high school study, to submit letters of recommendation, and to submit an ACT or SAT score equivalent to at least the 90th percentile of the University’s previous entering class. Additional information and application materials may be obtained by visiting or calling the Office of Admissions.

ADMISSION OF TRANSFER STUDENTS

Transfer Admission Requirements

Applicants who have attended other colleges or universities after high school graduation are considered transfer students. The applicant must submit official transcripts of all previous college courses attempted whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit. This transcript must be sent directly to the Office of Admissions from each institution attended or be submitted in an official, sealed, school envelope or faxed from the institution’s registrar’s office with an official cover sheet. All transfer students must meet the following requirements:

1. Have a cumulative grade-point average of at least 2.00 on all course work attempted, and
2. Be eligible to return to the last institution attended. Grade-point average is calculated on all course work attempted.

Students who have completed fewer than 24 transferable semester hours must, in addition to the above requirements, meet all requirements for freshman admission (see Admission of Entering Freshmen). Test scores and transcripts are also evaluated to determine whether State of Arkansas requirements for developmental course placement have been met. (See page 27.)

Transfer of Credit

The following policies control the granting of credit for course work taken at other institutions:

1. Transfer credits are subject to a two-stage evaluation process. First, the eligibility of the hours for transfer and the core courses completed are evaluated by the Office of the Registrar based upon decisions of appropriate faculty. Credits found to be eligible for general transfer may not always count toward the minimum requirements for a degree at the University of Arkansas. The second step in the evaluation, performed by the academic dean’s office or department responsible for the program of study, determines which hours evaluated will satisfy degree program requirements in the major.
2. Grades earned at other institutions are not calculated in the student’s grade-point average earned at the University.
3. General transfer credit is awarded for courses in which a grade of “C” or higher has been earned. Course work must be applicable to a baccalaureate degree; credit is not granted for course work that is remedial or technical in nature. Students can petition to have up to six hours of “D” grades transfer for degree credit to the University of Arkansas. Students must have a 2.00 GPA on a 4.00 scale to be considered, and courses must meet core or elective requirements in the student’s degree program. Courses outside the degree program and courses in the major cannot be considered for transfer. The Third Level Administrative Review Committee makes all decisions regarding “D” transfers. Petitions can be obtained from the Office of the Registrar.
4. In the case of course work taken at institutions not fully accredited by a regional accrediting agency, transfer credit may be denied altogether or may be granted provisionally subject to successful completion of specified courses at the University. Normally, credit is provisionally granted only if the institution is a candidate for regional accreditation.
5. No more than 68 semester hours of lower-division (freshman- or sophomore-level) course work will be accepted. There is no limit placed upon the number of upper-division (junior- or senior-level) credit hours that may be awarded in general transfer, but a student must complete at least 30 hours in residence to meet graduation requirements (see Requirements for Graduation in this catalog). Please also refer to the appropriate college section of this catalog for any additional transfer policies that may be
be specific to your anticipated degree program.

6. The State Minimum Core (SMC): Act 98 of 1989 requires each institution of higher learning in Arkansas to identify a minimum core of general education courses that shall be fully transferable between state-supported institutions. Under guidelines from the State Board of Higher Education, the SMC consists of 35 hours distributed among the following education areas: English, U.S. history or government, mathematics, science, fine arts and humanities, and social sciences. Students transferring credit with grades of “C” or better from the approved SMC of another state-supported institution in Arkansas may expect to have all these hours applied toward their degree at the University of Arkansas. Each college at the University of Arkansas reserves the right to set additional general education or core requirements above and beyond those in a particular 35-hour SMC, however. The evaluation of transfer credit performed by the receiving college dean’s office will determine the extent to which courses transferred as part of a SMC will satisfy degree requirements.

Students should be prepared to submit course descriptions of transfer work if there is any question concerning acceptance of credit toward a degree program. The University reserves the right to revise credit for advanced standing after the student has been in residence.

Please refer to the appropriate college or school section of this catalog for additional information concerning acceptance into specific degree programs.

Arkansas Common Course Index System (ACCIS)

The University of Arkansas participates in the Arkansas Common Course Index System for the purpose of facilitating the transfer of general academic courses between higher education institutions in Arkansas. It is an index of the State Minimum Core courses that are common across all Arkansas institutions. The numbering of indexed courses does not reflect any other state’s numbering system. ACCIS course numbers are noted in a footnote to the State Minimum Core courses on page 40. For more information you may contact the University of Arkansas Office of the Registrar.

Provisional Admission

If a student is currently enrolled at another institution at the time the admission decision is made, a provisional admission may be granted during the semester immediately prior to the student’s registration at the University, provided the following requirements are satisfied:

1. at the time of application, the student must
   a. present the most recent official transcripts (if any) from every college attended, and
   b. have an overall grade-point average of at least 2.00 on all college course work attempted.

2. Transfer students entering in terms immediately following enrollment at another institution may, in special cases, make arrangements to register if a final transcript is not yet available from the previous institution. All other official documentation must be on file. In those cases, final official transcripts showing an overall grade-point average of at least 2.00 on all college course work attempted will be required within a specified time and prior to registering for a second term or semester at the University. Failure to demonstrate the required 2.00 average may result in an immediate administrative withdrawal.

International students should refer to the section on “Admission of International Students” in this chapter for requirements.

Arkansas Assessment of General Education (AAGE) or Rising Junior Exam

All undergraduates in Arkansas public institutions who have earned at least 45 hours of credit toward a degree are required to take the Arkansas Assessment of General Education Exam (AAGE), also known as the Rising Junior Exam.

Students transferring from other Arkansas institutions who have earned 45 or more transferable semester hours must take the AAGE exam during the first semester of enrollment, unless the student has documentation that it was completed at another college or university in Arkansas. The only students who are exempt from the AAGE requirement are those transferring at least 61 degree credit hours from out-of-state or private institutions.

Students who do not meet the AAGE requirement by the last day of their first semester will lose their future registration privileges.

Testing services, 713 Hotz Hall, mails exam registration packets to a student’s local address. For more information on the AAGE, contact testing services at 479-575-3948.

(See also “Advanced Composition” on page 41.)

ADMISSION OF SPECIAL (NON-DEGREE SEEKING) STUDENTS

Applicants who are not interested in working toward a degree while taking classes may, under certain conditions, be approved to do so upon submitting an application for admission. Degree-seeking students attending part-time or as an “undeclared major” should not confuse their status with this special, non-degree seeking category. The Office of Admissions reserves the right to determine the proper category of admission and to determine what credentials may be required.

Classification as a special student permits enrollment in credit classes (or as an auditor) on a space-available basis; however, special students are not eligible for financial aid, and the University incurs no particular obligation to provide academic advisement.

Admission as a non-degree student is not intended to serve as a means of access to regular, degree-seeking status nor is it intended for a person who has earned unsatisfactory grades in previous high school or college course work. Students who have been denied regular undergraduate admission are not eligible for this status. Special students are subject to the same regulations concerning scholastic probation, suspension, and dismissal as other undergraduate students. Students who have previously been assessed developmental course requirements, high school course deficiencies, or a conditional admission will retain that status as a special student.

Special students must meet course prerequisites and should be prepared to verify to the department by official documentation that University course prerequisites have been met, if appropriate. Students planning to enroll in any upper-division education courses should verify admission to the Teacher Education Program prior to registration. Special students may not enroll for more than nine hours of courses in a term without approval of the student’s academic dean.

Unless otherwise specified, students with special status who wish to be admitted into a degree program at the University of Arkansas must apply for admission as such prior to the beginning of the term for which the change of status is requested. All requirements for admission to regular status must then be met. No more than 24 semester hours earned while in a non-degree seeking status will apply to a degree at the University.
When to Apply

Special students must meet the same application deadlines as other students with the exception of students participating in the senior citizens’ registration. For further information consult the online schedule of classes www.uark.edu/registrar/classes/soc.html.

How to Apply

The following students may be considered for special status:
1. Visiting students from other colleges or universities who wish to enroll at the University to earn credits that they plan to transfer back to their home institution. It is the student’s responsibility to verify with his or her college that courses taken here will be acceptable as transfer credit.

   Application procedure: Submit a completed application, a non-refundable application fee, and a letter of good standing verifying eligibility to return to the home institution.

2. Students who want to take courses of special interest for personal or professional development, but who are not interested in working toward a degree. Applicants in this category are normally expected to have been out of high school for three or more years.

   Application procedure: Submit a completed application and non-refundable application fee. Students who have been out of high school less than five years should submit a transcript and test scores verifying that admission requirements have been met.

   The application fee is not required for students 60 years and older.

3. Students who already have a college degree and who want to take credit classes, but not toward another degree at this time. Credits earned under this classification will not count toward a graduate degree.

   Application procedure: Submit a completed application and non-refundable application fee. Students who wish to enroll for successive terms should submit a transcript showing the degree.

4. Dually enrolled high school students must have at least a 20 ACT score and a 3.00 high school GPA to enroll. Dually enrolled high school students are ineligible to enroll in remedial courses.

   Application procedure: Submit a completed application, a non-refundable application fee, ACT or SAT scores, high school transcript, letter of intent regarding courses student wishes to enroll, and a letter of recommendation from the high school principal. Admissions applications should be submitted at least one month in advance of the term and must be submitted by the application deadlines.

   Dually enrolled high school seniors who plan to enroll in the fall as a regular freshman must submit a separate application for regular admission for the fall.

READMISSION OF RETURNING UA STUDENTS

Any former student who wishes to return to the University after missing a fall or spring semester should complete an Application for Admission. Students enrolled in UA correspondence courses during their absence must be readmitted. A $30 non-refundable application fee is required for former students.

When to Apply

An early readmission will enable you to register during priority registration. You should submit your application and all appropriate credentials at least one month prior to the time you plan to register. For registration dates and procedures, you may view the schedule of classes on the Internet at http://www.uark.edu/classes/soc.html.

Deadlines for Admission Consideration

Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:
- Fall – August 15
- Spring – December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

Requirements

1. Students must be academically eligible to return to the University and are readmitted with the same academic status as held during their last attendance. Course work taken at another institution will not affect a student’s probationary status or UA grade-point average. Students may change degree programs on re-admission to the University of Arkansas regardless of academic status, except for students entering the College of Engineering. A student may not enter the College of Engineering if the student is not in good standing. Students who have not satisfied their initial provisions of admission (but are still eligible to return) will be required to satisfy those conditions upon their return.

2. Students with transfer work: Students who have attended another institution while away from the University will be considered transfer students and must meet those requirements, including either a 2.00 grade-point average on all college work attempted and/or a 2.00 on all course work attempted since last UA attendance. Official transcripts of all course work attempted since last attendance at the University must be submitted (see Admission of Transfer Students).

3. Former special students: Students who previously attended the University as special students and wish to return as degree-seeking candidates must apply for admission as freshmen or transfer students, furnishing all appropriate admission credentials, including any required test scores. All requirements for admission to regular status must be met. (See appropriate section of this catalog for requirements.)

4. Former students who are submitting petitions to either the Academic Standards Committee or the Faculty Committee on Admissions and Transfer of Credit to request readmission must have on file all required documents by the application deadlines. (See the schedule of classes for deadlines for submitting petitions.)

ADMISSION OF INTERNATIONAL STUDENTS

All international students must present officially certified academic credentials, evidence of adequate financial support, and, for non-native English speakers only, a minimum TOEFL score of 550 (paper based), 213 (computer based), or a minimum score of 6.5 on the IELTS, taken within the preceding two years.

Applicants who meet the academic and financial requirements but who do not meet the English proficiency requirement of the University will be offered conditional admission and are required to attend an intensive English program through the Spring International Language Center. Students will be eligible to enroll in academic courses upon successful completion of the highest level of the intensive English program with a 3.00 grade average and recommendation of the director of Spring International.

An entering freshman who has completed secondary school at either U.S. or foreign institutions must have a) the equivalent of a final cumulative grade-point average of at least 2.75 and b) competency equivalent to that developed by taking four years of English and three years each of mathematics, natural sciences, and social
studies, and an additional three units of electives chosen from English, speech, foreign languages, mathematics, natural sciences, or social studies in U.S. high schools.

A student transferring with fewer than 24 semester hours of post-secondary work at either U.S. or foreign institutions must a) have a cumulative grade-point average of at least 2.50 (or its equivalent) on all post-secondary work attempted, and b) meet the requirements specified for entering freshmen. A student transferring from either a U.S. or foreign post-secondary institution with at least 24 semester hours must have the equivalent of a cumulative grade-point average of at least 2.50 on all post-secondary course work attempted.

In addition to these requirements, all electrical engineering and computer systems engineering applicants must submit a Test of Spoken English (TSE) score of at least 5.0, or a 7.0 on the spoken section of the IELTS, and an ACT score of 25 (or SAT score of 1140(R)) or above, to be eligible for admission. A non-refundable application fee of $50 is required for all international applicants. All applications and supporting documents must be submitted by May 31 for the fall semester; October 31 for the spring semester; and March 1 for the summer sessions.

Any international student returning to the University after an absence of a full semester (fall or spring) or more must submit an application for admission. For these students, the application deadlines are August 15 for the fall term and January 1 for the spring term. It should be noted that a student previously enrolled at the University of Arkansas who takes a full term of courses elsewhere and then seeks readmission to the University returns as a transfer student and must meet University admission requirements for international transfer students, submit a photocopy of the I-20 issued by the transferring institution, and submit a new financial statement. An application fee is not required for returning students.

For specific admission requirements and application materials pertaining to students on F-1 or J-1 visas, applicants should write directly to the International Admission Office, 747 W. Dickson Street, Suite 8, University of Arkansas, Fayetteville, Arkansas 72701, or call 479-575-6246 or e-mail iao@uark.edu.

Please see the section “Placement and Proficiency Tests” on page 19 for University policy regarding English language use by non-native speakers.

ACADEMIC BANKRUPTCY

Students returning to the University after an absence of five or more years may be eligible to declare academic bankruptcy if they meet the following criteria:

1. Must have been enrolled previously at the University of Arkansas, Fayetteville, as an undergraduate student and be returning as an undergraduate student.
2. Must not have been enrolled at the University during the previous five years.
3. Students who have attended another institution since their last attendance at the University must meet requirements for transfer students (2.00 GPA on all course work attempted more than five years after last enrollment at the University of Arkansas, Fayetteville) to be eligible for readmission.
4. Must submit an application for readmission and official transcripts of all college work attempted since last attendance at the University of Arkansas by the application deadlines and submit a “Declaration of Academic Bankruptcy” form (available from the Office of Admissions or academic dean’s office). The following are the conditions of academic bankruptcy:

   a. Students will forfeit all credit hours previously awarded by the University of Arkansas, Fayetteville. This includes course work completed at the University (regardless of grades earned), courses accepted in transfer, credit by examination, and any correspondence course work awarded.
   b. A new calculation of grade-point average and credit hours will begin when the student returns to the University.
   c. The transcript will reflect the student’s complete record (including all previous college work) with an added notation of “Academic Bankruptcy Declared.”
   d. Courses taken at another institution within five years of the last UA enrollment will not be accepted in transfer. Course work completed more than five years after last UA enrollment may be accepted in transfer, subject to UA transfer credit policies. For purposes of this policy, UA correspondence course work will be treated in the same manner as transfer work.
   e. For the University to provide appropriate advising and (as required by Arkansas Act 1052) appropriate assessment, a student may be required to submit ACT scores prior to registration for classes if, as a result of academic bankruptcy, that student is returning to the University as a freshman with fewer than 24 transfer hours.

PLACEMENT AND PROFICIENCY TESTS

ACT Assessment, SAT I, and ACT ASSET scores are used to determine placement in University courses. Students whose scores indicate the need for additional preparation may be placed in courses designed to prepare them for college-level work. (See Arkansas Requirements for Developmental Course Placement on page 27.) Credit earned in such courses does not count toward degrees in all colleges. (See Courses That Do Not Count Toward Degrees, page 27.)

Freshman Composition Placement

- Students with ACT English scores lower than 20, or SAT I verbal scores lower than 480, or ACT ASSET writing skills scores lower than 45 should enroll in the course sequence ENGL 0003, ENGL 1013, and ENGL 1023.
- Students with ACT English scores of 20-27, SAT I verbal scores of 480-620, or ACT ASSET writing skills scores of 45 or higher should enroll in ENGL 1013 and ENGL 1023.
- Students with ACT English scores of 28-29 or SAT I verbal scores of 630-670 may enroll in ENGL 1013 and ENGL 1023 or in Honors English (ENGL 1013H and ENGL 1023H).
- Students with ACT English scores greater than 29 or SAT I verbal scores greater than 680 may enroll in Honors English (ENGL 1013H and ENGL 1023H) or elect exemption. Students who elect exemption must complete the appropriate forms available in the English departmental office. Some degree programs require credit in composition, and students should confer with their advisers before exempting.

The Math Placement Test

This test is offered during New Student Orientation and is required of new freshmen who have not presented ACT, SAT I, or ASSET mathematics scores and of transfer students who have not taken and passed a college-level Calculus I course. Students may opt to take the placement test to improve their placement in mathematics.

Speech Communication Exemption Examination

Students who have had speech in high school and/or experience in public speaking may elect to take this test for exemption from or credit in COMM 1313. Both the written and oral (a five-minute impromptu speech) examinations must be passed to receive exemption or credit.
Foreign Language Placement Examinations

Students with previous foreign language experience in French, German, or Spanish are encouraged to take language placement examinations offered during summer orientation. Those test scores will be used by academic advisers to determine an appropriate foreign language placement level. Students who omit one or more courses in the basic language sequence will receive credit for omitted courses when they have validated their high placement by passing the course into which they were placed with a “C” or better. Conversation courses (3033, 4033) and correspondence courses may not be used to validate such prior knowledge; and no degree credit (graduation credit) is awarded for a foreign language 1003 course to students in the J. William Fulbright College of Arts and Sciences who are continuing the language begun in high school, either by validation or regular registration.

General Chemistry Placement Examinations

These tests will be offered during orientation and at other times during the year. Students who performed at above average levels in high school chemistry may find it to their advantage to enroll directly in the second semester of general chemistry. This examination is designed to provide guidance in making this course selection. Students who place into the second semester of general chemistry and earn a grade of “C” or better in the course will also receive credit for the first semester of the course.

English Language Use by Non-Native Speakers:

Non-native speakers of English admitted to undergraduate study at the University of Arkansas are required to present an acceptable score on one of the following tests: TOEFL (TWE), IELTS (writing), or ELPT (writing). Depending upon exam scores, a student may be required to take one or more EASL courses prior to the beginning of classes in their first term of study. Non-native speakers in the following categories are exempt from this requirement:

1. Undergraduate students who transfer at least 24 hours of credit from U.S. institutions, including courses that meet the freshman composition requirement;
2. Undergraduate students who have completed grades 10 through 12 in and graduated from a U.S. high school and have obtained an ACT English section score of 19 or above or a SAT I verbal score of 460.
3. Graduate students who earned bachelors or masters’ degrees from U.S. institutions or from foreign institutions where the official and native language is English;
4. Graduate or undergraduate students with a Test of Written English (TWE) score of 5.0 or IELTS writing score of 6.5.
5. Graduate students with a GRE Analytical Writing score of 4.5 or GMAT Analytical Score of 4.5.

Diagnostic and placement testing is designed to test students’ ability to use English effectively in an academic setting, and its purpose is to promote the success of non-native speakers in completing their chosen course of study at the University of Arkansas. Test results provide the basis for placement into English as a Second Language (EASL) support courses or course sequences. Courses are offered by the Department of Foreign Languages for those students whose language skills are diagnosed as insufficient for college-level work at the level to which they have been admitted (undergraduate or graduate study). Credit in EASL courses do not count toward University of Arkansas degrees. Non-native speakers diagnosed as having language competence sufficient for their level of study will not be required to enroll in EASL courses.

The ELPT is administered by Testing Services during New Student Orientation and there is a $10.00 charge.

Undergraduate and graduate students assessed EASL courses are required to complete these courses during their first semester of enrollment at the University.

GRADUATE SCHOOL ADMISSION

Applications for admission to the University of Arkansas Graduate School and two official copies of transcripts of the applicant’s academic record at each college and university attended since high school graduation must be submitted to the graduate school admissions office and approved in advance of registration. The transcripts will become a part of the student’s permanent file at the University. Applications may be obtained by writing to the Graduate and International Admissions Office, 747 W. Dickson Street, Suite 8, University of Arkansas, Fayetteville, AR 72701, or by calling 479-575-4401 or by applying on the World Wide Web at http://www.uark.edu.

Additional information and procedures for making application to the Graduate School are included in the Graduate School Catalog.

Admission to Graduate Standing

To be admitted to graduate standing, a student must have earned a baccalaureate degree from a regionally accredited U.S. institution or from an institution with substantially equivalent requirements for a baccalaureate degree and must have an overall cumulative grade-point average of 2.70 or better on all courses undertaken prior to receiving the baccalaureate degree.

Admission to graduate standing does not admit a student to a specific program of study leading to a graduate degree. Therefore, in addition to satisfying the general requirements of the Graduate School, the applicant must also comply with the specific requirements and have the approval of the department in which graduate study is desired.

Under certain conditions, applicants for admission to the Graduate School may be required to present satisfactory scores on the graduate record examinations (GRE) or another specified national standard test.

For further details see the Graduate School Catalog.

SCHOOL OF LAW ADMISSION

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the J. William Fulbright College of Arts and Sciences or in the Dale Bumpers College of Agricultural, Food and Life Sciences who are admitted to the special six-year program. All applicants for admission are required to take the law school admission test. (See page 102 for the Fulbright College Pre-Law Program or page 70 for the Dale Bumpers College of Agricultural, Food and Life Sciences).

For complete details concerning admission to the University of Arkansas School of Law, see the School of Law Catalog or write to Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701, telephone 479-575-3102. Applications can be submitted on the World Wide Web at http://www.uark.edu/.
Financial Aid and Scholarships

FINANCIAL AID

The University of Arkansas annually awards over $100 million of financial aid and scholarships to students. Financial aid is divided into categories of grants, work, loans, and scholarships. Unless otherwise specified, a student needs to complete only two forms to apply for all four basic types of assistance: The Free Application for Federal Student Aid (FAFSA), which analyzes the ability of the student’s family to pay for college; and the University’s Application for Admission. These forms collect information used by the Office of Financial Aid and the University’s scholarship committees in determining awards. In some cases, copies of the parents’ and/or student’s tax returns are needed.

DETERMINING FINANCIAL NEED

To determine financial need, a student must complete the FAFSA. Students release their information to the University of Arkansas by completing the college release section with the University of Arkansas Title IV Code of 001108.

There is a priority date of MARCH 1 for the submission of the FAFSA for the approaching school year for new students. Federally funded financial aid will be awarded on the basis of need as reflected by the FAFSA.

The Student Aid Report from the FAFSA (consisting of several pages) will be sent directly to the student by the Central Processing Service. A student needs to be enrolled or accepted for enrollment before a financial aid award may be generated. To continue receiving financial aid, the student needs to be making satisfactory progress toward a degree, as defined by the University of Arkansas. (See Satisfactory Academic Progress.)

APPLICATION PROCEDURE

1. Apply for admission to the University, if not currently enrolled or admitted.
2. Complete the Free Application for Federal Student Aid (FAFSA) and submit it to the federal processor by mail or online. You may submit the FAFSA on the Web at http://www.fafsa.ed.gov./

Students hoping to be considered for scholarships need to have their application for admission submitted by February 15 to the University for priority consideration. However, please check with your department for earlier deadlines and additional forms.

To receive priority consideration for financial aid, all forms and applications need to be submitted by March 1. Students are encouraged to apply even if they miss this priority date. Funds will be available after the priority date.

A student has a couple of choices concerning processing his or her FAFSA. These include mailing the form to the Federal Student Aid Programs or submitting it electronically on the Web at http://www.FAFSA.ed.gov/. The processing time for electronic applications is three days, and processing time for mailed applications is four to six weeks.

SATISFACTORY ACADEMIC PROGRESS

Federal regulation requires that a student must be making satisfactory academic progress regardless of whether he or she has previously received Title IV aid. All students enrolled at the University of Arkansas who receive financial aid through the Title IV Assistance Programs must meet satisfactory academic progress requirements as defined below to be eligible for further aid. Satisfactory academic progress is deemed to have been made by any undergraduate student who meets both the quantitative and qualitative requirements indicated below.

Quantitative Requirements

There are two quantitative requirements that the student must meet to remain eligible to apply for financial assistance. First, the student must pass, at a minimum, 67 percent of the credits attempted while attending the University. Also, the student will remain eligible to apply for aid as long as the number of credits attempted is not more than 150 percent of the number of credits required for the student’s degree.

A transfer student may have earned credits at another school that will count toward his or her degree at the University of Arkansas. Only transfer credits that apply to the student’s degree will count as part of the 150 percent maximum.

The determination of each student’s meeting the quantitative requirements for satisfactory academic progress will be made annually following the conclusion of the spring semester. If a student fails to pass at least 67 percent of the credits attempted or has attempted more than 150 percent of the number of credits required for graduation, then the student must appeal for reinstatement of financial aid eligibility.

Qualitative Requirements

A student is deemed to have met the qualitative requirements for satisfactory academic progress for financial aid purposes provided the student’s academic status is not one of Academic Dismissal.
Financial Aid and Scholarships

Graduate and Law Students

Satisfactory academic progress for graduate and law students is determined as described above with one exception. In order to meet the quantitative requirement, the student must pass with at least a grade of “C” at a minimum, 67 percent of the credits attempted while attending the University at the graduate level.

SCHOLARSHIPS

The Office of Academic Scholarships is part of the Honors College and is housed in Old Main, Room 518.

The University of Arkansas, Fayetteville, awards over 5,000 scholarships totaling more than $14 million for students each year. This total does not include funds that support such external scholarships held by UA students as Governor’s Scholarships or Arkansas Academic Challenge Scholarships. Scholarships funded by the University fall into three broad categories: distinguished fellowships, academic scholarships, and special interest/skills scholarships.

SCHOLARSHIPS FOR NEW STUDENTS

Distinguished Fellowships

The University of Arkansas offers four distinguished Fellowships. The Sturgis Fellowship (est. 1985), the Bodenhamer Fellowship (est. 1998), the Boyer Fellowship (est. 2000), and the Honors College Fellowships (est. 2002) are among the most competitive and prestigious fellowships in the nation and are awarded to the most competitive students in the country. Each Fellow receives up to $50,000 for four years of study. Students who wish to apply should visit the Web site at http://honorscollege.uark.edu/. One application is used for all Fellowships except the Boyer Fellowship. (See the chart below for details.)

Academic Scholarships

A limited number of academic scholarships also are awarded to entering freshmen and transfer students. Selection criteria include national test scores (ACT or SAT), grade-point average, National Merit or National Achievement recognition, quality and quantity of courses taken, and other pertinent factors. (See the chart on following page for details.) For online information, go to http://scholarships.uark.edu/.

UA SCHOLARSHIPS—GENERAL INFORMATION

The following regulations govern the general University scholarships described below:

1. FEBRUARY 15 is the scholarship deadline for entering freshmen and MARCH 15 for entering transfer students. An applicant must be admitted to the University by the above mentioned deadline to be considered for these scholarships.

2. An “entering freshman” is defined as a student who has not enrolled in another post-secondary institution in a fall or spring semester following graduation from high school.

3. Eligibility for renewal of Chancellor’s and general University scholarships is determined at the end of the second semester each award year. Students may “catch up” in summer terms by taking classes at their own expense on the Fayetteville campus.

4. These scholarships are generally awarded per academic year to cover the fall and spring terms, up to an eight-semester maximum for most students, or a ten-semester maximum for students in architecture or pursuing a Master of Arts in Teaching. Renewal criteria are evaluated every two semesters. See http://scholarships.uark.edu/renewal.html for renewal schedules.

5. A student who is placed on academic warning forfeits his or her scholarship effective the semester of academic warning. See http://www.uark.edu/admin/regrinfo/docs/academicstanding/ASPolicy.html for a full description.

Financial Aid and Scholarships
Scholarships, Grants, and Other Awards for Non-Resident Students

See page 33 in Fees & Costs.

COLLEGE AND DEPARTMENTAL SCHOLARSHIPS

The following college and departmental scholarships are available to entering freshmen at the University of Arkansas. Complete addresses and phone numbers of the colleges, schools, or departments listed below may be found in the respective college or school sections of this catalog.

School of Architecture

The School of Architecture offers a limited number of scholarships at various amounts to entering freshmen in any of the degree programs offered by the School. Several scholarships are renewable annually to the recipient who maintains all the requirements of the scholarship. Upon graduation or forfeiture by the recipient, another scholarship is awarded.

In order to be considered for any of the above scholarships, students are required to submit a portfolio of at least three (3) pieces of creative work. These pieces can include drawings, sketches, or paintings, but should not include computer aided drawings or floor plans. Additionally, a one-page resume should accompany the portfolio submission. Deadline for submission is May 1st.

Many upper level scholarships are available to continuing students. Applications are available in the fall and recipients selected in the spring for the following academic year. For more information contact the School of Architecture Academic Advising Center at (479) 575-2399.

J. William Fulbright College of Arts and Sciences

The J. William Fulbright College of Arts and Sciences offers many outstanding scholarship opportunities. Collectively, Fulbright’s 19 departments offer more than 100 scholarships and awards. At the college level, 12 scholarships benefit students in the arts and sciences. For comprehensive information about these awards, call 479-575-4801 or visit the Web at http://www.uark.edu/~arsc/students/scholarships.html.

Three college-wide scholarships merit special attention: Through the Sturgis Fellowship Program, Fulbright College offers premier fellowships to entering freshmen, continuing students, and graduate students. Most scholarships are based, primarily, on academic achievement and/or financial need. However, scholarships are also awarded on the basis of financial need and diversity. Scholarships are primarily awarded on academic performance, and are renewable up to three years.

The King Fahd Center for Middle East and Islamic Studies offers substantial four-year and two-year renewable scholarships to superior students majoring in Middle East Studies. The program also offers competitive funding for language study in Morocco, Tunisia, and Egypt. Funding for summer study abroad and research projects is considered on a case-by-case basis. Scholarship applications and information about the program can be obtained by contacting mest@uark.edu or calling 479-575-4157.

In honor of the Fulbright commitment to international education, the College offers the J.W. and Elizabeth W. Fulbright Endowed Scholarship, which supports a year of study abroad. To qualify, students must display an interest in one of the following fields: literature, history (including theatre, art, and music history), jurisprudence, philosophy, archaeology, comparative languages, and those aspects of the social sciences that employ philosophical or historical approaches. For more information about these opportunities, call 479-575-4801 or visit http://www.uark.edu/~arsc/students/scholarships.html.

Dale Bumpers College of Agricultural, Food and Life Sciences

A Margaret Stearns Fellowship in the amount of $9,000 will be awarded annually to an incoming freshman that has achieved outstanding academic performance, and is renewable up to three years.

The Division of Agriculture Land Grant Scholars Endowment Program provides up to 16 scholarships, dependent upon the availability of funds: the goal is to award one graduate fellowship at $11,000; two undergraduate scholarships $8,000 each, one to an entering freshman and the other to a new transfer student; 13 undergraduate scholarships for $4,000 to three entering freshman and to ten new transfer students.

Dale Bumpers Distinguished Scholar Program provides one $2,500 scholarship to the outstanding transfer undergraduate and a $1,000 award to the outstanding Ph.D. graduate student and a $500 award for the outstanding M.S. graduate student.

Information and application procedures regarding these and approximately 200 departmental scholarships are available on the college Web site: http://www.uark.edu/depts/dcbafs/scholarships.html or call the Scholarship Administrator at 479-575-2253.

Sam M. Walton College of Business

The Boyer Fellowship is offered to Walton College students who have achieved at an outstanding level both in and out of the classroom. High grades and standardized test scores are required along with a strong commitment to service and the demonstration of exceptional leadership skills. Applicants for the Boyer Fellowship must demonstrate financial need.

Other scholarships are available through the departments of accounting, information systems, economics, finance, management, and marketing & logistics as well as through the Walton College’s general scholarship program. Scholarships are primarily awarded on the basis of academic achievement and/or financial need.

For further information on Walton College scholarships, contact the Undergraduate Programs Office at 479-575-4622.

College of Education and Health Professions

The College of Education and Health Professions offers limited numbers of scholarships in varying amounts. Recipient selection is based on a variety of attributes that are specific to each award. Attributes may include but are not limited to: the basis of promise, character, leadership skills, scholarship, or financial need.

Scholarship applications are available in November of each year. All current and future COEHP students are strongly encouraged to take advantage of these scholarship opportunities. For further information regarding scholarships and the application process, visit the Scholarships link on the College of Education and Health Professions’ Web site or contact the Office of the Associate Dean for Academic Affairs, 317 Graduate Education Building, 479-575-4280.

College of Engineering

The College of Engineering awards numerous scholarships and fellowships to entering freshmen, continuing students, transfer students, and graduate students. Most scholarships are based, primarily, on academic performance. However, scholarships are also awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments.

College scholarships are available to any engineering student while departmental scholarships are meant for students enrolled in a particular discipline of engineering. Students must be admitted to the University of Arkansas and accepted into the College of Engineering to qualify and
receive either a college or departmental scholarship. The college has a one-step application process that allows a student to be considered for all college level scholarships and departmental scholarships. For more information concerning scholarship and diversity opportunities, contact the College of Engineering Office of Diversity, Retention and Scholarships at 479-575-5009 or e-mail tic@engr.uark.edu.

**SPECIAL SCHOLARSHIPS AND CONDITIONS**

**ACT 1185**
Arkansas income taxpayers who earn a minimum of $5,500 in wages and, with their dependents, reside in a bordering state in a county or parish contiguous to an Arkansas county in which a public institution of higher education is located may enroll at the University of Arkansas and receive an out-of-state tuition award under the provisions of ACT 1185 of 1995, Section 34. The availability of funds may vary each year, and the students must provide certain documentation. Please contact the Office of Academic Scholarships at 479-575-4464 for more information.

**Arkansas Alumni Association Scholarships**
For information on Arkansas Alumni Association, see chart below.

**Music and Band**
The Department of Music offers scholarships (both music scholarships and band scholarships) for talented students who sing or play instruments. All scholarships are based on playing ability, academic achievement, and potential contribution to music department ensembles. Scholarships are renewable for up to five years (ten semesters), as long as the student meets the conditions specified on the scholarship letter or contract.

Music and band scholarships are available to music majors and to students majoring in other areas who participate in certain ensembles. All scholarships require an audition. To set up an audition, contact the music department at 479-575-4701 or the band office at 479-575-4100.

**Air Force and Army ROTC**
The Air Force and Army Reserve Officer Training Corps programs offer a number of scholarship opportunities for entering freshmen and on-campus students. See the Reserve Officer Training Corps section of this catalog for detailed information.

**Veterans Benefits**
The University of Arkansas is approved by the Arkansas Department of Education for veterans and veterans’ beneficiaries who are working toward a degree. Veterans of recent military service, service members, members of reserve units, and the dependents of certain other servicemen may be entitled to educational assistance payments under the following programs: Title 38, Chapter 30, Montgomery GI Bill for Veterans; Title 38, Chapter 32, Veterans Educational Assistance Program (VEAP); Title 38, Chapter 35, Survivors and Dependents Education; and Title 10, Chapter 106, Montgomery GI Bill for Selective Reserves.

Students must be working toward a degree and following the curriculum outline for their objectives, since only specific courses may be applied toward VA certification and graduation. Students eligible for educational benefits may contact the Office of the Registrar for further information.

Detailed information regarding stipends and housing is provided in the chapter “Reserve Officer Training Corps.”

<td>Renewable for up to 10 semesters with the completion of 24 hours and a cumulative 2.00 GPA per year.</td>
</tr>
</tbody>
</table>
All new undergraduate students, both freshmen and transfer, are expected to attend an orientation session preceding their enrollment. The orientation program is designed to introduce every aspect of the university community to our students, enabling them to establish a bond with the institution and those here to support them. A significant aspect of this experience will be to provide students with information about the policies, support systems, and resources of the University, while engaging them with their advisers in the appropriate academic programs. To this end, students should complete the orientation program prepared to register for classes and ready to embark upon their academic careers. Students who attend the orientation program register during that time.

**REGISTRATION**

Undergraduate students, including students not declaring a major, must enroll in one of six academic units: the J. William Fulbright College of Arts and Sciences; the Dale Bumpers College of Agricultural, Food and Life Sciences, the Sam M. Walton College of Business, the College of Education and Health Professions, the College of Engineering, or the School of Architecture. Information regarding registration periods and procedures is found on the Registrar’s Web site at http://www.uark.edu/registrar/.

**Registration Periods**

Students must register during one of the formal registration periods. Currently enrolled students are expected to register during the priority registration held each semester for the following semester. For additional registration periods check the Registrar’s Web site at http://www.uark.edu/registrar/. New students (freshmen and transfers) are expected to register during orientation. New students not already registered during orientation should register during the open registration period that immediately precedes the beginning of classes each semester. There is a late registration period of five days at the beginning of fall and spring semesters and a one- or two-day late registration period at the beginning of the summer sessions, but students may find that many classes are filled.

**Proper Address of Students**

It is the responsibility of all students to maintain and correct their addresses with the University and to report any change of address promptly to the Registrar’s Office at the Registrar’s Web site at http://www.uark.edu/registrar/. Failure to do so may result in undelivered official correspondence and announcements.

Many important announcements are sent to the students through University assigned e-mail accounts, which should be checked regularly.

**Identification Cards**

Identification cards are made by the Division of Student Affairs during each registration period and at the ID Card Office during the year. Several privileges on campus require an ID, and it can be used as a debit card for purchases at various locations throughout the campus. Part-time students are also eligible for a card.

**Academic Advising**

Academic advising is an active, ongoing exchange between adviser and student with the purpose of providing students information and direction to make their educational experience relevant, coherent, and meaningful. It is a process that helps students connect to the University, make thoughtful academic decisions, and maximize their educational opportunities. Informed and supportive academic advising is essential to the vision for a “student-centered research university serving Arkansas and the world.”

Procedures may vary among schools and colleges; however, all academic advising should demonstrate the following characteristics:

- Be a developmental and educational process that occurs over time;
- Be a collaborative effort to connect students to campus resources;
- Include consideration of individual students’ interests, abilities, and needs;
- Include recommendation of required and appropriate courses;
- Provide interpretation of University, college, and department rules and regulations;
- Support and make possible a student’s understanding of and progress toward meeting academic requirements;
- Provide for reasonable availability and accessibility of advisers to students;
- Make available general information regarding career options and opportunities, with appropriate referrals;
- Be based upon shared responsibilities of adviser and student, the adviser being responsible for making available timely and accurate advice, information, and referrals, and the student being responsible for acting upon the advice, information, and referrals to complete requirements for the chosen degree.

The University is committed to developing each student to his or her fullest potential. To this end, programs in each college have been established to improve the academic achievement and persistence of students on academic warning and other students in need of academic assistance. Such assistance is provided through a variety of instructional and informational services.
Arkansas State Requirements for Developmental Course Placement

Arkansas law specifies that all first-time entering freshmen enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or remedial courses in English composition, reading, and mathematics on the basis of their scores on specified tests.

- Students who score below 19 on the English section of the ACT or below 740 on the verbal score of the SAT must enroll in Remedial English 0003, which does not carry degree credit.
- Students who score below 19 on the reading section of the ACT or below 470 on the verbal score of the SAT must enroll in Developmental Reading CIED 0003, which does not carry degree credit.
- Students who score below 19 on the mathematics section of the ACT or below 460 on the quantitative portion of the SAT must enroll in Remedial Math 0003, which does not carry degree credit. However, students whose Mathematics Placement Test (MPT) scores qualify them for placement in a higher-level mathematics course, such as MATH 1203, may enroll in that course. Students will be required to register for these courses during their first term at the University and, if necessary, in subsequent terms until passing grades have been earned in all required courses. Students must successfully complete any required developmental course in English before degree credit for freshman English can be awarded. Students must successfully complete any required developmental course in mathematics before enrolling in a college-level mathematics course. Students who need further information or clarification regarding this law are encouraged to discuss this with their academic adviser or dean.

(The Mathematical Sciences Department requires higher ACT/SAT scores to be placed in a higher-level mathematics course. Please see the Course Descriptions for MATH for details)

Courses That Do Not Count Toward a Degree

The following courses do not count toward degree credit in any college or school: ANTH 0003, PHSC 0003, ENGL 0003, MATH 0003, and CIED 0003.

The following courses do not count toward any degree in the College of Engineering: MATH 1203 College Algebra, MATH 1213 Plane Trigonometry, MATH 1285 Pre-calculus Mathematics, and ENGL 2003 Intermediate Composition.

Registration for Grades of Pass-Fail

Students in some programs may register to take certain courses on a pass-fail basis. In such cases, a mark of “CR” (passed) or a grade of “F” (failed) will be recorded.

Students in the J. William Fulbright College of Arts and Sciences, the School of Architecture, and the Dale Bumpers College of Agricultural, Food and Life Sciences are eligible to enroll for certain courses on a pass-fail basis under the following conditions:

1. That such registration be approved by the student’s adviser.
2. That the student has attained sophomore rank or higher.
3. That the student is not on academic warning and has achieved a cumulative grade-point average of at least 2.00.
4. That such enrollment be limited to one course per semester.
5. That the total enrollment on a pass-fail basis be limited to no more than 18 hours in any student’s degree program.
6. That the courses involved are not part of the student’s major and are not specifically required as part of the student’s degree program.

7. Normally, registration for pass-fail credit will be completed prior to the final date for changing registration by adding a course. Grades for students enrolled on a pass-fail basis will be reported on final grade rosters in the usual manner. The dean’s office will review each report and will authorize the registrar to record “CR” or “F” on the student’s official academic record, as appropriate. The “CR” marks will not be counted in grade point averages but will increment hours earned; the “F” grade will be counted in the grade point average.

Students in the College of Education and Health Professions may enroll in courses on a pass-fail basis under the same conditions but only in courses offered by the Fulbright College of Arts and Sciences and the College of Education and Health Professions. Walton College of Business and College of Engineering students may not take courses on a pass-fail basis.

Undeclared Major

Degree-seeking students who are undecided about their choice of a major field of study will be considered to have an undeclared major. However, all undergraduate students must enroll in one of the colleges or schools. Each of these academic units makes provisions for undeclared majors, and each has its own rules concerning the point at which a student must declare a major. Again, academic advisers will be of great assistance in determining the college or school in which a student with an undeclared major should enroll.

Walton College of Business students have the pre-business classification with an intended major until they complete specific lower-division courses, a process that normally takes four semesters. Students entering the College of Engineering must declare an intended major. All engineering students are classified as pre-engineering students until they have satisfied the pre-professional program, which is normally completed during the freshman year.

Registration for Audit

Students wishing to audit a class should contact the instructor teaching that class and request permission to audit. If the instructor approves the audit, the academic department will register the student in that class as an audit. Auditing of a class is allowed on a space-available basis, and a student must pay fees for that class. The instructor shall notify the student of the requirements for receiving the mark of “AU” for the course being audited. The instructor and the student’s dean may drop a student from a course being audited if the student is not satisfying the requirements specified by the instructor. The student is to be notified if this action is taken. The only grade or mark that may be awarded is “AU.”

Adding and Dropping Courses

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students may also add or drop courses during the first five class days of a major semester. Students who drop classes by the end of the first week of classes in the fall and spring will have their fees adjusted. (Refer to the Treasurer’s Office Web site for summer dates). Fee adjustments are not done for classes dropped after the first week of class. Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. The two functions have different fee adjustment policies. Fee adjustment deadlines for official withdrawal are noted below.

A student may drop a course during the first 10 class days of a major semester without having the drop shown on the official
Orientation and Registration

after the first 10 class days, and before the drop deadline of the semester, a student may drop a course, but a mark of “W,” indicating the drop, will be recorded. A student may not drop a full-semester course after the Friday of the tenth week of classes in a semester. Drop-add deadlines for partial semester courses and summer classes are listed on the schedule of classes Web site.

Withdrawal from Registration

Withdrawal from the University means withdrawing from all classes that have not been completed up to that time. A student who leaves the University voluntarily before the end of the semester or summer term must complete an exit interview and then drop all classes on the student registration system or notify the Office of the Registrar in writing. Withdrawal may occur anytime during the semester through the last day of classes. Withdrawal deadlines for summer sessions are listed in the summer schedule of classes; summer withdrawals do not require an exit interview. Students who do not withdraw officially from a class they fail to complete will receive an “F” in that class. Students with holds on their registration should contact the Office of the Registrar for assistance in processing their official withdrawal from the University.

The deadline for a full fee adjustment for an official withdrawal is the day before the start of classes for that term. After that date a $45.00 withdrawal fee will be charged, and a percentage of the fees will be refunded. Refer to the Treasurer’s Office Web site for the deadlines and percentages.

Course Loads

While University offices and services typically recognize the full-time status of students who have enrolled for a minimum of 12 semester hours, students should bear in mind that this minimum number of hours is insufficient to allow them to complete a four-year degree program in eight academic semesters (four years). Since most University degree programs require a minimum of 124 semester hours, or 31 hours per year, a student should earn 15 to 16 hours per semester to complete most degree programs in four years (eight semesters).

Number of Hours Allowed Per Semester

1. Students who wish to carry more than 18 hours per semester must first obtain the permission of their academic deans).
2. Students who wish to carry more than 21 hours per semester must first request and receive favorable action from the Academic Standards Committee.
3. Students on academic warning may not carry more than 12 hours per semester.
4. Students on academic suspension who choose the limited enrollment option may not carry more than 9 hours for that semester.
5. Students who wish to exceed the normal summer school load must have the approval of their academic deans) to take seven hours in five- or six-week sessions or 13 to 14 hours in 10- or 12-week sessions. Students who wish to take more than seven hours in one five- or six-week session or more than 14 hours in one 10- or 12-week session must first receive favorable action from the Academic Standards Committee.
6. For disabled students, less than 12 hours may be certified as full-time with the approval of the appropriate dean and the concurrence of a physician or a licensed examiner.

STUDENT STANDING

Fee and Cost Estimates for 2005-06

Educational expenses will vary according to a student’s course of study, personal needs, and place of residence. All fees, charges, and costs quoted in this catalog are subject to change without notice. A survey tool for tuition and fee estimation is available at http://avcf.uark.edu:81/TuitionCalc/.

Financial obligations to the University must be satisfied by the established deadlines. Payment may be made at the University Cashier’s Office in the lobby of Silas H. Hunt Hall by cash, personal check, money order, certified check, or VISA, MasterCard, or Discover credit cards. Payment may also be made via the World Wide Web. To make payments online go to ISIS at https://isis.uark.edu/. Payment options are available on the “finances” page.

Acceptance of payment for fees does not imply academic acceptance to the University.

ESTIMATED NECESSARY EXPENSES PER SEMESTER

Estimates of necessary expenses for one semester of the 2005-2006 academic year for a typical undergraduate student taking 15 credit hours per semester at the University of Arkansas:

<table>
<thead>

</tr>
</tbody>
</table>

Other variable costs per year:
* Books, supplies, and lab fees $923.00
* Personal expenses and travel $3,005.00

When paying tuition, room and board, and associated fees, anticipated financial aid for a current semester may be deducted when adequate documentation is provided to the University Cashier’s Office in Silas H. Hunt Hall. Adequate documentation includes, but is not limited to, award notices, guarantee notices, scholarship letters, and promissory notes.

The latest information regarding costs and other aspects of University life may be obtained by calling or writing the Office of Admissions, 200 Hunt Hall, University of Arkansas, Fayetteville, AR 72701. In Arkansas call 1-800-377-8632; from outside of Arkansas call (479) 575-5346.

TUITION FEES

Students classified as “in-state” for fee payment purposes are assessed tuition fees. Students classified as “out-of-state” for fee payment purposes are assessed additional tuition fees.

Official policies of the University of Arkansas Board of Trustees provide the basis for classifying students as either “in-state” or “out-of-state” for purposes of paying student fees. Board policies relating to residency status for fee payment purposes are included in Appendix A of this catalog. Out-of-state students who question their residency classification are encouraged to contact the Office of Admissions, 200 Silas H. Hunt Hall, for more information about residency classification review procedures.

Academic Year

Undergraduate students are assessed tuition fees of $145.38 per credit hour. Students with out-of-state residency status are assessed additional tuition fees of $257.58 per credit hour.

Summer Sessions

Undergraduate students are assessed tuition fees of $145.38 per credit hour. Undergraduate students with out-of-state residency status are assessed additional tuition fees of $257.58 per credit hour.

1. Students enrolled in the Walton College of Business courses are charged differential tuition at $20.35 per credit hour more than standard undergraduate, in-state tuition. Architecture students charged a differential tuition of $7.27.

2. University fees include the following:
   - Arkansas Assessment of General Education fee $5.10
   - Health, physical education and recreation fee 49.20
   - Student Health Center debt fee 12.75
   - Enhanced Learning Center 13.50
   - and the following student-initiated and student-approved fees:
     - Student Activity fee 12.75
     - Student Health fee, calculated at $6.40/credit hour, 96.00
     - Associated Student Government fee 9.00
     - Media fee 10.35
     - Arkansas Union fee, calculated at $2.57/credit hour, 38.55
     - Fine Arts Activity fee 9.00
     - Technology fees are calculated at $2/credit hour 30.00
     - Transit fee 30.60
     - Network Infrastructure and Data Systems fee calculated at $6.25/credit hour, 93.75
     - Safe Ride fee 3.30
     - Distinguished Lecture fee 6.75

3. Teaching Equipment and Laboratory Enhancement (COLG) fee. This figure reflects the per credit hour undergraduate fee for the College of Arts and Sciences. To obtain the per credit hour undergraduate fee for all colleges, view the Tuition Rate Schedule at http://avcf.uark.edu/treaweb/rateschedule.asp

4. Weighted average expenses for living in a residence hall, double occupancy, with an unlimited meal plan. Actual room and board fees vary from $2,738 to $2,900 per semester.

FEE ADJUSTMENTS

Academic Semesters and Summer Sessions

Students who officially withdraw (dropping ALL classes that have not been completed up to that time) from the University of Arkansas during the regular fall or spring semesters receive a cancellation of fees (see chart below), less an Administrative Withdrawal fee of $45. Students who officially withdraw from a summer session or who drop classes in the summer also receive a cancellation of fees (see chart below).

Late Fees

Students who register for the fall 2005 and spring 2006 semesters are required to pay all registration-related fees and housing charges by the posted payment deadline. Students who fail to pay all registration fees and housing charges or who execute an installment payment plan by the deadline may be assessed a late payment fee equal to the outstanding balance, not to exceed $50.00.

Any student with an outstanding balance, to include registration-related fees and/or housing charges, by the last payment deadline will be assessed a late payment fee equal to the outstanding balance, not to exceed $50.00.

Disbursement of Refund Checks

Disbursement of refund checks due to overpayments by scholarships, loans, and/or grants will be mailed approximately five (5) days prior to the start of classes. Checks will be mailed to the student’s permanent address unless a check address has been established with the student accounts office.

Addresses

Students may create a billing address, which will be used specifically for billing statements, and a check address, which will be used specifically for overpayment checks. These addresses may be created in addition to the local and permanent addresses. If a billing or check address is not created, the default address will be the permanent address. The student may pick up an address form in the Student Accounts Office, Hunt Hall 101 or change their address on the ISIS Web site in Student Accounts Self Service.

WAIVER OF TUITION AND FEES FOR SENIOR CITIZENS

Students who are 60 years of age or older and show proper proof of age may have tuition and fees waived. This waiver is limited to credit courses. Admission and enrollment under these conditions is open only on a “space available” basis in existing classes. Enrollment during Priority Registration periods is not allowed.

ROOM AND BOARD

University Housing

(Rates are subject to change)

Single freshmen under 21 years of age are required to live in University residence halls, fraternity or sorority houses, or with their parents, unless permission to live off-campus has been obtained through University Housing. Permission to reside off-campus is granted on a semester basis and must be obtained prior to enrolling or prior to the semester in which off-campus residency is desired.

Costs of room and board in University residence halls for one semester during the 2005-2006 academic year range from $2,738 to $2,900 for double occupancy rooms and with an unlimited meal plan. Single rooms are additional and are available on a first-come, first-serve basis. There is an additional $27.50 laundry run-free operation fee for residence hall tenants.

Housing for married students, students with family status, non-traditional, graduate, and law students is limited and requires early application. Carlson Terrace, two-bedroom, unfurnished units with utilities paid cost $445 per month.

Summer rates for room in University residence halls during summer sessions are $22.74 per day for a single. Charges start on the requested move-in day and run through the date of check-out.
Specific questions concerning on-campus living or meal plans may be directed to University Housing (479) 575-3951. Specific questions concerning fraternity and sorority living may be directed to the Office of Greek Affairs (479) 575-5001.

Off-Campus Housing

Students eligible to live off-campus may contact local real estate offices for rental information and availability.

OTHER GENERAL FEE INFORMATION

Checks tendered to the University are deposited immediately. The University does not accept postdated checks. Checks returned for “insufficient funds” (NSF checks) are generally presented for payment only once. Each check returned by a bank for any reason will be assessed a returned check fee. The University may, at its discretion, verify available bank funds for any checks written for payment of indebtedness before accepting a check.

The University of Arkansas reserves the right to withhold transcripts or priority registration privileges, to refuse registration, and to withhold diplomas for students or former students who have not fulfilled their financial obligations to the University. These services may also be denied students or former students who fail to comply with the rules governing the audit of student organization accounts or to return property entrusted to them.

Requests for exceptions to University’s fees, charges, and refund policies must be made in writing. Instructions for submitting requests for exceptions to the various fees, charges, and refund policies of the University may be obtained as follows:

For residence life and dining services fees, charges, and refund policies contact University Housing, Attention: Assistant Director for Business, Hotz Hall, 9th floor, (479) 575-3951.

For parking services fees, charges, and refund policies contact Parking and Transit, Administrative Services Building, 155 Razorback Road, (479) 575-3507.

For other fees, charges, and refunds, contact the Treasurer’s Office, 215 Administration Building, Attention: Treasurer, (479) 575-5651.

Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

Students are allowed to have automobiles at the University, although parking is quite limited. There is a parking permit and registration fee ranging from $38.85 to $305.55 for each vehicle, depending upon the parking option selected.

STUDENT RESIDENCE STATUS FOR TUITION AND FEE PURPOSES

Board Policy 520.8 (January 18, 1985, revised)

Determination of Residence Status

1. Purpose

The purpose of these regulations is to enable the administrative officers of the University of Arkansas to classify students for the purpose of paying student fees, as either “in-state” or “out-of-state,” so as to accord fairness and equity to the students of the University and to the public that provides support for the educational services provided by the University.

2. Initial Classifications

a. A student shall be admitted to the University in an “in-state” or “out-of-state” status for university fee purposes, as established under these regulations.

b. A bona fide domicile is a home of apparent true, fixed, and permanent nature, a place of actual residing for all purposes of living that may be distinguished from a temporary sojourn in this state as a student. The person claiming domicile in Arkansas must provide evidence of permanent connection with the State of Arkansas and demonstrate the expectation of remaining in this state beyond graduation. For purposes of implementing these policies, the Administration is directed to articulate standards that will be applied in making the determination of residence.

c. Except as otherwise provided under these regulations, the domicile of an adult (18 years of age or older) or emancipated minor student shall be determined on the basis of his or her own domicile.

d. Except as otherwise provided under these regulations, the domicile and residence of an unemancipated minor student (less than 18 years of age) or an unmarried dependent who has not attained the age of 23 is legally that of the parents or surviving parent; or such other person legally standing in the place of a parent to the student and with whom the student in fact makes his or her home and who has been making substantial contributions to the support of the student for at least six consecutive months prior to the term or semester for which fees are paid.

f. The responsibility for registering under a proper classification for student fee purposes is placed upon the student. It is the duty of each student at each time of registration to call any question about residency classification status to the attention of the campus classification review officer in a timely fashion in order that the question may be settled (see IV Procedures).

g. The six-month period required in paragraph A of these regulations may be waived for persons, their spouse, and their unmarried children who have not yet attained the age of 23 (dependents are the spouse and unmarried children who are legal dependents as defined by the IRS) and who move to Arkansas with attendance at the University only a by-product of the primary purpose of establishing domicile in this state.

h. An unmarried student who has not reached the age of 23 years having one parent residing in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) may be considered an “in-state” student for fee purposes, even if that student resided outside the state with the other parent before coming to Arkansas to attend the University.

i. Marriage is recognized as emancipation for both females and males.

j. The spouse of a person continuously domiciled in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) upon request shall be classified as “in-state” for fee purposes.
3. Reclassifications
   a. The initial classification of a student will not prejudice a different classification for following terms or semesters. However, a student’s prior domicile is assumed to continue until he or she clearly establishes a new domicile in Arkansas (see 4. Procedures).

   b. A student previously classified as “out-of-state” may be reclassified as “in-state” for fee purposes if he or she has established a bona fide domicile in Arkansas and has resided continuously in this state in that bona fide domiciliary status for at least six consecutive months prior to his or her reclassification by the University. In order for an adult or an emancipated minor to establish a bona fide domicile in Arkansas for fee purposes, he or she must have left the parental home, must have established in this state a home of a permanent character as manifested objectively by good faith acts, and must have the expectation of remaining in this state beyond graduation. The single fact of presence in Arkansas for at least six months of attendance as a student enrolled in the University of Arkansas, or any other educational institution, neither constitutes nor necessarily precludes reclassification as one domiciled in Arkansas, but will be a factor to be considered.

4. Procedures
   a. A student shall have the burden of establishing any claim that he or she is entitled to be treated as “in-state” for fee purposes. Persuasive evidence to that effect must be presented in writing and verified under oath by the student. Mere claims of local domicile and duration of stay are of little weight. A student who knowingly gives erroneous information in an attempt to evade the payment of “out-of-state” fees may be subject to dismissal from the University.

   b. All disputed classifications for student fee purposes, whether at initial enrollment or subsequent enrollments, and all disputed reclassifications will be decided initially on each campus by a classification review officer designated by each Chancellor.

   c. The Chancellor of each campus will designate a campus classification appeal officer to receive petitions from decisions made by the campus classification review officer. Each campus classification appeal officer may, in his or her discretion, make investigations, receive evidence, and conduct informal hearings. After considering the case, the campus classification appeal officer will render a decision and notify the affected student of the decision in writing. Any decision of the campus classification appeal officer may be appealed to the Vice President for Academic Affairs of the University of Arkansas System, who shall recommend final disposition to the President of the University.

   d. Written notice of the appeals procedure will be provided to each student raising a question about his or her status with the campus residency classification review officer.

   e. Determination of domicile will be based on a review of all pertinent facts, evidence, and circumstances that collectively show, in an objective and clear manner, the actual domicile of the student.

NOTE: In implementing these policies, it is presumed that dependent students who are classified as non-residents based upon parental/guardian domicile outside of Arkansas do not acquire Arkansas residency under Board of Trustees Policy 520.8 unless and until their parent(s)/guardian(s) have established a domicile in Arkansas, or the student has left the parental home and established a domicile in Arkansas evidenced by proof that he or she has established a home of a permanent character as manifested objectively by good faith acts, resided in Arkansas in bona fide domiciliary status for at least six consecutive months prior to his or her reclassification as an Arkansas resident, and demonstrates the expectation of remaining in this state beyond graduation.

---

Reclassification Deadlines

Students who have established a bona fide domicile in Arkansas following initial classification as a non-resident must request reclassification if they want their status recognized for fee purposes. Applications and appropriate documentation must be received by the Office of the Registrar no later than the fifth class day (second class day of a summer session) of the term for which in-state fee assessment is requested. Applications received after the deadline will be considered for the next term. All fees are to be paid by published due dates. Students who receive a favorable decision after payment will be provided a refund of out-of-state fees paid. Please direct questions about residence classification review procedures to the Office of the Registrar, 146 Silas H. Hunt Hall.

Resident Status of Native Americans

Native American people in other states belonging to tribes that formerly lived in Arkansas before relocation, and whose names are on the rolls in tribal headquarters, shall be classified as in-state students for tuition and fee purposes, on all campuses of the University of Arkansas. Tribes so identified include the Caddo, Cherokee, Chickasaw, Choctaw, Creek, Delaware, Kickapoo, Osage, Peoria, Quapaw, Shawnee, and Tunica.

Resident Status of Members of the Armed Forces and Their Dependents

(Board Policy 520.7, “Fees for Members of Armed Forces and Dependents.” Revised January 18, 1985)

Effective January 1, 1975, members of the Armed Forces who are stationed in the State of Arkansas pursuant to military orders, and their unemancipated dependents, shall be entitled to classification as in-state students for fee paying purposes (per Arkansas stat. Ann. 80-3366).

Persons continuously domiciled in Arkansas for at least 12 consecutive months who enter active military service from this state shall be classified as in-state students for fee paying purposes. This provision is forfeited if the military person does not return to Arkansas within twelve months after separation, discharge, or retirement from active duty.

Persons serving in active military service who demonstrate a change of bona fide domicile from another state to Arkansas at least twelve consecutive months prior to separation, discharge, or retirement from active military duty, and the dependents (the spouse and unmarried children who are legal dependents of the military person as defined by the IRS), shall be entitled to classification as in-state students for fee paying purposes. This provision is forfeited if the military person does not return to Arkansas within twelve months after separation, discharge, or retirement from active duty.

Resident Status of Students from Texarkana, Texas, and Bowie County, Texas

(Board Policy 520.10, Adopted November 16, 1984)

In accordance with the reciprocity agreement described in H.C.R. 32, signed by the Governor of Arkansas on February 12, 1965, Board Policy 520.10 states, “Residents of Texarkana, Texas and Bowie County, Texas, will be classified as in-state students for University fee purposes at the University of Arkansas.”
Academic Regulations

ARKANSAS ASSESSMENT OF GENERAL EDUCATION (AAGE) OR RISING JUNIOR EXAM

All undergraduates in Arkansas public institutions who have earned at least 45 hours of credit toward a degree are required to take the Arkansas Assessment of General Education Exam (AAGE), also known as the Rising Junior Exam.

Students transferring from other Arkansas institutions who have earned 45 or more transferable hours must take the exam during the first available test cycle, unless the student has documentation that the AAGE was completed at another college or university in Arkansas. The only students who are exempt from the AAGE requirement are those transferring at least 61 degree credit hours from out-of-state or private institutions.

Students who do not meet the AAGE requirement by the last day to register for classes will have their classes canceled for that semester.

Testing Services, 730 Hotz Hall, mails exam registration packets to a student’s local address. For more information on the AAGE, contact Testing Services at 479-575-2824.

(See also “Advanced Composition” on page 41.)

ACADEMIC HONESTY

(Campus Council, revised February 6, 1986)

Introduction

The University of Arkansas, Fayetteville, presents this policy as part of its effort to maintain the integrity of its academic processes. Academic honesty should be a concern of the entire University community, and a commitment to it must involve students, faculty, and administrators.

Students must understand what academic integrity is and what the most common violations are. With that understanding they must commit themselves to the highest standards for their own, as well as for their peers’, academic behavior.

Public support and encouragement of the faculty is a second critical component necessary to strengthen academic integrity on campus. Faculty members must be continually vigilant in the management of their classes, their assignments, and their tests.

Finally, the administration of the University must present to the students standards of academic integrity. Those standards must be part of a publicly recognized, understood, and accepted set of policies and procedures that can be applied consistently and fairly in cases of academic dishonesty.

It is the responsibility of each student, faculty member, and administrator to understand these policies. A lack of understanding is not an adequate defense against a charge of academic dishonesty.

With regard to the application of this policy, the University assures its support of faculty members and other employees of the University who are acting in good faith in the course and scope of their employment and in the performance of their official duties.

This policy is only a part of the University’s effort to promote academic integrity in all aspects of its programs. By necessity, this part discusses only prohibited acts and a process of applying sanctions. The ultimate goal, of course, is to provide an atmosphere that will make superfluous the procedures and sanctions that follow.

Definitions

Academic dishonesty involves acts that may subvert or compromise the integrity of the educational process at the University of Arkansas. Included is an act by which a student gains or attempts to gain an academic advantage for himself or herself or another by misrepresenting his or her or another’s work or by interfering with the completion, submission, or evaluation of work. These include, but are not limited to, accomplishing or attempting any of the following acts:

1. Altering of grades or official records.
2. Using any materials that are not authorized by the instructor for use during an examination.
3. Copying from another student’s paper during an examination.
4. Collaborating during an examination with any other person by giving or receiving information without specific permission of the instructor.
5. Stealing, buying, or otherwise obtaining information about an examination not yet administered.
6. Collaborating on laboratory work, take-home examinations, homework, or other assigned work when instructed to work independently.
7. Substituting for another person or permitting any other person to substitute for oneself to take an examination.
8. Submitting as one’s own any theme, report, term paper, essay, computer program, other written work, speech, painting, drawing, sculpture, or other art work prepared totally or in part by another.
9. Submitting, without specific permission of the instructor, work that has been previously offered for credit in another course.
10. Plagiarizing, that is, the offering as one’s own work the words, ideas, or arguments of another person without appropriate attribution by quotation, reference or footnote. Plagiarism occurs both when the words of another (in print, electronic, or any other medium) are reproduced without acknowledgement or when the ideas or arguments of another are paraphrased in such a way as to lead the reader to believe that they originated with the writer. It is the responsibility of all University students to understand the methods of proper attribution and to apply those
Academic Regulations

principles in all materials submitted.
11. Sabotaging of another student’s work.
12. Falsifying or committing forgery on any University form or document.
13. Submitting altered or falsified data as experimental data from laboratory projects, survey research, or other field research.
14. Committing any willful act of dishonesty that interferes with the operation of the academic process.
15. Facilitating or aiding in any act of academic dishonesty.

Procedures

Sanctions for acts of academic dishonesty may be applied in the following ways:

A. Instructor Action

When an instructor determines or believes that a student in the instructor’s class is guilty of academic dishonesty deserving of sanction, the instructor should within five working days follow one of the following: (If the instructor is either a graduate teaching assistant or a temporary faculty member, then a supervising faculty member or the departmental head or chairman may assist in the handling of an academic dishonesty case.)

1. The instructor may determine a grade sanction and within five working days report that sanction, along with the essential details of the incident, to the judicial coordinator in Student Affairs. There is, under these circumstances, no request for administrative or judicial action. The student sanctioned in this way and instructor will be notified by Student Affairs and will have five working days from that notification to request a hearing by the All University Judiciary (AUJ) as outlined in Section 2 below. If the student does not request a hearing within five working days, then it is assumed that the sanction is not contested. The student will be required to have a conference with the judicial coordinator so that the consequences of the action can be made clear.

During the course of the hearing, the student’s participation in the affected class should continue so that any action can be reversed without prejudicing the student’s academic performance and evaluation. Should the hearing process not support the grading sanction applied by the instructor, then the instructor and student may agree and remedy the sanction with the student proceeding in the class without prejudice. If the instructor and the student cannot agree, or if the grading sanction cannot be remedied, then the student may appeal via the Academic Appeal Structure for Undergraduate Students.

If the defense of any grade is based on alleged academic dishonesty and the faculty member has not followed the University policy, the ability of the faculty member to defend his or her action may be adversely affected.

2. The instructor may file an incident report form referring the case to the judicial process for determination of guilt or innocence and the application of sanctions. If the student is determined to be guilty of academic dishonesty, then the instructor may apply a grade sanction in addition to whatever sanctions are applied by the judicial process. While such a case is pending in the judicial process, the student’s participation in the affected class should continue to avoid pre-empting the options available after the guilt or innocence is determined. This course of action is appropriate in cases where there is doubt about guilt or innocence or in cases where the offense deserves sanctions beyond the grading system.

B. Judicial Process

If the instructor chooses to refer the case to the judicial process as outlined in A.2 or if another student, faculty member, or administrator wishes to charge a student with academic dishonesty, the following procedures will be followed:

1. Administrative Action. This would involve the application of a sanction or an admonition or some type of probation following established guidelines by the judicial coordinator after an incident has been reported by a faculty member, an administrator, or a student. Such action may be appropriate in cases where there is little or no disagreement as to the details of the reported incident. Administrative sanctions may be appealed by any party in the incident to AUJ within three working days of notification of the administrative action.

2. All-University Judiciary (AUJ). This involves application of sanctions for academic dishonesty after the case has been heard and decided by AUJ. This would be used in contested cases, cases of appeals of instructor or administrative actions, any case involving a student with a previous record of academic dishonesty or who previously received a grade sanction for academic dishonesty, and in cases where the sanction could result in suspension or expulsion from the University. The procedures involved in AUJ action are available from Academic Affairs or Student Affairs.

Any action of AUJ may be appealed within five working days through the Vice Chancellor for Academic Affairs to the Chancellor of the University. If the Chancellor discovers evidence previously unavailable to AUJ, then the Chancellor may explain in writing to the Chair of AUJ and ask that AUJ rehear the case.

Sanctions

The choice of sanctions in cases of academic dishonesty always involves consideration of the integrity of the educational process of the University. There is no place in that process for academic dishonesty, and if a student is undermining the integrity of that process, then separating that student from the University is the natural sanction. The intent of this policy is to make acts of academic dishonesty clear risks – that is, the sanctions are to be sufficiently heavy to deter academic dishonesty. Thus, the application of a grade sanction as the only sanction is to be very carefully considered and should occur only in unusual cases.

The following are possible sanctions for academic dishonesty:

1. Grading Sanctions. An instructor may apply grading sanctions. Such sanctions may also be recommended by either the judicial coordinator in case of administrative action or by AUJ, but the final decision will be that of the instructor. Grade sanctions may consist of either grades of zero or failing grades on part or all of a submitted assignment or examination, or a lowering of a course grade, or a failing grade. All grade sanctions must be appropriately reported as outlined in the procedures above. A grade sanction may be appealed by the student via the Academic Appeal Structure for Undergraduate Students.

2. Admonition or Probation. These are applied by either administrative action or AUJ action. The types:
   a. Admonition. This is a firm warning against future violations, filed in the office of the judicial coordinator.
   b. Conduct Probation. This is a probation imposed for a specified period and constitutes a final warning and a second chance to demonstrate what has been learned and to show improved judgment.
   c. Personal Probation. This is a probation imposed for a specified period and constitutes a final warning of more severe sanctions. This requires the student to meet periodically with a University official to discuss and explore alternatives to the kind of behavior that resulted in the sanction.
   d. Disciplinary Probation. This is probation imposed for a specified period and constitutes a warning that affects the student’s good standing in the University. Violations of regulations during the period are likely to result in suspension or expulsion.
During the period, the student is no longer to hold campus offices, receive honors, or represent the University in extracurricular or intercollegiate activities.

e. Educative Sanctions. These include a variety of assignments, tasks, or experiences that should make the offender more aware of the nature of the general problem of academic dishonesty. These may be applied in conjunction with any admonition or probation.

3. Suspension. Suspensions for a specified period of time from the University may be recommended by AUJ. Such suspensions may be for the remainder of a semester or for a specified number of semesters. In cases of clearly premeditated cheating or cases where either illegal actions or conspiracy with others is involved, suspension for at least the remaining part of a semester or one full semester must be considered as a sanction. Also, suspension will normally be the minimal sanction in cases where a student is guilty of academic dishonesty for a second time.

4. Expulsion. Expulsion from the University for an indefinite period of time may be recommended by AUJ.

Implementation and Review

For details of procedures for implementing this policy, contact the Office of the Vice Chancellor for Academic Affairs. This University policy does not preclude the implementation by colleges of policies determined by the Vice Chancellor to be more rigorous.

TERM PAPER ASSISTANCE

(Campus Council, March 26, 1987)

The use of services of term paper assistance companies is a violation of University policies on academic integrity. Student submission of such research or term papers to meet requirements of any class or degree program is expressly prohibited and constitutes academic dishonesty. Any violation of this prohibition will automatically result in both punitive action by the instructor (e.g., the award of a grade of “F” for the course) and a referral of each violation to the All-University Judiciary Committee for its consideration.

ATTENDANCE

Education at the university level requires active involvement in the learning process. Therefore students have the responsibility to attend classes and to actively engage in all learning assignments or opportunities provided in their classes. Instructors have the responsibility to provide a written policy on student attendance that is tied to course objectives included in a course syllabus. There may be times, however, when illness, family crisis, or University-sponsored activities make full attendance or participation impossible. In these situations students are responsible for making timely arrangements with the instructor to make up work missed. Such arrangements should be made in writing and prior to the absence when possible.

Examples of absences that should be considered excusable include those resulting from the following: 1) illness of the student, 2) serious illness or death of a member of the student’s immediate family or other family crisis, 3) University-sponsored activities for which the student’s attendance is required by virtue of scholarship or leadership/participation responsibilities, 4) religious observances (see UA Religious Observances policy below), 5) jury duty or subpoena for court appearance, and 6) military duty. The instructor has the right to require that the student provide appropriate documentation for any absence for which the student wishes to be excused.

RELIGIOUS OBSERVANCES

(Campus Faculty, November 15, 1995)

Although Christian religious holidays are reflected to some extent in the academic calendar of the University, holidays of other religious groups are not. When members of other religions seek to be excused from class for religious reasons, they are expected to provide their instructors with a schedule of religious holidays that they intend to observe, in writing, before the completion of the first week of classes. The Schedule of Classes should inform students of the University calendar of events, including class meeting and final examination dates, so that before they enroll they can take into account their calendar of religious observances. Scheduling should be done with recognition of religious observances where possible. However, faculty members are expected to allow students to make up work scheduled for dates during which they observe the holidays of their religion.

FINAL EXAMINATION POLICY

(Campus Council, revised November 16, 1989)

It is the policy of the University to minimize student participation in extracurricular activities during the final examination period. No meetings, social activities, athletic events, or other extracurricular activities that require student participation will be scheduled on Dead Day or during the final examination period. Any exceptions to this policy must receive prior approval from the Provost/Vice Chancellor for Academic Affairs.

GRADES AND MARKS

Final grades for courses are “A,” “B,” “C,” “D,” and “F” (except for courses taken in the School of Architecture and the College of Agricultural Food and Life Sciences).

<table>
<thead>
<tr>
<th>GRADES AND MARKS</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>CR</td>
</tr>
<tr>
<td>S</td>
</tr>
<tr>
<td>W</td>
</tr>
</tbody>
</table>

No credit is earned for courses in which a grade of “F” is recorded. A final grade of “F” shall be assigned to a student who is failing on the basis of work completed but who has not completed all requirements. The instructor may change an “F” so assigned to a passing grade if warranted by satisfactory completion of all requirements. Students who fail to present an acceptable reason for not having completed all course requirements including the final examination will receive the grade they would have received had they failed such requirements.
A mark of “I” may be assigned when a legitimate good cause has prevented the student from completing all course requirements, and the work completed is of passing quality. It is the discretion of the instructor that determines what qualifies as a legitimate good cause. It is recommended that the instructor, prior to the assignment of an “I” mark, document the legitimate good cause and conditions for completing course requirements. An “I” so assigned may be changed to a grade provided all course requirements have been completed within 12 weeks from the beginning of the next major semester (excluding summer semesters) of the student’s enrollment after receiving the “I.” If the instructor does not report the grade within the 12-week period, the “I” shall be changed to an “F.” When a mark of “I” is changed to a final grade, the grade points and academic standing are appropriately adjusted on the student’s official academic records.

A mark of “AU” (Audit) is given to a student who officially registers in a course for audit purposes (see Registration for Audit).

A mark of “CR” (Credit) is given for a course (for example, practice teaching, certain seminars, certain honors colloquia, and courses where credit is earned by examination) for which the University allows credit toward a degree, but for which no grade points are earned.

A mark of “S” (Satisfactory) is assigned in courses such as special problems and research when a final grade is inappropriate. The mark “S” is not assigned to courses or work for which credit is earned (and thus no grade points are earned for such work). If credit is awarded upon the completion of such work, a grade or mark may be assigned at that time, and, if a grade is assigned, grade points will be earned.

A mark of “W” (Withdrawal) will be given for courses from which students withdraw after the first 10 days of the semester and before the drop deadline of the semester.

“I,” “AU,” “CR,” “S,” and “W” marks will not be counted in the grade-point average. Grades of plus and minus are assigned grade-point values in the College of Agriculture (page 66) and School of Architecture (page 89). The grade-point average is computed by dividing the total number of grade points by the total number of credit hours attempted in courses for which grades (rather than marks) are given. Students who utilized grade renewal in retaking courses (prior to Fall Semester 1986 and after Fall 1996) have only the last grade used in computing grade-point averages.

### UNDERGRADUATE GRADE FORGIVENESS POLICY

(Campus Council, April 11, 1996)

Under the Grade Forgiveness Policy, a student may improve the undergraduate cumulative GPA by repeating a maximum of two courses (up to nine hours) in which a grade of “D” or “F” was received and requesting that the repeat grade be the only one that is counted in the calculation. Only two such requests are available to any student in his or her undergraduate career. The repeated grade must be in the same course taken at the University of Arkansas, Fayetteville. Only a course in which a grade of “D” or “F” was earned may be repeated under the Forgiveness Policy. Grade forgiveness may not be used to replace a grade assigned as a result of academic dishonesty. The student must file a written petition to use grade forgiveness indicating which course(s) he/she chooses to grade renew: the petition must be completed and approved prior to graduation.

Both attempts at the course will remain on the transcript, but only the second will be used to calculate both credit and GPA. The first attempt and the grade earned will be recorded on the transcript with the symbol “R” to denote that it has been repeated. Students considering grade forgiveness should be aware that many graduate schools, professional schools, employers or other institutions, in considering admission or employment, recompute the GPA and include all courses attempted even though a course was repeated. This means that if the cumulative GPA has been raised because of grade renewal, the recomputed GPA will be lower.

### SEMESTER HONOR ROLL

The colleges of the University publish, after the close of each semester, an honor roll of the highest ranking students in the college containing the names of not more than 10 percent of the undergraduate students of each class. Students are eligible for the honor roll if they are carrying at least 12 semester hours normally required for graduation by their college for their respective year. Most colleges refer to this part of the honor roll as the Dean’s List.

In addition, a Chancellor’s List is published each semester which recognizes those undergraduate students who achieve a 4.00 grade-point average. Students must also be carrying at least 12 semester hours normally required for graduation to be eligible for the Chancellor’s List.

For honor roll eligibility, the 12 semester hours must all be in courses for which grade points are earned.

* No student may be suspended who has not spent the prior term of enrollment on academic warning.
** No student may be dismissed who has not been suspended during a prior term of enrollment.
*** Following Suspension and Following Dismissal
FIRST-RANKED SENIOR SCHOLARS

A first-ranked senior scholar shall be recognized at the annual Commencement of the University of Arkansas, Fayetteville. The scholar or scholars so recognized must have a cumulative grade-point average of 4.00 on all course work completed at the time selection is made, must have applied for graduation for a semester to be a member of the appropriate class and must have completed all courses required for the baccalaureate degree at the University of Arkansas, Fayetteville, or in a program of study approved by the Director of Honors or other designee in the college in which the student is enrolled. In determining the cumulative grade-point average for the purposes of such awards, grade forgiveness, is not accepted.

SENIOR SCHOLAR

Since 1941 a key has been awarded to the graduating senior from each undergraduate college who has the highest grade-point average and who has completed at least half of his or her degree work at the University of Arkansas. The keys are awarded during the Honors Banquet.

ACADEMIC PROGRESS, SUSPENSION, AND DISMISSAL

(Vice Chancellor for Academic Affairs, June 8, 2000)

A student’s academic standing in the University is determined at the end of each term of enrollment (fall, spring, or summer) on the basis of the student’s cumulative and/or term grade-point average (GPA) and number of hours earned. See the chart below for the required performance levels. The student’s academic standing governs his or her re-enrollment status and determines any conditions associated with re-enrollment or denial of enrollment for a subsequent term. Normally, students will be notified of their standing individually by the University shortly after the end of each term. However, this policy statement is the formal notification to all students of the conditions that determine academic standing and the consequences for each term, regardless of individual notification.

Good Standing: Upon initial admission and during a student’s first term of enrollment, except for transfer students, the student is in good standing. (The standing of a transfer student reflects the student’s prior record and the status assigned upon admission). A student remains in, or returns to, good academic standing at the end of any term when the cumulative GPA is at or above the required minimum.

Academic Warning: When a student’s cumulative GPA falls below the minimum required for good standing, the student will be put on academic warning. This status is not recorded on the student’s permanent academic record and will not appear on transcripts. A student who enrolls for a term on academic warning may take no more than 12 hours (unless more are approved by the student’s adviser and dean). To continue for one or more additional terms on academic warning, the student must earn a term GPA at or above the cumulative GPA required for good standing. The student’s academic standing will remain in, or return to, good standing until the cumulative GPA is at or above the required minimum for good standing unless the student becomes subject to academic suspension by failing to earn the required term GPA.

Academic Suspension: A student on academic warning who does not earn the minimum required term GPA will be suspended from full-time enrollment. No student may be suspended who has not spent the prior term of enrollment on academic warning. A student on academic suspension has two alternatives: limited enrollment or academic leave of one year from the University.

Students who choose limited enrollment may enroll for up to nine hours of on-campus or Independent Study course work (as approved by the student’s adviser and dean) and must earn at least six hours of credit with grades of C or higher in all courses taken. A student who meets these conditions may enroll for a subsequent term on academic warning following suspension.

Students who choose academic leave may apply for readmission one year after the term of the suspension. A student who does not earn credit from another institution will be readmitted on academic warning following suspension. A student who earns credit from another institution(s) during or subsequent to the year of suspension must apply to the University for admission as a transfer student and will be granted academic standing consistent with transfer admission policy and the student’s record.

Academic Warning Following Suspension: A student on academic warning following suspension may take no more than 12 hours (unless more are approved by the student’s adviser and dean) and must earn a term GPA of 2.00 or higher for each term of enrollment until the student’s cumulative GPA is at the level required for good standing. Failure to satisfy these requirements will result in dismissal.

Academic Dismissal: A student on academic suspension or academic warning following suspension who does not earn a term GPA of 2.00 or higher and satisfy all other requirements associated with his or her status will be dismissed from the University. A student who has been dismissed may be readmitted only upon action of the Academic Standards Committee. Course work taken through Independent Study while under dismissal may be submitted to the committee as evidence of academic competence. If readmitted, the student may receive degree credit for such course work.

Academic Warning Following Dismissal: A student who enrolls subsequent to an initial dismissal and following favorable action of the Academic Standards Committee is placed on academic warning following dismissal and may take no more than 12 hours (unless more are approved by the student’s adviser and dean) and must earn a term GPA of 2.00 or higher. Failure to satisfy these requirements will result in a second academic dismissal. A second dismissal is for five years, after which a student must apply for readmission to the University and may also apply for Academic Bankruptcy. Individual colleges or programs have the discretion to set academic admission and continuation standards for specific programs that are higher than University standards.

REQUIREMENTS FOR GRADUATION

University Core Requirements (See page 40)

The University of Arkansas has adopted a “State Minimum Core” of 35 semester-credit-hours of general education courses that are required of all baccalaureate degree candidates. This is in compliance with Arkansas Act 98 of 1989 and the subsequent action of the Arkansas State Board of Higher Education. Beginning in the fall semester of 1991, all state institutions of higher education in Arkansas have a 35-hour minimum core requirement with specified hours in each of six academic areas. The University has identified those courses that meet the minimum requirement, and they are listed in the table on page 40.

Students should consult the requirements for specific colleges and programs when choosing courses for use in the UA University Core.

Rationale for U of A General Education Core

In order to prepare its students for lives of the highest individual quality and the greatest potential contribution to the making of a better world, the University of Arkansas has developed a comprehensive program of general education. Although the basic skills, knowledge, methodologies, and judgments derived from experience in the core area set forth here may provide the basis for a major of professional concentration, the aims of these core requirements are not career

### Footnotes

- Footnotes are on page 41.
specific. Rather, the following areas are designed to develop the tools for critical thinking and effective communication, an understanding of our richly diverse human heritage, the flexibility to adapt successfully to a rapidly changing world, a capacity for lifelong learning, and an enthusiasm for creativity.

A chart showing the General Education Core curriculum for the University of Arkansas can be found on page 40.

**English/Communication (6 hours)**

Courses offered in this area are designed to develop the ability to organize ideas and to communicate them in grammatically correct written English with clarity, precision, and syntactical maturity.

**Fine Arts/Humanities (6 hours)**

Courses presented in this area are drawn from the study of human thought, emotion, values, culture, and aesthetics. They are designed to develop the capacity for reflection, an appreciation of our own diverse culture and a tolerance of those foreign to us, and a heightened aesthetic and ethical sensibility. The courses are not performance-based, but offer students a basis for the gradual acquisition of broad cultural literacy.

**Mathematics (3 hours)**

Courses offered in this area are designed to develop the student’s ability to understand the diverse mathematical concepts that shape our increasingly technical culture. Core mathematics courses presuppose the ability to apply mathematical techniques at the level of high school algebra and geometry. The specific course(s) selected will depend upon each student’s curriculum, but no course below college algebra may be used to fulfill core requirements.

---

**Footnotes for the State Minimum Core on page 40:**

2. Some students majoring in math, engineering, science and business may be required to take a higher math as part of the State Minimum Core.

3. Some students majoring in math, engineering, science, education and health-related professions may be required to take higher or specific science courses as part of the State Minimum Core.

4. Some students majoring in engineering may be required to take either six hours of humanities or social sciences at the junior/senior level or substitute an additional six hours of higher math and/or foreign language as part of the State Minimum Core.

5. Students may choose any intermediate-level foreign language course numbered 2003.  See Foreign Languages.

6. Some students majoring in engineering may be required to take either six hours of humanities or social sciences at the junior/senior level or substitute an additional six hours of higher math and/or additional science as part of the State Minimum Core.

7. If not selected to meet the first three hours of the social sciences requirement.

---

**Science (8 hours)**

A primary goal of these courses is to develop an appreciation of the basic principles that govern natural phenomena and the role of experiment and observation in revealing these principles. Students should acquire an understanding of the relationship between hypothesis, experiment, and theory, and develop the skills common to scientific inquiry, including the ability to frame hypotheses and defend conclusions based on the analysis of data. These courses are designed to prepare a student for informed citizenship by illustrating the importance of science and technology to the present and future quality of life and the ethical questions raised by scientific and technological advances.

**Social Science (12 hours)**

The social sciences acquire and transmit knowledge with a distinctive set of methodologies. Courses offered in these methodologies are designed to equip students with an understanding of the causes and consequences of actions taken by individuals as well as by groups and institutions. Because of the compelling need for all educated citizens to have a basic familiarity with the social and political institutions and traditions of our own country, at least one of the courses selected (3 hours of the 12) must be from those marked with an asterisk.

**Freshman Composition**

Every undergraduate student at the University of Arkansas is required to submit six hours of freshman composition for graduation. Freshman English courses taken at other universities will satisfy this requirement only if they are courses in composition. Students whose ACT scores in English are 18 or below must enroll in the sequence of courses ENGL 0003, ENGL 1013, and ENGL 1023. Students whose ACT scores in English are between 19 and 27 should enroll in ENGL 1013-1023. Students with English ACT scores of 28 or above may enroll in Honors English (1013H-1023H) or regular English (1013-1023). Students with English ACT scores of 30 or above may take 1013H-1023H or elect exemption. Students electing exemption must fill out forms in the English department office. Some programs require credit in composition, and students should confer with their advisers before choosing exemption.

**American History and Civil Government**

Under Arkansas law, no undergraduate degree may be granted to any student who has not passed a college course in American history and civil government. Courses offered by the University of Arkansas, any one of which will meet this requirement, are HIST 2003 History of the American People to 1877; HIST 2013 History of the American People, 1877 to Present; and PLSC 2003 American National Government.

**Advanced Composition**

Every undergraduate student at the University of Arkansas is also required to take and pass ENGL 2003, a three-hour course in composition, unless exemption can be gained in one of the following ways: (1) by demonstrating a satisfactory writing ability on the Advanced Composition Exemption Examination, (2) by completing ENGL 2013 (Essay Writing), or (3) by achieving a grade of “A” or “B” in ENGL 1013 and a grade of “A” in ENGL 1023 in courses taken at the University of Arkansas, Fayetteville.

ENGL 2003 will not count as part of the total number of hours required for a degree in the College of Engineering or School of Architecture or the Food, Human Nutritional Hospitality curriculum in the School of Human Environmental Sciences in the College of Agricultural, Food and Life Sciences.

Students must satisfy the requirement of ENGL 1013 and ENGL 1023 and complete 30 credit hours before taking the Advanced
Academic Regulations

Composition Exemption Exam. The exam must be taken before the student has acquired 96 credit hours. The English requirement applies to all transfer students regardless of non-freshman composition courses taken at other schools. Junior and senior transfer students must take the examination at the time they enter the University of Arkansas.

Students not gaining exemption from ENGL 2003 must register for the course before the last semester of their senior year.

The examination will be graded in the following categories: (1) pass, (2) fail, and (3) borderline. The students whose papers are in the third category (borderline) will be eligible to submit a second writing sample at the regularly scheduled Junior English Exemption Exam in the following semester. Students who take and do not pass the Exemption Exam must take ENGL 2003. Students who meet the Advanced Composition Requirement also will have met the writing requirement of the Rising Junior Exam (AAGE). See page 35.

Residence

The full senior year must be completed in residence except that a senior who has already met the minimum residency requirement will be permitted to earn not more than 12 of the last 30 hours in extension or correspondence courses or in residence at another accredited institution granting the baccalaureate degree. No more than six of these 12 hours may be correspondence courses. The minimum residence requirement is 36 weeks and 30 semester hours. Residence for the senior year is defined as a period during which the student must be enrolled in courses offered on the campus in Fayetteville. This is intended to provide adequate contact with the University and its faculty for each student who is awarded a degree. Colleges and departments have the authority to prescribe residence requirements that exceed those described here.

Minimum Credit Hours

All students awarded a baccalaureate degree must have a minimum of 124 credit hours. Individual programs may require additional hours.

Minimum Grade-Point Average

No student will be allowed to graduate if the student has “D” grades in more than 25 percent of all credit earned in this institution and presented to meet the requirements for a degree. No student will be allowed to graduate if on warning.

Application for Graduation

Students who plan to graduate must file an official application to do so. Applications should be filed for the term in which degree requirements will be completed. A graduation fee will be required at the time of application.

Students intending to complete requirements during the spring semester should file their applications by the priority consideration deadline published in the schedule of classes. This will help ensure their names will be listed in the commencement program and receive priority when diplomas are mailed.

Students completing requirements during fall or summer terms must file an application by the deadlines established for those terms.

A student who fails to complete the degree during the intended semester must renew the application and pay a renewal fee for the term in which the degree requirements will be completed.

Other Graduation Requirements

Individual colleges and schools may have special graduation requirements, in addition to degree program requirements. Consult the college or school section in this catalog for statements of additional requirements.

Degree Program Requirements

A student’s degree program requirements are normally those specified in the catalog for the student’s first year of enrollment. Students may choose to meet the program requirements specified in a catalog for a later year. Students may be required to meet degree program requirements incorporated into the curriculum at a level beyond that at which the student is enrolled.

Students who transfer from institutions with articulation agreements with the University may also be allowed to meet the University program requirements in effect during their first year of enrollment in those institutions, subject to the time limits described below and the availability of course work. Students who transfer to a different degree program may be required to meet the program requirements specified in the catalog for the year of entry into that program. Students who are not enrolled for a period of two years or longer may be required to reenter under program requirements in the current catalog. Students who wish to be granted a degree on the basis of requirements specified in a catalog more than seven years old may be required to petition the college or school to be allowed to do so.

Students are expected to keep themselves informed regarding program requirements and changes.

GRADUATION HONORS

The faculty of each college will recommend for graduation with honors or with high honors those students it considers to be eligible for such distinction under its own regulations with the following general restrictions:

1. To be eligible for graduation honors a student must have completed at least one-half of his or her degree work at the University of Arkansas.
2. No student shall be eligible for graduation honors whose cumulative grade-point average is below 3.125.
3. A college should not recommend more than 10 percent of its graduating class for graduation honors except under unusual circumstances.
4. It is recommended that in determining graduation honors the faculty consider the whole of a student’s record but give greater weight to the last half of the record than to the first half.

ADDITIONAL BACHELOR’S DEGREE

A person with a bachelor’s degree from the University of Arkansas, or from any other institution, may not receive another bachelor’s degree without completing in residence at least 30 hours of additional, not necessarily subsequent, courses selected from the courses leading to a degree for which the person is a candidate. More than 30 hours of course work may be required. In addition to the college or school requirements, the candidate must also meet all University requirements as stated in the catalog, including graduation and core requirements, except when course work for the first degree satisfies requirements for the second.

GRADUATION RATES

In accordance with the Student Right-To-Know and Campus Security Act of 1990, the following is a summary of the institution’s six-year graduation rates:
**ANNUAL NOTICE OF STUDENT RIGHTS UNDER THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)**

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are as follows:

1. The right to inspect and review the student’s education records, with some exceptions under the Act, within 45 days of the day the University receives a request for access. Students should submit to the Registrar’s Office written requests that identify the record(s) they wish to inspect. The appendix to University-wide Administrative Memorandum 515.1 provides a list of the types and locations of education records, the custodian of those records, and copying fees for each individual campus. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. Students should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. A sample form, which may be used in making this request, is contained in the appendix to University-wide Administrative Memorandum 515.1. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing and is also contained in the University-wide Administrative Memorandum 515.1.

3. The right to withhold consent of disclosure of directory information, defined as the following information: the student’s name; address; telephone number; date and place of birth; religious preference; major field of study; classification by year; number of hours in which enrolled and number completed; parents’ or spouse’s names and addresses; marital status; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance including matriculation and withdrawal dates; degrees, scholarships, honors, and awards received, including type and date granted; most recent previous education agency or institution attended; and photograph.

   This information will be subject to public disclosure unless the student informs the Registrar’s Office in writing each semester that he or she does not want his information designated as directory information. To prevent publication of name in the printed student directory, written notice must reach the Registrar’s Office by August 31 of the fall semester.

4. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosures without consent. One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an educational record to fulfill his or her professional responsibility.

   Upon request, the University also discloses education records without consent to officials for another school in which a student seeks or intends to enroll.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is as follows:

   **Family Policy Compliance Office**
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington DC 20202-4605

6. University-wide Administrative Memorandum 515.1 is available on request in the main library on campus.

**PHOTOGRAPHIC AND VIDEO IMAGES**

The University is proud to publish and display photographic and video images of UA students, their activities and accomplishments. Any student who does not wish to be represented in such photographic and video images by the University should notify the Office of the Registrar, Hunt 146, in writing before the end of the first week of classes each semester. The request will be honored for all publications and communications undertaken during the remainder of any semester when notification has been received.

**WAIVER OF ACADEMIC POLICIES**

The Academic Standards Committee, composed of faculty and students, serves as a referral body for matters of probation, suspension, dismissal, and other rules and regulations related to academic progress and graduation. Petitions for waiver of academic rules and information on the petitioning process may be obtained at the offices of the academic deans or the Registrar. Petitioners should note petitioning deadlines.

**STUDENT ACADEMIC APPEALS AND COMPLAINTS**

Students are first encouraged to resolve academic conflicts and complaints informally through their department or through the assistance of the Office of Student Mediation and Conflict Resolution, which can provide objective and confidential mediation. If an informal resolution cannot be reached there are two kinds of procedures for undergraduate students to pursue with complaints of an academic nature. Refer to the Student Handbook for appeals structures for other grievances.
Grade Appeal Structure for Undergraduate Students

If a student questions the fairness or accuracy of a grade, there is recourse through a student grade appeal structure. Disagreements shall be heard that allege the instructor’s policy was not applied consistently to all students, differed substantially from the announced policy, or that a policy was not announced. All grievances concerning course grades must be filed within one calendar year of the end of the term in which the grade that is being appealed was assigned. The procedures are:

1. The student should first discuss the matter with the instructor involved, doing so as soon as possible after receiving the grade. The instructor should be willing to listen, to provide explanation, and to be receptive to changing the grade if the student provides convincing argument for doing so. The student’s questions may be answered satisfactorily during this discussion.

2. If the student chooses to pursue the grievance, the student shall take the appeal in written form to the appropriate department chairperson. That person, if she or he believes the complaint may have merit, will discuss it with the instructor.

3. If the matter remains unresolved, it will be referred to an ad hoc committee composed of the entire faculty of the instructor’s department. The committee will examine available written information on the dispute, will be available for meetings with the student and with the instructor, and will meet with others as it sees fit.

4. If the faculty committee, through its inquiries and deliberations, determines that the grade should be changed, it will request that the instructor make the change and provide the instructor with a written explanation. Should the instructor decline, he or she must provide an explanation for refusing.

5. If the faculty committee, after considering the instructor’s explanation, concludes it would be unjust to allow the original grade to stand, it may then recommend to the department chairperson that the grade be changed. That individual will provide the instructor with a copy of the recommendation and will ask the instructor to implement it. If the instructor continues to decline, the chairperson is then obligated to change the grade, notifying the instructor and the student of this action. Only the chairperson has the authority to effect a grade change over the objection of the instructor who assigned the original grade, and only after the foregoing procedures have been followed. If the faculty committee determines that the grade should not be changed, it should communicate this conclusion to the student, the faculty member, and the chair.

Student Complaint Procedure

This procedure is designed to give all students a means by which an academically related complaint against an instructor other than that which is solely concerned with a grade (covered by the previous section) may be reviewed and acted upon in such a way as to protect the rights of both the student and the instructor. The procedure must be initiated within one calendar year of the occurrence of the cause for the complaint.

Guidelines: All committee discussions or hearings shall be private. Furthermore, every effort shall be made to protect any person against discrimination as a result of statements or actions made in this procedure, but fraudulent or intentionally deceptive statements and/or allegations shall be considered an extremely serious violation of the procedures and could result in a recommendation for grave disciplinary measures. Nothing in this procedure may violate policies stated under “Appointments, Promotions, Tenure, Non-reappointment, and Dismissals” in the Faculty Handbook.

Definitions of Terms: Student – Under this procedure, a student is any person who has been formally admitted to the University of Arkansas and who is or was enrolled as an undergraduate student at the time the alleged grievance occurred. (A separate procedure exists for graduate students.) Decision – A decision will include a review of the issues, a determination about the validity of the complaint, the reasons for the determination, and any recommendations. A decision will be stated in writing. Working Days – Working days refer to Monday through Friday, excluding official University holidays.

Procedures: The normal course for a student or a group of students with an academically related complaint concerning an instructor is to go first to that instructor, although the student or group may appeal to the instructor’s chairperson, supervisor, or dean in an attempt to resolve the problem informally and amicably. However, if a student has a complaint regarding academic concerns not covered under the “Academic Appeal Structure” and, for whatever reason, does not wish or is unable to resolve the issue informally, the student is entitled to have the issue considered under the following normal procedures.

1. The student will submit a written complaint with supporting information to the Vice Chair of the Campus Council or to the Chair of the Student Panel or to the Chair of the Faculty Panel (as described in item 4 below). These three persons will comprise a Contact Committee, with the Vice Chair of the Campus Council as coordinator, and will be responsible for the initial review of the student’s complaint. If the Contact Committee, without any preliminary investigation, agrees unanimously that a particular complaint is not subject to these procedures or should not be pursued, the student will be notified in writing.

2. If, through lack of unanimous agreement or as a result of the student’s request, the Contact Committee pursues the complaint, the Committee will initiate the preliminary investigation.

The preliminary investigation should be completed within 15 working days, if possible, from the date the request is received. After the investigation, the Contact Committee has a choice of two alternatives:

a. It will make a determination regarding the complaint and will notify in writing both parties; or

b. It will determine that a Hearing Committee should be appointed and that a more thorough investigation should be conducted. Both parties will be advised of this determination and of who has been appointed to serve on the Hearing Committee.

3. If the Contact Committee has made a determination regarding resolution of the complaint and if either party is not satisfied with this determination, that party has a prerogative of requesting and having a Hearing Committee appointed to investigate the matter further.

4. Members of a Hearing Committee will be selected from two panels of 15 persons each: one of students, chosen by ASG; and one of faculty members, chosen by the Faculty Committee on Committees. The Chair of the Student Panel will be selected by the ASG President, and the Chair of the Faculty Panel will be selected by the Chair of the Campus Faculty.

### Symbols for placement and credit:
- **P** = placement: Pq = qualified placement (student may be placed in an advanced course, with credit awarded for prerequisite courses upon satisfactory completion, subject to departmental review.);
- **C** = credit; Cq = qualified credit (placement and credit subject to departmental review).

1. Credit will be awarded upon satisfactory completion of a junior or senior-level economic course.
2. Students must pass a departmental test to receive credit.
3. To receive credit for courses preceding the course for which AP credit has been granted, students must enroll in and complete with a grade of “C” or higher, that course which follows in sequence the course for which AP credit was granted.
4. At most, 3 hours credit allowed for AP Statistics.
5. When an investigation by a Hearing Committee becomes necessary, the Committee will be appointed immediately by the Contact Committee. The Hearing Committee will be composed of three students and of four faculty members, chosen to avoid obvious bias or partiality. The coordinator of the Contact Committee will call the initial meeting of the Hearing Committee to conduct an election of a chairperson from among the four faculty members and to review general information and results of any preliminary investigation.

6. Either party to the dispute may ask another member of the University community to attend the hearings and may ask any member of the University community to provide relevant information. At the end of its investigation, which, if possible, should be completed within 20 working days after its first meeting, the Hearing Committee will submit its decision to both parties.

7. If the decision is not acceptable to either the student or the instructor, that person may appeal in writing to the Vice Chancellor for Academic Affairs of the University. The Vice Chancellor for Academic Affairs will review the Hearing Committee’s written report and will forward a written recommendation to the student, the instructor, and the Chairperson of the Hearing Committee.

ADVANCED-STANDING PROGRAMS

Credit by Examination

There are two ways a student enrolled at the University of Arkansas, Fayetteville, may establish undergraduate credit by examination in courses offered by the University: either through the University of Arkansas Credit by Examination Program (see the next section), or through approved national testing programs, such as the College Level Examination Program (CLEP), the Advanced

<sup>1</sup> The University accepts both the 90-minute multiple-choice test and the 90-minute test, which includes a 45-minute multiple-choice section and a 45-minute essay section.

<sup>2</sup> Essay required. Numerical scores by themselves will not suffice for credit, nor will they guarantee credit.
The faculty of each department is responsible for designating the courses in that department that may be challenged by examination. Credit established by examination must be evaluated in terms of the specific program the student wishes to pursue. The decision regarding the appropriate application of such credit to a degree program will be made in each college or school. Credit established by examination will be applied to a degree program in the same manner as credit established in any other way. If credit is earned by examination, the mark of CR will be entered in the student’s record. Grades are not assigned.

In certain instances, however, instead of actually receiving credit in semester hours, a student may receive advanced standing and be authorized to enroll for advanced courses in the subject matter area. Credit by examination may not be used to satisfy minimum residency requirements as established by each college or school. Credit by examination is recorded only for students currently enrolled at the University of Arkansas, Fayetteville.

University of Arkansas Program

The following conditions apply to the departmental programs for credit by examination:

1. The student must apply for such examination using forms available in the office of the registrar or the academic dean. Permission to take the examination must be obtained from the faculty of the department offering the course.
2. The appropriate department or college offering the course will designate and administer the examination.
3. A passing grade on the examination must be “B” or above. A second trial for credit by examination in that course will not be permitted.
4. A $25 credit by examination fee will be assessed per course.

National Testing Programs

When credit by a national examination is granted, the student’s academic record will list the score used as a basis for credit as well as the type of examination used to establish credit, such as CLEP subject examination or general examination, AP examination or IB examination.

Credit is awarded on the basis of official score reports, which must be sent by the national testing service directly to the office of the Registrar, 146 Silas H. Hunt Hall, University of Arkansas, Fayetteville, AR 72701. Credit may also be awarded on the basis of scores posted on an official university or college transcript, provided the type of examination is included. In all cases, minimum score requirements as established by the University of Arkansas, Fayetteville, must be met.

Approval has been granted to award credit for the following national testing programs:

College Level Examination Program (CLEP) – see below

The University of Arkansas is a CLEP testing center and is authorized to administer CLEP examinations both on a national basis and on an institutional basis. However, CLEP examinations may be taken at scheduled times at any national test center, and the results sent to the University of Arkansas. The test center code number and score recipient code number for the University of Arkansas is 6866. For information or to make application, write Testing Services, 713 Hotz Hall, University of Arkansas, Fayetteville, AR 72701, or telephone 479-575-3948.

Approval has been granted by appropriate academic departments to award credit in the following courses by the use of CLEP examinations. Minimum scores for the paper-based version and the new computer-based version were established by the departments of the subject areas concerned.

Advanced Placement Program (AP) – see courses on page 45

The Advanced Placement (AP) Program of the College Entrance Examination Board gives students the opportunity to pursue college-level studies while still in high school and, with an appropriate score on an AP exam, to receive advanced placement and/or credit upon entering the University. The AP examinations are offered annually by high schools that participate in this program. UA departments have authorized credit and/or placement for students who present qualifying scores in the AP courses listed on page 45.

International Baccalaureate Program (IB)

The International Baccalaureate (IB) program is a comprehensive and rigorous two-year high school curriculum offered in the United States and in 72 countries around the world. The IB program provides students with a balanced education, facilitates geographic and cultural mobility, and promotes international understanding through a shared academic experience. The IB program gives students the opportunity to pursue college-level studies while in upper secondary school and to receive credit for final examinations upon entering the University.

The IB examinations are offered annually, usually in May, by high schools participating in this program. Students seeking credit for examinations must request that a final, official IB transcript of certificate or diploma results be sent by mail to the UA Office of the Registrar. These materials may be requested from International Baccalaureate North America, 200 Madison Avenue, Suite 2007, New York, NY 10016, telephone: 212-696-4464.

Approval has been granted by appropriate academic departments to award credit in the following courses. The minimum scores were established by the departments of the subject areas concerned.

1 May qualify for up to 8 hours of credit and/or placement in higher-level courses as determined by the Department of Mathematics.
UNIVERSITY LIBRARIES

The library system of the University of Arkansas, Fayetteville, is composed of the David W. Mullins Library (the main research facility on campus) and three branch libraries: the Robert A. and Vivian Young Law Library, the Fine Arts Library, and the Chemistry and Physics Libraries, which are housed together temporarily during renovations of the chemistry building. The combined holdings of the libraries total over 1.7 million volumes of books and bound periodicals and over four million items in microform. The Libraries currently receive over 22,400 separate journal and serial publications. Other resources in the collections include over 24,900 audio and visual materials, and several thousand maps, electronic databases (indexes and full text), and manuscripts.

The University Libraries maintain membership in the Greater Western Library Alliance (GWLA), the Center for Research Libraries (CRL), Amigos Bibliographic Council, and the state consortium ARKLink. Through OCLC, the libraries share cataloging and interlibrary loan information with thousands of libraries all over the world. The University Libraries’ holdings are cataloged in the InfoLinks system. Currently enrolled students, faculty and staff can access more than 200 reference databases, thousands of electronic journals, and InfoLinks from any computer with an Internet connection via the Libraries’ Web page, available through the University home page or directly at http://libinfo.uark.edu/.

The public may use materials, services, and resources of the University Libraries on-site. Currently enrolled students, appointed faculty and staff, and approved borrowers with a valid University ID card may check out materials through the libraries’ convenient electronic checkout system. The “view your own record” feature of this system allows patrons to check their library records, including the status of checked out items. Materials may be renewed and requested for hold through the automated system. Loan periods are of varying lengths as defined by circulation policies, which are available at the main Access Services Desk or through the library home page. Items not owned by the University Libraries may be obtained through interlibrary loan by completing the online request form. Requested items in electronic format will be sent directly to desktops; physical items will be held for pick-up at the Access Services Desk.

The Reference Department assists users in locating and using library resources. Reference librarians are ready to help students navigate InfoLinks and the numerous electronic databases. In addition, librarians offer orientation sessions and lectures on research methods to classes and groups upon request, and research consultations to individuals by appointment.

The University Libraries have had official United States government depository status since 1907. The Federal Depository Library Program provides free public access to U.S. government information by distributing information products from Federal agencies to depository libraries throughout the nation. Titles are distributed in paper, microfiche, or electronic (Internet, CD-ROM, DVD) formats and are arranged according to the Superintendent of Documents classification numbering system (SuDoc). The Government Documents Department has also been a depository for Arkansas state publications since 1993. The Department manages the University Libraries’ maps collection and GIS (Geographic Information Systems) program, including a public GIS workstation equipped with ArcGIS Desktop Suite.

The Libraries’ Special Collections acquires and preserves material for research in the history, literature, and culture of Arkansas and surrounding regions. Researchers have access to a rich assortment of books, pamphlets, periodicals, photographs, maps, and original manuscript collections to support their work.

For information concerning collections and services, as well as information on viewing rooms, reserve reading policies, carrel space for graduate students, computer laptop loans for in-house use, group study rooms, and book and journal ordering procedures, please inquire at (479) 575-4104. For inquiries regarding seminar rooms, faculty studies, gifts and donations, or any other library matter, please contact the Dean’s Office at (479) 575-6702.

QUALITY WRITING CENTER

The Quality Writing Center, established in 1984, provides an array of services to the University of Arkansas community. The center’s primary focus is one-on-one tutorials with students, faculty, and staff who want to improve their writing in projects such as freshman essays, technical reports, research papers, theses and dissertations, or articles for publication. In addition to face-to-face tutorials, consultants offer online tutorials at http://www.uark.edu/write/.

QWC faculty and graduate tutors work with writers on various matters, including brainstorming, organization, transitions, style formats, revision and editing strategies, usage, grammar, and punctuation. During these sessions, consultants ask and answer questions, give reader responses, and help writers take charge of their writing.

The center also assists faculty in planning and evaluating writing assignments and provides clients with assignments, models, articles, and books for them to consult. In addition, center faculty collaborate with classroom faculty in workshops on writing. Besides working with faculty and the general student body, the center also helps students for whom English is a second language (ESL); books and handouts are
available to review standard English, and the consultants explain the subtleties of writing assignments to the clients. The center also provides help to non-traditional students who may need to review writing and grammar skills and who may need personalized help to regain confidence in writing. For students writing editorials, petitions, resumes, job applications, or essays for scholarships and medical or graduate schools, the center offers tutorials and provides resource books.

To assist in the writing process, the center has a computer lab where writers may research the Internet, access library resources, write, and easily revise their work after tutorials. Patrons may visit our centers in Kimpel Hall and in the Enhanced Learning Center or access our online services and writing resources at http://www.uark.edu/write/.

**COMPUTING FACILITIES AND RESOURCES**

The department of Computing Services supports research, academic, and administrative computing activity on the UA campus. Computer operations are maintained to provide access to computing facilities and resources 24 hours a day, seven days a week.

A variety of host systems and servers are available for academic use. The primary mail and messaging server on campus is mail.uark.edu. E-mail is browser-based and can be checked from any computer with an Internet connection by going to http://mail.uark.edu/. In addition, users can choose to use e-mail clients such as Outlook or Eudora, both of which are supported. The primary server for academic and research computing is comp.uark.edu, a Sun Enterprise 6500, using the Unix operating system Solaris. Comp supports statistical packages (SAS, SPSS, MATLAB), programming languages (C, C++, FORTRAN, Pascal), e-mail software (Pine), and other Internet applications. Personal home pages may also be developed on the comp server. All students are automatically assigned accounts on mail.uark.edu and comp.uark.edu, and Active Directory, which allows students, staff, and faculty access to computers in the General Access Computing Labs.

A variety of other servers provide support for both administrative and academic computing. These include an IBM 9672 Model RB5 mainframe for administrative computing for campus student information, human resources, and business processing systems; data warehousing; Web services; and file and print services, among others. Some departments participate in Computing Services’ Intel-based file services, allowing them access PC and Mac-based software through these servers. Additionally, the General Access Computer Labs maintain software via networked servers, allowing access to the same products in multiple labs. Faculty may also access the administrative computing systems for advising purposes, roster generation, and grade reporting. Host peripherals include disk storage, tape systems, and laser printing.

UARKnet, the campus backbone network, is managed by Computing Services. This network enables communication among networks, computers, and servers on campus, as well as on the Internet and Internet2, of which the University is a member site. Virtually all departments, as well as all laboratories, are connected to the campus network. Network access is also available via dial-up modem connections. Dial-up access requires an ID and password, and students have access to a “student only” pool.

The General Access Computer Labs offer approximately 300 network-attached PC and Mac computers for use by University students, faculty, and staff. These labs are located in the Arkansas Union, Administrative Services Building, Sam Walton College of Business Building, Mullins Library, and the Enhanced Learning Center located in Gregson Hall. The labs offer day, evening, and weekend hours. In addition to being Internet-connected, a variety of products are installed on these machines, including Internet browsers (Netscape and Internet Explorer), word processors (MS Word and WordPerfect), databases (MS Access), and spreadsheet programs (MS Excel). Laser printing is available from all supported software. Scanning facilities are available in the Administrative Services Building and the Arkansas Union labs, and color printing is available in the Union. Laptops are available for check-out in Mullins Library and at the Student Technology Center, located in the Arkansas Union. These laptops can be used standalone or with network access via the wireless network in Mullins and the Union. Personal laptops may also connect to the network through public drops located in Mullins and the Union, as well as through the campus wireless network.

Computing Services offers free, non-credit training courses every month on a variety of computer and Internet-based topics, including operating systems, e-mail, word processing, Web page development, presentation tools, and many others.

The Student Technology Center, provided by the Student Technology Fee and Computing Services, is a walk-in computing help center offering laptops and projectors for checkout, as well as high-end multimedia direction and assistance. Laptops are configured for wireless Internet access, and carrels are available with desktop computers. Laptops and desktops are loaded with advanced, multimedia software for layout, graphics design, and Web site development, which students can learn to use with assistance from staff at the S1C.

The MultiMedia Resource Center (MMRC) provides access to and training for computers and applications that can be used to develop programs and classroom presentations. In addition, the MMRC features a training lab, including Internet-connected computers equipped for video conferencing and distance education applications. The MMRC also has presentation equipment and a portable IP-based video conferencing unit available for checkout. The Research Data Center provides researchers with assistance in data design and analysis and with support for other needs, such as training and access to numeric data and assistance in using Web-based data.

Computing Services is located in the Administrative Services Building (ADSB) at 155 Razorback Road. Computing Services specialists offer assistance with operating systems, application programs, virus scanning, modem communications, Internet tools, research projects, general troubleshooting, and more. For more information, call the Computing Services Help Desk at 479-575-2905, from 7 a.m. to 6 p.m. Monday-Thursday and until 5 p.m. Friday, or visit the Computing Services Web site at http://www.uark.edu/campus/compser/.

**TESTING SERVICES**

Testing Services is charged with the responsibility of administering standardized academic tests at the University of Arkansas. The office administers such national tests as the Medical College Admission Test (MCAT), the ACT Assessment, the Law School Admission Test (LSAT), the Graduate Management Admission Test (GMAT), the Graduate Record Examination (GRE), and CLEP exams in addition to others throughout the year. National testing companies determine testing dates and deadlines. Testing Services also offers a number of institutional tests such as the Test of English as a Foreign Language (TOEFL), the Spoken Language Proficiency Test (SLPT), and the Math Placement Test. These tests are scheduled at various times as demand dictates. Test fees vary depending on the test.

To obtain a registration bulletin or information about exam dates and deadlines, please stop by 714 Hotz Hall or call 479-575-3948.
University Centers and Research Units

Research programs are the means by which the University contributes to the generation as well as to the preservation and dissemination of knowledge. With nationally recognized programs in many areas and funding from government, industry, and other private sources, the research effort of the University is strong and diversified. Among the many advantages of attending the University of Arkansas is the accessibility of faculty members and their enthusiasm for including undergraduates in the research process. Such collaboration can enhance students’ educational experiences by providing practical training in research and lab techniques, by engaging students in the subject or process they’re studying, and by fostering a mentoring relationship between faculty and student researchers. It is not uncommon for students to contribute significant and meaningful insights to their field of study through the research process.

The University encourages all undergraduates to pursue research in their areas of academic interest. Students who wish to engage in research of any kind should seek the guidance of their advisors and professors to identify research teams and projects. In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by faculty members and staff in many associated University divisions. The University invites students to learn more about these divisions and the research opportunities they offer by visiting the Web sites or by contacting the individuals listed below.

VISION STATEMENT
The Division of Student Affairs enhances the University of Arkansas experience by helping students to become intellectually engaged, more self-aware, and strongly bonded to the University.

Mission Statement
The Division of Student Affairs’ mission is to provide programs and services to promote academic success and student development.

Core Values
• Act as partners and collaborators in all endeavors.
• Exercise our role as educators in the student learning process.
• Provide friendly, helpful and responsive service.
• Treat all individuals with dignity and respect.
• Preserve the highest ethical standards based on trust, honesty and integrity.
• Encourage and model civility in all relationships.
• Be an inclusive community.

The Vice Chancellor for Student Affairs administers the departments of the Division of Student Affairs and provides leadership in the development of programs and services that supplement the classroom experience of students and enrich the quality of campus life. The Vice Chancellor serves as a liaison to other administrative offices, faculty, and student governing groups. The office is a central source of information concerning University policies and procedures affecting student life and curricular programs and services.

Students are encouraged to bring their concerns, questions, and ideas to the attention of the Vice Chancellor or the Dean of Students.

The Dean of Students offers a wide variety of educational programming, as well as advising and referral services for individual students and many student organizations. Programs and services are developed to meet the needs of the campus community. Recognizing a diverse and changing student population, the staff works with faculty and University personnel to provide the best possible experience for all students.

STUDENT SERVICES
Enhanced Learning Center
The purpose of the Enhanced Learning Center (ELC) is to assist the University of Arkansas in achieving its commitment to retain and graduate more students. The ELC provides a centralized, University-wide, comprehensive academic support center. Services include tutoring in a variety of first- and second-year courses as well as supplemental instruction, study-skills education, individualized educational planning, math and writing resources, and academic coaching. Services offered at the ELC are available to all UA students.

The center is a collaboration of several academic support programs including: Student Support Services, Commuter and Non-Traditional Student Services, the Quality Writing Center, SOAR Centers, and the Math Resource and Tutoring Center.

The ELC opened in fall 2003. The center is located on the ground floor of Gregson Hall and features a state-of-the-art computer lab, laptop checkouts, an open-study area, glassed-in study rooms, a conference room, and staff offices. Hours of operation are from 8 a.m. to 10 p.m. Monday through Thursday, 8 a.m. to 5 p.m. on Friday, and 5 p.m. to 10 p.m. on Sunday. We may be contacted by phone at 479-575-2885 or visit us on the Web at http://www.elc.uark.edu/.

Services for Non-Traditional and Commuter Students
Increasing numbers of non-traditional students are attending the University. A non-traditional student is defined as an undergraduate who is 25 years of age or older, is enrolled part-time, is financially independent, has interrupted his/her education, is a single parent, works full-time, is married, or has dependents. Recent figures indicate that approximately 25 percent of undergraduate students at the University of Arkansas are non-traditional and 70 percent of all students live off campus. The mission of the Office for Non-Traditional & Commuter Students is to provide prospective and currently enrolled non-traditional and commuter students with support, information, and resources to meet their unique needs. The office will assist individuals with problem solving and provide information and referrals. The office maintains an e-mail list service and sends out a monthly newsletter full of information and events of interest. The ONTCS Discussion Board is an online forum where UA students may participate in discussions concerning childcare, housing, parking/transit, roommates, carpooling, or other general topics.

For further information, visit the office on the sixth floor of the Arkansas Union, Room 628, contact us by telephone 479-575-7351; e-mail ontcs@uark.edu, or view the Web site at www.uark.edu/admin/ontcs/.

In addition, several Student Affairs areas provide particular programs for non-traditional and commuter students. Orientation has sessions for transfer and adult students. Campus Dining Services offer meal plans for off-campus students. Counseling and Psychological Services (CAPS) provides a number of workshops and support groups designed to meet the special needs of adult learners.
Student Support Services

Student Support Services (SSS) is a federally funded TRiO program that has been contributing to the University of Arkansas campus since 1976. The purpose of SSS is to retain and graduate first-generation, income-eligible, and disabled students. Through holistic planning and preparation, the SSS program equips its participants with the skills to successfully matriculate and graduate with a baccalaureate degree from the University of Arkansas.

SSS provides a variety of services to all enrolled participants including: academic, personal, career, and financial-aid counseling; one-on-one and group tutoring; academic, social, and cultural enrichment; honor roll and achievement awards; study skills and etiquette instruction; as well as career and graduate school preparation. All SSS participants have access to a high-tech computer lab, wireless laptop computers, a quiet place to study, and friendly staff ready to help.

SSS is located within the Enhanced Learning Center on the ground floor of Gregson Hall. Call 479-575-3546 or visit the Student Support Services Web page at http://www.uark.edu/sss/.

Services for International Students

The Office of International Students and Scholars serves foreign students and scholars and enhances the global awareness of the UA community. The office provides pre-arrival assistance and a comprehensive orientation program for newly admitted international students each semester. Cross Cultural Mentors provide one-on-one contact and group activities for new international students during their first semester, assisting them in their adjustment to the academic community and the Fayetteville/Northwest Arkansas area. The office provides services such as immigration advising, employment authorization, non-resident tax filing assistance, and other programs and services that help students and scholars reach their academic and personal goals and make their time at the University of Arkansas more productive and enjoyable.

The office administers four outreach programs that give students an opportunity to learn about U.S. life and culture while enriching the community’s knowledge and appreciation of diverse populations and cultures. These are: the Friendship Partner program, which pairs students with local families who share American culture, daily life, and special activities with students; the Conversation Club program, which provides students with a small-group setting in which to practice conversational English with native speakers; the International Culture Team, a group whose members speak or share other skills and talents through presentations at community organizations, representing their home countries and cultures; and the Spouses Program, which brings together spouses of students and scholars to build friendships and introduce resources in the community that would benefit them.

The office sponsors various events including: the celebration of International Education Week each fall, yearly seminars for immigration attorneys, and an International Student Support Group each semester. A number of registered student organizations specific to various country, culture, or language groups are linked with the office including the International Students’ Organization (ISO), a group for U.S. and international students, which organizes events such as the International Bazaar and an annual banquet.

The Office of International Students and Scholars is in Holcombe Hall, Room 104; phone 479-575-5003; fax 479-575-7084; e-mail iss@uark.edu; Web: http://www.uark.edu/iss/.

Office of Student Mediation and Conflict Resolution

The Office of Student Mediation and Conflict Resolution provides an informal, impartial, and confidential means of conflict resolution to students and the campus community. It is the goal of the office to foster a culture of community, safe and open dialogue, and to encourage cooperative problem resolution. If you contact the office to address a specific conflict, an ombud will: listen to your concerns, provide facilitation or mediation services when appropriate, value diversity, hear all perspectives, assist you in considering your options for resolution, and remain impartial to all parties involved. Services are confidential, and no identifying records are kept.

Educating the University community and maintaining effective processes are important components of preventing conflicts from escalating and can help enable University students and employees to effectively address adversity themselves. Training is available in alternative conflict resolution techniques, theory, and practice. Workshops are customized to fit specific needs. Recommendations may be made to improve processes that may inadvertently create conflicts, or inhibit informal resolution. Our hope is to create an environment that supports the early resolution of conflict.

The Office of Student Mediation and Conflict Resolution is in the Arkansas Union, Room A677A; phone 479-575-4831; Web: http://www.uark.edu/ua/ombuds/.

Greek Life

The Office of Greek Life facilitates the educational process and provides resources related to programs that promote the growth and development of students affiliated with fraternities and sororities on campus. The overall mission is to enhance the academic, cultural, moral, and social development of students in Greek organizations; provide training in leadership and other personal and social skills; promote student involvement in extracurricular activities and community service projects; and promote Greek Life as a productive and viable lifestyle on campus. Programs such as Recruitment, Greek Weekend, Greek Life Facilitators, and Greek 101 are coordinated by the Office of Greek Life, the Interfraternity Council, the Panhellenic Council, and the National Pan-Hellenic Council.

The Interfraternity Council (IFC), Panhellenic Council (PHC), and National Pan-Hellenic Council (NPHC) are the governing bodies for 10 national sororities and 16 fraternities. The officers and representatives of IFC, Panhellenic, and NPHC work with the Office of Greek Life to provide positive programs and leadership opportunities to the members of the Greek organizations. The Greek Life office is in the Arkansas Union A697; phone 479-575-5001 or fax 479-575-3531; Web: http://uagreeks.uark.edu/.

Multicultural Center

The Multicultural Center exists to enhance the University of Arkansas academic experience by preparing students for life in a pluralistic society. The staff seeks to provide a “home away from home” atmosphere for African-American, Latino/a, Native American, and Asian-American students; to provide an environment that promotes cross-cultural interaction; and to collaborate with the University community in providing educational, cultural, social programs, and resources to assist in the development and advancement of a diverse community. The center also offers a large gallery area for programming, displays, and exhibits, a small resource library, and an informal lounge. The center is in the Arkansas Union, Suite 404; phone 479-575-2064; Web: http://www.uark.edu/studorg/samec/.

Reasonable Accommodations for Students with Disabilities

The Center for Students with Disabilities (CSD), 104 Arkansas Union, serves as the central campus resource for students with disabilities. Working in partnership with students, faculty, and staff, the goal of the CSD is to ensure a physically and educationally accessible University environment. CSD staff work individually with students and assist academic and non-academic units to determine reasonable accommodations that will enable every student to have
access to the full range of programs, services, and activities offered through the University.

For more information contact the CSD at Center for Students with Disabilities, 1 University of Arkansas, 104 ARKU, Fayetteville, AR 72701, phone 479-575-3104 (voice) or 479-575-3646 (TTY); e-mail: ada@uark.edu; Web: http://www.uark.edu/ada/.

Office of Community Standards and Student Ethics

The mission of the Office of Community Standards and Student Ethics (OCSS&E) is to provide an equitable and effective educational system that promotes responsibility, individual growth, accountability, and student learning through community outreach, peer mentoring, and enforcement of the Code of Student Life. The office is designed to provide an equitable process for dealing with alleged infractions of University rules, regulations, and/or laws by students. This system is informal, non-adversarial, and intended to be a part of the total educational process of the University. Students are encouraged to make responsible decisions and to be accountable for their actions. In addition, students who witness violations of the Code who are victims of inappropriate or illegal behavior perpetrated by other students are encouraged to report such activity to the Office of Community Standards and Student Ethics.

Students who are interested in involvement with the All-University Judicial Board or the PEERs (Peers Educating Ethical Razorbacks) program should contact the Associate Dean of Students of the OCSS&E. For more information see the Student Handbook, available in the Administration Building, Room 325. The Office of Community Standards and Student Ethics is in the Administration Building, Room 325, phone 479-575-5170; Web: http://www.uark.edu/ethics/.

First Year Experience Programs

The First Year Experience Programs at the University of Arkansas is a collaborative effort developed to enhance the academic and social integration of incoming students through a variety of classroom and co-curricular activities. Faculty and Student Affairs professionals work together to offer special assistance and promote skills designed to help students experience a fulfilling, rewarding, and successful first year at the University, and to assist them in reaching their ultimate goal of completing a degree.

First Year Experience Programs supports eight major initiatives: Orientation, ROCK Camp, Welcome Weeks, Academic Convocation, Burger Bash, Help-A-Hog, Family Weekend, and First Year Experience Seminar courses. First Year Experience Seminar courses are guided by an advisory board of Student Affairs professionals and associate deans from each academic college. U of A executive administrators, faculty, and staff participate in these programs as speakers, mentors, or through other means of engagement. By providing transitional support for incoming students, First Year Experience Programs effectively promotes their academic growth and supports the mission of the University.

The First Year Experience Programs office is in the Arkansas Union, Room A687; phone 479-575-5002; Web: http://fye.uark.edu/.

PRE-COLLEGE PROGRAMS

The Office of Pre-College Programs consists of eight programs, serving Arkansas’ brightest and best students who demonstrate the potential and desire to attend college. These programs are the Gifted and Talented Scholars and Summer Institute, Academy for Mathematics and Sciences, Educational Talent Search, College Project, Upward Bound/REAL, Veterans Upward Bound, and Youth Opportunities Unlimited. All participants receive multifaceted services to assist them with developing the skills, information, and resources necessary for college success.

As an ongoing mission, Pre-College Programs actively solicits collaborative partnerships with businesses, communities at large, and various departments within Student and Academic Affairs. These efforts enrich the services and learning opportunities available to participants and provide possibilities for the expansion of programming. For additional information, visit our office at 200 Hotz Hall, call 479-575-3553, or contact us online at http://precollege.uark.edu/.

Academy for Mathematics and Sciences

The Academy for Mathematics and Sciences serves students in grades 9-12 from a four-county area in Northwest Arkansas. This college preparatory program for students excelling in the academic areas of math and science encourages post-secondary study in related career fields. The program includes a six-week residential component in the summer and an academic component year round. An integrated curriculum focusing on group and individual research projects in math, science, and engineering is supplemented with offerings in English, foreign language, literature, and computers. A Web-based curriculum and discussion forums provide enhanced and ongoing student involvement throughout the year with the campus-based project. College tuition and credit is available to students bridging from their senior year in high school to college.

Educational Talent Search and College Project

Educational Talent Search is an early intervention project. Serving 1,200 students in grades 6-12, the program promotes the skills and motivation necessary for successfully completing a baccalaureate degree. Emphasizing personal/career development, technological/academic skills, ACT readiness, and college preparatory workshops, the program prepares students to meet their college entry goals. Academic monitoring, counseling, and tutoring services are incorporated to facilitate the progress of each student. Summer enrichment and campus-based events provide ongoing opportunities for institutional and faculty involvement. A second Educational Talent Search program, College Project, serves 600 Native American students attending school in specified districts eligible to receive Indian Education funds.

Gifted & Talented Scholars and Summer Institute

The University of Arkansas Gifted and Talented Scholars program was established to acknowledge the best and brightest youth throughout the state of Arkansas. Nominated by local educators, Gifted and Talented Scholars represent a select group of students, in grades 6-12, with exceptional academic ability and potential. The Gifted and Talented Scholars Summer Institute provides an intensive three-week residential experience for academically talented students completing the eighth and ninth grade. This advanced and educationally dynamic learning environment supplements all accelerated academic learning with a variety of extracurricular activities to address the social and affective needs of all participants.

Upward Bound and REAL

Upward Bound is designed to offer challenging pre-college experiences to students of high academic ability. Services are designed to develop the essential skills, study habits, and discipline necessary for success in high school and college. The project serves 60 students, in grades 9-12, from participating schools in Benton and Washington counties. Participants commit to the program until high school graduation and participate in both a six-week summer residential program and an academic year component. Being curriculum-based, the program provides access to a wide variety of academic, cultural, and social opportunities, simulating a college experience. Upward Bound students completing their senior year of high school receive free
tuition for up to six hours of college credit. A second Upward Bound program, R.E.A.L. (Reaching Educational Aspirations of Latinos/as) serves 50 Latino/a students in the Rogers and Springdale Public School districts.

Veterans Upward Bound
This program identifies and serves the unique needs of 120 eligible veterans from Northwest Arkansas who have the academic potential and desire to enter and succeed in a post-secondary program of study. Eligible veterans have completed a minimum of 180 days of active duty in the military or Coast Guard and hold any discharge other than dishonorable. Services include tutoring; guidance counseling; assistance in filing financial aid and VA benefit forms; academic/career assistance; test preparation for entrance exams; and courses in English, Spanish, math, science, and computer technology. Courses are offered each semester.

Youth Opportunities Unlimited (Y.O.U.)
Youth Opportunities Unlimited (Y.O.U.) is a statewide, comprehensive program designed to encourage 14- and 15-year-old students to remain in school by providing experiences for the development and enhancement of basic educational and vocational skills. A summer residential component combines a University work-based program with a wide range of support services encompassing health care, counseling, and enrichment courses. Students participating in the program receive ongoing follow-up services including monthly telephone contacts, supplemental newsletters, and regular mailings.

UNIVERSITY CAREER DEVELOPMENT CENTER
The Career Development Center provides a comprehensive career development program designed to meet the needs of the University of Arkansas community. The center assists students and alumni in the development of skills necessary for lifelong career management.

The center provides individual and group career advising sessions; a one-hour credit “Career Decision-Making” course; career planning and job search workshops; individual assistance with resume preparation and job interview skills; resources for experiential education opportunities; career interest assessments; a career resource library; and placement services.

Students are encouraged to begin working with the staff of the Career Development Center during their first year at the University of Arkansas. Advisers assist students in selecting a college major, in obtaining a cooperative education or internship placement, and in preparing for their job search or graduate/professional school application. A full-range of career fairs is offered each semester including all-campus fairs and individual industry-specific fairs.

The Career Development Center staff members welcome opportunities to present career planning or job search information to students in the classroom. The Career Center also encourages faculty and staff to partner with them in hosting employers for on-campus recruiting visits. There are valuable opportunities to develop strong professional relationships with the 300-400 corporate recruiters who visit our campus each year.

The University Career Development Center provides services and educational programs to students, alumni, former students, faculty, staff, and their families. A satellite Career Center in the Walton College of Business serves students and alumni in the Walton College.

For further information, contact the University Career Development Center, ARKU 607, 479-575-2805, or visit our Web site at http://career.uark.edu/.

UNIVERSITY HEALTH CENTER
Pat Walker Health Center
The Pat Walker Health Center provides professional and comprehensive medical care, mental health care, health education, and health promotion for the University of Arkansas community, including students, faculty, and staff. Committed to physical, mental, spiritual, emotional, and social health, the highest standards of quality, and an appreciation of the value of each individual, the Pat Walker Health Center services and programs support the education and development of each individual. Pat Walker Health Center services include:

Medical Services
Professional medical staff including physicians, nurse practitioners, and registered nurses provide primary health care, as well as women’s health care. An allergy clinic and a travel immunization clinic are also available. The Pat Walker Health Center is particularly advantageous to the campus community with a comprehensive clinical laboratory, X-ray facilities, and a licensed pharmacy with both prescriptive and over-the-counter medications.

Counseling and Psychological Services
Counseling and Psychological Services (CAPS) provides a wide range of consultations to students, students’ partners, staff, and faculty of the University of Arkansas. Psychologists, social workers, and professional counselors work with students to solve problems, understand themselves, grow personally, and develop more satisfying relationships with friends and family. In addition to office consultations and therapy sessions, students have opportunities to participate in educational programs on campus as well as access to 24-hour emergency services for mental health crises.

Health Promotion and Education
A unique feature of the Pat Walker Health Center is the complete focus on the promotion of good health and prevention of negative health conditions. Professional health educators serve the campus community with wellness and prevention activities delivered in a variety of educational settings including everything from individual consultations to one-hour credit classes. Students benefit from the breadth of health and lifestyle topics addressed, which help them attain success in all aspects of their lives.

The Pat Walker Health Center opened at 525 North Garland Avenue in November 2004, with expanded services for the University of Arkansas community.

Students pay a per credit hour semester health fee that covers professional office visit charges. Student spouses are eligible for services and may pay the health fee. Services other than professional office visits are the responsibility of the patient and/or their health insurance plan. The University strongly recommends that all students have health insurance. A student health insurance policy endorsed by the Associated Student Government is available to all students, student spouses, and their dependent children. Students may enroll in this plan at the Pat Walker Health Center.

The Pat Walker Health Center welcomes inquiries about specific services at 479-575-4451; TTY 479-575-4124. More information is available on the Web at http://health.uark.edu/.
UNIVERSITY HOUSING

University Housing is committed to providing a quality living and learning environment that both challenges and supports the personal, social, and academic development of our residents and their diverse communities.

Experience and extensive research nationwide has shown that academic success in the first year and beyond is directly linked to residing in an on-campus residence environment. In an effort to increase the academic success of our entering students, the University of Arkansas requires all single freshmen under the age of 21, who do not reside with a parent in their permanent home, to live in an on-campus residence hall their first year. Requests to live somewhere other than with parents in their permanent home are not likely to be approved under most circumstances. The Freshmen Exemption Requirement will not apply to students who have earned 24 credit hours at another college or university (even if the hours are not transferable). Students planning to live with their parents in their permanent home, or to request an exemption from the University of Arkansas Freshmen Residency Requirement, are encouraged to complete all required paperwork prior to attending an orientation session. Failure to do so could cause long delays in the orientation process.

Students who wish to apply for an exemption to the University’s requirement for single freshmen to live on campus may refer to the information on our Web site: http://housing.uark.edu/.

Each residence hall has a Resident Director. This individual is selected for his or her academic credentials and interest in helping others, as well as for his or her ability to work well with college students. In addition, every area or floor is staffed by a Resident Assistant who is an upperclassman with training, experience, and knowledge to answer students’ questions and, more importantly, to help students find their own answers. Counselors in Residence (graduate assistants) provide short-term counseling for students living in the residence halls and University apartments, in response to personal, social, academic, and developmental needs. Assistant Directors are full-time, master’s degree level, Residence Life professionals, and are each responsible for three to six residence halls. Access to residence halls is controlled by electronic card readers, which allow only residents and their escorted guests to enter.

Residential living offers several options: male, female, co-ed, or apartments. Rooms are available for visually or hearing impaired students as well as those who are physically challenged. Special-interest living options, such as honors programs, first-year experience, substance-free, architecture, engineering, pre-med/science, business and technology are also available to students. Additional information is available on the University Housing Web site.

Each of the three separate dining facilities on campus is managed by Campus Dining Services and provides a natural setting for socializing with friends and enjoying a wide variety of high quality, nutritious meals. All students living in a residence hall, except those residing in summer school housing, are required to have a meal plan. There are several meal plans available to meet the needs of both on-campus and off-campus students. Learn more about Campus Dining Services online at http://dining.uark.edu/.

ARKANSAS UNION

The mission of the Arkansas Union is to provide unique and diverse services, programs, conveniences, and amenities primarily for students, as well as for other members of the University of Arkansas family – faculty, staff, alumni, and guests. As the center of college community life, the Union compliments the academic experience through an extensive variety of cultural, educational, social, and recreational programs. These programs provide the opportunity to balance course work and free time as cooperative factors in education.

The Arkansas Union serves as the community center of the University for all members of the college family. As the “living room” of campus, the Union is the gathering place of the college. The Union provides services and conveniences that members of the campus community need in their daily lives and creates an environment for getting to know and understand others through formal and informal associations. Included in the Union are meeting, reception, and banquet rooms; lounges; a ballroom; Anne Kittrell Art Gallery; theater; video theater; and a computer lab. The Food Court offers Chick Fil A®, Burger King®, salads, soups, Tuscan Oven pizza/pasta, Sub Generation submarine sandwiches, Bar-B-Que, hot rotisserie foods, Mexican specialties, baked items, Bamboo Asian Cuisine®, RZ’s Coffeehouse® and a Stop Gap “grab and go” convenience store are located in the building addition. Complete catering services are provided for meeting and function support. In addition, the Union houses the University Bookstore, U.S. Post Office, Union Hair Care, Union Copy Center, Razorback Shop, and Computer Store.

As the center of the college community life, the Union complements the academic experience through an extensive variety of cultural, educational, social, and recreational programs. These programs provide the opportunity to balance course work and free time as cooperative factors in education. The Arkansas Union is the center of much student activity and is a perfect place for students to get involved on campus.

University Programs provides many student events and activities. These activities are planned, organized, and presented almost totally by students. Typical programs are major concerts, symposium speakers, theater productions, video programs, fine arts programs, and art gallery shows. The Union is a student-centered organization that values participatory decision-making. Through volunteerism, its boards, committees, and student employment, the Union offers first-hand experience in citizenship and educates students in leadership, social responsibility, and values.

The Student Life Center in the building addition provides office space for many Registered Student Organizations and Student Support offices. The Office of Student Involvement and Leadership provides resources for student organizations. More than 25 student organizations including Associated Student Government, University Programs, and the student radio station are housed in the Union. Many other offices provide goods and services to support students. Office of Student Involvement and Leadership, Campus Card Office, Razorbuck$ program, First Year Experience, Minority Student Services, Greek Affairs, Orientation, Office of Non-Traditional and Commuter Students, Student Mediation and Conflict Resolution, Assistant Vice Chancellor for Student Affairs, Multicultural Center, Associated Student Government, University Career Development Center, Career Center for Students with Disabilities, and other programs are located in the Union.

Office for Student Involvement and Leadership

The Office for Student Involvement and Leadership, located in the Arkansas Union, is the central location for student organizations and activities at the University. The primary mission of the department is to provide students with opportunities for involvement and to enable students to learn and practice leadership and management skills that complement classroom learning.

The Office of Student Involvement and Leadership is responsible for the oversight and administration of the following five areas:

Registered Student Organizations

There are more than 300 registered student organizations at the University. The Office of Student Involvement and Leadership provides student organizations with assistance and services to help them succeed, including the annual Razorbash event, facility reservations,
Leadership and Volunteerism Programs

The Leadership Programs are designed to provide training, education, and development for students across campus. The primary programs in this area are Emerging Leaders, the LeaderShape Institute, and the Leadership Resource Library. These interactive programs motivate students and develop key leadership skills related to self-awareness, management, interpersonal relationships, organizational leadership, and networking. The integral role that students play in implementation of these programs serves as a part of the educational process for all students involved.

The Volunteer Action Center encourages civic engagement through community service and service learning. Large-scale volunteer events, such as “Make a Difference Day” and “Students’ Day of Caring,” are sponsored as student-led programs where university students can participate in various volunteer projects on the assigned program date. The Volunteer Action Center’s e-mail list service provides a clearinghouse for volunteer and community service opportunities in the Northwest Arkansas area.

University Programs

University Programs is a volunteer student organization responsible for planning and coordinating more than 350 events annually for the campus community. University Programs provides students with cultural and educational experiences, entertainment, and fun. Seven committees, all made up of students, select, schedule and produce events such as concerts, movies, lectures, fine arts performances, gallery exhibitions, and daytime programs. Being a part of University Programs gives the student committee members leadership training and real opportunities to gain practical planning experience. Supported by a student activity fee, University Programs events, with the exception of major concerts, are free to students.

Associated Student Government

The purpose of the Associated Student Government is to act as an organized voice for all students of the University of Arkansas, to effectively represent students in the University’s decision- and policy-making process and to provide a broad educational experience for students while promoting citizenship on campus and in the greater community. Associated Student Government has many opportunities for involvement including the positions of Executive Officer, Executive Cabinet, ASG Senate, ASG Senate Committees, ASG Judiciary, and numerous University Committee Appointments.

Hog Nights

Late night weekend programming at the University of Arkansas is a collaborative effort for retention, programming, education and entertainment. It is designed to assist students in developing new and diverse relationships, particularly in interactive social events and promoting healthy lifestyles. The programs occurring on campus during the weekend are of the highest quality, represent a multiplicity of views, bring individuals together into a community setting, and are diverse enough to be enjoyed by all who participate.

STUDENT ACTIVITIES

An integral part of a University education is what can be gained through the worthwhile use of leisure time. Students are encouraged to balance involvement with their academic pursuits and interests. There are organizations, intramural sports, spectator sports, lectures, concerts, theatrical offerings, and other activities in which students are encouraged to participate. The Northwest Arkansas region represents one of the best recreational areas in the nation.

Organizations

Registered Student Organizations vary from those in professional fields to special interest activities. They also include religious organizations, community-oriented outreach programs, political interest groups, student publications, minority groups, departmental and professional organizations, social/fraternal organizations, and various honorary societies. Registered Student Organizations not affiliated with national social/fraternal organizations may be eligible for funding from the Associated Student Government.

Student Media

Student Media is an umbrella organization that administers and advises the official student media outlets of the University. These outlets are: the student newspaper, The Arkansas Traveler; the UA yearbook, The Razorback; the student television station, UATV; the student radio station, KXUA; and the student magazine for the arts, Ozark Review. All provide a forum for student expression, entertainment, news and information of interest to the campus community. Other than a small support staff, these groups are entirely staffed by student employees and volunteers, including editors and station managers. For more information, contact Student Media at 479-575-3406.
MISSION AND OBJECTIVES

The mission of the Honors College at the University of Arkansas is to provide exceptional opportunities for outstanding undergraduates to enhance their educational experiences and academic performances, and to serve the University by underscoring its reputation as a research institution, where students come first. This mission incorporates four areas of responsibility: recruitment; administration of honors fellowships, Honors College research grants, and study abroad scholarships; coordination of honors programs and curricula; and coordination of related services.

FACILITIES AND RESOURCES

The Dean’s Office for the Honors College is housed on the fourth floor of the Administration Building. Large lounges, designed as study and relaxation areas for students, may also be found on the fourth floor. The Honors College was created by a $200 million gift from the Walton Family Charitable Support Foundation with the goal that an honors education would be available in every college, with the Honors College serving as an umbrella organization, providing coordination of honors efforts among the colleges and additional scholarship and service opportunities for participating students.

The Academic Scholarship Office is part of the Honors College. Scholarships are awarded to a variety of students, both incoming and current, at the University of Arkansas. Students do not have to be in the Honors College to receive many of these scholarships though participation in honors of qualified students is always encouraged.

Scholarships awarded to incoming freshmen not funded through the Honors College include the Chancellor’s Scholarship, the Honors College Academy Scholarship, the Silas Hunt Scholarship, the University Scholarship, and the Leadership Scholarship. Scholarships for current students include the Brandon Burlsworth Memorial Scholarship, the R. Coin Mason Scholarship, the Blanche Bledsoe and Clarence J. Rosecrants Senior Endowed Scholarship, the Boles-Zaulx Scholarship, the Alfred Allen Scholarship, and many more. These scholarships are available to students across the University. For additional information see the chapter on Financial Aid and Scholarships in this catalog.

The Office of Post-Graduate Fellowships provides assistance to all students who are applying for international graduate fellowships: the Marshall, Rhodes, Gates Cambridge, Rotary, and Fulbright, and national graduate fellowships such as those provided by the National Science Foundation, the Department of Defense, the Department of
Energy, and the Mellon and Jacob Javits Foundations. The office also assists students with applications for nationally competitive undergraduate scholarships: Barry Goldwater (for outstanding sophomores and juniors in mathematics, science, and engineering), the Truman (for outstanding juniors interested in pursuing a career in public service), the Morris Udall (for competitive students who intended to pursue a career connected to environmental concerns), the James Madison (for students who want to become educators in the social sciences) and many more. The office also provides assistance to graduate, law, and medical school applicants.

The Honors College Governing Board consists of the Chancellor, the Provost and Vice-Chancellor for Academic Affairs, the Dean of the Honors College, the Vice-Chancellor for Student Affairs, and the Vice-Chancellor for University Advancement.

The Honors College Directors' Council consists of the Directors of the Honors Programs in each of the colleges and is chaired by the Associate Dean of the Honors College. The Honors Directors include the following:

- Duane Wolf, Dale Bumpers College of Agricultural, Food and Life Sciences, Plant Sciences 115
- Kim Sexton, School of Architecture
  Vol Walker 120
- Sidney Burris, Fulbright College of Arts and Sciences
  Old Main 517
- John Norwood, Walton College of Business
  Walton College of Business 328
- Steve Langsner and Nan Smith Blair, College of Education and Health Professions
  Peabody Hall 8
- Carol Gattis, College of Engineering
  Bell Engineering 4184

DEGREES OFFERED

The Honors College does not confer degrees. Honors degrees are conferred by the college of major.

OTHER PROGRAMS

Advanced Placement Summer Institute

The AP Summer Institute is a College Board approved summer program coordinated by the Honors College. The institute provides training to Advance Placement teachers in American history, biology, calculus, chemistry, composition, computer science, government, literature, physics, psychology, and statistics.

Honors College Internships

Fifty Honors College internships are offered each semester. Students register for a one-hour credit course. The course provides information on applying for scholarships, writing resumes and personal statements, and interviewing skills for internships and fellowships.

COLLEGE ADMISSION REQUIREMENTS

Admission to the Honors College requires that a student first be admitted to an honors program in the college of major. Students admitted to a program are automatically included in the Honors College. Students admitted to the Honors College must have a minimum 28 ACT or SAT equivalent and a minimum 3.5 high school grade-point average. These are the basic requirements for each of the honors programs except the Walton College, which requires a 28 ACT or SAT equivalent and a minimum 3.75 high school grade-point average. Students also can be admitted at the end of the freshmen year by earning a 3.5 GPA on 30 completed hours, or through the end of the sophomore year by earning a 3.5 on 60 completed hours (the total does not include Advance Placement or CLEP credit).

COLLEGE SCHOLARSHIPS

The Walton Family Charitable Support Foundation endowed two major scholarships for incoming freshmen to be administered by the Honors College. The Foundation also endowed funds for current honors students for study abroad and undergraduate research.

Honors College Fellowships provide $50,000 over a four-year period for outstanding incoming freshmen. A separate application is required (applications are available on the Honors College Web page). The deadline for application is February 1. Students will also be required to interview for the fellowships. The award covers tuition, room and board, and provides additional monies for the purchase of a computer and for study abroad.

Honors College Academy Scholarships provide $16,000 over a four-year period for outstanding incoming freshmen from under-represented counties in Arkansas. The application for admission serves as the application for this scholarship.

Honors College Study Abroad Grants are available to competitive students in the Honors College who have completed a minimum of 30 hours, 6 of which must be in honors. A separate application is required and is available in the Honors College Office. Deadlines are October 15 and February 15.

Honors Undergraduate Research Grants are available to competitive students in the Honors College who have completed a minimum of 30 hours, 6 of which must be in honors. A separate application is required and is available in the Honors College Office. The application includes a five-page summary of the proposed research and a detailed letter of support from the research mentor. Deadlines are October 15 and February 15.

STUDENT ORGANIZATIONS

The Honors College Student Association is a registered student organization sponsored by the Honors College at the University of Arkansas. Membership is open to all University of Arkansas honors students, with no membership fees or dues, and is designed to provide an honors community, uniting honors students from all colleges on campus. The group, which meets monthly, also encourages volunteerism and provides a means for students with similar academic interests to meet in a relaxed setting. Members participate in campus recruiting events and frequently serve as honors liaisons to visiting groups. Their newsletter publication Castalia is published each semester. Additional information is available on the Honors College Web site at http://honorscollege.uark.edu/.

COLLEGE ACADEMIC REGULATIONS

The Honors College wishes to foster an environment of intellectual interaction and development across colleges. To graduate with honors from any college requires a minimum of 12 honors credits and the completion of an undergraduate research project is required. Specific honors hours, thesis, and GPA requirements for Cum Laude, Magna Cum Laude and Summa Cum Laude are set by the college of major.

MISSION AND OBJECTIVES

The mission of the College of Agricultural, Food and Life Sciences is to prepare graduates who are intellectually enriched, technically competent, environmentally conscious, and ethically responsible. We honor the land-grant tradition and respect the many values of its fabric and heritage while having sensitivity toward change for the future. Our goal is for our graduates to be responsible leaders, possessing strong communication skills, problem-solving abilities, and having commitment to be self-directed, lifelong learners.

To accomplish this, the broad curricula include basic courses in the general sciences and liberal arts, as well as agriculture and human environmental sciences.

History and Organization

As the state’s land-grant university, the University of Arkansas has the responsibility for leadership in agricultural and human environmental sciences. This responsibility is shared with the Division of Agriculture, and it includes teaching, research, and service functions. The Bumpers College is an integral component of the University of Arkansas and addresses the teaching responsibility of the land-grant university. Its roots lie in the First Morrill Act of 1862, which created the land-grant system by providing a grant of land to each state for the establishment of a college “where the leading objective shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanical arts in such manner as the legislatures of the state may prescribe to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life.” Agricultural sciences have been taught at the University of Arkansas almost from the beginning of the institution in 1872. The University conferred the first degrees in agriculture in 1904.

Early instruction and outreach efforts focused on improving rural life for men, women, and children. Farm wives were interested in beautifying the home, food preparation and safety, and gardening. Foods and nutrition, bacteriology, chemistry, and other related subjects held a common scientific interest for both agriculture and home economics, so it naturally developed that studies in home economics should develop within the realm of agricultural education. Domestic science classes were offered as early as 1909, and a department of home economics was established in 1913. The department was elevated to school status in 1994, and its name was changed to the School of Human Environmental Sciences.

The passage of the Hatch Act in 1887 and subsequent legislation made possible the Agricultural Experiment Station, the research component of the Division of Agriculture. Most faculty who teach in the
Bumpers College also hold appointments in the Experiment Station and are able to incorporate active research into their teaching.

The dissemination of University research in agriculture and human environmental sciences is carried out by personnel in the Cooperative Extension Service, created by the Smith-Lever Act of 1914. Many Extension specialists also hold adjunct faculty status and bring their expertise to the teaching program.

It is this blending of teaching, research, and service functions that create a unique learning environment in the college. As students learn to relate basic areas of science to human needs, they study in laboratory-based classes and are taught in research facilities supported by the Division of Agriculture. Similarly, students are encouraged to intern with professionals in industry and governmental agencies, including the Cooperative Extension Service.

In recognition of the land-grant mission of the University and its commitment to serve the entire state, the Dale Bumpers College of Agricultural, Food and Life Sciences has worked cooperatively with numerous community colleges to organize the Arkansas Consortium for Teaching Agriculture (ACTA). ACTA is designed to facilitate the “seamless” transfer of students from community colleges to the Bumpers College. Coordinated advising, recruiting, and curricula development are working goals of the consortium. Students interested in ACTA should contact the dean’s office.

FACILITIES AND RESOURCES

The Dale Bumpers College of Agricultural, Food and Life Sciences is composed of ten academic departments and the School of Human Environmental Sciences. The college offers both undergraduate and graduate level degrees.

The Agricultural Food and Life Sciences building houses the dean's office and the department of animal science and serves as the headquarters for the college academic functions. There are six other buildings on campus operated by the college including the Agriculture Building, Home Economic Building, Rosen Center, Plant Science Building, Agricultural Annex, and the Center of Excellence for Poultry Science. Additionally, the Food Science building, Alzheimer Laboratory, Abernathy Agri-Science laboratory, Biological and Agricultural Engineering Laboratory, Pauline Whitaker Animal Science Arena, and the Dorothy E. King Equine Science facilities are located at the Research and Extension Center north of the main campus. These serve as additional teaching laboratories or classroom facilities. Also, the Infant Development Center and the Nursery School, 536 N. Leverett Ave., are managed by the college to provide instructional training for the child-development program.

Two distance-education classrooms and an agricultural statistics laboratory are available for instructional use. A Teaching and Faculty Support Center, located in the Agriculture Building, provides support for faculty and graduate student instructors. Students can receive academic assistance through the Academic Enhancement Program (AEP) coordinated by the dean’s office. Trained counselors provide guidance to students seeking extra assistance. Students can also seek assistance through the Enhanced Learning Center, a campus-wide resource.

DEGREES OFFERED

All entering students (including freshmen, international and transfer students) admitted to the University of Arkansas, Fayetteville, are eligible to pursue a degree program in the Dale Bumpers College of Agricultural, Food and Life Sciences. Degrees offered are as follows: The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.) The Bachelor of Interior Design (B.I.D.)

Non-Degree Training

While most students enrolled in the Dale Bumpers College of Agricultural, Food and Life Sciences work toward a degree, students who desire additional education of a specific nature but who do not wish to fulfill all requirements for a degree may enroll as special or unclassified students.

MAJORS, CONCENTRATIONS AND MINORS

Agricultural, Food and Life Sciences – B.S.A. Degree

Majors and Concentrations

Agricultural Business (AGBS)
Agricultural Business and Marketing (ABMM)
Pre-Law (PRLW)
Agricultural Economics (AGEC)
Agricultural Education, Communication and Technology (AECT)
Agricultural Education (AGED)
Extension and Industry Education (EXIE)
Agricultural Systems Technology Management (ASTM)
Agricultural Communications (ACOM)
Animal Science (ANSC)
Crop Management (CPMG)
Environmental, Soil, and Water Science (ESWS)
Food Science (FDSC)
Food Science (FDTC)
Food Technology (FDTN)
Horticulture (HORT)
Horticulture Management and Production (HMAP)
Horticulture Science (HSCI)
Horticulture Merchandising (HMER)
Poultry Science (POSC)
Turf & Landscape Horticulture (TLHT)
Turf Management (TURF-M)
Landscape Horticulture (LHRT)

Minors Offered

Agricultural Business (AGBS-M)
Agricultural Education (AGED-M)
Agricultural Systems Technology Management (ASTM-M)
Animal Science (ANSC-M)
Crop Management (CPMG-M)
Entomology (ENTO-M)
Environmental, Soil, and Water Science (ESWS-M)
Equine Science (EQSC-M)
Extension and Industry Education (EXIE-M)
Food Science (FDSC-M)
Global Agricultural, Food and Life Sciences (AFLS-M)
Horticultural Production (HORT-M)
Journalism (JOUR-M)
Landscape Design and Urban Horticulture (LHRT-M)
Pest Management (PMGT-M)
Plant Pathology (PLPA-M)
Poultry Science (POSC-M)
Turf Management (TURF-M)
Wildlife Habitat (WLHA-M)

Certificates Offered

Food Safety Manager Certificate of Proficiency (FMGR-CT)
Hazard Analysis and Critical Control Point Coordinator Certificate of Proficiency (HACCP-CT)
School of Human Environmental Sciences – B.S.H.E.S. or B.I.D. degree

Majors And Concentrations
- Apparel Studies (APST)
- Food, Human Nutrition and Hospitality (FHNH)
- Dietetics (DIET)
- General Foods and Nutrition (GFNU)
- Hospitality and Restaurant Management (HRMN)
- General Human Environmental Sciences (HESC)
- Human Development, Family Sciences, and Rural Sociology (HDFS)
- Child Development (CDEV)
- Lifespan (LSPN)
- Interior Design (IDES)

Minors Offered
- Human Development and Family Studies (HDFS-M)
- Human Nutrition (GFNU-M)
- Global Agricultural, Food and Life Sciences (AFLS-M)
- Journalism (JOUR-M)

Minor in Global Agricultural, Food and Life Sciences: The Bumpers College offers a minor in global agricultural, food and life sciences to provide students throughout the college opportunities to complement their major field of study with an international component. It is designed to provide learning skills and international experiences leading to greater understanding of global issues in agriculture, human and environmental sciences and the ability to participate effectively.

Requirements for a minor in Global Agricultural, Food and Life Sciences (AFLS):
- 18 semester hours to include AFLS 2003;
- 3 to 6 hours study abroad;
- AGEK 4163 or AGEK 4613 or AGEK 402V (international topic approved by student’s adviser and IAP director);
- 6 hours to be selected from the following:
  - ANTH 1023
  - HIST 3043
  - PlSC 2813
  - ANTH 3123
  - GEOG 4033
  - HIST 3203
  - PlSC 3803
  - ANTH 4253
  - GEOG 4243
  - HIST 4103
  - PlSC 3813
  - HIST 4783
  - And 3 hours of elective from the following (for students only taking 3 hours study abroad):
  - AGEK 4163
  - AGEK 4613
  - Down 402V
  - COMM 4343
  - ECON 4633
  - ECON 4643
  - ECON 4653
  - FINN 3703
  - PlSC 3853
  - or other courses with an international focus.

A student interested in a Global Agriculture minor must notify his or her major adviser for detailed information. The minor is coordinated by Dr. Preston Laferney of International Agriculture Programs, AGRI Building, room 216.

Minor in Journalism: This minor allows for a combination of training in journalism with a specialization in agriculture or human environmental sciences. Its purpose is to prepare the student for employment with firms and institutions that produce agricultural or human environmental sciences publications or employ public relations personnel.

Requirements for a minor in journalism: Students interested in a journalism minor may choose from one of three areas:
- Print Journalism (18 semester hours)
  - JOUR 1023, JOUR 1033, JOUR 2013, JOUR 3013, JOUR 3123 and JOUR 3633

A student interested in a journalism minor must notify his or her major adviser for detailed information. The minor is coordinated by the department of agricultural and extension education in consultation with the department of journalism.

Minors in Other Colleges: Students in the College of Agricultural, Food and Life Sciences may pursue an academic minor in the Sam M. Walton College of Business or in the J. William Fulbright College of Arts and Sciences. These minors usually consist of 15 to 20 hours of course work. For requirements regarding minors, check the catalog under the department offering the minor. Students must notify the dean’s office of their intention to pursue a minor.

Certificate of Proficiency
- Two undergraduate certificates of proficiency are offered in the college: Food Safety Manager (FMGR) Certificate of Proficiency and Hazard Analysis and Critical Control Point (HAACP) Coordinator Certificate of Proficiency. In both certificates, students take a concentrated core of Web-based courses focused on the application of scientifically based food-safety systems through the application of HAACP systems. Applicants must have a B.S. degree or seven years of relevant experience in the food industry.

See page 79 for the list of courses.

OTHER PROGRAMS

Pre-veterinary Medicine
- Because Arkansas does not have a college of veterinary medicine, the Arkansas General Assembly has authorized funds for education in veterinary medicine at out-of-state institutions. The State Board of Higher Education is the designated agent for the State of Arkansas, and the Student Loan Authority is authorized to administer the program. Terms and conditions prescribed by the Student Loan Authority are as follows: the grant will cover only out-of-state tuition, and the student will pay his or her own fees and expenses.
- Contracts have been negotiated with the Board of Control for Southern Regional Education for education in veterinary medicine at Louisiana State University and at Tuskegee University. Arrangements have also been made with the University of Missouri and Oklahoma State University. Under the provisions of the legislation, only citizens of Arkansas are eligible. They must enroll in and complete the pre-veterinary medicine curriculum to satisfy the admission requirements of these colleges of veterinary medicine.
- The pre-veterinary medicine program at the University of Arkansas is administered in the departments of animal science and poultry science of the Dale Bumpers College of Agricultural, Food and Life Sciences. There are faculty in these departments who help counsel and advise students regarding their pre-veterinary medicine program. There are also faculty veterinarians who provide some insight into the practice of veterinary medicine and are knowledgeable about many of the considerations encountered in establishing a practice upon graduation. Some of these veterinarians have been in private practice; others have been involved in full-time agricultural research since graduation from veterinary medicine and graduate school. Because there is a wide cross-section of experience among these faculty, students find their counselor valuable in planning a future in veterinary medicine.
COLLEGE ADMISSION REQUIREMENTS

All students seeking admission to the Dale Bumpers College of Agricultural, Food and Life Sciences must meet the general requirements for admission to the University. Students transferring from other colleges at the University of Arkansas or from other institutions are expected to meet the same entrance standard.

COLLEGE SCHOLARSHIPS

In addition to the scholarships awarded by the University, there are a number of scholarships available to students in agriculture and human environmental sciences made possible by generous gifts from many firms and individuals. During the 2003-2004 school year, the college awarded approximately 450 scholarships for over $650,000. To be considered for a college scholarship, students must first be admitted to the University. Most scholarships require students to be enrolled full-time, at least 12 credit hours per semester. A college scholarship application, which serves as an application to all available scholarships offered by the college, must be submitted by March 1 each year (priority deadline for new freshmen is February 15). A listing of various outside scholarships is available for review in the dean’s office, E-108, Agricultural, Food and Life Sciences Building and on the college’s Web site. There are also miscellaneous outside scholarships for which applications are available in some departmental offices. For more information on scholarships, contact the dean’s office.

STUDENT ORGANIZATIONS

Agricultural Business Club is a student organization for those interested in agricultural business and economics.

Agricultural Communicators of Tomorrow (ACT) is designed for students with an interest in agricultural communications. It allows students an opportunity to interact with others with similar interests at the college and professional level.

Agricultural Mechanization Club is a student organization for those with an interest in agricultural technology.

Student Branch, American Society of Agricultural Engineers (ASAE) is an organization for students interested in agricultural engineering.

American Society of Interior Designers (ASID) is a professional society dedicated to serving the entire profession and maintaining the highest possible standards for the practice of interior design. ASID student members participate in a wide range of learning experiences and stimulating programs that complement their academic training. Through the society’s thousands of professional members, student members gain important insight into the professional aspects of interior design.

National Block and Bridle Club is for students who are interested in any phase of animal science. Students with interests in dogs, cats, horses, cattle, sheep, or swine will find this club a good place to call home.

Collegiate 4-H/FFA is for any student who has been active in 4-H and/or FFA or has a current interest in service to these youth-oriented organizations. This club is especially designed for students interested in teaching agricultural education or working in Extension.

Collegiate Farm Bureau was formed in 2002 with support from the Arkansas Farm Bureau Federation. Its goals are to motivate students to become involved in shaping agricultural policy for the state and the nation.

All human environmental sciences majors are eligible for student membership in the American Association of Family and Consumer Sciences (AAFCS). Monthly meetings highlight various phases of human environmental sciences and provide social contact with other majors. In addition, members become involved in local service projects and may attend statewide workshops and leadership training sessions.
Crop, Soil, and Environmental Science Club is a student organization for those interested in crops and soils through both an agricultural and environmental perspective.

Horticulture Club is a student organization for those interested in horticulture including floriculture, ornamentals, turf, small fruits, and vegetables.

Hospitality and Restaurant Management Club is for students who are interested in hospitality industry.

Pre-Vet Science Club is for students interested in veterinary medicine and is especially designed for those students in the pre-veterinary medicine curriculum.

Food Science Club is an organization for those students interested in food science.

Minorities in Agriculture, Natural Resources Related Sciences (MANRRS): The purpose of this organization is to promote and implement initiatives which foster inclusion and advancement of members of ethnic/cultural groups under-represented in the agricultural and natural sciences and related fields in all phases of career preparation and participation.

Northwest Association for the Education of Young Children (NAEYC) is an organization for students who are interested in the welfare of young children. The organization, through programs, publications, and trips, offers students information about career opportunities in human development.

Student Dietetic Association (SDA) is an organization for students who are interested in the profession of dietetics. The goals are to promote growth in professional attitudes and to provide various programs of interest to the members.

Fashion Merchandising Club is an organization open to all students interested in the fashion industry.

Poultry Science Club is open to all students interested in any phase of the poultry industry or related fields.

There are also numerous general organizations on the University campus, and students of the Dale Bumpers College of Agricultural, Food and Life Sciences participate in most of them. These include fraternities, sororities, honor and scholarship organizations, religious and music groups, sports organizations, and others.

Alpha Zeta is the professional honor fraternity for students of agriculture. To be invited to become a member, a student must rank in the upper two-fifths of the class and be recognized for leadership and character.

Phi Upsilon Omicron is the professional honor fraternity for human environmental sciences students. To be eligible for invitation to membership, a student must rank in the upper 35 percent of the class and be recognized for leadership and character.

Gamma Sigma Delta is the honor fraternity for graduating seniors, graduate students, faculty, and alumni of the Dale Bumpers College of Agricultural, Food and Life Sciences. Seniors must rank in the upper 25 percent of their class to be eligible for membership, but not more than 15 percent of the class may be elected for membership. The highest-ranking sophomore and the highest-ranking senior are recognized annually by the society.

Alpha Tau Alpha is a national honorary professional fraternity for those preparing to become teachers of agricultural education. Its mission is to develop a true professional spirit in the teaching of agriculture, to help train teachers of agriculture who shall be leaders in their communities, and to foster a fraternal spirit among students in teacher training in agricultural education.

## COLLEGE ACADEMIC REGULATIONS

### Academic Advising

Bumpers College of Agricultural, Food & Life Sciences is committed to a strong, effective academic advising program. Advising plays a significant role in the total process of educating students for lifelong learning. The advisor assists students with the development and implementation of their educational plans.

Research demonstrates that the more contact students have with faculty, the more likely they are to persist and complete their educational goals in a timely manner. Therefore, the department has adopted a faculty advisement model.

The faculty advisor serves as a facilitator to assist students in maximizing their education potential. The advising relationship is a partnership between the student and the faculty advisor. It is dependent on effective communication and regular contact.

### General Requirement

For the Bachelor of Science in Agricultural, Food and Life Sciences degree, a student may choose one of 14 majors that satisfies his or her interests and goals for educational achievement. Some programs have concentrations, and most allow students to select a minor.

For the degree of Bachelor of Science in Agricultural, Food and Life Sciences, students must complete a minimum of 30 semester hours within the Bumpers College.

For the degree of Bachelor of Science in Human Environmental Sciences or Bachelor of Interior Design, students must complete a minimum of 30 hours within the School of Human Environmental Sciences at the University of Arkansas.

### Plus/Minus Grading System

The Dale Bumpers College of Agricultural, Food and Life Sciences utilizes a plus-minus grading system that assigns numerical values to 12 different grades. These values are used for courses when grade-point averages are calculated. See page 37 for the method of calculating grade-point averages. The 12-step grading system with assigned values is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>B+</td>
<td>3.67</td>
</tr>
<tr>
<td>B</td>
<td>3.33</td>
</tr>
<tr>
<td>B-</td>
<td>3.00</td>
</tr>
<tr>
<td>C+</td>
<td>2.67</td>
</tr>
<tr>
<td>C</td>
<td>2.33</td>
</tr>
<tr>
<td>C-</td>
<td>2.00</td>
</tr>
<tr>
<td>D+</td>
<td>1.67</td>
</tr>
<tr>
<td>D</td>
<td>1.33</td>
</tr>
<tr>
<td>D-</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

### Grade-Point Requirement

A grade-point average of 2.00 (“C” average) on all work attempted at the University of Arkansas is required for graduation.

### Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at graduation by the honors designation of Cum Laude, Magna Cum Laude, or Summa Cum Laude. To earn these distinctions, a student must meet the following criteria:

1. At least one-half of the degree course work must have been completed at the University of Arkansas, Fayetteville.
2. Only the grade-point average on course work completed at the University of Arkansas, Fayetteville, will be considered.
3. For each of the three distinctive honors, the student must have the minimum grade-point average indicated.

<table>
<thead>
<tr>
<th>Honors</th>
<th>Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cum Laude</td>
<td>3.50–3.74</td>
</tr>
<tr>
<td>Magna Cum Laude</td>
<td>3.75–3.89</td>
</tr>
</tbody>
</table>
HOURS
4. Students may graduate with honors without participating in the Honors Program.

Rules Applying to Course Work Used for Degree Credit
1. No credit will be given for duplicate coursework.
2. A maximum of six hours of internship and six hours of special problem may be counted for degree credit.
3. Elective courses used for degree credit may be chosen from any department in the University and are subject to the approval of the academic adviser.
4. Students are encouraged to join the University band, chorus, and judging teams, and to participate in debate, drama, athletics, etc. A total of six semester hours of elective credits in such activities may be counted toward a degree. The maximum elective credits in any one activity that may be counted toward a degree are as follows:

<table>
<thead>
<tr>
<th>Activity</th>
<th>HOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Band and/or chorus</td>
<td>4</td>
</tr>
<tr>
<td>Drama and/or debate</td>
<td>4</td>
</tr>
<tr>
<td>Judging teams</td>
<td>4</td>
</tr>
<tr>
<td>Physical education activities or athletics</td>
<td>4</td>
</tr>
</tbody>
</table>
5. Any course taken by correspondence, including Web-based courses, must be approved in advance in the dean’s office if the credits earned in the course are to be applied toward a degree. This applies regardless of the school from which the course is taken.

Additional Requirements
In addition to the University requirements for graduation, including the University Core Requirements (page 40), a student must complete a prescribed degree curriculum in accordance with the rules and regulations of the Dale Bumpers College of Agricultural, Food and Life Sciences to be eligible for a baccalaureate degree from the college.

Former students of the college who are readmitted after an absence of one year may be expected to meet the curriculum requirements in effect at the time of their readmission. Students should consult their academic adviser for degree planning before registering for classes.

Students interested in earning an additional bachelor’s degree should refer to the University requirements on page 40.

HONORS PROGRAM
The Bumpers College Honors Program provides students with opportunities for intellectual enrichment beyond the traditional undergraduate experience. This is accomplished through special honors courses, completion of an undergraduate honors thesis, and other significant activities. Students must maintain a GPA of 3.25 to remain in the program.

Honors courses in the college may be chosen from the following:
AFLS 1011H Honors Orientation
AFLS 102VH Honors Special Topics for Freshmen
AFLS 400H Honors Thesis
AFLS 401VH Honors Special Topics

Other college-wide courses include:
AFLS 1011 Freshman Orientation
AFLS 300V Study Abroad

The results of the student’s original research or creative project can be published in Discovery, the college undergraduate research journal. In support of these efforts, participants in the Honors Program are eligible to receive an honors stipend in support of their research projects. The transcript and diploma of each honors graduate will designate the student as an honor graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia and have the title of his or her honors thesis and mentor’s name listed in the graduation program. Honors graduates will be recognized as graduating with Honors distinction.

DEGREE REQUIREMENTS
The B.S.A., B.S.H.E.S., and B.I.D. degrees will be conferred upon students who have met all the general University and college requirements for a degree, and who have completed 124 semester hours in accordance with the college requirements.

Students, with the assistance of a faculty adviser, will plan a program best suited to their own background, training, and objectives. The program of study will be decided after consideration of a student’s preparation, aptitudes, test scores, and other information. Undeclared students will work with an adviser as they explore program opportunities within the college. Students must inquire about specific requirements in the department or school where the major is located. Students are responsible for meeting all requirements for graduation.

Selection of a Major
A student whoelects to major in some area of agricultural, food and life sciences or human environmental sciences should plan the program with a faculty adviser. While undecided students are welcome, early selection of a major will permit better planning and proper sequencing of courses. The student and faculty adviser work closely to ensure that curriculum requirements are met in a timely fashion. A student uncertain about a major will be advised as an undeclared major through the dean’s office.

Degree Requirements:

1. A total 124 semester hours with a minimum 2.0 cumulative grade-point average.
2. University Core Requirements: See page 40
   - Check requirements for each major; some require specific core courses.
3. Other University Requirements
   - ENGL 2003, Advanced Composition or ENGL 2013 (See page 41 for details.)
4. College Requirements
   - COMM 1313
   - Communications Intensive Elective
   - See majors for specific requirement.
5. A minimum of 39 hours of courses at the 3000-level and above.
6. Electives: May be used to develop a minor
7. Departmental Requirements
   - See specific majors and concentrations
   - Bumpers College courses outside of major may be included in departmental requirements

GRADUATE STUDIES
The Graduate School of the University, in cooperation with the Dale Bumpers College of Agricultural, Food and Life Sciences, offers the master of science degree in each of its nine departments and in one school. Six doctoral degrees are offered. More detailed information regarding individual programs may be obtained by contacting the administrative office of each department, or by consulting the Graduate School Catalog.
ACCREDITATIONS

The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.) degree programs are accredited by the Council for Professional Development of the American Association of Family and Consumer Sciences. The degree program in dietetics is accredited by the Commission on Accreditation for Dietetic Education of the American Dietetics Association. The Bachelor of Interior Design (B.I.D.) degree is accredited by the Foundation for Interior Design Foundation Research (FIDER). The Nursery School and the Infant Development Center in the School of Human Environmental Sciences are accredited by the National Association for the Education of Young Children (NAEYC). The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) in food science is accredited by the Institute of Food Technologists. Teacher education programs in agriculture and family and consumer sciences are coordinated with educational programs in the College of Education and Health Professions and are accredited by the National Council for Accreditation of Teacher Education (NCATE).

Departmental Majors

AGRICULTURAL AND EXTENSION EDUCATION (AEED)

Don R. Herring
Head of the Department
205 Agriculture Building
479-575-2035

• Professors Graham, Herring, Johnson, Wardlow
• Adjunct Professors Lyles, Baker
• Associate Professors Arthur, Scott
• Assistant Professor Miller
• Adjunct Assistant Professors Burch, Plafcan

Agricultural Education, Communication, And Technology (AECT)

The department of agricultural and extension education offers a degree program in agricultural education, communication and technology. Students with this major are in constant demand due to the rapidly changing educational needs of the agricultural and natural resources industries. Graduates with this degree have a broad knowledge of agricultural disciplines. They are prepared as agricultural technology transfer specialists to enter a variety of careers in formal and non-formal teaching roles in either the public or private sector as agricultural educators, Extension agents, industry-based trainers, information specialists, or technology-management specialists. Students in agricultural education, communication and technology may choose one of four areas of concentration listed below, or, with adviser’s approval, select courses from more than one concentration area.

Agricultural Education Concentration (AGED)

This area of concentration is designed for students who wish to be certified to teach agricultural science in public schools. Students may choose one of two options for teacher certification: either a four-year certification program or a five-year certification program that culminates in a master’s degree (M.A.T.). The department of agricultural and extension education has information about both programs. Admission and graduation requirements for the M.A.T. program are listed in the College of Education and Health Professions section of this catalog.

Extension and Industry Education Concentration (EXIE)

This concentration is designed for students who desire employment as professional educators/change agents with either the Cooperative Extension Service or in agricultural business and industry. Graduates from this program are in demand because it combines strong leadership, team management, communication, and human relations skills with a broad base of competencies in agricultural sciences.

Agricultural Systems Technology Mgmt. Concentration (ASTM)

Students planning a professional career related to technical operations and management in agricultural industry should enroll in this concentration. Graduates assume positions of leadership and responsibility in such areas as agricultural services and sales, agricultural management, agricultural production systems, product service, product testing, and service management. The program focuses on preparing students as problem solvers in the application, management and/or marketing of agricultural technology.

Agricultural Communications Concentration (ACOM)

This concentration is designed to produce graduates with both technical knowledge about the food and fiber industry and the communication skills needed to convey in an effective manner the story of agriculture to consumers, policy makers, and the public at large. Interpersonal and group communication, public relations, graphic art, video and television production, electronic communication, distance learning, video conferencing, and writing for the media are emphasized in this program.

Requirements for a major in agricultural education, communication and technology (See page 40 for University Core and page 63 for B.S.A. requirements.)

35 hours of University Core Requirements to include:

ENGL 2003 (exemption possible)
MATH 1203 (College Algebra or higher)
BIOL 1543/1541L Principles of Biology/Lab
CHEM 1074/1071L Fundamentals of Chemistry/Lab, or CHEM 1103/1101L and CHEM 1123/1121L
WLIT 1113 or WLIT 1123 (required for AGED concentration)
AGEC 1103 Principles of Agricultural Microeconomics, or AGEC 2103 Principles of Agricultural Macroeconomics
PSYC 2003 General Psychology

College Requirements

COMM 1313 Fund. of Communication
AGED 3142/3141L Agricultural Communications

Departmental Requirements (83 hours)

(see concentration for course selection):
AGED 1001 Orientation to Agricultural & Extension Education
AFLS 1011 Freshman Orientation
AGED 3153 Leadership Development in Agriculture
AGED 4003 Issues in Agriculture
AGME 1613/1611L Fundamentals of Ag Systems Tech/Lab
AGME 2903 Application of Microcomputers
AGME 4011 Senior Seminar
ANSC 1011 Fresh Introductory Animal Science
ANSC 1051 Intro. to the Livestock Industry
CHEM 2613/2611L Organic Physio Chemistry
BIOL 2013/2011L General Microbiology, or PHYS 1044 Physics for Architects
CSES 2203 Soil Science
CSES 2201L Soil Science/Lab, or
Additional Requirements for Agricultural Education Concentration (AGED):

For teacher certification
Agricultural electives 6-9 hours – selected in conjunction with adviser plus the following courses:
AGED 1122 Agricultural Youth Organizations
AGED 3133 Methods in Ag Ed
AGED 4012 Program Development
AGED 4632 Teaching Diverse Populations in Agriculture
AGED 4843 Methods in Ag. Labs
CIED 1002 Intro. to Education
AGED 1031 Intro. to Early Field Experience
CIED 3023 Survey of Exceptionalities
CIED 3033 Classroom Learning Theory
ETEC 2001/2002L Educational Technology/Lab, or
AGME 2903 Applications of Microcomputers
HLSC 3633 First Responder/First Aid
HORT (3 elective hours)
Choose 8 hours from the following AGME courses:
AGME 2123 Metals and Welding
AGME 3042 Agricultural Construction Technology
AGME 3102/3101L Small Power Units/Turf Equipment/Lab
AGME 3153 Surveying in Agriculture and Forestry
AGME 3173/3170L Electricity in Agriculture/Lab
AGME 4203/4200L Mechanized Systems Management/Lab
AGME 4973/4970L Irrigation/Lab
monds of Agricultural and Extension Education.

Additional Requirements for Extension and Industry Education Concentration (EXIE) (14-21 hours):

EXED 4173, EXED 475V, and Management elective or
EXED 4183 or RSOC 4623.

Additional Requirements for Agricultural Systems Technology Management Concentration (ASTM) (23-30 hours):

AGED 2303 Introduction to Agribusiness
AGED 3403 Farm Business Management
AGED 4313 Agricultural Business Management
Select 14-21 hours from the following:
AGME 2123/2120L Metals and Welding/Lab
AGME 3153 Surveying in Agriculture and Forestry
AGME 3102/3101L Small Power Units/Turf Equipment/Lab
AGME 3173/3170L Electricity in Ag./Lab
AGME 402V Special Topics in Agricultural Mechanization
AGME 4203/4200L Mechanized Systems Management/Lab
AGME 4973/4970L Irrigation/Lab
ENS 3263/3260L Environmental Soil and Water Conservation/Lab
PHYS 220V Intro. Electronics I
PHYS 320V Intro. Electronics II
GEOG 4523 Computer Mapping
GEOG 4543 Geographic Info. Sys.
GEOG 4593 Intro. to Global Positioning Systems

Additional requirements for Agricultural Communications Concentration (ACOM) (20-23 hours):

COMM 2303 Public Speaking
JOUR 1023 Fundamentals of Journalism
JOUR 1023 Media and Society
AGED 4243 Publication Production in Agriculture
AGED 3942 Professional Development in Agri. Communication
JOUR 2032/2031L Broadcast News Reporting I/Lab
JOUR 3072/3071L Broadcast News Reporting II/Lab
JOUR 2332/2331L Photojournalism I/Lab
JOUR 3743 Public Relations Principles

Requirements for a minor in Agricultural Education (AGED-M):
22 hours to include the following:
CIED 1002, AGED 1031, ETEC 2002L/2001, or
AGME 2903, CIED 3023, CIED 3033, AGED 1122, AGED 3133, AGED 4843, and AGED 4012.
A student completing the requirements for this minor meets the education hours required for entry into the master of arts in teaching (M.A.T.). Students interested in being certified to teach must contact the department of agricultural and extension education for additional requirements to enter the M.A.T. program.

Requirements for a minor in agricultural systems technology management (ASTM-M):
18 hours to include AGME 1613 and AGME 2903 and
12 hours selected from the following:
AGME 1611L, AGME 2123, AGME 3153, AGME 3102/3101L,
AGME 3173, AGME 4203, AGME 4973, ENSC 3263
Students planning to minor in ASTM should contact the department of agricultural and extension education.

Requirements for a minor in extension and industry education (EXIE-M):
18 hours to include
AGED 1122, AGED 1001, EXED 3023, AGED 3133 or
EXED 4173, EXED 475V, and Management elective or
EXED 4183 or RSOC 4623.
Select 3 additional hours from COMM 2303, COMM 3303, and
JOUR 1033 or AGED 3142/3141L.
Students planning to minor in EXIE should contact the department of agricultural and extension education.

Requirements for a minor in journalism (JOUR-M):
18 hours. See page 64 for specific requirements.
SEE PAGES 243, 280, AND 243 FOR AGRICULTURAL AND EXTENSION EDUCATION COURSES (AGED, EXED, OR AGME).
AGRICULTURAL ECONOMICS AND AGRIBUSINESS (AEAB)

M. J. Cochran
Head of the Department
217 Agriculture Building
479-575-2256

• University Professor LaFerney
• Professors Cochran, Dixon, Goodwin, Redfern, Wailes
• Adjunct Professors Millager, Miller
• Associate Professors Ahrendsen, McKenzie, Parsch, Popp (J.), Popp (M.), Thomsen
• Assistant Professors Rainey, Watkins
• Adjunct Assistant Professors Bryant, Doekson, Robinson
• Adjunct Instructor Hipp

The agricultural business degree program provides education suited to career opportunities in farm management, agricultural business management, and agricultural marketing in both the domestic and international areas.

Managers of farms and agricultural businesses are continually required to make organizational and operational decisions. The basic skills and knowledge needed for making sound decisions are provided by the agricultural business curriculum. Students may elect to specialize in areas compatible with their personal objectives, depending upon the extent of accounting and business orientation desired.

Students educated in agricultural business are in demand for positions in agricultural industries, farm operation, marketing agencies, agricultural service organizations, state and federal agencies, and numerous other positions. For those who go on to graduate school, teaching and research positions are available with land grant colleges as well as with other institutions. Three concentrations are available to meet career objectives:

A. Agricultural Business Management and Marketing (ABMM)
B. Pre-Law, for students preparing to attend law school (PRLW)
C. Agricultural Economics, which emphasizes quantitative and analytical skills to prepare students for graduate school (AGEC).

Requirements for a B.S.A. degree with a major in Agricultural Business:
(See page 40 for University Core and page 63 for B.S.A. requirements).
35 hours of University Core requirements to include the following:
PSYC 2003 or SOCI 2013 or RSOC 2603
AGEC 1103
AGEC 2103

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and
3 hours communication elective selected from:
AGED 3142/3141L, COMM 2303, COMM 2373,
COMM 3303, COMM 3383, or ENGL 3053
General Electives – 20 hours
College Broadening Electives – 9 hours

Departmental Requirements (51 hours)
Concentrations A, B and C:
Departmental Core (21 hours)
AGEC 2303 Intro. to Agribusiness
AGEC 3303 Food & Ag Marketing
AGEC 3403 Farm Business Mgmt.

Concentration A: Agricultural Management and Marketing (30 hours):
AGEC 2143 Agribusiness Financial Records or
WCOB 1023 Business Foundations
AGEC 3373 Futures & Options Markets
AGEC 3313 Agribusiness Sales
AGEC 3413 Principles of Environmental Economics
AGEC 4113 Agricultural Prices and Forecasting or
AGEC 4373 Advanced Price Risk Management
AGEC 4303 Advanced Agricultural Marketing Management or
AGEC 4313 Agribusiness Management
AGEC 2403 Quantitative Tools for Agribusiness or
WCOB 1033 Data Analysis and Interpretation
9 hours of AGEC, WCOB, ECON, MATH or STAT

Concentration B: Pre-Law (30 hours):
AGEC 2143 Agribusiness Financial Records
AGEC 2403 Quantitative Tools for Agribusiness or
WCOB 1033 Data Analysis and Interpretation
AGEC 3413 Principles of Environmental Economics
AGEC 3523 Environmental & Natural Resource Law
AGEC 4303 Advanced Agricultural Marketing Management or
AGEC 4313 Agricultural Business Management
15 hours (with courses from at least two areas)
1) Business Law
BLAW 3033 Commercial Law
BLAW 3043 Law of Business Organization
WCOB 1012 Legal Environment of Business
2) Communication
COMM 2303 Public Speaking
COMM 2373 Intro to Debate
COMM 3303 Small Group Discussion
COMM 3383 Persuasion
COMM 3353 Argumentation: Reason in Communication
COMM 3443 Intro to Rhetorical Theory
COMM 4113 Legal Communication
3) Philosophy
PHIL 2003 Intro to Philosophy
PHIL 2103 Ethics
PHIL 2203 Logic
PHIL 3103 Ethics in Professions
PHIL 4143 Philosophy of Law
4) Political Science
PLSC 3103 Public Admin
PLSC 3153 Public Policy
PLSC 4193 Admin Law
PLSC 5243 Judicial Process
PLSC 4253 Supreme Court and Constitution
PLSC 4263 Supreme Court and Civil Rights
5) Agriculture
Any upper division AGEC courses

3/3 Program
Exceptional students in the Pre-Law concentration may enroll in the Law School in their fourth year provided that the following requirements have been met:
1. completed all University, college, and department core requirements for the pre-law concentration;
2. completed 12 hours in the specialization list for pre-law;
3. a cumulative grade-point average in all college or University course work of at least 3.50 without grade renewal;
4. an LSAT score of at least 159. A student may substitute law school course work for the remaining total hours required for the bachelor’s degree in agricultural business.

It is a requirement of the Law School’s accrediting standards that no student be admitted to Law School until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in the 3/3 program satisfy this requirement.

Concentration C: Agricultural Economics (30 hours):
AGEC 3373 Futures & Options Markets
AGEC 4313 AgBusiness Management or
AGEC 4303 Advanced Ag Marketing Mgmt
ECON 3033 Microeconomic Theory
ECON 3133 Macroeconomic Theory
MATH 2043 Survey of Calculus
WCOB 1023 Business Foundations
WCOB 1033 Data Analysis & Interpretation or
STAT 4003/4001L Statistical Methods/Lab
WCOB 2033 Acquiring & Managing Human Resources
6 hours of electives from MATH, STAT or upper division electives from AGEC and courses offered by departments in the WCOB.

Requirements for a minor in Agricultural Business (AGBS-M):
18 semester hours to include AGEC 1103 and AGEC 2303;
6 hours from AGEC 3303, AGEC 3373, AGEC 3403,
AGEC 3413, or AGEC 4313; and
6 hours to be selected from the following:
AGEC 2103 AGEC 3303 AGEC 3373
AGEC 3403 AGEC 3413 AGEC 3503
AGEC 4113 AGEC 4143 AGEC 4303
AGEC 4313 AGEC 4373 AGEC 4403
AGEC 4413 AGEC 4613 AGME 2903
ECON 3033 ECON 3133 ECON 3533
ECON 4633 FINN 3043 FINN 3623
JSYS 3603 MGMT 3563 MGMT 3933
MGMT 4403 MGMT 4433 MKTG 3433
MKTG 3533 MKTG 4033 MKTG 4553
MKTG 4933 MKTG 4943 STAT 4003/4001L
WCOB 1023 WCOB 1033 WCOB 1012

Additional upper-division courses in the Sam M. Walton College of Business may be substituted with approval, provided prerequisites for those courses have been satisfied outside the minor. Students interested in postgraduate study in agricultural economics may obtain adjustments to these requirements to accommodate graduate admission requirements.

SEE PAGE 242 FOR AGRICULTURAL ECONOMICS AND AGRIBUSINESS (AGEC) COURSES.

ANIMAL SCIENCE (ANSC)
Keith Lusby
Head of the Department
B114 Dale Bumpers College of Agricultural, Food, and Life Sciences Building
479-575-4351

• Professors Brown (A.H.) Coffey, Jennings, Kellogg, Lusby, Maxwell, McNew, Pennington, Roeder, Rorie, Rosenkrans, Troxel
• Adjunct Professors Brown (M.A.), Baird, Burke, Chewning, Friesen, Looper, Nugent,
• Associate Professors Apple, Coblenz, Gunter, Johnson, Kegley, Kreider, Pohlmian
• Assistant Professors Beck, Powell, Jack
• Adjunct Assistant Professors Gadberry, Looper, M. Roeder
• Instructor Kutz

The animal science major is designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility. Students gain valuable experience pertaining to the production of beef and dairy cattle, swine, horses, sheep, and companion animals. In addition, extensive study is offered in the specialized areas of animal health, breeding and genetics, meat science, nutrition, and physiology.

Students majoring in animal science are prepared for a variety of careers. Pre-veterinary, pre-medical, and pre-professional course requirements may be fulfilled while meeting degree requirements. Specific career opportunities include positions and services related to the production, merchandising, processing and distribution of meat, milk, and related products. Additional opportunities include field persons, farm and herd managers, and other agribusiness-related positions. With additional academic training, animal science majors may become extension livestock specialists, nutritionists, geneticists, and physiologists.

Requirements for a B.S.A. degree with a major in Animal Science:
(See page 40 for University Core and page 63 for B.S.A. requirements)
35 hours of University Core Requirements to include the following:
BIOL 1543/1541L
CHEM 1074/1071L
University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and
3 hours communication elective (See adviser for approved course.)
Electives: 20 hours

Departmental Requirements:
58 hours to include the following:
CHEM 2613/2611L
BIOL 2013/2011L and the following animal science courses:
ANSC 1001L Intro. Animal Science Lab
ANSC 1032 Intro. Animal Sciences
ANSC 1041 Intro. Companion Animal Industry
ANSC 1051 Intro. Livestock Industry
ANSC 2252L Intro. to Livestock and Meat Evaluation
ANSC 2781 Career Preparation and Development
ANSC 3133 Animal Breeding/Genetics
ANSC 3143 Principles of Animal Nutrition
ANSC 3433 Reproductive Physiology

Select 7 hours from the following:
ANSC 4252 Cow–Calf Management
ANSC 4263 Swine Production
ANSC 4272 Sheep Production
ANSC 4283 Horse Production
ANSC 4452 Milk Production
ANSC 4652 Stocker–Feedlot Cattle Management
Select 15 hours from the following discipline-related electives:
ANSC 2003  ANSC 2213  ANSC 2304
ANSC 2482  ANSC 3282  ANSC 3291
ANSC 3491  ANSC 3691  ANSC 3723
ANSC 400V  ANSC 401V  ANSC 410V
ANSC 4291  WCOB 1023  WCOB 1012
AGEC 1103  AGEC 2103  AGEC 3203
AGME 2903  CSES/HORT 1203  BIOL 2533/2531L
CHEM 1103/1101L  CHEM 1123/1121L  CHEM 2262
CHEM 2272  CSES 2013  FDSC 2503
PHYS 2013/2011L  PHYS 2033/2031L  POSC 2353
POSC 2363  POSC 2554  BIOL 1603/1601L

and any upper-division course in
AGEC, AGEJ, AGME, CSES, AGST, BIOL, CHEM, FDSC,
HORT, POSC, WCOB.

Students should consult an animal science advisor for specific course selections in the elective areas. With appropriate advising, students have an opportunity to complete at least one minor within the 124-hour degree program.

Requirements for a minor in Animal Science (ANSC-M):
20 hours to include ANSC 1001L, ANSC 1032, ANSC 1041 or ANSC 1051, ANSC 2252L, ANSC 3133, ANSC 3143, ANSC 3433, and 5 hours from the following production and management courses: ANSC 452, ANSC 453, ANSC 4272, ANSC 4283, ANSC 4452, and ANSC 4652.

Students wishing to minor in animal science must consult with an animal science advisor.

Requirements for a minor in Equine Science (EQSC-M):
A minor in Equine Science prepares students for jobs in the equine industry. 20 hours to include ANSC 1032, ANSC 1041, ANSC 2003, ANSC 3723, ANSC 3822, ANSC 3433, ANSC 4283, (corequisite: 4280L, prerequisites: ANSC 1032, ANSC 3433), and 3 hours from any of the following courses: ANSC 401, ANSC 3143, (prerequisites: CHEM 1074 and CHEM 1071L), ANSC 3133 (corequisite: ANSC 1032), ANSC 3333 (corequisite: ANSC 3330L, prerequisites: ANSC 3032, ANSC 3042, BIOL 2013, BIOL 2011L), ANSC 3003 (corequisites: ANSC 300L, prerequisite: ANSC 1032), ANSC 2213

This minor is available to all students.

SEE PAGE 244 FOR ANIMAL SCIENCE (ANSC) COURSES.

BIOLOGICAL ENGINEERING (BENG)
Lalit Verma
Head of the Department
203 Engineering Hall
479-575-2351
Protection Agency, Natural Resources Conservation Service), municipalities and local environmental services (e.g., waste management and recycling, water and wastewater treatment facilities, parks and tourism departments), and a wide variety of private businesses. Many graduates from both majors also choose to continue their education in graduate programs in a wide variety of disciplines both related and complementary to the B.S. degrees.

**CROP MANAGEMENT**

*Requirements for a B.S.A. degree with a major in Crop Management.*

(See page 40 for University Core and page 63 for B.S.A. requirements)

- 35 hours of **University Core requirements** to include
  - CHEM 1103/1101L and
  - CHEM 1123/1121L
  - AGEC 1103
  - AGEC 2103 (For students wishing to minor in Ag. Business)

**University Advanced Composition Requirement:**

ENGL 2003. If exempt, ENGL 3053 is required.

**College Requirements:**

COMM 1313 and Communication Elective CSES 3023
Electives: 17 hours

**Departmental Requirements:** 63 hours

**General Agronomy:**

- CSES/ENSC 1011 Intro. to Crop, Soil and Environmental Science
- AGME 2903 Applications of Microcomputers, or
  - CSCE 1003 Survey of Computer Concepts, or
  - AGST 4023 Principles of Experimentation, or
  - STAT 2303 Principles of Statistics
  (students wishing to minor in Ag Business should not choose CSCE 1003)
- BIOL 1543/1541L Principles of Biology/Lab
- BIOL 1613/1611L Plant Biology/Lab
- BIOL 4304 Plant Physiology, or
  - ANSC/POSC 3123 Principles of Genetics, or
  - BIOL 3323 General Genetics
- CHEM 2613/2611L Organic Physiological Chemistry/Lab
- ENTO 3013 Intro. to Entomology
- PLPA 3004 Principles of Plant Pathology
- CSES 2103/2101L Crop Science/Lab
- CSES 2203/2201L Soil Science/Lab
- CSES 4013 Advanced Crop Science
- CSES 4133/4130L Weed ID, Morphology and Ecology/Lab
- CSES 4143/4140L Principles of Weed Control/Lab
- CSES 4224 Soil Fertility
- CSES 462V Internship, or
  - CSES 400V Special Problems (1–3 hrs)

Select a total of 8 hours from groups A and B
(at least 2 courses from Group A)

**Group A:**

- CSES 3113 Forage Management
- CSES 3312 Cotton Production
- CSES 3322 Soybean Production
- CSES 3332 Rice Production
- CSES 3342 Cereal Grain Production
- CSES 400V SP: CCA Review/Certification (1 hr)
- HORT 2303 Intro. to Turfgrass Mgmt.

**Group B:**

- CSES 3214 Soil Resources and Nutrient Cycles
- CSES 4103 Plant Breeding
- CSES 4234 Plant Anatomy
- CSES 4253 Soil Classification and Genesis
- CSES 355V Soil Profile Description (1–2 hrs)
- CSES 400V Special Problems (1–6 hrs)
- PLPA 4333 Intro. to Biotechnology

Select an additional 9 hours to complete one of the following minors:

**Agricultural Business:**

Crop Management majors may take 9 hours from this group to complete the requirements for a minor in Agricultural Business. Students should retain a second advisor in the minor field. (See page 71 for all requirements for Agricultural Business minor)

- AGEC 2303 Intro. to Agribusiness
- AGEC 3403 Farm Business Management
- AGEC 3303 Food and Agricultural Marketing, or
  - AGEC 3373 Futures and Options Markets, or
  - AGEC 3413 Principles of Environmental Economics, or
  - AGEC 4313 Agricultural Business Management

**Pest Management:**

Crop Management majors may take 9 hours from this group to complete the requirements for a minor in Pest Management. Students should retain a second advisor in the minor field. (See page 84 for all requirements for Pest Management minor)

- CSES 4143 Principles of Weed Control
- PLPA 4103 Plant Disease Control
- ENTO 4123 Insect Pest Management I, or
  - ENTO 4133 Advanced Applied Entomology

**ENVIRONMENTAL, SOIL, AND WATER SCIENCE (ESWS)**

*Requirements for a B.S.A. degree with a major in Environmental, Soil, and Water Science:*

(See page 40 for University Core and page 63 for B.S.A. requirements)

- 35 hours of **University Core requirements** to include:
  - CHEM 1103/1101L and
  - CHEM 1123/1121L
  - MATH 2043 Survey of Calculus

**University Advanced Composition Requirement:**

ENGL 2003 (exemption possible)

**College Requirements:**

COMM 1313 and
3 hours communication elective selected from the following:

- AGED 3142/3141L
- CSES 3023 or any course from ENGL, JOUR, or COMM

Electives: 20 to 21 hours

**Departmental Requirements:** 59–60 hours

- BIOL 1613/1611L Plant Biology/Lab, or
  - CSES 1203 Intro. to Plant Sciences
- BIOL 1543/1541L Principles of Biology/Lab
- BIOL 3863/3861L General Ecology/Lab, or
  - ENSC 3223/3221L Ecosystems Assessment/Lab
- CHEM 2613/2611L Organic Physiological Chem/Lab
- GEOL 1113/1111L General Geology/Lab
- BIOL 2013/2011L General Microbiology/Lab
AGST 4023 Principles of Experimentation, or
STAT 2023 Biostatistics, or
STAT 2303 Principles of Statistics
PHYS 2013/2011L College Physics I/Lab

Environmental Sciences Core:
CSES/ENSC 1011 Intro. to Crop, Soil, and Environmental Sciences
CSES 2203/2201L Soil Science/Lab
ENSC 1003 Environmental Science
ENSC 3003 Intro. to Water Science
Select 3 hours from Soil Science:
CSES 3214/3210D Soil Resources and Nutrient Cycles/Disc
CSES 4224/4220L Soil Fertility/Lab
CSES 4253/4250L Soil Classification and Genesis/Lab
CSES/ENSC 4263 Environmental Soil Science
Select 3 hours from Water Science:
ENSC 4023/4020L Water Quality/Lab
GEOL 4033/4030L Hydrogeology/Lab
BIOL 4814/4810L Limnology/Lab
GEOG 3333 Oceanography
Select 12 hrs from at least 2 of the following 3 groups:
Methods/Techniques in Environmental Science
CSES 355V Soil Profile Descriptions (1-2 hours)
CSES/BENG 4803 Precision Agriculture
ENSC 3253 Septic Systems
ENSC 3603 GIS for Environmental Science
ENSC 4034 Analysis of Environmental Contaminants

Environment and Society:
AGEC 3413 Principles of Environmental Economics
AGEC 3503 Agricultural Law
ENSC 3933 Environmental Ethics
RSOC/SOCI 4603 Environmental Sociology

Natural Resource Systems/Management:
CSES 2103 Pest Management
ENSC 3103 Plants and Environmental Restoration
ENSC 3263/3260 Environmental, Soil, and Water Cons./Lab

Environmental science courses transferred from Northwest Arkansas Community College, University of Arkansas at Fort Smith and the University of Arkansas at Little Rock can be used to fulfill selected ESWS requirements. Consult an academic adviser to verify transfer applicability.

Requirements for a minor in Crop Management (CPMG-M):
18 semester hours of 2000-level courses or above including CSES 2103 and CSES 2203 and an additional 12 hours from the courses listed below, with at least two courses from Group A.

Group A:
CSES 3113, CSES 3312, CSES 3522, CSES 3532, CSES 3342

Group B:
CSES 2003, CSES 3214, CSES 4013, CSES 4103, CSES 4133, CSES 4143, CSES 4224 and CSES 4234.

Requirements for a minor in Environmental, Soil, and Water Science (ESWS-M):
18 semester hours of courses to be selected from the following three groups

Group A: Environmental science (6 hours)
to include ENSC 1003 and
3 additional hours from AGEC 3413, AGEC 3503,
BIOL 3863/3861L, ENSC 3223, ENSC 3253, ENSC 3103,
ENSC 3603/3601L
ENSC 3263/3260L, ENSC 3933, ENSC/AGEC 4413
ENSC 4034, GEOL 1113/1111L, RSOC/SOCI 4603

Group B: Soil science (6 hours)
to include CSES 2203 and
3 additional hours from CSES 3214, CSES 355V, CSES 4224,
CSES 4253, CSES/ENSC 4263

Group C: Water science (6 hours)
to include ENSC 3003 and
3 additional hours from
ENSC 4023/4020L, GEOL 3333, GEOL 4033, or BIOL 4814.

A student planning to minor in environmental, soil, and water science should notify the department of crop, soil, and water sciences and consult with an academic adviser.

Requirements for a minor in Wildlife Habitat (WLHA-M):
20 semester hours to be selected from the following three groups. (A maximum of 9 hours of CSES or ENSC courses will be allowed to fulfill the requirements for both a major and minor in the Department of Crop, Soil and Environmental Sciences.)

Group A
12 hours from the following:
CSES 1203, or CSES 2103, or BIOL 1613/1611L
CSES 2203, ENSC 3103, and BIOL 4933
Select the remaining 8 hours from the following two groups with at least one course from each group:

Group B:
ENSC 1003, ENSC 3003, ENSC 3223, ENSC 3603,
BIOL 3863, BIOL 3861L, or CSES 462V (suggested internship
with the Arkansas Game and Fish Commission or the Natural
Resources Conservation Service)

Group C
AGEC 3413, BIOL 4723, BIOL 4763, BIOL 4833,
BIOL 5743, BIOL 5783, CSES 2201L, CSES 355V,
CSES 4133, CSES 4253, ENTO 3013, GEOG 3003,
GEOG 3343, GEOG 4093, RECR 1023

A student planning to minor in Wildlife Habitat must notify the Department of Crop, Soil and Environmental Sciences and consult an advisor for more detailed information.

Requirements for a minor in Crop, Soil, and Environmental Science (CSES) Courses and see page 279 for Environmental Science (ENSC) Courses.
The food science concentration at the University of Arkansas is one of only 45 programs in the United States and the only one in Arkansas that provides a curriculum that is approved by the Institute of Food Technologists (IFT).

Food science is the discipline in which the engineering, biological, and physical sciences are used to study the nature of foods, the causes of deterioration, the principles underlying food processing, and the improvement of foods for the consuming public. Food technology is the application of food science to the selection, preservation, processing, packaging, distribution, and use of safe, nutritious, and wholesome food. A major in food science prepares students for both research and development, quality control and assurance, value-added product development, sensory analysis, and food safety.

The food technology concentration provides students with an integrated background in food science and agribusiness and business. Students in the food technology concentration can readily complete a minor in agribusiness or business.

Ample elective hours exist in both concentrations to allow the selection of a minor in any of the Bumpers, Fulbright, or Walton colleges.

Requirements for a B.S.A. degree with a major in Food Science:
(See page 40 for University Core and page 63 for B.S.A. requirements)
35 hours of University Core requirements to include:
BIOL 1543/1541L
CHEM 1103/1101L
ECON 2143 or AGEC 1103 and AGEC 2103
for Food Technology Concentration

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and
3 hours communication selected from:
AGED 3142/3141L
ENGL 3053 for Food Science concentration
Electives: 18 to 19 hours

Departmental Requirements: 72-73 hours
BIOL 2013/2011L
CHEM 2613/2611L
AFLS 1011 Freshman Orientation
FDSC 1011 Food Science Orientation
FDSC 3103/3100L Principles of Food Processing/Lab
FDSC 4713/4710L Food Product Development/Lab

Requirements for Food Science Concentration (FDSC):
CHEM 3813 Intro. to Biochemistry
MATH 1213 Trigonometry
MATH 2554 Calculus I
PHYS 2013/2011L College Physics I
STAT 2303 or STAT 2023 or
PSYC 2013 or AGST 4023 (Statistics)
HESC 3204 Nutrition for Health Professionals and Educators
FDSC 4114/4110L Food Analysis/Lab
FDSC 4124/4120L Food Microbiology/Lab
FDSC 4203/4200L Quality Evaluation and Control/Lab or
FDSC 4413/4410L Sensory Evaluation of Food/Lab
FDSC 4304/4300L Food Chemistry/Lab
FDSC 4754/4750L Engineering Principles of Food Processing/Lab

Requirements for Food Technology Concentration (FDTN):
MATH 2043 Survey of Calculus
MATH 2053 Finite Math
FDSC 1103 Intro. to Food Science
FDSC 2503 Food Safety and Sanitation
FDSC 3202 Intro. to Food Law
FDSC 4203/4200L Quality Evaluation and Control/Lab
FDSC 431V(3) Internship
FDSC 4413/4410L Sensory Evaluation of Food/Lab
WCOB 1023 Business Foundations
WCOB 3310 Consumer Behavior
MGMT 3563 Mgmt. Concepts and Organizational Behavior or
AGEC 4313 Agricultural Business Management
Dale Bumpers College of Agricultural, Food and Life Sciences

MKTG 3433 Principles of Marketing or
AGEC 3303 Food and Agricultural Marketing
Select 6 hours from:
MGMT 3743 Human Resource Mgmt.
AGEC 2303 Intro. to Agribusiness
TLOG 3613 Business Logistics
AGEC 4143 Agricultural Finance or
any 3000-4000 Walton College of Business course

Requirements for a minor in Food Science (FDSC-M):
18 hours to include FDSC 3103, FDSC 4124, FDSC 4304 and 7 hours from FDSC 2503, FDSC 3202, FDSC 4114, FDSC 4203 or HESC 1213.
A student planning to minor in food science must consult a Department of Food Science adviser.

SEE PAGE 281 FOR FOOD SCIENCE (FDSC) COURSES

HORTICULTURE (HORT)
David L. Hensley
Head of the Department
316 Plant Sciences Building
479-575-2603

• Professors Klingaman, Morelock, Murphy, Clark, Hensley, Rom (C.)
• Associate Professors Evans, Richardson, Karcher, Lindstrom
• Research Associate Professors Anderson, Robbins
• Assistant Professor Srivastava
• Assistant Professor Emeritus McDaniel

The Department of Horticulture offers two major degree plans: horticulture (HORT) and turf and landscape horticulture (TLHT).

Horticulture involves production, management, marketing, and use of ornamental crops (shrubs, trees, flowers, and turf) and edible crops (vegetables and fruits) for the economic, aesthetic, and nutritional well-being of society. The horticulture major provides education in basic and applied sciences, arts and humanities, communication and leadership, business and economics, to provide an understanding of the underlying principles in plant growth and development, development and use of new technologies, and the actual operation of a horticultural enterprise. An internship in the industry is required to gain practical, hands-on experience. Job opportunities for horticulturists include horticulture crop production and management, horticulture merchandising and business, consulting, inspection, research, teaching, communications, allied industries serving horticultural producers, and developing private business. Advanced study may be required for some careers. Students pursuing the horticulture degree may choose to concentrate studies in one of three areas:
1. Horticulture Management and Production (HMAP)
2. Horticulture Science (HSCI)
3. Horticulture Merchandising (HMER).

The turf and landscape horticulture (TLHT) major blends broad training in turf and ornamental horticulture with a strong basis in science. This major also requires an internship in the industry to gain practical, hands-on experience. Students interested in careers related to golf course or sports turf management or to the diverse landscaping industries have two concentration options:
A) Turf Management (TMGM)
B) Landscape Horticulture (LHRT).

Turf management students will be exposed to the many aspects of the turfgrass industry and receive specific training in horticulture, environmental sciences, pest management, business, and communications. Landscape horticulture students will receive instruction in selection, care, and use of plant materials as well as the skills of management for the residential, commercial, or public landscapes.

Job opportunities for turf management graduates include golf course superintendent, sports field manager, turfgrass service companies, seed or sod production, green industry journalism, research, teaching, or private consulting. Landscape horticulture graduates will be prepared for careers in the landscape management industry, landscape nurseries, landscape architectural firms, private and public gardens, and public agencies such as parks and recreation.

HOUROCTURE (HORT)

Requirements for a B.S.A. degree with a major in horticulture:
(See page 40 for University Core and page 63 for B.S.A. requirements)
35 hours of University Core requirements to include:
BIOL 1613/1611L
CHEM 1074/1071L (except HSCI concentration – CHEM 1103/1101L)
3 hours from ECON 2143, ECON 2013, ECON 2023, or AGEC 1103, AGEC 2103

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and
3 hours Communication Elective.
See adviser for suggested list of courses.
Electives: 9-20 hours

Departmental Requirements: 53-63 hrs
AFLS 1011
CSES 2203/2201L
BIOI 4304/4300L

Select 3 hours from:
AGEC 3142/3141L, AGEC 4003, COMM 2323, COMM 2351, COMM 3303 or COMM 3703

Select 3-4 hours from:
PHYS 1023/1021L, PHYS 2013/2011L, PHYS 2054 or PHYS 1044, BIOI 3323/3321L or ANSC 3123
(NOTE: students must take the accompanying lab to courses)

Select 3 hours of environmental science, earth science, or geology.
See adviser for suggested list of courses.

Select 3 hours from:
AGEC or WCOB
See adviser for suggested list of courses.

Select 3 hours from:
CSES 2003, ENTO 3013, or PLPA 3004

14 hours of horticulture courses to include the following:
HORT 2003 Principles of Horticulture
HORT 4403 Plant Propagation
HORT 462V, HORT 463V, HORT 464V or HORT 465V Internship (3 hrs)
HORT 3901 Horticultural Career Development

Select 3 hours from:
HORT 3103 Woody Landscape Plants, or HORT 3113 Herbaceous and Indoor Plant Materials
Concentration A: Horticulture Management and Production (HMAP):
CHEM 2613/2611L

Select 3 hours from Turf and Landscape:
HORT 2303, HORT 4603 or HORT 4033

Select 3 hours from Edible Crops:
HORT 3303, HORT 4103/4100L

Select 3-4 hours from Plant Materials/Floriculture/Nursery/Greenhouse Crops:
HORT 3103, HORT 3113, HORT 4503, HORT 4703, or HORT 4803

Select 3-4 hours from Pest Management:
CSES 2003, ENTO 3013, or PLPA 3004

Concentration B: Horticulture Science (HSCI):
CHEM 1123/1121L, CHEM 2613/2611L
MATH 2043 or MATH 2554

Select 3 to 4 hours from:
BIOL 3323/3321L, ANSC 3123, PHYS 2013/2011L, PHYS 2054
(a genetics and physics class are required in the HSCI concentration).

9 hours of HORT classes 3000 level or above

Concentration C: Horticulture Merchandising (HMER):
Select 12 hours from horticulture management and production:
HORT 2303, HORT 3303, HORT 3403, HORT 4033,
HORT 4103, HORT 4503, HORT 4703, or HORT 4803

Select 3-4 hours from:
ANSC 3123 or CSES 2003, ENTO 3013, PLPA 3004,
AGME 3153, AGME 3102/3101L, AGME 4973

Select 3-4 additional hours from the preceding areas or from:
BIOL 4104, PHYS 2013/2011L, PHYS 2054/2050L, or
BIOL 3323/3321L

Select 6 hours of business courses from:
AGEC 2303, AGEC 3403, AGEC 3303, AGEC 3413,
MGM 3563, FINN 3043, FINN 3623,
WCOB 1012, WCOB 1023, WCOB 2013,
MKTG 3563, MKTG 4033, MKTG 4553, MKTG 4933,
MKTG 4943, JOUR 3723, ISYS 3603,
TLOG 3613 or TLOG 3623

Select 12 hours from:
AGEC, ACCT, BLAW, ECON, FINN, ISYS, MGMT or MKTG.
Students are encouraged to pursue an agricultural business or business minor.

TURF AND LANDSCAPE HORTICULTURE (TLHT)
Requirements for a B.S.A. degree with a major in Turf and Landscape Horticulutre:
(See page 40 for University Core and page 63 for B.S.A. requirements)
35 hours of University Core requirements to include:
BIOL 1613/1611L
CHEM 1074/1071L

3 hours from:
AGEC 1103, AGEC 2103, ECON 2013, ECON 2023, ECON 2143

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and
3 hours communication elective selected: See adviser for suggested list of courses.
Electives: 20-25 hours

Departmental Requirements: 60-61 hrs
AFLS 1011
CHEM 2613/2611L
CSES 2203/2201L
BIOL 4304/4300L

Select 3-4 hours from:
PHYS 1023/1021L, PHYS 2013/2011L, PHYS 2054,
PHYS 1044, BIOL 3323/3321L or ANSC 3123
(NOTE: students must take accompanying lab to courses).

Select 3 hours from AGEC or WCOB:
See adviser for suggested list of courses.
10 hours of Horticulture
HORT 2003 Principles of Horticulture
HORT 3103 Woody Landscape Plants, or
HORT 3113 Herbaceous and Indoor Plants
HORT 3901 Horticulture Career Development
HORT 462V or HORT 464V Internship (3 hrs)

Concentration A: Turf Management (TMGM)
26 hours from Turf Management and Soils to include:
HORT 2303 Intro. to Turfgrass Management
HORT 3403/3400L Turfgrass Management
HORT 4033/4030L Landscape Installation, or
HORT 4043 Landscape Management
HORT 4903/4900L Golf and Sports Turf
CSES 4224/4220L Soil Fertility
PLPA 3004/3000L Plant Pathology
AGME 3102/3101L Turf Equipment
AGME 4973/4970L Irrigation

Concentration B: Landscape Horticulture (LHRT)
HORT 2303 Intro. to Turfgrass Management
HORT 4033 Landscape Installation
HORT 4043 Landscape Management
HORT 4603 Practical Landscape Planning

Select 3 hours from:
HORT 5103/5100L Woody Plants,
HORT 3133/3130L Advanced Woody Plants, or
HORT 3113/3110L Herbaceous Plants

Select 6 hours from:
AGME 3153 Surveying,
AGME 3102/3101L Turf and Landscape Equipment, or
AGME 4973/4970L Irrigation

Select 6 hours of Pest Management:
CSES 2003/2000L
ENTO 3013/3010L or PLPA 3004/3000L
Requirements for a minor in Horticultural Production (HORT-M):
18 hours to include the following:

Select 9-11 hours from:
HORT 2303, HORT 4803, HORT 3303, HORT 4103, HORT 4503, HORT 4703, or HORT 400V.

Select 3 hours from:
HORT 3103, HORT 3113, or HORT 3133.

Requirements for a minor in Landscape Design and Urban Horticulture (LHRT-M):
18 hours to include HORT 2003, and HORT 4043, HORT 4603 or LARC Studio Course, HORT 3103 or HORT 3113.

Select 6 additional hours from:
HORT 2303, HORT 3103, HORT 3403, HORT 4043, or LARC 3734

Requirements for a minor in Turf Management (TURF-M):
19 hours to include the following:
CSES 2203/2201L.

Select 6 hours from:
HORT 2303, HORT 3403, or HORT 4903;
Select 6 hours from:
ENTO 400V, HORT 3103, HORT 4033, HORT 4043, or HORT 400V.

Select 3 hours from:
AGME 4973/4970L, AGME 3102/3101L

SEE PAGE 292 FOR HORTICULTURE (HORT) COURSES.

PLANT PATHOLOGY (PLPA)
Sung M. Lim
Head of the Department
217 Plant Sciences Building
479-575-2445

• University Professors Riggs, TeBeest
• Professors Correll, Gergerich, Kirkpatrick, Lee, Lim, Robbins, Rothrock, Rupe, Weidemann
• Associate Professors Cartwright, Fenn, Korth, Milus, Yang
• Lecturer Martin
• Adjunct Assistant Professors Jia, Vann

Plant pathology as a discipline seeks to understand the interrelationships of plants with the abiotic and biotic agents that affect plant health and productivity. The goal of the discipline is to minimize the impacts of plant diseases on agricultural production and human health. Scientific training within the department focuses on the nature, cause, and management of plant diseases caused by fungi, bacteria, viruses, and nematodes.

Plant pathology is a graduate degree program. Undergraduate students interested in plant pathology should pursue a minor in pest management or plant pathology. See page 63 for degree requirements.

Requirements for a minor in Plant Pathology (PLPA-M):
19 hours to include PLPA 3004, PLPA 400V and PLPA 4103. The remaining 9 hours to be selected from the following: BIOL 4353, BIOL 4304, BIOL 4424, BIOL 4233, and BIOL 4753. A student planning to minor in plant pathology should notify the department of plant pathology and consult an adviser.

SEE PAGE 320 FOR PLANT PATHOLOGY (PLPA) COURSES

POULTRY SCIENCE (POSC)
Walter G. Bottje
Head of the Department
0114 Poultry Center
479-575-4952

• University Professors Chapman, Waldroup (P.W.)
• Professors Anthony, Bottje, Coon, Erf, Goodwin, Hargis, Jones, Kirby, Kuenzel, Li, Slavik, Wideman
• Research Professors Donoghue (A.), Huffman (W.), Kath
• Adjunct Professors Brister, Haggard, Keck, Plue, Porter, Rhoads, Rosen, Steelman, Waldroup (A.), Zelenka
• Associate Professors Clark, Emmert, Marcy, Watkins
• Adjunct Associate Professors Story, Meulleneet
• Assistant Professors Bramwell, Donoghue (D.), Kwon, Owens
• Research Assistant Professor Huff (G.)
• Adjunct Assistant Professors Blair, Breeding, Cook, Davis, Fussell, Smith
• Adjunct Research Assistant Professor Pumford

A major in poultry science is designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility in the expanding fields of production, processing, marketing, and distribution of meat, eggs, and related poultry products. The curriculum also prepares students for career opportunities in specialized areas of nutrition, breeding, and genetics, physiology, management, food science, immunology, and disease.

Ample elective hours allow students to select a minor and thus personalize their degree. Elective hours can also be used to emphasize areas of business, production, processing, or science. Pre-veterinary medicine, pre-medical, or pre-pharmacy requirements may be fulfilled while meeting degree requirements.

Curricula are designed to permit the student to obtain the necessary foundation to pursue graduate study for the master’s and doctoral degrees. Advanced degrees are offered but not limited to the areas of nutrition, genetics, physiology, product technology, and poultry health.

Requirements for a B.S.A. with a major in Poultry Science:
(See page 40 for University Core and page 63 for B.S.A. requirements)
35 hours of University Core Requirements to include:
BIOL 1543/1541L
CHEM 1103/1101L

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirements:
COMM 1313 and 3 hours Communication electives chosen from any of the following:
AGED 3142/3141L
COMM 2303, COMM 2323, COMM 3303, COMM 3703, COMM 4323 or COMM 4343
ENGL 1213, ENGL 2013, ENGL 2023, or ENGL 3053
JOUR 1033
Departmental Requirements: 48 hours to include:
CHEM 1123/1121L, CHEM 2613/2611L
STAT 2303
BIOL 2013/2011L
and the following poultry science courses:
POSC 1002L Intro. to Poultry Careers Lab
POSC 2353 Broiler/Turkey Production
POSC 2363 Breeder/Layer Management
POSC 2554 Poultry Biology
POSC 3032 Animal Physiology I
POSC 3042 Animal Physiology II
POSC 3123 Principles of Genetics
POSC 3223 Poultry Diseases
POSC 4213 Integrated Poultry Mgmt.
POSC 4314 Egg and Meat Tech.
POSC 4343 Poultry Nutrition
POSC 4901 Undergraduate Seminar

Requirements for a minor in Poultry Science (POSC-M):
19 semester hours in courses above the freshman level to include
POSC 2353 or POSC 2363 and POSC 3223, POSC 4314, POSC 4213, POSC 4343, and 3 hours POSC elective. A student planning to
minor in poultry science should consult a departmental adviser.

Requirements for a Certificate of Proficiency:
Robert Wideman
Program Coordinator
O-402 Poultry Science Center
479-575-4397

Certificates of Proficiency in Hazard Analysis and Critical Control
Point (HACCP) and Food Safety Manager (FMGR) recognize stu-
dents who take a concentrated core of web-based courses focused on
the application of scientifically-based food safety systems through
the application of HACCP systems.
Students who earn the HACCP certificate will have a working
knowledge of fundamental food microbiology, food sanitation, appli-
cable law, statistical process control, and advanced HACCP applica-
tions in food processing industries. Prerequisites for acceptance:
applicants to the HACCP Coordinator Certificate of Proficiency
Program must have completed a B.S. degree or have at least seven
years relevant experience in the food industry.

HACCP Certificate Requirements:
16 hours of web-based courses: POSC 2003, POSC 4034, POSC 4023, FS 453, FS 495(3).

Students who earn the Food Safety Manager (FMGR) Certificate of Proficiency will have a working knowledge of advanced food
microbiology, food process engineering, human diseases, and quality
management as applied in food processing industries. Applicants to
the Food Safety Manager Certificate of Proficiency must have com-
pleted the HACCP certificate program of study.

FMGR Certificate requirements:
15 hours of web-based courses: FDSC 3753, HLSC 5613, FDSC 4823, HLSC 4623, INEG 4323.

SEE PAGE 323 FOR POULTRY SCIENCE (POSC) COURSES

SCHOOL OF HUMAN
ENVIRONMENTAL
SCIENCES (HESC)

Mary M. Warnock
Director
118 Home Economics Building
479-575-4305

• Professors Farmer, Martin, Warnock, Whan
• Associate Professors Bailey, Gentry, Noble, Turner
• Assistant Professors Apple, Fitch-Hilgenberg, Foote, Killian, Miller, Sattar, Takigiku, Wallack, Webb
• Instructors Baldwin, Crandall, Harding, Loewer, Powell, Smith

The School of Human Environmental Sciences at the University of Arkansas prepares students for a wide variety of professional careers
in education, industry, business, government, and community ser-
ices. The school is concerned with improving the quality of life for
individuals and families as they exist and function in society. Human
environmental sciences draws knowledge from its own research,
from the physical, biological, and social sciences, and from arts and
humanities. It relates this knowledge to an understanding of individu-
als’ and families’ needs and goals for food, clothing, shelter, manage-
ment of resources, and human development and relationships. The
School of Human Environmental Sciences has made a substantial
contribution to the development of individuals and families through
undergraduate and graduate preparation of human environmental sci-
entists and through research in human nutrition, foods, human de-
velopment, family sciences, interior design, apparel and textiles.

Services for Students with Children
There are two services administered by the School of Human
Environmental Sciences that can benefit young children whose par-
ents are students at the University of Arkansas.
The Infant Development Center (IDC), located at 536 N. Leverett
Street, provides care for children age three months to three years. At
least one parent must be a UA student, and priority is given to under-
graduate parents, single parents, and families in which both parents
are UA students.
The Nursery School provides care for children from the entire
community who are between the ages of three and five years.

Enrollment in each program is limited, and no provision is made
to accommodate “drop-ins.” For fees and other information, call the
School of Human Environmental Sciences at 479-575-4306.

DEGREES OFFERED
Human Environmental Sciences students pursuing the Bachelor
of Science in Human Environmental Sciences degree (B.S.H.E.S.)
may choose one of four majors. These programs have been accred-
ited by the Council for Professional Development of the American
Association of Family and Consumer Sciences. The four majors and
concentrations are as follows:

Bachelor of Science in Human Environmental Sciences
1. Food, Human Nutrition, and Hospitality (FHNH)
   Dietetics (DIET)
   General Foods and Nutrition (GFNU)
   Hospitality & Restaurant Mgmt. (HRMN)
2. Apparel Studies (APST)
3. General Human Environmental Sciences (HESC)
4. Human Development, Family Sciences and Rural Sociology (HDFS)
   Child Development (CDEV)
   Lifespan (LSPN).

Bachelor of Interior Design
Interior Design (IDES)
Students pursuing the bachelor of interior design (B.I.D.) degree must major in Interior Design (IDES). This program is accredited by the Foundation for Interior Design Education Research (FIDER).

Human Environmental Sciences Minors
Two minors are offered in Human Environmental Sciences: Human Development and Family Sciences (HDFS), and Human Nutrition (GFNU). Specific course requirements for the minors are listed at the end of the curriculum sections. Students may also minor in Journalism as well as other select minors in the J. William Fulbright College of Arts and Sciences or the Sam M. Walton College of Business.

The global agricultural, food, and life sciences minor is available for all students seeking majors in human environmental sciences. The minor is described on page 64.

Requirements for a Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.):
HOURS
1. A total of 124 semester hours with a 2.00 cumulative GPA.
2. A minimum of 39 hours of courses 3000 level or above
3. University Core Requirements 35
   See page 40 for requirements.
   Check requirements for each major.
   Some require specific core courses.
4. Other University Requirements 3
   Advanced Composition Requirement (see page 41)
   It exempt from advanced composition, 3 hours of ENGL, COMM, JOUR or Foreign Language are required. See specific major requirements.
5. College Requirements 3
   COMM 1313
6. Electives 4-23
   Electives can be used to develop a minor
7. School Requirements 64-78
   See specific majors and concentrations.

APPAREL STUDIES (APST)
Kathleen R. Smith
Area Coordinator
213 Home Economics Bldg.
479-575-2577

The apparel studies program opens the door to careers in the fashion industry. Buyer, product development specialist, fashion coordinator, sales consultant, visual display artist, and quality assurance technician are only a few of the possibilities. Classes in business, retailing, apparel production, science, social science, and the liberal arts give students a basic knowledge about the textile and apparel industries. By selecting from a variety of minors, students can tailor this program to meet their goals. Program strengths include guest speakers who provide insight today’s careers, tours of major fashion centers, and internships, which provide valuable career experience.

Requirements for a Bachelor of Science degree with a major in Apparel Studies:
(See page 40 for University Core and page 64 for B.S.H.E.S. requirements.)
35 hours of University Core requirements to include:
CHEM 1074, 1071L and BIOL 1543, 1541L
(Two semesters of chemistry, CHEM 1103/1101L and CHEM 1123/1121L, may be substituted for CHEM 1074/1071L.)
PSYC 2003
ECON 2143
ANTH 1023 or SOCI 2013
ARTS 1003
Select 3 hours from University Core Humanities (section B, C, or D)

University Advanced Composition Requirement:
ENGL 2003 (exemption possible - if exempt, student can select from COMM, JOUR, ENGL, or FLAN).

College Requirement:
COMM 1313
Electives: 12 hours (Suggested elective minor areas are marketing, journalism, drama, art or art history.)

School Requirements: 64 hours
MATH 2053
MKTG 3433
Select 3 hours from the following:
AGME 2903 or CSCE 1003 or other approved computer course.
Select 6 hours of any Foreign Language (not to be used as exemption for ENGL 2003)
Select 55 hours of HESC courses:
HESC 1501 Orientation
HESC 1013 Intro. to Clothing Concepts
HESC 1023 Intro. to Apparel Production
HESC 1053 Computer Based Methods
HESC 2013 Quality Assess of Apparel
HESC 2023 Visual Merchandising
HESC 2053/2050L Intro. to Textile Science/Lab
HESC 3003 Apparel Production
HESC 3013 Intro. Fashion Merchandising
HESC 3033 Fashion Merchandising Methods
HESC 4023 Advanced Apparel Merchandising
HESC 4033 Advanced Textile Study
HESC 4043 History of Apparel
HESC 4053 Contemporary Apparel
HESC 4063 Advanced Apparel Production
HESC 4073 Internship
HESC 4083 Professional Development
HESC 1213 Nutrition in Health
HESC 2413 Family Relations

FOOD, HUMAN NUTRITION, AND HOSPITALITY (FHNH)
Janet M. Noble
Area Coordinator
215 Home Economics Bldg.
479-575-4700

The curriculum in food, human nutrition, and hospitality allows students to prepare for a career in a specialized area of foods and nutrition by completing a common set of basic courses and one of the concentrations:
A: dietetics (DHEI)
B: general foods and nutrition (GFNU), and
C: hospitality and restaurant management (HRMN).
Interest and aptitude for the biological and physical sciences that support nutrition science are needed to complete concentrations A and B successfully. Concentration C is the best choice for those students who have an interest in management and who enjoy working with people.

Concentration A: Dietetics (DIET): This concentration is for the student who intends to become a registered dietitian (RD). Courses required include those necessary as prerequisites to a dietetic internship. An internship is required for eligibility to take the national registration examination and for eligibility for licensure. Students who complete the program with a minimum grade-point average of 3.0 may apply for an internship. Upon licensure, students practice as registered dietitians in the health care field or as consulting dietitians in private practice, sports nutrition, or in wellness and health maintenance centers. Students with lower GPAs may apply for supervised practice programs leading to the dietetic technician registered (DTR) certification.

Concentration B: General Foods and Nutrition (GFNU): Students taking this concentration are encouraged to select an approved minor from the Bumpers, Walton, or Fulbright colleges or plan other combinations of courses to prepare for non-traditional vocations including work in community or government sponsored programs, wellness and health maintenance centers, public relations in the food industry, TV/media outlets for food and nutrition information, and international food or nutritional programs.

Concentration C: Hospitality and Restaurant Management (HRMN): Students in the hospitality and restaurant management concentration prepare themselves for managerial positions in the restaurant and hospitality industry. This dynamic curriculum provides students with skills in foods and business, as well as hospitality and restaurant management. Students have the opportunity to manage and operate a restaurant on campus. Students obtain hands-on experience by completing 1,000 hours of satisfactory, verifiable work experience in the hospitality and restaurant industry, usually completed during the summer and on part-time jobs during the school year. This noncredit work experience must be completed prior to graduation. A management internship, which allows students to acquire practical management experience and specialized knowledge from supervised work in a hotel, restaurant, or other hospitality-related business, is also part of this degree. Students in this program can complete a minor in business.

Requirements for a B.S.H.E.S. degree with a major in Food, Human Nutrition and Hospitality:
(See page 40 for University Core and page 64 for B.S.H.E.S. requirements.)

35 hours of University Core requirements to include:
HESC 2413
PSYC 2003

Concentration A (DIET) and B (GFNU) to include:
CHEM 1103/1101L
CHEM 1123/1121L
MAIH 1203 or MAIH 1213

Concentration C (HRMN) to include:
CHEM 1074/1071L or
CHEM 1103/1101L and CHEM 1123/1121L
BIOL 1543/1541L

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirement:
COMM 1313

Electives: 9-24 hours
(Highly recommended for Concentration B: EXED 3023; for Concentration C: foreign language and HLSC 3633.)

School Requirements (68 - 81 hours):
2 hours PEAC or DEAC
HESC 1501 Orientation to HESC
HESC 1213 Nutrition in Health
HESC 2112/2111L Foods I/Lab
HESC 3604 Food Prep for Hospitality Industry
HESC 3653 Food Systems Mgmt.
HESC 4103 Experimental Foods
HESC 4303 Professional Development in HESC

Requirements for both Concentrations A and B:
ENGL 3053 or JOUR 3123 or AGED 3142/3141L
BIOL 2013/2011L
CHEM 2613/2611L and CHEM 3813
WCOB 1120
BIOL 2213/2211L and BIOL 2443/2441L or
BIOL 1543/1541L and ANSC 3032 and ANSC 3042
HESC 3204 Nutrition for Health Professionals and Educators
HESC 3213 Dietetic and Nutrition Practice
HESC 4213 Advanced Nutrition
HESC 4223 Nutrition/Life Cycle
HESC 4243 Community Nutrition
HESC 425V (1 hr) Seminar

Additional Requirements for Concentration A: (DIET)
HESC 1201 Intro. to Diet and Nutrition
AGST 4023 Principles of Experimentation
HESC 4264/4260L Medical Nutrition Therapy I/Lab
HESC 4273 Medical Nutrition Therapy II
HESC 4613 Food Service Purchasing
HESC 4623 Selection and Layout of Food Service Equipment

Additional Requirements for Concentration B: (GFNU)
HESC 1201 Intro. to Diet and Nutrition and/or
HESC 1603 Intro. to Hospitality
HESC 2203 Nutrition for Exercise and Sport

Requirements for Concentration C: (HRMN)
HESC 1601 Work Experience Practicum
HESC 1603 Intro. to Hospitality
AGED 3142/3141L Agri. Communications/Lab
ECON 2143 Basic Economics - Theory And Practice
MATH 2053 Finite Math
(Math 1203, prerequisite for MATH 2053, required for hospitality and restaurant management students who do not have the required math proficiency.)
MGMT 3743 Human Resources Mgmt.
FDSC 2503 Food Safety/Sanitation
HESC 2120L Catering Management Laboratory
HESC 2123 Catering Management
HESC 2623 Legal Issues in the Hospitality Industry
HESC 4613 Food Service Purchasing
HESC 4623 Selection and Layout of Food Service Equipment
HESC 4693 Hospitality Internship
WCOB 1023 Business Foundations
WCOB 1033 Data Analysis
WCOB 1120 Computer Competency Requirement
WCOB 2013 Markets and Consumers
WCOB 2033 Human Resources
WCOB 2043 Financial Resources
Requirements for a minor in General Foods and Nutrition (GFNU-M): 18-19 hrs
HESC 1213, HESC 2112/2111L, HESC 3204, and HESC 4213. Select 5-6 hours from HESC 2203, HESC 4223, HESC 4243, and HESC 425V (may be repeated once for 2 hours total credit.)

GENERAL HUMAN ENVIRONMENTAL SCIENCES (GHES)
Mary M. Warnock
Director
118 Home Economics Bldg.
479-575-4305

The general human environmental sciences curriculum serves students seeking a background in all of the subject-matter areas of human environmental sciences. The general curriculum prepares students for careers in social services, business, and the Cooperative Extension Service. Liberal elective hours allow students to select courses and programs to meet individual needs.

Students may be certified by the Arkansas State Board of Education to teach family and consumer sciences in Arkansas public schools by combining the pre-professional education courses as electives and completing the master of arts in teaching (M.A.T.) degree requirements. (See M.A.T., page 165). At the beginning of the sophomore year, students should consult with their advisers to schedule the general education and pre-professional education courses.

Requirements for a B.S.H.E.S. degree with a major in General Human Environmental Sciences:
(See page 40 for University Core and page 64 for B.S.H.E.S. requirements.)
35 hours of University Core Requirements to include:
CHEM 1074/1071L
(CHEM 1103/1101L and CHEM 1123/1121L may be substituted)
BIOL 1543/1541L
PSYC 2003
Plus two courses to meet state minimum social sciences core
ARTS 1003
HIST 2003, HIST 2013, or PLSC 2003
MATH 1203 or MATH 1213
Select 3 hours from University Core Humanities (Section B, C or D)

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirement:
COMM 1313
Electives – 12-14 hours

(Students wishing to qualify for the M.A.T. need six hours of English, world literature or American literature and three hours of western civilization or world civilization.)

School Requirements: 46 hours
General Electives: 31-33 hours
CHEM 2613/2611L
1- to 3-hour computer class
PEAC 1621
HLSC 1002

HUMAN DEVELOPMENT, FAMILY SCIENCES, AND RURAL SOCIOLOGY (HDFSRS)
Sue S. Martin
Area Coordinator
104 Home Economics Bldg.
479-575-4578

Students majoring in human development and family sciences prepare for one of the fastest growing employment opportunities in the country. The human services area includes jobs that serve people from conception through the last stages of life. Students develop skills for working with individuals and families in governmental, private, and nonprofit organizations. Two concentrations are offered:

Concentration A: Child Development (CDEV)
This concentration is for students who desire in-depth knowledge of children and programs for children from birth to age 12. The focus on children covers issues from the prenatal to early adolescence. Graduates may work as preschool teachers, daycare directors, specialists in the field of child life, and as child advocates.

Concentration B: Lifespan (LSPN)
This area of study covers the care issues faced by families and individuals in contemporary society. The knowledge and skills developed in this program will prepare the student to work in areas such as aging, parent education, financial and consumer counseling, youth services, and other human service type careers.

Requirements for a B.S.H.E.S. degree with a major in Human Development and Family Sciences:
(See page 40 for University Core and page 64 for B.S.H.E.S. requirements.)
35 hours of University Core Requirements to include:
BIOL 1543/1541L
4 hours from ASTR, CHEM, GEOL or PHYS
PSYC 2003
SOCI 2013 or RSOC 2603

University Advanced Composition Requirement:
ENGL 2003 (exemption possible)

College Requirement:
COMM 1313
Electives: 18-20 hours
School Requirements: 64-68 hours
3 hours from AGEC 1103, AGEC 2103, ECON 2013, ECON 2023, ECON 2143 or ECON 3053
3 hours from any computer course.

Select 22 hours of HESC courses:
HESC 1501 Orientation
HESC 1213 Nutrition in Health
HESC 2413 Family Relations
HESC 2433 Child Development
HESC 3423 Adolescent Development
HESC 4423 Adult Development
HESC 4753 Family Financial Management
HESC 4303 Professional Dev in HESC
HESC 4453 Parenting/Family Dynamics

Additional Requirements for Concentration A: Child Development
HESC 2402/2401L Infant and Toddler Development/Lab
HESC 3402/3401L Child Guidance
HESC 4463 Admn and Evaluation of Child Dev Programs
HESC 4472/4472L Child Development Practicum/Lab
CIED 3023 Survey of Exceptionalities
CIED 3103 Children’s Literature
CIED 3113 Emergent and Developmental Literacy
SCWK 3633 Problems of Child Welfare

Select 12 hours from the following:
HESC 3443 Families in Crisis
HESC 3763L Family Resource Management
HESC 4433 Dynamic Family Interaction
HESC 4483 Internship in HDFS (requires a GPA of 2.75 or higher)
HESC 4493 Public Policy Advocacy
HESC 4223 Nutrition/Life Cycle
CIED 3263 Language Development for the Educator
Any courses in HDFSRS not listed in this concentration or in the HDFS core may also be included as electives in this section.

Additional Requirements for Concentration B: Lifespan
HESC 1403 Lifespan Development
HESC 3443 Families in Crisis
HESC 4433 Dynamic Family Interaction
HESC 4443 Gerontology
HESC 4493 Public Policy Advocacy
SCWK 3163 Death and Dying

Select 3 hours of statistics from:
PSYC 2013, SOCI 3303/3301L or WCOB 1033

Select 3 hours research methods from:
PSYC 3073, SOCI 3513, or SCWK 4073

Select 12 hours from:
HESC 3763L, HESC 4483 (requires a GPA of 2.75 or higher), SOCI 3233, SOCI 4133, CIED 3053, CDIS 4273 or COMM 3433, RSOC 4603, RSOC 4623
Any courses in HDFSRS not listed in this concentration or in the HDFS core may also be included as electives in this section.

Requirements for a minor in Human Development and Family Sciences (HDFS-M):
18 hours
HESC 1403 and HESC 2413

Select 12-13 hours from the following:
HESC 2402/2401L, HESC 2433, HESC 3402/3401L, HESC 3423, HESC 4433, HESC 4443, HESC 4453, HESC 4463, HESC 4493 or HESC 4753

INTERIOR DESIGN (IDES)
G. Marie Gentry
Area Coordinator
17B Home Economics Bldg.
479-575-2578

Interior design, a FIDER-accredited program, combines an excellent foundation of professional courses that are enhanced by classes in human environmental sciences, art, architecture, and business. A goal of the program is to foster a sense of personal and professional responsibility. Students are actively involved in national design competitions and domestic and international travel. Field trip opportunities are offered on a regular basis, and students are expected to participate. Graduates are placed in residential, contract, and institutional interior design firms, architectural firms, art galleries, set design, and contract residential sales.

A sophomore portfolio review is an important component of the academic program. The review of studio work will occur in December of the sophomore year. The submitted materials will follow guidelines prepared by the interior design faculty and will include examples of work from Design I, Design II, Studio I, and Introduction to Presentation Media. All full-time interior design faculty will review portfolios. Students will receive a pass or probation. If the portfolio is acceptable (pass), the student may continue, without remediation or additional required work, to junior-level studios. To be removed from probationary status, the student must comply with faculty recommendations that may include repeating a course(s), taking supplemental courses to strengthen a weakness, or submission of reworked studio projects. Students on probation must resubmit a portfolio at the end of the spring semester following the initial review. In the event that skills are not improved, the student will not be permitted to progress into upper-level studios.

The studio sequence increases in complexity throughout the curriculum. The rigor of the program requires a significant commitment of time and energy. Students can expect to spend a minimum of 3 hours out of class for each hour of studio time to complete projects. Participation in an annual senior portfolio exhibition and a supervised internship experience are requirements for graduation. The faculty reserve the right to retain student work for accreditation and recruitment purposes.

Transfer students seeking advanced placement must submit a portfolio for faculty review prior to beginning any studio course. Review of portfolio will allow appropriate placement based on demonstrated skills. Students may be required to wait a semester for the appropriate studio sequence. Transfer students placed into the program prior to sophomore portfolio review will be required to participate in the sophomore review process.

A professional advisory board supports the program, and faculty and students participate in professional design association activities. The faculty are well-qualified educators and practitioners who foster an attitude of inquiry and learning based on their individual skills and interests. Intellectual development of students is stimulated and leadership qualities enhanced throughout the four-year curriculum. The student chapter of the American Society of Interior Designers (ASID) allows for interaction with professionals in interior design and allied professions.
In response to industry demands, the program requires laptop computers. Students must acquire a laptop for use in studio courses that are taught in the spring semester of the second year of the program. Specifications for laptops must be obtained from interior design faculty prior to purchase by the student.

**Requirements for a Bachelor of Interior Design**

1. A total of 124 semester hours with a 2.00 cumulative GPA
2. A minimum of 39 hours of courses 3000-level or above
3. **University Core Requirements**
   (See page 40 for core courses.)
   Must include 3 hours from:
   - ECON 2013 or ECON 2023 or ECON 2143 or
   - AGEC 1103 or AGEC 2013
   - PSYC 2003
   - SOCI 2013
   - Fine Arts (3 hours)
4. Other University Requirements
   - ENGL 2003 Advanced Composition Requirement
     (see page 41).
   - If exempt, must take 3 hours from
     COMM, JOUR, or ENGL courses
5. College Requirements
   - COMM 1313
6. Electives
   - 1
7. School Requirements
   - One ARTS studio elective and ARCH 4433
   - 6 hours of business courses to be selected from:
     - FINN 3003, WCOB 1012, MGMT 3563
     - WCOB 2013, MKTG 3433, or FINN 3933
   - WCOB 1120 or any computer course

**70 hours of HESC courses to include:**

- HESC 1501 Orientation to HESC
- HESC 2053 Intro. to Textile Science
- HESC 2413 Family Relations
- HESC 4303 Professional Development in HESC
- HESC 1031 Design I
- HESC 1034 Design I Studio
- HESC 1041 Design II
- HESC 1044 Design II Studio
- HESC 2803 Studio I: Development of Interior Space
- HESC 2813 Studio II: Design Process & Application
- HESC 2823 ID Materials & Resources
- HESC 2833 Introductory Presentation Media
- HESC 2841 Lighting Studio
- HESC 2842 Lighting Systems
- HESC 2883 History of ID I
- HESC 2893 Principles of Computer–Aided Design
- HESC 3803 Studio III: Working Drawings and Building Sys
- HESC 3813 Studio IV: Interiors for Public Use
- HESC 3863 Advanced Presentation Media
- HESC 3883 History of ID II
- HESC 4803 Studio V – Advanced Residential Design
- HESC 4811 Internship for ID
- HESC 4813 Human Factors in Interior Design
- HESC 4823 Professional Practice for Interior Design
- HESC 4843 Internship Preparation
- HESC 4863 Studio VI – Commercial Design
- HESC 4891 Senior Portfolio

SEE PAGE 286 FOR HUMAN ENVIRONMENTAL SCIENCES (HESC) COURSES.

**Minors**

**PEST MANAGEMENT (PMGT)**

Craig Rothrock
Program Coordinator
206 Plant Science Building
479-575-2445

- Distinguished Professor Boyd
- University Professors Kim, Meisch, Oliver, Riggs, Stephen, Talbert
- Professors Barrentine, Correll, Gergerich, Kirkpatrick, Kring, Lee, Lim, Luttrell, McLeod, Rothrock, Rupe, Steinkraus, TeBeest
- Associate Professors Burgos, Cartwright, Coker, Fenn, Lorenz, Milus
- Assistant Professor Spradley

Students interested in this area of study should consult the program coordinator.

**Requirements for a minor in pest management (PMGT-M):**

- 20-21 hours to include CSES 2003, ENTO 3013, and PLPA 3004.
- In addition, students must select one course from each area: CSES 4143 or CSES 4133; ENTO 4024, ENTO 4123 or ENTO 4133; and PLPA 4103. Students planning to minor in pest management must declare their intention to the program coordinator.
MISSION AND OBJECTIVES

The School of Architecture at the University of Arkansas houses the two professional design programs of architecture and landscape architecture. The School’s programs combine traditional models of professional studio-design education with innovative teaching in history and theory, technology, and urbanism. A broad range of course offerings equips graduates with the knowledge required for the challenges of a changing world. Design instruction occurs in a carefully planned studio sequence, providing educational experiences appropriate for students who wish to pursue both traditional and non-traditional forms of professional practice. Fundamental principles and techniques of problem solving are stressed, and the curriculum strives to empower students by developing skill, knowledge, and a deep sense of responsibility to the cultures they will serve. Design studio projects survey issues and opportunities in built and natural settings, as well as complex social, physical, and cultural relations that constitute the human-made environment.

FACILITIES AND RESOURCES

The School’s administrative offices and department of architecture are located in Vol Walker Hall, formerly the University’s library building, which has been extensively remodeled to meet the needs of the department and School. The landscape architecture department is located in Memorial Hall, formerly the University’s student union.

The University’s location in Northwest Arkansas, an area experiencing rapid growth and change, affords unusual opportunity to study the impact of urbanization in a rural setting. The School includes as part of its programs field trips, guest lectures, research assignments, and other teaching techniques oriented toward major urban and rural problems as means to broaden the educational base of its students.

Classes are also offered in a variety of settings away from the campus. Options include a semester in the Rome Study Center for Architecture and the Humanities near the Piazza Navona in Rome, Italy; a six-week Landscape Architecture Study Abroad Program to Italy and England in summer; and the Mexico Summer Urban Studio.

University of Arkansas Community Design Center (UACDC)

The School of Architecture provides community service opportunities through the University of Arkansas Community Design Center (UACDC). The Center was founded in 1995 with the support of the Harvey and Bernice Jones Charitable Trust. It is currently supported in part by a generous endowment from the Donald W. Reynolds Foundation.

The Center utilizes students, faculty, and professional staff to provide technical assistance to the towns and communities of the state of
Arkansas in such areas as town and environmental planning, low- and moderate-income housing, and community and policy development. In addition to providing design leadership, the Center gives students the opportunity to work directly with leaders throughout the state to solve real problems in the context of actual situations and conditions.

Design Studio

The design studio sequence is the core of each discipline within the School of Architecture. Students spend three afternoons each week in a design studio, with complementary lecture courses. Knowledge from those lectures is expected to inform work produced in design studios. This method is intended to develop and nurture the intellectual and creative skills of students and to allow them to approach problem solving in a disciplined, logical, and analytical manner.

Design professionals must be able to conceptualize responses to project programs, to communicate with clients, to present ideas verbally, and to demonstrate ideas graphically. They also need to maintain technical knowledge of building or ecology and construction technology, must be able to negotiate with contractors and owners, to administrate construction, and should be prepared to market their services. In other words, each designer fulfills a multitude of roles, whether practicing alone or as a team member in a large multidisciplined organization.

The design studio consists of a series of projects of increasing complexity, all requiring three-dimensional problem solving, conceptualization, and final presentation to the studio critic, other faculty members, and fellow students. The amount of material to be covered, the fast pace of assignments, and the pressure of critical reviews by faculty and other students combine to produce a highly charged studio atmosphere.

Library Resources

The School of Architecture is served by the Fine Arts Library, a branch of the University Libraries. The collections in the Fine Arts Library include traditional print resources on the visual arts (painting, drawing, sculpture, ceramics, printmaking, and photography), architecture, and landscape architecture. Types of materials include books, exhibition catalogs, reference books, and periodicals. Electronic resources supporting the art, architecture, and landscape architecture programs include Art Index, Avery Index, Bibliography of the History of Art, and Grove Dictionary of Art among others. The Fine Arts Library also maintains course reserves for faculty wishing to place materials on reserve for their classes.

A collection of more than 80,000 slides and 900 videos relating to architecture, architectural history, landscape, and urban design is housed in the School’s C. Murray Smart Media Center, which is located in Vol Walker Hall. Students in the School of Architecture can access digital imaging technology including scanners and digital cameras.

Garvan Woodland Gardens

This 210-acre botanical garden located on Lake Hamilton in Hot Springs, Arkansas, is an integral unit of the School of Architecture. The land and endowment were the result of a bequest to the department of landscape architecture in 1985. A master plan outlining future development has been completed and is currently being implemented. The garden includes facilities designed by Fay Jones and Maurice Jennings, and a garden designed by David Slawson. An internship program offers opportunities for summer study and employment.

DEGREES OFFERED

The School of Architecture offers five-year professional programs in architecture and landscape architecture. Each program culminates in a professional degree, the Bachelor of Architecture (B.Arch.) or Bachelor of Landscape Architecture (B. Landscape Arch.).

The Bachelor of Architecture prepares students who aspire to registration and licensure to practice architecture. Architects do more than design and plan buildings. The architect’s unique talents create environments that serve the psychological, economic, and spiritual needs of their clients and communities. Architects help cities and small communities to become safe, healthy, and wholesome places to live. Perhaps most important, architects create, preserve, and inspire beauty in the built environment.

The Bachelor of Landscape Architecture is an accredited five-year first professional degree that prepares students to practice landscape architecture as a licensed professional. The discipline of landscape architecture balances human requirements with landscape concerns. Landscape architects design, plan, and manage the land through understanding the interrelationships among the spirit of place, local ecology, individuals, and communities. They create outdoor spaces and rebuild ecological systems that meet societal needs, protect or enhance the natural environment, and respond to cultural conditions. Design and planning projects span the breadth of the profession to include urban design and town planning, public parks, land conservation, storm water management systems, ecological rehabilitation, historic landscape preservation, private gardens, housing developments, institutional and business campuses, and golf courses.

The School also offers two four-year programs, culminating in a non-accredited degree; the Bachelor of Science in Architectural Studies and the Bachelor of Science in Landscape Architectural Studies.

MAJORS, CONCENTRATIONS, AND MINORS

Minors

Students in architecture and landscape architecture may pursue an academic minor in approved degree programs of other colleges on campus, providing they meet the specific requirements for that minor.

SCHOOL ADMISSION REQUIREMENTS

University of Arkansas Department of Architecture Admissions

The University of Arkansas Department of Architecture maintains three distinct tracks of study for entering freshmen to accommodate all students interested in pursuing a degree in architecture. The three tracks of study are designed to foster learning and to build strong foundations for students entering the program with different skill levels and high school backgrounds. Students accepted to the University of Arkansas with the intention to participate in the B.Arch. or B.S. programs in the Department of Architecture will be classified as “Regular Admissions” (Fall/Spring Studio Students or Spring/Summer Studio Students) or “Pre-Architecture Admissions.” Please contact the School’s Advising Center for a complete description of admission requirements.
Regular Admissions: All “Regular Admissions” students entering the Department of Architecture will be classified as either “Fall/Spring Studio Students” or “Spring/Summer Studio Students.”

Fall/Spring Studio Students: All students who meet the University of Arkansas minimum requirements for admission (20 ACT/3.00 GPA) and who have completed a college preparatory curriculum in high school are admitted to the Fall/Spring track of study. The high school curriculum must include physics and an upper level math course (pre-calculus or higher) for a student to be considered. This track of study is designed to immerse students in the rigor of the architecture design studio while completing required core courses. The studio is capped at 70 students. A review at the end of Fall semester is required for all students. Students who fail to achieve a minimum grade of “C” (2.00) in both Design I and in physics are not allowed to continue into Design II. Students may enroll in Design II after successfully completing Design I and physics with a minimum grade of “C” (2.00). Please see the School’s Advising Center for additional information regarding the review process, grade criteria, and continuance in the program.

Spring/Summer Studio Students: Students who meet the University of Arkansas minimum requirements for admission but who have not had physics or pre-calculus in high school are enrolled in the Spring/Summer track of study. These students begin the design sequence with Design I in the Spring semester and follow with a six-week summer course (Design II). This track of study allows students to focus on the foundations of physics, math, and additional University Core courses in the Fall semester without the additional work of Design I. Students in good standing (a minimum of “C” in physics and required University Core courses) at the end of Fall semester, may take Design I in the Spring. Students who do not achieve a minimum grade of “C” (2.00) in Design I may not continue into Design II. Students may enroll in Design II after successfully completing Design I with a minimum grade of “C” (2.00). Students who successfully complete Design I and Design II will begin Design III in the Fall semester. Please see the School’s Advising Center for additional information regarding the review process, grade criteria, and continuance in the program.

Pre-Architecture Admissions: Students who are accepted to the University of Arkansas on a provisional basis cannot begin the Fall/Spring or Spring/Summer sequence until the provisions of their admission are met. These are students who have GPAs or ACT scores below the University of Arkansas minimum or have deficiencies in one or more areas (typically math or English). The Pre-Architecture track of study will, in most cases, add one year to their education. Students follow a specified curriculum based on individual needs and are allowed to enter the design sequence only when their provisions are met and a cumulative GPA of 3.00 is achieved. In addition to the core requirements, students are required to complete several fundamental drawing courses to build a strong foundation for the studio sequence. Please see the School’s Advising Center for additional information regarding the review process, grade criteria, and continuance in the program.

Architecture Department Transfer Students and International Students: Students transferring into the Department of Architecture must meet the University of Arkansas Transfer Admissions requirements, must score a minimum of 20 on the ACT, and must have completed a college preparatory high school curriculum (physics and pre-calculus or higher) with a 3.0 GPA. Architecture Department Transfer Students are generally classified as Spring/Summer studio students. They will begin the studio sequence (Design I) in the spring semester and will follow with a six-week summer course (Design II). Transfer students meeting the criteria for Fall/Spring studio admis-

ions may apply to begin the Architecture Program’s studio sequence in the fall (see the Fall/Spring studio student description and criteria above). Please see the Department of Architecture Admissions requirements for additional information.

International students must present a TOEFL minimum score of 550 to become eligible for acceptance into the department of architecture. Lack of knowledge or misinterpretation of policies and/or regulations on the part of individual students will not be considered a valid reason for failure to fulfill requirements.

Transferring from Accredited Schools of Architecture: Students transferring from an accredited architectural program desiring to have architecture courses reviewed for placement and acceptance will need to submit materials for review. Please contact the School’s Academic Advising Center for a specific list of required materials.

NOTE: All students must complete or receive transfer credit for either PHYS 1044/1040L “Physics for Architects I” or PHYS 2013/2011L “College Physics I” and all other first year university core curriculum courses prior to entry into ARCH 2016 “Architectural Design III” or ARCH 2114 “Architectural Technology I.”

Ultimate responsibility for completion of entrance requirements rests with each student. Please contact the School’s Advising Center, for a complete description of admission requirements.

Admission to the Professional Program in Architecture

The department of architecture offers prospective students the opportunity to prepare for architectural practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

Students are admitted to the first year of the architectural curriculum based on criteria established by the University and by the School of Architecture. They are evaluated by grades in course work and by grades each semester for performance and progress in the design studio sequence.

At the completion of the third year of the department of architecture curriculum, including completion of the 35 semester-credit hours of the University’s general education core requirement, students may apply for admission to the Professional Degree Program. Application documents are due in the School of Architecture advising center by the first day of classes of the spring semester. Students will be evaluated for admission on the basis of academic performance in the University core and the Architecture curriculum comprising the sub-disciplines of History/Theory, Technology, and Design. Admission requires a majority vote of the Admissions Committee. As part of the application process, all students will submit a course of study for the fourth and fifth years of the curriculum. Students are encouraged to take maximum advantage of the opportunities that professional and free electives provide for pre-professional development, cultivation of specialization in and related to the profession, and/or preparation for graduate education. Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final two years of design studio at the UA School of Architecture. At the time of admission, however, the faculty may recommend or approve an alternative course of study that will allow students to pursue an area of concentration other than design in accordance with the letter and spirit of the curricula. Multidisciplinary alternatives may be developed using electives and coursework from business, engineering and other areas applicable to the practice of architecture.

The University Advanced Composition requirement must be completed either by course work or by exemption via an exam, prior to entry into the fifth year of the professional curriculum.
University of Arkansas Department of Landscape Architecture Admissions

All students (including freshmen, international, and transfer students) admitted to the University of Arkansas are eligible for participation in the Landscape Architecture program in the School of Architecture. Students who require developmental work because of low ACT or SAT scores or University-administered math placement examinations or who require courses to remove deficiencies may not register for courses carrying LARC departmental designations. Upon completion of required developmental work and maintaining a grade-point average of 2.00 or more on at least 12 credit hours, students may enroll in landscape architecture (LARC) courses. Please refer to “Admission to the Professional Program in Landscape Architecture” for required academic levels for entering the program. Please contact the School’s Advising Center for more information.

Admission to the Professional Program in Landscape Architecture

The Department of Landscape Architecture offers a professional education grounded in liberal arts studies, which prepares students for landscape architecture practice in the private, public, and not-for-profit sectors. Successful completion of the program requires commitment to personal growth and excellence.

Students are admitted to the first year of the Landscape Architecture program based upon the established criteria by the University of Arkansas. Academic and professional performance is evaluated by grades in the course work, design studios, and construction labs. After two years in the program, students submit a portfolio of work at the end of the spring semester for application to continue in the professional program. Applicants who have a grade-point average below a 1.67 will not be allowed to continue in the program.

Contact department head for specific portfolio submission requirements and schedule of deadlines. All candidates will be notified of their acceptance or rejection in writing, normally by the first of August.

Students will be evaluated on general academic performance and in the Landscape Architectural curriculum as well as professional conduct. All department faculty serve on the admissions committee. Any appeal to the committee’s decision may be made by submitting a letter to the department head one week before the first week of the subsequent fall semester. The appeal will be presented to the entire faculty for consideration and will require the candidate to present their case in person.

Students who fail to gain admission to the Bachelor of Landscape Architecture degree program will be referred to the department head and the School’s academic adviser for appeal procedures and alternative degree programs in the School and the University.

SCHOOL SCHOLARSHIPS

More than 50 awards and scholarships, including both merit and need-based scholarships, are available to students in the School of Architecture. Most are awarded annually on the basis of recommendations made by the Honors and Awards Committee of the School of Architecture. Students must complete three semesters in residence with a minimum of 15 hours per semester to meet eligibility requirements for most scholarships. Only work accomplished since entering the School of Architecture will be considered in determining merit awards based on grade-point averages.

Applications for scholarships are made through the Advising Center. Students must apply by December 15.

STUDENT ORGANIZATIONS

American Institute of Architecture Students

The American Institute of Architecture Students (AIAS) is a national organization whose purpose is “to organize architecture students and combine their efforts to advance the science and art of architecture, to promote excellence in architectural education, training and practice, and to foster an appreciation of architecture and related disciplines among all persons.” AIAS stands with the American Institute of Architects (AIA), the American Collegiate Schools of Architecture (ACSA), the National Architectural Accrediting Board (NAAB), and the National Council of Architectural Registration Boards (NCARB) to make up the five collateral organizations within the profession.

The AIAS chapter at the University of Arkansas functions as a student government, as well as a service and a social organization, organizing and participating in both on-campus activities, such as Architecture Week, and off-campus activities, such as Forum, the national architecture student convention held each year during the Thanksgiving season. The organization also promotes a good transition into professional life by interacting with AIA members. All students in the School’s architecture program are eligible for membership.

American Society of Landscape Architects, Student Chapter

The purpose of the student chapter of the American Society of Landscape Architects is to bring together the landscape architecture students to combine their interests and efforts, to extend their knowledge of the profession of landscape architecture, and to help advance the profession while preparing for a professional career. Specifically, the chapter initiates student competitions, develops field trips, exchanges ideas between students and professionals, identifies and develops projects of community value, maintains correspondence with other student organizations, and solicits presentations of specialized subjects related to the profession of landscape architecture.

Tau Sigma Delta Honor Society

The Alpha Eta Chapter of Tau Sigma Delta was established at the School of Architecture in 1977. The organization is the only national collegiate honor society recognized in the fields of architecture, landscape architecture, and allied arts. Its prime objectives are to emphasize scholarship and character, to stimulate mental achievement, and to recognize students who attain high scholastic standing. All students of the School are eligible for membership.

Elections to membership are made by the existing membership, subject to approval by the faculty, from fourth-year and fifth-year students maintaining a minimum 3.00 cumulative grade-point average. In addition, leadership, character, and promise of professional merit are considered in making selections.

Construction Specification Institute

Construction Specification Institute (CSI) is a nonprofit technical organization dedicated to the improvement of specifications and building practices in the construction industry through service, education, and research. Founded in 1948, CSI provides a forum for architects, engineers, specification writers, contractors, construction product representatives, students, and others in the construction industry.

The Construction Specification Institute Student Affiliate Chapter was formed at the University of Arkansas in 1993. CSI provides social networking opportunities for students with area professionals, and it sponsors lectures and seminars on current construction issues.
SCHOOL ACADEMIC REGULATIONS

Plus/Minus Grading System

The School of Architecture utilizes a plus/minus grading system that assigns numerical values to 12 different grades. These values are used for architecture or landscape architecture courses when grade-point averages are calculated. See page 37 for the method of calculating grade-point averages. The 12-step grading system with assigned values is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numerical Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.67</td>
</tr>
<tr>
<td>C+</td>
<td>2.33</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.67</td>
</tr>
<tr>
<td>D+</td>
<td>1.33</td>
</tr>
<tr>

</table>

Academic Policies – Department of Architecture

The following academic policies, beyond the requirements of the University, are applicable to all students in the Department of Architecture.

1. Any student receiving a grade of “D (+/-)” in a pre-professional program studio course is subject to a comprehensive review of their semester’s work by the Design Review Committee. The Design Review Committee may require that the student retake the studio, prior to advancing to the next studio in sequence, in order to demonstrate competence for the required materials as evidenced by achieving a grade of “C” (2.00) or better. A student receiving an “F” in design studio must repeat that studio before progressing.

2. Each student’s progress through the Design Studio sequence is monitored and governed by the faculty and subject to a Design Review process.

3. Admission to the Professional Degree Program in the Department of Architecture requires a minimum 2.00 grade-point average in the University Core and each of the sub-disciplines of Architecture: History/Theory, Technology and Design.

4. Enrollment in Architectural Design VII (ARCH 4016) is contingent upon admission to the Professional Program in architecture as described above.

5. Successful completion of the upper level studios of the professional degree program (ARCH 4016, ARCH 4026, ARCH 5016, ARCH 5026) requires demonstration of competence as evidenced by achieving a grade of “C” (2.00) or better in those courses. Failure to achieve this minimum standard will require retaking the studio.

6. Successful completion of Technology VI (ARCH 5162) requires the demonstration of competence as evidenced by achieving a grade of “C” (2.00) or better. Failure to achieve this minimum standard will require retaking that course.

7. Any student receiving an “I” in a design studio must complete all work necessary to receive a grade prior to the first day of the next studio in the student’s prescribed sequence to be eligible to enroll in that studio.

8. Prior to graduation, a student must present a 2.00 cumulative grade-point average at this institution in all work attempted including the University Core, electives, and in each of the sub-disciplines of Architecture: History/Theory, Technology and Design.

Design Review Procedure – Department of Architecture

Design Review is a process initiated by a faculty member or by a student in order that a committee comprised of studio faculty may review a student’s design work within a studio course. The review process may be used by students to appeal grades and to seek resolution of conflicts with studio faculty in which it is believed there are questions of fairness and equity in the application of the published grading policy of the faculty member. Faculty reviews are predicated upon, but are not limited to, student work that may receive a “D” grade or lower.

Grade appeals initiated by students will occur during the week prior to the start of class in the subsequent semester. Petitions for this review must be made through the Advising Center prior to the scheduled meeting of the Design Review Committee. Grade appeals may be filed as soon as the student receives his or her final grade.

Faculty-initiated reviews will occur during the final exam period of the semester under review.

In all cases, the student shall exhibit, at the place and time specified by the Design Review Committee, all work assigned and attempted for the studio in the semester under review. Faculty are required to provide appropriate documentation including, but not limited to, the course syllabus, grading policy, and semester assignments. In the case of an appeal, the student is requested to meet with the faculty committee.

The outcome of the Design Review process may include:

1. A recommendation to the faculty member regarding the grade appeal of the student.

2. A requirement for the student to repeat the design studio course and any co-requisite.

3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.

Grade Appeals – Department of Landscape Architecture

Students in the Department of Landscape Architecture may appeal grades in the design studios as well as other professional courses in which it is believed that there are questions of fairness or equity in the application of the published grading policy of the faculty member. Appeals must be made in writing to the department head one week before the first week of the subsequent semester. The appeal will be presented to the entire Landscape Architecture faculty for consideration and may require the students to present their case in person.

Off-Campus Study Requirement

Each student in the professional program in architecture is required to complete an approved off-campus study experience focusing upon complex urban relationships, and fostering cultural diversity. Approved programs in Architecture include a semester in Rome and a summer design studio in Mexico City. Each student in the department of landscape architecture is required to participate in a summer study in Europe. This program exposes students to urban design and planning approaches. The program takes place after the student’s third year of design studies.

A special international programs fee supports the School of Architecture’s international programs. These fees are assessed to all students participating in the architecture and landscape architecture design studio classes designated in the “Fees and Cost Estimates” section of this catalog, and Landscape Architecture 3914. The international program fees offset costs of maintaining off-campus programs that are not a part of the School’s University-funded budget, as well as enhancing student-centered activities. For further information, see notes on related program fees under “Fees and Cost Estimates” for the University.
Ownership of Work
All original work submitted for credit, including design studio projects, becomes the property of the School of Architecture. Students are required to maintain portfolios documenting all academic and design studio work.

School Computer Policy
All students enrolled in the School of Architecture are required to supply, by the beginning of the second semester of the second year, a personal computer matching or exceeding specifications issued by faculty. The specifications, which are updated annually, are available through the Advising Center or at http://www.uark.edu/~archlabs/. A substantial amount of software may be required depending on specific course requirements.

Dean’s List
In accordance with University policy, the School of Architecture publishes a Dean’s List at the close of each semester.

Graduation with Honors
Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at graduation by the honors designation of *cum laude*, *magna cum laude*, or *summa cum laude*. To earn this distinction, the student must meet the following criteria:

1. At least the final two years of the degree course work must be completed at the UA Fayetteville campus.
2. For *cum laude*, the student must achieve a GPA of 3.50 or higher.
3. For *magna cum laude*, the student must achieve a GPA of 3.65 or higher.
4. For *summa cum laude*, the student must achieve a GPA of 3.80 or higher.

HONORS PROGRAM
The Departments of Architecture and Landscape Architecture provide opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education by participating in the School’s Honors Programs. Please contact the School’s Academic Advising Center for specific information.

Invitation to Join the School of Architecture Honors Program
Students who present a composite ACT score of 28 (or higher) and a high school GPA of 3.5 or higher during admission will be invited to enroll in the University of Arkansas Honors College. Currently enrolled students with the same qualifications majoring in any of the School’s degree programs will be invited to join the School of Architecture Honors Program. All School of Architecture Honors Scholars are required to maintain a minimum cumulative GPA of 3.5 to remain in the program.

Continuing students and transfer students may be invited to join the School of Architecture Honors Program if they maintain a cumulative GPA of 3.5 or higher in courses completed at the University of Arkansas by the end of their first semester of study. Every semester, the Architecture Advising Center will apprise the School’s Honors Program Committee of students who have achieved this level of excellence and are eligible to join the Architecture Honors Program. Invitations are extended to students following the semester in which they qualify. Continuing students are encouraged to consult the School of Architecture Honors Committee and the School of Architecture Advising Center before deciding the level of honors distinction they wish to pursue.

Dismissal from the School of Architecture Honors Program
Architecture Honors Program students who fail to maintain a 3.5 cumulative GPA, will receive a one-semester probation period prior to dismissal from the program.

Department of Architecture Honors Program Requirements

The Distinguished Scholars Program

1. Bachelor of Architecture
   Completion of 38 credit hours of honors designated courses, to include a minimum of:
   - University Core Honors Courses
   - Professional Core Honors Courses in Architecture (Architectural Technology and/or History of Architecture)
   - Honors Professional Electives, including an approved Methods of Architectural Research colloquium
   - Honors Thesis Research Project
   HOURS
   12
   11
   9
   6

2. Bachelor of Architectural Studies
   Completion of 38 credit hours of honors designated courses, to include a minimum of:
   - University Core Honors Courses
   - Professional Core Honors Courses in Architecture (Architectural Technology and/or History of Architecture)
   - Honors Professional Electives or Upper Level (3000+) University Honors Courses, including an approved research methods course.
   - Honors Thesis Research Project
   HOURS
   12
   8
   6

The Departmental Scholars Program

1. Bachelor of Architecture
   Completion of 18 credit hours of honor designated courses, to include a minimum of:
   - Upper Level (3000+) University Honors Courses, including an approved Methods of Architectural Research colloquium
   - Honors Thesis Project
   HOURS
   6
   6

2. Bachelor of Architectural Studies
   Honors Professional Electives and/or Upper Level (3000+) University Honors Courses, including approved methods of research course.
   - Professional Core Honors Courses in Architecture (Architectural Technology and/or History of Architecture)
   - Honors Research Thesis
   HOURS
   3
   6

Department of Architecture Honors Thesis/Research Project
All honors students will pursue a research project during the final semester of their undergraduate program. Most students in the Bachelor of Architecture curriculum will identify a research topic suggested by the fall semester (fifth year) comprehensive studio project, and developed within a studio environment involving both design and research skills. Bachelor of Architecture students in the History of Architecture and Urbanism major concentration and Bachelor of Science in Architectural Studies students will develop...
traditional research theses, articulating topics identified in the Methods of Architectural Research Colloquium or the Methods of Research in Architectural History Colloquium. The Research Project involves original work by each student under the direction of a committee which shall include a thesis director (for most students, this will be the research-studio instructor), the faculty honors mentor, and at least one faculty advisor. Typically, students will complete and present a written prospectus for the Research Thesis no later than December 15 of the fall semester of the final year of study, (e.g. the semester prior to developing the thesis). For honors students pursuing major concentrations in the Department of Architecture, the thesis requirements of the concentration area supersede Architecture Honors Program requirements. Students are expected to complete their projects in one semester and shall meet a schedule of interim requirements established by the Thesis Committee in consultation with the Architecture Honors Committee. Guidelines for topic selection and preparation of the Honors Thesis/Research Project are available from the Architecture Honors Committee.

Department of Landscape Architecture Honor’s Program

Required Course Work

An honors student in the School of Architecture’s Department of Landscape Architecture is required to take a total of 36 credit hours of honor’s courses within the University and Department requirements for graduation. This course work is summarized as follows:

<table>
<thead>
<tr>
<th>Course Work</th>
<th>HOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>University Core or Elective at the Honor’s level which shall include 3 credit hours of Honors Colloquium</td>
<td>12</td>
</tr>
<tr>
<td>Landscape Architecture Professional Core at the Honor’s level, which may include design studio, construction laboratory, or history classes</td>
<td>9</td>
</tr>
<tr>
<td>Professional Electives, as identified with the Professional Core, at the Honor’s level, which may include coursework within the Landscape Architecture Department or from other University department programs</td>
<td>9</td>
</tr>
<tr>
<td>Honor’s thesis or project as described below</td>
<td>6</td>
</tr>
</tbody>
</table>

Each Honor’s student shall have a Department faculty advisor who will consult with the student throughout the university experience. The advisor will meet with the student a minimum of two times every fall and spring semester and correspond at least once during the summer. These sessions are venues for students to discuss their academic progress, course work, community service activities, and leadership development opportunities.

Honors courses within the Professional Core may be fulfilled through independent study or additional course work within the History of Landscape Architecture, Contemporary Landscape Architecture, Construction III, and Construction IV.

The student may also select honors work within Design Studio VI or VII. Additional work may include in-depth precedent research and design application(s), and increased design resolution and details, as determined by the studio instructor. In addition, a student may choose, with mutual faculty agreement, an independent studio. This studio option is in addition to the required studios in the professional program and would only be available during the spring or summer semester of the fourth or fifth year.

An Honor’s student will be required to fulfill 6 credit hours of a written academic thesis or thesis design project. For the written thesis option, the student must take a 3 credit hours professional elective directly related to the thesis topic, and 3 credit hours of Special Projects with student’s thesis advisor or other faculty designee. For the studio thesis option, the student must take an honor’s level 3 credit hour Senior Project Preparation course and an honor’s level 3 credit hour sub-section of Design Studio VIII Senior Demonstration Project entitled “Design Research”. All landscape architecture students in the professional program are required to complete a Senior Demonstration Project. Honors students pursuing the design thesis option are expected to integrate significant research within the design. All honors students are highly encouraged to take a research methods course within the subject or topic area, and scheduled prior to thesis work.

ACCREDITATIONS

The architecture program was founded in 1946 and has been accredited by the National Architectural Accrediting Board (NAAB) since 1958. The landscape architecture program was established in 1975 and has been accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects (ASLA) since 1983. The School holds memberships in the Association of Collegiate Schools of Architecture (ACSA) and the Council of Educators in Landscape Architecture (CELA), organizations comprised of North American schools of architecture and landscape architecture.

In the United States, most state registration boards require a degree from an accredited professional degree program as prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Masters of Architecture and the Doctor of Architecture. A program may be granted a six-year, three-year, or two-year term of accreditation, depending on its degree of conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The Landscape Architecture Accreditation Board (LAAB) is the sole agency authorized to accredit U.S. professional degree programs in Landscape Architecture. LAAB recognizes the Bachelor of Landscape Architecture, Bachelor of Science in Landscape Architecture, and Masters of Landscape Architecture. It accredits each program every five years, evaluating degree of conformance with established education standards.

Masters degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.
Departmental Majors

ARCHITECTURE (ARCH)

Department Office
120 Vol Walker Hall
479-575-4945

- University Professor Emeriti Smart
- Professors Blackwell, Goodstein, Shannon, Vitale, Wall
- Associate Professors de Noble, Herman, Kucker
- Assistant Professors Messadi, Rudzinski, Sexton, Smith, Terry
- Clinical Assistant Professors Fitzpatrick
- Adjunct Assistant Professors Del Gesso, Piga

Bachelor of Architecture Degree

1. Completion of the following 95-hour professional program:

- Architectural Design
  - ARCH 1014, ARCH 1024, ARCH 2016, ARCH 2026, ARCH 3016, ARCH 3026, ARCH 4016, ARCH 4026, ARCH 5016, ARCH 5026

- Architectural Technology
  - ARCH 2114, ARCH 2124, ARCH 3134, ARCH 3144, ARCH 4154, ARCH 5162

- History and Theory of Arch.
  - ARCH 1212, ARCH 1222, ARCH 2233, ARCH 2243, ARCH 4433

2. Completion of the 35-hour general University Core as listed on page 40. In addition, specific requirements are listed below:

- Mathematics
  - MATH 2043 or MATH 2053

- Laboratory Science
  - PHYS 1044/1040L or PHYS 2013/2011L, required.
  - PHYS 1054/1050L or PHYS 2033/2031L, strongly recommended.

3. Completion of 27 hours of electives, as follows:

- Professional Electives
  - Chosen from upper-level courses (courses numbered 3000 or above) taught on the Fayetteville campus of the School of Architecture. Students participating in the Rome program may present only three hours of elective course work for professional elective credit. All other elective courses will be used to fulfill free elective requirements.

- Free Electives

4. A minimum of 157 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in all professional course work attempted is required. See Academic Policies.

5. Completion of the University Advanced Composition requirement either by course work or exemption by exam.

6. Participation for at least one semester in an approved international educational experience. (See Off-Campus Study Requirement, page 89.)

HOURS

95

56

22

13

4

NOTE: The hours of any required course from which a student has been exempted will be added to the free elective requirement. No more than three hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the curriculum. ENGL 2003 is not counted toward degree credit, nor is ARCH 1003 for Architecture majors.

By following the preceding curriculum, students will meet the state-mandated University Core Requirements. They must also meet all other University requirements for graduation (page 40). We require that transfer students present a minimum of one semester of physics (with laboratories) and strongly recommend a second course in physics as fulfillment of the science requirement in the State Minimum Core. See University Core Requirements, page 40. Physics is preparatory to architectural technology courses; students presenting a different science option may have difficulty in the architectural technology courses.

Sample curriculum for the Bachelor of Architecture degree can be obtained from the School’s Academic Advising Center.

Professional Licensure Degree Requirement

The National Architectural Accrediting Board (NAAB) only accredits professional programs offering the Bachelor of Architecture, which requires a minimum of five years of study, and the Master of Architecture degrees. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects. The curricular requirements for awarding these degrees must include three components — general studies, professional studies, and electives. Together these three components comprise a liberal education in architecture and ensure that graduates will be technically competent, critical thinkers who are capable of defining multiple career paths within a changing societal context.

While no four-year degrees are accredited by NAAB, the Bachelor of Science in Architectural Studies degree is useful to those who want a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment in fields related to architecture.

Major Concentration in the History of Architecture and Urbanism

The major concentration in the History of Architecture and Urbanism requires at least 33 semester hours and must include the following:

1. Completion of requirements for admission to the professional program in architecture, including ARCH 2233, ARCH 2243 and ARCH 4433, and presentation of a 3.25 grade-point average.

2. At least nine hours of professional electives in a chosen area of specialization. Sample areas of specialization include the following:

- American Architecture and Urbanism — select from
  - ARCH 4483 Arch. in the Americas
  - ARCH 5933 Preservation & Restoration
  - ARCH 4023 History of the City in American Art and Culture
  - ARCH 4023 American Building
  - ARCH 303 Morphology of Small Towns
  - ARCH 303 House Culture
  - LARC 3413 History of Landscape Architecture
  - LARC 4413 Contemporary Landscape Architecture, and
    other approved courses. Students declaring a specialization in American Architecture may develop an emphasis in Historic Preservation; ARCH 5933 is required for the emphasis.

- Early Modern (Renaissance and Baroque) Italy — select from
  - ARCH 4023 Italian Arch. from the Renaissance to the Present
  - ARCH 5493 History of Urban Form
ARCH 4023 Birth of Modern Culture, (1600 - 1900)
ARCH 4023 St. Peter’s Basilica
ARCH 302 Italian Art and Culture
ARCH 303 Arch. of the City, Rome
LARC 3413 History of Landscape Architecture and other approved courses.

**Modern Architecture and Urbanism**—select from
ARCH 4443 History of Architecture IV
ARCH 4483 Arch. in the Americas
ARCH 4913 Design Thinking: Relationships Between Theory and Process
ARCH 4023 History of the City in American Art and Culture
ARCH 303 House Culture
ARCH 4023 Italian Architecture from the Renaissance to the Present
ARCH 4023 Birth of Modern Culture, (1600 - 1900)
ARCH 303 Arch. of the City, Rome
LARC 4413 Contemporary Landscape Architecture, and other approved courses.

3. At least three hours in the History of Architecture and Urbanism Colloquium.
4. At least twelve hours of free electives to be selected from the following areas, to include:
   a. At least three hours in upper-level (3000+) art history courses related to the area of specialization.
   b. At least three hours in upper-level (3000+) humanities or social science courses related to the area of specialization; students pursuing the historic preservation emphasis must select ANTH 5023 or ANTH 5443.
   c. Foreign Language requirements for specialization to be determined in consultation with adviser. Students who intend to pursue graduate study in architectural history should have competency in at least one foreign language; French and/or German are recommended.
5. At least six hours of research thesis (ARCH 5026, option studio); students pursuing the historic preservation emphasis are strongly encouraged to participate in the UACDC option studio (ARCH 4016 or ARCH 4026) and/or the UACDC summer program (ARCH 303).
6. Students considering pursuing the minor concentration in History of Architecture and Urbanism are encouraged to fulfill the humanities and social science requirements of the 35-hour University Core with selections from the following courses.

ARHS 1003 Art Lecture
WLIT 1113 World Literature I
WLIT 1123 World Literature II
CLST 1003 Intro. to Classical Studies, Greece
CLST 1013 Intro. to Classical Studies, Rome
WCIV 1003 Western Civilization I
WCIV 1013 Western Civilization II
HIST 2003 History of the American People to 1877
HIST 2013 History of the American People 1877 to the Present
ANTH 1023 Intro. to Cultural Anthropology
Any foreign language, 2003 or 2013.

**SEE PAGE 247 FOR ARCHITECTURE (ARCH) COURSES**

**BACHELOR OF SCIENCE IN ARCHITECTURAL STUDIES**

The Bachelor of Science in Architectural Studies incorporates course work from the School of Architecture with liberal studies for students with interests that fall outside the parameters of the accredited professional degree program. The architectural studies program provides opportunities for students who wish to prepare for graduate study in an accredited architecture program or in an allied discipline, such as architectural history, historic preservation, urban planning, or construction management, as well as serving students who seek opportunities in related fields that may not require the five-year accredited degree.

**Requirements for a Bachelor of Science Degree in Architectural Studies:**

1. Completion of the following 35-hour architectural studies program:

<table>
<thead>
<tr>
<th>Course</th>
<th>HOURS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architectural Design</td>
<td>14</td>
</tr>
<tr>
<td>ARCH 1014, ARCH 1024, ARCH 2016</td>
<td></td>
</tr>
<tr>
<td>Architectural Technology</td>
<td>8</td>
</tr>
<tr>
<td>ARCH 2114, ARCH 2124, or LARC 2714, LARC 3723</td>
<td></td>
</tr>
<tr>
<td>History and Theory of Arch.</td>
<td>13</td>
</tr>
<tr>
<td>ARCH 1212, ARCH 1222, ARCH 2233, ARCH 2243, ARCH 4433</td>
<td></td>
</tr>
<tr>
<td>(Students interested in Landscape Architecture may substitute LARC 3413 for ARCH 2233 or ARCH 2243.)</td>
<td></td>
</tr>
</tbody>
</table>

2. Completion of the following 35-hour general education program:

**Minor Concentration in the History of Architecture and Urbanism**

The minor concentration in the History of Architecture and Urbanism requires at least 18 semester hours and must include the following:

1. Completion of requirements for admission to the professional program in architecture, including ARCH 2233, ARCH 2243, and ARCH 4433.
2. At least nine hours of professional electives in any area of architectural and urban history. Declaration of an area of specialization is not required for the minor concentration.
3. At least three hours in the History of Architecture and Urbanism Colloquium.
4. At least six hours in humanities and/or social science courses related to the minor concentration.
5. The research thesis (ARCH 5026, option studio) is optional for students in the minor; students interested in an historic preservation emphasis are strongly encouraged to participate in the UACDC option studio (ARCH 4016 or ARCH 4026) and/or the UACDC summer program (ARCH 303).
6. Students considering pursuing the minor concentration in History of Architecture and Urbanism are encouraged to fulfill the humanities and social science requirements of the 35-hour University Core with selections from the following courses.

ARHS 1003 Art Lecture
WLIT 1113 World Literature I
WLIT 1123 World Literature II
CLST 1003 Intro. to Classical Studies, Greece
CLST 1013 Intro. to Classical Studies, Rome
WCIV 1003 Western Civilization I
WCIV 1013 Western Civilization II
HIST 2003 History of the American People to 1877
HIST 2013 History of the American People 1877 to the Present
ANTH 1023 Intro. to Cultural Anthropology
Any foreign language, 2003 or 2013.
5. Completion of 21 hours of electives:

- Professional electives: 12 hours
  At least 6 hours in upper-level (3000 or above) courses taught in the School of Architecture. The remaining professional elective credits may be additional upper-level courses in the School of Architecture, approved courses in an allied discipline, or courses in another department of the University that contribute to the fulfillment of a recognized minor.

- Free electives: 9 hours
  At least six hours in courses numbered 2000 or above or courses in the School of Architecture numbered 2000 with specific course prerequisites.

- Humanities and Social Sciences: 12 hours
  A minimum of six hours in courses numbered above 3000 (not including any courses cross-listed with architecture).

- Fine Arts/Humanities: 6 hours
  One course must be elected from the fine arts core; one course from the humanities must be selected from PHIL 2003, PHIL 2103, PHIL 2203, or PHIL 3103. (See University Core Requirements)

- Social Science: 9 hours
  At least three hours should be taken in anthropology, economics, psychology, or sociology; and with not more than two courses taken from any one department to fulfill this requirement. (See University Core Requirements)

- Arts and Sciences: 6 hours
  A minimum of six hours in courses numbered above 3000 (not including any courses cross-listed with architecture).

- University Core Requirements: 12 hours

- Free electives: 9 hours

6. A minimum of 124 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in course work completed in the School of Architecture.

7. Presentation of at least 40 semester hours in courses numbered 3000 or above or courses in the School of Architecture numbered 2000 with specific course prerequisites.

8. Completion of the University Advanced Composition requirement, either by course work or exemption by exam.

9. Each student graduating in Architectural Studies must write a research/analytical paper in at least one upper-division course in her or his major or minor area.

10. Course work taken to remove course deficiencies assigned during admission or transfer will not be counted toward the degree. Similarly, courses considered to be remedial or developmental will not count toward the degree.

11. Unless exceptions are granted at the time of admission to the University of Arkansas, transfer work in which grades of “D” or “F” were earned will not be allowed toward credit for graduation. See the Admission chapter in this catalog for more information.

Architectural Studies degree candidates may pursue an academic minor. The minor must be in a field other than the major area, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours. Specific requirements for the minor are given in the section entitled “Majors, Minors, and Courses of Instruction.” Although students in architectural studies may choose from any recognized minor offered by the University, they are encouraged to consider the following fields:

- African-American Studies
- Anthropology
- Art
- Art History
- Business Administration
- Classical Studies
- Communication
- Computer Sciences
- Drama
- Economics
- Environmental Studies
- Environmental Studies
- European Studies
- Gender Studies
- Geography
- History
- History
- Latin-American Studies
- Philosophy
- Political Science
- Psychology
- Sociology
- Sociology

Although foreign study is not required of candidates for the four-year degree, students in the architectural studies curriculum are encouraged to participate in the School of Architecture’s off-campus study programs in Rome and Mexico City. Architectural studies majors also may take advantage of the community service opportunities offered through the University of Arkansas Community Design Center (UACDC). To take maximum advantage of the opportunities the four-year degree offers for pre-professional development (cultivation of specialization in and related to the field, and/or preparation for graduate study) each candidate for the Architectural Studies degree will work with a faculty adviser to develop a program of study emphasizing a student’s special interests.

Sample curriculum for the Bachelor of Science in Architectural Studies degree can be obtained from the School’s Advising Center.
LANDSCAPE ARCHITECTURE (LARC)

Departmental Office
231 Memorial Hall
479-575-4907

- Professor Crone
- Associate Professors Beatty, Boyer, Brittenum, Rollet-Crocker
- Assistant Professors Fields

BACHELOR OF LANDSCAPE ARCHITECTURE DEGREE

1. Completion of the following 95-hour Professional core:  
   
   Design and Graphics  
   LARC 1315, LARC 1325, LARC 2113, LARC 2336, LARC 2346, LARC 3356, LARC 3914, LARC 3366 LARC 4376, LARC 4383, LARC 5386  
   56 HOURS

   Landscape Architecture/ History/Theory  
   LARC 1211, LARC 1221, LARC 3413, LARC 4413, LARC 3924  
   12

   Summer Study Abroad  
   LARC 3933, LARC 4123  
   6

   Landscape Architecture Technical Courses  
   LARC 2714, LARC 3723, LARC 3734, LARC 4714  
   18

   Horticulture  
   HORT 3103  
   3

   Professional Practice  
   LARC 5613  
   3

2. Completion of the 35-hour University Core as listed on page 40. As part of the University Core, the department recommends the following:  
   Labor Science  
   BIOL 1543/1541L or BIOL 1613/1611L and GEOL 1113/1111L  
   8

3. Completion of the following additional general education requirements:  
   Professional Electives  
   Students may select courses from the Departments of Landscape Architecture and Architecture as well as courses in history, geography, horticulture, art, sociology, environmental studies, and business. These courses can be thematically selected to emphasize urban studies, ecological planning, construction management, and land development.  
   15

   Free Electives  
   Students are encouraged to take courses outside the Department to broaden their education.  
   12

4. Candidates seeking graduation shall achieve a minimum of 157 hours and a minimum of a “C-” in each course within the professional curriculum. The remaining balance of hours shall have a minimum of 2.00 cumulative grade-point average.  
   Any student receiving a “D” or below in the professional core shall repeat the course. Any student with a second “D” or below shall be considered for non-continuance in the program as determined by the department head and faculty.

To continue in the professional program, the student must submit a portfolio after their second year for faculty review. Please see section “Admission to the Professional Program in Landscape Architecture.”

5. Students in landscape architecture are required to complete the department’s summer study abroad program, after their third year.

NOTE: The hours of any required course from which a student has been exempted will be added to the elective requirement. No more than four hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the School’s curriculum. ENGL 2003 is not counted toward degree credit nor is LARC 1003 for BLA majors.

By following the preceding curriculum, students will meet the state-mandated University Core Requirements. They must also meet all other University Requirements for graduation (page 40). We strongly recommend that transfer students present eight hours of laboratory science courses selected from botany, biology, geology, and physical science as part of the State Minimum Core.

Professional Licensure Degree Requirement

The School’s BLA program is accredited by LAAB, which requires that specific criteria be met in a professional program. This five-year professional program gives its graduates the required prerequisite degree to qualify to take the licensing exam and prepares them for practice.

Forty-four states require licensure for landscape architects. The primary purpose of this licensure is to “protect the health, safety, and welfare of the public.” Most states require that candidates possess an accredited degree in landscape architecture and complete a period of professional experience, working with a licensed landscape architect. Once these requirements are complete, candidates must pass a national, uniform exam, sometimes with additional sections unique to that state. Sample curriculum for the Bachelor of Landscape Architecture degree can be obtained from the School of Architecture Advising Center.

Bachelor of Science in Landscape Architectural Studies

The Bachelor of Science in Landscape Architectural Studies program focuses either on landscape architecture studies or on environmental design issues, which serve students who wish to pursue a career in the profession of landscape architecture but do not seek licensure. The program utilizes existing professional courses within the Departments of Landscape Architecture, Architecture and the University to fulfill the required course work. The total number of hours of credit required for graduation is 124.

This degree program opens the opportunity to more individuals who have interests that can further the body of knowledge within the profession. For example, specialist areas are growing in the sub-fields of cultural landscape preservation and documentation, critical analysis of built works, contemporary case-study development, and urban planning and design. This program prepares students for work in private-sector landscape architecture and planning offices, public policy and administration departments, and the not-for-profit sector. Students will be prepared for graduate school and can pursue professional degrees in landscape architecture, urban planning and design, business, and law, and graduate degrees in historic landscape preservation, history, public policy, public administration, and journalism.
### Requirements for a Bachelor of Science in Landscape Architectural Studies

1. **Completion of the following 35-hour landscape architecture studies program:**  
   - Landscape Architecture Design  
     - LARC 1315, LARC 1325, LARC 3914, LARC 2113, LARC 2123  
   - Landscape Architecture Technology  
     - LARC 2714 or LARC 4743 or LARC 3723  
   - History and Theory of Landscape Architecture  
   - Research thesis preparation  
     - LARC 302V

1. **Completion of the following 27-hour basic program in the arts:**  
   - Communications  
     - COMM 1313
   - Humanities and Social Sciences  
     - WCIV 1003 and WCIV 1013 or HIST 1113 and HIST 1123, WLIT 1113 and 3 hours from WLIT 1123 or a foreign language literature course, CLST 1003 OR CLST 1013
   - Arts and Sciences  
     - A minimum of twelve (12) hours in courses numbered above 3000 (not including any courses cross-listed in the School of Architecture).

3. **Completion of the following foreign language requirement**  
   - Foreign Language  
     - Depending on placement, students must be introduced to a single modern or classic language other than English by completing two courses (1003 and 1013 or 2003 and 2013). Students with two years or more in one foreign language in high school may satisfy this requirement with higher-level course work. In cases of unusually thorough preparation, or in the case of international students, exemption may be sought through the department.

4. **Completion of 21 hours of electives**  
   - Professional Electives  
     - Credits may be from upper-level (3000 or above) courses from the departments of landscape architecture and architecture, sociology, geography, horticulture or other approved courses in an allied discipline or other courses that contribute to the fulfillment of a recognized minor.
   - Free Electives  
     - 9
   - University Core  
     - 35

A minimum of 124 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in course work completed in the Department of Landscape Architecture and the School of Architecture.

Presentation of at least 40 semesters in courses numbered 3000 or above or courses in the School of Architecture numbered 2000 with specific course prerequisites.

Completion of the University Advanced Composition requirement, either by course work or exemption by exam.

Each student graduating in Landscape Architectural Studies must write a research/analytical paper in at least one upper division course in his or her major or minor areas. Prior to or in association with developing this paper, the student must select a faculty from the Department of Landscape Architecture from whom to take a Special Studies one-credit preparation and review course.

Course work taken to remove course deficiencies assigned during admission or transfer will not be counted toward the degree. Similarly, courses considered to be remedial or developmental will not count toward the degree.

Transfer work in which grades of “D” or “F” were earned will not be allowed toward credit for graduation.

Landscape Architectural Studies candidates may pursue an academic minor. The minor must be in a field other than the major area, and the students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours, which are dictated by the department of the minor. Students in Landscape Architectural Studies may choose from any recognized minor offered by the University; however, they are encouraged to consider the following fields:

- Public Policy, History, Geography, and Horticulture, and further encouraged to consider cross-disciplinary study in African-American Studies, Anthropology, Art, Art History, Business Administration, Classical Studies, Communication, Computer Sciences, Economics, English, European Studies, Gender Studies, Latin-American Studies, Philosophy, Political Science, Psychology and Sociology.

Although foreign study is not required for candidates in Landscape Architectural Studies, students in the curriculum are encouraged to participate in the School of Architecture’s off-campus study programs in Rome and Mexico City. Community planning projects are offered through the University of Arkansas Community Design Center (UACDC).

To take maximum advantage of the opportunities of the four-year degree program, each student in the Landscape Architectural Studies program shall work with the department head to develop a program of study emphasizing special interests, to cultivate a specialization related to the field, and to guide preparation for graduate study, if desired.

J. William Fulbright
College of Arts and Sciences

MISSION AND OBJECTIVES

No one in 20th century America has done more to advance the study of international relations or promote human understanding than J. William Fulbright. Committed to the idea that a free society and a peaceful world require, above all, an educated citizenry, he urged with unflagging energy the use of historical perspective, cultural relativity, and scientific objectivity in the study of human affairs. Senator Fulbright, like Thomas Jefferson, Andrew Jackson, and Abraham Lincoln before him, was committed to the belief that an educated, enlightened electorate will unerringly act not only in its own self-interest but also in the interest of all the people of the world.

In recognition of J. William Fulbright’s contribution to the cause of liberal education and of his many services to his native state, the Board of Trustees of the University of Arkansas on November 20, 1981, resolved...

The College of Arts and Sciences at the University of Arkansas, Fayetteville, shall be named, henceforth, the J. WILLIAM FULBRIGHT COLLEGE OF ARTS AND SCIENCES. His name will imbue that college, and the University, with his reputation and image for a devoted interest in higher education and its accomplishments through its scholars as reflected in its students. That name will endow the college in such a way as to make it a worldwide center for liberal learning in the general and for the study of international relations in particular.

The college, dedicated to implementing the Fulbright philosophy that liberal education is a prerequisite for enlightened citizenship in a democratic society, has adopted as its mission the following statement from Fulbright’s writings:

... the highest function of higher education ... is the teaching of things in perspective, toward the purposes of enriching the life of the individual, cultivating the free and inquiring mind, and advancing the effort to bring reason, justice, and humanity into the relations of men and nations.

Consisting of 19 departments and 22 special programs and research centers, Fulbright College has a twofold mission: to provide a broad, liberal education to all students within the University community and to furnish specialized knowledge at the upper division and graduate levels leading to a professional career. The general education curriculum within the college is designed to assure students’ mastery of the English language, provide knowledge of the historical, social, intellectual, and linguistic bases of human culture, provide habits of thought and investigation useful in later life, encourage exploration
and development of aesthetic, political, and ethical values, and offer the necessary foundation for professional competence or further training in professional or graduate schools. The general education curriculum of the college is based on the Platonic assumption that the pursuit of knowledge is an intrinsically good activity and that it is incumbent upon all members of an enlightened society to engage in that pursuit.

Recognizing that its students must become productive members of contemporary American society, Fulbright College offers undergraduate majors in 43 different fields ranging from chemistry and art to journalism and German. In addition, the college, in cooperation with the Graduate School, offers course work leading to master’s degrees in 32 fields and doctoral degrees in 11 fields. As a natural corollary of their instructional role, the faculty of the college pursue active research programs in their fields and programs that enable them simultaneously to provide state-of-the-art education to their students and bring national and international recognition to the University.

In sum, Fulbright College lies at the very heart of the University. The seat of liberal learning within the institution and the state, it is committed to providing excellent general education to all members of the student body and specialized instruction of the highest quality to its own majors.

FACILITIES AND RESOURCES

Academic Advising Services

The Fulbright College of Arts and Sciences provides an adviser for each student enrolled in the college. The faculty of each department within Fulbright College assumes responsibility for advising those students who have declared majors in the department and those who have declared current interest in the department as a possible major area. Other advisory services exist to provide aid and direction to students who are non-degree candidates as well as those who are beginning work in the college without having yet decided on a major and those who are planning to attend professional schools such as those for medicine or pharmacy. Advisers in the Fulbright Advising Center will assist students in program planning and will help them to become aware of and familiar with the academic offerings of the University. Students should consult their advisers on a regular basis, not limited to registration matters but including all areas of their academic careers. Personnel in the Dean’s office will direct students to the appropriate advising office.

Students should discuss with their advisers opportunities for individual variations as well as regular course requirements, etc. Programs and facilities of particular interest to individuals may include the Honors Program, programs for Advanced Placement and Credit by Examination, and the services of the University Career Development Center.

The Career Development Center administers and interprets tests indicative of individual ability, interest, and achievement, and thus may aid also in counseling students about the field of study in which they are most likely to be effective and successful.

DEGREES OFFERED

For a complete list of departmental majors, minors, concentrations, options and coursework, see the chart on pages 100 and 101.

The J. William Fulbright College of Arts and Sciences offers four-year curricula leading to the degrees of Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), and Bachelor of Music (B.M.). Each candidate for the B.A. and B.S. degrees selects a major field for specialized study. In addition to usual departmental majors there are interdepartmental majors and special programs for students preparing for professional degrees in law, medicine, dentistry, and teaching.

Second (or dependent) Majors*

African American Studies
European Studies
Latin American Studies
Middle East Studies
Russian Studies

* A second (or dependent) major must be earned in a degree program in which the first major is one authorized to be given independently.

Minors

Academic minors in approved degree programs are options available to students in the Fulbright College of Arts and Sciences. The minor must be in a field other than the major, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours. Specific requirements for the minor are given in the section entitled Majors, Minors, and Courses of Instruction. Minors may be chosen from the following fields:

- African-American Studies
- History
- Anthropology
- Japanese
- Art
- Latin American Studies
- Art History
- Legal Studies
- Biology
- Mathematics
- Business
- Medieval and Renaissance Studies
- Chemistry
- Middle East Studies
- Classical Studies
- Music
- Communication
- Philosophy
- Computer Science
- Physics
- Drama
- Political Science
- Economics
- Pre-Education
- English
- Psychology
- European Studies
- Religious Studies
- French
- Social Work
- Gender Studies
- Sociology
- Geography
- Spanish
- Geology
- Statistics
- German

Fulbright College also recognizes all official minors offered by sister colleges at the University of Arkansas. Students wishing to have such minors made a part of their transcript must notify the Fulbright College dean’s office (MAIN 525) when degree application is made.
OTHER PROGRAMS

Undergraduate Preparation for Professional Programs

The Fulbright College of Arts and Sciences offers courses that are required for the study of law, medicine, dentistry, teaching, pharmacy, social work, and other professions. It provides supporting programs in the humanities, fine arts, social sciences, and natural sciences for students who are enrolled for professional programs in other undergraduate colleges on the campus and for those students who may plan to enter postgraduate professional programs in other colleges.

In some instances it may be possible for a student to plan the use of undergraduate courses so that the time required for completion of a postgraduate professional program may be shortened by as much as one full year. Currently, this may be done for the Master of Social Work program. For information and advice concerning this program see the Director or Associate Director of the School of Social Work.

In other pre-professional programs, the distribution of credits applied toward a degree in Fulbright College may require the assignment of a considerable portion of the available electives to prerequisite courses and to courses that are in direct support of the undergraduate major area.

Interested students should contact the appropriate advisers early in the planning of such programs.

Teacher Education Programs: Acceptance in a teacher education program is governed by regulations approved by the University Teacher Education Board for Initial Licensure and administered by the College of Education and Health Professions and the Fulbright College of Arts and Sciences. Students in Fulbright College can pursue teacher licensure in the following areas: Art, Drama/Speech, English, Foreign Languages, Mathematics, Music, Life/Earth Science, Physical/Earth Science, or Social Studies. Students in all subject areas, except Art and Music, must meet the entrance requirements for the Master of Arts in Teaching (M.A.T.) degree, which include completion of a baccalaureate degree in the subject area, completion of additional licensure requirements (if any) in subject area, completion of M.A.T. course requirements and a minimum 2.70 grade point average. See below for specific requirements in each subject area. Students intending to obtain teacher licensure in Art or Music will follow the education requirements set forth in the Bachelor of Fine Arts and Bachelor of Music degrees, respectively. For more information, please contact the Coordinator of Teacher Education in the College of Education and Health Professions, Peabody Hall, Room 8, and the Fulbright Advising Center, Old Main, Room 101.

Secondary Education Requirements for Fulbright College

Students (except in Art and Music)

1. All students must complete course requirements for entrance into the M.A.T. degree program. (All course requirements are subject to change. Students must meet current requirements at time of application for graduation.)

Licensure for teaching requires completion of the bachelor’s degree in Fullbright College and completion of the Master of Arts in Teaching (M.A.T.) degree through the College of Education and Health Professions. Admission to the M.A.T. degree program requires a minimum cumulative undergraduate grade-point average of 2.70 and completion of the following requirements. Refer to the teacher licensure checklist at http://www.uark.edu/depts/coehp/Certification.htm/ for licensing requirements and additional information.

Complete the following with a grade of “C” or higher:

a) CIED 4131, Practicum in Secondary Education
b) Demonstration of computer competencies in a portfolio or:
E TEC 2001, Educational Technology and
ETEC 2002L, Educational Technology Lab
c) CIED 3023, Survey of Exceptionality or:
CIED 4023, Teaching in Inclusive Secondary Settings (taken in the first summer session before entering the M.A.T. program)

2. Complete subject area requirements. (See below for specific subject area requirements.)

Drama/Speech

Complete a BA degree with a major in Communications or Drama.

Communication majors must take the following Drama courses:

DRAM 1223 Introduction to Dramatic Art
DRAM 1683 Acting I
DRAM 1313 and 1311L, Stage Technology I
DRAM 1323 and 1321L, Stage Technology II
DRAM 3653 Directing I

Drama majors must take the following Communication courses:

COMM 2573 Introduction to Debate
COMM 4793 Directing Forensics
COMM 2351 Parliamentary Procedures
COMM 2303 Public Speaking
COMM 3303 Small-Group Communication

Students are advised to obtain an additional licensure area.

English

Complete a BA degree with a major in English.

Students are advised to obtain an additional licensure area.

Foreign Languages

Complete a BA degree in French, German or Spanish.

Pass Oral Proficiency Examination in French, German, Russian, and Spanish equivalent to Mid-Intermediate Rating on the ACTFL/ETS test (taken at end of senior year).

Life/Earth Science

Complete a BA or BS degree with a major in biology.

The following Earth Science courses are recommended for preparation of Praxis II content area:

GEOL 1113/1111L
GEOL 1133/1131L
ASTR 2003/2001L
CIED 5243

Mathematics

Complete a BA or BS in mathematics.

Physical/Earth Science

Complete a BA or BS degree with a major in chemistry or physics.

The following Earth Science courses are recommended for preparation of Praxis II content area:

GEOL 1113/1111L
GEOL 1133/1131L
ASTR 2003/2001L
CIED 5243

Social Studies

Complete a BA degree in anthropology, economics, history, geography, political science, psychology, or sociology.

Complete these additional course requirements:

ECON 2143, Basic Economics or any other 3 hour credit
ECON course
HIST 4583, Arkansas and the Nation

Students are advised to obtain an additional licensure area.

* Indicates majors that are “second,” “dependent,” or “combined.” See each program for more details.
Pre-Law Program: While there is no prescribed pre-law curriculum, Fulbright College offers a minor in legal studies administered through the department of political science. Students considering a career in law may consult the UA School of Law Catalog or the Fulbright College Advising Center for information concerning certain categories of courses that may be helpful to the study and practice of law. Students uncertain about a major degree program should contact the Fulbright Advising Center.

A baccalaureate degree is required for admission to the UA School of Law, except for those students in the Fulbright College of Arts and Sciences who are admitted to the special six-year program referred to in the paragraph immediately following. All applicants for admission are required to take the Law School Admission Test. (See page 207.)

The University of Arkansas School of Law at Fayetteville and the Fulbright College of Arts and Sciences jointly administer a six-year program whereby highly qualified students may earn both the bachelor’s degree and the Juris Doctor degree. Any student enrolled in the J. William Fulbright College of Arts and Sciences during a spring semester shall be permitted to matriculate in the School of Law in the following fall semester if the admission complies with Section 1 of Part A of the law school’s admission policies and if the student meets the following conditions:

1. At least 30 consecutive hours of course work in Fulbright College,
2. At least 94 hours credited toward a bachelor’s degree by Fulbright College,
3. Completion of Fulbright College’s requirements for a major in connection with the bachelor’s degree,
4. A cumulative grade-point average in all college or University course work of at least 3.50, without grade renewal,
5. An LSAT score of at least 159.

A student may substitute law school course work for the remaining total hours required for the bachelor’s degree from Fulbright College. Formal application for the degree should be made to the Registrar. Information about the program may be obtained in the dean’s office or the Fulbright Advising Center.

For additional information about these and other allied health professions, contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307, or e-mail: fcac@cavern.uark.edu, Web site: http://www.uark.edu/~fcac/.

General: Each of the above areas involves the completion of a minimum number of semester hours and certain required courses. Many of the specific course requirements are common to all programs, and it is in the student’s best interest to complete these requirements as early as possible. Careful scheduling is essential to ensure that courses are taken in proper sequence.

Pre-Chiropractic Program: Students entering the pre-chiropractic program should determine the specific admission requirements for the school(s) of their choice at an early date. Most chiropractic colleges require a minimum of 90 hours of college credit to include the following: 6 hours of English, 12 hours chemistry (with a minimum of 3 hours inorganic chemistry and at least 6 hours organic chemistry and/or biochemistry), 8 hours of biology or zoology, 3 hours of psychology, 15 hours of social science or humanities, and 8 hours of physics.

All students planning careers in chiropractic should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Dental Program: All dental schools require a minimum of three years of college work, and most schools give preference to applicants who have completed a baccalaureate degree. The minimum requirements for admission to most dental schools can be met at the University of Arkansas by completing the following courses:

- ENGL 1013, ENGL 1023, BIOL 1543/1541L plus 4 additional hours of biology
- PHYS 2013/2011L, PHYS 2033/2031L, and
- CHEM 1103/1101L, CHEM 1123/1121L, CHEM 3603/3601L, CHEM 3613/3611L.

Mathematics is not a general requirement, but students are expected to have a background equivalent to college algebra and trigonometry.

Students who complete a minimum of 90 hours of work may qualify for the combined degree program provided that they complete the requirements for graduation in Fulbright College of Arts and Sciences.

All dental schools require the Dental Admissions Test. It is suggested that applicants take the DAT one year prior to the time they plan to enter dental school. A student planning a career in dentistry should contact Dr. J.C. Rose, Department of Anthropology, 479-575-2508.

Pre-Medical Program: Medical schools in general require a minimum of 90 semester hours of college credit exclusive of military science and physical education, and most recommend that the student complete a baccalaureate degree. All medical schools have specific course requirements, and the student should determine those requirements for the school or schools of his or her choice. The minimum requirements for most medical schools can be met by completion of the following courses:

- ENGL 1013, ENGL 1023, or equivalent
- BIOL 1543/1541L, plus one other course in biological sciences, or equivalent
- CHEM 1103/1101L, CHEM 1123/1121L, CHEM 3603/3601L, CHEM 3613/3611L
- MATH 1203 and MATH 1213, or MATH 2554
- PHYS 2013/2011L and PHYS 2033/2031L, or PHYS 2054 and PHYS 2074.

CLEP credit is not accepted.

Additional courses are recommended. Special opportunities and experiences are available to pre-medical students through the Liebolt Endowment.

Pre-medical students are encouraged to complete the requirements for the B.A. or B.S. degree. As part of these requirements the student must choose a major, but the choice of a major has no direct bearing upon admission to medical school and should reflect the particular interests of the student. If a student is admitted to a medical school prior to completion of the baccalaureate degree requirements, he/she may wish to take advantage of the combined degree program in medical science. If that program is elected, the student should complete all of the basic University and college requirements for graduation while residing on the UA campus.

Most medical schools require the Medical College Admissions Test (MCAT), which is given in the spring and fall at the University. The MCAT normally should be taken in the spring preceding application to medical school. Admission to medical school is highly competitive, and a good grade-point average is demanded. A grade-point average of 3.30 is the minimum likely to receive favorable
consideration. A grade of “D” in any course required by the medical school is not considered satisfactory. Advising is available through Dr. Neil Allison, Department of Chemistry and Biochemistry, 479-575-5179, and Dr. Jeanne McLachlin, 479-575-5348. Dr. Allison serves as chair of the University of Arkansas Pre-medical Advisory Committee. For information, visit the University of Arkansas pre-medical Web site: http://www.uark.edu/premed/.

Pre-Optometry Program: Admission requirements to schools and colleges of optometry are not uniform. Typically they include courses in English, mathematics, physics, chemistry, and biology or zoology. Some colleges and schools have specific requirements in psychology, social sciences, literature, philosophy, and foreign languages. Students in this program should determine the specific requirements of the school or college they wish to attend at an early date and plan their program of study accordingly. Details concerning the program are available from Dr. Tim Kral, Department of Biological Sciences, 479-575-3251.

Pre-Pharmacy Program: Entrance requirements for pharmacy schools vary, therefore students should research the schools of their choice to determine specific prerequisite course work.

The University of Arkansas for Medical Sciences College of Pharmacy requires 65 hours of pre-professional courses to include: 4 hours of calculus, 9 hours of English/Communication, 16 hours of chemistry, 8 hours of biology, 4 hours of physics, 3 hours of economics, 6 hours of critical thinking/problem solving, and humanities to total 65 hours.

Students are advised to begin taking humanities electives during the second semester of their freshman year. Since pharmacy schools have many more applicants than they can accept, the student is urged to earn a grade-point average somewhat higher than the minimum of 2.00.

Grades are a major consideration when admission committees evaluate a student’s qualifications for acceptance. The University of Arkansas College of Pharmacy and other pharmacy schools also require applicants to take the Pharmacy College Admission Test (PCAT). This may be taken in November or February. See the adviser for details.

The pre-pharmacy adviser for the University of Arkansas is Lorraine Brewer, Department of Chemistry and Biochemistry, 479-575-3103.

Pre-Podiatry Program: To meet entrance requirements for colleges of podiatry, an applicant must have completed a minimum of three years at an accredited undergraduate institution, however, most entering students have completed a baccalaureate degree.

Courses required for admission vary with the college, and a student should inquire early in the academic program about the courses required for a particular institution. In general, a student is advised to include at least 8 hours of general chemistry, 8 hours of organic chemistry, 8 hours of physics, 8 hours of biology, and 6 hours of English. Additional information concerning requirements for specific colleges of podiatry may be obtained from Dr. Neil Allison, Department of Chemistry and Biochemistry, 479-575-5179.

Pre-Cytotechnology Program: Requirements for the University of Arkansas for Medical Sciences College of Health Related Professions program in cytotechnology include 20 hours of biology, 8 hours of chemistry, 3 hours of college algebra, 6 hours English composition, 6 hours of Western civilization, 3 hours in American history or national government, 3 hours in the humanities, 6 hours in the social sciences, 3 hours of communication, 3 hours fine arts, and 24 hours of electives for a total of 84 hours. At least 5 of these elective hours must be upper-level.

All students planning careers in cytotechnology should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Dental Hygiene Program: Students entering the pre-dental hygiene program should determine the specific requirements for admission to the schools of their choice at an early date. Entrance requirements for the dental hygiene program at the University of Arkansas for Medical Sciences College of Health Related Professions consist of a minimum of 37 hours of college credit to include the following courses: 4 hours of biological science, 4 hours of microbiology, 4 to 5 hours of chemistry, 3 hours of mathematics, 6 hours of English, 3 hours of speech, 3 hours of sociology, 3 hours of psychology, 3 hours of computer science, and 3 hours of U.S. history or U.S. government. Students wishing to earn the B.S. degree in dental hygiene through the College of Health Related Professions must include: 6 hours of Western civilization, 3 hours of fine arts, 3 hours of humanities, and 12 hours of upper-level electives.

All students planning careers in dental hygiene should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Diagnostic Medical Sonography Program: Students entering this program should determine the specific admission requirements for the school of their choice at an early date. The admission requirements for the diagnostic medical sonography program at the University of Arkansas for Medical Sciences College of Health Related Professions consist of a minimum of 63 semester hours to include: 6 hours of English, 4 hours of human anatomy, 4 hours of human physiology, 4 hours of introductory physics, 3 hours of communication (speech), 3 hours of college algebra, 3 hours of U.S. history, 6 hours of history of civilization, 3 hours of sociology, 3 hours of psychology, 3 hours of fine arts, 3 hours of humanities, 3 hours of computer fundamentals/applications, and 15 hours of electives.

All students planning careers in diagnostic medical sonography should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Medical Technology Program: Students entering this program should determine the specific admission requirements for the school of their choice at an early date. The admission requirements for Medical Technology at the University of Arkansas for Medical Sciences College of Health Related Professions are as follows:

Applicants for admission must present a minimum of 68 semester hours to include 6 hours of English, 8 hours of general chemistry, 16 hours of biology (4 hours of introductory biology, 4 hours of microbiology, 4 hours of human physiology, and 4 hours of biology electives), 3 hours of communication (speech), 3 hours of fine arts, 6 hours of Western civilization, 3 hours of college algebra, 3 hours of U.S. history, 6 hours of other social sciences (two different fields), 3 hours of humanities, and 12 hours of electives.

All students planning careers in medical technology should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Nuclear Medicine Technology Program: Students who wish to attend a program in nuclear medicine technology should determine the specific requirements for admission to the schools of their choice. Admission requirements for the University of Arkansas for Medical Sciences, College of Health Related Professions, include completion of the courses listed below or their equivalents plus enough electives to bring the total to 85 hours.

Course requirements for admission are as follows: 4 hours of anatomy, 4 hours of physiology, 8 hours of general chemistry, 4 hours of general physics, 3 hours of college algebra or higher-level mathematics, 6 hours of English, 3 hours of speech communication, 3 hours of fine arts appreciation, 6 hours of Western civilization, 3 hours of U.S. history, 6 hours of social sciences, 3 hours of humanities, and at least 8 hours of upper-level credits. It is recommended that elective courses be in math and science, technical writing, computers, and health sciences.

All students planning careers in nuclear medicine technology should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Occupational Therapy Program: Students entering the pre-occupational therapy program should determine the specific
requirements for admission to the schools of their choice at an early date. The admission requirements for occupational therapy at the University of Central Arkansas consist of a minimum of 72 hours of college credit to include the following courses: 6 hours of English, 3 hours of world literature, 3 hours of fine arts, 3 hours of health education, 3 hours of US history or government, 3 hours of humanities, 3 hours of mathematics, 2 hours of medical terminology, 6 hours of Western civilization, 3 hours of communication (speech), 15 hours of biology (must include a course in both anatomy and physiology), 5 hours of chemistry, 4 hours of physics, 6 hours of psychology (including 3 hours of statistics), 3 hours of sociology, an additional 3 hours of either sociology or psychology electives, and 3 hours of developmental psychology (HESC 1403 Life Span Development can meet this requirement).

All students planning careers in occupational therapy should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Ophthalmic Medical Technology Program: Admission requirements for ophthalmic medical technology at the University of Arkansas for Medical Sciences College of Health Related Professions consist of a minimum of 55 credit hours to include: 4 hours of anatomy, 4 hours of physiology, 4 hours of microbiology, 9 hours of biology electives, 4 hours of physics, and 3 hours of college algebra (or higher level mathematics). General education courses: 6 hours of English composition, 6 hours of history of civilization/world history, 3 hours of American history or national government, 6 hours of social science, 3 hours of speech communication, 3 hours of fine arts, and 3 hours of humanities.

All students planning careers in ophthalmic medical technology should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Physical Therapy Program: Students planning to attend physical therapy school should determine the specific admission requirements for schools of their choice at an early date.

Admission requirements for the Doctor of Physical Therapy program at the University of Central Arkansas require completion of a baccalaureate degree to include the following: 4 hours of general biology, 4 hours of human anatomy, 4 hours of human physiology, 4 hours of microbiology, 3 hours of introductory neuroscience (psychological psychology at the University of Arkansas), 4 hours of histology, 8 hours of chemistry, 8 hours of physics, 3 hours of computer literacy, 3 hours general psychology, 3 hours psychology elective, 3 hours of statistics, 2 hours of medical terminology, and 3 hours of technical writing.

Any student planning a career in physical therapy should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Radiologic Technology: Students interested in radiologic technology should determine the specific admission requirements for the school of their choice at an early date. The admission requirements for the radiologic technology program at the University of Arkansas for Medical Sciences College of Health Related Professions consist of a minimum of 32 semester hours to include the following: 6 hours of English, 4 hours of human anatomy, 4 hours of human physiology, 3 hours of communication (speech), 3 hours of college algebra, 3 hours of U.S. history, 3 hours of sociology, 3 hours of psychology, and 3 hours of computer fundamentals/applications.

All students planning careers in radiologic technology should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Pre-Respiratory Care Program: Students who wish to enter the B.S. Degree program in Cardio-Respiratory Care in the College of Health Related Professions at the University of Arkansas for Medical Sciences must satisfactorily complete the courses listed below. The applicant must also complete the Health Occupation Aptitude Exam (administered by the department) as part of the application procedure. The B.S. program is available in Texarkana and in Little Rock. Prerequisite requirements consist of a minimum of 66 hours, including the following: 4 hours anatomy, 4 hours physiology, 4 hours microbiology, 8 hours chemistry, 4 hours physics, 3 hours computer fundamentals, 3 hours college algebra, 3 hours speech, 6 hours English composition, 3 hours American history or U.S. government, 6 hours history of Western civilization or world history, 3 hours fine arts, 3 hours humanities, 3 hours sociology, 3 hours psychology, and 11 hours electives.

All students planning careers in Respiratory Care should contact the Fulbright College Advising Center, 101 Old Main, 479-575-3307.

Cooperative Education

The Cooperative Education project is designed to offer students an opportunity to participate in a paid work experience directly related to their academic major. It resembles an internship, but includes a series of at least two such work experiences. The program also insists that at least minimal academic credit be awarded, thus ensuring that the work experience will be directly related to the student’s academic program. Cooperative Education offers advantages to students needing assistance in financing their education, and it offers the college a tangible way to demonstrate our conviction that although we do not stress vocational or professional training per se, there is nothing imbalanced between a liberal arts education and the world of work. Prerequisites include 45 credit hours, a cumulative GPA of 2.50, and consent of academic coordinator. A maximum of 4 credit hours of ARSC 310 (Cooperative Education) may be applied toward the student’s degree.

Detailed information about Cooperative Education may be obtained from the Office of the Dean, Fulbright College, 525 Old Main, or from the Career Development Center, 607 Arkansas Union.

COLLEGE ADMISSION REQUIREMENTS

Students seeking admission to the J. William Fulbright College of Arts and Sciences must meet the general requirements for admission to the University. In addition, students are expected to present two units (years) of a single modern foreign or classical language. Those unable to meet this standard will be expected to begin their collegiate foreign language study as soon as possible after matriculation. For these students, the first semester of language study will be considered to satisfy the admission deficiency and will not count toward the 124 hours required for graduation (although the course will appear as University credit, and the grade received will be computed in the grade-point average). For the students who meet the Fulbright Arts and Sciences admission requirements and continue with the same foreign language taken in high school, the first semester of language study will be considered remedial and will not count toward the 124 hours required for graduation (although the course will appear as University credit and the grade received will be computed in the grade-point average). Students transferring from other colleges at the University of Arkansas or from other institutions are expected to meet the same entrance standard.

COLLEGE SCHOLARSHIPS

Foremost among scholarships available in the J. William Fulbright College of Arts and Sciences is the Sturgis Fellowship. This scholarship enables Fulbright College to offer to outstanding graduates of secondary and preparatory schools undergraduate fellowships valued at $50,000 for four collegiate years.

Continuing students may also compete for the J. William Fulbright Prize for Distinction in the Liberal Arts. This scholarship carries a $1000 award.
Students studying in the humanities or classics may qualify for the Elizabeth W. Fulbright Scholarship. This award is for students who are at least juniors and is intended to support a year of study abroad.

The Robbin C. Anderson Scholarship is available to students who place in the top 10% of their class and who transfer to Fulbright College from an Arkansas community or junior college.

Freshman students who show outstanding promise may receive awards from the James Victor Spencer, Jr. Memorial Scholarship, and students with similar promise or records are eligible for the Marion A. Steele Memorial Scholarship.

In addition, students may compete for general scholarship monies, which are awarded, regardless of classification, to students with the highest grade-point averages. Application for these monies is made through the Office of the Dean, 525 Old Main. Students may also obtain information and an on-line application on the Web through Fulbright College of Arts and Sciences Scholarships and Fellowships at http://www.uark.edu/~arsc/students/scholarships.html.

Numerous other scholarships are available from the departments of Fulbright College. Information may be sought from the departmental chairperson of the student’s major and/or the Fulbright College Scholarships and Fellowships Web site listed above.

**STUDENT ORGANIZATIONS**

There are many general-interest societies and organizations to which students may belong, and nearly every department of the University maintains an honor society through which high scholarship is rewarded. Students in Fulbright College may aspire to membership in the following organizations:

- Phi Beta Kappa (arts and sciences)
- Kappa Kappa Psi (band, men)
- Tau Beta Sigma (band, women)
- Phi Sigma (biology)
- Alpha Chi Sigma (chemistry)
- American Chemical Society (chemistry)
- Alpha Psi Omega (drama)
- Pi Kappa Delta (forensics)
- Gamma Theta Upsilon (geography)
- Sigma Gamma Epsilon (geology)
- Eta Sigma Phi (Greek and Latin)
- Alpha Theta (history)
- Alpha Kappa Delta (sociology)
- Pi Mu Epsilon (mathematics)
- Phi Mu Alpha (music, men)
- Sigma Alpha Iota (music, women)
- Sigma Pi Sigma (physics)
- Pi Sigma Alpha (political science)
- Alpha Epsilon Delta (pre-medical, medical technology, pre-dental)
- Psi Chi (psychology)
- Sigma Delta Pi (Spanish)
- Lambda Pi Eta (communication)
- Lambda Tau (writers)
- Kappa Tau Alpha (journalism)
- Pi Delta Phi (French)
- Delta Phi Alpha (German)
- Phi Beta Delta (international scholarship)
- Omicron Delta Epsilon (Economics)

**HONORS PROGRAM**

To create an intellectual environment that challenges the best of students, the J. William Fulbright College of Arts and Sciences provides a comprehensive program of Honors Studies. This includes the Fulbright College Scholars Program, a four-year interdisciplinary honors program for students of superior academic ability or artistic talent, and the Departmental Honors Program, an honors program emphasizing directed independent study within a department or discipline of the college.

A student who successfully completes a program of Honors Studies within Fulbright College is eligible to receive a baccalaureate degree with the distinction Fulbright College Scholar Cum Laude, or Departmental Scholar Cum Laude in the major field of study. Higher distinctions of Magna Cum Laude or Summa Cum Laude may be awarded to outstanding honors students by recommendation of the Fulbright College Honors Council.

To earn the distinction Fulbright College Scholar Cum Laude at graduation, a student must successfully complete the honors core curriculum, maintain a minimum grade-point average of 3.25, and satisfy requirements for departmental honors in the major field of study, including preparation and oral defense of an honors thesis. The Honors Council may award the higher distinctions of Magna Cum Laude or Summa Cum Laude based upon a student’s total academic performance, including the academic transcript, the quality of the scholarly activity pursued within the major field of study, and the breadth of college study as a whole.

To earn the distinction of Departmental Scholar Cum Laude at graduation, a student must successfully complete requirements prescribed by the major department, including an honors thesis and oral examination, maintain a minimum grade-point average of 3.25, and take 12 hours (which may include six hours of thesis) in Honors Studies. If a student demonstrates superior academic performance or an exceptionally high level of scholarly activity, the Honors Council may award the distinction of Magna Cum Laude. In exceptional instances where truly outstanding work within the major field is coupled with the superior understanding of its relationship to the college work as a whole, the distinction Summa Cum Laude may be awarded.

A student who has earned at least 50 percent of his or her college credits at the University of Arkansas and has maintained a grade-point average of at least 3.80 through the semester preceding graduation shall earn the distinction of “Fulbright College Senior Scholar.” For more information about Honors Studies within Fulbright College, see page 109 and individual department listings.

**COLLEGE ACADEMIC REGULATIONS**

Courses of study in Fulbright College of Arts and Sciences are designed to give students the comprehensive view of society that the modern world requires. Students who enroll in Fulbright College, or who elect some of its courses, have an opportunity to gain a broad cultural education, which is a part of intelligent living and, at the same time, to prepare for professions or to acquire technical training in the sciences. The college has two major teaching functions: to provide basic general education in the arts and in the sciences necessary to all persons for effective participation in the complex world in which we live, and second, to furnish the student an opportunity to specialize in the field of the student’s choice.

To implement the first of these aims and to furnish a broad base for the accomplishment of the second, the faculty of Fulbright College has adopted the requirements listed below for each degree.

Specific course requirements may be fulfilled in one of four ways: 1. Establishing credit in approved courses:

a. by enrolling in and completing the required work in the course,
b. by examination (credit will be entered as CR on a student’s record as explained in Advanced-Standing Programs, page 45),
c. by advanced achievement, i.e., by satisfactory completion of a more advanced course of a sequence. For example, students who earn a grade of “C-” or better in a third-semester foreign language course may be granted credit for the second semester course upon recommendation of the Foreign Language

University of Arkansas, Fayetteville
Department and approval by the Dean of the college. (This does not apply to work taken by correspondence or in transfer.)

2. Gaining exemption by examination. Announced exemption examinations are routinely offered in several courses. Students may consult any department or the dean’s office concerning exemption examinations.

3. Advanced placement by examination. A student who is granted advanced placement may elect to substitute a more advanced course for the listed required course.

4. Transfer credit. Students presenting transfer credit in lieu of stated requirements may be asked to present official course descriptions, etc. Transfer work with grades of “D” or “F” will not be accepted.

In addition to the University requirements listed above, each candidate for a degree in Fulbright College of Arts and Sciences must complete the degree program with a cumulative grade-point average of at least 2.00.

The Fulbright College residence requirement insists that no fewer than 30 hours of credit must be earned in courses offered by this college, and at least 24 of those hours must be numbered above 3000.

Each degree candidate in Fulbright College will receive an automated degree audit each semester of enrollment in advance of priority registration. It is e-mailed to the student, and a hard copy is sent to the student’s adviser or major department. It is recommended that the student meet with his or her adviser to review the degree audit.

Each student graduating from Fulbright College must write a research/analytical paper for at least one upper-division course in his or her major. Satisfactory completion of an honors project or a senior thesis may fulfill this requirement. Students should consult with their major adviser for departmental procedures in satisfying this requirement.

A student may choose to write a senior thesis in a major area of study. The thesis may be accorded up to six hours of credit. Defense of the thesis before a committee is required. This thesis may be submitted to meet the college writing requirement mentioned above.

Questions concerning fulfilling the requirements should be referred to the student’s adviser or to the dean’s office, which will maintain current lists of approved courses, experimental offerings approved to fulfill requirements for a specified period of time, examination schedules, and other options available to the student.

In addition to completing one of the sets of degree requirements listed below, a student must also complete the University Requirements for Graduation, including the University Core requirements (see page 40).

**DEGREE REQUIREMENTS**

**Bachelor of Arts**

- A total of 124 semester hours.
- University Core:
  - ENGL 1013, ENGL 1023, Composition I, II 6
  - Advanced Composition Requirement (see page 41) 0-3
  - HIST 2003, HIST 2013, or PLSC 2003 3
- College Requirements
  - Fine Arts: six hours to include at least two different arts to be selected from the following nine courses:
    - ARTS 1003 or ARHS 1003 (except for art majors)
    - DRAM 1003 (except for drama majors)
    - COMM 1003
    - MLIT 1003
    - DANC 1003
    - ARCH 1003 or LARC 1003
    - HUMN 1003

- University Core:
  - MATH 1203 and one of the following three courses:
    - MATH 2043, MATH 2053, or MATH 2554

- Social science, to be selected from:
  - ANTH 1013/1011L
  - BIOL 1543/1541L
  - BIOL 1613/1611L
  - BIOL 2013/2011L or
  - BIOL 1603/1601L

**Bachelor of Science**

- A total of 124 semester hours.
- University Core:
  - MA TH 1203 and one of the following three courses:
    - MA TH 2043, MA TH 2053, or MA TH 2554

- Social science, to be selected from:
  - ANTH 1013/1011L
  - BIOL 1543/1541L
  - BIOL 1613/1611L
  - BIOL 2013/2011L or
  - BIOL 1603/1601L

**Bachelor of Arts (Honors)**

- A total of 124 semester hours.
- University Core:
  - MATH 1203 and one of the following three courses:
    - MATH 2043, MATH 2053, or MATH 2554

- Social science, to be selected from:
  - ANTH 1013/1011L
  - BIOL 1543/1541L
  - BIOL 1613/1611L
  - BIOL 2013/2011L or
  - BIOL 1603/1601L

- Foreign language (Depending upon placement) Students must demonstrate proficiency in a single modern or classical language other than English, usually by completing a sequence of four courses (1003, 1013, 2003, 2013). The first semester of foreign language study (1003) is normally considered remedial and, thus, does not apply toward the 124 hours needed for graduation.

- Students meeting the normal admission standard (two years of one foreign language in high school) may expect to satisfy this requirement with fewer courses, depending upon placement.

- In cases of unusually thorough preparation, or in the case of international students, exemption may be sought from the Department of Foreign Languages.

- PHIL 2003 or PHIL 2103
- MATH 1203 and one of the following three courses:
  - MATH 2043, MATH 2053, or MATH 2554

- Bachelor of Science (Honors)

- A total of 124 semester hours.
- University Core:
  - MATH 1203 and one of the following three courses:
    - MATH 2043, MATH 2053, or MATH 2554

- Social science, to be selected from:
  - ANTH 1013/1011L
  - BIOL 1543/1541L
  - BIOL 1613/1611L
  - BIOL 2013/2011L or
  - BIOL 1603/1601L
sociology, with not more than one course
taken from any one department
COMM 1313 3
WCIV 1003, WCIV 1013 or HIST 1113, 6
HIST 1123 6
WLIT 1113 and 3 hours to be chosen from
WLIT 1123, a foreign language literature course, any other world literature course,
CLST 1003, or CLST 1013 6

4. Completion of the requirements for one of the majors
described in the selection entitled Majors and Courses of
Instruction. Majors may be chosen from the following fields:
American Studies  Geology
Anthropology  German
Art  History
Biology  Intl. Relations
Chemistry  Journalism
Classical Studies  Mathematics
Communication  Music
Computer Science (B.A.)  Philosophy
Criminal Justice  Physics
Drama  Political Science
Earth Science  Psychology
Economics  Public Administration
English  Social Work
French  Sociology
Geography  Spanish

Second or dual majors may be chosen from the following fields:
  African-American Studies
  European Studies
  Latin American Studies
  Middle East Studies
  Russian Studies

See page 109 for the combined academic and medical degree.
See page 98 for minors.

5. Presentation of at least 40 semester hours in courses numbered
3000 and above or courses numbered 2000 with specific course
prerequisites excluding MILS 2002, MILS 2102, AERO 2011,
AERO 2021, and foreign language courses numbered 2003 and
2013. At least 24 of the 40 hours must be in courses numbered
above 3000 and taken in Fulbright College.

6. Unless exceptions are granted at the time of admission to the
University of Arkansas, transfer work in which grades of “D” or
“F” were earned will not be allowed toward credit for graduation.
For more information, see the Admissions chapter in this catalog.

7. If the student’s degree program is strengthened by course work
in the following departments, as many as eight hours may be
applied toward the degree with the consent of the adviser:
AERO  HLSC  PHED
DEAC  ITED  RECR
EXED  MILS  UNIV
ETEC  PEAC  VOED

No more than four of the eight hours may be applied from
AERO, MILS, PEAC, or DEAC, unless a student completes
an ROTC program and receives a commission. Upon receipt of
notification in the dean’s office of completion of ROTC pro-
gram and receipt of commission, up to 16 hours of AERO or
MILS may be applied toward the student’s degree.

8. Each student graduating from Fulbright College must write a
research/analytical paper for at least one upper-division course
in his or her major. Satisfactory completion of an honors project
or a senior thesis may fulfill this requirement. Students should
consult with their major adviser for departmental procedures in
satisfying this requirement.

9. Course work taken to remove course deficiencies assigned at
the time of admission or transfer will not be counted toward the
degree. Similarly, courses considered to be remedial or develop-
mental will not count toward the degree.

10. Those courses constituting the State Minimum Core of 35 hours
for the University of Arkansas are set forth on page 40 of this
catalog. These courses, or courses transferred with a grade of
“C” or better from any other state institution in Arkansas, may
be used in partial or full satisfaction of the Fulbright College
general education core.

Bachelor of Science

1. A minimum of 124 semester hours. (Departments may require additional hours up to a total of
132.)

2. University Core:
   ENGL 1013, ENGL 1023, Composition I, II 6
   Advanced Composition Requirement (see page 41) 0-3
   HIST 2003, HIST 2013, OR PLSC 2003 3

3. College requirements:
   Foreign language (Depending upon placement) 0-9
   Students must demonstrate proficiency in a
   single modern or classical language other than
   English, usually by completing a sequence of
   three courses (1003, 1013, 2003). The first
   semester of foreign language study (1003) is
   normally considered remedial and, thus,
   does not apply toward the 124 hours needed
   for graduation. Students meeting the normal
   admission standard (two years of one foreign
   language in high school) may expect to satisfy
   this requirement with fewer courses, depending
   upon placement. In cases of unusually thorough
   preparation, or in the case of international
   students, exemption may be sought from the
   Department of Foreign Languages.
   World literature, foreign literature, philosophy
   (to be selected from PHIL 2003, PHIL 2103,
   PHIL 2203), fine arts (to be selected from at
   least two areas)
   WCIV 1003, WCIV 1013 or HIST 1113, 6
   HIST 1123 6
   Social sciences, to be selected from:
   ANTH 1023 3
   ECON 2013, ECON 2143 3
   GEOG 2003, GEOG 2203 3
   PSYC 2003 3
   SOCI 2103 3
   Science and mathematics
   (to be determined by the department of major
   and to be selected from at least two depart-
   ments other than the department of the major).
   WCIV 1003, WCIV 1013 or HIST 1113, 6
   HIST 1123 6

4. Completion of the requirements for one of the majors
described in the section entitled Degree Programs and
Courses. Majors may be chosen in the following fields:
   Biology
   Chemistry
   Computer Science
   Earth Science
   Geology
   Mathematics
Physics
Public Administration
See page 109 for the combined academic and medical degree.
See page 98 for minors.
5. Presentation of at least 40 semester hours in courses numbered 3000 and above or courses numbered 2000 with specific course prerequisites excluding MILS 2002, MILS 2012, AERO 2011, AERO 2021, and foreign language courses numbered 2003 and 2013. At least 24 of the 40 hours must be in courses numbered above 3000 and taken in Fulbright College.
See also College Requirements on page 106.
6. See item #6, page 107.
7. See item #7, page 107.
8. See item #8, page 107.
9. See item #9, page 107.
10. See item #10, page 107.

Bachelor of Fine Arts

1. A minimum of 128 semester hours.
2. University Core:
   ENGL 1013, ENGL 1023, Composition I, II 6
   Advanced Composition Requirement (see page 41) 0-3
   HIST 2003 or 2013 or PLSC 2003 3
3. College requirements:
   Natural Sciences 8
   4 hours to be selected from
   PHYS 1023/1021L
   CHEM 1053/1051L
   ASTR 2003/2001L
   GEOL 1113/1111L
   4 hours to be selected from
   ANTH 1013/1011L
   BIOL 1543/1541L
   BIOL 1613/1611L or
   BIOL 1603/1601L
   2. Students must demonstrate proficiency in a single modern or classical language other than English, usually by completing a sequence of at least three courses (1003, 1013, 2003). The first semester of foreign language study (1003) is normally considered remedial and, thus, does not apply toward the 124 hours needed for graduation. (For a major emphasis in voice, 9 hours additional is required in two different foreign languages appropriate to vocal repertoire. See Music Department requirements.)
   MLIT 1003, Fine arts 3
   Natural sciences 8
   (to be selected from the courses listed under the natural science requirements for the B.A. degree – 4 hours must be from biological science area, and 4 hours must be from physical science area).
   WCIV 1003, WCIV 1013 or HIST 1113, HIST 1123 6
   MATH 1203 3
   SOCI 2013, SOCI 2033 3
   ANTH 1023 3

Bachelor of Music

1. A minimum of 124 semester hours.
2. University Core:
   ENGL 1013, ENGL 1023, Composition I, II 6
   Advanced Composition Requirement (see page 41) 0-3
   HIST 2003, HIST 2013, or PLSC 2003 3
3. College requirements:
   Foreign language (Depending upon placement) 0-6
   Students must demonstrate proficiency in a single modern or classical language other than English, usually by completing a sequence of two courses (1003, 1013). The first semester of foreign language study (1003) is normally considered remedial and, thus, does not apply toward the 124 hours needed for graduation. (For a major emphasis in voice, 9 hours additional is required in two different foreign languages appropriate to vocal repertoire. See Music Department requirements.)
   WLIT 1113, World literature 3
   WCIV 1003, WCIV 1013 or HIST 1113, HIST 1123 6
   MATH 1203 3
   ECON 2013, ECON 2143 3
   GEOG 2103, GEOG 2203 3
   PHIL 2003, PHIL 2103, PHIL 2203 3
   PSYC 2003 3
   ANTH 2023 3

preparation, or in the case of international students, exemption may be sought from the Department of Foreign Languages.
COMM 1313 or PHIL 2203 or an additional foreign language
COMM 1313 is required for art education majors.
WCIV 1003, WCIV 1013 or HIST 1113, HIST 1123 6
WLIT 1113, WLIT 1123 6
4. Presentation of at least 40 semester hours in courses numbered 3000 and above or courses numbered 2000 with specific course prerequisites excluding MILS 2002, MILS 2012, AERO 2011, AERO 2021, and foreign language courses numbered 2003 and 2013. At least 24 of the 40 hours must be in courses numbered above 3000 and taken in Fulbright College.
See also College Requirements on page 106.
5. See item #6, page 107.
7. See item #8, page 107.
8. See item #9, page 107.
4. Completion of the requirements for one of the majors described in the section entitled Majors and Courses of Instruction. Major fields of specialization may be chosen from the following: Applied Music (performance areas are specified under Courses of Instruction), Music Theory, Composition, Music Education.

5. Presentation of at least 40 semester hours in courses numbered 3000 and above or courses numbered 2000 with specific course prerequisites excluding MILS 2002, 2012, AERO 2011, 2021, and foreign language courses numbered 2003 and 2013. At least 24 of the 40 hours must be in courses numbered above 3000 and taken in Fulbright College. See also College Requirements on page 106.

7. See item #7, page 107.

8. See item #8, page 107.

9. See item #9, page 107.

10. See item #10, page 107.

Combined Academic and Medical or Dental Degree

Fulbright College offers both the Bachelor of Arts and Bachelor of Science degrees in medical science or medical science (dentistry). A student may substitute the first year of regular medical or dental work taken in any standard, approved medical or dental school for 30 hours of the total required for the Bachelor of Arts degree or for 33 hours of the total required for the Bachelor of Science degree provided that the following requirements are met:

- 1. Completion of all core requirements for a B.A. or B.S. degree, as appropriate, prior to student’s entrance in medical or dental school.
- 2. Completion of a minimum of 12 hours of courses numbered above 3000 taken in Fulbright College.
- 3. Completion of at least 30 hours immediately prior to student’s entrance in medical or dental school in residence in Fulbright College.

Students interested in this degree should consult with their adviser or with the Fulbright College dean’s office early in their program. Formal application for the degree should be made to the Registrar.

This program is for highly qualified students with outstanding academic records who may be eligible for early admission to medical school or dental school programs. The year of a medical or dental study substitutes for the major in the B.A. or the B.S. degree program.

Additional Majors

Students fulfilling all requirements for the BS, BFA and BM degrees, including all core requirements and at least one major in these degree programs, may also claim an additional major in a humanistic discipline, social science, or interdisciplinary program associated with a BA degree. Upon completing all major requirements for that discipline, students wishing to have an additional major will not also receive a BA degree, but the additional major will be made part of their transcript. Students interested in this option should consult regularly with an academic adviser in the additional major and must notify the Fulbright College dean’s office (MAIN 525) when degree application is made.

Degrees with Honors

The J. William Fulbright College of Arts and Sciences is dedicated to providing students a liberal education in the arts, humanities, and sciences. Such an education should be soundly based, innovative, and enriched by a creative faculty. This is especially true for students with superior academic ability or artistic talent. To achieve these aims, the college faculty has developed and participates in the Fulbright College Scholars Program and the Departmental Honors Program.

Requirements for the Fulbright College Scholars Program:

Credit or exemption for University Core in English composition, including ENGL 1013, ENGL 1023, and ENGL 2003, and in American history or American government, completion of the requirements for departmental honors in a department or study area of the college, including preparation and oral defense of an honors thesis, a cumulative grade-point average of 3.25 or above, and completion of the honors core curriculum. Students who do not have at least a 3.25 GPA will not be allowed to graduate with honors.

Requirements for Departmental Honors:

Specific academic requirements including course work, participation in departmental honors colloquia or seminars, and independent study projects are established by the faculty of the individual departments or study areas and are approved by the Honors Council. However, all departmental honors students must have a 3.25 cumulative grade-point average, complete and defend an honors thesis, and take 12 hours (which may include six hours of thesis) in Honors Studies. Information concerning these requirements is given within each department’s catalog listings.

The following outlines the minimum academic requirements of the honors core curriculum for the B.A., B.S., B.M., and B.F.A. degree programs.

Students pursuing either option must also complete the following:

**Social Science**  
Select from the following:  

**Colloquia in Social Sciences**  
Must be selected from two different areas of social sciences. Course offerings vary each semester. See adviser.

**Foreign Language:** (depending upon placement)  
See your adviser. Students must demonstrate proficiency in a single modern or classical language other than English, usually by completing a sequence of three courses (1003, 1013, 2003). See Fulbright College Admission Requirements (page 104). Students meeting the normal admission standard (two years of high school language) may expect to satisfy this requirement with fewer courses, depending upon placement. In cases of unusually thorough preparation, or in the case of international students, exemption may be sought from the department of foreign languages.

**Natural Science and Mathematics:**  
Twelve hours (chosen from at least two different departments) of honors credit, with a minimum of eight in the laboratory sciences. See adviser for specific science course listing. Additionally, Fulbright Scholars must fulfill the math requirement of MATH 2043 OR MATH 2053 OR MATH 2554. Although not required as honors courses, MATH 2053 or MATH 2554 may, when taken in honors sections, satisfy up to four hours of the required 12 hours of honors credit in the mathematical and natural sciences.

**Colloquium in Natural Science or Math**  
To be selected in an area outside the student’s departmental major. Course offerings vary each semester. See adviser.

**Bachelor of Science Degree**

GRADUATE STUDIES

The Graduate School, in cooperation with the faculty of Fulbright College of Arts and Sciences, offers work leading to the graduate certificate or to the degrees of Master of Arts, Master of Science, Master of Music, Master of Fine Arts, Master of Public Administration, Master of Social Work, and Doctor of Philosophy.

Students interested in any of these advanced degrees should consult the Graduate School Catalog or the Dean of the Graduate School.

ACCREDITATIONS

The Bachelor of Science (B.S.) degree program in chemistry is accredited by the American Chemical Society. The American Council on Education in Journalism and Mass Communications has accredited the Bachelor of Arts (B.A.) degree program in journalism. The degree programs in the Department of Music are accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in psychology is accredited by the American Psychological Association. The Bachelor of Arts (B.A.) degree program in social work is accredited by the Council of Social Work Education.

• Professor Morgan (sociology)
• Associate Professor Jones (music), Robinson (history)
• Assistant Professors D’Alisera (anthropology),

Students who wish to gain knowledge and understanding of the history, social organization, current status, and problems of African-Americans and of their contributions to the American heritage may elect a combined major in African-American studies together with a major in anthropology, economics, history, philosophy, political science, psychology, sociology, or social welfare.

Requirements for a Combined Major in African-American Studies:
1. Eighteen hours in African-American Studies courses in addition to the requirements for the departmental major;
3. The remaining six hours will be selected from the following recommended courses: ANTH 3253 Cultures of the South, HIST 4563 The Old South 1607-1865, HIST 4573 The New South 1860 to Present, HIST 4383 The History of Sub-Saharan Africa, SOCI 4073 Peoples of East Africa, WLIT 4993 African Literature;

4. No course can be counted both for African-American Studies and the departmental major.

With careful advising, a combined major of African-American Studies and majors other than those listed may be developed to meet student needs. Members of the African-American Studies Committee and interdepartmental committee are Charles Robinson (chair), history; Gordon Morgan, sociology; JoAnn D’Alisera, anthropology; and Eddie W. Jones, music.

Requirements for a Minor in African-American Studies:
AAST 499V and HIST 3233, and at least 9 hours of approved elective courses. Interested students should consult with the African-American Studies Chairman for selection of appropriate classes.

Students desiring further information may consult with Associate Professor Robinson of the history department.

Requirements for a Major in African-American Studies:
AMST major program requires 27 semester hours, which must be tightly focused or highly individualized courses of study and provides substantial flexibility for students wishing to design interdisciplinary approaches to these fields and develop course of study.

Requirements for a Major in American Studies: The American Studies major program requires 27 semester hours, which must include the following:

2. Three hours of American history, HIST 2003 or HIST 2013. (Students must also complete PLSC 2003 to satisfy the University requirement.)
3. Three hours of American literature, (Papers submitted in this course will fulfill the Fulbright College writing requirement.)
4. Eighteen hours to be selected from the following courses, with the selection to include:
   a. At least one of the following:
      ARCH 4483, ARHS 4913, ARHS 4923, COMM 4143, COMM 4353, COMM 4383, COMM 4883, MUHS 4253
   b. At least one of the following:
      ANTH 3213, ANTH 3253, GEOG 3343, GEOG 4063, SOCI 3033, SOCI 3193, SOCI 3253
   c. At least one of the following:
      PLSC 3153, PLSC 3853, PLSC 3933, PLSC 4203
   d. Nine hours in the chosen area of concentration. Sample areas of concentration include the following:

American-American Culture – selections from:
HIST 3233, PLSC 4243, PLSC 4263, SOCI 3033, SOCI 4123, and other approved courses.

Contemporary Politics – selections from:
COMM 4383, HIST 4733, PLSC 3973, SOCI 3153, and other approved courses.

Gender Issues – selections from:
ENGL 3923H, and other approved courses.

Native American Culture – selections from:
ANTH 3203, ANTH 3213, ANTH 3263, HIST 3263, and other approved courses.

Southern Culture – selections from:
ENGL 3923H, HIST 4563, HIST 4573, and other approved courses

Western or Frontier Studies – selections from:
HIST 3383, HIST 4463, PLSC 3223, and other approved courses

Requirements for the Major in American Studies with Emphasis on Regional Studies: Students wishing to major in American Studies with emphasis on regional studies may complete requirements (1), (2), (3), and (4) as all majors. They must also complete ANTH 3253 to satisfy requirement (4A) and PLSC 3223 to satisfy requirement (4C). Either HIST 4563, or HIST 4573 must also be completed in satisfying requirement (4D). These requirements total nine hours, leaving six elective hours to complete requirement (4D).

Requirements for the Certificate in American Studies for International Students Not Seeking a University of Arkansas Degree: International students not seeking a University of Arkansas degree may receive a certificate in American Studies by completing requirements (2) and (3), plus completing a total of twelve hours in any combination from the courses listed under requirement (4). This represents a total of 18 hours.

Requirements for Departmental Honors in American Studies: The Departmental Honors Program in American Studies offers junior and senior students the opportunity to enroll in enriched courses and to conduct independent research. In addition to satisfying all other requirements for the major, honors candidates must complete at least 12 hours of honors work, including six in honors essay. The Honors Program in American Studies requires a total of 33 hours in addition to University and college requirements.

Requirements for the Major in Anthropology: The Department of Anthropology offers a major in anthropology to all students, and a minor in anthropology to all students.

Requirements for Departmental Honors in Anthropology: The Departmental Honors Program in Anthropology offers a major in anthropology to all students, and a minor in anthropology to all students.

Requirements for the Certificate in Anthropology: The Certificate in Anthropology is offered to all students.

Courses in anthropology provide an introduction to world peoples, their ways of living, and world views. Anthropology helps students to better understand human similarities and differences.

Requirements for a Major in Anthropology: 30 semester hours including ANTH 1013, ANTH 1011L, ANTH 1023, ANTH 3023/3021L, and ANTH 4013.
Writing Requirement: The Fulbright College research/analytical paper requirement for anthropology majors is fulfilled in ANTH 4013.

Requirements for Departmental Honors in Anthropology: The Departmental Honors Program in Anthropology provides an opportunity for outstanding undergraduate majors to conduct independent research under the supervision of a faculty member. The research project culminates in an honors thesis, which is primary for the award “Anthropology Scholar Cum Laude.” Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate’s entire program of honors studies.

Honors candidates must meet the college requirements for an honors degree. They must complete and defend an honors thesis and take 12 hours, which may include 6 hours of thesis, in Honors Studies. The candidate is expected to maintain a minimum 3.25 cumulative grade-point average in anthropology and other course work, to participate in anthropology honors colloquia, and is encouraged to take honors courses outside the anthropology department.

Requirements for a Minor in Anthropology: 15 hours including ANTH 1023. At least 9 hours must be in courses numbered 3000 or above. Students who minor in anthropology should consult with an anthropology adviser to select appropriate courses. A student must notify the department of his or her intent to minor.

Requirements for a combined major in anthropology and sociology: 36 hours with a minimum of 15 hours in each subject, to include SOCI 2013, SOCI 3013, SOCI 3303 (or a course in statistics), SOCI 3313, and SOCI 4023 and ANTH 1013, ANTH 1011L, ANTH 1023, ANTH 3023/3021L, and ANTH 4013. Additional courses are to be selected in consultation with a representative of the field concerned.

Cartography/Remote Sensing/GIS Specialization: This program gives students an opportunity to develop expertise in (1) cartography, map design and computer-assisted map production, (2) remote sensing and image interpretation, including photographic systems, sensor systems, and digital image processing, and (3) geographic information systems, including data sources, analytical techniques, and hardware/software systems.

To complete the specialization, a student is required to fulfill certain course requirements.

Required Courses (9 hours):
GEOG 3023, GEOG 4413, and GEOG 4543 (same as ANTH 4543)

Elective Courses (9 hours to be selected from the following):
GEOG 4523, GEOG 5423, GEOG 4553 (same as ANTH 4553),
GEOG 4563 (same as ANTH 4563), GEOG 4573 (same as ANTH 4573),
GEOG 4593 (same as ANTH 4593), STAT 4003 (or other approved statistics course), CVEG 2053 (or other approved surveying course), CENG 4883

For the combined major in anthropology and African-American studies, see the African-American Studies listing.

For requirements for the M.A. and Ph.D. degrees in anthropology, see the Graduate School Catalog.

SEE PAGE 245 FOR ANTHROPOLOGY (ANTH) COURSES

ART (ARTS)

Lynn F. Jacobs
Chair of the Department
116 Fine Arts Building
479-575-5202
Web site: http://www.uark.edu/~artinfo

- Distinguished Professor Harington
- Professors Peven, Stout, (K.)
- Professor Emeritus Conner and Ross
- Associate Professors Golden, Jacobs, LaPorte, Musgnug, Nelson,

Newman
- Assistant Professors Hulen
- Visiting Assistant Professor Swartwood
- Instructor Jones
- Adjunct Assistant Professors Kaminsky, Musick, Stout (D.)

Bachelor of Arts Degree

Transfer students should confer with the chairperson of the department prior to entrance for information concerning entrance requirements and transfer credits.

Requirements for an Art Major: A minimum of 40 semester hours, including ARTS 1313, ARTS 1323, ARTS 1013, ARTS 2013, ARTS 4921, and at least 12 hours in art history/criticism to include: ARHS 2913 (Survey I) and 2923 (Survey II), one course from ARHS 4833 (Ancient), ARHS 4843 (Medieval), ARHS 4853 (Italian Renaissance), ARHS 4863 (Northern Renaissance), ARHS 4873 (Baroque), one course from ARHS 4883 (19th Century European), ARHS 4893 (20th Century European), ARHS 4913 (American Art to 1900), ARHS 4923 (American Art Since 1900), ARHS 4813 (History of Photography), ARHS 4823 (History of Graphic Design). In addition to the freshman year block of courses, the art major must complete a minimum of three semesters in one specialty area of art and a minimum of two semesters in a second area. Areas of selection are drawing, painting, sculpture, printmaking, ceramics, photography, and visual design. An exhibition of creative work of each student is required before commencement. No art major may present ARTS 1003 or ARHS 1003, or any other art course, to satisfy the college fine arts requirements.

Requirements for an Art Minor: A minimum of 18 semester hours to include ARTS 1013, either ARTS 1313 or ARTS 1323, and one of the following three courses: ARHS 1003, ARHS 2913, or ARHS 2923. A minimum of nine additional hours are required in studio art, to be determined through consultation with an art department adviser. A student must notify the department of his or her intent to minor.

Requirements for a Major in Art with a Concentration in Art History/Criticism: A minimum of 40 semester hours, including ARTS 1313, ARTS 1323, ARTS 1013, ARTS 2013, and ARHS 2913, ARHS 2923. In addition to the preceding requirements, two courses selected from ARHS 4833, ARHS 4843, ARHS 4853, ARHS 4863, ARHS 4873, two courses selected from ARHS 4813, ARHS 4883, ARHS 4893, ARHS 4913, ARHS 4923. In addition, ARHS 4963 (Individual Research in Art History), one seminar course in art history or art criticism, and one elective course in art history or studio art. No art major may present ARHS 1003 or ARTS 1003, or any other art course, to satisfy the college fine arts requirement.

Requirements for a Minor in Art History/Criticism: A minimum of 18 semester hours to include ARTS 1013, ARHS 2913, ARHS 2923, and three additional art history courses exclusive of seminars. A student must notify the department of his/her intent to minor. The minor is especially suited to students majoring in anthropology, English, foreign languages, history, philosophy, and music.

Requirements for Departmental Honors in Art: As part of the Honors Studies Program of the J. William Fulbright College of Arts and Sciences, the department of art provides the opportunity for academically superior junior- and senior-level students to acquire broader and deeper knowledge and skills in the visual arts and related disciplines. This is accomplished through independent research projects in studio art and/or art history under the direction of the art faculty. Outstanding achievement is recognized by awarding the distinction “Art Scholar Cum Laude.” Students may apply for honors studies beginning in the second semester of their sophomore year and normally will not be accepted into the program after completion of the second semester of their junior year. The department requires each applicant
to have a minimum cumulative grade-point average of 3.25 in all college course work, a minimum grade-point average of 3.25 in all course work taken in the department of art, completed ARHS 2913 and ARHS 2923, completed at least 20 semester hours of work in art department courses, and at least 30 semester hours of general education requirements. Included in those hours, a student must complete and defend an honors thesis and take 12 hours, which may include 6 hours of thesis, in honors studies. Higher degree distinctions take into consideration the student’s entire academic career and are recommended for only those students whose honors projects and programs of study demonstrate a truly exceptional degree of creativity and scholarship.

Bachelor of Fine Arts Degree

Admission: Students earning a grade-point average of 3.00 or higher in art, after the completion of ARTS 1013, 1313, and 1323, and who have maintained an overall grade-point average of 2.00 are eligible to make application to the B.F.A. degree program. In addition to meeting the required grade-point average, all students must submit, as part of their application, a portfolio of current representative work for evaluation by the art faculty. Acceptance into the B.F.A. program is contingent upon favorable evaluation by the art faculty of the applicant’s portfolio. Upon acceptance into the B.F.A. degree program, each student will be assigned a major adviser for the purpose of completing a degree plan, which must meet departmental approval.

After entry into the BFA program, the student is required to complete two semesters with a minimum of three credit hours of course work in their major studio area each semester.

Transfer credit will be allowed from other accredited and recognized art departments if the credit earned is compatible with program and course requirements within the UA art department and reflects a grade of “C” or higher. This department will not accept more than 50 percent of the required B.F.A. professional degree credits from another institution.

Degree Requirements: The Bachelor of Fine Arts degree will be awarded to students, who, upon the completion of the approved program, have maintained a 3.00 grade-point average within the UA art department and a 2.00 grade-point average overall. A faculty-supervised critique of the work of each student, once each semester in the program, is required. A senior review and exhibition will be required prior to the granting of the degree.

Off-campus Study Requirement: Each student is required to complete an approved off-campus study experience each semester in the program. This may involve a field trip to an urban center that includes visits to major art collections.

Requirements for the Bachelor of Fine Arts Degree with an Emphasis in Studio Art: A minimum of 84 semester hours including ARTS 1013, ARTS 1313, ARTS 1323, ARTS 2003, ARTS 2013, ARTS 3333, ARTS 3023 or ARTS 4343, and ARTS 4921, PHIL 4403, plus a minimum of 18 semester hours in the selected studio major, a minimum of 26 semester hours in art electives (must include a minimum of one course in each of the following areas: painting, sculpture, printmaking, visual design, photography, and ceramics. Up to six credit hours may be taken outside of the department with approval), and at least 15 semester hours in art history including ARHS 2913, ARHS 2923, and ARHS 4943.

Requirements for the Bachelor of Fine Arts Degree with Emphasis in Art Education: A minimum of 66 hours to include ARTS 1013, ARTS 1313, ARTS 1323, ARTS 2003, ARTS 2013, ARTS 3333, ARTS 3023 or ARTS 4343, ARTS 4921, PHIL 4403, a minimum of 12 hours in a selected studio major and 6 hours in a selected studio minor, at least 12 hours in art history including ARHS 2913, ARHS 2923, and ARHS 4943, at least 8 hours studio art electives exclusive of the studio major and minor to be selected from ARTS 3103, ARTS 3203, ARTS 3363, ARTS 3463, ARTS 3503 or ARTS 3523, ARTS 3803.

Students who wish to apply for admission to the internship program in art education must complete the following Stages.

Stage I: Complete an evaluation for internship. Students must also meet the following criteria to be cleared for the internship:

1. Declare the major in art education in the Fulbright Advising Center, 101 Old Main.
2. Successful completion of the PRAXIS I test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203.
3. Obtain a “C” or better in the following pre-education core courses: CIED 1002, CIED 1011, CIED 3023, CIED 3033, ETDC 2001, ETDC 2002L.
4. Obtain a “C” or better in ARED 3613, ARED 3643, ARED 3653.
5. Satisfactory completion of the Evaluation for Internship form. The Evaluation form must be completed by October 1 prior to doing a fall internship or March 1 prior to doing a spring internship. This form is available online at http://www.uark.edu/depts/coehp/boyer/Evaluation_for_internship/Evaluation_for_Art_Internship.doc. The completed form must be returned to the Coordinator of Teacher Education, 8 Peabody Hall, no later than the stated deadline.
6. Complete the B.F.A. degree with a cumulative GPA of 2.50 or higher. The degree must be posted to your University of Arkansas transcript at the Registrar’s Office prior to internship.
7. Obtain departmental clearance for internship based on successful completion of portfolios, evaluation for internship, GPA requirements, course work requirements, selected written recommendations, an interview, and/or other requirements specified by your program.
8. Complete licensure packet available from the Coordinator of Teacher Education, Peabody Hall Room 8. All requirements in Stage I must be met to be cleared for the internship. Please contact the Coordinator of Teacher Education, 8 Peabody Hall, College of Education and Health Professions for more information.

Stage II: Internship

1. Complete the one-semester internship at an approved site in Washington or Benton counties.
2. Complete Praxis II requirements. See your adviser for completion dates.

NOTE: Students should always consult the Coordinator of Teacher Education for any licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. An application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

Writing Requirement: The Fulbright College research/analytical writing requirement for art majors, B.A. and B.F.A. degrees, will be fulfilled in art history courses ARHS 4833, ARHS 4843, ARHS 4853, ARHS 4863, ARHS 4873, ARHS 4943, ARHS 4963, and ARHS 4973. It also may be an honors thesis in art history (only).
For requirements for the M.F.A. degree program in art, see the Graduate School Catalog.

SEE PAGE 249 FOR ART (ARTS) COURSES

ARTS AND SCIENCES (ARSC)

Charles H. Adams
Chair of Studies
525 Old Main
479-575-4801

Students may enroll in off-campus programs (ARSC) under special circumstances and with the approval of the Associate Dean of Fulbright College.

SEE PAGE 249 FOR ARTS AND SCIENCES (ARSC) COURSES

ASIAN STUDIES (AIST)

S. Henry Tsai
Chair of Studies
416 Old Main
479-575-3001

Students may earn a minor in Asian Studies by taking courses in art, anthropology, economics, geography, history, languages, sociology, political science, and literature of Asia.

Language Requirement: Students must fulfill the Fulbright College requirement in either Chinese or Japanese. At the discretion of the chair of studies, proficiency in other Asian languages may also satisfy this requirement.

Beyond the language requirement, students must complete 15 credit hours of approved courses, including at least three hours in the Asian Studies Colloquium (AIST 4003). The following courses may be taken in fulfillment of the elective requirements:
- ANTH 4613 Primate Adaptation and Evolution
- ECON 4633 International Trade Policy
- HIST 3503 Far East in Modern Times
- HIST 4313 History of China to 1644
- HIST 4323 Modern China
- HIST 4343 Modern Japan
- JAPN 4313 Language and Society of Japan
- PLSC 3503 Governments and Politics of East Asia
- PLSC 4823 Foreign Policy of East Asia
- SOCI 3013 Population and Society
- WLI 4293 Literature of China and Japan

Students may also apply three hours of credit in an approved study-abroad program in an Asian country and three hours of upper-level Chinese or Japanese toward the minor.

Beyond the elective requirement, students must complete 12 additional upper-level credits toward the major. This includes Principles of Biology. Principles of Biology (BIOL 1543/1541L) is not required for the B.S. major. Well-prepared students, in consultation with their adviser, may opt to begin their coursework with the Core.

b. At least 2 elective courses numbered 2000 or higher which are lab courses. This includes Core Labs taken in addition to the basic Core requirement.

c. At least 18 hours in courses numbered 3000 or higher, of which at least 12 hours must be from courses numbered 4000 or higher.

d. A course meeting the Fulbright College writing requirement.

The means of meeting the writing requirement are listed following the description of the B.A. with a major in biology.)

NOTE: Biology related electives that are not taught by the Department of Biological Sciences must be approved using the “Exception Request—DARS for Major or Minor Requirements.”

Requirements in cognate science and mathematics include the following:

1. CHEM 1103/1101L (may be completed by advanced placement), CHEM 1123/1121L, CHEM 3603/3601L, CHEM 3613/3611L, CHEM 3813
2. PHYS 2013/2011L, PHYS 2033/2031L or PHYS 2054/2050L, PHYS 2073/2070L
3. MATH 2554 (MATH 2564 is recommended)
4. STAT 2023 or STAT 4003/4001L or equivalent.

Requirements for a B.A. Degree with a Major in Biology:

A minimum of 124 hours is required, including 40 hours in the major as specified below.

1. Biology Core (13 hours): Cell Biology (BIOL 2533), General Genetics (BIOL 2323), Evolutionary Biology (BIOL 3023), General Ecology (BIOL 3863) and a minimum of one hour of Core Laboratory selected from Cell Biology Laboratory (BIOL 2531L), General Genetics Laboratory (BIOL 2321L), and General Ecology Laboratory (BIOL 3861L)
2. Bibliographic Practicum (BIOL 2001)
3. An additional 26 hours of electives in biology and/or biology related electives including:
   a. No more than 8 hours of elective courses at the 1000 level. This includes Principles of Biology. Principles of Biology (BIOL 1543/1541L) is not required for the B.S. major. Well-prepared students, in consultation with their adviser, may opt to begin their coursework with the Core.
   b. At least 2 elective courses numbered 2000 or higher which are lab courses. This includes Core Labs taken in addition to the basic Core requirement.
   c. At least 18 hours in courses numbered 3000 or higher, of which at least 12 hours must be from courses numbered 4000 or higher.
   d. A course meeting the Fulbright College writing requirement.

The means of meeting the writing requirement are listed following the description of the B.A. with a major in biology.)

NOTE: Biology related electives that are not taught by the Department of Biological Sciences must be approved using the “Exception Request—DARS for Major or Minor Requirements.”

Requirements for a B.S. Degree with a Major in Biology:

A minimum of 124 hours is required, including:

1. BIOL 1543/1541L. Majors may take additional 1000-level BIOL courses, but majors may apply a maximum of eight 1000-level credits toward the major.
2. An additional 24 hours of biological sciences, including:

     • University Professor James
     • Professors Emeriti Dale, Evans, Johnston, Kilambi, Martin, Meyer, Russert-Kraemer, Smith (E.)
     • Research Professor Stephenson
     • Associate Professors Beaupre, Brown, Henry, Ivey, Krall, Rhoads, Sagers, Spiegel
     • Associate Professors Emeriti Bailey, Lane, Wickliff
     • Associate Research Professors Krementz, Magoulick
     • Assistant Professors Curtin, Lehmann, McNabb, Pinto, Silberman, Ziegler
     • Assistant Research Professor Goforth

The Department of Biological Sciences offers a Bachelor of Science degree for those students who seek a degree with a broad background in the life sciences. The B.S. is recommended for students planning to continue their education in basic or applied biology in graduate or professional school. A Bachelor of Arts degree is available for students who do not plan necessarily on a career as a professional biologist but who desire a good foundation in the discipline. Students seeking research experience are invited to participate in the college honors program.

Requirements for a B.S. Degree with a Major in Biology: A minimum of 124 hours is required, including 40 hours in the major as specified below.

Requirements in cognate science and mathematics include the following:

1. CHEM 1103/1101L (may be completed by advanced placement), CHEM 1123/1121L, CHEM 3603/3601L, CHEM 3613/3611L, CHEM 3813
2. PHYS 2013/2011L, PHYS 2033/2031L or PHYS 2054/2050L, PHYS 2073/2070L
3. MATH 2554 (MATH 2564 is recommended)
4. STAT 2023 or STAT 4003/4001L or equivalent.

Requirements for a B.A. Degree with a Major in Biology:

A minimum of 124 hours is required, including:

1. BIOL 1543/1541L. Majors may take additional 1000-level BIOL courses, but majors may apply a maximum of eight 1000-level credits toward the major.

University of Arkansas, Fayetteville
a. One course from four of the following six areas of specialization, and at least one course from each of the three general areas of biology: botany, microbiology, zoology
   I. Microorganism Biology: BIOL 2533/2531L [lab optional] or BIOL 2013/2011L
   II. Genetics: BIOL 2323/2321L or BIOL 4233
   III. Morphology: BIOL 2504, BIOL 4104, BIOL 4424, BIOL 3123, BIOL 2404 or BIOL 2814
   IV. Physiology: BIOL 4304, BIOL 4313 or BIOL 2213/2211L
   V. Evolution: BIOL 3023
   VI. Ecology: BIOL 3863/3861L
b. Bibliographic Practicum (BIOL 2001)
c. Remaining 8-10 credit hours of biology electives above the 3000 level

3. Requirements in cognate science and mathematics include:
   a. CHEM 1103/1101L, CHEM 1123/1121L, and either CHEM 2613/2611L/2610D or CHEM 3603/3601L, CHEM 3613/3611L
   b. PHYS 2013/2011L, PHYS 2033/2031L
   c. MATH 2043 or MATH 2554

Requirements for Departmental Honors in Biology: The biological sciences honors program is designed to provide students an opportunity to investigate questions in biology through an expanded reading program and research experience. Biological science majors may apply to enter the program between the second semester of the sophomore year and the end of the junior year. Application is made through both Honors Studies (MAIN 517) and the Department of Biological Sciences (SCEN 601). Applicants must have a 3.5 grade-point average. Students should consult with their adviser to identify and contact a potential faculty research mentor. The student’s research activities will then be directed by the departmental faculty member who agrees to sponsor the student.

Students may enroll for up to four hours of credit in BIOL 399V/H during the junior year and up to eight hours of credit in BIOL 499V during the senior year. A maximum of six of these credits may be applied toward a major. Participants must complete and defend an honors thesis and take 12 hours in Honors Studies, which may include six hours of thesis. The honors thesis is based on an original research project and presented orally before a committee composed of two faculty from the biological sciences, a person from outside the biological sciences, and a representative from the Honors Council. This committee makes a recommendation concerning the award of the honors distinction to the Honors Council. Students who successfully complete the departmental honors program usually graduate as “Departmental Scholar Cum Laude.” Higher degree distinctions are recommended only in exceptional cases and are based upon the candidate’s entire involvement in the honors program. Completion of an honors thesis fulfills the writing requirement in biological sciences, which precludes credit for BIOL 498V (Senior Thesis) for the same body of work.

Writing Requirement: The college writing requirement for majors in biology may be met by one of the following:
1. Completion of an honors thesis,
2. Completion of a senior thesis (BIOL 498V) supervised by a faculty member in biological sciences,
3. Completion of a required term paper with a grade of B or above in a course numbered above 3000 on a topic approved by the instructor, or
4. Completion of a paper, supervised by a faculty member, in Special Problems (BIOL 480V)

Requirements for a Minor in Biology: Students must take BIOL 1543/1541L, or equivalent, and one course from five of the six areas of specialization outlined in the requirements for a B.A. degree in biology. Students must notify the departmental chair of their intent to minor in biology.

Biology (B.A. or B.S.) Life/Earth Science Teacher Licensure Requirements: Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students interested in teaching science in middle school should consult with a middle level adviser in the College of Education and Health Professions.

For information on advanced degrees in biology, see the Graduate School Catalog.

SEE PAGE 252 FOR BIOLOGY (BIOL) COURSES

BUSINESS MINOR FOR NON-BUSINESS STUDENTS

The Sam M. Walton College of Business minor requires completion of a minimum of 21 required hours of study (including equivalencies) with at least 50 percent of the courses applied toward the minor taken in residence. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor.

Fulbright College students seeking a minor in the Walton College must notify the Fulbright College Dean’s Office (MAIN 525).

All students seeking a business minor are required to complete the Walton College computer competency requirement (WCOB 1120) and the following courses:

Concentration 1 – General Business
Select 12 hours from the following courses
   (at least 6 hours must be 3000-4000 level)
   WCOB 1012 Legal Environment of Business
   WCOB 2013 Markets and Consumers
   WCOB 2023 Production and Delivery of Goods and Services
   WCOB 2033 Acquiring and Managing Human Resources
   WCOB 2043 Acquiring and Managing Financial Resources
   Plus any other 3000- or 4000-level Walton College course

Concentration 2 – Accounting
ACCT 3013 Accounting View of Economic Events
ACCT 3613 Managerial Uses of Accounting Info
   Plus an additional six hours selected from the following:
   ACCT 3533 Accounting Technology
   ACCT 3723 Financial Reporting and Analysis
   ACCT 3843 Fundamentals of Taxation

Concentration 3 – Business Economics
ECON 4333 Economics of Organizations
   Plus an additional 9 hours of 3000- or 4000-level business economics courses

Concentration 4 – Finance
WCOB 2043 Acquiring and Managing Financial Resources
   Plus an additional nine hours of 3000- or 4000-level finance courses.

Concentration 5 – International Business
Select 12 hours from the following:
   ECON 3843 Economic Development, World Bank, and Multilateral Finance
   ECON 3853 Emerging Markets
   ECON 3933 Japanese Economics
   ECON 4633 International Trade
   ECON 4643 International Macroeconomics and Finance
   ECON 4653 Global Competition and Strategy
   ECON 468V International Economics and Business Seminar
   FINN 3703 International Finance
   MGMT 4583 International Management
MKTG 4833 International Marketing
TLOG 4643 International Transportation Logistics

Concentration 6 – Management
MKTG 4243 Ethics and Corporate Responsibility
Plus an additional 9 hours of 3000- or 4000-level management courses (except WCOB 3016)

Concentration 7 – Marketing
MKTG 3433 Principles of Marketing
Plus an additional 9 hours selected from the following:
MKTG 3533 Promotional Strategy
MKTG 4033 Selling and Sales Mgmt.
MKTG 4133 Marketing Research
MKTG 4553 Consumer Behavior
MKTG 4833 International Marketing
MKTG 4933 Retail Marketing Strategy
MKTG 4943 Retail Buying and Merchandise Control
TLOG 3613 Business Logistics

Concentration 8 – Transportation and Logistics
TLOG 3443 Principles of Transportation
TLOG 3613 Business Logistics
Plus an additional 6 hours selected from the following:
TLOG 3623 Purchasing and Inventory Systems
TLOG 4633 Transportation Carrier Management
TLOG 4643 International Transportation & Logistics

In addition to the above course requirements, non-business-degree-seeking students seeking a minor should note the following:
1. Students who elect to obtain a business minor must provide written notice of their intent to minor to the dean’s office of the college in which they are receiving a degree. This notice and all requirements for the business minor must be completed prior to the awarding of the student’s undergraduate degree.
2. Business minor students must complete all 1000- and 2000-level courses required for the business minor and be a junior- or senior-level student to enroll in 3000- or 4000-level business courses.
3. All specific course prerequisites must be met. Although business minor students are not required to satisfy the entire pre-business core, they must complete the required courses and any other prerequisite course specified prior to enrolling in a 3000/4000-level course.
4. ECON 2143 will substitute for ECON 2013 (Microeconomics) and ECON 2023 for prerequisite purposes. In addition, students who take both ECON 2013 (Macroeconomics) and ECON 2023 (Microeconomics) will satisfy the economics requirements of the minor.
5. Business minor students are ineligible to take WCOB 3016 (Business Strategy and Planning).
6. Non-business students may substitute equivalent courses for the Walton College computer competency requirement. All equivalencies must be approved by the associate dean for academic affairs.

CHEMISTRY AND BIOCHEMISTRY (CHBC)

Bill Durham
Chair of the Department
F19 Phoenix House
479-575-4648
Web site: http://www.uark.edu/depts/cheminfo/uarkchem/
E-mail: cheminfo@uark.edu

• Distinguished Professors Millett, Pulay, Schäfer, Wilkins
• University Professors Cordes, Hinton, Koepp
• University Professor Emeritus Fry
• Professors Bobbitt, Davis, Durham, Gawley, Geren, Sears, Yu
• Professors Emeriti Blyholder, Howick, Johnson, Meyer, Thoma

• Associate Professors Allison, Fritsch, McIntosh, Paul, Peng, Sakon, Stites
• Assistant Professor Tian, Vicic
• Adjunct Professor Becker
• Adjunct Associate Professors Edkins, Turnbull

Requirements for a B.S. degree with a Major in Chemistry:
A minimum of 40 semester hours in chemistry including CHEM 1213/1211L, CHEM 1223/1221L, or CHEM 1103/1101L, CHEM 1123/1121L, CHEM 2262, CHEM 2272, CHEM 3504, CHEM 3512L, CHEM 3514, CHEM 3703/3702L, CHEM 3713/3712L, CHEM 4123, CHEM 4213/4211L, CHEM 4723, and at least one additional advanced lecture course with 3514 as a prerequisite is required. On the basis of scores on the Freshman Chemistry Proficiency Examination, a student may be advised to enroll in CHEM 1123/1121L, and upon receiving a grade of “C” or better in these courses, will also receive credit for CHEM 1103/1101L. A minimum of 18 hours of science outside of chemistry and including mathematics through MATH 2574 and physics through PHYS 2074 are required. These mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program. Some work in the biological sciences is recommended. This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 or CHEM 5813/5843 is included. Sample schedules may be obtained from the department of chemistry and biochemistry. Prospective students should consult a departmental adviser.

Requirements for a B.S. degree with a Major in Chemistry, Biophysical Option: A minimum of 43 semester hours in chemistry including CHEM 1213/1211L, CHEM 1223/1221L, or CHEM 1103/1101L, CHEM 1123/1121L, CHEM 2262, CHEM 2272, CHEM 3504, CHEM 3603/360L-3613/3611L or CHEM 3703/3702L, CHEM 3713/3712L, CHEM 3514/3512L, CHEM 4213/4211L, CHEM 4853 or completion of a senior thesis based on independent research wherein at least 1 credit hour is earned in CHEM 500V (chemistry research) and/or CHEM 4981 (senior thesis) during each of 3 different semesters, and 6 hours from CHEM 5813-5843 or CHEM 3813-4723, MATH 2554 and MATH 2564, PHYS 2054/2050L and PHYS 2074/2070L, and 11 hours from the biological sciences, to include BIOL 1543/1541L, BIOL 2533/2531L, and one additional lecture course numbered above 3000. The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Requirements for a B.S. degree with a Major in Chemistry, Biochemistry Option: A minimum of 39 semester hours in chemistry including CHEM 1213/1211L, CHEM 1223/1221L, or CHEM 1103/1101L, CHEM 1123/1121L, CHEM 2262, CHEM 2272, either CHEM 3504-3514/3512L or CHEM 3453/3451L, CHEM 3703/3702L, CHEM 3713/3712L, CHEM 4853 or completion of a senior thesis based on independent research wherein at least 1 credit hour is earned in CHEM 500V (chemistry research) and/or CHEM 4981 (senior thesis) during each of 3 different semesters, and 6 hours from CHEM 5813-5843 or CHEM 3813-4723, MATH 2554 and MATH 2564, PHYS 2054/2050L and PHYS 2074/2070L, and 11 hours from the biological sciences, to include BIOL 1543/1541L, BIOL 2533/2531L, and one additional lecture course numbered above 3000. The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Requirements for a B.A. degree with a Major in Chemistry:
Pre-medical students, prospective secondary school science teachers, and others who do not intend to pursue professional careers in chemistry may satisfy the requirements by completing CHEM
1213/1211L, CHEM 1223/1221L, (or CHEM 1103/1101L, CHEM 1123/1121L), CHEM 2262, CHEM 2272, and 18 additional semester hours in chemistry to include CHEM 3703/3702L-3713/3712L or CHEM 3603/3601L-3613/3611L, and either CHEM 3453/3451L or the combination CHEM 3504-3514-3512L and two additional lecture courses numbered above 3000. PHYS 2033/2031L and MATH 2554 or MATH 2043 are prerequisites for CHEM 3453, and PHYS 2074 and MATH 2574 are prerequisites for the alternate physical chemistry course sequence CHEM 3504-3514/3512L. These physics and mathematics prerequisite requirements are substantial, and these courses and their prerequisites should be scheduled early in the student’s program. Sample schedules may be obtained from the department of chemistry and biochemistry. Prospective students should consult a departmental adviser.

Requirements for a B.A. degree with a Major in Chemistry, Biochemistry Option: A minimum of 32 semester hours in chemistry including CHEM 1213/1211L, CHEM 1223/1221L, (or CHEM 1103/1101L, CHEM 1123/1121L), CHEM 2262, CHEM 2272, either CHEM 3453/3451L or CHEM 3504-3514-3512L, either CHEM 3603/3601L-3613/3611L or CHEM 3703/3702L-3713/3712L, CHEM 4853 or completion of a senior thesis based on independent research wherein at least 1 credit hour is earned in CHEM 500V (chemistry research) and/or CHEM 498V (senior thesis) during each of 3 different semesters, and either CHEM 5813-5843 or CHEM 5815-4211L or CHEM 5815-4123 or CHEM 5815-4273, MATH 2554 or MATH 2043, PHYS 2013/2011L-2033/2031L or 2054-2074, and 11 hours from the biological sciences, at least 3 hours of which must be upper-level courses. The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Requirements for Departmental Honors in Chemistry: Students with good academic backgrounds and strong interests in research are encouraged to participate in the department of chemistry and biochemistry honors program. Entrance into the program is normally during the sophomore year or the first semester of the junior year, and a minimum cumulative GPA of 3.25 is required. Entrance is initiated by consulting the faculty academic adviser, who will help arrange conferences with potential faculty research project advisers. When there is agreement between the student and the adviser on a research project or area, an Honors Advisory Committee is set up to supervise the honors candidate’s program. The heart of the program is the research project, but students are encouraged to broaden their experience beyond required courses within chemistry, the natural sciences, the social sciences, and the humanities. Participation in Honors Colloquia, honors sections of regular courses, and chemistry departmental and divisional seminars is especially recommended. All honors candidates enroll in the spring semester Honors Seminar (CHEM 4011H), and senior honors students must make at least one seminar presentation. All honors candidates will be required to complete and defend an honors thesis and take 12 hours (which may include 6 hours of thesis) in Honors Studies. The thesis is required in the spring semester of the senior year, followed by an oral presentation. On the basis of these written and oral reports and their evaluation of all aspects of the student’s honor program, the candidate’s Honors Advisory Committee will recommend whether or not the distinction “Chemistry or Biochemistry Scholar Cum Laude” should be awarded. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Requirements for a Minor in Chemistry: 18 hours of courses above the 1000 level including CHEM 2262, CHEM 2272, CHEM 3603/3601L, CHEM 3613/3611L, CHEM 3453, and a 3-hour course at the 3000-4000 level. A student must notify the department of his or her intent to minor.

Chemistry (B.A. or B.S.) Physical/Earth Science Teacher Licensure Requirements: Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach science in middle school should consult with a middle level adviser in the College of Education and Health Professions.

SEE PAGE 258 FOR CHEMISTRY (CHEM) COURSES

CLASSICAL STUDIES (CLST)

Daniel B. Levine
Chair of Studies
502 Kimpel Hall
479-575-2951
Web site: http://www.uark.edu/ua/metis2/

• Professors Levine, Spellman, Waligorski
• Associate Professors Coon, Engels, Fredrick

Requirements for a Major in Classical Studies: The college offers a major in classical studies leading to the Bachelor of Arts degree. Students should select appropriate courses from the following:
1. 15 hours of Ancient Greek or 15 hours of Latin.
2. 18 hours of additional work in classical languages and/or specific classical studies-related electives, to be selected from the following courses: ARCH 2233, ARHS 4833, ARHS 4843, CLST 1003, CLST 1013, HIST 4003, HIST 4013, HIST 4023, HIST 4043, HIST 4053, PHIL 4003, PHIL 4013, PHIL 4023, PLSC 3953, WLIT 2323.

No more than nine hours of electives from the medieval period may be applied to the major requirements.
3. Three hours of a classical studies colloquium (CLST 4003H).

Requirements for a Minor in Classical Studies: Students should select appropriate courses from the following areas:
1. 9 hours of Ancient Greek or Latin courses numbered above 2000,
2. 6 hours of additional work in classical languages and/or specific classical studies-related electives, to be selected from the following courses: ARCH 2233, ARHS 4833, ARHS 4843, CLST 1003, CLST 1013, HIST 4003, HIST 4013, HIST 4023, HIST 4043, HIST 4053, PHIL 4003, PHIL 4013, PHIL 4023, PLSC 3953, WLIT 2323.
3. Three hours of a classical studies colloquium (CLST 4003H).

Requirements for Honors in Classical Studies: The Honors Program in Classical Studies gives students of high ability the opportunity to strengthen their study of classics by intensifying their experience with ancient languages and cultures. In addition to the requirements for graduation with a major in classical studies and the general college requirements for a B.A. degree, honors candidates in classical studies must
1. be accepted as honors candidates by the Classical Studies Committee,
2. complete at least three semesters in a second classical language,
3. enroll in at least two 1-hour units of CLST 399VH and pursue independent-study topics under the guidance of classical studies faculty,
4. enroll for two hours of CLST 399VH and write an honors thesis, and
5. defend and discuss their entire honors program in an oral examination.
Successful completion of the requirements will be recognized by the award of the distinction “Classical Studies Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

SEE PAGE 263 FOR CLASSICAL STUDIES (CLST) COURSES

COMMUNICATION (COMM)

Robert M. Brady
Chair of the Department
417 Kimpel Hall
479-575-3046
Web site: http://www.uark.edu/depts/comm/
E-mail: comm@uark.edu

• Professors Frenz, Rogers, Smith (S.), Webb
• Professor Emeritus Rea
• Associate Professors Allen, Amason, Bailey, Brady, Rosteck, Scheide, Warren, Wicks
• Research Assistant Professor Smith (L.)
• Assistant Professor Emeritus Galloway
• Adjunct Assistant Professors Cowling

As a subject for academic study, communication bridges the humanities and the social sciences. It focuses on relationships — personal, group, and societal — and the factors and processes that affect important relationships. Friendships and families, business relationships and political systems, cultural interaction and technological advances are important areas of study in communication. Communication students may concern themselves with the dynamics of interpersonal persuasion, the effects of media technologies, the nature of gender stereotypes, the function of roles within the family, the structure of organizational authority, the influence of cultural myths, the impact of social movements, and the history of rhetoric. Because the program offers many diverse interests, there is a place for anyone with a genuine curiosity about human communication and its effect upon society.

Communication majors from recent graduating classes now hold responsible positions in government and public affairs, in management, marketing, and public relations within private business, and in television and mass media organizations. Many others are successfully pursuing further education in graduate and professional schools. The department of communication offers general studies of the discipline, as well as concentration in three specific emphasis areas:

1. interpersonal, small group, and organizational communication
2. mass communication
3. rhetoric and public communication

Students may also select a program for acquisition of teaching certification in the field.

Admission Requirements for a Major in Communication: For standing as a major, entering freshmen must have ACT composite scores of 20 or higher, and those transferring into the program after the first semester of college study must have a cumulative grade-point average of 2.00 or higher.

University and College Requirements for a Major in Communication: 36 semester hours in communication courses, to include COMM 2333, COMM 3343, COMM 3443, COMM 3673, at least 12 additional hours chosen from COMM courses above 3000. Communication courses used to satisfy the college or University Core requirements will not count toward the major. To graduate, students must have a cumulative grade-point average of 2.00 or above within the major.

Writing Requirement: The college writing requirement may be satisfied by a research paper submitted for an upper-division communication class and approved by the chairman of the department.

Requirements for Departmental Honors in Communication: The Honors Program in communication gives an opportunity for a student to achieve an additional level of intellectual growth and a satisfaction of accomplishment. A student engages in independent research and writing, under the supervision of a member of the communication faculty, and participates in special honors classes, seminars, and colloquia.

The faculty recognizes outstanding achievement by a student by recommending that the bachelor’s degree in communication be awarded with the distinction “Communication Scholar Cum Laude.” Higher distinctions may be awarded to truly outstanding students based upon the whole of their academic program and quality of honors research.

To enter the Honors Program, a student must possess a 3.25 minimum grade-point average on all academic work and receive the recommendation of a faculty member in communication to the Honors Council of Fulbright College. A student may pursue an independent research program of a historical, critical, descriptive, or experimental nature, within any of the areas of rhetorical or communication theory, history of public address, interpersonal, small-group, or organizational communication, persuasion, argumentation, political communication, freedom of speech, communication education, or in any closely related areas of inquiry. A student interested in mass communications, broadcasting, or film may choose to pursue either a research project or a creative study. In addition to satisfying the general college and departmental requirements for a bachelor’s degree, a student must satisfy departmental honors requirements, which include the following:

1. become an honors candidate no later than the first semester of the junior year of study,
2. enroll in COMM 399VH, Honors Course, a minimum of one hour of credit each semester during the junior-senior years,
3. achieve a 3.25 minimum grade-point average in communication, marketing, and public relations, and
4. take 12 hours, which may include 6 hours of thesis in Honors Studies, and
5. write and defend before a faculty examining committee a thesis based on the investigative or creative project undertaken in COMM 399VH.

For a full description of the Honors Program and its requirements, consult with an adviser in the department of communication.

Requirements for a Minor in Communication: 18 hours including COMM 2303 and COMM 2323. At least 9 hours must be numbered 3000 or above. A student should consult with an adviser in the department of communication for the selection of appropriate courses. A student must notify the department of his or her intent to minor.

Communication (B.A.) Drama/Speech Teacher Licensure Requirements: Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

SEE PAGE 264 FOR COMMUNICATION (COMM) COURSES

COMPUTER SCIENCE AND COMPUTER ENGINEERING

Jerry Yeargan
Head of the Department
311 Engineering Hall
479-575-6197

• Professors Crisp, Deaton, Lala, Skeith, Sohraby, Starling, Thompson (C.), Yeargan
• Associate Professors Apon, Beavers, Li, Lush, Panda, Parkerson
The educational objectives of the Department of Drama are centered on producing graduates prepared to enter the competitive world of professional play production as well as a variety of teaching and dramatic criticism. The educational objectives of the department are to produce graduates who are recruited in a competitive market and make valuable contributions to a wide variety of industries, particularly in computer and information technology, who succeed in graduate or professional studies, who pursue life-long learning and continued professional development, and who undertake leadership roles in their profession, in their communities, and in the global society.

Requirements for a B.A. degree with a Major in Computer Science: At least 30 hours in computer science including CENG 1113/1111L, CSCE 1123/1121L, CSCE 2143, CSCE 3313, and CSCE 4313 plus 13 hours of electives to be selected from a list of CSCE courses numbered 3000 or higher offered by the department. The mathematics requirements of the degree are MATH 2043 or MATH 2554, MATH 2103, MATH 3103.

Requirements for Departmental Honors are listed in the College of Engineering section of this catalog.

Requirements for a Minor in Computer Science: CENG 1113/1111L, CSCE 1123/1121L, CSCE 2143, CSCE 3313, and either CENG 2133 or CSCE 4313.

SEE PAGE 265 FOR COMPUTER SCIENCE (CSCE) COURSES.

DRAMA (DRAM)
D. Andrew Gibbs
Chair of the Department
619 Kimpel Hall
479-575-2953
Web site: http://www.uark.edu/depts/drama/
E-mail: drama@cavern.uark.edu

• Professors Brusstar, Gibbs, Gross
• Associate Professors Herzberg, Martin, Riha
• Assistant Professors Dwyer, Tyndall
• Instructor Leftwich

The Department of Drama offers the Bachelor of Arts (B.A.) degree in Drama, a broad spectrum program in the context of a liberal arts education, and the Master of Fine Arts (M.F.A.) degree in six concentrations: Acting, Directing, Playwriting, Costume Design, Scene Design and Lighting Design. (Please see the Graduate Catalog for information regarding the MFA degree.) Classes at both undergraduate and graduate levels are focused on providing a strong, professional orientation to theatre performance and technology in conjunction with appropriate research-based course work to address the required foundations in theatre history, dramatic literature and dramatic criticism.

The educational objectives of the Department of Drama are centered on producing graduates prepared to enter the competitive world of professional play production as well as a variety of teaching and research fields. In addition a background in Drama has proven to be a valuable asset to those wishing to pursue a wide range of corporate and industrial occupations.

The play production program is the “laboratory” for study in Drama. To that end the Department produces an average of 10 plays each year involving students in virtually all aspects of production. Auditions are open to all students on campus.

The Department of Drama also supports course work in Dance, offering a variety of basic and advanced studio courses.

Requirements for a Major in Drama: A minimum of 40 semester hours to include 18 semester hours in courses numbered 3000 and above or the prescribed program for teacher licensure in speech education. All drama majors must enroll in the following courses:

- DRAM 1223 Intro. to Dramatic Art
- DRAM 1313 Stage Technology I: Costumes and Makeup
- DRAM 1311L Stage Technology I Lab
- DRAM 1323 Stage Technology II: Scenery and Lighting
- DRAM 1321L Stage Technology II Lab
- DRAM 1683 Acting I
- DRAM 2683 Acting II
- DRAM 3653 Directing I
- DRAM 2313 Intro. to Design

A choice of one course selected from DRAM 3213 (Costume Design I), DRAM 3733 (Lighting Design I), DRAM 3903 (Makeup Design) or DRAM 4653 (Scene Design I)
- DRAM 4233 History of Theatre I
- DRAM 4333 History of Theatre II

Six hours of courses chosen from DRAM 3803 Development of the Drama, DRAM 4733 Dramatic Criticism, DRAM 3453 Stage Speech, DRAM 4463 African American Theatre History, DRAM 491V Special Topics in Script Analysis/Synthesis, one design course, not previously taken, chosen from among DRAM 3213, DRAM 3733, DRAM 3903, DRAM 4653.

In addition, all drama majors are required to take 2 credit hours of DRAM 3001 Theatre Practicum. It is expected that one hour of theatre practicum will be taken per academic year. In consultation with the adviser, each student may select the focus area of each practicum credit in any of the technical theatre areas. No drama major may present DRAM 1003 to satisfy the college fine arts requirement.

Writing Requirement: The Fulbright College research/analytical paper requirement for drama majors will be fulfilled in DRAM 4233, DRAM 4333, DRAM 4453, or DRAM 4733. Satisfactory completion of an honors project or senior thesis may fulfill the requirement.

Senior Progress Review: All drama majors are required, in the semester before graduation, to successfully complete the Senior Progress Review, a faculty assessment of each student’s accomplishments in performance and production.

Requirements for Departmental Honors in Drama: The Departmental Honors Program in Drama provides upper-division undergraduate students with an opportunity to formally participate in creative and scholarly activities in theatre. Honors candidates engage in independent study and research under the guidance of the drama faculty and participate in special honors seminars and colloquia. Outstanding student achievement will be recognized by awarding the distinction “Drama Scholar Cum Laude” at graduation. In addition to satisfying the general college requirements for the bachelor’s degree with Honors, honors candidates in drama must:

1. become a candidate no later than the second semester of their junior year,
2. enroll in honors colloquia when available,
3. enroll in six hours of honors research DRAM 399VH,
4. complete and defend in oral examination an honors thesis based upon the project carried out in DRAM 399VH, and
5. achieve a cumulative grade-point average of 3.25. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate’s entire academic program. Usually these are awarded only to students with a cumulative grade-point average of 3.50 or above, whose project
demonstrates a high degree of creativity and scholarship.

Requirements for a Minor in Drama: A minimum of 18 semester hours in drama, including DRAM 1223. One of the following courses or course/lab combinations is also required: DRAM 1313 and 1311L, or DRAM 1323 and 1321L, or DRAM 1683. The remaining hours must be selected from courses at the 3000- or 4000-level, the specific courses to be determined by the student in consultation with a drama department faculty adviser. The student must notify the department of his or her intent to minor.

Drama (B.A.) Drama/Speech Teacher Licensure Requirements:
Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

For requirements for the M.A. and M.F.A. degrees in drama, see the Graduate School Catalog.

SEE PAGE 270 FOR DRAMA (DRAM) COURSES

**ECONOMICS (ECON)**

Joseph Ziegler  
Chair of the Department  
402 Business Building  
479-575-ECON (3266)  
Web site: http://waltoncollege.uark.edu/ECON/default.asp

- Phillips Petroleum Chair of International Business and Economics  
- Distinguished Professor Murray  
- Lewis E. Epley Jr. Professor Ferrier  
- Professors Britton, Curington, Dixon, Farmer, Ziegler  
- Associate Professors Horowitz, Kali  
- Assistant Professors Deck, Lee, Mendez, Reyes

Requirements for a Major in Economics: 30 semester hours, including ECON 2143 or ECON 2013 and ECON 2023, ECON 3033, ECON 3133, ECON 4743, and ECON 4033.

Requirements for a Major in Economics with Emphasis in International Economics and Business:

1. 30 semester hours of courses, including ECON 2013, ECON 2023, ECON 3033, ECON 3133, ECON 4633, ECON 4643, and 12 hours of international economics and business electives that may be selected from ECON 3843, ECON 4653, ECON 468V, MGMT 4583, or other courses approved by the departmental adviser. Course pre-requisites for non-economics international business courses will count toward this 12-hour requirement.

Thus, if a student wants to take MKTG 4833 International Marketing as an international economics and business elective, he/she also must take the prerequisite MKTG 3433 Principles of Marketing. These two courses will satisfy 6 hours of the elective requirement.

2. 9 hours of upper-division course work in Fulbright College that focuses on a country or region of the world related to the foreign language, which might include upper-division courses in the same language, which should emphasize literature or cultural topics. Courses must be approved by the departmental adviser. Students who meet the requirements of the Fulbright College area studies programs in Asian Studies, Russian and Soviet Studies, Latin American Studies, or European Studies will be considered to have fulfilled this requirement.

3. MATH 2043 and MATH 2053 or MATH 2554 and MATH 2564 – these courses fulfill the Fulbright College mathematics requirement.

4. 9 hours of business/stat courses to include WCOB 1033 or STAT 2303 and ACCT 2013 and ACCT 2023, 5. 6 hours of a foreign language at the intermediate level, or above, and

6. 3 hours of upper-division foreign language in the same language covering business communications, or equivalent. Any student whose minimum 6-hour requirement under (#5) above includes an upper-division course may choose to include business communications among the 6 hours of required university course work in the foreign language.

NOTE: It is strongly recommended that economics majors who plan to continue their studies at the graduate level take two semesters of calculus (MATH 2554 AND MATH 2564) and linear algebra (MATH 3083).

Writing Requirement: The Fulbright College writing requirement for economics majors will be fulfilled by the research/analytical paper required in ECON 4033. For economics majors who elect to emphasize international economics and business, the writing requirement will be fulfilled by the research/analytical paper required in ECON 4633 or 4643.

Requirements for Departmental Honors in Economics: The Departmental Honors program provides upper-division students the opportunity to engage in independent study or research under the guidance of an individual member of the faculty. In addition to satisfying the general college requirements for the bachelor’s degree with honors, honors candidates in economics are required to complete and orally defend an honors thesis based upon independent study under ECON 399VH (for 3 to 6 hours) and to have a minimum grade-point average of 3.25. Outstanding student achievement will be recognized by awarding the bachelor’s degree with the distinction “Economics Scholar Cum Laude.” Higher distinctions may be awarded to truly outstanding students based upon the whole of their academic program and quality of honors research.

The following courses, among others in business administration, are given credit toward an economics major for the B.A. degree. For description of these courses, see College of Business Administration section of this catalog.

- FINN 3133 Commercial Banking
- FINN 3043 Principles of Finance
- WCOB 1033 Data Analysis and Interpretation

For the combined major in economics and African-American studies, see page 111.

Requirements for a Minor in Economics: 18 hours in economics. Required courses are ECON 3033 Microeconomic Theory, and ECON 3133 Macroeconomic Theory, plus 12 additional hours in economics, six of which must be in courses numbered 3000 or above.

NOTE: ECON 2013 and ECON 2023, or ECON 2143, are prerequisites to all economics courses numbered above 3000.

Economics (B.A.) Social Studies Teacher Licensure Requirements:
Please refer to the Secondary Education Requirements for Fulbright College Students on page 99. Students wanting to teach social studies in middle school should consult with a middle level adviser in the College of Education and Health Professions.

• Associate Professors Emeriti MacRae, Park
• Assistant Professors Adams (R.), Cohen, McCombs
• Instructors Clark, Lane

The Department of English offers a major in English, a minor in
English, and a combined major in English and journalism.

The major in English is suitable for many purposes, both profes-
sional and cultural. By properly selecting courses, the student may
prepare for postgraduate work in literature and language; meet the
English requirements for secondary teaching licensure; develop writ-
ing skills, both in creative and in expository writing; obtain appropri-
ate pre-professional training for areas such as law; or study broadly
in the literary culture of English-speaking peoples. A rich variety of
courses is offered, and there is opportunity within the major for any
student to explore areas of special interest: for example, American
literature, the Renaissance, drama, the English language, and modern
and contemporary literature.

Requirements for a Major in English: 36 semester hours (not
counting ENGL 0003, ENGL 1013, ENGL 1023, and ENGL 2003).
These hours must include 12 hours of survey courses, including
ENGL 2303; either ENGL 2313 or ENGL 2323; either ENGL 2343
or ENGL 2353; and one additional survey course chosen from ENGL
2313, ENGL 2323, ENGL 2343, and ENGL 2353. Majors must take
an additional 12 hours that include ENGL 4303; one of ENGL 3713,
ENGL 3723, and ENGL 3733; either ENGL 3743 or ENGL 3753;
and one of ENGL 3833, ENGL 3843, ENGL 3853, and ENGL 3863.
The remaining twelve hours can be taken in any English course
numbered above 3000, with the stipulation that at least six of these
hours must be numbered above 4000.

Writing Requirement: All upper-division English courses require
a research or an analytical paper except ENGL 4003, and the courses
in creative writing (ENGL 3013, ENGL 4013, ENGL 4023, ENGL
4073). For this reason all students who fulfill the requirements for a
major in English thereby fulfill the Fulbright College writing require-
ment.

Requirements for a Major with a Concentration in Creative
Writing: 36 semester hours (not counting ENGL 0003, ENGL 1013,
ENGL 1023, and ENGL 2003) to include three hours of ENGL
3203 Poetry; three hours of ENGL 3213 Fiction; three hours of
ENGL 2023 Creative Writing I; three hours of ENGL 3013 Creative
Writing II; three hours of ENGL 4013 Poetry Workshop or ENGL
4023 Fiction Workshop; twelve hours of survey courses (taken from
ENGL 2303, ENGL 2313, ENGL 2323, ENGL 2343, and ENGL
2353); three hours of ENGL 4303 Introduction to Shakespeare; and
six additional hours chosen from ENGL courses numbered above
3000 and WLIT courses numbered above 2353.

Requirements for Departmental Honors in English: The
Departmental Honors Program in English allows upper-division
undergraduates to strengthen their study of English and adapt it to
their interests. Honors candidates enroll in special courses and do
directed independent study and research. In addition to the college
and departmental requirements for the major in English and the gen-
eral college requirements for the B.A. degree, each honors candidate
in English must
1. be accepted as an honors candidate by the department,
2. complete at least nine hours of honors course work, at least
three hours of which must be in English,
3. enroll in at least three hours of Senior Thesis ENGL 498V and
write an honors thesis, either a critical study or a creative
writing project, and
4. defend the candidate’s entire honors program in an oral
examination.

Candidates may petition to enroll in a departmental graduate semi-
nar. Candidates who complete the honors program with merit will
graduate with the distinction “English Scholar Cum Laude.” The distinc-
tions of Magna Cum Laude and Summa Cum Laude will be
awarded only for exceptional work and will be based on the
candidate’s entire honors program.

Requirements for a Minor in English: 18 hours of English (not
counting ENGL 0003, ENGL 1013, ENGL 1023, and ENGL 2003) to
include any nine hours of survey courses (chosen from ENGL 2303,
ENGL 2313, ENGL 2323, ENGL 2343, and ENGL 2353) and nine
additional hours chosen from English courses numbered above 3000
and WLIT courses above 2333.

Requirements for a Combined Major in English and
Journalism: The English requirements for this combined major are
as follows: 24 hours of English courses (not counting ENGL 0003,
ENGL 1013, ENGL 1023, and ENGL 2003) to include any nine
hours of survey courses (chosen from ENGL 2303, ENGL 2313,
ENGL 2323, ENGL 2343, and ENGL 2353) and 15 additional hours
chosen from English courses numbered above 3000 and WLIT
courses above 2333.

The journalism requirements for the combined major are as fol-
lows: 21 semester hours including JOUR 1023, JOUR 2013, JOUR
3013, JOUR 3023, and JOUR 3633. Other sequences of courses are
available for students emphasizeing broadcast journalism.

Assessment Requirement: Every senior English major must
take the program assessment exam administered by the department
each spring semester to graduate. Exam results will not affect GPA,
although the student’s score will be noted on his or her permanent
academic record. This requirement may be waived in extraordi-
ary circumstances by the department’s Director of Undergraduate
Studies. Contact your adviser for more information.

English (B.A.) Teacher Licensure Requirements:
Please refer to the Secondary Education Requirements for
Fulbright College Students on page 99.

Students wanting to teach English in middle school should consult
with a middle-level adviser in the College of Education and Health
Professions.

SEE PAGE 277 FOR ENGLISH (ENGL) COURSES

EUROPEAN STUDIES (EUST)

Fiona Davidson
Director of Studies
108 Ozark Hall
479-575-3879
Web site: http://www.uark.edu/depts/eust/

• Professors Booker (English), Bukey (history), Dixon (geography),
  DuVal (English), Eichmann (French), Gay (economics), Hanlin
Courses are offered in European studies, broadly defined as the study of the geography, culture, history, language, and politics of central Europe, including the British Isles.

Students wishing to maximize their knowledge of European studies and wishing to prepare for graduate training and/or employment in the private sector or government in positions related to the area may earn a combined major in European studies together with a major in another discipline. Students are required to coordinate their academic programs both with their advisers in the major department and with the director of the European Studies program. New students entering the program are required to notify both the major adviser and the director of studies of their intention to participate. Freshmen and sophomores considering this program are advised to begin their study of an appropriate foreign language as early as possible.

**Requirements for a Minor in European Studies:** Students wishing to minor in European studies must fulfill the EUST 2013 Introduction to Europe and EUST 4003 Colloquium requirements and the language requirements described below under the requirements for the major. They also must complete at least 12 hours from among the electives listed below. A maximum of six hours of electives may be submitted from any one department.

**Requirements for a Major in European Studies – Language Requirement:** Students must complete the equivalent of a third year of a modern European language, e.g., six hours of advanced 3000- or 4000-level work in French, German, or Spanish. Less commonly taught languages such as Portuguese or Italian may be used, subject to the availability of courses. Three to six hours in an approved study abroad program in Europe may substitute for all or part of this requirement. For native speakers of a European language other than English, this requirement is waived.

**Introduction to Europe:** Students must complete EUST 2013 Introduction to Europe, preferably before taking the colloquium.

**European Studies Colloquium:** Students must complete three to six hours of EUST 4003 European Studies Colloquium.

**Electives:** Students must complete at least 18 hours of credit, in addition to the language requirement and the European studies colloquium, from among the following or in individualized studies under the direction of faculty participating in the program. Students choosing to take individualized reading or directed research courses as part of the major or minor must obtain the approval of the director of the area studies program and their major adviser. In addition, the following conditions apply:

1. A maximum of nine hours may be submitted from any one department, and
2. A maximum of six hours may be submitted from courses taken in the student’s major department.

The following courses may be taken in fulfillment of elective requirements:

**Anthropology**
- ANTH 4253 People and Cultures of the World Regions
  (Region varies, counts for EUST if region is Europe)

**Art History**
- ARHS 4873 Baroque Art

**Arts and Sciences**
FOREIGN LANGUAGES (FLAN)

Kay Pritchett
Chair of Department
425 Kimpel Hall
479-575-2951
Web site: http://www.uark.edu/depts/flaninfo/

• Professors Eichmann, Hanlin, Haydar, Levine, Pritchett, Ricker, Tucker, Williams
• Professors Emeriti Falke, Fernandez
• Associate Professors Arenberg, Bell, Christiansen, Davis, Fredrick, Restrepo, Turner
• Associate Professors Emeriti Bergal, Ford, Hassel, Horton
• Research Associate Professor Cornell
• Assistant Professors Bernard, Comfort, Condray, Fukushima, Jones, Rozier, Ruiz
• Instructors Xu

The foreign language requirement among the basic courses is satisfied by successful completion of a course numbered 2013 for all B.A. degree candidates and of a course numbered 2003 for all B.S. and B.F.A. degree candidates, and 1013 for B.M. degree candidates. Students who, on the basis of prior knowledge of language, omit one or more courses in the basic language sequence (1013-2013) may receive college credit for omitted courses if they validate their higher placement by passing an advanced course with a grade of “C” or above. Credit will be awarded at the request of the student when filed by application to the Foreign Language Department office.

Restrictions: (a) Conversation courses (3033, 4033) and correspondence courses may not be used to validate such prior knowledge, (b) No degree credit (graduation credit) is awarded for a foreign language 1003 course to students in Fulbright College continuing the language begun in high school, either by validation or regular registration. Also, for Fulbright College students who do not present the Fulbright College admission requirement of two units (years) of a single modern foreign or classical language, the first semester of language study will be considered remedial and will not count towards the 124 hours required for graduation (although the course will appear as University credit and the grade received will be computed in the grade-point average). Students transferring from other institutions are expected to meet the same entrance standard.

Requirements for a Major in a Foreign Language: (University and college requirements for the Bachelor of Arts are found on pages 40 and 106.)

French: 24 hours in French in courses numbered 3000 or above with a minimum grade of “C” in each course. Specific courses required are FREN 3113, FREN 4003, FREN 4033, FREN 4123, and FREN 4223.

German: 24 hours in German in courses numbered 3000 or above with a minimum grade of “C” in each course. Specific courses required are GERM 3003, GERM 3013, GERM 4003, GERM 4213, GERM 4223, three hours of conversation (GERM 3033 or GERM 4033) and six hours of literature.

Spanish: 27 hours in Spanish in courses numbered 3000 or above with a minimum grade of “C” in each course. Specific courses required are SPAN 3003, SPAN 3033, SPAN 3103, SPAN 3113, and SPAN 4003. The remaining 12 hours are to be selected from among other 4000-level offerings, in consultation with the major adviser. Students considering future graduate work in Spanish are strongly advised to take both the Spanish and Latin American literature surveys (SPAN 4103 and 4133).

Writing Requirement: The college writing requirement may be satisfied by a term paper or other written work submitted for an upper-division foreign language literature class approved by the chair of the department.

For majors in Greek and Latin, see Classical Studies.

Requirements for a Minor in Foreign Languages:

French: 15 hours in courses numbered 3000 or above. Specific courses required are FREN 3113, FREN 4003, and FREN 4033.

German: 15 hours in courses numbered 3000 or above. Specific courses required are GERM 3003, GERM 4003, GERM 4213 and three hours of literature.

Spanish: 15 hours in courses numbered 3000 or above. Specific courses required are SPAN 3003, SPAN 3103, and SPAN 4003 with six additional hours selected in consultation with the Spanish adviser.

Requirements for a Minor in Foreign Languages with a Business Orientation:

French: Courses required are FREN 3003, FREN 3103, FREN 4003, FREN 4033, and FREN 4333.

Spanish: Courses required are SPAN 3003, SPAN 3033, SPAN 3103, SPAN 4003, and SPAN 4333. In some cases, specific course requirements may be adjusted to the individual needs of the candidate with the permission of the Spanish adviser.

Japanese: Courses required are JAPN 3003, JAPN 3013, JAPN 3033, and JAPN 4333. In addition to these four courses, students must choose one of the following elective courses: JAPN 3983 or JAPN 4313. In some cases, elective courses may be adjusted to the individual needs of the candidate with the permission of the Japanese adviser. For information on advanced degrees in foreign languages, see the Graduate School Catalog.

Requirements for Honors in Foreign Languages: The Honors Program in Foreign Languages gives students of high ability the opportunity to conduct independent research culminating in an honors thesis. In addition to satisfying general graduation requirements and all requirements for honors separately established by the Honors Council, candidates for honors in Foreign Languages must:

1. Complete 12 hours of honors credit. One to six of these may be honors thesis hours; the remaining hours should be taken in disciplines chosen in consultation with the adviser;

2. Complete an honors thesis in the major field, and pass an oral examination on the thesis conducted by an honors committee, as evidence of substantial individual research skills;

3. Demonstrate superior competence in language, culture, and literature by achieving a G.P.A. of 3.5 in all upper-division courses submitted for the major.

Successful completion of these requirements will be recognized by the award of the distinction "Language Scholar Cum Laude." Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Foreign Language (B.A.) Teacher Licensure Requirements:

Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

SEE PAGE 282 FOR FOREIGN LANGUAGES (FLAN) COURSES, CHECK PAGE 239 FOR ALPHABETICAL LISTINGS OF SPECIFIC LANGUAGES.

FULBRIGHT INSTITUTE OF INTERNATIONAL RELATIONS (FIIR)

Donald R. Kelley
Director of the Institute
722 W. Maple
479-575-2006
Web site: http://www.uark.edu/~fiir/
The Fulbright Institute of International Relations is a center for study, research, and analysis of foreign policy and international affairs within the J. William Fulbright College of Arts and Sciences. The institute honors J. William Fulbright for his leadership in international relations and his lasting contributions to international education and better understanding among nations. In addition to instructional and research activities, the institute serves as a medium for international scholarly exchange and study programs, and sponsors conferences, seminars, public events, and publications on international relations.

GENDER STUDIES (GNST)

Susan Marren
Chair of Studies
333 Kimpel Hall
479-575-4301
Web site: http://cavern.uark.edu/depts/h2p/index.html

• Professors Schneider, Swedenburg
• Associate Professors Bailey, Coon, Detels, Fredrick, Gordon, Marren, Parry, Sonn, Stephens, Striftler, Zajeczek
• Assistant Professors Amason, Cohen, Cornell (R.), D’Alisera, Erickson, House, Kafh, Robinson, Starks

The gender studies minor introduces students to various ways that questions about women’s and men’s differing participation in work, the family, political systems, and creative endeavors have been asked and answered by different academic disciplines. This is an interdisciplinary minor. Courses in the humanities and the social sciences explore sex roles, sex differences, and the concepts of masculinity and femininity, the roles of women in culture and society, past and present, and their implications for the roles of men, questions about the distribution of power, work, and resources in the public and private sectors, and the symbolic representation of gender and identity in literature, religion, and art. The minor is often chosen by students interested in investigating materials previously neglected by scholars and in fresh perspectives on traditional subject matter. Some expertise in gender studies has proven to be an asset to both female and male students who have gone on to a graduate school and to work in such fields as government and business, social services and health agencies, the law, art and politics.

Requirements for a Minor in Gender Studies: The student must complete 15 credit hours of regular courses listed below or special topics and seminars found in each semester’s schedule of classes under Gender Studies, including HUMN 2003 Introduction to Gender Studies:

ANTH 3163 Male and Female
ANTH 3523 Gender and Politics in Latin America
CLST 4003H Rome on Film
COMM 3433 Family Communication
COMM 3983 Rhetoric of American Women
COMM 4333 Communication and Gender
HIST 3083 Women and Christianity
HIST 3923H Honors Colloquium: The History of Sexuality in the United States
HIST 3923H Honors Colloquium: Russian and Soviet Women
HIST 4133 Society and Gender in Modern Europe
HIST 4413 New Women in the Middle East
HUMN 2003 Intro. to Gender Studies
HUMN 3923H Honors Intro. to Gender Studies
HUMN 4243 Women in Music and Art
LAST 4003 Latina Writers
PLSC 4573 Gender and Politics

Requirements for the B.S. Degree with a Major in Earth Science:

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>56</td>
</tr>
</tbody>
</table>

In addition, all earth science majors must satisfy the senior-level writing requirement as specified by the geosciences department.

Earth Science (ERSC)

Fulbright College offers a major in earth science leading to the Bachelor of Science degree. Prospective secondary teachers may plan a program, in cooperation with the College of Education, which will satisfy the teacher licensure requirements. Students interested in environmental problems, teaching earth science in public schools, or wishing to pursue graduate work in either geography or geology will obtain much of the necessary foundation through this degree. Because the program outlined below lists only minimum science requirements, it is expected that most students will use some of their elective credit hours to strengthen their science backgrounds in areas other than geography and geology. These areas of additional study will be determined through consultation between the student and the adviser. Students interested in this major should contact either Professor R.H. Konig or Professor J.C. Dixon.

Requirements for the B.S. Degree with a Major in Earth Science:

At least 6 additional hours, at the 3000 level or above, in either geography or geology. 6

Total Hours 56

In addition, all earth science majors must satisfy the senior-level writing requirement as specified by the geosciences department.

Earth Science (B.S.) Teacher Licensure in Life/Earth Science or Physical/Earth Science Requirements:

Students wanting to teach science in middle or secondary school should consult with an adviser in the College of Education and Health Professions.

Geography (GEOG)

Undergraduates who wish to major in geography should identify themselves to the department as soon as possible in order that they may develop a meaningful sequence of courses and take part in...
departmental activities. Two types of undergraduate programs with concentrations in geography are described below. Those interested in the graduate program should consult the Graduate School Catalog.

Requirements for a Major in Geography: The geography major of 30 hours leads to the B.A. degree in Fulbright College of Arts and Sciences. Requirements include GEOG 1123, GEOG 2103, GEOG 2203, GEOL 1113L, and GEOL 1133. A minimum of 15 hours must be at the 3000 level or above, including GEOG 3023, with a balance between regional and topical courses. The college writing requirement is to be met by completion of a term paper deemed satisfactory by the student’s adviser and instructor of an upper-level geography course. The college writing requirement may also be met by the completion of an honors thesis. Students who expect to enter graduate school are encouraged to register for GEOG 410V their senior year. Electives in closely related fields are considered a part of the program and, upon prior approval of the department, six hours may be counted toward the major. Those planning to teach in secondary schools should note that they can both earn their degree in geography and qualify for a teaching certificate; they should consult with the department as early as possible.

Requirements for a Minor in Geography: 15 hours in geography to include GEOG 1123. At least 6 hours must be numbered 3000 or above and must include one regional and one topical course.

Cartography/Remote Sensing GIS Specialization: This program gives students an opportunity to develop expertise in (1) cartography, map design and computer-assisted map production, (2) remote sensing and image interpretation, including photographic systems, sensor systems, and digital image processing, and (3) geographic information systems, including data sources, analytical techniques, and hardware/software systems.

To complete the specialization, a student is required to fulfill certain course requirements.

Required courses (9 hours):
- GEOG 3023, GEOG 4413, and GEOG 4543 (same as ANTH 4543).

Elective courses (9 hours to be selected from the following):
- GEOG 4523, GEOG 5423, GEOG 4553 (same as ANTH 4553), GEOG 4563 (same as ANTH 4563), GEOG 4573 (same as ANTH 4573), GEOG 4593 (same as ANTH 4593), STAT 4003 (or other approved statistics course)
- CENG 2053 (or other approved surveying course)
- CENG 4883

Requirements for Departmental Honors in Geography: Admission to the Departmental Honors Program in Geography is open to geography majors with a minimum grade-point average of 3.25 in all their work. All honors candidates must take 12 hours, which may include 6 hours of thesis, in Honors Studies. During the fall semester of either the junior or senior year the candidate will enroll in GEOG 399VH (no more than three hours of credit), an undergraduate seminar in geographical philosophy and methodology. During the senior year the honors candidate will complete the program by writing a senior honors paper under GEOG 399VH (no more than three hours of credit). Successful completion of the requirements will be recognized by the award of the distinction “Geography Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Geography (B.A.) Social Studies Teacher Licensure: Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach social studies in middle school should consult with a middle level adviser in the College of Education and Health Professions.

SEE PAGE 283 FOR GEOGRAPHY (GEOG) COURSES
4. Take 12 hours in Honors Studies, which may include 6 hours of thesis,
5. Complete junior and senior honors courses GEOL 3901, GEOL 3911, GEOL 4922, GEOL 4932, and
6. Achieve a cumulative grade-point average of 3.30 in geology courses.

Geology (B.A. or B.S.) Teacher Licensure in Life/Earth Science or Physical/Earth Science Requirements:
Students wanting to teach science in middle or secondary school should consult with an adviser in the College of Education and Health Professions.
For requirements for the M.S. degree in geology, see the Graduate School Catalog.

SEE PAGE 284 FOR GEOLOGY (GEOL) COURSES

HISTORY (HIST)

Jeannie Whayne
Chair of the Department
416 Old Main
479-575-3001
Web site: http://www.uark.edu/depts/histinfo/history/

• Distinguished Professors West, Woods
• Alumni Distinguished Professor Emeritus Gatewood
• Professors Bukley, Chappell, Cornell, Engels, Kennedy, Sutherland, Tsai, Whayne
• Professors Emeriti Brown, Chase, Vizzier
• Associate Professors Coon, Finlay, Gordon, Robinson, Sloan (D), Sonn, Tucker
• Associate Professor Emeritus Edwards
• Assistant Professors Brogi, Schweiger, Sloan (K), Starks, Williams (P)

Requirements for a Major in History: 36 semester hours to include WCIV 1003 and WCIV 1013. A student must notify the candidate’s program of honors studies.
Prospective Departmental Honors students must take 12 hours in Honors Studies, of which 6 hours must include HIST 3973H Honors Methods (Spring semester, junior year and HIST 399VH, Honors History Thesis, Fall or Spring semester, senior year). During the senior year, the honors candidate will complete the program by writing a senior honors thesis. Successful completion of the program will be recognized by the award of the distinction “History Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Requirements for a Minor in History: 15 semester hours not to include WCIV 1003 and WCIV 1013. A student must notify the department of his or her intent to minor.
For the combined major in history and African-American studies, see page 111.
For freshman history, see Western civilization 1003, 1013.

Requirements for Departmental Honors in History: Admission to the Departmental Honors Program in History is open to history majors with a minimum grade-point average of 3.25 in all their work. Prospective Departmental Honors students must take 12 hours in Honors Studies, of which 6 hours must include HIST 3973H Honors Methods (Spring semester, junior year and HIST 399VH, Honors History Thesis, Fall or Spring semester, senior year). During the senior year, the honors candidate will complete the program by writing a senior honors thesis. Successful completion of the program will be recognized by the award of the distinction “History Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Requirements for a Minor in History: 15 semester hours not to include WCIV 1003 and WCIV 1013. A student must notify the department of his or her intent to minor.
For the combined major in history and African-American studies, see page 111.

History (B.A.) Social Studies Teacher Licensure Requirements:
1. Refer to the Secondary Education Requirements for Fulbright College Students on page 99.
2. Students wanting to teach social studies in middle school should consult with a middle-level adviser in the College of Education and Health Professions.
3. For requirements for advanced degrees in history, see the Graduate School Catalog.
4. For information regarding departmental scholarships, visit the Web site at http://www.uark.edu/depts/histinfo/history/sch.html.

HIST 3583, HIST 3593, HIST 4423, HIST 4503, HIST 4513, HIST 4533, HIST 4543, HIST 4563, HIST 4573, HIST 4613, HIST 4623, HIST 4643, HIST 4653, HIST 4663, HIST 4673, HIST 4703, HIST 4723, HIST 4733.

Writing Requirement: To fulfill the Fulbright College writing requirement, each history major will submit, prior to graduation, a substantial research or analytical paper, with a grade of ‘A’ or ‘B’ from an upper-division history course (3000, 4000, 5000 level) to his or her departmental adviser. Satisfactory completion of an honors project or a senior thesis may fulfill this requirement.

HUMANITIES (HUMN)

David Fredrick
Chair of Studies
506 Old Main
479-575-6776
Web site: http://cavern.uark.edu/depts/h2p/index.html

• Distinguished Professor West
• Professors Burris, Cochran, Cory, Goodstein, Kennedy, Quinn
• Adjunct Professor Vitali
INTERNATIONAL RELATIONS (IREL)

Hoyt H. Purvis
Chair of Studies
116 Kimlpe Hall
479-575-3601
Web site: http://www.uark.edu/~arsc/IR

The J. William Fulbright College of Arts and Sciences is strongly committed to the study of international relations and this program offers students a strong foundation for more advanced study as well as preparation for careers in an increasingly global economy and society. The degree offers a broad interdisciplinary course of study with a strong intercultural and international focus. Intensive language study and study abroad are especially encouraged.

Requirements for a Major in International Relations:

FIIR 2813 Intro. to International Relations (same as PLSC 2813)
Six hours of upper-division foreign language courses or equivalent. (May be satisfied with approved study abroad courses related to language field. If upper-division language courses or unavailable in field of study, (appropriate courses will be approved as substitutes.)
ECON 2013 Principles of Macroeconomics and ECON 2023 Principles of Microeconomics, or ECON 2143 Basic Economics and one upper-level international economics course: ECON 4633 International Trade Policy, or ECON 4643 International Macroeconomics & Finance
From the following (depending on ECON option selected); (Courses must be selected from at least two departments.)
COMM 4343 Intercultural Communication
ECON 4633 International Trade Policy, or ECON 4643 International Macroeconomics & Finance*
GEOG 2103 Emerging Nations
GEOG 2203 Developed Nations
GEOG 4243 Political Geography
HIST 3063 Military History
HIST 3443 Modern Imperialism
HIST 3533 World War II
HIST 3583 U.S. and Vietnam
HIST 4763 Diplomatic History
PLSC 3533 Political Development
PLSC 3803 International Organization
PLSC 3813 International Law
PLSC 3823 Theories of International Relations
PLSC 3853 American Foreign Policy
PLSC 4513 Creating Democracies
PLSC 4803 Foreign Policy Analysis
PLSC 4813 Politics of the Cold War

Area Studies Concentration
Three hours of an Area Studies Colloquium (AIST, EUST, LAST, MEST, or RSST 4003) and approved area studies courses from GEOG, HIST, or PLSC. (A second Area Studies Colloquium may be taken with advanced approval.)

FIIR (IREL) 4003 International Relations Seminar
(Credits in study-abroad courses on an international topic or an honors colloquium on an international topic may be applied toward the major if approved in advance. Such courses may not be substituted for FIIR/PLSC 2813, the ECON requirement, or FIIR 4003.)

Disciplinary or Area Studies Minor
Students must complete a minor (15-18 hours) in one of these disciplines, consisting of approved international-related courses:

Anthropology (15)
Economics (18)
Geography (15)
History (15)
Political Science (18)
Asian Studies (15)
European Studies (15)
Latin American Studies (15 and language requirements)
Middle East Studies (18)
Russian Studies (18)

Approved Courses for Minor in Anthropology for International Relations majors:
ANTH 3003 World Prehistory
ANTH 3033 Egyptology
ANTH 3123 Anthropology of Religion
ANTH 3503 Power and Popular Protest in Latin America
ANTH 3523 Gender and Politics in Latin America
ANTH 3923H Honors Colloquium (for honors students if the topic is international-related)
ANTH 4123 Ancient Middle East
ANTH 4163 Globalization: Crisis, Conflict and Capitalist Development
ANTH 4253 Peoples and Cultures of World Regions
ANTH 4513 African Religions: Gods, Witches, Ancestors
ANTH 4533 Middle East Culture
ANTH 4583 Peoples and Cultures of Sub-Saharan Africa

Approved Courses for Minor in Economics for International Relations majors:
ECON 2013 Principles of Macroeconomics
and ECON 2023 Principles of Microeconomics
or ECON 2143* Basic Economics
ECON 3033 Macroeconomic Theory
ECON 3133 Macroeconomic Theory
ECON 4633 International Trade Policy
ECON 4643 International Macroeconomics & Finance
*Students who take ECON 2143 will be required to take an additional upper division economics course to complete the minor.

Approved Courses for Minor in Geography for International Relations majors:
GEOG 2023 Economic Geography
GEOG 2103 Emerging Nations
GEOG 2103H Honors Emerging Nations
GEOG 2203 Developed Nations

J. William Fulbright College of Arts and Sciences

• Associate Professors Adams, Coon, Davidson, Detels, Fredrick, Gordon, Jacobs, McCray, Robinson, Scheide, Sloan, Stephens
• Assistant Professors Halman, Sexton
• Adjunct Assistant Professor Del Gesso

The Humanities Program supports interdisciplinary coursework in Gender Studies, Medieval and Renaissance Studies, Honors World Cultures, and Arts and Aesthetics. Humanities also sponsors courses in Classics, Medieval, and Renaissance cultures taught every other summer and every fall semester at the Rome Study Center.

SEE PAGE 293 FOR HUMANITIES (HUMN) COURSES
Approved courses for minor in History for International Relations majors:

- HIST 1113 Institutions and Ideas of World Civilization
- HIST 1113H Honors World Civilization
- HIST 1123 Institutions and Ideas of World Civilization
- HIST 1123H Honors World Civilization
- HIST 3003 History of Christianity
- HIST 3033 Islamic Civilization
- HIST 3043 History of the Modern Middle East
- HIST 3063 Military History
- HIST 3203 Colonial Latin America
- HIST 3213 Modern Latin America
- HIST 3443 Modern Imperialism
- HIST 3473 Palestine and Israel in Modern Times
- HIST 3503 Far East in Modern Times
- HIST 3533 World War II
- HIST 3583 The United States and Vietnam, 1945-1975
- HIST 3923H Honors Colloquium
- HIST 4003 Greece and the Ancient Near East
- HIST 4013 Alexander the Great and the Hellenistic World
- HIST 4023 The Roman Republic and Empire
- HIST 4043 Late Antiquity and the Early Middle Ages
- HIST 4053 Late Middle Ages
- HIST 4073 Renaissance and Reformation, 1300-1600
- HIST 4083 Early Modern Europe, 1600-1800
- HIST 4103 Europe in the 19th Century
- HIST 4113 Twentieth Century Europe, 1898-1939
- HIST 4133 Society and Gender in Modern Europe
- HIST 4143 Intellectual History of Europe Since the Enlightenment
- HIST 4163 Tudor-Stuart England
- HIST 4193 Great Britain, 1901-1982: Empire to Welfare State
- HIST 4213 The Era of the French Revolution
- HIST 4223 France Since 1815
- HIST 4243 Germany, 1789-1918
- HIST 4253 History of Germany, 1918-1949
- HIST 4283 Russia to 1861
- HIST 4293 Russia Since 1861
- HIST 4313 History of China to 1644
- HIST 4323 Modern China
- HIST 4343 Modern Japan
- HIST 4353 Middle East 600-1500
- HIST 4373 Mongol & Mamluk Middle East 1250-1520
- HIST 4383 The History of Sub-Saharan Africa
- HIST 4393 The Ottoman Empire and Iran 1300-1722
- HIST 4413 New Women in the Middle East
- HIST 4423 The Mediterranean World
- HIST 4433 Social and Cultural History of the Modern Middle East
- HIST 4463 The American Frontier
- HIST 4473 Environmental History
- HIST 4763 Diplomatic History of U.S. 1890 to 1960

Approved courses for Minor in Political Science for International Relations majors:

Students must complete 15 credit hours of courses from the list of approved Political Science courses in the catalog, including at least three hours of approved courses numbered 3000 or above, and at least nine of these hours must be in courses numbered 3000 or above, and courses must be chosen from at least two of the five political science fields.

- PLSC 2813 Intro. to International Relations
- PLSC 3503 Government and Politics of East Asia
- PLSC 3523 Government and Politics of the Middle East
- PLSC 3533 Political Development
- PLSC 3553 Western European Politics
- PLSC 3573 Government and Politics of Latin America
- PLSC 3803 International Organization
- PLSC 3813 International Law
- PLSC 3823 Theories of International Relations
- PLSC 3853 American Foreign Policy
- PLSC 4503 African Politics
- PLSC 4513 Creating Democracies
- PLSC 4543 Government and Politics of Eastern Europe
- PLSC 4563 Government and Politics of Russia
- PLSC 4583 Political Economy of the Middle East
- PLSC 4593 Islam and Politics
- PLSC 4803 Foreign Policy Analysis
- PLSC 4813 Politics of the Cold War
- PLSC 4823 Foreign Policy of East Asia
- PLSC 4843 Middle East in World Affairs
- PLSC 4873 Inter-American Politics

Approved Courses for Minor in Asian Studies:

Students must complete 15 credit hours of courses from the list of approved Asian Studies courses in the catalog, including at least three hours in AIST 4003 Asian Studies Colloquium.

Approved Courses for Minor in European Studies:

Students must fulfill the Colloquium (EUST 4003) and language requirements for European Studies minors described in the catalog and must complete 12 hours from the list of approved European Studies courses in the catalog, including at least three hours in EUST 4003 European Studies Colloquium.

Approved Courses for Minor in Latin American Studies:

Students must fulfill the Colloquium (LAST 4003) and language requirements for Latin American Studies minors described in the catalog and must complete 12 hours from the list of approved Latin American studies courses listed in the catalog.

Approved Courses for Minor in Middle East Studies:

Students must complete a minimum of 9 hours of approved MEST core courses, 3 hours in the MEST Colloquium (MEST) 4003, and 6 hours of Arabic beyond the 12 credit college language requirement.

Approved Courses for Minor in Russian Studies:

Students must fulfill the Colloquium (RSST 4003) and language requirements for Russian Studies described in the catalog and must complete 12 hours from approved Russian Studies courses listed in the catalog.

JOURNALISM (JOUR),
THE WALTER J. LEMKE DEPARTMENT OF

Patsy G. Watkins
Chair of the Department
116 Kimpel Hall
479-575-3601
Web site: http://uark.edu/journalism

- Professors Foley, Purvis
- Professors Emeriti Ingenthron, Reed
- Associate Professors Carpenter, Jordan, Miller, Montgomery, Stockdell, Watkins, Wicks
- Instructors Martin, Shurlds
- Instructor Emerita Belzung
The purpose of the Walter J. Lemke Department of Journalism is to provide students with knowledge of the history, theory, and ethics of mass communications, to educate students in journalistic skills, including the ability to express themselves logically and clearly, and to guide them in securing specialized knowledge of society appropriate to journalistic careers.

Journalism majors must fulfill the requirements for either the news/editorial option, the advertising/public relations option, or the broadcast option. A minimum of 84-85 hours in non-journalism courses must be applied toward the 124 hours required by the college for a Bachelor of Arts degree.

**Writing Requirement:** Students may meet the college writing requirement by producing a satisfactory honors thesis, or research/analytical paper. The research/analytical paper may be written in any journalism course numbered JOUR 3133 or higher or by registering for JOUR 498V. Rules governing the research/analytical paper may be obtained from the journalism department or from any journalism professor.

**Requirements for a B.A. degree in Journalism:** A minimum of 33 semester hours in journalism, including JOUR 1023, JOUR 1033, and JOUR 3633. Note that a minimum grade of ‘C’ is required in all journalism courses that serve as prerequisites for advanced journalism courses. In certain courses a minimum grade of ‘B’ is required. Also required is ENGL 2013. Students must select a sequence when they enter the department. Specific courses in addition to the journalism courses are required only for the advertising/public relations sequence. The requirements for each sequence are as follows:

**News/Editorial:** JOUR 2013, JOUR 3013, JOUR 3123, and either JOUR 3023 or JOUR 4553 are required, plus any four additional journalism courses for which the student has prerequisites. It is recommended that one course choice be an internship.

**Advertising/Public Relations:** JOUR 3723, JOUR 3743, JOUR 4143, JOUR 4423, and JOUR 4453 are required, plus any three additional journalism courses for which the student has prerequisites. It is recommended that one course choice be an internship. Also required are ECON 2143, MKTG 3433, and MKTG 4553. Ad/PR option students are required to earn a grade of ‘B’ or higher in both JOUR 3723 and JOUR 3743 to qualify to take all upper level Ad/PR courses. JOUR 3723 and JOUR 3743 may only be repeated once to earn a B.

**Broadcast:** JOUR 2032/2031L, JOUR 3072/3071L, JOUR 4863/4860L, and JOUR 4873 are required, plus any four additional journalism courses for which the student has prerequisites. It is recommended that one course choice be an internship and another choice be JOUR 4883/4880L.

**Requirements for Departmental Honors in Journalism:** The Journalism Honors Program gives upper-division undergraduates a chance to pursue journalistic research in the context of other academic disciplines. Honors candidates carry out independent study and research under the guidance of the journalism faculty and participate in honors classes in journalism and at least one other discipline. Outstanding student achievement will be recognized by the award of distinction “Journalism Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in cases of exceptional achievement and are based on the candidate’s total honors studies program. To be considered for such distinctions, students must earn a minimum cumulative 3.50 grade-point average in journalism. Journalism departmental honors students must satisfy the general Fulbright College honors requirements as stated elsewhere in this catalog. In addition, for journalism departmental honors, they must complete a minimum of 12 hours in honors credits, with thesis credit determined by departmental rules. These requirements are specified as follows:

- 1. enter the program no later than the first semester of their junior year, and register for thesis beginning with the first semester of the junior year,
- 2. complete at least one journalism honors colloquium,
- 3. complete the journalism honors core research course JOUR 5043,
- 4. complete an approved honors colloquium in a second discipline,
- 5. complete and orally defend an honors thesis based on honors courses of study, and
- 6. earn a cumulative 3.50 grade-point average in journalism courses.

Four-Year Honors students who would like to major in journalism must meet all requirements for Journalism Department Honors. More specific information on the Journalism Departmental Honors program, including the requirements for Four-Year Honors students, is available from the Journalism Department Honors advisor.

**Combined Majors**

**Combined Major in Journalism and Political Science:** The combined major in journalism and political science has been developed for students who wish to combine their strong interests in both journalism and political science. There are two journalism options available: Public Affairs Reporting and Political Advertising and Promotion. The journalism requirement may be satisfied by 24 semester hours of courses, including JOUR 1023, JOUR 1033, and JOUR 3633. The remaining hours are filled from the following options.

Those wishing to emphasize Public Affairs Reporting can choose from either print or broadcast news:

- **Print News:** JOUR 2013, JOUR 3013, JOUR 3023, JOUR 4043, and one additional journalism course.
- **Broadcast News:** JOUR 2033, JOUR 3073, JOUR 4043, JOUR 4863, and JOUR 4873.

Those wishing to emphasize Political Advertising and Promotion take the following courses: JOUR 3723, JOUR 3743, JOUR 4043, and 6 hours of advanced journalism courses. Students should check course prerequisites.

The political science requirement may be satisfied by 24 semester hours of courses, including PLSC 2003, PLSC 2013, PLSC 4373, and 15 additional hours of advanced political science courses elected from one or the other of two field concentrations. Those wishing to emphasize American political affairs may elect the additional hours from the following:

- **Print:** JOUR 2013, JOUR 3013, JOUR 3023, JOUR 4043, and one additional journalism course.
- **Broadcast:** JOUR 2033, JOUR 3073, JOUR 4043, JOUR 4863, and JOUR 4873.

Alternatively, a foreign affairs concentration may be pursued by electing the advanced hours from the following courses:

- **Print:** JOUR 2013, JOUR 3013, JOUR 3023, JOUR 4043, and one additional journalism course.
- **Broadcast:** JOUR 2033, JOUR 3073, JOUR 4043, JOUR 4863, and JOUR 4873.

**Combined Major in Journalism and English:** The combined major in journalism and English is recommended for those students who have a strong interest in these two related fields. The journalism requirement for the combined major is 24 semester hours including JOUR 1023, JOUR 1033, and JOUR 3633. The remaining 15 hours are filled from one of the two following options:

- **Print:** JOUR 2013, JOUR 3013, JOUR 3023, JOUR 3123, and one additional journalism course.
- **Broadcast:** JOUR 2033, JOUR 3073, JOUR 4043, JOUR 4863, and JOUR 4873.
Broadcast: JOUR 2023/2031L, JOUR 3072/3071L, JOUR 4863, JOUR 4873, and one additional journalism course

For English course requirements for the combined major see notes under department of English.

**Journalism (B.A.) Teacher Licensure Requirements:**

Students interested in obtaining teacher licensure may not obtain licensure in journalism alone. Licensure in another discipline must be obtained, and journalism may be added as an additional area of licensure. Please refer to the Secondary Education Requirements for Fulbright College Students on page 99 or contact your departmental adviser or an adviser in the College of Education and Health Professions.

**Journalism for Agricultural Majors:** A list of 18 hours of journalism courses is available for students in the College of Agricultural, Food and Life Sciences. See the Bumpers College section of this catalog for these journalism courses. This program is recommended for students who plan to work in public relations in these areas. It is also recommended for students who expect to enter extension work in agriculture and home economics and who will use the mass media to promote their programs.

SEE PAGE 297 FOR JOURNALISM (JOUR) COURSES

---

**LATIN AMERICAN STUDIES (LAST)**

Steven M. Bell  
Chair of Studies  
605 Kimpel Hall  
479-575-2951  
Web site: http://www.uark.edu/depts/lastinfo/

- Professors Britton (economics), Graff, Hehr (geography), Purvis (journalism and political science)
- Associate Professors Bell, Restrepo (foreign languages), Montgomery (journalism), Ryan (political science), Striffler (anthropology)
- Assistant Professors Ruiz, Villalobos (foreign languages), Erickson (anthropology), Kali, Méndez, Reyes (economics)

Students interested in Latin America and wishing to maximize their potential for academic, business, professional, or government careers related to the area, may earn a combined major or a minor in Latin American studies together with a major in another discipline in Fulbright College. Advice on appropriate combinations of Latin American studies with other majors as well as individual approval for such combinations may be obtained from the LAST program director. New students in this program must officially declare the combined major and notify the LAST program director. Degree checks must also be cleared with the program director. Freshmen and sophomores considering this program are advised to begin their study of Spanish or Portuguese as early as possible.

**Requirements for a Minor in Latin American Studies:**

Students wishing to minor in Latin American studies must fulfill the Colloquium (LAST 4003) and the language requirements described below, and must complete at least 12 hours from among the electives listed below. Included in the 12 hours may be 3 additional hours of LAST 4003, provided the topic is different. A maximum of 6 hours of electives may be submitted from any one department.

**Requirements for a Major in Latin American Studies:**

- **Language Competence:** The student must complete SPAN 2013 (or equivalent) or PORT 2013 (or equivalent). Provisions are available for recognition of language skills gained by other means than formal course work taken at the University of Arkansas: See information under the entry in the department of foreign languages. Further functional work in Spanish or Portuguese as well as study and residence in a Latin American nation can serve to strengthen language competence and are encouraged.

  **Colloquium:** The student must complete at least three hours in the interdepartmental colloquium, LAST 4003. The Colloquium may be repeated, with the adviser’s approval, provided the topic is different.

  **Electives:** The student must complete 18 hours, in addition to the LAST Colloquium, in courses with specific Latin American content, or individualized study options under instructors teaching Latin American studies. Students choosing to take individualized readings or directed research courses must obtain the approval of the director of the area studies program. In the selection of the electives, the following conditions apply:

  1. Courses must be selected from at least three different departments,
  2. A maximum of nine hours may be submitted from courses taken in any one department.

The following courses and individualized study options may be taken in fulfillment of elective requirements (for detailed descriptions please see the listings under the individual departmental headings):

**Anthropology**

- ANTH 3503 Power and Popular Protest in Latin America
- ANTH 3513 Latinos in the US
- ANTH 3523 Gender and Politics in Latin America
- ANTH 4173 The Latin American City
- ANTH 448V Individual Studies in Anthropology

**Economics**

- ECON 3843 Economic Development & Multilateral Finance
- GEOG 2103 Emerging Nations
- GEOG 410V Special Problems in Geography
- GEOG 4173 The Latin American City

**History**

- HIST 3203 Colonial Latin America
- HIST 3213 Modern Latin America
- HIST 4173 The Latin American City
- HIST 4743 History of Brazil

**Latin American Studies**

- LAST 2013 Intro. to Latin-American Studies
- LAST 3013 Modern Latin American Lit in Translation
- LAST 4003 Latin-American Studies Colloquium
- LAST 4173 The Latin American City

**Political Science**

- PLSC 3573 Governments and Politics of Latin America
- PLSC 394V Readings in Political Science
- PLSC 4873 Inter-American Politics
- PLSC 5573 Political Change/Latin America

**Spanish**

- SPAN 3103 Cultural Readings
- SPAN 3113 Intro. to Literature
- SPAN 4133 Survey of Spanish-American Literature
- SPAN 4223 Latin-American Civilization
- SPAN 4233 Modern Mexico: Culture and Society
- SPAN 4243 Literatures and Culture in the Hispanic United States
- SPAN 4253 Latin-American Cinema and Society
- SPAN 475V Special Investigations
- SPAN 5253 Colonial Literature and Culture
- SPAN 5393 19th Century Spanish-American Literature
- SPAN 5463 20th Century Spanish-American Literature
- SPAN 5533 Mexican Literature

**Requirements for Honors in LAST:** The Honors Program in Latin American studies gives junior and senior students of high ability the opportunity to enroll in enriched courses and conduct independent research culminating in an honors thesis. In addition to satisfying
the general Fulbright College requirements for graduation and the basic eligibility requirements for honors as established by the Honors Council, candidates for honors in Latin American studies must complete 12 hours of honors credit in partial satisfaction of requirements for the co-major. One to six of these may be thesis hours (LAST 399VH). The preferred method for satisfying the remaining hours is to enroll in the colloquium at least once for honors credit (LAST 4003H) and to take relevant honors colloquia or graduate courses (with permission) in one of the departments contributing to this interdisciplinary area study. The thesis committee shall include a representative from the major discipline (in the case of multiple majors, from the discipline contributing most significantly to the topic). Successful completion of these requirements will be recognized by the award of the distinction “Latin American Studies Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in exceptional cases and are based upon the whole of the candidate’s program of honors studies.

SEE PAGE 301 FOR LATIN AMERICAN STUDIES (LAST) COURSES

MATH 2103, MATH 2564, MATH 3113, MATH 3404, and MATH 4513.

Requirements for a Major in Mathematics, B.A. Degree:
MATH 2103, MATH 2574, MATH 4932 and 18 semester hours of courses in mathematics numbered above 3000, including MATH 3083 and MATH 3113. (See writing requirement below.)

Requirements for a Major in Mathematics, B.S. Degree: As a part of the requirements for a B.S. degree with a major in mathematics, the student must complete MATH 2103, MATH 2574, MATH 3083, MATH 3113, MATH 3404, MATH 4513, MATH 4932, and CSCE 1023/1021L or CENG 1113/1111L. In addition, for the B.S. degree in mathematics, the student is required to complete one of the following three options:

1. A program for the student who wishes to prepare for either industrial work in mathematics or graduate work in some field other than mathematics or statistics,
2. A program for the student who is seeking a broad background in mathematics or who wishes to study mathematics at the graduate level,
3. A program for the student who wishes to emphasize statistics or who intends to study statistics at the graduate level.

The courses required for option (1) are MATH 3423, either MATH 3453 and MATH 4363 or STAT 3013 and STAT 4003, plus three semester hours of electives from mathematics courses numbered above 3000. Strongly recommended electives in this program are MATH 4523 and MATH 3443.

The courses required for option (2) are MATH 4523, MATH 3443, MATH 4113 and three hours of electives from mathematics courses numbered above 3000.

The courses required for option (3) are MATH 3353, STAT 3013, STAT 4003, STAT 4001L, STAT 4033, STAT 4043. Strongly recommended electives in this program are STAT 5103 and STAT 5113.

All of the electives used in fulfilling the requirements for either of the baccalaureate programs in mathematics must be approved by the student’s adviser.

The science requirement for the Bachelor of Science degree in mathematics consists of two of the five course sequences as listed:

1. BIOL 1543/1541L and one of BIOI 2533, BIOL 1613/1611L, BIOL 1603/1601L or BIOL 2013/2011L
2. CENG 1123/1121L and CSCE 2143
3. CHEM 1103/1101L, CHEM 1123/1121L
4. GEOL 1113/1111L, GEOL 1133/1131L
5. PHYS 2054, PHYS 2074 (College Physics will not substitute)

In addition, one advanced course must be chosen from one of the two chosen areas. Courses taken to satisfy this requirement must be approved by the department of mathematical sciences.

A 2.00 cumulative grade-point average on all work completed in the department of mathematical sciences will be required for graduation with a B.A. or B.S. degree.

Writing Requirement for both B.A. and B.S. Degrees: The writing requirement for mathematics majors will be satisfied by writing a paper based on the student’s research of a mathematical topic under the direction of a faculty member. Typically, one hour of credit in MATH 400V will be awarded for successfully completing the paper. An honors paper or senior thesis will satisfy this requirement. The student should consult his or her adviser for details.

Requirements for Departmental Honors in Mathematics: The Departmental Honors Program in Mathematics is designed for the superior student and is intended to help the student develop a more comprehensive view of the nature of mathematics. The program provides a vehicle for the recognition of the achievements of work beyond the usual course of study and earns the student the distinction “Mathematics Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Graduation with honors: The candidate must satisfy the requirements set forth by the Honors Council. The candidate must also obtain at least a 3.50 grade-point average in mathematics courses numbered MATH 2554, MATH 2564, MATH 2574, MATH 3083, MATH 3113, MATH 3404, and MATH 4513, as well as in the additional mathematics courses necessary to complete the requirements for the chosen option. In addition, a grade of “D” or “F” in any other course offered by the department disqualifies a student for honors.

Candidates must take one year of honors mathematics in their senior year. This course will require an acceptable paper and will carry two hours of credit per semester. The quality of this paper, along with the execution of the rest of the student’s honors program including the overall academic performance, will be used in determining the distinction between Honors and High Honors.

Requirements for a Minor in Mathematics: MATH 2103, 2564, and 9 hours (3 courses) selected from MATH 2574, MATH 3083, MATH 3103, MATH 3113, MATH 3404, and MATH 4513.

Requirements for a Minor in Statistics: MATH 2554 and 12 hours of non-cross-listed courses in the statistics section of this catalog, including 9 hours in courses numbered 3000 and above. A student must notify the department of his or her intent to minor.

Students in Fulbright College of Arts and Sciences who, in the opinion of the department of mathematical sciences, need additional work in the fundamentals are required to take MATH 0003. Using the student’s record and their ACT or Mathematics Placement Test scores, a student’s adviser will suggest enrollment in appropriate courses.

Mathematics (B.A. or B.S.) Teacher Licensure Requirements:
Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach mathematics in middle school should consult with a middle level adviser in the College of Education and Health Professions.

SEE PAGE 306 FOR MATHEMATICS (MATH) COURSES

**Statistics (STAT)**

Laure Meaux  
Chair of Studies  
301 Science and Engineering  
479-575-3351

- Associate Professors Meaux  
- Assistant Professors Petris, De Oliveira

**Requirements for a Minor in Statistics**: MATH 2554 and 12 hours of non-cross-listed courses, including 9 hours in courses numbered 3000 and above. A student must notify the department of mathematical sciences of his or her intent to minor.

SEE PAGE 331 FOR STATISTICS (STAT) COURSES

**MEDICAL SCIENCES AND DENTISTRY**

See page 109, under Combined Academic and Medical or Dental Degree and also the discussion of the pre-medical programs and the pre-dental program under the section on Health Related Professions.

**MEDIEVAL AND RENAISSANCE STUDIES (MRST)**

William Quinn  
Chair of Studies  
333 Kimpel Hall  
479-575-4301  

- Professors Candido, Cornell (V.), Detels, Goodstein, Gross, Levine, Quinn, Spellman, Tsai, Waligorski
- Associate Professors Coon, Finlay, Fredrick, Horton, Jacobs, Stephens, Tucker
- Assistant Professors Cornell (R.), Sexton

The Medieval and Renaissance studies minor is administered by the Humanities program. This minor encourages undergraduate students to pursue an interdisciplinary study of all aspects of the Middle Ages and Renaissance as a complement to their major field of study.

**Requirements for a Minor in Medieval and Renaissance Studies (MRST)**: (15 credit hours) Students must take HIST 1113H or HIST 1113, Honors World Civilization I or non honors section, or HUMN 1124H/1120E (the Medieval segment of the Honors Humanities Project) and complete at least 12 additional credit hours selected from the courses listed below. A maximum of 6 hours may be presented from courses taken in the student’s designated major.

- Required Core Course (3 hours)  
  HUMN 1124H Honors Equilibrium of Cultures, 500-1600 CE and discussion section HUMN 1120E, or HIST 1113H Honors World Civilization I (may also be taken as non-honors, HIST 1113 World Civilization I)

- 12 hours of electives to be chosen from the following (a maximum of six hours may be presented from courses taken in the student’s major department):
  - ARHS 4843 Medieval Art
  - ARHS 4853 Italian Renaissance Art

**Middle East Studies (MEST)**

Vincent J. Cornell  
Director, King Fahd Center for Middle East and Islamic Studies  
202 Old Main  
479-575-4157

Web site: http://www.uark.edu/depts/mesp/index.htm  
E-mail: mest@uark.edu

- Professors Cornell (V.) (history), Farah (curriculum and instruction), Haydar (foreign languages), Paradise (geography), Rose (anthropology), Swedenburg (anthropology)
- Associate Professors Adler (philosophy, biblical Hebrew), Coon (history), Gordon (history), Kahf (comparative literature), Reid (political science), Tucker (history), Wolpert (music)
- Assistant Professors Casana, D’Alisera (anthropology), Ghadbian (political science)
- Research Associate Professor Cornell (R.) (foreign languages)
- Research Assistant Professor Halman (Middle East studies, religious studies)

Students interested in the Middle East and wishing to maximize their potential for academic, business, professional, or government careers related to the area, may earn a major in Middle East studies with a required second major in an approved area such as anthropology, economics, foreign languages, geography, history, journalism, and political science. New students entering the program are required to notify both the major adviser and the MEST director of their intention to participate. Freshmen and sophomores considering this program are advised to begin their study of a Middle East language as early as possible. Students may also earn a minor in Middle East studies.

**Requirements for a Major in MEST**: To attain a major in MEST, the student is required to have a second major in one of the following approved areas: anthropology, communication, economics (BA), French, geography, history, international relations, journalism, political science, sociology, or Spanish. Up to nine hours of courses in the second major with Middle East content may be counted toward the MEST major with the permission of the MEST director.
Total Hours Required: (30 semester hours) Students must complete 3 hours in Gateways to the Middle East (MEST 2013), 3 hours in the MEST Colloquium (MEST 4003), 6 hours of Arabic language beyond the Fulbright College language proficiency requirement (ARAB 2013), and 18 hours in additional MEST or MEST-approved core courses. MEST courses must be in at least two disciplines, with no fewer than 9 hours of MEST core courses in each discipline.

Gateways to the Middle East: (3 hours) Students must complete 3 hours of Gateways to the Middle East (MEST 2013).

Middle East Studies Colloquium: (3 hours) Students must complete at least 3 hours in the Middle East Studies Colloquium (MEST 4003). The Colloquium may be repeated with a change of subject for a maximum of 6 credits.

Arabic Requirement: (6 hours of MEST credit) Students must complete 6 hours of Arabic language beyond the Fulbright College language proficiency requirement (ARAB 2013). Courses approved by the MEST director and completed in a summer intensive Arabic program or study-abroad program in an Arabic speaking country may substitute for all or part of this requirement.

MEST Core Courses: To count for MEST credit, courses not on the following list must be approved by the student’s MEST major adviser and the MEST director. Individualized readings, directed research courses, or courses in a second Middle Eastern language such as biblical Hebrew or Aramaic may count as MEST core courses with the approval of the MEST major adviser and MEST director.

MEST Core Courses:
- ANTH 3123 Anthropology of Religion
- ANTH 3033 Egyptology
- ANTH 4123 Ancient Middle East
- ANTH 4253 Peoples and Cultures of World Religions
- ANTH 4256 Archeological Field Session
- ANTH 4533 Middle East Cultures
- ANTH 4803 Historical Archeology
- ANTH 4913 Topics in the Middle East
- ARAB 4213 Intro. to Arab Culture
- GEOG 2103 Emerging Nations
- GEOG 4033 Geography of the Middle East
- HIST 3033 Islamic Civilization
- HIST 3043 History of the Modern Middle East
- HIST 3473 Palestine and Israel in Modern Times
- HIST 3923H Honors Colloquium (approved selected topics)
- HIST 4353 Middle East 600-1500
- HIST 4373 Mongol and Mamluk 1250-1520
- HIST 4393 The Ottoman Empire and Iran 1300-1722
- HIST 4413 New Women in the Middle East
- HIST 4433 Social and Cultural History of the Modern Middle East
- HUMN 2213 Intro. to World Religions
- HUMN 425V Colloquium (approved selected topics)
- MEST 2003 Islam: History and Practice
- MEST 2013 Gateways to the Middle East
- MEST 4003 Middle East Studies Colloquium
- MEST 4003H Honors Middle East Studies Colloquium
- PLSC 3523 Politics of the Middle East
- PLSC 4583 Political Economy of the Middle East
- PLSC 4593 Islam and Politics
- PLSC 4843 The Middle East in World Affairs
- WLIT 3903/603 Special Studies: (approved selected topics)

Requirements for a Minor in Middle East Studies:
- Total Hours Required: (18 semester hours)
- Students must complete MEST 2013 Gateways to the Middle East (3 hours), MEST 4003 MEST Colloquium, 6 hours of Arabic beyond the Fulbright College language proficiency requirement (ARAB 2013), and a minimum of 6 additional hours of MEST core courses.

Arabic Requirement: (6 hours of MEST credit) Students must complete 6 hours of Arabic language beyond the Fulbright College language proficiency requirement (ARAB 2013). Courses approved by the MEST director and completed in a summer intensive Arabic program or study-abroad program in an Arabic speaking country may substitute for all or part of this requirement.

MEST Core Courses: (6 hours) Students must complete an additional 6 hours of MEST core courses supervised by faculty participating in the program. Students choosing to take individualized reading or directed research courses as a part of the minor must obtain the approval of the MEST director and their major adviser.

MUSIC (MUSC)

Stephen Gates
Chair of the Department
201 Music Building
479-575-4701
Web site: http://www.uark.edu/depts/uamusic/
E-mail: music@uark.edu

- Professors Cencel, Detels, Gates, Greeson, Mains, Mueller, Ragsdale, Sloan, Thompson, Wolpert
- Research Professor Markham
- Professors Emeriti Ballenger, Bright, Brothers, Cowell, Groh, Jackson, Janzen, Umiker, Widder, Worthley
- Associate Professors Jones, Margulis, Misenhelter, Ramey, Warren, Yoes
- Associate Professors Emeriti Colber, Johnson, Nastasi
- Assistant Professors Chollitchantha, Hickson, Rulli
- Visiting Associate Professor Goza
- Visiting Assistant Professors Delaplaine, Gunter, Jekova-Goza, Lacy, Langager, Morris, Pierce, Pratchard

The music department strives to enrich and inspire the human mind and spirit through the pursuit of excellence in creative activity, research, teaching, and service. The Department of Music is an accredited institutional member of the National Association of Schools of Music. The requirements for entrance and for graduation as set forth in this catalog are in accordance with the published regulations of that Association.

Degrees in Music

Two baccalaureate degrees in music are available: the Bachelor of Music (see page 108 for general education requirements, see below for more detailed specific requirements), and the Bachelor of Arts with a Major in Music (see page 106 of this catalog for general education requirements, see below for more detailed specific requirements). To achieve junior standing in the curriculum leading to the Bachelor of Arts degree with a major in music and the Bachelor of Music degree, the student must have completed 56 hours and must have maintained a cumulative grade average of “C” in all music courses, with the exception of ensemble, by the end of the fourth semester. The student must also have earned a grade average of not less than “B” in the major applied field of study during the sophomore year. This standing is prerequisite to all 3000-level courses and above in music.

All music majors are required to enroll in an ensemble in each semester of residence appropriate to their major area and with consent of their adviser.

Piano Proficiency Requirement: Students pursuing a Bachelor of Music degree must pass a piano proficiency examination upon enter-
ing the University of Arkansas or must register in piano class until this requirement is met.

On the basis of prior study in music, a student may be advised to omit one or more of the semesters of Aural Perception (MUTH 1621, MUTH 1631, MUTH 2621, MUTH 2631). Students will receive college credit for the omitted aural perception courses when they have validated their higher placement by passing the course in which they are placed with a grade of “B” or better.

**Writing Requirement:** Students can meet the Fulbright College writing requirement by submission of a satisfactory term paper for MUHS 4253.

**Requirements for a Major in Music leading to a Bachelor of Music Degree:** MUTH 1603, MUTH 1621, MUTH 1631, MUTH 2603, MUTH 2621, MUTH 2631, MUTH 3603 (except for music education majors), MUTH 3613, MUTH 4703 (except for music education majors), MUHS 3703, MUHS 3713, MUHS 4253 (except for music education majors), MUDP 3801, MUAC 2111, MUAC 2121 plus the following specific requirements by major area of emphasis.

**Piano Performance Major:** Applied Piano 28 hours, of which 16 must be at the upper level (including MUAP 3201, 4201); Secondary MUAP or MUAC (2); MUHS 4803, MUHS 4813; MUTH 4322; MUAP 3811 or MUDP 3861; MUDP 4863; MUEN 3411 (2), MUEN 3451 (6), electives (may be non-music): 4.

**Voice Performance Major:** Applied Voice 24 hours, of which 12 must be at the upper level (including MUAP 3201, MUAP 4201); Secondary MUAP or MUAC (4); MUAP 110V, MUAP 310V, MUAP 3201; MUEN 3431, MUEN 3501 (4); electives (may be non-music): 10.

**String Performance Major:** Applied 28 hours, of which 16 must be at the upper level (including MUAP 3201, MUAP 4201); Secondary MUAP or MUAC (4); MUHS 4703, MUEN 3431 (8), MUEN 3501 (4); electives (may be non-music): 10.

**Woodwind, Brass, or Percussion Performance Major:** Applied 24 hours, of which 12 must be at the upper level (including MUAP 3201, MUAP 4201); Secondary MUAP or MUAC (4); MUTH 4612, MUHS 4733. Large Ensembles (8); Small Ensembles (4); electives (may be non-music): 11.

**Guitar Performance Major:** Applied 28 hours, of which 16 must be at the upper level (including MUAP 3201, MUAP 4201); Secondary MUAP or MUAC (4); MUHS 4703, MUTH 4612; electives (may be non-music): 11.

**Theory or Composition Major:** MUAP 110V/310V (major-level applied 16 hours), MUAC 1221, MUAC 1231, MUAC 2221, MUAC 2231 (unless waived), MUDP 3811 or MUDP 3861, MUTH 4612, Composition: MUTH 164V, MUTH 364V (14), MUTH 4633, MUAP 4201; electives (may be non-music): 7. Theory: MUTH 164V, MUTH 364V (6), MUTH 4633, MUTH 498V (3); electives (may be non-music): 13; demonstration of piano skills appropriate for a composer or theorist.

**Music Education:** (all emphases; in addition to requirements for the Bachelor of Music degree listed above) MUTH 4612; 14 MUAP/ MUAC (applied, including recital — see below); MUAC 1221, MUAC 1231, MUAC 2221, MUAC 2231 (except for piano majors — see below); 8 MUEN (see below); MUED 2012, MUED 3021, MUED 3833; plus the following specific requirements by emphasis.

Students who wish to apply for admission to the internship program in music education must complete the following stages.

**Stage I: Complete an Evaluation for Internship**

Students must meet the following criteria to be cleared for the internship:

1. Declare the major in music education in the Fulbright Advising Center, 101 Old Main.
2. Successful completion of the PRAXIS I test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203.
3. Obtain a “C” or better in the following pre-education core courses: CIED 3023, CIED 3033, ETEC 2001, ETEC 2002L.
4. Obtain a “C” or better in MUED 3021, MUED 3021, and MUED 3833.
5. Satisfactory completion of the Evaluation for Internship form.

The evaluation form must be completed by October 1 prior to doing a fall internship or March 1 prior to doing a spring internship. The completed form must be returned to the Coordinator of Teacher Education, 8 Peabody Hall, no later than the stated deadline.

6. Complete the B.M. degree with a cumulative GPA of 2.50 or higher. The degree must be posted to your University of Arkansas transcript at the Registrar’s Office prior to internship.
7. Obtain departmental clearance for internship based on successful completion of portfolios, evaluation for internship, GPA requirements, course work requirements, selected written recommendations, an interview, and/or other requirements specified by your program.

All requirements in Stage I must be met to be cleared for the internship. Please contact the Coordinator of Teacher Education, 8 Peabody Hall, College of Education and Health Professions for more information.

**Stage II: Internship**

1. Complete the one-semester internship at an approved site in Washington or Benton counties.
2. Complete PRAXIS II requirements. See your adviser for completion dates.

**Note:** Students should always consult the Coordinator of Teacher Education for any licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. An application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

**Music Education, Wind/Percussion:** 14 MUAP to consist of 8 MUAP 110V, 5 MUAP 310V, MUAP 3201; 8 MUEN to consist of 2 MUEN 3441; 6 selected from MUEN 3431, MUEN 3441, MUEN 3461, MUEN 3481, MUEN 3511; 9 additional MUAP to consist of MUAP 1331, MUAP 1341, MUAP 1351, MUAP 1361, MUAP 1371, MUAP 2141, MUAP 1381, and either MUAC 1301 or MUAC 1311, MUAP 3811, MUED 4295; electives (may include MUTH 1003 and any MUEN): 6.

**Music Education, Strings:** 14 MUAP to consist of 8 MUAP 110V, 5 MUAP 310V, MUAP 3201; 8 MUEN to consist of 2 MUEN 3441; 6 selected from MUEN 3431, MUEN 3441, MUEN 3461, MUEN 3481, MUEN 3511; 9 additional MUAP to consist of MUAP 1331, MUAP 1341, MUAP 1351, MUAP 1361, MUAP 1371, MUAP 2141, MUAP 1381, MUAP 1391, MUAP 3811, MUED 4295; electives (may include MUTH 1003 and any MUEN): 6.

**Music Education, Choral/Voice:** 11 MUAP to consist of 5 MUAP 110V, 5 MUAP 310V, MUAP 3201, 8 MUEN to consist of 2 MUEN 3441; 6 selected from MUEN 3431, MUEN 3441, MUEN 3461, MUEN 3481, MUEN 3511; 9 additional MUAP to consist of MUAP 1331, MUAP 1341, MUAP 1351, MUAP 1361, MUAP 1371 and MUAP 1381, MUAP 3811, MUED 4295; electives (may include MUTH 1003 and any MUEN): 6.

**University of Arkansas, Fayetteville**

J. William Fulbright College of Arts and Sciences
Although the designation on the diploma will read “in music,” he or she may be granted honors in more than one area, wishes to combine work in more than one field and if the committee approves, he or she may be granted honors. If a student wishes to combine work in music history, theory, or composition, etc. major area that is, a student majoring in voice performance may elect to do honors work in music history, literature, theory, composition, or music education. Honors work may be done in an area other than the student’s particular interests. The student must notify the Department of Music of his/her intent to minor. For requirements for advanced degrees in music, see the Graduate School Catalog.

SEE PAGES 311-314 FOR MUSIC (MLIT THROUGH MUTH) COURSES

PHILOSOPHY (PHIL)

Thomas D. Senor
Chair of the Department
318 Old Main
479-575-3551
Web site: http://www.uark.edu/depts/philinfo/
E-mail: phildept@uark.edu

• Professor Spellman
• Professor Emeritus Nissen
• Associate Professors Adler, Lee, Minar, Senor
• Associate Professor Emeritus Edwards
• Assistant Professors Funkhouser, Lyons, Ward

Requirements for a Major in Philosophy: 30 semester hours in philosophy to include PHIL 2203 or PHIL 4253, and PHIL 4033, 4043, and six hours to be chosen from PHIL 4013, PHIL 4023, PHIL 4043, PHIL 4063, PHIL 4073, and PHIL 4083.

Writing Requirement: The writing requirement can be satisfied either by completion of an acceptable thesis or by approval of a research/analytical paper from any 4000-level course in philosophy submitted by the student to the Philosophy Department’s Undergraduate Committee.

Requirements for Departmental Honors in Philosophy: The purpose of the honors program is to provide the honors candidate with the opportunity of achieving greater maturity in dealing with philosophical ideas through independent study. The candidate’s plan...
of study will include the reading of significant philosophical works. Normally a candidate will complete a total of three to six hours of independent readings in philosophy during his or her junior and senior years. In addition, it is recommended that the candidate register for honors courses and colloquia. One colloquium is required.

The candidate will be expected to take 12 hours (which may include 6 hours of thesis) in Honors Studies and to write an essay during his or her senior year and give a satisfactory account of the honors readings and senior essay in an oral examination. Successful completion of the requirements will be recognized by the award of the distinction “Philosophy Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Requirements for a Combined Major in Philosophy and African-American Studies: 36 semester hours, consisting of 18 hours in philosophy and 18 hours in African-American studies. The philosophy requirement is: 18 semester hours in philosophy to include either 12 hours over 3000 and PHIL 2203 or PHIL 4253, or 15 hours over 3000. The hours over the 3000-level must include at least three hours of value theory to be chosen from PHIL 4113, PHIL 4123, PHIL 4133, or PHIL 4143, and at least six hours in the history of philosophy (PHIL 4003, PHIL 4013, PHIL 4023, PHIL 4033, PHIL 4043, PHIL 4063, PHIL 4073, PHIL 4083) including PHIL 4003 or PHIL 4033. See African-American studies on page 111.

Requirements for a Minor in Philosophy: 18 semester hours in philosophy to include PHIL 2203 or PHIL 4253, and either PHIL 4003 or PHIL 4033. A student may earn either a minor or a combined major in philosophy but not both. A student must notify the department of his or her intent to minor.

For requirements for advanced degrees in philosophy, see the Graduate School Catalog.

SEE PAGE 318 FOR PHILOSOPHY (PHIL) COURSES

PHYSICS (PHYS)
William F. Oliver, III
Chair of the Department
226 Physics Building
479-575-2506
Web site: http://www.uark.edu/depts/physics/
E-mail: physics@cavern.uark.edu

• University Professor Salamo
• Distinguished Professor Xiao
• Professors Gea-Banacloche, Gupta, Harter, Lacy, Lieber, Pederson, Singh, Vyas
• Research Professor Vickers
• Professor Emeritus Hobson
• Associate Professors Bellaiche, Oliver, Stewart, Thibado
• Assistant Professors Fu, Li

Requirement for B.S. Degree with a Major in Physics: The student must present a minimum of 40 semester hours in physics including PHYS 2054/2050L, PHYS 2074/2070L, PHYS 2094/2090L, PHYS 3414, PHYS 3614, PHYS 4073, PHYS 4991 and courses in one of five concentrations:
  Professional: PHYS 3113, PHYS 4333, and 10 semester hours numbered 3000 and above in physics or astronomy.
  Optics: PHYS 3544, any 2 courses selected from PHYS 4734, PHYS 4754, PHYS 4774, and PHYS 4794, and 4 semester hours numbered 3000 and above in physics or astronomy.
  Electronics: PHYS 220V (up to 2 hours), PHYS 320V (2 or more hours), PHYS 4333, and 6 semester hours numbered 3000 and above in physics or astronomy.

Computer: PHYS 3113 and 13 semester hours including courses numbered 3000 and above in physics or astronomy with up to 9 hours of advanced computer science or mathematics chosen with the adviser’s permission.

Biophysics: PHYS 3113 and 13 semester hours including courses numbered 3000 and above in physics, astronomy, biology, and chemistry chosen with the adviser’s permission.

For all five of the possible concentrations the following mathematics courses are required: MATH 2554, MATH 2564, MATH 2574, MATH 3404, and MATH 3423. CSC 4513, CENG 4423, or MEEG 2703 can be substituted for MATH 3423 with the adviser’s approval. In addition, CHEM 1103/1101L and CHEM 1123/1121L, or an approved 8 hours of laboratory-based courses in CSC 1113/1111L and CSC 1123/1121L or CENG (CENG 1113/1111L and CENG 1123/1121L), or an approved 9 hours of courses in CSC (CSC 1113, CSC 1123, CSC 2143, CSC 3313) or CENG (CENG 1113, CENG 1123, CENG 2143, CENG 3313) are required.

Majors must propose participation in a research experience project no later than the end of their junior year of study. A written report of the results must be submitted during Senior Seminar (PHYS 4991).

Requirements for a B.A. Degree with a Major in Physics: This track is for students desiring a broader program in the arts, sciences, and social sciences while majoring in physics. This program is recommended for pre-medical, journalism, pre-business, pre-law, and other students planning careers in fields for which a physics education would be beneficial. For B.A. students seeking teacher licensure, see the Teacher Licensure Requirements below. This program requires a total of 124 semester hours. The student must present 24 semester hours in physics or astronomy, including PHYS 2013/2011L, PHYS 2033/2031L, PHYS 3603/3601L, PHYS 4991, and 11 semester hours chosen from PHYS 220V and/or any physics or astronomy courses at the 3000 level or above. The student must also present MATH 1285 (or MATH 1203 and MATH 1213) and MATH 2554 (or MATH 2043) as well as two additional courses at the 2000 level or above in mathematics or statistics. An additional 9 semester hours at the 3000 level or above must be taken from a single special emphasis area chosen with the adviser’s approval. The special emphasis area may be chosen in any single degree-granting department at the University of Arkansas. For B.A. students seeking teacher licensure, the special emphasis area may involve courses from more than one degree-granting department at the University of Arkansas with the approval of their adviser.

Writing Requirement: Students majoring in physics may satisfy the Fulbright College writing requirement by means of a senior thesis (PHYS 498V), an honors thesis submitted in fulfillment of the requirements of the honors program (PHYS 399VH), or by means of a paper submitted as part of PHYS 4991 or any physics or astronomy course numbered 3000 or above. Students electing the last route must obtain approval of the instructor during the first three weeks of the semester. The research/analytical paper should demonstrate competency in the use of word processing software and also at least one computer analytical tool such as a spreadsheet, mathematical or graphics program, or an original program written by the student.

Assessment of Student Learning: In accordance with state, University, and college requirements, all students must have learning assessed before graduation. Students majoring in physics will be assessed in the course PHYS 4991, which must be taken in the year prior to graduation.

Requirements for Departmental Honors in Physics: The Departmental Honors Program in Physics provides upper-division undergraduate students with an opportunity to formally participate in scholarly physics activities. Honors candidates carry out independent study and research under the guidance of the physics faculty
and participate in special honors classes, seminars, and colloquia. Outstanding student achievement will be recognized by awarding the distinction “Physics Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies. To be considered as a candidate for higher distinctions, however, a student must achieve at least a 3.50 cumulative grade-point average in physics and mathematics. In addition to satisfying the general college requirements for the bachelor’s degree with honors, an honors candidate in physics must
1. become a candidate no later than the first semester of the junior year of study,
2. enroll in honors sections of physics courses when available,
3. enroll in six hours of honors research PHYS 399VH,
4. enroll in at least one physics honors colloquium PHYS 3923H,
5. complete and orally defend an honors thesis based upon the project carried out in PHYS 399VH, and
6. achieve a cumulative grade-point average of 3.125 in physics.

Requirements for a Minor in Physics: Students wishing to obtain a minor in physics must take either PHYS 2013/2011L, PHYS 2033/2031L or PHYS 2054/2050L, PHYS 2074/2070L, plus at least seven additional hours of physics courses numbered 3000 or above. A student must notify the department of his or her intent to minor.

Physics (B.A. or B.S.) Physical/Earth Science Teacher Licensure Requirements:
Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach science in middle school should consult with a middle level adviser in the College of Education and Health Professions.

For information on advanced degrees in physics, see the Graduate School Catalog.

479-575-2506

• Professors Lacy, Lieber
• Associate Professor Oliver

SEE PAGE 250 FOR ASTRONOMY (ASTR) COURSES

POLITICAL SCIENCE (PLSC)
Todd G. Shields
Chair of the Department
428 Old Main
479-575-3356
Web site: http://www.uark.edu/depts/plscinfo/

• Professors Kelley, Miller, Reid, Shields, Waligorski
• Professors Emeriti Neuse, Savage, Vanneman
• Associate Professors Conge, Ghadbian, Kerr, Parry, Ryan, Schreckhise
• Associate Professor Emeritus Tweraser
• Assistant Professors Dowdle, Hansen, Zeng
• Assistant Professor Emeritus Elston

Requirements for B.A. Degree with a Major in Political Science:
30 semester hours at least 21 of which must be above 3000.
1. Students are required to take both PLSC 2003 American National Government and PLSC 2013 Intro to Comparative Politics.
2. Students must choose one of the following:
   PLSC 2813 Intro. to International Relations
   PLSC 3103 Intro. to Public Administration
   PLSC 3963 Modern European Political Thought.
3. Students fulfill the remaining requirements from among any of the available political science courses. The only stipulation is that at least 21 hours must be in the 3000-4000 level.

American Politics
PLSC 2003, PLSC 3203, PLSC 3223, PLSC 3243, PLSC 3253,
PLSC 4203, PLSC 4213, PLSC 4223, PLSC 4243, PLSC 4253,
PLSC 4263, PLSC 4273, PLSC 4283, PLSC 4373

Comparative Politics
PLSC 3503, PLSC 3523, PLSC 3553, PLSC 3573, PLSC 4503,
PLSC 4513, PLSC 4543, PLSC 4563, PLSC 4573, PLSC 4583,
PLSC 4593

International Politics
PLSC 3803, PLSC 3813, PLSC 3823, PLSC 3853, PLSC 4803,
PLSC 4843, PLSC 4873

Political Theory
PLSC 3603, PLSC 3913, PLSC 3933, PLSC 3953, PLSC 3963,
PLSC 3973, PLSC 3983, PLSC 4503, PLSC 4903, PLSC 4923

Public Administration
PLSC 3103, PLSC 3113, PLSC 3153, PLSC 4193

Writing Requirement: The college writing requirement is fulfilled by submitting an acceptable research/analytical paper to the department for approval at least four weeks prior to graduation. The paper may be derived from completion of an honors essay (PLSC 499VH), a senior thesis (PLSC 498V), or some other advanced course in political science. The student is urged to consult with his or her faculty adviser no later than early in the first semester of the senior year.

Requirements for Departmental Honors in Political Science:
The Departmental Honors Program in Political Science offers junior and senior students the opportunity to enroll in enriched and advanced courses and to do independent research in their senior year. Honors candidates are eligible for honors colloquia, honors courses, some advanced seminars, and an independent studies project, usually in close collaboration with one or more members of the faculty.

In addition to satisfying the general college honors requirements for the bachelor’s degree, honors candidates in political science must successfully complete at least 12 hours of honors work. Six of the 12 hours will be senior essay credit (PLSC 499VH) and will be taken during the senior year. Successful completion and defense of senior essay or thesis is a major part of the Political Science Honors Program, and students should begin discussing it with the Honors Adviser during their junior year. The preferred methods for satisfying the remaining six hours is to enroll in an honors colloquium (3923H) in political science or another department, by enrolling in a graduate seminar in political science, or by enrolling in PLSC 399VH (honors course).

Under exceptional circumstances, students may satisfy honors requirements by enrolling in PLSC 394V, by enrolling in honors sections in other departments, or by enrolling in colloquia or graduate seminars in other departments, each of which requires approval by the department chairperson. Successful completion of the requirements will be recognized by the award of the distinction “Political Science Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies. For full details consult the chairperson of the political science department.
Political Science (B.A.) Social Studies Teaching Licensure Requirements:

Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach social studies in middle school should consult with a middle level adviser in the College of Education and Health Professions.

Combined Majors

Political Science and African-American Studies: For the requirements for a combined major in political science and African-American studies, see page 111.

Political Science and Journalism: The combined major in political science and journalism is recommended for those students who have a strong interest in the reporting of public affairs as a career. The political science requirement may be satisfied by 24 semester hours of courses including PLSC 2003, PLSC 2013, PLSC 4373, and 15 additional hours of advanced political science courses elected from one or the other of two field concentrations. Those wishing to emphasize American political affairs may elect the additional hours from the following:

- PLSC 3103
- PLSC 3203
- PLSC 3603
- PLSC 3933
- PLSC 399VH
- PLSC 4223
- PLSC 4273

Alternatively, a foreign affairs concentration may be pursued by electing the advanced hours from the following courses:

- PLSC 3503
- PLSC 3573
- PLSC 3823
- PLSC 3953
- PLSC 399VH
- PLSC 4543
- PLSC 4583
- PLSC 4823

For journalism requirements, see the combined major in Journalism and Political Science on page 130. Students should consult with their adviser in each department.

Political Science and Latin American Studies: For the requirements for a combined major in political science and Latin American studies, see page 131.

Requirements for a Minor in Political Science: 18 hours including PLSC 2003 or PLSC 2013. At least 9 of these hours must be in courses numbered 3000 or above, and courses must be chosen from at least two of the five political science fields. Students should consult with an adviser in the department for the selection of appropriate courses.

Minor in Legal Studies: This minor will introduce undergraduate students to the study and application of law by taking law-related courses in a number of disciplines. It provides a focus for students who are interested in the law, whose careers will require a measure of legal knowledge, or for those considering entering law school.

Requirements for a Minor in Legal Studies: 18 semester hours to include the following:

- PLSC 3243, and either PLSC 4253 or PLSC 4263
- PLSC 4193, PLSC 4283

For requirements for the M.A. degree in political science, the M.P.A. degree, or the combined J.D./M.P.A. degree, see the Graduate School Catalog.

SEE PAGE 321 FOR POLITICAL SCIENCE (PLSC) COURSES.

Public Administration

The degree in public administration is designed to prepare students for career positions with local, state, or federal government agencies, labor organizations, non-governmental organizations and other groups. These organizations are constantly in need of able people thoroughly trained in the principles of public administration and management, government budgeting, economic planning, and economic research.

The B.S.P.A. is a flexible liberal arts degree with some courses in business administration. This flexibility results from the opportunity to take junior-senior electives from business, economics, or political science. The B.S.P.A. adviser can assist in structuring a personalized degree plan to enhance a student's future academic or professional options.

Requirements for B.S. Degree with a Major in Public Administration: 30 semester hours, at least 21 of which must be above 3000. The student must complete the following 18 hours of core courses:

- S1A1 2303 or another data analysis course approved by the BSPA Advisor

- ECON 2013, PLSC 2003, PLSC 4103, PLSC 4193, PLSC 4283

An additional 12 hours of junior or senior electives in business administration or economics or political science (selected with the consent of the BSPA adviser) must be completed. (See also pre-business core requirements and selected WCOB minors in this catalog.) 18 hours of science and math are required to include at least 12 hours laboratory natural sciences and 6 hours of math (MATH 2053 or higher is recommended).

SEE PAGE 321 FOR POLITICAL SCIENCE (PLSC) COURSES.

PSYCHOLOGY (PSYC)

Requirements for B.A. Degree with a Major in Psychology:

Minimum of 30 semester hours to include PSYC 2003, PSYC 2013, PSYC 3073, minimum of one course chosen from PSYC 3083, PSYC 3183, PSYC 3283, PSYC 3383, PSYC 3483, PSYC 3583, PSYC 3683, PSYC 3783, six hours chosen from PSYC 3103, PSYC 4073, PSYC 4123, PSYC 4143, PSYC 4183, PSYC 4193, and six hours chosen from PSYC 3013, PSYC 3023, PSYC 3033
(or PSYC 3093), PSYC 4053, PSYC 4063, and remaining hours as free electives chosen from any psychology course in this catalog. A 2.00 cumulative grade-point average on all work completed in the Department of Psychology (including a grade of “C” or higher in PSYC 3083, PSYC 3183, PSYC 3283, PSYC 3383, PSYC 3483, PSYC 3583, PSYC 3683, or PSYC 3783) will be required for graduation with a B.A. degree.

Students who want to pursue graduate training in psychology are advised to begin preparations early in their undergraduate careers. Grade-point average, scores on the Graduate Record Examinations, effective communications skills, preparation in the natural sciences and mathematics, and research experience (e.g., honors project, independent readings) are the major criteria considered by admissions committees.

Students with applied, paraprofessional, or human-service interests who plan to enter the job market with a B.A. in psychology are strongly encouraged to take related courses in anthropology, sociology, social work, human development and family studies, and education. Students interested in business applications of psychology (e.g., marketing, management) are similarly encouraged to take related courses in the Sam M. Walton College of Business. Minors are also available in several areas of business. For more information concerning psychology as a major or careers in psychology and related fields, please contact the Psychology Advising Coordinator, Memorial Hall, room 203.

**Writing Requirement:** Students majoring in psychology will satisfy the Fulbright College writing requirement by successful completion of PSYC 3083, PSYC 3183, PSYC 3283, PSYC 3383, PSYC 3483, PSYC 3583, PSYC 3683, or PSYC 3783, each of which requires a final research paper.

**Requirements for Departmental Honors in Psychology:** The Departmental Honors Program in Psychology provides upper-division undergraduate students with an opportunity to formally participate in scholarly psychology activities. Honors candidates carry out independent study and research under the guidance of the psychology faculty and participate in special honors classes, seminars, and colloquia. Outstanding student achievement will be recognized by awarding the distinction “Psychology Scholar Cum Laude” at graduation. In addition to satisfying the general college honors requirements, honors candidates in psychology are required to complete and orally defend an honors thesis based upon the independent study carried out in PSYC 399VH. PSYC 399VH may be taken for 1 to 6 hours of credit each semester and repeated for a maximum of 12 hours. Nine hours are ordinarily needed to complete the research project and to prepare the honors thesis.

Honors candidates in psychology are encouraged to enroll in as many honors classes, seminars, and colloquia as possible. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

**Requirements for a Minor in Psychology:** Minimum of 18 hours including PSYC 3003, PSYC 3013, and PSYC 3073. A maximum of three hours of 306V can be counted toward meeting the minor requirement. A student must notify the department of his or her intent to minor in Psychology (B.A.)

**Teacher Licensure in Social Studies Requirements:**

Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach social studies in middle school should consult with a middle level adviser in the College of Education and Health Professions.

For requirements for advanced degrees in psychology, see the Graduate School Catalog.

RUSSIAN STUDIES (RSST)
Donald R. Kelley
Chair of Studies
722 W. Maple
479-575-2006

• Professors Kelley (political science), Gay (economics), Tucker (foreign languages)
• Assistant Professors Ferrier (economics), Starks (history)

The Russian studies program focuses on the pre-Revolutionary period prior to 1917, on the communist period from 1917 to 1991, and on the post-communist period from 1991 onward. The geographic focus includes Russia, the other successor states that have emerged from the breakup of the Soviet Union, and East Europe.

Students wishing to maximize their knowledge of Russia and the other successor states and wishing to prepare for graduate training and/or employment in the private sector or government in positions related to the area may earn a combined major in Russian studies together with their major in another discipline. Students are required to coordinate their academic programs both with their advisers in the major department and with the Chairman of the Russian studies program. New students entering the program are required to notify both the major adviser and the chairman of studies of their intention to participate. Freshmen and sophomores considering this program are advised to begin their study of Russian as early as possible.

Language Requirement: The student must complete the equivalent of a third year of Russian language training such as RUSS 3013 and RUSS 3023. Students are strongly encouraged to obtain at least a portion of this training in an intensive summer or semester program which provides concentrated instruction beyond the conventional class experience.

Russian Studies Colloquium: The student must complete at least three hours in the Russian Studies Colloquium (RSST 4003). The Colloquium may be repeated with a change of subject for a maximum of six credits, with the three additional credits counted as non-departmental electives within the program.

Electives: The student must complete at least 18 hours in addition to the language requirement and the Colloquium, in courses with specific content related to Russian studies, or in individualized courses under faculty participating in the program. Students choosing to take individualized reading or directed research courses as part of the RSST program must obtain the approval of the chairman of studies and their major adviser.

The following conditions apply to the selection of Russian studies electives:
1. courses must be selected from at least three separate departments;
2. a maximum of nine hours may be submitted from courses taken in any one department; and
3. a maximum of nine hours may be submitted from courses taken in the student’s major department.

The following courses may be taken in fulfillment of elective requirements:

Foreign Language
RUSS 4123 Survey of Russian Literature from its Beginnings to the 1917 Revolution

RUSS 4133 Survey of Russian Literature
RUSS 475V Special Investigations

History
HIST 4283 Russia to 1861
HIST 4293 Russia Since 1861

Political Science
PLSC 394V Readings in Political Science
PLSC 4513 Creating Democracies
PLSC 4543 Government & Politics of Eastern Europe
PLSC 4563 Government & Politics of Russia
PLSC 4813 Politics of the Cold War
PLSC 5563 Russian and Soviet Political System

SEE PAGE 327 FOR RUSSIAN STUDIES (RSST) COURSES

SOCIAL WORK (SCWK)
Joe Schriver
Director of the School of Social Work
Bev Steimla
Associate Director of the School of Social Work
Melody Greer
Undergraduate Coordinator

106 ASUP
479-575-5039
Web site: http://www.uark.edu/depts/scwk/

• Professors King, Schriver
• Associate Professor Emerita McGetrick
• Assistant Professors Christy-McMullin, DeCoster, Murphy, Reese
• Research Associate Professor Hurd
• Clinical Associate Professor Hall
• Clinical Assistant Professors Greer, House, Steimla

The social work program is fully accredited at the baccalaureate level by the Council on Social Work Education. The principal objective of the social work program is to prepare students for beginning generalist social work practice. Contact the undergraduate coordinator for admission and retention requirements.

Requirements for a Major in Social Work: 45 semester hours of social work courses including:
SCWK 2133 Intro. to Social Work
SCWK 4073 Social Work Research and Technology I
SCWK 4093 Human Behavior and the Social Environment I
SCWK 4103 Human Behavior and the Social Environment II
SCWK 4153 Social Welfare Policy
SCWK 3193 Human Diversity and Social Work
SCWK 4333 Social Work Practice I
SCWK 4343 Social Work Practice II
SCWK 4412 Field Seminar I
SCWK 4422 Field Seminar II
SCWK 4434 Social Work Internship I
SCWK 4444 Social Work Internship II
SCWK 4733 Social Work Practice III
Social Work electives – 6 hours

Students must adhere to requirements cited for each social work course. A grade of ‘C’ or better must be earned in all core social work courses. If a student receives a grade of ‘D’ in a core social work course, the course must be retaken with a grade of ‘C’ or better prior to taking the course for which that course serves as a prerequisite.

The following social science and general education courses are also required as part of the social work curriculum:
PLSC 2003 American National Government
SOCI 2013 General Sociology

J. William Fulbright College of Arts and Sciences
BIOL 1543/1541L Principles of Biology
COMM 1313 Fundamentals of Communication
PSYC 2003 General Psychology
Statistics course, 3 hours

In addition, six hours of upper-level (3000-4000) social science electives, to be selected from SOCI, PSYC, ANTH, GNST, PLSC, COMM, GEOS, ASST, or HESC complete the degree requirements.

**Writing Requirement:** Social work students complete the research/analytical writing requirement by submitting the research paper from SCWK 4073 or honors paper to the social work faculty for approval.

**Requirements for Departmental Honors in Social Work:** The Departmental Honors Program in Social Work is an upper-division course of study with an independent investigation on a topic in social work. Students work closely with an adviser of their choice to define the goals of an honors project and to develop it to completion. They must take 12 hours (which may include 6 hours of thesis) in Honors Studies. In developing the project, students are encouraged to take honors courses, participate in honors colloquia, and do extensive background reading. The honors thesis may entail a library research project, a social work intervention project to be conducted in the field, or a policy analysis project. A research study that requires original data collection and analysis is preferred. In any case, the honors work is a serious long-term undertaking that should have direct value in supplementing the student’s regular departmental academic program. Enrollment in SCWK 399VH takes place after the student has done background reading and has actually begun a project. Students normally enroll in this course for three hours of credit. The course may be repeated for an additional 3 hours of credit if the student’s project is an extensive one. Regardless of the type of project, it is presented in written form and defended at an oral examination before an Honors Council Committee. Projects of extraordinarily high quality may be designated High Honors by the Committee. Successful completion of the requirements will be recognized by the award of the distinction “Social Work Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

**Requirements for a Minor in Social Work:** 18 hours including SCWK 2133, SCWK 3193, and SCWK 4153 (required) and any other nine hours of social work electives. A student must notify the department of his or her intent to minor. The social work minor is not preparation for social work practice and is not accredited by CSWE.

**Sociology (SOCI)**

A Bachelor of Arts (B.A.) degree in sociology is useful preparation not only for graduate work in sociology, but also for pre-professional training in other fields, such as medicine, law, human services, or related work in the government.

**Requirements for B.A. Degree with a Major in Sociology:** 31 semester hours, to include SOCI 2013, SOCI 3193, SOCI 3223, SOCI 3301L, SOCI 3303, SOCI 3313, SOCI 4023, SOCI 4043, and 9 hours from sociology 3000- and 4000-level electives.

**Writing Requirement:** To fulfill the Fulbright College writing requirement, each sociology major will submit, prior to graduation, a substantial research or analytical paper, with a grade of “A” or “B” from an upper-division sociology course (3000-, 4000-, or 5000-level) to their departmental adviser. Satisfactory completion of an honors project or a senior thesis may fulfill this requirement.

**Requirements for Departmental Honors in Sociology:** The Departmental Honors Program in Sociology is an upper-division course of study based on independent investigation on a scholarly topic of sociological interest. To be eligible for sociology honors candidacy, students normally will have completed 28 semester hours and not more than 85 semester hours with a minimum cumulative grade-point average of 3.25. They must take 12 hours in Honors Studies, which may include 6 hours of thesis. In the junior year, three hours of directed reading, planning, or other work on a research problem should be selected from the following courses:

- SOCI 399VH Honors Course
- SOCI 403V Individual Study in Sociology
- SOCI 4043 Seminar in Sociology.

In the senior year, the student will complete an honors project for up to six hours of credit in SOCI 399VH Honors Course. This honors research project will normally consist of an empirical investigation but may, with the approval of the honors director and the other departmental representatives, be intensive library research on a topic. All candidates must pass an oral examination given by an Honors Council Committee. Successful completion of the requirements will be recognized by the award of the distinction “Sociology Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

**Requirements for a Minor in Sociology:** 19 semester hours in sociology to include SOCI 2013, SOCI 3301L, SOCI 3303, SOCI 3313, and at least nine hours of 3000-level classes or above. A student must notify the department of her or his intent to minor.

**Sociology (B.A.) Teacher Licensure in Social Studies Requirements:**

Please refer to the Secondary Education Requirements for Fulbright College Students on page 99.

Students wanting to teach social studies in middle school should consult with a middle level adviser in the College of Education and Health Professions.

**Combined Major in Sociology and Anthropology:** 36 hours with a minimum of 15 hours in each subject, to include SOCI 2013, SOCI 3013, SOCI 3303/3301L (or a course in statistics), SOCI 3313, and SOCI 4023 and ANTH 1013, ANTH 1011L, ANTH 1023, ANTH 3023/3021L, and ANTH 4013. Additional courses are to be selected in consultation with a representative of fields concerned.

For a combined major in sociology and African-American studies, see page 111.

For a major in criminal justice, see below.

For a major in social work, see page 141.

For requirements for an M.A. degree in sociology, see the Graduate School Catalog.
The program in criminal justice is designed to prepare candidates for a variety of entry-level positions in criminal justice and to enable experienced personnel to expand their knowledge and skills. Drawing on a strong interdisciplinary base in the social sciences, the program provides education in the complexities of human behavior and problems of interpersonal relations in an increasingly urbanized America. The overall goal of the program is to enable men and women to contribute to the development and implementation of a fair and effective system of criminal justice.

Requirements for the B.A. Degree with Major in Criminal Justice: Minimum of 31 semester hours to include CMJS 2003, CMJS/SOCI 3023, SOCI/SOCS 3043, CMJS/SOCI 3203, SOCI 3301L, SOCI 3303, SOCI 3313, one course from CMJS 3003, CMJS 3503. Hours to complete the 31-semester-hour requirement from 3000- and 4000- level criminal justice or sociology courses not taken above.

For transfer students, a minimum of 18 hours of coursework in the major at the University of Arkansas is required.

Writing Requirement: To fulfill the Fulbright College writing requirement, each criminal justice major will submit, prior to graduation, a substantial research or analytical paper, with a grade of 'A' or 'B' from an upper-division criminal justice course (3000-, 4000-, or 5000-level) to their departmental adviser. Satisfactory completion of an honors project or a senior thesis may fulfill this requirement.

Requirements for Departmental Honors in Criminal Justice: The Departmental Honors Program in Criminal Justice is an upper-division course of study based on a topic in the area of criminal justice. To be eligible for criminal justice honors candidacy, students normally will have completed 28 semester hours and not more than 85 semester hours with a minimum cumulative grade-point average of 3.25. They must take 12 hours (which may include 6 hours of thesis) in Honors Studies. The honors project may be an intensive study of a topic in criminal justice or an empirical research investigation. The candidate is expected to pass an oral examination given by an Honors Council Committee. Projects of extraordinarily high quality may be designated High Honors by the Committee. Successful completion of the requirements will be recognized by the award of the distinction “Criminal Justice Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

SEE PAGE 263 FOR CRIMINAL JUSTICE (CMJS) COURSES
MISSION AND OBJECTIVES

Vision Statement
The Sam M. Walton College of Business is a nationally competitive business school that connects people with organizations and scholarship with practice by combining excellent student learning experiences with quality research serving Arkansas and the world.

Core Values
Excellence: We strive for excellence in all we do.
Professionalism: We believe organizational practices must be built on an ethical foundation and high standards of professional behavior.
Innovation: We value creativity, innovation, and entrepreneurial spirit.
Collegiality: We believe in working together to examine situations and ideas from diverse perspectives.

Mission Statement
The Walton College, the flagship business school of the state of Arkansas, has a three-fold mission:

Teaching
Educate a diverse population of students in bachelor’s, master’s, and doctoral programs to be tomorrow’s business, community, and academic leaders;

Research
Discover and disseminate knowledge through our research to support excellence and innovation in organizations; and

Service
Share our business expertise in support of our state, our professions, and the academic community.

FACILITIES AND RESOURCES
The Walton College offers degree programs for undergraduate students and for graduate students at both the master’s and doctoral levels. Walton College is located in two modern buildings designed to be a functional home for the on-campus programs. These attractive facilities house fully equipped classrooms for business classes, eight state-of-the-art computer laboratories for both class and individual use, faculty and administrative offices, an honors program study area with computer access, a Career Development Center, and a large study room equipped for individual as well as group studying.

The library of the college is part of the general University Libraries and is housed in Mullins Library. The business and economics collection comprises approximately 55,000 volumes and makes this library one of the best in the region.
Walton College also operates centers for research, outreach, and public service. Information about these centers may be found in the University Centers and Research Units section of this catalog. Walton College centers include the following:
- Arkansas Household Research Panel
- Bessie Moore Center for Economic Education
- Center for Business and Economic Research
- Center for Management and Executive Development
- Center for Retailing Excellence
- Information Technology Research Center
- Supply Chain Management Research Center
- Small Business Development Center

DEGREES OFFERED

Undergraduate students may pursue curricula leading to one of the following degrees: Bachelor of Science in Business Administration (B.S.B.A.), Bachelor of Science in International Business (B.S.I.B.). In each of these degree programs, the pre-business requirements must be completed before students may enroll in upper division business courses. Students in Walton College may pursue an academic minor in business or in the J. William Fulbright College of Arts and Sciences. Walton College also offers business minors for business and non-business students. Degree programs and minors are outlined on subsequent pages.

- Finance
- Financial Economics
- Management
- Marketing
- Transportation

OTHER PROGRAMS

Cooperative Education
Cooperative education (co-op) is an academic program that enables students to gain degree-related experience prior to graduation. It is a planned, progressive educational strategy in which the student obtains work experience related to his or her academic major and career goals. Participating students earn academic credit for their work experiences and are always paid by their employers. Co-op students can maintain their status as full-time students while participating in the program, even if their co-op experience requires they spend a semester working full-time.

Walton College students are eligible for co-op credit if they have 1) completed the pre-business core and have obtained at least 60 hours of credit, 2) a cumulative grade-point average of 2.5 or better, and 3) a grade-point average of 2.5 or better for the last full-time term completed. Students may receive one hour of credit per semester for a job that requires 12-19 hours of work per week or two hours of credit per semester for a job that requires 20 or more hours per week. A maximum of six hours of degree credit may be awarded as a junior- senior-level business elective. Full-time students who work 40 hours or more per week in internships approved by the co-op education academic coordinator are eligible for three hours of academic credit per semester, or per full summer, provided they have a minimum GPA of 2.75, as well as having received a GPA of at least 2.75 in the prior full-time semester.

Students may seek either to qualify a job they have found themselves for co-op credit, or they may seek an employment opportunity through the Walton College Career Development Center, WCOB 117. The employment opportunity may be either a full-time, off-campus work assignment that alternates with semesters spent on campus taking courses (an alternating co-op), or it may be a part-time job undertaken concurrently with course work (a parallel co-op). Once a student has been matched with an approved job, the co-op coordinator, the faculty co-op adviser, the student’s work place supervisor, and the student work together to formulate career-related learning objectives for the coming semester of work. These objectives must be in writing and in to the cooperative education coordinator in order for a student to be registered for co-op. At the end of each semester of work, the student is required to submit a three- to ten-page paper (depending on credit hours to be received) that re-states the student’s learning objectives for the semester and discusses how the job experience fulfilled the objectives. The student is also required to submit an employer evaluation form, and the work supervisor is asked to submit an evaluation of the student’s work.

For information on participating in Walton College co-op program, a current listing of co-op opportunities, and phone numbers of people with whom you may discuss these opportunities, visit the Cooperative Education home page on the Web at http://waltoncollege.uark.edu/coop/.

COLLEGE ADMISSION REQUIREMENTS

All students admitted to the University of Arkansas, Fayetteville, are eligible for admission to the Sam M. Walton College of Business. Students will be required to follow the degree program requirements set forth in the catalog corresponding to the student’s first semester in Walton College, not the first semester of enrollment at the University of Arkansas.

COLLEGE SCHOLARSHIPS

High school graduates who expect to enroll in Walton College are encouraged to apply for scholarships made available to freshmen by individuals, business firms, and organizations. Also available to freshmen, regardless of degree program, are freshmen academic scholarships. Current Walton College students may apply for both college and departmental scholarships beginning in January of each year for the following academic year. Information on these financial
STUDENT ORGANIZATIONS

In addition to the general university student organizations, Walton College Student Ambassadors, Study Abroad Ambassadors, and a Business Dean’s Student Advisory Board, there are several college societies open to Walton College students. These include the following:

- Alpha Kappa Psi (business professional)
- American Marketing Association
- Assoc. of Information Technology Professionals
- Beta Alpha Psi (accounting honorary and professional)
- Beta Gamma Sigma (business honorary)
- Economics Club
- Finance Club
- National Assoc. of Black Accountants
- Omicron Delta Epsilon (economics honorary)
- Human Resource Management Association
- Transportation and Logistics Association

COLLEGE ACADEMIC REGULATIONS

Pre-Business Requirements

Students pursuing a degree in Walton College are classified as pre-business with an intended major until all pre-business requirements are fulfilled. The following policies apply to the pre-business program:

To be eligible to enroll in upper-division business courses in Walton College, a student must complete the Walton College computer competency requirement (WCOB 1120) and maintain at least a 2.50 (on a 4.00 scale) cumulative grade-point average (GPA) in addition to completing the 42 credit hours listed below of pre-business core courses (or their equivalents), also with at least a 2.50 GPA. Further, a student must complete all courses offered to meet this requirement with a grade of “C” or better or the requirement for graduation. The pre-business core courses are as follows:

COMM 1313 Fundamentals of Communication
ECON 2013 Principles of Macroeconomics
ECON 2023 Principles of Microeconomics
ENGL 1013 Composition I
ENGL 1023 Composition II
MATH 2043 Survey of Calculus
MATH 2053 Finite Mathematics
WCOB 1111 Freshman Business Connections
WCOB 1012 Legal Environment of Business
WCOB 1023 Business Foundations
WCOB 1033 Data Analysis and Interpretation
WCOB 2013 Markets and Consumers
WCOB 2023 Production and Delivery of Goods and Services
WCOB 2033 Acquiring and Managing Human Resources
WCOB 2043 Acquiring and Managing Financial Resources

Students’ records will be evaluated each semester to determine whether a student should be moved to a major and have pre-business classification removed. After receiving notification that a student has been admitted into his or her major, the student is expected to arrange for a degree check by the Undergraduate Programs Office to ascertain remaining degree requirements.

Registration in Junior/Senior-Level Walton College Courses

Walton College students must complete the pre-business requirements prior to enrollment in junior- or senior-level courses in Walton College.

Non-degree seeking students and students enrolled in other colleges are subject to the same course prerequisites as students within Walton College. Specific exceptions to this policy must be addressed to the associate dean for academic affairs in Walton College.

Restrictions on General Education Electives: Only six hours total of general education electives will be allowed in Physical Education Activity (PEAC) or Dance Education Activity (DEAC) courses.

Transfer of Credit Policies

In addition to the University policies controlling the granting of credit for course work taken at other institutions, the following policies apply to transfer work applied to any undergraduate business program:

1. Transfer students considering admission to pursue a major in Walton College must have completed the pre-business courses and requirements listed above and have a 2.50 (on a 4.00 scale) cumulative grade-point average in the pre-business courses and in his or her overall grade-point average. Transfer students will be classified as pre-business students until pre-business core requirements have been completed.

2. A pre-business and overall grade-point average for courses accepted for transfer by the University of Arkansas will be calculated and used to evaluate the completion of the pre-business requirements by students transferring courses from other institutions.

3. Unless exceptions are granted at the time of admission to the University of Arkansas, transfer courses accepted by the University will not be accepted by Walton College for degree purposes unless a grade of “C” or better has been earned in each of these courses. (See the Admission chapter.)

4. A transferred course cannot carry more degree hours than are available in a similar University of Arkansas course. For example, a four-hour principles of economics course transfers as three degree hours.

5. Business courses completed at the freshman or sophomore level at another institution will not count as equivalents of junior- or senior-level courses offered in Walton College (University of Arkansas), and no transfer credit shall be granted for any such course(s) in Walton College.

6. At least 50 percent of program requirements in business and economics must be taken in residence.

7. All courses within a student’s major and Business Strategy and Planning (WCOB 3016) must be taken in residence at the University of Arkansas, Fayetteville.

8. Junior- or senior-level core courses in business and economics may be transferred from a school accredited by AACSB International.

9. Junior- or senior-level core courses taken at a non-AACSB International-accredited, four-year institution must either be repeated or validated by procedures specified and approved by the managing director of undergraduate programs.

10. Junior- or senior-level electives in business and economics taken at a non-AACSB International-accredited, four-year institution may be accepted in transfer as junior/senior business electives.

11. If a student takes courses with different names but with similar content at different institutions or in different colleges within the University of Arkansas, degree credit will be allowed for only one of the courses, for example, principles of economics and agricultural economics.

12. Courses taken at any higher education institution where the course content is remedial are not acceptable for degree credit.

13. The student should be prepared to submit course descriptions, syllabi, or other course-related information for transfer course work if there is any question as to whether Walton College will grant degree credit for such work.
14. Exceptions: All requests for, exceptions to, and variations from the rules, regulations, and requirements of Walton College and the university should be made in writing to the associate dean for academic affairs of Walton College. Consult the Undergraduate Programs Office in Walton College for these requests.

Course Loads

The normal course load in Walton College is 15 to 17 hours per semester (and six hours per summer term). Students with a 2.75 grade-point average the previous semester may take a maximum of 18 hours. Seniors may take 18 to 19 hours, if required for graduation, during their final semester. Students on academic warning are limited to a maximum course load of 12 hours. University regulations on the number of hours allowed per semester are found in the Orientation and Registration section of this catalog.

Foreign Language Concentration

An undergraduate B.S.B.A. degree-seeking student may elect to substitute 12 hours in a single upper-level foreign language for 12 hours in the junior-senior business elective block of courses for the degree requirements. Students may not present a combination of foreign language and junior-senior business electives to fulfill this requirement.

Double Major

A student may elect to obtain a double major by completing all required courses for two majors in Walton College (but not in two concentrations within a single major). The minimum hour requirement for a double major is 138 degree credit hours to include all requirements for both majors. If there are courses common to both majors, the department chairs involved will agree upon and specify additional requirements in lieu of the common courses. The junior/senior business elective block is reduced by three hours; however, choice of the junior/senior business electives is restricted to no more than three total hours from each department that offers the two majors. Students who have elected to substitute a foreign language course of study for junior/senior business electives must complete 12 hours of junior/senior language courses.

The student must notify the Undergraduate Programs Office in Walton College of intent to pursue a double major. All requirements for double majors must be completed prior to awarding of a degree.

Additional Bachelor’s Degrees

Students seeking a second bachelor’s degree must contact the undergraduate programs office to ascertain specific requirements. Degree candidates must meet the university’s general graduation requirements. The university requires that 1) the student take a minimum of 30 semester hours over the requirements for the first degree, and 2) the 30 hours cover a minimum of 36 weeks in residency at the Fayetteville campus. Walton College also requires that the student complete all courses in the pre-business and business core and the major and any additional business requirements (if some of these have been completed on the first degree, they are waived). It is recommended that any additional courses needed to finish the University’s 30-hour requirement be junior or senior business electives. The second degree may be taken after the first is awarded, or both degrees may be awarded simultaneously after completion of all requirements for both.

College Graduation Requirements

1. University Requirements. Degree candidates must meet the following: the University’s general entrance requirements, number of credit hours required in residence, and the “requirements for graduation,” including the University Core American history, and English proficiency.

2. Hour Requirements. Degree candidates must satisfactorily complete the total number of semester hours specified for the curriculum in courses approved for one of the majors outlined in the succeeding pages. No less than 50 percent of the total credits must be in approved subjects other than business.

NOTE: Not all courses offered by the University will be accepted for degree credit by Walton College. Courses falling into this category are ANTH 0003, PHSC 0003, CIED 0003, ENGL 0003, MGMT 1033 and MATH 0003. Developmental courses are defined as 1) any course so designated by the university, and 2) any lower-division course taken after a higher-level course is taken. Credit will not be given for duplicate course work.

3. Grade Requirements. Students must earn a grade of “C” or better in all pre-business core course requirements. Each student must have a 2.00 cumulative GPA in each of the following areas:

   a. All work completed at the University of Arkansas.
   b. All courses specifically designated for the major.
   c. All required business core courses and required economics courses.

4. General Education Course Work. A student’s general education course work must satisfy University Core Requirements, additional college/program course-specific requirements, as well as these two area requirements:

   a. Social Issues, Multicultural Environment, and Demographic Diversity, and
   b. Micro and Macroeconomics. If a student has not satisfied these area requirements within the fine arts and/or social sciences areas of the university core, these area requirements must be satisfied through general education electives to allow students to complete degree requirements within the hours indicated above.

Courses that satisfy these area requirements are listed below. Courses that satisfy these area requirements are listed below. NOTE that many of these courses will also satisfy University Core Requirements. Where possible, a student should select courses that satisfy both requirements.

   a. Social Issues, Multicultural Environment, and Demographic Diversity
      ANTH 1023 Intro. to Cultural Anthropology (Univ. core)
      SOCI 2013 General Sociology (Univ. core)
      SOCI 2033 Social Problems (Univ. core)
      WCIV 1003 Western Civ. I (Univ. core)
      WCIV 1013 Western Civ. II (Univ. core)
      GEOG 1123 Human Geography (Univ. core)
      Any Foreign Language (Univ. core, if 2000-level or above, general education elective otherwise)
   b. Micro/Macro Economics
      ECON 2013 Principles of Macroeconomics (business core)
      ECON 2023 Principles of Microeconomics (business core)

5. Residency Requirements. The senior year’s curriculum (last 30 hours) in business must be taken in residence. In addition, the student’s major requirements (or the degree equivalent) and WCOB 3016 must be completed in residence. Specifically required junior or senior courses in business or economics must be taken at the University of Arkansas or at an AACSB-accredited school. At least 50 percent of the total hours in business and economics must be taken in residence.

6. Correspondence Course Rules. No more than 18 hours of course work taken by correspondence may apply toward a degree. These 18 hours may not include more than 12 hours of courses in economics or business, and may not include any junior- or senior-level economics or business courses without prior approval of the associate dean for academic affairs.
7. Catalog/Curriculum Changes. Business is a dynamic profession, and the college and department curricula are updated continuously to keep pace with changes in the business world. Students entering under this catalog will be required to comply with such curricular changes to earn their degree. The total number of hours required for the degree, however, may not be increased, and all work completed in accordance with this catalog prior to the curriculum change will be applied toward the student’s degree requirements. Furthermore, courses incorporated into the curriculum at a level lower than the one the student has completed are not required for that student unless there are specific prerequisites. Students entering under earlier catalogs are responsible for completing the graduation requirements as published in the catalog in effect when they entered the program. Students having interruptions of their academic programs that exceed two calendar years must complete the requirements published in the catalog in effect when they re-enter the program. Exceptions to the graduation requirements must be approved by the associate dean for academic affairs and appropriate department chair.

Graduation with Honors

The bachelor’s degree Summa Cum Laude (with highest honors), Magna Cum Laude (with high honors), or Cum Laude (with honors) may be conferred only upon those students who have successfully completed the Walton College Honors Program. Both Walton Scholars and Departmental Scholars are eligible for these designations. Students whose cumulative grade-point average place them in the top 10 percent of their graduating class but who have not completed the Honors Program are eligible for the designation “With Distinction” on their official transcript. Among those students completing the Honors Program, the designations Summa Cum Laude, Magna Cum Laude and Cum Laude shall be determined as follows:

- Top 20 percent of students completing the Honors Program: Summa Cum Laude
- Next 30 percent of students completing the Honors Program: Magna Cum Laude
- Next 50 percent of students completing the Honors Program: Cum Laude

No honors degree will be conferred upon a candidate who has not completed at least 50 percent of his or her degree work at the University of Arkansas or who, in the last four semesters of attendance, has a cumulative grade-point average of less than 3.00 or has received a “D” or “F” in any course in the last semester. Certain other requirements will be outlined on request by the dean of the College.

HONORS PROGRAM

Walton College honors program consists of two components: the four-year Walton Scholars Program and the Departmental Scholars Program. Students participating in the honors program will be eligible to graduate Cum Laude, Magna Cum Laude, or Summa Cum Laude. Students who do not participate in the honors program are eligible to graduate with distinction, a classification separate from the Cum Laude awards. Honors program students will receive priority for participation in the Arkansas Cooperative Education Program, SAKE, the portfolio management class, and financial support for study-abroad programs. They also have access to an honors study area.

Eligibility for the Honors Program

Admission will be offered to incoming freshmen with an ACT of 28 or higher and a high school GPA of 3.75. Students are required to maintain a cumulative GPA of 3.50 to remain in the program.

Requirements for Walton Scholars Program:

1. Complete 17 of 35 University Core hours in honors courses.
   Completing honors sections of courses in the Fulbright College will fulfill this requirement. MATH 2554 and MATH 2564 also count toward this requirement.
2. Demonstrate proficiency in a foreign language. This requires 0 to 12 hours of course work. Students may demonstrate proficiency by completing the 2013-level course in any foreign language.
3. Complete eight to nine credit hours of honors courses in Walton College to include the following:
   a. One three-hour college colloquium in a student’s major: This is an interdisciplinary course with topics appealing to a wide range of majors. The subject matter changes annually and is targeted to juniors.
   b. One three-hour departmental colloquium: Each department will offer one departmental colloquium each year. It is designed for seniors.
   c. A two- to three-hour thesis: The thesis is a major independent writing project and arises from an international study experience, an internship, or working with a professor on research.
4. Complete an alternate honors capstone course WCOB 3016H, Business Strategy and Planning. This is a course emphasizing joint projects with a Walton College corporate partner.

Requirements for the Departmental Scholars program:

1. Complete six hours of honors courses in the University Core or demonstrate proficiency in a foreign language (as described above).
2. Complete eight to nine hours of honors courses in Walton College to include:
   a. One three-hour college colloquium
   b. One three-hour departmental colloquium
   c. A two- to three-hour thesis.

DEGREE REQUIREMENTS

Bachelor of Science in Business Administration (B.S.B.A.)

The Bachelor of Science in Business Administration degree is offered through an educational program in the business and organizational disciplines intended to prepare individuals to make sustained contributions to organizations and society in a global, diverse, and dynamic environment. To achieve this objective the curriculum focuses on developing an individual’s interdisciplinary problem-solving skills, interpersonal and communication skills, ability to adapt to changing technology, spirit of entrepreneurial innovation, and ethical and professional values.

Walton College offers work in the following eight majors for the B.S.B.A. degree. Some majors have concentrations to allow additional specialization.

1. Accounting (ACCT)
2. Business Economics (BECO)
   a. Concentration I – Business Economics
   b. Concentration II – International Economics and Business
3. Finance (FINN)
   a. Concentration I – Banking
   b. Concentration II – Financial Management/Investment
   c. Concentration III – Insurance
   d. Concentration IV – Real Estate
   e. Concentration V – Personal Financial Management
4. General Business (GBUS)
5. Information Systems (ISYS)
6. Management (MGMT)
   b. Concentration II – Small Business and Entrepreneurship
   c. Concentration III – Organizational Leadership
7. Marketing (MKTG)
   a. Concentration I – Marketing Management
   c. Concentration II – Retail Marketing
8. Transportation (TRNS)

Requirements for B.S.B.A. Degree

Students pursuing a degree in Walton College are classified as pre-business with an intended major until all pre-business requirements are fulfilled. To enroll in upper-division courses, a student must obtain at least a 2.50 (on a 4.00 scale) overall grade-point average in addition to the completion of all pre-business core courses (or equivalents), also with a minimum 2.50 GPA. Further, a student must earn a grade of “C” or better in each pre-business core course for admission into the major or for the graduation requirement.

TOTAL REQUIRED FOR B.S.B.A. DEGREE 126

(Total is less than the sum of the categories because some courses count in two categories.)

** Pre-Business requirement: These 42 hours must be completed with a GPA of 2.50, an overall GPA of 2.5, and a grade of “C” or better in each course before a student is allowed to take upper-division business courses.

In addition to the core courses, each student will complete the required major courses, junior- senior-level business electives, and electives specified by each major.

Each student must have a 2.00 cumulative grade-point average in each of the following areas: all work completed at this university, all courses specifically designated for the major, and all required Walton College core and economics courses. Students must earn a grade of “C” or better in each of the pre-business core courses.

Bachelor of Science
in International Business Degree (B.S.I.B.)

The Bachelor of Science in International Business degree is intended for students who wish to learn more about the international aspects of business. It provides preparation for a broad range of careers in business, including accounting, management, marketing, economics, information systems, finance, and transportation and logistics. This degree is also well suited for students wishing to continue their studies in law, international affairs, or graduate education in business and economics.

This degree requires completion of the University Core and Walton College Core courses, as well as course work in international business, a single foreign language and an area of study related to that language. In addition, students must select a concentration in one of the following areas: accounting, business economics, information systems, finance, general business, management, marketing, or transportation and logistics.

Students pursuing a degree in the Sam M. Walton College of Business are classified as pre-business with an intended concentration until all pre-business requirements are fulfilled. For admission into the intended concentration, a student must obtain at least a 2.50 (on a 4.00 scale) overall grade-point average, in addition to the completion of all pre-business core courses listed elsewhere in the catalog (or equivalents), also with a minimum 2.50 grade-point average. Further, a student must earn a grade of “C” or better in each of the pre-business core courses for admission into the major or for the graduation requirement.

Graduation Requirements for the B.S.I.B. Degree

Each student must have a 2.00 cumulative grade-point average in each of the following areas: all work completed at this university, all courses in the business core, and all designated international business courses/functional concentration/foreign language courses. In addition, students must earn a grade of “C” or better in each of the pre-business core courses.

TLOG 4643 International Transportation and Logistics 3
Plus six hours of Jr./Sr.-level transportation courses 6

F. Foreign Language Requirements 12

Students whose native language is English or whose native language is not taught at the University of Arkansas must complete 12 hours of university course work in a single foreign language — six hours of intermediate language and six hours of upper-division course work in communications and business language, or equivalent. Students who, on the basis of prior knowledge of language, omit one or both courses in the intermediate language sequence — FLAN 2003, FLAN 2013 — may receive degree credit for omitted courses if they validate their higher placement by passing the business language course (or equivalent) with a grade of “C” or above. Students with no previous foreign language training or only rudimentary knowledge of a foreign language will be required to complete up to six hours of elementary language — FLAN 1003, FLAN 2003 — in addition to the 12 hours of language specified above. No degree credit will be given for elementary language courses.

Students may select one of the following language tracks:
Arabic – ARAB 2003, ARAB 2013, ARAB 3003, ARAB 3013 or equivalent
Chinese – CHIN 2003, CHIN 2013, CHIN 3033, and any other upper division CHIN
French – FREN 2003, FREN 2013, FREN 4333, FREN 3033 or FREN 3003
German – GERM 2003, GERM 2013, GERM 3003, and GERM 4333
Italian – ITAL 2003, ITAL 2013, ITAL 3003, and ITAL 3013
Japanese – JAPN 2003, JAPN 2013, JAPN 3003, and JAPN 3013
Spanish – SPAN 2003, SPAN 2013, SPAN 3003, and SPAN 4333

Students whose native language is not English but is taught at the University of Arkansas must select a third language from the list above or substitute six hours of upper-division English language courses (i.e., speech, writing, or U.S. literature), to be selected with the consent of the international business adviser. Those students whose native language is not taught at the University of Arkansas will normally be required to select a third language.

G. Area Studies Requirements
For students taking a foreign language, nine hours of upper-division course work in the J. William Fulbright College of Arts and Sciences are required. Domestic students can satisfy this requirement in one of three ways:
1) any upper division foreign language course,
2) minor in a foreign language, and/or
3) select upper division courses related to the foreign language to include:
   Arabic – any upper division course for Middle Eastern Studies (MEST) to include MEST 4003, 4003H or additional courses listed under MEST in the university catalog
   Chinese/Japanese/Asian Studies – any upper division course for Asian Studies (AIST)
   French – any upper division course for EUST
   German – any upper division course for EUST
   Italian – any upper division course for EUST
   Spanish – any upper division course for Latin American Studies (LAST) or European Studies (EUST) to include LAST 4003, LAST 4003H, or LAST 470V or additional courses listed under LAST in the university catalog, or EUST 399VH, EUST 4003, EUST 4003H, EUST 470V, or EUST 470VH or additional courses listed under EUST in the university catalog.

International students may satisfy this requirement in one of two ways:
1) For students who choose to take a third language, area studies requirements are the same as those for domestic students.
2) For students who choose to take six hours of upper division English to satisfy their language requirement, nine hours of upper division course work in the J. William Fulbright College of Arts and Sciences pertaining to the United States to include any upper division course for American Studies (AMST) listed in the University catalog.

H. Electives

I. International Experience Requirement
At a minimum, a domestic student must complete a study abroad program approved by the Walton College of at least four weeks and six credit hours, or work abroad, or work with the international division of a domestic company as part of their program. Students are strongly encouraged, but not required, to seek job experience in a company located in a country related to their foreign language requirement.

Total Degree Requirements 125
(Total is more than the sum of the categories because some courses count for multiple requirements.)

Clarifying Notes on Degree Requirements
1. Courses that are required in either Walton College or the international business core and also are required in one of the business concentrations cannot be used to satisfy both requirements. For example, students who take FINN 3703 to satisfy the finance concentration requirements cannot also use it to satisfy the international business requirements.
2. Students who select ECON 2013 and ECON 2023 to partially satisfy the social science bloc and FLAN 2003 to partially satisfy the fine arts and humanities bloc of the University Core Requirements can complete the degree with 125 hours. Students selecting other courses to satisfy these requirements will have longer programs.

**Minors in the J. William Fulbright College of Arts and Sciences**

Students in Walton College may pursue an academic minor in the J. William Fulbright College of Arts and Sciences. Academic minors usually consist of 15 to 18 hours of course work. The available minors and course requirements are specified in the Fulbright College section of this catalog. Students must notify the Undergraduate Programs Office in Walton College of their intention to pursue a minor as early as possible. Walton College will certify that the requirements of the minor have been satisfied by graduation and, with the assistance of the Fulbright College, will advise students on the requirements to complete a minor. The minor will be designated on the student’s transcript.

Courses that are part of the University Core Requirements or the additional General Education Requirements or any other non-business course that is part of a student’s course of study may also be counted for credit in a minor. For example, ANTH 1023 Introduction to Cultural Anthropology, is a concentration in the B.S.B.A. social science bloc and can also be used to satisfy the requirements of the anthropology minor. Other courses in a minor can be counted as general education electives. Walton College economics majors in the business economics concentration or the international economics and business concentration may not obtain a Fulbright College minor in economics.

**Business Administration Minors for Non-Business Students**

To facilitate students outside Walton College in obtaining knowledge that will assist them in making sustained contributions to organizations and society in a global, diverse, and dynamic environment, Walton College offers a business minor. The minor requires completion of a minimum of 21 required hours of study (including equivalencies) with at least 50 percent of the courses applied toward the minor taken in residence. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor.

All students seeking a business minor are required to complete the Walton College computer competency requirement (WCOB 1120) and the following courses:

- ECON 2143 Basic Economics Theory and Practice
- WCOB 1023 Business Foundations
- WCOB 1033 Data Analysis and Interpretation or equivalent

In addition, students must select and complete one of the following concentrations:

**Concentration 1 – General Business**

Select 12 hours from the following courses

(at least 6 hours must be at the 3000 or 4000 level).
- WCOB 1012 Legal Environment of Business
- WCOB 2013 Markets and Consumers
- WCOB 2023 Production and Delivery of Goods and Services
- WCOB 2033 Acquiring and Managing Human Resources
- WCOB 2043 Acquiring and Managing Financial Resources
- Plus any other 3000- or 4000-level Walton College course

**Concentration 2 – Accounting**

- ACCT 3013 Accounting View of Economic Events
- ACCT 3613 Managerial Uses of Accounting Information
- Plus an additional six hours selected from the following:
  - ACCT 3533 Accounting Technology
  - ACCT 3723 Financial Reporting and Analysis

**Concentration 3 – Business Economics**

- ECON 4333 Economics of Organizations
- Plus an additional nine hours of 3000- or 4000-level business economics courses.

**Concentration 4 – Finance**

- WCOB 2043 Acquiring and Managing Financial Resources
- Plus an additional nine hours of 3000-4000 level finance courses

**Concentration 5 – International Business**

Select 12 hours from the following:

- ECON 3843 Economic Development, World Bank, and Multilateral Finance
- ECON 3853 Emerging Markets
- ECON 3933 The Japanese Economic System
- ECON 4633 International Trade
- ECON 4643 International Macroeconomics and Finance
- ECON 4653 Global Competition and Strategy
- ECON 468V International Economics and Business Seminar
- FINN 3703 International Finance
- MKTG 4583 International Management
- MKTG 4833 International Marketing
- TLOG 4643 International Transportation and Logistics

**Concentration 6 – Management**

- MKTG 3433 Principles of Marketing
- Plus an additional nine hours selected from the following:
  - MKTG 3533 Promotional Strategy
  - MKTG 4033 Selling and Sales Management
  - MKTG 4133 Marketing Research
  - MKTG 4553 Consumer Behavior
  - MKTG 4833 International Marketing
  - MKTG 4933 Retail Marketing Strategy
  - MKTG 4943 Retail Buying and Merchandise Control
  - TLOG 3613 Business Logistics

**Concentration 7 – Marketing**

- TLOG 3443 Principles of Transportation
- TLOG 3613 Business Logistics
- Plus an additional six hours selected from the following:
  - TLOG 3623 Purchasing and Inventory Systems
  - TLOG 4633 Transportation Carrier Management
  - TLOG 4643 International Transportation and Logistics
  - TLOG 4653 Transportation and Logistics Strategy

In addition to the above course requirements, non-business, degree-seeking students working toward a minor should note the following:

1. Students who elect to obtain a business minor must provide a written notice of their intent to the dean’s office of the college in which they are receiving a degree. This notice and all requirements for the business minor must be completed prior to the awarding of the student’s undergraduate degree.

2. Business minor students must complete all 1000- and 2000-level courses required for the business minor and be a junior- or senior-level student to enroll in 3000- or 4000-level business courses.

3. All specific course prerequisites must be met. Although business minor students are not required to satisfy the entire pre-business core, they must complete the required courses and any other prerequisite course specified prior to enrolling in a 3000/4000-level course.

4. ECON 2143 will substitute for ECON 2013/2023 for prerequisite purposes. In addition, students who take both ECON 2013 (Macroeconomics) and ECON 2023 (Microeconomics) will satisfy the economics requirements of the minor.
5. Business minor students are ineligible to take WCOB 3016 Business Strategy and Planning.
6. Non-business students may substitute equivalent courses for the Walton College computer competency requirement. All equivalencies must be approved by the associate dean for academic affairs.

GRADUATE STUDIES

The University of Arkansas offers the following advanced degrees in business: Master of Accountancy, Master of Business Administration, Master of Arts in Economics, Master of Transportation and Logistics Management, Master of Information Systems, Doctor of Philosophy in Business Administration, and Doctor of Philosophy in Economics.

For further information about these programs and requirements for admission, see the Graduate School Catalog or write to the associate dean for academic affairs, Graduate School of Business, 475 WCOB.

ACCREDITATIONS

The college has been a member of and accredited by AACSB International - The Association to Advance Collegiate Schools of Business since 1931. The accounting program was accredited separately in 1986 at both the bachelor’s and master’s level. The master’s degree in the business administration program was approved in 1963. Accreditation by and membership in that organization signifies commitment by the college to the goals of promoting and actualizing the highest standards of business education.

ACCOUNTING (ACCT)

Karen V. Pincus
Department Chair and S. Robson Walton Chair in Accounting
401 WCOB
479-575-4051

• Ralph McQueen Chair in Accounting and Professor Bouwman
• Doris M. Cook Chair in Accounting and Professor Callahan
• Garrison/Wilson Chair in Accounting and Professor Finn
• S. Robson Walton Chair in Accounting and Professor Pincus
• Sam M. Walton Leadership Chair and Professor Williams
• Associate Professor and BKD Lectureship in Accounting West
• Associate Professor and Nolan G. Williams Lecturer in Accounting Thomas
• Associate Professor Norwood
• Assistant Professors Mosebach, Peters, Smith
• Clinical Associate Professor Leflar
• Visiting Assistant Professor Evers-Murray
• Instructors Caldwell, Greenhaw, Shook

The mission of the department of accounting is to cultivate an environment of educational excellence. We do so by pursuing the following endeavors:
• Providing a learning environment in which students interact with others to identify and solve accounting and business problems. 
• Developing and disseminating knowledge that has the potential for significant impact on accounting, business, and education.
• Interacting with the accounting profession, the business and academic communities, and the community at large.

The department of accounting offers an undergraduate degree program in accounting and graduate programs at both the master’s and doctoral levels. The department’s programs are accredited by the AASCB – The International Association for Management Education, which ensures quality and promotes excellence and continuous improvement in undergraduate and graduate education.

A major in accounting is preparation for success in the business world. Every business needs accounting help, whether it is the largest retail company in the world, a small family-owned enterprise, an agency for the homeless, or a musical group touring the country. The accounting major provides an excellent foundation for a variety of careers.

For example, the professional public accountant provides auditing and accounting services to client business and non-business organizations in a variety of industries. A management accountant works for a particular organization in its finance and operations areas or becomes part of the management team. Some accountants are employed by non-profit organizations such as the American Cancer Society, state and local governments, or government agencies like the FBI. Other accounting graduates are self-employed in a variety of professions or businesses, and some continue in graduate school to prepare for teaching careers.

Professional examinations, such as the Certified Public Accountant (CPA) or Certified Management Accountant (CMA) examinations, are governed by the organizations that administer the exam. Students should see the accounting department upon enrollment in the University of Arkansas for information relative to the professional exams.

The education objective at the undergraduate level is to provide an environment in which students learn skills necessary to become professional accountants, including information development and distribution; knowledge of accounting, auditing, and tax; knowledge of business and society; communication skills; analytical and decision-making skills; leadership; and professionalism. In addition, the accounting department offers courses in Business Law.

NOTE: Selection of electives should be made in consultation with academic advisers. Students planning on taking professional examinations should ascertain course requirements by examining authorities. Successful completion of a Master of Accountancy Degree from the University of Arkansas will qualify a student to take the CPA examination in Arkansas. B.S.B.A. graduates would need additional accounting hours and other courses amounting to a total of 150 semester hours to sit for the CPA exam in Arkansas.
Accounting Minor for Business Students:

The Department of Accounting offers a minor for Walton College students desiring more knowledge of accounting to assist them in their business careers. The minor requires the completion of 15 specific hours of study with all of the courses applied toward the minor taken in residence. The 15 hours include the following courses:

- ACCT 3013 Accounting View of Economic Events
- ACCT 3533 Accounting Technology
- ACCT 3613 Managerial Uses of Accounting Information
- ACCT 3723 Financial Reporting and Analysis
- ACCT 3843 Fundamentals of Taxation

Students who desire to earn an Accounting minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met.

SEE PAGE 240 FOR ACCOUNTING (ACCT) COURSES

SEE PAGE 254 FOR BUSINESS LAW (BLAW) COURSES

ECONOMICS (ECON)

Joseph Ziegler
Department Chair
402 WCOB
479-575-ECON (3266)

- Phillips Petroleum Company Chair of International Business and Economics Distinguished Professor Murray
- Professors Britton, Curington, Dixon, Farmer, Gay, Ziegler
- Lewis E. Epley Jr. Professorship and Professor Ferrier
- Associate Professor Horowitz
- Assistant Professors Deck, Kali, Lee, Mendez
- Clinical Associate Professor Stapp
- Visiting Assistant Professors Collins, Littrell

The department of economics offers two concentrations within the business economics major:

1) business economics
2) international economics and business.

The concentration in business economics is intended for those students who are interested primarily in business, but at the same time have a desire to understand the more advanced tools of economic analysis. Such a background is excellent preparation for careers in corporate research and planning, as well as careers with government and regulatory agencies, for graduate study in business and economics, and for law school. Students who want to pursue an advanced degree in business economics can, with appropriate planning, complete a master’s degree at the University of Arkansas within 12 months after receiving a B.S.B.A. degree. Please see the economics department chair for more information.

The international economics and business concentration is intended for students who wish to learn more about the international aspects of economics and business. It provides preparation for a broad range of careers in business, including management, marketing, and finance.

It is strongly recommended that economics majors who plan to continue their studies at the graduate level take two semesters of calculus (MATH 2554 and MATH 2564) and linear algebra (MATH 3083). These courses will substitute for the math courses required within Walton College core (MATH 2043 and MATH 2053).

Business Economics Concentration

The major in Business Economics requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplin- ary minor or collateral track. See an adviser for selection of courses.

The courses required for the business economics concentration include those required in Walton College and Fulbright College. In addition, 15 hours of specified courses (listed below) are required:

- Complete the requirements for a B.S.B.A. degree as listed on page 148.
- Total General Education
- Walton College Core Requirements (See page 148)
- Course Requirements in the concentration
  - ECON 3033 Microeconomic Theory
  - ECON 3133 Macroeconomic Theory
  - ECON 4333 Economics of Organizations
  - ECON 4743 Intro. to Econometrics, or
  - ECON 4753 Forecasting
  - Nine hours of ECON 3000/4000
  - Collateral Course
    - (may be selected from MATH 2103, MATH 2564, MATH 2574, AGEC 3413, AGEC 4413, GEOG 3353, and any upper division course in ACCT, FINN, ISYS, MGMT, MKTG, MATH, and STAT)
  - Junior- senior-level electives within Walton College
    - (Only six hours are permitted within major field of economics)

- Total Walton College Requirements
- Total Degree Requirements

International Economics and Business Concentration

The major in International Economics requires 21 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra course is part of an interdiscipli- nary minor or collateral track. See an adviser for selection of courses.

The courses required for the international economics and business concentration include those required in Walton College and Fulbright College. In addition, 21 hours of economics and business courses, nine hours of upper-division courses in the Fulbright College, and six hours of a single foreign language at the intermediate level or above, and three hours at the upper-division level in business communications, or equivalent, in the same foreign language are specified.

- Complete the requirements for a B.S.B.A. degree as listed on page 148.
- University Core
- Additional University Core
- Walton College Core Requirements (See page 148)
**Course Requirements in the concentration**

Select two classes (six hours) from the following:

- FINN 3703 International Finance
- MKTG 4833 International Marketing
- TLOG 4643 International Transportation and Logistics
- ECON 4653 Global Competition and Strategy
- ECON 3843 Economic Development, World Bank, and Multilateral Finance
- ECON 3933 The Japanese Economic System

Other courses may fulfill this requirement as approved by the economics faculty adviser.

**Area Studies Requirements**

For students taking a foreign language, nine hours of upper-division course work in the J. William Fulbright College of Arts and Sciences are required. Domestic students can satisfy this requirement in one of three ways:

1) any upper division foreign language course,
2) minor in a foreign language, and/or
3) select upper division courses related to the foreign language to include:

- Arabic – any upper division course for Middle Eastern Studies (MEST) to include MEST 4003, MEST 4003H or additional courses listed under MEST in the university catalog
- Chinese/Japanese/Asian Studies – any upper division course for Asian Studies (AIST)
- French – any upper division course for EUST
- German – any upper division course for EUST
- Italian – any upper division course for EUST
- Spanish – any upper division course for Latin American Studies (LAST) or European Studies (EUST) to include LAST 4003, LAST 4003H, or LAST 470V or additional courses listed under LAST in the university catalog

International students may satisfy this requirement in one of two ways:

1) For students who choose to take a third language, area studies requirements are the same as those for domestic students.
2) For students who choose to take six hours of upper division English to satisfy their language requirement, 9 hours of upper division course work in the J. William Fulbright College of Arts and Sciences pertaining to the United States to include any upper division course for American Studies (AMST) listed in the university catalog.

Students who desire to earn an Economics minor must notify the Walton College Undergraduate Programs Office of their intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met.

FINANCE (FINN)
Wayne Y. Lee
Department Chair and Alice L. Walton Chair in Finance
302 WCOB
479-575-4505

• Arkansas Bankers Association and Bellamy Chair of Banking and Professor Dominick
• Alice L. Walton Chair in Finance and Professor Lee
• Dillard Department Store Chair in Corporate Finance and Professor Millar
• Harold A. Dulan Finance Chair in Capital Formation and Robert E. Kennedy Chair in Finance and Professor Liu
• Associate Professors Hearth, Perry
• Assistant Professors Jandik, Kruse, Rennie
• Clinical Assistant Professor Carter
• Instructors Driver, Risk

The academic mission of the department of finance is to provide an educational experience that:
• stimulates student learning through open dialogue and informative discussion both inside and outside the classroom;
• actively engages students in their own learning through problem-based casework, participation in real-world business activities, and internships in the financial community; and
• prepares students to successfully meet the rigors of the challenging and diverse career opportunities in finance.

Finance Major
Students who elect to major in finance can choose from one of five concentrations: banking; financial management/investment; insurance; real estate, and personal financial management. This choice should reflect the student’s primary career focus and electives should be used to complement the coursework in the chosen concentration. Careers in finance that are analytically oriented will generally require proficiency in accounting, economics, and quantitative methods. In contrast, careers in finance that are sales or management oriented will generally require marketing and management skills. Finance majors are strongly encouraged to consult with departmental faculty advisers and/or the department chair in developing their curriculum.

The following courses are strongly recommended for the Personal Financial Management concentration and may be used towards the junior/senior business elective requirements:

- ACCT 3843 Fundamentals of Taxation | 3 |
- ACCT 5883 Individual Tax Planning | 3 |

The highly recommended courses listed below satisfy the six credit hour interdisciplinary requirement in the major:

- **Accounting**
  - ACCT 3013 Accounting View of Economic Events | 3 |
  - ACCT 3723 Financial Reporting and Analysis | 3 |

- **Economics**
  - ECON 3733 Experimental Economics | 3 |
**Information Systems (ISYS)**

Fred Davis  
Department Chair and David D. Glass Chair in Information Systems  
204 WCOB  
479-575-4500

- David D. Glass Chair in Information Systems and Professor Davis (F)  
- George and Boyce Billingsley Endowed Chair in Information Systems and Professor Venkatesh  
- M.D. Matthews Chair in Business and Professor Cronan  
- Professors Douglas, Glorfeld, Jones (T. W.)  
- Edwin and Karlee Bradberry Endowed Chair and Associate Professor Hardgrave  
- Associate Professors Aloysius, O’Leary-Kelly (S.), Riemenschneider  
- Assistant Professors Armstrong (D.), McKinney, Wilson (D).  
- Clinical Assistant Professor Renwick  
- Visiting Assistant Professor Maruping  
- Instructors Armstrong (K.), Bristow, Brown (N.), McDaniel  
- Executive in Residence Schmidt

The curriculum in information systems is designed to prepare graduates for careers in solving business problems with applications of computer technology. Graduates with a degree in Information Systems are sought by hundreds of companies for many different types of positions, such as programmer, analyst, database administrator, and web developer, among others. U of A graduates are now programming, analyzing and designing systems, consulting, teaching, and solving business problems across the country.

**Information Systems Major Requirements**

The major in Information Systems requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor. The Information Systems department encourages its majors to seek an interdisciplinary minor. See an adviser for selection of courses.

**Finance Minors for Business Students:**

The Department of Finance offers two minor options for Walton College students in the areas of Banking/Financial Management/Investment and Insurance/Real Estate. The minors require completion of 15 hours of study with all of the courses applied toward the minor taken in residence. The 15 hours include the following options and courses:

Information Systems Minor for Business Students:
The Department of Information Systems offers a minor for Walton College students desiring more knowledge of information systems to assist them in their careers. The minor requires completion of 15 hours of study with all of the courses applied toward the minor in residence. The 15 hours include the following courses:

- ISYS 2263 Intro. to Information Systems Development
- ISYS 3253 IT Infrastructure
- ISYS 3293 System Analysis and Design
- ISYS 3393 Business Applications and Visual Basic
- Plus one of the following:
  - ISYS 4373 Object Oriented Programming
  - ISYS 4283 Centralized Data Systems

Students who desire to earn an Information Systems minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met.

- Raymond F. Orr Chair and Professor Gupta
- Professors O’Leary-Kelly (A.), Todd, White
- Associate Professors Delery, Ellstrand, Johnson, Reeves
- Assistant Professor Anand
- Instructor Newman

Management is the force responsible for directing organizations toward goals or objectives. Therefore, the management curriculum focuses on the nature and capabilities of human and other resources, as well as how the manager plans, organizes, staffs, coordinates, and evaluates those resources in an organization and its environment. The study of management prepares men and women for positions of leadership in profit and nonprofit organizations of all sizes. Management majors gain insight and skill needed for careers as professional managers or as self-employed entrepreneurs. These skills include technical knowledge, communicative capacity, human understanding, and conceptual and problem-solving ability. Two majors are offered in the management department: management and general business. Both majors are described below.

Management Major
Students may choose from among three concentrations: Human Resource Management, Small Business and Entrepreneurship, and Organizational Leadership. All management majors must complete MGMT 4243, Ethics and Corporate Responsibility. An additional 21 hours of credit are required for students majoring in management. Six of these credit hours are specified in the concentration. Beyond this, students can choose from specified management and non-management courses in order to complete the requirements for the major.

The Human Resource Management concentration is designed to prepare students for careers in human resource-related occupations. Among issues and areas addressed are management-employee relations, quality of work life, compensation and other reward systems, organizational staffing, and training and development. The Human Resource Management track emphasizes the importance of integrating individual goals and organizational objectives.

The Small Business and Entrepreneurship concentration is suggested for students who are interested in starting and/or operating a small business or independent company after graduation. The Small Business and Entrepreneurship focus provides excellent preparation for students wishing to obtain a highly integrated view of business operations. The Organizational Leadership concentration prepares new students for leadership positions within organizations. Among the topics explored are employee motivation, how to manage power and influence within organizations, developing effective teams, managing diversity, organizational transformation and change, and globalization.

Management Major Requirements
The major in management requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See an adviser for selection of courses.

Complete the requirements for a B.S.B.A. degree as listed on page 148.

MARKETING AND LOGISTICS (MKTL)

Thomas D. Jensen
Department Chair
302 WCOB
479-575-4055

• Wal-Mart Chair of Marketing and Professor Burton
• Wal-Mart Lecturer in Retailing and Professor Jensen (T.)
• R. A. and Vivian Young Chair and University Professor Kurtz
• Oren Harris Chair of Transportation Professor Ozment
• Professors Creyer, Murray
• Associate Professors Ashton, Gentry, Kopp, Rapert, Stassen, Waller
• Visiting Assistant Professor Jensen (M.)
• Instructors Cole, Cox

The department of marketing and logistics offers two majors:
1) marketing
2) transportation and logistics.

Descriptions of the marketing major and courses follow. The transportation and logistics major is described in the next section.

Marketing Major

The major in marketing requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See a marketing adviser for selection of courses.

The major in marketing is designed to prepare students for careers involving product planning, distribution, promotion, and pricing strategies in profit or nonprofit organizations. In addition to a broad overview of the marketing functions within organizations, students are provided with knowledge and skills in consumer behavior, marketing research, and strategic marketing. Students majoring in marketing are actively subjected to problem-solving situations, both domestic and international, where a variety of contemporary tools are employed to stimulate the strategic decision-making process. Supportive disciplines with which the marketer should be familiar include psychology, sociology, accounting, economics, statistics, quantitative analysis, and research methodology.

The marketing major has two concentrations to select from: marketing and retail marketing. The marketing management concentration is intended to provide students with broad knowledge and skills in marketing applicable to industry. The retail marketing concentration prepares students for marketing careers in the retail industry.

Marketing Major Requirements

Complete the requirements for a B.S.B.A. degree as listed on page 148.

Total General Education
60
Walton College Core Requirements
(See page 148)
33

Course Requirements in All Concentrations

MKTG 3433 Principles of Marketing 3
MKTG 4133 Marketing Research 3
MKTG 4553 Consumer Behavior 3
MKTG 4933 Marketing Management 3

 Majors must select one of the following concentrations and must complete twelve hours of course work in the elected concentration.
### Transportation Major

The major in transportation is designed to prepare students for careers in carrier management and logistics management. Carrier management is the management of the domestic and international modes of transportation. Logistic management applies analytical techniques and uses the systems approach in managing the flow of materials into and through the production and manufacturing processes of a firm to its customers.

Basic employment opportunities exist in marketing, sales, and operations positions with carriers in all transportation modes, and in positions with shippers having responsibility in one or more of the areas under logistics management, warehousing, packaging, and materials handling. Opportunities also exist in governmental agencies.

**SEE PAGE 331 FOR TRANSPORTATION AND LOGISTICS (TLOG) COURSES**
These courses are interdisciplinary courses that are not attached to a specific department in Walton College.

Enterprise Resource Planning Minor:
The Walton College offers an interdisciplinary minor in Enterprise Resource Planning (ERP). ERP systems are large-scale programs, which are used by many large companies to integrate their business processes and run the organization using primarily one software system. The minor requires completion of 15 hours of study with all of the courses applied toward the minor taken in residence. The 15 hours include:
- WCOB 4213 ERP Fundamentals
- ISYS 4223 ERP Configuration and Implementation
- Plus nine hours from the following courses:
  - ACCT 3013 Accounting View of Economic Events
  - ACCT 3533 Accounting Technology
  - ISYS 4233 ERP Development
  - TLOG 3443 Principles of Transportation
  - TLOG 3613 Business Logistics
  - TLOG 3623 Purchasing and Inventory Systems

Students who desire to earn an Enterprise Resource Planning minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met.

Financial Economics Minor:
The Walton College offers an interdisciplinary minor in Financial Economics. The minor will provide students with the background needed for research in finance and industry. The minor requires completion of 15 hours of study with all of the courses applied toward the minor taken in residence. The 15 hours include:
- FINN 3043 Principles of Finance
- ECON 4753 Forecasting (Applied Time Series)
- Plus nine hours from the following courses:
  - FINN 3063 Investments
  - FINN 3603 Corporate Finance
  - ECON 3033 Money and Banking
  - ECON 4743 Intro. to Econometrics

Students who desire to earn a Financial Economics minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met.

SEE PAGE 333 FOR WALTON COLLEGE OF BUSINESS (WCOB) COURSES
MISSION AND OBJECTIVES

The mission of the College of Education and Health Professions is to enhance the quality of life of the citizens of Arkansas, the nation, and the world through the development of scholar-practitioners in education, health, and human services. The vision of the college is to become a nationally competitive, student-centered research college serving Arkansas and the world.

The goals of the College of Education and Health Professions are as follows:

- Strengthen the academic quality and reputation of the college by developing and enhancing programs of excellence in teaching, research, and service.
- Improve the quality and diversity of our students, faculty, and staff, and increase the size of our student enrollment.
- Generate increased private and public support for the college’s research, academic, and service initiatives.

FACILITIES AND RESOURCES

The Sylvia Hack Boyer Center for Student Services

To ensure that students receive the personal attention they need and deserve throughout their enrollment, the college established the Sylvia Hack Boyer Center for Student Services. Students who have completed 44 hours or less are assigned an academic adviser in the Center who will assist them by: providing accurate and personalized academic information, educating them about their academic responsibilities, and referring them to the internal and external resources and services of the University.

Questions pertaining to undergraduate programs, transfer of credit, student services, and administrative policies and procedures can be directed to the Sylvia Hack Boyer Center for Student Services, 479-575-4203, 339 Graduate Education Building. The Center is part of the Office of the Associate Dean for Academic Affairs. It can be reached via e-mail at bcss@uark.edu.

Organization

For administrative purposes, the programs of the college are organized under five academic units:

1. Curriculum and Instruction
   Elementary/Childhood Education
   Middle Level Education
   Secondary Education
   Special Education
2. Educational Leadership, Counseling, and Foundations
   Counselor Education
West Avenue Annex houses the following education research and service units: Office for Research, Measurement and Evaluation (ORME), Office for Educational Policy (OEP), Arkansas Leadership Academy (ALA), Teacher Advancement Program of Arkansas (TAPS), Great Expectations of Arkansas (GEA), Arts in Education (A+) programs, and the child-care projects office. Established in 1991, the Arkansas Leadership Academy is a nationally recognized statewide partnership of 13 universities, 9 professional associations, 15 educational cooperatives, the Arkansas Departments of Education, Higher Education, and Workforce Education, the Arkansas Educational Television Network, Tyson Foods Inc., Wal-Mart Stores Inc., and the Walton Family Foundation. The Office of Research, Measurement, and Evaluation conducts targeted educational research focusing on issues affecting students in Arkansas and general theoretical work in statistics, testing, and educational measurement. The Office of Education Policy was established in 2003 within the Department of Educational Leadership, Counseling, and Foundations to gather and disseminate evidence to aid lawmakers and policymakers in decision-making regarding education in the state.

Established in 1974, the Regional Continuing Education Center in Rehabilitation provides human resources development programming for personnel employed in rehabilitation programs funded by the Rehabilitation Act. These programs include the following: state vocational rehabilitation agencies, independent living centers, community rehabilitation programs, client assisted programs, and projects with industries in the states of Arkansas, Louisiana, New Mexico, Oklahoma, and Texas. The center is located at the Hot Springs Rehabilitation Center, Hot Springs, Arkansas.

Established in 1981, the Research and Training Center for People who are Deaf or Hard of Hearing conducts research and training programs to enhance rehabilitation efforts on behalf of the 24 million U.S. citizens who are deaf or hard of hearing. These programmatic efforts are directed toward enhancing the career preparation, job entry and placement, career advancement, and workplace communication accommodations consistent with the Americans with Disabilities Act. The center is located in Little Rock and offers a track in rehabilitation counseling for persons who are deaf or hard of hearing as part of the M.S. in rehabilitation counseling program.

**Academic Journals**

The College of Education and Health Professions is host to several highly regarded academic and professional journals. One such publication is the Journal of American Deafness and Rehabilitation Association, whose monographs are edited by RHAB Professor Douglas Watson. The journal is now in its 35th year of publication and is considered the nation’s leading reference for issues involving rehabilitation of persons who are deaf or hard of hearing.

The Journal of Interpretation also is edited by RHAB Professor Douglas Watson. Published by the Registry of Interpreters for the Deaf, this journal is considered the most widely read sign-language interpreting journal in the world.

In addition, the college is host to the Journal of Research & Policy Studies, edited by EDFD Professor Christopher J. Lucas.

**DEGREES OFFERED**

The college offers curricula leading to the Bachelor of Science in Education degree (B.S.E.) with several programs listed below. Several of these degree programs have concentrations and specialties that are described in the section entitled “Departmental Majors.”

The college also offers the curriculum leading to the Bachelor of Science in Nursing. The degree programs are described in this college section under the area of “Departmental Majors.”

---

**Facilities**

The Graduate Education Building and Peabody Hall serve as the nucleus of the College of Education and Health Profession’s activities. An auditorium, several conference and seminar rooms, classrooms, and offices for individual professors, along with several special administrative and service units such as dean, associate dean for administration, associate and assistant deans for academic affairs, the Sylvia Hack Boyer Center for Student Services, distance education center and educational statistics laboratory are housed in the Graduate Education Building.

Peabody Hall houses the Department of Curriculum and Instruction, Teacher Licensure, and several classrooms and offices for individual professors. Additional classroom and office facilities used by the College of Education and Health Professions are located in Ozark Hall, West Avenue Annex, and the Speech and Hearing Clinic.

The Health Physical Education and Recreation (HPER) Building houses the majority of faculty offices and classrooms for health science, kinesiology, recreation, the Office for Studies on Aging, and the Health Education Projects Office. Specialized indoor space for instruction and recreation includes two dance studios, the Donna Axum Fitness Center, four gymnasiums, an Olympic-size swimming pool, a jogging track, a climbing wall, and a combative room. The building also features a Human Performance Laboratory for instruction and research. The Department of Health Science, Kinesiology, Recreation, and Dance uses the Donna Axum Fitness Center, HPER Building Natatorium, UA tennis courts, and Barnhill Arena for instructional purposes. Intramural/Recreational Sports offices are located on the second level of the HPER Building. The intramural/recreational sports program is a University-wide service program housed in the college. Administered through the Department of Health Science, Kinesiology, Recreation, and Dance, the program provides recreational activities to the entire University community. The program is organized into seven program areas: intramural sports, fitness/wellness, facility management, special events, sport clubs, accessible recreation, and the Outdoor Connections Center.

The Communication Disorders program is housed in the Speech and Hearing Clinic. The clinic contains faculty offices, a classroom, a graduate seminar room, teaching and research laboratories, and space and facilities for the provision of services to the speech, language, and hearing impaired. University services are provided through the clinic to University students and the community.

The Eleanor Mann School of Nursing is housed in Ozark Hall. The nursing program facilities include administrative offices, faculty offices, two classrooms, two laboratories, a conference room, and a computer lab. The school has affiliation agreements for clinical practice with area health care agencies.
MAJORS, CONCENTRATIONS, AND MINORS

Majors and Concentrations

- Childhood Education
- Communication Disorders
- Health Science
- Kinesiology
  - K-12 Teaching Physical Education/Wellness & Leisure
  - Exercise Science – Exercise Physiology/Biomechanics
  - Exercise Science – Pre-Professional
  - Exercise Science – Fitness Specialist
  - Exercise Science – Pre-Athletic Training
- Middle-Level Education
- English/Social Studies
- Social Studies/English
- Science/Math
- Math/Science
- Nursing
- Recreation
- Vocational Education
- Business Education
- Family and Consumer Sciences Education
- Human Resource Development
- Industrial and Technical Education

Minors

Students in the college may declare any official academic minor available at the University of Arkansas. Students must notify the Sylvia Hack Boyer Center for Student Services of their intent to pursue a minor. The college, with the assistance of the college offering the minor, will certify that the requirements of the minor have been satisfied. The academic minor will be designated on the student’s official transcript. Requirements for the minor are listed in the catalog under the department offering the minor. The one minor offered in the College of Education and Health Professions is in Recreation (Department of Health Sciences, Kinesiology, Recreation and Dance). See page 177 for course requirements.

OTHER PROGRAMS

Curricula Offered For Initial Licensure

**Nursing Licensure:** Completing the minimum requirements for the degree of Bachelor of Science in Nursing will satisfy the academic requirements for licensure as a Registered Professional Nurse. Students must complete all of the requirements set forth by the Arkansas State Board of Nursing to be licensed as a registered nurse. See adviser for details.

**Teacher Licensure and Licensure of other School Personnel:**

The approved program of study for initial teacher licensure at the University of Arkansas, except for music and art education, and some areas of agriculture education is the Master of Arts in Teaching (M.A.T.) degree program. The M.A.T. degree program is offered in consecutive summer, fall, and spring semesters with initial enrollment in the summer semester. The M.A.T. is a graduate degree program and requires a minimum of 33 semester hours. The M.A.T. degree program has six areas of emphasis: agriculture education, childhood education, middle level education, physical education, secondary education, and vocational education. Consult the Admission Process for Initial Teacher Licensure Stages I-IV on page 166 and the Graduate School Catalog for admission and graduation requirements for the M.A.T. degree program.

The State Board of Education issues the regulations governing the licensure of teachers in Arkansas. The Board specifies minimum cut-off scores for all Praxis exams. The U of A pass rate for 2002-2003 was 100 percent, and 107 students completed the program. Each application for a teacher’s license requires completion of an approved program of study, completion of a state and national background check, and documentation of passing the Praxis exams. Those wishing to add an additional license or endorsement, should contact the Coordinator of Teacher Education in 117 Peabody Hall for the approved programs of study or go to www.uark.edu/depts/coehp/Certification.htm. Look for the menu “Additional Licensure Plan Program of Study.”

The Bumpers College of Agricultural, Food and Life Sciences, College of Education and Health Professions, Fulbright College of Arts and Sciences, and the University Teacher Education Board for Initial Certification have developed the preparation programs leading to initial teacher licensure. The Coordinator of Teacher Education will recommend students for initial teacher license who have submitted the licensing packet and successfully completed the appropriate approved program and all state licensure requirements. Licensure packets may be obtained from the Coordinator of Teacher Education, 117 Peabody Hall, 479-575-6740, or from the Arkansas Department of Education 501-682-4342. Students must follow the licensure guidelines as set forth by the Arkansas Department of Education in consultation with the Coordinator of Teacher Education. Adding an additional licensing area or endorsement may also require passing Praxis II scores and an approved program of study. See College Academic Regulations for the admission process for initial teacher licensure.

University Teacher Education Board for Initial Certification

The University Teacher Education Board for Initial Certification is composed of the associate deans; faculty representatives from the College of Education and Health Professions; Fulbright College of Arts and Sciences; the College of Agricultural, Food and Life Sciences; public school teachers and/or administrators, and students. The functions are to (1) govern the teacher education/licensure program that culminates in the Master of Arts in Teaching (M.A.T.) degree; (2) establish general policies and procedures necessary to maintain quality in the M.A.T. degree program; (3) oversee the general coordination of the initial licensure process; and (4) approve new courses and course changes in the M.A.T. program. The Board serves as a liaison group for the faculties involved and emphasizes the importance of teacher education as one of the primary responsibilities of the University.

COLLEGE ADMISSION REQUIREMENTS

All entering students (including freshmen, international, and transfer) admitted to the University of Arkansas, Fayetteville, are eligible for admission to the college. Students transferring from another college within the University must have a cumulative GPA of at least 2.00.

Transfer of Credit

The policies controlling the granting of credit for course work taken at other institutions apply as follows:

1. Neither hours nor grades earned in transfer work are used in the determination of the student’s grade-point average.

2. General transfer credit is awarded for courses in which a grade of “C” or higher has been earned. Course work must be applicable to a baccalaureate degree; credit is not granted for course work that is remedial or technical in nature. Students can petition to have up to six hours of “D” grades transfer for degree credit to the University of Arkansas. Students must have a 2.00 GPA on a 4.00 scale to be considered, and courses
must meet core or elective requirements in the student’s degree program. Courses outside the degree program and courses in the major cannot be considered for transfer. The Third Level Administrative Review Committee makes all decisions regarding “D” transfers. Petitions can be obtained from the Office of Admissions, or you can print and mail a “D” Petition Form. The form is available online at http://admissions.uark.edu/students/transfer/dpetition.pdf.

3. If a course with a grade of “D” is successfully petitioned through the Office of Admissions for “General Credit,” the College of Education and Health Professions requires a second petition called “A Petition to Accept ‘D’ Grades for Transfer Credit” to be successfully navigated. The petition can be obtained from the Sylvia Hack Boyer Center for Student Services, 339 Graduate Education Building. Each course will be reviewed by the COEHP Undergraduate Curriculum Committee. Students are encouraged to make an appointment with an academic advisor in the Sylvia Hack Boyer Center for Student Services to discuss options and to clarify this procedure.

4. Education courses completed at the lower-division (freshman or sophomore) level at another institution will not count as equivalents of upper-division (junior or senior) level courses offered in the college.

5. Courses taken at other institutions of higher education where the course content is designed to be remedial are not accepted.

6. The student should be prepared to submit official course descriptions of transfer course work if there is any question as to whether the college will grant degree credit for such work.

Undeclared Majors

Students enrolled in the College of Education and Health Professions must declare a major. For assistance contact the Sylvia Hack Boyer Center for Student Services, 339 Graduate Education Building, (479) 575-4203.

COLLEGE SCHOLARSHIPS

The College of Education and Health Professions offers limited numbers of scholarships in varying amounts. Recipient selection is based on a variety of attributes that are specific to each award. Attributes may include but are not limited to: the basis of promise, character, leadership skills, scholarship, or financial need.

Scholarship applications are available in November of each year. All current and future COEHP students are strongly encouraged to take advantage of these scholarship opportunities. For further information regarding scholarships and the application process, visit the Scholarships link on the College of Education and Health Professions’ Web site or contact the Office of the Associate Dean for Academic Affairs, 317 Graduate Education Building, 479-575-4280.

STUDENT ORGANIZATIONS

There are many general-interest societies and organizations on the campus, and nearly every department of the University maintains an honor society through which high scholarship is rewarded. Of special interest to students in the college are the following:

• Kappa Delta Pi – honor society for education
• Phi Delta Kappa – honor fraternity for graduate students
• Delta Pi Epsilon – graduate business education majors
• Kinesiology Club – for kinesiology majors
• Recreation Majors Club – for recreation students
• Razorback Athletic Training Association (RATA) – for undergraduate kinesiology majors with a concentration in exercise science – pre-athletic training, entry level graduate athletic training students and graduate assistant athletic trainers in women’s and men’s athletics
• National Student Speech-Language-Hearing Association – for communication disorders majors
• Arkansas Nursing Students Association, National Student Nurse Association, and the Pi Theta chapter of Sigma Theta Tau International Honor Society of Nursing – for nursing majors
• Rehabilitation Counseling Association for Students – rehabilitation counseling program majors.

COLLEGE ACADEMIC REGULATIONS

Admission Process for Initial Teacher Licensure

Stage I: Enrollment

Enroll in an undergraduate degree program leading to a potential teacher licensure field. Potential fields include the following:

Agricultural Education – B.S.A.
Art Education – B.F.A.
Elementary Education – B.S.E.
Human Environmental Sciences Education – B.S.H.E.S.
Kinesiology K-12 – B.S.E.
Middle Level Education – B.S.E.
Music Education – B.M.
Secondary Education – B.A., B.S.
Vocational Education – B.S.E.

Stage II: Evaluation

Complete an Evaluation for Internship by October 1 prior to entering the Master of Arts in Teaching (M.A.T.). Art and music students should complete the evaluation by October 1 prior to a fall internship and by March 1 prior to a spring internship. Satisfactory completion of this form does not guarantee admission to the Master of Arts in Teaching (M.A.T.) degree program or other teacher education programs. All requirements must be met to be cleared for the internship. This form is available from the college Web site at www.uark.edu/depts/coehp/certification.htm. The form must be completed and returned to the Coordinator of Teacher Education, 117 Peabody Hall.

Students must meet the following criteria to be cleared for internship:

1. Pass Praxis I test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203. Please note that several departments have additional program requirements regarding the Praxis I and II. Please consult with your adviser for additional requirements.

2. Obtain a “C” or better in the following pre-education core if these courses are required for your program:
   CIED 1002, CIED 1011, CIED 3023 (PHED 3903 for KINS K-12 majors), CIED 3033, ETEC 2001, ETEC 2002L.
   In addition, For Middle-Level Education and Elementary Education a minimum of “C” or higher must be earned in ENGL 1013, ENGL 1023, ENGL 2003, COMM 1313, and MATH 1203 unless UA exemption is earned in one or more of the courses.

3. Complete additional licensure requirements: COEHP majors take either HLSC 1002 or 1103, and PLAC 1621. PHED majors take either HLSC 1002 or 1103, and PHED 3042. ELED and MDLV majors take HIST 3383. SEED Social Studies students take either HIST 4583 or HIST 3383 and any ECON course.

4. Secondary Education majors except for art and music majors, must complete the following courses with a grade of “C” or higher. CIED 3023 or 4023, CIED 4131, ETEC 2001/2002L or demonstration of computer competencies in a portfolio.

5. Obtain a “C” or better in the six hours of program-specific courses (see your adviser for information).
6. Schedule a visit with your adviser for additional requirements including admission to upper-division courses.
7. Consult with your adviser regarding Praxis II requirements.
8. Earn a cumulative GPA of 2.70 or higher in the undergraduate degree program (special conditional admission will be considered on a case-by-case basis for students with a GPA between 2.5 and 2.69). Some programs require a higher GPA. Consult your adviser for the GPA requirements for your program.

**Stage III: Admission**

The following minimum criteria are necessary to be eligible for consideration for admission to the M.A.T. Degree Program: (Consult with your faculty adviser for additional requirements set by your program.)

1. Meet all requirements in stages I and II.
2. Complete an appropriate undergraduate degree program.
3. Earn a cumulative GPA of 2.70 or higher in all previous courses completed as part of a bachelor’s degree program. Some programs require a higher GPA. Consult your adviser for the GPA requirements for your program.
4. Obtain recommendation for admission from M.A.T. program area based on successful completion of portfolios, evaluation for internship, GPA requirements, course work requirements, selected written recommendations, an interview, and other requirements specified by your program.
5. Obtain admission to Graduate School. (See UA Graduate School Catalog for details.)

Enrollment in each cohort will be limited. Transfer students will be allowed to enter the program on a space available basis and must progress through all three admission stages.

**Stage IV: Graduation requirements for M.A.T.**

1. Meet all requirements in stages I – III.
2. Obtain a minimum cumulative GPA of 3.00.
3. Complete a minimum of 33 graduate semester hours as specified by program area.
4. Satisfactorily complete an internship. The internship will be completed at a school/district in Benton or Washington County that has been approved by the Northwest Arkansas Partnership Steering Committee.
5. Pass the appropriate Praxis tests (see adviser for the appropriate test) by meeting or exceeding the Arkansas Department of Education cut-off scores. This test is required for most programs. Please consult with your adviser.
6. Successfully complete Comprehensive Examination.
7. Consult with your adviser for other requirements.
8. Apply for degree at the Graduate School, 119 Ozark Hall.

**Licensure**

Students who have completed the stages listed above must obtain a licensure packet from the Coordinator of Teacher Education, 117 Peabody Hall, prior to entering internship.

**NOTE:** Students should always consult the Coordinator of Teacher Education or adviser regarding licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

**NOTE:** Students who have completed the B.M. or B.F.A. in music or art education and the B.S.A. in agricultural education and have completed the internship may obtain the licensure packet from the Coordinator of Teacher Education, 117 Peabody Hall.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. Application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

**College Honor Roll**

At the close of each semester, the college recognizes students who qualify for the honor roll. They are the 10 percent of the highest-ranking students in each class. Students must carry a minimum of 12 semester hours to be eligible for the Honor Roll.

**Graduation with Honors**

Graduation with Honors will be conferred to College of Education and Health Professions students (who are not participating in the college “Honors Program”) based upon their University of Arkansas cumulative grade-point average at the time of graduation. To earn this distinction, a student must have completed at least one-half of the course work required for his or her degree at the University of Arkansas, Fayetteville. The graduation with honors designation will be assigned as follows:

1. For highest distinction, the student must have a minimum cumulative grade point average of 3.95 and rank in the top 10 percent of the graduating class.
2. For high distinction, the student must have a minimum cumulative grade point average of 3.75 and rank in the top 10 percent of the graduating class.

**HONORS PROGRAM**

The College of Education and Health Professions Honors Program is designed for students who value and want to be challenged by an exceptional educational experience and want to focus their studies intensively. The program creates and supports a caring academic environment of intellectual adventure and provides a carefully integrated and demanding curriculum. And the rewards are immense: high academic achievement; an honors degree on the student’s transcript; and recognition at commencement.

The mission of the Honors Program is to: Establish and maintain an Honors community of learning that is intellectually rigorous, personally and culturally enriching, and fosters learning and discovery through independent and collaborative inquiry; Allow students to be creative, inquisitive and think outside the box; Support student research and analysis of ideas; Support student academic ventures through mentoring, travel, and supplies; when presenting work at undergraduate research symposia; Challenge students to connect the classroom with the larger world by expanding social and cultural experiences and promoting leadership, and prepare students for admission to and success within graduate and professional schools in the United States and abroad.

Benefits of participating in the Honors Program include: Small class sizes, close contact with talented faculty, opportunity for independent study that counts toward the requirements of the Honors Program, special academic counseling and priority registration, increased confidence and skill in writing, Honors housing, recognition on transcript as “Graduate of the University Honors Program,” enhanced career opportunities, and increased advantages for graduate or professional school applicants.

Admission to the COEHP Honors Program assures automatic admission to the University of Arkansas Honors College. The following are admission criteria for students seeking admission to the COEHP Honors Program:

**Entering Freshmen:**

- 28 ACT or equivalent SAT score (not super scored)
- 3.5 or greater high school GPA
Students Applying Following Their 1st Academic Year:
Successful completion of 1 academic year at the University with a 3.5 or greater GPA
Departmental recommendation regarding the student’s academic abilities

Inter-College Transfer of Honors Students:
Students at the University who were honors students in other college honors program on campus may transfer into the COEHP under the following criteria:
- 0-29 hours- 3.25 cumulative GPA
- 30-59 hours- 3.37 cumulative GPA
- 60-89 hours- 3.50 cumulative GPA

Transfer Students:
- 3.5 Cumulative GPA in ALL transfer work
- Letter of recommendation from a previous professor regarding the student’s academic abilities

Application:
1. Complete the Honors Program Application and return to: COEHP Honors Program, Office of the Associate Dean for Academic Affairs, Graduate Education Building, Room 317 Fayetteville, AR 72701
2. All applications will be reviewed and approved by the Honors Program Council. A letter of acceptance will be sent to the student within 10 working days of receipt of the application.
3. Following admission to the COEHP Honors Program, a faculty liaison advisor will be assigned from the student’s academic department in addition to an academic advisor in the Sylvia Hack Boyer Center for Student Services.

Eligibility for continued enrollment in the COEHP Honors Program will be based on the following cumulative minimum grade-point averages:
- 3.25 GPA - At the end of the freshman year (30 hours)
- 3.37 GPA - At the end of the sophomore year (59 hours)
- 3.5 GPA - At the end of the junior year (93 hours)
- 3.5 GPA - At graduation

At the end of each semester, the director of the COEHP honors program will review the academic records of all enrolled honors students to determine whether each one has the cumulative grade-point average to continue in the program. If a student becomes ineligible, he/she will be requested to drop all honors courses for which he/she is registered for the following semester. The ineligible student will be flagged as “probationary status.” GPA will be reassessed following completion of the semester. An honors student may stay on probationary status for only one semester without being dropped from the honors program. The student will be reinstated to good standing in the honors program or dropped permanently from the program.

The course requirements for completion of the College of Education and Health Professions honors program are as follows:
1. The student meets all University, COEHP, and department degree requirements.
2. Completion of 12 hours of honors credit, only six of which may be taken outside the COEHP.
3. The following courses are required: 6 hours Honors sections of core classes taken from Arts and Sciences, 6 hours Honors sections of classes taken within the COEHP including HNED 3001 H Honors Education Thesis Tutorial, HNED 4003 H Honors Education Thesis/Project, a minimum of 2 hours of honors courses from the student’s academic department.
4. Written submission of the honors thesis/project to the COEHP Honors Council and oral presentation of the Honors Thesis to faculty and students in the COEHP (arranged by the Honors Council).
5. Graduation with a minimum GPA of 3.50. Summa Cum Laude will be awarded Honors Students graduating with a GPA > 3.9. Magna Cum Laude will be awarded Honors Students graduating with a GPA > 3.7. Cum Laude will be awarded Honors Students graduating with a GPA > 3.5

A requirement for graduating from the College of Education and Health Professions Honors Program is completion of the thesis or creative project. Students must complete both the Honors Thesis Tutorial (HNED 3001H) and Honors Thesis/Project (HNED 4003) courses. The Honors Thesis Tutorial (HNED 3001H) is designed to provide the foundation for the Honors Thesis. Students and faculty tutors work one on one exploring a specific topic, which has been agreed upon by the student and the professor. This course may be repeated for 5 hours.

The Honors Thesis/Project (HNED 4003) is designed to provide the honors student with the opportunity to complete original research or creative activity in their major field. Approval of the student’s thesis/project and oral presentation are requirement for successful completion of this course.

The thesis/project process allows students to advance their research skills significantly or perfect their crafts in their respective fields. The Honors thesis/project may well be the students’ most valuable educational experience requiring students to examine complex objects, ideas and issues. Students are expected to submit work that meets the scholarly expectations of the discipline and the COEHP Honors Program.

The thesis/project experience develops self-reliant scholars and will serve Honors Students well as they leave the University to take their place as community, professional, or academic leaders. The thesis or project is a stepping stone to graduate or professional school.

The Honors student is to complete the Honors Thesis/Project Tutorial (HNED 3001H) course and submit their Honors Thesis/Project Proposal the semester prior to enrolling in the Honors Thesis/Project (HNED 4003H) course. The proposal form stands as a “contract” between you and your faculty mentor and committee. It is an agreement with the COEHP Honors Council to complete the work described within the semester in which the student enrolls in the thesis/project course.

The abstract required on the Honors Thesis/Project Proposal Form should give sufficient information about the nature and scope of the proposed work and should be written for a well-educated but general audience. [Note: Your faculty mentor may require a full prospectus in the more specialized language of your discipline prior to accepting the abstract.] If there are substantive changes to the Honors Project, a revised abstract should be submitted on a new proposal form to the Honors Council.

The student must be enrolled in the Thesis/Project course during the semester the thesis will be completed. It is assumed, however, that the student will be working on the thesis idea, the proposal and completion of the project throughout the junior and senior years.

The final thesis should be prepared and formatted according to the conventions employed in the discipline of study. Students participating in a team project must submit a copy of the team’s project as well as provide the COEHP Honors Council a two-to-four page summary documenting their individual contribution to the team effort.

The final thesis and the Honors Thesis/Project Approval Form should be submitted to the faculty mentor and committee two weeks prior to the last class day. Presentation of the Thesis/Project to the COEHP faculty and Honors Council will occur the week preceding finals week. Once the faculty mentor has signed the approval form, the thesis and form should be received in the Honors Council by the last class day. For more information about the honors program or to complete an application form, please refer the college’s honors Web page at http://www.uark.edu/depts/coehp/Honors_Program/.

SEE PAGE 292 FOR COLLEGE OF EDUCATION AND HEALTH PROFESSIONS HONORS PROGRAM (HNED) COURSES
DEGREE REQUIREMENTS

Minimum Requirements for the B.S.E. or B.S.N. Degree

The candidates for a baccalaureate degree from the college must meet University requirements, which specify at least 124 semester hours of work with a grade-point average of at least 2.00 on all work attempted in the University. Students exempting any course must still meet the 124-hour graduation requirement and should consult their adviser for specific program requirements. Exemption of courses does not result in credit earned. The students must comply with the prescriptions and restrictions listed below and under General Studies and must complete the requirements in one or more of the approved degree programs.

Students must also meet all other University Requirements for Graduation, including the University Core requirements (page 40). Students are required to have a pre-graduation check at least one semester prior to graduation. Students who complete the pre-graduation check and meet all University and College of Education and Health Professions requirements may apply for graduation under the guidelines detailed on page 42. All course work, University requirements, and college requirements must be completed by the deadline for the term in which applied. Students not graduating in spring, but wishing to participate in the spring commencement ceremony, must apply for graduation by the established priority deadline for the spring term and have no more than 12 hours of course work remaining for the baccalaureate degree. For clarification, please contact the Sylvia Hack Boyer Center for Student Services, 339 Graduate Education Building, at 479-575-4203.

General Studies – Undergraduate Programs

The following are general studies requirements that must be met by all students completing an undergraduate program in the College of Education and Health Professions. Some programs may require specific courses as part of the general studies requirements. Students should consult their adviser for program-specific requirements.

* COEHP Core Requirements

GRADUATE STUDIES

The Graduate School, in cooperation with the college offers advanced work in education and health professions leading to the degrees of Master of Arts in Teaching, Master of Science, Master of Education, Educational Specialist, Doctor of Education, and Doctor of Philosophy.

The Graduate School awards the graduate degrees. Students who are interested in registering for graduate courses or in becoming candidates for these degrees should consult the dean of the Graduate School and the Graduate School Catalog.

Students who plan to study for an advanced degree in the subject-matter field should consult with the head of the department concerning course requirements to be eligible to begin graduate study. Specialization requirements for a B.S.E. degree in the College of Education and Health Professions may not be sufficient in every field to gain admission for graduate study without deficiencies.

ACCREDITATIONS

Students who complete the approved program of study leading to initial licensure are eligible to receive licenses to teach at the grade level or in the fields for which they have made preparation upon application and presentation of acceptable scores on the appropriate Praxis exams. However, students must follow licensure guidelines set forth by the Arkansas Department of Education to be licensed to teach.

The teacher education program of the College of Education and Health Professions is accredited by the National Council for Accreditation of Teacher Education (NCATE), 2010 Massachusetts Ave., NW, Suite 500, Washington, D.C. 20036; phone 202-466-7496; Web: www.ncate.org. This accreditation covers the initial teacher preparation programs and/or advanced educator preparation programs. Because of the accreditation by the National Council for Accreditation of Teacher Education, students who complete the curricula as outlined in this catalog are eligible to be recommended for licensure in states that agree to certify graduates who are recommended by the College of Education and Health Professions as having fulfilled its requirements.

The teacher education program submits data to Educational Testing Service for its Title II Report. According to data from this report, there were 112 individuals who completed the teacher education program at the University of Arkansas in 2002-2003. Of these, 100 percent passed the Praxis I and II tests by the cut-off date.

The University of Arkansas holds membership in and is accredited by the North Central Association of Colleges and Secondary Schools. The college is also a member of the American Association of Colleges for Teacher Education. The graduate program in communication disorders is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association. The counselor education graduate program is nationally accredited through the Council for the Accreditation of Counseling and Related Educational Programs (CACREP), 5999 Stevenson Avenue, 4th Floor, Alexandria, Virginia 22304; 1-800-347-6647, ext. 301. The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the Commission on Collegiate
The Department of Curriculum and Instruction sponsors initial teacher licensure programs in the areas of childhood education, middle level education, and secondary education. The department also offers additional licensure plans in ESL, gifted and talented, special education and selected other areas (please see College Web Site licensure link). With the cooperation of the Department of Health Science, Kinesiology, Recreation, and Dance; the Department of Rehabilitation, Human Resources and Communication Disorders; the J. William Fulbright College of Arts and Sciences; and the Dale Bumpers College of Agricultural, Food and Life Sciences, additional secondary school licensure programs are made available.

SEE PAGE 260 FOR CURRICULUM AND INSTRUCTION (CIED) COURSES

**Childhood Education**

- Associate Professors Collier, Imbeau, Lefever-Davis, McGee
- Assistant Professors Eilers, Kirkpatrick
- Instructors Cronan, Riggs, Frevert, Tanneberger

The University of Arkansas offers the B.S.E. degree in childhood education and the M.A.T. degree in childhood education. To be recommended for an initial teaching license in childhood education (pre-kindergarten through grade four) the student must complete both degree programs. Information about the M.A.T. degree program in childhood education can be found in the Graduate School Catalog.

### Academic Regulations for Childhood Education Majors and Others Seeking Admission to the Undergraduate Teacher Education Program

**Stage I:** Sylvia Hack Boyer Center for Student Services Advisement

1. Enroll in the undergraduate B.S.E. program in childhood education.

2. Complete 45 hours.

3. Obtain a grade of “C” or better in CIED 1002 and CIED 1011 (Introduction to Education/Practicum) and in MATH 1203 or higher.

4. Establish a GPA of 2.50 or better at the University of Arkansas or on transfer hours.

5. Pass Praxis I (required for enrollment in upper-division professional education courses).

**Stage II: Program Advisement**

1. Register for and complete screening (attending required information session and participating in an oral interview with program faculty and providing a copy of the appropriate Praxis passing scores) in the first semester advised by childhood education program faculty.

2. Eligibility to enroll in subsequent program courses is contingent upon successful screening as well as meeting ALL Stage I requirements.

3. Establish a GPA of 2.7 or better.

**Stage III: Admission to Undergraduate Teacher Education Program**

Eligibility to enroll in upper-division classes (CIED 3103, CIED 3113, CIED 4128, CIED 4113, and CIED 4101) is based on successfully meeting all Stage II requirements and maintenance of 2.70 or better GPA.

NOTE: All professional education courses in CIED must have a grade of “C” or better. Passing appropriate Praxis scores and a GPA of 2.7 or better are required for enrollment in upper-division (senior year) professional education courses. CIED 3103 and CIED 3113 are only offered during the fall semester. CIED 4128, CIED 4113, and CIED 4101 are only offered during the spring semester. No teaching methods courses may be taken by correspondence.

ETEC 5062 Teaching and Learning with Computer Based Technologies

Additional Program Requirements 23
CIED 5003 Childhood Seminar
CIED 5073 Case Study in Childhood Education
CIED 5173 Literacy Assessment
CIED 5183 Readings in Early Childhood Education
CIED 5162 Applied Practicum
CIED 5063 Contemporary and Futuristic Concerns of Childhood Education
CIED 508V Childhood Ed. Cohort Teaching Internship

NOTE: Enrollment in the M.A.T. with an emphasis in childhood education is limited. A passing score on the appropriate Praxis test is a requirement to begin the M.A.T. A passing score on an additional Praxis test is a requirement to graduate from the M.A.T. (Students must consult with their advisers to determine the appropriate Praxis exams to take for admission and graduation.) Other specific application procedures and selection criteria are available in the Department of Curriculum and Instruction, 214 Peabody Hall or from childhood education faculty advisers.

B.S.E. in Elementary Education
For information on the B.S.E. in elementary education offered at Northwest Arkansas Community College, refer to the COEHP website, Department of Curriculum and Instruction.

Middle-Level Education
• Professor Totten
• Associate Professors Johnson, Morrow

The Bachelor of Science in Education (B.S.E.) in middle-level education is a teacher preparation degree that prepares educators for meeting the needs of early adolescents. Grounded in an understanding of and appreciation for the physical, intellectual, emotional, and social development of early adolescents (ages 9 to 14, and/or grades four to eight), the B.S.E. degree provides the prerequisite knowledge, skills, and dispositions necessary for entry into the Master of Arts in Teaching (M.A.T.) program for initial licensure in middle-level education. Candidates for the B.S.E. in middle-level education will be eligible to apply for entry to the M.A.T. program, through which they will develop further expertise in educating early adolescents and graduate with the requisite skills and degree for teaching grades four to eight.
Requirements for the B.S.E. in Middle-Level Education:

General Studies

(47-50)

(College & University core requirements)

English Composition, Literature, Social Sciences, Communication, Science, Mathematics, Health and Wellness, and Fine Arts and Humanities

Pre-Education Courses

12 Hours Pre-education College Core:

CIED 1002/1011 Intro. to Education and Practicum

ETEC 2001/2002L Educational Technology

CIED 3023 Survey of Exceptionalities

CIED 3033 Classroom Learning Theory

12 Hours Designated by Program:

CIED 3053 The Emerging Adolescent

CIED 3043 Intro. to Middle Level Principles and Methods

CIED 3073 Early Adolescent Literature

CIED 3063 Literacy Strategies for Middle Level Learners

Dual Areas of Concentration

52-55

In accordance with middle-level licensure in Arkansas, pre-service teachers must choose a dual area of concentration with requisite number of hours for both the primary and supporting areas of concentration. Primary/supporting areas are English/social studies (54 hours), social studies/English (55 hours), mathematics/science (53 hours), or science/mathematics (52-53 hours). This dual emphasis lends itself to interdisciplinary instruction that is reflective of middle-level philosophy.

Middle-Level Program Requirements:

CIED 3053 The Emerging Adolescent

(Prerequisites: CIED 1002/1011, PSYC 2003; pre- or co-requisite: CIED 3033)

CIED 3043 Intro. to Middle-Level Principles and Methods (Prerequisite: CIED 3053)

CIED 3073 Early Adolescent Literature

(Prerequisite: CIED 3043; co-requisite: CIED 3063)

CIED 3063 Literacy Strategies for Middle-Level Learners (Prerequisite: CIED 3043; co-requisite: CIED 3073)

Admission Requirements

Upon completion of 45 hours, prospective majors must apply for acceptance into the program and will be evaluated based on the following performance criteria:

• Completion of CIED 1002/1011 Intro. to Education/Practicum with a grade of “C” or better,

• Minimum 2.70 GPA (including transfer hours).

General Studies

ENGL 1013, ENGL 1023, or ENGL 2003

or exempt with test.

Literature (American, English, or World)

Social Studies

(See University State Minimum Core Requirements – 3 hours must be U.S. History or Government, 3 hours must be PSYC 2003, and

6 hours of elective introductory-level courses from the following: sociology, history, political science, economics, anthropology, geography, or philosophy)

COMM 1313 Communications

3

Fine Arts, Humanities

(see University State Minimum Core Requirements)

6

Laboratory Science

8

(4 hours of biological and 4 hours of physical science are required for all students entering M.A.T. program)

Mathematics (college algebra or above)

3

Health and Wellness

3

(HLSC 1002 Wellness Concepts, and PEAC 1621 Fitness Concepts)

Electives (defined by program)

Total Hours Required for General Studies

47-50

Pre-education Core Requirements

CIED 1002/1011 Intro. to Education/Practicum

3

ETEC 2001/2002L Educational Technology

3

CIED 3023 Survey of Exceptionalities

3

CIED 3033 Classroom Learning Theory

3

Common Core for all middle-level education majors

CIED 3053 The Emerging Adolescent

3

CIED 3043 Intro. to Middle Level Principles and Methods

3

CIED 3073 Early Adolescent Literature

3

CIED 3063 Literacy Strategies for Middle Level Learners

3

Total Hours for Pre-education Core

24

Dual Areas of Concentration: As determined by State licensure requirements.

English/Social Studies

Social Studies/English Science/Math Math/Science

Students must complete a minimum of 21 (24 for science) required hours in primary area and 9-12 restricted elective hours in supporting area.

Total Hours for Areas of Concentration

52-55

Total Hours for B.S.E. in Middle-Level Education

124-130

English/Social Studies

English

ENGL 1213 Intro. to Literature

ENGL 2133, ENGL 2143, ENGL 2153, ENGL 2163,

History of Literature in English I-IV

ENGL 4003 English Language and Composition for Teachers

ENGL 3183 Modern English Syntax and Style

ENGL 4253 African Literature

ENGL 3653 Intro. to Shakespeare

3-hour course above 3000-level selected from Medieval, Renaissance (excluding Shakespeare), Restoration, or 18th Century Literature

3-hour course above 3000-level selected from 19th Century, 20th Century, or American Literature
Social Studies

HIST 3383 Arkansas and the Southwest
3 hours from Africa, Asia, Latin America, Near East history: HIST 3033, HIST 3043, HIST 3203, HIST 3233, HIST 3473, HIST 3503, HIST 4313, HIST 4323, HIST 4353, HIST 4383
GEOG 1123 Human Geography
ANTH 1023 Intro. to Cultural Anthropology
HIST 4073 Renaissance and Reformation, 1300-1600

NOTE: The program above describes the minimum requirements for a degree in Middle-Level Education. Interested students should consult a Middle-Level Program faculty adviser regarding licensure requirements.

Admission requirements for the Middle-Level M.A.T. degree program for initial licensure are as follows:
The Master of Arts in Teacher (M.A.T.) degree program in Middle Level Education is a 34-semester hour program. The M.A.T. degree is the initial licensure program for students at the University of Arkansas.

Prerequisites to the M.A.T. Degree Program: Students will be selected up to the maximum number designated for each cohort area of emphasis.

Admission Requirements:
1. Completion of the pre-education core on page 171 with a minimum of “C” in all courses
2. Completion of all prerequisite courses in teaching field
3. Passing scores on appropriate Praxis test
4. Satisfactory completion of Evaluation for Internship
5. Completion of a B.S.E. in Middle-Level Education (Social Studies/English, English/Social Studies, Math/Science, or Science/Math). Cumulative GPA of 3.00 in all previous courses
6. Admission to the Graduate School
7. Admission to the Teacher Education Program
8. Recommendation from the Department of Curriculum and Instruction based upon:
   a. Middle-level writing assessment
   b. Interview with middle-level education faculty and public school administrators and faculty
   c. Portfolio
SEE PAGES 260 FOR MIDDLE-LEVEL EDUCATION (CIED) COURSES

Secondary Education (SEED)

- Professors Besonen, Farah, Taylor, Totten
- Associate Professor Wavering
- Assistant Professor Lincoln

Secondary Schools Program

The Masters of Arts in Teaching (M.A.T.) is a degree program of 33-34 semester hours. The M.A.T. degree is the initial teacher licensure program for students at the University of Arkansas. Students licensing to teach in grades 7-12 will receive a degree from the J. William Fulbright College of Arts and Sciences with a specialization in one of the following areas: anthropology, biology, chemistry, communication, drama, economics, English, foreign language, geography, geology, history, journalism, mathematics, physics, political science, psychology, sociology, or any other appropriate degree.

Admission Requirements

Prerequisites to the M.A.T. Degree Program: Meeting or exceeding minimum requirements does not guarantee acceptance into the M.A.T. Admission requirements for the M.A.T. degree program for initial licensure are as follows:

1. Completion of an appropriate undergraduate degree program
2. Cumulative GPA of 2.70 in all previous undergraduate courses
3. Admission to the Graduate School
4. Admission to Teacher Education Program and admission interview.
5. Completion of all prerequisite courses in teaching field.

Completion of CIED 4023 Teaching in Inclusive Secondary Settings and CIED 4131 Practicum in Secondary Education. Competency in use of technology (see program for requirements).
6. Payment of internship fee

Refer to list of steps and deadlines for acceptance into the Secondary Education M.A.T. program, available in the Sylvia Hack Boyer Center for Student Services (bcss@uark.edu).

SEE PAGE 328 FOR SECONDARY EDUCATION (SEED) COURSES

Special Education (SPED)

- Professors Gartin, Smith
- Associate Professor Imbeau
- Assistant Professor Collins
- Instructor Jordan

State licensure requirements for special education changed effective January 1, 2002. The University of Arkansas no longer offers an undergraduate degree in special education. Information regarding the Master of Education in special education can be found in the University of Arkansas Graduate School Catalog.

The Department of Educational Leadership, Counseling, and Foundations offers graduate-level courses in five distinctive academic and degree programs. Master’s, specialist, and doctoral degrees may be obtained in counselor education, educational administration, educational foundations and higher education. A master’s degree may be obtained in educational technology. Educational foundations also offers courses in research and statistics for all programs. Undergraduate courses are offered by counselor education and educational technology.

The program in health science is designed to prepare candidates for a variety of career options in the vast field of health education and health promotion. Career opportunities may include planning, development, and delivery of health programs in various settings. These settings may include hospitals, government agencies, non-profit organizations, community organizations, corporations, and other places of occupation. Graduates of this program should be well prepared to enter the work force at an entry level position in community health or graduate programs of study in such areas as health education and health promotion, corporate health, public health, health care administration, and other allied health professional schools.

The candidate for the Bachelor of Science in Education degree with a major in health science will focus on community health. All students must complete the University Core requirements as listed on page 40 and the college requirements as listed on page 169. In addition, all students must take the courses listed below under required general studies for the health science major and the additional health science major requirements. A minimum of 127 semester hours is required for graduation in the major of health science.

**NOTE:** A student preparing to teach in the public schools in kinesiology must select the K-12 teaching concentration, complete pre-M.A.T. requirements, graduate with a cumulative GPA of 2.70 or above, and be admitted to Graduate College and other post-baccalaureate programs. Students planning on applying for the M.A.T. degree (M.A.T.) to be eligible to apply for initial teacher licensure in the State of Arkansas. Students planning on applying for the M.A.T. degree (M.A.T.) to be eligible to apply for initial teacher licensure in the State of Arkansas.

**Kinesiology (KINS)**
- University Professor Brown
- Professors Di Brezzo, Fort, Gorman, Riggs
- Associate Professor Lirgg
- Clinical Associate Professor Kern
- Assistant Professor Ferguson
- Clinical Assistant Professors Bonacci, Smith-Nix
- Instructors Forbess, Mayes, Vardiman

The program in kinesiology is designed to prepare candidates for a variety of career options in the vast field of movement science. Career opportunities may include teaching physical education, coaching, analyzing and prescribing fitness programs, athletic training, or preparation for professional programs in allied health. Graduates of this program should be well prepared to enter graduate programs of study in such areas as pedagogy or adapted physical education, exercise physiology, biomechanics, athletic training, sport management, medical school, physical therapy school, and other allied health professional schools.

The candidate for the Bachelor of Science in Education degree with a major in kinesiology must select one of five concentrations:

I. K-12 Teaching Physical Education/Wellness & Leisure
II. Exercise Science – Exercise Physiology/Biomechanics
III. Exercise Science – Pre-Professional
IV. Exercise Science – Fitness Specialist
V. Exercise Science – Pre-Athletic Training

All students must complete the University Core requirements as listed on page 40 and the College of Education and Health Professions requirements as listed on page 169. In addition, all students must take the required general studies for the kinesiology major and the kinesiology core requirements listed below. As part of the University Core requirements and College of Education and Health Professions requirements, specific math and science courses are required within the kinesiology major and concentrations. A student preparing to teach in the public schools must select the K-12 teaching concentration, complete the stages of admission for initial licensure as listed on page 166, have a cumulative GPA of 2.70 or above, and be admitted to Graduate
School to be eligible to apply for initial teacher licensure. Students interested in obtaining an endorsement in coaching should contact the Coordinator of Teacher Education, 117 Peabody Hall. Students planning on applying for other post-baccalaureate programs should inquire as to prerequisite requirements. Students planning on a major in kinesiology with a concentration in exercise science (concentrations II, III, IV, or V) must earn a grade of “C” or better in KINS 3153, KINS 3353, and KINS 3533. A minimum of 124 semester hours is required for graduation in the major of kinesiology. The total hours may vary slightly depending on the concentration of study.

Curriculum for a Major in Kinesiology

**Required general studies for the Kinesiology Major**

- **CHEM 1103/1101L/1100D University Chemistry**
- **KINS 1013 Careers in Kinesiology: A History and an Overview**
- **KINS 2223 Motor Development**
- **KINS 3153 Exercise Physiology** (for exercise science concentrations II-IV)
- **KINS 3163 Exercise Physiology: Theory and Application**
- **KINS 3353 Mechanics of Human Movement**

**Concentration I: K-12 Teaching**

- **Physical Education/Wellness & Leisure**
- **RECR 1001L Outdoor Recreation Lab**
- **BIOL 1543/1541L Principles of Biology**
- **PHED 2003 Teaching Styles/Lesson Planning**
- **PHED 2013 Teach Progressions/Assessment of Basic Skills**
- **PHED 2023, Teach Progressions/Assessment of Advanced Skills**
- **PHED 3012 Teaching Games**
- **PHED 3022 Teaching Stunts/Tumbling**
- **PHED 3032 Teaching Rhythms**
- **PHED 3042 Teaching Fitness**

**Concentration II: Exercise Science – Exercise Physiology/Biomechanics**

- **CHEM 1123/1121L/1120D University Chemistry II**
- **PHYS 2013/2011L/2010D College Physics I**
- **PHYS 2033/2031L/2030D College Physics II**
- **BIOL 2213/2211L Human Physiology**
- **HESC 1213 Nutrition in Health**
- **PSYC 4183 Physiological Psychology**

**Concentration III: Exercise Science – Pre-Professional**

- **PSYC 2013 Intro. to Statistics for Psych.**
- **PSYC 3023 Abnormal Psychology**
- **MATH 2043 Survey of Calculus**
- **CHEM 3603/3601L/3600D Organic Chemistry I**
- **CHEM 3613/3611L/3610D Organic Chemistry II**
- **CHEM 3813 Intro. to Biochemistry**

**Concentration IV: Exercise Science – Fitness Specialist**

- **MATH 1203 College Algebra**
- **MATH 1213 Plane Trigonometry**
- **CHEM 2613/2611L/2610D Organic Physiol.**
- **PSYC 3023 Abnormal Psychology**
- **MGMT 3563 Management Concepts in Org. Behavior**
- ** MKTT 3433 Principles of Marketing**
- **KINS 4773 Performance and Drugs**
- **HESC 1213 Nutrition in Health**

**Pre-Education Core Specialty Program Courses**

- **KINS 2223 Motor Development** (hours counted in the kinesiology core)
- **CNED 4003 Classroom Human Relations Skills**
- **11-14 hours toward course content in health science**
- **Analytical Basis/Movement**
- **KINS 3533 Laboratory Techniques**

The third-year program in the K-12 concentration consists of 53 hours of graduate courses including student teaching internship and a comprehensive exam. Successful completion should result in eligibility for teaching licensure and the Master of Arts in Teaching (M.A.T.) degree. (Refer to the Graduate School Catalog for special requirements.)
PSYC 3023 Abnormal Psychology (takes place of PSYC 4183 in Exercise Science Core)
KINS 2393 Prevention and Care/Athletic Injuries
KINS 3093 Application Techniques in Athletic Training
KINS 4773 Performance and Drugs Professions
HLSC 2662 Terminology for the Health Professions
HLSC 3633 First Responder – First Aid
VOED 4403 Nutrition Education and Counseling
Additional adviser-approved electives (9hrs.)

SEE PAGE 298 FOR KINESIOLOGY (KINS) COURSES

Recreation (RECR)

• Professor Hunt
• Associate Professors Langsner, Moiseichik
• Assistant Professor Hughes

The program of recreation is designed to prepare candidates for a variety of career opportunities in the field of recreation and parks. Career opportunities may include park and recreation directors for a city, therapeutic recreation specialists, fitness center managers, state and national park managers, camp administrators, or work in YMCAs, Boys and Girls Clubs, or other youth-serving agencies. Graduates of this program should be well prepared to enter the recreational workforce at an entry level position or pursue graduate studies in such areas as recreation management, sport management, or other allied health professional schools.

The candidate for the Bachelor of Science in Education degree with a major in recreation must select a concentration of study in an area of interest with help from a recreation faculty academic adviser. Each concentration is developed individually to meet specific career goals. Concentrations are 18-21 hours, generally in academic areas other than recreation. Examples of concentrations of study include but are not limited to, public recreation, children and families, fitness club management, commercial recreation, aquatic management, therapeutic recreation, camp administration, outdoor leadership, community sports, youth at risk, and outdoor recreation.

All students must complete the University Core requirements as listed on page 40 and the college requirements as listed on page 169. In addition, all students must take specific general studies courses to meet the recreation core requirements listed below. As part of the University Core and College of Education and Health Profession requirements, specific social sciences and science courses are mandatory within the recreation major and concentrations. Recreation majors must obtain a “C” or better in all courses beginning with the alpha code RECR.

To enroll in RECR 440V, students must have a 2.50 GPA or better in RECR core and concentration courses. Many courses in the recreation curriculum are taught in sequential order. Please check catalog course descriptions for prerequisites.

There are several experiential requirements within the recreation core. Students must complete three practicum experiences (RECR 201V) in three different agencies. Each experience totals 45 hours. The internship (RECR 440V), a more intensive experience requires a minimum of 400 hours of full time work for 12-15 weeks in an agency with a qualified park and recreation professional. Students in the recreation program must obtain three certifications that must be appropriate to recreation and be pre-approved by the recreation program. For additional information regarding these certifications see a recreation faculty advisor. Certifications must be valid at the time of graduation and be completed before a grade will be assigned in RECR 4013 Contemporary Issues in Leisure. A minimum of 124 hours are required for graduation in the recreation major. The total hours may vary slightly depending on the study concentration.

An undergraduate minor in recreation is also available to students enrolled in other colleges. Students with interests related to the recreation profession such as business, biology, human environmental science, or horticulture may elect the 15-hour minor. This minor can enhance future career opportunities.

**ELEANOR MANN**  
**SCHOOL OF NURSING (NURS)**

Tom Kippenbrock  
Director  
217 Ozark Hall  
479-575-3904  
E-mail: nursing@uark.edu

- Professors Kippenbrock, Neighbors  
- Associate Professors Barta, Lawson  
- Assistant Professor Smith-Blair  
- Instructors Buron, Howard, Kolb-Selby, Meadows, Miller, Schmeringer

The mission of the Eleanor Mann School of Nursing is to promote the health of society through education of professional nurses, research, and service. The school, as an established entity within the college and the University of Arkansas, Fayetteville, subscribes to the philosophy and stated mission of the University of Arkansas on teaching, research, and service. The School of Nursing provides nursing education to meet expanding health care needs. In recognition of the interrelationship between teaching, research, service, and the practice of nursing, in the changing health care needs of society, the faculty aspires toward excellence in teaching, contributes to research in nursing, and promotes improved health care.

The philosophy and purposes of the education are a synthesis of the personal beliefs of the faculty in relation to the person, society, environment, health, nursing, education, the learning process, and the role of the graduates of the program.

The person is a unique five dimensional being of interrelated and inseparable systems (biological, intellectual, psychological, social, and spiritual) from which needs arise as the person develops throughout the life span. Each person is a member of a larger cultural, racial, and/or ethnic group and is unique in the way in which the dimensions are developed, intersected, and expressed. Environment influences the person’s health within each of these dimensions. The person is influenced by and interacts as a whole with the internal and external environment to preserve vital functions, dignity, and a meaningful existence.

Society is a dynamic and multicultural phenomenon functioning within the ever-changing environment. The basic unit in society is the family. It functions to socialize its members to cultural values and norms and is highly influential in shaping the health behaviors of its members. Individual persons and family groups combine and interact to form and function as larger distinct and indistinct community units. These units also have needs that arise from biological, intellectual, psychological, social and spiritual dimensions. The health of the person, family, or community impinges on and affects the health of the others. Society has given nursing and other health care professionals the latitude and responsibility to assist clients (individuals, families, and communities) in meeting health care needs.

The environment, internal and external, consists of those forces that influence the dimensions of the client. These complex factors act upon the client and ultimately determine its form, survival, and evolution. When the forces affect health, nursing becomes an integral part of the environment to assist the client in maximizing health.

Health is a general condition involving the total client within the environment. Health is dynamic and relative, wherein the person exists at varying points along the wellness-illness continuum. Wellness and illness are relative states of health and may be a matter of one’s perception.

Nursing is a helping relationship that assists the client in achieving wellness. It is both an art and a science. Professional nursing is derived from a specialized body of knowledge. The professional nurse draws from various academic disciplines to diagnose and make treatment decisions. Critical thinking is essential to the diagnoses and treatment decisions in nursing. The professional nurse practices in a variety of settings and collaborates with other health care professionals to assist the client in promoting health, preventing illness, maintaining or restoring wellness, or to cope with death. The therapeutic and significant contribution of nursing is through performance in the roles of caregiver, manager, and teacher using research-based practice in health care. A critical-thinking approach known as the nursing process is used to meet health care needs.

Professional nursing begins with a Bachelor of Science degree. Nursing education offers a research base for nursing practice that promotes the ability of the nurse to effect change needed to improve health. It is a process by which knowledge is continually synthesized and directed toward meeting the health care needs of clients. The learner develops and applies intellectual, interpersonal, and psychomotor skills in assisting clients in a variety of settings. Professional nursing education develops critical thinking, and acceptance of responsibility for nursing interventions and accountability for outcomes. In the study of professional nursing, the student builds on a planned general education from the academic disciplines and acquires theoretical and specific knowledge to meet health care needs. In addition the curriculum provides opportunity for students with technical nursing education to expand their knowledge and scope of practice. The baccalaureate program establishes a foundation for graduate education in nursing and for continued personal and professional development.

Learning takes place within the student and is ultimately the responsibility of the student. Knowledge and skills are enhanced when the student derives satisfaction from the learning environment and has the opportunity to explore and express thoughts and feelings. Acquisition of knowledge and skills promotes development of the student and is manifested by a change in behavior.

Faculty have the responsibility to ensure the quality of the nursing program. They define levels of expectations for students and maintain standards of nursing practice. They focus on students’ learning needs when they select or manipulate the environment to enhance experiential learning. Faculty members guide and direct learning through the development and implementation of the curriculum and through planned periodic evaluations based on program criteria. In clinical agencies, faculty and practicing nurses are role models for students.

Within a climate of mutual respect, students and faculty share in an interdependent enterprise of learning, inquiry, and teaching. With guidance, students develop the ability to use critical thinking to integrate eclectic knowledge with current nursing theory and research-based practice. They learn personal and professional responsibility and accountability. Progress, or lack of, in meeting performance expectations and improvements necessary for success is identified by teacher evaluation and student self-evaluation.

The baccalaureate graduate, as a member of the discipline, uses knowledge from a research base to fulfill the roles of the nurse in contemporary society as a caregiver, manager, and teacher. On entry into practice the graduate performs the following:

1. Uses critical thinking in making clinical judgments to deliver holistic nursing care.
2. Uses theory and research-based knowledge to improve delivery of nursing care to meet health care needs of individuals, families, and communities.
3. Develops, implements, and evaluates health-related education based on assessed needs.
4. Applies information and health care technologies to assess, monitor, and support clients, families, and communities.
5. Designs, manages, and coordinates health care for individuals, families, and communities.
6. Uses ethical principles in nursing practice, conduct, and relationships with clients.
7. Identifies with the values of the profession and incorporates them into practice.

The baccalaureate nurse works singularly or in collaboration with other health care professionals in coordinating and promoting culturally sensitive health care. The Eleanor Mann School of Nursing at the University of Arkansas prepares students to enter the professional practice of nursing and/or pursue graduate-level nursing education. The curriculum provides the student with a theoretical base to practice professional nursing with diverse clients in various settings through the roles of caregiver, manager, and teacher. The program of study has been designed to emphasize one or more of these roles in each nursing course. Graduates of the program are eligible to apply to take the NCLEX examination for licensure as a registered nurse (R.N.). Persons convicted of a crime may not be eligible to take the NCLEX examination. A criminal background check is required before graduation and reported to the Arkansas State Board of Nursing as part of the procedures for application for licensure. The Bachelor of Science in Nursing degree (B.S.N.) is awarded after successful completion of the nursing curriculum.

The Eleanor Mann School of Nursing offers a limited number of scholarships specifically for nursing students admitted to the school. These scholarships are awarded by the scholarship committee of the School of Nursing and include the Banks, Beverly, Jerry Wade Davis Jr., Mervin Harold Davis Jr., Eleanor Mann, Mina Marshall, Nelda W. Richter, Peggy and Donald Parks, McKennon-Brockmann, Margaret Parrish, and Stars for Nursing Scholarships. Contact the Eleanor Mann School of Nursing about the guidelines and application deadlines.

ADMISSION TO THE B.S.N. PROGRAM

Admission Policies

Admission to the B.S.N. program is limited. Final approval for admission will be determined by the Eleanor Mann School of Nursing faculty. Requirements for admission into the professional program of study are as follows:

1. Overall minimum grade-point average (GPA) of 2.75. (Transfer GPA will be factored in if it is to the student’s benefit. If the UA GPA is based on at least 12 hours of study and is greater than the transfer GPA, the UA GPA will be used. If the student has less than 12 hours at the University of Arkansas, the transfer GPA will be factored in.)
2. Students will be ranked according to GPA for admission to the program.
3. Applications for admission must be submitted by December 1 to be considered for fall semester admission and by June 15 for spring semester admission. Late applications will be considered on a space-available basis.
4. All prerequisite requirements must be completed prior to beginning the nursing professional program of studies. Students applying for a spring semester admission must have all prerequisite courses completed by the end of the preceding fall semester; students applying for a fall semester admission must have all prerequisite courses completed by the end of the preceding spring semester. Additionally, the student must maintain the required 2.75 minimum GPA.
5. Students transferring from another nursing program must be eligible to return to that program to be considered for admission.
6. Students must meet the performance standards for the professional program of study.
7. CPR certification (American Heart Association program) is required.
8. The completed Hepatitis B vaccine series and Diphtheria-Tetanus (DT) must be verified.
9. Negative Tuberculin skin test or X-ray is required.
10. Diphtheria-Tetanus (DT) required
11. Health and liability insurance is required (check with the School of Nursing).
12. A criminal background check with fingerprinting is required and reported to the Arkansas State Board of Nursing.
13. Some clinical agencies require students to complete a negative drug screening and criminal background check before students can be placed in the agency. To complete appropriate clinical experiences, students will have to comply with these requirements.

RN to BSN Admission Policies

1. College admission requirements.
2. Eleanor Mann School of Nursing admission policies
3. Completion of the general education studies. (R.N. students who have completed 45 hours of the required general studies may petition for exception to this policy if MATH 1203, EDFD 2403, and NURS 3011 and NURS 3002 have been completed.).
4. Graduation from an Arkansas State Board of Nursing approved program or an accredited out-of-state program.
5. Review of nursing courses for transfer credit by the School of Nursing.
6. Proof of, and maintenance of, unencumbered licensure to practice as a Registered Nurse in Arkansas.
7. Requirements necessary to receive advanced placement may vary with length of time since graduation and length of time of (or since) nursing employment.
8. Credit for courses listed below will be held in escrow. The student will receive credit for these courses upon successful completion of the program.

8. Students may receive credit for NURS 3634/NURS 3643 through validation examination.

**Performance Standards for Admission to and Progression in the Professional Program of Study**

Professional nurses must have the knowledge and ability to completely assist the biological, psychological, intellectual, social, and spiritual dimensions of the client. After acceptance, but before admission to the B.S.N. program, students must show documentation for current certification in cardiopulmonary resuscitation (CPR) for health-care providers (American Heart Association course). This requires the ability to successfully complete both the written and practical tests for certification. In addition, students admitted to the Eleanor Mann School of Nursing must meet the following abilities and expectations during their enrollment in the program:

1. **Critical Thinking.** Student nurses must be able to analyze data, explore interpretations, generate hypotheses, select actions, and evaluate outcomes related to nursing care of clients. In addition, applicants must be able to problem solve.

2. **Psychomotor.** Student nurses must be able to perform the following:
   a. assess clients through auscultation, percussion, palpation, and other diagnostic maneuvers.
   b. manipulate equipment necessary to assist the client to desired outcomes.
   c. lift and move clients to provide safe care and emergency treatment.
   d. perform cardiopulmonary resuscitation (CPR).
   e. perform independently of others.
   f. possess cognitive abilities to measure, calculate dosages, reason, analyze, and synthesize.

3. **Communication.** Student nurses must be able to perform the following:
   a. receive, translate, and import information by oral and written means according to standards of the English language and safe nursing practice.
   b. speak, hear, visually observe clients, and interpret non-verbal behavior.
   c. effectively communicate verbally and in writing with all health care providers.

4. **Behavioral/Social Attributes.** Students are required to have social skills and emotional health sufficient to provide safe, therapeutic care. The ability to function in stressful environments and meet physically and mentally stressful demands is essential. The study and practice of nursing requires strong emotional, intellectual, and physical capabilities. It is important for prospective nursing students to have a realistic view of the demanding curriculum before they decide to pursue the degree. Prospective students are encouraged to contact the School of Nursing if they have questions about their ability to function in the clinical settings.

**Progression, Probation, Suspension, Withdrawal, and Dismissal**

1. Any nursing course in which a letter grade of “D” or lower is received must be repeated before the student progresses (Repetition of courses depends on clinical space available).

2. Students who receive a grade of “D” or lower or withdraw from any nursing course for any reason must petition the school’s Admission and Advisement Committee for readmission to the nursing program. Final decisions for readmission rests with the nursing faculty.

3. Students must achieve a 70% exam average in every course in the professional program of study. Failure to do so in a course will result in failure of the course and possible dismissal from the program.

4. Junior Progression Exam Requirement (Students should contact their adviser for details).

5. Senior Progression Exam Requirement (Students should contact their adviser for details).

6. Students are limited to one petition for readmission. Readmission is limited by space availability.

7. Students who are dismissed from any clinical course will be suspended from all clinical courses until the dismissal is reviewed by the faculty of the school (Suspension means the student will not be permitted to attend any clinical assignment until the school reviews the issue).

**Readmission Policies**

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (if applicable).

2. Complete Readmission Application to the School of Nursing the semester prior to the semester of intended re-entry into the program.

   (Readmission is limited by space availability).

3. If the student’s enrollment was interrupted to attend another college, the University’s transfer student admission policies would also apply for readmission.

**Exit Policies**

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-division nursing course. If the student does not complete the Professional Program of Study within the five-year limit, nursing credits must be reevaluated.

2. All University of Arkansas and college requirements must be met.

E-mail: okpark@uark.edu

The Department of Rehabilitation, Human Resources, and Communication Disorders offers the B.S.E. with an emphasis in vocational education and the B.S.E. in communication disorders. The M.Ed. in adult education, M.Ed. in vocational education, M.A.T. in vocational education, M.S. with an emphasis in speech pathology, M.S. in rehabilitation, Ed.S. in adult education, Ed.S. in vocational education, Ed.D. in adult education, Ed.D. in vocational education, and Ph.D. in rehabilitation are also offered.

Adult Education (ADED)

• Professors Dutton, Hinton
• Associate Professors Nafukho, Thompson (D.)
• Assistant Professors Banks, Beck, Brooks, Mungania
• Visiting Assistant Professor Carder
• Adjunct Assistant Professor Lofton

SEE PAGE 241 FOR ADULT EDUCATION (ADED) COURSES

Communication Disorders (CDIS)

201 Speech and Hearing Clinic
479-575-4509

• Professor Shadden
• Associate Professor Toner
• Assistant Professors Henrikson, Hagstrom
• Research Associate Aslin
• Instructor McGehee

An undergraduate major in communication disorders leads to the B.S.E. degree and prepares students for graduate studies (master’s level) in speech-language pathology and audiology. The minimum requirements for all students in the college are listed under general studies on page 169.

Admission to the B.S.E. Major Degree Program in Communication Disorders

All students declaring an undergraduate major in communication disorders are accepted as tentative candidates to the undergraduate program. However, formal admission to the program is limited. Students must apply for admission to the undergraduate B.S.E. degree program in communication disorders prior to taking junior- and senior-level classes in the major. Requirements for admission include the following:

• Completion of the admission application form.
• Junior status at the time that 3000-level courses will be taken.
• An overall minimum GPA of 3.0 over the first four semesters (50-60 hours) of college course work. Under special circumstances, students may petition the faculty to waive the 3.0 GPA requirement.
• Satisfactory completion of an admission interview with designated members of the faculty.

Students who do not meet admission criteria for the B.S.E. degree program in communication disorders in any given year may reapply in subsequent years.

Requirements for the program in Communication Disorders

University Core and COEHP General Studies
Required General Studies for the Communications Disorders Major (choose one of the following):
- PHYS 1023/1021L
- PHYS 2013/2011L
- CHEM 1023/1021L
- CHEM 1074/1071L

Communication Disorders Core
- CDIS 2253 Intro. to Communicative Disorders
- CDIS 3103 Intro. to Audiology
- CDIS 3124 Normal Phonological and Articulatory Processes, and CDIS 3120L Phonetic Transcription Lab
- CDIS 3203 Articulation Disorders
- CDIS 3213 Anatomy and Physiology of Speech and Hearing Mechanisms
- CDIS 3224 Language Development in Children
- CDIS 3233 Intro. to Clinical Practice
- CDIS 4133 Intro. to Aural Rehab
- CDIS 4213 Intro. to Speech and Hearing Science
- CDIS 4183 Clinical Assessment of Speech and Language Disorders
- CDIS 4223 Language Disorders in Children
- CDIS 4253 Neurological Bases of Communication
- CDIS 4273 Communication Behavior and Aging

Electives to meet 124 hours

Total for Communication Disorders

SEE PAGE 254 FOR COMMUNICATION DISORDERS (CDIS) COURSES

Rehabilitation (RHAB)
100 Graduate Education Building
479-575-4758

• University Professor Roessler
• Professors Anderson, Watson
• Research Professors Boone, Schroedel
• Assistant Professor Williams
• Research Assistant Professors Cochran, Sabik

SEE PAGE 326 FOR REHABILITATION (RHAB) COURSES

VOCATIONAL EDUCATION (VOED)

• Professors Biggs, Hinton, Thompson (C.)
• Associate Professors De Vore, Nafukho, Orr, Park, Thompson (D.)
• Assistant Professors Banks, Beck, Brooks, Mungania
• Visiting Assistant Professor Carder
• Instructor Wills

The University of Arkansas has been approved by the State Board for Workforce Education for the preparation of teachers, supervisors, and administrators in vocational education. The two areas of concentrations in vocational education are: business education (BUED) and family and consumer sciences (FCSE).

Professional Pre-Education Core Requirements in Vocational Education

HOURS
- Curriculum and Instruction
  - CIED 1002 Intro. to Education
  - CIED 1011 Intro. to Education Practicum
  - CIED 3023 Survey of Exceptionalities
  - CIED 3033 Classroom Learning Theory
- Educational Technology
  - ETEC 2001 Educational Technology
  - ETEC 2002L Educational Technology Lab
- Vocational Education
  - VOED 4003 Intro. to Professionalism
  - VOED 4013 Presentation Techniques
- General Studies Requirements
  - The general requirements for all under-graduate programs in the College of Education and Health Professions are found under general studies of which 4 hours of chemistry that meet the University core, is required.

Total for Communication Disorders

SEE PAGE 326 FOR VOCATIONAL EDUCATION (VOED) COURSES.

Business Education (BUED)
Fredrick Muyia Nafukho
Adviser
108 Graduate Education Building
479-575-4758

Ok Park
Adviser
213 Graduate Education Building
479-575-4898

Completion of the Bachelor of Science in Education degree has two concentrations: non-licensure and licensure. Requirements for initial teacher licensure may be met by completing the B.S.E. and the Master of Arts in Teaching (M.A.T.) (See the Graduate School Catalog.) Refer to the college academic regulations, admission process for initial licensure for other requirements.

Basic Plan
In addition to the general studies (see note) and the 18-hour Professional Pre-Education Core, the following courses are required for a concentration in business education and, upon completion of the Master of Arts in Teaching (M.A.T.) degree, will qualify the graduate for the teaching of business education courses excluding marketing and computer technology.

HOURS
- Business courses by consent of adviser
- WCOB 1012 Legal Environment of Business
- ECON 2143 Basic Economics
- VOED 480V Problems in VOED (Keyboarding II)
- ISYS 3000-level or above

Total for Communication Disorders

SEE PAGE 254 FOR COMMUNICATION DISORDERS (CDIS) COURSES.
VOED 480V Problems in VOED (Word Processing)  3
MGMT 3563 Mgmt Concepts/Orgn Behavior, or  3
MKTD 3433 Principles of Marketing
VOED 380V Supervised Work Experience  6
VOED 4122 Leadership Development  2
COMM 3703 Organizational Communications  3
Business electives  12
Total  50

NOTE: ECON 2143 will satisfy the economics requirement in general studies and the prerequisite requirement for MKTT 3433. The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 124 semester hours.

Marketing
See adviser for requirements.

Family and Consumer Sciences Education (FCSE)

Cecelia K. Thompson  
Adviser  
120 Graduate Education Building  
479-575-2581

Students pursuing the Bachelor of Science in Education degree may select the family and consumer sciences education program concentration as a field of specialization in vocational education. Requirements for initial licensure may be met by completion of the B.S.E. and the Master of Arts in Teaching (M.A.T.) See the Graduate School Catalog.

Completion of the B.S.E. and M.A.T. will prepare students to teach family and consumer sciences at the junior high and secondary education level. Completion of the B.S.E. will prepare students to work in professional careers in the Cooperative Extension Service, business, industry, or social services.

In addition to the general studies and the 18-hour Professional Preparation Core, the following courses are required for a concentration in family and consumer sciences education.

HOURS  33

Technical Requirements
HESC 1403 and HESC 2413
(must be taken as part of the general education requirements in social studies.)
Study of the Family—Select 2 courses:
HESC 3443 Families in Crisis
HESC 4433 Dynamic Family Interaction
HESC 4453 Parenting and Family Dynamics
SCWK 3233 Juvenile Delinquency
SCWK 4133 Family Preservation
SCWK 4143 Addiction and the Family
Human Development—Select 1 course
HESC 2402/2401L Infant and Toddler Development
HESC 2433 Child Development
HESC 3423 Adolescent Development
Management
HESC 3763L Family Resource Management Lab
Consumer Economics—Select 1 course
HESC 4753 Family Financial Management or
FINN 3003 Personal Financial Management
HOURS  26

Nutrition and Food
HESC 1213 Nutrition in Health
HESC 2112/2111L Foods I
HESC 2123/2120L Catering for Healthy Lifestyles, or HESC 2203 Nutrition for Exercise and Sports

Clothing and Textiles
HESC 1013 Intro. to Clothing Concepts
HESC 2053/2050L Intro. to Textile Science

Housing
VOED 480V (3)

Professional Concerns (Recommended but not required)
HESC 1501 Orientation to HESC
HESC 4303 Professional Development
CNED 3053 The Helping Relationship
EXED 3023 Intro. to the Cooperative Extension Service
EXED 4173 Principles of Extension Teaching
Electives—26 credits from any department in the University. Use elective credits to strengthen your area of family and consumer science or complete work toward and additional licensure plan (ALP).

NOTE: The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 124 semester hours.

For professional education requirements for Master of Arts in Teaching (M.A.T.), see the Graduate School Catalog or see page 165 in this catalog.

Human Resource Development (HRDV)

Dale E. Thompson  
Adviser  
111 Graduate Education Building  
479-575-6640

Phil Gerke  
Adviser  
217 Graduate Education Building  
479-575-4690

This concentration is open only to adult learners, employed full-time, who have at least five years of work experience. Departmental approval is mandated before taking any of the required courses in this concentration. The accelerated degree-completion plan of study permits credit for experiential learning. This concentration is delivered to selected off-campus locations via distance learning (interactive television and web-based) technology on a two-year rotation plan in cooperation with the University of Arkansas Division of Continuing Education. Details can be found on the Web at http://www.uark.edu/hrd/. This is not a teacher preparation concentration.
Human Resource Development Concentration

General Studies Requirements 50
Electives 5
Technical Requirements 33

Required Course: VAED 3403 Employment Law in Human Resource Development.

The remaining 30 hours of HRD technical requirements may be satisfied in a variety of ways. 1) Appropriate occupation-related credits from UA coursework, transfers from accredited institutions of higher learning (within limits), or from College Level Examination Program (CLEP) exams may be applied. 2) Credit for work experience and experiential learning may be applied to HRD technical requirements. VOED 200V-204V Work Experience credit is earned through selected National Occupational Competency Testing Institute (NOCTI) assessments. After completing VAED 3503 Workforce Behavior course, credit may be earned through VAED 450V Experiential Learning for documented experiential or occupational learning based on a standardized format as suggested by the Council for the Advancement of Experiential Learning (CAEL). Credit for certain occupational training or professional certifications may also be earned using the American Council on Education (ACE) guidelines. 3) After the initial 12-hour HRDV Internship requirement has been met, up to 12 additional credits of ITED 459V may also be applied to HRDV Technical requirements.

Human Resource Development Professional Courses
(taught in a two-year rotation of weekend and web-based classes.)
VAED 3113, VAED 3123, VAED 3133,
VAED 3213, VAED 4113, VAED 4133,
VAED 4213, VAED 4233

Human Resource Development Internship
ITED 459V, HRDV Internship (HRD theory and concepts applied in a practical workplace setting)

Total 124

Industrial and Technical Education (ITED)

Jack B. DeVore, Jr.

102 Graduate Education Building
479-575-7285

Fred A. Wills
Adviser
109 Graduate Education Building
479-575-5114

Performance-Based Teacher Education (PBTE) Concentration

This concentration should be selected by incumbent (in-service) trade and technical instructors who desire to obtain a Bachelor of Science in Education degree or become certified as a master instructor in the post-secondary vocational and secondary school systems. PBTE concentration utilizes the Performance-Based Teacher Education modules and is field-based.

Residency Requirement for PBTE Concentration

The residency requirement for the PBTE concentration specifies that at least six semester hours of course work must be completed on campus, with an additional six semester hours taken at a location in the state taught by University of Arkansas faculty.

SEE PAGE 331 FOR VOCATIONAL AND ADULT EDUCATION (VAED) COURSES
MISSION AND OBJECTIVES

Engineering is one of the most rewarding of the major professions. Engineers have been primarily responsible for the present high standard of living and for the security of the nation in times of peace and war. Engineering graduates must have a background of sound mathematics, scientific and economic principles and must be acquainted with industrial practices in their chosen field before they can assume responsibility in the profession. Many engineering graduates become managers and leaders in the public and private sectors because of the problem-solving skills that were developed as part of an engineering education.

The College of Engineering adds personal, social and economic value to the region, the state, the nation, and to the world through engineering education and cutting-edge research in emerging technologies. Value is added through four separate but highly integrated activities:

- Undergraduate Education
- Graduate Education and Research
- Continuing Education and Technology Transfer
- Technology-based Business Incubation and Job Creation

Programmatic activities focus largely on the following areas of emphasis:

- Biological, Chemical and Food Processing
- Biomedical Engineering
- Database and Telecommunications
- Electronics Manufacturing
- Environmental and Ecosystems Analysis
- Nanotechnologies
- Transportation, Logistics and Infrastructure
- Homeland Security

Extensive information about the College of Engineering is available from the Web site http://www.engr.uark.edu. The site includes overviews of each programmatic activity and area of emphasis as well as information about faculty, facilities, programs of study, advisory groups, centers, research capabilities, special programs, distance education, professional development, and opportunities for partnerships with the college.

Statement of Purpose

Recognizing that the University of Arkansas, Fayetteville, is a land-grant institution with consequent responsibilities in teaching, research, and service, and realizing that these are mutually dependent and necessary responsibilities, the College of Engineering adopts and seeks to fulfill the following statements of purpose.

Undergraduate Education: To offer a high-quality and fully accredited course of instruction involving classroom, laboratory, and extracurricular activities that will result in professionals qualified...
College of Engineering

to begin careers in the field of engineering and prepared to assume responsible places of leadership in society.

Graduate Education: To offer state-of-the-art coursework and research experiences that result in all graduates being capable of independent analysis and design, and all Ph.D. graduates capable of extending the state-of-the-art in their areas of expertise.

Continuing Education: To provide local, regional, national, and international seminars, symposia, short courses, and credit courses to engineers and others in the technical community to help them further their formal education and keep abreast of new developments in technology.

Technology Development: To assist actively and vigorously in the growth and development of the state of Arkansas and the nation by performing research and development of state-of-the-art technology, by updating the existing technology within industrial circles, by providing educational support services, and by attracting and creating new industry.

External Relations: To communicate effectively with the college’s various constituencies to establish and maintain long-term relationships, which lead to increased support for quality programs in teaching, research, and service.

Internal Relations: To actively involve engineering faculty in University, college, and department governance and related functions.

COLLEGE OF ENGINEERING STRATEGIC PLAN

"Engineering the Future – Today"

For more than 100 years, the College of Engineering has successfully fulfilled its primary mission: to provide an excellent engineering education to undergraduate and graduate students at the University of Arkansas.

The College of Engineering faculty, staff, alumni and students decided to accept the challenge to become one of the best. Specifically, our collective goal is:

To become and be perceived as one of the top tier graduate and undergraduate engineering programs in the U.S.

The College’s strategic plan encompasses six main goals. By successfully accomplishing these objectives, the College of Engineering will contribute to the University of Arkansas becoming a nationally-competitive, student-centered research institution serving Arkansas and the world, effectively fulfilling its purpose.

Six Strategic Goals

1. Implementing the Student-Centered Educational Experience
   Provide a student-centered educational experience that attracts diverse, high-quality students, enables them to realize their potential, inspires them to pursue excellence at all degree levels and groom them to become leaders in their profession.

2. Implementing an Enabling Research Environment
   Create a research environment that enables, enhances and recognizes scholarship, while stimulating entrepreneurship and economic development within our state, nation and world.

3. Implementing the Vision as it Relates to Faculty
   Recruit, mentor and retain high-quality and diverse faculty members who value and promote world-class scholarship.

4. Implementing the Vision as it Relates to Staff
   Attract, develop and retain well-qualified, diverse and skilled staff members who are equipped to support the growth and potential of the College of Engineering.

5. Implementing the Service and Outreach Plan
   Enhance the impact of the College of Engineering both within and outside the university through service and outreach.

6. Implementing the Economic Development Plan
   Become a catalyst for economic development to achieve the long-term economic goals of Arkansas through entrepreneurship, research and collaboration with industry and government.

FACILITIES AND RESOURCES

Instructional, Computer, and Laboratory Facilities

Undergraduate instruction in engineering takes place in Bell Engineering Center, Engineering Hall, and the Mechanical Engineering building. These facilities contain state-of-the-art classrooms and instructional equipment. Undergraduate laboratories are located both on the main campus as well as at the Engineering Research Center. Laboratories offer students hands-on experience relating to the subject matter addressed in the classroom.

The College of Engineering utilizes a wide variety of computing equipment to assist in engineering education. Students have easy access to computers through general computer laboratories or computer facilities located in specialized laboratories within the college. The computers are networked so that all the computing power of the university, including the mainframe computers, can be accessed from the PCs or workstations provided for engineering students. Owning a personal computer is not required; however, it is beneficial.

Laboratory Fee

In order to maintain the college’s state-of-the-art instructional and computer laboratories, each student enrolled in an engineering course is assessed a laboratory fee for that term. This fee is used only to purchase and maintain equipment and staff the engineering laboratories to assist students.

Library

The books and references used by engineering students and faculty are housed principally in the University of Arkansas Mullins Library. This collection is the most useful and comprehensive engineering library in the state. Many publications pertinent to the engineering profession are being added continuously. Mullins Library is the depository for water resources papers, geological survey materials, and NASA publications, as well as other governmental and industrial series.

Engineering Research Center

The 178,000 square foot Engineering Research Center is located approximately two miles south of the main campus. The center provides the facilities and support services for a wide variety of research activities. It houses the Engineering Experiment Station through which the research of individual departments in the college is administered. Centers and laboratories located at the Engineering Research Center include GENESIS, the High Density Electronics Center, the Center for Training Transportation Professionals, and the Chemical Hazards Research Center.

Center for Distance Learning

A Master of Science in Engineering (M.S.E.) degree is available for students who wish to take a broad range of engineering courses. See the Graduate School Catalog for details.

The Master of Science in Operations Management (MSOM) degree program at the University of Arkansas offers students the philosophy, concepts, and techniques needed to manage available resources to achieve maximum efficiency and effectiveness in meeting operational goals. It provides the tools needed for successful management in industrial and/or military settings. Geared toward the working student, classes meet in the evenings in five 8-week terms per year.
Professional development and continuing education credits can be earned through the College of Engineering’s Professional Development Center. These courses provide ongoing training on technical and engineering topics for professional engineers, land surveyors, and others in the technical and engineering professions.

DEGREES OFFERED

The College of Engineering offers curricula accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET) leading to the following seven undergraduate degrees:

- Bachelor of Science in Biological Engineering (B.S.B.E.)
- Bachelor of Science in Chemical Engineering (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cmp.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)

Other undergraduate degrees awarded:

- Bachelor of Science in Computer Science (B.S.)

Students can be awarded a second bachelor’s degree in engineering by satisfying all the requirements for both degrees. In doing this, the student must complete a minimum of 30 semester hours of studies for the second degree, which are not used to satisfy any requirement for the first degree.

OTHER PROGRAMS

Cooperative Education

The Cooperative Education (Co-op) Program provides a unique opportunity for an engineering student to complement on-campus engineering education with practical experience in industry. A participant begins sometime after the freshman year by alternating periods on campus as a full-time student with periods off campus in industry doing engineering work with appropriate guidance and supervision from practicing engineers. Depending on the individual situation, three to five work assignments may be meshed with the undergraduate academic work on a year-round basis. The co-op student often returns to the same employer for all work assignments.

The Co-op Program allows a participating student to integrate industrial experience with formal academic training, earn a substantial part of or all of remaining college expenses, gain professional practice in engineering, and try a tentative career choice at a stage when change can readily be made in the academic program.

During each work period, the student registers for one hour of cooperative education, listed under General Engineering. These hours may be used to satisfy any free elective hours in the curriculum. In some cases, with the consent of the department head, a student may use an advanced course to satisfy a technical elective hour.

Normally, a student is eligible to participate in the Co-op Program after completing one year of appropriate engineering study or specific entry-level coursework in the chosen area of study with a minimum cumulative grade-point average of 2.25.

COLLEGE ADMISSION REQUIREMENTS

Freshmen admitted to the University of Arkansas, Fayetteville, are eligible to enroll in the College of Engineering.

The freshman curriculum stresses a basic foundation in mathematics, physics, and chemistry, which will be required in later years. The sophomore, junior, and senior years are spent in a strong concentration on the student’s chosen field, with emphasis on industrial applications of classroom and laboratory work. By the selection of electives, a student can concentrate in depth in a particular subject, have the flexibility to study several subjects, and minor in an area of interest. Provision is made for electives in the humanities and social sciences as a means of providing a well-rounded education.

Computer Skills

Future students are strongly encouraged to take a one-year high school course in basic computer skills, which should include at a minimum: 1) basic use of a common operating system, 2) word processing, and 3) use of spreadsheets. All engineering departments either recommend or require that incoming students deficient in these skills take a specified remedial course. Taking high school courses in engineering drawing and computer programming also is beneficial and strongly encouraged.

International Students

Before being admitted to the electrical engineering program or the computer engineering program, international students will be required to present a score of 50 or higher on the Test of Spoken English (TSE) exam and either a score of 1000 or higher on the SAT, or a score of 25 or higher on the ACT.

Transfer of Credit

In addition to the University policies controlling the granting of credit for course work taken at other institutions, the following policies apply to students entering the College of Engineering.

1. All courses taken at another institution are subject to approval by the dean of the College of Engineering and the head of the degree-granting department. Credit from all institutions must be approved on a course-by-course basis to ensure its acceptability in fulfilling requirements for a degree in engineering. In making this evaluation, the student may be required by the dean and/or department head to produce catalogs from the institution from which the student is transferring that contain descriptions of the courses for which credit is expected in an engineering discipline.

2. Advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have engineering programs accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

3. Unless exceptions are granted at the time of admission to the University of Arkansas, no degree credit will be granted for any course taken at another institution in which the student’s grade in that course was not the equivalent of at least 2.00 on a 4.00 grading system. See the Admission chapter in this catalog for more information.

Three-Two Transfer Plan

The College of Engineering recognizes that a graduate engineer, to be of full service to his community, must be educated in the social sciences and humanities as well as in technical subjects. The practice of industry to elevate engineers to managerial and administrative positions emphasizes the desirability of a broad educational background. Likewise, most universities within Arkansas do not offer a degree in engineering. Accordingly, the College of Engineering of the University of Arkansas has entered into a cooperative program with several Arkansas “partner” universities to provide for a five-year combined course of study that leads to a Bachelor of Arts/Bachelor of Science degree from the partner university and an engineering degree from the University of Arkansas. Typically, a student spends the first three years at the partner university and then completes an engineering curriculum in two years at the University of Arkansas. The student is awarded the Bachelor of Arts/Bachelor of Science degree by the
partner university. The student is awarded the Bachelor of Science in an engineering discipline by the University of Arkansas.

**COLLEGE SCHOLARSHIPS**

The College of Engineering awards numerous scholarships and fellowships to entering freshmen, continuing students, transfer students, and graduate students. Most scholarships are based primarily on academic performance. However, scholarships also may be awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments. College scholarships are available to any engineering student, and departmental scholarships are meant for students enrolled in a particular discipline of engineering. Students must be admitted to the University of Arkansas and accepted into the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows a student to be considered for all college-level and departmental scholarships.

For more information concerning scholarship and diversity opportunities, contact the College of Engineering Office of Diversity, Retention, and Scholarship at 575-5009 or e-mail tic@engr.uark.edu.

**STUDENT ORGANIZATIONS**

The following are honorary-scholarship and professional societies to which engineering students at the University of Arkansas may aspire:

- Tau Beta Pi (Engineering)
- Alpha Epsilon (Biological/Agricultural Engineering)
- Omega Chi Epsilon (Chemical Engineering)
- Chi Epsilon (Civil Engineering)
- Eta Kappa Nu (Electrical Engineering)
- Alpha Pi Mu (Industrial Engineering)
- Pi Tau Sigma (Mechanical Engineering)
- Phi Eta Sigma (freshmen)
- Phi Kappa Phi (Juniors and seniors)
- Pi Mu Epsilon (Mathematics)
- Theta Tau, (a professional engineering fraternity, maintains a chapter house on the campus and is active in university and college affairs)
- Phi Sigma Rho, (professional engineering sorority)
- Alpha Chi Sigma (a professional chemistry fraternity)

Several national engineering societies are listed below and maintain student branches in the College of Engineering, each under the auspices of a professor in a related department.

- American Chemical Society
- American Nuclear Society
- Amateur Radio Club of the University of Arkansas
- American Society of Agricultural Engineers
- American Society of Civil Engineers
- American Society of Heating, Refrigeration, and Air-Conditioning Engineers
- American Society of Mechanical Engineers
- Institute of Chemical Engineers
- Institute of Electrical and Electronics Engineers
- Institute of Industrial Engineers
- Institute of Transportation Engineers
- International Microelectronics and Packaging Society
- National Society of Black Engineers
- Society of American Military Engineers
- Society of Automotive Engineers Assoc. for Computing Machinery
- Society of Hispanic Professional Engineers
- Society of Manufacturing Engineers
- Society of Women in Engineering
- Transportation and Logistics Association

**COLLEGE ACADEMIC REGULATIONS**

Students are expected to keep themselves informed concerning current regulations, policies, and program requirements in their fields of study and must meet all requirements of the degree programs in which they are enrolled. Courses that are modified or added to a curriculum and that are incorporated into the curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Courses that are incorporated into the curriculum at a level lower than the one at which the student is enrolled are not required for that student.

**Eligibility**

Only students enrolled in the College of Engineering or enrolled in programs in which curricula require engineering courses will be allowed to take engineering courses. Exceptions to this requirement must be approved by the dean of engineering. This does not apply to graduate students.

**Pre-Professional Program**

Engineering students follow essentially the same schedule of courses during the freshman year regardless of their intended field of specialization. Certain courses normally taken in the first year comprise the pre-professional curriculum.

The pre-professional curriculum consists of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 1013 Composition I</td>
<td>3</td>
</tr>
<tr>
<td>ENGL 1023 Technical Composition II</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 1103, CHEM 1101L Univ Chemistry I</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 1123, CHEM 1121L Univ Chemistry II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 2554 Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 2564 Calculus II</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total semester hours</strong></td>
<td><strong>22</strong></td>
</tr>
</tbody>
</table>

Satisfactory completion of the pre-professional curriculum is a prerequisite for enrollment in any 2000-level or higher engineering course. Satisfactory completion is defined as a grade of “C” or better in each course or, alternatively, a grade-point average of at least 2.20 for the courses comprising the pre-professional curriculum. If courses are repeated, all attempts are included in the computation of the grade-point average.

Additional courses are included in the pre-professional curriculum for some engineering programs.

- Electrical engineering students must complete PHYS 2054/2050L Univ. Physics I (and laboratory) in addition to the above college pre-professional requirements.
- Industrial engineering students must complete ING 1103 Principles of Industrial Engineering rather than CHEM 1123/1121L in the college pre-professional requirements.
- Computer engineering and computer science students must complete CSCE 1113/1111L Programming Foundations I, rather than CHEM 1123/1121L in the college pre-professional requirements and CSCE 1123/1121L Programming Foundations II.

Satisfactory completion for electrical engineering and industrial engineering students is defined as a grade of “C” or better in each course and a grade-point average of at least 2.50 for the courses comprising the pre-professional curriculum. Satisfactory completion for computer science and computer engineering students is defined as a grade of “C” or better in each course and a grade-point average of at least 2.75 for the courses comprising the pre-professional curriculum. If courses are repeated, the best attempt is used in computing the grade-point average.
Students who enroll in 2000-level or higher engineering courses without satisfactorily completing the pre-professional program will be administratively dropped from those courses. Limited exceptions can be made by the department head with the approval of the dean when extenuating circumstances exist that are beyond the control of the student.

During the second, third, and fourth years of work, the student pursues a prescribed curriculum of technical and non-technical courses as preparation for professional practice in a chosen engineering field.

**State Minimum Core, Humanities and Social Sciences Requirements**

Every student seeking a baccalaureate degree from the College of Engineering must satisfy the University courses that qualify for the State Minimum Core requirements and the humanities and social sciences requirements of the College of Engineering. For a listing of the University Core requirements, see the chapter on Academic Regulations. Every student in the College of Engineering is required to complete a minimum of 18 semester hours in the humanities and social sciences. Six semester hours must be at the 3000-level or above. A list of approved upper-level humanities/social science courses is available in departmental offices and the dean’s office.

No more than nine semester hours from any single discipline may be presented for degree credit. To meet the University Core requirements, the total number of hours (both upper level and lower level) in the fine arts/humanities courses must be at least six, and the social science hours must total at least nine (in addition to the U.S. history or government requirement). The six hours of courses at the 3000-level or above may be in the fine arts/humanities area, the social science area, or divided between the two areas. Since some of the humanities/social science courses are specified in some of the curricula, e.g., ECON 2143 in chemical, and mechanical engineering, the student should consult the curriculum of the department in which he/she is enrolled prior to selecting upper-level electives.

### Specific University Core Requirements for Engineering Students

### Special Courses

The curricula outlined on the following pages will be followed by the majority of engineering students. There are, however, courses in several departments, such as English, Western civilization, and mathematics, for students who qualify for honors courses. For students not ready to pursue the regular courses in the engineering curriculum, certain preparatory courses in English, mathematics, and chemistry are offered on the basis of placement scores.

### College Policy on Academic Ethics

The purpose of this policy statement is to define and encourage a uniform application of rules and regulations regarding academic ethics throughout the College of Engineering. Unethical conduct undermines the pursuit of the educational goals of this institution and erodes the honor, ability, and reputation of its graduates. This policy is intended to promote an academic climate wherein the full potential of each student can be realized and recognized.

### Code of Ethics

Students in the College of Engineering are obligated to comply with pertinent provisions of the Code of Ethics applicable to professional practice following graduation. The Code requires "honesty, impartiality, fairness, and equity,” and “adherence to the highest principles of ethical conduct.” Most particularly, it states that engineers shall:

1. Be objective and truthful in professional reports, statements, or testimony;
2. Not falsify or permit misrepresentation of their academic or professional qualifications;
3. Give credit for engineering work to those whom credit is due;
4. Not compete unfairly with other engineers by attempting to obtain employment or advancement by improper or questionable methods;
5. Avoid any act tending to promote their own interest at the expense of the dignity and integrity of the profession.

### Examples of Unethical Conduct

Pursuant to these provisions, the faculty of the College of Engineering considers the following to be specific examples of unethical conduct:

- Submission, as one’s own, of any work prepared totally or in part by someone else.
- Plagiarism, i.e., the unacknowledged incorporation of another person’s work, either verbatim or in substance, in work submitted for credit.
- Unauthorized collaboration with another person in preparing work submitted for credit.
- Unauthorized submission, for credit, of work previously credited in another course.
- Unauthorized alteration of work submitted for re-grading.
- The use of unauthorized materials or aids during examinations.
- Copying from the examination paper of another student or giving aid to, or seeking aid from, another student during an examination.
- Using, obtaining, or attempting to obtain by any means the whole or any part of an examination not yet administered, or of information pertaining thereto.
- Taking, or attempting to take, an examination for another student, or allowing another student to take or attempt to take an examination for oneself.
- Any conduct expressly stated to be unethical by the instructor in a particular course.
- Aiding, abetting, or condoning unethical conduct on the part of another student.

Strict adherence to the foregoing Code of Ethics is a requirement for graduation from the College of Engineering.
Faculty Response to Acts of Unethical Conduct

Upon becoming aware of unethical conduct, the faculty member should:

1. Collect and/or prepare appropriate documentation of the act.
   Examples of suitable documents are (a) reproduced copies of examinations, papers, or reports that establish unethical conduct; (b) signed written statements regarding unethical conduct by another student. (This means may be used by students to initiate action in cases of unethical conduct.)
2. Inform the student of any action to be taken in response to unethical conduct. Possible actions include (a) reduction of grade; the faculty member may reduce the grade on a particular test or assignment or assign a failing grade for the course; (b) request the College of Engineering Academic Ethics Board to rule that the student does not meet the requirements for graduation.
3. Submit a report to the College of Engineering Academic Ethics Board and give a copy of the report to the student(s) involved. Copies of documentation should accompany the report submitted to the board. (The report will provide protection against repeated offenses in different courses.)

Academic Ethics Board

The purpose of the Academic Ethics Board is to review the academic ethics reports submitted by faculty members and any record of previous infractions. When the circumstances warrant, the board can, by a two-thirds vote, rule that the student does not meet the requirements for graduation from the college as set forth in the engineering catalog. (The board can specify conditions under which the requirements might still be met.)

The board shall be made up of seven tenured engineering faculty members and two students. The faculty members in each department of the College of Engineering shall elect one person from the faculty in their department to serve on the board. Each board member shall serve a two-year term. The Dean will appoint the student members to serve staggered two-year terms.

Appeals

A student who wishes to appeal a decision by a faculty member or by the College of Engineering Academic Ethics Board may utilize existing university academic grievance procedures.

HONORS PROGRAM

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research related careers that require considerable critical and original independent thinking. Admission requirements for the college’s Honors Program are as follows: entering freshmen must have at least a 3.5 high school GPA and at least 28 composite score on the ACT; entering transfer students must have a 3.25 GPA on their transfer work. Students not qualifying for the Engineering Honors Program initially are eligible after one year if they earn at least a 3.25 GPA.

Students must formally apply for admission to the Engineering Honors Program. Once accepted into the program, Honors students take a minimum of 12 hours of Honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To retain status in the Honors Program, a student must maintain a minimum cumulative GPA (for all course work, computed at the end of the spring semester) of 3.25. To receive honors distinction at graduation, a student must hold a cumulative GPA of 3.50 or better (for all course work, computed at graduation). Students with a GPA between 3.25 and 3.50 do not receive honors distinction at graduation.

DEGREE REQUIREMENTS

The basic requirement for a Bachelor of Science degree in engineering is 124-136 semester hours of academic work, depending on the career field chosen. Students coming from high school with adequate preparation will be able to satisfy this requirement in eight semesters; however, some students require preparatory courses, and others choose to enroll in slightly lighter loads and graduate in nine or 10 semesters. Students enrolled in ROTC require an additional 9 semester hours to meet all graduation requirements and graduate in 10 semesters (five years).

Engineering is a rapidly changing profession, and the departmental curricula are updated continuously to keep pace with these changes. Students entering under this catalog will be required to comply with such curriculum changes to earn their degree. However, the total number of semester hours required for the degree may not be increased, and all work completed in accordance with this catalog prior to the curriculum change will be applied toward the student’s degree requirements. Former students of the college must meet the curriculum requirements in effect at the time of their readmission.

Graduation Requirements

In addition to the University Core requirements for graduation (see chapter on Academic Regulations), a candidate for a degree from the College of Engineering must also meet the following requirements:

Candidates for engineering degrees must meet the minimum curricular requirements established by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology.

A candidate for a degree from the College of Engineering must have earned a grade-point average of no less than 2.00 on all courses in the student’s major area of study, all engineering courses, and all work completed at the university and presented for the degree. Grades on work taken at other colleges and presented for transfer credit must also meet this standard.

No student will be allowed to graduate if the student has “D” grades in more than 15 percent of all credit earned in this institution and presented to meet the requirements for a degree.

Every undergraduate student is required to take and pass ENGL 2003 Advanced Composition unless exemption can be gained (see chapter on Academic Regulations on page 41).

All ROTC classes are elective. Unspecified electives may be satisfied with any course except those courses, or prerequisite courses, needed to satisfy the student’s curriculum, and those courses considered remedial to the programs in engineering.

Minors in Other Colleges and Schools

Students in the College of Engineering may pursue an academic minor in other colleges. For example, a minor in business is popular among engineering students. For requirements regarding minors, check the catalog listing for the department offering the minor. Students must notify the College of Engineering dean’s office of their intent to pursue a minor.

Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at gradu-
Master of Science in Transportation Engineering (M.S.T.E.) (ABET accredited)
Doctor of Philosophy in Computer Science (Ph.D.)
Doctor of Philosophy in Engineering (Ph.D.)

In addition, the College of Engineering supports the following interdisciplinary graduate programs:
Master of Science in Cellular and Molecular Biology (M.S.)
Master of Science in Microelectronics-Photonics (M.S.)
Master of Science in Space and Planetary Sciences (M.S.)
Doctor of Philosophy in Cellular and Molecular Biology (Ph.D.)
Doctor of Philosophy in Microelectronics-Photonics (Ph.D.)
Doctor of Philosophy in Space and Planetary Sciences (Ph.D.)

Further information concerning these programs may be found in the Graduate School Catalog or in the office of the dean of the Graduate School.

ACCREDITATIONS
As the only comprehensive engineering program in Arkansas, the College of Engineering offers undergraduate, graduate, and doctoral degrees through seven academic departments. UA engineering programs have been continuously accredited by the Accreditation Board of Engineering and Technology (ABET) since 1936.

Departmental Majors

BIOLOGICAL AND AGRICULTURAL ENGINEERING (BAEG)

Lalit Verma
Head of the Department
203 Engineering Hall
479-575-2351

- Professors Gardisser, Griffis, Li, Loewer, VanDevender, Verma,
- Associate Professors Carrier, Costello, Huitink, Matlock, Tacker
- Assistant Professors Bajwa, Chaubey, Kavdia, Kim, Osborn, Ye
- Adjunct Professor Ang, Clausen, Deaton, Ingels, Malshie
- Adjunct Associate Professors Beitle, Yang
- Adjunct Assistant Professors Haggard, Howell, Shafirstein, Wimberly

Biological Engineers improve people’s lives today and help assure a sustainable quality of life for tomorrow. They create solutions to problems by coupling living systems (human, plant, animal, environmental, food, and microbial) with the tools of engineering and biotechnology. Biological engineers improve human health through biomedical engineering; ensure a safe, nutritious food supply and create critical, new medicines through food and bioprocess engineering; secure a healthy and safe environment through ecological engineering; and create tools to manage agriculture, the environment, and the products of biotechnology through biosource engineering.

Biological Engineering is an ABET accredited program leading to the B.S. degree. M.S. and Ph.D. degrees are also offered. The curriculum is under the joint supervision of the dean of the College of Engineering and the dean of the Dale Bumpers College of Agricultural, Food and Life Sciences. The Bachelor of Science in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.
The educational objectives of the Biological Engineering program are to produce graduates who 1) effectively apply engineering to biological systems and processes (plant, animal, human, microbial, and ecosystems) with demonstrated proficiency in basic professional and personal skills, and 2) are well prepared for future challenges in biological engineering, life-long learning, and professional and ethical contributions to society through sustained accomplishments.

Areas of Concentration

The four areas of concentration in biological engineering are as follows:

- **Biomedical Engineering** – an overview of instrumentation, physiological modeling, biomechanics, biomaterials rehabilitation engineering, and assistive technology for the disabled. This area is excellent preparation for medical, veterinary, or dental school as well as for graduate programs in biomedical engineering.

- **Bioresource Engineering** – remote sensing, geographic information systems and other technology for managing agriculture and bioresources, and designing machines to interface with living systems.

- **Ecological Engineering** – integrates ecological principles into the design of sustainable systems to treat, remediate, and prevent pollution to the environment. Applications include stream restoration, watershed management, water treatment design, ecological services management, urban greenway design and enclosed ecosystem design.

- **Food and Bioprocess Engineering** – biotechnology, food processing, food safety and security, developing new products from biomaterials, and using bacteria to synthesize products.

Each student is required to complete 12 semester hours of approved electives in his or her area of concentration. Six of these hours must be from the biological engineering design elective courses. The remaining six hours are classified as technical electives and consist mainly of upper-division courses in engineering, mathematics, and the sciences as approved by the student’s adviser. The department maintains a list of approved electives.

The areas of technical concentration and the recommended elective courses for each are listed here. Note that additional Biological Engineering Design Elective courses (beyond the six hours required) may be taken to satisfy technical elective requirements. Some electives are specially denoted (†) as strongly recommended by the faculty for students in a particular area of concentration.

**Biomedical Engineering**

NOTE: Pre-Medical students must take CHEM 3603/3601L, Organic Chemistry I, and CHEM 3613/3611L, Organic Chemistry II, instead of CHEM 2613/2611L, Organic Physiological Chemistry. This requires special scheduling of courses beginning in the first sophomore semester. See your faculty adviser for this schedule plan.

**Design Electives:**
- BENG 403 Introduction to Biomedical Engineering†
- BENG 4213 Applications of Biomedical Engineering†

**Technical Electives:**
- CHEM 3613 Organic Chemistry II
- CHEM 3611L Organic Chemistry II Lab
- BIOL 2404 Comparative Vertebrate Morphology, or BIOL 2443/2441L Human Anatomy†
- BIOL 4234 Comparative Physiology, or BIOL 2213/2211L Human Physiology
- BENG 4113 Risk Analysis for Biological Systems
- BENG 4123 Biosensors and Bioinstrumentation
- BENG 4623 Biological Reactor Systems Design
- BIOL 1533/2531L Cell Biology
- BIOL 4233 Microbial Genetics
- KINS 3353 Mechanics of Human Movement

**Bioresource Engineering**

**Design Electives:**
- BENG 4913 Design of Agricultural Waste Management Systems
- BENG 4113 Risk Analysis for Biological Systems
- BENG 4213 Biosensors and Bioinstrumentation

**Technical Electives:**
- BENG 4803 Precision Agriculture
- GEOL 4413 Principles of Remote Sensing
- GEOG 4563 Vector GIS
- GEOG 4593 Introduction to GPS
- MEEG 3113 Machine Dynamics and Control
- MEEG 4123 Finite Element Methods
- INEG 4513 Application of Machine Vision

**Ecological Engineering**

**Design Electives:**
- BENG 4903 Natural Resources Engineering†
- BENG 4113 Risk Analysis for Biological Systems
- BENG 4403 Enclosed Ecosystems Design
- BENG 4623 Biological Reactor Systems Design
- BENG 4913 Design of Agricultural Waste Management Systems
- BENG 4923 Nonpoint Source Pollution Engineering

**Technical Electives:**
- CVEG 3243 Environmental Engineering
- CVEG 4243 Environmental Engineering Design
- CSES 2203 Soil Science
- CSES 4043 Environmental Impact and Fate of Pesticides
- BENG 4803 Precision Agriculture
- GEOG 4543 Geographic Information Systems
- ENSC 4034 Analysis of Environmental Contaminants
- BIOL 3863/3861L General Ecology

**Food and Bioprocess Engineering**

**Design Electives:**
- BENG 4703 Food and Bioprocess Engineering†
- BENG 4113 Risk Analysis for Biological Systems
- BENG 4213 Biosensors and Bioinstrumentation
- BENG 4623 Biological Reactor Systems Design

**Technical Electives:**
- FDSC 4304 Food Chemistry
- FDSC 4124 Food Microbiology
- FDSC 3103 Principles of Food Proc.
- CHEM 3453/3451L Elements of Physical Chemistry
- MEEG 4413 Heat Transfer
- CHEG 4423 Auto. Process Control

The following section contains the list of courses required for the Bachelor of Science in Biological Engineering degree and a suggested sequence. Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

**BIOLOGICAL ENGINEERING PROGRAM**

**Freshman Year - First Semester**
- 2 BENG 1012 Biological Engr Design Fundamentals
- 3 ENGL 1013 Composition I

University of Arkansas, Fayetteville
Second Semester
2 BENG 1022 Biological Engr Design Studio I
3 ENGL 1023 Technical Composition II
2 CHEM 1121 University Chemistry II Lab
4 MATH 2564 Calculus II
3 BIOL 1543 Principles of Biology
1 BIOL 1541L Principles of Biology Lab
17 semester hours

Sophomore Year - First Semester
2 BENG 2612 Biological Engr Design Studio II
4 PHYS 2054 University Physics I
4 MATH 2574 Calculus III
3 BIOL 2013 General Microbiology*
1 BIOL 2011L General Microbiology Lab
3 Humanities/Social Science Elective
17 semester hours

Second Semester
2 BENG 2622 Biological Engr Design Studio III
4 PHYS 2074 University Physics II
3 MEEG 2003 Statics
3 MEEG 2403 Thermodynamics, or
CHEG 2313 Thermodynamics of Single Component Systems
3 CHEM 2613 Organic Physiological Chemistry*
1 CHEM 2611L Organic Physiological Chemistry Lab
16 semester hours

Junior Year - First Semester
2 BENG 3712 Engr Properties of Biol Materials
3 ELEG 2103 Electronic Circuits
1 ELEG 2101L Electronic Circuits Lab
3 MEEG 3013 Mechanics of Materials
3 CVEG 3213 Hydraulics, or
MEEG 3503 Mechanics of Fluids, or
CHEG 2133 Fluid Mechanics
3 CHEM 3813 Intro. to Biochemistry
15 semester hours

Second Semester
3 BENG 3723 Unit Operations in Biological Engr
3 BENG 3803 Mechanical Design in Biological Engr
3 BENG 4103 Instrumentation in Biological Engr
3 MEEG 2013 Dynamics
4 MATH 3404 Differential Equations
16 semester hours

Senior Year - First Semester
3 BENG 4813 Senior Biological Engr Design I
3 BENG 3733 Transport Phenomena in Biological Systems
3 BENG Design elective
6 Humanities/Social Studies Elective
15 semester hours

Second Semester
2 BENG 4822 Senior Biological Engr Design II
3 BENG Design elective
6 Humanities/Social Science Elective

128 Total hours required
*Students in the Pre-Medical focus area must see faculty adviser for alternate scheduling and elective course requirements.

SEE PAGE 251 FOR BIOLOGICAL ENGINEERING (BENG) COURSES
for example, development of the critical thinking process and the solution of mass and energy balances;
• design a system, component, or process to meet desired needs including, for example, determining the capital and operating costs for chemical process equipment and performing technical economic projections;
• locate, interpret, and use physical property data; when data are unavailable, design and conduct experiments, and interpret the resulting data;
• understand professional and ethical responsibility;
• use the techniques, skills, and modern engineering tools necessary for engineering practice including, for example, writing structured computer programs and using commercially available technical computer software;
• develop and use effective written and oral communication skills;
• function in multi-disciplinary teams;
• recognize the need to engage in life-long learning;
• understand the impact of engineering solutions in a global or societal context including, for example, being conscious of social, environmental, and safety concerns; and
• be familiar with contemporary issues.
These outcomes are reinforced and demonstrated in a senior capstone safety and design sequence.

The following section contains the list of courses required for the Bachelor of Science in Chemical Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

CHEMICAL ENGINEERING PROGRAM
Freshman Year - First Semester
4 MATH 2554 Calculus I
3 CHEM 1123 University Chemistry II
1 CHEM 1121L University Chemistry II Lab
3 ENGL 1013 Composition I
3 CHEG 1113 Intro. to Chem Engr I
3 HIST 2003 Hist./American People to 1877
(HIST 2013 or PLSC 2003 may be substituted.)
17 semester hours

Second Semester
4 MATH 2564 Calculus II
3 CHEG 1123 Intro. to Chem Engr II
3 ENGL 1023 Composition II
2 CHEG 1212L Chemical Engr Lab I
3 Humanities/social science elective
15 semester hours

Sophomore Year - First Semester
4 MATH 2574 Calculus III
3 CHEM 3603 Organic Chemistry I
1 CHEM 3601L Organic Chemistry I Lab
4 PHYS 2054 University Physics I
0 PHYS 2050L University Physics Lab I
2 CHEG 1113 Intro. to Chem Engr I
3 Humanities/social science elective
15 semester hours

Second Semester
4 MATH 2584 Calculus IV
3 CHEG 1123 Intro. to Chem Engr II
3 ENGL 1023 Composition II
2 CHEG 1212L Chemical Engr Lab I
3 Humanities/social science elective
18 semester hours

Junior Year - First Semester
4 CHEM Elective
3 MEEG 2003 Statics
3 CHEG 3143 Heat Transport
2 CHEG 3232L Chemical Engr Lab II
3 CHEG 3253 Chem Engr Computer Methods
3 Humanities/social science elective
18 semester hours

Second Semester
4 CHEM Elective
3 MEEG 3013 Mechanics of Materials
3 CHEG 3333 Chem Engr Reactor Design
3 CHEG 3153 Non-Equil Mass Transfer
3 ECON 2143 Basic Economics
(ECON 2013 Principles of Macro-economics may be substituted.)
16 semester hours

Senior Year - First Semester
3 CHEM 4163 Equil Stage Mass Transfer
3 CHEG 4413 Chem Engr Design I
3 CHEG 4813 Chemical Process Safety
3 Technical elective
3 Humanities/social science elective
15 semester hours

Second Semester
2 CHEG 4332L Chem Engr Lab III
3 CHEG 4443 Chem Engr Design II
3 ELEG 3903 Electric Circuits and Machines
3 CHEG 4423 Auto Process Control
3 Technical elective
3 Humanities/social science elective
17 semester hours

132 Total hours required

Technical Elective Options in Chemical Engineering
Each student in chemical engineering is required to complete six semester hours of technical electives. Students may select these courses from upper division (3000 and above) courses in mathematics, engineering, and the sciences with the approval of their adviser. An undergraduate education in chemical engineering provides a firm foundation for many areas of specialization. The following groups of courses can strengthen the background of a student in a particular area of expertise; note that other technical electives are included on the list approved by the department and that not all of the following courses will meet the requirements of a technical elective.

Biotechnology/Biomedical Engineering
CHEG 5513 Biochemical Engineering Fundamentals
CHEG 5523 Bioprocess Engineering
CHEM 3813 Introduction to Biochemistry, or
CHEM 5813 Biochemistry I, or
CHEM 5843 Biochemistry II
BIOL 2323/2321L General Genetics
CEMB 5911 Seminar in Cellular/Molecular Biology
## Chemical Process Safety
- CHEG 5273 Corrosion Control
- INEG 3213 Safety Engineering
- INEG 4223 Occupational Safety and Health Standards
- FDSC 4223 Risk Analysis for Biological Systems
- OMGT 4303 Industrial Safety Administration

## Environmental Engineering
- CHEG 5753 Air Pollution
- CHEG 4263 Environmental Experimental Methodology
- CHEG 4913 Environmental Engineering Chemodynamics
- CHEG 5273 Corrosion Control
- MEEG 4813 Air Pollution Abatement
- MEEG 4843 Environmentally Conscious Design and Manufacturing
- CVEG courses on an approved list available from the department.

## Food Process Engineering
- BENG 4703/4700L Food and Bioprocess Engineering
- BENG 3712 Engineering Properties of Biological Materials
- FDSC 4713/4710L Food Product and Process Development
- FDSC 4124 Food Microbiology
- FDSC 4223 Risk Analysis for Biological Systems
- FDSC 4304/4300L Food Chemistry

## Materials Science and Engineering
- CHEG 5273 Corrosion Control
- CHEG 5733 Polymer Theory and Practice
- MEEG 4303 Materials Laboratory

## Microelectronics
- CHEG 5613 Microelectronics Fabrication and Materials
- ELEG 4203 Semiconductor Devices
- PHYS 3614 Modern Physics
- MATH 3423 Advanced Applied Mathematics

## Nuclear Power Engineering
- CHEG 5273 Corrosion Control
- MEEG 4603 Basic Nuclear Engineering
- MEEG 4623 Radiation Protection and Shielding
- MEEG 4633 Nuclear Power Generation
- CHEM 5263 Nuclear Chemistry

## Pre-medicine
- BIOL 1543/1541L Principles of Biology
- CHEM 3813 Introduction to Biochemistry
- BIOL 2013/2011L General Microbiology
- BIOL 2213/2211L Human Physiology
- BIOL 2443/2441L Human Anatomy

## Simulation and Optimization
- CHEG 5033 Technical Administration
- CHEG 5213 Advanced Chemical Engineering Calculations
- INEG 3313 Engineering Statistics
- INEG 3613 Introduction to Operations Research
- INEG 4623 Introduction to Simulations
- MATH 3083 Linear Algebra

## CIVIL ENGINEERING (CVEG)

**Robert P. Elliott**
Head of the Department
4190 Bell Engineering Center
479-575-4954

- University Professor Emeritus LeFevre
- Professors Buffington, Dennis, Elliott, Gattis, Gross, Hall, Selvam, Wang, Young
- Professor Emeriti Ford, Heiple, Jeffus, Knowles, Moore, Parker
- Associate Professors Soerens
- Associate Professors Emeriti Algure, Pleimann, Thornton
- Assistant Professors Edwards, Hale, Heymsfield, Tooley, Williams (R.), Williams (S.)

Civil engineering is the oldest of all the engineering fields, yet it is as contemporary as the need to provide solutions to today’s environmental problems and to develop advanced transportation systems. The civil engineer plans, designs, builds, and operates projects for the advancement and well being of society while coordinating and conserving human resources. Civil engineering projects range from small to monumental and include public water systems, buildings, bridges, rail and highway networks, wastewater treatment plants, solid and hazardous waste disposal facilities, airports, and soil conservation and flood diversion controls.

The civil engineering profession offers a vast array of opportunities. Civil engineers may work in private employment or with public agencies. They may work indoors in activities such as planning and design, or outdoors in areas such as construction supervision. Employment is possible anywhere in the world.

The objectives of the civil engineering program are to produce graduates who are:
1. employable in any of the following fields: foundation, earthwork, and embankment design and analysis; water, wastewater, and waste handling and treatment; highway facility design and operation; and structural design and analysis.
2. academically prepared to pursue licensure as a Professional Engineer.
3. prepared to pursue an advanced education.

To fulfill these objectives, all students must take courses in geological, environmental, transportation, and structural engineering. Courses are designed to present “real world” applications without sacrificing conceptual and theoretical basics. Students complete design problems in each of these areas; and, as part of the senior year, they participate in two major design projects.

The following section contains the list of courses required for the Bachelor of Science in Civil Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

### CIVIL ENGINEERING PROGRAM

**Freshman Year - First Semester**
- 3 ENGL 1013 Composition I
- 4 MATH 2554 Calculus I
- 2 CVEG 1012 Civil Engr Fund
- 3 CHEM 1103 University Chemistry I
- 1 CHEM 1101L University Chemistry I Lab
- 3 Humanities/social science elective
- 16 semester hours
Second Semester
3 ENGL 1023 Technical Composition II
4 PHYS 2054 University Physics I
0 PHYS 2050L University Physics I Lab
3 CHEM 1123 University Chemistry II
1 CHEM 1121L University Chemistry II Lab
4 MATH 2564 Calculus II
2 GNEG 1122 Introduction CAD
17 semester hours

Sophomore Year - First Semester
4 MATH 2574 Calculus III
3 MEEG 2003 Statics
3 CVEG 1113 CE Computer Applications
3 Humanities/social science elective
3 CVEG 2053 Surveying Systems
1 CVEG 2051L Surveying Systems Lab
17 semester hours

Junior Year - First Semester
4 CVEG 3304 Structural Analysis
3 CVEG 3133 Soil Mechanics
3 CVEG 3213 Hydraulics
3 CVEG 3413 Transportation Engineering
2 GEOL 3002 Geology for Engineers
3 Humanities/social science elective
16 semester hours

Second Semester
2 CVEG 3022 Public Works Economics
3 CVEG 3223 Hydrology
3 CVEG 3243 Environmental Engineering
3 CVEG 4313 Structural Steel Design I
4 Science elective
3 Humanities/social science elective
18 semester hours

Senior Year - First Semester
3 CVEG 4143 Foundation Engineering
3 CVEG 4303 Reinforced Concrete Design I
3 CVEG 4433 Transportation Pavements & Materials
2 CVEG 4852 Professional Practice Issues
6 Engineering electives
1 Civil Engineering design elective
18 semester hours

Second Semester
3 CVEG 4243 Environmental Engr Design
3 CVEG 4513 Construction Mgmt
6 Engineering electives
1 Civil Engineering design elective
3 Humanities/social science elective
16 semester hours

136 Total hours required

Elective Courses
Students must select four 3-hour engineering elective courses in conference with their adviser. The selection must include at least three civil engineering courses. The fourth course can be a civil engineering course or one of the following: MEEG 2013 Dynamics, MEEG 2403 Thermodynamics, ELEG 3903 Electric Circuits and Machines, MEEG 3703 Numerical Methods. Normally, the civil engineering courses are selected from among the 4000-level elective CVEG courses. Exceptional students may be allowed to choose from the 5000 (graduate-level) course series. Humanities and social science electives are selected from courses approved by the college. The science elective requirement is satisfied by completing one of the following course sequences: CHEM 3603 and CHEM 3601L, Organic Chemistry, GEOL 3513 and GEOL 3511L, Structural Geology, BIOL 2013 and BIOL 2011L, General Microbiology, or PHYS 2074 and PHYS 2070L, University Physics II. Lists of approved electives are on file in the department office.

Civil Engineering Design Electives
Students must complete two of the following four CVEG design project electives: CVEG 4811 Environmental Design Project, CVEG 4821 Geotechnical Design Project, CVEG 4831 Structural Design Project, and CVEG 4841 Transportation Design Project. Each design project elective is associated with a specific design-oriented course. The associated course must be taken at the same time as the design project elective. The associated courses may be taken alone but the design electives cannot.

Honors Program Requirements
Students enrolled in the Honors College who are to receive the Bachelor of Science in Civil Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Civil Engineering program including at least 3 hours resulting in an Honors Thesis. The CVEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses. The following Civil Engineering courses are offered for honors credit: CVEG 491V H Honors Studies in Geotechnical Engineering, CVEG 492V H Honors Studies in Environmental Engineering, CVEG 493V H Honors Studies in Structural Engineering, CVEG 494V H Honors Studies in Transportation Engineering, and CVEG 4983 H Undergraduate Honors Thesis

SEE PAGE 268 FOR CIVIL ENGINEERING (CVEG) COURSES

COMPUTER SCIENCE
AND COMPUTER ENGINEERING (CSCE)

Jerry Yeargan
Head of the Department
311 Engineering Hall
479-575-6197

• Distinguished Professor Yeagars
• Professors Crisp, Deaton, Lala, Skeith, Sohraby, Starling, Thompson (C.)
• Associate Professors Apon, Beavers, Li, Lusth, Panda, Parkerson
• Assistant Professors Di, Hexmoor, Thompson (D.)
• Instructors Baker, Holmes, Wiggins

The faculty of the Computer Science and Computer Engineering department is engaged in multidisciplinary academic research, course offerings, and student projects in areas such as: high performance and scientific computing, grid computing, agents, middleware, net-
working, data security, nanotechnology, graph theory, and subsystem design. Requirements for the Bachelor of Arts degree are listed in the Fulbright College of Arts and Sciences section of this catalog.

The educational objectives of the department are to produce graduates who are recruited in a competitive market and make valuable contributions to a wide variety of industries, particularly in computer and information technology; succeed in graduate or professional studies; pursue life-long learning and continued professional development; and undertake leadership roles in their profession, in their communities, and in the global society.

Since almost all of today's complex systems encompass hardware and software elements, the computer engineering degree (CENG) has required sequences of courses in both hardware and software aspects of computer applications and design. Computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with open-ended problems with opportunities for research and design.

A degree in computer science (CSCE) provides unique diversity in career choices. Computer science graduates can design, implement, or manage computer systems, as well as adapt computers to new applications. Computer science core courses include the fundamentals of programming concepts, data structures, operating systems, algorithms, formal languages, database management systems, and programming languages.

Humanities and social science electives are selected from courses approved by the College of Engineering. The Undergraduate Handbook has a list of approved basic science, mathematics, humanities/social science, and technical electives. Any course not included in these lists requires faculty approval.

The following section contains the list of courses required for the Bachelor of Science in Computer Engineering and Computer Science degrees and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

### Computer Engineering Program

**Freshman Year - First Semester**
- 4 MATH 2554 Calculus I
- 3 CHEM 1103 University Chemistry
- 1 CHEM 1101L University Chemistry Lab
- 3 CSCE 1113 Programming Foundations I
- 1 CSCE 1111L Programming Foundations I Lab

* Computer Science majors are required to take 12 hours of scientific coursework consisting of either PHYS 2054/2050L, PHYS 2074/2070L and CHEM 1103/1101L; or CHEM 1103/1101L, CHEM 1123/1121L and PHYS 2054/2050L.

Degree Program Changes
Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

Requirements for Departmental Honors
Computer Science and Computer Engineering

The Honors Program in Computer Science and Computer Engineering is designed for the superior student and is intended to help the student develop a more comprehensive view of Computer Science and Computer Engineering. The program provides a vehicle for the recognition of achievements of work beyond the usual course of study. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate’s whole program of honors studies.

The department considers the following requirements necessary for graduation with honors:
1. The candidate must satisfy the requirements set forth by the College of Engineering.
2. A student must obtain at least a 3.50 grade-point average in required Computer Engineering and/or Computer Science courses.
3. The student must complete 7 hours of Honors credit in the major, which includes 4 hours of Honors Thesis taken as two successive semesters of CSCE 4912H or CENG 4912H and 3 hours of non-thesis.

ELECTRICAL ENGINEERING (ELEG)

Aicha Elshabini
Head of the Department
3217 Bell Engineering Center
479-575-3009

• Distinguished Professor Brown (W.D.), Elshabini, Yeargan, Vasundara Varadan, Vijay Varadan
• University Professor Schmitt
• Professors Ang, Balda, Manasreh, Mantooth, Martin, Naseem, Schaper, Waite
• Associate Professors Barlow, Brown (R.L.), Burkett, El-Shenawee, Caldwell, Gattis, McCann
• Assistant Professor Lee
• Professors Emeritus Jones, Mix, Stephenson, Webb

Electrical engineering is a profession in charge of designing electrical devices, components, integrated chips, computer chips, and electronic assemblies to benefit mankind. This may encompass systems such as radar and satellite antennas, microelectronics, optical, portable or wireless electronics and communications, and embedded computers in everyday consumer or military electronics.

The electrical engineering graduate is at the forefront of the technology leading to the dramatic increase in global communications, the accelerated use of electric power, the dominating influence of...
The electrical engineering program, includ-
ing faculty, students, staff, and facilities, is a major resource of the state, region, and nation. Faculty members are encouraged to provide services to both the community and the profession. Faculty members are active in local, state, national, and international professional and service organizations, as well as public and private schools involving grades K-12.

The electrical engineering curriculum is designed to provide students with a knowledge of scientific principles and methods of engineering analysis to form a solid foundation for a career in design, research and development, manufacturing and processing, measurement and characterization, or management. Students progressively build their design experience throughout the curriculum and demonstrate this ability in the senior design lab, the Honors electrical engineering design I and II, and the senior honors thesis. Honors Colloquium provides information on special topics and issues in the electrical engineering discipline. Equally important, the curriculum introduces students to subjects in the humanities, social sciences, success, and ethics so they may better understand the interaction of technology and society.

The electrical engineering curriculum is divided into three phases. The first year is the pre-professional curriculum, which concentrates on development of a sound understanding of basic science and mathematics. Due to the crucial importance of this foundation material to the study of electrical engineering, satisfactory completion of the pre-professional curriculum is required prior to admission to entry-level electrical engineering courses. The second- and third-year course work further develops scientific principles and covers the basic core of the professional curriculum in electrical engineering. The fourth year is composed primarily of senior-level elective courses. At this time, the student, in conjunction with his or her adviser, may plan a program to concentrate in one or more of the technical specializations within electrical engineering, such as power, electronics, mixed-signal, microelectronics, circuits, digital or computer hardware, communications, controls, electromagnetics, sensors, and nanotechnology. This final year permits the student to tailor a program suited to his or her individual career objectives.

The graduation requirement in electrical engineering is 128 semester hours. The following section contains the list of courses required for the Bachelor of Science degree in Electrical Engineering and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

**ELECTRICAL ENGINEERING PROGRAM**

**Freshman Year - First Semester (Pre-Professional Curriculum)**

1. ELEG 1001 Intro. to Electrical Engineering
2. ENGL 1013 Composition I
3. MATH 2554 Calculus I
4. CHEM 1123 University Chemistry II

** Sophomore Year - First Semester (Professional Curriculum)**

1. ELEG 1011 Engineering Success and Ethics
2. ENGL 1023 Technical Composition II
3. MATH 2564 Calculus II
4. CHEM 1123 University Chemistry II
5. CSCE 1113 Programming Foundations I

3 Technical Elective
3 Upper-level humanities/social science elective
13 semester hours

128 Total hours required

In addition to the graduation requirements for the College of Engineering and the University of Arkansas, candidates for an electrical engineering degree must have earned a grade-point average of no less than 2.00 on all ELEG courses, excluding ELEG laboratories.

Degree Program Changes
A student must meet all requirements of the degree programs and is expected to keep informed concerning current regulations, policies, and program requirements in a chosen field of study. Changes made in curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not normally required for that student. Students should consult their adviser for additional information.

Electrical Engineering Honors Program
To graduate with Honors in electrical engineering, students must be a member of the Honors College and complete a minimum of 12 hours of honors credit of which 6 hours must be Electrical Engineering courses and includes the following courses: ELEG 4061H – Honors Electrical Engineering Design I, ELEG 4071H – Honors Electrical Engineering Design II, and ELEG 4081H – Senior Thesis. Students must also have a minimum cumulative GPA of 3.50 to graduate with Honors in Electrical Engineering.

Recommended Technical Studies
Students in electrical engineering are required to complete 15 semester hours of technical electives. A minimum of nine semester hours of these courses must be 4000- or 5000-level electrical engineering elective courses. A student may select the remaining six semester hours from upper-division technical courses in electrical engineering, mathematics, engineering, and the sciences. Not more than six semester hours total in ELEG 488V and ELEG 489V may be credited toward technical electives.

Communications

The following courses are applicable to all of the technical specialization areas listed above.
INEG 3113 Law and Ethics
INEG 3213 Safety Engineering
INEG 3413 Eng Economic Analysis
INEG 4223 Occupational Safety and Health Standards
INEG 4443 Engineering Management

Mathematics/Science Elective
Each student in electrical engineering is required to complete three semester hours of mathematics or science elective to be chosen from the following courses:
MATH 3083 Linear Algebra
MATH 3353 Numerical Methods in Analysis
MATH 3423 Advanced Applied Mathematics
MATH 3443 Complex Variables for Application
STAT 3013 Intro. to Probability and Statistics
CHEM 3504 Physical Chemistry I
CHEM 3603 Organic Chemistry I
PHYS 2094 University Physics III
PHYS 3113 Analytical Mechanics
PHYS 3544 Optics
PHYS 3614 Modern Physics
MEEG 2703 Computer Methods in Mechanical Engineering

INDUSTRIAL ENGINEERING (INEG)
John English
Head of the Department
4207 Bell Engineering Center
479-575-3156

- Distinguished Professor White
- Professors English, Johnson
- Associate Professors Cassady, Fant, Pohl, Rossetti
- Assistant Professors Buyurgan, Chimka, Mason, Nachtmann, Nam
- Adjunct Associate Professor Gattis

The mission of the industrial engineering department at the University of Arkansas is to be a nationally competitive, student-centered industrial engineering program serving Arkansas and the world through undergraduate and graduate studies and leading-edge research programs.

Industrial engineers are concerned with improving organized activity. The physical arrangement of people, equipment, and material sig-
significantly influences the effectiveness of any organization — whether the organization is industrial, governmental, or commercial.

Today's industrial engineers develop applications of new processing automation and control technology; install data processing systems, performance measures and standards, job evaluation and wage and salary programs; research new products and product applications; devise ways to improve productivity through application of technology and human factors; select operating processes and methods to accomplish a given task using proper tools and equipment; design facilities, management systems, operations procedures, storage systems; improve allocation of resources, planning and control systems for distribution of goods and services, production, inventory, quality and plant maintenance; enhance plant environment and the quality of working life; evaluate reliability and quality performance; implement office systems, procedures, and policies; analyze complex business problems through operations research; conduct long-range organization studies, plant location surveys, system effectiveness studies; and study potential markets for goods and services, raw material sources, labor supply, energy resources, financing and taxes.

Industrial engineers integrate engineering skills with mathematics and computer science tools, providing systematic ways to maximize productivity and quality while minimizing time and cost.

The goal of the Industrial Engineering Undergraduate Program at the University of Arkansas is to prepare men and women for professional careers and graduate studies in Industrial Engineering. We provide a foundation in mathematics, science, humanities and social sciences, engineering science, and engineering design to produce Industrial Engineers with the intellectual, technical, and professional competence to develop, implement, and manage industrial engineering solutions to complex problems in industry, government, and society.

The IE Program Objectives represent and describe the expected accomplishments of our graduates resulting from participation within our program within the first few years after graduation. Our objectives have been developed to address the needs of our constituencies and to be consistent with and supportive of our mission and programmatic goals. The IE Program Objectives are as follows:

1. to train and educate students in the mathematics, science, methodologies, computational skills, and analysis techniques of Industrial Engineering practice, including such core Industrial Engineering topics as probability, statistics, engineering economics, human factors, engineering management, computing, and operations research applied to manufacturing, logistics, and service systems;
2. to develop students with written and oral communication skills, teamwork skills, professionalism, and ethics so that they can contribute to Industrial Engineering practice and leadership within the profession;
3. to develop students who possess the ability to design, improve, and manage integrated systems of people, technologies, material, information, and equipment within the context of societal and contemporary issues in engineering practice such as safety and health;
4. to develop students who possess the ability to solve unstructured problems by collecting, modeling, analyzing, and interpreting data within Industrial Engineering practice;
5. to make students aware of the need for, and to provide the ability to accomplish, life-long learning, continuing education, and professional growth within the field of Industrial Engineering.

These specific objectives are reinforced by a senior capstone design course in which the student must apply the skills to a comprehensive design problem for an industry setting. This course integrates preceding courses through development of physical systems and organizational characteristics, financial aspects, product analysis, equipment selection, production layout, distribution systems, and overall economic analysis.

The following section contains the list of courses required for the Bachelor of Science in Industrial Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

The total graduation requirement in industrial engineering is 128 hours. For further information please visit us on the World Wide Web at http://www.ineg.uark.edu/.

INDUSTRIAL ENGINEERING PROGRAM

Freshman Year - First Semester
3 INEG 1103 Principles of Indust Engr
4 MATH 2554 Calculus I
3 ENGL 1013 Composition I
3 CHEM 1103 University Chemistry I
1 CHEM 1101L Univ Chemistry I Lab
14 semester hours

Second Semester
4 MATH 2564 Calculus II
3 INEG 1403 Industrial Cost Analysis
3 ENGL 1023 Technical Composition II
3 Science elective
13 semester hours

Sophomore Year - First Semester
4 MATH 2574 Calculus III
3 Computer Elective I
3 INEG 3313 Engineering Statistics
4 PHYS 2054 University Physics I
3 ECON 2143 Basic Economics
17 semester hours

Second Semester
4 MATH 3404 Differential Equations
3 Computer Elective II
4 PHYS 2074 University Physics II
3 INEG 3413 Eng Economic Analysis
3 INEG 4333 Industrial Statistics
17 semester hours

Junior Year - First Semester
3 INEG 3713 Methods and Standards
3 INEG 4623 Intro. to Simulation
3 Engineering Science Elective I
3 ELEG 3903 Electric Circuits and Machines
3 INEG 2513 Manuf System Design
3 (History or government requirement: HIST 2003, HIST 2013, or PLSC 2003)
18 semester hours

Second Semester
3 INEG 3613 Intro. to Operations Research
3 Engineering Science Elective II
3 INEG 4523 Automated Production
3 Engineering Science Elective III
3 Humanities/social science electives
15 semester hours

Senior Year - First Semester
3 INEG Management Elective
3 (An upper-level ROTC course may be substituted.)
3 INEG 4543 Materials Handling
3 Technical elective
3 INEG 4723 Ergonomics
6 Humanities/social science electives
18 semester hours

Second Semester
3 INEG 4553 Production Planning/ Control
4 INEG 4904 I.E. Design
3 Humanities/social science elective
6 Technical electives
16 semester hours

128 Total hours required

Technical Electives
The purpose of technical electives is to provide students with the opportunity to expand their education along lines of particular interest to them. The approved list of technical electives is available in the industrial engineering department. At least three hours must be selected from INEG courses.

Humanities/Social Science Electives
Although any elective included on the humanities/social science list may be selected, PSYC 2003 General Psychology is recommended for industrial engineers.

Science Elective
The approved list of science electives is available in the industrial engineering departmental office.

Computer Elective
The approved list of computer electives is available in the industrial engineering departmental office.

Engineering Science Electives
The approved list of engineering science electives is available in the industrial engineering departmental office.

INEG Management Electives
The approved list of management electives is available in the industrial engineering departmental office.

MECHANICAL ENGINEERING (MEEG)
Joseph J. Renics
Head of the Department
204 Mechanical Engineering Bldg.
479-575-3153
Fax: 479-575-6982
E-mail: meeg-undergrad@engr.uark.edu

- Distinguished Professor Saxena
- Giffels Professor Bhat
- Professors Jong, Malshe, Rencis, Schmidt, West
- Associate Professors Couvillion, Gordon, Nutter, Roe, Springer, Tung
- Assistant Professor Zou
- Instructor Davis
- Adjuncts Batzer, Cole, Hamilton

The mechanical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that result in graduates who are qualified and prepared to meet the demands of a professional career in the present and future work place and be able to assume a responsible place of leadership in a complex technological society.

The courses offered in mechanical engineering provide the student with a broad understanding of fundamental scientific principles that serve as a background for many fields of specialization. The undergraduate curriculum is designed to stress basic engineering principles and to assist in developing creative thinking. Emphasis is placed on the science and art of designing machines and systems, of converting energy into useful forms, and developing a basic understanding of engineering mechanics. The undergraduate program leads to a Bachelor of Science degree in Mechanical Engineering; its educational objectives are to produce graduates who:

1. effectively analyze and design mechanical systems and energy systems;
2. contribute to the success of companies in Arkansas and the rest of the world through the practice of mechanical engineering;
3. meet or exceed the needs and expectations of mechanical engineering employers in industry, government, and private practice;
4. engage in professional activities that promote the mechanical engineering profession and provide continuing self-development;
5. succeed in graduate study and research if pursued.

The Bachelor of Science in Mechanical Engineering curriculum includes, in addition to the humanities/social science elective courses, a total of 12 hours of technical and science electives. A student must select these electives with the approval of his or her adviser.

It is expected that electives will be chosen to provide a coherent program within one or more areas of specialization or options available to mechanical engineers. Areas of specialization are available in the nuclear, mechanical systems design, materials, thermal systems design, and engineering mechanics fields. Current options include pre-medical, management, business, and astronautics.

The first-year curriculum is essentially the same as prescribed for all engineering freshmen. The full curriculum follows, with the number of credit hours at the left, preceding course numbers and titles. In addition to the curriculum below, all students must meet the exemption requirements or take ENGL 2003 Advanced Composition.

The following section contains the list of courses required for the Bachelor of Science in Mechanical Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students interested in obtaining a sequencing schedule of courses may contact the Mechanical Engineering office.

MECHANICAL ENGINEERING PROGRAM
Freshman Year - First Semester
3 ENGL 1013 Composition I

3 Technical/science elective
3 Technical/science elective
3 Humanities/social science elective (lower level)
3 Humanities/social science elective (3000- 4000-level)
15 semester hours

124 Total hours required

Technical/Science Electives
The purpose of technical/science electives is to provide students with the opportunity to expand their education along lines of particular interest to them. The approved list of technical/science electives and selected courses for various options is available in the Mechanical Engineering department office.

Humanities/Social Science Electives
Any elective included on the humanities/social science list may be selected. This list is available in the department office.

SEE PAGE 307 FOR MECHANICAL ENGINEERING (MEEG) COURSES
MISSION AND OBJECTIVES

The primary goal of the University of Arkansas School of Law is to prepare lawyers who will render high-quality professional service to their clients, who are interested in and capable of advancing legal progress and reform, and who are prepared to fill the vital role of the lawyer as a community leader.

The School of Law has certain widely shared objectives for its educational program. There are a number of important skills and qualities every lawyer should possess. The major objectives of legal study are to see that graduates possess these skills and qualities upon completion of their legal studies.

These objectives can best be realized by a competent and dedicated full-time faculty working in partnership with an interested and involved bench and bar. The faculty and administrative staff at the Law School strive to maintain mutually beneficial relationships with judges and practicing lawyers. Appellate courts regularly schedule cases at the School of Law. The judges meet with students informally after the arguments.

While only full-time faculty members teach first-year courses and other required substantive law courses, practice skill courses such as legal clinic and trial advocacy and activities such as moot court and client counseling depend on the assistance of the practicing bar.

The School of Law educational program is directed to lawyers and judges as well as to law students. The study of law cannot end with the receipt of a diploma. Significant and rapidly changing developments in substantive and procedural law and in the way that law is practiced has created the need for a quality program of continuing legal education. Recognizing this need, the University of Arkansas School of Law, in cooperation with the organized bar, provides lawyers and judges with the opportunity to enhance their knowledge and skills through seminars, workshops, and publications. These programs attempt to blend practical considerations in the solution of legal problems with policy, theoretical, and ethical considerations.

The University of Arkansas School of Law also has a strong sense of responsibility to the people of Arkansas. Thus, members of the faculty and student body are active in numerous public service activities. Legal counsel to the indigent is provided through the clinical education program at the School and by special court appointments from time to time. Students and faculty also serve on bar, civic, and legislative committees and task forces. A number of faculty and students contribute time and expertise to state agencies and law reform groups. All of these activities offer to students a laboratory of legal work that is eminently real, while at the same time enabling the University of Arkansas School of Law to be of service to the people of Arkansas.
Teaching Methods

Legal training involves the learning of principles through discussion and of skills by practice. The student must be, by definition, an active participant in that process.

Socratic or Inductive Teaching: The “case method” is the basic tool of traditional American legal education. This method involves the study and discussion of litigated cases. The teacher calls upon the student to respond in a stimulating question-and-answer dialogue, frequently involving several class members and often including more questions than answers. The learning experience occurs not only in the interchange between teacher and student, but also among the students themselves. The perceptive student will soon learn that a key to the realization of maximum benefit from these interchanges is the ability to listen with discrimination.

This process, applied skillfully by expert teachers and by students possessing a sense of awareness and curiosity, hones the minds of students, develops their respect for facts, and creates a sensitivity to essential differences among issues, policies, reasons, and arguments. Intensive and consistent daily preparation is necessary for students to participate effectively in this process.

Problem Solving: In some of the first-year courses, and in many later courses, students are given practical legal problems. These problems may involve the drafting of legal documents or the formulation of a course of action for a hypothetical client.

Seminars: By the time the students reach their third year, and sometimes earlier, they will be prepared to engage in significant legal research in selected areas of specialization. A primary source for such experience will be seminars taught informally in small groups by professors who are experts in selected subjects. Frequently, a student will be expected to defend a seminar paper before classmates under circumstances that provide lively and constructive discussion.

Clinical Experience: Of increasing importance in legal education is the role of practical, on-the-job training involving legal problems of actual clients. Legal clinic courses provide valuable client counseling experience, as well as participation in actual trials and appeals under the supervision of a member of the faculty who is also a licensed attorney.

The clinic has offices in the Law Programs Center. Representation is provided for students and indigent local residents. Both civil and criminal referred criminal cases are accepted by the clinic. In addition, the Law School plans to continue to offer students the opportunity to participate in a mediation clinic, and has plans for both a transactional and an appellate practice clinic for 2005-06.

Individual Research: During the second and third years, students will be permitted to engage in research and writing projects for credit under the supervision and consultation of a selected faculty member, in an area of particular interest to the student.

Skills Classes: Many classes in the School of Law involve a significant skills component in which students are placed in a simulated client-based situation and asked to respond appropriately. The curriculum includes a number of specially designated skills classes that focus on practice skills. All law students are required to take at least one skills class prior to graduation.

FACILITIES AND RESOURCES

The Robert A. Leflar Law Center facility includes two buildings, Waterman Hall and the Law Programs Center.

Waterman Hall houses the Young Law Library and includes courtroom space, classrooms, seminar rooms, student lounges, and office space for student organizations, faculty and staff. The Law Programs Center houses the legal clinic, the National Agricultural Law Center, and the Arkansas Law Review.

Improvements have been and continue to be made to the Leflar Law Center as the need for expansion arises. In recent years, substantial renovations have been made to the student lounges and classrooms. In addition to the cosmetic improvements, a generous gift of more than $500,000 from alumnus Ron LeMay enabled the school to update and expand its electronic infrastructure to accommodate new technology, which includes a videoconferencing system, multi-media retrieval system, structured wiring system, and data equipment.

A capital campaign is currently underway as the School of Law seeks to complete funding for an addition to house more library space and classrooms that will readily accommodate state-of-the-art technology. The expansion project is scheduled to commence in 2005 and when finished, will offer students and other members of the Law School community access to a superior facility.

Robert A. and Vivian Young Law Library

The Young Law Library contains more than a quarter million volumes, including cases and statutes from every American jurisdiction. The law library also contains a current and complete collection of legal encyclopedia, digests, tests, treatises, law reviews, reports of administrative agencies, and other government publications.

The Young Law Library is a depository for federal, state, and United Nations documents. It is the only U.N. documents library in the state and one of a few in the Midwest. The library includes a growing collection of agricultural law materials developed with assistance from the National Agricultural Law Center. We have also begun collecting international legal materials to support the curriculum and faculty research.

Students researching legal problems use traditional printed resources and electronic resources available across the Internet. Portals such as Loislaw.com, LEXIS, WESTLAW, the State of Arkansas Web page, the National Agriculture Law Center Web page, and the Young Library’s Web page help students identify and use appropriate resources. Computer labs are available for student use. While primarily designed for the use of Arkansas students, the Young Law Library also serves the research needs of the bench, the bar, and the University community. The Young Law Library provides an attractive and comfortable atmosphere for study and research. Included within the law library is the Barrett Hamilton Law Library Mezzanine, a particularly attractively study and shelf space area. In addition, the main campus library, Mullins Library, is located near the Young Law Library. The two libraries work closely together to identify, acquire, and share resources throughout the campus.

Law Faculty

- Distinguished Professors Killenbeck (M.), Laurence
- Professors Atkinson, Bailey, Beard, Brill, Brummer, Flaccus, Goforth, Guzman, Judges, Kilpatrick, Leflar, Matthews, Moberly, Mullane, Norvell, Seligmann, Watkins
- Associate Professors Ewelukwa, Kelley, Nance, Schneider, Sheppard
- Clinical Associate Professors Baker, Coats, Foster, Killenbeck (A.), Sampson, Tarvin
- Assistant Professors Circo

OTHER PROGRAMS

Joint J.D./M.B.A. Program (Business Administration)

The School of Law and the Sam M. Walton College of Business cooperate in offering an opportunity for a student to pursue a juris doctor (J.D.) degree and a master’s of business administration (M.B.A.) degree concurrently. Students working to pursue their degrees concurrently must gain admission to both the School of Law and the Graduate School and be accepted into the program of study leading to the M.B.A. degree. If the student is accepted into both programs, a maximum of six hours of approved upper-level elective law courses
may be used as duplicate credit toward the M.B.A. degree and a maximum of six hours of approved graduate courses in business administration may be used as duplicate credit toward the J.D. degree, thus reducing the total time necessary for completion of the degrees.

Joint J.D./M.P.A. Program (Public Administration)

The department of political science, the Graduate School, and the School of Law cooperate in offering a dual degree program that allows a student to pursue a juris doctor (J.D.) degree and a master’s of public administration (M.P.A.) degree concurrently. Students must be admitted to the M.P.A. program, the School of Law, and the dual degree program. If a student seeks to enter the dual degree program after enrolling in either the law school or the M.P.A. program, he or she must obtain admission to the other degree program and the dual program during the first year of study.

The School of Law accepts a maximum of nine hours of M.P.A. courses to satisfy requirements for the J.D. degree. To qualify for J.D. credit, the M.P.A. courses must come from a set of core courses and must be approved by the School of Law. For purposes of the M.P.A. degree, 15 hours of elective courses may be taken in the School of Law, provided they are in an area of concentration approved by the director of the M.P.A. program. Students must earn a grade of B or higher in any M.P.A. course offered for credit toward the J.D.

Students admitted to the dual degree program may commence their studies in either the School of Law or in the M.P.A. program but must complete first year course requirements before taking courses in the other degree program. If they do not maintain the academic or ethical standards of either degree program, students may be terminated from the dual degree program. Students in good standing in one degree program but not the other may be allowed to continue in the program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.P.A. degree, he or she cannot count any hours of M.P.A. courses toward the J.D. degree. Likewise, M.P.A. students may not be able to count certain law courses if they decide to discontinue their studies in the School of Law. The J.D. degree will be awarded upon completion of all degree requirements; the M.P.A. will be awarded upon completion of the comprehensive examination and the internship (and internship report), or alternately, six hours of additional coursework.

Joint J.D./M.A. Program

The School of Law and the Department of Political Science provide a dual J.D./M.A. in International Law and Politics. This program’s students must be admitted both to the School of Law and the Graduate School, Department of Political Science.

A maximum of 12 hours of approved, upper-level elective law courses may be used as credit toward the M.A. and a maximum of nine hours of approved graduate courses in political science may be used as credit toward the J.D. degree -- reducing the time necessary to complete both degrees by about one academic year. The M.A. program offers a six-hour thesis or a paid, six-month internship option designed to prepare students for a career in international politics or law.

The 12 hours of M.A. courses taken in the School of Law must relate to the study of international law and be approved by the student’s M.A. advisor and the Law School’s Associate Dean of Academic Affairs. The nine hours of approved graduate courses in political science may include: Comparative Political Analysis; Seminar in International Politics; Seminar in Contemporary Problems; International Political Economy; and ECON 4633, International Trade Policy. Other political science and graduate-level courses may be taken by permission. Paid internship credits cannot be applied toward the juris doctorate.

SCHOOL ADMISSION REQUIREMENTS

For complete details concerning admission to the University of Arkansas School of Law, see the School of Law Catalog or write to School of Law Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701, or telephone 479-575-3102.

General Information

Except for students in the “3/3 Programs” described later, applicants must have completed all requirements for a bachelor’s degree from an accredited institution prior to enrolling in the School of Law. All applicants must take the Law School Admission Test (LSAT) administered by Law School Admission Services.

Admission of most students is based on the applicant’s undergraduate grade-point average and his or her LSAT test score. However, the School of Law also seeks a diverse student body with a broad set of backgrounds, interests, life experiences, perspectives, qualifications, and career objectives. In selecting a small percentage of applicants, therefore, the admissions committee may consider a number of factors relevant to a determination of how the applicant might contribute to such diversity within the School of Law.

There is no predetermined satisfactory grade-point average or law school admission test score. Admission is on a selective basis.

While admissions personnel are happy to answer any questions that an applicant may have, the interview as a device for the applicant to “sell” herself or himself is not a part of the admissions process. The admissions committee works only with the written materials in an applicant’s file.

LSAT

The Law School Admission Test (LSAT) is given four times a year in Fayetteville and at other locations throughout Arkansas, as well as in other states. Arrangements may be made by writing to Law School Admissions Services, Box 2000, Newton, PA 18940. Applicants for admission are urged to take the test at least nine months prior to expected entrance to law school.

LSDAS

The University of Arkansas participates in the Law School Data Assembly Service (LSDAS). The LSAT/LSDAS registration packet may be obtained by writing directly to Law School Admissions Services, Box 2000, Newton, PA 18940. The packet includes instructions for providing transcripts of scholastic work for analysis by the LSDAS. The applicant should see that the LSAT score and LSDAS reports are sent to this school.

Pre-Law Study

No pre-law curriculum is prescribed at the University of Arkansas School of Law or at any other American law school. Experience has shown that students do equally well in law school and in law practice regardless of their differing educational backgrounds. As a result, no single “pre-law major” is required or even recommended. Students in a position to structure their college curricula should select courses that emphasize analytical and problem-solving skills and courses in which written work is vigorously edited. Arkansas admits applicants from a wide variety of college majors. The resulting diversity enhances and enriches the educational experience of all students.

The Admission Process

The University of Arkansas School of Law admits one beginning class in August of each year. Applications for admission may be obtained from the Office of Admissions, University of Arkansas School of Law, Leflar Law Center, Fayetteville, AR 72701.
Applications should be completed as early as possible. While applications are considered as long as there are openings in the entering class, few applications arriving after April 1 receive favorable action.

The admission process at Arkansas is a continuing one. As test reports and scores are received, admission decisions are made. It is impossible to give a final decision on some applicants until late spring.

An applicant whose admission has been approved will receive a tentative admission notice. The applicant will be required to deposit a $75 pre-registration fee. This fee is not refundable but is applied to the regular registration fee when the student registers.

Other Admission Information

Persons who have attended other law schools should not follow the above procedure but should apply to the Associate Dean for Students at the School of Law as a transfer student, indicating previous attendance at another school. Failure to indicate such attendance will automatically void a tentative admission granted to such person.

A student may not register in the School of Law for any course without first complying with all admission requirements for regular law students.

Transfer Students

A law student who has received a degree from an approved college and thereafter has completed work with satisfactory scholarship in a law school accredited by the American Bar Association is eligible to be considered for transfer to the University of Arkansas School of Law. The amount of transfer credit to be granted will depend upon the quality of performance and the relation of completed courses to the program of this school. Only credits or units (not grades) are transferable in any case, and even credits will not be accepted for any course or other work in which a grade below 2.0 or the equivalent has been given from the other law school. To qualify for a degree, the student must comply with the American Bar Association’s residency requirements, which require attendance at this Law School for at least 60 credit hours.

Failure to disclose attendance at another college or law school or expulsion or suspension therefrom is sufficient grounds to require withdrawal.

Visiting Students

A student in good standing at another fully accredited law school may apply for admission as a visiting student. Enrollment restrictions may limit class selection, and visiting students are not eligible to receive degrees from the School of Law.

3/3 Programs

The School of Law and the J. William Fulbright College of Arts and Sciences have agreed on a program that will enable outstanding students to enter law school after their third year of college. A student enrolled in the Fulbright College is eligible to begin study in the UA School of Law after the completion of at least 94 hours of college work if the following criteria are met:
1. Completion of all University, college, and major course requirements for their undergraduate degree;
2. A cumulative grade-point average of at least 3.50; and
3. A score of at least 159 on the Law School Admissions Test.

Such students will receive a Bachelor of Arts or a Bachelor of Science degree after the completion of sufficient hours of law school work to meet the regular requirements of Fulbright College. These students will then receive a juris doctor (J.D.) degree after completing the required number of hours of law school work.

In addition to the 3/3 program with the J. William Fulbright College of Arts and Sciences, the Law School has a similar program with the department of agricultural economics and agribusiness in the Dale Bumpers College of Agricultural, Food and Life Sciences. Exceptional students may enroll in the Law School in their fourth year of undergraduate study. Students will be required to have (1) completed at least 95 credit hours in the pre-law program, (2) a cumulative grade-point average in all college or University course work of at least 3.50 without grade renewal, and (3) an LSAT score of at least 159. The B.S.A. Agricultural Business degree will be granted after successfully completing 29 credit hours from the first year law school course work.

It is a requirement of the Law School’s accreditation standards that no student be admitted to the University of Arkansas School of Law until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in these 3/3 programs satisfy this requirement.

COLLEGE SCHOLARSHIPS

Students are expected to make sufficient financial arrangements for the first year of study without the necessity of seeking employment. All law students are required to be full-time students, and no law student is permitted more than 20 hours per week of employment. First-year students are strongly discouraged from working while enrolled in classes. First-year students are expected to adhere to a standard curriculum; also, some courses in the upper-division curriculum are required.

Applications for financial aid may be obtained from the Office of Financial Aid, University of Arkansas, Hunt Hall 114, Fayetteville, AR 72701, 479-575-3806. This information must be submitted to the Office of Financial Aid by April 1. Specific fees and costs are listed in the School of Law Catalog.

DEGREE REQUIREMENTS

For course information and degree requirements, see the School of Law Catalog. Contact the School of Law Office of Student Affairs for a copy of the current catalog: University of Arkansas School of Law, Leflar Law Center, Waterman Hall 147, Fayetteville, AR 72701, 479-575-3102.

GRADUATE STUDIES

The University of Arkansas School of Law is a professional degree program. In addition to the law degree, the Law School offers a graduate degree in agricultural law. The Graduate Program in Agricultural Law at the University of Arkansas is the only program in the United States that offers a Master of Laws (LL.M.) degree in agricultural law. Students enrolled in this unique and selective program have the opportunity for advanced study, creative research, and specialized professional training in the legal issues involved with agricultural production, marketing, and distribution. Graduates of the program are among the leaders of today’s agricultural law community, working in private practice, government, agribusiness, public policy and academia. For more information, see the Graduate Program in Agricultural Law Catalog.

ACCREDITATIONS

The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.
## Reserve Officer Training Corps

The Reserve Officer Training Corps (ROTC) programs at the University of Arkansas provide physical and mental challenges that are not offered anywhere else on campus. The ROTC programs prepare young men and women for careers as professional military officers. In addition to academic studies, each service requires that all students attend a weekly leadership laboratory.

The freshman and sophomore courses are electives offered to male and female students who may earn four hours of academic credit in Aerospace Studies or up to six hours in Military Science. Absolutely no military obligation is incurred by non-scholarship students as a result of their enrollment in or completion of any or all of their freshman or sophomore ROTC courses.

### U. S. AIR FORCE ROTC

In addition to the first two years of academic study (see above), the University, in cooperation with the U.S. Air Force, offers two years of advanced instruction in Aerospace Studies. The advanced instruction prepares students for the responsibilities and privileges of a commissioned officer. This advanced instruction offers three hours of academic credit per semester for Air Force cadets.

Air Force ROTC cadets must attend and successfully complete field training. Air Force ROTC cadets usually attend field training between their sophomore and junior years. Air Force ROTC cadets enrolled in the full four-year program attend a four-week session, whereas students entering the two-year program attend a six-week session. Air Force ROTC cadets may volunteer to attend light aircraft training, parachutist training, or various other professional development courses.

For students having a minimum of two academic years remaining in school (undergraduate, graduate, or a combination of the two), an alternate two-year program is offered. Students entering the two-year ROTC program must attend a six-week field training orientation during the summer prior to their last two years of college or between their junior and senior years. The student must successfully complete the summer field training to qualify for the advanced ROTC program. All veterans who have completed basic training and 180 days of service with any component of the U.S. Armed Forces may receive full credit for the freshman and sophomore courses and may enter ROTC at the advanced level when junior academic standing has been achieved.

Financial assistance is also available through multiple scholarship programs to qualified students enrolled in ROTC courses. Air Force ROTC offers four-, three-, and two-year scholarships to qualified students. If accepted, all scholarship students receive a monthly tax-free allowance ranging from $250 to $400, payment of all tuition expenses, textbook payment, and payment of certain other fees. Additional information and applications for this assistance may be obtained on

the Web at http://www.afrotc.com/. Engineering and nursing students are highly encouraged to apply.

A student who successfully completes the Advanced Course in Air Force ROTC and receives a degree will be awarded a reserve commission and will serve on active duty in the U. S. Air Force.

All textbooks, instructional material, and equipment required for ROTC courses are furnished at no cost to the student.

SEE PAGE 241 FOR U.S. AIR FORCE ROTC (AERO) COURSES

U. S. ARMY ROTC

In addition to the first two years of academic study, the University, in cooperation with the U.S. Army, offers two years of advanced instruction in Military Science, Leadership, Ethics, and Personal Confidence. The advanced instruction prepares students for the responsibilities and privileges of a commissioned officer. This advanced instruction offers four hours of academic credit per semester for Army cadets. Additionally, all students enrolled in the final two years of ROTC receive a monthly tax-free allowance ranging from $250 to $400.

Army ROTC cadets attend a paid 33-day Leadership Development and Assessment Course (LDAC) between their junior and senior school years. Cadets may attend professional development training such as Leadership Internships, airborne, air assault, British Exchange program, northern warfare, Nurse Summer Training Program, and mountain warfare. During summer field training, cadets receive room and board.

For students having a minimum of two academic years in school remaining (undergraduate, graduate, or a combination of the two), an alternate two-year program is offered. Students entering the two-year ROTC program attend a 28-day Leaders Training Course (LTC) during the summer. Rising juniors, seniors and graduate students who meet the U.S. Army Cadet Command’s Scholar-Athlete-Leader criteria and are unable to attend the LTC may elect to participate in the Accelerated Cadet Commissioning Training (ACCT) program conducted on the UA campus.

Students with high school-level military schooling (ROTC, NDCC, or Military Academy) may qualify for the advanced ROTC program without completing the freshman or sophomore courses. All veterans who have completed basic training and 180 days of service with any component of the U.S. Armed Forces can receive full credit for the freshman and sophomore courses and may enter ROTC at the advanced level, once junior academic standing has been achieved.

Financial assistance is also available to qualified students enrolled in ROTC courses. The Army offers two-, two-and-one-half-, three-, three-and-one-half-, and four-year scholarships. Freshman or sophomore students who are not enrolled in Army ROTC may qualify for on-campus two- or three-year scholarships. Juniors, seniors, and graduate students who have at least two full years of college remaining may also qualify for on-campus two- or three-year scholarships. Scholarships can be used to pay for graduate school. Scholarship students receive a monthly tax-free allowance ranging from $250 to $400, payment of all tuition expenses, textbook payment ($900 per year), and payment of certain other fees. Additionally, all qualified four- and three-year scholarship winners may receive free room and board, provided they meet the University of Arkansas requirements for the Room and Board Scholarship.

Army ROTC scholarship and advanced course students must agree to successfully complete at least one semester of American military history, LDAC, and a Staff Ride (Terrain Walk) prior to commissioning. Depending on the degree plan, Army ROTC may count from zero to 19 hours of elective credits for undergraduate students.

Army ROTC also offers a unique financial assistance program available to all non-scholarship Army ROTC Advanced Course students through the Simultaneous Membership Program (SMP). This program allows students with 27 or more hours to be enrolled in Army ROTC while simultaneously serving with an Army Reserve or Army National Guard unit. Financial benefits of this program presently provide approximately $600 to $1,200 per month to enrolled students. Prior Service National Guard and Army Reserve students may also qualify for the Montgomery G.I. Bill, MGIB Kicker, the Veterans Administration Workstudy Program, Federal Tuition Assistance, and/or the Arkansas Army National Guard Tuition Assistance Program. Army ROTC Scholarship Nurse Cadets may also receive reimbursement for expenses related to Nursing Uniforms, Immunizations, Clinical Fees, Nursing Malpractice Insurance and the NCLX-RN review and testing.

A student who successfully completes the Advanced Course in the Army ROTC program and receives a degree may be accepted for a regular or reserve commission in one of the sixteen branches of the Army.

All textbooks, instructional material, and equipment required for ROTC courses are furnished at no cost to freshmen and sophomore students. Junior and senior Army ROTC students must purchase textbooks only. All other equipment and materials will be furnished at no cost.

SEE PAGE 310 FOR U.S. ARMY ROTC (MILS) COURSES
The first date after the listing of each name indicates the year of first appointment at the University; the second date indicates the year of appointment to present faculty rank. Where they coincide, only one date is given.

Ackerson, Michael Dean – B.S.Ch.E., M.S.Ch.E. (University of Missouri-Rolla), Ph.D. (University of Arkansas), P.E., Associate Professor of Chemical Engineering, 1988, 1992.

Adkins, Jr., Charles W. – B.S. (University of Central Arkansas), L.E. (U.S. Army Logistics Management College), Major (U.S. Army, Quartermaster Corps), Assistant Professor of Military Science and Leadership, 2001.

Adler, Jacob – A.B., Ph.D. (Harvard University), Associate Professor of Philosophy, 1984, 1991.

Ahrendsen, Bruce L. – B.S. (Iowa State University), M.Econ., Ph.D. (North Carolina State University), Associate Professor of Agricultural Economics and Agribusiness, 1990, 1996.

Alexander, Jerry W. – B.A. (Western Kentucky University), M.A. (Texas Tech University), Visiting Assistant Professor of Operations Management, 2002.

Allen, Carolyn Henderson – B.S. (Alabama State University), M.S. (Clark Atlanta University), Professor and Dean of University Libraries, 2000.

Allison, Neil T. – B.S. (Georgia College), Ph.D. (University of Florida), Associate Professor of Chemistry and Biochemistry, 1980, 1985.

Anders, Merle M. – B.S. (Iowa State University of Science and Technology), M.S., Ph.D. (University of Hawaii), Research Assistant Professor of Rice Cropping Systems, 1998.

Andersen, Craig R. – B.S. (Augustana College), M.S., Ph.D. (University of Minnesota), Research Associate Professor of Horticulture, 1985, 1995.

Ang, Simon S. – B.S.E.E. (University of Arkansas), M.S.E.E. (Georgia Institute of Technology), Ph.D. (Southern Methodist University), P.E., Professor of Electrical Engineering, 1988, 1995; Adjunct Professor of Biological and Agricultural Engineering, 2003.

Anthony, Nicholas B. – B.S., M.S. (Ohio State University), Ph.D. (Virginia Polytechnic Institute and State University), Professor of Poultry Science, 1987, 2000.

Antoine, Pierre Ph. – B.S. (University of Louvain, Belgium), Ph.D. (University of Minnesota), Adjunct Professor of Agronomy, 1987.

Apple, Jason K. – B.S. (Oklahoma State University), M.S., Ph.D. (Kansas State University), Associate Professor of Animal Science, 1995, 2001.

Apple, Laurie M. – B.S. (University of Arkansas), Ph.D. (Oklahoma State University), Assistant Professor of Human Environmental Sciences, 2000.

Arenberg, Nancy – B.A. (Grinnell College), M.A. (University of Illinois, Champaign-Urbana), Ph.D. (University of Arizona, Tucson), Associate Professor of Foreign Languages, 1996, 2002.

Armstrong, Deborah J. – B.A. (California State University), M.B.A. (Avila College), Ph.D. (University of Kansas), Assistant Professor of Information Systems, 2001.

Arnold, Mark E. – B.S., Ph.D. (Northern Illinois University), Associate Professor of Mathematical Sciences, 1993, 1999.

Ashton, Dub – B.S.B.A., M.B.A. (Memphis State University), Ph.D. (University of Georgia), Associate Professor of Marketing and Logistics, 1981.

Bacon, Robert K. – B.S.A., M.S. (University of Arkansas), Ph.D. (Purdue University), Professor of Crop, Soil, and Environmental Sciences, 1984, 1993.

Bailey, Alberta S. – B.A. (Miles College), M.S.L.S. (Case Western Reserve University), Professor and Librarian, 1979, 1989.

Bailey, Carlton – B.A. (Tallahassee College), J.D. (University of Chicago), Associate Professor of Law, 1978, 1983.

Baird, Douglas H. — D.V.M. (Louisiana State University), Adjunct Assistant Professor of Animal Science, 2002.

Bajwa, Sreekala G. – B.S., Ag.E. (Kerala Agriculture University, Tavanur, India), M.S. Ag.E. (Indian Institute of Technology, Kharagpur, India), Ph.D. (University of Illinois), Assistant Professor of Biological and Agricultural Engineering, 2001.

Baker, Darlene Z. – B.S., M.S. (University of Arkansas), Ph.D. (Texas Women's University), Adjunct Professor of Agricultural and Extension Education, 2001.

Baker, Lindlee – A.B. (Georgetown University), M.Sc. (London School of Economics and Political Science), J.D. (University of Arkansas), Clinical Associate Professor of Law, 1994, 2002.

Baldwin, Vernoice G. – B.S., M.S. (University of Arkansas), Instructor/ Director of Nursery School for the School of Human Environmental Sciences, 1996.

Balog, Janice M. – B.S. (Purdue University), M.S. (University of Rhode Island), Ph.D. (Purdue University), Research Assistant Professor of Poultry Science, 1992, 1998.

Bamberger, Uta – M.A. (University of California, Santa Barbara), Ph.D. (University of Massachusetts), Assistant Professor of Foreign Languages, 1997.

Barlow, Fred – B.S. (Emory University), M.S., Ph.D. (Virginia Polytechnic Institute and State University), Associate Professor of Electrical Engineering, 2000, 2003.

Barrentine, James L. – B.S., M.S. (University of Arkansas), Ph.D. (Purdue University), Professor of Crop, Soil, and Environmental Sciences, 1998.

Barta, Kathleen M. – B.S. (Marquette University), M.S. (Boston College), Ed.D. (University of Arkansas), Associate Professor of Nursing, 1984, 1998.

Batson, Donald W. – B.A., M.Ed. (Central State University), M.L.S. (Emporia Kansas State College), Associate Professor and Associate Librarian, 1976, 1980.

Batzer, Stephen A. – B.S. (Michigan Technological University), M.S. (GMI Engineering and Management Institute), Ph.D. (Michigan Technological University), P.E., Adjunct Assistant Professor of Mechanical Engineering, 2004.

Beatty, Frances G. – B.S. (Pennsylvania State University), M.A. (Boston University), Associate Professor of Landscape Architecture, 2001.

Beaufre, Steven J. – B.S., M.S. (University of Wisconsin), Ph.D. (University of Pennsylvania), Associate Professor of Biological Sciences, 1995, 2001.

Beavers, Gordon – B.S., M.S. (University of Texas), Ph.D. (Indiana University), Associate Professor of Computer Science and Computer Engineering, 2002.

Beck, Paul – B.S., M.S. (Oklahoma State), Ph.D. (University of Arkansas), Assistant Professor of Animal Science, 2004.

Beitle, Robert R. – B.S.Ch.E., M.S.Ch.E., Ph.D. (University of Pittsburgh), P.E., Associate Professor of Chemical Engineering, Adjunct Associate Professor of Biological and Agricultural Engineering, 1993, 1998.

Bell, Steven M. – B.A. (University of Kansas), M.A. (University of Kentucky), Ph.D. (University of Kansas), Associate Professor of Foreign Languages, 1992, 1996.

Bellaiche, Laurent – B.S., M.S., Ph.D. (University of Paris VI, France), Associate Professor of Physics, 1999, 2003.

Bench, James C. – B.S. (Bellevue University), Assistant Professor of Aerospace Studies, 2004.

Bering, J.M. – B.A. (Florida Atlantic University), M.S. (University of Louisiana at Lafayette), Ph.D. (Florida Atlantic University), Assistant Professor of Psychology, 2002.

Bernard, Lori A. – B.S. (The Ohio State University), M.A. (Cleveland State University), Ph.D. (University of California, Davis), Assistant Professor of Foreign Languages, 2004.

Bernhardt, John L. – B.S., M.S. (East Caroline University), Ph.D. (Clemson University), Research Associate of Rice Insects, 1979.

Berthelot, Ronald J. – B.S. (Southeastern Louisiana University), M.S., Ed.D (University of Tennessee), Visiting Assistant Professor of Operations Management, 1993.

Blackwell, Marlon M. – B.Arch (Auburn University), M.Arch (Syracuse University), Professor of Architecture, 1992, 2002.

Bleakley, Gage A. – B.A. (South Carolina State University), M.S. (Air Force Institute of Technology), Professor of Aerospace Studies, 2004.

Bobbitt, Donald R. – B.S. (University of Arkansas), Ph.D. (Iowa State University), Professor of Chemistry and Biochemistry, 1985, 1993.

Bonacci, Jeffrey A. – B.S. (University of Akron), M.S. (West Virginia University), D.A. (Middle Tennessee State University), Clinical Assistant Professor of Kinesiology, 2000.

Bonanno, F. Ramon – B.S. (U.S. Military Academy), M.S. (Iowa State University), Ph.D. (University of Arizona), Visiting Assistant Professor of Operations Management, 1994.

Bos, Stephen K. – B.S. (Bemidji State University), M.S. (Utah State University), Ph.D. (University of North Carolina, Chapel Hill), Associate Professor of Geology, 1996, 2002.

Bourland, Fred M. – B.S.A., M.S. (University of Arkansas), Ph.D. (Texas A&M University), Professor of Crop, Soil, and Environmental Sciences at Northeast Research and Extension Center, 1988.

Bouwman, Marinus J. – B.S. (Eindhoven University of Technology), M.S., Ph.D. (Carnegie-Mellon University), Professor of Accounting and Ralph McQueen Chair of Accounting, 1992, 2003.

Broyer, Mark E. – B.S. in Landscape Architecture (University of Kentucky), M. in Landscape Architecture (Louisiana State University), Associate Professor of Landscape Architecture, 1998, 2004.

Brady, Pamela L. – B.S., M.S. (University of Arkansas), Ph.D. (University of Tennessee), Adjunct Professor of Food Science, 1999.

Brady, Robert M. – B.S. (Murray State University), M.A. (Western Kentucky University), Ph.D. (University of Michigan), Associate Professor of Communication, 1979, 1985.

Brahana, John Van – A.B. (University of Illinois), M.A., Ph.D. (University of Missouri), Professor of Geosciences (Geology), 1999.

Brazzell, Johnetta – B.A. (Spellman College), M.A. (University of Chicago), Ph.D. (University of Michigan), Adjunct Associate Professor of Higher Education, 2002.

Breeding, Steve – B.S., M.S., D.M.V. (North Carolina State University), Adjunct Assistant Professor of Poultry Science, 1998.

Brescia, William F., Jr. – B.A. (Wartburg College), M.S. (University of Wisconsin), Ph.D. (Indiana University), Assistant Professor of Educational Technology, 2000.

Brewer, Dennis W. – B.A. (Sterling College), M.A., Ph.D. (University of Wisconsin), Professor of Mathematical Sciences, 1975, 1990.

Brister, Roy – B.S., M.S., Ph.D. (Texas A&M University), Adjunct Professor of Poultry Science, 1994.

Brogi, Alessandro – B.A. (University of Florence, Italy), M.A. (Ohio University), Ph.D. (University of Florence, Italy), Ph.D. (Ohio University), Assistant Professor of History, 2002.

Brown, Arthur V. – B.S., M.A. (Sam Houston State University), Ph.D. (North Texas State University), Associate Professor of Biological Sciences, 1974, 1981.

Brown, Michael A. – B.S., M.S., Ph.D. (Oklahoma State University), Adjunct Professor of Animal Science, 1998.

Broyles, John F. – B.S. (Georgia Institute of Technology), Professor of Kinesiology, 1970.

University Faculty

Chism, Stephen J. – B.A. (University of Arkansas), M.L.S. (University of Kentucky), Associate Professor and Associate Librarian, 1984, 1990.

Chollithchanta, Nophachai – B.M. (Chulalongkorn University, Thailand), M.M. (University of Northern Colorado), Assistant Professor, 2001.

Christiansen, Hope L. – B.A., M.A. (Kansas State University), Ph.D. (University of Kansas), Associate Professor of Foreign Languages, 1990, 1996.

Christy-McMullin, Kameri – B.A. (University of Missouri - Kansas City), M.S.W., Ph.D. (University of Kansas), Assistant Professor of Social Work, 2003.

Cihak, Herbert – B.A., M.A. (Brigham Young University), J.D. (University of Nebraska), M.L.S. (Brigham Young University), Professor and Director of the Law Library, 2004.

Circo, Carl J. – B.A. (University of Nebraska), J.D. (University of Nebraska School of Law), Assistant Professor of Law, 2003.

Clausen, Edgar C. – B.S.Ch.E., M.S.Ch.E., Ph.D. (University of Missouri-Rolla), P.E., Professor of Chemical Engineering, Adjunct Professor of Biological and Agricultural Engineering, 1981, 1985.

Clifford, Heath – B.A. (University of Louisville), M.A. (Eastern Kentucky University), Instructor of Kinesiology, 1996.

Coats, Kimberly F. – B.S. (Arizona State University), J.D. (Oklahoma City University), Clinical Associate Professor of Law, 1999, 2002.

Coblentz, Wayne K. – B.A. (Western Maryland College), M.S. (Penn State University), Ph.D. (Kansas State University), Associate Professor of Animal Science, 1997, 2002.

Cochran, Mark J. – B.S. (New Mexico State University), M.S., Ph.D. (Michigan State University), Professor of Agricultural Economics and Agribusiness, 1982, 1991.

Cochran, William A. – B.A. (Austin College), M.S. (Trinity University), Ph.D. (University of Arkansas), Clinical Assistant Professor of Rehabilitation, 1986.

Coffey, Kenneth – B.S. (University of Tennessee), M.S. (University of Missouri), Professor of Animal Science, 1996, 2003.

Cohen, Debra Rae – B.A. (Yale University), Ph.D. (University of Mississippi), Assistant Professor of English, 2003.

Cole, Jack H. – B.S., M.S., Ph.D. (Oklahoma State University), P.E., Adjunct Professor of Mechanical Engineering, 2004.

Collier, James A. – B.S.I.E. (University of Arkansas), M.S.I.E. (Purdue University), Visiting Assistant Professor of Operations Management, 2000.

Collier, Marta – B.A. (Earlham College), M.A., Ph.D. (University of Iowa), Associate Professor of Curriculum and Instruction, 1996, 2003.

Collins, Jeff T. – B.A. (Colorado State University), Ph.D. (University of Tennessee), Visiting Assistant Professor of Economics, 1999.

Collins, Kathleen – B.A., M.A., Ph.D. (University of California at Santa Barbara), Assistant Professor in Special Education, 2002.

Comfort, Kathleen A. – B.A., M.A. (Illinois State University), Ph.D. (University of Kansas), Assistant Professor of Foreign Languages, 2001.

Condray, Kathleen – B.A. (University of Arkansas), M.A., Ph.D. (University of Illinois at Urbana-Champaign), Assistant Professor of Foreign Languages, 2002.

Conge, Patrick J. – B.S., M.A. (Arizona State University), Ph.D. (University of Texas), Associate Professor of Political Science, 1996, 2002.

Conway, Cheryl L. – B.S. (Southwest Missouri State University), M.A. (University of Arkansas), M.L.S. (University of Arizona), Associate Professor and Associate Librarian, 1981, 1986.

Cook, Peggy – B.S. (Arkansas Tech University), M.S., Ph.D. (University of Arkansas), Adjunct Assistant Professor of Poultry Science, 1996.

Coon, Craig – B.S., M.S., Ph.D. (Texas A&M University), Professor of Poultry Science, Arkansas Poultry Federation Chair, 1997.

Coon, Lynda L. – B.A. (James Madison University), M.A., Ph.D. (University of Virginia), Associate Professor of History, 1990, 1996.

Cornell, Ria E. – D.A.P., C.A.P. (Regional Normal School, Morocco), Research Associate Professor of Foreign Languages, 2000.

Costello, Thomas A. – B.S.Ag.E., M.S.Ag.E. (University of Missouri), Ph.D. (Louisiana State University), Associate Professor of Biological and Agricultural Engineering, 1986, 1992.

Cote, Robert R. – B.S. (Salve Regina University), M.B.A. (Golden Gate University), Visiting Assistant Professor of Operations Management, 2000.

Cotthen, Jackson – B.S. (United States Air Force Academy), M.S., Ph.D. (Ohio State University), Assistant Professor of Geography, 2004.

Counce, Paul A. – B.S. (University of Tennessee-Martin), M.S. (Purdue University), Ph.D. (University of Georgia), Professor of Crop, Soil, and Environmental Sciences, 1983, 1992, 2003.
Couvillon, Rick J. – B.S.M.E. (University of Arkansas), M.S.M.E., Ph.D. (Georgia Institute of Technology), P.E., Associate Professor of Mechanical Engineering, 1981, 1986.

Cowling, Dan C. – B.A., M.A. (University of Arkansas), Adjunct Assistant Professor of Communication, 2002.

Cox, Nicole – B.S. (College of the Ozarks), M.B.A. (University of Arkansas), Instructor of Marketing and Logistics, 2003.

Crandall, Mardel A. – B.S. (Kansas State University), M.S. (Purdue University), Instructor/Director of the Infant Development Center for the School of Human Environmental Sciences, 1995.

Crandall, Philip G. – B.S. (Kansas State University), M.S., Ph.D. (Purdue University), Professor of Food Science, 1989, 1997.

Cronan, Timothy P. – B.S. (University of Southwestern Louisiana), M.S. (South Dakota State University), D.B.A. (Louisiana Tech University), Professor and the M. D. Matthews Endowed Chair in Information Systems, 1979, 1986.

Crone, John V. – B.Landscape Arch. (University of Georgia), M.Regional Planning (University of Pennsylvania), Professor of Landscape Architecture, 1980, 1991.

Cross, Robert A. – B.S.Ch.E. (University of Arkansas), M.S. (Massachusetts Institute of Technology), Research Professor of Chemical Engineering, 1995.

Curtin, Kathryn D. – B.S. (Pennsylvania State University), M.S. (Yale University), Ph.D. (Harvard University), Assistant Professor of Biological Sciences, 2004.

D’Alisera, JoAnn – B.A. (State University of New York at New Paltz), A.M., Ph.D. (University of Illinois-Urbana-Champaign), Assistant Professor of Anthropology, 1999.

Daniels, Donna – B.A., M.L.S. (Western Michigan University), Associate Professor and Associate Librarian, 1982, 1988.

Davidson, Fiona M. – B.A. (Newcastle Upon Tyne Polytechnic), M.A., Ph.D. (University of Nebraska-Lincoln), Associate Professor of Geography, 1992, 1998.

Davis, Danny J. – B.S. (Rose Polytechnic Institute), Ph.D. (Ohio State University), Professor of Chemistry and Biochemistry, 1979, 1990.

Davis, Fred D. – B.S. (Wayne State University), Ph.D. (Massachusetts Institute of Technology), Professor and David D. Glass Chair in Information Systems, 1999.

Davis, James N. – B.A. (Ouachita University), M.A. (University of Chicago), Ph.D. (University of Minnesota), Associate Professor of Foreign Languages (French), 1993, 1999.

Davis, Ralph K. – B.S., M.S., Ph.D. (University of Nebraska, Lincoln), Associate Professor of Geology, 1994, 2000.

Davis, Stephen – B.S., D.M.V. (Kansas State University), Adjunct Assistant Professor of Poultry Science, 1996.

DeCoster, Vaughn A. – B.A. (University of Arkansas), M.S.W. (Tulane University), Ph.D. (Louisiana State University), Assistant Professor of Social Work, 2003.

de Noble, Timothy E. – B.S.Arch. (University of Texas at Arlington), M.Arch. (Syracuse University), Associate Professor of Architecture, 1997, 2004.

De Oliveira, Victor – B.S., M.S. (Universidad Simon Bolivar, Venezuela), Ph.D. (University of Maryland, College Park), Assistant Professor of Mathematical Sciences, 2001.

Delery, John E. – B.S. (Tulane University of Louisiana), M.S. (Memphis State University), Ph.D. (Texas A&M University), Associate Professor of Management, 1992, 1998.

Del Gesso, Emilio – B.A. (University of Rome), Adjunct Assistant Professor of Architecture, 1989.

Dennis, Norman D., Jr. – B.S.C.E., M.S.C.E. (University of Missouri-Rolla), M.S.B.A. (Boston University), Ph.D. (University of Texas), P.E., Professor of Civil Engineering, 1996, 2000.

Denton, James H. – B.S., M.S., Ph.D. (Texas A&M University), Professor of Poultry Science, 1992.

DeVore, Jack B., Jr. – B.S., M.S., Ed.S. (Kansas State College of Pittsburg), Ph.D. (Kansas State University), Associate Professor of Vocational Education, 1970, 1976.

Di, Jia – B.S., M.S. (Tsinghua University), Ph.D. (University of Central Florida), Assistant Professor of Computer Science & Computer Engineering, 2005.

DiBrezzo, Rosalie – B.S. (Brooklyn College), M.S. (Indiana University), Ph.D. (Texas Woman's University), Professor of Kinesiology, 1983, 1993.
Dixon, Bruce L. – B.A. (University of California-Santa Barbara), M.S., Ph.D. (University of California-Davis), Professor of Agricultural Economics, 1984, 1986.

Dodson, Gerald A. – B.S. (South Dakota State), M.S., Ph.D. (Oklahoma State University), Adjunct Associate Professor of Agricultural Economics and Agribusiness, 2004.

Dominick, John A. – B.S.B.A. (Louisiana Polytechnic Institute), M.S., Ph.D. (University of Alabama), Professor of Finance and Chairholder, Arkansas Bankers Association Chair of Banking, and J.W. Bellamy Chair of Banking and Finance, 1970, 1976.

Donoghue, Ann – B.S. (San Diego State University), M.S. (Texas A&M University), Ph.D. (F. Edward Herbert School of Medicine), Poultry Science, 2000.

Donoghue, Daniel – B.S. (Medical University of South Carolina), M.S. (Brigham Young University), Ph.D. (Texas A&M University), Post Doctoral Fellow (Rutgers University, Cook College), Assistant Professor of Poultry Science, 2000.

Dowdle, Andrew – B.A. (University of Tennessee), M.A. (University of Iowa), Ph.D. (Miami University), Assistant Professor of Political Science, 2003.

Durdik, Jeannine M. – B.S. (Purdue University), Ph.D. (Johns Hopkins University), Professor of Biological Sciences, 1994, 2004.

Durham, Bill M. – B.A. (Rutgers, the State University of New Jersey), M.S. (Clarkson College of Technology), Ph.D. (Wayne State University), Professor of Chemistry and Biochemistry, 1979, 1990.

Dutton, Donnie – B.S., M.Ed. (North Carolina State University), Ph.D. (Florida State University), Professor of Adult Education, 1974.

Dwyer, Mavourneen – B.A. (University of Montreal), M.F.A. (University of Texas-Austin), Assistant Professor of Drama, 1999.

Dye, Judith – B.A. (Michigan State University), M.S.L.S. (Atlanta University), Associate Professor and Associate Librarian, 2002.

Edwards, Findlay G. – B.S.C.E., B.S.G.E., M.S.C.E. (New Mexico State University), M.M. (University of New Mexico), Ph.D. (New Mexico State University), P.E., Assistant Professor of Civil Engineering, 1999.

Eichmann, Raymond – B.A., M.A. (University of Arkansas), Ph.D. (University of Kentucky), Professor of Foreign Languages (French), 1969, 1983.

Ellers, Linda – B.S.E., M.Ed. (University of Arkansas, Little Rock), Ph.D. (Louisiana State University), Assistant Professor of Curriculum and Instruction, 2001.

El-Shenawee, Magda – B.S., M.S. (Assiut University, Egypt), Ph.D. (University of Nebraska), Assistant Professor of Electrical Engineering, 2000.

Emmert, Jason – B.S., M.S., Ph.D. (University of Illinois), Associate Professor of Poultry Science, 1997, 2002.

Erf, Gisela F. – B.S., M.S. (University of Guelph, Canada), Ph.D. (Cornell University), Professor of Poultry Science, 1994, 2004.

Erickson, Kirstin C. – B.A. (St. Olaf College), M.A., Ph.D. (University of Wisconsin, Madison), Assistant Professor of Anthropology, 2001.

Etges, William J. – B.S. (North Carolina State University), M.S. (University of Georgia), Ph.D. (University of Rochester), Professor of Biological Sciences, 1988, 2004.

Evers-Murray, Deborah J. – B.A. (University of California, Santa Barbara), M.A. (University of Northern Colorado), Ph.D. (University of Arkansas), Visiting Assistant Professor of Accounting, 2001.

Fant, Earnest W. – B.S.I.E. (University of Arkansas), M.S.I.E. (Southern Methodist University), Ph.D. (Texas Tech University), P.E., Associate Professor of Industrial Engineering, 1988, 1994.

Farah, Mounir A. – B.A. (Oklahoma City University), M.A. (University of Bridgeport), Ph.D. (New York University), Professor of Curriculum and Instruction, 1995, 1999.

Farmer, Frank L. – B.A. (Fort Lewis College), M.S. (University of Arkansas), Ph.D. (Pennsylvania State University), Professor of Human Environmental Sciences, 1987, 1995.

Feldman, William A. – B.S. (Tufts University), M.S. (Northwestern University), Ph.D. (Queen's University), Professor of Mathematical Sciences, 1971, 1981.

Fenn, Patrick – B.S. (State University of New York at Syracuse), Ph.D. (University of Wisconsin), Associate Professor of Plant Pathology, 1979, 1984.

Findley, Jr., Benjamin F. – B.B.A., M.S. (West Virginia University), Ph.D. (University of Northern Colorado), Visiting Assistant Professor of Operations Management, 1993.

Finn, Don W. – B.S. (Texas Tech University) M.B.A. (Arkansas State University), Ph.D. (University of Arkansas) Professor of Accounting and the Garrison/Wilson Chair in Accounting, 2003.

Fitch-Hilgenberg, Majorie E. – B.S., M.S. (University of Arkansas), Ph.D. (University of Wisconsin), Assistant Professor of Human Environmental Sciences, 1999.

Fitzpatrick, Lynn E. – B.S. (Cornell University), M. Arch. (Rice University), Clinical Assistant Professor of Architecture, 1999.

Foley, Larry – B.A. (University of Arkansas), M.S. (University of Central Arkansas), Associate Professor of Journalism, 1993.

Foote, Jerald C. – B.A. (University of Northern Colorado), M.S., R.D., Ph.D. (Texas Tech University), Assistant Professor of Human Environmental Sciences, 2002. Adjunct Assistant Professor of Food Science, 2003.

Forbess, Janet – B.S.E. (Georgia Southern College), M.A. (University of Florida), Instructor in Kinesiology, 1978.

Foster, Sharon E. – B.A. (University of California at Los Angeles), J.D. (Loyola Law School), LL.M. (University of Edinburgh, Scotland), Clinical Associate Professor of Law, 2000, 2003.

Fredrick, David C. – B.A. (University of Kansas), M.A., Ph.D. (University of Southern California), Associate Professor of Foreign Languages, 1991, 1997.

Freeman, Donald W. – B.S., M.S. (University of Arkansas), Ph.D. (Mississippi State University), Adjunct Associate Professor of Food Science, 1997.

Frentz, Thomas – B.S., M.S., Ph.D. (University of Wisconsin), Professor of Communication, 1985, 1995.

Freund, Joel S. – B.S., M.S., Ph.D. (Northwestern University), Associate Professor of Psychology, 1970, 1976.

Friesen, Kim G. – B.S. (University of Nebraska), M.S., Ph.D. (Kansas State University), Adjunct Professor of Animal Science, 1998.

Fritsch, Ingrid – B.S. (University of Utah), Ph.D. (University of Illinois-Urbana/Champaign), Associate Professor of Chemistry and Biochemistry, 1992, 1997.

Fu, Huaxiang – B.S. (University of Science and Technology of China), M.S., Ph.D. (Fudan University), Assistant Professor of Physics, 2002.

Fukushima, Tatsuya – B.A. (Kanto Gakuin University, Japan), M.A., Ph.D. (Oklahoma State University), Assistant Professor of Foreign Languages, 2001.

Funkhouser, Eric M. – B.A., M.A. (University of Nebraska), Ph.D. (Syracuse University), Assistant Professor of Philosophy, 2004.

Fussell, Leonard – B.S., M.S., D.M.V. (University of Georgia), Adjunct Assistant Professor of Poultry Science, 1996.

Ganson, Judith A. – B.A. (Purdue University), M.S. Library Science (University of Illinois), M. Administration (University of California, Riverside), Associate Professor and Associate Librarian, 2001.

Ganster, Daniel C. – B.A. (Wabash College), M.S., Ph.D. (Purdue University), Charles C. Fichtner Chair in Management and Professor of Management, 1990.

Gardisser, Dennis – B.S., M.S., Ph.D. (University of Arkansas), Research Professor of Biological and Agricultural Engineering, 1995.

Garner, Jerald L. – B.S. (Park College), M.S. (University of Arkansas), Visiting Assistant Professor of Operations Management, 1996.

Gattis, Carol S. – B.S.E.E., M.S.E.E., Ph.D. (University of Arkansas), Visiting Assistant Professor of Operations Management and Adjunct Associate Professor of Industrial Engineering, 2002.

Gattis, Jim L. – B.S.E.E., M.S.E.E. (University of Arkansas), Ph.D. (Purdue University), P.E., Associate Professor of Electrical Engineering, 1972, 1977.

Gawley, Robert E. – B.S. (Stetson University), Ph.D. (Duke University), Professor of Chemistry, 2003.

Gbur, Edward E., Jr. – B.S. (Saint Francis College), M.S., Ph.D. (Ohio State University), Professor of Crop, Soil, and Environmental Sciences, 1987, 1998.

Gea-Banacloche, Julio R. – Licenciado en Ciencias Fisicas (Universidad Autonoma de Madrid), Ph.D. (University of New Mexico), Professor of Physics, 1989, 2000.

Gealy, David R. – B.S. (University of Nebraska), M.S., Ph.D. (University of Illinois), Visiting Professor of Crop, Soil and Environmental Sciences, 1996.

Gentry, G. Marie – B.S. (Arizona State University), M.S. (Iowa State University), Ph.D. (Texas Tech University), Associate Professor of Interior Design, 2000.

Gentry, Johnnie L., Jr. – B.S. (Murray State University), M.S. (University of Kentucky), Ph.D. (Columbia University), Professor and Curator, 1979, 1985.

Gentry, Julie – B.A., M.S. (University of Tennessee at Knoxville), Ph.D. (Arizona State University), Associate Professor of Marketing and Logistics, 1993, 1998.

George, James E. – B.S. (University of Arkansas at Little Rock), M.S. (Air Force Institute of Technology), Visiting Assistant Professor of Operations Management, 1996.

Geren, Collis R. – B.S. (Northeastern State College), M.S. (Kansas State College of Pittsburg), Ph.D. (Oklahoma State University), Professor of Chemistry and Biochemistry, 1976, 1984.

Ghahbian, Najib – B.Sc. (United Arab Emirates University), M.A. (Rutgers University), M.A., Ph.D. (City University of New York), Assistant Professor of Political Science, 2000.

Gibbons, James W. – B.S. (Hendrix College), M.S., Ph.D. (University of Arkansas), Research Assistant Professor of Rice Breeding, 1999.

Goggin, Fiona L. – B.S. (Cornell University), Ph.D. (University of California, Davis), Assistant Professor of Entomology, 2001.

Goh, Lyle A. – B.S., M.S., Ph.D. (Purdue University), Associate Professor of Higher Education, 1982.

Goodman-Strauss, Chaim – B.S., Ph.D. (University of Texas), Associate Professor of Mathematical Sciences, 1994, 2000.

Gordon, Joel – B.A. (University of Illinois), Ph.D. (University of Michigan), Associate Professor of History, 1999.

Goza, Paul David – B.A. (University of the Ozarks), M.M. (Memphis State University), M.M. (University of Arkansas, Fayetteville), D.M.A. (University of Missouri, Kansas City), Visiting Associate Professor of Music, 2004.

Graff, Thomas Oscar – B.S., M.A. (Western Illinois University), Ph.D. (University of Kansas), Associate Professor of Geography, 1973, 1979.

Greene, Jeremy K. – B.A. (College of Charleston), M.S., Ph.D. (Clemson), Assistant Professor of Entomology, 2002.

Griffis, Carl L. – B.S.Ch.E., M.S.Ch.E., Ph.D. (University of Arkansas), Professor of Biological and Agricultural Engineering, 1967, 1983.

Gross, Roger D. – B.A. (University of Oregon), M.A. (University of Minnesota), Ph.D. (University of Oregon), Professor of Drama, 1980.

Guccione, Margaret J. – B.S. (St. Joseph's College), M.S. (Miami University), Ph.D. (University of Colorado), Professor of Geology, 1979, 2001.

Gunter, Stacey A. – B.S. (Oregon State University), M.S. (University of Nevada Reno), Ph.D. (Oklahoma State University), Associate Professor of Animal Science, 1996, 2002.

Gunter, Timothy – B.S.E., M.M. (University of Arkansas), Adjunct Assistant Professor of Music, 1991.

Guo, Chunlei – B.S. (Changchun Institute of Optics and Fine Mechanics, China), Ph.D. (University of Connecticut), Assistant Professor of Physics, 2001.

Gupta, Rajendra – B.Sc, M.Sc. (Agra University), Ph.D. (Boston University), Professor of Physics, 1978, 1985.

Gupta, Usha – B.S. (Delhi University), M.L.S. (Simmons College), Professor and Librarian, 1985, 1993.

Guzman, Rafael – B.A. (University of Dayton), L.L.B. (George Washington University), Professor of Law, 1967, 1974.
Haggard, Brian – B.S. (University of Missouri), M.S. (University of Arkansas), Ph.D. (Oklahoma State University), Adjunct Assistant Professor of Biological and Agricultural Engineering, 2001.

Hagstrom, Fran – B.A. (Southwest Baptist University), M.A. (St. Louis University), M.S. (UT-HSC Houston, TX), Ph.D. (Clark University), Assistant Professor, 2002.

Hale, William Micah – B.S., M.S., Ph.D. (Oklahoma University), Assistant Professor of Civil Engineering, 2002.

Hammons, James – B.S. (Northwestern State University of Louisiana), M.S. (Southern Illinois University), Ph.D. (University of Texas), Professor of Higher Education, 1976.

Hanlin, Todd C. – B.A. (Wabash College), M.A. (University of Kansas), Ph.D. (Bryn Mawr College), Professor of Foreign Languages (German), 1981, 1994.

Hardgrave, Bill C. – B.S. (Arkansas Tech University), M.B.A. (Southwest Missouri State University), Ph.D. (Oklahoma State University), Edwin and Karlee Bradberry Endowed Chair and Associate Professor of Information Systems, 1993, 1997.

Harding, Lorna E. – B.A. (University of Western Ontario), M.Sc. (University of Alberta), Assistant Professor of Interior Design, 2004.

Hargis, Billy – B.S. (University of Minnesota), M.S. (University of Georgia), D.V.M., Ph.D. (University of Minnesota), Professor of Poultry Science, 2000.

Harris, William C. – Major, USAF, B.S. (University of Arkansas), M.S. (Troy State University), Assistant Professor of Aerospace Studies, 1997.

Harter, William G. – B.S. (Hiram College), Ph.D. (University of California, Irvine), Professor of Physics, 1985.

Haydar, Adnan F. – B.A., M.A. (American University of Beirut), Ph.D. (University of California at San Diego), Professor of Foreign Languages, 1993.

Hays, Donald – B.A. (Southern Arkansas University), M.F.A. (University of Arkansas), Associate Professor of English, 1990.

Hearth, Douglas P. – B.A. (University of Wisconsin, Madison), M.A., Ph.D. (University of Iowa), Associate Professor of Finance, 1989.

Hehr, John G. – B.S.Ed. (Ohio University), M.A. (Western Michigan University), Ph.D. (Michigan State University), Professor of Geography, 1977, 1986.

Hendrix, William H. – B.S. (Clemson), M.S. (University of Arkansas), Ph.D. (Iowa State University), Professor of Entomology, 1996.

Henrickson, Larry K. – B.E.E. (University of Minnesota), M.S. (Colorado State University), Ph.D. (Stanford University), Assistant Professor of Audiology, 1999.

Henry, Ralph L. – B.S.E. (University of Kansas), M.S., Ph.D. (Kansas State University), Associate Professor of Biological Sciences, 1996, 2002.

Hensley, David L. – B.S. (University of Missouri), M.S., Ph.D. (Purdue University), Professor and Head of Horticulture, 2000.

Herman, Gregory S. – B.Arch. (University of Cincinnati), M.Arch., (Rice University), Associate Professor of Architecture, 1991, 1998.

Herrington, Donald R. – B.S., M.S. (Texas A&M University), Ph.D. (The Ohio State University), Professor of Agricultural and Extension Education, 1997.

Hettiarachchy, Navam S. – B.S. (University of Madras, India), M.S. (Edinburgh University, Scotland), Ph.D. (University of Hull, England), Professor of Food Science, 1992, 1997.

Hexmoor, Henry – B.S. (State University of New York at Stony Brook), M.S. (Georgia Institute of Technology), Ph.D. (State University of New York at Buffalo), Assistant Professor of Computer Science and Computer Engineering, 2000.

Heymsfield, Ernest – B.S., M.S. (Polytechnic Institute of New York), Ph.D. (City University of New York), Assistant Professor of Civil Engineering, 2001.

Hilgenroth, Mark J. – B.A. (University of Akron), Ph.D. (University of Tennessee), Assistant Professor of Psychology, 1996.

Hinton, James F. – B.S. (University of Alabama), M.S., Ph.D. (University of Georgia), University Professor of Chemistry and Biochemistry, 1965, 1989.

Hipp, Janie S. – B.A. (University of Oklahoma), J.D. (Oklahoma City University School of Law), LL.M. in Agricultural Law (University of Arkansas School of Law), Adjunct Instructor in Agricultural Economics and Agribusiness, 1993, 1998.

Hipple, William J. – B.S. (U.S. Naval Academy), M.S. (George Washington University), Ph.D. (University of Texas), Visiting Assistant Professor of Operations Management, 1995.

Hogan, Jeffrey – B.Sc., Ph.D. (University of New South Wales), Assistant Professor of Mathematical Sciences, 2000.

Holyfield, Lori – B.S.E., M.A. (University of Arkansas), Ph.D. (University of Georgia), Associate Professor of Sociology, 1995, 2001.

Hopkins, John D. – B.S., M.S. (Clemson), Ph.D. (University of Arkansas), Assistant Professor of Entomology, 2002.
Horowitz, Andrew – B.S. (University of Maryland), M.S., Ph.D. (University of Wisconsin), Associate Professor of Economics, 1997.

Howard, Linnie J. – B.S.N. (Ball State University), MBA (University of Arkansas), Instructor of Nursing, 2004.

Howell, Terry A. – B.S.Ag.E. (Texas A&M University), Ph.D. (University of Wisconsin), Adjunct Research Assistant Professor of Food Science, Adjunct Assistant Professor of Biological and Agricultural Engineering, 2002.

Huff, Geraldine – B.S., M.S., Ph.D. (University of Arkansas), Research Assistant Professor of Poultry Science, 1994, 1998.

Huggins, Denise W. – B.A., M.A., Ph.D. (Texas Woman's University), Assistant Professor of Sociology, 2001.

Hughes, Jean S. – B.S. (University of Central Arkansas), M.Ed., Ed.D. (University of Arkansas), Assistant Professor of Recreation, 2000.

Huitink, Gary – B.S., M.S. (Iowa State University), Associate Professor of Biological and Agricultural Engineering, 1995.

Hulen, Jeannie L. – B.F.A. (Kansas City Art Institute), M.F.A. (Louisiana State University), Assistant Professor of Art, 2002.

Hurd, Debra – B.A. (University of Arkansas), M.P.A. (University of Arkansas), Ph.D. (University of Arkansas), Research Associate Professor of Social Work, 2004.

Hurd, Fred Coy – B.S. (Arkansas State University), M.S., Ph.D. (University of Arkansas), Visiting Assistant Professor of Operations Management, 2002.

Imbeau, Marcia B. – B.A. (Hendrix College), M.Ed. (University of Arkansas at Little Rock), Ph.D. (University of Connecticut), Associate Professor of Special Education, 1991, 1997.

Ingels, Neil B., Jr. – B.S.E.E. (University of Arkansas), M.S.E.E. (University of Santa Clara, California), Ph.D. (Stanford University, California), Adjunct Professor of Biological and Agricultural Engineering, 2003.

Ivey, David M. – B.S., Ph.D. (University of Georgia), Associate Professor of Biological Sciences, 1992, 1998.

Jack, Nancy E. – B.S. (Tarleton State University), M.S., Ph.D. (New Mexico State University), Assistant Professor of Animal Science, 2000, 2004.

Jackson, James R. – B.A. (Southern Methodist University), J.D. (University of Arkansas), M.L.I.S. (University of Oklahoma), Associate Librarian, Law, 1996.

Jackson, Thomas L. – B.A. (University of the Pacific), M.A., Ph.D. (Bowling Green State University), Professor of Psychology, 1988, 1991.

James, Douglas Arthur – B.S., M.S. (University of Illinois), University Professor of Biological Sciences, 1953, 2004.

Jandik, Tomas – B.S., M.S. (Czech Technical University), Ph.D. (University of Pittsburgh), Assistant Professor of Finance, 2000.

Jennings, John A. – B.S. (Southwest Missouri State University), M.S. (University of Arkansas), Ph.D. (University of Missouri), Adjunct Professor of Animal Science and Extension Livestock Specialist, 1998.

Jensen, Molly – B.S. (Southwest Missouri State University), M.A., Ph.D. (University of Arkansas), Visiting Assistant Professor of Marketing and Logistics, 2003.

Jia, Yulin – B.S. (Xichang Agriculture College), M.S. (University of Florida), Ph.D. (Purdue University), Adjunct Assistant Professor, 2001.

Johnson, Charlene – Psy., M.Ed. (University of Cincinnati), M.B.A. (Atlanta University), Ph.D. (Emory University), Associate Professor of Middle Level Education, 1992, 1998.

Johnson, Donald M. – B.S., M.A.E. (Western Kentucky University), Ph.D. (University of Missouri), Professor of Agricultural and Extension Education, 1993, 1999.

Johnson, Donald R. – B.A., M.S. (University of Arkansas), Ph.D. (North Carolina State University), Adjunct Professor of Entomology, 1992.

Johnson, Mark R. – B.S. (Brooklyn College), M.S. (Purdue University), Ph.D. (Michigan State University), Associate Professor of Mathematical Sciences, 1995, 2001.

Johnson, Michael G. – B.S., M.S. (University of Illinois), Ph.D. (University of California-Davis), Professor of Food Science, 1984.

Johnson, Normastel – B.A. (Vanderbilt University), M.L.S. (Simmons College), Associate Professor and Associate Librarian, 1989, 1995.

Johnston, Theodore H. – B.S., M.S. (University of Nebraska-Lincoln), Ph.D. (Iowa State University), Adjunct Professor of Agronomy, 1987.

Jones, Chester S. – B.S.E. (Pittsburg State University), Ph.D. (University of Alabama at Birmingham), Associate Professor of Health Science, 1994, 2000.

Jones, Eddie Wade – B.A. (Tougaloo College), M.M. (Miami University), D.M.A. (Memphis State University), Associate Professor of Music, 1990.

Jones, Linda C. – B.A. (Northeast Louisiana University), M.A. (University of Arizona), M.A. (University of Arkansas), Assistant Professor of Foreign Languages, 2000.

Jones, Phillip J. – B.A. (University of California - Santa Barbara), M.A. (University of California - Irvine), M.S. (University of Illinois), Associate Professor and Associate Librarian, 2003.

Jong, Ing-Chang – B.S.C.E. (National Taiwan University), M.S.C.E. (South Dakota School of Mines and Technology), Ph.D. (Northwestern University), P.E., Professor of Mechanical Engineering, 1965, 1974.

Jordan, Elizabeth A. – B.S. (Lincoln University), M.A.T. (Webster University), M.S. (University of Missouri, Kansas City), Instructor of Special Education, 1996.

Jordan, Gerald B. – B.A. (University of Arkansas), M.S.J. (Northwestern University), Associate Professor of Journalism, 1995.

Judges, Donald P. – B.A. (Johns Hopkins University), J.D. (University of Maryland), Ph.D. (University of Tulsa), Ben J. Altheimer Professor of Legal Advocacy, 1989, 1996.

Karcher, Douglas E. – B.S. (The Ohio State University), M.S., Ph.D. (Michigan State University), Associate Professor of Horticulture, 2000, 2004.

Katayama, William R. – B.A. (Concordia College), M.S., Ph.D. (North Dakota State University), Adjunct Professor of Entomology, 1992.

Kavdia, Mahendra – B.S.Ch.E., (Indian Institute of Technology-Delhi), M.S.Ch.E. (Indian Institute of Technology-Madras), Ph.D. (Oklahoma State University), Assistant Professor of Biological and Agricultural Engineering, 2003.

Keck, Lloyd D. – B.S. (University of Arkansas), D.V.M. (Louisiana State University), Ph.D. (University of Arkansas), Adjunct Professor of Poultry Science, 1999.

Kelley, Christopher R. – B.A. (Louisiana State University), J.D. (Howard University), LL.M. (University of Arkansas), Associate Professor of Law, 1998, 2002.

Kelloog, D. Wayne – B.S.A., M.S. (University of Missouri), Ph.D. (University of Nebraska), Professor of Animal Science, 1981.

Kennefick, Julia – B.S. (University of Arkansas), Ph.D. (California Institute of Technology), Visiting Assistant Professor of Physics, 2003.

Kern, Jack C. – B.S. (University of Wisconsin-LaCrosse), M.Ed. (Southwest Texas State University), Ph.D. (Texas Woman's University), Clinical Associate Professor of Kinesiology, 1996, 2002.

Kerr, John B. III – B.A. (University of Texas), Ph.D. (Texas A&M University), Associate Professor of Political Science, 1994, 2000.

Kilbourn, Ann M. – B.A., J.D., M.A. (University of Nebraska), M.Ed. (University of Arkansas), Ph.D. (University of Michigan), Associate Clinical Professor of Law, 2004.

Kilbourn, Mark R. – A.B. (Boston College), J.D., Ph.D. (University of Nebraska), Wylie H. Davis Distinguished Professor of Law, 1988, 2003.

Killian, Timothy S. – B.A. (Central Bible College), M.A. (Wheaton College), Ph.D. (University of Missouri, Columbia), Assistant Professor of Human Environmental Sciences, 2001.

Killpatrick, Judith – B.S., J.D. (University of California, Berkeley), LL.M., J.S.D. (Columbia University), Associate Professor of Law, 1994, 1997.

Kim, Jin-Woo – B.S. (Technology, Seoul National University), B.S. (University of Iowa), M.S. (University of Wisconsin), Ph.D. (Texas A&M University), Assistant Professor of Biological and Agricultural Engineering, 2001.

King, Jerry – B.S., M.S. (Butler University), Ph.D. (Northeastern University), Adjunct Professor of Food Science, 2004.

Kirby, John D. – B.A., M.S. (University of Nebraska), Ph.D. (Oregon State University), Associate Professor of Poultry Science, 1993, 1997.

Kirkpatrick, LaVonne – B.S. (Northern State College, South Dakota), M.S., Ed.D. (University of South Dakota), Assistant Professor of Elementary Education, 1984.

Kirkpatrick, Terrence L. – B.S.A., M.S. (University of Arkansas), Ph.D. (North Carolina State University), Professor of Plant Pathology, 1984, 1997.
Kissing, Daniel B. – B.A. (University of Wisconsin), M.S. (University of Nevada, Las Vegas), Ph.D. (University of South Carolina), Assistant Professor of Counselor Education, 2004.

Klingaman, Gerald L. – B.S. (Oklahoma State University), M.S., Ph.D. (University of Maryland), Professor of Horticulture, 1974, 1983.

Knowles, Eric – B.A. (Antioch College), Ph.D. (Boston University), Professor of Psychology, 1984.

Koepp, Roger E. – A.B. (Haverford College), Ph.D. (California Institute of Technology), University Professor of Chemistry and Biochemistry, 1979, 1996.

Kolb-Selby, Adelaide – M.N.Sc. (University of Arkansas for Medical Sciences), B.S.N. (Henderson State University), Instructor of Nursing, 2002.

Konig, Ronald H. – B.S. (St. Lawrence University), M.S., Ph.D. (Cornell University), Professor of Geology, 1959, 1971.

Kopp, Steven W. – B.S. (University of Missouri-Rolla), M.B.A. (University of Southern Mississippi), Ph.D. (Michigan State University), Associate Professor of Marketing and Logistics, 1992, 2000.

Korth, Kenneth L. – B.S. (University of Nebraska), Ph.D. (North Carolina State University), Associate Professor of Plant Pathology, 1999, 2003.

Kral, Timothy A. – B.S. (John Carroll University), Ph.D. (University of Florida), Associate Professor of Biological Sciences, 1981, 1988.

Kreider, David L. – B.S.A. (University of Arkansas), M.S. (Oklahoma State University), Ph.D. (University of Arkansas), Associate Professor of Animal Science, 1986, 1991.

Kring, Timothy J. – B.A. (Quinnipiac College), M.S., Ph.D. (Texas A&M University), Professor of Entomology, 1985, 1994.

Kruse, Timothy A. – B.S. (Purdue University), M.B.A. (University of Missouri), Ph.D. (Purdue University), Assistant Professor of Finance, 2001.

Kucker, Patricia C. – B.S., B. Arch. (Pennsylvania State University), M.Arch. (University of Pennsylvania), Associate Professor of Architecture, 2002.

Kuenzel, Wayne – B.S., M.S. (Bucknell University), Ph.D. (University of Georgia), Professor of Poultry Science, 1999.

Kulczak, Deborah E. – B.A., M.L.S. (Kent State University), Associate Professor and Associate Librarian, 1988, 2000.

Kurtz, David – B.A. (Davis and Elkins College), M.B.A., Ph.D. (University of Arkansas), University Professor of Marketing and Logistics and R.A. and Vivian Young Chair in Business Administration, 1988, 2000.

Kvamme, Kenneth L. – B.A., M.A. (Colorado State University), Ph.D. (University of California-Santa Barbara), Associate Professor of Anthropology, 1999.

Kwon, Young Min – B.S., M.S. (Seoul National University), Ph.D. (Texas A&M University), Assistant Professor of Poultry Science, 2002.

Lacy, Claud H. – B.S., M.S. (University of Oklahoma), Ph.D. (University of Texas, Austin), Professor of Physics, 1980, 1999.

LaFerney, Preston – B.S., M.S. (University of Arkansas), Ph.D. (Oklahoma State University), University Professor of Agricultural Economics and Agribusiness, 1980, 1992.

Lamar, Brian – Captain, U.S. Army, B.S. (Ferris State College), Assistant Professor of Military Science, 1991.

Lamphear, Billy D. – B.A. (Northeastern Oklahoma State University), M.S. (Kennedy-Western University), Visiting Assistant Professor of Operations Management, 2002.

Langager, Graeme – B.M. (Capilano College, British Columbia), M.M. (California State University, Long Beach), Visiting Assistant Professor of Music, 2003.

Langsner, Steve – B.S. (Springfield College), M.S. (University of Baltimore), Re.D. (Indiana University), Associate Professor of Recreation, 1989, 1995.

Lanzani, Loredana – B.S. (University of Rome II), Ph.D. (Purdue University), Associate Professor of Mathematical Sciences, 1997, 2003.

Lawson, Glenda – A.D.N. (Mississippi University for Women), B.S.N., C.N.S., M.S.N. (University of Texas Medical Branch), Ph.D. (Texas Woman's University), Associate Professor of Nursing, 2000.

Lee, Fleet N. – B.S.A., M.S. (University of Arkansas), Ph.D. (Louisiana State University), Professor of Plant Pathology, 1968, 1986.

Lee, Jungmin – B.A., M.A. (Seoul National University), Ph.D. (University of Texas at Austin), Assistant Professor of Economics, 2004.

Lee, Richard N. – B.A. (Luther College), Ph.D. (Stanford University), Associate Professor of Philosophy, 1982, 1988.

Lee, Wayne Y. – B.S.M.E. (De La Salle College, Philippines), M.B.A. (Santa Clara University), Ph.D. (University of California, Los Angeles), Professor of Finance and the Alice L. Walton Chair in Finance, 1998.

Lee, Wookwon – B.S. (Inha University, Korea), M.S., Ph.D. (George Washington University), Assistant Professor of Electrical Engineering, 2000.
Lefever-Davis, Shirley – B.S., M.S., Ph.D. (Kansas State University), Associate Professor of Reading, 1991, 1997.

Lehigh, Patti W. – B.S., M.S. (University of Arkansas), Ph.D. (Louisiana State University). Adjunct Assistant Professor of Food Science, 1997.

Lehmann, Michael – Diploma in Biology, Ph.D. (Philips University of Marburg, Germany), Associate Professor of Biological Sciences, 2002.

Lester, Melissa K. – B.S., M.S. (University of Arkansas), Ph.D. (Texas A&M University), Research Assistant Professor of Agricultural and Extension Education, 1993, 1997.

Levine, Daniel – B.A. (University of Minnesota), Ph.D. (University of Cincinnati), Professor of Foreign Languages (Classics), 1980, 1998.

Levine, William H. – B.S. (DePaul University), M.S., Ph.D. (State University of New York at Binghamton), Assistant Professor of Psychology, 2001.

Li, Jiali – B.S. (Hei Long Jiang University), M.S. (University of Science & Technology of China), M.S., Ph.D. (City University of New York), Assistant Professor Physics, 2002.

Li, Wingning – B.S. (University of Iowa), M.S., Ph.D. (University of Minnesota), Associate Professor of Computer Science and Computer Engineering, 1989, 1995.

Li, Yanbin – B.S. (Shenyang Agricultural University, China), M.S.Ag. E. (University of Nebraska), Ph.D. (Pennsylvania State University), Professor of Biological and Agricultural Engineering, 1994, 2003; Professor of Poultry Science, 1999, 2003; Adjunct Professor of Food Science, 1999.

Lim, Sung M. – B.S., M.S. (Seoul National University), M.S. (Mississippi State University), Ph.D. (Michigan State University), Professor of Plant Pathology, 1991.

Lincoln, Felicia – B.S., M.Ed. (Arkansas Tech University), Ph.D. (University of Pennsylvania), Assistant Professor in English as a Second Language, 2000.

Lirgg, Cathy D. – B.A. (Muskingum College), M.S. (Indiana State University), Ph.D. (Michigan State University), Associate Professor of Kinesiology, 1991, 1996.

Littrell, Rita L – B.S.E., M.Ed. (University of Arkansas), Ph.D. (University of Kansas), Visiting Assistant Professor of Economics, 1997.

Loewer, Otto J. – B.S., M.S. (Louisiana State University), M.S. (Michigan State University), Ph.D., (Purdue University), Professor of Biological and Agricultural Engineering, [1985-1992], 1996.

Loftin, Kelly M. – B.S. (Arkansas Tech), M.S. (University of Arkansas), Ph.D. (New Mexico State University). Assistant Professor of Entomology, 2002.

Lohr, Jeffrey M. – B.S. (University of Wisconsin), M.A., Ph.D. (University of Hawaii), Professor of Psychology, 1975, 1992.

Longer, David E. – B.S. (Ball State University), M.S., Ph.D. (Purdue University), Professor of Crop, Soil, and Environmental Sciences, 1979, 1986, 2005.

Looper, Michael L. – B.S., M.S. (University of Arkansas), Ph.D. (Oklahoma State University), Adjunct Assistant Professor of Animal Science, 2002.

Lorenz, Gus M. – B.S.A., M.S., Ph.D. (University of Arkansas), Professor of Entomology, 1997.

Lucas, Christopher J. – B.A. (Syracuse University), M.A. (Northwestern University), Ph.D. (Ohio State University), Professor of Educational Leadership, Counseling, and Foundations, 1993.

Luoni, Stephen D. – B.S.Arch. (Ohio State University), M.Arch. (Yale University), Associate Professor of Architecture, 2003.

Lusby, Keith S. – B.S., M.S. (Kansas State University), Ph.D. (Oklahoma State University), Professor Animal Science, 1995.

Lusht, John C. – B.S. (Michigan Technological University), M.S. (Duke University), Ph.D. (University of Alabama), Associate Professor of Computer Science and Computer Engineering, 2002.

Luttrell, Randall G. – B.S. (Texas A&M University), M.S., Ph.D. (University of Arkansas), Professor of Entomology, 1998.

Lyles, Ivory W. – B.S. (Alcorn State University), M.S. (Mississippi State University), Ph.D. (Ohio State University). Adjunct Professor of Agricultural and Extension Education, 2001.

Lyons, Jack C. – B.A. (Valparaiso University), M.A., Ph.D. (University of Arizona), Assistant Professor of Philosophy, 2001.

Madison, Bernard L. – B.S. (Western Kentucky University), M.S., Ph.D. (University of Kentucky), Professor of Mathematical Sciences, 1979.

Maksi, Gregory E. – B.S.M.E., M.S. (Georgia Institute of Technology), Ph.D. (University of Mississippi), Visiting Assistant Professor of Operations Management, 1988.

Mallory, Sherry L. – B.A. (University of California - Santa Cruz), Ph.D. (University of Arizona), Adjunct Assistant Professor of Higher Education, 2002.

Malshe, Ajay P. – B.S. (S.P. College, University of Poona, India), M.S., Ph.D. (University of Poona), Associate Professor of Mechanical Engineering, 1994, 2000; Adjunct Professor of Biological and Agricultural Engineering, 2004.

Manger, Walter L. – B.A. (Wooster College), M.S., Ph.D. (University of Iowa), Professor of Geology, 1972, 1981.

Mantooth, H. Alan – B.S., M.S. (University of Arkansas), Ph.D. (Georgia Institute of Technology), Professor of Electrical Engineering, 1998, 2002.

Marcy, John R. – B.S., M.S. (Iowa State), Ph.D. (University of Tennessee), Research Associate Professor and Extension Specialist of Poultry Science, Adjunct Faculty Member of Food Science, 1993, 2000.

Markham, Elizabeth J. – B.A. (University of Otago, New Zealand), Ph.D. (Cambridge University), Research Professor in the Department of Music, 2000.

Marsh, Paul M. – B.S., M.S., Ph.D. (University of California-Davis), Adjunct Professor of Entomology, 1998.

Martin, Elizabeth (Betty) M. – B.S., M.S., Ph.D. (University of Arkansas), Lecturer, 2003.

Martin, Patricia Jean – B.A. (Rollins College), M.F.A. (Purdue University), Associate Professor of Drama, 1995, 2001.

Maruping, Likoebe M. – B.S.I.E., M.S.E. (University of Texas), Ph.D. (Arizona State University), Assistant Professor of Industrial Engineering, 2000.

Matlock, Marty D. – B.S., M.S., Ph.D. (Oklahoma State University), Associate Professor of Biological and Agricultural Engineering, 2001, 2003.

Matlock, Mary E. – B.S.E., J.D. (University of Arkansas), Professor of Law, 1986, 1996.

Mattice, John D. – B.A. (Grinnell College), Ph.D. (University of Arkansas), Research Associate Professor of Crop, Soil, and Environmental Sciences, 1989, 2003.

Mattlioi, Glen S. – B.A. (University of Rochester), M.S., Ph.D. (Northwestern University), Associate Professor of Geosciences, 2001, 2002.

Mauroumostakos, Andy – B.S. (Oral Roberts University), M.S., Ph.D. (Oklahoma State University), Professor of Crop, Soil, and Environmental Sciences, 1989, 2002.

Maxwell, Charles – B.S., M.S., (University of Georgia), Ph.D. (University of Wisconsin), Professor of Animal Science, 1996.

Mayes, Richard – B.S. (University of Arkansas), Major (U.S. Army Corps of Engineers), Assistant Professor of Military Science and Leadership, 2004.

Mayes, Susan – B.S.E., M.Ed. (University of Arkansas), Instructor in Kinesiology, 1992.

McCann, Roy – B.S.E.E., M.S.E.E. (University of Illinois), Ph.D. (University of Dayton), Associate Professor of Electrical Engineering, 2003.

McCartney, Nancy G. – B.A., M.A., Ph.D. (University of Wisconsin), Assistant Professor and Assistant Curator, 1974, 1976.

McCombs, Davis – A.B. (Harvard), M.F.A. (University of Virginia), Assistant Professor of English, 2002.

Mc Gee, Christy – B.S. (Murray State University), M.Ed., Ed.D. (University of Louisville), Associate Professor of Curriculum and Instruction, 1996.

McGehee, Marilyn – B.S.E., M.S. (University of Arkansas), Instructor in Communication Disorders, 1999.

McIntosh, Matthias C. – B.A. (Virginia Tech); Ph.D. (The Pennsylvania State University), Associate Professor of Chemistry and Biochemistry, 1996, 2002.

McLeod, Paul J. – B.S., M.S., Ph.D. (University of Arkansas), Professor of Entomology, 1984, 1993.

McNabb, David – B.S. (University of Texas at Arlington), Ph.D. (Louisiana State University Medical Center), Assistant Professor of Biological Sciences, 2000.

McNew, Ronald W. – B.S. (Colorado State University), M.S., Ph.D. (Purdue University), Professor of Animal Science, 1989.

Mears, Derrick G. – B.S., M.S. (Central Missouri State University), Lecturer in Kinesiology, 2002.

Mearns, Laurette M. – B.S., M.S., Ph.D. (University of Southwestern Louisiana), Associate Professor of Mathematical Sciences, 1989, 1995.

Meek, James L. – B.A., M.A., Ph.D. (University of Texas), Associate Professor of Mathematical Sciences, 1967, 1974.

Meisch, Max V. – B.S.A. (Texas College of Arts & Industries), M.S., Ph.D. (Texas A&M University), University Professor of Entomology, 1970, 1990.

Mendez, Fabio – B.S. (University of Costa Rica), M.A., Ph.D. (Michigan State University), Assistant Professor of Economics, 2002.

Messadi, Tahar – B.Arch. (Universite de Constantine, Algeria), M.Arch., Ph.D. (University of Michigan, Ann Arbor), Assistant Professor of Architecture, 2003.

Meullenet, Jean-Francois – B.S. (Superior Special Math Preparatory School, Remins, France), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Ph.D. (University of Georgia), Associate Professor of Food Science, 1996, 2001.

Miller, David M. – B.S., M.S. (Purdue University), Ph.D. (University of Georgia), Professor of Crop, Soil, and Environmental Sciences, 1988, 2001.

Miller, Debra L. – B.A. (University of Arkansas), M.S.L.S. (University of Kentucky), Visiting Assistant Professor and Visiting Assistant Librarian, 1999.

Miller, Jefferson D. – B.A. (Northeastern State University, Oklahoma), M.A., Ph.D. (Oklahoma State University), Assistant Professor of Agricultural and Extension Education, 2001.

Miller, Katrina R. – B.A. (University of Alaska), M.S. (Western Oregon University), Ed.D. (Lamar University), Clinical Assistant Professor of Rehabilitation, 2001.

Miller, Michael – B.S. (University of Missouri, Rolla), M.S. (University of Colorado), Visiting Assistant Professor of Operations Management, 2001.

Miller, Nancy G. – B.A., B.S. (Iowa State University), M.S., Ph.D. (University of Minnesota), Assistant Professor of Interior Design, 2002.

Miller, Phyllis – B.S., M.Ed. (Lamar University), Ph.D. (Texas A&M University), Associate Professor of Journalism, 1991, 1993.

Miller, Wayne P. – B.S. (Purdue University), M.S. (University of Illinois), Ph.D. (University of Wisconsin), Adjunct Professor of Agricultural Economics and Agribusiness, 1989, 1992.

Millett, Francis S. – B.S. (University of Wisconsin), Ph.D. (Columbia University), University Professor of Chemistry and Biochemistry, 1972, 1989.

Misenhelter, Dale – B.M. (Florida State University), M.M. (University of Wyoming), Ph.D. (Florida State University), Associate Professor of Music, 2002.

Moberly, Robert M. – B.S., J.D. (University of Wisconsin), Professor of Law, 1999.

Moiseichik, Merry – B.S.E., M.S. (State University of New York at Cortland), Re.D. (Indiana University), Associate Professor of Recreation, 1989, 1995.

Moldenhauer, Karen A.K. – B.S. (Iowa State University), M.S. (North Carolina State University), Ph.D. (Iowa State University), Professor of Crop, Soil, and Environmental Sciences, Rice Research and Extension Center, Stuttgart, 1982, 1992.

Montgomery, Louise F. – B.S. (Arkansas State College), M.A., Ph.D. (University of Texas, Austin), Associate Professor of Journalism, 1989.

Moore, Corey L. – B.A. (University of Georgia), M.S. (University of Kentucky), Ph.D. (Southern Illinois University), Research Assistant Professor of Rehabilitation, 1999.

Moore, Philip A., Jr. – B.S., M.S. (University of Arkansas), Ph.D. (Louisiana State University), Visiting Associate Professor of Crop, Soil, and Environmental Sciences, 1990, 1992.

Moores, John A. – B.B.A. (Kent State University), M.A. (Ball State University), Visiting Assistant Professor of Operations Management, 2000.

Moorhead, James R. – B.S. (Indiana State University), M.B.A. (Kennedy Western University), Visiting Assistant Professor of Operations Management, 1989.

Morgan, Tanya J. – B.A. (University of Arkansas), M.S. (University of Arkansas), Ph.D. (University of North Carolina), Assistant Professor of Health Science, 1997, 1999.

Morris, Barney P. – Major, U.S. Army, B.S., M.S. (University of Arkansas), Assistant Professor of Military Science, 1993.
Morris, Justin R. – B.S., M.S. (University of Arkansas), Ph.D. (Rutgers, the State University of New Jersey), Distinguished Professor of Food Science, 1964, 1997.

Morris, Manford – B.S., M.S., Ph.D. (Berkley), Adjunct Professor of Food Science, 2001.

Mosebach, Michael – B.S. (University of Nevada, Reno), M.B.A. (Sonoma State University), Ph.D. (University of Oklahoma), C.P.A., Assistant Professor of Accounting, 2000.

Mozaffari, Morteza – B.S., M.S. (University of Massachusetts), Ph.D. (University of Delaware), Research Assistant Professor, Soil Testing and Research Laboratory, 2002.

Muir, John H. – B.S., M.S. (North Dakota State University), Ph.D. (University of Nebraska), Associate Professor of Soil Fertility, 1999.

Mullane, Michael W. – B.A., J.D. (University of Notre Dame), Professor of Law, 1999.

Muralidhara, H.S. – B.S., M.S. (University of Bangalore, India), M.T. (University of Nagpur, India), M.S. (Southern Illinois University), Ph.D. (West Virginia University), Adjunct Professor of Chemical Engineering, 2002.

Murders, Michael R. – B.S. (Park University), M.S. (Troy State University), Assistant Professor of Aerospace Studies, 2005.

Murphy, J. Bradford – B.S. (Colorado State University), M.Phil., M.S., Ph.D. (Yale University), Professor of Horticulture, 1976, 1993.

Murphy, Sonya Yvette – B.A. (University of North Carolina, Charlotte), M.S.W. (University of North Carolina, Chapel Hill), Ph.D. (University of North Carolina, Greensboro), Assistant Professor of Social Work, 2004.

Nafukho, Fredrick Muyia – B.Ed., M.Ed. (Kenyatta University), Ph.D. (Louisiana State University), Assistant Professor of Vocational and Adult Education, 2001.

Nam, Chang S. – B.S. (Sung Kyunkwan University, Korea), M.A. (Sogang University, Korea), M.S. (State University of New York at Buffalo), Ph.D. (Virginia Polytechnic Institute and State University), Assistant Professor of Industrial Engineering, 2004.

Nance, Cynthia E. – B.S. (Chicago State University), J.D., M.A., Ph.D. (University of Iowa), Associate Professor of Law, 1994, 1999.

Neighbors, Marianne – B.S.N. (Mankato State University), M.Ed. (University of Arkansas), M.S. (University of Oklahoma), Ed.D. (University of Arkansas), Professor of Nursing, 1972, 1995.

Newgent, Rebecca A. – B.A., M.Ed. (Kent State University), Ph.D. (University of Akron), Assistant Professor of Counselor Education, 2001.

Noble, Janet M. – B.S., M.S. (Kent State University), Ph.D. (Virginia Polytechnic Institute and State University), Associate Professor of Human Environmental Sciences, 1992, 1998.

Noggle, Kellar – B.S.E., M.S.E. (University of Central Arkansas), Ed.D. (University of Arkansas), Assistant Professor of Educational Administration, 1978.

Noland, Billy R. – B.B.A. (Midwestern University), M.B.A. (University of Central Arkansas), Visiting Assistant Professor of Operations Management, 1981.

Norman, Richard J. – B.S., M.S. (University of Missouri), Ph.D. (University of Illinois), Professor of Crop, Soil, and Environmental Sciences, 1983, 1992.

Norvell, Phillip E. – B.A., J.D. (University of Oklahoma), Professor of Law, 1975, 1983.

Norwood, John M. – B.A., M.B.A. (Louisiana State University), J.D. (Tulane University of Louisiana), C.P.A., Associate Professor of Accounting, 1981.

Nugent, Russell A. – B.S. (Pennsylvania State University), M.S. (Virginia Polytechnic Institute and State University), Adjunct Professor of Animal Science, 1998.

Nutter, Darin W. – B.S.M.E., M.S.M.E. (Oklahoma State University), Ph.D. (Texas A&M University), P.E., Associate Professor of Mechanical Engineering, 1994, 2000.

Oliver, Lawrence R. – B.S.A., M.S. (University of Arkansas), Ph.D. (Purdue University), University Professor of Crop, Soil, and Environmental Sciences, 1972, 1994.

Oliver, William F. III – B.S. (University of Arizona), M.S., Ph.D. (University of Colorado), Associate Professor of Physics, 1992, 1998.

O’Neal, Thomas – B.A. (Rutgers University), M.H.A. (Virginia Commonwealth University), Visiting Assistant Professor of Operations Management, 2002.

Oosterhuis, Derrick M. – B.S. (Natal University), M.S. (Reading University), Ph.D. (Utah State University), Distinguished Professor of Crop, Soil, and Environmental Sciences, 1985, 1998.

Osborn, G. Scott – B.S., M.S., Ag.E. (University of Kentucky), Ph.D. (North Carolina State University), Assistant Professor of Biological Engineering, 2001.

Osborn, Tommy – B.S. (Arkansas State University), Major (Field Artillery, U.S. Army), Assistant Professor of Military Science and Leadership, 2001.

Owens, Casey M. – B.S., M.S., Ph.D. (Texas A&M University), Assistant Professor of Poultry Science, 2000, Adjunct Assistant Professor of Food Science, 2003.

Ozment, John D. – B.S.B.A., M.B.A. (University of Tulsa), Ph.D. (University of Minnesota), Professor of Marketing and Logistics, Oren Harris Chair in Transportation, 1986, 1996.

Panda, Brahjendra – M.S. (Utkal University, India), Ph.D. (North Dakota State University), Associate Professor of Computer Science and Computer Engineering, 2001.

Park, Ok D. – B.A. (Seoul National University), M.A. (Northeast Missouri State University), Ph.D. (University of Missouri), Associate Professor of Vocational Education, 1980, 1984.

Parker, Marie A. – B.S. (University of Arkansas, Pine Bluff), M.S. (Ouachita Baptist University), Instructor in Curriculum and Instruction, 1995.

Parker-Gibson, Necia – B.S.A. (University of Arkansas), M.L.I.S. (Louisiana State University), Associate Professor and Associate Librarian, 1991, 1997.

Parker, Sandra C. – B.S.N.S., M.A., Ph.D. (University of Arkansas), Adjunct Professor of Industrial Engineering, 1970, 1992.

Patnoe, Jerry L. – B.A. (Indiana University), M.A., Ph.D. (University of Arizona), Associate Professor of Sociology, 1990, 1996.

Paul, David W. – B.S. (Southwestern University), Ph.D. (University of Cincinnati), Associate Professor of Chemistry and Biochemistry, 1980, 1986.

Pederson, Donald O. – B.S. (Texas Technological College), Ph.D. (Rice University), Professor of Physics, 1972, 1984.

Peng, Xiaogang – B.S., M.S., Ph.D. (Jilin University, China), Associate Professor of Chemistry and Biochemistry, 1999, 2003.

Penney, W. Roy – B.S.M.E., M.S.M.E. (University of Arkansas), Ph.D. (Oklahoma State University), P.E., Professor of Chemical Engineering, 1989.

Pennington, Jodie A. – B.S. (Western Kentucky University), M.S. Ph.D. (University of Illinois), Adjunct Professor of Animal Science, 1997.

Peters, Gary – B.S. (Arkansas Tech University), M.S. (University of Missouri - Columbia), Ph.D. (University of Oregon), Assistant Professor of Accounting, 2003.

Petretic, Patricia A. – B.A. (Youngstown State University), M.A., Ph.D. (Bowling Green State University), Associate Professor of Psychology, 1991.

Petris, Giovanni – B.S. (Universita degli Studi di Milano, Italy), M.S., Ph.D. (Duke University), Assistant Professor of Mathematical Sciences, 1999.

Peven, Michael D. – A.B. (University of Illinois, Chicago), M.F.A. (School of the Art Institute of Chicago), Professor of Art, 1977, 1994.

Phillips, Jerry M. – B.S. (University of Arkansas at Monticello), M.S., Ph.D. (University of Arkansas), Professor of Crop, Soil, and Environmental Sciences, Southwest Research and Extension Center, Hope, 1985, 1995.

Piga, Giovanna P. – Dipl. Arch. (University of Rome), Adjunct Assistant Professor, 1994.

Pincus, Karen V. – B.S., M.B.A., Ph.D. (University of Maryland), C.P.A., Professor of Accounting and S. Robson Walton Chair in Accounting, 1995.

Pinto, Ines – B.S., M.S. (University of Chile), Ph.D. (Louisiana State University Medical Center), Assistant Professor of Biological Sciences, 2000.

Plafcan, Frank T. – B.S.A., M.S. (University of Arkansas), Ed.D. (Oklahoma State University), Adjunct Assistant Professor of Agricultural and Extension Education, 1993.

Plue, Raymond E. – D.V.M. (Purdue University), M.S. (University of Georgia), Adjunct Professor of Poultry Science, 1992.
Pohl, Edward A. – B.S.E.E. (Boston University), M.S.E.M. (University of Dayton), M.S.S.E. (Air Force Institute of Technology), M.S.R.E., Ph.D. (University of Arizona), Associate Professor of Industrial Engineering, 2004.

Pohman, Fred W. – B.S. (University of Missouri), M.S. (University of Tennessee), Ph.D. (Kansas State University), Associate Professor of Animal Science, 1997; Adjunct Professor of Food Science, 2003.

Popp, Valentin E. – M.S. (Moscow State University), Ph.D. (Agro-Physical Institute), Visiting Professor of Chemical Engineering, 1994.

Porter, Jon G. – B.A. (Park College), M.S. (Drury College), Adjunct Professor of Poultry Science, 1996.

Powell, F. Allen – M.S. (Amherst University, Dallas), Instructor of Human Environmental Sciences, 2003.

Prior, Ronald L. – B.S. (University of Nebraska), Ph.D. (Cornell University), USDA-ARS Phytochemistry/Nutrition, Adjunct Associate Professor, 1987; Adjunct Professor of Food Science, 2001.

Proctor, Andrew – B.S. (Queen Mary College, University of London), M.S., Ph.D. (University of Arkansas), Professor of Food Science, 1992, 2001.

Pulay, Peter – M.S. (Eotvos L. University, Budapest), Ph.D. (University of Stuttgart), Roger Bost Professor of Chemistry and Biochemistry, 1982, 1983.

Pumford, Neil R. – B.S., Ph.D. (University of Arkansas for Medical Sciences), Adjunct Research Assistant Professor of Poultry Science, 1999.

Purcell, Larry P. – B.S., M.S. (University of Georgia), Ph.D. (University of Florida), Associate Professor of Crop, Soil, and Environmental Sciences, 1993, 1998; Ben J. Altheimer Chair for Soybean Research, 2004.

Quinn, William A. – B.A. (Xavier University), M.A., Ph.D. (Ohio State University), Professor of English, 1979, 1995.

Rainey, Daniel V. – B.S.A. (University of Arkansas), M.S., Ph.D. (Purdue University), Assistant Professor of Agricultural Economics and Agribusiness, 2000.

Redfern, J. Martin – B.Sc. (MacDonald College of McGill University), M.S. (Iowa State University), Ph.D. (Oklahoma State University), Professor of Agricultural Economics and Agribusiness, 1968, 1978.

Reese, Dona J. – B.A. (Northwestern University), M.S.W., Ph.D. (University of Maryland), Assistant Professor of Social Work, 2000.

Reeves, Carol A. – B.S. (Georgia Southern College), M.A. (University of South Carolina), Ph.D. (University of Georgia), Associate Professor of Management and the Cecil and Gwendolyn Copp Applied Professorship in Entrepreneurship, 1990, 1996.

Reid, Margaret F. – B.A. (University of Marburg, West Germany), M.A. (University of Bonn), M.P.A. (University of Oklahoma), M.B.A. (Central State University), Ph.D. (University of Oklahoma), Associate Professor of Political Science, 1993, 1999.

Rencis, Joseph J. – B.S. (Milwaukee School of Engineering), M.S. (Northwestern University), Ph.D. (Case Western Reserve University), P.E., Professor of Mechanical Engineering, 2004.

Rennie, Craig G. – B.A. (University of Toronto), M.B.A. (Dalhousie University), Ph.D. (University of Oregon), Assistant Professor of Finance, 2001.

Renwick, Janet S. – B.A., M.A. (University of Arkansas at Little Rock), Ph.D. (University of Indiana), Clinical Assistant Professor of Information Systems, 1995.

Restrepo, Luis Fernando – B.A. (Universidad Pontificia Bolivariana), M.A., Ph.D. (University of Maryland at College Park), Associate Professor of Foreign Languages, 1995, 2001.

Reyes, Javier – B.A. (Instituto Tecnologico y de Estudios Superiores de Monterry), Ph.D. (Texas A&M University), Assistant Professor of Economics, 2003.

Rhoads, Douglas Duane – B.A., M.A. (Wichita State University), Ph.D. (Kansas State University), Associate Professor of Biological Sciences, 1990, 1996.

Richardson, Michael D. – B.S. (Louisiana Tech University), M.S. (Louisiana State University), Ph.D. (University of Georgia), Associate Professor of Horticulture, 1998, 2002.

Ricker, Judith – B.S., M.A., Ph.D. (University of Nebraska), Professor of Foreign Languages (German), 1980, 1998.

Rieck, Yo’Av – B.A. (Israel Institute of Technology), Ph.D. (University of Texas), Assistant Professor of Mathematical Sciences, 2000.

Riggs, Charles, Jr. – B.S. (University of Texas), M.S., Ph.D. (Texas A&M University), Professor of Kinesiology, 1984, 1992.

Riggs, Robert D. – B.S.A., M.S. (University of Arkansas), Ph.D. (North Carolina State College), University Professor of Plant Pathology, 1958, 1992.
Riggs, Susan – B.S. (University of Texas), M.Ed. (Texas A&M University), Instructor in Curriculum and Instruction, 1987.

Robbins, James A. – B.S. (University of Wisconsin), M.S. (University of Georgia), Ph.D. (University of California-Davis), Research Associate Professor of Horticulture, 1998.

Robbins, Robert Thomas – B.S., M.S. (Kansas State University), Ph.D. (North Carolina State University), Professor of Plant Pathology, 1979, 1990.

Robinson, Dennis P. – B.S. (Southern Illinois University), A.M. (Indiana University), Ph.D. (George Washington University), Adjunct Associate Professor of Agricultural Economics and Agribusiness, 2004.

Roeder, Mikelle J. – B.S., M.S. (Washington State University), Ph.D. (University of Idaho), Adjunct Assistant Professor of Animal Science, 2002.

Rogers, Marilyn – B.A. (Northwestern State University, Louisiana), M.L.S. (Louisiana State University), Assistant Professor and Assistant Librarian, 1987.

Rossetti, Manuel D. – B.S. (The University of Cincinnati), M.S., Ph.D. (The Ohio State University), Associate Professor of Industrial Engineering, 1999, 2003.

Rothrock, Craig S. – B.S. (Iowa State University), M.S., Ph.D. (University of Illinois), Professor of Plant Pathology, 1989, 1994.

Rozier, Louise – Licence ès Lettres (Université des Lettres et Sciences Humaines, Besançon, France), M.A. (University of Arkansas, Fayetteville), D.M.L. (Middlesex College), Assistant Professor of Foreign Languages, 2004.

Rudzinski, Russell – B.Arch. (Syracuse University), M.Arch. (Washington University), Assistant Professor of Architecture, 2000.

Ruz, M. Reina – B.A. (University of Leon, Spain), M.A. (Kansas State University), Ph.D. (Washington University), Assistant Professor of Foreign Languages, 2001.

Rupe, John C. – B.A. (Goshen College), B.S. (Colorado State University), M.S., Ph.D. (University of Kentucky), Professor of Plant Pathology, 1984, 2001.

Rutger, J. Neil – B.S. (University of Illions), M.S., Ph.D. (University of California - Davis), Adjunct Professor of Crop, Soil, and Environmental Sciences USDA (ARS), 1995.

Rutledge, E. Moye – B.S. (Tennessee Technological University), M.S. (University of Arkansas), Ph.D. (Ohio State University), Professor of Crop, Soil, and Environmental Sciences, 1958, 1978.

Ryan, Jeffrey J. – B.A. (Colorado State University), M.A., Ph.D. (rice University), Associate Professor of Political Science, 1990, 1996.

Sabilk, Sharon F. – B.A. (Mount Holyoke College), M.Ed. (Springfield College), Ph.D. (University of Arkansas), Research Assistant Professor, 2003.

Sagers, Cynthia L. – B.A. (University of Iowa), Ph.D. (University of Utah), Associate Professor of Biological Sciences, 1994, 2000.

Rossetti, Manuel D. – B.S. (The University of Cincinnati), M.S., Ph.D. (The Ohio State University), Associate Professor of Industrial Engineering, 1999, 2003.

Rothrock, Craig S. – B.S. (Iowa State University), M.S., Ph.D. (University of Illinois), Professor of Plant Pathology, 1989, 1994.

Rozier, Louise – Licence ès Lettres (Université des Lettres et Sciences Humaines, Besançon, France), M.A. (University of Arkansas, Fayetteville), D.M.L. (Middlesex College), Assistant Professor of Foreign Languages, 2004.

Rudzinski, Russell – B.Arch. (Syracuse University), M.Arch. (Washington University), Assistant Professor of Architecture, 2000.

Ruz, M. Reina – B.A. (University of Leon, Spain), M.A. (Kansas State University), Ph.D. (Washington University), Assistant Professor of Foreign Languages, 2001.

Rupe, John C. – B.A. (Goshen College), B.S. (Colorado State University), M.S., Ph.D. (University of Kentucky), Professor of Plant Pathology, 1984, 2001.

Rutger, J. Neil – B.S. (University of Illinois), M.S., Ph.D. (University of California-Davis), Adjunct Professor of Crop, Soil, and Environmental Sciences USDA (ARS), 1995.

Rutledge, E. Moye – B.S. (Tennessee Technological University), M.S. (University of Arkansas), Ph.D. (Ohio State University), Professor of Crop, Soil, and Environmental Sciences, 1958, 1978.

Ryan, Jeffrey J. – B.A. (Colorado State University), M.A., Ph.D. (rice University), Associate Professor of Political Science, 1990, 1996.

Sabilk, Sharon F. – B.A. (Mount Holyoke College), M.Ed. (Springfield College), Ph.D. (University of Arkansas), Research Assistant Professor, 2003.

Sagers, Cynthia L. – B.A. (University of Iowa), Ph.D. (University of Utah), Associate Professor of Biological Sciences, 1994, 2000.

Salamo, Gregory J. – B.S. (Brooklyn College), M.S. (Purdue University), Ph.D. (City University of New York), University Professor of Physics, 1975, 1995.

Sampson, Kathryn A. – B.A. (University of Northern Iowa), J.D. (University of Iowa), Clinical Associate Professor of Law, 1995, 1998.

Santos, Sarah K. – B.A. (University of Arkansas), M.L.S. (Vanderbilt University), Assistant Professor and Assistant Librarian, 2000.

Sauer, Thomas J. – B.S. (University of Wisconsin – Stevens Point), M.S., Ph.D. (University of Wisconsin – Madison), Adjunct Assistant Professor of Crop, Soil, and Environmental Sciences, 1996.

Savin, Mary C. – B.S. (University of Notre Dame), M.S., Ph.D. (University of Rhode Island), Assistant Professor of Environmental, Soil, and Water Sciences, 2002.

Schäfer, Lothar – Diploma, Ph.D. (University of Munich), Distinguished Professor of Chemistry and Biochemistry, 1968, 1989.

Schaper, Leonard W. – B.S.E.E. (Newark College of Engineering), B.S. (University of Wisconsin), M.S.E. (Massachusetts Institute of Technology), D.E.S. (New Jersey Institute of Technology), Professor of Electrical Engineering, 1992.

Schmidt, William F. – B.S.M.E. (University of Kentucky), M.S.E., Ph.D. (University of Washington), P.E., Professor of Mechanical Engineering, 1985.

Schneider, Mary J. Grinstead – B.S.Ed. (Central Missouri State College), M.A., Ph.D. (University of Missouri), Professor of Anthropology, 1969, 1982.

Schneider, Susan A. – B.A. (College of St. Catherine), J.D. (University of Minnesota), L.L.M. (University of Arkansas), Associate Professor of Law, 1998, 2002.

Schneringer, Rebecca J. – B.S.N. (University of Arkansas for Medical Sciences), M.S. (University of Oklahoma for Medical Sciences), Instructor of Nursing, 2004.

Schriver, Joe M. – B.A. (University of Arkansas), M.S.W. (University of Arkansas at Little Rock), Ph.D. (University of Iowa), Professor of Social Work, 1994, 2003.

Schroeder, David A. – B.S. (Purdue University), Ph.D. (Arizona State University), Professor of Psychology, 1976, 1989.

Schweiger, Beth Barton – B.A. (Stephen F. Austin State University), M.A., Ph.D. (University of Virginia), Assistant Professor of History, 2000.

Sears, Derek W. – B.S. (University of Kent of Canterbury), Diploma in Space Science (University College, London), Ph.D. (University of Leicester), Professor of Chemistry and Biochemistry, 1981, 1989.

Seideman, Steven – B.S., M.S., Ph.D. (Texas A&M University), Extension Specialist of Food Science, 2002.

Selvam, Rathinam Panneer – B.E., M.E. (University of Madras, India), M.S.C.E. (South Dakota School of Mines and Technology), Ph.D. (Texas Tech University), P.E., Professor of Civil Engineering, 1986, 1999.

Senor, Thomas D. – B.S. (University of Oregon), Ph.D. (University of Arizona), Associate Professor of Philosophy, 1989, 1999.

Sexton, Kim Susan – M.A. (State University of New York at Binghamton), M.A., M.Phil., Ph.D. (Yale University), Assistant Professor of Architecture, 1999.

Shadden, Barbara B. – B.S. (Oberlin College), M.A. (Southern Connecticut State College), Ph.D. (University of Tennessee), Professor of Communication Disorders, 1979, 1992.

Shafristein, Gal – B.Sc. (Ben Gurion University, Israel), M.Sc., Ph.D. (Technion, Israel Institute of Technology), Adjunct Assistant Professor of Biological and Agricultural Engineering, 2004.

Shannon, Graham F. – B.A., B.Arch. (University of Arkansas), M.Arch. in Urban Design (Rice University), Professor of Architecture, 1979, 1990.

Sheng, Guangyao – B.S., M.S. (Nanjing University), Ph.D. (Michigan State University), Assistant Professor of Crop, Soil, and Environmental Sciences, 2000.

Shields, Todd G. – B.A. (Miami University), M.A., Ph.D. (University of Kentucky), Associate Professor of Political Science, 1994, 1999.

Siebenmorgen, Terrence J. – B.S.Ag.E. (University of Arkansas), M.S.Ag.E. (Purdue University), Ph.D. (University of Nebraska), P.E., Professor of Food Science, 1984, 1999; Adjunct Professor of Chemical Engineering, 2004.

Silano, Alfred L. – B.S. (Rutgers, the State University of New Jersey), M.S. (Newark College of Engineering), Ph.D. (Rutgers, the State University of New Jersey), Research Professor of Chemical Engineering, 1987; Adjunct Professor of Chemical Engineering, 2004.

Silberman, Jeffrey D. – B.S. (Southern Methodist University), M.S. (Louisiana State University Medical Center), Ph.D. (University of Missouri), Assistant Professor of Biological Sciences, 2004.

Simpson, Ethel Chachere – B.A. (University of Southwestern Louisiana at Lafayette), M.A., Ph.D. (University of Arkansas), Librarian/Professor, 1983, 1996.

Singh, Surendra P. – B.Sc., M.Sc. (Banaras Hindu University, India), M.A., Ph.D. (University of Rochester), Professor of Physics, 1982, 1992.

Slavik, Michael F. – B.S. (Drake University), M.S., Ph.D. (Iowa State University), Professor of Poultry Science, 1977, 1995.

Sloan, David Andrew – B.A. (University of California), Ph.D. (University of California-Santa Barbara), Associate Professor of History, 1967, 1978.

Smith, Bob – B.S. (St. John's University, New York), M.S., Ph.D. (University of Michigan), Professor of Chemistry and Biochemistry, 2000.

Smith, Brent L. – B.A. (Ouachita Baptist University), M.A., Ph.D. (Purdue University), Professor of Sociology, 2003.

Smith, Kathleen R. – B.S. (The Ohio State University), M.S. (University of Arkansas), Instructor of Human Environmental Science, 1999.

Smith, Kimberly – B.S. (Tufts University), M.S. (University of Arkansas), Ph.D. (Utah State University), Professor of Biological Sciences, 1981, 1992.

Smith, Korydon H. – B.P.S., M.Arch. (State University of New York - Buffalo), Assistant Professor of Architecture, 2002.

Smith, Lindsay A. – B.A., M.A. (University of West Florida), J.D. (University of Arkansas), Research Assistant Professor of Communication, 2002.

Smith, Rodney E. – B.S. (University of Oregon), M.S. (Naval Postgraduate School), Ph.D. (University of California, Irvine), C.P.A., Assistant Professor of Accounting, 2000.

Smith, Tom E.C. – B.S.E., M.Ed. (University of Texas Tech University), Professor in Curriculum and Instruction, 2002.

Smith-Blair, Nan – B.S.N. (Texas Christian University), M.S.N. (Northwestern State University, Louisiana), Ph.D. (University of Kansas), Assistant Professor in Nursing, 1993, 2001.

Smith-Nix, Angela R. – B.S.E., M.S.E. (Arkansas State University), Ph.D. (University of Arkansas), Clinical Assistant Professor in Kinesiology, 1990, 2000.

Snyder, Tamara – B.S. (University of California - Los Angeles), M.S. (University of Arkansas), Assistant Professor of Physics, 2001.

Spicer, Thomas O. III – B.S.Ch.E., M.S.Ch.E., Ph.D. (University of Arkansas), Professor of Chemical Engineering, 1984, 1996.

Spiegel, Frederick W. – B.A. (Drew University), Ph.D. (University of North Carolina), Associate Professor of Biological Sciences, 1982, 1988.

Srivastava, Vibha – B.S. (D.E.I. University), M.S. (Govind Ballabh Pant University of Agriculture and Technology), Ph.D. (Jawaharlal Nehru University, New Delhi), Assistant Professor of Plant Tissue Culture and Genetics, 2001.

Stapp, Robert – B.S.B.A. (Oklahoma City University), M.S., Ph.D. (Oklahoma State University), Clinical Associate Professor of Economics, 1995.

Starks, Tricia – B.A. (University of Missouri), M.A., Ph.D. (Ohio State University), Assistant Professor of History, 2000.

Starling, A. Gregory – B.S.E.E., M.S., Ph.D. (University of Arkansas), Professor of Computer Science and Computer Engineering, 1985.

Stassen, Robert – B.S. (University of Minnesota), M.B.A., Ph.D. (University of Nebraska), Associate Professor of Marketing and Logistics, 1989, 1995.

Steelman, C. Dayton – B.S., M.S., Ph.D. (Oklahoma State University), Professor of Entomology, 1983.

Stegman, Charles E. – B.A. (St. Mary's College), M.A., Ph.D. (University of Missouri-Kansas City), Professor of Educational Foundations, 1995.

Steinmetz, Donald C. – B.A. (Cornell University), M.S. (University of Connecticut), Ph.D. (Cornell University), Professor of Entomology, 1989, 1999.

Stephen, Frederick M. – B.A. (San Jose State University), Ph.D. (University of California, Berkeley), University Professor of Entomology, 1974, 1992.

Stephenson, Steven – B.S. (Lynchburg College), M.S., Ph.D. (Virginia Polytechnic Institute and State University), Research Professor of Biological Sciences, 2003.

Stewart, Gay B. – B.S. (University of Arizona), M.S., Ph.D. (University of Illinois - Urbana-Champaign), Associate Professor of Physics, 1994, 2000.

Stewart, James McDonald – B.S., Ph.D. (Oklahoma State University), Professor of Crop, Soil, and Environmental Sciences and Ben J. Altheimer Chair for Cotton Research and Development, 1986.

Stockdell, Richard – B.S. (Northwest Missouri State University), M.A. (Kansas State University), Associate Professor of Journalism, 1980, 1986.

Story, John David – B.A. (University of Texas-Austin), M.S., Ph.D. (University of Arkansas), Adjunct Associate Professor of Poultry Science, 1985.

Stripling, Jeffrey S. – B.A. (Stanford University), Ph.D. (University of Colorado), Professor of Psychology, 1976, 1990.

Swartwood, Larry D. – B.A. (Southern Colorado State College), M.F.A. (University of Colorado), Visiting Assistant Professor of Art, 1993.

Szakasits, Monica – B.A. (Sam Houston State University), J.D. (Baylor University), M.S.L.I.S. (University of Texas), Associate Librarian, Law, 2004.

Szalanski, Allen L. – B.S.A. (University of Manitoba), M.S. (Kansas State University), Ph.D. (University of Nebraska), Assistant Professor of Entomology, 2001.

Tacker, Phil – B.S., M.S. (University of Arkansas), Research Associate Professor of Biological and Agricultural Engineering, 1995

Takigiku, Susan K. – B.A. (University of Colorado), M.S. (Miami University), Ph.D. (Purdue University), Assistant Professor of Human Environmental Sciences, 2001.

Talbert, Ronald E. – B.S., M.S., Ph.D. (University of Missouri), University Professor of Crop, Soil, and Environmental Sciences, 1963, 1990.

Talburt, Dwight E. – B.S. (Arkansas State College), M.S., Ph.D. (University of Arkansas), Professor of Biological Sciences, 1969, 1976.

Tarvin, Timothy R. – B.A. (Hendrix College), J.D. (University of Arkansas), Clinical Associate Professor of Law, 1993, 2002.

Teague, Tina G. – B.S., M.S. (University of Arkansas), Ph.D. (Texas A&M University), Adjunct Professor of Entomology, 1995.

Teague, William Ricky – B.B.A. (Memphis State University), M.S. (Webster University), Visiting Assistant Professor of Operations Management, 2002.

TeBeest, David O. – B.S. (Wisconsin State University), M.S., Ph.D. (University of Wisconsin), University Professor of Plant Pathology, 1975, 2003.

Terry, Laura M. – B.S. in Environmental Design (Auburn University), M.F.A. in Painting (Savannah College of Art and Design), Assistant Professor of Architecture, 1998, 2002.

Thibado, Paul M. – B.S. (San Diego State University), Ph.D. (University of Pennsylvania), Associate Professor of Physics, 1996, 2000.

Thoma, Gregory J. – B.S.Ch.E., M.S.Ch.E. (University of Arkansas), Ph.D. (Louisiana State University), Associate Professor of Chemical Engineering, 1993, 1999.

Thomas, Deborah W. – B.A. (Centenary College), J.D. (Vanderbilt University), M.S.A. (University of Arkansas), C.P.A., Associate Professor of Accounting and the Nolan E. Williams Lectureship in Accounting, 1983, 1993.

Thompson, Craig – B.S. (Stanford University), M.S., Ph.D. (The University of Texas at Austin), Acxiom Database Chair in Engineering and Professor of Computer Science and Computer Engineering, 2003.

Thompson, Dale R. – B.S., M.S. (Mississippi State University), Ph.D. (North Carolina State University), Assistant Professor of Computer Science and Computer Engineering, 2000.

Thompson, Lynne – B.S. (Kansas State University), M.S., Ph.D. (University of Minnesota), Adjunct Professor of Entomology, 1992.

Thompson, Timothy F. – B.M. (University of North Carolina, Chapel Hill), M.M. (University of Wisconsin), Professor of Music, 1979, 2002.

Thomsen, Michael R. – B.S., M.S. (Utah State University), Ph.D. (University of Minnesota), Associate Professor of Agricultural Economics and Agribusiness, 1998, 2004.

Tingle, Christopher H. – B.S., M.S. (Mississippi State University), Ph.D. (Texas A&M University), Research Assistant Professor of Crop, Soil, and Environmental Sciences, 2001.

Tjani, Maria – B.S. (University of Ionina, Greece), M.S. (Purdue University), Ph.D. (Michigan State University), Instructor, 2001.

University Faculty

Ton, Gary M. – B.S. (University of Mississippi), M.S. (University of Arkansas), Visiting Assistant Professor of Operations Management, 2000.

Toner, Mary Ann – B.S., M.S. (University of Wyoming), Ph.D. (University of Oklahoma), Associate Professor of Communication Disorders, 1990, 1996.

Tooley, Melissa S. – B.S.C.E. (Louisiana Tech University), M.S.C.E., Ph.D. (University of Arkansas), Research Assistant Professor of Civil Engineering, 1998.

Troxel, Tom R. – B.S. (West Texas State University), M.S., Ph.D. (University of Illinois), Adjunct Professor of Animal Science, 1993.

Tsai, Shih-Shan Henry – B.A. (National Taiwan Normal University), M.A., Ph.D. (University of Oregon), Professor of History, 1971, 1983.

Tucker, Janet G. – A.B., M.A., Ph.D. (Indiana University), Professor of Foreign Languages (Russian), 1990, 2002.

Tullis, Jason – B.S. (Brigham Young University), M.S., Ph.D. (University of South Carolina), Assistant Professor of Geography, 2004.

Tung, Chao-Hung S. – B.S.M.E. (National Taiwan University), M.S.M.E., Ph.D. (University of Houston), Associate Professor of Mechanical Engineering, 2000, 2005.

Turner, Lori W. – B.S. (Florida State University), M.S. (Florida International University), M.S. (Florida State University), Ph.D. (University of Alabama), Associate Professor of Health Science, 1997, 2002.

Turpin, Jim L. – B.S.Ch.E., M.S.Ch.E. (University of Arkansas), Ph.D. (University of Oklahoma), P.E., University Professor of Chemical Engineering, 1960, 1995.

Tyndall, C. Patrick – B.A. (Wabash College), M.A. (Miami University at Ohio), Ph.D. (University of Texas), Assistant Professor of Drama, 1999, 2002.

Ulrich, Richard K. – B.S.Ch.E. (University of Texas), M.S.Ch.E. (University of Illinois), Ph.D. (University of Texas, Austin), P.E., Professor of Chemical Engineering, 1987, 1995.

VanDeVender, Karl – B.S., M.S. (Mississippi State University), Ph.D. (University of Arkansas), Professor of Biological and Agricultural Engineering, 1995, 2004.

Vann, Stephen R. – B.S., M.S. (Mississippi State University), Ph.D. (Texas A&M University), Adjunct Assistant Professor of Plant Pathology, 2002.

Varadan, Vasundara – B.Sc., M.Sc. (University of Kerala, Cochin, India), M.S., Ph.D (University of Illinois), Distinguished Professor of Electrical Engineering, 2005.

Vardiman, John Phillip – B.S. (Southeast Missouri State University), M.S. (Eastern Kentucky University), Instructor of Kinesiology, 2000, 2002.

Verma, Lalit R. – B. Tech. (J.N. Agricultural University, Jabalpur, India), M.S. (Montana State University), Ph.D. (The University of Nebraska), P.E., Professor of Biological and Agricultural Engineering, 2000.

Vicic, David A. – B.A. (The Johns Hopkins University), M.S., Ph.D. (University of Rochester), Assistant Professor of Chemistry, 2002.

Viswaneth, Vinkatesh – B.E. (Bharathiar University, India), Ph.D. (University of Minnesota), Professor and the George and Boyle Billingsley Endowed Chair in Information Systems, 2004.

Vitale, Davide – Diploma in Architecture (University of Rome), M.Arch. (Harvard Graduate School of Design), Professor of Architecture, 1985, 1997.

Vories, Earl D. – B.S.Ag.E., M.S.Ag.E. (University of Arkansas), Ph.D. (University of Tennessee), Adjunct Professor of Biological and Agricultural Engineering, 1988, 2004.

Vyas, Reeta – B.S., M.S. (Banaras Hindu University), Ph.D. (State University of New York at Buffalo), Professor of Physics, 1989, 2002.

Wales, Eric J. – B.S. (Cornell University), Ph.D. (Michigan State University), Professor of Agricultural Economics and Agribusiness; L.C. Carter Endowed Chair, 1980, 2002.

Walker, James Martin – B.S., M.S. (Louisiana Polytechnic Institute), Ph.D. (University of Colorado), Professor of Biological Sciences, 1965, 1976.

Walker, Mary A. – B.A. (University of Arkansas), M.L.S. (University of North Texas), Assistant Professor and Assistant Librarian, 2001.

Wall, Jerry D. – B. of Arch.Engr. (Oklahoma State University), S.M. (Massachusetts Institute of Technology), Ph.D. (University of Arkansas), Professor of Architecture, 1973, 1979.

Wallar, Matthew – B.S. (University of Missouri – Columbia), M.S., Ph.D. (Pennsylvania State University), Associate Professor of Marketing and Logistics and the Oren Harris Chair in Logistics, 2002.

Wang, Gangqiang – M.S. (Chongqing University), Ph.D. (Tsing Rue University), Assistant Professor of Electrical Engineering, 2001

Wang, Ya-Jane – B.S. (National Taiwan University), M.S. (University of Minnesota-Twin Cities), Ph.D. (Iowa State University), Associate Professor of Food Science, 1999, 2004.

Ward, Barry M. – B.A. Mod., M.Sc. (Trinity College, Dublin), Ph.D. (Rutgers University), Assistant Professor of Philosophy, 2002.

Wardlow, George W. – B.S., M.Ed. (University of Missouri), Ph.D. (The Ohio State University), Professor of Agricultural and Extension Education, 1992, 1998.

Warnock, Mary M. – B.A. (Texas Christian University), M.S., Ph.D. (Texas Woman’s University), Professor of Human Environmental Sciences, 1976, 1996.

Warren, Kimberly – B.S. (Virginia Polytechnic Institute and State University), M.S., Ph.D. (North Carolina State University), Assistant Professor of Civil Engineering, 2002.

Warren, W. Dale – B.S. (Austin Peay State University), M.M. (University of Kentucky), Associate Professor of Music, 1991.

Watkins, Bradley – B.S., M.S. (University of Arkansas), Ph.D. (Oklahoma State University), Research Assistant Professor of Agricultural Economics, 2002.

Watkins, Patsy – B.A., M.A. (University of Texas, Austin), Ph.D. (University of Iowa), Associate Professor of Journalism, 1984, 1992.

Watson, Douglas – B.S. (Gallaudet College), M.S. (Southern Illinois University), Ph.D. (Florida State University), Professor of Rehabilitation Education, 1982, 1984.

Webb, Jennifer D. – B.S., M.S. (University of Tennessee), Ph.D. (Oklahoma State University), Assistant Professor of Interior Design, 1999.

West, Charles P. – B.S., M.S. (University of Minnesota), Ph.D. (Iowa State University), Professor of Crop, Soil, and Environmental Sciences, 1984, 1995.

West, Elliott – B.J. (University of Texas, Austin), M.A., Ph.D. (University of Colorado), Distinguished Professor of History, 1979, 2000.

West, Leon – B.S. (University of Arkansas), Ph.D. (Florida State University), P.E., Professor of Mechanical Engineering, 1982, 1990.

West, Timothy – B.S.B.A., M.Acc.(University of Missouri), Ph.D. (University of Tennessee), Associate Professor and the BKD Lectureship in Accounting, 2002.

Whan, Mary Margaret (Peggy) – B.S.Ed. (Northwest Missouri State University), M.S. (University of Nebraska), Ph.D. (Purdue University), Professor of Human Environmental Sciences, 1988.

White, Donald D., Jr. – B.S.B.A., M.A. (Central Missouri State College), Ph.D. (University of Nebraska), Professor of Management, 1971, 1981.

White, John A. – B.S.I.E. (University of Arkansas), M.S.I.E. (Virginia Polytechnic Institute), Ph.D. (The Ohio State University), Chancellor and Distinguished Professor of Industrial Engineering, 1997.

Wicks, Jan LeBlanc – B.A. (University of Southwest Louisiana), M.A., Ph.D. (Michigan State University), Associate Professor of Journalism, 1994, 2000.

Wideman, Robert F. – B.A. (University of Delaware), M.S., Ph.D. (University of Connecticut), Professor of Poultry Science, 1993.

Widick, J. Darell – B.S.A. (University of Tennessee), M.S., Ph.D. (University of Arkansas), Research Assistant Professor of Agronomy, 1982.

Wilke, Stephen B. – B.S. (Middle Tennessee State University), J.D., M.P.A. (University of Memphis), Visiting Assistant Professor of Operations Management, 1996.

Wilkins, Charles L. – B.S. (Chapman College), Ph.D. (University of Oregon), Distinguished Professor of Chemistry and Biochemistry, 1998.

Williams, Brent – B.A. (Austin College), M.S. (University of Texas Southwestern Medical Center - Dallas), Ph.D. (University of Illinois at Urbana-Champaign), Assistant Professor, 2002.

Williams, Doyle Z. – B.S. (Northwestern State University of Louisiana), M.S., Ph.D. (Louisiana State University), C.P.A., Professor of Accounting and Sam M. Walton Leadership Chair, 1993.

Williams, Nathan L. – B.A. (Pennsylvania State University), M.A., Ph.D. (George Mason University), Assistant Professor of Psychology, 2002.

Williams, Patrick G. – B.A. (University of Texas), M.A., Ph.D. (Columbia University), Assistant Professor of History, 2000.

Williams, Rodney – B.S.C.E., M.S.C.E., Ph.D. (University of Arkansas), Adjunct Assistant Professor of Civil Engineering, 2000.

Williams, Stacy – B.S.C.E., M.S.C.E., Ph.D (University of Arkansas), Assistant Professor of Civil Engineering, 2001.

Wilson, C. E., Jr. – B.S.A. (Arkansas State University), M.S., Ph.D. (University of Arkansas), Research Assistant Professor of Agronomy and Extension Rice Specialist, 1993.
Wilson, Darryl D. – B.S.E.E. (Old Dominion University), M.B.A. (Xavier University), Ph.D. (The Ohio State University), Assistant Professor of Information Systems, 2000.

Wimberly, Jim – B.S., M.S. (Louisiana State University), Adjunct Assistant Professor of Biological and Agricultural Engineering, 1999.

Wolf, Duane C. – B.S., M.S. (University of Missouri-Columbia), Ph.D. (University of California, Riverside), University Professor of Crop, Soil, and Environmental Sciences, 1979, 1996.

Worden, Steven K. – B.S., M.A. (Portland State University), Ph.D. (University of Texas, Austin), Associate Professor of Sociology, 1987, 1993.

Xiao, Min – B.S. (Nanjing University), Ph.D. (University of Texas), Professor of Physics, 1990, 1998.

Yang, Song – B.A. (Branch College of Nankai, China), M.A. (Nankai University, China), Ph.D. (University of Minnesota), Assistant Professor of Sociology, 2002.

Yang, Yinong – B.S. (Hangzhou University, P.R. China), M.S. (University of South Florida), Ph.D. (University of Florida), Associate Professor of Plant Pathology, 1997, 2002.

Yazwinski, Thomas Anthony – B.S. (University of Vermont), M.S. (University of Maine), Ph.D. (North Carolina State University), University Professor of Animal Science, 1977, 2004; Adjunct Professor of Poultry Science, 2003.

Ye, Kaiming – B.S., M.S., Ph.D. (East China University of Science and Technology), Assistant Professor of Biological and Agricultural Engineering, 2003.

Yeager, Jr., Milton P. – B.S. (University of Southern Mississippi), M.S. (University of Arkansas), Visiting Assistant Professor of Operations Management, 1989.

Yoes, Janice – B.M. (Drake University), M.M. (University of Tulsa), Associate Professor of Music, 1985, 1991.

Young, Juana R. – B.A. (Texas Tech University), M.L.S. (North Texas State University), Professor and Librarian, 1972, 1984.

Young, Margaret S. – B.S.E.H.E. (University of Arkansas), Instructor in Human Environmental Sciences, 1984, 1999.

Young, Michael – B.A. (Southwest Baptist College), M.Ed. (University of Arkansas), Ph.D. (Texas A&M University), University Professor of Health Science, 1980, 2003.

Yu, Chin – B.S. (Fu-Jen Catholic University, Taiwan), Ph.D. (Florida State University), Professor of Chemistry, 2003.

Zachry, Doy L., Jr. – B.S., M.S. (University of Arkansas), Ph.D. (University of Texas, Austin), Professor of Geology, 1968, 1987.

Zajicek, Anna M. – B.S., M.S. (University of Silesia, Poland), Ph.D. (Virginia Polytechnic Institute and State University), Associate Professor of Sociology, 1994, 2000.

Zeng, Ka – B.A. (Foreign Affairs College, Beijing), M.A. (Virginia Polytechnic Institute and State University), Ph.D. (University of Virginia), Assistant Professor of Political Science, 2000.

Zhengrong, Ryan Tian – B.S. (Fudan University, Shanghai), Ph.D. (University of Connecticut), Assistant Professor of Chemistry and Biochemistry, 2004.

Ziegler, Joseph A. – B.A. (St. Mary’s College), Ph.D. (University of Notre Dame), Professor of Economics, 1973, 1980.

Ziegler, Susan – B.S. (University of Massachusetts-Amherst), Ph.D. (University of Texas), Assistant Professor of Biological Sciences, 1999.

Zou, Min – B.S.A.E., M.S.A.E. (Northwestern Polytechnical University), M.S.M.E., Ph.D. (Georgia Institute of Technology), Assistant Professor of Mechanical Engineering, 2003.
Glossary

**Academic Warning.** A status resulting from unsatisfactory grades. **Act 1052/467.** Section 21 of Arkansas Act 467 of 1989 specifies that all first-time entering freshmen who are enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or developmental courses in English composition, reading, and mathematics on the basis of their scores on specified tests. See Orientation and Registration. **Advance Registration.** A period of time scheduled during a regular (fall or spring) semester that allows currently enrolled students to register for the next regular semester. In addition, advance registration for the summer sessions is scheduled during the spring semester. **Audit.** To take a course without credit. **Adviser.** A faculty member assigned to a student to advise that student on academic matters that include degree requirements and selection of courses. **Class Schedule.** List of courses and sections for a specific semester, including names of instructors; day, hour, and place of class meetings; and detailed registration procedures. Commonly referred to as the “Racing Form.” **College or School.** One of eight major divisions within the University that offers specialized curricula. **Concentration.** A sub-set of a major’s requirements leading to a graduate or bachelor’s degree. **Consent.** A prerequisite that requires the student to obtain approval from the instructor or the department before he or she will be allowed to register for the course. **Corequisite.** A course that must be taken at the same time as the course described. **Course.** A unit of academic instruction. **Course Deficiencies.** Lacking required units of study in high school. See Admission chapter. **Course Load.** The number of semester credit hours a student may schedule in a given term. **Cumulative Grade-Point Average.** An average computed by dividing the total number of grade points earned by the total number of credit hours attempted in all courses for which grades (rather than marks) are given. **Curriculum.** A program of courses comprising the formal requirements for a degree in a particular field of study. **Degree Program.** A complete course of study inclusive of all University, college, and departmental requirements. **Department.** Division of faculty or instruction within a college, such as Department of Accounting within the Sam M. Walton College of Business Administration. **Drop/Add.** Official dropping or adding of courses for which students are registered during specified times as published in the schedule of classes. **Elective.** A course not required but one that a student chooses to take. **Equivalent.** A course allowed in place of a similar course in the same academic discipline. May require approval by an academic dean. **Fees.** Charges, additional to tuition, which cover specific University services, programs, facilities, activities and/or events. See the Fee and Cost Estimates chapter of this catalog for a full list of fees. **Grade Points.** Points per semester hour assigned to a grade (not a mark), indicating numerical value of the grade. The grade-point average indicates overall performance and is computed by dividing the total number of grade points earned by the number of semester hours attempted. **Grade Sanction(s).** A penalty for academic dishonesty. Grade sanctions may consist of either a grade of zero or a failing grade on part or all of a submitted assignment or examination or the lowering of a course grade, or a failing grade. **Hazing.** Any activity that is required of an individual that may cause mental or physical stress and/or embarrassment when in the process of joining or belonging to any organization. **Laboratory.** Descriptive of work other than class work, such as experimentation and practical application. **Lecture.** A class session in which an instructor speaks on a specific topic. **Major.** A main or primary discipline in which a student completes a designated number of courses and hours of credit. **Minor.** A second discipline or area of study in which a student concentrates in addition to the student’s major; each approved minor requires a minimum of 15 hours in a designated discipline. **Noncredit Course.** A course for which no credit is given. (Some credit courses will not count toward degrees.) **Overload.** A course load of more semester hours than a student is normally permitted to schedule in a given period. **Prerequisite.** A course or requirement that must be completed before the term when the described course is taken. **Registrar.** Enrollment at the beginning or prior to the beginning of a semester, including selection of classes and payment of fees and tuition. **Registrar Sanction(s).** A fee paid by all students who register for classes. **Sanction(s).** The penalty for noncompliance to a policy. Usually a response that will redirect the individual or group’s inappropriate behavior, encourage responsible judgment and ethical reasoning, protect the community’s property and rights, and affirm the integrity of the institution’s conduct standards.
Section. A division of a course for instruction. A course may be taught in one or more sections or classes or at different times, depending on enrollment in the course.

Semester Credit Hour. Unit of measure of college work. One semester credit hour is normally equivalent to one hour of class work or from two to six hours of laboratory work per week for a semester.

Student Number. A number given to each student as a permanent identification number for use at the University.

Summer Sessions. Periods of time during the summer when course work is offered. (See the calendar or the summer class schedule for specific times and dates.)

Suspension. A status in which students are not permitted to register for courses for a specified time period.

Syllabus. An outline or summary of the main points of a course of study, lecture, or text.

Transcript. A copy of a student’s academic record, mainly intended for communicating information from one institution to another.

Tuition. The charge for University enrollment and registration, calculated per credit hour each semester. Tuition rates may vary depending on a student’s resident status, undergraduate or graduate standing, and college affiliation. Tuition does not include cost of room and board. Additional charges will apply depending on student status (see entry for Fees).

Undeclared Major. Designation indicating students who have not selected a major.

Undergraduate Study. Work taken toward earning an associate or a baccalaureate degree.

Withdrawal. Official withdrawal from all courses during a semester at the University.

University of Arkansas, Fayetteville
A COURSE DESCRIPTION

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by code. The word “course” refers to a unit of academic instruction. While the word “class” refers to a course scheduled during a semester or summer session with a certain number of prescribed meetings each week. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

The Schedule of Classes lists classes available in a specific semester, along with the instructor of record, time and place the class is being held.

COURSE DESCRIPTION EXPLANATIONS

A course listing is comprised of the following elements, in order:

Course Prefix: This alpha descriptor is the first identifying part of a course. This four-digit code represents the course prefix name. Usually the course prefix will be the same as the department offering the course, occasionally the prefix is one of many different courses offered in a single department. For example, ARAB refers to Arabic courses, which are offered through the department of foreign languages.

Course Number: Each course is designated by a four-digit number. The first digit identifies the level of the course: 1, freshman level; 2, sophomore level; 3 and 4, junior-senior level; 5; 6, and 7, graduate level. Any exceptions to this practice are stated in the course descriptions.

Students desiring admission to courses offered at levels beyond their standing should request the instructor’s permission to enroll. (For definitions of academic standing see Student Standing on page 28.)

The second and third digits of the number identify the course within the department that offers it.

The fourth digit identifies the semester-hour value of the course. Credit for certain courses does not count toward some degrees (see Courses That Do Not Count Toward Degrees on page 27).

Normally, courses meet once each week for 50 minutes for each hour of course credit. Laboratory, drill and other kinds of activity courses typically meet for 50-minute periods per week for each hour of credit.

The letter ‘V’ is used in place of the last digit for those courses in which credit is variable. The minimum and maximum credit hours possible are given in parentheses after the course title.

The first three digits of the number are the same for corequisite courses (for example, the lecture course, and the corequisite lab or drill).

Course Suffix: A suffix to the course number further identifies the specific type of instruction:

D - Drill or Discussion
L - Laboratory
H - Honors Course
E - Honors Drill or Discussion
M - Honors Laboratory

A course with no suffix is a typical lecture course (not an honors course).

Course Title: The title of the course is printed in bold letters.

Course Semester Offering: Also inside the parentheses following the course title are letters indicating which semester the course is normally offered. Cross-check with the Schedule of Classes to determine if a course is being offered. Courses marked (SP) will be offered in the spring, courses marked (FA) will be offered in the fall, courses marked (SU) will be offered in the summer, and courses marked (I or IR) will be offered irregularly.

Course Description: A brief description of the course content and its major emphasis are stated. If the course is cross-listed (also offered under another course number) a “Same As” statement will be included in the description. If the course is eligible to be repeated for degree credit more than once, a statement will appear to indicate the total hours or times a course may be repeated. If no repeated statement is listed, the course may be used for degree credit only once.

Requisites: Requisites are requirements that must be fulfilled either before a course may be taken or at the same time a course is taken. Prerequisites are courses or requirements that must be completed prior to enrolling in a certain course. Courses may have prerequisites from inside and outside the department. It is the student’s responsibility to make sure he/she has completed the proper prerequisites before enrolling in any class.

Courses listed as corequisite are to be taken in the same semester as the course desired.

Pre- or co-requisites are requirements that if not taken prior to enrolling in a course, must be taken during the same semester as the course.

Students may not enroll in courses for which they do not have the necessary requisites. Students who are in doubt concerning their eligibility for entry into specific courses should consult their academic adviser. Students may be dropped from courses for which they do not have the necessary requisites.
standing, WOCE 3016 and completion of all junior-level BA core and completion of junior-level accounting courses with a grade of "C" or better.

ACCT5413 Accounting Issues for Restructurings (Fa) Integrated course which examines the financial reporting, tax, managerial, systems and auditing aspects of major corporate restructurings. Focuses on events such as mergers, acquisitions, spinoffs, reorganizations and downsizings. Prerequisite: ACCT 4753 with a grade of "C" or better.

ACCT5433 Fraud Prevention and Detection (Fa) An examination of various aspects of fraud prevention and detection, including the sociology of fraud, elements of fraud, types of fraud involving accounting information, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. Prerequisites: MBLA 5112 and MBLA 5122 and ISYS 2623 with a grade of "C" or better.

ACCT5443 Asset Management (Sp) Acquisition and management of inventories, tangible capital assets, and intangible assets. Included are issues such as acquisition processes, internal controls, systems requirements, accounting measurements, inventory models, re-engineering, capital budgeting, and tax implications. Prerequisites: MBAU 5112 and MBAU 5122 and ISYS 2623 each with a grade of "C" or better.

ACCT5463 Contemporary Accounting Issues (Sp) Cross-functional seminar on emerging issues in accounting. Prerequisites: ACCT 5413 and ACCT 6433.

ACCT549V Special Topics in Accounting (Sp, Su, Fa) (1-3) Seminar in current topics not covered in other courses. Course is taught in separate 1-hour units, each with a different topic and instructor. Students may enroll in one or more units.

ACCT5523 Advanced Accounting Information Systems (Sp) This course describes accounting systems in technical environments. Controls and other technical design considerations are described for the input, processing, storage, and reporting of accounting information. Special topics, such as expert systems and artificial intelligence applications in financial accounting, auditing, and tax, also receive considerable attention. Prerequisite: MBAU 5112 and MBAU 5122 and ISYS 2623 with a grade of "C" or better.

ACCT5873 Advanced Taxation (Fa) A review of the more complex issues focusing on the tax problems encountered by various forms of business entities. Prerequisite: ACCT 3843 or equivalent with a grade of "C" or better.

ACCT5883 Individual Tax Planning (Sp) A review of the financial planning opportunities available to individuals, focusing on tax implications of personal business decisions. Prerequisites: MBAU 5112 and MBAU 5122 and ISYS 2623 with a grade of "C" or better or ACCT 3843 with a grade of "C" or better.

ACCT5993 Assurance Services (Fa) The expression of assurance on financial statements and other forms of information. Standards of practice are discussed. Includes risk assessment, evidence gathering, and reporting. Prerequisite: ACCT 4753 and ACCT 4963 each with a grade of "C" or better.

ACCT6011 Graduate Colloquium (Sp, Fa) Presentations and research papers and proposals.

ACCT6033 Accounting Research Seminar I (Fa) First course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 5433.

ACCT6033 Accounting Research Seminar V (Sp, Su, Fa) Fifth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisites: ACCT 6033.

ACCT700V Doctoral Dissertation (Sp, Su, Fa) (1-6) Prerequisite: candidacy.

(ADED) ADULT EDUCATION

ADED5103 Learner in Adult Education (Sp, Su, Fa) The learner in adult education programs is examined from young adulthood to the adult learner. Focuses is given to understanding the effect this knowledge has on the teaching-learning process in adult education and how adult education programs are designed to serve the uniqueness demanded by adult learners.

ADED5113 Adult Learner: The Later Years (Sp, Su, Fa) Directed toward people who are most likely to interact with older adults in a learner setting. Emphasis is on understanding the educational needs, wants, and characteristics of older learners so that appealing, valuable, and effective instruction can be developed.

ADED5123 Nontraditional Student (Sp, Su, Fa) An overview of activities that could ultimately promote greater access and success for adult learners with higher education.

ADED5203 ABE/GED/ESL (Sp, Su, Fa) An introductory course to teaching adults at the Adult Basic Education (ABE), General Education Development (GED), or High School Equivalency, and English as a Second Language (ESL) levels. Will address instructional needs assessment, curriculum development and evaluation, and techniques of teaching basic skills in various settings including public schools, vocational-technical schools, technical institutes, colleges, community organizations, and the workplace.

ADED5213 Teaching Reading to Adults (Sp, Su, Fa) A practically-oriented course. Covers reading materials, diagnostic-prescriptive reading instruction and will include the following 3 main components: the adult as a learner; assessing reading needs in adult basic education; and developing reading skills for the adult learner.

ADED5223 Teaching Disabled Adults (Sp, Su, Fa) A survey of the diversity of adult learners comprising that population described as educationally disadvantaged. Consideration given to the various physical, mental, social, and economic factors which contribute to the uniqueness of this body of individual differing abilities.

ADED5303 Contemporary Issues in Adult Education (Sp, Su, Fa) Examines issues of methodology, theories, materials, and programming currently emerging in the field of adult education. Discussion focus upon timely topics as they appear in the professional publications.

ADED5313 The Change Process in Adult Education (Fa) Processes available for changing adult behavior in both formal and informal situations. Emphasis on adult education and school systems such as curriculum change.

ADED5323 Foundations of Adult Education (Sp, Su, Fa) History of the adult education movement in America, characteristics, interests, abilities, and educational needs of adults; the role of the public school in adult education; methods and techniques for adult classes.

ADED560V Workshop (Sp, Su, Fa) (1-18)

ADED574V Internship (Sp, Su, Fa) (1-18)

ADED998V Seminar (Sp, Su, Fa) (1-18)

ADED700V Doctoral Dissertation (Sp, Su, Fa) (1-18)

(AERO) AIR FORCE ROTC

AERO2001 The Evolution of Air and Space Power I (Fa) A historical survey of air and space power, from the first balloons and dirigibles to the space-age global positioning systems of the Persian Gulf War. Historical examples illustrate the development of Air Force capabilities and missions. Additional topics: Principles of War and Tenets of Air and Space Power. LLAB mandatory for cadets. Corequisite: Lab component.

AERO2002 The Evolution of Air and Space Power II (Sp) A historical survey of air and space power, from the first balloons and dirigibles to the space-age global positioning systems of the Persian Gulf War. Historical examples illustrate the development of Air Force capabilities and missions. Additional topics: Principles of War and Tenets of Air and Space Power. LLAB mandatory for cadets. Corequisite: Lab component.

AERO3011 Air Force Leadership Studies I (Sp) A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations. Corequisite: Lab component.

AERO3023 Air Force Leadership Studies II (Sp) A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations. Corequisite: Lab component.

AERO4013 National Security Affairs and Preparation for Active Duty I (Fa) Examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Communication skills are honed within this structure.

AERO4023 National Security Affairs and Preparation for Active Duty II (Sp) A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations. Corequisite: Lab component.

AFLS1011 Honors Orientation (Fa) The course will serve as an introduction to the basic information and requirements of the AFS Honors Program. The course is available to all students, but is required for students in the honors program. Topics covered will include an orientation to the honors program, course requirements, research and creative activity opportunities, and written and oral communication exercises. Recitation 3 hours per week for the first 5 weeks of the semester. (Syllabus AFS 5111)

AFLS1011 Freshman Orientation (Irregular) AFLS102VH Honors Special Topics for Freshmen (Irregular) (1-6) Topics not covered in other courses or in fall and spring courses of a particular year. Used primarily for the program for Beginning Scholars and the Honors Program.

(AFLS) AGRICULTURAL, FOOD AND LIFE SCIENCES

AFS1011 Honors Orientation (Fa) The course will serve as an introduction to the basic information and requirements of the AFS Honors Program. The course is available to all students, but is required for students in the honors program. Topics covered will include an orientation to the honors program, course requirements, research and creative activity opportunities, and written and oral communication exercises. Recitation 3 hours per week for the first 5 weeks of the semester. (Syllabus AFS 5111)
Course Descriptions

**AFLS2003 Introduction to Global Agricultural, Food and Life Sciences** (Su) An introductory approach focusing on global environmental resources, animal and crop production, food safety and nutrition, agricultural marketing and merchandising, trade, agricultural policies and conflict. Introduction to data visualization, law and information systems in various geographic regions. Lecture 3 hours per week.

**AFLS300V Study Abroad** (Sp-Fa, Fu) (2-4) Open to students with prior study abroad in officially sanctioned programs. May be repeated for 24 hours. Study abroad may include summer internships, special topics, coursework abroad and/or directed individual or group study abroad trips of one or more semesters. May be repeated to a maximum of 36 hours per week.

**AFLS3211H Honors Professional Development** (Sp) Professional networking, communication skills, and group dynamics as they relate to research, teaching, and extension. One hour per week. 3 hours per week for 3 weeks.

**AFLS400VH Honors Thesis** (Sp, Fa) (1-6) Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course.

**AFLS4021 Internship for Ambassadors** (Sp, Fa) Practical experience gained through group dynamics, communication, planning and implementing collegiate wide activities. Must be selected as a college Ambassador before enrolling.

**AGEC**

**AGEC1103 Principles of Agricultural Microeconomics** (Sp, Fa) Introduction to agricultural economics including an understanding of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Pre- or Corequisite: MATH 1203.

**AGEC2103 Principles of Agriculture Management** (Sp, Fa) Applications of economics principles to problems of agricultural production, distribution, and income, including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Pre- or Corequisite: MATH 1203. (Same as AGEC 2103H)

**AGEC2143 Agribusiness Financial Records** (Sp, Fa) Principles of small agricultural business management and accounting. Course is taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Prerequisites: AGEC 2003 or equivalent and AGEC 1103 or equivalent.

**AGEC2303 Introduction to Agribusiness** (Sp, Fa) Introduction to agribusiness issues as they relate to the food processing, marketing, wholesale and retail sectors of the agriculture industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023.

**AGEC2403 Quantitative Tools for Agribusiness** (Fa) Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisites: AGEC 1103 and MATH 2053.

**AGEC3303 Food and Agricultural Marketing** (Fa) Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food marketing system; and the role of the marketing mix in agricultural marketing topics. Prerequisites: MATH 1203 and (AGEC 1103 or AGEC 2023).

**AGEC3313 Agribusiness Sales** (Sp) Principles of professional sales and sales management techniques used in food agribusiness that will develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Prerequisites: AGEC 1103 or AGEC 2103 or Econ 2143 or equivalent.

**AGEC3373 Futures and Options Markets** (Sp) Study markets for futures and options on agricultural commodities and financial markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for the agricultural producer. Emphasis placed on futures market activity and financial market activity. Course prepares students for some of the more common futures and options contracts. Prerequisite: MATH 2043 and or ISYS 1121L.

**AGEC3403 Farm Business Management** (Fa) Application of planning, organizing, and managing the farm operation and the operation of the farm business. Focuses upon agricultural production management; decision-making tools; input/output decisions; budgeting techniques (enterprise, operating, financial); recordkeeping (balance sheet, income statement, investment analysis and risk management. ACCT 2003 and AGME 2903 or ISYS 1121L are recommended as prerequisites. Prerequisite: AGEC 1103 or ECON 2023.

**AGEC3403 Farm Business Management** (Sp) Application of planning, organizing, and managing the farm operation and the operation of the farm business. Focuses upon agricultural production management; decision-making tools; input/output decisions; budgeting techniques (enterprise, operating, financial); recordkeeping (balance sheet, income statement, investment analysis and risk management. ACCT 2003 and AGME 2903 or ISYS 1121L are recommended as prerequisites. Prerequisite: AGEC 1103 or ECON 2023.

**AGEC3413 Principles of Environmental Economics** (Sp) An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Same as ECON 2433)

**AGEC3503 Agricultural Law I** (Sp) Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of selected areas of agricultural law; acquisition and disposal of farmstead; farm tenancies; rights and limitations in the use and ownership of farmstead; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context.

**AGEC3523 Environmental and Natural Resources Law** (Sp, Even Years) Principles of environmental and natural resources law relevant to agriculture, food, and the environment sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other development and regulatory issues relating to agricultural land and natural resources.

**AGEC400V Special Problems** (Sp, Su, Fa) (1-6) Special study and research conducted under the direct supervision of staff members to satisfy the requirements of individual students.

**AGEC401V Internship in Agribusiness** (Irregular) (1-6) A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisites: Junor standing.

**AGEC402V Special Topics** (Irregular) (1-3) Studies of selected topics in agricultural economics not available in other courses.

**AGEC4113 Agricultural Prices and Forecasting** (Sp) Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural economic price analysis. Lecture 2 hours, laboratory 2 hours per week.

**AGEC4124 Agricultural Finance** (Fa) Methods and procedures whereby agricultural crops acquire and utilize funds required for their successful operation. Emphasis is placed upon role of organization and financial planning and consideration is given to an understanding of financial firms serving agriculture. ACCT 2003 and ACCT 2303 are recommended. Prerequisite: (AGEC 1103 or ECON 2023) and MATH 2053 C or MATH 2043 and ISYS 1121L.

**AGEC4143 Agricultural Finance** (Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of organization and financial planning and consideration is given to an understanding of financial firms serving agriculture. ACCT 2003 and ACCT 2303 are recommended. Prerequisite: AGEC 1103 or ECON 2023. (Same as ECON 2433)

**AGEC4163 Agricultural and Rural Development** (Su) Examine agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories and alternative agricultural policies analyzed. Prerequisite: (AGEC 1103 or ECON 2023). (Same as ECON 3433)

**AGEC4303 Agricultural and Environmental Policy** (Sp) Application of welfare criteria and economic analyses to develop policy recommendations for agricultural policy. Prerequisite: ECON 2023.

**AGEC4413 Economics of Environmental Management** (Sp) An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: AGEC 1103 and AGEC 3413. (Same as ECON 3433)

**AGEC4613 Domestic and International Agricultural Policy** (Fa) Agricultural and food policies studied from domestic and international perspectives. Policy analysis examining public policy in terms of rationale, content, and consequences. Economic framework used to assess policies to improve competitive structure, operation, and performance of U.S. and international food and agriculture. Farm, international, public, private, resource, technology, agricultural, consumer, and producer policies analyzed. Prerequisite: (AGEC 1103 and or ECON 2023) and (AGEC 2103 or ECON 2103).

**AGEC500V Special Problems** (Sp, Su, Fa) (1-3) Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing.

**AGEC5011 Seminar** (Sp, Fa) Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedure, data analysis, and presentation of results. Prerequisite: graduate standing.

**AGEC502V Special Topics** (Irregular) (1-3) Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: graduate standing.

**AGEC503V Internship in Agricultural Economics** (Irregular) (1-6) On-the-job application of skills developed in the M.S. program. (Credit/No Credit only)

**AGEC5113 Agricultural Marketing Analysis** (Su) Course prepares students for some of the more common tasks in market analysis as undertaken by professional agricultural economists in industry, government, and academic institutions. Major emphasis is on the analytical procedures and techniques required in short- and long-term outlook for forecasting and projecting supply, demand and prices; and impact of market organization and governmental con- sumer policies analyzed. Prerequisite: (AGEC 1103 and or ECON 2023) and (AGEC 2103 or ECON 2023)

**AGEC5143 Financial Management in Agriculture** (Irregular) Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate farms. Covers the analytical process for financial analysis including financial arithmetic, asset evaluation under risk, and financial analysis and planning using econometric models. Such topics covered include management of current assets, capital structure, financial planning, and capital budgeting in agricultural finance. Prerequisite: graduate standing.

**AGEC5153 The Economics of Agricultural Policy** (Sp) Application of welfare criteria and economic analyses of alternative policies and programs to agricultural development and investments in agriculture. Existing programs and alternative proposals are evaluated for both short and long term viewpoints, under the criterion of resource use and income distribution within agriculture and between agriculture and the rest of the
Economy. Prerequisite: graduate standing.

AGED3503 Agricultural Marketing Theory (Sp) Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: graduate standing.

AGED5404 Quantitative Methods for Agribusiness (Fa) Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with computer image to economic theory. Prerequisite: graduate standing.

AGED5413 Agribusiness Strategy (Fa) Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: graduate standing.

AGED5613 Econometrics I (Fa) Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multivariate linear heteroscedasticity, binary variables and distributed lags. An introduction to the simultaneous systems model is presented. Two 80-minute lecture periods weekly. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite and (AGEC 1103 or ECON 2023) and an introductory statistics course (Same as ECON 5743).

AGED5623 Econometrics II (Sp) Use of economic theory and statistical methods to estimate simultaneous models of an economy. Emphasis given to the problem of identification and the methods of estimating system models. Frontier topics are introduced. Prerequisite: ECON 5533 and ECON 5613 or (Same as AGED 5613). (Same as ECON 5623)

AGED600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate status.

AGED700V Doctoral Dissertation (Sp, Su, Fa) (1-6) Prerequisite: candidacy.

(AGED) AGRICULTURAL EDUCATION

AGED1001 Orientation to Agricultural and Extension Education (Fa) Continuation of AGED 1001. Provides an overview, with attention given to sharing of possible solutions to individual problems. Exploration of anticipated collegiate experiences for departmental majors as well as post-graduation opportunities. Student and faculty interaction, discussion of career and life issues during the last four of the fall semester twice a week. The class also meets once or twice evenings for up to two hours each time.

AGED102V Special Topics for Freshmen (Irregular) (1-2) Topics not covered in other courses or in-depth study of a particular topic. Used primarily with the program for Beginning Scholars and the Honors Program.

AGED1031 Introduction to Early Field Experience (Fa) A thirty hour field experience designed to give prospective agricultural education teachers an opportunity to observe and participate in a variety of school settings. Co-requisite: CIED 1002.

AGED112 Agricultural Youth Organizations (Fa) Survey course of agricultural youth organizations including 4-H, FFA, Grange, and others pertaining to membership, awards programs, benefits, and special recognition programs. Lecture and discussion. Two periods per week.

AGED1331 Methods in Agricultural Education (Irregular) Methods and techniques in teaching agriculture at the secondary level. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Corequisite: Lab component. Prerequisite: Lab component.

AGED1341L Ag Communications Lab (Sp, Fa) Corequisite: AGED 1341

AGED202V Ag Communications (Sp, Fa) An overview of communications in the agricultural, food and life sciences, including newsletter design, slide presentations, newswriting, electronic communication and web publishing. Co-requisite: AGEC 3134L, 3134.

AGED3153 Leadership Development in Agriculture (Sp, Fa) Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. Prerequisite: Junior standing.

AGED3942 Professional Development in Agricultural Communications (Irregular) Overview of professional development and skills needed to succeed in internships and jobs in the field of agricultural communications. Prerequisite: JOUH 1033 and AGML 2903.

AGED4003 Issues in Agriculture (Sp, Fa) Lecture and discussion of contemporary issues and international issues related to agricultural policy, ethics, environment, society, and science. Designed for students with at least six hours of upper division agricultural science courses. Prerequisite: sophomore standing.

AGED400V Special Problems in Agricultural and Extension Education (Sp, Su, Fa) (1-6) Individual study or research for advanced undergraduates in the field of agriculture and extension education. Prerequisite: sophomore standing.

AGED4012 Program Development (Fa) Principles and concepts of leadership, program organization, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133. (Same as AGED 401V, AGED 401VH)

AGED401V Special Topics (Irregular) (1-3) Studies of selected topics in agricultural education not covered in other courses. (Same as AGED 4023)

AGED4143 Electronic Communications in Agriculture (Sp) An overview of communication technology in the agricultural, food and life sciences. Prerequisite: AGEL 3142 and AGEL 3141L.

AGED4243 Publication Production in Agriculture (Irregular) Theory and practice of planning, editing, designing, and producing publications commonly used in agriculture, extension and related industries. Prerequisite: AGME 2903.

AGED4632 Teaching Diverse Populations in Agricultural and Extension Education (Sp) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Prerequisite: Teaching certificate.

AGED475V Internship in Agric Educ (Sp, Su, Fa) (1-6) Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school settings. Emphasis will be on classroom preparation, teaching, and student evaluation. Prerequisite: admission into Clinical Practice.

AGED4843 Methods in Agricultural Laboratories (Sp) Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, monitoring, lecture 2 hours, laboratory 4 hours per week. Prerequisite: AGME 2123.

AGED5001 Seminar (Sp) Presentations and discussion of graduate student research as well as review of current literature and trends by students and faculty. All graduate students will make at least one formal presentation. Prerequisites: admission to Graduate College and approval from the student’s advisor.

AGED5013 Advanced Methods in Agricultural Mechanics (Irregular) Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics.

AGED5031 Ethics in Agricultural and Extension Education (Fa) A study of ethics as applied to problems of professional practice. The focus will be on case studies.

AGED5033 Developing Leadership in Agricultural Organizations (Irregular) Organizational concepts of leadership, administration, organization structures; leadership roles for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: graduate standing.

AGED5053 Philosophy of Agricultural and Extension Education (Irregular) An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: graduate standing.

AGED5074 Program Management Practicum (Sp) AGED501V Special Problems (Sp, Su, Fa) (1-6) Individual investigation and study of Agricultural Education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: graduate standing.

AGED520V Special Topics in Agricultural and Extension Education (Irregular) (1-4) Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: graduate standing.

AGED5463 Research Methodology in the Social Sciences (Odd years, Sp) Logcial structure and the method of science. Basic elements of research design, observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. (Same as AGEC 5013, HUCL 5463)

AGED5473 Interpreting Social Data in Agriculture (Fa) The development of competencies in analyzing, interpreting and reporting the results of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. Prerequisite: AGST 4023 or (EDFD 5393) and AGED 5463 or (HSUC 5463 or HLA 5463 or AGED 5013).

AGED550V College Teaching in Agriculture and Related Disciplines (Irregular) (1-3) for students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing college-level courses.

AGED575V Internship in Agricultural Education (Sp, Fa) (1-6) Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school settings. Emphasis will be on classroom preparation, teaching, and student evaluation.

AGED600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

(AGME) AGRICULTURAL MECHANICS

AGME1611L Fundamentals of Agricultural Systems Technology Laboratory (Sp) Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in AGME 1613, offered in the Fall semester. Corequisite: AGEL 1613. Corequisite: AGEL 1613, prerequisite: MAH 1203.

AGME1613 Fundamentals of Agricultural Systems Technology (Sp) Introduction to basic physical concepts important in agricultural systems technology, including applied mechanics, power and machinery management, structures and electification, and soil and water conservancy. Lecture 3 hours per week, laboratory 3 hours per week. Prerequisite: AGME 1103.

AGME2123 Metals and Welding (Fa) An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component.

AGME2903 Agricultural and Human Environmental Sciences Applications of Microcomputers (Sp, Su) Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural research, production, and home economics. Major emphasis placed on learning to use selected, appropriate software packages. Lecture 2 hours per week, laboratory 2 hours per week. (Same as BAST 2903)

AGME3042 Agricultural Construction Technology (Sp) Principles of building design and construction. Includes site selection calculating structural loads and computerized packages for building design. Safety practices, selection of building materials and determining costs are also included. Lecture is one hour and lab is two hours per week. Prerequisite: MAH 1203 and junior standing.

AGME3101L Small Power Units/Turf Equipment Laboratory (Sp) Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscape industries. Corequisite: AGME 3102. Prerequisite: MAH 1203.

AGME3102 Small Power Units/Turf Equipment (Sp) Principles of operation, adjustment, repair, maintenance, and trouble shooting of small power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: AGME 3101L. Prerequisite: MAH 1203.

AGME3153 Surveying in Agriculture and Forestry (Fa) Formerly AGME 2153 Techniques and procedures normally used in determining areas and char-
acyzing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, and prismatic compass; topographical mapping; and public land surveys. Lecture and laboratory 6 hours per week. Prerequisite: MATH 1203.

AGME3713 Electricity in Agriculture (Fa) Principles of electricity: wiring of homes, farmsteads, and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 6 hours, laboratory 2 hours per week. Corequisite: Lab component.

AGME400V Special Problems (Fa, Su, Fa) 1-6 Individual research or study in electricity, irrigation, farm power, machinery, or buildings. Prerequisite: senior standing.

AGME4011 Senior Seminar (Irregular) For agricultural education, communication and technology majors. Covers how to prepare and present a report on a current topic, job opportunities, and professionalism. Prerequisite: senior standing.

AGME402V Special Topics in Agricultural Mechanization (Irregular) Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization.

AGME4203 Mechanized Systems Management (Sp, Su, Fa) Selection, sizing, and operating principles of agricultural systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: Lab component.

AGME4973 Irrigation (Sp, Su, Fa) Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: Lab component.

AGST100V Open Course (Irregular) Open course.

(AGST) AGRICULTURAL STATISTICS

AGST140V Special Problems (Sp, Fa) 1-6 Work on special problems of agricultural statistics or related areas.

AGST4011 SAS Programming for Agricultural Sciences (Sp, Fa) An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach.

AGST4023 Principles of Experimentation (Sp, Fa) Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. Prerequisite: MAH 1203 or higher level.

AGST500V Special Problems (Sp, Su, Fa) 1-6 Individual special problems in some area of statistics applicable to the agricultural, food, environmental, and life sciences not covered in other courses or a broader-based study of special topics in agricultural statistics.

AGST5041 Environmental Design (Sp) Types of experimental design for problems of agricultural research. Prerequisite: Agricultural Statistics or equivalent.

AGST523L Applied Regression Analysis for Agricultural Sciences (Fa) Analysis of agricultural experiments which contain quantitative factors through modern statistical methods. Prerequisite: STAT 5213.

AGST5803 Case Studies in Biometry (Sp) Nonstandard statistical problems arising in the agricultural, food, environmental, and life sciences. Prerequisites: STAT 5113 and STAT 5313 and either (AGST 5014 or AGST 5015L) or STAT 4373.

AGST591L Statistical Consulting Process (Sp) Examines the components of statistical consulting with emphasis on the interpretation of statistical results.

AGST5913 Statistical Consulting Practicum (Fa) Supervised statistical consulting. Prerequisite: STAT 5313 and AGST 5901 and either (AGST 5014 or STAT 4373).

(AIST) ASIAN STUDIES

AIST4003H Honors Asian Studies Colloquium (Fa) An interdisciplinary colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: sophomore standing. (Same as AIST 4003)

AIST4004H Asian Studies Colloquium (Fa) An interdisciplinary colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: sophomore standing.

AIST4013 Language and Society of Japan (Fa) The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and customs of the Japanese people as a social group, or comparison purposes, this course may be taken by a student proficient in American language and culture. Proficiency in Japanese not required. Prerequisite: Junior standing. (Same as CMM 4313, JUCL 4313)

(AMST) AMERICAN STUDIES

AMST2003 Introduction to American Studies (Sp) Introduction to American Studies as an interdisciplinary field of study, examination of a selected topic from various methodological perspectives.

AMSC101L Introductory to Animal Sciences Laboratory (Fa) Study of animals used in production, processing, and management in animal agriculture. Identification, selection, and breeding livestock, meat, and milk. Laboratory 3 hours per week. Corequisite: AMSC 101.

AMSC132 Introductory Animal Sciences (Sp) Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, growth and development, physiology, nutrition, animal health, and animal behavior. Course will meet M, T, W, and H for the first 8 weeks of the fall semester.

AMSC1041 Introduction to Companion Animal Industry (Sp) The importance of companion animals and their allied industries will be discussed. Application of scientific principles to the care and management of companion animals, specifically dogs, cats, and horses, will be emphasized. Course will meet on T and R during the second eight weeks of the fall semester. Prerequisite: AMSC 102.

AMSC1051 Introduction to the Livestock Industry (Fa) The importance of livestock and their allied industries will be discussed. Application of scientific principles to the care and management of livestock, specifically beef and dairy cattle, swine, sheep, and goats will be emphasized. Course will meet on M and W during the second eight weeks. Prerequisite: AMSC 103.

AMSC2030 Introduction to Equine Industry (Sp) Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership.

AMSC2213 Behavior of Domestic Animals (Fa) Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals. Prerequisite: AMSC 2252L.

AMSC2252L Introduction to Stock and Meat Evaluation (Sp) Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine. Prerequisite: AMSC 103.

AMSC2254 Equine Behavior and Training (Fa) Psychology and ethology of equine social behavior and how it pertains to learning patterns. Application of behavioral principles and general training techniques to achieve safe and effective training for the horse and trainer. Lecture two hours and laboratory six hours per week.

AMSC2282 Introduction to Animal Management (Fa) Principles of companion animal management, primarily dogs and cats. Lectures and demonstrations will address husbandry, behavior, nutrition, health, reproduction and selection of dogs and cats as companions.

AMSC2781 Career Preparation and Development (Fa) The importance of preparing for a career in the animal sciences and industries will be covered.

AMSC3003 Applied Animal Physiology (Fa) The economically important parasites of domestic animals with emphasis on their host relationships and management considerations. Prerequisite: 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: AMSC 103.

AMSC3013 Parasitisms of Domesticated Non-Herbivores (Sp) Course will provide applied instruction and appreciation for the parasitology of our domesticated swine, chickens, turkeys, dogs and cats. Prerequisite: AMSC 3003.

AMSC3032 Animal Physiology I (Fa) Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and function of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1074. (Same as POSC 3032)

AMSC3042 Animal Physiology II (Sp) Fundamental aspects of renal, respiratory, digestive, and endocrine physiology will be covered. The normal structure and function of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: AMSC 3032 or POSC 3032. (Same as POSC 3032)

AMSC3123 Principles of Genetics (Fa) Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and BIOL 1544L and MATH 1203. (Same as POSC 3123)

AMSC3133 Animal Breeding and Genetics (Sp) Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Prerequisite: AMSC 103.

AMSC3143 Principles of Animal Nutrition (Sp) Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 2 hours per week. Prerequisite: CHEM 1074 and CHEM 1071.

AMSC3151L Applied Animal Nutrition Laboratory (Sp) Practical approach to animal nutrition; use of various methods of feedstuff evaluation and ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: AMSC 3151L.

AMSC3282 Livestock Judging and Selection (Fa) Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisites: AMSC 1032 or AMSC 2252L.

AMSC3291 Livestock Junior Judging Team Activity (Sp) Training for membership on judging teams. Prerequisite: AMSC 2252L.

AMSC3333 Diseases of Livestock (Sp, Fa) Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Lecture 3 hours per week. Prerequisite: AMSC 3032 and AMSC 3042 and BIOL 2013 and BIOL 2011L.

AMSC3433 Fundamentals of Reproductive Physiology (Fa) Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Prerequisite: AMSC 1032 and BIOL 1543.

AMSC3481 Artificial Insemination of Cattle and Swine (Sp) Experience in artificial insemination of cattle and swine, including semen handling, estrus synchronization and detection, and insemination technique. Laboratory 4 hours per week for 8 weeks. Prerequisite: AMSC 2252L. Offered the second 8 weeks of the Spring semester. Prerequisite: AMSC 3483.

AMSC3613 Meat Science (Fa) The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603.

AMSC3691 Meats Judging (Sp) Training in judging meat based on federal grading standards. Laboratory 4 hours per week. Prerequisite: AMSC 3613.

AMSC3723 Horse and Livestock Merchandising (Fa, Sp) Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock. Prerequisite: AGEC 2303.
ANSC3822 Equine Law (Odd years, Fall) Horse ownership presents unusual, if not unique, legal issues. This course examines common problems of commercial transactions in horses, tort liability, business structure, environmental law and gaming regulation.

ANSC400V Special Problems (Sp, Su, Fa) (1-6) Special problems in the animal sciences for advanced undergraduate students.

ANSC401V Internship in Animal Sciences (Sp, Su, Fa) (1-6) Supervised work experience with private or governmental organizations; Prerequisite: junior standing.

ANSC410V Special Topics in Animal Sciences (Irregular) (1-4) Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Irregular: Prerequisite: ANSC 1032.

ANSC4252 Cow-Calf Management (Fa, Sp) Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Lecture 1 hour and laboratory 2 hours per week. Prerequisite: ANSC 1032 and ANSC 3143 and ANSC 3123.

ANSC4272 Sheep Production (Odd years, Sp) Purebred and commercial sheep management emphasizing the production of meat and wool in lamb and wool production in Arkansas. Lecture 1 hour, laboratory 2 hours per week. Corequisite: lab component. Prerequisite: ANSC 1032 and ANSC 3143 and ANSC 3123.

ANSC4291 Livestock Senior Judging Team Activity (Fa) Training for membership on judging teams, throughout participation.

ANSC4296 Production System (Sp) Principles of breeding, feeding, and management of dairy cattle will be reviewed, and course will include field trip touring dairy industry. Lecture 1 hour per week and laboratory two hours per week. Prerequisites: ANSC 1032 and ANSC 3143.

ANSC4652 Stocker-Feeder Cattle Management (Fa) Production and management systems for stocker and feedlot cattle including practical applications of forage systems. Economics, management and economics of production of these livestock. Lecture 1 hour per week and laboratory two hours per week. Prerequisites: ANSC 1032 and ANSC 3143 and senior standing.

ANSC500V Special Problems (Sp, Su, Fa) (1-6) Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: graduate standing.

ANSC5123 Advanced Animal Genetics (Even years, Fa) Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123.

ANSC5133 Quantitative Inheritance (Odd years, Sp) Advanced basis of variation and the genetic control of quantitative traits in populations. Lecture 3 hours per week. Prerequisite: ANSC 3133.

ANSC5143 Biochemical Nutrition (Even years, Fa) Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; special differences in regulatory control of tissue metabolism of nutrients. Prerequisites: CHEM 3813. (Same as POSC 5143)

ANSC5152 Protein and Amino Acid Nutrition (Even years, Sp) Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Same as POSC 5152)

ANSC5253 Advanced Livestock Production (Even years, Fa) Comprehensive review of recent advances in the management processes of livestock production. Prerequisite: ANSC 4252 (or ANSC 4263) and ANSC 3133 (or ANSC 3143). ANSC5253 Advanced Hay and Silage Production (Fa) Advanced application of the principles of good hay and silage production. The course includes a detailed review of forage nutritive value followed by an in-depth discussion of the management of witting forage crops, silage biochemistry, enabling characteristics of various forages, silo management, spontaneous heating in hay and silage, dry matter loss, management of stored hay, and changes in forage quality that result from poor conservation of harvested forages. Prerequisites: ANSC 1032 and ANSC 3111L.

ANSC5743L Advanced Analytical Methods in Animal Sciences Laboratory (Fa) Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week.

ANSC5763 Protozoan Parasites of Domestic Livestock and Companion Animals (Even years, Fa) Course topics will include economically and medically important protozoan parasites of domestic livestock and companion animals, with an emphasis on their significance for animal and human health. Lecture/discussion 3 hours per week. Prerequisite: ANSC 3133.

ANSC5853 Advanced Meats Technology (Odd years, Su) An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products to the consumer. Prerequisites: ANSC 1032 and CHEM 3813.

ANSC5901 Seminar (Sp, Su, Fa) Critical review of the current scientific literature pertaining to the field of animal husbandry science. Oral reports. Lecture 1 hour per week. Prerequisite: senior standing.

ANSC5922 Neuroscience (Fa) Course covers cellular through neural systems, major brain functions and comparative neuroanatomy between mammals and birds. Specific topics include coverage of ion channels, membrane potentials, action potentials, synaptic integration, neurotransmitters, major brain regional development, senses, cellular and chemical analysis, microbiology, nutritional aspects, and Prerequisites: POSC 4314 or ANSC 4343.

ANSC5991 Seminar (Sp, Su, Fa) Prerequisite: ANSC 3133.

ANSC600V Master's Thesis (Fa, Sp) Comprehensive review of recent theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 5970D and ANSC 5970D.

ANSC6010 Master's Thesis (Fa, Sp) Prerequisite: graduate standing.

ANSC6253 Forage-Ruminant Relations (Odd years, Sp) Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. Prerequisite: ANSC 3143 and CSES 3113.

ANSC6343 Vitamin Nutrition in Domestic Animals (Even years, Sp) The vitamins required by domestic animals with emphasis on their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: ANSC 4143 (or POSC 4343) and CHEM 3813.

ANSC6833 Reproduction in Domestic Animals (Even years, Sp) Comprehensive review of current theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 4133.

ANTH1013H Honors Introduction to Biological Anthropology (Fa, Sp) Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Same as ANTH 1011L)

ANTH1011L Introduction to Biological Anthropology Laboratory (Fa) Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Same as ANTH 1011M)

ANTH1013 Introduction to Biological Anthropology (Fa) An introduction to the field of physical anthropology using human evolution as a unifying concept. Areas include human genetics, race, speciation, primate evolution, and human variation and adaptation. Prerequisite: ANTH 1013H.

ANTH1023H Honors Introduction to Cultural Anthropology (Fa) Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. (Same as ANTH 1023H, ANTH 2023H)

ANTH1023 Introduction to Cultural Anthropology (Sp, Su, Fa) Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. (Same as ANTH 1023H, ANTH 2023H)

ANTH3002 Approaches to Archeology (Sp, Fa) Laboratory exercises illustrating concepts of archeology. Corequisite: ANTH 3023.

ANTH3008 Archeology Laboratory (Sp, Fa) Laboratory exercises illustrating concepts of archeology. Corequisite: ANTH 3023.

ANTH3123 The Anthropology of Religion (Sp) An exploration of rituals, symbols, and rules that shape religious life. Religion is viewed broadly, considering activities that invoke powers beyond the reach of ordinary senses.
Examining a variety of cultures, we explore what people say and do as they participate in activities such as magic, healing, unemployment, and religious practice.

ANTH3163 Male and Female: A Cultural and Biological Overview (Fa). A comparative study of male and female roles in culture related to human biology and socialization.

ANTH3173 Introduction to Linguistics (Sp). Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages, especially American, as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: junior standing. (Same as UMM 3173, ENGL 3173)

ANTH3213 Indians of North America (Sp) Study of the Indians of North America and Mexico emphasizing lifeways at early White contact and subsequent acculturation. (Same as ANTH 3213)

ANTH3253 Cultures of the South (Sp) Survey of the diverse ethnic and racial groups of the American South with special emphasis on social and cultural traits related to contemporary developments. (Same as SOCI 3253)

ANTH3263 Native People of Arkansas and the South (Fa) Study of the traditional lifeways and prehistoric background of Native Americans living in the Southern United States, including Arkansas.

ANTH3333 Anthropology of Ethnicity (Fa). Anthropological approaches to the study of race and ethnicity, with reference to other models such as gender, nation, and class. Case studies drawn from Western and non-Western societies, and from pre-colonial and colonial periods. Prerequisites: ANTH 1013 (or BIOL 1543 and BIOL 1541L).

ANTH3421L Human Osteology Laboratory (Sp) Laboratory exercises illustrating concepts of human osteology. Corequisite: ANTH 3421.

ANTH3423 Human Osteology (Sp) Study of the human skeleton, including series of bones, allometric growth, sexual dimorphism, osteological genetic inheritance and environmental stresses. Lectures and demonstration. Corequisite: ANTH 3421L.

ANTH3433 Human Evolution (Sp). A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction.

ANTH3443 Criminalistics: Forensic Sciences (Sp). Introduction to forensics focused on the scientific analysis of physical and biological evidence encountered in criminal investigations. Chemical, microscopic, biological, and observational techniques employed in the analysis of material evidence are described, discussed, and illustrated within an investigative framework. Topics include inorganic materials, fiber, tissue, human identification, fingerprints, tools, and weapons.

ANTH3503 Power and Popular Protest in Latin America (Fa). This course focuses on the historical formation of Latin America by examining conflicts between the region’s rich and poor. It includes both an historical perspective on the formation of ethnic, gender, and class relations in Latin America, and a discussion of contemporary social problems.

ANTH3513 Latinos in the U.S. (Sp). Why, when, and from where did differently situated groups of Latin Americans cross the border and become involved in U.S. agriculture? Once in the U.S., where did they settle, for whom did they work, and how did their experiences differ from those of earlier waves of immigrants? How do peasant-workers engage their political worlds and how are they organized (politically as well as culturally)?

ANTH3523 Cultures of the South (Fa) Study of the traditional lifeways and prehistoric background of Native Americans living in the Southern United States, including Arkansas.

ANTH3923H Honors Colloquium (Irregular). Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in anthropology)

ANTH399VH Honors Course (Sp, Fa) (1-6) Prerequisite: junior standing. ANTH399VH: Anthropological Thought (Fa). Detailed consideration of anthropological theory through study of its historical development. The research paper in this course will fulfill the FUBright College research paper requirement for the major.

ANTH4033 Popular Culture (Sp). Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle.

ANTH4093 The Archeology of Death (Irregular). Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed.

ANTH4123 Ancient Middle East (Sp) The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization.

ANTH4143 Ecological Anthropology (Sp, Su, Fa). Anthropological perspectives on the study of relationships among human populations and their ecosystems.

ANTH4153 Latin American Business, AGRIC, and Agricultural Economy (Fa) This course examines various aspects of the relationship between power and meaning, including concepts such as hegemony, resistance, and political consciousness. What types of agricultural development programs do appropiate for Latin America? How does history within the context of inequality and social change?

ANTH4163 Globalization: Crisis, Conflict and Capitalist Development (Sp) This course examines the reasons between capitalist development and forms of political and cultural struggle. We explore theories of capitalist development and scholarly attempts to understand local experiences within the context of broader processes of capitalist solvency.

ANTH4173 The Latin American City (Irregular) This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. It introduces students to urban studies concepts, and each semester is organized around a specific set of case studies.

ANTH4183 Global Politics of Food (Sp) This course explores the politics of food production, processing, transportation, and consumption on a global level.

ANTH4243 Archeology of the Midsouth (Irregular) Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Prerequisite: junior standing.

ANTH4253 Peoples and Cultures of World Regions (Irregular) The anthropology (prehistory, peoples, and cultures) of a selected world region. Regional emphasis will vary but may include China, Europe, Mexico, Africa, and the Americas. May be repeated for 12 hours.

ANTH4256 Archeological Field Session (Su) Practical field experience using hands-on techniques in an archaeological research. May be repeated for 12 hours.

ANTH4263 Identity and Culture in the U.S.-Mexico Borderlands (Irregular) An exploration of the interplay between Latinas, Mexicanos, Anglos, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender from an anthropological perspective, paying special attention to the border as a theoretical construct as well as material reality.

ANTH4333 Laboratory Methods in Archeology (Irregular) Theoretical and practical aspects of laboratory and field archaeology. Field methods include client-side applications for data collection and analysis.

ANTH4363 Museums, Material Culture, and Popular Imagination (Fa). Museums as ideological sites and thus as sites of popular contestation produce cultural and social systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with attention to the intersections of race, class, and gender in American and national museums.

ANTH4468V Individual Study of Anthropology (Sp, Su, Fa) (1-6) Reading course for advanced students with special interests in anthropology.

ANTH448V Individual Study in Museum Work (Irregular) (1-6) individual research, exhibit design and execution, or other problems of museum work.

ANTH4513 African Religious Identities: Gods, Witchcraft, Ancestors (Sp). An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa.

ANTH4523 Dental Science (Fa). Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology.

ANTH4533 Middle East Cultures (Sp). Study of the peoples and cultures of the Middle East: ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change.

ANTH4543 Geographic Information Systems (Sp). Computer assisted display and geographic resource data. Course develops the theory behind spatial data analysis techniques, and reinforces the theory with exercises that demonstrate its practical applications. Prior experience with computers and/or completion of GEOG 4523 (Computer Mapping) is useful but not a prerequisite.

ANTH4553 Introduction to Raster GIS (Fa) Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data analysis, elevation models, and remote sensing applications. (Same as GIS3253)

ANTH4563 Vector GIS (Fa) Introduction to geographic information systems (GIS) for representing and analyzing digital information, real property, and natural resources in two- and three-dimensional space. Emphasis is placed on developing computer based software and relational data bases. (Same as GEG 4563)

ANTH4573 Introduction to GRASS Applications in GIS (Fa) An introduction to geographic information systems (GIS) problem solving using the Geographic Resource Analysis Support System (GRASS) software. (Same as GEG 4573)

ANTH4583 Peoples and Cultures of Sub-Saharan Africa (Sp). An exploration of the peoples and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to understand the unity and diversity of African cultures, as well as the importance African sociocultural forms played in shaping us understand culture/society throughout the world.

ANTH4593 Introduction to Global Positioning Systems (Sp). An introduction to navigation, georeferencing, and digital data collection using the Arc-View based geographical information system. Course develops the theory behind spatial resource data. Course develops the theory behind spatial data collection using GPS receivers, data loggers, and laser technology for natural science and resource management. Components of Navstar Global Positioning system are used in integration of digital information into various GIS applications with an emphasis on practical applications. (Same as GEG 4593)

ANTH4603 Landscape Archaeology (Fa). This course provides an introduction to the methods and theories of landscape archaeology. Topics include basic survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships.

ANTH4613 Primate Adaptation and Evolution (Fa). Introduction to the biology of the order of Primates. Prerequisite: ANTH 1013 or BIOL 1543 and BIOL 1541L. (Same as BIOL 4613)

ANTH4631L Archaeological Prospecting & Remote Sensing Lab (Odd years, Sp). Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, seismic, radiocarbon dating, sounding, thermography, and multi-spectral imaging. Required computer skills, field trips, and use of instruments. Corequisite: ANTH 4643.

ANTH4683 Archaeological Prospecting & Remote Sensing Lab (Odd years, Sp). Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography.

246 University of Arkansas, Fayetteville
ANTH4653 Advanced Raster GIS (Odd years, Sp) Advanced raster topics are examined beginning with a theoreti- cal and methodological review of toms’ cartographic modeling and cartography theory and include Fourier methods image processing, kriging, spatial statistics, principal compo- nents, fuzzy and regression modeling, and multi-criteria decision models. Several raster GIS programs are examined with linking and programming analysis software. Prerequisite: ANTH 4503 or GL451 4503.

ANTH4803 Historical Archeology (Irregular) Review of the development of historical archeology and dis- cussion of current methods and issues. Lab sessions on historic artifact identification and analysis.

ANTH4913 Ethnographic Approaches to the Past (Irregular) Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation.

ANTH4963 Quantitative Anthropology (Fa) Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphs, measures of central tendency, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods, utilize anthropological data and a statistical soft- ware package (such as SPSS). Prerequisite: ANTH 4463.

ANTH4903 Seminar in Anthropology (Sp, Su, Fa) Research, discussion, and projects focusing on a variety of topics. To be selected for. Prerequisite: ANTH 4913. Topics of the Middle East (Sp, Su, Fa, Va) Covers a topical or issue.

ANTH4923 Karl Marx: Life, Work, and Legacy (Fa) This course examines the writings of Karl Marx. Students will read and discuss his major works, including Capital, The German Ideology, and Grundrisse. In order to understand Marx’s writings, students will also explore his life, times, and legacy.

ANTH500V Advanced Problems in Anthropology (Sp, Fa) (1-18) Individual research at graduate level on clearly defined problems or problem areas.

ANTH5013 Research Methods in Anthropology (Fa) Investigation of the nature of inquiry; scientific and other approaches to the perception of anthropological data; the development and use of research models; organization of observations; numerical and other methods of analyzing and interpreting data.

ANTH5023 Public Archeology (Sp) Practical problems of archeology in relation to federal and state needs, legislation, requirements, community research, public support and information need, and the job market.

ANTH5033 Settlements, Sites, and Models (Even years, Sp) The modeling of potential archeologi- cal resource locational receives greater attention, because of increased funding for government and private sectors. The theoretical and methodological basis behind such mod- els is examined, as are the history, controversies, key issues, individuals, and the important role of GIS technology and statistical methods. Prerequisite: ANTH 4543 or GEOG 4543.

ANTH5053 Quaternary Environments (Fa) An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. (Same as GEOG 5053, GEOL 5053)

ANTH5103 Innovations of Cultural Method and Theory (Fa) Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting cultural anthropological data.

ANTH5153 Topics in Anthropology (Sp, Su, Fa) Graduate level seminar with varied emphasis on topics relat- ing to cultural anthropology.

ANTH5203 Applications of Archeological Method and Theory (Fa) Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting archeological data.

ANTH525V Topics in Archeology (Sp, Su, Fa) (1-18) Graduate level seminar with varied emphasis on topics relating to archeology.

ANTH5263 Indians of Arkansas and the South (Fa) Study of the traditional lifeways and prehistoric back- grounds of Indians living in the southern United States, including Arkansas.

ANTH5303 Applications of Method and Theory in Biological Anthropology (Irregular) Review of the nature and history of biological anthropology; recent theories and the practical implications of various methods of acquiring, analyzing, and interpreting data.

ANTH5333 Social Organization (Fa) Comparative study of social organization focusing primarily on pre-indus- trial and non-western cultures. Primary topics are variation in kinship, kinship groups, kinship terminology, analysis, mar- riage, and current developments in social structure.

ANTH535V Topics in Physical Anthropology (Sp, Fa) (1-6) Individual research with varied emphasis on topics relating to physical anthropology.

ANTH5413 Bioarcheology Seminar (Even years, Sp) Intensive coverage of bioarcheological method and theory with the context of both academic and cultural resources management research.

ANTH5423 Human Evolutionary Anatomy (Irregular) Paleontologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of tony morphology and associated soft tissues. This course surveys methods and theories to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors.

ANTH546V Special Problems in Museum Work (Irregular) (1-6) Individual research in exhibit design and execution, or other problems of museum work.

ANTH561V Field Research in Archeology (Irregular) (1-6) Directed graduate level archeological fieldwork.

ANTH600V Master’s Thesis (Sp, Su, Fa) (1-6) Variable topics in Archeology will be explored in depth.

ANTH682V Seminar: Archeology (Sp, Fa) (1-6) Variable topics in Archeology will be explored in depth.

ANTH683V Seminar: Biological Anth (Sp, Su, Fa) (1-6) Variable topics in Biological Anthropology will be explored in depth.

ANTH700V Doctoral Dissertation (Sp, Fa) (3-9) ing and writing. Emphasizes morphology and syntax with increased focus on reading and writing. Students begin to press ideas and opinions. Prerequisite: ARAB 3013.

ARAB3013 Intermediate Arabic IV (Sp, Fa) Continued development of speaking, comprehension, reading and writing. Complements introduction of standard language skills required for functional abilities in an Arabic-speaking environment. Prerequisite: ARAB 3003.

ARAB3016 Intermediate Arabic III (Fa) Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued emphasis on morphol- ogy and syntax. Prerequisite: ARAB 3016.

ARAB4016 Intermediate Arabic IV (Sp) Continued development of speaking, comprehension, reading, and writing. Emphasizes responsibilities of the writer and student to set clear intentions with various styles ranging from classical to modern in both prose and verse. Prerequisite: ARAB 4008 or equivalent.

ARAB4023 Advanced Arabic I (Fa) Development of advanced speaking and writing skills. Extensive reading and writing assignments and translating exercises from English into Arabic. Prerequisite: ARAB 4016.

ARAB4033 Advanced Arabic II (Sp) Continued advanced speaking, reading, and writing skills. Prerequisite: ARAB 4023.

ARAB4043 Advanced Conversation (Irregular) Continued development of aural comprehension and speak- ing skills in one of the major Arabic dialects.

ARAB4053 Arabic Readings (Sp, Su, Fa) Develops skill in description, analysis, and argumentation through weekly reading and writing assignments within a workshop atmosphere. Selected readings are from various styles of stan- dard Arabic, ranging from newspapers to literary texts.

ARAB4113 Modern Arabic Literature (Irregular) Selected readings from Arabic fiction and poetry from the 20th century to the present. Prerequisite: ARAB 4043.

ARAB4213 Introduction to Arab Culture (Irregular) Selected readings from Arab history, literature, Islamic tradition, and the Holy Qur’an. Prerequisite: ARAB 4033.

ARAB470V Special Topics (Sp, Su, Fa) (1-6) May be offered in a topic not specifically covered by courses offered.

ARAB575V Special Investigations (Sp, Su, Fa) (1-3)
Course Descriptions

and syntheses are used as a means of examining the past and the present while providing a framework from which personal and professional futures can evolve. Corequisite: ARCH 2114 and ARCH 2233. Prerequisite: ARCH 1025.

ARCH2026 Architectural Design IV (Sp) Principles for design and visualization of architectural spaces. Examination of the influences of architectural, structural, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of techniques, including the materiality of space and light. Corequisite: ARCH 2312. Prerequisite: ARCH 2025. ARCH2114 Honors Architecture Technology I (Fall) Introduction to the fundamentals of building systems technology, systems integration, preparation, and context of contemporary architectural design. Study of the integration of all systems within the conceptual and functional organization of the building and its context. Corequisite: ARCH 2102. Prerequisite: ARCH 2025 and ARCH 2121. (Same as ARCH 2114)

ARCH2114 Honors Architecture Technology I (Fa) Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Same as ARCH 303IV) Arch 2133 Design and Visualization (Irregular) A study of basic techniques in architectural presentation drawing and rendering, including studio problems designed to develop skills in various black and white and color media. Studio 6 hours. Prerequisites: ARCH 2243 and ARCH 4433.

ARCH303V Honors Special Projects (1-3) Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Same as ARCH 303V) Arch 303V Honors Special Projects (1-3) A study of advanced techniques in architectural presentation drawing and rendering, including studio problems designed to develop skills in various black and white and color media. Studio 6 hours. Prerequisites: ARCH 2243 and ARCH 4433.

ARCH303V Honors Special Projects (1-3) Study of the practice of design in the Americas from the Pre-Columbian cultures to the present. Lecture and studio 3 hours per week.

ARCH4433 History of Architecture III (Fa) A study of the development of Indian, Chinese, and Japanese art forms with an emphasis on architecture. Corequisite: ARCH 4433.

ARCH4433 History of Architecture III (Fa) A study of the development and origins of architecture in the Americas from the Pre-Columbian cultures to the present. Lecture and studio 3 hours per week.

ARCH4610 Architecture Cooperative Education I (Sp, Su, Fa) A practical introduction and an introduction to the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty.

ARCH4610 Architecture Cooperative Education I (Sp, Su, Fa) A practical introduction and an introduction to the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty.

ARCH4630 Cooperative Education II (Sp, Su) A practical introduction and an introduction to the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty.

ARCH4640 Architecture Cooperative Education IV (Sp, Su) A practical introduction and an introduction to the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty.

ARCH4916 Architectural Design V (Sp) Advanced seminars in subjects to special interest to students and faculty. (Same as ARCH 4023) Corequisite: ARCH 4023.

ARCH4916 Architectural Design V (Sp) Advanced seminars in subjects to special interest to students and faculty. (Same as ARCH 4023) Corequisite: ARCH 4023.

ARCH4916 Architectural Design V (Sp) Advanced seminars in subjects to special interest to students and faculty. (Same as ARCH 4023) Corequisite: ARCH 4023.

ARCH5016 Architectural Structures Seminar (Irregular) Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. Corequisites: ARCH 4015, ARCH 4023, and ARCH 4433.

ARCH5016 Architectural Structures Seminar (Irregular) Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. Corequisites: ARCH 4015, ARCH 4023, and ARCH 4433.

ARCH5016 Architectural Structures Seminar (Irregular) Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. Corequisites: ARCH 4015, ARCH 4023, and ARCH 4433.

ARCH5253 Architectural Structures Seminar (Irregular) Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. Corequisites: ARCH 4015, ARCH 4023, and ARCH 4433.
porary America with emphasis on urban form as an expression of computer use as design and realization tools. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433.

ARCH5643 Architectural Computer Applications (Irregular) Digital computer programming and introduction to the use of current design and realization tools. Prerequisite: ARCH 5933 Preservation and Restoration (Irregular) History of the preservation and restoration movement in Europe and the U.S.; its relation to the contemporary practice of urban design. Modern economic and administrative techniques of preservation. Participation in history surveys at regional and state levels.

(ARED) ART EDUCATION

ARED3603 Public School Art for Elementary Schools (Sp, Fa) Selection, preparation, and use of instructional materials for art in the elementary school. Artistic development of the child and implications to learning in other academic areas. Prerequisite: ARTS 1003 and ARHS 1003 and admission to teacher education.

ARED3613 Public School Art I (Irregular) Selection, preparation and use of instructional materials in elementary and secondary schools. For students seeking teaching certification in art. Prerequisite: AH113 and ARTS 1313 and ARTS 2023.

ARED3643 Teaching Art in Elementary Schools (Sp, Su, Su) Methods and materials used in teaching elementary school art. Prerequisite: ARED 3603 or ARED 3613.

ARED476V Student Teaching in Art (Sp, Su, Fa) A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Prerequisite: BFA degree in Art Education.

(ARHS) ART HISTORY

ARHS1003H Honors Basic Course in the Arts: Art Lecture (Irregular) A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, tints, slides. Three hours a week plus attendance at specified programs and exhibitions. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Same as AH113)

ARHS1103H Basic Course in the Arts: Art Lecture (Sp, Su, Fa) A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, tints, slides. Three hours a week plus attendance at specified programs and exhibitions. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Same as ARHS 1003H)

ARHS2913 Art History Survey I (Fa) Survey of art works from Stone Age through Medieval.

ARHS2923 Art History Survey II (Sp) Survey of art works from Renaissance to the present.

ARHS4813 The History of Photography (Irregular) Survey of photography from 1685 to present.

ARHS4823 History of Graphic Design (Irregular) Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923.

ARHS4823 Ancient Art (Even years, Sp) Study of the visual arts of Mesopotamia, Egypt, Greece, and the Roman Empire. Prerequisite: ARHS 2913.

ARHS4843H Honors Medieval Art (Sp, Su, Fa) Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Same as ARHS 4843)

ARHS4843 Medieval Art (Sp, Su, Fa) Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Same as ARHS 4843H)

ARHS4853 Italian Renaissance Art (Sp, Su, Fa) Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles. Prerequisite: ARHS 2923.

ARHS4863H Honors Northern Renaissance Art (Sp, Su, Fa) Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Same as ARHS 4863H)

ARHS4863 Northern Renaissance Art (Sp, Su, Fa) Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Same as ARHS 4863)

ARHSC500V Study Abroad (Sp, Su, Fa) Open to graduate students studying abroad in officially sanctioned programs.

(ARTS) ART

ARTS1003 Basic Course in the Arts: Art Studio (Sp, Su, Fa) Provides experience through participation in the arts. (Same as ARTS 1003H)

ARTS1013 Drawing Fundamentals I (Sp, Fa) Problems dealing with materials and techniques of drawing, including basic concepts of line, perspective, and value.

ARTS1313 Two-Dimensional Design (Sp, Fa) Studio problems in the use of line, shape, texture, value, and color and their relationships.

ARTS2003 Drawing Fundamentals II (Sp, Fa) Continuation of Drawing Fundamentals. Prerequisite: ARTS 1103.

ARTS2013 Figure Drawing I (Sp, Fa) Continuation of drawing fundamentals with emphasis upon human figure studies. Prerequisite: ARTS 1013.

ARTS2313 Computer Applications in Art (Fa) Introduction to digital imaging and the use of computer graphic software programs and and work in the digital visual arts. Prerequisite: ARTS 1223.

ARTS3023 Drawing III (Fa) Advanced studies and problems in drawing techniques and Prerequisites: ARTS 2313.

ARTS3103 Painting I (Sp, Fa) An exploration of different ways of articulating visual forms on a picture plane, using common materials and procedures. Prereq.: ARTS 1313 or ARTS 1323 or ARCH 1025.

ARTS3113 Painting II (Sp, Fa) An expanded use of materials, procedures, subject matter, and approaches. Prerequisite: ARTS 3103.

ARTS3123 Painting: Water Media (Sp) Introductory course presenting basic materials and techniques of watercolor, gouache, and acrylic painting. Form and composition to be studied through observation and imagination. Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 1013 and ARTS 1323 and ARTS 1323.

ARTS3203 Sculpture I (Sp) Additive and subtractive techniques using clay and plaster and including basic casting. Prerequisites: ARTS 1313 and ARTS 1323 and ARTS 2313.

ARTS3213 Sculpture II (Sp) Subtractive techniques using wood and stone; additive fabrication techniques in a variety of materials. Prerequisite: ARTS 3203.

ARTS3333 Color Studies (Sp, Fa) Investigation of color qualities and relationships through research and studio problems. Prerequisites: ARTS 1313 and ARTS 1323 and ARTS 1313.

ARTS3343 Graphic Design I (Sp, Fa) The primary emphasis of this course is on the aesthetics of letter forms and understanding the symbolic communication inherent in different type faces. Typographic relationships will be investigated through experimental problems and projects such as logos, posters, and brochures. Prerequisite: ARTS 1013 and ARTS 2313.

ARTS3403 Etching I (Sp) Introduction to intaglio and relief. Prerequisite: ARTS 1313 and ARTS 2003 or ARTS 2023 or ARTS 2023.

ARTS3413 Etching II (Sp) Advanced work in intaglio or relief. Students select one area for study. Intaglio emphasizes working with copper plates and color printing. Background in color studies preferred but not mandatory. Prerequisite: ARTS 3403 or ARTS 3463.

ARTS3423 Printmaking-Lithography (Fa) Introduction to lithography with emphasis on stone lithographic techniques. Prerequisite: ARTS 1313 and (ARTS 2003 or ARTS 2023 or ARTS 2023).

ARTS3433 Lithography II (Fa) Advanced study with emphasis on color printing and plate lithography techniques. Prerequisite: ARTS 3423.

ARTS3443 Serigraphy I (Su, Fa) Introduction to serigraphy techniques, including cut stencil, resist methods,
Projects focus on the organizational principles and practices of layout design, with a study of contemporary design and graphic design history. Ideas are visualized through traditional and computer techniques. Presentation of work and development of portfolio pieces are emphasized. Prerequisite: ARTS 3363.

ARTS439V Special Problems in Graphic Design (Sp, Fa) (1-6) Advanced individual projects in graphic design. Prerequisite: ARTS 4363 or ARTS 4373 or ARTS 4383.

ARTS4463 Etching III (Sp, Fa) (continued) study of intaglio and letterpress techniques. Prerequisite: ARTS 4433 or ARTS 4473.

ARTS449V Special Problems in Prints (Sp, Fa) (1-6) Individual projects in one area of printmaking. Prerequisite: ARTS 4463 or ARTS 4473.

ARTS4553 Ceramics-Handbuilding III (Sp, Fa) Continued advanced work in handbuilding techniques and glaze calculation. Prerequisite: ARTS 3513.

ARTS4563 Ceramics-Wheelthrown III (Sp, Fa) Continued advanced work in wheel-throwing techniques and/or glaze calculation. Prerequisite: ARTS 3533.

ARTS4573 Ceramics IV (Sp, Fa) Continued advanced study in either wheel-throwing or handbuilding techniques and/or glaze calculations. Prerequisite: ARTS 3533 and ARTS 3513 and ARTS 3523 and ARTS 3533.

ARTS458V Special Problems in Ceramics (Sp, Fa) (1-3) Individual projects in studio practice. Prerequisite: ARTS 3503 or ARTS 3523.

ARTS459V Individual Instruction (Sp, Fa) (1-6) Special projects on an arranged basis for advanced students in any area of art in which the catalog sequence of courses has been completed.

ARTS4813 Digital Photography (Fa, Even years) Introduction to digital photography, production techniques and theory. Digital input from scanning (film & slides/positive), digital cameras, video and internet sources. Computer assisted manipulation of imagery for correction and abstraction. Output to a digital printing systems, analog systems (film recorder), service bureau, internet. Prerequisite: ARTS 3603.

ARTS4823 Color Photography I (Irregular) Introduction to color production. Color materials, techniques and theory. Direct reversal transparencies and prints, color negative processing and printing, and manipulation of color materials. Assignments, demonstrations, critiques, and lectures. Prerequisite: ARTS 3803.

ARTS4833 Advanced Photography (Fa) Individual problems in photography with optional study in areas of color, slide production, and photography application to other art media. Prerequisite: ARTS 3803.

ARTS484V Special Problems in Photography (Sp, Fa) (1-6) Individual problems under the guidance of faculty and graduate students. Special projects in photography designated by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833).

ARTS490VH Honors Thesis (Sp, Fa) (1-6) Special problems in studio, art history, art criticism, art education, or a combination of these. Prerequisite: junior standing.

ARTS4919 Internships in Art (Sp, Su, Fa) (1-3) Credit for practical experience gained through internships in studio art, art history, gallery practices and/or art education. Report from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: junior standing and art major.

ARTS4921 Workshop: Professional Practices in Art (Sp, Su) A workshop in professional artistic practices including portfolio presentation, matting, framing, writing resumes, making slides of work, health and safety issues, opportunities, etc. Prerequisite: Majors only. Requires junior, senior or graduate standing.

ARTS493V Fine Arts Gallery Internship (Sp, Su, Fa) (1-3) Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, and distribute publicity. Prerequisite: junior standing and art major.

ARTS494V Graphic Design Internship (Sp, Su, Fa) (1-6) Credit for practical experience gained through internship in graphic design. Report required from intern and field supervisor on significant accomplishments. 3 credit hours per semester. Prerequisite: ARTS 4363 or ARTS 4373 or ARTS 4383.

ARTS495V Special Topics (Irregular) (1-6) May be offered in a subject not specifically covered by the courses otherwise listed.

ARTS502H Senior Thesis (Sp, Su, Fa) (1-6) Senior thesis and dissertation. Prerequisite: Graduate Standing.

ARTS503 Graduate Drawing (Fa) Graduate level study of drawing materials and techniques. Prerequisite: graduate standing.

ARTS5901 Graduate Critique (Sp, Su, Fa) Art faculty review and critique of M.F.A. student's art works. Prerequisite: admission into the M.F.A. program.

ARTS5912 Graduate Seminar in Studio Art (Sp, Fa) Examination and analysis of current issues in contemporary visual art. The relationship of current theoretical literature to studio practice will be explored through presentations and discussions of graduate student research. Prerequisite: admission to M.F.A. program.

ARTS590V Master of Fine Arts Exhibition (Sp, Su, Fa) (1-6) Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for selecting the acceptable exhibit of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy.

ARTS602V Graduate Drawing (Sp, Su, Fa) (1-6) Individual problems in drawing techniques. Prerequisite: graduate standing.

ARTS612V Graduate Painting (Sp, Su, Fa) (1-6) Individual problems in painting techniques. Prerequisite: graduate standing.

ARTS622V Graduate Sculpture (Sp, Su, Fa) (1-6) Individual problems in sculpture techniques. Prerequisite: graduate standing.

ARTS632V Graduate Ceramics (Sp, Su, Fa) (1-6) Individual problems in ceramics techniques. Prerequisite: graduate standing.

ARTS642V Graduate Photography (Sp, Su, Fa) (1-6) Individual problems in photography. Prerequisite: graduate standing.

ARTS652V Special Studio Problems (Sp, Su, Fa) (1-6) Individual problems in two- and three-dimensional design. Prerequisite: graduate standing.

ARTS659V Special Topics (Irregular) (1-6) Subject matter not covered in other courses. Prerequisite: graduate standing.

(ARTS) ASTRONOMY

ASTR2001 Survey of the Universe and Laboratory, Honors (Sp, Su, Fa) An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, black holes, the Galaxy, clusters of galaxies, and cosmology. Prerequisite: ASTR 2001L, ASTR 1013 (1-6) ASTR 2001L Survey of the Universe Laboratory (Sp, Su, Fa) Daytime and nighttime observing with telescopes and indoor exercises on selected topics. (Same as ASTR 2001L, ASTR 1013)

ASTR2003 Survey of the Universe (Sp, Su, Fa) An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, neutron stars, black holes, the Galaxy, clusters of galaxies, and cosmology. Prerequisite: ASTR 2003.

ASTR2003H Honors Survey of the Universe and Laboratory (Sp, Su, Fa) An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, black holes, the Galaxy, clusters of galaxies, and cosmology. (Same as ASTR 2003)

ASTR2003J Survey of the Universe (Sp, Su, Fa) An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, neutron stars, black holes, the Galaxy, clusters of galaxies, and cosmology. (Same as ASTR 2003)
Course Descriptions
ASTR3033 Solar System Astronomy (Irregular)
Basic course on state of knowledge of solar system astronomy, especially designed for students in B.A. Physics program or as an elective for undergraduates in related areas.
Prerequisite: PHYS 2033 and PHYS 2031L.

ASTR3053 Stellar System Astronomy (Irregular)
Basic course on stars, galaxies and cosmology; especially
designed for students in the B.A. Physics program or as an
elective for undergraduates in related areas. Prerequisite:
PHYS 2033 and PHYS 2031L.

ASTR5013 Astrophysics (Odd years, Fa)

Introduction to astrophysics. The course covers stellar evolution, interstellar medium, galactic nucleogenesis and observational cosmology. Prerequisite: PHYS 3614, CHEM 3504,
or graduate standing.
ASTR5033 Planetary Systems (Fa) The nature of
the solar system and other planetary systems as deduced
from observations and theoretical modeling. Structure and
evolution of terrestrial and jovian planets and their satellites.
Planetary atmospheres, magnetospheres, and the solar wind;
planetary interiors. Theoretical and observed properties of
exoplanetary systems; astrobiology.

(BENG) BIOLOGICAL ENGINEERING
BENG1012 Biological Engineering Design
Fundamentals (Fa) Introduction to the profession of
Biological Engineering including a definition, and demonstration through field trips, guest speakers, examples of job
opportunities and internships. Basic engineering methodologies, including analysis and design, as applied to biological
systems. Introduction to problem solving, data analysis,
report writing, presentations, and engineering record keeping. Group activities and team design efforts. Lecture 1 hour,
laboratory 3 hours per week. Corequisite: Lab component.

BENG1022 Biological Engineering Design Studio
I (Sp) Continued practice of biological engineering design
in the Biological Engineering Design Studio. Design projects
explore the unique problems associated with engineering
applied to biological systems. Group activities to teach teamwork skills in the context of engineering practice, including
reporting, project management, time management, communication and balancing individual and team accountability.
Introduction and application to a computer aided graphics
package. Lecture 1 hour, laboratory 3 hours per week.
Prerequisite: BENG 1012. Corequisite: Lab component.

BENG2103 Electronic Applications in Biological
Systems (Irregular) Basic circuit theory and introductory
applications of DC circuits, AC circuits and electro-mechanical components in actuating, monitoring and controlling processes involving biological materials. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component.

BENG2612 Biological Engineering Design Studio
II (Fa) Applications of biology, chemistry and physics to the
design of life support for enclosed biological systems involving people, animals, plants and microbes. Design process
will be based upon engineering analyses such as quantifying
bio-energetics and growth, energy and mass balances, solar
energy and psychrometrics. Student teams will be presented
multiple design modules that include literature/experimental
discovery, open-ended design and prototype testing. 4 hours
of design studio per week. Pre- or Corequisite: PHYS 2054,
BIOL 1543/1541L, and BENG 1012.

BENG2622 Biological Engineering Design Studio
III (Sp) Continuation of BENG 2612. Design Studio experience includes additional life support system design modules.
Design process will include discussion of social issues and
ethics, use of engineering economics as a tool to evaluate
design alternatives. Use of descriptive statistics and regression to analyze experimental data. Improve written and
oral communication skills through presentation of design
project results. 4 hours of design studio per week. Pre- or
Corequisite: BENG 1022.

BENG3712 Engineering Properties of Biological
Materials (Fa) Measuring and predicting the physical,

chemical, and thermal properties of biological materials
necessary for the analysis and design of production and processing systems. Prerequisite: BENG 2622.

BENG3723 Unit Operations in Biological
Engineering (Sp) Design of basic unit operations typical
of biological engineering practice; unit operations include
pump-pipe, fan-duct, moist air (psychrometric) processes
(cool/heater/humidifier/dryer), air mixing, aeration, refrigeration and materials conveying; unit operations design will
account for unique constraints imposed by biological sys-

University of Arkansas, Fayetteville

tems. Lecture 2 hours and lab 3 hours per week. Corequisite:
Lab component. Prerequisite: (MEEG 2403 or CHEG 2313)
and (CVEG 3213 or CHEG 2133 or MEEG 3503).

BENG3733 Transport Phenomena in Biological
Systems (Fa) Applications of the principles of kinetics

and heat and mass transfer to the analysis and design of
biological engineering processes. Biological engineering processes will encompass examples in the realms of bioprocess,
bioenvironmental, bioresource, and biomedical engineering.
Lecture 3 hours per week. Prerequisite: (CHEG 2313 or
MEEG 2403) and (CHEG 2133 or MEEG 3503 or CVEG
3213) and CHEM 3813 and MATH 3404.

BENG3803 Mechanical Design in Biological
Engineering (Sp, Fa) Introduction to the mechanical

design process applied to biological engineering, with examples of mechanical components interfacing with biological
systems. Engineering properties of materials, loading, combined stress analysis, theories of failure. Systems approach
in design, including safety, reliability and cost. Lecture 2
hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MEEG 3013.

BENG4103H Honors Instrumentation in
Biological Engineering (Sp) Theory and advanced

applications of analog circuits, digital circuits, and commercial
instruments involving biological materials. Lecture 2 hours,
laboratory 3 hours per week. Corequisite: Lab component.
Prerequisite: BENG 2103 (or ELEG 2103 or ELEG 3903).
(Same as BAEG 4103,BENG 4103)

BENG4103 Instrumentation in Biological
Engineering (Sp) Theory and advanced applications of
analog circuits, digital circuits, and commercial instruments
involving biological materials. Lecture 2 hours, laboratory 3
hours per week. Corequisite: Lab component. Prerequisite:
BENG 2103 or ELEG 2103. (Same as BAEG 4103,BENG
4103H)

BENG4113 Risk Analysis for Biological Systems
(Odd years, Fa) Principles of risk assessment including
exposure assessment and dose response, and risk management. Methods of risk analysis modeling and simulation with
computer software. Applications of risk analysis in animal,
food and environmental systems. Prerequisite: MATH 2564
and BIOL 2013.

BENG4123 Biosensors & Bioinstrumentation
(Odd years, Sp) Principles of biologically based sensing

elements and interfacing techniques. Design and analysis
methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in in bioprocessing, bioenvironmental, biomechanical
and biomedical engineering. Lecture 2 hours, laboratory 3
hours per week. Corequisite: Lab component. Prerequisite:
BIOL 2013 and BENG 4103.

BENG4203 Biomedical Engineering Principles
(Fa) Engineering principles applied to the design and analysis of systems affecting human health. This is an introductory
course focusing on fundamentals of physiological systems
and modeling and how this relates to analysis and equipment design. Topics include: brief overview of anatomy and
physiology; biomedical sensors, instrumentation and signal
processing; physiological modeling, biomechanics, and fluid
mechanics. Lecture 3 hours per week. Prerequisite: MEEG
2013, (MEEG 2403 or CHEG 2313), ELEG 2103, (MEEG
3503 or CVEG 3213 or CHEG 2133), MEEG 3013, BIOL
1543 or equivalents

BENG4213 Applications of Biomedical
Engineering (Sp) Continuation of BENG 4203.

Biomedical engineering fundamentals applied to biomedical
engineering problems. Topics include: biomaterials, tissue
engineering, biotechnology, radiation imaging, ultrasound,
NMR, MRI, biomedical optics and lasers, rehabilitation
engineering, assistive technology, and clinical engineering.
Lecture 3 hours per week. Prerequisite: BENG 4203

BENG4403 Design of Enclosed Ecosystems
(Even years, Fa) Environmental and functional design of
buildings, chambers, rooms and habitats to house/exhibit animals and plants. Advanced analytical techniques which incorporate physiological considerations. Psychometrics, solar and
alternate energy principles. Design of ventilation, heating and
cooling systems and controls. Design considerations include
animal behavior, stress and welfare. Corequisite: Lab component. Prerequisite: BENG 2622.

BENG450V Special Problems (Sp, Fa) (1-4)

Selected problems in biological engineering are pursued in
detail. Prerequisite: senior standing.

BENG451VH Honors Thesis (Sp, Su, Fa) (1-6)
Prerequisite: Honors candidacy.

BENG452V Special Topics in Biological

Engineering (Irregular) (1-6) Special topics in biological engineering not covered in other courses. May be
repeated.

BENG4623 Biological Reactor Systems Design
(Even years, Fa) Extension of principles of microbial
growth kinetics and transport phenomena to the design of
biological reactor systems used in biological engineering.
Reactor systems using specialty microbial biomass (activated
sludge) for substrate utilization as well as biomass and
product formation. Application areas such as bio-remediation,
bioprocessing and organic (food/animal) waste treatment.
Corequisite: Lab component. Prerequisite: BENG 3733.

BENG4703 Food & Bioprocess Engineering
(Even years, Sp) Basic engineering principles involved in

the design of systems for handling, conditioning, and storage
of agricultural materials. Lecture 2 hours, laboratory 3 hours
per week. Corequisite: Lab component. Prerequisite: BENG
3723 or CHEG 3143 or MEEG 4413.

BENG4803 Precision Agriculture (Odd years,
Fa) Introduction to precision agriculture, benefits, spatial

variability within a field, zone concept, site-specific management. Spatial data collection: sensors, GPS, yield monitoring, remote sensing. Knowledge discovery from data: data
processing, neural networks, genetic algorithms, use of GIS.
Decision support systems. Variable-rate technology: real-time
and map-based systems, variable-rate machinery, smart controls. Evaluation: Yield mapping, economic analysis. Students
are expected to have basic computer skills and statistics
knowledge. Prerequisite: MATH 1213 and junior standing.

BENG4813 Senior Biological Engineering Design
I (Fa) Design concepts for equipment and processes used
in biological, food and agricultural industries. Initiation of
comprehensive two-semester team-design projects; defining design objectives, developing functional/mechanical
criteria, standards, reliability, safety, ethics and professionalism issues. Lecture 2 hours, laboratory 3 hours per
week. Corequisite: Lab component. Prerequisite: consent of
instructor.

BENG4822 Senior Biological Engineering Design
II (Sp) Continuation of BENG 4813. Design concepts for
equipment and processes used in biological and agricultural
industries. Completion of 2-semester team design projects.
Construction, testing, and evaluation of prototypes. Written
and oral design reports. Discussion of manufacturing methods, safety, ergonomics, analysis/synthesis/design methods
as appropriate for particular design projects. Laboratory/
design 4 hours per week. Prerequisite: BENG 4813.

BENG4903 Natural Resources Engineering (Odd
years, Fa) Engineering principles for the design of systems
for utilization of surface water and ground water. Includes
frequency analysis of rainfall, infiltration, runoff, evapotranspiration, hydraulic control structures, ground water pumping,
drainage and irrigation. Lecture 2 hours, laboratory 3 hours
per week. Corequisite: Lab component. Prerequisite: CVEG
3213 or MEEG 3503.

BENG4913 Design of Animal Waste Management
Systems (Even years, Sp) Engineering principles for
the design of systems for the biological treatment and utilization of organic by-products from animals and food processing. Design of best management practices to protect bio-environmental resources by minimizing nonpoint pollution (off-site
movement of sediment, nutrients, ammonia gas and other
constituents) and by minimizing nuisance odors associated
with land applied organic residues. Emphasis on economic
utilization of beneficial components of typical wastes using
environmentally acceptable processes. Lecture 2 hours,
laboratory 3 hours per week. Corequisite: Lab component.
Prerequisite: BENG 2622.

BENG4923 Non-Point Source Pollution
Engineering (Odd years, Sp) Engineering principles

involved in assessment and management of nonpoint source
(NPS) pollution. Effect of NPS pollution on ecosystem
integrity. Use of GIS/mathematical models to quantify extent
of pollution. Design/implementation of best management
practices. Discussion of Total Maximum Daily Load (TMDL)
principles and processes. Lecture 2 hours, laboratory 3 hours
per week. Corequisite: Lab component. Prerequisite: CVEG
3213 or MEEG 3503.

BENG500V Advanced Topics in Biological
Engineering (Sp, Su, Fa) (1-6) Special problems in
fundamental and applied research. Prerequisite: graduate
standing.

BENG5103 Advanced Instrumentation in
Biological Engineering (Even years, Sp)

Applications of advanced instrumentation in biological
systems. Emphasis on updated sensing and transducing

251



BENG5713 Food Product and Process Development (Odd years, Fa) Multidisciplinary approaches for developing new food products and processes, within the context of an industry-sponsored project. Group dynamics and interpersonal skills. Factors that influence product and process development. Analysis and modeling applied to food process design. Lecture 1 hour, laboratory 6 hours per week. Corequisite: BENG 4703.

BENG5723 Food Safety Engineering (Even years, Fa) Principles of engineering methods applied to food and safety and sanitation. Discussion of thermal, chemical, electrical pasteurization or sterilization in food processing. Demonstration of monitoring and detecting techniques for food safety, including image analysis, biosensors and modeling. Lecture 3 hours per week. Prerequisite: BENG 4103 and FQSC 4124 (or equivalent).

BENG5733 Advanced Biological Process Engineering (Odd years, Fa) Applications of the principles of microbiology to microbial- and biological problems. Topics include applied enzymology, metabolic engineering, molecular genetics and control, and bioinformatics in addition to classical applied enzyme and cell-growth kinetics and advanced bioreactor design. Prerequisite: BENG 3732 or CHEG 5531.

BENG5801 Graduate Seminar (Fa) Reports presented by graduate students on topics dealing with current research in agricultural engineering. Prerequisite: graduate standing.

BENG5903 Water Quality Modeling and Management (Odd years, Sp) Processes and methodologies associated with surface water quality modeling, investigation of management processes based on modeling results. Process from simple steady-state spreadsheet models to complex GIS-based dynamic models. Develop calibration and validation methodologies for development of a 2- to 4-semester project that integrates their skills and knowledge in parameterizing, calibrating, and validating water quality models for environmental applications. Prerequisite: BENG 5303 and 5304.

BENG5923 Nonpoint Source Pollution Control and Modeling (Even years, Sp) Control of hydrologic, meteorologic and agronomic factors that contribute to nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation and cell-growth kinetics and advanced bioreactor design. Prerequisite: BENG 4903 or CEEG 3223.

BENG5933 Environmental and Ecological Risk Assessment (Even years, Sp) Process and methodologies associated with human-environmental and ecological risk assessments. Environmental risk assessments based on human receptors as endpoints, addressing predominantly abiotic processes. Ecological risk assessments based on non-human receptors as endpoints. Approach using hazard definition, effects assessment, risk estimation, and risk management. Application of methods to student projects to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes. Prerequisite: BENG 4113.

BENG600V Master's Thesis (Sp, Su, Fa) (1-18) Prerequisite: candidacy.

BENG700V Doctoral Dissertation (Sp, Su, Fa) 1-18 Prerequisite: candidacy.
BIOL2404 Comparative Vertebrate Morphology (Sp, Fa) A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, four hours lab per week.

BIOL4243 Comparative Physiology (Fa) Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 4 hours, laboratory 2 hours per week. Corequisite: BIOL 2531 and CHEM 3611 and CHEM 3611L.

BIOL4261 Cell Physiology Laboratory (Sp) Laboratory demonstrations of cell processes involved in growth, metabolism, transport, excitation, sensory perception, and regulation in euukaryotes, primarily animals. Three lecture hours. Prerequisite: BIOL 2533 and CHEM 3813 and PHYS 2033.

BIOL4304 Plant Physiology (Fa) Study of plant processes. Lecture 3 hours per week. Corequisite: BIOL 2533 and CHEM 3611L.

BIOL4404 Comparative Botany (Even years, Fa) A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, four hours lab per week.

BIOL4404 Comparative Botany (Odd years, Fa) A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, four hours lab per week.

BIOL4463 Physiological Ecology of Animals (Odd years, Sp, Fa) A survey of the events causing human disease at the molecular, cellular, and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use add the body’s own defenses contribute to pathology. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL4703 Mechanisms of Pathogenesis (Fa) A survey of the events contributing to the ability of microorganisms to infect and cause disease. Topics include pathogenesis mechanisms, manipulation of immune system, and other interactions with host. Three lecture hours, laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL4713 Basic Immunology (Sp) A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, other infections problems in modern Immunology. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL4743 Fish Biology (Odd years, Sp) Morphology, classification, life history, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: BIOL 4740L. Prerequisite: 12 hours of biological science.

BIOL4763 Ornithology (Even years, Sp) Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: BIOL 2533 and BIOL 2323 or graduate standing.

BIOL480VH Honors Special Problems (Sp, Su, Fa) (1-6) For advanced students with adequate preparation. (Same as BIOL 480VH)

BIOL4841 Limnology (Odd years, Fa) Physical,
chemical and biological conditions of inland waters. Lecture 3 hours, laboratory by arrangement. Corequisite: lab component. Prerequisite: BIOL 3863 or instructor's permission.

BIOL4824 Community Ecology (Even years, Sp) Survey of theoretical and applied aspects of community process, structure, theory, dynamic community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL4833 Animal Behavior (Odd years, Fa) An approach emphasizing current field and laboratory techniques, experimental design, and data analysis. Field trip is required.

BIOL490V Special Topics in Microbiology (Irregular) (1-6) Consideration of new areas of microbiological knowledge not yet treated adequately in textbooks or in other courses. Prerequisite: 8 hours of biological sciences.

BIOL4933 Special Topics in Zoology (Su) Discussion of recent outstanding biological research of interest to zoology majors and public school science teachers. May be repeated with different instructor or at maximum of 6 hours of credit. Prerequisite: 8 hours of biological sciences.

BIOL499V Field Ecology (Sp, Su, Fa) (1-3) Project-oriented approach employing current field and laboratory techniques, experimental design, and data analysis. Field trip is required.

BIOL5001 Seminar in Biology (Sp, Fa) Discussion of selected topics and review of current literature in any area of the biological sciences. Corequisite: Lab component.

BIOL5101 Bibliographic Practicum (Fa) Systematic survey of biological resources available on CD-ROM, through electronic library on-line services, and on the Internet and World Wide Web. Prerequisite: senior or graduate standing.

BIOL5261 Cell Physiology Laboratory (Sp) Laboratory demonstrations of cell processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Lecture 3 hours. Prerequisite: BIOL 2533 and BIOL 2531L and CHEM 3813 and PHY11 2033.

BIOL5264 Soil Microbiology (Odd years, Fa) A study of soil-microbe interactions for which they are responsible. Corequisite: Lecture 3 hours, laboratory 3 hours per week. Corequisite: BIOL 3350L. Prerequisite: BIOL 2011L.

BIOL529V Research in Physiology (Sp, Su, Fa) (1-6) Biologists reconstruct past life forms and systematic relationships of our ancestors using comparative studies of tory morphology and associated soft tissues. This course surveys methods of functional and phylogenetic, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Same as ANTH 5243)

BIOL5433 Principles of Evolution (Even years, Fa) Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the modern synthesis. Historical, theoretical, and population genetics approaches will be discussed. Required: BIOL 3023 and BIOL 3321L and BIOL 3861L. Prerequisite: BIOL 3323 and BIOL 3863L.

BIOL5463 Physiological Ecology of Animals (Odd years, Sp) Interactions between environments, physiology, and behavior of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234 and BIOL 4230L.

BIOL549V Research in Vertebrate Morphology (Sp, Su, Fa) (1-6)

BIOL5503 Ecosystem Ecology (Odd years, Sp) Factors controlling ecosystem structure and function. Topics include: ecological communities, current species alliances, biogeochemical cycles, and climate change and ecosystem stability. Prerequisite: BIOL 3864.

BIOL5511L Population Ecology Laboratory (Sp) Demonstration laboratory for concepts from BIOL 5511. Pre- or Corequisite: BIOL 5513.

BIOL5513 Population Ecology (Sp) Survey of theoretical and applied aspects of populations processes stressing models of population growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3864.

BIOL5523 Physiological Ecology (Even years, Sp) Effects of environmental factors on plant growth. Studies of light, temperature, soil, and soil moisture relationships will be emphasized. Prerequisite: BIOL 3864.

BIOL5524 Developmental Biology (Sp) An analysis of the development of species in terms of current evolutionary models emphasizing the experimental approach. Corequisite: Lab component.

BIOL5533 Chemical and Biochemical Aspects of Evolution (Odd years, Sp) Abiotic synthesis of bio-molecules on Earth, the origin of cells; genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, and eukaryotes, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data and evidence. Prerequisite: BIOL 5544 Comparative Vertebrate Embryology (Fa) Comparative study of the embryology of selected vertebrates through the mammal with special emphasis on human development. Lecture, laboratory 6 hours per week. Corequisite: Lab component.

BIOL558V Research in Cell Biology (1-18)

BIOL559V Research in Embryology (Sp, Su, Fa) (1-6)

BIOL5643 Invertebrate Phylogeny (Even years, Sp) Introduction to the principles and practice of phylogeny reconstruction and rigorous evaluation of animal relationships inferred from molecular and morphological characters. Emphasis will be on high-level phylogeny of invertebrate taxa. Prerequisite: BIOL 2814 or equivalent.

BIOL569V Research in Invertebrate Zoology (Sp, Su, Fa) (1-6)

BIOL5723 Fish Biology (Odd years, Sp) Morphology, classification, life histories, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: lab component. Prerequisite: 12 hours of biological sciences.

BIOL5743 Herpetology (Even years, Sp) Morphology, classification and ecology of amphibians and reptiles. Lecture 2 hours, laboratory 1 hour per week. Corequisite: lab component.

BIOL5763 Ornithology (Even years, Sp) Taxonomy, morphology, distribution, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: lab component. Prerequisite: 10 hours of biological sciences.

BIOL5783 Mamalogy (Irregular) Lectures and laboratory dealing with classification, morphology, distribution, ecology, behavior, and phylogeny of mammals. Corequisite: lab component.

BIOL579V Research in Vertebrate Zoology (Sp, Su, Fa) (1-6)

BIOL580V Research in Botany (Sp, Su, Fa) (1-6)

BIOL5814 Limnology (Odd years, Fa) Physical, chemical and biological conditions of inland waters. Lecture 3 hours per week, laboratory arranged. Corequisite: lab component. Prerequisite: CHEM 1123 and CHEM 1121L or equivalent and 12 hours of biological sciences.

BIOL581V Research in Microbiology (Sp, Su, Fa) (1-6)

BIOL5822 Animal Distribution (Even years, Fa) Physical, chronological, and biological factors affecting animal distribution, emphasizing terrestrial and fresh-water vertebrates.

BIOL5833 Animal Behavior (Odd years, Fa) Organization, regulation, and phylogeny of animal behavior, encompassing behavioral, laboratory, and field work. Corequisite: lab component.

BIOL5844 Community Ecology (Even years, Sp) Survey of theoretical and applied aspects of community process, structure, theory, dynamic community interactions, and major community types. Corequisite: BIOL 5840L. Prerequisite: Lab component.

BIOL585V Field Ecology (Sp, Su) (1-3) Project-oriented approach employing current field and laboratory techniques, experimental design and data analysis. Field trip is required.

BIOL5859 Research in Field Zoology (Sp, Su, Fa) (1-6)

BIOL590V Special Topics in Botany (Sp, Fa) (1-6) Consideration of new areas of botanical science not yet treated adequately in textbooks or in other courses. Prerequisite: 2 hours of biological sciences.

BIOL5914 Stream Ecology (Even years, Fa) Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: some previous course work in ecology is essential.

BIOL5919 Special Topics in Microbiology (Sp, Fa) (1-6) Consideration of new areas of microbiological science not yet treated adequately in textbooks or in other courses. Prerequisite: 6 hours of biological sciences.

BIOL5922 Conservation of Endangered Species (Odd years, Sp) Biological, bureaucratic, and political considerations for protection of the natural environment. Conservation biology, population genetics, and legal implications of protecting selected species in ecosystem are discussed. Lecture 2 hours per week. Prerequisite: 12 hours of biological sciences.

BIOL5933 Global Biogeochemistry: Elemental Cycles and Environmental Change (Odd Years, Sp) This course explores the chemical, biological, and ecological processes occurring within ecosystems. An understanding of these processes are used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on the interaction and the effects of more recent anthropogenic influences. Prerequisite: college level chemistry or biochemistry and ecology.

BIOL600V Master’s Thesis (Sp, Su, Fa) (1-12) Prerequisite: graduate standing.

BIOL700V Doctoral Dissertation (Sp, Su, Fa) (1-12) Prerequisite: graduate standing.

(CDJS) COMMUNICATION DISORDERS

CDJS2253 Introduction to Communicative Disorders (Sp, Fa) (1-6) An introductory course which surveys the professional interests of speech-language pathology and audiology with specific attention to the general recognition of disorders of speech, language, hearing, and swallowing.
speech, language, and cognition. Prerequisite: CDIS 3213. CDIS4263 Advanced Audiology (Fa) Study of the basic tenets of the theory of hearing in children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Prerequisite: CDIS 3103.
CDIS4273 Communication Behavior and Aging (Fa) Study of the effects upon communication of normal aspects of the aging process, from early adulthood through-out the the lifespan. Changes in speech, language, and hearing functioning are described. Prerequisite: CDIS 3103.
CDIS490V Special Problems (Sp, Su, Fa) (1-3) Prerequisite: graduate standing. CDIS5102 Research Methodology in Communication Disorders (Su) An examination of the methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: graduate standing. CDIS5112 Seminar in Early Intervention (Fa) Study of a family-centered, transdisciplinary approach to early inter-vention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery, and collaboration with other disciplines, and legislation mandating services. Prerequisite: CDIS 3233 or equivalent, and graduate standing. CDIS5121 Feeding and Swallowing Disorders Lab (Fa) Observation and interpretation of techniques used for assessment and remediation of feeding and swal-lowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3233 and graduate standing. CDIS5122 Feeding and Swallowing Disorders (Fa) Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3233 or equivalent, and graduate standing. CDIS5131 Discourse Analysis and Treatment (Fa, Su) Study of discourse processes and discourse analysis procedures appropriate for communicatively disordered children and adults, atypical development, and personality disorders associated with impaired discourse performance. Prerequisite: previous course work in language process and disorders, and graduate standing. CDIS5142 Cognitive-Communication Development and Disorders (Sp) Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223.
CDIS5152 TBI and Right-Hemisphere Disorders (Fa) Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and gradu-ate standing.
CDIS5163 Seminar in Language Topics (Sp, Su, Fa) Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: gradu-ate standing.
CDIS5173 Survey of Disorders of Communication (Su) Course Descriptions (Sp, Su, Fa) Focus on the role of communication in the aging process, as well as the impact of disabilities on aging populations. Prerequisite: CDIS 3223.
CDIS5221 Introduction to Speech and Hearing Science (Sp) Study of the behavioral basis of speech and the auditory skills underlying speech perception. Prerequisite: CDIS 3233.
CDIS5241 Clinical Practicum: Public Schools (Sp, Fa) Practicum activities in speech-language assessment. Prerequisite: graduate standing.
CDIS5293 Augmentative and Alternative Communication (Fa) Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: graduate standing. CDIS5381 Diagnostic Practicum (Sp, Su, Fa) Practicum activities in speech-language assessment. Prerequisite: graduate standing. CDIS5391 Clinical Practicum: Hearing Disorders (Sp, Su, Fa) Practicum activities in speech-language assessment. Prerequisite: graduate standing. CDIS548V Off-Campus Practicum: Public School Site (Sp, Fa) (1-6) Practicum activities in speech-language disorders in a public school setting. Prerequisite: CDIS 5391.
CDIS558V Internship: Clinical Site (Sp, Su, Fa) (3-6) Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treat-ment. Students in the Master's program must maintain a mini-mum of 3 credit hours of CDIS 558V or CDIS 578V during their last semester of graduate studies. Prerequisite: graduate standing; completion of other required practicum courses.
CDIS578V Off-Campus Practicum: Clinical Site (Sp, Su, Fa) (1-6) Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: graduate standing; completion of at least 2 semesters of CDIS 522V. CDIS578V Internship: School Site (Sp, Su, Fa) (3-6) Field placement in approved public school setting for clock hours in speech-language pathology assessment and treat-ment in the master's degree program. Students in the Master's program must enroll in a mini-mum of 3 credit hours of CDIS 578V or CDIS 558V during their last semester of graduate studies. Prerequisite: graduate standing; completion of other required practicum courses.
CDIS5990 Special Problems (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.
CDIS599V Seminar in Professional Issues (Sp, Su, Fa) (1-3) Selected topics in professional issues in speech-language pathology and audiology.
CDIS600V Master's Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing. CDIS6099 Seminar in Communication Sciences and Disorders (Irregular) (1-6) Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: advanced graduate standing.

(CEMB) CELL AND MOLECULAR BIOLOGY
CEMB590V Special Topics in Cell and Molecular Biology (Sp, Su, Fa) (1-6) Consideration of new areas in Cell and Molecular Biology not yet treated adequately in textbooks or in other courses. This course may be repeated, provided subject matter is different for a maximum of 6 hours credit.
CEMB5911 Seminar in Cell and Molecular Biology (Sp, Fa) Discussion of current topics in Cell and Molecular Biology. All graduate students in the Cell and Molecular Biology degree program must enroll every fall and spring semester in this course or an approved alternate seminar course. Prerequisite: graduate standing.
CEMB600V Master's Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.
CEMB700V Doctoral Dissertation (Sp, Su, Fa) (1-18) Prerequisite: graduate standing.
Course Descriptions

CENG113H Honors Introduction to Computers (Sp, Fa) Intended for students majoring in computer science or computer engineering, topics include Von Neumann architecture, data representation, high-level language programming, and problem-solving. Prerequisite: CENG 1123. Laboratory experiences to accompany CENG 1123. Corequisite: CENG 1123. (Same as CSCE 1123)

CENG112L Introduction to Programming Laboratory (Sp, Fa) Laboratory experiences to accompany CENG 1123. Corequisite: CENG 1123. (Same as CSCE 1123)

CENG1123 Introduction to Programming (Sp, Fa) Introductory course to programming. Topics include problem analysis and specification, design and test of programming solutions including abstraction, iteration and recursion, program I/O and files. Credit will be allowed for only one of CESC 1123 and CENG 1123. Corequisite: CENG 1123. Prerequisite: CENG 1123. (Same as MAH 2123)

CENG1213 Digital Techniques I (Fa) Introduction to the hardware aspects of digital computers, logic gates, flip-flops, registers, reduction, and state machines. Corequisite: Lab component. Prerequisite: (CSCS 1123 or CENG 1123) and MAH 2123.

CENG1213 Digital Techniques II (Sp) Continuation of Digital Techniques I. Topics include PLD and memory devices, finite state machine analysis, software design tools, and sequential logic design. Corequisite: Lab component. Prerequisite: CENG 2113.

CENG2133 Assembly Language Programming (Sp) Study of the connection between hardware and machine languages. Covers assembly language features and programming concepts. Prerequisite: CENG 2133. (Same as CSCE 3323)

CENG3353 ComputerSubsystem Design (Fa) Structured and automated design techniques for computer systems. Includes the application of subsystems to computers. Topics include hardware/software interface, I/O, memory, interrupts, memory controllers, disk systems, DMA controllers, and A/D and D/A converters. Prerequisite: CENG 2133 and CENG 2123.

CENG3943 Engineering Applications of Unix (Irregular) Structure of UNIX file system, use of exec and fork, interprocess communication and record locking. Prerequisite: CENG 2123.

CENG3953 Logic Synthesis-VHDL (Fa) Representation of digital signals in VHDL. VHDL design description, use of IEEE standard logic package, representation of digital devices in VHDL, verification of arithmetic circuits using VHDL, VHDL for combinational circuits, VHDL sequential statements for registers and counters, VHDL code for finite state machines. Prerequisite: CENG 2123.

CENG4113 Embedded Systems (Irregular) The architecture, software, and hardware of embedded systems. Includes a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VLSI, DOE, test equipment, cell phones, cameras, and robots for factory automation. Corequisite: Drill component. Prerequisite: CENG 2123 and CENG 2133.

CENG4213 Introduction to Computer Architecture (Sp) Design of a single board computer including basic computer organization, memory subsystem design, computer organization of DMA control, interprocessor communication, and bus organization. Prerequisite: CENG 2123 and CENG 3213. (Same as ELEG 4983)

CENG4223 Digital Circuit Testing and Testability (Fa) This course introduces current testing techniques for digital circuits and to design strategies used to enhance their testability. Prerequisite: CENG 4213.

CENG4233 Low Power Digital Systems (Fa) The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has been developed to high performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Prerequisite: CENG 2123.

CENG4343 Computer Graphics (Fa) Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Prerequisite: CENG 2123.

CENG4423 Honors Computer Systems Analysis (Fa) Basic concepts of problem analysis, model design, and simulations methodology. Prerequisite: CENG 3423 and CENG 3425 and be used in this course. Prerequisite: INEG 3313 or STAT 3013.

CENG4423 Computer Systems Analysis (Fa) Basic concepts of problem analysis, model design, and simulations methodology. Prerequisite: CENG 3423 and CENG 3425. Corequisite: Drill component. Prerequisite: INEG 3313 or STAT 3013.

CENG4503 Object Oriented Programming and Design (Fa) In-depth coverage of the methods and techniques of object-oriented design and its applications to data-base and artificial intelligence. Prerequisite: CENG 3943.

CENG4571 Senior Design Project I (Sp) Formerly CENG 457. Students complete comprehensive design project during their final year of undergraduate study. The project is done over 2 semesters in phases; design, implementation, and presentation. The projects include and may require the integration of hardware, software, and human factor elements and are developed to standard engineering specifications. Prerequisite: CENG 4571.

CENG4591 Topics in Computer Hardware (Irregular) Advanced features of computer hardware. Topics include memory, input and output devices, direct memory access techniques, and electro-optical signal conversion and EPROM applications. Corequisite: CENG 4101L. Prerequisite: CENG 4213 or equivalent and graduate standing.

CENG5023 Software Engineering I (IR) A study of design and development used in software and computer systems engineering. Topics include project plan- ning, requirements analysis, software design fundamentals, quality assurance, and software testing and maintenance. Prerequisite: graduate standing.

CENG5033 Software Engineering II (Irregular) A study in software project design and management. The class delves and develops a semester project carrying out the planning, requirements analysis, software and systems design quality assurance, as well as software testing and maintenance. Prerequisite: CENG 5023.

CENG5043 Real-Time Operating Systems (Irregular) A study and implementation of a real-time operating system for process control applications using a single board computer. Prerequisite: CENG 4423.

CENG5083 Digital Circuit Design Verification (Irregular) A study of the principles of formal verification as an alternative to simulation and testing in the elimination of logical design errors in digital systems. Prerequisite: CESC 2123 and graduate standing.

CENG5093 Fault-Tolerant System Design (Sp) Fault-tolerance is concerned with making or recovering from the effects of faults in a digital system, once they have been detected. On-line fault detection is often required before the fault recovery process. This course will familiarize students with currently available techniques for self-checking and fault-tolerant system design. Prerequisite: CENG 5023.

CENG510V Special Problems (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

CENG5153 Real-Time Data Acquisition Systems (Irregular) A study of currently available hardware and software techniques for real-time data acquisition and processing. Prerequisite: CENG 5153.

CENG5161 Introduction to Telecommunications (Fa) Overview of public and private telecommunication systems, service engineering, communications systems basics, information technology, electro-magnetics, data transmission (same as ELEG 5613). Prerequisite: graduate standing. (Same as ELEG 5613)

CENG5563 Network Performance Evaluation (Sp) A study of performance modeling tools for telecommu- nication networks, computer networks, and wireless networks. Prerequisite: STAT 3013 or equivalent and graduate standing. CENG5564 Computer Networks (Irregular) A study of computer communication networks, including the data link layer, routing, flow-control, local area networks, TCP/IPv4, ATM, IS-ISDN, queueing analysis, and recent developments in computer communications. Prerequisite: graduate standing.

CENG5565 Network Security (Irregular) This course introduces security and secrecy in a networked environment. It is intended to familiarize students with the principles of computer communication, and how they inter-relate to provide secure networks in public and private settings. Prerequisite: graduate standing.

CENG4853 Image Processing (Irregular) Concepts involved in the processing of digital images. Emphasis on image analysis, enhancement, and restoration. Itoh spatial and frequency domain approaches are presented. Prerequisite: graduate standing and working knowledge of
CHEG1113 Introduction to Chemical Engineering (Su, Fa) An introduction to the field of chemical engineering. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed and the application of computers to chemical engineering problems is introduced.

CHEG1123 Introduction to Chemical Engineering II (Sp, Su) Multi-stage, multi-unit mass balances; vapor-liquid equilibrium; mass balances; rate concepts; thermodynamics and equilibrium stage concepts; engineering economics; professionalism; ethics; computer applications; introduction to process simulation. Prerequisite: CHEG1113 and MATH 1103 or (CHEG 1113 and MATH 1103).

CHEG1133 Fundamentals of Chemical Engineering (Sp, Su) This course is a combination of CHEG 1113 and CHEG 1123 for transfer students and students requiring the prerequisite to CHEG 2133. (Same as CHEG 1113 and CHEG 1123) 1 credit hour

CHEENG1151 Seminar (Sp, Fa) Oral presentations given by graduate students on the application of computers in chemical and mechanical disciplines. Prerequisite: graduate standing.

CHEG5801 Seminar (Sp, Fa) Oral presentations given by graduate students on the application of computers in chemical engineering and computer science. Prerequisite: graduate standing.

CHEG581V Master’s Research Project and Report (Sp, Su, Fa) 1-6 credit hours required for course option. Prerequisite: graduate standing.

CHEG5903 Advanced Computer Architecture (Irregular) A study of advanced architectural techniques employing VLSI technology and multipurpose computers with emphasis on uniprocessor systems, uniprocessor topics; support for instruction-level parallelism (branch prediction, multiple instruction issue, speculative execution, computer optimizations for ILP), advanced memory system design, high-performance I/O. Multiprocessor topics: cache coherence protocols, memory consistency models, synchronization mechanisms. Prerequisite: CENG 4213 or equivalent and graduate standing.

CHEG5913 Advanced Compilers (Irregular) Compiler issues are discussed with regards to contemporary languages and architectures. Such topics as flow analysis, optimization, code scheduling, parallelism, and memory use will be covered. Prerequisite: graduate standing.

CHEG5923 Research Topics in Computer Architecture (Irregular) This course focuses on the design of high performance central processing units (CPUs). The design of superscalar, superpipelined, decoupled and multithreaded architectures will be covered. Course materials will be drawn from literature, and will represent the current state of the art. Prerequisite: CENG 4213 or equivalent and graduate standing.

CHEG5933 CAD Methods for VLSI (Irregular) Introduction to computational methods for the design and implementation of computer aided design (CAD) tools for digital systems engineering. The underlying theory of the tools is emphasized in addition to their application. Prerequisite: proficiency using a modern high-level programming language and CENG 4213.

CHEG5943 Computer Arithmetic Circuits (Irregular) Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course is intended for students interested in digital systems and practical circuit design to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits. Pre- or Corequisite: graduate standing.

CHEG5963 Computer Systems Optimization (Sp, Su, Fa) Design considerations and performance analysis of computer and communication systems modeling. Prerequisite: CENG 5943.

CHEG5973 Advanced Embedded Systems Design (Irregular) A theoretical and practical study of embedded systems design. The use of the state principle and hazard identification, and risk assessment in the chemical process industries. Special attention to attaining a high order of accuracy and to presenting results in complete written reports, with emphasis on quality rather than quantity work performed. Pre- or Corequisite: CENG 3135 and CHEG 4613.

CHEG4413 Chemical Engineering Design I (Sp, Fa) An introduction to the assessment of chemical engineering design decisions with applications to the solution of problems in chemical engineering design. Prerequisite: CHEG 2133 and MATH 2574. (Same as CHEG 3143)

CHEG4332L Chemical Engineering Laboratory II (Sp, Fa) Experimental investigations of fluid flow and applications of computer methods to chemical engineering. Prerequisite: CHEG 2313 and MATH 2574. (Same as CHEG 3323) 1 credit hour

CHEG3333H Honors Chemical Engineering Reactor Design (Sp, Su) Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Prerequisite: CHEG 3323. (Same as CHEG 3333) 3 credit hours

CHEG4163 Equil. Stage Mass Transfer (Fa) Application of chemical engineering design to stage-wise and continuous separations in systems approaching equilibrium. Prerequisite: CHEG 3413 and CHEG 4163.

CHEG4263 Environmental Experimental Methodology (Irregular) Introduction to experimental design, environmental analytical method quality assurance of analytical measurements, sample collection and pretreatment. Laboratory work necessary to support a field scale tracer experiment will be required. Prerequisite: senior or graduate standing.

CHEG4473 Corrosion Control (Sp) Quantitative and numerical introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. Prerequisite: CHEG 2133.

CHEG3433L Chemical Engineering Laboratory III (Sp, Su, Fa) Experimental investigations of heat and mass transfer. Special attention to attaining a high order of accuracy and to presenting results in complete written reports, with emphasis on quantity rather than quality work performed. Pre- or Corequisite: CHEG 3135 and CHEG 4613.

CHEG4423 Automatic Process Control (Sp) Application of mathematical modeling methods to the design and analysis of transient phenomena in processes. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Prerequisite: MATH 3404 and CHEG 3134. (Same as CHEG 4423)

CHEG4443H Honors Chemical Engineering Design II (Sp, Su) Responsibility for decision making is placed on the student in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Corequisite: lab component. Prerequisite: CHEG 4413 and CHEG 4163. (Same as CHEG 4443H) 3 credit hours

CHEG4443 Chemical Engineering Design II (Sp, Su) Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Corequisite: lab component. Prerequisite: CHEG 4413 and CHEG 4163. 3 credit hours

CHEG44813 Honors Chemical Process Safety (Fa) Application of chemical engineering knowledge to the study of safety, health, and loss prevention. Hazards and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Prerequisite: senior standing. (Same as CHEG 4813)

CHEG4813 Chemical Process Safety (Fa) Application of chemical engineering principles to the study of safety, health, and loss prevention. Hazards and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Prerequisite: senior standing. (Same as CHEG 4813) 3 credit hours

CHEG4913 Environmental Engineering Chemistry (Irregular) The course focuses on the application of chemical engineering fundamentals to the understanding and solution of environmental pollution problems. It includes study of intra- and inter-phase environmental mass transport, equilibrium distribution of contaminants between the geospheres: air, soil and water. Prerequisite: CHEG 3323 and CHEG 3033.

CHEG4913 Environmental Engineering Chemistry (Irregular) This course focuses on the application of chemical engineering fundamentals to the understanding and solution of environmental pollution problems. It includes study of intra- and inter-phase environmental mass transport, equilibrium distribution of contaminants between the geospheres: air, soil and water. Prerequisite: CHEG 3323 and CHEG 3033.

CHEG4913 Environmental Engineering Chemistry (Irregular) This course focuses on the application of chemical engineering fundamentals to the understanding and solution of environmental pollution problems. It includes study of intra- and inter-phase environmental mass transport, equilibrium distribution of contaminants between the geospheres: air, soil and water. Prerequisite: CHEG 3323 and CHEG 3033.
Prerequisite: CHEG 3153.
CHEG5033 Technical Administration (Fa) Means and methods of evaluating and analyzing design, production, and research.
CHEM5043 Environmental Chemistry (Even years, Sp) Application of chemical principles and techniques to environmental problems, and the chemical interrelationships of these problems. Topics include the chemistry of pollutants, natural and industrial, and the impact of chemical processes on the environment.

CHEM5233 Chemical Instrumentation (Odd years, Fa) Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include absorption and molecular absorption; spectroscopic techniques in the ultraviolet, visible, and infrared spectral regions. Prerequisite: CHEM 4213.

CHEM5253 Spectrochemical Analysis (Odd years, Fa) Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include absorption and molecular absorption; spectroscopic techniques in the ultraviolet, visible, and infrared spectral regions. Prerequisite: CHEM 4213.

CHEM5303 Advanced Organic Chemistry (Irregular) This course is a course in advanced organic chemistry. It is intended for students who have completed CHEM 3603 and who wish to continue their study of organic chemistry. Prerequisite: CHEM 3603.

CHEM5333 Fundamentals of Biochemistry (Odd years, Spring) This course is a course in the fundamentals of biochemistry. It is intended for students who have completed CHEM 3514. Prerequisite: CHEM 3514.

CHEM5463 Quantum Chemistry I (Even years, Sp) Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrödinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotator, hydrogen atom, interaction of matter with radiation. Prerequisite: CHEM 5504. Recommended: MATH 3404.

CHEM6002 Advanced Inorganic Chemistry I (Fa) Reaction mechanisms of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3514.

CHEM6411 Instrumental Analysis Laboratory (Sp) Provides laboratory experience in parallel with the lecture material in CHEM 4211. Laboratory 3 hours per week. Pre- or Corequisite: CHEM 4211.

CHEM6503 Honors Organic Chemistry I Laboratory (Su, Fa) Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3602H. (Same as CHEM 3602M)

CHEM6613H Organic Chemistry II Laboratory (Sp, Su) Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3613. (Same as CHEM 3613H)

CHEM6703 Organic Chemistry I Laboratory (Sp) Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3602H. (Same as CHEM 3602M)

CHEM6703 Organic Chemistry I (Sp) Basic chemistry of the compounds of carbon. Primarily for B.S. and B.A. chemistry majors; lecture 3 hours per week. Pre- or Corequisite: CHEM 3602M. Corequisite: CHEM 3603 and CHEM 3601L. (Same as CHEM 3601L)

CHEM6712 Organic Chemistry I Lab for Majors (Sp) At the introductory level, the introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Lecture-discussion and laboratory 3 hours per week. Corequisite: CHEM 3703. (Same as CHEM 3703H)

CHEM6713 Organic Chemistry I Lab for Majors (Sp) At the introductory level, the introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Lecture-discussion and laboratory 3 hours per week. Corequisite: CHEM 3713. (Same as CHEM 3713H)

CHEM6731 Organic Chemistry I (Sp) Basic chemistry of the compounds of carbon. Primarily for B.S. and B.A. chemistry majors. Lecture 3 hours per week. Pre- or Corequisite: CHEM 3602M. Corequisite: CHEM 3603 and CHEM 3601L. (Same as CHEM 3601L)

CHEM6731 Organic Chemistry I Laboratory (Su) Laboratory exercises in organic chemistry. Meets 3 hours per week. Pre- or Corequisite: CHEM 3602M. Corequisite: CHEM 3603 and CHEM 3601L. (Same as CHEM 3601L)

CHEM6813H Biochemistry I (Fa) The first of a two-course series covering biochemistry for undergraduates in science, biology, and agriculture. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and carbohydrate metabolism. Prerequisite: CHEM 3712L and CHEM 3713L (or CHEM 3713 and CHEM 3712L) and CHEM 3504. (Same as CHEM 3504L)

CHEM6843H Biochemistry II (Sp) A continuation of CHEM 4813H covering topics including biological membranes and membrane transport, the energy transduction of the cell, and mechanisms of gene expression. Prerequisite: CHEM 4813H. (Same as CHEM 5843)

CHEM6853 Biochemical Techniques (Sp) Techniques for handling, purifying and analyzing enzymes, structure and function of proteins, and nucleic acids. Lecture 1 hour; laboratory 6 hours per week. Pre- or Corequisite: CHEM 5813 or CHEM 3801.

CHEM6928V Senior Thesis (Sp, Su, Fa) (1-6) CHEM4033 Chemical Business (Irregular) This course is intended to introduce the topics of Value Creation and Business Strategy Development as applied to industrial chemistry. Topics may include research presentations by students, especially those in the agricultural, biological, and environmental sciences. Prerequisite: CHEM 3504 or CHEM 3504L. (Recommended: MATH 3404).

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.

CHEM6953 Chemical Business (Irregular) Theory and applications of the principles of kinetics to reactions between substances in the gaseous state and in solution. Prerequisite: CHEM 3514.
protein structure and function, enzyme kinetics, enzyme mechanisms, and carbohydrate metabolism. Prerequisite: CHEM 242L and CHEM 3713 (or CHEM 3613 and CHEM 3611L) and CHEM 3514 (or CHEM 3453 and CHEM 3451L). (Same as CHEM 4813H)

CHEM5843 Biochemistry II (Sp) A continuation of CHEM 3843. This course includes biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure and structure and synthesis, and molecular biology. Prerequisite: CHEM 5813. (Same as CHEM 5843H)

CHEM600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

CHEM601I Chemistry Seminar (Sp, Fa) Members of the advanced standing class meet weekly for discussion of current research chemical. Weekly seminar sections are offered for the Departmental seminar and for divisional seminars in biochemistry and in analytical, inorganic, nuclear, and physical chemistry. Chemistry graduates in their senior year are required to present the Departmental seminar and the major divisional seminar sections each semester they are in residence. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. Prerequisites: CHEM 5354 and CHEM 3712L, and CHEM 3713 and senior or graduate standing.

CHEM619V Special Topics in Inorganic Chemistry (Irregular) (1-3) Topics which have been covered in the past include: coordination chemistry of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry.

CHEM6283 Mass Spectrometry (Sp, Odd Years) This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with the magnetic/electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Interpretative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: graduate standing.

CHEM629V Special Topics in Analytical Chemistry (Irregular) (1-3) Topics that have been presented in the past include: electroanalytical techniques, kinetics of chemical reactions, and chemical and electrolysis processes. Interactions of ions with magnetic/electric fields and implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Interpretative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: graduate standing.

CHEM6333 Chemistry of Organic Natural Products (Irregular) Selected topics concerned with structural analysis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633.

CHEM649V Special Topics in Physical Chemistry (Irregular) (1-3) Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectroscopy, nuclear magnetic resonance spectroscopy, and methods of theoretical chemistry.

CHEM6633 Chemistry of Organic Natural Products (Irregular) Selected topics concerned with structural analysis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633.

CHEM6669V Special Topics in Organic Chemistry (Irregular) (1-3) Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereoisomerism, photochemistry, and carbonization chemistry.

CHEM6823 Physical Biochemistry (Even, years, Fa) Physical chemistry of proteins, nucleic acids, and biological membranes. Ultrastructure, absorption and fluorescence, the role of enzymes, and clinical applications. Prerequisite: CHEM 5813 and CHEM 3514 or graduate standing.

CHEM6863 Enzymes (Odd years, Fa) Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: graduate standing (or CHEM 5843 and CHEM 5843H). Prerequisite: CHEM 5813 and CHEM 3514 or graduate standing.

CHEM6873 Molecular Biochemistry (Odd years, Sp) Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry, genetic engineering, molecular biology, and cell biology. Prerequisites: CHEM 5613 and CHEM 5843.

CHEM6883 Bioenergetics and Biomembranes (Even years, Sp) Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843.

CHEM700V Doctoral Dissertation (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

(Chinese) CHIN

CHIN1003 Chinese Language I (Fa) Intermediate Chinese I (Fa) Intermediate courses stress correct pronunciation, Aural comprehension, and simple speaking ability, and lead to mastery of basic grammar and limited reading ability. Prerequisite: CHIN 1003 or equivalent.

CHIN2003 Intermediate Chinese I (Fa) Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. Prerequisite: CHIN 1013 or equivalent.

CHIN2013 Intermediate Chinese II (Sp) Continued development of advanced speaking skills and intensive development of reading skills. Prerequisite: CHIN 2003 or equivalent.

CHIN3003 Advanced Chinese (Fa) Continues to develop speaking, listening, reading and writing skills and presents more complex forms and structures of the language as well as additional characters. Prerequisite: CHIN 2013

CHIN3330 Conversation (Irregular) Guided conversation practice for the intermediate/student. Prerequisite: CHIN 2013 or equivalent.

CHIN3103 Chinese Culture and Film (Sp) A course based on film and readings designed to give insight into Chinese civilization. Emphasis will focus on history, culture, and a variety of the Chinese language. This course is taught in English.

CHIN3983 Special Studies (Irregular) May be offered in subject not specifically covered by courses otherwise listed.

(CIED) CURRICULUM AND INSTRUCTION

CIED0003 Developmental Reading (Sp, Su, Fa) A structured individualized laboratory course in the improvement of reading skills. Prerequisite: meeting U of A admissions reading placement standards. University credit given; does not count toward graduation.

CIED1002 Introduction to Education (Sp, Su, Fa) An introduction to teacher education as it applies to various forms of early childhood instruction. Prerequisite: meeting U of A admissions reading placement standards. University credit given; does not count toward graduation.

CIED1011 Introduction to Education: Practicum (Sp, Su, Fa) This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIED 1002.

CIED1011D1 Introduction to Education: Practicum (Sp, Su, Fa) This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIED 1002.

CIED1011D2 Introduction to Education: Practicum (Sp, Su, Fa) This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIED 1002.

CIED1011D3 Introduction to Education: Practicum (Sp, Su, Fa) This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIED 1002.

CIED2013 Practicum (Sp, Prac) Corequisite: CIED 4113.

CIED4003 Developmental Reading (Sp, Su, Fa) A structured individualized laboratory course in the improvement of reading skills. Prerequisite: meeting U of A admissions reading placement standards. University credit given; does not count toward graduation.

CIED4113 Practicum (Sp, Prac) Corequisite: CIED 4113.

CIED4113 Integrated Communication Skills (Sp) This course is designed to synthesize the foundational content presented in the Bachelor of Science in Early Childhood Education program. It focuses on refinement of generalization knowledge to accommodate specialized content relevant to young children.

CIED4203 Teaching in Inclusive Secondary Settings (Su) This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionally, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students.

CIED4203 Practicum (Sp, Prac) Corequisite: CIED 4113 and CIED 4128.

CIED4113 Integrated Communication Skills (Sp) This course is designed to synthesize the foundational content presented in the Bachelor of Science in Early Childhood Education program. It focuses on refinement of generalization knowledge to accommodate specialized content relevant to young children.

CIED4113 Practicum (Sp, Prac) Corequisite: CIED 4113 and CIED 4128.

CIED4113 Integrated Communication Skills (Sp) This course is designed to synthesize the foundational content presented in the Bachelor of Science in Early Childhood Education program. It focuses on refinement of generalization knowledge to accommodate specialized content relevant to young children.
CIED5042 Reading and Writing Across the Curriculum (Su, Fa) This course teaches the integration of oral and written language. Headings and writing as integrated strands of the language process are presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the research application. Prerequisite: admission to the M.A.T. program.

CIED5052 Seminar: Multicultural Issues (Su) This seminar provides an introduction to the major concepts and issues related to multicultural education. The ways in which race, ethnicity, class, gender, and exceptionality influence students’ behavior are discussed. Prerequisite: admission to the M.A.T. program.

CIED5063 Conceptual and Future Concerns of Childhood Education (Sp, Su) Historical, Contemporary and Future Perspective of Childhood Education. A probe of course in childhood education which deals with historical, current and future concerns. These early childhood concerns include demographic trends, family, composition and change, instructional models, social/political/economic issues, parent/community involvement, and evolving professional roles. Prerequisite: admission to the CHED M.A.I. program.

CIED5073 Case Study in Childhood Education (Sp) Provides the students with experience in conducting case studies and in understanding the discipline. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: admission to M.A.I. program.

CIED508V Childhood Education Cohort Teaching Internship (Sp, Su) Provides the students with experience in conducting case studies and in understanding the discipline. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: admission to M.A.I. program.

CIED5093 Methods of Instruction for Middle Level I (Su) A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). Emphasis is on designing, implementing, microteaching, and the development of middle school instructional materials are included. Prerequisite: admission to M.A.T. program.

CIED5103 Advanced Middle Level Principles (Sp) An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on examining cutting edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: admission to Masters of Arts in Teaching program.

CIED5113 Reading Across the Middle Level (Sp, Su, Fa) An overview of methods and materials for teaching reading to early adolescents. Elective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: admission to the middle level education program and CIED 3113.

CIED5123 Writing Process Across the Curriculum (Middle Level) (Sp) This course will provide an overview of widely accepted methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content.

CIED5132 Research in Middle Level Curriculum and Instruction (Fa) An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practice in educational research and evaluation is done as part of the class. Prerequisite: admission to the MAT program.

CIED514V Internship: Middle Level (Sp, Su, Fa) (1-6) The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in educational courses with practice in the field. Prerequisite: admission to the M.A.T. program.

CIED5150 Middle School Practicum (Sp, Su, Fa) Provides practical experiences in conjunction with specified middle level course. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: enrollment is associated with middle level education courses.

CIED5153 Design and Preparation of Curriculum Materials (Sp, Su, Fa) (Formerly SEED 5153) Principles and procedures for the selection, development, and organization of curriculum materials including learning packages, simulation and gaming, units, courses of study or curriculum guides. Prerequisite: EDUH 5373 or equivalent.

CIED5162 Applied Practicum (Fa) Provides laboratory experiences for RDNG 5123 (Literacy Assessment), and RDNG 113 (Reading in Early Childhood Education). Corequisites: UIL 5163 and UIL 5173. Prerequisite: admission to the M.A.T. program.

CIED5173 Literacy Assessment (Fa) Focuses on assessment of young children’s literacy skills. Techniques include informal observation, direct assessment, indirect assessment, and portfolio assessment. Prerequisite: admission to the CHED M.A.T.

CIED5183 Readings in Early Childhood Education (Fa) Will continue to develop understandings of classic studies and will explore those that have had the most recent issues in early childhood education. Prerequisite: admission to the M.A.T. program.

CIED5193 Methods of Instruction for Middle School (Sp) Second special methods course teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5092 and admission to the M.A.I. program.

CIED5223 Issues and Principles of Secondary Education (Su) This course provides an introduction to the secondary education M.A.I. program. It provides the student with information about foundation issues in education, including history and philosophy of American education, current trends and issues in education, and the major social and economic issues of education. Characteristics of learners, and learning processes. Prerequisite: admission to M.A.I. degree program.

CIED5232 Interdisciplinary Studies (Sp, Su, Fa) Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: admission to the M.A.I. program.

CIED5243 Special Methods of Instruction I (Su) Study of the methods and materials in the special content areas. Includes philosophical, cognitive, and psychological dimensions of teaching the content area. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: admission to the M.A.I. program.

CIED5253 Special Methods of Instruction II (Fa) Study of the methods and materials in the special content areas. Classroom applications of teaching strategies with analysis of teacher effectiveness in seminar settings. Prerequisite: admission to the M.A.I. program.

CIED5262 Special Methods of Instruction III (Sp) Study of the methods and materials in the special content areas. The focus is on student-centered and interdisciplinary teaching strategies. Designed to develop content specific materials and to implement them in the partnership school setting. Prerequisite: admission to the M.A.I. program.

CIED5263 Measurement and Evaluation (Sp, Su, Fa) Study of measurement tools and sampling procedures including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Prerequisite: admission to the M.A.I. program.

CIED5273 Research in Curriculum and Instruction (Sp, Su, Fa) An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative methods in assessment and evaluation are considered. Practice in educational research and evaluation is done as part of the class. Prerequisite: admission to the M.A.I. program.

CIED528V Secondary Cohort Teaching Internship (Sp, Su, Fa) (1-6) Provides internships to students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels.

CIED529V Practicum in Special Education (Irregular) (1-6) Supervised field experiences in special education programs, schools, institutions, and other facilities for exceptional children.

CIED5343 Applied Classroom Management (Fa)
Course Descriptions

An advanced course in managing behaviors in students with exceptionalities. Students are provided with experiences in applying theoretical knowledge to classroom management through identifying, assessing, graphing, and analyzing behavioral data and implementing management plans. Ethical and professional issues in classroom management are addressed.

CIED5373 Appraised Methods for Teaching Students with Exceptionalities (Fa) An advanced course in designing and implementing individualized programs for students with exceptionalities. Students are provided with experiences in applying learning theories and instructional methodologies developed and observed in previous coursework. Prerequisite: acceptance into the SPED M.A.1. program.

CIED5413 Early Childhood Education: Rationale and Curriculum (Irregular) Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies.

CIED5413 Early Childhood Education: Methods and Materials (Irregular) An interdisciplinary approach to methods and materials used in early childhood education with emphasis on developmental literacy. Prerequisite: PSYC 3093 and CIED 5403.

CIED5423 Curriculum Reconstruction (Sp, Su, Fa) Changes in curriculum development and design as related to social, political, sociocultural, and economic theories of curriculum development, implementation and evaluation are researched.

CIED5433 Children’s Literature (Sp, Su, Fa) Issues and trends in children’s literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children’s literature is emphasized. Prerequisite: undergraduate course in children’s literature.

CIED5453 Evaluation Techniques (Irregular) Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques.

CIED5463 Child Behavior and Development (Sp, Su, Fa) Advanced study of research and theory. A thematic and case study approach to child behavior and development which investigates the child’s behavior and needs in the school setting. Emphasis on current research. Prerequisite: PSYC 3093.

CIED5473 Advanced Course in Children’s Literature (Irregular) Compares and contrasts contemporary award winning books with children’s classics, analyzing elements of style. Focuses on use of rhetorical devices. Prerequisite: CIED 3103 and CIED 5433.

CIED5483 Teaching Mathematics (Irregular) Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning and teaching. Prerequisite: undergraduate coursework in teaching elementary or early childhood social studies.

CIED5503 Teaching Science (Sp, Su, Fa) The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school.

CIED5533 Teaching Language Arts (Sp, Su, Fa) The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in teaching reading, writing, listening, and speaking.

CIED5553 Problems in Elementary Education (Sp, Su, Fa) Problems, trends, and issues related to the elementary school.

CIED5573 Reading (Sp, Su, Fa) Teaching of reading to children; techniques, research, and modern practice.

CIED5583 Correlates of Reading Process (Sp, Su, Fa) Emphasis is placed on research pertinent to the student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of the child. Prerequisite: CULI 5073.

CIED5593 Corrective Reading in the Classroom (Sp, Su, Fa) Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with causes of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is recommended for students interested in teaching.

CIED5603 Innovations in School Education (Sp, Su, Fa) An examination of the change process in education with emphasis on the support for or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels.

CIED5613 Contemporary Issues in Education (Sp, Su, Fa) An examination of issues pertinent to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher’s role in dealing with current concerns in these areas.

CIED5623 The School Curriculum (Sp, Su, Fa) General principles and techniques of selecting and organizing curriculum materials.

CIED5633 Analysis of Instruction (Sp, Su, Fa) A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues.

CIED5653 Methods of Middle School Instruction (Sp, Su, Fa) Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: graduate standing.

CIED5663 Evaluation of Instruction (Sp, Su, Fa) Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of various types of test items.

CIED567V Teaching Foreign Cultures in Social Studies Curricula (Sp, Su, Fa) (1-6) Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies.

CIED5683 Adolescent Literature (Sp, Su, Fa) Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. Prerequisite: PSYC 3093 or equivalent.

CIED5696 Interdisciplinary Instruction K-4 (Sp, Su, Fa) Stressors of learning science, mathematics, and reading. Emphasis given to construction processes involving experimentation, investigation, communication, reasoning, and problem solving. Builds foundations in content to show connections and relevant applications of these disciplines.

CIED5723 Nature and Needs of Persons with Mild Disabilities (Irregular) Educational, psychological, and social characteristics of individuals who are mildly handicapped with emphasis on educational modifications.

CIED5753 Nature and Needs of Persons with Serious Emotional Disorders (Irregular) A survey of the educational, psychological, and social characteristics of individuals with serious emotional disorders. Focus is on categories of behavior disorders. Attention is given to the development of corrective instructional and evaluation strategies.

CIED576V Teaching Severely Handicapped Children (Irregular) (1-6) Methods and materials for teaching students with severe handicaps, including severe mental retardation, serious emotional disturbance, and severe physical disabilities.

CIED5793 Corrective Reading Practicum (Sp, Su, Fa) Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continued diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CULI 5093.

CIED5803 Needs of the Gifted and Talented (Fa) Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: graduate standing.

CIED5813 Curriculum Development in Gifted & Talented (Sp) Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803.

CIED5823 Students with Exceptionalities (Sp, Su) Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CULI 5813.

CIED5833 Gifted and Talented (Flex) Practicum (Fa) Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5823.

CIED5873 Assessment of Exceptional Students (Fa) Methods and techniques of assessment of children in all areas of exceptionality with emphasis on diagnosis and classification.

CIED5883 Research in Special Education (Irregular) Review of research in special education including all areas of exceptionality with emphasis on diagnosis and classification.

CIED5893 Organization, Administration and Supervision of Special Education (Irregular) Principles, responsibilities and strategies of organization, administration, and supervision of special education programs.

CIED5903 Adaptive Instruction (Su) An examination of the general principles and techniques for adapting instruction to meet the needs of various learning styles and learning modalities, especially those with exceptional strengths.

CIED5913 Professionalization of Teaching (Sp, Su, Fa) Explores the need for recontextualizing the role and responsibility of career professional teachers and concomitant implications for school improvement and educational change. Reflection and inquiry processes are integrated with emphasis on increasing professionalism in educational bases and professional barriers. Prerequisite: experience as a practicing educator.

CIED5923 Second Language Acquisition (Sp, Su, Fa) Theories, procedures, responsibilities and organization for second language acquisition, including endorsement for teaching English as a Second Language (ESL) testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance.

CIED5923 Second Language Methodologies (Fa) This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). This course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL.

CIED5943 Teaching People of Other Cultures (Fa) This course is in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum.

CIED5953 Second Language Assessment (Sp) This course is in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance.

CIED5963 Reading in Secondary Schools (Sp, Su, Fa) Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students.

CIED599V Special Topics (1-18) CIED6013 Curriculum Development (Fa) Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum; curriculum models, and elements desirable in the curriculum of schools.

CIED6023 Instructional Theory (Irregular) Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives of educational interaction and contextual phenomena of instruction and learning. Prerequisite: EDFD 5373.

CIED6033 Content Specific Pedagogy (Irregular) This course explores the relationship between the content of courses taught in schools and the pedagogical processes that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from their own experiences.

CIED6043 Analysis of Teacher Education (Irregular) This course examines issues, problems, trends, and research associated with teacher education programs in pedagogical content, classroom teaching, and the knowledge and skills in gifted education. Prerequisite: CIED 6033.

CIED6073 Seminar in Developing Creativity (Irregular) A study of the facets of creativity, how they can be applied to be used in one’s everyday life, how they can be
applied in all classrooms, and how to encourage the development of these in students.

CIED6023 Pragmatic Theory and Instruction (Odd years, Sp) Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will develop a learning environment setting.

CIED6103 Early Childhood Education Curriculum (Sp, Su, Fa) Advanced course in curriculum design and evaluation for early childhood education programs. Prerequisite: CIED 5443.

CIED6203 Individual Diagnosis and Remediation in Reading (Sp, Su, Fa) Specialized techniques and material for diagnosis and remediation of reading disability. Holistic reading and instructional setting is developed through emphasis on an interdisciplinary approach to diagnosis, program planning, and remediation. Enrollment limited to 20. Advanced graduate students only. Prerequisite: CIED 5583 and CIED 5589.

CIED6223 Investigations in Reading (Sp, Su, Fa) Research techniques and readings in reading are extensively reviewed by the student. Student is expected to culminate activity in this course by crafting a research problem in the field of reading for possible further study. Prerequisite: reading certification.

CIED6283 Organization of Reading Programs (Sp, Su) Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching setting.

CIED6323 Science Seminar (Sp, Su, Fa) Tread the perspective of science educators who have the necessary background, knowledge, and skills to become effective professionals in higher education. Emphasis is on current trends in secondary science, issues developing in secondary science, research in secondary science, philosophy in science, and history of science education.

CIED6403 Emerging Issues in Special Education (Irregular) A study in the complex issues with which professionals in the field of special education must be familiar and prepared to address.

CIED641V Special Topics in Special Education (Irregular) (1-6) Discussion and advanced studies on select topics in special education. Specific focus on recent developments.

CIED6423 Philosophical and Sociological Bases of Special Education (Irregular) A study of the basic philosophical and sociological bases for current practices in special education. Education.

CIED6433 Legal Aspects of Special Education (Irregular) A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings.

CIED6443 Advanced Research in Special Education (Irregular) A study in the planning, implementation, and evaluation of research in special education.

CIED6484 Effective Teaching: Concepts and Processes (Sp, Su, Fa) This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: admission to the Ph.D. program.

CIED6603 Multicultural Education (Sp, Su, Fa) This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, different views of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis on education schooling experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: admission to the Ph.D. program.

CIED666V Workshop (Sp, Su, Fa) (1-18) Applied training in the field of special education.

CIED674V Internship (Sp, Su, Fa) (1-6) Internship in Special Education.

CIED674V Special Topics (Sp, Su, Fa) (1-6) Discussion and advanced studies on select topics in curriculum and instruction. Specific focus on recent developments.

CIED695V Independent Study (Sp, Su, Fa) (1-6) Independent study.

CIED699V Doctoral Seminar (Sp, Su, Fa) (1-3) Advanced study in the field of special education.

CLST1003H Honors Introduction to Classical Studies: Greece (Sp, Su, Fa) (Same as CLST 1003) CLST1003H Honors Introduction to Classical Studies: Greece (Odd years, Fa) An introduction to the world of Ancient Greece, from the Trojan War to Alexander the Great. Prerequisite: CLST 1003.

CLST1013H Honors Introduction to Classical Studies: Rome (Even years, Sp) A multi-faceted introduction to Roman culture, focusing on the literature, philosophy, architecture, art, and archeology. Prior to 5th century BC are read in English. Lectures liberally illustrated with slides. This course fulfills the second semester world literature requirement.

CLST1016H Honors Introduction to Classical Studies: Rome (Even years, Sp) A multi-faceted introduction to Roman culture, focusing on the literature, philosophy, architecture, art, and archeology. Prior to 5th century BC are read in English. Lectures liberally illustrated with slides. This course fulfills the second semester world literature requirement.

CLST1041V Honors Course (Irregular) (1-6) Prerequisite: junior standing.

CLST4003H Honors Classical Studies Colloquium (Sp) Prerequisite: senior standing. (Same as CLST 4003)

(CMJS) CRIMINAL JUSTICE

CMJS2003 Introduction to Criminal Justice (Sp, Fa) Survey of the field of criminal justice, with an emphasis upon law enforcement, the courts, and corrections. (Same as CMJS 2003)

CMJS2053 Critical Thinking and Writing in Criminal Justice (Sp, Fa) An introduction to methods of critical thinking and writing in criminal justice. Prerequisite: CMJS 2003; optional writing familiarity (Same as CLST 1013)

CMJS3003 Criminal Law and Society (Sp, Fa) Principles and problems of criminal law in contemporary society. Prerequisite: CMJS 2003.

CMJS3023 Criminology (Sp, Fa) A survey of theories of crime causation, development of law, corrections, victimization, and police and policy. Prerequisite: SOC 2013 or SUIC 2033. (Same as SUIC 3023)

CMJS3043 The Police and Society (Sp, Fa) Origins, development, and practice of policing, with an emphasis on police organization, problems, and issues in contemporary society. Prerequisite: CMJS 2003.

CMJS3203 Corrections (Fa) A study of the origins, development, and practices related to corrections, including incarceration, community corrections and supervision, and intermediate sanctions. Prerequisite: CMJS 2003. (Same as SUIC 3023)

CMJS3303 Criminal Procedures (Fa) Legal principles of police work, including arrests, force, interviewing, search and seizure. Prerequisite: CMJS 3003.

CMJS3523 Criminal Investigation (Sp) Survey of the theories, concepts, and legal conditions concerning the techniques used in the location, preservation and presentation of evidence. Prerequisite: CMJS 3003.

CMJS399H Added Credit (Sp, Su) (1-6) Prerequisite: CMJS 2003.

CMJS4003 Internship in Criminal Justice (Sp, Su) Supervised experience in municipal, county or state criminal justice agency, or any other agency which is approved by instructor. Prerequisite: CMJS 3003.

CMJS4013 Special Topics in Criminal Justice (Sp, Fa) Comprehensive study of varied subjects in contemporary criminal justice. May be repeated for different topics.

CMJS5003 Criminal Justice Information Management (Sp, Fa) Advanced study of the information management needs and strategies for effective management of criminal justice systems.

CMJS5013 Digital Imaging of Evidence (Sp) Digital imaging of evidence in the criminal justice system.

CMJS5203 Persuasion (Sp) Theory and practice of persuasive communication.

CMJS5303 Individual Appraisal (Su, Fa) Analysis of concepts, methods, and procedures utilized in individual appraisal.

CMJS5313 Program Organization and Information Management (Fa) Study of client information needs and strategies for effective management of counseling services.

CMJS5323 Counseling Theory (Fa, Su) Introductory survey and critical analysis of major alternative theoretical perspectives in counseling.

CMJS5333 Basic Counseling Techniques (Fa, Sp) Introduction to basic counseling techniques and skills common to multiple theoretical perspectives.

CMJS5343 Counseling Practicum (Sp, Fa) Supervised counseling practice. Pre or Co requisite: CEND 5373 and CEND 5363. Prerequisite: CEND 5303, CEND 5333, CEND 5303, CEND 5403 and Permission.

CMJS5363 Dynamics of Group Counseling (Fa, Sp) Therapeutic and other theoretical information is presented regarding group process and the counselor’s role in that process. An experiential group experience is required. Prerequisite: CEND 5333 and CEND 5323.

CMJS5373 Ethical and Legal Issues in Counseling (Fa, Sp) An examination of the ethical and legal standards governing the counseling profession, training, research, and counseling practice; including client rights; confidentiality; the client-counselor relationship; and counseling research, training, and supervision. Prerequisite: CEND 5303 and CEND 5323.

CMJS5383 Crisis Intervention Counseling (Su) (Formerly CEND 5382) Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CEND 5323 and CEND 5323.

CMJS5403 Case Management and Counseling (Sp) Advanced study of the process of organizing and delivering services to individuals and groups.

CMJS5413 Information Management (Sp) Advanced study of the information management needs and strategies for effective management of information management.

CMJS5433 Management of Counseling Services (Sp, Fa) Advanced study of the information management problems, services, and practices common to multiple theoretical perspectives.

CMJS5450 Information: Pre and Co requisite: CEND 5373 and CEND 5363. Prerequisite: CEND 5303, CEND 5333, CEND 5303, CEND 5403 and Permission.

CMJS5451 Crisis Intervention Counseling (Su) (Formerly CEND 5382) Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CEND 5323 and CEND 5323.

CMJS5453 Management of Counseling Services (Sp) Advanced study of the information management problems, services, and practices common to multiple theoretical perspectives.

CMJS6013 Crisis Intervention Counseling (Su) (Formerly CEND 5382) Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CEND 5323 and CEND 5323.

CMJS6033 Management of Counseling Services (Sp) Advanced study of the information management problems, services, and practices common to multiple theoretical perspectives.
overview of differential treatment. Prerequisite: CNED 5323 and CNED 5333 and CNED Doctoral or Masters Standing or permission.

COMM600V Master’s Thesis (Sp, Su, Fa) (1-6)

COMM6013 Advanced Counseling Theory and Methods (Fa, Even Years) Critical analysis of major theoretical approaches to counseling, including both group and individual counseling strategies for dealing with affective, cognitive, and behavioral dysfunction. Prerequisite: UNL& Doctoral Standing or permission.

COMM6023 Foundations of Marriage and Family Counseling Therapy (Su) Comprehensive examination of the current theories/techniques of marriage, family, and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED Doctoral or Masters Standing or permission.

COMM6033 Advanced Group Theory and Methods (Sp) Comparative study of theories and processes of group counseling, including supervised experience in group facilitation with video recording and playback. Prerequisite: CNED 5363 or equivalent and CNED Doctoral Standing or permission.

COMM6043 Supervision of Counselors (Fa, Even Years) Analysis, assessment, and practical application of counselor supervision techniques in treatment and training programs. Prerequisite: CNED 674 and CNED Doctoral standing or permission.

COMM605V Independent Study (Sp, Su, Fa) (1-18)

COMM6063 Counseling and Sexuality (Su, Odd Years) Analysis of theory and practice in issues related to sexual dysphoria, sexuality, and sexual problems. Prerequisite: CNED 574 and CNED Doctoral standing or permission.

COMM6073 Research in Counseling (Sp, Odd Years) Review and analysis of research in counseling. Prerequisite: UNL& Doctoral standing or permission.

COMM6083 Consultation Theory and Methods (Su) Strategies, practical application, and techniques for effective consultation with parents, teachers, and community agencies. Prerequisite: CNED Doctoral or Masters standing or permission.

COMM6093 Counseling Children and Adolescents (Sp) Introduction to counseling children and adolescents including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED Doctoral or Masters standing or permission.

COMM6123 Clinical Applications of Marriage and Family Counseling and Therapy (Su, Even Year). Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling, in all settings, with emphasis on solution-focused systems, Satir model, and psychosocially family based in schools. Includes supervision of clinical experience in family, marriage and counseling. Prerequisite: CNED 5203 and CNED Doctoral Standing or permission.

COMM6134 Clinical Foundations and Counseling (Sp, Fu) Focuses on basic theories and techniques for the provision of mental health services to the community. Prerequisite: CNED 5323 and CNED 5333 and UNL& Doctoral Standing or permission.

COMM6253 Gender Issues in Counseling and Human Development (Su, Even Years) A study of gender and sex role issues pertinent to the counseling profession, and their effect on the development of children, adults, youth, and families. Prerequisite: Must utilize Fair Guidelines for counseling as presented by the American Counseling Association. Prerequisite: CNED 5203 and CNED Doctoral standing or permission.

COMM624V Internship (Irregular) (1-9) Supervised field placement (Clinical/Instructor/Supervisor). Prerequisite: UNL& Doctoral Standing and Hermann.

COMM680V Educational Specialist Project (Sp, Su, Fu) Prerequisite: Must be a project in which the student will design, implement, and evaluate an educational program, and report required of all t.d.s. degree candidates. Prerequisite: admission to the Ed.S. program.

COMM689V Seminar (Fa, Su) (1-18) Prerequisite: UNL& Doctoral Standing and permission.

COMM700V Doctoral Dissertation (Sp, Su, Fa) (1-18) Prerequisite: candidacy.
COMM4323 Communication and Conflict (Sp) 
Study of the processes, effects, and managements of communication conflict, including the resolution of conflict between groups and individuals.

COMM4324 Intercultural Communication (Fa) 
Study of intercultural communication skills, intercultural issues and their impact at home and abroad, and cross-cultural differences.

COMM4333 Television Writing (Sp, Su, Fa) 
A study of the techniques and styles of television commercial writing. Emphasis on persuasion.

COMM4343 Interstitial Communication (Fa) 
Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of narrative techniques and their impact on mass media messages.

COMM4353 American Public Address (Irregular) 
Historical and critical study of the leading American speakers, their speeches, the issues with which they were identified. Lectures, discussions, reports, and critical papers.

COMM4373 Political Communication (Sp) 
Study of the nature and function of the communication process as it operates in the political environment. (Same as PLSC 4373)

COMM4383 Rhetoric of the Modern American Presidency (Sp, Su, Fa) 
A study of the increasing reliance on television for political communication.

COMM4413 Communication, Negotiation, Mediation and Conflict Resolution (Irregular) 
Examine Alternative Dispute Resolution (ADR) research and techniques focusing primarily on negotiation and mediation. Emphasizes the assumptions and concepts in a relational approach to interpersonal communication. Provides exposure to a sampling of the research findings in relational communication.

COMM4633 History and Development of International Film (Sp) 
A critical survey of international film as a distinctive art form and as a medium of expression and communication, with reference given to films and cinema from its origins to the present.

COMM4683 Documentary Film (Fa) 
A study and analysis of the documentary film as a discrete form and as an art form as an independent cinematic scene. Prerequisite: advanced standing.

COMM4793 Directing Forensics (Irregular) 
Practicum directing, and coaching co-curricular forensics teams at the high school or college level.

COMM4823 Children and Media (Sp) 
An in-depth examination of children's use of media and the effects of media content on child and adolescent development. Topics may include violence and sex in media, commercialism, and new media.

COMM4833 Television Writing (Fa) 
Comprehensive analysis of the techniques and styles of television commercial writing. Emphasis on the economic and social impact of commercials, news, censorship, children's programs, blacks and women on television, future developments in the field.

COMM4883 Television and American Culture (Fa) 
Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of narrative techniques and their impact on mass media messages, particularly how race and gender shape content and reception of programming.

COMM490V Special Problems (Sp, Fa) 
1-6 Credit arranged. Prerequisite: graduate standing.

COMM4913 Internship in Communication (Sp, Su, Fa) 
Internship in applied communication within public and private organizations.

COMM5111 Colloquium in Communication Research (Sp, Fa) 
Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence.

COMM5113 Historical and Legal Methods in Communication (Fa) 
Emphasizes the assumptions and procedures of historical and legal research methods in communication.

COMM5123 Quantitative Research Methods in Communication (Fa) 
Describes the assumptions and procedures of social scientific research methods in communication.

COMM5133 Media Processes & Effects (Fa) 
Introduction to scholarly research and theory in media processes and effects. Emphasis will be placed on the impact of media messages on individuals and societies.

COMM5143 Ethnographic Methods in Communication (Sp) 
This course focuses on the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills.

COMM5193 Seminar in Communication (Sp, Su, Fa) 
Research and discussion; papers on a variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours.

COMM5233 Seminar in Persuasion (Fa) 
Focus is on comparing theoretical orientations and research evidence concerning the effects of various factors on persuasion.

COMM5333 Communication Theory (Sp) 
Survey of the theoretical orientations in communication theory with primary focus on conceptual, theoretical, and philosophical issues.

COMM5343 Interpersonal Communication (Fa) 
Theories of communication and the mutual influencing of behavior among people.

COMM5353 Rhetorical Criticism (Sp) 
A seminar in rhetorical criticism. A study of the development of standards of rhetorical evaluation, the development of the art of speaking to the modern period; examination of rhetorical approaches to rhetorical appraisal. Practice in critical analysis of contemporary addresses.

COMM5363 Seminar in Small Group Communication (Su) 
A seminar in the development of small group research which relate to problem solving tasks, leadership and other kinds of human interaction through small group processes given to group interpersonal speech transaction and to the emergence of participant roles. Prerequisite: COMM 3303 or SOCI 4193.

COMM5373 Content Analysis (Irregular) 
Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: graduate standing.

COMM5383 Seminar in Political Communication (Irregular) 
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, and political symbols. Prerequisite: graduate standing.

COMM5393 Seminar in Contemporary Rhetoric (Sp) 
Study of contemporary perspectives on rhetoric, including scholars such as Burke, Richards, Weaver, Grassi, MacIntyre, Derrida, and Rorty. Prerequisite: graduate standing.

COMM5403 Organizational Communication Theory (Sp) 
A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports.

COMM5413 Organizational Communication Research (Su) 
A seminar on conducting applied research within an organizational setting.

COMM5423 Seminar in Mass Media Cognition (Sp) 
Seminar exploring how people learn from written, spoken, and visual mass media messages. Topics to include attention, memory, comprehension, emotional response, arousal, unconscious processing, picture perception and person perception. Students will be concerned with most popular media (e.g., television, radio, newspaper, and film), and with several content genres (e.g., entertainment, news, advertising).

COMM5433 Marital Communication (Even years, Sp) 
An exploration of the major theories and lines of research that examine marital communication in contemporary American life.

COMM5443 Issues of Race and Gender in Interpersonal Communication (Odd years, Sp) 
An exploration of the major theories and lines of research that examine how race and gender influence interpersonal communication.

COMM5453 Myth and Communication Criticism (Sp) 
Seminar in major theories of myth, including archetypal and ideological perspectives, and their applications to the criticism of public communicative events. Practice in written critical analysis. Prerequisite: graduate standing.

COMM5503 Communication and Cultural Studies (Sp) 
Examinations of the role of communication in modern American society. Emphasis is upon the relationships of communication to the development of meanings with society, and special attention is given to the role of popular and mass media in this process.

COMM5553 Family Communication (Even years, Fa) 
An exploration of the major theories and lines of research that examine family communication in contemporary American life.

COMM569V Seminar in Film Studies (Irregular) 
Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, the film music, and film acting as ENGL 569W.

COMM590V Special Problems (Sp, Su, Fa) 
1-6 Credit arranged. Prerequisite: graduate standing.

COMM5913 Internship in Communication (Sp, Su, Fa) 
Internship in applied communication within public and private organizations. Prerequisite: 15 hours graduate level communication in residence.

COMM600V Master's Thesis (Sp, Fa) 
Prerequisite: graduate standing.

(CSCE) COMPUTER SCIENCE AND COMPUTER ENGINEERING

CSCE1003 Survey of Computer Concepts (Sp, Su, Fa) 
Vocabulary of computers, covering terminology and concepts of large and small computers. Uses of computers in science, business, and government. Introduction to the use of a computer; students wishing to learn programming language should take CSCE 1023. Credit will not be given for both CSCE 1003 and CSCE 1012.

CSCE1012 College Computing Skills (Sp, Su, Fa) 
Introduction to the computer; basic computing skills including operating systems, word processing, spreadsheet and data-base management applications; Internet applications; using electronic mail, remote computing via Telnet, file transfer via ftp, World Wide Web navigation and publication. No prior computing skill is necessary.

CSCE1021L Programming Laboratory for Non-CSCE Majors (Sp, Fa) 
Laboratory exercises appropriate to Programming. Pre- or Corequisite: CSCE 1023. (Same as CSCE 1021LM)
CSCE1023 Programming for Non-CSCE Majors (Sp, Fa) Teaches how to design, implement, and document computer programs in languages of good programming style. This course cannot be taken by CSCE majors for credit. Corequisite: CSCE 1021L. (Same as CSCE 1023H)

CSCE1111L Programming Foundations I Lab (Sp, Su) Laboratory experiences to accompany CSCE 1113. Corequisite: CSCE 1113.

CSCE1113 Programming Foundations I (Sp, Fa) Introductory course for students majoring in computer science or computer engineering. Topics include data representation, high-level languages, looping, functions, pointers and introduction to UNIX operating system. Corequisite: CSCE 1111L.

CSCE1121M Honors Programming Foundations II Laboratory (Sp, Fa) Laboratory experiences appropriate to CSCE 1123 and CSCE 1123H.

CSCE1121L Introduction to Programming Laboratory (Sp, Fa) Laboratory experiences appropriate to CSCE 1123. Corequisite: CSCE 1123 (Sp) as CSCE 1123L

CSCE1123H Honors Programming Foundations (Sp, Fa) Introductory course to programming. Topics include problem analysis and specification, design and test of programming solutions, toile, decomposition, abstraction, iteration and recursion, program I/O and files. Credit will be allowed for only one of CSCE 1023 and CSCE 1123H. Corequisite: CSUCIL 1121L. Prerequisite: ENGN 1113.

CSCE1123 Introduction to Programming I (Sp, Fa) Specification and implementation of computations. Fundamental topics: problem solving and analysis techniques, procedure and data abstraction, fundamental data types, arrays, linked lists, recursion, basic sorting and searching, an introduction to object oriented programming. Corequisite: CSCE 1121L. Prerequisite: ENGN 1113. (Same as CSCE 1123)

CSCE1123L Introduction to Internet/World Wide Web Laboratory (Fa) Laboratory to accompany CSCE 2812. Students develop practical skills in, and learn to apply industry-wide standards and practices for, Web page design and layout, electronic publishing, network communications, cybermedia authoring systems, and such bandwidth-limiting enhancements as animation and applets. Corequisite: CSUCIL 2812.

CSCE2812 Introduction to Internet/World Wide Web (Irregular) An introduction to Internet and World Wide Web tools and resources, including Web browsers, robots and search engines, multimedia authoring systems, electronic publishing systems, virtual reality systems, network computing, multimedia communication and networking systems, digital watermarking, Web sensors, Web authoring and programming languages. Corequisite: CSUCIL 2811L or CSUCIL 1023L.

CSCE2812L Internet/World Wide Web Laboratory (Sp, Fa) Provides an introduction to the Internet and World Wide Web. Corequisite: CSCE 2812.

CSCE3411L Internet Programming Laboratory (Sp) Lab will help students develop practical skills in, and learn to apply industry standards and practices for, Web site design and layout, network communications, cybermedia authoring systems, and animation, applets, etc. Course requires some introduction to scripting or programming. Corequisite: CSUCIL 3411.

CSCE3412 Internet Programming (Sp) HTML authoring to W3C standards, use of environment and shell variables, programming concepts with both scripting languages and interpreted and compiled languages, creating Web documents, applications, advanced tum applications, search/index utilities, Web databases. Course requires some introduction to scripting or programming. Corequisite: CSUCIL 3412.

CSCE3412 Internet Programming (Sp) HTML authoring to W3C standards, use of environment and shell variables, programming concepts with both scripting languages and interpreted and compiled languages, creating Web documents, applications, advanced tum applications, search/index utilities, Web databases. Course requires some introduction to scripting or programming. Corequisite: CSUCIL 3411L. Prerequisite: CSUCIL 3411.

CSCE390V Topics in Computer Science (Irregular) (1-6) Topics not offered in depth in other computer science courses. Prerequisite: Junior standing.

CSCE4311L Computer Programming I (Irregular) Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled parallel computer architectures; designing algorithms for concurrency; distributed computer architectures. Prerequisite: senior standing in computer science or engineering.

CSCE4313 Machine Design (Irregular) Industrial systems; machine tools; general machine design principles; metalworking processes; computer-aided design of parts. Prerequisite: CSCE 1413.

CSCE4323 Languages (Sp) Comparison of imperative, object-oriented, and functional styles of languages; language extensibility, design of language interpreters, lexical analysis, grammars/parsing, evaluation strategies. Prerequisite: CSCE 2143 or CENG 2143.

CSCE4323 Introduction to Formal Languages and Computability (Irregular) Finite Automata and regular languages, regular expressions, context-free languages, pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Prerequisite: CSCE 313.

CSCE4413 Computer Systems Architecture (Sp, Fa) An introduction to operating systems including topics in system structures, process management, storage management, file systems, and distributed systems. Corequisite: CSCE 2133 and CSCE 2143 or CENG 2143. (Same as CENG 4413, ELEL 4931)

CSCE4513 Software Engineering (Sp, Fa) A modern approach to the current techniques used in software design and development. This course emphasizes the use of modern software development tools, multi-module programming, and team design and engineering. Prerequisite: CSCE 2143 or CENG 2143 (Same as UINL 4513)

CSCE4523 Software Engineering (Sp) Basic principles of software engineering systems (Irregular) Introduction to database management system tools, architecture, storage structures, indexing, relational data model, ER diagrams, languages, SQL, ODBC, transaction processing, concurrency, and security. Prerequisite: CSUCIL 2143 or UINL 2143.

CSCE4533 Software Design (Irregular) A study of object-oriented design patterns, their general applications in software design, and their particular applications in framework design. Reusable behavioral, creation, and structural design patterns. Prerequisite: CSCE 1123 or UINL 1123 and CSUCIL 3313.

CSCE4543 Software Architecture (Irregular) A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques and tools for evaluating software architectures. Prerequisite: CSCE 3313 and CSCE 4513.

CSCE4551 CS Capstone I (Sp, Fa) Computer Science students complete a comprehensive software capstone project during their final year of undergraduate studies. The project is done over 2 semesters in phases: concept, formal proposal, implementation, and presentation. The project must be done in collaboration with one or more students drawn from real systems designed to solve real problems, to include problem analysis and specification, design and test of programming solutions, toiles, decomposition, abstraction, iteration and recursion, basic sorting and searching, an introduction to object oriented programming. Corequisite: CSCE 4123 and CSCE 4123H. Prerequisite: ENGN 2103 and CSCE 2143. (Same as CSCE 4123)

CSCE4551L CS Capstone I Laboratory (Irregular) Same as CSCE 4551.

CSCE5263 Computational Complexity (Irregular) An in-depth study of the computational complexity of problems, problems, pseudo-polynomial and approximation techniques. Prerequisite: graduate standing.

CSCE5323 Principles of Compiler Construction (Irregular) Lexical analysis, parsing, syntax tree construction, intermediate code generation, run-time simulation. Prerequisite: graduate standing.

CSCE5263 Formal Languages (Irregular) An advanced continuation of CSCE 4263. Prerequisite: CSCE 4263 and graduate standing.

CSCE5283 Computational Complexity (Irregular) An introduction to the theory of computation, including Turing machines, recursive and nonrecursive functions, complexity measures, NP-completeness, analysis of NP-complete problems, pseudo-polynomial and approximation techniques. Prerequisite: graduate standing.

CSCE5283 Graph and Combinatorial Algorithms (Irregular) A study of algorithms for graphs and combinatorial structures, with special attention to graph coloring, matchings, and traveling salesman. Prerequisite: graduate standing.

CSCE5411 Advanced Operating Systems (Irregular) Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; case studies of specific operating systems. Prerequisite: CSCE 4413 or equivalent and graduate standing.

CSCE5323 Computer Security (Sp) Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 4413.

CSCE5323 Computer Forensics (Fa) Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officials, legal issues related to computer and network forensics. Prerequisite: CSCE 5303.

CSCE5411 Intelligent Robot Control (Irregular) This course is designed to examine software issues surrounding the creation and control of autonomous robots. Techniques include: genetic programming, artificial neural networks, reinforcement learning, and symbolic methods. Projects are run in simulation and on actual robotic controllers. Prerequisite: CSCE 4413.

CSCE5513 Intelligent Robot Control (Irregular) An in-depth introduction to database management systems. Topics include: architecture, schemas, data sources, file structures, indexing, data models (relational, hierarchical, network, entity relationship, object-oriented), query languages, views, relational algebra, SQL optimization, user UIs, transaction management, concurrency control, recovery, integrity, security, and commercial trends. Prerequisite: CSCE 2143 or CENG 2143 and graduate standing.

CSCE5123 Database Management Systems (Irregular) In-depth introduction to database management systems. Topics include: architecture, schemas, data sources, file structures, indexing, data models (relational, hierarchical, network, entity relationship, object-oriented), query languages, views, relational algebra, SQL optimization, user UIs, transaction management, concurrency control, recovery, integrity, security, and commercial trends. Prerequisite: CSCE 2143 or CENG 2143 and graduate standing.

CSCE5323 Principles of Compiler Construction (Irregular) Lexical analysis, parsing, syntax tree construction, intermediate code generation, run-time simulation. Prerequisite: graduate standing or instructor consent.

CSCE5303 Parallel Programming (Irregular) An in-depth study of parallel computing with respect to soft- ware engineering. Practical programming experience on pipelined, array, and multi-processor computers. Prerequisite: CSCE 4313 or equivalent and graduate standing.

CSCE5353 Advanced Operating Systems (Irregular) Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; case studies of specific operating systems. Prerequisite: CSCE 4413 or equivalent and graduate standing.

CSCE5333 Computer Security (Sp) Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 4413.

CSCE5333 Computer Forensics (Fa) Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officials, legal issues related to computer and network forensics. Prerequisite: CSCE 5303.

CSCE5411 Intelligent Robot Control (Irregular) This course is designed to examine software issues surrounding the creation and control of autonomous robots. Techniques include: genetic programming, artificial neural networks, reinforcement learning, and symbolic methods. Projects are run in simulation and on actual robotic controllers. Prerequisite: CSCE 4413.
CSES1011 Introduction to Crop, Soil, and Environmental Science (Fa) An introduction to the CSES department and majors in Environmental Soil and Water Sciences and Crop Management. Emphasis will be placed on issues and opportunities within these disciplines and orienting students to the department and University of Arkansas. Required of all department majors with less than 24 semester credit hours. Recitation 1 hour 20 minutes per week. Corequisite: Lab component. Prerequisite: must have completed 60 hours of coursework.

CSES1203 Introduction to Plant Sciences (Sp, Fa) An introduction to the principles of organic agriculture, animal science, and the regulations governing organic production and certification. Additional topics include crop rotations for pest management and for increasing soil organic matter, feeding the soil and plant nutrition, soil health, and green manuring, corporate agriculture and genetically modified organisms.

CSES1393 Crop Management (Sp) An introductory course to basic principles of pest management as they relate to vertebrate animals, insects, plant disease and weeds. Selected pests are studied with emphasis on current management practices. Corequisite: Lab component. Prerequisite: must have completed 60 hours of coursework.

CSES2101L Crop Science Laboratory (Sp) A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103.

CSES2103 Crop Science (Sp) Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agricultural crop species. Lecture 3 hours per week. Prerequisite: CSES 1203 or HOUH 1203.

CSES2201L Soil Science Laboratory (Fa) Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all coursework and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre-corequisite: CSES 2203.

CSES2202 Introduction to Geographical Information Systems (Irregular) Overview of digital unified multimedia. Programming methodology involved in integration of all forms of digitized information (e.g., text, sound, graphics, animation, and process control) in a single computer-based interactive environment. Prerequisite: graduate standing.

CSES2572 Client-Server Computing (Irregular) Advanced Object oriented methods for designing software systems for network applications. Topics include implementation of distributed object models, remote database connectivity, Server side programming, and reusable components. Prerequisite: CSEC 5743 and graduate standing.

CSES3733 Information Agency (Sp, Su, Fa) Study of software agents and their deployment on the internet: precursors to agents - viruses and worms, origins of software agents, delegate vs. representative agents, agency of the Internet. Permits students to examine guidelines for agents, IP transaction security, MUD agency, intelligent agency, application of agents: indexes, resource managers, search utilities, commercial applications. Prerequisite: graduate standing.

CSES3762 Advanced Programming for the Internet (Irregular) Object oriented design and programming for Internet/client/server applications. Basics of the Internet, including TCP/IP protocol stack, Introduction to UHTTP client/server design and Object Oriented Design with Unified Modeling Language. Sockets application programming interface. Graphical user interfaces. Prerequisite: graduate general enrollment.

CSES500 Advanced Topics in Computer Science (Irregular) (1-3) Topics not covered in depth in other courses. Prerequisite: graduate standing.

CSES5953 Real-Time Systems (Irregular) A study of real-time computing, development of real-time systems will be examined from the standpoint of academia, government, and industry. Scheduling, operating systems, and architecture considerations are among other topics to be covered. Prerequisite: graduate general enrollment.

CSES610V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

CSES620 Research in Computer Science (Irregular) (1-6) Prerequisites: graduate standing.

CSES690V Graduate Seminar (Irregular) (1-6) Concentrated study in selected areas of computer science research. Prerequisite: advanced graduate standing.

CSES700V Doctoral Dissertation (Sp, Su, Fa) (1-18)
specific topics in agronomy. Prerequisite: graduate standing.

CSES5053 Scientific Writing (Fa) Open to graduate students in agricultural and life sciences. The course will cover understanding the scientific literature, writing theses, proposals, journal articles, and other scientific documents. Emphasis on style and techniques used in scientific publications. Lecture 3 hours per week. Prerequisite: graduate standing.

CSES5103 Scientific Presentations (Sp, Fa) Experience in procedures required for professional presenta-
tions of laboratory research, technical papers, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: CVEG 3243.

CSES5124 Crop Molecular and Physiological Genetics (Even years, Sp) Study of genome organization and expression in agronomic and horticultural plants, with emphasis on genes regulating physiological processes. Lecture 3 hours, discussion 1 hour per week. AGHN 5013 and CHEM 5843 and CHEM 5843 are recommended but not required. Corequisite: HORT 5120D. Prerequisite: BIOL 4304 and MICS 3201 and MICS 3201L (or ANSL 3123).

CSES5204 Applied Math Methods in Life Sciences (Odd years, Fa) Methods of data presentation and mathematical descriptions of research data in the life sciences including: data presentations, linear regression, growth equations, kinetics, transport equations, and compartmentalization. Analytical, numerical, and statistical approaches to the solution of research problems in life sciences. Lecture 3 hours, laboratory 3 hours per week. Corequisite: CSES 5200L. Prerequisite: MATH 2954 and AGST 4023.

CSES5214 Analytical Research Techniques in Agronomy (Fa) Preparation and analysis of plant and soil samples utilizing spectrophotometry, iso-
topes, and chromatographic separation methods. Additionally, measurements are made of photosynthates, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: CSES 5210L. Prerequisite: BIOL 4304 and CHEM 2613 and CHEM 2611L.

CSES5226 Soil Physics (Sp) Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: CSES 5220L. Prerequisite: CSES 2200 and MATH 1203.

CSES5233 Plant Genetic Engineering (Even years, Sp) Topics will be covered in the field of in vitro plant propagation and design of transgenic plant technology. Concepts and applications of transgenic plant technology will be discussed, with the emphasis on the strategies for crop improvement and gene discovery. Lecture 3 hours.

CSES5243 Crop Fertility (Even years, Sp) An advanced consideration of the chemical, physi-
cal, and biological phenomena which influence the nutri-
ent-supplying power of the soil. Lecture 3 hours per week. Prerequisite: CVEG 4223.

CSES5264 Soil Microbiology (Odd years, Fa) A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Corequisite: CSES 5260L. Prerequisite: BIOL 2013 and BIOL 2011L.

CSES5353 Advanced Hay and Silage Production (Fa) Advanced study of the principles of good hay and silage production. The course includes a detailed review of forage nutritive value followed by an in-depth discussion of the management of wilted forage crops, stage biochemistry, ensiling characteristics of various forages, silo management, spontaneous heating in hay and silage, dry matter loss, management of stored hay, and changes in forage quality that result from poor conservation of harvested forages. Prerequisites: CSES 3113, ANSC 3152 and ANSC 3151L. (Same as ANSL 3363).

CSES5453 Soil Chemistry (Even years, Sp) Application of the principles of chemistry to processes of agricultural productivity and soil health. Emphasis on soil bi-
ology, soil chemical processes, structure and reaction structure and reactivity of humus, surface complexation and ion exchange, elec-
tro-chemical phenomena, and colloidal stability. Prerequisites: CSES 3113 and CHEM 1121L.

CSES5553 Plant Genomics (Odd years, Fa) Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of research including structural, comparative and functional genomics as well as proteomics. Pre-requisite: CHEM 5843 or any general level genetics course.

CSES600V Master's Thesis (Sp, Su, Fa) Introduction to theories and fundamentals of physi-

cal, chemical, and biological processes with emphasis on water supply and wastewater collection, transport, and treatment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 3213 and CHEM 1123. (Same as ENSC 3253)

CSES6253 Septic Systems (Odd years, Sp) An overview of designing, installing, and monitoring standard and alternative septic systems as well as the rules and regulations that impact septic system design and installation. Lecture 3 hours per week. Prerequisite: CVEG 2053 or CVEG 3213. (Same as ENSC 3253)

CSES6304 Structural Analysis (Sp, Su, Fa) Truss analysis, influence lines for beams and trusses, and effects of moving loads. Deformation of beams, frames, and trusses. Analysis of indeterminate structures to avoid collapse, slope detection, and moment distribution methods; approximate methods of analysis. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 1113 and MEEG 3013.

CSES6413 Transportation Engineering (Sp, Su, Fa) Introduction to highway and transportation engineering, planning, finance, economics, traffic, and geometric design of transportation facilities; theory and application of driver, vehicle and roadway characteristics as they relate to road-

way and intersection design; safety, capacity, traffic opera-
tions, and environmental effects for highway engineering. Prerequisite: CVEG 2053.

CVES4003 CAD & Visualization for Civil Structures (Sp, Su, Fa) Design process of infrastruc-
tures using 3-Dimensional (3D) CivilCAD Designed and Engineering Visualization with a highway design emphasis. Students produce a digital model for a designed civil structure as a class project. Develop skills in photo matching for place-
ces and constructed structures in real environment. Prerequisite: senior standing.

CVES4083 Control Surveys (Sp, Su, Fa) Sun and Polaris observations for astronomical azimuth, solar access studies; control traversing, leveling, triangulation; state plane coordinate systems. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2053 and CVEG 2051L.

CVES4133 Foundation Engineering (Sp, Su, Fa) Introduction to geotechnics and design of retaining walls, slope, piles and piers. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 1113 and CVEG 3133.

CVES4153 Earth Structures (Sp, Su, Fa) Design and construction of retaining walls, slope, piles and piers. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 1113 and CVEG 3133.

CVES4233 Environmental Engineering Design (Sp, Su, Fa) Application of physical, biological, and chemi-
cal operations and processes to the design of water supply and wastewater treatment systems. Prerequisite: CVEG 3223 and CVEG 3243.

CVES4253 Small Community Wastewater Systems (Sp, Su, Fa) Design of innovative and alterna-
tive wastewater collection, transport, and treatment systems typically suited for rural and small community applications. Recitation 3 hours per week. Prerequisite: CVEG 3243.

CVES4263 Environmental Regulations and Permits (Fa) Topics include federal and state environmen-
tal regulations, the permitting process, permit requirements and related issues. Prerequisite: CVEG 4243 and senior standing.

CVES4303 Reinforced Concrete Design (Sp, Su, Fa) Design and construction of concrete elements with emphasis on ultimate strength design supplemented by working stress design for deflection and crack analysis. Prerequisite: CVEG 3243 and MEEG 3013.

CVES4313 Structural Steel Design I (Sp, Su, Fa) Design of structural steel elements by elastic design the Load and Resistance Factor Design method. Intensive treatment of structural steel design concepts, loading, stress and safety factors, design of members subjected to tension, eccentric loading, and interaction effects for highway engineering. Prerequisite: CVEG 3243.
CVEG4848V Special Problems (Sp, Su, Fa) (1-6) Prerequisite: senior standing.
CVEG4849VH Honors Studies in Geotechnical Engineering (Sp, Su, Fa) (1-6) The study of advanced topics in the geotechnical engineering field. May include participation in geotechnical engineering courses normally available only to graduate students. Course may be repeated for up to 6 hours total credit with approval of the CVEG honors advisor. Prerequisite: CVEG 3433.
CVEG493VH Honors Studies in Structural Engineering (Sp, Su, Fa) (1-6) The study of advanced topics in the structural engineering field. May include participation in engineering courses normally available only to graduate students. Course may be repeated for up to 6 hours total credit with approval of the CVEG honors advisor. Prerequisite: CVEG 3433.
CVEG494VH Honors Studies in Transportation Engineering (Sp, Su, Fa) (1-6) The study of advanced topics in the transportation engineering field. May include participation in transportation engineering courses normally available only to graduate students. Course may be repeated for up to 6 hours total credit with approval of the CVEG honors advisor. Prerequisite: CVEG 3433.
CVEG4983H Thesis (Sp, Su, Fa) Thesis research for civil engineering students enrolled in the honors college. Prerequisite: Honors College. CVEG4994 Civil Engineering Design (Sp, Su, Fa) Conducts of a comprehensive design problem. Integration of prerequisite courses through site selection; preliminary design; evaluation of initial and life-cycle costs, formulation of specifications, assessment of alternatives, and consideration of constraints. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: CVEG 3243 and CVEG 4313 and CVEG 4303 (or CVEG 4313).
CVEG5123 Measurement of Soil Properties (Sp, Su, Fa) Consequence involved in the design and evaluation of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: CVEG 5120L. Prerequisite: CVEG 4143.
CVEG5143 Transportation Soils Engineering (Sp, Su, Fa) Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade material design characteristics; cementation of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3133.
CVEG5153 Advanced Soil Mechanics (Sp, Su, Fa) Study of consolidation, shear strength, clays, bearing capacity, and other soil mechanics topics. Emphasis on understanding the basis of soil mechanics. Prerequisite: CVEG 4143.
CVEG5173 Advanced Foundations (Sp, Su, Fa) Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Uchti cone, and other specialized foundation design topics. Prerequisite: CVEG 4143.
CVEG5234 Water and Wastewater Analysis (Sp, Su, Fa) Application of chemistry to environmental engineering. Quantitative determinations of constituents in water and wastewater. Principles of bacteriological laboratory techniques. Lecture and laboratory 3 hours per week. Prerequisite: CVEG 3243.
CVEG5243 Groundwater Hydrology (Fa) Detailed analysis of groundwater movement, wet hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3243.
CVEG5293 Environmental Engineers (Sp, Su, Fa) Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and storm drainage systems. Prerequisite: CVEG 4143.
CVEG5263 Stream Pollution Analysis (Sp, Su, Fa) The determination and application of deoxygination and reaeration rates to stream pollution analysis. A study of biologic degradation rates for municipal and industrial wastes. Prerequisite: CVEG 3243.
CVEG5273 Open Channel Flow (Sp) Open Channel Hydraulics studies advanced open channel flow through measurement techniques, a hydrology review, culvert and storm drainage design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisites: CVEG 4143 and CVEG 4433.
CVEG5283 Solid Waste Management (Sp, Su, Fa) Collection, processing and disposal of solid waste with emphasis on incineration, and sanitary landfilling systems. Supplementary transportation and hazardous waste topics included. Hazardous waste disposal design and regulatory considerations are discussed. Prerequisite: CVEG 3243.
CVEG5293 Water Treatment & Distribution Systems Design (Sp, Su, Fa) Focus on water distribution and municipal water treatment plants. Discussion of raw and treated water requirements for the several uses. Distribution system analysis and design including distribution storage and pumping. Prerequisite: CVEG 3243.
CVEG5313 Matrix Analysis of Structures (Sp, Fa) Linear and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3304.
CVEG5343 Highway Bridges (Sp, Su, Fa) Economic design of roadways, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 4133 and CVEG 4303.
CVEG5383 Finite Element Methods in Civil Engineering (Sp, Su, Fa) An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: graduate standing.
CVEG5403 Advanced Reinforced Concrete II (Sp, Su, Fa) Design of 2-way slabs, flat slabs, and other floor systems; circular fluid and dry storage tanks; and rectangular tanks, walls, footings, and detailing. Prerequisite: CVEG 4303.
CVEG5413 Transportation and Land Development (Sp, Su, Fa) Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: graduate standing.
CVEG5423 Structural Design of Pavement Systems (Sp, Su, Fa) An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement joining and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4303.
CWEG5433 Traffic Engineering (Sp, Fa) A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite: CVEG 3433 or graduate standing.
CWEG5443 Transportation Planning Methods (Sp, Fa) Procedures and methodologies for developing multi-modal transportation plans in urbanized areas. The development and utilization of transportation studies used in transport behavior and modeling. Prerequisite: graduate standing.
CWEG5453 Asphalt Mix Design and Construction (Sp, Su, Fa) 1 The theory and practice of asphalt concrete mix design for pavements and bases including specifications and construction methods for hot-mix asphalt. Prerequisite: CVEG 3433 and CVEG 4433.
CWEG5463 Transportation Network Modeling (Sp, Su) 1 An analytical approach to the use of digital and mathematical techniques and computer models to represent urban transport systems. Deterministic and stochastic methods for trip generation, distribution, modes choice, and assignment. Prerequisite: CVEG 5443.
Course Descriptions

CVEG5473 Transportation System Characteristics (Sp, Su, Fa) Introduction to traffic flow theory, including traffic stream interactions and capacity. Applications for planning, design, operations. Prerequisite: CVEG 3413 and graduate standing.

CVEG5483 Transportation Management Systems (Sp, Su, Fa) An introduction to the historical development, current state, and future trends and challenges in transportation management systems. Prerequisites: CVEG 3413 and 4563.

CVEG5493 Infrastructure Management with GIS & DB (Sp, Su, Fa) Use of the major components of a Geographical Information System (GIS). Learn to define project, create a project build categories and features, and perform database joints. Use of dynamic segmentation and multimedia capabilities. Application of Hierarchical Database Management System (RDBMS) and database interface service to GIS. Introduction to Global Positioning System (GPS). Prerequisite: CVEG 3413.

CVEG562V Research (Sp, Su, Fa) (1-6) Fundamental and applied research. Prerequisite: graduate standing.

CVEG600V Special Problems with (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

CVEG5734 Advanced Wastewater Process Design and Analysis (Sp, Su, Fa) Application of advanced techniques and principles to the analysis of wastewater treatment facilities. Physical, chemical and biological processes for removing suspended solids, organics, nitrogen, and phosphorus. Laboratory treatability studies will be used to design and troubleshoot treatment plants. Lectures 2 hours, laboratory 3 hours per week. Prerequisite: CVEG 5234.

CVEG5753 Air Pollution (Sp, Su, Fa) Fundamentals of air pollution causes, effects, and measurements, as well as control methods with application to current industrial problems. Prerequisite: graduate standing. (Same as CHEG 5753)

CVEG600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

CVEG5794 Oral Dissertation (Sp, Su, Fa) (1-18) Prerequisite: candidacy.

(DANC) DANCE

DANC1003H Honors Basic Course in the Arts: Movement and Dance (Sp, Su, Fa) Introduction to the nature and scope of ballet, ethnic, and modern dance forms and their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of studio labs. Prerequisite: honors standing. (Same as DANC 1003)

DANC1003 Basic Course in the Arts: Movement and Dance (Sp, Su, Fa) Introduction to the nature and scope of ballet, ethnic, and modern dance forms and their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of studio labs. Prerequisite: honors standing. (Same as DANC 1003)

DANC1931 Beginning Ballet (Sp, Su, Fa) Introduction to the basic elements of ballet in the recognized classical form. Prerequisite: DANC 1922.

DANC1932 Beginning Ballet (Sp, Su, Fa) A continuation of the basic modern dance techniques from DANC 1912, with emphasis on weight, time, and shape in movement. Prerequisite: DANC 1912.

DANC1932 Beginning Ballet (Sp, Su, Fa) A continuation of the basic modern dance techniques from DANC 1912, with emphasis on weight, time, and shape in movement. Prerequisite: DANC 1912.

DANC1951 Tap Dance (Sp, Fa) Basic techniques and combinations of tap dancing. Prerequisite: DANC 1951.

DANC2981 Jazz I (Fa) Basic techniques and combinations of stylized movement. Prerequisite: DANC 1912 or DANC 1932.

DANC2991 Jazz II (Sp) Intermediate techniques and combinations of stylized movement. Prerequisite: DANC 2981.

DANC3912 Intermediate/Advanced Practicum in Modern Dance Technique (Sp, Su, Fa) Further develops space-time coordination and more complex dance techniques that build the student’s development of individual style. Prerequisite: DANC 1912.

DANC3932 Intermediate/Advanced Practicum in Ballet Technique (Sp, Su, Fa) Designed to refine alignment, improve control, and develop performance presentation for executing adagio and allegro combinations. Prerequisite: DANC 1932.

DANC5003 Practicum in Using the Arts to Teach Health and in Grades K-6 (Sp) Designed for the elementary classroom teacher, the course assists the student in creating meaningful pedagogical methods and materials to be used for introducing children to a variety of cultures.

(DEAC) DANCE EDUCATION/ACTIVITY

DEAC1951 Tap Dance (Sp, Fa) Basic steps and combinations of tap dancing.

DEAC1961 Ballroom Dance (Sp, Fa) The fundamentals of ballroom dance.

(DRAM) DRAMA

DRAM1003H Honors Basic Course in the Arts: Theatre Lecture (Sp, Su, Fa) (Same as DRAM 1003F, A 1022,F A 113,FINE ART 113,FINE ART 113,3,FNAR 1022) DRAM1003 Basic Course in the Arts: Theatre Lecture (Sp, Su, Fa) Introduction to theatre arts; playwriting, directing, acting, and design for the general student. May not be presented toward satisfaction of the B.A. in fine arts requirement by drama majors. (Same as DRAM 1003H)

DRAM1223 Introduction to Dramatic Art (Sp, Fa) Introduction to and fundamental elements of make up, costume, design, and scenic elements of dramatic art. Study of the history, literature, theory, practice of the theatre, from ancient to modern times, from the playwright to the producer. (Same as DRAM 1223)

DRAM1311L Stage Technology I Laboratory (Fa) Practicum in costume technology and makeup. Corequisite: DRAM 1311.

DRAM1313 Stage Technology I: Costumes and Makeup (Fa) Corequisite: This course will be associated with an emphasis on techniques, planning and process. Theories and principles of makeup as related to dramatic production with practical laboratory experience. Corequisite: DRAM 1313.

DRAM1321L Stage Technology II Laboratory: Scenery and Lighting (Sp) Practical application of principles of scenery and lighting technology. Students will participate in projects involving the construction and preparation of scenery, stage properties, and lighting associated with departmental productions. Production running crew positions will also be assigned. Corequisite: DRAM 1223.

DRAM1323 Stage Technology II: Scenery and Lighting (Sp) Fundamentals of scenery and lighting technology with emphasis on theatre tools, equipment, and basic drafting. Training in basic principles and skills of stage carpentry, lighting technology. Corequisite: DRAM 1313.

DRAM1333 Introduction to Design and Technical Production (Sp, Su, Fa) The fundamentals of scenic, lighting, and costume design and the technical processes involved in the execution of these designs. Prerequisite: DRAM 1683 Acting I (Sp, Su, Fa) An analytical approach to the actor’s art with emphasis on the techniques of characterization.

DRAM2033 Introduction to Theatrical Design (Fa) Fundamentals of design for the theatre including costume, lighting, and scenic design. Study of the designer’s role in the production process, design requirements, and aesthetics. Emphasis on the basic two-dimensional graphic forms and graphic forms through various media, and a study of color and color theory as they apply to the major areas of theatrical design. Prerequisite: DRAM 1323.

DRAM2683 Acting II (Sp, Su) Prerequisites (Same as DRAM 4453) Advanced theories and techniques of acting. Prerequisite: DRAM 1683 and DRAM 1683.

DRAM3001 Theatre Practicum (Sp, Su, Fa) Credit for participation in mainstage or design electives: performance and/or technical assignments, one (1) credit hour per production. Assignments shall be determined by the faculty. Credit will be awarded only after completion of assignments and only with faculty approval.

DRAM3213 Costume Design I (Fa) Study of the art and practice of stage costume design. Emphasis on the expression of character through costume. Development of research and research skills. Prerequisite: DRAM 1333.

DRAM3243 Costume Technology I (Sp, Su, Fa) Methods of costume construction techniques; exploration and practice in pattern drafting millinery, mask making, fabric printing and dyeing. Practical experience through work in departmental productions. Prerequisite: DRAM 1333.

DRAM3433 Stage Speech (Sp, Su, Fa) An introduction to the basic skills of speech, voice production and communication for performance and broadcasting. Special focus on General American speech and the characteristics of speech regionalisms. The course will explore breath control, resonance, articulation, pitch, volume, voice quality and stress management. Prerequisite: UHUM 2003.

DRAM3563 Directing I (Sp, Su, Fa) Basic principles and techniques of play directing with an emphasis on the modern realistic mode of production. Corequisite: Drama Majors with at least junior standing. Prerequisite: DRAM 1223 and DRAM 2683.

DRAM3733 Stage Lighting I (Sp) Study of the art and practice of stage lighting; color theory; electricity and lighting systems; problems involved in lighting 3 hours, laboratory by arrangement, coinciding with departmental productions, 3 hours per week. Prerequisite: DRAM 1223.

DRAM3803 Development of the Drama (Sp, Fa) An introductory survey of the theoretical approaches to theatre and drama. This course investigates various paradigms for understanding drama across traditional period boundaries. Readings include a cross-section of literary and performance theories ranging from the classical to the post-modern. Prerequisite: UHUM 1223.

DRAM3823 Script Interpretation (Irregular) Techniques for making sense of playwrights and finding their theatrical demands, including basic objective/motive/ action structure, use of the fictional and functional models of the text, imagery analysis, linguistic individuation, and indirect modes of meaning. Each student focuses on one script for the full term. Prerequisite: DRAM 1223 and DRAM 3803.

DRAM3903 Theatrical Makeup (Sp, Su, Fa) The techniques and skills of theatrical makeup and design involved in the creation and execution of characters for the stage.

DRAM3923H Honors Colloquium (Sp, Su, Fa) Treats a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in drama).

DRAM399V Honors Course (Sp, Su, Fa) (1-6) Prerequisite: junior standing.

DRAM406V Playing for (Fa) (1-3) A workshop course for students who wish to attempt original work in the dramatic form. Prerequisite: junior standing.

DRAM4153 Musical Theatre Performance (Sp, Su, Fa) Principles and techniques of performing a singing role for the theatre. Examines the relationship between score and text.

DRAM4223 Costume Design II (Irregular) Practical survey of historical costumes and the application of costume history to costume design for the theatre. Exploration of silhouettes, construction details, fabrics and accessories. Costume design and rendering emphasized. Prerequisite: DRAM 3013.

DRAM4233 History of the Theatre I (Fa) A survey of dramatic literature, theatre practices and cultural contexts for dramatic presentation from classical Greece through the Restoration. Prerequisite: UHUM 1223.

DRAM4333 History of the Theatre II (Sp) A survey of theatre practices, theatre practices and cultural contexts for dramatic presentation from the 18th century to the mid-20th century. Emphasis is given to Western theatre practices. Prerequisite: DRAM 3803.

DRAM4453 History of the Theatre III (Sp) An examination of history and theory of modern theatrical styles. (Same as DRAM 4453)

DRAM4463 African American Theatre History — 1950 to Present (Sp) A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political
social conditions. Upon completion of this course the student should be familiar with the major works of African-American theatre and have a deeper understanding of American History. (Same as AAST 499V)

DRAM4653 Scene Design I (Odd years, Sp) Theory and practice in the art of scenic design, including historical and conceptual principles and an introduction to scenic design software. Preliminary experience gained through work on departmental productions. Prerequisite: UAHM 1333.

DRAM4733 Dramatic Criticism (Sp, Su, Fa) Analysis of how plays emerged from Aristotle to the present: interrelationships of theatre disciplines as well as the influence of the church, state, and press on dramatic criticism. Prerequisite: UAHM 2308.

DRAM4201 Advance Shakespeare (IR) Work on the special techniques required for performance of the plays of Shakespeare and his contemporaries. The cultural and theatrical context required for understanding the scripts. Prerequisite: DRAM 2683.

DRAM4748V Theatre Workshop (Su) (1-6) Production of plays for public performance by all members of the workshop. Mornings are spent in instruction and laboratory work preparing sets, lighting, costumes, and properties. Afternoons are spent in instruction in acting and directing, rehearsal of plays in production. Special problems for graduate credit. Prerequisite: senior standing.

DRAM4901V Directed Study (Sp, Su, Fa) (1-3) Individually designed and conducted programs of reading and reporting under the guidance of a faculty member. Prerequisite: UAHM 4653.

DRAM5113 Scene Design II (Sp, Su, Fa) (1-3) Classes in scenic design and construction. Offered on demand on the basis of student needs and changes within the profession.

DRAM5191 Internship (Irregular) (1-12) Supervised practice in the various arts and crafts of the theatre (e.g., full design responsibility for a box office management; actor apprenticeship in a professional company). Available only to those who have exhausted the regular curricular possibilities in the area of specialization.

DRAM5493 Theatre Study in Britain (Sp, Su, Fa) Study of the components of stage production through attending and critiquing a wide variety of classical, modern, and avant garde theatre as performed in England, including tours of London and historical theatre sites and seminars with British theatre artists.

DRAM5113 Scene Design II (Sp, Su, Fa) Major styles and trends in scene design in relation to periods of dramatic literature. Problems in period and contemporary scene design. Prerequisite: UAHM 4653.

DRAM5123 Theatrical Design Rendering Techniques (Sp, Su, Fa) Investigation of drawing and painting methods and materials useful to theatrical designers. Integration of graphic communication with overall production concepts will be treated through examination of various theatre styles and periods.

DRAM5133 Scene Design III (Sp, Su, Fa) Work in line, color, and composition using historical conventions as the basis for contemporary scenic statements. Prerequisite: graduate standing.

DRAM5143 History of Decor for the Stage (Sp, Su, Fa) An overview of architectural decoration and its application to theatrical design from the Prehistoric Period (4400-3200 B.C.) through the Art Deco period with references to contemporary decor. Prerequisite: graduate standing.

DRAM5153 Scene Painting (Sp, Su) A studio class in painting techniques for the theatre. Problems in color, texture, style and execution with appropriate analysis and research documentation. Graduate level project required.

DRAM5163 Theatre Graphics and Technology (Irregular) An intensive study of the technology of theatre, drawing, and rendering techniques and model making. Graduate level project required.

DRAM5213 Costume Design I (Sp, Su, Fa) Advanced study of costume design including the areas of film, dance, and opera. Exploration of advanced rendering techniques and stylization. Development of portfolio and resume. Prerequisite: DRAM 2683.

DRAM5243 Costume Technology I (Sp, Su, Fa) A series of projects focusing on methods of costume construction, pattern drafting techniques, millinery, mask making and fabric manipulation. Specific techniques may be included as determined by student needs.

DRAM5253 Costume Technology II (Sp, Su, Fa) Advanced study in methods of costume construction and pattern making techniques focusing on designing, draping, designing, corsetry and costumes crafts as determined by student needs.

DRAM5263 Costume Shop Management (Sp, Su, Fa) Comprehensive study of costume shop management including scheduling, production load, budget and time management techniques. Practical application through actual production experience in the University Theatre.

DRAM5323 Stage Lighting II (Irregular) Entry level class for graduate study in lighting. Emphasis on lighting design and analysis, lighting for dance and musical theatre, equipment as it relates to the designer. Graduate level project required.

DRAM5333 Lighting III (Sp, Su, Fa) Advanced study of design, technology and production development collaboration involved in lighting at the professional level. Theatre, screen and architectural venues will be examined. Dance, musical theatre, legitimate drama and related lighting situations will be explored through practical design and laboratory exercises. Prerequisite: graduate standing.

DRAM5353 Stage Lighting Technology (Sp, Su, Fa) The thorough examination of the technology of equipment that supports theatrical lighting: theory, operating principles and specification of lamps, fixtures, control systems and special effect hardware will be explored. Prerequisite: graduate standing.

DRAM5363 Theatre Planning (Irregular) A study of significant theatre buildings, modern and historical, and their relationship to contemporary theatre planning. Practical application of theory through design problems and evaluation. Graduate level research paper required.

DRAM5403 Acting/Directing Techniques (Sp, Su, Fa) Examination of the major forms of acting and directing techniques and theories. Practical application through analysis and scene work, with students functioning as both director and actor throughout the course. Prerequisite: graduate standing.

DRAM5413 Graduate Acting Principles (Sp, Su, Fa) An intensive study of the actor’s craft. This course focuses on the development of the actor as an artist, on the interrelationship of the actor’s craft with the design of performance; and the development of skills necessary to the professional theatre actor.

DRAM5432 Graduate Stage Speech (Sp, Su, Fa) Focus will be on enabling the body’s natural breathing mechanism to provide strong vocal support. Freedom from unnecessary tension, resonance, articulation and vocal hygiene will also be explored as they relate to clear vocal production. Prerequisite: graduate standing.

DRAM5443 Graduate Acting: Period Styles (Sp) Styles of acting in relation to French and English Dramatic Literature (16th-19th Centuries). This course also examines the historical and cultural influences that shaped each genre. A period component is included. Prerequisite: graduate standing.

DRAM5453 Musical Theatre Performance (Sp, Su, Fa) Theory and techniques of performing a singing role for the theatre. Integrates acting and vocal techniques and examines the technical aspects of the musical theatre and text. Prerequisite: graduate standing in Drama.

DRAM5463 Audition Techniques (Sp, Su, Fa) A thorough study and practical application of audition skills and techniques. This course will equip the student with prepared audition pieces and experience in cold reading, on-camera work, and improvisation. The course also explores the practical needs of the actor; from how to get an audition to how to prepare/sell oneself in a successful audition in alarm.

DRAM5473 Graduate Acting: Shakespeare (Sp, Su, Fa) Analysis of Shakespeare for performance. Work will include the plays of Shakespeare and his contemporaries, including cultural and theatrical contexts required for understanding the scripts. Prerequisite: Graduate standing in Drama.

DRAM5503 Research Techniques in Drama (Fa) basic techniques of research and study in the fields of Drama and Theatre with consideration of the necessary interplay of intuitive and intuitive skills in mature artistry. Practice in the logical, empirical and evidentiary work of scholarship and in the various research methodologies.

DRAM5513 Graduate Playwriting: Realism (Sp, Su, Fa) Advanced theory and technique in playwriting emphasizing the realism of the modern dramatist. Focus is on the manipulation of expression, plot, character, and meaning. Prerequisite: graduate standing.

DRAM5523 Graduate Playwriting: Non-Realism (Sp, Su, Fa) Advanced theory and technique in playwriting emphasizing non-realistic traditions of the 20th century. Prerequisite: graduate standing.

DRAM5533 Graduate Playwriting: Special Projects (Sp, Su, Fa) Advanced study and practice in the area of playwriting. The area of concentration will be determined by the student's specific writing project(s). Prerequisite: graduate standing.

DRAM554V New Script Ensemble (Sp, Su, Fa) (1-3) An interdisciplinary course for designers, actors, directors, and playwrights. An exploration of techniques and strategies for approaching the new script and realizing the distinctive elements pertinent to developing the new work. Prerequisite: graduate standing.

DRAM5561 Graduate Directing Principles (Sp, Su, Fa) Theory and technique of directing realism; script analysis; spatial considerations of composition and picturization; development in production of the Aristotelian concepts of plot, character, thought, diction, music, sound, and spectacle. Prerequisite: graduate standing.

DRAM5562V Seminar in Dramatic Art (Sp, Su, Fa) (1-9) Research, discussion and projects focusing on a variety of topics including theatre management, advanced acting methods, and specialized periods in dramatic literature. Prerequisite: senior or graduate standing.

DRAM5563 Graduate Directing: Non-Realism (Sp, Su, Fa) Theory and techniques of directing in non-realist modes. Some study in the history of non-realism, including Expressionism, Epic theatre, Ibsen, and contemporary elements in non-realist modes. Prerequisite: Graduate standing in Drama.

DRAM5564 Dramaturgy (Irregular) To define the dramaturge’s role in theatrical production and to introduce students to working models of structural and dramaturgical analysis. Also to teach the application of these analytical models to various genres of dramatic literature. Prerequisite: graduate standing.

DRAM5565 Directing II (Sp, Fa) Advanced techniques of stage direction. Prerequisite: UAHM 4563 and graduate standing.

DRAM5573 History of the Theatre I (Fa) A comprehensive study of the theatre in different cultures and ages, an institution, as an art, and as a vision of life.

DRAM5573 History of the Theatre II (Sp) A continuation of DRAM 5573.

DRAM5575 History of the Theatre III (Sp) An examination of history and theory of modern theatrical styles. Prerequisite: senior or graduate standing.

DRAM5576 Drama (Fa) Analysis of critical theories from Aristotle to the present; interrelationships of theatre disciplines as well as the influence of the church, state, and press on dramatic criticism. Prerequisite: senior or graduate standing.

DRAM558V Theatre Production III (Sp, Su, Fa) (1-3) Participation in the process of production for the University Theatre at a supervised level. Areas of involvement may include scenery, lighting, sound, makeup, lighting, etc.

DRAM559V Independent Study (Sp, Su, Fa) (1-3) Individual study designed and conducted programs of reading and reporting under guidance of a faculty member.

DRAM559V Special Topics (Sp, Su, Fa) (1-3) Classes not listed in the regular curriculum, offered on demand on the basis of student needs and changes within the profession. Prerequisite: Graduate standing in Drama or Instructor consent required.

DRAM559V Internship (Irregular) (1-6) Supervised practical experience in the various arts and crafts of the theatre (e.g., full design responsibility for a production; box office management; actor apprenticeship in a professional company).

DRAM600V Master’s Thesis (Sp, Fa) (1-6) Prerequisite: graduate standing.
EASL 0021 Advanced English Grammar (Sp, Su, Fa) Preparation overview of the verb, modal, and article in English. Hear and practice on compound and complex sentences. Practice of grammatical structure orally and in writing. Not for degree credit. Prerequisite: ESL placement test.

EASL 0024 Reading and Writing I (Sp, Su, Fa) Work on improving skills necessary to write a well-organized, thought-provoking essay incorporating paraphrased, summarized, and quoted ideas from various sources. Introduction to several rhetorical patterns. Critical reading skills practice, understanding intonences, and improving reading skills comprehension. Not for degree credit. Prerequisite: ESL placement test.

EASL 0034 Reading and Writing II (Sp, Su, Fa) Advanced writing of formal documented, organized, and thought-provoking essays. Students will learn to read passages/articles in English proficiently and maintain discussion with near-native abilities and confidence. Not for degree credit. Prerequisite: ESL placement test.

EASU 0021 Pronunciation (Sp, Su, Fa) Students learn to generate native-sounding speech and increase their intelligibility by working specifically on accent reduction, pronunciation, intonation patterns, and fluency. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test.

EASU 0053 ESL Listening and Speaking (Sp, Su, Fa) For improvement of aural/oral skills by international students. Practice in fluency, intonation stress, and pronunciation. Students give presentations and participate in academic discussions. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test.

ECON 1123 Economic Development of the United States Development of American economic institutions from Colonial times to present. Present-day economic institutions and problems. (Credit not granted to students who have already completed ECON 2013 and ECON 2023.) (Same as ECON 1123)

ECON 2013H Honors Principles of Microeconomics (Sp, Su, Fa) Microeconomics analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Prerequisite: (MAT 1203 or higher) or (MAT 1211 or 25 or higher) or (MAT 50 or higher) or (MAT 2433 or higher). (Same as ECON 2013)

ECON 2013 Principles of Microeconomics (Sp, Su, Fa) Microeconomics analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Prerequisite: (MAT 1203 or higher) or (MAT 50 or higher) or (MAT 2433 or higher). (Same as ECON 2013)

ECON 2023H Honors Principles of Microeconomics (Sp, Su, Fa) Microeconomic analysis, including market structures, supply and demand, production, costs, price and output, international economics. Prerequisite: (MAT 1203 or higher) or (MAT 50 or higher) or (MAT 2433 or higher). (Same as ECON 2023)

ECON 2023 Principles of Microeconomics (Sp, Su, Fa) Microeconomic analysis, including market structures, supply and demand, production, costs, price and output, international economics. Prerequisite: (MAT 1203 or higher) or (MAT 50 or higher) or (MAT 2433 or higher). (Same as ECON 2023)

ECON 3133 Economics of Electronic Commerce (Irregular) A combination of concepts from microeconomics, industrial organization, and macroeconomics in examining how electronic markets and the use of information impact economic activity. The course combines theoretical models, field data and cases to explore the issues of pricing strategy, network effects, information goods, market mechanisms and competition. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ECON 2143.

ECON 3143 Economics of Electronic Commerce (Irregular) A combination of concepts from microeconomics, industrial organization, and macroeconomics in examining how electronic markets and the use of information impact economic activity. The course combines theoretical models, field data and cases to explore the issues of pricing strategy, network effects, information goods, market mechanisms and competition. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ECON 2143.

ECON 3333 Public Finance (Sp, Su, Fa) Governmental functions, revenues; tax shifting; inciden; public expenditures, their effects; fiscal policy. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 3353 Law and Economics (Irregular) The use of economic tools to analyze public policy issues and explore the intersections between the law and economics. The course will provide students with an understanding of legal institutions, incentives they generate and issues surrounding current legal reforms. Prerequisite: ECON 2023 or ECON 2143.

ECON 3433 Money and Banking (Sp, Su, Fa) Financial history; financial institutions; theory of practice and in the market structure and market failures, financial and legal problems. Prerequisite: ECON 2023 or ECON 2143.

ECON 3533 Labor Economics (Sp, Su, Fa) Economic analysis of labor market as demand and supply; human capital investment; wage differentials; discrimination; economic effects of labor unions and collective bargaining; public sector labor markets; unemployment and labor market reforms. Prerequisite: ECON 2023 or ECON 2143.

ECON 3633 Advertising Economics (Irregular) An examination of how economics delineate and categorize types of products and advertising campaigns. Alternative views of advertising – persuasive vs. informative — are discussed. Models of the relationship between advertising and sales, profits, market structure, product quality, and price are examined. Prerequisite: ECON 2023 or ECON 2143.

ECON 3853 Emerging Markets (Irregular) An analysis of the business and economic environment in emerging countries, focusing on the East Asia and Transition Economies. The topics and issues covered include: market structure and market failures, financial and legal background, current institutions and political economy issues, and current business practices. Prerequisite: ECON 2143; or ECON 2023 and ECON 2033.

ECON3933 The Japanese Economic System (Irregular) This class presents essential facts about the Japanese economy and then subjects them to modern economic analyses. Japanese institutions and policies are contrasted with their American counterparts, and these economies are compared in terms of performance. Current issues including: comparative economic conditions and Us - Japanese trade relations are also examined. Pre- or Corequisite: ECON 2023. Prerequisite: ECON 2013 or ECON 2143.

ECON3999V Honors Economics (Irregular) (1-3) Primarily for students participating in Honors program.

ECON4003H Economics Honors Colloquium (Irregular) Explores events, concepts and/or new developments in the field of economics for high standing.

ECON 4013 Economic History of Thought (Sp) Historical, critical analysis of economic theories relative to their instructional background. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 4110V Special Topics in Economics (Irregular) (1-6) Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2143) or (MAT 2433 or MATH 2554).

ECON 4143 Information Economics (Irregular) A combination of concepts from microeconomics, industrial organization, and probability to examine how economic actors use information in decision-making. The course combines theoretical models and cases to develop an understanding of risk, uncertainty, information, and ambiguity. Prerequisite: (ECON 2143 and ECON 2023) or ECON 2143.

ECON 4333 Economics of Organizations (Fa) An economic perspective on the design of organizations. Applies developments in game theory and contract theory to analyze the role of information and incentives within and between firms. Covers the boundaries of firms, integration and outsourcing, authority and incentives, and alternative organizational structures in an evolving business environment. Prerequisite: (ECON 2013 and ECON 2143) or (ECON 2143).

ECON4433 Experimental Economics (Sp) The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with experimental economics and the analysis of laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Prerequisite: ECON 2023 or ECON 2143.

ECON 450V Independent Study (Irregular) (1-6) Permits students on individual basis to explore selected topics in economics.

ECON 4633 International Trade Policy (Sp, Su, Fa) Problems of the international economy from a microeconomic perspective. Topics include analysis of the pattern and content of trade; trade in factors of production; and the application of trade theory to the study of trade policy. Credit is awarded as to tariffs and quotas. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 4653 Global Competition and Strategy (Sp, Su, Fa) Applies concepts from microeconomics and industrial organization to competitive decision-making in national and international business environments. Topics include industry analysis, competitive advantage, entry, competitive pricing, commitment, antitrust, exit, vertical integration, R&D, licensing, and standards. These issues will be discussed in the context of globalizing industries and global firms. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 468V International Economics and Business Seminar (Sp, Su, Fa) Offered primarily in conjunction with international study abroad programs with an emphasis on international economics and business. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 4743 Introduction to Econometrics (Sp) Introduction to the application of statistical methods to problems in economics. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143 and (MATH 2043 or MATH 2554) and (MATH 2053 or MATH 2053C) and (WCOB 1033 or STAT 2303). ECON 4753 Forecasting (Irregular) The application of forecasting methods to economic problems, empirical economi- cal, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Prerequisite: (ECON 2013 and ECON 2023 or ECON 2143) and (MATH 2043 or MATH 2554 and (MATH 2053 or MATH 2053C) and (WCOB 1033 or STAT 2303). ECON 4753 Forecasting (Irregular) (1-3) Overview of basic econometric and principles with emphasis on using them in the curriculum of elementary and secondary schools. Not open to majors in business and economics. Offered for degree credit in Education only.

ECON5233 Mathematics for Economic Analysis (Su) This course will develop mathematical and statistical skills in the fields of economics and related fields. Topics include calculus, static optimization, real analysis, linear algebra, convex analysis, and dynamic optimization. Prerequisite: Grade standing in MATH 2554 or equivalent. ECON 5133 Statistical Economics of Organizations (Irregular) An economic perspective on the design of organizations. Applies developments in game theory and contract theory to analyze the role of information and incentives within and between firms. Covers the boundaries of firms, integration and outsourcing, authority and incentives, and alternative organizational structures in an evolving business environment.
DUTIES AND RESPONSIBILITIES OF THE PUBLIC SCHOOL BUILDING ADMINISTRATOR: EXAMINATION AND ANALYSIS OF PROBLEMS, ISSUES, AND CURRENT TRENDS IN THE THEORY AND PRACTICE OF THE PUBLIC SCHOOL ADMINISTRATION

EDAD5053 School Law (Irregular) Legal aspects of public and private schooling: federal and state legislative statues and judicial decisions, with emphasis upon Arkansas public education law.

EDAD5063 School Personnel Administration and Supervision (Irregular) Principles, processes, and procedures of employee personnel management, supervision, and staff development.

EDAD5093 Effective Leadership in School Settings (Sp, Su, Fa) Strategic planning, group facilitation and decision making, organizational behavior and development, predictors and standards, principles of effective educational leadership.

EDAD5163 Current Educational Issues (Irregular) Current problems, issues, and trends facing school administrators in Arkansas and the nation.

EDAD574V Internship (Sp, Su, Fa) (1-6) Supervised in-school/district experiences individually designed to afford opportunities to apply previously-acquired knowledge and skills in administrative workplace settings.

EDAD599V Seminar (Irregular) (1-6) Advanced seminar in educational topics.

EDAD600V Master’s Thesis (Sp, Su, Fa) (1-6) Research and writing leading to the preparation of a thesis acceptable for consideration toward degree completion.

EDAD6023 School Facilities Planning and Management (Irregular) School facilities planning, management, cost analysis, operations, and maintenance of the school plant.

EDAD6103 School Finance (Irregular) Principles, issues and problems of school funding formulae and fiscal allocations to schools.

EDAD6173 School Business Management (Irregular) Fiscal and resource management in public schools: budgeting, insurance, purchasing, and accounting.

EDAD6333 Advanced Fiscal and Legal Issues in Education (Irregular) The examination and discussion of advanced legal and fiscal issues affecting public school education. Prerequisite: advanced graduate standing.

EDAD6503 Topics in Educational Research for School Administration (Irregular) Application of educational research in the school setting by educational administrators. Emphasis placed on the use of state and local school or district data, interpretation and reporting, hands-on experience with SPSS, and the formal process of writing a research report. Prerequisite: advanced graduate standing.

EDAD6523 Advanced Application of Educational Leadership (Irregular) A review of seminal and current works on leadership as applied to the educational setting. Provides knowledge of classic and contemporary strategies for leadership.

EDAD6533 Educational Policy (Irregular) Examination of the research and theory relating to the evolution of local, state, and federal governance and educational policy. Emphasis given to the consideration of procedures involving policy formulation, implementation, and analysis.

EDAD6563 Educational Administration and Human Behavior (Irregular) Examination of research and theory relating to the utilization of human resources with educational organizations.

EDAD660V Workshop (Sp, Su, Fa) (1-6) Workshops on current topics in educational administration.

EDAD674V Internship (Sp, Su, Fa) (1-6) Internship experience in educational administration.

EDAD680V Special Topics Project (Sp, Su, Fa) (1-6) An original project, research project, or report required of all Ed.S. Degree candidates. Prerequisite: admission to the Ed.S. program.

EDAD690V Directed Readings in Educational Administration (Sp, Su, Fa) (1-3) Selected readings from classical books and authors in the field.

EDAD699V Seminar (Irregular) (1-6) Prerequisite: advanced graduate standing.

EDAD700V Doctoral Dissertation (Sp, Su) (1-18) Prerequisite: candidacy.

COURSE DESCRIPTIONS

EDFD2403 Statistics in Nursing (Irregular) Introduction to descriptive and inferential statistical methods used in nursing research.

EDFD5013 Research Methods in Education (Sp, Su, Fa) General orientation course which considers the nature of research problems in education and the techniques used by investigators in solving those problems. Prerequisite: graduate standing.

EDFD5303 Historical Foundations of Modern Education (Sp, Su, Fa) Understanding the interpretation of the historical antecedents of contemporary education, focusing upon the American experience from the colonial period to the present.

EDFD5323 Global Education (Irregular) Comparative and global analysis of international education with emphasis on cultural education and implications for the future.

EDFD5353 Philosophy of Education (Irregular) Introduction to the method and attitude essential to effective analysis and interpretation of issues and values within a society reflecting cultural, ethnic, gender, and global diversity. Prerequisite: graduate standing.

EDFD5373 Psychological Foundations of Teaching and Learning (Irregular) Psychological principles and research applied to classroom learning and instruction. Social, emotional, and intellectual factors relevant to topics such as readiness, motivation, discipline, and evaluation in the classroom.

EDFD5393 Statistics in Education and Health Professions (Sp, Su, Fa) Applied statistics course for master's degree candidates. Includes application of statistical concepts and operations for frequency distributions, graphing techniques, measures of central tendency and variation, sampling, hypothesis testing, and interpretation of statistical results.

EDFD5473 Adolescent Education: A Global Perspective (Irregular) Study of the adolescent experience with emphasis on the unique psychological problems and tasks of this developmental stage; role of educators in the facilitation of crises resolutions in social, personal and institutional contexts. Prerequisite: graduate standing.

EDFD5573 Life-Span Human Development (Sp, Su, Fa) Basic principles of development throughout the human life-cycle: Physical, cognitive, social, emotional, and personal development.

EDFD5653 Educational Assessment (Sp, Fa) Introduction to measurement issues and basic test theory. Focus on types and usage of assessment tools, data management, and analysis and interpretation of educational data. Practical training in the utilization and interpretation of academic achievement data in Arkansas.

EDFD5683 Issues in Educational Policy (Sp, Su) This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policy issues and develop key policy issues that arise at level of government.

EDFD599V Seminar (Irregular) (1-6) Research topics of interest to graduate students.

EDFD600V Master’s Thesis (Sp, Su, Fa) (1-6) Research and writing leading to the preparation of a thesis acceptable for consideration toward degree completion.

EDFD609V Independent Studies (Sp, Su, Fa) (1-6) Research and writing leading to the preparation of a thesis acceptable for consideration toward degree completion.

EDFD6123 Educational Futurism (Irregular) An integrative, holistic analysis and assessment of potential alternative futures to guide current educational practice. Prerequisite: graduate standing and history or philosophy of education.

EDFD6403 Educational Statistics and Data Processing (Sp, Su, Fa) Theory and application of frequency distributions, graphical methods, central tendency, variability, simple regression and correlation indices, chi-square, sampling, and parameter estimation, and hypothesis testing. Use of the computer for the organization, reduction, and analysis of data (required of doctoral candidates). Prerequisite: EDFD 5013 or equivalent.

EDFD6413 Experimental Design in Education (Sp, Fa) Principles of experimental design as applied to educational situations. Special emphasis on analysis of variance techniques used in educational research. Prerequisite: EDFD 6403 or equivalent.

EDFD6423 Multiple Regression Techniques for Education (Fa) Introduction to multiple regression procedures for analyzing data as applied in educational settings, including multicollinearity, dummy variables, analysis of covariance, curvilinear regression, path analysis. Prerequisite: EDFD 6403.

EDFD6453 Applied Multivariate Statistics (Sp) Multivariate statistical procedures as applied to educational research settings including discriminant analysis, principal component analysis, and factor analysis.
components analysis, factor analysis, canonical correlation, and cluster analysis. Emphasis on use of existing computer statistical packages. Prerequisite: ELDH 4431.

EDEF6513 Advanced Experimental Design (IR) Advanced topics of the general linear model, including hierarchically linear modeling and longitudinal analysis with a focus on decomposition of variance and theoretical basis for these methods. Prerequisite: EDEF 6413.

EDEF6523 Advanced Multiple Regression (IR) Advanced topics of correlational research methods, including logistic regression and path analysis with a focus on developing the mathematical and theoretical basis for these advanced methodological designs. Prerequisite: EDEF 6423.

EDEF6533 Qualitative Research (Sp, Fa) Introduction to non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Pre- or Co-requisite: ELDH 4432.

EDEF6543 Advanced Qualitative Research (Sp) Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: EDEF 6533.

EDEF6553 Advanced Multivariate Statistics (IH) Builds on the foundation provided in Multivariate and inference techniques that extend mathematical elements of canonical, discriminant, factor analytic, and longitudinal analyses, and includes computer analysis of data that is necessary for these designs. Prerequisite: EDEF 6453.

EDEF6613 Evaluation of Policies, Programs, and Projects (Fa) Introduction to evaluation in social science research, including how and why evaluations of programs, projects, and policies are conducted; includes analysis of actual evaluations in a variety of disciplines.

EDEF6623 Techniques of Research in Education (Sp, Su, Fa) Use of scientific method in attacking educational problems. Emphasis placed on the planning and design of research studies, collection of reliable and valid data, sampling methods, and analysis and interpretation of data. (Required for EDEF 6640.)

EDEF668V Practicum in Research (Sp, Su, Fa) (1-4) Practical experience in educational research on campus, in school systems, or in other agencies in educational program development.

EDEF699V Seminar (Irregular) (1-6) Prerequisite: advanced graduate standing.

(Educ) EDUCATION

EDUC100V Freshman Seminar (Irregular) (1-3) The course is designed to support and assist freshmen in becoming successful, self-directed learners. Focus will be upon campus resources to help learners accomplish this goal and upon strategies for successful learning.

(ELED) ELEMENTARY EDUCATION

ELED600V Master’s Thesis (Irregular) (1-6) ELED605V Independent Study (Sp, Su, Fa) (1-18) Prerequisite: candidacy.

ELEG4233 Introduction to Integrated Circuit Design (Sp, Su, Fa) Design and layout of large scale digital integrated circuits using NMOS and CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout considerations for special NMOS and CMOS circuits. Prerequisite: ELEG 3213.

ELEG4243 Analog Integrated Circuits (Sp, Su, Fa) Theory and design techniques for linear and analog integrated circuits. Topics include voltage to base current matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3203.

ELEG4253 Digital Electronics Manufacturing Processes (Sp, Su, Fa) Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality, and economics. Emphasis on manufacturability. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ELEG 3093 or ELEG 2103. (Same as MEEG 3253)

ELEG4283 Mixed Signal Test Engineering I (Even years, Fa) Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement instrumentation, test hardware, sampling theory, DSP-based testing, analog channel testing, digital channel testing. Prerequisite: senior or graduate standing.

ELEG4293 Mixed-Signal Modeling & Simulation (Sp) Study of digital and mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Prerequisite: ELEG 3223.

ELEG4463 Design of Power Semiconductor Devices (Sp, Su, Fa) Basic switching converter topologies: buck, boost, buck-boost, Cuk, flyback, resonant; pulse-width modulation; integrated circuits; converter switching design case studies; switching converter circuits; state-space averaging and linearization; switching converter transfer functions. Prerequisite: ELEG 3203 and ELEG 3123.

ELEG4403 Control Systems (Sp, Su, Fa) Mathematical models of control systems. Performance criteria and stability. LQG-LQ, root-locus, and frequency-response design techniques. Special topics. Credit may be for either ELEG 4403 or MEEG 4413. Prerequisite: ELEG 3123. (Same as MEEG 4403, ELEC 4217)

ELEG4463L Control Systems Laboratory (Sp, Su, Fa) Experimental study of various control systems and components. Design, implementation, and performance of control systems on the measurement of systems parameters, ladder-logics, process-control applications, process-control applications, and electrical measurement systems. Prerequisite: ELEG 4403.

ELEG4493 Electric Power Distribution Systems (Sp, Su, Fa) Design considerations of electric power distribution systems, including distribution substations, primary and secondary circuits. Distribution transformer and capacitor application, reliability considerations and distribution system protection. Prerequisite: ELEG 3303.

ELEG4513 Power System Analysis (Sp, Su, Fa) Equivalent circuit representation of power transmission lines. Unsymmetrical short-circuit network equivalents and power systems, including symmetrical component method for unbalanced 3-phase circuits. Introduction to the problems of load flow, fault analysis, and transient stability. Prerequisite: ELEG 3312 or ELEG 3003.

ELEG4523 Introduction to Power Electronics (Sp, Su, Fa) Power electronic systems, power semiconductor switches, ac-dc, dc-dc, diode rectifiers, circuit configuration, and common-mode noise. Prerequisite: ELEG 3123 and ELEG 3223.

ELEG4623 Communication Systems (Sp, Su, Fa) Various modulation methods used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in AM, the phase locked loop, matched filter detection, probability of error in PSK, FSK, DPSK. The effects of quantization and thermal noise in digital systems. Information theory and integrated circuits. Prerequisite: ELEG 4203.

ELEG4683 Introduction to Image Processing (Sp, Su, Fa) Introduction to the basic concepts of image processing; theory and applications. Covers digital methods of image reconstruction, restoration, and extraction and analysis. Corequisite: Unit component.

ELEG4713 Electromagnetic Transmission (Sp, Su, Fa) Steady state and transient response of lossless and dissipative transmission lines, transmission line models, transmission line design and analysis. Antennas and radiation. Prerequisite: ELEG 3703.

ELEG4723 Introduction to RF and Microwave Design (Fa) An introduction to microwave design principles. Microwave components, passives, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as related to radar and communications systems will be reviewed. Prerequisite: ELEG 3703.

ELEG487VH Honors Special Topics in Electrical Engineering (Irregular) (1-3) Consideration of current electrical engineering topics not covered in other courses. Prerequisite: senior standing.

ELEG487V Honors Special Topics in Electrical Engineering (Irregular) (1-3) Consideration of current electrical engineering topics not covered in other courses. Prerequisite: senior standing.

ELEG488VH Honors Special Problems (Sp, Su, Fa) (1-3) Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: senior standing. (Same as ELEG 488V)

ELEG488V Special Problems (Sp, Su, Fa) Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: senior standing.

ELEG489V Special Projects (Sp, Su, Fa) Design and construction of a project mutually agreeable to the student and a faculty member. Prerequisite: senior standing.

ELEG4943 Digital Systems Design (Sp, Su, Fa) Number systems and codes, fundamentals of switching algebra, analysis and design of sequential switching circuits and memory elements. Design and analysis. Prerequisite: Corequisite: Lab component.

ELEG4983 Introduction to Computer Architecture (Sp, Su, Fa) Design of a single board computer including computer design, peripheral interfacing, DMA control, interrupt control, and bus organization. (Same as CENG4213) Prerequisite: ELEG 3923. (Same as CENG 4213)

ELEG5153 Real-Time Data Acquisition Systems (Sp, Su, Fa) The theoretical, practical, and application aspects of taking measurements of the real world for use with computers. Sampling and data analysis techniques. Prerequisite: ELEG 3403. (Same as CSEG 5053)

ELEG5163 Advanced Microcontroller Design Project (Sp, Su, Fa) Use of development systems as an aid to microcontroller design; the student is expected to design, build, and test a microcontroller-based system to perform a specified task. Corequisite: LLEE 5180L. Prerequisite: ELEG 3923.

ELEG5173 Digital Signal Processing Laboratory (Sp, Su, Fa) Use of USP integrated circuits. Lectures, demonstrations, and projects. DSP IC architectures and instruction sets. Assembly language programming. Development tools, implementation of elementary DSP operations, difference equations, transforms, filters. Prerequisite: ELEG 4603.

ELEG5183L DSP Digital Communications Laboratory (Sp, Su) Implementation of digital communication techniques in the Texas Instruments C30 processor. AM, FM, SSB modulation, demodulation, I/Q demodulator, PAM, QAM; echo cancellation, full-duplex modems. Prerequisite: LLEE 4623.

ELEG5193L Advanced DSP Processors Laboratory (Sp) Familiarization with, and use of, advanced USP processors. Parallel processor configurations, timing consideration, specialized programming techniques, complex pipelines. Prerequisite: ELEG 5173L.

ELEG5213 Integrated Circuit Fabrication Technology (Sp, Su, Fa) Theory and techniques of integrated circuit fabrication technology; crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and metalization. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203.

ELEG5223 Solid-State Electronics I (Sp, Su) Theoretical treatment of crystal structure and lattices, quantum and statistical mechanics, thermal properties of crystals, tree-electro theory of metals and quantum theory of electrons in periodic lattices. Prerequisite: ELEG 4203 and PHYS 3614 and PHYS 3611.

ELEG5253L Circuit Design Laboratory I (Sp, Su, Fa) Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, multi-chip module fabrication, and design of very large scale chips. Prerequisite: ELEG 4233 and ELEG 4203.

ELEG5253L Circuit Design Laboratory II (Sp, Su, Fa) Students test the I.C. chips they designed in I.C. Design Laboratory I and propose design corrections where needed. Topics include gate arrays, bipolar design, I.L, memory design, and microprocessor design. Prerequisite: ELEG 5233L.

ELEG5273 Electronic Packaging (Sp, Su, Fa) An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Credit can not be earned for both MEEG 5273 and ELEG 5273. (Same as ELEG 5273)

ELEG5283 Mixed Signal Test Engineering II (Odd years, Sp) Focus calibration, LEC testing, A/D testing, design, software, test, Data Analysis, Test Economics. Prerequisite: ELEG 4283.

ELEG5293L Integrated Circuits Fabrication Laboratory (Sp, Su, Fa) Experimental studies of silicon oxides, nitrides, solid-state diffusion, photomask fabrication, and electrical characteristics of silicon wafers and processing techniques. Prerequisite: ELEG 5213.

ELEG5313 Power Semiconductor Devices (Sp, Su, Fa) Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect
ELEG5333 Semiconductor Nanostructures II (Sp) This course is a continuation of ELEG 5333 Semiconductor Nanostructures I. Focuses on the transport properties, growth, electrical and optical properties of semiconductor nanostructures, and optoelectronic devices. Prerequisite: ELEG 5333 or Instructor Permission.

ELEG5344 Nonlinear Systems Analysis and Control (Sp, Su, Fa) Second-order nonlinear systems. Nonlinear differential equations. Approximate analysis methods. Lyapunov and input-output stability. Design of controllers, observers, and estimators for nonlinear systems. Prerequisite: ELEG 4403 or MATH 5303. (Same as MATH 5443)

ELEG5453 Adaptive Filtering and Control (Sp, Su, Fa) Models for deterministic systems. Parameter estimation in linear and quadratic systems. System modeling using the z-transform and state-variable techniques. Analysis and design of digital control systems. Digital redesign for continuous control. Prerequisite: ELEG 4403 or ELEG 4404.

ELEG5443 Computer Communications Networks (Sp, Su, Fa) A study of various current data communication techniques used in the computer world. Concepts of digital communications technology as well as protocols and standards are studied. Prerequisite: ELEG 4423 or ELEG 4424.

ELEG5653 Artificial Neural Networks (Su) Fundamentals of artifical neural networks, both theory and practice. Teaches basic concepts of both supervised learning and unsupervised learning. Neural networks. Topics include the perceptron, back propagation, the competitive Harnnet, self organizing feature maps, topological considerations, requirements for effective generalization, and design considerations. Prerequisite: ELEG 4423 or ELEG 4424.

ELEG5673 Pattern Recognition (Sp, Su, Fa) Introduction to the basic concepts of pattern recognition, its theory and application. Subjects include: trainable pattern classifiers, discriminant functions, parametric training methods, nonparametric training methods, feature selection, feature ordering, cluster analysis. Prerequisite: ELEG 3143 or ELEG 4424.

ELEG5693 Digital Transmission (Sp, Su, Fa) Telecommunication and data transmission. Transmission of information in digital circuits. Modulation and demodulation. Digital communication systems. Error detection and correction. Prerequisite: ELEG 4423 or CSCE 3626.

ELEG5713 Antennas and Radiation (Sp, Su, Fa) Radiating structures, mesh, control of radiation patterns, antenna impedance and antenna feeding systems. Prerequisite: ELEG 3703.

ELEG5723 Advanced Microwave Design (Sp) This course is an introduction to the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwaves Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3703 and ELEG 4723.

ELEG5733 Remote Sensing Systems (Sp, Su, Fa) Analysis of remote sensors operating in 3 widely used EM spectral regions: Visible and near IR, thermal IR, and microwave. Emphasis on understanding generic types of remote sensors seeing spectral bands, their data products, and their applications. Prerequisite: ELEG 3703 and ELEG 4723.

ELEG5753 Radar Networks (Sp, Su, Fa) Methods of discrimination and ambiguity in the measurement of range, angle and velocity. Analysis of search, tracking, M1, SLAAH, and SAR systems. Characterization of return from complex targets. Prerequisite: ELEG 3703.

ELEG5753 Satellite Communications & Navigation Systems (Sp) Introduces satellite communication systems, including launching, launching, scheduling, microwave transmission, satellite transponders, earthstation hardware, modulation and multiple access techniques, and satellite networks. Prerequisite: ELEG 3143 and ELEG 3703.

ELEG5753 Digital Remote Sensing (Sp) Theoretical and practical aspects of the manipulation and interpretation of environmental phenomena recorded by digital remote sensing instruments. Emphasis is on techniques of digital image enhancement and transformation, digital image processing and supervised & unsupervised classification of multispectral image data from Earth-observing platforms. Prerequisite: ELEG 3703.

ELEG6273 Advanced Electronic Packaging (Sp, Su, Fa) An advanced treatment of electronic packaging and technology. Topics include packaging materials and processes, design techniques, current-voltage measurements, photo-electric measurement, and soldering. Prerequisite: ELEG 5333 or ELEG 5334.

ELEG6274 Control of Physical Systems (Sp, Su, Fa) Models and methods for the control of physical systems. Topics include optimal control, optimal estimation and control of linear dynamic systems. Prerequisite: ELEG 5333 or ELEG 5334.

ELEG6275 Autonomous Control (Sp, Su) Design of autonomous control systems. Prerequisite: ELEG 5333 or ELEG 5334.

ELEG6277 Real-Time Control Systems (Sp, Su) Design of control systems for real-time applications. Prerequisite: ELEG 5333 or ELEG 5334.

ELEG6374 Advanced Computer Networks (Sp, Su) Topics include network architecture, protocols for packet radio communications, and network security. Prerequisite: ELEG 5333 or ELEG 5334.
map scale, map generalization, error mapping, and cartographic production. Prerequisite: (ANTH 4563 or GEOL 4563) or equivalent.

ENDY5043 GIS Analysis and Modeling (Odd yr, Sp) Advanced raster topics are examined with a theoretical and methodological review of terrain, cartographic modeling, GIS principles, and identify four model components: digital data, image processing, kriging, spatial statistics, principal components, zoning and regression modeling, and multi-criteria decision models. Several raster GIS programs are examined with practical exercises designed to integrate GIS, traditional techniques, and improve critical thinking. Prerequisite: (ANTH 4563 or GEOL 4563) or equivalent.

ENDY5053 Quaternary Environments (Fa) An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics, and human adaptations. (Same as ANTH 5053, GEOG 5053, GEOL 5053)

ENDY5063 Paleoclimatology (Sp) The earth’s climate history over the last 2 million years and the influence various factors have had on it: compilation and paleoclimatic histories and methods of dating climatic effects. Prerequisite: GEOG 4363 or equivalent.

ENDY5113 Global Change (Fa) Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined.

Course Descriptions

ENGL ENGLISH

ENGL0053 Basic Writing (Sp, Fa) A required course for incoming students whose placement-test scores indicate that they are not prepared for ENGL 1013. Upon the recommendation of the Department of English, students may possibly be exempted from this course and transferred to ENGL 1013 after further testing during the first week of classes. Credit earned in this course may not be applied to the total required for a degree.

ENGL1013H Honors Composition I (Fa) A course for freshmen with high placement scores. (Same as ENGL 1013H, ENGL 1013i)

ENGL1023H Honors Composition II (Sp) Continuation of ENGL 1013H. Prerequisite: ENGL 1013H.

ENGL1023 Composition II (Sp, Su, Fa) Continuation of ENGL 1013. (Same as ENGL 1023H, ENGL 1023i)

ENGL1115 Vocabulary Building (Irregular) Designed to independently locate vocabulary and thereby improve reading comprehension, writing, and knowledge of the operations of language. Also includes study of how words have been added to the English Language in the past, study of patterns of relatedness, and the analysis of etymology. Some attention given to pronunciation and spelling. Not a remedial course. (Same as ENGL 1153)

ENGL1213 Introduction to Literature (Fa) Approaches to human communication writing fiction, drama, and poetry at the college level.

ENGL2003 Advanced Composition (Sp, Su, Fa) Review course in English composition. Required of all candidates for bachelor’s degree unless exempted by examination or by credit in ENGL 2013 or by a grade of at least a “B” in ENGL 1013 and a grade of “A” in ENGL 1023 at the University of Arkansas, Fayetteville. Not to be taken before the second semester of the sophomore year; must be taken prior to the last semester before graduation. Cannot be counted toward a major in English. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL2013 Essay Writing (Sp, Su) Prerequisite: ENGL 1013 and ENGL 1023. (Same as ENGL 2013i)

ENGL2023 Creative Writing I (Sp, Fa) Beginning level workshop course in which students write original poems and stories. Reading and detailed discussion of poems and stories in anthologies is required. Designed to teach the student the fundamental techniques of fiction and poetry.

Prerequisite: ENGL 1013 and ENGL 1023,

ENGL2123 History of Literature in English I (Sp, Su) A critical and historical survey of the development of literature in English from its beginnings to the Restoration period. Prerequisite: b/ENGL 1013 and b/ENGL 1023.

ENGL2124 History of Literature in English II (Sp, Su) A critical and historical survey of the development of literature in English in both Great Britain and the United States, from the Restoration to the rise of Romanticism. Prerequisite: ENGL 2123.

ENGL2153 History of Literature in English III (Sp, Su) A critical and historical survey of the development of literature in English, in both Great Britain and the United States, from Humanism to Modernism. Prerequisite: b/ENGL 1013 and ENGL 1023.

ENGL2163 History of Literature in English IV (Sp, Su, Fa) A critical and historical survey of literature in English from Modernism to the present, including literature from English-speaking countries other than Great Britain and the United States. Prerequisite: ENGL 2153 and ENGL 2103.

ENGL2213 Poetry (Sp, Fa) A critical introduction to the genre.

ENGL2303 Survey of American Literature from the Colonial Period through Naturalism (Sp, Fa) A survey of major American writers from the colonial period to 1900.

ENGL2353 Survey of Modern American Literature (Sp, Fa) A survey of major American writers from 1900 to World War II.

ENGL3031 Creative Writing II (Sp, Fa) Laboratory course for students who wish to attempt original work in the various literary forms. Prerequisite: b/ENGL 2023 or equivalent.

ENGL3053 Technical Writing (Sp, Fa) Intensive practice in such types of writing as processes, descriptions of mechanism, abstracts, and laboratory and research reports. The criteria for effective written exposition in the sciences and engineering. Prerequisite: ENGL3113 Folklore (Irregular) Popular literature (ballads, folktales, etc.). Prerequisite: junior standing.

ENGL3123 Folk and Popular Music Traditions (Irregular) Introduction to the study of folk and popular music. Emphasis on American traditions. Prerequisite: ENGL 3113.

ENGL3173 Introduction to Linguistics (Irregular) Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Emphasis on language history and its relation to culture and society, the history of linguistic scholarship. Prerequisite: junior standing. (Same as ANTH 3173, CUMM 3173)

ENGL3183 Modern English Syntax and Styile (Sp) Structure of modern English (from 1500 to the present), with emphasis upon the contemporary period; different grammatical systems (such as traditional, structural, and generative transformational) and the analysis of syntax upon dialects, place names, and specific lexical and structural differences between standard and non-standard English.

ENGL3193 History of the English Language (Fa) Introduction to the English language and its vocabulary from Anglo-Saxon times to the present.

ENGL3203 Poetry (Sp, Fa) A critical introduction to the genre.

ENGL3213 Fiction (Sp, Fa) A critical introduction to the genre.

ENGL3223 Drama (Sp) A critical introduction to the genre.

ENGL3283 Topics in Popular Culture and Popular Genres (Irregular) Survey of a broad topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. May be repeated.

ENGL3333 British Short Story (Irregular) Survey of the British short story in the nineteenth and twentieth centuries, with emphasis on the major writers.

ENGL3433 Introduction to Chaucer (Irregular) Course designed primarily for undergraduate students. Extensive reading in Chaucer’s major works.

ENGL3623 The Bible as Literature (Irregular) The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Same as WLIT 3623)

ENGL3713 Topics in Medieval Literature and Culture (Irregular) Study of the languages, literature and civilization of the British Isles from approximately 500-1600 CE (including Old English, Middle English, Celtic, Anglo-Norman and Scoto-Norman); Content varies.

ENGL3723 Topics in Renaissance Literature and Culture (Irregular) The study of works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated.

ENGL3733 Topics in Restoration and Eighteenth-Century Literature (Irregular) The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated.

ENGL3743 Topics in 19th-Century British Literature and Culture (Irregular) The study of literature of the 19th century, with attention to particular themes, genres, authors, literary movements, or other organizing principles. Content varies. May be repeated.

ENGL3753 Topics in Modern British Literature (Irregular) This course focuses on the literature and culture of a specific period of time within the twentieth century, or on more broadly conceived topics that might organize the century as a whole. Content varies.

ENGL3763 Topics in Postcolonial Literature and Culture (Irregular) Survey of a broad topical area related to postcolonial literature and culture. Content varies. May be repeated.

ENGL3833 Topics in American Literature and Culture to 1900 (Irregular) The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. May be repeated.

ENGL3843 Topics in Modern American Literature and Culture (Irregular) The study of a special topic in the field of modern American literature and culture. Content varies. May be repeated.

ENGL3853 Topics in African-American Literature and Culture (Irregular) The study of works of African-American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated.

ENGL3863 Topics in Literature and Culture of the American South (Irregular) The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical
Course Descriptions

ENGL4003 Special Topics (Irregular) Survey of a broad topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated.

ENGL4004 English Language and Composition for Teachers (Fa) Subject matter and methods of approach for high school composition. Prerequisite: ENGL 3503.

ENGL4005 English Language Concurrency (Irregular) Open to Honors candidates. Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL4013 Undergraduate Poetry Workshop (Irregular) A workshop in writing the screenplay with close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 4023 Undergraduate Fiction Workshop (Irregular) for advanced students. Gives close attention to individual manuscripts in a workshop environment. May be repeated.

ENGL4073 Film Writing Workshop (Irregular) A workshop in writing the screenplay with close attention given to student manuscripts and adaptations. Prerequisite: advanced standing.

ENGL4113 Undergraduate Independent Study [Irregular] UG undergraduate original research and writing. Prerequisite: ‘B’ average and two-thirds (21 hours or regular requirements for length major completed).

ENGL4143 American Film Survey (Irregular) A survey of major American genres, major directors, and films that have influenced the development of motion pictures. (Same as COMM 4143)

ENGL4213 Senior Research Seminar (Irregular) Seminar in Literature and English with a substantial research paper required.

ENGL4303 Introduction to Shakespeare (Sp, Su, Fa) Examine reading in Shakespeare’s comedies, histories, tragedies, and romances. (Same as ENGL 3603)

ENGL4503 Introduction to Literary Theory (Irregular) A historical survey of literary theory from Plato onward.

ENGL4513 Studies in Literary Criticism and Theory (IR) A survey of contemporary trends in literary criticism. Emphasis will be placed on engaging the practices of a particular theory. Content varies. May be repeated.

ENGL4533 Studies in Literature and Gender (Irregular) The study of a special topic involving literature and gender. Content varies. May be repeated.

ENGL4543 Studies in Literature and Multiculturalism (Irregular) The study of literature and multiculturalism, with attention to particular themes, genres, authors, literary movements, historical moments, or other questions. At least one major paper will be required. Content varies. May be repeated.

ENGL4563 Topics in Major Authors (Irregular) The concentrated study of works by one or more major authors. At least one major paper will be required. Content varies. May be repeated.

ENGL4573 Studies in Major Literary Movements (Irregular) This course focuses on the literature of a major literary movement such as Romanticism or Modernism, or of a more specific topic such as utopianism in twentieth-century writing. Content varies. May be repeated.

ENGL4603 Special Studies (IR) Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated.

ENGL4604 Special Studies (Irregular) Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated.

ENGL498V Senior Thesis (Irregular) (1-6) Independent research, directed thesis, film comedy, the experimental film, criticism, the film musical. (Same as COMM 569V)

ENGL5073 American Literature and Culture Before 1900 (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5073 Studies in Literature and Culture of the American South (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5083 Studies in Twentieth-Century American Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5093 Studies in Twentieth-Century British Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5263 Form and Theory of Poetry: II (Irregular) Second part of the study of the techniques of poetry. Discussion is limited to the short story. Prerequisite: ENGL 5263.

ENGL5273 Form and Theory of Poetry: I (Irregular) An examination of principal challenges that confront translators of literature, including the recreation of style, dialect, ambigous, and formal poetry; vertical translation; translation where multiple manuscripts exist; and the question of how literal a translation should be. (Same as WLL 5233)

ENGL5283 Shakespearean Drama: I and II (Irregular) (Sp) The concentrated study of works by one or more major authors. At least one major paper will be required. Content varies. May be repeated.

ENGL5303 Seminar in Restoration and Eighteenth-Century British Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5313 Introduction to Literary Theory (Irregular) An introductory survey of theoretical approaches to literature. May be repeated.

ENGL5403 Studies in Nineteenth-Century British Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5513 Seminar in Twentieth-Century British Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5603 World Literature and Culture in English (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL5623 The Bible as Literature (Irregular) Three translations of the Bible; its qualities as great literature; its influence on the English; religious traditions. (Same as WLL 5623)

ENGL5633 English Drama from Its Beginning to 1642 (Irregular) Early forms, Tudor drama, Shakespearean comedy and farce, drama to the closing of the theatres.

ENGL5653 Shakespeare: Plays and Poems (Irregular) (Sp, Su, Sp)

ENGL565V Seminar in Film Studies (Irregular) (1-9) Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, the experimental film. (Same as COMM 569V)

ENGL5703 American Literature and Culture Before 1900 (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL6733 Seminar in Literature and Culture of the American South (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL6803 Seminar in Twentieth-Century American Literature and Culture (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL6933 Seminar in Popular Culture and Popular Genres (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL6943 Seminar in Literary Theory (Irregular) Subject matter changes depending on student interest and faculty expertise. May be repeated.

ENGL6953 Seminar in Literary History (Irregular) (Same as COMM 6953)
**Subject matter changes depending on student interest and faculty expertise. May be repeated.**

**ENGL 326: Senior in English: The Articulate and Composition (Irregular)** Subject matter changes depending on student interest and faculty expertise. May be repeated.

**ENGL 698VM Master’s Thesis (Sp, Su, Fa) (1-6)**

**ENGL 700MV Master of Fine Arts Thesis (Sp, Su, Fa) (1-6)**

**ENGL 700V Doctoral Dissertation (Sp, Su, Fa) (1-18)**

(ENVS) **ENVIRONMENTAL SCIENCE**

**ENSC 1003 Environmental Science (Sp) Series of lectures and discussions introducing the topic of environmental science related to water, soil, and air quality. May not be taken for natural science credit by students in Fullbright College.**

**ENSC 1202 Orientation to Crop, Soil, and Environmental Science (Fa)** An introduction to majors in Crop Management and Environmental, Soil and Water Sciences with emphasis on issues in these disciplines and on developing ethical and communication skills. Required of all departmental majors with less than 24 semester credit hours. Recitation 2 hours per week. Lecture 3 hours, discussion 1 hour per week. Corequisite: ENSC 2201L and Drill component. Prerequisite: CHEM 1103. (Same as ENSC 2203)

**ENSC 2003 Introduction to Water Science (Fa)** Properties, occurrence, and description of the types, functions, quality and quantity, potential contaminants, uses, and guiding policies and regulations of the various water resources in the environment. Prerequisite: ENGL 1023 and ENSC 1003 or CHEM 1053 or higher or BGL 1113 or higher or BIOL 1543.

**ENSC 3103 Plants and Environmental Restoration (Udd, Fa)** Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: ENGL 1023 or HORT 2003.

**ENSC 3221L Ecosystems Assessment Laboratory (Even Years, Fa)** The purpose of this laboratory is to complement concepts learned in lecture by carrying out experiments that familiarize students with methods used in soil, aquatic ecology, and soil science. Students will collect samples, analyze and interpret data obtained from soil and water samples. Lab will meet once per week for 3 hours. Corequisite: ENSC 3223.

**ENSC 3223 Ecosystems Assessment (Even Years, Fa)** Application of ecological principles for EWS majors and college students interested in environmental science. Applications of the basic ecological principles of organisms, populations, communities, and ecosystems to gain an appreciation for how large scale patterns in terrestrial and aquatic ecosystems are influenced by small scale interactions among individuals (microorganisms to invertebrate macrofauna) and between these systems and their local environment. Lecture 3 hours per week. Prerequisite: BIOL 1543, CSE 2203, and ENSC 3003.

**ENSC 3253 Septic Systems (Odd years, Sp)** An overview of designing, installing, and monitoring standard and alternative septic systems as well as the rules and regulations that impact septic system design and installation. (Same as CVEG 3253). Recitation 3 hours per week. Prerequisite: CSE 2203 or CVEG 3213. (Same as CVEG 3253)

**ENSC 3413 Principles of Environmental Economics (Fa)** An introductory, issues-oriented course in the economics of the environment that is involved in society making decisions about environmental quality will be studied. Environmental issues important to the State of Arkansas and the United States will be emphasized (same as AGEC 3413). Prerequisite: AGEC 1103 or ECON 2023. (Same as MISC 3413)

**ENSC 3603 GIS for Environmental Science (Odd Years, Sp)** Provide instruction on the uses of GIS techniques to support environmental and agricultural land use problems. Areas include: 1) an introduction to spatial variability in soils with an emphasis on the application of GIS techniques to map and understand spatial parameters important to different land uses, and 2) development of individual experience in the use of GIS in solving environmental and agricultural problems in an oral and written term project. Prerequisite: CSES 2103.

**ENSC 3933 Environmental Ethics (Odd Years, Sp)** The course addresses ethical questions about nature and the natural environment. Topics of discussion include anthropocentric and biocentric ethics, population control, obligations to future generations, animal rights, moral considerability, Leopold’s land ethic, deep ecology, and ecoscenism. Lecture/discussion 3 hours per week. Prerequisite: ENSC 3003 or PHIL 2003 or PHIL 2103.

**ENSC 400V Special Problems (Sp, Su, Fa) (1-3)** Work on special problems in environmental science or related fields.

**ENSC 4023 Water Quality (Fa)** Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Laboratory experiments in water sampling, measurement of water quality parameters, and instrumentation. Corequisite: Lab component. Prerequisite: CHEM 1103 and CHEM 1121L.

**ENSC 4034 Analysis of Environmental Contaminants (Even Years, Sp)** Methods of analysis for inorganic and organic compounds and microorganisms in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Lecture 2 hours and laboratory 4 hours per week. Prerequisite: ENSC 4023 and CHEM 3213.

**ENSC 404V Special Topics (Irregular) (1-3)** Study of selected topics in environmental sciences not available in other courses.

**ENSC 4263 Environmental Soil Science (Sp)** Study of the behavior of pesticides, toxic organic compounds, metals, nutrients, and pathogenic microorganisms in the soil/plant/water continuum. Lecture 3 hours per week. Prerequisite: CSES 3214. (Same as CSES 4263)

**ENSC 4413 Economics of Environmental Management (Odd years, Sp)** An economic approach to problems of evaluating private and social benefits and costs of policies of air, water, and soil pollution. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: AGEC 1103 and AGEC 3413. (Same as AKL/UL 4413)

(ENTO) **ENTOMOLOGY**

**ENTO 1023 Insects and People (Sp, Fa)** Appreciation of the insects and their roles in nature and in civilization for students not required to take ENVI 1030. Biological, historical, social, and economic aspects of insects are discussed. Emphasizes appreciation of entomology and employs many visual aids. Lecture 3 hours per week.

**ENTO 1031 Field and Laboratory Studies in Entomology (Udd, Su)** Fundamental and identification of insects and other arthropods occurring in woodland, aquatic and agricultural environments with emphasis on identification and observation of insects in their natural settings. Laboratory 2 hours per week. Corequisite: ENTO 1023.

**ENTO 3013 Introduction to Entomology (Fa)** Fundamentals of structure, function, biology and identification of insects; typical procedures in control of representative species. Insect collection required. Lecture 2 hours, laboratory 2 hours a week. Suggested prerequisites: BIOL 1543 and BIOL 1541L. Corequisite: Lab component.

**ENTO 400V Special Problems (Sp, Su, Fa) (1-4)**

**ENTO 4013 Insect Behavior and Chemical Ecology (Even years, Sp)** Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component.

**ENTO 4024 Insect Diversity and Taxonomy (Fa)** Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component.

**ENTO 4033 Immature Insects (Even years, Sp)** Identification of immature forms of insects and their phylogeny and development. Lecture 1 hour and laboratory 2-2 hours per week. Corequisite: ENTO 4024.

**ENTO 4113 Applied Molecular Genetics (Odd years, Sp)** Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: ENVI 5120L.

**ENTO 5013 Applied Molecular Genetics (Even years, Sp)** A hands on course in applied molecular genetic techniques used in agricultural research including molecular diagnostics and population genetics. Students will learn how to use advanced molecular genetic tools and Internet database resources to the organism that they are using for their graduate research. Prerequisite: ANSC 3123 ENTO 600V Master’s Thesis (Sp, Su, Fa) (1-6)

**ENTO 60613 Master’s Thesis (Sp, Su, Fa) (1-6)**

**ENTO 6071 Seminar (Sp, Fa)** Fall: special topics not covered in regular course work. Spring: critical review of research papers in entomology. Seminar will be taken by graduate student majors for both semesters.

**ENTO 60613 Insect Physiology (Even years, Sp)** General and comparative physiology of insects. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 3 hours per week. Corequisite: lab component.

**ENTO 60621 Insect Toxicology (Odd years, Sp)** Toxicology of chemicals to insects and humans including techniques of testing collecting data, and factors influencing reactions to different classes of insecticides. Previous knowledge of organic physiological chemistry is helpful, but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: lab component.

**ENTO 700V Doctoral Dissertation (Sp, Su, Fa) (1-8)** Prerequisite: graduate standing.

(ENV) **ENVIRONMENTAL DESIGN**

**ENVD 1301 Orientation in the Design Studio Experience (Su)** Four-day intensive design studio

Course Descriptions

University of Arkansas, Fayetteville 279
experience designed to acquaint prospective design majors with the nature of studio education. Design project and jury, for the general student.

ETEC4853 Urban Planning and Practice (Irregular) An introduction to the theory and practice of contemporary urban planning; emphasis upon the understanding and application of as an interactive and interactive process necessary to the preparation of comprehensive land use plans and plan implementation; study through readings, development cases, and simulation of urban change, growth, and impact of decision making. Credit cannot be received for both CUVL 4853 and ENVU 4853.

ETEC4863 Public Design and Planning Determinants (Irregular) Introduction to land use theory and practice and private development devices used in management of change within community; explanation of tools and techniques of land use control such as zoning, subdivision regulations, capital improvement program, transportation, and citizen participation.

ETEC4883 Design and Human Behavior (Irregular) An advanced-level course investigating behavioral, social, and cultural factors and their implications for the design and planning of the physical environment; relationship of basic behavioral and social concepts to theory of environmental design through seminar and case study.

ETEC EDUCATIONAL TECHNOLOGY

ETEC2001 Educational Technology (Sp, Su, Fa) A criterion-based course designed to provide beginning technology users with fundamental knowledge and skills in the area of fundamental computer technology and traditional educational media. Grades are determined by total points earned on completion of identified course projects, unit quizzes, and a proctored final examination. Corequisite: ETEC 2002L.

ETEC5062 Teaching and Learning with Computer-Based Technology (Irregular) Provides students admitted to the Master of Arts in Teaching (M.A.T.) program with the information and experience needed to use computer-based teaching technologies to meet instructional objectives in content and classrooms. Prerequisite: ETEC 2003.

ETEC5063 Practicum in Educational Technology (Irregular) Provides practical experiences in educational technology Prerequisite: graduate standing and 15 credit hours completed in educational technology.

ETEC5103 Instructional Systems Analysis and Design (Irregular) A basic level instructional analysis and design course. Students demonstrate knowledge of specific beginning level instructional design strategies as it significantly influence the analysis, design, and evaluation of instructional technology products. Prerequisite: graduate standing.

ETEC5183 Internet in the K-12 Classroom (Irregular) This course prepares teachers to be informed consumers of Internet technology; plan appropriate and effective Internet activities for their learners; and understand their responsibilities for the use of Internet media, communication, and the Internet in the classroom. Prerequisite: graduate standing.

ETEC5203 History & Systems of Instructional Technology (Sp, Su, Fa) Provides learners with a comprehensive survey of the major trends, issues, people, processes, and products that have significantly affected the evolution of the field of educational technology.

ETEC5213 Introduction to Educational Media (Sp, Su, Fa) Instruction in selecting, utilizing and evaluating instructional materials and equipment. Prerequisite: graduate standing.

ETEC5233 Teaching Educational Technology (Fa) Provides practical experience in teaching educational courses. Prerequisite: graduate standing.

ETEC5243 Instructional Design Theory & Models (Fa) A study of the instructional development process as it pertains to the design and production of instructional materials which use modern technologies. Goal analysis, objectives, evaluation, instructional strategy development, production of an educational product, and revision of the instructional materials are considered. Prerequisite: graduate standing.

ETEC5253 Information Technologies in Education (Irregular) An intensive examination of the role of telecommunications and distance education technologies and their implications for educational practice. Emphasis is on telecommunication as an enhancement education technologies in classroom environments.

ETEC5263 Grant Writing in Instructional Technology (Sp, Su, Fa) Students will have an opportunity to prepare and submit an actual grant proposal to an agency for consideration. Will study research in instructional media over the past 60 years and learn specific criteria for reading and evaluating research reports. Students will have opportunities to write research proposals and learn the research process. Prerequisite: ETEC 5213.

ETEC528V Field Experiences in Instructional Technology (Irregular) (3-6) Field experience in educational technology settings. Prerequisite: graduate standing and 6 hours of graduate work in instructional technology.

ETEC5293 Critical Evaluation of Educational Films (Su) A criterion-based course designed to develop critical thinking skills in the selection and evaluation process. Appropriate for media specialists, curriculum supervisors, librarians, administrators, classroom teachers and others involved in the purchasing, selection and/or utilization of educational films. Prerequisite: ETEC 5213 or equivalent.

ETEC5303 Learning Environments in K-12 Classrooms (Irregular) This course is a study of how technology can be used to support current theories of learning. Students enrolled in the course will be required to learn about various learning theories and technologies as well as develop projects that utilize technology and current learning theories. Prerequisite: graduate standing.

ETEC5313 Principles in Visual Literacy (Sp, Su, Fa) Focuses primarily on the development of visual images that can be employed in the teaching process. The use of black and white photography, darkroom techniques, and color slide photography are vehicles for studying the use of visual images in educational use.

ETEC5323 Computers as an Instructional Technology (Sp) An advanced course in the creation and evaluation of computer courseware for educational purposes. Emphasizes instructional design principles as they relate to computer education.

ETEC5333 Teaching on the Internet (Irregular) This course examines the use of the Internet by practitioners. Students will develop instructional activities in the environment of online instruction. Topics covered include technical and methodological issues related to instruction with the Internet. Prerequisite: graduate standing and Web Development Experience.

ETEC5343 Assessment & Evaluation in Instructional Technology (Sp, Su, Fa) Provides learners with a comprehensive survey of the major assessment and evaluation techniques used in the system design and evaluation. Techniques range from needs assessment through summative evaluation.

ETEC5353 Production of CD ROM Media (Irregular) This course examines the processes involved in the creation and production of multi-media CU-HUM project. It includes students with the experience of collaboratively designing, developing, and producing a large scale multi-media CU-HUM project. Emphasis is placed on teamwork, quality of instructional materials produced, and the utilization of various technologies. Prerequisite: ETEC 5273.

ETEC5363 Distance Learning (Irregular) This course covers important aspects of the distance learning, course design and teaching. The course will link theory to practice by investigating the research that underpins practice, examining and analyzing current practice, proposing practice standards, and discussing issues related to learners in distance education environments.

ETEC5373 Instructional Design (Irregular) This course covers the important aspects of the web design process as carried out in many educational environments. The course will include theory to underpin practice, examination and analysis of instructional design principles and standards, and discussion of issues related to learners in this new medium.

ETEC5383 Issues in Web Design (Fa) This course is an overview important aspects of the web design process as carried out in many educational environments. In this seminar we will be focusing on nonprofit educational environments. This course will include theory to underpin practice, examination, and analysis of current practice, proposal of practice standards, and discussion of issues related to learners in nonprofit settings. Prerequisite: graduate standing.

ETEC560V Workshop (Irregular) (1-6) A seminar designed to enhance the established educational technology curriculum by providing students with special topic content and classroom experiences under the guidance of a faculty member. Prerequisite: graduate standing.

ETEC574V Internship (Sp, Su, Fa) (1-6) A supervised field placement in educational technology that provides experience consistent with the student's professional goals and training emphasis. Internship topics and design and directed under the guidance of a faculty member. Prerequisite: graduate standing.

ETEC599V Seminar (Irregular) (3-6) This course is designed to enhance the established educational technology curriculum by providing students with special topic content and classroom experiences under the guidance of a faculty member. Prerequisite: graduate standing.

ETEC600V Master's Thesis (Sp, Su, Fa) (1-6) Individually designed and conducted studies of educational technology under the guidance of a faculty member. Negotiated learning contract with supervising faculty required before enrollment. On-campus internship may be required. Prerequisite: graduate standing.

ETEC6223 Strategic Planning and IDT Programs (Sp, Su, Fa) This course offers readings and experiences intended to develop strategic planning knowledge, values, attitudes, and skills in future instructional design and technology leaders. Topics covered include strategic planning and leadership.

ETEC6253 Information Technologies in Education (Irregular) An intensive examination of the role of telecommunication and distance education technologies and their implications for educational practices. Emphasis is on technical and methodological issues related to research and grant writing in instructional media. Grades are determined by total points earned on completion of identified course projects, unit quizzes, and a proctored final examination. Corequisite: ETEC 2002L.

ETEC6393 Issues and Trends in Instructional Design and Technology (Irregular) Critical thinking and problem-solving processes are a result of the increasing influence of technology into the school and training environments. Emphasis is placed on the acquisition of knowledge concerning online instruction, the quality of instructional materials produced, and the ability to work with and teach a faculty member about online instruction. Prerequisite: graduate standing and Web Development Experience.

ETEC6343 Assessment & Evaluation in Instructional Technology (Sp, Su, Fa) A study of the instructional development process as it pertains to the design and production of instructional materials which use modern technologies. Goal analysis, objectives, evaluation, instructional strategy development, production of an educational product, and revision of the instructional materials are considered. Prerequisite: graduate standing.

EUST2013 Introduction to Europe (Fa) This course will cover the basic physical and human geography of Europe, emphasizing the factors that tie Europe together as well as the diversity of environmental conditions in the region. The class will focus particularly on those countries that are current members of the EU and on possible future entrants.

EUST399V Honors Thesis (Sp, Su, Fa) (1-6) May be repeated for six hours. Prerequisite: junior standing.

EUST4003H Honors European Studies Colloquium (Sp) (Same as EUST 4003) A seminar for honors students designed to examine the special issues and problems that define the European experience. Prerequisite: sophomore standing.

EUST470VH Honors Special Topics (Irregular) (1-6) An examination of pertinent issues in Europe. (Same as EUST 470V)

EUST470V Special Topics (Irregular) (1-6) An examination of pertinent issues in Europe. (Same as EUST 470V)

(ExE) EXTENSION EDUCATION

EXED3023 An Introduction to the Cooperative Extension Service (Sp) Development of the extension service as a part of the Land-Grant College system; organization, personnel and functions of the Extension Service in culture and human environmental sciences. Prerequisite: junior standing.
EXED4173 Principles of Extension Teaching (Fa)
An understanding of the principles of teaching and learning, selecting appropriate teaching methods and materials with an emphasis on the role of extension as a part of the community education system. Prerequisite: EXED 3023 and PSYC 2003.

EXED4183 Management of Volunteer Programs (Sp)
Recruitment, evaluation, and recognition of volunteers in agricultural-related organizations, non-profit organizations, community groups, and advisory committees. Prerequisite: junior standing;

EXED475V Internship in Extension (Sp, Su, Fa)
A supervised practical work experience in Cooperative Extension which is designed to give the student an insight into the role of Extension employees and an opportunity to gain professional experience. Prerequisite: junior standing and EXED 3023.

EXED5113 Program Development and Evaluation (Irregular)
Principles and procedures of program development process including planning, designing, implementing, and evaluating of extension education programs. An emphasis on the framework for appraising and non-formal education principles to the change process. Prerequisite: INSUJ 3022.

EXED5133 Extension Organization and Administration (Irregular)
Program and personnel administration for planning and management of county extension programs. Emphasis will be given to organization, structures, principles, and theories of administration, personnel management, training and evaluation. Prerequisite: graduate standing.

(FDSC) FOOD SCIENCE

FDSC1011 Food Science Orientation (Fa)
Introduces students to a unique career oriented course. Course emphasizes the importance of science in processing and preservation of food and discusses current topics and issues. Provides sound basic information on food structure, additives, labeling, environmental issues, food regulations, and food safety. Lecture 2 hours per week for 8 weeks.

FDSC1103 Introduction to Food Science (Sp) This course is designed to provide students with a general application and understanding of current issues associated with food products and food ingredients. Discussions will focus on controversial subjects, involving food products, food additives, food safety and preservation techniques based on scientific principles and popular belief. Lecture/discussion/demonstrations, 3 hours per week.

FDSC233 Food Safety and Sanitation (Even years, Fa)
Principles of sanitation, cleaners and sanitizers, sanitary equipment and plant design, and microbial growth and control in food processing operations. Lecture/discussion/demonstrations, 3 hours per week.

FDSC3103 Principles of Food Processing (Even years, Fa) The course is designed as an overview of the unit, food processing operations common to all types of food processing plants. Material will be drawn from international food processing operations, fruits and vegetable products, poultry and meats, oilseeds and cereals, emphasis on oral communication and critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L.

FDSC3202 Introduction to Food Law (Even years, Sp) Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food labeling, and the FDA. Discussion relates to practical use of food law. Lecture 2 hours per week.

FDSC3303 Principles of Food Processing (Even years, Fa) This web-based introductory course is designed as an overview of unit food processing operations common to all types of food processing plants. Examples will be drawn from national and international food processing operations processes. Prerequisites: math, geometry, vocabulary, and math. Emphasis is on student learning principles of food processing operations and includes strengthening students’ written communications and critical thinking skills. Corequisite: lab component.

FDSC3753 Introduction to Food Engineering Principles (Sp) Web-based course designed to give students a perspective of how engineering principles are used in the food industry. The student will be introduced to the application of food engineering principles to real-world food processing situations. Students will develop an understanding of the basics of unit systems, mass balances, fluid mechanics, fluid flow, heat transfer, and thermal processing. Prerequisite: MATH 1285 or equivalent and/or consent of instructor.

FDSC400V Special Topics (Sp, Su, Fa) (1-4) Investigation of assigned problems in food science. Prerequisite: junior standing.

FDSC4011 Undergraduate Seminar (Sp) Open to all food science students. Course may be repeated with a change in topic. Prerequisite: junior standing.

FDSC4114 Food Analysis (Even years, Sp) Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and processed food. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 2611L, and CHEM 2611L or (CHEM 3003 and CHEM 3011L).

FDSC4121 Microbiology (Sp) Microbiology, contamination, preservation, and spoilage of different kinds of foods, food poisoning, sanitation, control, and inspection; microbiology of water; and standard methods for food and public health laboratories. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2103 and BIOL 2101L, and CHEM 1123 and CHEM 1121L. (Same as BIOL 4124)

FDSC4203 Quality Evaluation and Control (Odd years, Sp) Defined of grades and standards of quality by chemical, physical, and sensory techniques. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 2611L, and CHEM 2611L or (CHEM 3003 and CHEM 3011L).

FDSC4223 Risk Analysis for Biological Systems (Odd years, Fa) Principles of risk assessment including exposure assessment and dose response, and risk management. Methods of risk analysis and simulation with computer software. Applications of risk analysis in animal, food, and environmental systems. Prerequisite: STAT 2023 or (STAT 2033 or AGST 4023) and BENG 1022. (Same as HJPC 4223)

FDSC4304 Food Chemistry (Fa) Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; chemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 2613 and CHEM 2611L or (CHEM 3003 and CHEM 3011L).

FDSC431V Internship in Food Science (Irregular) (1-4) A supervised practical work experience in the food industry or a governmental or industrial organization having direct impact on the food science area in order to gain professional competence and insight into employment opportunities. Prerequisite: junior standing.

FDSC4413 Sensory Evaluation of Food (Odd years, Fa) Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological and psychological factors affecting sensory verdicts. Lecture and laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: STAT 2003 or (STAT 2033 or AGST 4023 or STAT 2023 or PSYC 2003).

FDSC4713 Food Product and Process Development (Odd years, Sp) Multidisciplinary approaches for developing new food products and processes, in the context of an industry-sponsored project. Group dynamics and interpersonal skills. Factors that influence product and process development. Analysis and modeling applied to food process design. Lecture 2 hours and laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: HJPC 3103 and HJPC 4203 or HJPC 4304.

FDSC4723 Special Topics in Food Science (Irregular) (1-4) Discussion focused on selected topics of particular interest in a food science based on food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation.

FDSC4754 Engineering Principles of Food Processing (Odd years, Sp) Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2033, and PHYS 2031L.

FDSC4823 Principles of Food Microbiology (Fa) This web-based class will build on web course FDSC 2003, fundamentals of microbiology and look at food structure and function, viability states, physical and chemical barriers, sampling and enumeration methods, hurdle and predictive microbiology models. Lecture and problem sets and project. 3 hours per week. Prerequisite: FDSC 2003.

FDSC5001 Seminar (Sp, Fa) Presentation and discussion of graduate student research. Prerequisite: graduate standing.

FDSC509V Special Problems Research (Sp, Su, Fa) (1-4) Original investigation on assigned problems in food science. Prerequisite: graduate standing. May be repeated 6 hours.

FDSC5603 Enology (Even years, Fa) Examination of factors influencing wine grape quality with emphasis on wine and grape regions, grape composition, and fermentation. Lecture/discussion 3 hours per week. Corequisite: CHEM 3813 and FDSC 4124.

FDSC600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

FDSC602V Special Topics (Irregular) (1-3) Discussions focused on selected topics of particular fields of raw product physiology and food processing, chemistry, physiology, microbiology, evaluation, sensory analysis and preservation. Prerequisite: graduate standing.

FDSC6033 Food Biochemistry (Even years, Sp) Biochemical characteristics, functions, regulation and impact of components in raw and processed foods of plant origin. Lecture/discussion 3 hours per week. Prerequisite: CHEM 3813.

FDSC6101 Colloquium in Food Science (Sp, Fa) Presentation and discussion of papers and topics by doctoral student and graduate faculty in the interdepartmental food science program. Prerequisite: graduate standing.

FDSC6123 Food Carbohydrate Chemistry (Odd years, Sp) Focus is on carbohydrate chemistry including molecular structures and physical properties, production and food applications, analytical methods for food carbohydrates, and interactions among food polysaccharides. Prerequisite: HJPC 4304.

FDSC6133 Food Lipid Chemistry (Even years, Fa) Chemistry and technology of commercial fats and oils in food systems with discussion of lipid changes affecting food quality and human health. Prerequisite: FDSC 4304 and FDSC 4114.

FDSC6333 Food Protein Chemistry and Functionality (Odd years, Fa) This course is a study in advanced food protein chemistry, including molecular structures and physical properties, processing and food applications, analytical methods for food hydrocolloids, and interactions among food polysaccharides. Prerequisite: HJPC 4304.

FDSC650V Doctoral Dissertation (Sp, Su, Fa) (1-6) The doctoral program in food science is an interdepartmental program offered by the departments of Animal and Poultry Sciences, and Human Environmental Sciences. Prerequisite: graduate standing.

(FIIR) FULLBRIGHT INSTITUTE OF INTERNATIONAL RELATIONS

FIIR2813 Introduction to International Relations (Sp, Fa) Introduction to the international system, theories of international behavior, political economy, conflict and peacemaking, the third world, international law and organizations, and the nature of the post-Cold War world. (Same as PLSC 2813)

FIIR4003 International Relations Seminar (Fa) The capstone course in international relations involves intensive study of major global trends and issues. Students choose a research project culminating in a senior thesis to meet the College writing requirement. Prerequisite: FIIR 2813 or PLSC 2813.

(FINN) FINANCE

FINN3003 Personal Financial Management (Sp, Fa) Topics covered include cash planning, managing credit, taxes, insurance, investments, and retirement planning.

FINN3013 Financial Analysis and Valuation (Sp, Su, Fa) Focuses on how information contained in financial statements can be used in financial decision-making, in
particular, to assess financial performance, evaluate credit and default risk, forecast future funds needs, weigh the risk-reward of investment, and develop estimates of intrinsic value using relative valuation metrics and discounted cash flow methods. Prerequisite: WCOB 2043.

FINN3053 Financial Markets and Institutions (Sp, Su, Feng) Focus on the principal operations of financial markets and their implications in the economy. Supply of, demand for, funds, interest rates and flow of funds analysis; financial policies, practices of bank and nonbank financial institutions. Prerequisite: ECON 2023 or ECON 2143.

FINN3103 Financial Modeling (Sp, Su, FA) Develop strong computing skills in financial analysis by integrating conceptual material with spreadsheet-based numerical solution and simulation techniques. Prerequisite: WCOB 2043.

FINN3133 Commercial Banking (Sp, Su, Feng) Commercial bank administration, management; loans; bond portfolios; credit analysis; public relations; analysis and interpretation of federal reserve regulations and publications. Prerequisite: WCOB 2043.

FINN3603 Corporate Finance (Sp, Fa, Feng) Develop analytical competencies in financial planning, cost of capital estimation, corporate liquidity and budgeted cash flow approach to valuation and capital allocation, lease analysis, evaluation of merger and organizational restructuring strategies. Prerequisite: WCOB 2043.

FINN3625 Risk Management (Sp, Fa) A survey of the extent and types of risk in business; ways of dealing with business risk; use of security and commodity exchanges; survey of law bearing on insurance and risk management practices. Prerequisite: FINN 3063.

FINN3703 International Finance (Sp, Su, Fa) Introduction to international financial markets, exchange rates and exchange rate determination, balance of trade measures, and vehicles for foreign trade financing. Prerequisite: ACCT 3723 and FINN 3133.

FINN3933 Real Estate Principles (Sp, Su, Feng) Comprehensive, covering economics of real estate, real estate value, real estate finance, rights in real property and their transfer, public programs, policies relating to real property. Prerequisite: WCOB 2043.

FINN4003H Finance Honors Colloquium (Irregular) Explores important concepts, significant events and/or new developments in the field of Finance. Prerequisite: Senior standing.

FINN4013 Seminar in Personal Financial Planning (Sp) Explores financial planning function, including contact, data acquisition, plan development and implementation; covers all areas of personal financial planning including investments, insurance, taxes, and estate planning; addresses planning techniques and financial planning ethical and legal bases. Prerequisite: FINN 3625 or FINN 3704.

FINN410V Special Topics in Finance (Irregular) (1-6) New developments and special topics in finance not covered in other courses. May be repeated for 6 hours. Prerequisite: FINN 3043.

FINN4133 Advanced Investments (Sp, Fa) Sound principles in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Prerequisite: FINN 3063.

FINN4143 Portfolio Management I (Fa) This course applies modern investment theory to the practical management of the Rebsamen Trust. Students prepare a statement of investment policy and recommend an asset allocation strategy based on a quantitative analysis of asset class returns, and select securities using fundamental analysis. Classes are organized as management meetings and visits to investment managers are an important part of the class. Selection is by invitation. Prerequisite: ACCT 3723 and FINN 3063 and by invitation only.

FINN4153 Portfolio Management II (Sp) This course is a continuation of FINN 4143. Topics covered include technical analysis, dynamic asset allocation and derivative strategies. Visits to major investments firms and organized exchanges in New York City or other locations are generally planned. Prerequisite: FINN 3133. (Irregular) (1-3)

FINN4163 Fixed Income Securities I (Fa) The markets and institutional settings of fixed income securities; valuation, and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate; interest rate derivatives as hedging tools. Prerequisite: FINN 3043 and FINN 3063.

FINN4173 Fixed Income Securities II (Sp) Continuation of FINN 4163. The markets and institutional settings of fixed income securities; valuation, and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate derivatives as hedging tools. Prerequisite: FINN 4163.

FINN4233 Advanced Corporate Finance (Sp, Su, Feng) Complex addresses the selection of investment and financing alternatives; decisions facing the managers of financial institutions. Prerequisite: FINN 3063.

FINN4313 Advanced Commercial Banking (Sp, Fa) Problems and cases emphasizing application of analytical tools, techniques in decision making process. Determination of operating policies regarding loans, investments, liquidity, capital, efficient performance of lending, investment function; profit planning, analysis; strategies of growth, competition; evaluation of bank performance. Prerequisite: FINN 3133.

FINN4413 Real Estate Investment and Appraisal (Fa) Investment analysis and valuation theory applied to real estate. Prerequisite: FINN 3933.

FINN4443 Real Estate Finance (Sp) Consideration of professional aspects of real estate, brokerage, property management, finance, appraisal, property development, current problems and developments relating to real property. Prerequisite: FINN 4143.

FINN450V Independent Study (Sp, Su, Fa) (1-3) Permits students on an individual basis to explore selected topics in finance and/or economics. Prerequisite: FINN 3043.

FINN4733 Life and Health Insurance I (Fa) Basic principles, functions, uses of life and health insurance; types of policy contracts; calculation of premiums, reserves; organizations, management, supervision, of companies. Prerequisite: FINN 3043.

FINN4833 Property and Casualty Insurance I (Sp) Forms and functions of fire, marine, inland marine, automobile title, miscellaneous types insurance and bonds for business, personal use. Prerequisite: FINN 3043.

FINN4843 Property and Casualty Insurance II (Sp) Institutional and functional aspects of property and casualty insurance industry; analyzes types of carriers, marketing organizations, underwriting, rates and rate making, financial analysis, problems facing the industry in these areas. Prerequisite: FINN 3063.

FINN5203 Money and Capital Management (Sp, Su)Role of finance in U.S. economy; the institutions, monetary theory, policies which comprise environment in which financial decisions are made. Finance function within firm; financial planning, analysis and control, financial decision making in modern complex business. Prerequisite: ACCT 5103 and ECON 5103 and ISYS 5203.

FINN5303 Advanced Corporate Financial Management (Sp, Su) Focus on financial policy issues using systems approach to control of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: MBA 5112.

FINN5333 Investment Theory and Management (Fa) Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5203.

FINN5523 Investment Banking and Securities Markets (Fa) Topics include investment banking, securities markets, traditional and new financial products, money management, and derivative securities. Prerequisite: FINN 5203.

FINN5563 Financial Institutions (Sp) Savings intermediation and its effects on allocating investments funds; characteristics of financial institutions including services, asset management, growth; relations between growth of institutions and interest rates, consumer behavior, investment demand, government policies, critical evaluation of performance by financial intermediaries. Prerequisite: FINN 5203.

FINN5563M Financial Infrastructure (Fa) Topics pertinent to manager of firm in multinational business environment, including international institutions, risks, investments, capital budgeting. Prerequisite: FINN 5203.

FINN5573 Risk Management (Sp, Su, Fa) Provides a conceptual understanding of key theoretical developments in the field of financial economics, including firm decisions under risk within a world of uncertainty. Prerequisite: FINN 6133 Seminar in Investment Theory (Sp)

Study advanced literature in field investments, with special reference to theory of random walks, stock valuation models, portfolio management. Prerequisite: FINN 5203.

FINN6233 Seminar in Financial Management (Fa) Financial management of firm with emphasis on financial theory or firm, quantitative methods used in financial analysis. Prerequisite: FINN 5203.

FINN636V Special Problems in Finance (Irregular) (1-6) Case studies in investments, corporation finance, money and banking, monetary theory, international finance, public finance. By arrangement.

FINN6733 Seminar in Financial Markets and Institutions (Sp, Su, Fa) Recent developments in the literature of financial markets and institutions. Participants will be involved in the extensive study of existing theories and empirical tests of the theories. Prerequisite: FINN 700V Doctoral Dissertation (Sp, Fa) (1-18) Prerequisite: candidacy.

FLAN3923H Honors Colloquium (Irregular) Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in foreign languages).

FLAN398V Special Studies (Irregular) (1-6) A course (not independent study) which covers a topic or author not usually presented in depth in regular courses.

FLAN4003 Special Language I (Fa) Under the number, various oriental, African, or other less commonly-taught languages will be offered from year to year. Prerequisite: junior standing.

FLAN4013 Special Language II (Sp) Continuation of Special Language I. Prerequisite: FLAN 4003 or equivalent.

FLAN423V Culture and Civilization: Field Studies (Irregular) (1-6) May be taken for credit in connection with overseas study programs approved by the department.

FLAN4713 Language and Culture (Sp, Su, Fa) Anthropological approaches to the description and analysis of languages and their extension into ethnographic semiotics with emphasis on cognitive models and their sociological correlates. (Same as ANTH 4713,COMM 4713)

FLAN5023 Language Teaching and the Internet (Fa) This course provides graduate students of foreign languages with innovative ways to teach and communicate through the use of the Internet as applied to second language learning. Topics of discussion include Instructional Systems Design, Web-based Technologies, Graphics, Presentation technologies, and Interactive Utilization of Technologies in Language Courses.

FLAN5033 Language Teaching and Video Applications (Irregular) This course provides graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include Instructional Systems Design, Video Taping, Editing and Development for Internet and DVD delivery, and Effective Utilization of Video in teaching and communication.

FLAN504V Translation Workshop (Irregular) (1-6) Problems of translation and those posed by both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of the existing translations with primary material may vary. Prerequisite: reading knowledge of a foreign language.

FLAN505V Workshop (Irregular) (1-3) Specialized
university of Arkansas, Fayetteville

FREN1003 Elementary French I (Sp, Fa) (same as FREN 1003)
FREN1013 Elementary French II (Sp, Fa) Elementary courses in pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. Prerequisite: H-FLN 1003 or equivalent. (Same as H-FLN 1013)
FREN1016 Intensive Elementary French (Sp, Su, Fa) Equivalent to 1003 and 1013. Stress aural comprehension and cultural speaking ability. Reading, writing, and grammar in support of communication skills.
FREN1030H Honors Intermediate French I (Sp, Fa) Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. Prerequisite: FREN 1013 or equivalent. (Same as FREN 2003)
FREN2013H Honors Intermediate French II (Sp, Fa) (Same as FREN 2013, FREN 2013I)
FREN3003 Advanced French (Sp, Su, Fa) Further intensive development of reading comprehension and writing skills and intensive development of reading. Prerequisite: H-FLN 2003 or equivalent. (Same as H-FLN 2013)
FREN3033 French Conversation (Fa) Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: H-FLN 2013.
FREN3063 Ph.D. Reading Requirement I (Su) (Same as FREN 3063)
FREN3103 Cultural Readings (Sp, Su, Fa) A course designed to build vocabulary and to strengthen reading skills and oral expression through extensive practice with culturally authentic materials. Prerequisite: H-FLN 2013.
FREN3203 Honors Quebec Studies (Irregular) A study of Quebec's culture, institutions, economy, literature and cinema. Prerequisite: H-FLN 3113. (Same as H-FLN 4203)
FREN4213 Civilisation (Sp) Prerequisite: FREN 3113. (Same as FREN 4213)
FREN4233 Business French (Fa) A survey of French literature, its forms and themes from the medieval period through the 18th century. Prerequisite: H-FLN 3113.
FREN4233 Business French (Fa) Introduction and orientation to the French world of business and commerce through the study of vocabulary, forms, and formulas and expressions in commercial correspondence. Prerequisite: FREN 3113.
FREN475V Special Investigations (Sp, Fa) (1-6)
FREN5013 Stylistics and Advanced Composition (Irregular) Analysis of genres and stylistic choices available in written French. Intensive practice in composition especially as it relates to graduate-level courses.
FREN5033 Advanced French Conversation (Irregular) This course will provide small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world.
FREN5213 French Culture & Civilization (Irregular) An analysis of French cultural symbols and attitudes as observed in their historical economical, political, social, educational, and linguistic aspects.
FREN5233 Old French Literature (Irregular) An intensive study of the Old French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the time.
FREN5333 Old French Literature (Irregular) An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the time.
FREN5433 French 16th Century Literature (Irregular) A survey of representative writers of the sixteenth century.
FREN5533 French 17th Century Theatre (Irregular) A survey of representative writers of the seventeenth century.
FREN5543 French 17th Century Literature (Irregular) A survey of representative writers of the seventeenth century.
FREN5703 Special Topics (Irregular) May be offered in a subject not specifically covered by the courses otherwise listed.
FREN5723 The Development of French Romanticism (Irregular)
FREN575V Special Investigations (Irregular) (1-6)
FREN5813 French 20th Century Theatre (Irregular)
FREN5823 French 20th Century Literature (Irregular) A survey of representative writers of the twentieth century.
FREN5833 French 20th Century Novel (Irregular)
FREN600V Master's Thesis (Irregular) (1-6)

(GEOG) GEOGRAPHY

GEOG1123 Human Geography (Sp, Su, Fa) Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities. (Same as GeULG 1123)

GEOG2023 Economic Geography (Irregular) Systematic study of the geographical distribution of man's activities and the earth's products as related to geographic factors. Prerequisite: sophomore standing.

GEOG2103H Honors Emerging Nations (Sp, Fa) Survey of the political, economic and physical aspects of the developing world. Areas covered include Latin America, Africa, Middle East, and Monsoon Asia. (Same as GEULG 2103, GEULG 2103H)

GEOG2203 Developmental Problems (Sp, Fa) Survey of the human, physical, and political development of underdeveloped world. Areas covered included Europe, Anglo-America, USSR, Japan, and Australia. (Same as GEULG 2203)

GEOG3003 Conservation of Natural Resources (Sp, Su) Theory and growth of conservation and the wise use of the major natural resources of the United States. This course meets the requirement for conservation for teachers. Prerequisite: junior standing. (Same as GEOG 3003)

GEOG3023 Introduction to Cartography (Fa) Students learn basic principles of map design, cartographic theory and field surveying to produce a variety of computer-generated maps. An introductory course designed for students in a variety of different disciplines using AutoCad software and various new technologies. Field trips may be required.

GEOG3333 Oceanography (Sp) The sea, its landforms, its winds and currents as related to the atmosphere, world climates, and world trade; its basin as avenues for continental drift; its waters as habitat for plant and animal life; its marine and submarine resources as presently and potentially useful to man. Offered as physical science. Prerequisite: junior standing.

GEOG3334 Natural Regions of North America (Odd years, Sp) Introduces students to the characteristics of the natural environments of North America. Focuses on geological, climatic, hydrological, and biogeographical aspects of the principal natural regions of the United States, Canada, and Central America are examined.

GEOG3353 Economic Geography of NAFTA (Irregular) Systematic study of the geographical distribution of economic activities in the countries of the North American Free Trade Agreement. Prerequisite: junior standing.

GEOG3393H Honors Colloquium (Irregular) Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in geography).

GEOG3399H Honors Course (Irregular) (1-6)
Prerequisite: junior standing.

GEOG4013 Latin America (Irregular) Geography of South America, Mexico, Central America, and the Caribbean islands.

GEOG4033 Geography of the Middle East (Irregular) Physical and cultural landscapes, natural and cultural resources, art and architecture, landuse, political history, Office of Planning and Development, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Field work is required. Prerequisite: junior standing.

GEOG4093 Geography of Arkansas (Fa) Natural resources of the state, its leading occupations, and its geographic regions. Prerequisite: junior standing.

GEOG410V Special Problems in Geography (Sp, Su, Fa) (1-6) Unusually designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: junior standing.

GEOG4173 The Latin American City (Irregular) This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. The course involves an introduction to urban studies concepts, and each semester is organized around a specific set of case studies.

GEOG4243 Political Geography (Odd years, Fa) Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Prerequisite: junior standing.

GEOG4260V Internship in Physical Geography (Sp, Su, Fa) (3-6) Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. Prerequisites: GEOG 4243 Elements of World Geography (3) (Irregular) and satisfactory completion of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Prerequisite: junior standing.

GEOG4383 Climatology (Sp) Fundamentals of topi-
cal climatology followed by a study of regional climatology. Offered as physical science. Prerequisite: GEOG 1003 and/or GEOL 4383.

GEOG4383H Hazard & Disaster Assessment, Mitigation, Risk & Policy (Sp) Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the course. Prerequisite: Junior standing or above.

GEOG4383 Hazard & Disaster Assessment, Mitigation, Risk & Policy (Sp) Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the course. Prerequisite: Junior standing or above.

GEOG4384 Principles of Landscape Evolution (Fa) Examines the role of waves, rivers, wind, and tectonics in shaping and modifying the surface of the earth. Considers the way in which an understanding of landscape processes is essential to the effective solution of environmental problems. Lecture 3 hours, laboratory 2 hours per week.

GEOG440V Internship in GIS & Cartography (Sp, Su, Fa) (3-4) Supervised experience in GIS and cartographic applications with municipal, county, state, or private enterprises.

GEOG4593 Computer Mapping (Sp) This course addresses construction of cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using AutoCad and FreeHand software and integrate them into the cartography lab. Field trips may be required. Prerequisite: GEOLG 3023.

GEOG4543 Geographical Information Science (Fa, Sp, Su) Computer assisted analysis and display of geographic resources. Topics include thematic maps, spatial data analysis techniques, and reinforces the theory with exercises that demonstrate its practical applications. (Same as ANTH 4543)

GEOG4553 Introduction to Raster GIS (Fa) Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are explored. Examines image processing, raster data handling, elevation models, and resource models using Boolean algebra and other related methods. Prerequisites: GEOG 4543 or ANTH 4543. (Same as ANTH 4543)

GEOG4563 Vector GIS (Sp, Su, Fa) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using Arc-node based software and related data bases. Prerequisites: GEOLG 3023 or GEOLG 4543.

GEOG4573 Introduction to GRASS Applications in GIS (Irregular) An introduction to geographic information systems (GIS) problem solving using the Geographical Resource Analysis Support System (GRASS) software. (Same as ANTH 4573)

GEOG4593 Introduction to Global Positioning Systems (Sp, Su, Fa) Introduction to navigation, georeferencing, and digital data collection using GPS receivers, data loggers, and laser technology for natural science and resource management. Components of Navstar Global Positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. (Same as ANTH 4593)

GEOG4563 Advanced Raster GIS (Odd years, Sp) Advanced raster topics are examined beginning with a theoretical description of the raster data model and continues into more advanced cartographic modeling principles. Topics vary and include Fourier methods, image processing, kriging, spatial statistics, principal components, fuzzy and regression modeling, and multi-criteria decision models. Several raster GIS programs are examined in constructing point, line, and area data sets. Prerequisites: STAT 4401 and STAT 2001L or equivalent. (Same as ANTH 4863)

GEOG5003 Seminar in Geography (Irregular) Selected topics, the nature of which varies with the need. Prerequisite: graduate standing.

GEOG5011 Colloquium (Sp) Weekly meetings of faculty, graduates, advanced students and guests to discuss research and trends in the field of geography. Prerequisite: STAT 4401 and STAT 2001L or equivalent.

GEOG5093 History of Geography (Even years, Sp) Chronological development of the science; leaders in the field of geography; evolution of the major concepts of geography. Prerequisite: graduate standing.

GEOG510V Special Problems in Physical Geography (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

GEOG5113 Global Change (Fa) Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wildfires and other natural and human disasters, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: graduate standing.

GEOG520V Special Problems in Human Geography (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

GEOG530V Special Problems in Regional Geography (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

GEOG5313 Planetary Atmospheres (Irregular) Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, comparative planetology of atmospheres. Prerequisite: graduate standing.

GEOG5333 Research Methods and Materials in Geography (Odd years, Fa) Geographical research and the preparation of research papers. Prerequisites: graduate standing.

GEOG600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

(GEOL) GEOLOGY

GEOL111M Honors General Geology Laboratory (Fa) Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOL 1113 H. GEOL 1111L General Geology Laboratory (Sp, Su, Fa) Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre-or Corequisite: GEOL 1113. (Same as GEOL 1111L)

GEOL1113 Honors General Geology (Irregular) Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisites: GEOL 1111 M.

GEOL113 General Geology (Sp, Su, Fa) Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Lecture 3 hours per week. GEOL 1111 L is recommended as a corequisite.

GEOL113M Honors General Geology II Laboratory (Sp) Laboratory exercises concerning study of organisms commonly found as fossils, sedimentary rocks, correlative, and earth history.

GEOL113L Environmental Geology Laboratory (Sp) Laboratory exercises concerning the interaction of human beings with the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal. Prerequisite: GEOL 1113 and GEOL 1111L or GEOG 1003 and GEOG 1001L. (Same as GEOL 113L)

GEOL1133 Environment for Geology (Sp) The application geologic principles and knowledge of problems created by human occupancy and exploitation of the physical environment. Prerequisites: (GEOL 1113 and GEOL 1111 L) or Skip GEOG 1001L and GEOG 1003L.

GEOL2131 Mineralogy (Fa) General principles and hand sample study of common minerals. Prerequisites: GEOL 1113.

GEOL3002 Geology for Engineers (Fa) Geologic principles involved in construction of building locations. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

GEOL3114 Invertebrate Paleontology (Sp) Survey of invertebrate phyla comparing preserved organisms emphasizing their physical and biological characteristics. Lecture 3 hours, laboratory 2 hours per week. Coreprerequisite: GEOL 1113 or (BIOL 1543 and BIOL 1541L) or equivalent.

GEOL3313 Igneous and Metamorphic Rocks (Sp) Megascopic study and classification of igneous and metamorphic rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOL 2131.

GEOL3413 Sedimentary Rocks (Fa) An introductory study of sedimentary rocks from the standpoint of classification, field and laboratory description, and genesis. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOL 2131.

GEOL3514 Structural Geology (Fa) Survey of deformatonal features and their geological significance in the crust of the earth. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOL 1104 or GEOL 1113 or GEOL 3002.

GEOL3653 Undergraduate Special Problems (Sp, Fa) (1-3) Library, laboratory, or field study in different phases of geology.

GEOL3901 Junior Honors Course (Sp, Su, Fa) Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing.

GEOL3911 Junior Honors Course (Sp, Su, Fa) Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing.

GEOL3923H Honors Colloquium (Irregular) Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in geology).

GEOL4033 Hydrogeology (Sp) Occurrence, movement, and interaction of water with geological and cultural features. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: GEOL 4033.

GEOL4053 Geomorphology (Sp) Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Corequisite: Lab component. Prerequisite: GEOL 4033.

GEOL4111M Hydrology (Sp) Survey of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Prerequisite: GEOL 4033.

GEOL4223 Stratigraphy and Sedimentation (Sp) Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A two-day field trip will be conducted during the semester. Corequisite: Lab component. Prerequisite: GEOL 3413.

GEOL4253 Petroleum Geology (Fa) Distribution and properties of petroleum. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOL 4250L. Prerequisite: geology major and senior standing.

GEOL438V Geology Field Trip (Sp, Fa) (1-2) CAMPING TRIP A 5-day trip to a remote geological location during spring break. Prerequisites: GEOL 3313.

GEOL4413 Principles of Remote Sensing (Fa) Theoretical and practical consideration of radar imagery, aerial photographs, and infrared imagery. Prerequisite: GEOL 3313.

GEOL4473 Geology of the United States and Canada (Sp, Su) (3-4) Geologic regions of North America. Prerequisite: junior standing. (Same as GEOG 4733)

GEOG4783 Geography of Europe (Irregular) Geographic regions of the area with emphasis on their present development. Prerequisite: Junior standing.

GEOG4793 Geography of Concepts for Global Studies (Su) Application of geographic concepts and principles to understanding the development of nations as well as geographic themes of current importance will be examined. Prerequisite: junior standing.

GEOG4853 Quantitative Techniques in Geosciences (Sp, Odd Years) An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. Prerequisite: STAT 4401 and STAT 2001L or equivalent. (Same as ANTH 4863)
Course Descriptions

GEOL4433 Geophysics (Irregular) Derivation from physical and biologic principles and methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOL 4463, PHYS 2043 and PHYS 203L and PHYS 203L and PHY 3513 and GEOL 3515 and GEOL 351L.

GEOL4641L Historical Geology Laboratory (Sp) Laboratory exercises concerning the study of physical and biologic history of the earth from its formation to the beginning of the historical era. Graduate enrollment only with departmental permission. Corequisite: GEOL 4643.

GEOL4643 Historical Geology (Fa) Physical and biologic history of the earth from its formation to the beginning of the historical era. Includes two field trips. Graduate enrollment only with departmental permission. (Same as GEO 5603.)

GEOL4666 Geology Field Camp (Su) A professional course taught off campus emphasizing occurrence, description, mapping, and interpretation of major rock types. Prerequisite: GEOL 3413 and GEOL 3513 and GEOL 351L. May not be taken for graduate credit.

GEOL481V Cooperative Education Program (Sp, Su, Fa) (1-6) Credit for off-campus, compensated work experience related to geology arranged through the Cooperative Education Office and Department of Geology. Graduate enrollment only with departmental permission. (Same as U.S.L.)

GEOL492 Senior Honors Course (Sp, Su, Fa) Special honors research in geology. Two hours of credit each semester. Prerequisite: graduate standing.

GEOL4929 Senior Honors Course (Sp, Su, Fa) Special honors in research in geology. Two hours of credit each semester. Prerequisite: junior honors.

GEOL5001 Graduate Seminar (Irregular) Informal discussions of research as reported in geological literature. All graduate students are expected to attend.

GEOL5053 Quarterary Environments (Fa) An interdisciplinary study of the Quaternary Period, including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: graduate standing. (Same as ANTH 5053, GEOG 5053.)

GEOL5063 Geochemistry (Fa) Chemistry of geologic processes and the geochemical cycles of selected elements. Prerequisite: CHEM 1103 and CHEM 1101L and CHEM 1123 and CHEM 1121L.

GEOL5076 Advanced Field Methods of Applied Hydrogeology (Su) Applied field course emphasizing collection and interpretation of ground water data. Three hours may be applied toward an M.S. degree in geology. Prerequisite: GEOL 4033.

GEOL5123 Stratigraphic Principles and Practice (Irregular) Physical and biological characteristics of strata and their correlation in time with emphasis on the local geologic section. Corequisite: GEOL 5120L. Prerequisite: GEOL 4223.

GEOL5132 Ammonoid Biostratigraphy (Irregular) Laboratory study of the biology, taxonomy, and biostratigraphy of Paleozoic ammonoid cephalopods. Pre- or Corequisite: GEOL 5123.

GEOL5142 Conodont Biostratigraphy (Irregular) Laboratory study of the biology, taxonomy, and biostratigraphy of the conodonts. Pre- or Corequisite: GEOL 5123.

GEOL5153 Environmental Site Assessment (Irregular) Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOL 4033.

GEOL5163 Hydrogeologic Modeling (Irregular) Topics include recharge, infiltration and ground water flows, solute transport, aequous geochemistry, theoretical development of equations, hypothesis testing of conceptual models, limitations of specific methods, and error analysis. Emphasis on practical applications and problem solving. Prerequisite: GEOL 4033 and computer literacy.

GEOL5223 Sedimentary Petrology (Fa) Sediments and sedimentary rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: GEOL 4223. Prerequisite: GEOL 4223.

GEOL5263 Hydrochemical Methods (Sp) Collection, analytical and interpretation techniques and methods for water, including quality control and quality assurance. Prerequisite: CHEM 1123 and CHEM 1121L.

GEOL5413 Planetary Geology (Irregular) Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary crusts, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets. GEOL5423 Remote Sensing of Natural Resources (Odd years, Sp) Advanced course in remote sensing technology with special emphasis on interpretive techniques for resource management and research. Prerequisite: GEOL 4413.

GEOL5444 Advanced Petroleum Geology (Even years, Sp) Advanced well logging techniques, quantitative analysis, and subsurface correlation. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOL 5440L. Prerequisite: GEOL 4235.

GEOL5533 Marine Geology (Fa) Geologic principles as applied to the study of the world’s ocean basins. Course includes basic theories of ocean basin evolution, continental drift, tectonic processes, and methods of study of deep sea records of global change and paleoceanography. Corequisite: GEOL 5530L. (Same as GEOL 5530.)

GEOL5543 Tectonics (Fa) Development of model of the plate tectonics theory. Analysis of the evolution of mountain belts. Lecture 3 hours per week. Prerequisite: GEOL 3513 and GEOL 351L.

GEOL560V Graduate Special Problems (Sp, Su, Fa) (2-6) Library, laboratory, or field research in different phases of geology. Prerequisite: graduate standing.

GEOS1111L General Geology Laboratory (Sp, Su, Fa) Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre- or Corequisite: GEOL 1111L. (Same as GEOL 1111L)

GEOS1113 General Geology (Sp, Su, Fa) Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Lecture 3 hours per week. GEOL 1113L is recommended as a corequisite. (Same as GEOL 1113)

GEOS1131L Environmental Geology Lab (Sp, Su, Fa) Laboratory exercises concerning the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal. Prerequisite: GEOL 1113 and GEOL 1111L or GEOG 1003 and GEOG 1001L. (Same as GEOL 1131L)

GEOS1133 Environmental Geology (Sp) The application of geologic principles and knowledge of problems created by human occupancy and exploitation of the physical environment. Prerequisite: GEOL 1113 and GEOL 1111L or GEOG 1003 and GEOG 1001L. (Same as GEOL 1133)

GEOS4413 Principles of Remote Sensing (Fa) Theoretical and practical applications of remote imaging, aerial photography, and infrared imagery for understanding Earth resources related to agriculture, archeology, engineering, forestry, geography, and geology. Corequisite: GEOS 4410L. Prerequisite: GEOL 1113 and GEOL 1111L or GEOG 3002L. (Same as GEOL 4413)

GEOS4563H Honors Geology of Our National Parks (Sp) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOL 1113. (Same as GEOS 4563)

GEOS4563 Geology of Our National Parks (Sp) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOL 1113. (Same as GEOS 4563)

GEOS4563H Honors Geology of Our National Parks (Sp) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOL 1113. (Same as GEOS 4563)

GEOS5853 Environmental Isotope Geochemistry (Sp) Introduction to principles of isotope fractionation and distribution in geochemical environments, isotopic analytical methods, and extraction of isotopic samples; application of principles in characterization of chemical processes and interaction with hydrologic, surficial, and biologic attenuation, paleotemperature, soil, and biogeochemical processes. Prerequisite: GEOL 5063 or GEOL 5263.

(GERM) GERMAN

GERM1003 Elementary German I (Fa, Sp, Su) (Same as GER 1003)

GERM1013 Intermediate German II (Fa, Sp, Su) Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. Prerequisite: GERM 1003 or equivalent. (Same as GERM 1013)

GERM2003 Intermediate German I (Fa, Sp, Su) Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. Prerequisite: GERM 1013 or equivalent. (Same as GERM 2003H, GERM 2013)

GERM2013H Honors Intermediate German II (Sp, Su) (Same as GERM 2013)

GERM2013 Intermediate German II (Fa, Sp, Su) Development of reading, writing, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 2013. (Same as GERM 3003H)

GERM2013 Introduction to Literature (Fa) Development of reading skills and introduction to literary analysis. Prerequisite: GERM 2013 or equivalent. (Same as GERM 3013)

GERM3003 Conversation (Sp) Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: GERM 3013.

GERM3063 Ph.D. Reading Requirement (Su) (Same as GERM 3063, GERM 4003, GERM 4003H)

GERM399V HONORS GERMAN COURSE (Sp, Su) (1-6) Prerequisite: junior standing.

GERM4002 Advanced German II (Sp) Further development of reading, writing, listening, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 3013. (Same as GERM 3030H)

GERM4003 Conversation (Sp) Three hours per week of conversation practice for the advanced undergraduate.
GERO5133H Honors The German Drama (IR) A study of the forms and themes of German lyric poetry from the Middle Ages to the present. Prerequisite: GERM 2013 or equivalent. Instructor consent required. Undergraduate only. (Irregular) (1-3)

GERO5223 German-Speaking Countries in the 20th Century (Sp, Su, Fa) Continues the introduction to German culture and civilization begun with GER 4213 with emphasis on the emergence in the 20th century contemporary Austria, Switzerland, and a unified Germany. Prerequisite: GER 4213

GERM4134 German Lyric Poetry (Irregular) A study of the forms and themes of German lyric poetry from the Middle Ages to the present. Prerequisite: GERM 2013 or equivalent. Instructor consent required. Undergraduate only. (Irregular) (1-3)

GERM4223 German-Speaking Countries in the 20th Century (Sp, Su, Fa) Continues the introduction to German culture and civilization begun with GER 4213 with emphasis on the emergence in the 20th century contemporary Austria, Switzerland, and a unified Germany. Prerequisite: GER 4213

GERM4333 Business German I (Fa) Introduces students to the language of business German and provides insights into business practices in the German-speaking countries. Covers aspects of business geography, environmental, issues, mercantilism, trade, forms of payment, taxation, benefits, import/export, and business correspondence. Open to all majors; no business prerequisites. Prerequisite: GER 3013. Instructor consent required. Undergraduate only. (Irregular) (1-3)

GERM4470 Special Topics (Irregular) (1-3) May be offered in a topic not specifically covered by courses otherwise listed.

GERM470V Special Topics (Irregular) (1-3) May be offered in a topic not specifically covered by courses otherwise listed.

GERM475V Special Investigations (Sp, Fa) (1-6)

GERM5223 Early German Literature: Middle Ages to the Enlightenment (Sp, Su, Fa)

GERM5273 German Literature: Enlightenment, Storm and Stress, and Classicism (Sp, Su, Fa)

GERM5323 German Literature: Romanticism and Realism (Sp, Su, Fa)

GERM5343 Early Modern German Literature: Late 19th and Early 20th Century (Sp, Su, Fa)

GERM5343 German Literature after 1945 (Sp, Su, Fa)

GERM5703 Special Topics (Sp, Su, Fa) May be offered in a subject not specifically covered by courses otherwise listed.

GERM575V Special Investigations (Sp, Su, Fa) (1-6) GERM600V Master’s Thesis (Sp, Su, Fa) (1-6)

HESC1130 Design Studio I (Fa) Introduction to the application of design elements and principles to 2-D and 3-D design. Lecture 8 hours per week. Prerequisite: HESC 1015. Corequisite: HESC 1025. (Sp, Su, Fa) 1 credit hour each term for 2 credit hours total.

HESC1131 Design Studio II (Sp, Su) Drawing and Drafting. Lecture 8 hours per week. Prerequisite: HESC 1025. Corequisite: HESC 1026. (Sp, Su) 1 credit hour each term for 2 credit hours total.

HESC1201 Introduction to Dietetics and Nutrition (Sp, Fa) Introduces student to the field of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and activities.

HESC1213 Nutrition in Health (Sp, Fa) The functions of food, body processes, optimum diets in relation to health and physical fitness. (Same as HESC 1213) GERH1403 Life Span Development (Sp, Fa) An overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. 3 credit hours per week.

HESC1501 Orientation to Human Environmental Sciences (Sp, Fa) Adjustment to study and personal problems in college. History of human environmental sciences and breadth of its professional opportunities. 1 credit hour. (Sp, Su) 1 credit hour each term for 2 credit hours total.

HESC1601 Work Experience Practicum (Sp, Su) This course is designed to give HRMN students credit for their required 1,000 hours of satisfactory and verifiable hospitality work experience once they are enrolled in the HRMN concentration. Each credit hour is equivalent to 250 work hours. A maximum of 4 credit hours may be earned. Prerequisite: Declared HRMN concentration. May be repeated for 4 hours credit.

HESC1603 Introduction to Management (Fa) Overview of the hospitality industry with an emphasis on the history, scope, economic trends, and professional opportunities of this global industry. Professional areas include: commercial, institutional, and long term residential food service; hotels and resorts; travel and tourism; convention and club management.

HESC200V Special Problems (Sp, Su, Fa) (1-3) Special problems are considered under the guidance of a faculty member and include an inquiry initiated by the student into an aspect of study or program not dealt with in the regular curriculum. Students are required to submit to their instructor a detailed outline of the project and its objectives.

HESC2013 Quality Assessment of Apparel (Fa) Study of apparel from the perspective of structure, aesthetics, cost, and expected performance of the finished product. Prerequisite: HESC 1031. 3 credit hours.

HESC2023 Visual Merchandising (Sp, Fa) Fashion components, terminology and design features as applied to apparel. Principles and techniques of visual merchandising as a means of mass communication in the fashion industry. Window display and store floor planning. Web design for selling merchandise. Lecture 1 hour, laboratory 4 hours per week. Prerequisite: ARTS 1021.

HESC2053 Introduction to Textile Science (Sp, Fa) Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, care, and dying. Artistic and functional uses of materials for clothing and household furnishings. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component required for Apparel Studies majors only.

HESC2111 Foods I Laboratory (Fa) Laboratory exercises and practice applicable of Foods I. Laboratory 3 hours. Corequisite: HESC 2111. (Sp) 6 credit hours each term for 6 credit hours total.

HESC2112 Foods I (Fa) Physical and chemical characteristics of foods and factors that affect these characteristics during storage and preparation. Lecture 2 hours. Corequisite: HESC 2111. (Sp, Su) 6 credit hours each term for 6 credit hours total.

HESC2123 Catering Management (Sp) Course focuses on catering in food service operations and management, including on-premise, off-premise, working with a con-
design projects that relate to both interior residential and commercial spaces, dimensioning, and spreadsheets for specifications. Students will work on a project under the supervision of the instructor. Laboratory 6 hours per week. Prerequisite: sopho-
more standing.

HESC3003 Apparel Production (Sp, Fa) A study of product development, production, and the related vocabu-
larly necessary to communicate professionally within the indus-
tory. Laboratory 6 hours per week. Prerequisite: HESC 1023 and HESC 1053.

HESC3010 Introduction to Fashion Merchandising (Fa) A study of the retailing of fash-
on. Included are market structures, store philosophies, job descriptions, responsibilities at the management level, structural components of the retail environment, evaluation, job application, the resume, interdependences of the retail store with other segments of the fashion industry. Recommended for students seeking a career in business organizations which produce and/or distribute fashion prod-
ucts and services. Lecture 3 hours per week. Prerequisite: HESC 1013 and (ANGL 1103 or ECUN 2143).

HESC3033 Fashion Merchandising Methods (Sp) Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific qualitative skills. Course follows fashion item from the design to the apparel technician to fashion designers. Lecture 2 hours per week. Prerequisite: HESC 1053 and HESC 2843.

HESC3813 Studio IV: Interiors for Public Use (Fa) Advanced studio problems involving larger-scale interior spaces for public use. Students will use computer applications for project production. 6 studio hours per week. Prerequisite: HESC 3803, HESC 3843, and HESC 3823.

HESC3863 Advanced Presentation Media (Fa) Advanced class in presentation techniques and methods, involving computer and multimedia programs for perspective drawing, rendering and presentation of design concepts and completed problem solutions. 6 studio hours per week. Prerequisite: HESC 2833 and HESC 2893.

HESC3883 History of Interior Design II (Sp) Study of historic interiors and furniture from 1800 through the pres-
ent. Emphasis given to the identification of the interior styles and furniture of these eras. Lecture 3 hours per week.

HESC400V Special Problems (Sp, Su, Fa) (1-6)

HESC4023 Advanced Apparel Merchandising (Sp) Advanced Apparel Merchandising aspects of fashion through interpretation of apparel classification, seasonal cycles, stock planning and assortment techniques. Lecture 2 hours per week. Prerequisite: HESC 2033 and HESC 2813.

HESC4043 History of Apparel (Fa) The evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization. Cultural and economic factors affecting dress and customs associated with dress will be stressed. Lecture three hours per week. Prerequisite: ANTH 1023 or SOCI 1033 or HESC 1013.

HESC4053 Contemporary Apparel (Sp) Fashion as a social force, the origin, scope, theory, and history of the fashion business, the marketing and merchandising of apparel, trends and an overview of marketing communication industry, including advertising, personal selling and sales promotion. Prerequisite: HESC 3033.

HESC4063 Advanced Textile Study (Sp) Use of advanced computer-aided design (CAD) software to enhance skills in textile studies. Prerequisite: HESC 1053 and HESC 2843.

HESC4083 Apparel Production (Sp, Fa) An advanced study of product development incorporating technol-
y used in the industry for a career in fashion merchandising and/or product development. Prerequisite: HESC 3033 and HESC 2013.

HESC4073 Apparel Studies Internship (Su) A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operation. Prerequisite: junior standing and 2.50 cum GPA and HESC 3033, May be repeated for 9 hours.

HESC4103 Experimental Foods (Sp) Application of experimental methods for investigations in cooking, Group and individual problems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: HESC 2113 and CHEM 1123 and CHEM 1121L (or HESC 2113 and CHEM 1074 and CHEM 1071L).

HESC4213 Advanced Nutrition (Fa) Normal nutrition with emphasis on utilization of nutrients. Lecture and reports on current literature 3 hours per week. Pre-
or Corequisite: CHEM 2313. Prerequisite: HESC 3034.

HESC4223 Nutrition During the Life Cycle (Fa) Study of normal nutrition emphasizing quantitative needs for nutritional functions of twinning, pregnancy, and the aging stages of the life cycle. Nutritional needs during pregnancy and childhood are emphasized with some attention to nourishing ager and elderly adults. Factors that affect food choices and eating behavior are also considered. Lecture 3 hours per week. Prerequisite: HESC 1213 or either ZOOL 2213 or ZOOL 2211L or ANCS 3032 or PSOC 3032 and ANSC 3042 or PSOC 3402 (or CHEM 1074 and CHEM 1071L and BIOL 1611 or BIOL 1614L).

HESC4243 Community Nutrition (Sp) Identification, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international lev-
els. 2 hours per week. Prerequisite: HESC 4242 and HESC 4034.

HESC425V Food and Nutrition Seminar (Sp) (1-2)

UPPERCLASSMEN, graduate students and members of faculty meet weekly for presentation and discussion of selected topics. Two credits (2 semesters) required of all foods and
Course Descriptions

nutrition graduate students. May be repeated for 2 hours. Prerequisite: HESC 3204.

HESC 4443 Principles of Nutritional Therapy I (Fa) Principles of nutritional care with emphasis on pathophysiolo-

ogy, assessment, and treatment of chronic illnesses. Lecture 3 hours, laboratory 3 hours per week. Pre- or corequisite: CHEM 3402L and HESC 3423. Corequisite: Lab component. Prerequisite: ZOOL 2213 and ZOOL 2211L (or ANSC or PUBS 3942).

HESC 4473 Medical Nutrition Therapy II (Sp) Principles of clinical nutrition with emphasis on pathophysiolo-

ogy, assessment, and treatment in critical illness. Lecture 3 hours per week. Prerequisite: HESC 4264.

HESC 4430 Professional Development in Human Environmental Studies (Sp) Enhancements of professional and personal development of students by fos-

tering an understanding of the historical and philosophical basis of Human Environmental sciences, with an emphasis on the interrelationships and integration of the component specialties. Clarification of career goals and development of professional skills.

HESC 4433 Dynamic Family Interaction (Sp) Examination of family interaction across the lifespan. Methods for enhancing marriage and family relations will be analyzed. Sources of marital conflict, intergenerational support and negotiations process will be analyzed. Lecture three hours per week. Prerequisite: HESC 4413 and junior standing.

HESC 4443 Gerontology (Sp) Physiological and psycholog-

ical development of the aging individual, extended family relations, setting strategies for the elderly, and retire-

ment activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HESC 1403 (or HESC 4213 or PSY 3003 or WYSE 4003) and junior standing.

HESC 4453 Parenting and Family Dynamics (Sp, Fa) Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childrearing techniques, family influences on cognitive and social development, and changes in family relationships during the family life cycle. Prerequisite: HESC 1403 or PSY 3003.

HESC 4463 Administration and Evaluation of Child Development (Sp) Examination of planning, developing, operating, and evaluating child develop-

ment programs. Topics include physical facilities, staff, cur-

riculum, budgets, parent involvement, and evaluation. Lecture and discussion 3 hours per week. Prerequisite: HESC 3403 and junior standing.

HESC 4472L Child Development Practicum Laboratory (Sp) Actual experience facilitating children’s learning with individual and group techniques. Participation in planning, implementing, and evaluating individual children and pro-

gram. 6 hours laboratory per week. Corequisite: HESC 4472. Prerequisite: HESC 3402 and HESC 3401L.

HESC 4472R Child Development Practicum (Sp) Interaction with parents and planning, implementing, and evaluating directed experiences with children ages 3-5 in an NA/AYC accredited laboratory setting — U. of A. Nursery School. 2 hours lecture per week. Prerequisite: HESC 4472L.

HESC 4483 Internship in Human Development and Family Studies (Sp, Su, Fa) The internship expe-

rience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 60 hours per credit hour in the setting. Must be taken no sooner than the summer following completion of junior year. May be taken for an additional 3 hours of elective credit if second experience is distinctly different from first internship. Prerequisite: HESC 4302.

HESC 4493 Advanced Hotel Operations (Sp) Study of the operation and management of hotels, including survival and growth strategies. Lecture 3 hours per week. Prerequisite: HESC 3653 and HESC 3604.

HESC 4503 Advanced Hotel Operations (Sp) Study of the operation and management of hotels, including survival and growth strategies. Lecture 3 hours per week. Prerequisite: HESC 3653.

HESC 4505V Special Problems Research (Sp, Su, Fa) (1-5) Prerequisite: HESC 3803. Principles of Textile Testing (Sp) Study of textile testing machines and methods utilized to determine construction and performance characteristics of woven and knit fabrics. Lecture 1 hour. Laboratory 4 hours per week. Corequisite: Lab component.

HESC 5203 Special Topics in Nutrition (Sp) Critical review of current literature; reports and discussion of original research pertinent to the topic(s) identified for study. Lecture/seminar format 3 hours per week. Prerequisite: HESC 4213 (or ANSC 4143) and CHEM 3813.

HESC 5225V Readings in Nutrition (Sp, Su, Fa) (1-6) Seminar and individual study. Prerequisite: HESC 4213.

HESC 5403 Advanced Family Relations (Fa) Subtle elements in marriage, parent-child, and other relations among family members and between families across the life span. Prerequisite: graduate standing.

HESC 5423 Theories of Human Development (Fa) Classic and contemporary theories and theoretical issues concerning human development across the life span. Prerequisite: graduate standing.

HESC 5433 Advanced Child Development (Sp) Techniques and research concerning research in human behavior and develop-

ment in childhood. Accession of library resources, classic studies, and recent literature. Prerequisite: HESC 4803.

HESC 5463 Research Methodology in Social Sciences (Sp) Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, preparation, and presentation of results. Applications to research in the eco-

nomics of the family, economic influences on cognitive and social development, and research in the social and psychological processes of aging in Human Environmental Sciences. Prerequisite: graduate standing. (Same as AEGC 5463). HESC 549V Special Topics in Human Developmental Sciences (Irregular) (1-3) Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. Prerequisite: candidacy.

HESC 5500V Master's Thesis (Sp, Su, Fa) (1-6) HESC 700V Doctoral Dissertation (Sp, Su, Fa) (1-18) Prerequisite: candidacy.

HIED5003 Overview-American Higher Education (Fa) A basic course in the study of higher education open to all students seeking careers in colleges and universities. Serves as an introduction to the programs, problems, issues, and trends in higher education. Prerequisite: none. HIED5003 College Students and Student Personnel Services (Fa) Study of origins, functions, and policies in student personnel services in contemporary 2- and 4-year colleges and universities with emphasis on the student and student development. HIED5043 The Student in Higher Education (Sp) Provides those who work or plan to work in post secondary educational institutions with an understanding of the student and student development. HIED504V Practicum in Higher Education (Sp, Su, Fa) (1-6) Students are assigned to a department or agency within or outside the university for professional experience under the joint supervision of an off-campus and university faculty. Periodic meetings are scheduled for evaluation, discussion, and examination of techniques. HIED5053 The Community-Junior College After a review of the community and the history and philosophy of the community college movement, students, curriculum, state and local campus governance, teaching, student personnel work, finance and issues, prob-
HIST4333 Modern Islamic Thought  (IH) Main currents in Islamic theology and political philosophy from the Ottoman Empire to the end of the twentieth century.

HIST4353 Middle East, 600-1250  (Even years, Fa) An examination of the Middle Eastern sociopolitical, religious, and cultural development of the region from 600 to 1250.

HIST4373 Mongolia & Maimi Middle East 1250-1520  (Even years, Sp) An examination of the historical, cultural, and political developments of the region.

HIST4383 History of Sub-Saharan Africa  (Irregular) A study of the history of the major political, social, and cultural developments of sub-Saharan Africa.

HIST4385 The Ottoman Empire and Iran 1300-1722  (Odd years, Sp) An examination of the political, cultural, and religious developments of the region.

HIST4413 New Women in the Middle East  (Sp, Odd years) This course covers the transformation of social and cultural roles of women in the Middle East since the 19th century. Emphasis is placed on women's participation in political, social, and economic developments.

HIST4423 The Mediterranean World  (Irregular) An intensive study of the political, social, and cultural perspectives of the Mediterranean region.

HIST4433 Religion in America to 1860  (Irregular) An examination of the development of the Civil War period. Emphasis is placed on the causes of the Civil War and the problems of post-Civil War America. Particular attention is given to the political, social, and economic issues from the late antebellum period through Reconstruction.

HIST4463 Environmental History  (Irregular) A survey of the impact of the Industrial Revolution, Imperialism, and progressivism on American life and institutions.

HIST4473 Diplomatic History of the United States, 1776-1900  (Odd years, Fa) A survey of American foreign relations from the American Revolution to the end of the 19th century.

HIST4475 Diplomatic History of the United States, 1776-1945  (Even years, Sp) An examination of the history of American foreign relations from the end of the 19th century to the present.

HIST4483 Modern America in the Nation  (Fa) An analysis of modern America in the United States, with an emphasis on the role of the corporation in American life and society.

HIST4503 History of Political Parties in the United States, 1776-1900  (Even years, Sp) An examination of the history of political parties in the United States from 1776 to 1900.

HIST4513 History of Political Parties in the United States, 1896-1945  (Odd years, Fa) An examination of the history of political parties in the United States from 1896 to 1945.

HIST4543 American Social and Intellectual History Since 1865  (Fa) A survey of significant developments in American social and intellectual history since 1865.

HIST4553 American Social and Intellectual History to 1865  (Fa) A survey of significant developments in American social and intellectual history up to 1865.

HIST4613 Colonial America to 1763  (Fa) Political, economic, and social history of colonial development from the time of contact to the Treaty of Paris, with primary, but not exclusive, emphasis upon Anglo-America. (Same as HIST 4613)

HIST4643 Early American Republic, 1801-1828  (Sp, Fa) History of the early United States emphasizing social and cultural perspectives. Topics addressed will include westward expansion, slavery, religion, and economic change.

HIST4653 Antebellum America, 1828-1850  (Sp) History of antebellum United States emphasizing social and cultural perspectives. Topics addressed will include slavery, religion, gender, the market economy, regionalism, and political developments.

HIST4663 Rebellion to Reconstruction, 1850-1877  (Even years, Sp) A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the Civil War and the problems of post-Civil War America. A brief examination of the Civil War is included.

HIST4673 The American Civil War  (Irregular) An intensive study of the political, social, and military aspects of the Civil War period.

HIST4723 America Between the Wars, 1917-1941  (Even years, Fa) An examination of American foreign relations from 1917 to 1941, with particular attention to the impact of World War I and the Great Depression upon American society and culture.

HIST4733 Recent America, 1941 to the Present  (Sp) A general survey of American history since World War II, with emphasis upon the post-Cold War: the rise of corporate power, the Cold War, and cultural developments.

HIST4743 History of Brazil  (Even years, Sp) A survey of the history of Brazil from the time of contact to the present.

HIST4753 Diplomatic History of the United States, 1776-1900  (Odd years, Fa) A survey of American foreign relations from the American Revolution to the end of the 19th century.

HIST4773 Diplomatic History of the United States, 1900-1945  (Even years, Sp) A survey of American foreign relations from 1900 to 1945, with emphasis upon the presidential reform movements, the Cold War, and cultural developments.

HIST4793 Diplomatic History of the United States, 1945 to the Present  (Sp) A survey of American foreign relations from 1945 to the present, with particular attention to the Cold War, the rise of corporate power, and cultural developments.
Japanese economic, social, and political questions, including their successes and costs.

HIST5480V Senior Thesis (Sp, Su, Fa) (1-6)

HIST5023 Historical Methods (Fa) Practical introduction to historical research and writing. Consists of lecture, library reading, and class criticism of research papers. Prerequisite: graduate standing.

HIST5043 Historiography (Sp) Survey of the history of historical writing and a study of the important schools and historical interpretation. Prerequisite: graduate standing.

HIST5506V Readings in Asian History (Sp, Su, Fa) (1-4) Irregular: prerequisites: graduate standing.

HIST507V Readings in American History (Sp, Su, Fa) (1-6) Irregular: prerequisites: graduate standing.

HIST508V Research Problems in European History (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

HIST509V Research Problems in American History (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

HIST5103 Reading Seminar in American History (Sp, Su, Fa) Historiographical and bibliographical study of special areas of U.S. history, such as the Age of Jackson, the Civil War, Reconstruction, etc. Prerequisite: graduate standing.

HIST5123 Research Seminar in American History (Sp, Su, Fa) Research projects in selected fields of American history, such as the Civil War, the Age of Jackson, etc. Prerequisite: graduate standing.

HIST5133 Reading Seminar in European History (Sp, Su, Fa) Historiographical and bibliographical study of special periods in European history, such as the Roman Empire, the late Middle Ages, the French Revolution, etc. Prerequisite: graduate standing.

HIST5143 Research Seminar in European History (Sp, Su, Fa) Research projects in selected fields of European history, such as the French Revolution, humanism, etc. Prerequisite: graduate standing.

HIST5163 Research Seminar in British History (Sp, Su, Fa) Research projects in selected fields of British history.

HIST517V Readings in Asian History (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

HIST519V Readings in Near Eastern History (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

HIST520V Research Problems in Near Eastern History (Sp, Su, Fa) (1-6) Irregular: graduate standing.

HIST5213 Reading Seminar in Middle Eastern History (Sp, Su, Fa) Historiographical and bibliographical study of special areas of Middle Eastern history. Prerequisite: graduate standing.

HIST5233 Research Seminar in Middle Eastern History (Sp, Su, Fa) Research projects in selected fields of Middle Eastern history. Prerequisite: graduate standing.

HIST5600V Workshop in Social Studies Curriculum (Su) (1-6) Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. Four week residential summer institute. (Same as PLSC 560V)

HIST5600V Master's Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

(HKRD) HEALTH SCIENCE, KINESIOLOGY, RECREATION AND DANCE

HKRD480V Workshop (Sp, Su, Fa) (1-18)

HKRD5303 Research in Health Science, Kinesiology, Recreation and Dance (Sp, Su, Fa) Methods and techniques of research in health education, physical education and recreation including an analysis of examples of their use and practice in their application to problems of interest to the student.

HKRD5373 Problems in Health Science, Kinesiology, Recreation, and Dance (Su) A study of current problems in the field of health education, kinesiology, and recreation.

HKRD560V Workshop (Sp, Su, Fa) (1-6)

HKRD5873 Leadership in HKRD Services (Fa) Consider research, theory, and practical applications of leadership principles utilized in the provision of HKRD services. Focus is on motivation, attitude, communication, group dynamics, and problem solving.

HKRD5883 Sports Facilities Management (Fa) Considers basic elements and procedures in the planning, design, construction, operation, and maintenance of sport facilities; management considerations in conducting various types of events.

HKRD5893 Public and Private Finance in HKRD (Sp, Su) Develops an understanding of both public and private finance management for students in public and private management positions. Provides an understanding of the budgeting processes and techniques used in obtaining and controlling funds, including private sector finance procedures in the arts of creating, pricing, income, and debt management.

HKRD5983 Health Promotion at the Workplace (Sp, Su, Fa) Examines specific workplace health promotion programming, organizational and administrative schemes for program delivery, and appraisal systems for determining health programming priorities in workplace settings.

HKRD6133 Issues in HKRD (Su) A review of the significant social, demographic, behavioral, developmental, and technological issues that influence health, kinesiology, and recreation programs. Pre- or Corequisite: for doctoral level students.

HKRD6233 Management in HKRD (Sp) Deals with principles, procedures, relationships, programs, and current practices in the supervision of health education and kinesiology. Includes management of facilities, programs, personnel, and processes.

HKRD6333 Measurement in HKRD (Sp, Su) Competencies for analysis and application of evaluation and measurement HKRD.

HKRD660V Workshop (Sp, Su, Fa) (1-6)

HKRD689V Directed Research (Sp, Su, Fa) (1-6) Laboratory involves directed research.

HKRD699V Seminar (Sp, Su, Fa) (1-3)

(FLSC) HEALTH SCIENCE

HLSC1002 Wellness Concepts (Sp, Su, Fa) Intereffrelationship of mental, emotional, physical, social, and spiritual aspects of functioning to optimal health and wellness; implications for education about wellness in the schools and for adult living are provided.

HLSC1103 Prevention of Drug Abuse (Sp, Su, Fa) Health and safety problems with emphasis on the promotion of individual health and safety. (Same as HLED 1103/HLSC 1103)

HLSC1203 Prevention of Drug Abuse (Sp, Fa) Provides an overview of drugs of use and abuse in society. Also assists the student in evaluating drug abuse prevention approaches for public, private, or community settings.

HLSC1303 Introductory Health and Safety (Fa) An examination of human sexuality with a critical analysis of the social, cultural, and economic factors influencing the development of sexuality.

HLSC1403 Prevention of Drug Abuse (Sp, Su, Fa) Examination and application of health promotion concepts based on individualized health hazard appraisal. (Not to replace current courses leading to teacher certification in health education.):

HLSC2101 Special Topics (Sp, Su, Fa) Present strategies to achieve a more healthful balance in life.

HLSC2101 Health Promotion (Sp, Su) History and philosophy of health education discipline; organization and administration of health education programs; curriculum development and evaluation of educational efforts; and student observation in school and non-school settings.

HLSC2563 Introduction to Community Health (Fa) An exploration of the techniques for maintaining, protecting, and improving the health of the people through organized community efforts.

HLSC2662 Terminology for the Health Professions (Sp) History and development of word roots and combined forms of words describing various facets of health and disease. Descriptive definitions with application of practical significance included for the health professional.

HLSC2803 Seminar in Community Health (Sp, Su, Fa) Supervised short-term work experience in various community health programs, designed to provide students with comprehensive view of the community health field.

HLSC310V Readings in Health Science (Sp, Su, Fa) (1-3) Synthesis and critical analysis of current literature in the health sciences.

HLSC3613 Methods and Materials in Health Education and Safety (Sp, Su, Fa) Methods and materials; planning and organizing instruction; preparation of teaching units. Prerequisite: junior standing.

HLSC3633 First Responder-First Aid (Sp, Su, Fa) Prepares persons to administer cardiopulmonary resuscitation and emergency aid to victims of serious bleeding, poisoning, shock, fracture, and other forms of injury until emergency medical services personnel arrive at the scene.

HLSC3643 Community Health Planning and Promotion (Sp, Su, Fa) emphasis on community analysis; defining and working with community competencies; establishing program goals; defining and assessing health behaviors; formulating educational goals, objectives, methods, and activities; promoting programs; and designing program evaluation.

HLSC3663 Principles and Practice of Mental Health Promotion (Fa) Understanding and practicing the principles of sound mental health is key elements in achieving high level wellness. This course encourages students exploration of the mental dimensions of holistic health and presents strategies to achieve a more healthful balance in life.

HLSC3673 Teacher Drug Education (Fa) Specifically for educators; provides an overview of use of drugs, alcohol, and abuse in society, and assists the educator in developing a sequential drug education program in private, public, or community educational settings. (Same as HLSC 3673)

HLSC3683 Health Care Consumerism (Sp) Study of products and services provided by the health care delivery system; an analysis of those components lacking scientific credibility, yet promoted for the maintenance or restoration of health status.

HLSC4011L Emergency Medical Care I Laboratory (Fa) A required laboratory component for students enrolled in Emergency Medical Care I. Emphasis is on the development of specific hands-on competencies in the assessment and treatment of the trauma and/or medical patient utilizing appropriate adjunctive equipment.

HLSC4013 Emergency Medical Care I (Fa) Initial phase of training that emphasizes the development of student sink in recognition of symptoms of illness, injuries, and proper procedures of emergency care presently considered with the responsibilities of the emergency medical technician.

HLSC4011L Emergency Medical Care II Laboratory (Fa) A required laboratory component for students enrolled in Emergency Medical Care II. Emphasis is on the development of specific hands-on competencies in the assessment and treatment of the trauma and/or medical patient utilizing appropriate adjunctive equipment.

HLSC4023 Emergency Medical Care II (Sp) Final phase of training that emphasizes life threatening emergencis, childbirth and problems of child patients, environmental emergencies, extraction from automobiles and all operational aspects of the emergency vehicle. Also included will be 15 hours of hospital emergency room and ambulance experience.

HLSC4023 Emergency Medical Care II (Sp) Final phase of training that emphasizes life threatening emergencis, childbirth and problems of child patients, environmental emergencies, extraction from automobiles and all operational aspects of the emergency vehicle. Also included will be 15 hours of hospital emergency room and ambulance experience.

HLSC404V Community Health Preceptorship (Sp, Su, Fa) (6-12) Designed to provide the student with an extended work experience in a selected community health program. The student works under college supervision with a professional in the health care delivery field. Prerequisite: senior standing.

HLSC4063 Application of Health Behavior Theories in Health Education (Sp) Survey of the reasons for behavior change for the health education professional. It is necessary to assist in the development of services and programs that are likely to move an individual from an unhealthy behavior to one that is more appropriate for a healthy lifestyle. This course surveys the major health behavior theories used in health education and applications of the theories will be used in the classroom.

HLSC4073 Human Disease Processes (Odd years, Sp) An examination of the variety, behavior, distribution, and management of both infectious and noninfectious diseases in human populations. Prerequisite: ZOOL 1004 (or BIOL 1543 and BIOL 1541L).

HLSC4075V Student Teaching (Sp, Su, Fa) (1-18) Involves time and an off-campus school where student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school.

Course Descriptions

University of Arkansas, Fayetteville

291
Course Descriptions

and the community.

HLSC553S Health Counseling (Sp) A review of the role of the counselor including a focus on problem solving approaches for coping with daily problems of living, decision making, and life style planning. (Same as CNULU 5302)

HLSC5643 Contemporary Issues in Human Sexuality (Fa) Indepth analysis of the social, biological, and behavioral factors associated with the development of one's sexuality.

HLSC5803 School Health Programs (Fa, Su, Fa) Study of program content, program organization, and administrative details in planning and conducting a school program which includes healthful school life, health services, and health instruction.

HLSC5563 Public Health (Fa) Acquaints the student with the structure, functions, and major problems in public health and with the role of education in public health.

HLSC6253 Principles of Health Education (Sp, Su, Fa) Current trends, basic issues, controversial issues, and fundamental principles of health education.

HLSC5883 Voluntary Health Agencies (Sp, Su, Fa) Introduction to a variety of voluntary health agencies in the community. Opportunities to visit these agencies will be provided. Purpose, objectives, functions, and programs will be presented by representatives of selected agencies.

HLSC620V Research (Irregular) (1-6)

HLSC6513 Principles of Epidemiology (Sp, Su, Fa) Distribution and patterns of disease or physiological conditions within populations; an examination of the nature of epidemiology.

HLSC5623 Health Planning (Sp, Su, Fa) A focus is on an evaluation of administrative factors relating to health services. Administrative and professional authority, boards, consumers, delivery of services, federal role, and cost containment will also be addressed.

HLSC689V Independent Research (Sp, Su, Fa) (1-6) Development, implementation, and completion of graduate research project. Prerequisite: M.S. degree in health sciences and HPHL 5253 and LUPH 5293.

HLSC599V Seminar (Irregular) (1-3)

HLSC600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisites: M.S. degree in health science and permission of supervising faculty.

HLSC605V Independent Study (Sp, Su, Fa) (1-6) Provides students with an opportunity to pursue special study of education problems.

HLSC6333 Health Behavior Research (Fa) A review of human behavior and its relationship to health and well being. Emphasis will be placed on contemporary health behavior research and instrumentation.

HLSC6443 Health & Health Care in Cross-Cultural Settings (Sp, Su, Fa) The relationship of socio-cultural factors to primary health care and public health in developed and developing countries is emphasized. Epidemiological factors influencing health status in various countries are reviewed.

HLSC6553 Environmental Health (Sp, Su, Fa) An analysis and evaluation of the various environmental factors that influence our health. Causes of problem factors are identified and solutions proposed for improving environmental conditions.

HLSC6733 Health and the Aging Process (Sp, Su, Fa) An overview of the health-related issues facing elderly populations with indepth study of the biological and behavioral changes associated with aging.

HLSC674V Internship (Sp, Su, Fa) (1-3) Provide Ph.D. students with an individualized college teaching experience in collaboration with a faculty mentor. Enrollment concurrent with residency. Prerequisite: admission to the Ph.D. in Health Science degree program.

HLSC6803 Health Communication Theory, Research and Practice (Sp, Odd Years) This course is designed with the role of communication in health education and with basic principles and practices in interpersonal, group, and mass communication. Health communication theory will be discussed in the first part of the semester and the second part of the semester will focus on research in the area of health communication, and finally putting to practice the material will be the terminal experience for the course.

HLSC6833 Principles of Epidemiology II (Sp, Su, Fa) Provides students with knowledge and skills necessary to design, conduct, and interpret observational epidemiological concepts, sources of data, prospective cohort studies, retrospective cohort studies, case-control studies, cross-sectional studies, methods of sampling, estimating sample size, questionnaire design, and effects of measurement error. Prerequisite: HLSC5993 or LUPH 6401.

HLSC699V Workshop (Irregular) (1-6) Special topics or issues in education for the Honors student. Prerequisite: honors candidacy.

HLSC600V Master’s Thesis (Sp, Su, Fa) (1-6) Honors Education Thesis/Project Prerequisite: honors candidacy.

HLSC6003H Honors Education Thesis/Project (Sp, Su, Fa) (1-6) Honors Education Thesis/Project (Irregular) (1-6) Honors Thesis. Students and faculty tutors work “one-on-one” exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: honors candidacy.

HLSC6100 Principles of Education Seminar (Sp, Su, Fa) (1-3) Discussion of selected topics and review of current literature in the health sciences. Prerequisite: advanced graduate standing.

(HNED) HONORS EDUCATION

HNED3001H Honors Education Thesis Tutorial (Sp, Su, Fa) Designed to provide foundation for the Honors Thesis. Students and faculty tutors work “one-on-one” exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: honors candidacy.

HNED4003H Honors Education Thesis/Project (Sp, Su, Fa) Prerequisite: honors candidacy and HNED 3001H.

(HORT) HORTICULTURE

HORT1100V Special Topics (Sp, Su, Fa) (1-4) Topics not covered in other courses or a more intensive study of specific topics in horticulture.

HORT1103 Plant & Home Environment (Fa) A course describing the nutritional and health value, and other importance of plants to humans. The course will highlight the use and importance of plants and gardening throughout the ages, study significant gardens to human history and introduce students to using plants to their benefit. The use of color, texture, aroma and flavor in the home and landscape will be presented. Basic home gardening, plant care and use will be discussed and practiced.

HORT1203 Introduction to Plant Sciences (Sp, Fa) An introduction to basic agricultural crop plant structure, growth, and production.

HORT2003 Principles of Horticulture (Sp, Fa) A course introducing students to the biological and technologies underlying the propagation, production, handling and use of horticultural crops, turf and landscape plants. Students will be introduced to the various disciplines and commodities of horticulture. The use of plants for the benefit of human-kind because of their aesthetic and nutritional value will be explored. Previous instruction in Plant Science, Plant Biology, or general botany is recommended. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

HORT2203 Introduction to Turfgrass Management (Fa) An introductory course in turfgrass management emphasizing turfgrass growth, adaptation, and management. Methods for establishment, fertilization, mowing, cultivation, irrigation, and pest management are presented and their impact on culture of laws, golf courses, athletic fields, and other managed turf areas discussed.

HORT3103 Woody Landscape Plants (Fa) Identification, climatic adaptation and landscape design values of woody ornamental trees, shrubs and vines. Lecture 2 hours per week. Corequisite: Lab component.

HORT3113 Herbaceous and Indoor Plant Materials (Odd years, Sp) Identification, culture, and use of annuals, perennials, herbaceous and foliage plants in interiors. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

HORT3133 Advanced Woody Landscape Plants (Odd years, Sp) Study of rare and unusual plant materials for specific landscape uses and examination of cultivars of commonly used landscape plants. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 3103.

HORT3303 Vegetable Crops (Even years, Sp) General course in vegetable crops with attention to the principles underlying methods of production and handling related to yields and quality of the products. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: HUKI 2003 and CSEB 2203.

HORT3403 Commercial and Residential Turfgrass Management (Fa) Cultural and management practices of residential and commercial lawns. Prerequisite: HORT 3103 or consent of instructor.

HORT4103 Fruit Production Science and Technology (Even years, Fa) The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberry, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Corequisites: Lab component. Prerequisite: HORT 3103.

HORT4403 Plant Propagation (Even years, Sp) Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of horticulture and plant physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

HORT4503 Nursery Management (Odd years, Fa) Principles and practices in the production and handling of woody ornamental stock; management of the retail nursery and garden center. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003.

HORT4603 Practical Landscape Planning (Even years, Sp) Ornamental plant design and landscape planning concepts. Preparing planting plans, materials, and performance, portfolio and resume, development and job hunting skills will be presented. Prerequisite: 45 hours completed coursework.

HORT460V Special Problems (Sp, Su, Fa) (1-6) Original investigations on assigned problems in horticulture. Prerequisite: junior standing.

HORT461V Special Topics in Horticulture, Turf or Landscape (Irregular) (1-6) Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic.

HORT462V Horticulture Judging and Competition Activity (Irregular) (1-6) Training for and participation on horticultural identification, judging and competitive teams. Repeatable for up to 4 credits. Prerequisite: HORT 2003.

HORT4633 Professional Landscape Installation and Construction (Even years, Fa) Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, landscape design and drafting, and drafting. Lecture 3 hours per week. Preparatory training in agribusi- ness or business is suggested. Prerequisite: HORT 2003 and HORT 3103.

HORT4651 Forest Plant Production Science and Technology (Even years, Fa) The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawber- ries, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making manage- ment decisions in fruit crop productions. Corequisites: Lab component. Prerequisite: HORT 3103.

HORT4663 Landscape Horticulture Internship (Sp, Su, Fa) (1-6) A supervised practical work experience in a nursery or landscape design, maintenance, or contractor business to gain proficiencies necessary for successful job or landscape design planning. Prerequisite: Junior standing.

HORT468V Horticulture Internship (Sp, Su, Fa) (1-6) A supervised practical work experience in a horticultural or landscape design program. Prerequisite: 40 hours experi- ence in horticultural operations and insight into employment opportunities. Prerequisite: junior standing.

HORT4733 Vegetable Crops (Even years, Sp) (1-6) A supervised practical work experience in a horticultural or landscape design program. Prerequisite: 40 hours experi- ence in horticultural operations and insight into employment opportunities. A maximum of 6 hours credit is permitted for degree credit. Prerequisite: minimum of 60 hours completed coursework.

HORT466V Turf Management Internship (Sp, Su, Fa) (1-8) Practical experience in golf course management, sports turf management, residential and/or commercial turf management, turf production or related turf industries.
HUMN1003H Honors Introduction to the Arts and Aesthetics (Fa) An interdisciplinary, multicultural introduction to the arts through general artistic concepts and questions, including the nature of artistic media, form, style and interpretation, includes experimental and academic approaches. (Same as HUMN 1003)

HUMN1003 Introduction to the Arts and Aesthetics (Sp, Su, Fa) An interdisciplinary, multicultural introduction to the arts through general artistic concepts and questions, including the nature of artistic media, form, style and interpretation, includes experimental and academic approaches.

HUMN1114H Honors Roots of Culture to 500 C.E. (Fa) This course constitutes the first segment of a four-semester sequence that explores the evolution of the Dead, the Torah, the Roman Colosseum, Hinduism and Confucianism. open to first-year Honors students by invitation only. Corequisite: Drill component.

HUMN1124H Horizons of Culltures of 500-1600 (Sp) This course constitutes the second segment of a four-semester sequence focusing on world cultures. Semester 2 may include the interdisciplinary study of Islam, early Byzantium, Gothic architecture, Heian Japan, and the ancient Maya. Open to first-year Honors students by invitation only. Corequisite: Drill component.

HUMN2003H Honors Introduction to Gender Studies (Sp) This course explores the concept of gender and sexuality using a variety of media, including literature, film, and architecture. (Same as HUMN 2003)

HUMN2003 Introduction to Gender Studies (Fa) This course explores the concept of gender and sexuality using a variety of media, including literature, film, and architecture.

HUMN2114H Honors Birth of Modern Culture 1600-1900 (Ir) This course constitutes the third segment of a four-semester sequence focusing on world cultures. Semester 3 may include the interdisciplinary study of Renaissance Venice, Feudal Japan, Moghul India, Jefferson's Monticello, and Darwinism. Open to second-year Honors students by invitation only. Corequisite: Lab component.

HUMN2124H Honors Twentieth Century Global Culture (Sp) This course constitutes the fourth segment of a four-semester sequence focusing on world cultures. Semester 4 may include the interdisciplinary study of the Brooklyn Bridge, the Mexican Revolution, African literature, the Vietnam Memorial, and the atomic age. Open to second-year Honors students by invitation only. Corequisite: Lab component.

HUMN2213 Introduction to World Religions (Sp) A survey of the major religions, including—but not limited to—Hinduism, Buddhism, Judaism, Islam, and Christianity.

HUMN3003 Religions of Asia (Sp) This course explores the religious traditions of Japanese Buddhism, Taoism, Confucianism, Shintoism, Islam, and Sikhism.

HUMN3163 On Death and Dying (Sp, Su, Fa) Reviews the theory and humanistic importance of the concepts of death and dying in society. An experimental option and interdisciplinary considerations. Prerequisite: junior standing. (Same as SCWK 3163)

HUMN3203 Approaches to Religious Studies (Fa) Introduces students to the academic study of religion from a variety of disciplinary approaches. Topics include the idea of the sacred, myth, ritual, belief, symbol, values, revelation, mysticism, and hermeneutics. Introductions to religious beliefs throughout the world and their historical development and influence on the engineering viewpoint; introduction to general engineering courses to follow and shows their relationship to the systems engineers consider today. 

HUMN3913 Literary Reflections of the Holocaust (Ir) Deals with the adequacy of imaginative literature in the face of atrocity, the comparative effectiveness of fiction versus autobiography, and the dangers of exploitation and trivialization.

HUMN4913 Literary Reflections of the Holocaust (Sp) Deals with the adequacy of imaginative literature in the face of atrocity, the comparative effectiveness of fiction versus autobiography, and the dangers of exploitation and trivialization.

HUMN4993 The City in American Art and Culture (Sp, Su, Fa) An examination of the role of the city and the urban American experience in American civilization from colonial times to the present. May be used to satisfy the art history requirement for art majors.

(INEG) INDUSTRIAL ENGINEERING

INEG1113 Principles of Industrial Engineering (Fa) Considers the historical and present roles of the professional industrial engineer and evaluates future trends. Introduces courses to follow and shows their relationship to the systems engineers consider today. 

INEG1145 Introduction to Industrial Costing (Sp) Introduction to financial accounting information for planning and control with emphasis on the engineering viewpoint; introduction to general accounting procedures; principles of cost accounting and other means of production control; standard costs, flexible budgets, distribution of profits, securities, sources of corporate capital, interpretation of financial statements, and other related topics. Laboratory required. Corequisite: Lab component.

INEG2513 Manufacturing System Design (Sp) Basic manufacturing processes and machining fundamentals; metals shaping and removal processes; economic tool life; machinability; machining economics. Selection and design of productive systems to manufacture products. Analysis of manufacturing systems, mechanized assembly, numerical control work centers, and robotics. Laboratory required. Corequisite: Lab component.

INEG3113 Law and Ethics (Irregular) Analysis of the fundamental legal principles applicable in protecting the rights and interests of engineers and their employers; termination and discharge of contracts; agency relationships; torts; labor laws; patents; trademarks; copyrights; unfair competition, ethics; professional considerations. Prerequisite: junior standing.

INEG3321 Safety Engineering (Irregular) Principles of accident and industrial disease prevention; organization and operation of industrial hygiene and safety programs; design problems involving mechanical, electrical, and fluid flow considerations. 

INEG3331 Engineering Statistics (Sp, Su, Fa) Fundamentals of probability and distribution theory with applications to various branches of engineering; experimental procedures and samples; statistical decision theory including significance testing and estimation. Drill required. Corequisite: Drill component. Prerequisite: MATH 2564. (Same as INEG 3313)

INEG3413 Engineering Economic Analysis (Sp, Su, Fa) Economic aspects of engineering, including current economic problems and the treatment of estimates when evaluating alternative courses of action. Methods of selection and replacement of equipment and break-even point of operations; desirability of new projects or processes; what asset life, rate of return on investment, and first, fixed, differential, marginal, and sunk costs must be considered. Corequisite: Drill component of course; agency relationships; torts; labor laws; patents; trademarks; copyrights; unfair competition, ethics; professional considerations. Prerequisite: junior standing.

INSC3321 Safety Engineering (Irregular) Principles of accident and industrial disease prevention; organization and operation of industrial hygiene and safety programs; design problems involving mechanical, electrical, and fluid flow considerations. 

INSC3331 Engineering Statistics (Sp, Su, Fa) Fundamentals of probability and distribution theory with applications to various branches of engineering; experimental procedures and samples; statistical decision theory including significance testing and estimation. Drill required. Corequisite: Drill component. Prerequisite: MATH 2564. (Same as INEG 3313)

INSC3413 Engineering Economic Analysis (Sp, Su, Fa) Economic aspects of engineering, including current economic problems and the treatment of estimates when evaluating alternative courses of action. Methods of selection and replacement of equipment and break-even point of operations; desirability of new projects or processes; what asset life, rate of return on investment, and first, fixed, differential, marginal, and sunk costs must be considered. Corequisite: Drill component of course; agency relationships; torts; labor laws; patents; trademarks; copyrights; unfair competition, ethics; professional considerations. Prerequisite: junior standing.
**Course Descriptions**

### INEG3333 Industrial Statistics (Sp, Su, Fa) (1-3)
Survey of industrial statistics. Includes review and development of computer databases for statistical analysis; basic probability theory; random variables and probability distributions; random variables, with application to engineers; normal and Poisson processes; engineering applications of probability theory; statistical analysis as applied to problems and experiments, learning curves, activity based costing, detailed and parameter estimation models, and handing risk and uncertainty. Prerequisite: INEG 4333.

### INEG3443 Project Management (Odd years, Sp) (1-3)
Analysis of project engineering management including environment, planning, organization, and staffing. Professional creativity, motivation, leadership, and ethics are explored. At the tactical level, project selection, control and management are emphasized. Organizational behavior and models related to scientific and professional employees are examined. Prerequisite: senior standing.

### INEG4331 Electronic Manufacturing Processes (Fa) Introduction to manufacturing processes and con- current engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality cost, and assembly line design, and manufacture. Prerequisites: INEG 1233 and INEG 4223. Corequisite: Lab component. Prerequisite: INEG 3133.

### INEG4333 Engineering Management (Fa) Studies of cases in engineering administration emphasizing human relationships in a technical environment. Productivity/quality enhancement through an understanding of organizational design and behavior, motivation and reward systems, and participative management. Prerequisite: senior standing.

### INEG4443 Project Management (Odd years, Sp) Analysis of project engineering management including environment, planning, organization, and staffing. Professional creativity, motivation, leadership, and ethics are explored. At the tactical level, project selection, control and management are emphasized. Organizational behavior and models related to scientific and professional employees are examined. Prerequisite: senior standing.

### INEG4533 Productivity Improvement (Even years, Fa) Development of skills required to: diagnose problems; measure productivity; develop improvement strategies; and provide for the implementation and maintenance of productivity improvement systems. Prerequisite: senior standing.

### INEG4513 Electronics Manufacturing Processes (Fa) Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of
course Descriptions

University of Arkansas, Fayetteville

295

tableau, duality and primal dual relationships, complementarity slackness, revised simplex, interior point algorithms, improving search strategies, graph (Irregular) modeling. INEG5623 Analysis of Inventory Systems (Irregular) Elements of production and inventory control, economic lot size models, price breaks models using Lagrangian method, dynamic inventory model, probabilistic one-period and multi-period models, zero and positive lead time models, continuous review models. Prerequisite: INEG 5513.

INEG5653 Modeling and Analysis of Semiconductor Manufacturing (Even years, Sp) Introduction to semiconductor manufacturing process, wafer processing, topics include an introduction to wafer processing, factory and equipment capacity modeling, automated material handling, simulation, cost modeling, and production scheduling. (Same as INEG 3613.) Prerequisite: INEG 5513.

INEG5663 Analysis of Queuing Systems (Irregular) Poisson axioms, pure birth and death model, queue disciplines (M/M/1) and (M/M/n) models, machine servicing model, Pollaczek-Khintchine formula, priority queues, queues in series. Markovian analysis of (G/M/K) (M/G/1) models, bulk queues. Hergen, banker's, and jockeying phenomena. Prerequisite: INEG 5513.

INEG5673 Graphs and Network Theory (Irregular) Directed, undirected and bipartite graphs; incidence matrices; shortest route problems; maximal and minimal cut sets, planar graphs; and duality theorem. Applications of networks and graphs to transportation, transshipment, assignment, plant layout, routing, scheduling, and tree problems. Prerequisite: INEG 3613 or INEG 5613.

INEG5713 Advanced Topics in Human Factors Engineering (Irregular) Advanced work in special research topics in man-machine systems. Prerequisite: INEG 4723.

INEG5723 Advanced Man/Machine System Design (Irregular) Continuation of INEG 5713. Prerequisite: INEG 5713.

INEG5823 Systems Simulation I (Su) Monte Carlo techniques, digital simulation, modeling, timekeeping in simulations, design of simulation experiment, statistical verification of results. Includes the use of simulation language such as AHA/NA. Prerequisite: CSCE 1116 and INEG 3131 (or equivalent).

INEG5843H Honors Scheduling & Sequencing I (Odd years, Sp) An introduction to constructive algorithms and various operations research approaches for solving sequencing and scheduling problems. The NP-completeness of most scheduling problems leads to a discussion of combinatorial complexity, the use of heuristic solution methods, and the development of worst case bounds. Prerequisite: INEG 3613 and computer programming proficiency. (Same as INEG 5643.)

INEG5843 Scheduling and Sequencing I (Odd years, Sp) An introduction to constructive algorithms and various operations research approaches for solving sequencing and scheduling problems. The NP-completeness of most scheduling problems leads to a discussion of combinatorial complexity, the use of heuristic solution methods, and the development of worst case bounds. Prerequisite: INEG 3613 and computer programming proficiency. (Same as INEG 5643.)

INEG600V Master's Thesis (Sp, Su, Fa) (1-9) INEG6843H Research Applications (Irregular) Investigation of literature case studies; use of mathematical models to solve practical problems; data collection and solution implementation. Students work in teams on actual problems observed in industry and government. Prerequisite: INEG 5613.

INEG6823 Operations Research Applications (Irregular) Advanced topics in production and inventory systems, including experimental design, simulation optimization, variance reduction, and statistical output analysis techniques applied to discrete event simulation. Prerequisite: INEG 5513.

INEG6843 Systems Simulation II (Odd years, Sp) An investigation into constructive algorithms and various operations research approaches for solving sequencing and scheduling problems in a variety of machine environments (single-machine, parallel machines, flow shops and job shops). Prerequisite: INEG 5843.

INEG700V Doctoral Dissertation (Sp, Su, Fa) (1-18) (Odd years, Sp) (Irregular)
The focus of this course is to expose students to working of information systems. Prerequisite: ISYS 3293.

ISYS4833 Enterprise Transaction Systems (Sp)
Being able to accurately capture and store business transactions is an important processing function in many businesses. For many large companies with high volume processing, the tools of choice for transaction processing are CICS/DB2. This course provides students with the necessary understanding and skills to work in this type environment. Prerequisite: ISYS 2623 or CSCE 1123 with a grade of "C" or better.

ISYS5033 Decision Support Systems (Fa)
Prerequisite: ISYS 3293. This course is designed to provide students with active mastery of current topics in data mining and business intelligence, and to develop the necessary skills and knowledge for students to gain a valuable insight into computing in a mainframe operating environment. Prerequisite: ISYS 2623 or CS/US 1123 with a grade of "C" or better.

ISYS5463 Enterprise Transaction Systems (Sp)
Prerequisite: ISYS 2623. This course provides students with the necessary understanding and skills to work in this type environment. Prerequisite: ISYS 2623 or CSCE 1123 with a grade of "C" or better.

ISYS450V Independent Study (Sp, Fa) (1-3)
Permits students on individual basis to explore selected topics in data processing and/or Quantitative Analysis.

ISYS4933 Global Information Technology Management (Irregular)
This course will focus on IT environments around the world, national infrastructures and regulatory regimes, global IT applications, global IS development strategies, global management support systems, and global IT management strategies. The course will include an in-depth understanding of managing information resources across national borders, time zones, cultures, political philos- ophies, social and economic infrastructures. Prerequisite: WCOB 3016 with a grade of "C" or better.

ISYS5103 Business Statistics (Sp, Fa) (Irregular)
First offered Summer 2002, Formerly CISQ 5103 Analysis, summarization, and interpretation of data for use in managerial decision making. Includes descriptive statistics, probability and prob- ability distributions, sampling, test of hypotheses, analysis of variance, and regression. Prerequisite: MATH 2043 and MAH 2053.

ISYS5133 E Business Development (Irregular)
First offered Summer 2002, Formerly CISQ 5133 This course allows students to gain valuable insight into computing in a mainframe operating environment. Prerequisite: ISYS 2623 or CS/US 1123 with a grade of "C" or better.

ISYS5203 Statistics and Quantitative Analysis (Fa)
Prerequisite: ISYS 3033. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5233 Seminar in ERP Development (Sp, Fa) (Irregular)
This course provides students with the necessary understanding and skills to work in this type environment. Prerequisite: ISYS 3293 or ISYS 4283 or ISYS 4733 or CSCE 1123 with a grade of "C" or better.

ISYS5203 Statistics and Quantitative Analysis (Sp)
Prerequisite: ISYS 3033. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5233 Seminar in ERP Development (Sp)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS6013 Graduate Colloquium (Sp, Fa)
Presentation and critique of research papers and proposals.

ISYS6021 Research Seminar in Systems Development (Irregular)
An examination of research topics in systems development. Emphasis on understanding and conducting systems development research. Pr- or Corequisite: ISYS 5503.

ISYS6073 Research Seminar in Data Management (Irregular)
An examination of research topics in data management. Emphasis on understanding and conducting data management research. Pr- or Corequisite: ISYS 5503.

ISYS6103 Seminar in Management Information Systems (Irregular)
Focuses on the relationship between an information system and the organization it supports. Topics include system theory, information system resources, types of information systems, and characteristics of the managerial activities that involve information systems. Prerequisite: ISYS 5723.

ISYS6113 Seminar in Computer Information Systems (Irregular)
Provides the student with information in current CIS technological topics. Topics include end-user computing and development, advanced generation languages, artificial intelligence, data mining, business intelligence, and program management. Prerequisite: ISYS 5423.

ISYS5843 Seminar in Business Intelligence and Knowledge Management (Sp)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5933 Global Information Systems Seminar (Irregular)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5943 Global Information Technology (Irregular)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ITAL2003 Intermediate Italian I (Fa) (Irregular)
Prerequisite: ITAL 2013. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL2013 Intermediate Italian II (Sp) (Irregular)
Prerequisite: ITAL 2003 or equivalent. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL5033 Research Seminar (Sp, Fa) (Irregular)
Prerequisite: ITAL 2003 or equivalent. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL5033 Research Seminar (Sp, Fa) (Irregular)
Prerequisite: ITAL 2003 or equivalent. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL475V Special Investigations (Irregular) (1-6)
Independent reading and research under supervision of selected staff member.

ISYS7500V Doctoral Dissertations (Sp, Su, Fa) (1-18)
Prerequisite: candidacy.

ISYS5463 Enterprise Transaction Systems (Sp)
Prerequisite: ISYS 2623. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5933 Global Information Systems Seminar (Sp)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5943 Global Information Technology (Irregular)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS6013 Graduate Colloquium (Sp, Fa)
Presentation and critique of research papers and proposals.

ISYS6021 Research Seminar in Systems Development (Irregular)
An examination of research topics in systems development. Emphasis on understanding and conducting systems development research. Pr- or Corequisite: ISYS 5503.

ISYS6073 Research Seminar in Data Management (Irregular)
An examination of research topics in data management. Emphasis on understanding and conducting data management research. Pr- or Corequisite: ISYS 5503.

ISYS6103 Seminar in Management Information Systems (Irregular)
Focuses on the relationship between an information system and the organization it supports. Topics include system theory, information system resources, types of information systems, and characteristics of the managerial activities that involve information systems. Prerequisite: ISYS 5723.

ISYS6113 Seminar in Computer Information Systems (Irregular)
Provides the student with information in current CIS technological topics. Topics include end-user computing and development, advanced generation languages, artificial intelligence, data mining, business intelligence, and program management. Prerequisite: ISYS 5423.

ISYS5843 Seminar in Business Intelligence and Knowledge Management (Sp)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5933 Global Information Systems Seminar (Irregular)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ISYS5943 Global Information Technology (Irregular)
Prerequisite: ISYS 3293. This course is designed to provide students with the necessary understanding and skills to work in this type environment.

ITAL2003 Intermediate Italian I (Fa) (Irregular)
Prerequisite: ITAL 2013. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL2013 Intermediate Italian II (Sp) (Irregular)
Prerequisite: ITAL 2003 or equivalent. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL5033 Research Seminar (Sp, Fa) (Irregular)
Prerequisite: ITAL 2003 or equivalent. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL3013 Introduction to Literature (Sp) (Irregular)
Prerequisite: ITAL 2013. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)

ITAL1031 Elementary Italian I (Fa) (Irregular)
Prerequisite: ITAL 1013. Students will learn about Business to Business transactions and for deriving physical systems designs. Coverage of quantitative data, statistical analysis, computer-aided drafting. Corequisite: ITED 1201L. (Same as ITED 1203L)
ITED1303 Construction Methods and Materials (Sp, Su, Fa) Primary objective is to acquaint the student with various types of construction materials and their application. Corequisite: ITED 1301L.

ITED1401L Power and Energy Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of power systems and facilities. Corequisite: ITED 1409.

ITED1403 Power and Energy (Sp, Su, Fa) How energy is extracted, processed, converted, and used to power societal needs. Corequisite: ITED 1401L.

ITED1411L Principles of Electricity Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of electricity.

ITED1413 Principles of Electricity (Sp, Su, Fa) (Same as JOUR 2023).

ITED1503 Introduction to Industrial and Technical Education (Sp, Su, Fa) Surveying and interpreting the origin, principles, and objectives of industrial and technical education and its relationship to other educational programs. Required for all undergraduates in industrial/technical education.

ITED1603 Industrial Safety I (Sp, Su, Fa) Study of accidents, causes, the cost of accidents, appraising safety performance, safety inspection, planning and maintaining a safe environment, and organization and operation of school laboratories and industrial accident prevention programs.

ITED2211L Industrial Design Laboratory (Sp, Su, Fa, F) Laboratory exercises in principles and practices of industrial design. Corequisite: ITED 2213.

ITED2213 Industrial Design (Sp, Su, Fa) Principles of structural design; contour and surface ornamentation applied to 3-dimensional objects; sketches, details, and working drawings of projects. Corequisite: ITED 2211L. (Same as ITED 2213)

ITED2311L Metals Fabrication Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of metals fabrication. Corequisite: ITED 2313.

ITED2313 Metals Fabrication (Sp, Su, Fa) A study of the tools, materials, and processes involved in sheet metal, ornamental iron work, welding, and forging used to install metal products either in the fabrication shop or on the construction site. Corequisite: ITED 2311L.

ITED2421L Industrial Maintenance Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of industrial maintenance. Corequisite: ITED 2423.

ITED2423 Industrial Maintenance (Sp, Su, Fa) The principles and practices used in installing, maintaining, troubleshooting, diagnosing, and repairing electrical, mechanical, and facility components found in the manufacturing, construction, and service industries. Corequisite: ITED 2421L.

ITED2221L Drafting Technology II Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of drafting technology II. Corequisite: ITED 2223.

ITED2223 Drafting Technology II (Sp, Su, Fa) Combination of drafting and drafting design including section views, thread drawing, and dimensioning working drawings combined with rendering of plans and specifications for houses of traditional and contemporary design; emphasis on computer-aided drafting and design. Corequisite: ITED 2221L.

ITED3231L Construction Coating Application Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of construction coating applications. Corequisite: ITED 3233.

ITED3233 Construction Coating Applications (Sp, Su, Fa) Use and application of various transparent and opaque finishes that are applied by brush, spray, and wipe-on methods, including finishes for wood, metal, and concrete. Corequisite: ITED 3231L.

ITED3431L Exploring Electronics Technology Laboratory (Sp, Su, Fa) Corequisite: ITED 3433L.

ITED3433 Exploring Electronics Technology (Sp, Su, Fa) Vacuum tubes, gas tubes, and semiconductors; electronic circuits including amplifier, oscillators, switching and timing circuits. Concentrations include sound and video system, relays, controls, and industrial devices. Corequisite: ITED 3431L.

ITED3513 Applied Technology Education (Sp, Su, Fa) An introductory course in technology education focusing on the management of hands-on activities utilized in technology programs; for elementary and secondary industrial technology teachers.

ITED3621L Wood Processing Technology Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of wood processing technology. Corequisite: ITED 3623.

ITED3623 Wood Processing Technology (Sp, Su, Fa) Basic principles of design and construction processes involving machines, materials, and supplies in the integrated wood processing technology. Corequisite: ITED 3621L.

ITED3631L Plastics in Industry Laboratory (Sp, Su, Fa) Laboratory exercises in principles and practices of plastics in industry. Corequisite: ITED 3633.

ITED3633 Plastics in Industry (Sp, Su, Fa) Tools, materials, and processes involved in the use and fabrication of plastics relating to modern plastic industries. Corequisite: ITED 3631L.

ITED4523 Advanced Technology Education (Sp, Su, Fa) Provides the student with the expertise to develop and update a typical industrial technology education program in order to keep the program current with changes that occur in technology.

ITED459V Industrial Internship (Sp, Su, Fa) (1-12) In an actual industrial setting, the student will study managerial functions, safety, quality systems, cost and budget design, production fabrication, routing, quality control, work schedules, industrial relations, and related activities of American industry.

ITED4643 Industrial Safety II (Sp, Su, Fa) Indepth study of accidents, causes, the cost of accidents, appraising safety performance, safety inspection, planning and maintaining a safe environment, and organization and administration of school laboratory and industrial accident prevention program. (Same as ITED 4643L)

(JAPAN) JAPANESE

JAPN1003 Elementary Japanese I (Fa) Elementary course of vocabulary, grammar, conversation, and comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. Prerequisite: JAPN 1001 or equivalent.

JAPN2003 Intermediate Japanese I (Fa) Intermediate course leads to greater facility in spoken language and to more advanced reading skills. Prerequisite: JAPN 1001 or equivalent.

JAPN3003 Intermediate Japanese II (Sp) Continued development of basic reading comprehension and writing skills and intensive development of reading skills. Prerequisite: JAPN 2003 or equivalent.

JAPN3002 Intermediate Conversation I (Sp, Fa) Supplemental to 2003. Provides 2 hours of guided conversational practice per week with the objective of building the listening/speaking skills.

JAPN3002 Intermediate Conversation II (Sp, Fa) Supplemental to 2003. Provides 2 hours of guided conversational practice per week with the objective of building the listening/speaking skills.

JAPN3003 Advanced Japanese I (Fa) Introduces more complex forms and structures of the language as well as more Kani (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 2013.

JAPN3003 Advanced Japanese II (Sp) Continuation of JAPN 3003 with more complex forms and structures of the language as well as more Kani (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 3003.

JAPN3003 Advanced Japanese Conversation (Sp, Fa) Conversational practice for advanced learners of Japanese. Designed primarily for students who intend to use Japanese in business and other formal settings. Honorific vocabulary, and situationally specific expressions in the Japanese language reflects the beliefs and customs of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Prerequisite junior standing.

JAPN3333 Business Writing in Japanese (Sp) This course aims to familiarize the students with formats, vocabulary, and situationally specific expressions in Japanese business correspondence. Prerequisite: JAPN 2013 or equivalent Japanese proficiency.

(JOUR) JOURNALISM

JOUR1003 Media and Society (Sp, Fa) A survey of mass media (newspaper, radio, TV, magazine, advertising, public relations, photography, etc.) which stresses their importance in today’s society and introduces the student to the various roles in journalism. Recommended for students considering journalism as a major. (Same as JUHU 1023).

JOUR1033H Honors Fundamentals of Journalism (Sp, Fa) Course introduces students to the industries of journalism, including design, creative thinking and concise writing required in all aspects of journalism, as well as to the technology needed in upper-upper level courses. Practice using references for greater speed and journalistic style. A prerequisite to JOUR 2013, 2033, 2063 and 4143. Corequisite: Lab component. (Same as JOUR 1033H).

JOUR1033 Fundamentals of Journalism (Sp, Su, Fa) Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: JOUR 1003 and JOUR 1033. (Same as JOUR 1033).

JOUR2013 News Reporting I (Sp, Fa) Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: JOUR 2003 and JOUR 1003. JOUR2013L Broadcast News Reporting I Laboratory (Sp, Fa, F) Intensive training in the methods of gathering and writing broadcast news reporting techniques. Laboratory 3 hours per week. Corequisite: JOUR 3033. Prerequisite: JOUR 2013L.

JOUR2032 Broadcast News Reporting I (Sp, Fa) Intensive training in the methods of gathering and writing broadcast news. Lecture 2 hours per week. Corequisite: JOUR 2031L. Prerequisite: JOUR 2031L.

JOUR2063 Media Technology (Sp, Fa) Introduction to computer skills required in training major computer software used in the profession. Prerequisite: JOUR 2003 and JOUR 1003.

JOUR2331L Photographic Imaging I Laboratory (Sp, Fa, F) Provides students with the basic knowledge and skills in using photography, including darkroom procedures, composition, and the use of cameras. Lecture 2 hours per week. Corequisite: JOUR 2331L.

JOUR3001L Graphics of Journalism Laboratory (Sp, Fa) Hands-on training and experience in graphic design and production techniques. Laboratory 2 hours per week. Corequisite: JOUR 3002.

JOUR3002 Graphics of Journalism (Sp, Fa) Introduces the student to computer graphics including element pixel, make-up, type faces, design, and proofreading. Lecture 2 hours per week. Corequisite: JOUR 3001L.

JOUR3013 Editing (Sp, Fa) Theories and practices in news editing, copywriting, including darkroom layout and the gathering and publication of written and pictorial information. Prerequisite: JOUR 1003 and JOUR 2013.

JOUR3023 News Reporting II (Sp, Su, Fa) Continuation of JOUR 2013. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2013.

JOUR3061L Newspaper Graphics Laboratory
JOUR3071L Broadcast News Reporting II Laboratory (Sp, Fa) Television studio production including producing, directing, teleprompter, character generation, audio editing, graphics, Fresno State only. (Same as JOUR 3071L) 1 hour lecture, 2 hours television broadcast lab. Corequisite: JOUR 3072L. Prerequisite: JOUR 2032 and JOUR 3072L.

JOUR3072 Broadcast News Reporting II (Sp, Fa) Advanced broadcast journalism including: covering beats; writing and interviewing; and producing news program for television. Corequisite: JOUR 3071L. Prerequisite: JOUR 2032 and JOUR 3071L.

JOUR3073 Broadcast News Reporting III (Sp, Su, Fa) Study of news and feature photography. Includes planning and shooting photographs for newspapers and magazines, photographic techniques, and other aspects of photography for publication. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2332 and JOUR 2333L.

JOUR3083 Photojournalism II (Sp, Fa) Indepth, hands-on experience in the design and production of mass media photographs. Includes basic photography and the computer's influence on design and conceptualization. Emphasizes different approaches required for different audiences and media. Prerequisite: JOUR 3073 and a grade of B or better in both JOUR 3723 and JOUR 3743.

JOUR4133 Research Methods of Utility in Journalism (Sp, Su, Fa) An in-depth study of research in mass media and the impact of new technologies on mass communications. Focuses on the interaction between media, politics, government, and public policy, particularly on the impact and influence of the media on public policy agenda. Required trip to Hot Springs Documentary Film Festival. JOUR5333 Documentary Production II (Sp) A continuation of JOUR 5332. Documentary Production I students photograph, write, and edit a documentary film in the fall semester. Prerequisite: JOUR 5323.

JOUR500V Master's Thesis (Sp, Su, Fa) Indepth, hands-on exploration of computer hardware and software in the design and production of mass media messages. Includes computer technology and the computer's influence on design and conceptualization. Emphasizes different approaches required for different audiences and media. Prerequisite: JOUR 3073 and a grade of B or better in both JOUR 3723 and JOUR 3743. Primarily for students intending to teach journalism or to supervise publications in high schools. Prerequisite: advanced standing.

JOUR4503 Advanced Feature Writing (Sp, Su) This course is designed for students with proven feature writing objectives and research, media mix, and creative strategy. Focuses on the interaction between media, politics, government, and public policy, particularly on the impact and influence of the media on public policy agenda. Required trip to Hot Springs Documentary Film Festival. JOUR5333 Documentary Production II (Sp) A continuation of JOUR 5332. Documentary Production I students photograph, write, and edit a documentary film in the fall semester. Prerequisite: JOUR 5323.

JOUR600V Master's Thesis (Sp, Su, Fa) Advanced feature writing and reporting. Includes authorship from Daniel Defoe to John McPhee. Includes authors from contemporary journalism. Emphasis given to concept presentation delivery, utilizing audio and visual techniques. Prerequisite: JOUR 3723 and JOUR 3743 and JOUR 4423 and JOUR 4453. Credit May be repeated twice for a maximum of 6 hours credit, as content will vary.

JOUR5043H Honors Research Methods (Sp, Su, Fa) Research methods of utility in journalism. Emphasis on survey research, electronic data base searching, and traditional library research. Prerequisite: graduate standing or honors program standing. (Same as JOUR 5043)

JOUR5043 Research Methods in Journalism (Sp, Fa) Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: graduate standing.

JOUR5073 Propaganda and Public Opinion (Sp, Su, Fa) Examines and analyzes the means of influencing and measuring public opinion, with an emphasis on survey research and polling.

JOUR5193 Professional Journalism Seminar (Irregular) Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: graduate standing.

JOUR5193H Professional Journalism Seminar (Irregular) Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: graduate standing.

JOUR401V Advanced Journalistic Practices (Sp, Fa) (1-4) Study of media and techniques of media in modern society, business, and communications. Influence opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR3123 Feature Writing (Sp, Fa) Study of techniques and principles of coverage of sports and sports-related subjects on and off the field, and on the relationship between sports and the mass media.

JOUR3723 Media Law (Sp, Fa) Constitutional guarantees, statutory laws and court cases applicable to mass communications. Prerequisite: Junior standing.

JOUR3723 Advertising Principles (Sp, Fa) Study of the use of advertising in newspapers, magazines, radio, television, and other media. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR3743 Public Relations Principles (Sp, Fa) Study of principles and ethics of public relations in modern society, business, and communications. Influencing opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR3923H Honors Colloquium (Sp, Fa) Covers a special topic or issue, offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in journalism).

JOUR401V Advanced Journalistic Practices (Sp, Fa) (1-4) Study of media and techniques of media in modern society, business, and communications. Influence opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR3923H Honors Colloquium (Sp, Fa) Covers a special topic or issue, offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in journalism).

JOUR401V Advanced Journalistic Practices (Sp, Fa) (1-4) Study of media and techniques of media in modern society, business, and communications. Influence opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR401V Advanced Journalistic Practices (Sp, Fa) (1-4) Study of media and techniques of media in modern society, business, and communications. Influence opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Junior standing and 2.25 overall grade point average.

JOUR405V Specialized Journalism Seminar (Irregular) (1-3) Primary purpose of course is to enlarge the journalistic skills of students interested in advanced forms of mass media. Includes authors from contemporary journalism. Emphasis given to concept presentation delivery, utilizing audio and visual techniques. Prerequisite: JOUR 4873. Credit May be repeated twice for a maximum of 6 hours credit, as content will vary.

JOUR4063 Computer-Assisted Publishing (Sp, Su, Fa) Indepth, hands-on experience in the design and production of mass media photographs. Includes basic photography and the computer's influence on design and conceptualization. Emphasizes different approaches required for different audiences and media. Prerequisite: JOUR 2332 and JOUR 2333L.

KINS1013 Careers in Kinesiology: A History and an Overview (Sp, Su, Fa) An introduction to the broad field of kinesiology, including historical aspects and career perspectives.

KINS2223 Motor Development (Sp, Fa) An overview of contemporary motor development and movement theory, developmental hierarchies, and physiological aspects of development throughout the lifespan.

KINS2383 Prevention and Care of Athletic Injuries (Sp, Fa) Introduction to the prevention and care of athletic related injuries. Includes athlete injury recognition and management. Prerequisite: BIOL 2443 and BIOL 2441L. KINS3093 Application in Athletic Training (Sp, Su) The purpose of this course is to help the student gain new and useful information of applying techniques of athletic injuries through taping and wrapping. Athletic taping wrapping and bandaging techniques can help in the reduction of athletic injuries and proper care once an injury occurs. This course has been designed to integrate personal experiences each student possesses with teaching based instructional training for taping and wrapping of the human body. Prerequisite: BIOL 2443 and BIOL 2441L.

KINS3153H Honors Exercise Physiology (Sp, Su, Fa) Examination of exercises on the physiology of the system of the body. The week of the exercise includes lectures dur- ing, immediately after, and as long term results of work and exercise. Prerequisite: BIOL 2213 and BIOL 2211L. (Same as KINS 3153A)
KINS1153 Exercise Physiology (Sp, Su, Fa) Examination of effects of exercise on the physiology of the systems of the human body; the session includes effects during, immediately after, and as long term results of work and exercise. Prerequisite: BIOL 2213 and BIOL 2211L (Same as KINS 3173).

KINS1153H Honors Exercise Physiology: Theory and Application Examination of the changes during childhood and a adolescence of physiological responses to exercise. The exploration includes the study of the maturation of the body’s functional capacities as it relates to exercise. Designed for Physical Education Teacher Education majors. Prerequisite: BIOL 2443 and BIOL 2441L and KINS 2223; for K-12 physical education majors only.

KINS1203 Exercise Physiology: Theory and Application (Sp, Su, Fa) Examination of the changes during childhood and a adolescence of physiological responses to exercise. The exploration includes the study of the maturation of the body’s functional capacities as it relates to exercise. Designed for Physical Education Teacher Education majors. Prerequisite: IBLK 2443 and IBLK 2441L and KINS 2223; for K-12 physical education majors only.

KINS3153 Mechanics of Human Movement (Sp, Su, Fa) An introduction to basic analysis of motor skills. No credit given toward major in Zoology. Prerequisite: BIOL 2443 and BIOL 2441L (Same as BIOL 3353,ZOOL 3353)

KINS3153H Honors Mechanics of Human Movement (Sp, Fa) The study of the fundamental principles of biomechanics as they relate to athletic performance. Prerequisite: KINS 3353 and KINS 3533.

KINS3173 Philosophical/Sociocultural Impact on Kinesiology (Sp, Fa) An investigation of the philosophically and sociocultural impact on Kinesiology.

KINS3413 Evaluative Techniques for Athletic Training (Sp, Su) Course will provide an in-depth examination of scientific methods that will enable the student to evaluate the athletic performance of the body's functional capacities as it relates to exercise. Prerequisite: KINS 3353 and KINS 3533.

KINS3413H Honors Evaluative Techniques for Athletic Training (Sp, Fa) Course will provide an in-depth examination of scientific methods that will enable the student to evaluate the athletic performance of the body's functional capacities as it relates to exercise. Prerequisite: KINS 3353 and KINS 3533.

KINS3663 Rehabilitation of Athletic Injury (Fa) A study of athletic injury rehabilitation principles involving the use of various therapeutic exercise protocols. Provides an opportunity to include additional rehabilitation programs. Prerequisite: KINS 2393.

KINS3703 Measurement Concepts in Kinesiology (Sp, Su, Fa) A presentation of basic measurement concepts concerning in the laboratory and non-laboratory settings. Prerequisite: KINS 3153.

KINS3733 Laboratory Techniques (Fa) Practical experience in testing physical fitness in both the laboratory and non-laboratory settings. Prerequisite: KINS 3153.

KINS3863 Research in Sport Psychology (Sp, Fa) The study of research problems. (Same as KINS 4833)

KINS4053 Exercise Applications for Special Populations (Sp, Su, Fa) The study of the effects of exercise, exercise training, and other stressors in special populations. Focuses on the physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: KINS 3353 and KINS 3533. (Same as KINS 4833)

KINS4833 Exercise Applications for Special Populations (Sp, Su, Fa) The study of the effects of exercise, exercise training, and other stressors in special populations. Focuses on the physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: KINS 3353 and KINS 3533. (Same as KINS 4833)

KINS4833H Exercise Applications for Special Populations (Sp, Su, Fa) The study of the effects of exercise, exercise training, and other stressors in special populations. Focuses on the physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: KINS 3353 and KINS 3533. (Same as KINS 4833)

KINS5212 Athletic Training Clinical I - Application of Athletic Preventive Devices (Odd years, Su) This course will serve as an introduction to the athletic training clinical program. Procedures and polices of this clinical program and application of athletic preventive devices will be included as well. Prerequisite: admission to the graduate program.

KINS5222 Athletic Training Clinical II - Evaluation Lab - Lower Extremity (Fa) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direction of a certified athletic trainer, and reinforce the evaluation skills of the lower extremities. Prerequisite: KINS 5212.

KINS5222H Athletic Training Clinical III - Evaluation - Upper Extremity (Sp) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of the upper extremities, head, neck, and posture. Prerequisite: KINS 5222.

KINS5242 Athletic Training Clinical IV - Emergency Procedures/Mobility Lab (Su) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direction of a certified athletic trainer, and reinforce the evaluation skills of the upper extremities, head, neck, and posture. Prerequisite: KINS 5222.

KINS5252 Athletic Training Clinical V – Rehabilitation Lab (Fa) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: KINS 5252.

KINS5252H Athletic Training Clinical V – Rehabilitation Lab (Fa) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: KINS 5252.

KINS5262 Athletic Training Clinical VI - Athletic Training Seminar (Sp) This course will serve as a process for monitoring student’s progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: KINS 5252.

KINS5323 Biomechanics I (Sp, Su, Fa) Intended to serve as an introduction to biomechanics and focuses on the fundamental principles involved in understanding and analyzing human motion.

KINS5333 Instrumentation in Biomechanics (Sp, Su, Fa) A detailed study of the tools and techniques necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: KINS 5323.

KINS5363 Evaluation Techniques of Athletic Injuries - Upper Extremity (Even years, Fa) Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: admission to graduate athletic training program.

KINS5373 Evaluation Techniques of Athletic Injuries - Lower Extremity (Even years, Sp) Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: admission to graduate athletic training program.

KINS5473 Medical Conditions in Athletic Training (Odd years, Su) Administrative components of athletic training programs. Emphasizes the importance of ethical, legal, and moralistic viewpoints of drug taking. Designed for Physical Education Teacher Education majors. Prerequisite: admission to the graduate athletic training program or permission of instructor.

KINS5513 Physiology Exercise I (Sp, Su, Fa) A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems.

KINS5523 Muscle Metabolism in Exercise (Sp) A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: KINS 5513 or equivalent.

KINS5533 Cardiac Rehabilitation Program (Sp, Su, Fa) An examination of the concepts, design, and implementation of cardiac rehabilitative programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions.

KINS5543 Cardiopulmonary Function in Exercise (Sp, Su, Fa) Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Prerequisite: KINS 5513 or equivalent.

KINS5593 Practicum in Laboratory Instrumentation (Sp, Su, Fa) Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantity physiological parameters, leading to the individualized exercise prescription.

KINS560V Workshop (Irregular) (1-3 credit hours) A presentation of basic measurement concepts and techniques relevant to specific hardcapping conditions in the adapted physical education setting.

KINS5643 Motor Learning (Sp, Su) Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletics; their drug taking habits and relevant psychological impact on performance. Prerequisite: KINS 5103.

KINS5753 Research in Sport Psychology (Sp) Investigation of historical and contemporary research in sport psychology. Prerequisite: HRKD 5353.

KINS5873 Prevention and Care of Injuries (Sp, Su, Fa) The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: ZOOL 2213 and ZOOL 2211L or equivalent.

KINS589V Independent Research (Sp, Su, Fa) (1-3 credit hours) A presentation of basic measurement concepts and techniques relevant to specific hardcapping conditions in the adapted physical education setting.

KINS5473 Thesis: Advanced Morphology and Physiology of the Human Body (1-3 credit hours) Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: ZOOL 2213 and ZOOL 2211L or equivalent.
Course Descriptions

LARC1003 Basic Course in the Arts: The American Landscape (Sp, Fa) Markings changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American ecological philosophy. Association of the functions of the natural and historic landscapes to the arts and the aesthetic importance of open space

LARC1211 Introduction to Landscape Architecture I (Su, Fa) Introduction to basic principles of design and the natural landscape. Urbanism and the public realm. Lecture 1 hour per week.

LARC1221 Introduction to Landscape Architecture II (Sp, Su) Theoretical, formal, and constructive principles and their impact in the design discipline, modernism and alteration. Introduction to the intellectual and philosophical foundations of landscape architecture. Lecture 1 hour per week. Corequisite: LARC 1211.

LARC1315 Landscape Architecture Design I (Su, Fa) Theory and craft of seeing, drawing, and model-building to record and communicate a design. Basic design principles with architectural and natural geometries are introduced and employed. Studio and lecture. Corequisite: LARC 1211.

LARC2225 Landscape Architecture Design II (Sp, Su) Basic concepts of spatial, visual and experiential analysis are used in the investigation and evaluation of designed landscapes. Introduction to three-dimensional spatial organization and sustainable design principles. Continued development and analysis of three-dimensional design problems. Emphasis on the integration of design informatics and the associated processes with design decisions.

LARC2232 Landscape Architecture Design III (Fa) Introduction to design process which responds to site and context. Reinforcement of design principles and organization systems applied to small scale design projects. Studio and lecture. Prerequisite: LARC 2221 and LARC 1325.

LARC2346 Landscape Architecture Design IV (Sp) (Formerly LARC 3345) Expansion of abilities to analyze existing conditions of site and develop methods for interpreting and translating those conditions into spatial design proposals. Emphasis on design form and the use of meaning and landscape narrative applied to increased scale projects within a larger or more complex context.

LARC2371 Landscape Architecture Construction I (Sp) (Formerly LARC 3371) Landscape architecture construction I (Sp) (Formerly LARC 3371) Emphasis on the process of planning and design in an urban setting. Introduction to the profession. Emphasis on design with an emphasis on grading, earthwork computations, and technical drawing. Emphasis on methods of organizing ideas in a creative, yet orderly, fashion. Emphasis on the process of planning and design in an urban setting.

LARC2714 Landscape Architecture Construction II (Sp) (Formerly LARC 3371) Landscape architecture construction II (Sp) (Formerly LARC 3371) Emphasis on the process of planning and design in an urban setting. Introduction to the profession. Emphasis on design with an emphasis on grading, earthwork computations, and technical drawing. Emphasis on methods of organizing ideas in a creative, yet orderly, fashion. Emphasis on the process of planning and design in an urban setting.

LARC300V Honors Special Studies (IR) (IR) Individual or group study and project related to landscape design, history and environmental analysis. Studio and lecture. Prerequisite: LARC 1221 (Irregular) (1-6) Individual or group study and project related to landscape design, history, and environmental analysis. Studio and lecture. Prerequisite: LARC 300V (IR) (1-6) Design development, study, practice, and preparation of working drawings.

LARC3356 Landscape Architecture Design V (Fa) (Formerly LAHL 3356) Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution of design with a detailed design component. Studio and lecture. Prerequisite: LARC 2113, LARC 2346 and LARC 2714; and acceptance into the program.

LARC3556H Honors Landscape Architecture Design VI (Sp) Investigation of ecological determinism, historic and contemporary planning, and sustainable design as distinct approaches to landscape architecture. Studio and lecture. Prerequisite: LARC 3356. Corequisite: LARC 3556.

LARC3665H Honors Landscape Architecture Design III (Sp) (Formerly LARC 4365) Investigation of ecological determinism, historic and contemporary planning, and sustainable design as distinct approaches to landscape architecture. Studio and lecture. Prerequisite: LARC 3556.

LARC3413H Honors History of Landscape Architecture (Fa) Analysis of the interaction between existing landscapes and human cultural development as reflected in the meaning and organization of landscape designs at community and project scales from the Neolithic period to the mid-nineteenth century. (Same as LARC 3413)

LARC3413 History of Landscape Architecture (Fa) Analysis of the interaction between existing landscapes and human cultural development as reflected in the meaning and organization of landscape designs at community and project scales from the Neolithic period to the mid-nineteenth century. (Same as LARC 3413)

LARC3723 Landscape Construction II (Fa) (Formerly LARC 3723) Design and construction of landscape elements within the existing environment. Introduction to landscape construction details, and other working drawings. Includes laboratory.

LARC3734H Honors Landscape Architecture Construction III (Sp) (Structures) Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drafting production. Lecture and laboratory. Prerequisite: LARC 3723. (Same as LARC 3734).

LARC3734 Landscape Architecture Construction III (Sp) (Structures) Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drafting production. Lecture and laboratory. Prerequisite: LARC 3723. (Same as LARC 3734).

LARC3821 Study Abroad Preparation (Sp) Orientation to the geography, history, and culture of the countries in which to study. Studio and lecture. Prerequisite: LARC 3821.

LARC3914 Planting Design I (Sp) Introduction to small scale projects involving use of plant materials in relation to other landscape elements, formulation of a vocabulary of plant materials, and design of planting plans and applicable specifications. Includes laboratory. Prerequisite: HORT 3103.

LARC3924 Ecological Design (Irregular) Continuation of LARC 3914 emphasizing a change in scale of projects to include medium and large scale projects, and increasing complexity in dealing with more complicated and advanced design concepts and sustainable design includes laboratory. Prerequisite: LARC 3914 and HORT 3103.

LARC3933 Cultural Landscape Studies (Su) The examination of landscape forms, and their historic and evol-utionary development. Includes a study of world, regional, and site context influences. Required field trip component of study abroad. Prerequisite: LARC 3913 and LACH 3921.

LARC4123 Urban Form Studies (Su) The examination of the interaction between existing landscapes and human cultural development as reflected in the meaning and organization of landscape designs at community and project scales from the Neolithic period to the mid-nineteenth century. (Same as LARC 3413)

LARC4378H Honors Landscape Architecture Design VII (Fa) Synthesis of all previous course work; an introduction to the theory and practice of larger scale planning with an emphasis on design of systems in urbanizing environments, studio and lecture. Prerequisite: LARC 3913 and LARC 4413. (Same as LARC 4378)

LARC4376 Landscape Architecture Design VII (Fa) (Formerly LARC 4376) Synthesis of all previous course work; an introduction to the theory and practice of larger scale planning with an emphasis on design of systems in urbanizing environments, studio and lecture. Prerequisite: LARC 3913 and LARC 4413. (Same as LARC 4376)

LARC4383H Seniors Project Preparation (Sp) Design and planning of personally selected design project. Requires full documentation of topi-cal research, program development, site data collection, site analysis, and site project base maps. Studio and lecture. Prerequisite: LARC 3767. (Same as LARC 4383)

LARC4383 Seniors Project Preparation (Sp) Design and planning of personally selected design project. Requires full documentation of topical research, program development, site data collection, site analysis, and site project base maps. Studio and lecture. Prerequisite: LARC 3767. (Same as LARC 4383)

LARC4413H Contemporary Landscape Architecture (Fa) Critical study and analysis of landscape architecture from mid-nineteenth century to the present. Emphasis on the philosophical and design theories that have influenced the form of gardens, parks, and cities. (Same as LARC 4413)

LARC4413 Contemporary Landscape Architecture (Fa) Critical study and analysis of landscape architecture from mid-nineteenth century to the present. Emphasis on the philosophical and design theories that have influenced the form of gardens, parks, and cities.

LARC4714H Honors Landscape Architecture Construction IV (Fa) (Systems) Introduction to systems of landscape architectural construction including stormwater management, lighting, irrigation, water features, and erosion control. Emphasis on an advanced understanding of landscape architecture and sustainable design concepts. Significant integration of computer generated drawings, lecture and laboratory. Prerequisite: LARC 3714.

LARC4714 Landscape Architecture Construction IV (Fa) (Systems) Introduction to systems of landscape architectural construction including stormwater management, lighting, irrigation, water features, and erosion control. Emphasis on an advanced understanding of landscape architecture and sustainable design concepts. Significant integration of computer generated drawings, lecture and laboratory. Prerequisite: LARC 4714.

LARC4724 Site Planning for Non-Landscape Architects (Irregular) Synthesis of landscape systems and spatial elements used in landscape design with an emphasis on grading and drainage and the relationship of structure to site. Lecture and laboratory 6 hours per week.

LARC5043 Landscape Architecture Seminar (Irregular) The role of the landscape architect in contemporary society; how this is affected by technological change and awareness of ecological problems. Group discussions, individual research projects, and guest lectures. Prerequisite:
critical study of Catullus in translation and secondary works. Prerequisite: LATN 3003 or equivalent. (Same as LATN 3013)

LATN3003 Virgil (Sp) Selections from the Aeneid and/or the Metamorphoses, and an introduction to the Roman literary history through the critical study of these works in translation and secondary works. Prerequisite: LATN 3003 or equivalent.

LATN3013 Caesar (Sp) Selected readings from Caesar’s commentaries on Gallic or Civil Wars, and an overview of the political and military history through the critical study of the Aeneid in translation and secondary works. Prerequisite: LATN 3003 or equivalent.

LATN3036 Intensive Elementary Latin Reading (Su, IR) Overview of Roman grammar, vocabulary and syntax, leading to more advanced works. Prerequisite: LATN 3003 or equivalent.

LATN4035 Roman Satire (Irregular) Selections from the satire of Horace, Juvenal, Persius, or Seneca. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4036 Roman Drama (Irregular) Selections from Plautus, Terence, or Seneca. An overview of Roman theater through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4037 Roman Novels (Irregular) Selections from Petronius or Apeleius. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4038 Roman Oratory (Irregular) Selections from the orations and theoretical works of Cicero, Seneca the Elder, or Quintilian. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4039 Roman Philosophy (Irregular) Selections from the philosophical works of Cicero or Seneca. An overview of Roman philosophy through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4153 Roman Narrative Epic (Irregular) Selections from Virgil, Ovid, Lucan, Statius, or Silius Italicus. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN4156 Special Investigations (Irregular) (1-6) Historical, political, and legal studies of ancient Latin literature. Prerequisite: LATN 2013 or equivalent.
Course Descriptions

LAWW4173 Criminal Procedure (Sp, Su, Fa)
Concerned with the legal steps through which a criminal pro-
cceeding passes, commencing with the initial investigation of a
crime, and concluding with the release of the defendant. Does not
deal exclusively with constitutional problems, although consi-
terable time is spent on them. Recent Supreme Court de-
cisions receive special emphasis. Criminal Procedure does not
deal with the investigation or relations with many of the other
topics problems relating to the introduction of evidence at the trial.

LAWW4203 Civil Procedure II (Sp, Su, Fa)
Study of the process of civil litigations from such preliminary matters
as court selection and jurisdiction to appeal and collateral
attack of final judgments. Some attempt is given to cover the
antecedents of modern procedure; and where appropriate,
suggestions for reform are developed in class discussion.
Emphasis is on the Federal Rules of Civil Procedure and
on code pleading and common law procedure used in state
court systems.

LAWW4294 Business Organizations (Sp, Su, Fa)
Course is constructed around different forms of business
organizations, with emphasis on agency and partnership law,
and corporation law.

LAWW4442 Law & Accounting (Irregular)
Study of basic legal principles in a number of specialized areas
engaged in business related activities. Topics covered include
the fundamental accounting equation, the nature of accrual
accounting, understanding financial statements, and account-
thing for income taxes. Also a review of basic concepts associated
with financial statement analysis and valuation principles.
Intended for students with little or no business
training, and may not be applicable for credit by students who
have pursued more than 6 or more hours of undergraduate or
graduate credit in accounting courses.

LAWW4993 Pre-Practice Trial (Sp, Su, Fa)
Develops fundamental lawyer’s skills using role-play in a simulated
experience. Emphasis is on framing and presentation skills and
critical thinking. Emphasis is on the development of legal
reasoning, and practical knowledge and application.

LAWW500V Special Topics (Sp, Su, Fa) (1-18)
Included under this heading will be a variety of one-credit
courses dealing with agricultural law topics not included else-
where in the curriculum. Most of the Special Topics courses will
be taught by agricultural law experts and scholars from
around the nation, and sometimes from other countries.

LAWW5103 Professional Responsibility (Sp, Su, Fa)
Hole of the lawyer as counselor, advocate, and public
serving; obligation to society of the individual lawyer and the
profession as a whole; ethical problems of the profession;
representation of clients in multiple cases; conflicts of interest;
ethics; attorneys’ obligations to their clients; lawyer and the press;
the lawyer in public service; the topics of law office
management.

LAWW5203 Remedies (Sp, Su, Fa)
Covers equity (jurisdiction and powers of courts of equity, injunctions,
including adequacy of legal remedies, balancing of equities,
interests protected, and defenses), damages (compensatory, exemplary, and nominal damages; direct and consequential
damages; mitigation; special application in contract and tort
actions) and restitution (relief afforded by the judicial process,
to prevent unjust enrichment of benefits).

LAWW5204 Remedies (Sp, Su, Fa)
Covers equity (jurisdiction and powers of courts of equity, injunctions,
including adequacy of legal remedies, balancing of equities,
interests protected, and defenses), damages (compensatory, exemplary, and nominal damages; direct and consequential
damages; mitigation; special application in contract and tort
actions) and restitution (relief afforded by the judicial process,
to prevent unjust enrichment of benefits).

LAWW5213 Business Planning (Sp, Su, Fa)
Basic introduction to selected areas of the law applicable to
business organizations to provide guidance in choosing form and
the way these problems might be avoided or mitigated through proper planning.

LAWW5262 Administrative Law (Sp, Su, Fa)
Course is constructed around Federal materials, but with
some state references. Considers the origin and constitu-
tional basis for the administrative process, role of the agency
and the courts in judicial review, legislative and executive power.

LAWW5282 Products Liability (Sp, Su, Fa)
A course in advanced tort law and litigation. Coverage includes
topics of product defect (manufacturing, marketing, and
design defects), proof of causation, damages, federal pre-
emption of state-law claims, and special features relating
to corporate liability. Course requirements typically may be
fulfilled by either a paper or an examination.

LAWW5302 International and Domestic Sales and Leasing (Sp, Su, Fa)
Study of Articles 2 and 2A of the Uniform Commercial Code and the International
Conventions on Contracts for the International Sale of Goods
(Incoterms 2010). Course requires the completion of the Code
and a basic understanding of the Code as well. Students who
have previously earned 6 or more hours of undergraduate or
graduate credit in accounting courses.

LAWW5303 International and Domestic Sales (Sp, Su, Fa)
Study of the theory of compulsory education, constitutional rights of
children, and special liability provisions relating to the education
process.

LAWW5304 Uniform Commercial Code (Sp, Su, Fa)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.

LAWW5382 Remedies of Unsecured Creditors (Sp, Su, Fa)
Emphasis on statutory, regulatory, and statutory remedies
for general creditors (pre- and post-judgment), including provi-
sional writs, statutory liens, and the process of prosecution.
Includes rights of debtors whose property is the object of
a general creditor’s remedies.

LAWW5402 Election Law (IR) (1-3)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.

LAWW5410 Domestic Relations (Sp, Su, Fa)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.

LAWW5501 Decedents’ Estates (Sp, Su, Fa)
Study of the legal principles dealing with taxation and form of
business organization in choosing form and

LAWW5504 December’s Estates (Sp, Su, Fa)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.

LAWW5505 December’s Estates (Sp, Su, Fa) (3-4)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.

LAWW5506 Trusts (Sp, Su, Fa)
A basic focus on corporation law including the process of organization of the
corporation, distribution of corporate powers, duties, and liabilities of officers, directors and shareholders, issuance of shares, dividends, and other aspects of the internal affairs of the business.
LAWW5513 Labor Relations in the Private Sector
(Sp, Su, Fa) The right to organize; organization of labor unions; collective bargaining; collective agreements and their enforcement; unfair labor practices by employers and by unions; the union member and his union; state labor relations legislation; the National Labor Relations Board and its investigation and hearing powers; mediation and arbitration; jurisdiction; and the remedies of unsuccessful creators.

LAWW6003 Law and Medicine
(Sp, Su, Fa) An examination in the role of the law in determining access to and the quality of the services provided by the health care industry. Principles and processes involved in medical malpractice litigation and alternative forms of dispute resolution will be a central concern. Attention will be given to the analysis of the rights of physicians in diverse contexts, including staff privileges, peer review, and countersuits. Selected current consumer problems will be discussed among them, patient's rights to medical records, the functions of state medical boards, barriers to informed consent, and the impact of government cost-containment programs upon the poor and elderly.

LAWW6013 Alternative Dispute Resolution
(Sp, Su, Fa, Fs) Topics include forms of litigation for resolving various types of disputes. The alternatives considered include negotiation, mediation and conciliation, arbitration, "rent-a-judge," and other special procedures. Areas of application include tort disputes, community problems, labor relations, and medical practice controversies. This course will satisfy the skills requirement.

LAWW620V Independent Legal Research
(Sp, Su, Fa) (1-3) Research conducted under the supervision of faculty members. Ordinarily a student may not accumulate more than two semester hours of credit for Independent Legal Research. This cumulative maximum may be exceeded only by special permission of the dean, who in exceptional circumstances may approve a cumulative maximum of three semester hours of credit for Independent Legal Research.

LAWW630V Federal Jurisdiction
(Sp, Su, Fa) (1-3) Topics include federal jurisdictional issues in the district court and circuit courts, venue jurisdiction, limitations and exceptions to venue jurisdiction, removal jurisdiction, and the supervision of appeals. This course is a seminar format.

LAWW6042 Children and the Law
(IR) Topics include children as legal persons, including minors' rights to expression under the First Amendment and their participation in decision-making in legal contexts; children's rights and school authority, including constitutional issues in school discipline and religious accommodation; foster care; termination of parental rights; and adoption.

LAWW6043 Corporate Finance
(Sp, Su, Fa) Study of the important legal issues that affect the elderly. Areas of investigation include: aging patterns and statistical profiles of the elderly; the right of the elderly to benefits; age discrimination in employment; health care financing; health care decision-making; abuse; and guardianship and conservatorship. This course also cover unenrolled academic credit, to be awarded in the spring semester of the student's third year in law school, upon completion of duties for the fall and spring semesters.

LAWW6152 Elder Law Seminar
(Sp, Su, Fa) (1-3) Members of the Board of Advocates may receive ungraded academic credit, to be awarded in the spring semester of the student's third year in law school, upon completion of duties for the fall and spring semesters.

LAWW6153 Elder Law
(Sp, Su, Fa) A survey of important legal issues that affect the elderly. Areas of investigation include: aging patterns and statistical profiles of the elderly; the right of the elderly to benefits; age discrimination in employment; health care financing; health care decision-making; abuse; and guardianship and conservatorship. This course also cover unenrolled academic credit, to be awarded in the spring semester of the student's third year in law school, upon completion of duties for the fall and spring semesters.

LAWW616V Labor Law Review Seminar
(Sp, Su, Fa) (1-4)

LAWW6173 Future Interests
(Sp, Su, Fa, Fs)

LAWW6182 Advanced Torts: Dignitary and Economic Harm
(Sp, Su, Fa, Fs)

LAWW6192 Workers’ Compensation
(Sp, Su, Fa) Study of state legislation providing remedies for workers injured in the course of their employment. Not offered every year.

LAWW6193 Social Legislation
(Sp, Su, Fa) Examination of the various statutes (exclusive of the employment discrimination laws) governing the rights and responsibilities of employees in their state of employment, including the regulation and enforcement of employment practices, and the payment of wages.

LAWW6203 Trial Advocacy
(Sp, Su, Fa) An introduction to litigation trends, processes, and skills training through simulated exercises and the conduct of a mock trial. This course will satisfy the skills requirement.

LAWW6213 Product Liability
(Sp, Su, Fa) An intensive study of the theories of product liability; the concepts of product and defect; potential defendants; defenses; problems of proof and causation.

LAWW6233 Federal Income Tax of Individuals
(Sp, Su, Fa) Fundamentals of the federal income tax of individuals. Topics covered include gross income, deductions, assignments of income, basis, taxation of property transactions, and tax accounting.

LAWW6243 Federal Estate and Gift Taxation
(Sp, Su, Fa) Fundamentals of the federal estate and gift transfer tax system. Topics covered include the determination of gifts for tax purposes, amounts includable in decedents' gross estates, valuation, deductions and credits.

LAWW6253 Federal Income Taxation of Business Entities
(Sp, Su, Fa) Focus on tax issues in business organization, formation, operations, distributions, and liquidations.

LAWW6272 Federal Income Taxation of Trusts and Estates
(Sp, Su, Fa) Federal income taxation of simple and complex trusts, decedents' estates, and grantor trusts. Topics include determinations of estate and trust income, allocations of income, grantor trust rules, and income in respect of a decedent.

LAWW6283 Family Law Topics
(IR) Focus is on areas of current concern and issues that are emerging in family law, such as the regulation and effects of divorce, abortion, and surrogacy. Critical examination of the various theories of the family and its inter-connection with other economic and social institutions.

LAWW6293 Advanced Corporations
(Sp, Su, Fa) In-depth analysis of the Federal income tax of individuals. Topics covered include gross income, deductions, assignments of income, basis, taxation of property transactions, and tax accounting.
Course Descriptions

Circuit and Chancery Courts, federal bankruptcy or administrative cases pending before the U.S. Bankruptcy Court and Administration, and representation and prosecution of criminal misdemeanor cases. Students are responsible for all aspects of representation including interviewing, counseling, negotiation, pleading and discovery practice, and trial advocacy. This course offers an opportunity to experience counseling and representing non-profit organizations serving Northwest Arkansas in a wide range of non- litigation business law matters. Services include startup, incorporation, obtaining federal and state tax exemptions, change of business form, purchase and lease of real and personal property, employment, labor law issues, and general contract negotiation, drafting and execution. In addition, students prepare and participate as presenters in a workshop on matters of general interest to non-profit organizations. Legal Clinic Faculty supervise and review the student attorneys work, and provide personal feedback to the individual student attorneys. Prerequisite: qualification by interview.

LAW W4043 Land Use (Sp, Su, F) Covers public land use controls such as zoning, subdivision regulations, and eminent domain (including private property rights, takings, and inverse condemnation). Heavy emphasis is placed on planning at state and local levels.

LAW W411V Higher Education and Law Seminar (Sp, Su, Fa) (2-3) A detailed examination of legal issues arising from the operation of college and university instruction, research, and service; emphasis on rights and responsibilities of students and faculty, higher education policy.

LAW W423 Tax Policy (Sp, Su, F) Study of tax policy through examination of existing federal income and transfer tax systems. Economic, political, and social consequences of existing tax laws and alternatives are considered.

LAW W442 Legal History (Sp, Su, F) Investigation and development of English and American legal institutions and doctrines.

LAW W443 Legal History (Sp, Su, F) Investigation of English and American legal institutions and doctrines with emphasis on early American (colonial) and 19th Century developments in the law.

LAW W473 Legal Clinic (Criminal Prosecution) (Sp) Students in this course will have the opportunity to extend and refine their lawyering skills, knowledge of substantive law, and mastery of criminal procedure through prosecution of misdemeanor crimes on behalf of the State of the State of Arkansas. Counsel is fully responsible for the students assigned to them. Their responsibilities include assessing the charges and investigation of law enforcement, interviewing witnesses, conducting discovery, evaluating cases for an agreed position, negotiating with defense counsel and pro se defendants, responding to suppression and other defense motions, trial preparation, and trying cases to the court. The preparation and performance of student attorneys is supervised by clinic faculty who provide personal feedback to the individual students. Prerequisite: Unless waived by the instructor, prerequisites for taking the course shall be satisfactory completion of 48 semester hours of offerings, including Civil Procedure I, Civil Procedure II, Criminal Law, Criminal Procedure, Evidence, and Professional Responsibility; and qualifying for Rule XV practice.

LAW W5033 Clinical (Criminal) (Sp, Su, F) Study of immigration and nationality, including exclusion and deportation; political asylum and refugee status; visa allocation and refugee experience under the provisions of the law; and naturalization and citizenship. It is recommended that Administrative Law be taken first.

LAW W5253 Employment Law (Sp, Su, F) An overview of the various aspects of the employer/employee relationship, both statutory and common law. Covers the establishment and parameters of employment, the security of the worker, employer’s rights, terminations.

LAW W5022 Intellectual Property (Sp, Su, F) Principles of international law involving relations among government. The function of international tribunals and organizations.

LAW W5613 Bankruptcy (Sp, Su, F) Study of insolvency law, with particular emphasis on federal bankruptcy law.

LAW W5623 Sentencing and Post-Conviction Remedies (Sp, Su, F) Law, theory, and practice of sentenc- and post-conviction remedies.

LAW W5653 American Indian Law (Sp, Su, F) Study of American Indian law, with emphasis on Native American tribes and their general law. Prerequisites: Cum GPA of 2.0, successful completion of 48 semester hours of offerings, including Criminal Law, Criminal Procedure, and Environmental and Natural Resources Law.

LAW W5702 Copyright Law (Sp, Su, F) The nature of the rights, acquisition, enforcement, and property character of the copyright. Emphasis is placed on the general legal principles embodied in the Copyright Act, but attention is also given to the Lanham Act and related state law doctrines. Attention is also given to the technical and formal provisions of the Copyright Act.

LAW W6713 Judicial Externship (Sp, Su, F) Students in this course will have the opportunity to work with a supervising attorney in a corporate counsel's office. Each extern works 16 hours per week (average minimum) and attends at least 3 times with the faculty supervisor.

LAW W6831 Corporate Counsel Externship (Sp, Su, F) Students work with a supervising attorney in a corporate counsel's office. Each extern works 16 hours per week (average minimum) and meets at least 3 times with the faculty supervisor. Prerequisites: LAW 4239, LAW 5013 and approval of the faculty supervisor; recommended: LAW 5223.

LAW W6822 Patent Law (Sp, Su, F) Study of the patent system of the United States, including conditions for a valid patent, procedures of the patent office, and litigation relating to patents, not offered every year.

LAW W6883 Law and Education (Sp, Su, F) Externs work with a supervising attorney in a corporate counsel's office. Each extern works 16 hours per week (average minimum) and meets at least 3 times with the faculty supervisor.

LAW W6903 ADR in the Workplace (Sp, Su, F) Examines procedural and substantive law in the context of alternative dispute resolution to reduce the employment disputes. The primary focus will be on the analysis of collective bargaining agreements and individual employment contracts through arbitration and the use of arbitration to resolve statutory issues such as claims of employment discrimination, wills of employment requests. Students will be required to conduct a research paper in which they discuss several topics of the criminal justice system. The seminar component provides time for the student to reflect and self-evaluate their work. Prerequisite: LAW 4873 and Rule XV qualification.

LAW W7043 Entertainment and Sports Law (Sp, Su, F) Survey of important legal issues arising in the sports and entertainment industries. Topics include negotia- tion, copyright, representation of athletes and entertainers, labor law issues, communications law, antitrust and other emerging areas of law. Not offered every year.

LAW W7053 Prosecution Externship (Irregular) Students will be assigned to the Prosecutors office for approximately ten (10) hours each week handling three (3) to four (4) felony cases as well as conducting arrang- ing, citizen intake, probable cause hearings, and evaluat- ing requests for arraignments. Students will also be required to attend conferences in which they discuss various aspects of the criminal justice system. The seminar component provides time for the student to reflect and self-evaluate their work. Prerequisite: LAW 4873 and Rule XV qualification.

LAW W70963 Legal Clinic (Criminal Defense) (Sp, Su, F) Students develop skills by representing actual clients with misdemeanor offenses in the Fayetteville Municipal Court and nearby counties and clients charged with felonies and mis- demeanor in Washington County Juvenile Court. Students interview clients, counsel them, negotiate, and litigate. The Legal Clinic faculty supervise students who conduct client interviews, do legal research, and provide personal feedback to individual students.

LAW W70982 Law & Psychiatry (Sp, Su, F) Law W70983 Mental Health Services and the Law (Sp, Su, F) Study of topics arising out of the intersection between law and mental health. Topics will vary from semester to semester, but will usually include the legal duties and liabilities of mental health professionals, access to mental health services, evidentiary issues relating to criminal law (including criminal responsibility and sentenc- ing), civil commitment, and competency in both the civil and criminal systems.

LAW W70934 Arkansas Criminal Practice, Procedure and Policy (Sp, Su, F) Advanced study of the process of criminal law. Administration of criminal justice through police, prosecutorial, sentencing and penological discretion.

LAW W70922 Bioethics and Law (Sp, Su, F) A lim- ited-enrollment seminar focusing on issues in law, medicine, and ethics. Coverage includes problems of human reproduction and birth (abortion, in vitro fertilization, and surrogacy); discrimination; rights of the mentally ill; and the allocation of organs for transplant; and life-physician-assisted suicide). A research paper is required.

LAW W70712 Juvenile Justice Seminar (Sp, Su, F) Examination of the emerging role of juvenile justice court. Special attention is given to alternative ways of dealing with two categories of juveniles, i.e., status offenders who are under the jurisdiction of the court although not accused of criminal conduct, and youthful offenders who commit seri- ous crimes.

LAW W70732 Criminal Justice Seminar (Sp, Su, F) A study of the theories and practices relating to criminal legislation and incarceration.

LAW W70743 Entertainment and Sports Law (Sp, Su, F) Survey of important legal issues arising in the sports and entertainment industries. Topics include negotia- tion, copyright, representation of athletes and entertainers, labor law issues, communications law, antitrust and other emerging areas of law. Not offered every year.

LAW W70753 Prosecution Externship (Irregular) Students will be assigned to the Prosecutors office for approximately ten (10) hours each week handling three (3) to four (4) felony cases as well as conducting arrang- ing, citizen intake, probable cause hearings, and evaluat- ing requests for arraignments. Students will also be required to attend conferences in which they discuss various aspects of the criminal justice system. The seminar component provides time for the student to reflect and self-evaluate their work. Prerequisite: LAW 4873 and Rule XV qualification.

LAW W7076V Sports Law (Irregular) (2-3) The major topics covered include significant contract issues, tort liability involving participants, institutions, physicians and equipment manufacturers, criminal liability, drug testing, constitutional and related issues dealing with sports associations and Title 9 and gender equity issues. Other relevant topics may also be covered in the seminar.

LAW W7073 Mediation in Practice (Irregular) This three-credit course will train students to mediate disputes assigned to the Northwest Arkansas Durable-Need/Family Mediation Program. Students will be assigned disputes assigned to the Northwest Arkansas Durable-Need/Family Mediation Program. In the first five weeks of the externship the externs will be instructed on basic mediation theory, procedures, and ethical constraints; communication techniques; juvenile law; mediation of the child welfare system in Arkansas. This training will include lectures, discussion, and simulation exercises. In the remaining weeks of the semester, students will receive additional information and simulation practice, and will also observe and participate in the mediation of actual cases assigned to the Project.

LAW W70783 Public Lands Law (Sp, Su, F) The law governing the use of federal lands and resources. Resources surveyed are watered, mineral, forests, range, wildlife, and others in their artistic and intellectual creations. Emphasis is placed on the general legal principles embodied in the Copyright Act, but attention is also given to the Lanham Act and related state law doctrines. Attention is also given to the technical and formal provisions of the Copyright Act.

LAW W6713 Judicial Externship (Sp, Su, F) Student works the equivalent of 16 hours per week dur- ing the semester under the direct supervision of a judge appointed by the United States magistrate to maintain law and order in the courtroom. The student will work on assigned cases, doing research, prepar- ing memoranda, and when feasible, attending conferences with counsel conducted by the judge. Only third year students may enroll in this course.

LAW W6722 Terrorism, National Security and Human Rights (Irregular) International law international law issues relating to protection of human rights. Research papers will be given substantial credit.

LAW W6803 Comparative Law (Sp, Su, F) Study of legal systems and legal institutions in other countries, particularly civil law jurisdictions and socialist nations. Not offered every year.

LAW W6813 Corporate Counsel Externship (Sp, Su, F) Externs work with a supervising attorney in a corporate counsel's office. Each extern works 16 hours per week (average minimum) and meets at least 3 times with the faculty supervisor. Prerequisites: LAW 4239, LAW 5013 and approval of the faculty supervisor; recommended: LAW 5223.

LAW W6822 Patent Law (Sp, Su, F) Study of the patent system of the United States, including conditions for a valid patent, procedures of the patent office, and litigation relating to patents, not offered every year.
recreation and wilderness. Issues involve both private rights and public interest in common property.

LAWW 7752 Agricultural Law (Sp, Su, Fa) Study of the legal issues surrounding the financ-
ing of agricultural inputs, operations, and marketing, and the legal aspects of agricultural security issues under the Uniform Commercial Code, and debt restructuring opportunities. Special focus is on lending options offered by the Farm Service Agency and other federal and state agencies. Study of the federal laws that govern the employment of agri-
cultural workers, including wage and hour provisions, laws impacting migrant and seasonal farm workers, immigration issues, occupational safety and health, and labor laws.

LAWW 7783 Agricultural Administrative Procedure and Practice (Sp, Su, Fa) focus on administrative practice before the USDA and the judicial review of USDA actions involving the federal domestic com-
modities programs, federal crop insurance, the Packers and Stockyards Act, the Hershite Agricultural Commodities Act, and federal marketing Orders.

LAWW 7787 Agricultural Law Seminar (Sp, Su, Fa) (1-2) Intensive coverage of a specialized topic in agri-
cultural law not covered in any existing law course. For LL.M. students only.

LAWW 7788 Comparative Law Seminar (Sp, Su, Fa) A study of selected foreign legal systems with a focus on the basic differences between those legal institutions and the Anglo-American common law system.

LAWW 7802 Comparative Law Seminar (Sp, Su, Fa) An examination of special problems in the area of civil rights and civil liberties law. Coverage will vary, with the focus on an advanced understanding of constitutional guar-
antees in areas such as freedom of expression, religion, and state, substantive and procedural due process, specialized approaches to the protection of discrete or insular groups within the society and other related problems. Not offered every year.

LAWW 7822 Corporate Practice Ethics (Irregular) The study, preparation, and/or review of materials, docu-
ments, and matters frequently encountered in the organiza-
tion, operation, and sale or other disposition of both public and private corporations.

LAWW 7833 Corporate Acquisitions (Sp, Su, Fa) Corporate acquisitions, divestitures and takeovers; corporate law aspects of buying, selling, and merging businesses with emphasis on federal and state securities law requirements, antitrust considerations, and other general business and management considerations.

LAWW 7843 Supreme Court Seminar (Sp, Su, Fa) An examination of the unique role and responsibilities of the Supreme Court of the United States, including its jurisdiction and procedures, theories of judicial review, and the political and policy making roles of the Court.

LAWW 7852 Forestry Law and Policy (Sp, Su, Fa) Introduces legal and policy problems associated both with public and private forest and rangeland holdings, including a brief history of the public timber and range resource; federal timber policy; modern forest management; the legal aspects of timber harvesting; legal aspects of management and control of agricultural and natural resources, including water rights; and Federal law and the environment.

LAWW 7853 Agriculture and the Environment (Sp, Su, Fa) Study of the law governing the organization and operation of the USDA, the judicial review of administrative actions and decisions of the USDA, and the legal aspects of antitrust and securities law applicable to agricul-
tural cooperatives.

LAWW 7873 Agriculture and the Environment (Sp, Su, Fa) Focus on the specific provisions of the Internal Revenue Code relating to farmers and ranchers; accounting methods; tax “shelters;” deferred payment contracts, depreciation of farm assets, Commodities trading, business associations in agriculture; unique problems in farm estate and business planning.

LAWW 7892 Commodities Trading and Regulation (Sp, Su, Fa) Federal regulation of commodities trading with an emphasis upon the rules of the Commodities Futures
MATH003 Beginning and Intermediate Algebra (Sp, Su, Fa) For students who have inadequate prepara-
tion for taking MATH 1203. Credit earned in this course may not be applied to the total required for a degree. (Same as MATH 003,MATH 1033)

MATH1203 College Algebra (Sp, Su, Fa) Credit will be allowed for only one of MATH 1203 and MATH 2103 or MATH 285. (Same as MATH 1033) Prerequisite: MATH 003 with a grade of C or better or an ACT score of 20 or greater with E/A subscore of 10 or greater.

MATH1203 Plane Trigonometry (Sp, Su, Fa) Credit will be allowed for only one of MATH 1203 or MATH 1213 and MATH 2103 or MATH 285. (Same as MATH 1033) Prerequisite: MATH 003 with a grade of C or better or an ACT score of 20 or greater with E/A subscore of 10 or greater.

MATH1285 Precalculus Mathematics (Sp, Su, Fa) Selected topics in elementary calculus and analytic geometry for students in business, agriculture, and social sciences. Credit will be allowed for only one of MATH 1203, MATH 1213, and MATH 1285. Prerequisite: MATH 003 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater.

MATH2034 Survey of Calculus (Sp, Su, Fa) Selected topics in elementary calculus and analytic geometry for students in business, agriculture, and social sciences. Credit will be allowed for only one of MATH 2043 and MATH 2554. Prerequisite: MATH 1203 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater.

MATH2035 Honors Finite Mathematics (Sp, Su, Fa) (Same as MATH 2033)

MATH2053C Finite Mathematics (Sp, Fa) Same as 2053 except taught with a two-day-per-week lecture and one-day-per-week drill. Corequisite: Unit component. Prerequisite: MATH 1203 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater. (Same as MATH 2053,MATH 2053H,MATH 2053S)

MATH2053 Finite Mathematics (Sp, Su, Fa) Selected topics in probability, vectors and matrices, linear programming. Terminal course for students in business, agriculture, and social sciences. This course will not prepare students to take other mathematics courses. Prerequisite: MATH 1203 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater. (Same as MATH 2053,MATH 2053H,MATH 2053S)

MATH2053H Honors Finite Mathematics (Sp, Su, Fa) (Same as MATH 2033)

MATH2053C Finite Mathematics (Sp, Fa) Same as 2053 except taught with a two-day-per-week lecture and one-day-per-week drill. Corequisite: Unit component. Prerequisite: MATH 1203 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater. (Same as MATH 2053,MATH 2053H,MATH 2053S)

MATH2053 Finite Mathematics (Sp, Su, Fa) Selected topics in probability, vectors and matrices, linear programming. Terminal course for students in business, agriculture, and social sciences. This course will not prepare students to take other mathematics courses. Prerequisite: MATH 1203 with a grade of C or better or an ACT score of 23 or greater with E/A subscore of 13 or greater and A/G subscore of 6 or greater. (Same as MATH 2053,MATH 2053H,MATH 2053S)
MBAD5013 MBA Foundations I (Su) A focus on leadership, teamwork, process improvement, and communication, in association with business content, in the areas of information technology, quantitative analysis, marketing management, and managing people and the organization. Corequisite: MBA 5023. Prerequisite: Admission to the M.B.A. program and satisfactory completion of the M.B.A. preparation work.

MBAD5023 MBA Foundations II (Su) A focus on leadership, teamwork, process improvement, and communication, in association with business content in the areas of financial and economic analysis and production and operations management. Corequisite: MBA 5013. Prerequisite: MBA 5023. Prerequisite: Admission to the M.B.A. program and satisfactory completion of the M.B.A. preparation work.

MBAD5112 Information Technology and Decision Making (Fa) (2-3) Utilization of information, quantitative techniques, and computer application in decision making and problem solving within business environment. Corequisite: MBAD 5112 and MBAD 5222. Prerequisite: MBAD 5122 and MBAD 5212 and MBAD 5232.

MBAD513V Information Technology and Decision Making (Fa) (2-3) Utilization of information, quantitative techniques, and computer application in decision making and problem solving within business environment. Corequisite: MBAD 5112 and MBAD 5222. Prerequisite: MBAD 5122 and MBAD 5212 and MBAD 5232.

MBAD514V Leading High Performance Organizations (Sp, Fa) (2-3) Managing a global workforce, including human resource issues, motivation, performance evaluation, quality concepts, transformational leadership, and selection/recruitment/development of employees. Corequisite: MBAD 5112 and MBAD 5212. Prerequisite: MBAD 5222. Managing Ideas, Products, and Services (Sp, Fa) (2-3) Product management, market research, marketing communications, retailing and distribution, consumer behavior, and social and ethical implications of marketing. Corequisite: MBAD 5112 and MBAD 5132. Prerequisite: MBAD 5122 and MBAD 5212 and MBAD 5232.

MBAD523V Economics of Management and Strategy (Sp, Fa) (2-3) Information economics and applied game theory. Corequisite: MBAD 5122 and MBAD 5132.

MBAD5313 Strategic Management (Fa) Strategy formulation, strategy implementation, and other topics related to the long-term planning and strategic role of the general manager, international issues, and the impact of management tactics on decision making. Corequisite: MBAD 5122 and MBAD 5222 and MBAD 5232. MBAD5413 Partnering Project I (Sp) A large-scale, real world, 10 week project involving hands-on work addressing issues faced by managers in partnering firms. Corequisite: MBAD 5313 and MBAD 5423.

MBAD5423 Partnering Project II (Fa) (Sp) (Continuation of MBAD 5413) Corequisite: MBAD 5313 and MBAD 5413.

MBAD5433 Capstone Project (Odd years, Fa) A large-scale project integrating various business topics. Corequisite: MBAD 5413 and MBAD 5423.

MBAD5511 Focus Topic I (Fa) A concentrated emphasis on one business topic. Corequisite: MBAD 5122, MBAD 5122 and MBAD 5232. Prerequisite: MBAD 5232.

MBAD5521 Focus Topic II (Sp) A concentrated emphasis on one business topic. Pre- or Corequisite: MBAD 5122, MBAD 5122, MBAD 5212, and MBAD 5232. Prerequisite: MBAD 5112, MBAD 5122, and MBAD 5122.

MBAD5713 Algebraic Topology (Sp) Homotopy, singular and relative homology, excision theorem, the Mayer-Vietoris sequence, Eilenberg numbers, and the U.ilter characteristics. Prerequisite: MAH 5033.

MBAD600V Master’s Thesis (Sp, Su, Fa) (1-6) Prerequisite: graduate standing.

MBAD610V Directed Readings (Irregular) (1-6) Independent study in approved majors. Prerequisite: Sp, Su, Fa (1-6) Corequisite: Sp, Su, Fa (1-6) Current research interests in algebra.

MBAD659V Topics in Analysis (Sp, Su, Fa) (1-6) Current research interests in analysis.

MBAD699V Brigham Young University (Sp, Su, Fa) (1-6) Current research interest in topology.

MBAD700V Doctoral Dissertation (Sp, Su, Fa) (1-6)
Page 308

Course Descriptions

MEEG4213 Control of Mechanical Systems (Fa)
Mathematical modeling for feedback control of dynamic mechanical systems with design techniques using Laplace transforms, root locus, frequency analysis, and criteria for performance and stability. Prerequisite: MEEG 3113. (Same as CE/EN 4403, ELE/EE 4043)

MEEG4223 System and Signal Analysis (Irregular) Linear systems, state space, convolution, Fourier and z-transforms, +1, stability, frequency response, filtering, state variable models, and analysis. Digital system simulation. Masons Rules. Credit cannot be earned for both MEEG 4203 and 3113.

MEEG4233 Microprocessors in Mechanical Engineering I: Electronic Systems (Irregular) Microcomputer architecture, programming, and interfacing, smart product design (microprocessor-based design). Control of DC and stepper motors and interfaces to sensors. Applications to robotics and real-time control. Mobot robot project. Digital and analog electronics are reviewed where required. Prerequisite: ELEG 3913.

MEEG4303H Honors Materials Laboratory (Sp, Su) A study of material testing and the heat treatment of basic engineering materials. Lecture 1 hour, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: MEEG 2303 and MEEG 3013. (Same as MEEG 4303)

MEEG4303R Honors Materials Laboratory (Sp) A study of properties, uses, testing, and heat treatment of basic engineering materials. Lecture 1 hour, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: MEEG 2303 and MEEG 3013.

MEEG4403 Thermal Systems Laboratory (Irregular) Selected experiments dealing with heat transfer applications. Lecture 1 hour, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: MEEG 4202.

MEEG4413 Heat Transfer (Sp, Su) Basic thermal energy transport processes; conduction, convection, and radiation; and the mathematical analysis of systems involving these processes. ELEG 3203 is a prerequisite. (Irregular)

MEEG4433 Aerospace Propulsion (Irregular) Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Prerequisite: MEEG 3503.

MEEG4443 Aerospace Propulsion (Irregular) Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Prerequisite: MEEG 3503.

MEEG4443 Advanced Machine Design (Irregular) Detailed study of selected materials engineering topics. Topics will vary, but may include diffusion processes in solids, thermodynamics of solids, fracture mechanics, and corrosion. Prerequisite: MEEG 5103 and graduate standing. (Same as MEEG 491V)

MEEG4491H Honors Special Projects (Sp, Su) (1-5) (Same as MEEG 491V)

MEEG4491V Special Projects (Sp, Su) (1-5) (Same as MEEG 491V)

MEEG5003 Continuum Mechanics (Sp) Cartesian tensor and index notation; Legendrian and Euleria description; analyses of stress and strain, coordinate transformations, irreversible mechanics, finite strains, stress and strain quasid, equations of equilibrium, and compatibility equations; Reynolds transport theorem, balance of momenta, continuity equation, 1st and 2nd laws of thermodynamics, application to solids and fluids. Prerequisite: MEEG 3013 and MEEG 4703.

MEEG5013 Advanced Mechanical Vibrations (Irregular) Continuation of MEEG 4013 with a more analyt- ical approach. Included are techniques for modeling and un- derstanding the vibratory behavior of multi-degree of freedom discrete systems, continuous systems, nonlinear systems, and random variables. Prerequisite: MEEG 4013.

MEEG5033 Advanced Topics in Materials I (Irregular) Combined stress, theories of failure, thick-walled cylinders, bending of unsymmetrical sections, torsion in non- circular section, plate stresses, and strain energy analysis. Prerequisite: MEEG 4103 and MEEG 4013.

MEEG5103 Structural Dynamics (Fa) The forced and random vibration response of complex structural systems are studied through the use of the finite element method. Computational aspects of structural dynamics, and numerical results are discussed and digital computer applications undertaken. Prerequisites: MEEG 4103 and graduate standing.

MEEG5113 Modal Analysis Methods (Sp) Fundamental concepts and experimental modal analysis methods are examined and applied to the study of complex structural systems. Computational aspects of these problems are discussed, and digital computer applications undertaken with experimental verification.

Prerequisite: MEEG 5103 and graduate standing.

MEEG5123 Finite Elements Methods II (Sp) Fundamental concepts and applications of the elements methods used to solve transient and twodimensional boundary value problems. Applications are taken from solid and fluid mechanics, heat transfer, and acoustics. Emphasis is placed on advanced methodology in order to introduce research literature and commercial software manuals, and to encourage responsible use and interpretation of FE analysis. Prerequisite: MEEG 4123 and graduate standing or consent of instructor.

MEEG5213 Modern Mechanics of Materials (Irregular) Application of advanced topics such as probability theory, fracture mechanics, and computer methods to the design and analysis of complex mechanical systems. Prerequisite: MEEG 4123 or consent of instructor.

MEEG5253 Microprocessors in Mechanical Engineering II Real-time Control (Irregular) Feedback control system theory and design. U. programming. Microcontroller interfacing. Real-time control of electromechanical systems in laboratory projects using a single-board computer as the controller. Prerequisite: MEEG 4303 or MEEG 491V.

MEEG5263 Introduction to Micro Electro Mechanical Systems (Irregular) Fundamentals of microelectronics and devices on the micro scale. Course topics will include: introduction to micro scales, fundamentals of micro fabrication, surface and bulk micromachining, device packaging, microelectronics, tribology, corrosion, bio- and nano-materials. Recitation three hours per week.

MEEG5273 Electronic Packaging (Fa) An intro- duction to electronic packaging from single chip to multichip, including materials, electrical design, thermal design, mechanical design, package modeling and simulation, processing considerations, reliability, and testing. Credit cannot be earned for both MEEG 5273 and 5273.

MEEG5277 Micro-Electromechanical Systems (Irregular) Multi-disciplinary introduction to micro/nano electronics and mechanical design. Prerequisite: MEEG 4303 or MEEG 491V and MATH 3404. (Same as ELEG 5277)

MEEG5303 Physical Metalurgy (Irregular) Physical and chemical properties of solids and the application of materials in commerce. Lecture 4 hours per week.

MEEG5313 Materials and Design (Irregular) Analysis, design, and testing of high strength and modulus materials, brittle materials, composites, and anisotropic materials. Effect of environment on design with particular emphasis on nuclear application. Prerequisite: MATH 3404.

MEEG5323 Physical and Chemical Vapor Deposition Processes (Sp) Fundamental principles of materials behavior in the deposition of films by PVD/CVD techniques. topics include kinetic theory of gas dynamics, surface science, plasma, diagnostics, reaction rate, nucleation and growth, crystal structures and defects in thin films, advanced characterization techniques for thin films, and applications in microelectronics, tribology, corrosion, bio- and nano-materials. Prerequisite: graduate standing in Engineering or cons- sent of instructor.

MEEG5393 Engineering Materials Topics (Irregular) Detailed study of selected materials engineering topics; topics will vary, but may include diffusion processes in solids, thermodynamics of solids, fracture of materials, failure analysis, advanced techniques in electron microscopy, ana- lysis of failure, computer methods to the design of mechanical systems, etc. Prerequisite: graduate standing.

MEEG5403 Advanced Thermodynamics (Sp) An in-depth review of classical thermodynamics, including analytical techniques, combustion, micro and macro thermodynamics, plasma, diagnostics, reaction rate, nucleation and growth, crystal structures and defects in thin films, advanced characterization techniques for thin films, and applications in microelectronics, tribology, corrosion, bio- and nano-materials. Prerequisite: MEEG 4013 and graduate standing.

MEEG5433 Combustion (Fa) Introduction to combus- tion of solid, liquid, and gaseous fuels. Equilibrium and kinet- ics of hydrocarbon oxidation, laminar and turbulent flames,
variety of disciplinary approaches to the study of the geo-cultural region, including history, politics, arts and literature, religion and cultures, social geographical aspects.

MEST3503H Honors Middle East Studies Colloquium (Sp, Su, Fa)

MEST4003 Middle East Studies Colloquium (Sp, Su, Fa)

An interdisciplinary colloquium with a final change in subject required of all students in the Middle East studies program. Prerequisite: sophomore standing. (Same as MEST 4003H)

(MGMT) MANAGEMENT

MGMT1033 Introduction to Business (Sp, Fa)

Survey of organization, principles, practices of business world; provides general view of field as a whole, serves as foundation for specialized courses. (Same as MGMT 1033I) and T3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and developments in the field of Management. Prerequisite: Senior standing.

MGMT4103 Special Topics in Management (Irregular) Explores trends, concepts, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.

MGMT3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) Introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.

MGMT3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) Introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.

MGMT3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) Introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.

MGMT3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) Introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.

MGMT3563 Management Concepts and Organizational Behavior (Sp, Su, Fa) Introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop critical thinking and problem solving skills through case studies and experimental exercises.

MGMT3743 Human Resource Management (Irregular) Study of the human resource management function in the legal and organizational environment designed to benefit general human resource management and human resource specialists; emphasis given to development and administration of methods and policies within the legal context of contemporary human resource management, through the use of simulations and team projects.

MGMT3933 Entrepreneurship and New Venture Development (Fa) The role of the entrepreneur in starting up new businesses, identification of new venture opportunities and the evaluation of their feasibility. Prerequisite: WOCB 2033.

MGMT4003H Management Honors Colloquium (Irregular) Explores events, trends, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered.
Small enterprise opportunities and problems emphasizing innovation, management planning and control, financing, marketing, and operation of small businesses. Emphasis on application of management knowledge to small enterprise management. Prerequisite: WOCB 2033.

MGMG450V Independent Study (Sp, Su, Fa) (1-3) Permits advanced individual basis to explore selected topics in management.

MGMG4583 International Management (Sp) Develops an understanding of international business management and multinational management, including management in the processes of competitive environmental analysis, strategy implementation, strategic control, international strategic management, and ethical/societal responsibility behavior. Prerequisite: senior status and completion of all junior level I.A. core courses. (Same as MGMG 4833)

MGMG4833 Strategic Management (Sp, Su, Fa) This capstone course allows students to integrate the knowledge that they have acquired about the functioning of complex organizations. Focuses on top management’s roles, responsibilities, and decision making in the processes of competitive environmental analysis, strategy implementation, strategic control, international strategic management, and ethical/societal responsibility behavior. Prerequisite: senior status and completion of all junior level B.A. core courses.

MGMG4943 Organizational Staffing (Fa) Indepth study of current issues and trends in the field of organizational behavior and personnel management. Topics include psychological, sociological, and substantive issues related to selection, performance appraisal, and development of employees. Students participate in individual and group projects designed to provide theoretical and practical skills related to human resource management. Prerequisite: WOCB 2033.

MGMG4953 Organizational Rewards and Compensation (Sp) Develops an understanding of reward systems theory and its application to the design of compensation systems. Provides theoretical and practical background and applications for the use of reward systems in attracting, motivating, and retaining employees.

MILS4963H Honors Seminar I (Fa) Permits students on individual basis to explore selected topics in management. Entrance by invitation only.

MILS4973H Honors Seminar II (Sp) Open to limited number of invited seniors; gives classroom experience in decision making through solution of policy and management problems. Prerequisite: invitation.

MGMG5993 Entrepreneurship Practicum (Sp, Su, Fa) Hands-on management of an actual on-going business. Students assume real responsibilities in making decisions about, and managing a business. Topics covered include accounting, economics, finance, information systems, law, logistics, management, and marketing. Entrance by invitation.

MILS4001 Contemporary Military Issues (Sp) Provides an overview of major issues in human resource management. Designed to familiarize students with the seminal research in human resource management, and to provide them with the conceptual and methodological tools necessary to do research in the area. Prerequisite: junior standing plus one of the following conditions: approval of Professor of Military Science.

MILS4011 Advanced Military Correspondence (Sp, Fa) Application of military organization, management, and communication using this medium. Students are required to lead in drill and demonstration and to present a weapon skills exercise per semester. Corequisite: Lab component.

MILS4014 Advanced Leadership II (Sp) Development of managerial and leadership abilities, maximizing performance-oriented hands-on training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training and 3 hours of practical training conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component.

MILS4017B Fieldcraft and Skills (Sp) Provides an overview of major military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army’s training and maintenance management system. Lecture 3 hours, laboratory 3 hours, physical training 3 hours per week. MS IV cadet plan and participate in 1 field training exercise per semester. Corequisite: Lab component. Prerequisite: successful completion of MS III course work.

MILS4011 Advanced Military Correspondence (Sp, Fa) Practicum for advanced undergraduates. Students submit prepared military correspondence projects written in the military style using military forms and formats. Prerequisite: PMS approval.

MILS4004 Advanced Leadership I (Fa) The study of military organization, management, and communication using this medium. Students are required to lead in drill and demonstration and to present a weapon skills exercise per semester. Corequisite: Lab component.

MILS5001 Basic Outdoor Field Craft and Skills (Sp, Fa) Introduction to safe use of a rifle and basic marksmanship. Introduction to safety of personnel including use of the Maxim material, fire, shelters, and first aid. Emphasis is on the use of this medium. Students are required to lead in drill and demonstration and to present a weapon skills exercise per semester. Corequisite: Lab component.

MILS5202 Leadership Development I (Fa) Continuation of basic leadership development in MILS 1001 and MILS 1011. Course focus is on small unit leadership, team building and management skills. Includes an introduction to small unit tactics. Students develop leadership foundations by leading discussion of planning and operating operations using the military decision making model. Classroom 2 hours per week. Lab 1 hour per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or approval of Professor of Military Science.

MILS52012 Leadership Development II (Sp) Continuation of basic leadership development in MILS 2002. Course focus is on decision making process, time management, and leadership skills. Includes an introduction to military writing and basic tactics. Cadets continue training in drill, ceremony, first aid, and practical training conducted 2 hours per week. Lab 1 hour per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or approval of Professor of Military Science.

MILS501 Advanced Rifle Marksmanship (Sp) Course to teach students the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air rifle, small bore firing, advanced practical exercises of different shooting positions and marksmanship competition with other universities. Prerequisite: MILS 1101.

MILS5304 Applied Leadership I (Fa) Development of managerial and leadership abilities, maximizing performance-oriented hands-on training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training and 3 hours of practical training conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component.

MILS5304 Applied Leadership II (Sp) Development of managerial and leadership abilities, maximizing performance-oriented hands-on training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training and 3 hours of practical training conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component.

MILS5304 Applied Leadership III (Sp) Development of managerial and leadership abilities, maximizing performance-oriented hands-on training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training and 3 hours of practical training conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component.

MILS5304 Applied Leadership IV (Sp) Development of managerial and leadership abilities, maximizing performance-oriented hands-on training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training and 3 hours of practical training conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component.

MILS5353 Multinational Management (Sp) Organizational behavior, and skills in a variety of communication contexts.

MILS5363 Strategic Management (Sp, Su, Fa) Problems involved in multinational management of business firms; emphasis placed on economic and environmental variables and the application of management concepts as they apply to multinational management.

MILS5363 Strategic Innovation (Su) Management of innovation and growth in organizations. Organization development processes, and the application of organizational behavior, such as entrepreneurship, innovation management, and total quality management.

MILS5383 Intra/Entrepreneurship of Technology (Sp) A multidisciplinary review of managing the development of new technical products and services in startups and in existing companies. The course includes examination of the search and evaluation for new technical products; development and implementation of a business plan and prototype, and managing and the launch and business development of new products.
MKTG4003 Marketing and Transportation

Consults (Irregular) explores events, concepts and trends in transportation in the field of Marketing and/or Transportation. Prerequisite: Senior standing.

MKTG4033 Selling and Sales Management

(Sp, Su, Fa) Direction, supervision, control of sales divisions of manufacturing and wholesale organizations; sales planning, research, supervision, motivation and compensation of salespeople; principles and techniques of personal selling. Prerequisite: MKG 3433.

MKTG4103 Marketing Topics (Sp, Su, Fa)

Special topics in marketing not available in other courses. Topics selected by the marketing faculty for each semester each course is offered. Prerequisite: MKG 3433.

MKTG4333 Advanced Research (Sp, Su, Fa)

Modern research techniques applied to problems of measuring market and sales potential, allocation of territories, demand for industrial goods, consumer purchasing power, sales forecasting, and sales research as basis for establishing marketing strategy. Prerequisite: MKG 1433 and ISYS 2013.

MKTG4533 Marketing Management (Sp, Su, Fa)

Strategic and management of the marketing function. Topics covered include product planning, channels strategy, pricing strategy, and promotional strategy in the context of the overall strategic direction of the firm. Prerequisite: MKG 4133 and MKG 4553.

MKTG4553 Consumer Behavior (Sp, Su, Fa)

Analyzes consumer motivation, buying behavior, market adjustment, product innovation and adaptation; consumer marketing research, survey of economic, behavioral and social science theories of consumer market behavior, producer and intermediary reactions. Consumer decision-making is evaluated as to psychological drives, sociological concepts used by producers, channel intermediaries, consumers; considers methods, techniques for measuring consumer behavior, analyzing consumer markets. Prerequisite: MKG 3433.

MKTG4833 International Marketing (Irregular)

Irregular broad view of the marketing of industrial products, emphasizing the similarities and the differences between the marketing of industrial and consumer products. Marketing research, market analysis, forecasting, distribution, product management, product pricing and promotion as they affect industrial products are examined. Prerequisite: MKG 3433.

MKTG4834 Industrial Marketing Research (Sp, Su, Fa)

Wide range of research topics related to marketing, current research and problems in the field. Prerequisite: MKG 3433.

MKTG5333 Consumer and Market Research (Sp)

Modern marketing research techniques and their applications to problems related to marketing strategy, pricing, forecasting, and policy determination. Special attention is given to consumer research, behavioral concepts, and the measurement for marketing purposes. Prerequisite: ISYS 5203.

MKTG5553 Special Topics in Marketing (Su)

Strategic planning and management of brands and product categories from both manufacturing and retailing perspectives. Focus is on the product brand development, pricing, distribution, and promotion of brands and their strategic and functional roles in the product mix.

MKTG5555 Buyer Behavior (Fa)

Behavioral science concepts, applied research relating to consumer and executive purchasing processes; stresses problems in buying behavior research, conceptual integration, relevance to marketing management. Prerequisite: MKTG 5103.

MKTG636V Special Problems in Marketing (Irregular) (1-6)

Individual research problems. Prerequisite: MKTG 6413 Special Topics in Marketing (Irregular) seminar in special topics in marketing, topics vary depending upon the instructor.

MKTG6423 Seminar in Causal Marketing (Irregular)

MKTG6433 Seminar in Research Methods (Irregular)

Extensive review of literature illustrative of marketing research studies. Focuses upon theoretical foundations of research design, methodology, and analysis as well as interpretation of univariate, bivariate, and multivariate data in marketing theory exploration.

MKTG6443 Seminar in Marketing Theory (Sp)

Comprehensive survey and critical review of the history of marketing thought and contemporary schools of thought in marketing discipline. Indepth research, review, synthesis, and research projects will be required in a selected topic from the perspectives of advancing marketing theory. Prerequisite: MKT 5103 and MKT 5303.

MKTG6453 Seminar in Transportation and Business Logistics (Irregular)

Underlying theories and problems related to the development of logistical systems in the U.S. Attention focused on transport economics, the role of government in providing transportation facilities, and management of the integrated transportation system: inventory control, warehousing, customer service levels, and facility location.

MKTG6463 Seminar in Strategic Marketing Management (Irregular)

Comprehensive survey of literature of strategic marketing management area. Focuses on critical evaluation of conceptual frameworks, research meth- odologies, and interdisciplinary integrations. Requires indepth research, synthesis, integration, and conceptualization resulting in a research paper aimed at advancing the field of strategic marketing management. Prerequisite: MKG 5303.

MKTG700V Doctoral Dissertation (Sp, Fa) (1-18)

Prerequisite: candidacy.

(MILT) MUSIC LITERATURE

MLIT100H3 Honors Music Lecture (Sp, Su, Fa) (Same as MLIT 1003)

MLIT1003 Basic Course in the Arts: Music Lecture (Sp, Su, Fa) Introduction to music. Lecture 3 hours per week providing experience in guided listening. Acquisition of vocabulary and certain fundamentals of music.

MUAC1121 Italian for Singers (Sp, Su, Fa) Training in proper pronunciation and inflections of Italian as applied to singers. Two meetings per week.

MUAC1141 German for Singers (Sp, Su, Fa) Training in proper pronunciation and inflection of German as applied to singing. Two meetings per week.

MUAC1151 French for Singers (Sp, Su, Fa) Training in proper pronunciation and inflections of French as applied to singing. Two meetings per week.

MUAC1161 Class Instruction in Piano for Non-Music Majors (Sp, Fa) Beginning instruction in piano. Does not fulfill the piano requirement for music majors.

MUAC1221 Piano Class for Music Majors I (Fa) Training in functional piano skills for music majors. Two meetings per week.

MUAC1231 Piano Class for Music Majors II (Sp)

A continuation of MUAC 1221. Two meetings per week. Prerequisite: MUAC 1221.

MUAC1301 Class Instruction in Violin and Viola (Sp, Fa) Beginning class instruction in violin and viola.

MUAC1311 Class Instruction in Violincello and String Bass (Sp, Fa) Beginning class instruction in vio- lin and string bass.

MUAC1321 Class Instruction in Guitar (Sp, Fa) Beginning class instruction in guitar. Students must provide their own instruments.

MUAC1331 Class Instruction in Clarinet (Sp, Fa)

The elementary study of clarinet. Beginning class instruction designed to familiarize the student with the basic playing skills and teaching techniques for the instrument.

MUAC1331 Class Instruction in Flute (Sp, Fa)

The elementary study of flute. Beginning class instruction designed to familiarize the student with basic playing skills and teaching techniques of the instrument.

MUAC1351 Class Instruction in High Brass Instruments (Sp, Fa)

The elementary study of the cornet, trumpet, and horn. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the high brass family.

MUAC1361 Class Instruction in Low Brass Instruments (Sp, Fa) (Irregular) The elementary study of the trombone, euphonium and tuba. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the low brass family.

MUAC1371 Teaching the Beginning Percussionist (Sp, Fa) A study of the pedagogy and techniques needed to instruct middle school and junior high percussionists. Emphasis on elementary snare drum and marimba perfor- mance. Study of junior high band and orchestra methods, solos and ensemble music.

MUAC1381 Class Instruction in Voice (Sp, Fa)

Fundamentals of vocalization and singing of English songs, including breathing, vowel clarity, and pronunciation of con- sonants.

MUAC2111 Music Technology I (Sp, Su, Fa)

Students will develop skills in transcribing music using music notation software and learn about sound reinforcement systems. Prerequisite: MUAC 1231.

MUAC2141 Class Instruction in Oboe, Bassoon, and Clarinet (Sp, Su, Fa) Beginning class instruction in oboe, bassoon, and saxophone. Class instruction designed to familiarize the student with basic playing skills and teach- ing techniques of the instruments. Prerequisite: MUAC 1331 or MUAC 1341.

MUAC2221 Piano Class for Music Majors III (Fa)

A continuation of MUAC 1231. Two meetings per week. Prerequisite: MUAC 1231.

MUAC2231 Piano Class for Music Major IV (Sp)

A continuation of MUAC 2221. Two meetings per week. Prerequisite: MUAC 2221.

MUAC4371 Teaching the High School Percussionist (Odd years, Sp)

A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba II, timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Prerequisite: MUAC 1371.

MUAP3001V Honors Applied Voice/Instrument (Sp, Su, Fa) (1-18) Private study of the major instrument. Prerequisite: MUAP 3001V.

MUAP3010V Applied Voice/Instrument (Sp, Su, Fa) (1-4) Private study of the major instrument. Prerequisite: MUAP 310V.
MUAP3201 Honors Applied Recital I (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 15 minutes on music. Corequisite: MUAP 310 H. (Same as MUAP 3201)

MUAP3201 Recital I (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 25 minutes of music. Corequisite: MUAP 310 H. (Same as MUAP 3201)

MUAP4201 Honors Applied Recital II (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 310 H. (Same as MUAP 4201H)

MUAP4201 Recital II (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 310 H. (Same as MUAP 4201H)

MUAP5001 Applied Voice/Instrument-Secondary Level (Sp, Su, Fa) Private study at the graduate secondary level.

MUAP510V Applied Voice/Instrument (Sp, Su, Fa) (1-5) Private study at the graduate level. Prerequisite: MUAP 310 or equivalent.

MUAP5201 Graduate Recital I (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 50 minutes of music.

MUAP5201 Graduate Recital II (Sp, Su, Fa) Preparation and performance of a public recital of a minimum of 50 minutes of music.

MUED3021 Introduction to Music Education (Sp, Fa) A course designed to provide early experiences for the prospective music teacher. Students will become familiar with professional trends, music classroom organizational and management issues, and principles of effective education. 3/4/3 hours. Emphasis will include basic psychological and philosophical orientations, observations in public school classrooms. Required of all prospective Music Education majors.

MUED3021 Supervised Practicum in Teaching Musical Skills (Sp, Su, Fa) Provides for supervised teaching opportunities with public school students in instrumental, choral, and elementary classes. Prerequisite: instrumental emphasis (band): MUAC 1221 & MUAC 1231, MUAC 1331, MUAC 1341, MUAC 1351, MUAC 1361 & MUAC 1371, prerequisite for instrumental emphasis (string): MUAC 1221 & MUAC 1231, MUAC 1301, MUAC 1311 and any other three of those listed for “band” concentration. Prerequisites for vocal (elementary) emphasis: MUAC 1221 & MUAC 1321. Any four of those listed for “band” or “string” concentration. MUAC 1321 may also count toward this requirement.

MUED3813 Music for Elementary Education Majors (Sp, Su, Fa) Develops music knowledge, skills, and pedagogical techniques for use in the elementary classroom. Lecture 3 hours, keyboard laboratory 1 hour per week. Prerequisite: MUAC 1161.

MUED3881 Supervised Teaching in the Elementary School (Sp, Su, Fa) Concepts of elementary music education; methods, materials, curriculum design, and supervision in elementary school music.

MUED4237 Professional Development in Music Education (Sp, Fa) A seminar offered during the student teaching semester to prepare the student for the role of a professional educator. Content includes professional ethics and conduct, classroom management, evaluation and grading, and application for employment.

MUED4273 Methods for Teaching String Instruments (Odd years, Fa) Methods and materials for studying and preparing to teach orchestral instruments and ensembles in the public schools.

MUED4283 Teaching Vocal Music (Even years, Sp, Su,METHOD) Methods and materials used in teaching high school vocal music.

MUED4293 Instrumental Methods (Fa) Problems of teaching instrumental music in the public schools.

MUED451V Student Teaching: Elementary Music (Sp, Su, Fa) A seminar and performance of music in an off-campus school, where the student will teach under supervision in the elementary classroom and will participate in other activities involving the school and community. Enrollment requirement is for a total of 12 hours and 15 weeks involvement in 452V and 451V. Corequisite: MUED 452. Prerequisite: Bachelor of Music degree in Music Education.

MUED452V Student Teaching: Secondary Music (Sp, Su, Fa) (4-8) A minimum of five weeks and a maximum of ten weeks. Students will teach in an off-campus school, where the student will teach under supervision in the elementary classroom and will participate in other activities involving the school and community. Enrollment requirement is for a total of 12 hours and 15 weeks involvement in 452V and 451V. Corequisite: MUED 451. Prerequisite: Bachelor of Music degree in Music Education.

MUED477V Special Topics in Music Education (Irregular) (1-6) Subject matter not covered for credit. Sources. With permission, may be repeated for credit if topics are different.

MUED513 Seminar: Resources in Music Education (Sp, Su, Fa) Analysis of the analysis and writing skills necessary for academic research in music education. Each student identifies one problem specific to music education, finds and reviews related literature and sources, develops a comprehensive bibliography, and writes a paper which synthesizes the research. Open to graduate students and undergraduates in honors in music education.

MUED5653 Seminar: Issues in Music Education (Sp, Su, Fa) A seminar exploring the relationships between the profession of teaching music and selected views about learning theories, teaching methods, philosophy, psychology, and other selected topics relevant to contemporary music education.

MUED5733 Music Education in the Elementary School (Sp, Su, Fa) Concepts of elementary music education; methods, materials, curriculum design, and supervision in elementary music.

MUED5811 Curriculum Design in Music (Sp, Su, Fa) Goals and objectives in music education. Student will develop a curriculum for an actual or hypothetical music education program.

MUED5862 Marching Band Techniques (Su) Includes the place of the Marching band in the school program, types of formations used, and selecting, arranging or writing the musical score.

MUED588V The Marching Band Program: Changing Materials and Techniques (Sp, Su, Fa) (1-3) Treatment of specific problems and issues-survey of choral literature; materials and contemporary methods appropriate to the development of a comprehensive choral experience.

MUED5973 Tests and Measurement in Music This course will address the psychometric concepts of tests and measurement of music achievement, aptitude, attitude, and self assessment. The course will focus on the teaching and assessment of musical skills, musical responses, and will critically examine existing aptitude tests (Seashore, Watkins Farmum, Gordon, etc). Basic statistical concepts and data analysis used in content will be introduced. Prerequisite: graduate standing in music.

MUED5983 Psychology of Music Behavior (Sp, Even years) This course is an introduction to the psychology of music, perception of music, and provides an interdisciplinary view toward the field, covering such topics as philosophical and sociological questions about the nature and function of music, the physiology of the ear, the physical and perceptual properties of sounds (acoustics), performance anxiety, preference and taste research, social and pedagogical attributes of performance, and behavioral musical responses. Prerequisite: graduate standing.

MUED599V Seminar (Su) (1-6)

MUED600V Master’s Thesis (Irregular) (1-6) Preparation of a master’s thesis as partial fulfillment of the requirements for the Master of Music degree. Prerequisite: Admission with director’s approval. Approval required prior to registration.

MUEN3341 Concert Choir (Sp, Su, Fa) Three hours of rehearsal weekly, with extra rehearsals at the director’s discretion. Admission with director’s approval. No audition required prior to registration.

MUEN3421 Inspirational Singers (Sp, Fa) Performance of African-American literature with particular emphasis on Negro Spirituals, contemporary gospel music. No audition required to registration. Rehearsal 3 hours per week.

MUEN3431 Symphony Orchestra (Sp, Su, Fa) Rehearsal 3 hours per week with extra rehearsals at director’s discretion. Admission with director’s approval.

MUEN3441 Marching Band (Fa) Rehearsal 8 hours per week. Admission with director’s approval.

MUEN3451 School Chorale (Sp, Fa) Vocal ensemble limited to the more experienced singers. Rehearsal 5 hours per week. Admission with director’s approval. Prerequisite: MUN341.

MUEN3461 Wind Symphony (Fa) Rehearsal 3 to 5 hours per week. Admission by audition and approval of the conductor. Corequisite: MUNEJ 3460L.

MUEN3471 Jazz Performance Laboratory (Sp, Fa) Rehearsal 3 hours per week. Admission by audition.

MUEN3481 Concert Band (Sp) Rehearsal 3 hours per week. Admission by audition and approval of the conductor.

MUEN3501 Chamber Musicians (Sp, Su, Fa) A seminar exploring the relationships between the profession of teaching music and selected views about learning theories, teaching methods, philosophy, psychology, and other selected topics relevant to contemporary music education.

MUEN3521 Woodwind Quintet (Sp, Fa) Study and performance of music for woodwind quintet. Weekly coaching will emphasize interpretation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly.

MUEN3531 Brass Ensemble (Sp, Fa) Study and performance of chamber music for brass instruments. Rehearsal 2 hours per week.

MUEN3541 Accompanying (Sp, Fa) Harp accompanying of vocal and instrumentalists. Rehearsal 2 hours per week. Prerequisite: MUNEJ 3540.

MUEN3551 Percussion Ensemble (Sp, Su) Study and performance of ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week.

MUEN3551 Vocal Ensemble (Sp, Su, Fa) Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit.

MUEN3591 Chamber Orchestra (Sp, Fa, Su) Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week.

MUEN3711 Flute Ensemble (Sp, Fa) Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week.

MUEN3731 Double Reed Ensemble (Sp, Fa) Study and performance of music for multiple double reed instruments, including trios, quartets, quintets, and double reed choir. Rehearsal 2 hours per week.

MUEN3731 Trumpet Ensemble (Sp, Fa) Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week.

MUEN3771 Trombone Ensemble (Sp, Fa) Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week.

MUEN3771 Tuba Ensemble (Sp, Fa) Study and performance of music for multiple tubas, including trios, quartets, quintets, and bassoon choir. One hour of rehearsal weekly.

MUEN3531 Copper Ensemble (Sp, Fa) Performance of early music for various combinations of
MUHS5703 History of Music to 1800 (Fa) Survey of music in the 18th and early 19th centuries. Lecture 3 hours per week. Prerequisite: WCVI 1003 and WCVI 1013 and MLIT 1003.

MUHS5713 History of Music from 1800 to Present (Sp, Fa) Survey of music in the 19th and 20th centuries. Lecture 3 hours, plus additional lecture lab 1 hour per week. Prerequisite: WCVI 1003 and WCVI 1013 and MLIT 1003 and MUHS 3703.

MUHS5398V Honors Independent Studies (Sp, Su, Fa) Independent study in music history and literature. One hour credit per semester. Open to undergraduates in honors.

MUHS5425S Special Topics in Music History (Sp, Fa) Independent study of music history, including historical and theoretical issues in music history. Lecture 1 hour per week. Prerequisite: MUHS 3703 and MUHS 3713.

MUHS54623 Music History Review (Sp, Su, Fa) Review of the central data and concepts of music history, with emphasis on individual periods as needed by students enrolled. Credit in this course may not count toward the Master of Music or Master of Education degree.

MUHS4703H Honors Survey String Literature (Irregular) A survey of solo and chamber music literature involving stringed instruments. Prerequisite: MUAP 110 and MUTH 2613. (Same as MUHS 4703)

MUHS54703 Survey of String Literature (Irregular) A survey of solo and chamber music literature involving stringed instruments. Prerequisite: MUAP 110 and MUTH 2613. (Same as MUHS 4703H)

MUHS54733 Survey of Vocal Literature (Irregular) A survey of the symphonic literature from its beginnings to the present. Prerequisite: MUAP 110.

MUHS4763 Survey of Vocal Literature I (Odd years, Sp, Fa) A study of concert literature for the solo voice.

MUHS4773 Survey of Vocal Literature II (Odd years, Sp, Fa) A survey of chamber music literature for the solo voice. Prerequisite: MUHS 4763.

MUHS4793 Band Literature (Even years, Sp, Su) A study of literature written for concert band, symphonic band, and wind ensemble, representative of the following five periods in Music History: Renaissance (1420-1600), Baroque (1600-1750), Classical (1750-1820), Romantic (1820-1900), and Contemporary (1900-present). Prerequisite: MUAP 110 and MUTH 2613. (Same as MUHS 4703H)

MUHS4793H Honors Survey String Literature (Odd years, Sp, Su, Fa) Honors survey of music literature involving stringed instruments. Prerequisite: MUAP 110 and MUTH 2613.

MUHS54833 Survey of Organ Literature I (Irregular) A survey of the organ works of outstanding composers. Prerequisite: MUAP 110.

MUHS54833H Honors Survey Organ Literature I (Odd years, Sp, Fa) A study of organ literature by outstanding composers. Prerequisite: MUAP 110 and MUTH 2613.

MUHS5489V Seminar in Music History (Irregular) (1-4) Subject matter not covered in other courses. With permission, may be repeated for credit if topics are different.

MUHS5496S Honors Seminar in Performance Practice (Irregular) Study of problems of performing in their historical context including media of performance: relation of notation to performance: rhythm: tempo: ornamen- tation: realization of improvised parts: dynamics and expression: and changing styles in music performance. Upon completion of this course and a history program, students will have the option of undertaking graduate work in musicology (graduate research, preparing a thesis, and others). Satisfactory completion of the term paper in this course will fulfill the Fulbright College writing requirement. The course will be offered on an irregular basis and will be limited to graduate students and to undergraduates in honors.

MUHS5794 Seminar in Music of the 20th Century (Even years, Sp, Su) Seminar in music of the 20th century. Lecture 3 hours, plus additional lecture lab 1 hour per week. Prerequisite: WCVI 1003 and WCVI 1013 and MLIT 1003. Current problems, techniques, and approaches to the prac- tice of musicology, including notation and editing problems. Prerequisite: MUHS 5594 Seminar in Music of the 19th Century (Odd years, Sp, Su) Intensive study of music of the 19th century.
Course Descriptions

Emphasis is placed on teaching methods, techniques, con- cepts, and materials. Prerequisite: one year of similar class instruction in the undergraduate level.

MUSD591V Percussion Techniques (Sp, Su, Fa) (1-2) A continuation of the undergraduate class brass instrument course. Emphasis is placed on teaching methods, techniques, and materials. Prerequisite: one year of similar class instruction in the field on the undergraduate level.

MUSD99V Special Workshop in Music (Sp, Su, Fa) (1-8) Presented by visiting master artist-teacher in vari- ous fields of music performance, teaching, and composition. Prerequisite: graduate standing.

(MUSIC) MUSIC

MUSC490VH Honors Essay (Irregular) (1-6) An honors research paper in Music History or literature, Music Theory, or Music Education. Open to seniors in honors.

(MUS) MUSICOLOGY

MUSY5113 Proseminar: Ethnomusicology (Odd years, Fa) An introduction to ethnomusicological study with practicum in techniques for fieldwork, preservation and presentation.

MUSY5123 Proseminar: Musical Notations, Transnotation and Analysis (Even years, Sp) Principles and practices for the study and musical analysis of gestural and oral "notations", as well as standard notation, for music of all cultures.

MUSY5213 Proseminar: Historical Ethnomusicology (Even years, Fa) An introduction to historical ethnomusicological study with readings and dis- cussion of seminal writings in the field.

MUSY5223 Seminar: Latin American Music (Even years, Sp) A study of the process and result of musical hybridization in South America and the Caribbean, from European colonization to the present.

MUSY5313 Proseminar: Topics in Asian and Middle Eastern Musics (Sp) Research seminars on selected topics, such as The Performing Arts in East Asia; and Music and Ritual. May be repeated.

MUSY5323 Seminar: Topics in Asian and Middle Eastern Poetry and Music (Irregular) Heading seminars on selected topics, such as Poetry and Music in Persian, Arabic and Turkish Cultures of the Islamic World; and Poetry and Song in early East Asia. May be repeated.

MUSY5343 Seminar: Special Topics in Traditions and Musics of Europe and the Americas (Irregular) (prerequisite MUSY 5313 or MUSY 5323); and Historical Central Asian and Middle- and Near-Eastern Musics (pre- requisite MUSY 5313 or MUSY 5323). May be repeated.

(MUS) MUSIC THEORY

MUTH600V Master's Thesis (Irregular) A study of advanced principles of orchestral writing through investigation of its major practitioners.

MUSY1003 Basic Musicianship (Sp) Introductory- level studies in music theory and aural perception for stu- dents not prepared for MUTH 1603 or MUTH 1621. Meets 4 days per week.

MUTH1621 Aural Perception I (Sp) A study of dia- stonic harmonic practice. Includes part-writing and analysis. Prerequisite: MUTH 1003.

MUTH1621 Aural Perception II (Sp) Development of aural perception skills for the preparation of singing, and keyboard harmony. Meets 2 hours per week.

MUTH1631 Aural Perception III (Sp) Continued development of aural perception through ear training, sight singing, and keyboard harmony. Meets 2 hours per week.

MUTH164V Composition (Sp, Su, Fa) (1-4) Private lessons of one-half hour, and one hour of composition labora- tory session each week. Development of skills in creative musical expression specifically for composition-theory majors - others admitted by consent. May be repeated. Prerequisite: MUTH 164V.

MUTH2603 Music Theory II (Sp) A continuation of MUTH 1600. Also includes chromatic harmony. Prerequisite: MUTH 1603.

MUTH2621 Aural Perception III (Sp) A continua- tion of MUTH 1631. Meets 2 hours per week, one hour credit. Prerequisite: MUTH 1631.

MUTH2631 Aural Perception IV (Fa) A continua- tion of MUTH 2621. Two hours per week, one hour credit. Prerequisite: MUTH 2621.

MUTH3603 Music Theory III (Sp) A study of 18th cen- tury counterpoint. Writing and analysis of inventions, canons, fugues, etc. Three hours per week. Prerequisite: MUTH 2603 MUTH3613 Music Theory IV (Fa) A study of the har- monic and melodic trends of the 20th century. Three hours per week. Prerequisite: MUTH 3603.

MUTH364VH Honors Composition II (Sp, Su, Fa) (1-4) Private lessons of one-half hour, and one hour of composition laboratory session each week. Development of skills in creative musical expression specifically for composi- tion-theory majors - others admitted by consent. May be repeated (Same as MUTH 364V). Prerequisite: MUTH 364V.

MUTH364V Composition (Sp, Su, Fa) (1-4) Private lessons of one-half hour, and one hour of composition labo- ratory session each week. Development of skills in creative musical expression specifically for composition-theory majors - others admitted by consent. Prerequisite: MUTH 164V. (Same as MUTH 364V).

MUTH600V Master's Thesis (Sp, Su, Fa) (1-6) A selected learning experience in nursing to exchange knowledge about and/or practice in the profession.

(NURS) NURSING

NURS2022 Introduction to Professional Nursing Concepts (Sp, Su, Fa) (Formerly NURS 3023) The course presents an overview of theories, principles and con- cepts essential to professional nursing practice. It includes ethical and legal implications relevant to health care systems. Focus is on the nursing process as the organizing framework for the provision of care to the underserved and for the profession of the professiona. This is a Level I course. Prerequisite: for pre- nursing and nursing majors only.

NURS2032 Therapeutic Communication (Sp, Su, Fa). Focuses on interpersonal communication and assessment strategies necessary for effective nurse-client interactions. Introduces a variety of communication techniques skills including group process and dynamics. This is a Level 1 course. Prerequisite: pre- nursing and nursing majors only.

NURS217V Independent Study in Nursing (Sp, Fa) (1-2) A selected learning experience in nursing to exchange knowledge about and/or practice in the profession.
Examines various therapeutic modalities in the care of clients experiencing mental health or psychosocial disorders. This is a Level I course. Corequisite: NURS 3750. Prerequisite: completion of Level I courses.

NURS3752 Professional Role Implementation III: Caregiver (Fa, SP) (Formerly NURS 4112) Students work with families to observe, participate in, and interpret group process in therapy sessions, and develop interpersonal communication skills. Students apply research-based knowledge in assisting assigned clients meet mental and other health care needs. This is a Level II course. Corequisite: NURS 3742. Prerequisite: completion of Level I courses.

NURS3841L Professional Nursing Skills: Advanced (Fa, SP) (Formerly NURS 3341L) Introduction to advanced nursing skills and application to general principles to apply advanced skills in laboratory and clinical settings. This is a Level II course. Prerequisite: completion of Level I courses.

NURS3842 Research in Nursing (Fa) (Formerly NURS 3343) Introduction to the research process through a comparative analysis of selected studies examining various theoretical, methodological and analytical approaches. Students acquire the basic competencies to critically read, evaluate and interpret nursing research studies for use in professional nursing practice. This is a Level II course.

NURS3854 Nursing Concepts: Children and Family (Fa, SP) (First Offered Fall 2002, Formerly NURS 4134) This course provides theory and research-based knowledge regarding holistic nursing care of children and families. Principles of health promotion and health education for expanding family health behaviors is the focus of this course. This is a Level II course. Corequisite: NURS 4114. Prerequisite: completion of Level I courses.

NURS4146 Professional Role Implementation IV: Teacher (Fa, SP) (First Offered Fall 2002, Formerly NURS 4144) Clinical and laboratory experience for application of research-based knowledge and skills in the nursing care of children and families. Emphasis is on assessing role of the nurse. This is a Level II course. Corequisite: NURS 4154. Prerequisite: NURS 3841L and completion of Level I courses.

NURS4242 Management in Nursing (Fa, SP) (First Offered Fall 2002, Formerly NURS 3323) Introduces principles of management and adaptive nurse's roles in the health care system. Considers the perspectives of management, organization, and change theory. Includes strategies for monitoring delivery of care, outcomes and evaluating program effectiveness. This is a Level II course.

NURS4263 Nursing Concepts: Older Adult Health and Illness (Fa, SP) (First Offered Fall 2002, Formerly NURS 4134) This course focuses on scientific approaches to the knowledge, logic, and techniques of the research process. Health-related relationships among theory, research, and evidence-based nursing practice are emphasized. Pre- or Corequisite: NURS 5003.

NURS5003 Role Development of the Advanced Practice Clinical Nurse Specialist (Fa) The study of role development of the Advanced Practice Nurse with specific emphasis on the role of the Clinical Nurse Specialist (CNS). Concepts include role development, interdisciplinary communication and collaborative strategies, patient advocacy and serving as change agent for role implementation. Pre- or Corequisite: NURS 5003.

NURS5023 Advanced Concepts in Health Promotion with Diverse Populations (Su) Application of advanced health assessment techniques with adults within the context of the family and community. Differentiate abnormal from normal findings, interpret diagnostic tests, and use clinical reasoning to formulate diagnoses for culturally diverse individuals. Emphasis on health promotion and disease prevention. Corequisite: NURS 5111. NURS5511 Clinical Practicum: Advanced Health Assessment. Opportunities to conduct health assessments on a variety of clients. Corequisite: NURS 5102.

NURS5102 Advanced Pharmacology (Su) Advanced concepts and application of pharmacotherapeutic and pharmacokinetics of broad categories of agents used for disease management of individuals. Provides the student with knowledge and skills to facilitate care and management of evidence based pharmacologic agents to a client’s common health problems in a safe, high quality, cost-effective manner. NURS5511 Clinical Practicum: Advanced Concepts in Health Promotion with Diverse Populations (Sp) Clinical practicum companion course for NURS 5042. Provides opportunity to develop, implement, and evaluate health promotion interventions for selected clients. Corequisite: NURS 5042.
OMGT4223 Occupational Safety and Health Standards (Sp) Survey of existing and proposed standards by examining fundamental physical, economic, and legal bases with special emphasis on specific standards. Emphasizes enforcement and data collection. National consensus and promulgation process. Includes a design project using a computer. (Same as INEG 4223)

OMGT5403 Industrial Safety and Health Administration (Sp, Su, Fa) Principles of accident and industrial disease prevention; organization and operation of industrial safety and hygiene programs; conformance with federal occupational safety and health regulations.

OMGT4313 Law and Ethics (Sp, Su, Fa) Analysis of the fundamental legal principles applicable in protecting the rights and interests of individuals and organizations; court systems and litigation processes; constitutional law and legislation, tort and discharge of contracts; agency relationships; torts; labor laws; patents; trademarks; copyrights; unfair competition; ethics; professional relations. Not for graduate credit.

OMGT4332 Industrial Cost Analysis (Sp, Su, Fa) Use of accounting information for planning and control from a management viewpoint; principles of cost accounting and other aspects of production costs; budgeting, depreciation, taxes, distribution of profits, securities, sources of corporate capital, and interpretation of financial statements. Not for graduate credit.

OMGT5433 Applied Statistics (Sp, Su, Fa) Fundamentals of probability and distribution theory with applications in managerial decision making. Descriptive methods, probability distributions, sampling distributions and hypothesis testing. Not for graduate credit.

OMGT4373 Quality Engineering and Management (Irregular) Provides the student with complete coverage of the functional area of “Quality Assurance”; ranging from the need for such a function, how it works, techniques utilized, and managerial approaches for insuring its effectiveness. Not for graduate credit.

OMGT4523 Automated Production (Fa) Industrial robots and robot programming, industrial logic control systems, programmable controllers for the control of work stations, and computer-aided design and microprocessors. Group technology, flexible manufacturing systems, and computer-integrated manufacturing laboratory required. Optional course for selected majors.

OMGT4553 Production Planning and Control (Sp) Operations management formulation including control of purchased material inventory; scheduling of a job shop, batch, and continuous production process for single and multi-item product lines; planning of work force and inventory under seasonable demand. Required course for selected majors. Not for graduate credit.

OMGT4583 Operations Productivity and Automation (Sp, Su, Fa) An examination of methods to improve industrial productivity including quality circles, robots, machine vision, programmable controllers, computer numerical control, and computer-assisted manufacturing.

OMGT4613 Production and Inventory Control (Sp, Su, Fa) Operational problems of production systems including control of purchased materials; scheduling of job shop, batch, and continuous production processes; planning of work force and production under seasonal demand. Inventory control and demand strategies are compared.

OMGT4623 Strategic Management (Sp, Su, Fa) Case studies covering the spectrum of strategic management issues facing typical organizations. Designed to provide analysis and synthesis experience to apply principles of strategic operations management. Should be taken in last half of the degree program.

OMGT4783 Project Analysis and Control (Sp, Su, Fa) Introduction to the Critical Path Method and Program Evaluation and Review Technique (PERT) project planning and control methods; activity sequencing; time-cost trade-offs; allocation of manpower and equipment resources; scheduling activities; computer systems for PERT/CPM.

OMGT4873 Principles of Operations Research (Sp, Su, Fa) Surveys the mathematical models used to design and analyze operational systems. Contents include linear programming models, waiting line models, and management science. Applications of operations research are emphasized.

OMGT5003 Introduction to Operations Management (Sp, Su, Fa) An overview of the functional areas of Operations Management. Each class will consist of a capsule of the topics covered in other courses in depth. Required course for all majors in Operations Management.

OMGT5013 Operational Systems Design (Sp, Su, Fa) Fundamental tools for design and analysis of operational systems. Includes models and algorithms; materials handling, transportation, maintenance, standards, and control.

OMGT5113 Human Resource Management (Sp, Su, Fa) Human resource policies and practices are examined including legal foundations, classification and compensation plans, recruitment and selection processes, training, employment policies and morale, compensation, employee relations, and organization.

OMGT5123 Public Financial Administration (Sp, Su, Fa) Financial planning in military and civilian operations; the application of budgets and controls for operational systems. OMGT 5133 Operations Management I the Service Sector (Sp, Su, Fa) History of the operations management in the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service and others. Emphasizes the principles and methodologies applicable to the solution of problems within the service industries. Prerequisite: graduate standing.

OMGT5143 Contemporary Issues in Human Resource Management (Irregular) Emerging issues affecting employees in the workplace: impact on productivity, economic productivity issues. Impact of such issues as diversity, job evaluation, compensation, incentive pay, retention, and the aging workforce. Legal aspects of FMLA, EAP, and ADA are included. Students will develop a wage survey and an action plan to implement into an organization.

OMGT5223 Safety and Health Standards Research (Sp, Su, Fa) For graduate students who seek Certified Professional or Certified Industrial Hygienist status, or both.

Includes review and development of computer databases for standards, interpretations, court decisions, and field memorandum, test equipment and procedures for determining indoor air quality. Corequisites: INEG 4223 and OMGT 4303. (Same as INEG 5223)

OMGT5373 Quality Management (Sp, Su, Fa) Implementation of modern quality assurance techniques in military and civilian operations. Includes quality control methods and control charts. Acceptance sampling plans with emphasis upon Department of Defense procurement standards.

OMGT5423 Operations Management & Global Competition (Sp) Studies of principles and cases in business/industrial administration in global competition. Survey of markets, technologies, multinational corporations, cultures, and customs. Discussion of ethics, professionalism, difference valuing, human relations skills, and other topics relevant to global engineering practice. Required course for INEG 5433.

OMGT5433 Cost Estimation Models (Sp, Su, Fa) An examination of the methodologies for estimating and forecasting manufacturing costs. Types of cost recovery systems, work process functions, product improvement curves, determination of hourly rates, parametric estimating, and the development of software for computer-aided estimating systems. Prerequisite: INEG 3513 and INEG 3883. (Same as INEG 5433)

OMGT5463 Economic Decision Making (Sp, Su, Fa) Principles of economic analysis with emphasis upon discounted cash flow criteria for decision making. Comparison of criteria such as rate of return, annual cost, and present worth for the evaluation of project alternatives.

OMGT5503 Maintenance Management (Sp, Su, Fa) Principles and practices of maintenance department organization, prevention procedures, and typical equipment problems. Includes related topics such as plant protection, preventative, and plant maintenance.

OMGT5733 Human Factors Analysis (Sp, Su, Fa) Psychological and physiological factors to be considered by the operations manager. Human perceptual and work capacities are examined in relation to various task situations, with emphasis on controlling and monitoring tasks. Fundamental design factors are also considered. Human behavioral aspects of management decisions are considered.

OMGT577V Special Problems (Sp, Su, Fa) Application of previous work knowledge to problems encountered in modern military and civilian operations. Problems are proposed by students according to individual interests and needs.

OMGT5823 Computer Applications (Sp, Su, Fa) Computer systems for application in military and civilian operations management problems. Coding of operations models and currently available software systems. Microcomputers, minicomputers, and time-sharing systems. Networking and navigation of the Internet as a resource for solving operations management problems.

OMGT5873 Organization and Control (Sp, Su, Fa) Examination of organizational decision making authority, structures, and controls. Functions of management-planning, organizing, staffing, directing, and controlling. Comparison of military and civilian environments for the implementation of management principles.

OMGT600V Masters Thesis (Sp, Su, Fa) (1-6)

(PAMD) PUBLIC ADMINISTRATION

PADM5803 Quantitative Methods Analysis (Fa) Data analysis techniques, including descriptive and inferential statistics and packaged computer programs. Prerequisite: (Appropriate undergraduate statistics course or equivalent) and graduate standing.

PADM5813 Methods in Public Management Information (Sp) Quantitative approaches toward an understanding of public administration and statistical tools essential to administrative problems. Prerequisite: PADM 5803 or equivalent and graduate standing.

PADM5823 Grantwriting for the Social Sciences (Irregular) This course will teach students the fundamen-
tals of obtaining grants from local, state and federal agencies. PADMSV4 Special Topics in Public Administration (Irregular) (1-3) topics vary.
PADMSV7 Professional Development (Sp, Su, Fa) (1-6) Encompasses internships, professional projects if individual is employed full-time and not eligible for an internship, conference and workshop participation, and other activities conducive to the students development as a public service professional.
PADMSV8 Directed Readings (Sp, Su, Fa) (1-3) Prerequisite: graduate standing.
PADMSV9 Independent Research (Sp, Su, Fa) (1-3) Prerequisite: graduate standing.

(PHED) PHYSICAL EDUCATION / ACTIVITY

PEAC1111 Adaptive Activities (Sp, Fa) Instruction and participation in sports, recreational and fitness type activities.

PEAC1121 Adaptive Activities (Sp, Fa) Instruction and participation in sports, recreational and fitness type activities.

PEAC1131 Beginning Swimming (Sp, Fa) Includes: essentials of water safety; basic strokes and techniques of swimming and beginning diving.

PEAC1151 Beginning Fitness (Sp, Fa) Instruction and participation in various types of aerobic and strengthening water activities.

PEAC1221 Beginning Jogging (Sp, Fa) Instruction and participation in an aerobics program.

PEAC1231 Beginning Bowling (Sp, Fa) Instruction and participation in bowling.

PEAC1241 Beginning Volleyball (Sp, Fa) Instruction and participation in volleyball.

PEAC1251 Beginning Racquetball (Sp, Fa) Instruction and participation in racquetball.

PEAC1351 Beginning Golf (Sp, Fa) Instruction and participation in golf.

PEAC1371 Beginning Fencing (Sp, Fa) Instruction and participation in fencing.

PEAC1391 Fitness Walking (Sp, Fa) Instruction and participation in vigorous walking for cardiovascular development and improvement.

PEAC1401 Beginning Gymnastics for Men’s Apparatus (Sp, Fa) Instruction and participation in gymnastics apparatus.

PEAC1411 Beginning Gymnastics for Women’s Apparatus (Fa, SP) Instruction and participation in gymnastics with women’s apparatus.

PEAC1421 Beginning Tennis (Sp, Fa) Instruction and participation in tennis.

PEAC1471 Beginning Badminton (Sp, Fa) Instruction and participation in badminton.

PEAC1491 Beginning Archery (Sp, Fa) Instruction and participation in archery.

PEAC1571 Beginning Handball (Sp, Fa) Instruction and participation in handball.

PEAC1611 Beginning Concepts (Sp, Fa) Acquaints students with a basic knowledge, understanding, and value of physical activity as related to optimal wellness.

PEAC1631 Beginning Self Defense (Sp, Fa) The fundamental techniques of dealing with assailants.

PEAC1641 Beginning Judo (Sp, Fa) The fundamental skills of judo.

PEAC1651 Beginning Karate-Do (Sp, Fa) The fundamental skills of karate-do as a martial art.

PEAC1661 Weight Training (Sp, Fa) Instruction and participation in weight training.

PEAC1801 Aerobic Dance I (Sp, Fa) The fundamental skills of aerobic dance as a physical fitness program.

PEAC1811 Beginning Canoeing (Sp, Fa) Instruction and participation in canoeing.

PEAC1831 Beginning Scuba Diving (Sp, Fa) Instruction and participation in scuba diving. Corequisite: Drill component.

PEAC1901 Special Topics (Sp, Fa) Instruction and participation in specialized activity.

PEAC2111 Intermediate Swimming (Sp, Fa) Honeymaiot of basic strokes and techniques of swimming and progressive instruction in skills and techniques of diving. Prerequisite: PEAC 1131 or equivalent.

PEAC2211 Intermediate Volleyball (Sp, Fa) A continuation of the study and practice of volleyball fundamentals with emphasis on advanced skills and strategies.

PEAC2251 Intermediate Racquetball (Sp, Fa) A continuation of the study and practice of racquetball fundamentals with emphasis on advanced skills, tournament play and strategy. Prerequisite: PEAC 1251.

PEAC2351 Intermediate Golf (Sp, Su, Fa) A continuation of the study and practice of golf fundamentals with emphasis on advanced skills. Prerequisite: PEAC 1351 or equivalent.

PEAC2371 Intermediate Fencing (Sp, Fa) A continuation of the study and practice of fencing fundamentals with emphasis on improvement of techniques already possessed by the student and mastery of advanced techniques. Prerequisite: PEAC 1371 or equivalent.

PEAC2421 Intermediate Tumbling (Sp) The fundamentals of tumbling from basic rolls and balances to aerial movement and combinations. Prerequisite: PEAC 1401 and PEAC 1411.

PEAC2431 Intermediate Tennis (Sp, Su, Fa) A continuation of the study and practice of tennis fundamentals with emphasis on advanced skills, strategy, knowledge, and doubles play. Prerequisite: PEAC 1431 or equivalent.

PEAC2521 Adaptive Activities (Sp, Fa) Instruction and participation in sports, recreational and fitness type activities.

PEAC2611 Intermediate Self Defense (Sp, Fa) A continuation of the study and practice of self defense with emphasis on advanced skills. Prerequisite: PEAC 1631.

PEAC2641 Beginning Karate (Sp, Fa) A continuation of the study and practice of judo fundamentals with emphasis on advanced skills. Prerequisite: PEAC 1641.

PEAC2651 Intermediate Karate (Sp, Fa) A continuation of the study and practice of tae-kwon-do with emphasis on advanced skills. Prerequisite: PEAC 1651.

PEAC2801 Aerobic Dance II (Sp, Su, Fa) A continuation of the study and practice of aerobic dance fundamentals with emphasis on improvement of physical fitness already possessed by the student. Prerequisite: PEAC 1801.

(PERS) PERSIAN

PERS1016 Intensive Persian I (Irregular) This course is designed for students of beginning Persian. The major objectives of the course are to develop listening, speaking, writing, and reading skills through the study of authentic aural, written, and visual texts and through in-class communicative activities; and to explore historical, literary, and artistic manifestations of Iranian culture.

PERS2016 Intensive Persian II (Irregular) This course is an intermediate course designed to increase reading efficiency through scanning, skimming, taking notes, summarizing, and writing authentic texts in Persian. Grammar, syntax, and vocabulary are also emphasized in this course. Students should have completed six hours in elementary Persian or have equivalent exposure to the Persian language. Prerequisite: PERS 1016 or permission of instructor.

(PHED) PHYSICAL EDUCATION

PHED2003 Teaching Styles/Lesson Planning (Sp, Fa) This course will present a variety of teaching techniques that can be utilized to convey the K-12 physical education curriculum. Discussion will also focus on proper planning procedures to assure efficient delivery of physical education lessons.

PHED2013 Teaching Progressions and Assessment of Basic Skills (Sp, Fa) This course serves as an introduction to motor analysis. Participation is placed on teaching and task analysis of locomotor, non-locomotor, and manipulative skills.

PHED2023 Teaching Progressions and Assessment of Advanced Skills (Sp, Fa) This course is designed to teach the progression and analysis of motor and sports skills. Specific emphasis is on the commonalities of various motor skills that apply to various sports movements. Prerequisite: PHED 2013. PHED2122 Coaching Baseball (Sp) Discussion and participation of preseason and in-season training methods, skill development and administrative principles in the coaching of baseball. Prerequisite: PHED2142 Coaching Track and Field (Sp) Discussion and participation of preseason and in-season training methods, skill development and administrative principles in the coaching of track and field. Prerequisite: sopho- more standing.

PHED2252 Coaching of Football (Sp) Discussion and participation in preseason and off-season training methods, skill development and administrative principles in the coaching of basketball. Prerequisite: sophomore standing. PHED3001 Practicum I (Fa) All 4-year teaching option majors serve as teaching assistants in 1 physical education or dance education class under an experienced teacher. Prerequisite: junior standing.

PHED3012 Teaching Games (Fa) This course is designed to provide opportunities for the student to acquire an understanding of developmentally appropriate games and why they should be part of a physical education program. Prerequisite: PHED 2003 and PHED 2013 and junior standing.

PHED3022 Teaching Stunts and Tumbling (Sp) Instructional strategies for teaching public school students stunts and tumbling skills. Prerequisite: PHED 2003 and PHED 2013 and senior standing.

PHED3032 Teaching Rhythms (Sp) Designed to teach K-12 Physical Education students how to program, teach, develop and implement rhythmic activity. Prerequisite: PHED 2003 and PHED 2013 and junior standing.

PHED3042 Teaching Fitness (Fa) Instructional strategies for teaching public school students about fitness concepts. Prerequisites: PHED 2003 and PHED 2013 and junior standing.

PHED3203 Principles and Problems of Coaching (Sp, Fa) A focus on the various types of coaching the athletes in contemporary society through an examination of research findings related to factors affecting performance. Attention to be given to problems, principles and understanding essential to the management of athletic contests. Prerequisite: junior standing.

PHED3373 Methods and Materials in Physical Education for Elementary School (Sp, Su, Fa) Program planning and techniques of teaching physical education activities to children; for early childhood and elementary teachers, supervisors, and principals. Prerequisite: junior standing. (Same as PHED 3873)

PHED3903 Physical Education for Special Populations (Sp, Fa) Provides fundamental concepts and skills essential to physical education programming for handicapped students. Deals with definitions, handicapping conditions, developmental and remedial activities, games, and sports. Prerequisite: junior standing.

PHED4001 Practicum II (Sp, Su, Fa) All 5-year teaching option majors serve as a coaching assistant at the K-12 level. Prerequisite: senior and junior standing. (Same as PHED 2001)

PHED4053 Teaching Individual/Dual Sports (Sp, Fa) Instructional strategies for teaching individual and dual sport concepts to public school children. Corequisite: PHED 4063. Prerequisite: (PHED 2003 and PHED 2013 and PHED 2023) and junior standing.

PHED4063 Teaching Team Sports (Sp, Fa) Instructional strategies for teaching team sport concepts to public school children. Corequisite: PHED 4053. Prerequisite: (PHED 2003 and PHED 2013 and PHED 2023) and junior standing.

PHED474V Student Teaching-Elementary (Sp, Su, Fa) (1-12) involves time at an off-campus school, where the student teacher has an opportunity under supervision to observe, to teach, and participate in other activities involving school and the community.

PHED475V Student Teaching-Secondary (Sp, Su, Fa) (1-16) involves time at an off-campus school, where the student teacher has an opportunity under supervision to observe, to teach, and participate in other activities involving school and the community.

PHED480V Workshop (Sp, Su, Fa) (1-6) Prerequisite: (Same as PHED 480V) and PHED 4003. Prerequisite: (PHED 2003 and PHED 2013 and PHED 2023) and junior standing.

PHED5011L Measurement/Research/Statistics Laboratory (Sp, Su, Fa) Cohort 5th year course. Application of content, principles, and concepts needed to become an effective evaluator/ researcher in kinesiology.

PHED5023 Class Management (Sp, Su, Fa) 5th year class that emphasizes class management; includes professional ethics and school policies related to students, faculty and programs. A major part of course time will be field based.

PHED503IL Curriculum Design Laboratory (Sp, Su, Fa) This cohort 5th year course reviews curriculum mod-

Course Descriptions
Course Descriptions

PHIL1203 Reflective Thinking (Sp, Su, Fa) Helping students develop critical thinking skills. Degree credit may not be earned for both 1203 and 2203.

PHIL2003C Introduction to Philosophy (Sp, Su, Fa) An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. Corequisites: MATH 1301, 1302, 2301. (Sp, Su, Fa) PHIL 2003.

PHIL4023 Philosophy of Mind (Sp, Su, Fa, Irregular) An examination of such topics such as the relationship between mind and body, the nature of the quantum mechanical world, and the temporal and spatial modalities of the universe. Topics covered may include the relationship between mind and body, and the role of God in the universe. Degree credit may not be earned for both PHIL 1203 and 2203. (Same as PHIL 2003).

PHIL4083 Existentialism (Sp) An examination of such topics such as the role of God in the universe, the nature of the quantum mechanical world, and the temporal and spatial modalities of the universe. Degree credit may not be earned for both PHIL 1203 and 2203. (Same as PHIL 2003).

PHIL4083 Existentialism (Sp) An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. Corequisites: MATH 1301, 1302, 2301. (Sp, Su, Fa) PHIL 2003.

PHIL4083 Existentialism (Sp) An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. Corequisites: MATH 1301, 1302, 2301. (Sp, Su, Fa) PHIL 2003.

PHIL4083 Existentialism (Sp) An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. Corequisites: MATH 1301, 1302, 2301. (Sp, Su, Fa) PHIL 2003.
PHYS4513 Quantum Mechanics I (Fa) Non-relativistic quantum mechanics; the Schrodinger equation; the Heisenberg matrix representation; operator formalism; transformation theory; spinors and Pauli theory; the Dirac equation; applications to atoms and molecules, collision theory, semiclassical theory of radiation. Prerequisite: PHYS 4073.

PHYS55423 Advanced Electrodynamics (Sp) Continuation of PHYS 5413. Prerequisite: PHYS 5413.

PHYS55513 Atomic and Molecular Physics (Odd years, Sp) Survey of atomic and molecular physics with emphasis on the electronic structure and spectroscopy on 1s and 2 electron atoms, and diatomic molecules. Includes line and hyperfine structure. Zeeman and Stark mixing of states, collision phenomena, radiative lifetimes, and experimental techniques. Prerequisite: PHYS 4073 or PHYS 5413.

PHYS55523 Theory of Relativity (Irregular) Conceptual and mathematical structure of the special and general theories of relativity with selected applications. Critical analysis of Newtonian mechanics; relativistic mechanics and electrodynamics; tensor analysis; continuum media; and gravitational theory. Prerequisite: PHYS 5103.

PHYS55713 Quantum Mechanics (Even years, Sp) Quantum mechanics. Topics include: perturbation theory; applications of matrices, tensors, and linear vector spaces to problems in quantum mechanics; elementary probability; applications to quantum mechanical operators. Prerequisites: PHYS 4073 or PHYS 5413.

PHYS5574V Internship in College or University Teaching (Sp, Su, Fa) Supervised field experience in student personnel services, college administration, college physical plant, institutional research, development, or other areas of college and university work. Prerequisite: PHYS 400.

PHYS55754 Applied Nonlinear Optics (Odd years, Sp) A combined lecture/laboratory course covering the theory of laser operation, laser resonators, propagation of laser beams, specific lasers such as gas, solid state, semiconductor and chemical lasers, and laser applications in medicine and technology devices. Prerequisite: PHYS 4073 and PHYS 5413.

PHYS55774 Lightwave Communication (Even years, Sp) A laboratory-based course on light propagation in planar and fiber waveguides, optical coupling, operation principles of semiconductor lasers, detectors, and LEDs, hands-on experience with applications in communication systems. Prerequisite: PHYS 3414 or ELEG 3703.

PHYS5811 Research and Operations Management Seminar (Sp, Su, Fa) Weekly seminar of physics candidates for the Doctor of Philosophy degree to discuss issues that impact a technical group's research and operational effectiveness. Topics include ethics, applications of procedures, cultural impact on operations, and team-based methodologies, as well as current events in the interface between technology and human affairs. Prerequisite: physics graduate standing and PHYS 5811.

PHYS700V Doctoral Dissertation (Sp, Su, Fa) (1-18)
topics of current interest not covered in other courses in plant pathology or related areas. Prerequisite: graduate standing.

PLPA6500L. Prerequisite: MBIO 2013 and MBIO 2011L.

PLPA6600L. Prerequisite: graduate standing.

PLPA6603 Plant Pathogenic Fungi (Odd years, Fa) Plant Pathogenic fungi is structured as an integrated lecture/laboratory class designed for students who are interested in an understanding and appreciation for taxonomy, biology, and ecology of plant pathogenic fungi and related saprophytic fungi. Corequisite: PLPA 5600L. Prerequisite: graduate standing.

PLPA6713 Introduction to Electron Microscopy (Sp) Use of the electron microscope in biological research, including the preparation of various plant and animal specimens and their observation with the electron microscope. Lecture 1 hour, laboratory 4 hours per week. Prerequisite: graduate standing.

PLPA600V Master's Thesis (Sp, Su, Fa) (1-3) Prerequisite: graduate standing.

PLPA6203 Plant Virology (Odd years, Fa) Lecture emphasizing discussion of recent advances in plant virology. Laboratory concerned with techniques and equipment used in plant virus studies, including transmission of viruses and characterization utilizing ultracentrifugation, spectrophotometry, electrophoresis, electron microscopy, and serology. Lecture 2 hours, laboratory 3 hours per week. Corequisite: PLPA 6200L. Prerequisite: graduate standing.

PLPA6303 Plant Nematology (Even years, Fa) Nematodes and their relationship to plant diseases, with consideration of identification, morphology, biology, distribution, symptoms, pathogenicity, management, and control. Lecture 2 hours, laboratory 2 hours per week. Corequisite: PLPA 6300L. Prerequisite: graduate standing.

PLPA6503 Plant Bacteriology (Odd years, Sp) Current topics in plant bacteriology, including taxonomic, ecological and molecular aspects of plant pathogenic bacteria and their interactions with hosts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: PLPA 6500L. Prerequisite: MBIO 2013 and MBIO 2011L.

(PLSC) POLITICAL SCIENCE

PLSC2003H Honors American National Government (Fa) Survey of the history, basic ideas, structure, and political processes of the national government of the United States, including the fundamental relationships of the United States with the federal system. Required of all political science majors. (Same as PLSC 2003, PLSC 2003I)

PLSC2003 American Government (Sp, Su, Fa) Survey of the history, basic ideas, structure, and political processes of the national government of the United States, including the fundamental relationships of the federal system. Required of all political science majors. (Same as PLSC 2003)

PLSC2013 Introduction to Comparative Politics (Sp, Su, Fa) An in-depth survey of comparative political systems. (Same as PLSC 2013)

PLSC2203 State and Local Government (Sp, Fa) Organization and functions of state and local governments in the United States; governmental relations, administration, adjudication, and the organization and function of political parties on state and local levels. (Same as PLSC 2203)

PLSC2313 Introduction to International Relations (Sp, Su) Introduction to the international system, theories of international behavior, political economy, conflict and peacemaking, the United Nations and law and organizations, and the nature of the post-Cold War world. (Same as PLSC 2013I)

PLSC300V Internship in Public Affairs (Sp, Su, Fa) (1-3) Work experience in a public agency arranged by the student under the guidance of a faculty member. Paper required.

PLSC3103 Public Administration (Sp, Fa) Trends and organization of public administration, dynamics of management, public and personnel management, administrative powers and responsibility. Prerequisite: PLSC 3003.

PLSC3113 Dynamics of Service Sector Organizations (Sp) Study of service sector organizations (public and private organizations). Emphasis is placed on management challenges, conflict resolution, leadership and accountability of these organizations. The course addresses recent changes in the environment of service organizations such as the emergence of public private partnerships.

PLSC3153 Public Policy (Sp) A study of public policy formulation, implementation, and evaluation at various levels of government. Prerequisite: PLSC 3003.

PLSC3183 Public Personnel Management (Sp, Su, Fa) Development of the merit system in government, career systems, human resource planning and development, labor relations, employee compensation, and performance evaluation of public personnel systems. Prerequisite: PLSC 3003.

PLSC3203 Political Opinion (Fa) Survey of the processes by which people formulate their opinions on public matters and the relative influence of various institutions on the making of decisions. Prerequisite: PLSC 2203.

PLSC3223 Arkansas Politics (Fa) The political system of Arkansas including the political process, public policy, social problems, political behavior, governmental structure, and contemporary issues. Prerequisite: PLSC 2003.

PLSC3243 The Judicial Process (Fa) The structure and operation of the state and national court systems. Emphasis is upon the role of the judiciary in the American political system and the political aspects and consequences of judicial decision-making. Prerequisite: PLSC 3003.

PLSC3253 Urban Politics (Fa) Analysis of comparative urban systems, including political process, public policy, social problems, governmental structure, and voter behavior. Prerequisite: PLSC 2003.

PLSC3523 Politics of the Middle East (Sp, Su, Fa) Survey of the unity and diversity in the political development of the Middle East, as evident in historical legacies, state formation, civil society, social class, and political identity. Prerequisite: PLSC 2003.

PLSC3533 Political Development (Fa) Introduction to the study of political development in Asia, Latin America, Middle East). Comprising 2/3 of states, they share a legacy of foreign intervention and economic need. We examine diverse approaches: modernization, dependency, class, political economy. Within these include debt, gender, ideological empowerment, human rights, gaps between theory and practice. Prerequisite: PLSC 2013.

PLSC3553 Western European Politics (Fa) Comparative analysis of Western European parliamentary systems with special attention to political traditions, constitutional arrangements, socio-economic structure, and the political and legislative processes in countries such as Britain, France, and Germany. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC3573 Governments and Politics of Latin America (Irregular) Introduction to the political systems of American political forces and institutions with special attention to patterns and problems of political change and development in that area. Prerequisite: PLSC 3003.

PLSC3650 Ecological Methods of Political Science (Irregular) The basic principles and assumptions of political inquiry (methodology) and research techniques for gathering and analyzing data about political phenomena. Prerequisite: PLSC 2003.

PLSC3803 International Organization (Fa) The theory and practice of international organizations past and present, with emphasis on the United States and a critical examination of current events. For junior standing.

PLSC3813 International Law (Sp) Analysis of the traditional principles of public international law including the law of war, the law of sea and air, and the legal nature of statehood; and analysis of selected principles of private international law relevant to such topics as the multinational corporation, international arbitration, commerce with Communist states, and the expropriation of foreign property. Prerequisite: junior standing.

PLSC3823 Theories of International Relations (Sp, Fa) Analysis of major intellectual traditions in the field of international relations, including idealism, realism, and social constructivism. Emphasis will be placed on how they help us to understand war, revolution, global capitalism, nationalism, peace, and other significant international phenomena. Prerequisite: PLSC 2203.

PLSC3853 American Foreign Policy (Sp, Fa) The structure and process for making and implementing the foreign policy of the United States, and an evaluation of current policies in the contemporary international milieu. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC3913 American Political Thought Before 1900 (Fa) Major ideas, issues, and arguments in American Political Thought from the colonial period to approximately 1900. Prerequisite: PLSC 2003H Honors Colloquium (Irregular) Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy in political science.

PLSC3923 Contemporary American Political Thought (Sp) Twentieth century American political thought, including who should participate, expanding concepts of freedom, political economy, equality, feminism, conservatism and liberalism.

PLSC394V Readings in Political Science (Sp, Su, Fa) (1-3) For advanced students who wish to study some field of political science beyond the course offering available in that field. Prerequisite: junior standing.

PLSC3953 Ancient and Medieval Political Thought (Fa) Leading political works by classical writers during Greece and mediaeval Europe.

PLSC3963 Modern European Political Thought (Sp) Major European political writings from Machiavelli to the present. Prerequisite: junior standing.

PLSC3973 Twentieth Century Political Thought (Sp) Twentieth century political thought including authority, obligation, dissent, government and economy, politics and technology, alienation, anarchism, pacifism, positivism and existentialism within the general context of democratic-contemporary controversies.

PLSC3983 Politics in Literature (Sp) Analysis of political theories and issues through extensive reading and discussion of selected works of literature. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC399V Honors Course (Sp, Su, Fa) (1-3) Prerequisite: junior standing.

PLSC400V Special Topics (Irregular) (1-3) Topics in political science not usually covered in other courses.

PLSC4053 Political Sociology (Fa) Analysis of political institutions and movements in relation to power, social class and the state. Prerequisite: PLSC 4050.

PLSC4119 Administrative Law (Sp) Legal aspects of the administrative process and the effect of legal principles and processes upon administrative decision-making. Emphasis is given to the judicial review and the judicial review of administrative decision. Prerequisite: PLSC 3103 or PLSC 4253.

PLSC4203 American Political Parties (Sp, Fa) The nature, function, and history of political parties in the United States with emphasis on party membership, organization, campaign techniques, finance and electoral alliances. Prerequisite: PLSC 2003.

PLSC4213 Campaigns and Elections (Irregular) This course examines the American electoral process. It is an empirical course that provides opportunities for original analysis of survey data and election returns. Emphasis is placed on the most recent federal election.

PLSC4223 The American Congress (Fa) Thorough examination of the constitutional role of the legislative branch under the Constitution; the internal procedures and personalities of the Senate and House; the central place of Congress in shaping domestic and foreign policy. Prerequisite: PLSC 2003.

PLSC4233 The American Chief Executive (Sp) Offices and roles of the President and state governors of the United States focusing on the President in terms of responsibilities and political leadership. Prerequisite: PLSC 2003.

PLSC4243 Minority Politics (Fa) Reviews political analysis and concepts of political behavior of minority groups, focusing on contemporary political behavior.

PLSC4253 The Supreme Court and the Constitution (Fa) United States Supreme Court decisions involving the functions and powers of Congress,
the Supreme Court, and the President and federalism. Prerequisite: PLSC 2003.

PLSC428V Behavior (Sp) Inflammatory soundTrack that constitutes the inter-American system, (Sp) United States Supreme Court decisions interpreting the political, economic, and civil rights of individuals and groups. Prerequisite: PLSC 2003.

PLSC4292 Comparative Politics (Sp) Examines the role of the individual in the polity including basic psychological constructs of relevance to political action, the formulation and maintenance of stable political orientations, the patterns linking individual, party, polity, and major modes of inquiry. Prerequisite: PLSC 2003.

PLSC4283 Federalism and Intergovernmental Relations (Sp, Su, Fa) Analysis of changes in inter-governmental relationships in the federal system. Discussions will focus on political, economic, and administrative aspects of policy changes of the pre-and post- Hegemony, third is devoted to comparative topics. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC4563 Government and Politics of Russia (Sp) Study of Russian and Soviet politics after 1917 and of the democratization of Russia and the other successor states. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC4573 Gender and Politics (Even years, Sp) Examines the significance of gender in politics. Includes discussion of the women’s movement and feminist theory, but emphasizes the content and process of public policy as it relates to women and men. Focus is on the U.S. but final third is in comparative topics. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC4583 Political Economy of the Middle East (Sp, Su, Fa) Examines the links between politics and economics in the Middle East and the impact of that nexus on development. Analyses of global and regional integration, oil states, statism development, liberalization and privatization, and resources and population movements to understand power and class in the area.

PLSC4593 Islam and Politics (Sp, Su, Fa) Compares contemporary Islamist political movements. Seeks to explain causes and consequences of such movements by linking strategies of Islamism in the political realm. Addresses sovereignty, the rule of law, visions of the good state and society, and relations between national- ism, religion and political development. Focus on Middle East with comparison to other regions in the world.

PLSC4803 Foreign Policy Analysis (Sp) Comparative analysis of foreign policy, with attention paid to explanations at a variety of levels, such as the individual, group, organizational, societal, systemic.

PLSC4813 Politics of the Cold War (Fa) Examines the cold war from different perspectives; nature of the international system during the cold war; American and Soviet perceptions of the cold war; domestic political considerations; impact of the cold war on the economy, culture, and society; end of the cold war; the post-cold war world.

PLSC4823 Foreign Policy of East Asia (Sp) This course provides an overview of the major strategies of the successor states. Prerequisite: graduate standing.

PLSC4843 The Middle East in World Affairs (Sp) An analysis of geo-political and socio-economic characteristics of the Middle East, Prerequisite; graduate standing.

PLSC4873 Inter-American Politics (Sp) An analysis of the political themes, regional organization, and hemi- spheric relations that constitute the inter-American system, with special emphasis on conflict and cooperation in the hemispheric policies of the American republics. Prerequisite: major standing.

PLSC4903 Democratic Theory (Sp, Su, Fa) Analysis and comparison of classical and contemporary theories of democracy.

PLSC4923 Karl Marx: Life, Work, and Legacy (Sp) This course examines the writings of Karl Marx. Students will read and discuss his major works, including Capital, The German Ideology, and Grundrisse. In order to understand Marx’s writing, students will also explore his life, times, and legacy.

PLSC496V Senior Thesis (Sp, Su, Fa) 1-6

PLSC499VH Honors Essay (Sp, Su, Fa) 1-3

PLSC5103 Human Behavior in Complex Organizations (Fa) Review of the fundamental literature and a systematic analysis of various theories and research focusing on organization and behavior in public administration, including the discussion of organizational development, human motivation, leadership, rationality, and conflict management in public organizations. Prerequisite: graduate standing.

PLSC5113 Seminar in Human Resource Management (Sp) Intensive study of public sector management issues and practices, including legal foundations, classifica- tion and compensation, personnel selection and recruitment processes, training, employment policies and morale, employee relations and organization. Prerequisite: graduate standing.

PLSC5123 Public Budgeting and Finance (Fa) Focuses on the budgeting process and governmental budgeting and finance, policy formulation, adoption, and execution. Prerequisite: graduate standing.

PLSC5133 Management of Service Sector Organizations (Sp) This course provides an overview of the principal management functions in public and non-profit organizations. Topics include financial management, SWOT analysis, program planning, program evaluation, personnel management, and decision-making. Special attention focus on the nature of the rule-making and adjudicatory powers of public agencies and on executive, legislative, and judicial restraints on such activities. Also considered is the role, scope, and place of public regulatory activities. Prerequisite: graduate standing.

PLSC5153 Environmental Politics and Policy (Even years, Fa) Surveys recent patterns of environmen- talism in the U.S. and explores the nature of policy making with regard to environmental and economic development issues. Includes an overview of institutions, issues reviewing interests in environmental issues, privatization vs. preservation, multiple use vs. sustainability, intergovern- mental policy implementation, incentives, and free market environmentalism.

PLSC5163 Public Policy (Sp) A seminar providing an overview of public policy making and the role of public policy in complex human systems. Attention given to issues dealing with cognitive limitations in decisional settings, the use of reasoned persuasion vs. power, the appropriate application of technical analysis. Prerequisite: graduate standing.

PLSC5183 Comparative Public Administration (Irregular) A comparative study of administrative structures and processes in selected modern and modernizing political systems. Analysis includes the consideration of cultural, legal and political factors influencing the operation of bureaucratic institutions, developmental goals, and the methods of estab- lishing and adapting administrative techniques to economic and political development. Prerequisite: graduate standing.

PLSC5193 Seminar in Public Administration (Fa) An introduction to and synthesis of public administration theory, functions, history, public accountability and management concerns, economic impact of administrative decisions, cur- rent problems, and issues in the public sector. Prerequisite: graduate standing.

PLSC5203 Seminar in American Political Institutions (Fa) Research seminar dealing with aspects of the major governmental institutions in the United States. Prerequisite: graduate standing.

PLSC5213 Seminar in American Political Behavior (Sp) Reading and analytic seminar focusing on methodological research design and empirical research in the realm of American political behavior. Prerequisite: graduate standing.

PLSC5223 Seminar in Legislative Processes and Budgeting (Fa) Intensive study of legislative and budgetary processes and behavior in the United States. Prerequisite: graduate standing.

PLSC5233 Disability Policy in the United States (Sp, Su, Fa) An analysis of public policy approaches to disability in the United States. Examines the political and philo- sophical origins of disability policy; reviews major disability leg- islation and its effects on policy stakeholders; describes recent policy initiatives; analyzes policy making and policy change with context of changing societal, economic and political conditions. Prerequisite: graduate standing. (Same as RHAB 6203)

PLSC5243 Seminar in State and Local Politics (Sp) Research seminar focusing on state and local institutions and policies such as police and judicial institutions, and their role in the state and in local communities. Prerequisite: graduate standing.

PLSC5283 Seminar in Political Communication (Irregular) Research seminar focusing on topics such as candidate imagery, attentiveness to political information, or political symbolism. Prerequisite: graduate standing.

PLSC5303 Comparative Political Analysis (Fa) A selection of topics to provide the theoretical, conceptual and methodological foundation for the analysis of contempo- rary political topics. Prerequisite: graduate standing.

PLSC5523 Topics in Politics of the Middle East (Sp, Su, Fa) Explore the major lines of inquiry on the poli- tics of the state and society in the context of endogenous and exogenous forces that have influenced conceptions of power, identity, and governance in the Middle East. Prerequisite: graduate standing.

PLSC5553 Research Methods in Political Science (Sp, Su, Fa) Indepth analysis of specific political phenomen- ena in the contemporary Middle East. Inquiry will vary but may focus on gender, political economy, politics of inclusion and exclusion (democratization and authoritarianism), or the politics of oil. Prerequisite: graduate standing.

PLSC5563 Russian and Soviet Political Systems (Sp) Study of the political systems of the Soviet Union and the successor states. Prerequisite: graduate standing.

PLSC5573 Political Change in Latin America (Even years, Sp) Research seminar analyzing obstacles to political change in Latin America with a focus on major political events and American and Latin American research frameworks and tech- niques that deal with the theory and measurement of stability and change. Prerequisite: graduate standing.

PLSC560V Teaching Foreign Cultures in Social Studies Curriculum (Su) Introduction to foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. Four week residential summer institute. (Same as HIST 560V)

PLSC5803 Seminar in International Politics (Fa) 1-6 An intensive study of political phenomena in the contemporary world. Emphasis is given to selected topics in theories of international relations, the comparative study of foreign policy making, and international organiz- ing. Prerequisite: graduate standing.

PLSC5843 Seminar in Comparative Problems (Fa) A seminar with concentrated reading in selected and specialized areas of contemporary international relations. Prerequisite: graduate standing.

PLCS5843 International Legal Order (Sp) Survey of distinctive characteristics of international law. Topics include role of legal order in controlling the use of force in international relations and the impact of social and political environment on growth of international law and relations among international political systems. Prerequisite: graduate standing.

PLSC590V Directed Readings in Political Science (Sp) 1-18 Graduate students are directed to read and discuss his major works, including Capital, The German Ideology, Grundrisse which examines the constitutional and statutory basis and authority of public organizations. Special attention focus on the nature of the rule-making and adjudicatory powers of public agencies and on executive, legislative, and judicial restraints on such activities. Also considered is the role, scope, and place of public regulatory activities. Prerequisite: graduate standing.

PLSC5913 Research Methods in Political Science (Fa) Methods relevant to research in the various fields of political science. Required of all graduate students in political science. Prerequisite: graduate standing.

PLSC592V Internship in Political Science (Sp, Su, Fa) 1-6 Internship in a local, state, regional, or federal agency. Paper required on a significant aspect of internship experience. Prerequisite: graduate standing.

PLSC595V Research Problems in Political Science (Sp, Su, Fa) 1-3

PLSC5963 Modern Political Thought (Fa) European political thinking since the rise of the nation-state and the rel- evance of that tradition to contemporary politics. Prerequisite: graduate standing.

PLSC5973 Contemporary Normative Political
Theory (Sp) Analysis of current normative problems of political theory such as obligation, dissent, justification, sovereignty and tolerance, and major schools of thought including Marxism, liberalism and western conservatism. Prerequisite: graduate standing.

PLSC600V Master's Thesis (Sp, Su, Fa) 1-6

PLSC690V Directed Research (Sp, Su, Fa) 1-6

Doctoral level directed readings and research.

PORT1003 Elementary Portuguese I (Irregular) An introduction to basic Portuguese grammar with emphasis on listening comprehension and speaking skills.

PORT1003 Intermediate Portuguese II (Irregular) A continuation of PORT 1003. Prerequisite: PORT 1003 or equivalent.

PORT2003 Intermediate Portuguese I (Irregular) Review of basic grammar and further development of oral and reading skills.

PORT2013 Intermediate Portuguese II (Irregular) Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. Prerequisite: PORT 2003 or equivalent.

(POS) POULTRY SCIENCE

POSC1002L Introduction to Poultry Careers Laboratory (Fa) To expose the student to poultry career opportunities in the area of business, science, production and processing. Efforts will be made to develop communication skills through written and oral and group activities. Lecture 1 hour, laboratory 3 hours per week.

POSC2003 Fundamentals of Food Microbiology (Sp, Su, Fa) The impact of intrinsic or extrinsic factors on bacteria will be examined. Course information will address the basis of the Hudge Theory or creating multiple barriers to bacteria will be examined. Prerequisites: BIOL 1543 and BIOL 1541L.

POSC2554 Poultry Biology (Sp) Detailed coverage of the external and internal anatomy of poultry including formation and development of the egg and embryo. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1143.

POSC3013 Exotic Companion Birds (Fa) Formerly POSC 1013 Topics include basic care, health, breeding, bird evolution, anatomy, and nutritional management of commonly kept exotic companion birds, including parrots, cockatoos, macaws, finches, canaries, and pigeons. Discussion will include housing and care for individual pet birds and large scale breeding and production. Lecture/discussion 3 hours per week. Prerequisite: BIOL 1543.

POSC3032 Animal Physiology I (Fa) Fundamental aspects of health and disease and the cardiovascular system. The normal structure and function of these systems will be emphasized. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1074. (Same as ANSC 3032)

POSC3042 Animal Physiology II (Sp) Fundamental aspects of respiratory, renal, digestive, and endocrine physiology will be covered. The normal structure and function of these systems will be emphasized. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: ANSC 3032 or POSC 3032. (Same as ANSC 3042)

POSC3123 Principles of Genetics (Fa) Fundamentals of animal genetics with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and BIOL 1541L and MATH 1203. (Same as ANSC 3123)

POSC3233 Poult Diseases (Fa) Common diseases affecting poultry reared under commercial conditions will be covered including diagnosis, therapy and prevention. Immunity, sanitation practices, and chemophrophylaxis will also be covered. Prerequisite: students will have some comportations, slides and videotapes. Prerequisite: MIBIO 2013 and MIBIO 2011L and junior standing.

POSC3382 Poultry Judging and Selection (Sp, Fa) Practice in judging and flock selecting. Laboratory 4 hours per week.

POSC400V Special Problems (Sp, Su, Fa) 1-9 Special problems in the poultry sciences for advanced students.

POSC410V Internship in Poultry Science (Sp, Su, Fa) 1-6 Supervised work experience with private or government organizations to introduce students to professional areas of work in poultry, meat, and immunology. Prerequisite: junior standing.

POSC423 Advanced Topics in Food Safety Management (Sp, Su, Fa) This capstone experience for students in the HACC-P Certificate/Certification program requires completion of selected reading materials prior to spending an intensive week in an on-campus institute at UAF. Activities include group projects, case studies, online library resource acquisition and industry/regulatory HACCP Round table discussions. Prerequisite: instructor permission.

POSC4304 Statistical Process Control in the Food Industry (Sp, Su, Fa) Analysis of processing data related to food safety, quality, governmental critical limits and customer specifications. Prerequisite: Students will have some knowledge of statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Covers quality topics appropriate for students following food technology, quality assurance, and manufacturing. Web-based. Prerequisite: instructor permission.

POSC410V Special Topics in Poultry Science (Sp, Su, Fa) 1-4 Topics not covered in other courses or for a more intensive study of specific topics in poultry science. Prerequisite: POSC 1003.

POSC4213 Integrated Poultry Management Systems (Sp) Major management systems in the integrated commercial poultry industry. Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Prerequisite: POSC 235.

POSC4223 Risk Analysis for Biological Systems (Odd years, Fa) Principles of risk assessment including exposure assessment and dose response, and risk management. Methods of risk analysis modeling and simulation with computer software. Applications of risk analysis in animal, food and environmental systems. Prerequisite: STAT 2023 or (STAT 2033 or AGST 4023) and BENG 1022. (Same as JHDL 4229)

POSC4314 Egg and Meat Technology (Fa) Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional, and microbiological characteristics of added and processed products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Corequisites: POSC 4310L. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 1121L.

POSC4333 Poultry Breeding (Odd years, Fa) Application of new developments in poultry breeding for efficient egg and meat production. Lecture 3 hours per week. Prerequisite: POSC 3123 or ANSC 3123 and junior standing.

POSC4343 Poultry Nutrition (Sp) Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Prerequisite: CHEM 2613 and CHEM 2611L and junior standing.

POSC4434 Fundamentals of Reproductive Physiology (Fa) Principles of avian reproductive physiology with emphasis on poultry. Lecture 3 hours, laboratory 3 hours per week. Prerequisite: POSC 1002L and POSC 3123.

POSC4743 Analytical Methods in Animal Nutrition (Sp) Experience in the techniques used in the modern animal nutrition laboratory and interpretation of experimental data. Lecture 1 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L.

POSC4890 Undergraduate Seminar (Sp) Required by all poultry science majors. Prerequisite: junior standing.

POSC500V Special Problems (Sp, Su, Fa) 1-6 Work in special problems of poultry industry. Prerequisite: graduate standing.

POSC510V Special Topics in Poultry Sciences (Irregular) 1-4 Topics not covered in other courses or for a more intensive study of specific topics in poultry science. Prerequisite: graduate standing.

POSC5123 Advanced Animal Genetics (Even years, Fa) Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: PLUP-J2132 or ANSC 3123. (Same as ANSC 5123)

POSC5143 Biochemical Nutrition (Even years, Fa) Interrelationships of nutrition and physiological chemistry. Structure and metabolism of carbohydrate, lipid, and protein systems. Prerequisite: CHEM 3813. (Same as ANSC 5143)

POSC5152 Protein and Amino Acid Nutrition (Even years, Sp) Students will be introduced to the basic processes of protein digestion, amino acid absorption, trans- port, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Same as ANSC 5152)

POSC5313 Domestic Animal Bacteriology (Fa) A study of bacteria pathogenic for domestic animals. Lecture 3 hours per week.

POSC5343 Advanced Immunology (Sp) Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in basic immunology prior to enrollment in Advanced Immunology is recommended. Prerequisite: Requirement. Lecture 3 hours per week. (Same as MIBIO 5343)

POSC5352L Immunology in the Laboratory (Sp) Laboratory course on immune-diagnostic labora- tory techniques and uses of antibody detection. Corequisite: Students will have cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: HJDL 5243 or MIBIO 5243 or MIBIO 4714. (Same as MIBIO 5352L, VTSCE 5352L)

POSC5742 Advanced Poultry Diseases (Fa) The most important diseases of poultry will be covered in depth and the course will focus on understanding mechan- isms of pathogenesis, diagnostic techniques and prin- ciples of prevention. Lecture/discussion 2 hours per week with Kodachrome slides and microscopic slides utilized. Prerequisite: POSC 3023. (Same as MBIO 5742)

POSC5743L Advanced Analytical Methods in Animal Sciences Laboratory (Fa) Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week.

POSC5752L Advanced Poultry Diseases Laboratory (Sp) POSC5763 Protozoan Parasites of Domestic Livestock and Companion Animals (Even years, Fa) Course topics will include economically and medically important protozoan parasites of domestic livestock and companion animals, with an emphasis on disease for animal and human health. Lecture/discussion 3 hours per week. (Same as ANSC 5763). Prerequisite: general undergraduate biology.

POSC5853 Advanced Meats Technology (Even years, Su) An intensive study of processed meats, relat- ing the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiological nutritional aspects, and product labeling are covered. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: ANSC 3613 or POSC 4314. (Same as ANSC 5853)

POSC5873 Molecular Analysis of Foodborne Pathogens (Fa) Course topics will include molecular detection and identification of foodborne pathogens, the molecular response of foodborne pathogens to their environments, functional genomic approaches, and analysis of complex microbial communities. Lecture/discussion 3 hours per week.

POSC601 Graduate Seminar (Sp, Fa) Critical review of the current scientific literature pertaining to the field of poultry science. Oral reports, Hectation 1 hour per week. Prerequisite: senior standing.

POSC6940 Undergraduate Seminar (Fa) Course covers cell- lular through neural systems, major brain functions and comparative neuroanatomy between mammals and birds. Specific topics include coverage of ion channels, membranes, neurotransmitters, action potentials, synaptic integration, neuroanatomers, major brain regions of mammals and birds, sensory systems and the autonomic nervous system. Lecture 3 hours; Neuroscience Journal Club 1 hour per week (for 1st 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: POSC6940
PSYC 5920. Prerequisite: ANSC/POSC 3032 and ANSC/POSC 3042. (Same as ANSC 5920)

PSYC5962 Gastrointestinal/Digestive Physiology of Domestic Animals (Sp): Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cell control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: PSYC 5940L. Prerequisite: ANSC/POSC 3032 and ANSC/POSC 3042. (Same as ANSC 5962)

PSYC5972 Renal Physiology of Domestic Animals (Sp): Renal physiology, including mechanisms of renal clearance with emphasis on cell control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: PSYC 5940L. Prerequisite: ANSC/POSC 3032 and ANSC/POSC 3042. (Same as ANSC 5972)

PSYC5983 Adulthood and Aging (Sp): A lecture and laboratory course dealing with the major areas of social psychology in understanding the animal from birth to maturity. Prerequisite: PSYC 4073.

PSYC5993 Introduction to Clinical Practice: Core Skills and Ethical Guidelines (Sp, Su): Introduction to basic procedures in the study of behavior and to the elementary principles of learning, motivation, emotion, sensation, and individual differences. Students will be expected to complete a research requirement. (Same as PSYC 2003H)

PSYC2003 General Psychology (Sp, Su): Introduction to basic procedures in the study of behavior and to the elementary principles of learning, motivation, emotion, sensation, and individual differences. Students will be expected to complete a research requirement. (Same as PSYC 2003H, PSYC 2003)

PSYC2013 Introduction to Statistics for Psychologists (Sp, Su, Fa): Introduction to the descriptive and inferential statistics commonly used by psychologists. Prerequisite: PSYC 2003. (Same as STAT 2013)

PSYC3013 Social Psychology (Sp, Su, Fa): Introduction to the problems, themes, and experiments of social psychology. Prerequisite: PSYC 2003. (Same as PSYC 3013)

PSYC3023 Abnormal Psychology (Sp, Su, Fa): Causes and treatment of the major forms of abnormal behavior. Prerequisite: PSYC 2003. (Same as PSYC 3023)

PSYC3033 infancy and Early Childhood (Sp, Su, Fa): A lecture and laboratory course dealing with normal processes involved in the prenatal period through 5 years of age. Emphasizes interaction of heredity and environmental influences on personality, perception, learning, motivation, cognition, and socialization. Prerequisite: PSYC 2003. (Same as PSYC 3033)

PSYC3053 Psychology of Business and Industry (Irregular): Application of psychological principles to the problems of business and industry with emphasis upon employees and industry influence. Industrial relations, safety, fatigue, etc. Prerequisite: PSYC 2003. (Same as PSYC 3053)

PSYC3054 Clinical Special Readings and Projects (Sp, Su, Fa) for undergraduate majors in psychology.

PSYC3073 Research Methods (Sp, Su, Fa) training in execution and interpretation of experiments using the classical experimental designs. Limited enrollment. Prerequisite: PSYC 2013.

PSYC3083 Research in Applied Psychology (Even years, Sp): A lecture and laboratory course dealing with the application of psychological research methods to practical problems. Prerequisite: PSYC 3053.

PSYC3093 Childhood and Adolescence (Sp, Su, Fa): Psychological factors influencing development from age 6 to early adulthood, with emphasis on cognitive, personal- ity, and psychosocial development. Prerequisite: PSYC 2003. (Same as PSYC 3093)

PSYC3103 Cognitive Psychology (Sp): Introduction to theories and research in cognition including memory, language, and problem-solving. Prerequisite: PSYC 2003. (Same as PSYC 3103)

PSYC3183 Research in Human Learning (Odd years, Fa): A lecture and laboratory course dealing with the simpler forms of human learning. Prerequisite: PSYC 2003.

PSYC3283 Research in Social Psychology (Even years, Sp): A lecture and laboratory course dealing with research methods commonly used in social psychology as well as selected research topics and laboratory experience involving the design, conduct, and analysis of research on selected developmentally-related problems. Prerequisite: PSYC 2003.

PSYC3483 Research in Physiological Psychology (Even years, Sp): A lecture and laboratory course dealing with techniques for investigating the relationship between brain functions and animal research. Students should expect to carry out a research project using laboratory rats. Prerequisite: PSYC 3073.

PSYC3583 Research in Personality (Odd years, Sp): A lecture and laboratory course dealing with methods and techniques for the study of personality. Individual and group research projects including reviews of literature, application of methodology, and writing of reports will be conducted. Prerequisite: PSYC 3073.

PSYC3683 Research in Perception (Odd years, Sp): Lecture and laboratory course dealing with methods and experimental designs applied to the study of perception. Emphasis on application of psychological methods in the study of audition and vision. Prerequisite: PSYC 3073.

PSYC3783 Research in Cognition (Even years, Fa): A lecture and laboratory course dealing with the design, execution, and synthesis of changes in area of memory, language, and other aspects of complex human information processing. Prerequisite: PSYC 3073.

PSYC3923H Honors Colloquium (Irregular): Treats a special topic or issue, offered as part of the honors program. May be repeated when the content is changed. Prerequisite: honors candidacy (not restricted to candidacy in psychology). (Same as PSYC 3923H)

PSYC3933H Honors Course (Sp, Su, Fa) (Irregular): Prerequisite: junior standing.

PSYC4013 Exceptional Children (Irregular): A study of children whose development follows atypical patterns, including for example, those who are physically and emotionally handicapped. Prerequisite: PSYC 2003. (Same as PSYC 4013)

PSYC4023 Adulthood and Aging (Even years, Sp): Psychological factors occurring from young adulthood through old age. Emphasis on cognitive, personality, physical, and psychological factors. Prerequisite: PSYC 2003.

PSYC4073 Educational Psychology (Irregular): Psychological theories and concepts applied to the educational process. Investigates the learner and instructional vari- ables in a wide range of educational settings. Prerequisite: PSYC 2003. (Same as PSYC 4073)

PSYC4083 Psychological Tests (Fa) Nature and theory of individual and group tests of intelligence, personal- ity, interests, and abilities. Prerequisite: PSYC 2013. (Same as PSYC 4083)

PSYC4085 Psychological Personality (Sp) Development and nature of the normal personality. Prerequisite: PSYC 2003. (Same as PSYC 4085)

PSYC4093 Psychology of Learning (Sp, Su, Fa): Basic principles of learning showing how these principles are derived from experimental studies and how they are applied to explain more complex forms of behavior. Prerequisite: PSYC 2003.

PSYC409V Psychology Seminar (Irregular) (1-18): Provides intensive coverage of specialized psychological topics.

PSYC4123 Perception (Fa): Survey of principles and theories of sensation and perception. Content covers the classical senses with emphasis on integrating physical, physiological, and psychophysical evidence concerning the characteristics of sensory systems in humans and other animals. Prerequisite: PSYC 2003.

PSYC4133 Behavior Modification (Odd years, Sp): Introduction to the basic principles of behavior modification and contingency management. Presents procedures for conditioning, reinforcement, token economy and self-control of indi- viduals and groups in a variety of settings with emphasis on applications of research and educational implications. Prerequisite: PSYC 2003.

PSYC4143 History and Systems of Psychology (Fa): Examination of the concepts, methods, and systems which have contributed to the development of modern psy- chology. Prerequisite: PSYC 2003.

PSYC4183 Psychological Education (Fa): Examination of the biological basis of behavior. Surveys neu- roanatomy, neurophysiology, and neuropharmacology, and then investigates how the nervous system produces various forms of behavior. Prerequisite: PSYC 2003.

PSYC4193 Comparative Psychology (Sp): Similarities and differences in behavior across different spe- cies, including man. Special reference is made to principles concerning the organisms adjustment to its environment. Prerequisite: PSYC 2003.

PSYC489V Senior Thesis (Sp, Su, Fa) (1-6): Prerequisite: PSYC 2003. (Same as PSYC 489V)

PSYC5013 Advanced Developmental Psychology (Sp): Critical examination of the research relevant to the psychological factors influencing the growth processes of the individual from birth to maturity. Prerequisite: PSYC 4073.

PSYC5043 Advanced Social Psychology (Irregular) introduction to the principles, techniques, and tools of assessment in clinical neuropsychology. Includes training in the interpretation, integration, and reporting of assessment results. Prerequisite: PSYC 5043; enrollment in the Psychodiagnostic assessment program.

PSYC5053 Psychopathology (Fa): Psychological and somatic factors contributing to pathological behavior. Interrelations of these factors will be analyzed in terms of how they lead to differential abnormal states. Prerequisite: PSYC 3023; enrollment in the Graduate Program in Psychology, or consent.

PSYC5043 Assessment of Intellectual and Cognitive Abilities (Fa): training in the theory, adminis- tration and interpretation of individual tests of intelligence and mental ability. Prerequisite: PSYC 4073; enrollment in the Graduate Program in Psychology. (Formerly PSYC 4053)

PSYC5053 Advanced Personality Assessment and Clinical Diagnosis (Fa): Guidelines for using standard- ized instruments and structured interviews in the diagno- sis and clinical assessment of major psychological disorders. Includes training in the interpretation, integration, and report- ing of results. Prerequisite: PSYC 5043 and PSYC 5163.

PSYC5063 Advanced Social Psychology (Sp): theory, methodology, and contemporary research in the major areas of social psychology. Topics include attitude theory and measurement, group processes, social and cul- tural factors.

PSYC5073 Introduction to Clinical Practice: Core Skills and Ethical Guidelines (Sp, Fa): Formerly PSYC 507). An introduction to clinical practice focusing on a) interview methods and techniques and b) ethical principles and guidelines. Prerequisite: Enrollment in the Psychology
Provides clinical experience and training in the major behaviors of marital and family psychotherapy. Includes supervised experience in the application of the techniques with the more severe functional disorders.

Prerequisite: PSYC 5033.

PSYC6163 Psychotherapy (Fa) Provides supervised experience in the application of the techniques with the more severe functional disorders.

Prerequisite: PSYC 5033; enrollment in the Psychology graduate program.

PSYC618V Clinical Practicum (SP, Fa) (1-3) Provides intensive clinical experience in specialized clinical topics.

Open to all graduate students.

PSYC611V Individual Research (Sp, Su, Fa) (1-18) Provides the individual with the basic knowledge and principles for research in clinical psychology.

Provides the individual with the basic knowledge and principles for research in clinical psychology.

Provides the individual with the basic knowledge and principles for research in clinical psychology.

Provides the individual with the basic knowledge and principles for research in clinical psychology.

opment and application with a variety of population groups and representative leisure service areas. Prerequisite: RECR 1003 and HELC 3833.

RECR3843 Planning, Design, and Maintenance for Recreation (Fa) Planning concepts, design principles, and maintenance techniques are emphasized. Also, techniques for translating client experiences in maintenance of facilities are included. Prerequisite: RECR 1003 and HELC 3833.

RECR3853 Leisure Behavior (Fa) An examination of individual and social influences on leisure behavior within a human development context. Identification and exploration of motivating factors related to various traditional and contemporary leisure expressions. Emphasis placed on application of leisure behavior concepts in the delivery of recreation programs and services.

RECR3873 Sport and Recreation Risk Management (Fa) Indepth look at risk management and related legal issues affecting recreation and sport administration. Prerequisite: RECR 3833 and junior standing.

RECR4003 Innovative Practices in Recreation (Sp) Management techniques for recreation programs and facilities. Prerequisite: RECR 3873.

RECR4013 Contemporary Issues in Leisure (Sp) Discussion of selected topics and review of current literature in the recreation field. Analysis of current trends and professions in leisure studies and services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process.

RECR4093 Fundamentals of Therapeutic Recreation (Fa) An introduction to the field of therapeutic recreation. This course covers processes history, philosophy, programs, treatment, research, populations served, and professional aspects of therapeutic recreation practice. Requirements are different for graduate credit.

RECR4263 Aquatic Facilities Management (Sp) Prepares students to organize, administer, and supervise aquatic facilities, staff, and programs in school, community, and camp settings.

RECR440V Internship (Sp, Su, Fa) (1-12) Prerequisite: RECR 3873.

RECR4503 Seminar (Sp, Su, Fa) (1-3) Prerequisite: RECR 3873.

RECR5003 Graduate Prerequisites (Fa) Gives students entering a recreation degree program with no course background in recreation the necessary understanding of the recreation field. This course will not count toward a graduate degree in recreation.

RECR5213 Social Psychology of Recreation (Irregular) Application of social psychological theory to leisure, recreation, and travel behavior. Additional emphasis placed on the contribution of this theory to current practice in the recreation and tourism management field.

RECR5223 Applied Leisure Behavior (Irregular) Examines antecedents and consequences of leisure behavior from a social psychological perspective. Emphasis on assisting recreation managers to facilitate quality leisure experiences in their agency programs.

RECR5733 The Intramural Sports Program (Fa) Historical development, aim and objectives, organization, administration, units of competition, program of activities, schedule making, scoring plans, rules and regulations, awards, and special administrative problems.

RECR5293 Sports Management (Fa) Deals primarily with high school athletics and considers historical development, objectives, controlling agencies, eligibility and contest regulations, financial and administrative policies, program finances, inventories, facilties and equipment, safety, legal aspects, awards, publicity, and public relations.

RECR5433 Medical Aspects of Disability (Fa) Untempered elements related to various disabling conditions with emphasis on the severely disabled. (Same as RHAB 5433)

RECR5453 Psychological Aspects of Disability (Sp) Intensive study of the psychological aspects of adjustment to physical and psychological handicapping conditions. (Same as RHAB 5453)

RECR5473 Techniques in Therapeutic Recreation (Su) Advances the student's understanding and application of therapeutic recreation techniques. It provides knowledge and the opportunity to apply skills for the student to gain competencies in the field of therapeutic recreation services. Prerequisite: RECR 4093.

RECR5483 Treatment Planning in Therapeutic Recreation (Sp) Prepares students with the skills and understanding to apply the "TR Preparation, Assessment, Planning, Implementation, Evaluation" in the development of individual client treatment plans in Therapeutic Recreation. Prerequisite: RECR 4093.

RECR5493 Trends and Issues in Therapeutic Recreation (Su) Advances the student's knowledge of issues and concerns that moderate therapeutic recreation services to the client. The student is expected to critically examine and discuss each issue in an effort to develop a sound, practical philosophy of therapeutic recreation. The ultimate goal is to prepare the student to enter the profession confident in his or her ability to provide exemplary services. Prerequisite: RECR 4093.

RECR560V Workshop (Irregular) (1-3)

RECR574V Internship (Irregular) (1-3)

RECR5813 Principles of Recreation (Su) Considers historical development, development context. Identification and exploration of motivating factors related to various traditional and contemporary leisure expressions. Emphasis placed on application of leisure behavior concepts in the delivery of recreation programs and services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process.

RECR5823 Outdoor Recreation Program (Irregular) Considers the values and scope of outdoor recreation programs. Attention is given to the influence of geographical factors, land use, standards, economics, and legislation on program planning and operation.

RECR5833 Recreation for Special Populations (Sp, Su) Skills, knowledge, and concepts within recreation which are appropriate to planning and implementing recreation programs and services for the handicapped.

RECR5843 Tourism (Fa) Explores major concepts of tourism to discover what makes tourism work, how tourism is organized, and its social and economic effects.

RECR5853 The School and Community Recreation Program (Sp) Nature, background, significance, and trends in recreation in the school and community. Attention is given to departmental organization, administrative practices, program financing, personnel, safety, and legal aspects.

RECR5863 Operation of Commercial Recreation Enterprise (Irregular) Explores the operational requirements of commercial recreation enterprises. Students analyze the current state of various commercial recreation enterprises with respect to entry opportunities, operational and financial requirements, and market orientation.

RECR5883 Recreation Services Promotion (Sp) Experiences related to activities promoting recreation program in the local community.

RECR5893 Field Work in Recreation (Sp, Su, Fa) Provides practical work experience in recreation programs and the opportunity to study special programs under the supervision of specialists.

RECR599V Seminar (Irregular) (1-6)

RECR600V Master's Thesis (Sp, Su, Fa) (1-3)

RECR605V Independent Study (Sp, Su, Fa) (1-3)

RECR612V Directed Reading in Recreation (Sp, Su, Fa) (1-3) Critical analysis of literature in the area of recreation.

RECR6553 Legal and Political Aspects (Sp) An overview of major legislation affecting NHRD professions; how to operate within these laws; and methods for influencing new legislation. Also discusses political aspects of professional organizations both outside and inside government agencies.

RECR674V Internship (Sp, Su, Fa) (1-3) Students learn diverse teaching techniques and implement them in an on-going undergraduate recreation class serving as the teaching laboratory for the course. Focus will be relative to integrating various teaching techniques with specific content areas in the class will be explored by both the student and the instructor.

RECR689V Seminar (Sp, Su, Fa) (1-6) Uncussion of selected topics and review of current literature in the recreation field. Prerequisite: advanced standing graduate student.
niques that enable people to cope with 2 major life events: disability and unemployment.

RHSB243 Advanced Rehabilitation Research (Sp) An advanced doctoral level course to facilitate the application of theoretical, empirical, research skills, and behavior to the generation of rehabilitation knowledge and problem solving.
RHSB265V Teaching internships in Rehabilitation (Sp, Su, Fa) (1-18) Graduate teaching experience in the rehabilitation counseling curriculum. Under the supervision of a faculty member, will participate in the development of syllabi, course materials and examinations. Will teach team graduate rehabilitation courses with the faculty member.
RHSB266V Practicum Supervision (Su) (1-6) (Formerly HHAI 6263) The study and practice of supervising master's rehabilitation counseling students in a clinical practicum setting. Prerequisite: doctoral standing.
RHSB2673 Administration & Supervision in Rehabilitation Settings (Odd years, Fa) An examination of the basic knowledge and skills required to perform supervisory and administrative functions in rehabilitation settings. Includes a review of applicable laws, management theory, issues in human resource development, burnout, and exposure to organizational structure and function. Prerequisite: candidacy. Scheduling may vary. Sector standing.
RHSB675V Internship (Sp, Su, Fa) (1-18) Advanced supervised practice rehabilitation setting. Prerequisite: advanced graduate standing.
RHSB700V Doctoral Dissertation (Sp, Su, Fa) (1-18) Prerequisite: candidacy.

(RSST) RUSSIAN STUDIES

RSST4003 Honors Russian Studies Colloquium (Sp) (Same as RSST 4003)

RSST4003H Honors Russian Studies Colloquium (Sp) (Same as RSST 4003)

An interdepartmental colloquium with an annual change in subject of investigation, required of all students in the Russian studies program. Open to non-majors standing for Russian studies majors and honors students. (Same as RSST 4003H)

(RUS’7) RUSSIAN

RUSS1003 Elementary Russian I (Fa) (Same as RUSS 1003)

RUSS1013 Elementary Russian II (Sp) Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. Prerequisite: RUSS 1003 or equivalent.

RUSS2003 Intermediate Russian I (Fa) Intermediate courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. Prerequisite: RUSS 1013 or equivalent.

RUSS2013 Intermediate Russian II (Sp) Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. Prerequisite: RUSS 2003 or equivalent.

RUSS301 Introduction to Literature (Fa) Development of research in literary analysis. Prerequisite: RUSS 2003 or equivalent.

RUSS3023 Listening Comprehension (Sp) Provides an intensive practice in listening to recordings taken from such sources as television broadcasts, lecture, radio, readings of literature. This is supplemented by conversations and comprehension tests. Prerequisite: RUSS 2013 and RUSS 3021.

RUSS4003 Advanced Russian I (Sp, Su, Fa) Advanced Russian reading, conversation, and composition. Prerequisite: RUSS 3013.

RUSS4013 Advanced Russian II (Sp, Su, Fa) Advanced Russian reading, conversation, and composition. Prerequisite: RUSS 4003.

RUSS4123 Survey of Russian Literature from Its Beginning to the 1917 Revolution (Fa) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. (Same as WLIT 4123)

RUSS4133 Survey of Russian Literature since the 1917 Revolution (Fa) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and deal with literature as an outlet for social criticism. There will be textual analysis in English. (Same as WLIT 4133)

RUSS470V Special Topics (Irregular) (1-6) May be offered in a topic not specifically covered by courses otherwise listed.

RUSS475V Special Investigations (Sp, Fa) (1-6) Prerequisite: graduate standing.

(SCW) SOCIAL WORK

SCWK2133 Introduction to Social Work (Sp, Su, Fa) Introduction to the profession and to social welfare institutions from the perspective of the generalist, entry level social worker. Emphasis on motivation and function of social work.

SCWK3183 On Death and Dying (Sp, Su, Fa) Reviews the theory and humanistic importance of the concepts of death and dying in society. An experimental option and interdisciplinary faculty presenters will be part of the format. Prerequisite: junior standing. (Same as HUMN 3163)

SCWK3183 Elderly Citizen (Sp, Su, Fa) Survey of the theoretical and practical issues of aging. Prerequisite: junior standing. (Same as HUMN 3163)

SCWK3193 Human Diversity and Social Work (Sp, Su, Fa) An introduction to information basic concepts related to human diversity and social work. Provides content on attitudes and similarities in the experiences, needs, and beliefs of people distinguished by race, ethnicity, culture, class, gender, sexual orientation, religion, physical or mental ability, age or national origin. Prerequisite: SCWK 2133.

SCWK3233 Juvenile Delinquency (Sp, Su, Fa) Nature, causes, extent, and measures of treatment of juvenile delinquency. Prerequisite: junior standing. (Same as SCWK 3233)

SCWK3533 Legal Aspects of Social Welfare (Fa) Study of a selected group of legal regulations encountered by the social worker, including the court system, legal rights of indigent persons and children, domestic relations, problems of the small wage earner, and health measures. Prerequisite: junior standing.

SCWK3633 Problems of Child Welfare (Sp, Su, Fa) Study of the needs of deprived children with some attention to methods and standards of care. Cultural competence and family-centered practice are emphasized. Prerequisite: junior standing. (Same as SCWK 3633)

SCWK3923H Honors Colloquium (Irregular) Treats a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in social welfare).

SCWK399VH Honors Course (Irregular) (1-18) Prerequisite: junior standing.

SCWK400V Special Topics in Social Work (Irregular) Comprehensive study of various topics of importance in contemporary social welfare and social work programs. Prerequisite: standing.

SCWK4073 Social Work Research and Technology I (Sp, Fa) (Formerly SCWK 3073) An overview of forms and sources of social work research including existing social data, techniques for collecting original social data, and techniques of organization, interpretation, and presentation of data. Students will also become proficient in the use of current technology for social work research and practice. Prerequisite: three hours of statistics and computer literacy.

SCWK4093 Human Behavior and the Social Environment I (Sp, Su, Fa) (Formerly SCWK 3093) Provides a conceptual framework for knowledge of human behavior and the social environment with a focus on individuals. Social systems, life, course, assets, and resiliency-based approaches are presented. Special attention is given to the impact of discrimination and oppression on the ability to achieve and maintain optimal health. Prerequisite: BIOL 1543, BIOL 1541L, PSYC 2003, SCWK 2133, and SCWK 3193.

SCWK4103 Human Behavior and the Social Environment II (Sp, Fa) (Formerly SCWK 3103) This course applies the basic framework for creating and organizing knowledge of human behavior and the social environment acquired in Hlth 21. To the understanding of family, group, organizational, community, and global systems. Attention is given to discrimination, oppression, the impact of technology, and poverty at each system level. Prerequisite: SCWK 4093.

SCWK4133 Family Preservation Services: An introduction to the fundamentals of family preservation services. Emphasis is on learning the components, implications, and techniques of the family preservation model. Strategies for helping the multiproblem family.

SCWK4143 Addiction and the Family (Sp, Su) Introduction to the biophysical basis of chemical and behavior compulsions with special focus on family impacts. Childhood development within addictive families is also examined. Social work intervention with substance abusing families is highlighted.

SCWK4153 Social Welfare Policy (Sp, Su, Fa) (Formerly SCWK 3153) Describes and analyzes the policies and services rendered by local, state, regional, national, and international agencies as well as the policy implications for social work practice. Students prepare to advocate social policy changes designed to improve the quality of life, promote social and economic justice, and to empower at-risk populations. Prerequisite: PLCS 2003, SCWK 2133, and SCWK 3193.

SCWK4223 Seminar: Children and Family Services (Sp, Su, Fa) An examination of selected current issues in the field of children and family services through discussion, individual study, and interaction with professional in the field.

SCWK4333 Social Work Practice I (Sp, Fa) This is the first in the sequence of practice courses introducing students to the generalist approach to micro social work. This course focuses on developing a solid foundation for practice with individuals, including learning basic communication and helping skills, values, principles, and the connection of theory to practice. Prerequisite: SCWK 4093.

SCWK4343 Social Work Practice II (Sp, Fa) This course
This course develops advanced social work practice, emphasizing understanding, skills, and techniques related to generalist practice in schools, groups, and organizations. The course builds on the theoretical foundations of social work, elaborates on system theory as it impacts groups and families, and uses experiential teaching methods. Prereq: SCWK 4103. Corequisite: SCWK 4343.

SCWK4422 Social Work Internship II (Sp, Su, Fa) An integrative seminar to assist students in comparing their practice experiences, integrating knowledge acquired in the classroom, and expanding knowledge beyond the scope of the practicum setting. Corequisite: SCWK 4434 and social work majors only. May be repeated for 4 hours.

SCWK4434 Social Work Internship I (Sp, Su, Fa) Arranged in connection with social service agencies. Credit is based on completion of all course objectives, including a minimum of 225 hours of field work under the supervision of a licensed social worker. Corequisite: SCWK 4412 (social work majors only). Prerequisite: SCWK 3073 and SCWK 3103 and SCWK 4333.

SCWK4434 Social Work Internship II (Sp, Su, Fa) Arranged in connection with social service agencies. Credit is based on completion of all course objectives, including a minimum of 225 hours of field work under the supervision of a licensed social worker. Corequisite: SCWK 4412 (social work majors only). Prerequisite: SCWK 3073 and SCWK 3103 and SCWK 4333.

SCWK4460 Independent Study (Sp, Su, Fa) Students acquire and practice the skills, knowledge, and values necessary for culturally competent generalist social work practice with organizations and communities. Special attention is given to the implications of discrimination and oppression for social work. Prereq: SCWK 2133. Corequisite: SCWK 4434. Prerequisite: SCWK 4103 and SCWK 4333.

SCWK5003 Foundations of Culturally Competent Social Work Practice (Fa) The purpose of this course is to provide students with the knowledge, skills, and values necessary for culturally competent social work practice with individuals, families, groups, organizations, communities, and social systems. This course builds on the theoretical foundations of social work and utilizes class assignments to advocate improvements in current policy and practice. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5163 Social Work Management, Administration and Supervision (Sp, Su) This course develops advanced skills in management, administration, and supervision in social work organizations. Emphasis is placed on developing leadership skills in ethics, budgeting, finance, resource development, information management, recruitment, evaluation, staff hiring, supervision and development, and the use of technology in organizational leadership, development, and maintenance. Prerequisite: graduate standing and SCWK 5003 or SCWK 5013.

SCWK5173 Advanced Practice with Families and Couples (Fa) The purpose of this course is to provide advanced understanding of the knowledge, skills and values needed to assess and intervene effectively with traditional and non-traditional families and couples. The course will examine social systems and life-course strengths approaches to understand how families and couples function. Students will design interventions. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5183 Advanced Practice with Individuals (Sp) This course develops advanced skills in social work practice on a micro level. Students learn to analyze and compare practice models and strategies for developing a practice model and integrating multiple models based on client needs. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5193 Advanced Practice and Policy in Aging (Sp) This course examines the delivery of social work practice with, and policies for, older persons. Current, past, and future practices and policies for older persons across systems and the life course are examined. Emphasis is placed on the influences of the aging process and cultural diversity in the well-being of older persons. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5213 Advanced Practice and Policy in Mental Health (Sp) This advanced course prepares students to identify mental disorders, plan intervention strategies with clients from a strengths perspective, and understand mental health policies and programs through which services are delivered. Special attention is given to the impact of socioeconomic status, gender, race, and sexual orientation on diagnosis and treatment decisions are addressed. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5223 Advanced Practice and Policy in Health Care (Fa) This course examines the delivery of health care in the United States in the context of social, political, economic, ethical, and legal factors. Students gain skills for collaboration on an interdisciplinary team. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5233 Advanced Technology for Social Work Practice (Sp, Fa) This course examines the delivery of social work practice with, and policies for, older persons. Current, past, and future practices and policies for older persons across systems and the life course are examined. Emphasis is placed on the influences of the aging process and cultural diversity in the well-being of older persons. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5253 Spiritualizing in Social Work (Sp, Fa) This course provides a framework of knowledge, values, skills and experiences for spiritually-sensitive social work practice. It prepares students to respond competently and ethically to diverse spiritual and religious perspectives by using a comparative, critically reflective approach to content. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK5343 Advanced Practice with Groups (Sp, Su) This course provides advanced knowledge, skills, and values necessary for culturally competent generalist social work practice with groups. Prerequisite: SCWK 3103 or SCWK 5003 or SCWK 5013.

SCWK5412 Foundation Field Seminar (Sp) A required course for MSW students without an accredited undergraduate degree in social work. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to learn peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 5444. Prerequisite: SCWK 5444.

SCWK5444 Advanced Field Internship I (Fa) This course is required of all graduate students entering the MSW program without an accredited undergraduate degree in social work. Minimum of 330 clock hours of agency-based professional social work practice experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5412. Prerequisites: SCWK 5003, SCWK 4333, SCWK 4434, SCWK 5042/72, SCWK 6093, and SCWK 4153.

SCWK5452 Foundation Field Seminar II (Sp) This seminar is required of all graduate students entering the MSW program with advanced standing. Students who have previous relevant work experience, interned with experiences in the field, learned peer supervision and consultation, and learned from the experiences of other students in the field. Corequisite: SCWK 5444. Prerequisite: admission to the MSW program with advanced standing.

SCWK5454 Advanced Field Internship II (Sp) This course is required of all graduate students entering the MSW program with advanced standing. A minimum of 330 clock hours of agency-based professional social work practice experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5442. Prerequisite: admission to graduate program with advanced standing.

SCWK6000L Thesis Laboratory (Sp, Su) This laboratory is required for completion of the thesis, which is developed through components of the graduate Research & Technology sequence. Other courses in the graduate curriculum provide support for the conceptualization and development of the thesis. This laboratory is taken in conjunction with SCWK 6073 and SCWK 6074. Corequisite: SCWK 5073 or SCWK 5074.

SCWK6003 Life Course Multi-System Social Work II (Sp) This course prepares advanced standing students to provide services to socially work clients. This course covers application of life course theory and multi-system and diversity perspectives. Issues across the life course are considered in addressing interventions through program development, grant proposal submission, and implementation of macro interventions. Corequisites: SCWK 6073, SCWK 6454, and SCWK 6452. Prerequisite: SCWK 6003.

SCWK6073 Social Work Research and Technology III (Sp) In this final research course, students collect and analyze data as planned in the thesis proposal submitted for Research and Technology II. Course content focuses on the advanced research skills necessary to complete the thesis. Students write a research report of their findings and submit it for publication. Corequisite: SCWK 6013 and SCWK 6000L. Prerequisite: SCWK 5073 or SCWK 5454 Advanced Field Internship I (Fa) The first of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to practice peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442.

SCWK6044 Advanced Field Internship I (Fa) This is the first of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practice experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444.

SCWK5452 Advanced Field Seminar II (Sp) This is the second of two advanced field seminars required of all students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practice experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444.

SCWK5454 Advanced Field Internship II (Sp) This is the second of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practice experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442.
SEED4223 Teaching of Mathematics (Sp, Su, Fa) (Same as SEED 4223)

SEED599V Seminar (Irregular) (1-18)

SEED600V Master’s Thesis (Irregular) (1-6)

SEED605V Independent Study (Sp, Su, Fa) (1-18)

SEED606V Work Study (Irregular) (1-18) Prerequisite: advanced graduate standing.

SEED674V Internship (Irregular) (1-6) Prerequisite: advanced graduate standing. May be repeated for 6 hours

SEED699V Special Projects (Irregular) (1-18)

(SOCI) SOCIOLOGY

SOCI2013H Honors General Sociology (Sp, Su, Fa) Group relations, culture, personality, social institutions, collective behavior, and social change. (Same as SOCI 2013I, SOCI 2013). (Sp)

SOCI2033 General Sociology (Sp, Su, Fa) Group relations, culture, personality, social institutions, collective behavior, and social change. (Same as SOCI 2013I)

SOCI2033 Social Problems (Sp, Su, Fa) Social disorganization, social strain, and deviant behavior, including consideration of war, poverty, ethnic relations, delinquency, drug addiction, mental illness, and population problems. (Same as SOCI 2033I)

SOCI2043 Marriage and the Family (Fa) A sociological analysis of courtship, marriage, and parenthood patterns including gender relations in and diverse forms of contemporary American families. Participant observation. (Irregular)

SOCI3013 Population and Society (Odd years, Sp) The social significance of population; population distribution and composition; population trends and problems of the population. (Same as SOCI 3013)

SOCI3023 Criminology (Sp, Su, Fa) A survey of theories of crime causation, development of law, corrections, victimization, and police and policy. Prerequisite: SOCI 3023 or SOCI 3023I. (Irregular)

SOCI3033 American Minorities (Fa) A sociological approach to the study of the culture, lifestyles, contemporary issues and the psycho-social well-being of minority groups in America. Prerequisite: SOCI 2013I.

SOCI3034 Contemporary Caribbean (Sp) The background, development, social organization, problems, and prospects of the contemporary people of the Caribbean islands and related territories.

SOCI3103 Religion and Society (Sp) Comparative study of religious organization, beliefs, practitioners, and rituals, examining the role of religious and social sciences issues in the study of religion. (Same as ANTH 3103, ANTH 3103I)

SOCI3123 Sociology of Work (Sp) Study of the social organization of work, changing work roles, theories of work.

SOCI3133 Urban Structure and Change (Fa) Situate and dynamic nature of urban structure and the role of space as social factor with attention on efforts to revitalize residential neighborhoods in central city areas. Prerequisite: junior standing.

SOCI3153 Urban Sociology (Fa) The processes of urbanization; the nature of urban social organization; the impact of urban culture on non-urban society; implications for policy and planning; including study of foreign as well as American communities. Prerequisite: SOCI 2013. (Same as SOCI 3133)

SOCI3193 Race, Class, and Gender in America (Fa) Introduction to sociological theories and research on social inequality in the United States. Course focuses on the three prominent lines of social division in this society: class, gender, and race. Prerequisite: SOCI 3133.

SOCI3203 Corrections (Fa) A study of the origins, development, and practices related to corrections, including incarceration, community corrections and supervision, and intermediate sanctions. Prerequisite: CMJS 3203.

SOCI3223 Social Psychology (Fa) Current theories and research in social interaction, with emphasis on symbolic processes, role theory, theories of interpersonal behavior, socialization, and the relationship of institutional structures to individual behavior. Prerequisite: SOCI 3133.

SOCI3233 Collective Behavior (Su, Fa) Emergent non-institutionalized crowds, public and social movements, their genesis, process, effect, termination, and control. Prerequisite: SOCI 3133.

SOCI3253 Cultures of the South (Sp) Survey of the diverse ethnic and racial groups of the American South with special emphasis on social and cultural traits related to contemporary development. (Same as ANTH 3253)

SOCI3301L Social Data and Analysis Laboratory (Sp, Fa) Applied statistics lab to accompany SOCI 3301.

SOCI3303 Psychology of Data and Analysis (Sp, Fa) An introduction to descriptive and inferential statistics with special emphasis on those techniques most commonly used in social research. Corequisites: SOCI 3301L. Prerequisite: SOCI 2013. (Same as STAT 3303)

SOCI3313 Social Research (Sp, Fa) Study and experience in current methods of social research with emphasis on sociological measurement and design. Prerequisite: SOCI 2013 and CMJS 3313.

SOCI3333 Anthropology of Ethnicity (Sp) Anthropological approaches to the study of race and ethnicity, with reference to other models such as gender, nation, and class. Case studies drawn from Western and non-Western societies, and from pre-colonial and post colonial periods. (Same as ANTH 3333)

SOCI3723 Deviant Behavior (Fa) Prevalence, theories, stereotypical responses, and treatment programs for behaviors such as vagrancy, alcoholism, violence, and sexual deviacy which deviate from social norms. (Same as SOCI 3723)

SOCI3923H Honors Colloquium (Irregular) Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidates in sociology). (Irregular)

SOCI4001 Proseminar in Sociology (Irregular) Forum for students and faculty to present and discuss research interests.

SOCI4003 Internship in Sociology (Sp, Su, Fa) (Formerly SOCI 4006) Supervised experience in municipal, county, or state agencies, or any other agency which is approved by the instructor. Prerequisite: SOCI 3133.

SOCI401V Special Topics in Sociology (Sp, Su) Designed to cover specialized topics not usually presented indepth in regular courses. Prerequisite: SOCI 3133.

SOCI4023 Social Disorganization (Sp) An in-depth look at ethnic, racial, and gender issues as part of the 20th century sociological theory. Present-day currents in sociology are studied and related to political, philosophical, and psychological contemporary thought. Prerequisite: SOCI 3133 and junior standing.

SOCI403V Individual Study in Sociology (Sp, Su, Fa) (1-3) A reading and conference course on special topics in sociology for advanced students.

SOCI4043 Seminar in Sociology (Sp) Prerequisite: senior standing.

SOCI4063 Organizations in Society (Fa) An introduction to the study of organizations: provides a broad overview of issues related to organizations in society. Prerequisite: SOCI 3133.

SOCI4073 Peoples of East Africa (Fa) The major institutional structures, dynamics and problems of the Africans, Asian and indigenous peoples of Uganda, Kenya, Tanzania, Somalia, Sudan, and Ethiopia. Prerequisite: SOCI 3133.

SOCI4123 Black Ghetto (Sp, Fa) The origin, continuity, problems, and personalities, of the Black American community and its contributions to national and international life. Prerequisite: SOCI 3133.

SOCI4123H The Family (Sp) A sociological analysis of the interactions and relationships which constitute the family as a group and as an institution, to include issues of gender and family diversity. Prerequisite: SOCI 4123 or SOCI 3033.

SOCI4163 Extremism (Sp) Understanding and evaluation of actions for, religious cults and extremist political groups in America, including quest(s) of appropriate response to them. Prerequisite: junior standing.

SOCI4213 Seminar in Violence (Irregular) Explanations for, consequences of, and possible responses to individual, collective, and institutional violence; comparison between socially acceptable and unacceptable forms of violence. Prerequisite: SOCI 3133.

SOCI4313 Language and Society of Japan (Fa) The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and customs of the Japanese people. The course further examines how Japanese culture, thought, and social organization can influence the study of Japanese language and literature. Prerequisite: SOCI 4313.

SOCI4333 Methods of Field Research (Irregular) An introduction to research strategies including intensive interviewing, participant observation, content analysis, historical analysis, and comparative research. Emphasis on the practical aspects of designing and executing research involving multiple methods or data gathering and analysis. Prerequisite: graduate standing.

SOCI5113 Seminar in Social Inequality (Fa) Major theories of stratification; types of stratification systems, comparisons of modern and traditional systems; emergent trends. Prerequisite: graduate standing. (Sp)

SOCI5133 The Community (Even years, Sp) A sociological analysis of the theory, methods and materials used in the study of the community. Prerequisite: graduate standing.

SOCI5133 Sociological Perspective on Social Psychology (Sp) Principles, concepts and methods used in analyzing effects of social structures and processes on the self and interaction. Topics include exchange theory, role analysis, symbolic interactionism, social construction of reality, socialization, interpersonal competence, organizational and leadership development, social dislocation, and stress. Prerequisite: graduate standing.

SOCI5213 Social Evaluation (Irregular) Examination of the process of social evaluation at the federal, state and local level, including topics in evaluation strategies, and methodologies encountered. Emphasis on evaluation results, with special attention to the relationship between process and product evaluation programs in programs for families and young children. Prerequisite: SOCI 5013.

SOCI5233 Theories of Deviance (Even years, Fa) A survey of major theories-classical, developmental, ecological, functionalist, conflict, subcultural, control, and phenomenological-examining morally condemned differences in society. Particular emphasis is on practical implications of each perspective for policy and social control. Prerequisite: graduate standing.

SOCI5253 Classical Social Theory (Fa) A survey of social theory up to the late 20th century. An introduction to the classical sociological themes that continue to inform research, analysis, and policy formation. Major issues will include the relationship between the individual and the community, and the sources of stability, conflict, and change. Prerequisite: graduate standing.

SOCI5263 Contemporary Social Theory (Sp) Analysis of contemporary social theory and its major theoretical currents, and the changing political and social environment in which those theories are formulated. Prerequisite: graduate standing.

SOCI5333 Applied Data Analysis Laboratory (Sp) Provides instruction for data transformations required for the advanced statistical procedures used in the Statistical Package for the Social Sciences (SPSS). Also provides instruction in the use of advanced statistical procedures.
covered in SOCI 5313. Corequisite: SOCI 5313. Prerequisite: SOCI 3303 and SOCI 3301L.

SPAC513 Applied Data Analysis (Sp) Covers basic concepts and applications of the general linear model to a variety of sociological research issues and problems. Also provides an introduction to binary dependent and multi-
tivariant categorical data analysis for sociological research. Prerequisite: SOCI 3303 or equivalent course in statistics. Familiarity with statistical computer programs is assumed.

SOCI5403 Survey Methods (Irregular) Introduction to techniques of research. Focuses on the development of survey research instruments and their con-
struction. Measurement techniques are examined including issues of reliability and validity, scaling, and index construc-
tion. Issue of questionnaire design and interview techniques are discussed in the applied context of research. Techniques of file generation and manipulation relative to survey research are examined. Prerequisite: SOCI 3303 or equivalent.

SPAC466 Research Internship (Sp, Fa) Supervised research experience in field setting. Prerequisite: graduate standing.

SOCI600V Master’s Thesis (Sp, Su, Fa) (1-6) SOCI6043 Public Policy, Children and Families (Irregular) The study of the impact of public policy on chil-
dren and families, and the ways in which policies are created, modified, and changed. Includes the history of public policy concerning children and families.

(SPAN) SPACE AND PLANETARY SCIENCES

SPAC500V Graduate Research (Irregular) (1-10) This course covers research performed by students in the graduate programs in space and planetary sciences: the MS and PhD space and planetary sciences, and concentra-
tions in space and planetary sciences for the PhD degrees in physics, biology, and mechanical engineering and the master’s degrees in geography and geology.

SPAC5033 Planetary Systems (Sp) The nature of the solar system and other planetary systems as deduced from observations and theoretical modeling. Structure and evolution of terrestrial and jovian planets and their satellites. Planetary surface processes, atmospheric processes, and the solar wind; planetary interiors. Theoretical and observed properties of exoplanetary systems; astrophysics.

SPAC511L Space and Planetary Lab (Irregular) Laboratory course in space and planetary sciences consist-
ing of experiments in the five major areas of space and planetary sciences: planetary astronomy, planetary geology, planetary atmospheres, origin and evolution of life and orbital mechanics, and asteroids. Intended for students enrolled in the graduate programs in space and planetary sciences.

SPAC5123 Internship (Irregular) Internship for gradu-
ate students in the space and planetary sciences gradu-
ate degree programs. Concentrations in the graduate programs in physics, biology, geosciences and mechanical engineering. Students conduct a phase of their research, normally for one month, at a national or industrial laboratory in North America or overseas.

SPAC5132 Ethics Workshop (Irregular) A two-week workshop exploring the ethical issues of conducting research in the space and planetary sciences. Through a study of case histories, the course will explore both issues of academic and research integrity, such as the fabrication of data, and the ethics surrounding the execution of research, such as issues surrounding planetary protection. Summer only.

SPAN142 Communications Workshop (Irregular) A two-week workshop concerning the ways in which scen-
tists communicate the results of their work to the general public. The course is taught by prominent journalists in the space and planetary sciences and puts an emphasis on original writing and critique. The workshop is not considered satisfactorily completed unless each student has an article published in a university or higher-education publication. Summer only.

SPAC5152 Entrepreneurship Workshop in Space and Planetary Sciences (Irregular) A two-week workshop addressing the ways in which technology generated during space research is transferred to the private sector and used for wealth generation. Summer only.

SPAC5161 Seminar (Irregular) Seminars organized by the Arkansas-Oklahoma Center for Space and Planetary Sciences designed to provide cutting edge of research in the field for graduate students conducting research with a faculty member in the space and planetary sciences as part of their graduate degree programs or concentrations in the graduate programs in physics, biology, geology, geography and mechanical engineering.

SPAC5313 Planetary Atmospheres (Irregular) Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmo-
sphere, the upper atmosphere, escape of atmospheres, com-
parative planetology of atmospheres. (Same as CHEG 5313)

SPAC5413 Planetary Geology (Irregular) Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary crusts, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets.

SPAC5513 Biochemical Evolution (Irregular) Abiotic synthesis of biomolecules on Earth, the origin of cells; a prebiotic Earth and the origin of life; early terrestrial ecosystems and emergent life; the evolution and diversity and, ecosystem niches, bacteria, archaea, and eukaryotes, novel metabolic reshaping of the environ-
ment, life being reshaped by the environment, molecular data, and evolution. Prerequisite: CHEM 5813.

SPAC600V Master’s Thesis (Irregular) (1-10) SPAC700V Doctoral Dissertation (Irregular) (1-10)
the movement of [modernism].

SPAN383 Twentieth Century Spanish American Poetry (Sp, Su, Fa) A calculus-based introduction to the foundations of probability and statistics. Emphasis is placed upon understanding elementary properties of probabilities, events, statistical densities and distributions, properties of random variables, law of large numbers, and their relationship to sampling and statistical inference. Prerequisite: MATH 2564.

SPAN4001L Statistics Methods Laboratory (Sp, Fa) Emphasis on use of integrated statistical packages to complement traditional methodology being covered concurrently in STAT 4003. Corequisites: STAT 4003.

STAT4033 Nonparametric Statistical Methods (Sp, Fa) Chi square tests, Kolmogorov-Smirnov goodness-of-fit tests, the Mann-Whitney and Wilcoxon 2-sample tests, and various nonparametric measures of association. Prerequisite: MAH 1203 and junior standing.

STAT4043 Sampling Techniques (Sp, Su, Fa) Considers optimum techniques of simple random, stratified random, cluster systematic, and sampling fraction for finite populations subject to cost precision constraints. Wide range of application. Prerequisite: STAT 4003.

STAT4373 Experimental Design (Sp) Topics in the design and analysis of planned experiments, including randomized block, Latin square, split plot, and split designs, use of fractional factorial replication, and repeated measures. Prerequisite: STAT 4003.

STAT5103 Theory of Statistics (Fa) Fundamentals of probability, distribution theory, and random variables; expected value, moments, and generating functions; classical parametric families of distributions; central limit theorems, inequalities, and laws of large numbers. Prerequisite: STAT 5103.

STAT5113 Statistical Inference (Sp) Statistical theory of estimation and testing hypothesis. Prerequisite: STAT 5103.

STAT5313 Regression Analysis I (Sp) Matrix formulation of least squares and multiple regression models. Estimability and use of the generalized inverse in analysis of variance and covariance models of less than full rank. Computational aspects are emphasized. Prerequisite: STAT 5322.

STAT5322 Statistical Packages (Sp, Fa) Emphasis on use of digital computer to perform statistical data analysis through the use of integrated statistical packages. Instruction includes use of the SAS, SPSS, and BMD packages. Data management operations as well as formal statistical procedures such as ANOVA and regression are considered. Prerequisite: 3 hours of statistics.

STAT5333 Analysis of Categorical Responses (Sp) A modern treatment, including extensions of classical probit analysis, multivariate logistic models, GSK model, log-linear models in analysis of multiway contingency tables, and nonmetric multidimensional scaling. Prerequisites: IAI S1131.

STAT5353 Methods of Multivariate Analysis II (Sp) Hotelling’s T2 procedures, multivariate analysis of variance, discriminant function analysis and problems of classification, multidimensional scaling, and cluster analysis. Prerequisite: STAT 5371.

STAT5371 Time Series Analysis (Sp, Su, Fa) Identification, estimation and forecasting of time series. Spectral analysis including the fast Fourier transform computation. Prerequisite: STAT 5103.

STAT5413 Spatial Statistics (Sp) Applied statistical techniques, covering univariate spatial modeling (kriging), multivariate spatial modeling (cokriging), methods of estimation and inference, and spatial sampling designs. Special relevance to remote sensing. Prerequisite: IAI S1131.

STAT610V Research in Statistics (Irregular) (1-4) Prerequisite: graduate standing.

STAT639V Topics in Statistics (Irregular) (1-3) Current state of the art on methodology in one of the topics: multivariate analysis, time series analysis, sequential analysis, factor analysis, or biostatistics.

TLOG4613 Business Logistics (Sp) Management of logistics functions in the firm including warehousing, and organization. Prerequisite: TLOG 3613.

TLOG4643 Transportation Carrier Management (Fa) Reviews special management techniques and analytical framework available for solving problems associated with transportation companies. Prerequisite: STAT 4003 or IAI M1143.

TLOG4643 Spatial Topics in Logistics (Irregular) (1-3) Explores current events, concepts, and new developments in the field of logistics and transportation. Topics are selected by the Marketing and Transportation faculty for each semester the course if offered. Prerequisite: TLOG 3613.

TLOG4643 Transportation and Logistics (Sp) Logistics activities in international business with special emphasis on transportation, global sourcing, customs issues, governmental influence, facility location in global environment, and import-export opportunities. Special emphasis is placed on current events and their effect on the marketing and logistics activities of U.S.-based organizations. Pre- or Corequisite: TLOG 3443. Prerequisite: TLOG 3613.

TLOG4653 Transportation and Logistics Strategy (Sp) Design and management of transportation and logistics of firms of varying size and different market conditions. This capstone course relies heavily on computer assisted cases and lectures from visiting transportation and logistics executives. Prerequisite: TLOG 3443 and TLOG 3613.

TLOG466V Independent Study in Transportation and Logistics (Sp, Su, Fa) (1-3) Explores current events, concepts, and new developments in the field of logistics and transportation. Topics are selected by the Marketing and Transportation faculty for each semester the course is offered.

TLOG5633 Business Logistics Systems (Fa) Case approach to physical distribution problems of wholesale, retail, manufacturing, and service organizations. Prerequisite: TLOG 5643.

TLOG5643 Strategic Issues in Transportation Management (Fa) Focuses on the setting of objectives and the design of optimal transportation strategy and alternative means of implementing transportation strategies within different types of organizations.

TLOG5653 Global Logistics Strategy (Sp) Transportation and logistics activities of multinational firms with emphasis on transportation, customer service, inventory control, facility location global sourcing, customs documentation, and the role of government in importing and exporting. Attention given to current events and their effect on the marketing and logistics activities of U.S.-based organizations. Prerequisite: TLOG 5633.

TLOG5663 Supply Chain Management (Fa) This course examines the planning and management of supply chain activities including supplier selection and management, demand management, quick response, vendor managed inventory, logistics options, strategic alliances, and performance measurement. Emphasis is placed on the integration of purchasing, materials management, and multi-firm logistics planning.

TLOG5673 Transportation & Logistics Modeling (Sp) This course examines technology and computer applications in transportation and logistics, using an integrated supply chain management technique. Topics covered include computer information systems, decision support systems, optimization models, simulation, advanced statistics, and computer logistics software systems. Prerequisite: IAI L331 and TLOG 5643.

(VAED) VOCATIONAL EDUCATION / ADULT EDUCATION

VAED1003 Self-Directed Learning Seminar (Sp, Fa) This course is designed to take students beyond orientation into the realm of taking responsibility for their academic decisions and learning. The focus is on the whole student and the whole college experience.

VAED1011 Career Exploration (Sp) This course examines career exploration concepts and strategies, including accepted theory in career development. The focus is on decision-making processes, understanding personal characteristics, exploring academic majors, researching occupations.
and creating a career plan.

VAED3113 Skills/Strategies in Human Resource Development (Su, Su, Fa) This course addresses the acquisition of professional skills and strategies associated with creating and maintaining adult learning environments. It involves a regular class workshop situation where skills are practiced and encouraged in a workshop-like situation where skills are tried and implemented as well as assessed.

VAED3123 Theory and Principles of Needs Assessment and Evaluation in Human Resource Development (Sp, Su, Fa) This course addresses the acquisition of knowledge associated with needs assessment and evaluation of human resources with emphasis on workplace application.

VAED3133 Communication in Human Resource Development (Sp, Su, Fa) This course provides an introduction to communication principles and practices in the HRD area. The emphasis is on identifying/developing HRD communication skills that apply to roles, responsibilities and strategies, and exploring how organizations/individuals communicate and their impact on HRD. Both theoretical and practical applications will be included.

VAED3213 Introduction to Human Resource Development (Sp, Su, Fa) This course addresses the theory and processes of needs analysis, teaching/learning strategy design and implementation associated with creating and maintaining habituated learning environments. Emphasis is on the design and implementation of strategies and the evaluation of the educational outcomes. The professional practice section addresses the way in which adult learning environments can be created to implement experimental strategies discussed in tutorial sessions without putting participants at risk.

VAED3403 Employment Law in Human Resource Development (Sp, Su, Fa) This course covers the major employment law concepts used in human resource development. Applications of the key concepts and facts are emphasized in the class. Knowledge of the employment law facts and concepts and their applications at the workplace is vital for the human resource development professional.

VAED3503 Workforce Behavior (Sp, Su, Fa) The prerequisite for VAED 455/Portfolio Development, this course familiarizes students with the impact of work on the individual through a study of organizational culture, job satisfaction, motivation, communication, behavioral styles, and career development. In addition, students will assess individual personality traits, learning styles, work skills, and develop both professional and personal life goals.

VAED4113 Theory and Principles of Adult Education (Sp, Su, Fa) Focus of study on the concept of individual differences, what they are, and how they affect the learning and teaching of adults.

VAED4133 Applied Theory/Principle of Group Dynamics (Sp, Su, Fa) This course is designed for persons who are practicing tacticators of adult learning in a workplace setting. The course focuses on the various theories and principles that explain the underlying reasons for group behavior in the workplace.

VAED4213 Strategies in Professional Development (Sp, Su, Fa) Students are encouraged to examine their own learning processes and professional development in terms of the theories and principles of how adults learn. Methods and strategies for self development and change are discussed. Self-directed lifelong learning strategies that ensure continued growth for professional adult educators/human resource development practitioners will be discussed.

VAED4233 Leadership in Human Resource Development (HRD) (Sp, Su, Fa) This course provides strategies and principles to provide leadership in the HRD area, and is intended as a foundation course for students practicing, or who plan to pursue a career in HRD. The emphasis is on identifying/developing HRD leadership skills associated with self-direction and adult readiness in the workplace.

VAED450V Experiential Learning (Sp, Su, Fa) (1-20) This course is designed for persons qualifying for experiential credit to be applied to Industrial/Technology II, Technical Performance Improvement, Option III, Human Resource Development.

VAED4523 Diversity Issues and Globalization (Su) This course emphasis is on diversity in the workplace. Current issues on globalization and diversity are explored. Policy issues pertaining to diversity and globalization are examined. Prerequisite: Graduate standing.

VAED605V Independent Study (Irregular) (1-18) VAED6113 Administrative Leadership in Vocational and Adult Education (Sp, Su, Fa) The function of administering vocational and adult education program is addressed through the study of leadership style, function, and constituency.

VAED6123 Supervision in Vocational and Adult Education (Su) Principles and procedures of effective supervision; supervisory techniques and practices in facilitat- ing and improving instructional programs and vocational and adult education programs.

VAED6133 Instructional Management in Vocational and Adult Education (Sp, Su, Fa) An analysis of designing and managing vocational and adult instruction will relate principles of curriculum development in streamlining curriculum development, improving instruction, formulating schedules, and initiating competency-based education.

VAED6143 Student Services in Vocational and Adult Education (Sp, Su, Fa) A comprehensive course which includes managing student recruitment and admissions, providing systematic counseling and guidance services, maintaining overall school discipline, establishing a student placement service, and coordinating follow-up studies.

VAED6203 Instructional Materials in Vocational and Adult Education (Sp, Su, Fa) A comprehensive course designed to provide a unique opportunity to understand the development of instructional materials, to present, and test materials leading toward excellence in instruction.

VAED6213 Curriculum Development in Vocational and Adult Education (Sp, Su, Fa) Determining principles of curriculum development, organizing curriculum, and evaluating curriculum materials with special reference to vocational and adult education.

VAED6223 Advanced Methods in Vocational and Adult Education (Sp, Su, Fa) Improvement of instruction in vocational and adult education; particular emphasis upon formulating goals and objectives, structuring course of study, group and self-instructional methods, and evaluation of instruction.

VAED6303 Program Planning and Evaluation in Vocational and Adult Education (Sp, Su, Fa) Emphasis upon the planning and evaluation of vocational education. Theoretical founda- tion upon which the programming process is predicated, developing a theoretical mode, and acquiring the conceptual tools necessary for analyzing the programming process in any vocational or adult education organization.

VAED6403 Special Topics in Human Resource Development (Sp, Su, Fa) Designed for persons interested in exploring topics specific to vocational and adult education, the course provides an opportunity to explore a specific topic and develop related instruction, group and self-instructional materials, and evaluation of instruction.

VAED6413 Developing Human Resources (Sp, Su, Fa) An overview of human resource development, personnel management, and in college. Required for all persons preparing to teach in public and private schools.

VAED6423 Foundations of Human Resource Development (Sp, Su, Fa) An overview of human resource development theories and practice. Focus on the integration of individual development (training), career development, and organizational development. Topics include strategic planning for human resource development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organizational learning theories.

VAED6443 Seminar in Human Resource Development (Sp, Su, Fa) An overview of human resource development theories and practice. Focus on the integration of individual development (training), career development, and organizational development. Topics include strategic planning for human resource development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organizational learning theories.

VAED6453 Supervising in the Workplace (Sp, Su, Fa) An introduction to and survey of current theories and practices in training in the workplace. Students are expected to explore selected interdisciplinary topics in areas such as adult education, vocational education, human resource develop-ment, organizational behavior, instructional technology, and economics as they relate to training in the workplace.

VAED6503 Computer Technology in Vocational and Adult Education (Sp, Su, Fa) A study of comput-er technology as it relates to vocational and adult education. Brief introduction to computers, overview of hardware and software, hands-on learning of word processor, spreadsheet, database, desktop publishing, telecommunication, graphics, CAD/CAM, and/or CAA/CAI packages are covered.

VAED660V Workshop (Sp, Su, Fa) (1-18) Prerequisite: advanced graduate standing.

VAED674V Internship (Irregular) (1-18) Prerequisite: advanced graduate standing.

VOED200V Educational Specialist Project (Irregular) (1-6) An original project, research paper, or report required of all Ed. S. degree candidates. Prerequisite: admission into L.U. S. program.

VOED692V Directed Field Experience (Irregular) (1-18) teaching and supervision in secondary or post-second- ary schools or work in business or industry under guid- ance. For students who desire or need directed experience.

VOED699V Seminar (Irregular) (1-18)

**(VOED) VOCATIONAL EDUCATION**

VOED200V Work Experience I (Sp, Su, Fa) (1-6) Method of securing a position and making a beginning, commu-nication skills, job skills, and related information for the beginning teacher.

VOED201V Work Experience II (Sp, Su, Fa) (1-6) Job rating skills for work experience, mathematics for specific vocation, job skills, and related information for intermediate jobs in a specific vocation.

VOED202V Work Experience III (Sp, Su, Fa) (1-6) Personality factors, safety judgments, vocabulary for the occupation, job skills, and related information for advanced jobs in a specific vocation.

VOED203V Work Experience IV (Sp, Su, Fa) (1-6) Advanced mathematical skills, communication skills for a specific vocation, evaluation in business and industry, job skills, and related information for advanced work in a specific vocation.

VOED204V Work Experience V (Sp, Su, Fa) (1-6) Human relations, economies of business and industry, public relations, job skills, and related information at the supervisory level.

VOED3001 Orientation to VOED (Sp, Su, Fa) (1-6) Survey of the status of vocational education in public and private schools of our nation with an emphasis on Arkansas schools. Major emphasis is placed on vocational education in second- ary schools and 1- and 2-year undergraduate-level students with a major in vocational education. postsecondary schools and in college. Required for all.

VOED3112 Vocational Student Organizations (Fa) (Sp, Su, Fa) (1-9) Supervision in business and industry under guidance. Designed for students who desire or need directed occupational experience.

VOED390V Performance Based Teacher Education (Sp, Su, Fa) (3-12) Development of competencies related to the methodology of instructional planning, execution, and evaluation. Provided by PBTE modules and University resource person. Enrollment before VOED 391V and 392V. Prerequisite: employed in service vocational-tech-nical education field based instructor.

VOED391V Performance Based Teacher Education (Sp, Su, Fa) (3-12) Development of competencies related to vocational guidance, contemporary instructional techniques, and student vocational organiza-tions. Provided by PBTE modules and University resource person. Prerequisite: completion of 12 credit hours of VOED 390 and employee inservice-vocational-technical education field based instructor.

VOED392V Performance Based Teacher Education (Sp, Su, Fa) (3-12) Development of competencies related to program planning, development, evaluation; school-community relations; and professional development. Provided by PBTE modules and University resource person. Prerequisite: completion of 12 credit hours of VOED 391 and employee inservice-vocational-technical education field based instructor.
VOED393V Performance Based Internship (Sp, Su, Fa) (3-6) In an actual school setting the student will satisfactorily complete the competencies required to conduct a total vocational-technical education program. Instruction and follow-up will be provided by a University resource person. Prerequisite: completion of 12 credit hours of VOED at an approved service-vocational-technical education field based instructor.

VOED4003 Introduction to Professionalism (Sp, Su, Fa) Studying and developing professional concepts in vocational education with accepted principles of professionalism applied to vocational education settings.

VOED4013 Presentation Techniques (Fa) Methods and techniques in the preparation and delivery of teaching.

VOED4015 Understanding Student Affairs (Fa) This course provides students an opportunity to gain knowledge in the theory and practical application of student affairs. An emphasis is placed on leadership development, problem solving, and career exploration in student affairs.

VOED4122 Leadership Development (Sp, Su, Fa) Studying and developing leadership in vocational education using commonly accepted principles of leadership applied to vocational education settings.

VOED4303 Business Communications in Education (Sp, Su, Fa) Emphasizing applying and understanding principles of written and oral communication in the classroom. Specific attention given to effective communication and organizations, using words effectively, communicating through letters and memoranda, communicating through reports, oral communication, and communicating today and tomorrow.

VOED4403 Nutrition Education and Counseling (Irregular) Nutrition education and counseling methods for dietitians and other health professionals. Prerequisite: HRES 1121 and 1122.

VOED480V Problems in Vocational Education (Sp, Su, Fa) (1-6) Problems and issues relating to instruction in vocational and technical education.

VOED481V Problems in Technical Education (Sp, Su, Fa) (1-3) A consideration of special problems relating to technical education.

VOED5004 Cohort Directed Field Experience (Sp, Su, Fa) 10 weeks will be spent in an off-campus school, at which time the student will have an opportunity to observe 6 classroom teachers and to teach under supervision. Prerequisite: cohort year status.

VOED5016 Cohort Teaching Internship (Sp, Su, Fa) A minimum of 10 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: cohort year status.

VOED5103 Teaching Strategies in Vocational Education Methods and techniques in teaching vocational education. Prerequisites: foundational industrial technology education.

VOED5113 Laboratory Management in Vocational Education Selection, design, and evaluation of laboratory experiences in vocational business, home economics, and industrial technology education.

VOED5123 Current Design and Evaluation in Vocational Education (Sp, Su, Fa) Methods and techniques in developing, organizing, implementing, and evaluating programs in vocational education.

VOED5191 Applied Research (Sp, Su, Fa) Interpretation and evaluation of research in education for vocational-technical education.

VOED5203 School-To-Workforce (Sp, Su, Fa) (Irregular) (1-18) A minimum of 10 weeks will be spent in an off-campus school, at which time the student will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: cohort year status.

VOED5205 Cooperative Education/Industrial Technology (Sp, Su, Fa) This course is designed to provide students with a broad understanding of the production and delivery of goods/services. The course focuses on concepts and methodologies for managing the flow of material and information throughout the production and delivery of goods/services. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023H)

VOED5205H Honors Cooperative Education/Industrial Technology (Sp, Su, Fa) This course is designed to provide students with a broad understanding of the production and delivery of goods/services. The course focuses on concepts and methodologies for managing the flow of material and information throughout the production and delivery of goods/services. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023H)

VOED5206 Acquiring and Managing Human Resources (Sp, Su, Fa) Study of the process of acquiring and managing human resources, focusing on the organizational behavior, legal, economic, and technical issues concerning with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023/4)

VOED5206H Honors Acquiring and Managing Financial Resources (Sp, Su, Fa) Key decisions within in business processes related to the acquisition and management of capital resources, including decisions regarding what to acquire, how to finance the acquisition, and issues related to the existence of markets and how buyers within those markets may be accessed profitably. Key concepts include an overview of competitive markets, buyer behavior, developing new markets and products, promoting goods and services, pricing and profitability concepts, the sales and collections process, and strategic planning. Prerequisite: WUCM 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023/4)

WCOB2013H Honors Markets and Consumers (Sp, Su, Fa) Key decisions required to understand the existence of markets and how buyers within those markets may be accessed profitably. Key concepts include competitive markets, buyer behavior, developing new markets and products, promotion and distribution channels, pricing and profitability concepts, the sales and collections process, and strategic planning. Prerequisite: WUCM 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2013H)

WCOB2023H Honors Production and Delivery of Goods and Services (Sp, Su, Fa) This course is designed to provide students with a broad understanding of the production and delivery of goods/services. The course focuses on concepts and methodologies for managing the flow of material and information throughout the production and delivery of goods/services. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023/4)

WCOB2033H Honors Acquiring and Managing Human Resources (Sp, Su, Fa) Study of the process of acquiring and managing human resources, focusing on the organizational behavior, legal, economic, and technical issues concerning with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—each with a grade of “C” or better. (Same as WCOB 2023/4)

WCOB2043H Honors Acquiring and Managing Financial Resources (Sp, Su, Fa) Key decisions within in business processes related to the acquisition and management of capital resources, including decisions regarding what to acquire, how to finance the acquisition, and issues related to
Course Descriptions

to the accounting for those capital resources. The identification of key decisions leads to decision models and the identification of those capital resources, including decisions regarding what to acquire, how to finance the acquisition, and issues related to the accounting for those capital resources. The identification of key decisions leads to decision models and the identification of information needs. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and WCOB 1012—with each of a grade of "C" or better. (Same as WCOB 2043)

WCOB5003 College Honors Colloquium (Sp, Fa) (First Offered Summer 2002, Formerly BADM 3003H) An inter-disciplinary course exploring events, concepts, and new developments in the field of business administration.
Prerequisite: Junior or senior standing.

WCOB500V Study Abroad (Sp, Su, Fa) (1-15) (First Offered Summer 2002, Formerly BADM 300) Open to undergraduate students studying abroad in officially sanctioned programs.

WCOB5016H Honors Business Strategy and Planning (Sp, Fa) Integrative study of the managerial decision making process to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and experiential approaches to designing business plans for key decisions, implementing these decisions, and monitoring their effects.
Prerequisite: A business student must complete the pre-business requirements before enrolling for this course. WCOB 2013, WCOB 2023, WCOB 2033, and WCOB 2043 must each be completed with a grade of "C" or better. This course is restricted to Walton College students. (Same as WCOB 3016)

WCOB5181 Business Strategy and Planning (Sp, Fa) Integrative study of the managerial decisions; introduces students to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and experiential approaches to designing business plans for key decisions, implementing these decisions, and monitoring their effects.
Prerequisite: A business student must complete the pre-business requirements before enrolling for this course.
WCOB 2013, WCOB 2023, WCOB 2033, and WCOB 2043 must each be completed with a grade of "C" or better. This course is restricted to Walton College students. (Same as WJUN 3018H)

WCOB5310V Cooperative Education (1-3) (First Offered Summer 2002, Formerly BADM 310) Co-op allows students to earn one or two hours of credit per semester for work experiences. Accumulated credits may not exceed six hours. Eligibility requires: (1) junior standing in the college, (2) completion of the pre-business core and (3) the prescribed GPA. See catalog for details. Prerequisite: junior standing and completion of pre-business core. May be repeated for 3 hours

WCOB410V Special Topics in Business (Irregular) (1-6) Special business topics of an interdisciplinary nature.

WCOB4213 ERP Fundamentals (Sp) An introduction to enterprise resource planning systems. Students should gain an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented. Students will learn how to develop an integrated system that reaches across organizational boundaries and can change how a company does business. Implementation issues are covered, including the importance of change management. Prerequisite: WCOB232 ERP Configuration and Implementation (Sp) The process of configuring and implementing an enterprise resource planning system. Business process re-engineering and System/2 implementation will develop a company and set up several modules in SAP R/3 for use. Develop understanding of how the business processes work and integrate.
Prerequisite: WCOB 5213 with a grade of "C" or better.

WCOB6611 Seminar in Business Administration Teaching I (Fa) (First Offered Summer 2002, Formerly BADM 6111) This course in college level teaching is designed for graduate students and new college teachers with specific emphasis on the Business Administration learning and classroom management. The purpose of this course is to introduce graduate students to principles of teaching and learning and to prepare them to teach as new college teachers in the classroom as teachers. Prerequisite: graduate standing.
WCOB6812 Seminar in Business Administration Teaching II (Sp, Fa) (First Offered Summer 2002, Formerly BADM 6112) The student teacher will have successfully completed Seminar in Business Administration Teaching I, this course is suggested as the second course in the sequence. It is designed a hands-on teaching course. Students will be assigned a class to teach by their respective department and will be supervised. In addition, all students in the class will come together for seminar discussion twice per month. Prerequisite: WCOB 6111 or equivalent.

WCOB6813 Seminar in Business Administration Teaching III (Sp, Fa) (First Offered Summer 2002, Formerly BADM 6113) This is an advanced course in college level teaching designed for graduate students and new college teachers and focuses on the Business Administration learning and classroom management. The purpose of this course is to enhance graduate students’ knowledge of teaching pedagogy given a base knowledge and classroom experience. This course will focus on current and advanced topics of teaching and learning, as well as research in teaching. Prerequisite: WCOB 6111 or equivalent, WJUN 6211 suggested.

WLIT1113H Honors World Literature I (Sp, Su, Fa) An introduction to the study of both western and non-western literature. Prerequisite: Participation in Fulbright College Scholars Program or English ACT score of 28 or above. (Same as WLIT 1113H, WJUN 1113H)
WLIT1113C World Literature I (Irregular) An introduction to literature from the beginning of civilization to about 1650. Corequisite: Drill component. (Same as WLIT 1113, WJUN 1113, WJUN 1119)

WLIT1113W World Literature I (Sp, Su) A continuation of the study of world literature. Prerequisite: WLIT 1113H and participation in the Fulbright College Scholars Program or English ACT score of 28 or above. (Same as WLIT 1113W, WJUN 1113W, WJUN 1113)
WLIT1123 World Literature II (Sp, Su, Fa) An introduction to literature from 1650 to the present. Prerequisite: WLIT 1113. (Same as WLIT 1123W, WJUN 1123W, WJUN 1123)
WLIT1123G Greek and Roman Mythology (Irregular) A study of the stories, figures, and motifs in the mythology of Greece and Rome. Prerequisite: WJUN 1013 and ENGL 1013.

WLIT2332 Patterns in Mythology (Irregular) An analytic study of the recurrent patterns, themes and motifs in the mythology. May include Norse, Celtic, Babylonian, Indian, American Indian materials. Greek and Roman material will generally be excluded from the course. Prerequisite: WJUN 1113.
WLIT3263 The European Novel to 1900 (Irregular) Novels representative of several schools and countries to 1900. (Same as ENGL 3263)

WLIT3623 The Bible as Literature (Irregular) The several translations of the Bible; its qualities as great literature; influence upon literature in English; types of literary forms. (Same as ENGL 3623)

WLIT3963 Twentieth-Century Continental Novel (Irregular) Survey of the continental novel from 1900 to the present.

WLIT3983 Special Studies (Irregular) Covers a topic not usually presented in depth in regular courses. Not an independent study. This course may be repeated. Prerequisite: junior standing. (Same as WJUN 3983H)

WLIT4123 Survey of Russian Literature from its Beginning to the 1917 Revolution (Irregular) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. (Same as RUSS 4123)

WLIT4133 Survey of Russian Literature Since the 1917 Revolution (Irregular) The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. (Same as RUSS 4133)

WLIT4273 Literature of India and the Near East (Irregular) Leading works and genres of the ancient civilizations, the Moslem world and India, and their contribution to the Western literary tradition.

WLIT4293 Literature of China and Japan (Irregular) Survey of the literary works of the Far East, and of its contribution to the Western Tradition.

WLIT4913 Literary Reflections and the Holocaust (Irregular) Wearing of tefillin, poetry, autobiography, and drama from works written originally in French, Polish, German, Dutch, English, and Yiddish, this course introduces students to the Holocaust through literature. Deals with the adequacy of imaginative literature in the face of atrocity, the comparative effectiveness of fiction versus autobiography, and the dangers of exploitation and trivialization. (Same as HUMN 4913)

WLIT4923 Modern World Drama (Irregular) Drama from Ibsen to the 1930s. (Same as ENGL 4923)

WLIT4963 Contemporary World Drama (Irregular) Drama since the 1930s. (Same as ENGL 4963)

WLIT4993 African Literature (Irregular) A study of modern African fiction, drama, poetry, and film from various parts of Africa in their cultural context. Works are in English or English translation. (Same as WLIT 4993)

WLIT5193 Introduction to Comparative Literature (Irregular) Literary theory, genres, movements, and influences. Prerequisite: WLIT 1113. (Same as ENGL 5193)

WLIT5233 Form and Theory of Translation (Irregular) An examination of the principal challenges that confront translators of literature, including the recreation of style, dialect, ambiguities, and formal poetry; vertical translation where multiple cultures and languages are involved; the question of how literal a translation should be. (Same as ENGL 5233)

WLIT5473 Germanic and Celtic Backgrounds of Medieval Literature (Irregular) Medieval traditions of Old and Middle English, of Germany, Ireland, Scandinavia, and Wales. (Same as ENGL 5483)

WLIT5593 The Renaissance (Irregular) Italian forms and writers of the late 15th and 16th centuries and the spread of the Renaissance tradition in Spain, Portugal, France, and Northern Europe up to 1660.

WLIT5623 The Bible as Literature (Irregular) The several translations of the bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Same as ENGL 5623)

WLIT5793 The Enlightenment (Irregular) Literature of the late 17th and 18th centuries, especially in France and Germany.

WLIT600V Master’s Thesis (Sp, Su, Fa) (1-6)

WLIT603V Special Studies in Comparative Literature (Irregular) (1-6)

WLIT690V Seminar (Irregular) (1-6)

WLIT699V Master of Fine Arts in Translation Thesis (Sp, Su, Fa) (1-6)

WLIT770V Doctoral Dissertation (Sp, Su, Fa) (1-12)
