Total Units in Sequence: 120
* Must be completed prior to WCOB 1033.
** Must be completed prior to MGMT 3013.
*** Must be completed prior to taking any 3000 or 4000 level business courses.

**International Business Minor for Business Students**

The Walton College offers a minor for students desiring more knowledge in international programs to assist them with their business careers. The minor requires completion of 21 required hours of study (including equivalencies). The 21 hours include the following courses:

Select seven of the following: 21
- ECON 3843 Economic Development, Poverty & the Role of the World Bank and IMF in Low-Income Countries
- ECON 3853 Emerging Markets
- ECON 3933 The Japanese Economic System
- ECON 4633 International Trade
- ECON 4643 International Macroeconomics and Finance
- ECON 468V International Economics and Business Seminar
- FINN 3703 International Finance
- MGMT 4583 International Management
- MKTG 4633 Global Marketing
- 3 hours of Study Abroad led by Walton College faculty
- SCMT 3643 International Transportation and Logistics
- Other – Department Chair approval needed

Total Hours 21

Students must also complete six hours of intermediate foreign language. Students whose native language is English or whose native language is not taught at the University of Arkansas must select six hours of university course work in a single foreign language. Students who, on the basis of prior knowledge of language, omit one or both courses in the intermediate language sequence — at 2003 and 2013 level — may receive degree credit for omitted courses if they validate their higher placement by passing the business language course (or equivalent) with a grade of “C” or above. Students with no previous foreign language training or only rudimentary knowledge of a foreign language will be required to complete up to six hours of elementary foreign language. Students whose native language is not English but is taught at the University of Arkansas will normally be required to select a third language.

Students may select from one of the following language tracks:

**Arabic**
- ARAB 2016 Intensive Arabic II 6

**Chinese**
- CHIN 2003 Intermediate Chinese I 3
- CHIN 2013 Intermediate Chinese II 3

**French**
- FREN 2003 Intermediate French I (ACTS Equivalency = FREN 2013) 3
- FREN 2013 Intermediate French II (ACTS Equivalency = FREN 2023) 3
- or FREN 2013 H Honors Intermediate French II

**German**
- GERM 2003 Intermediate German I (ACTS Equivalency = GERM 2013) 3
- GERM 2013 Intermediate German II (ACTS Equivalency = GERM 2023) 3

**Italian**
- ITAL 2003 Intermediate Italian I (Fa) 3
- ITAL 2013 Intermediate Italian II (Sp) 3

**Japanese**
- JAPN 2003 Intermediate Japanese I (Fa) 3
- JAPN 2013 Intermediate Japanese II (Sp) 3
- or JAPN 2013 HHonors Intermediate Japanese II (Sp)

**Russian**
- RUSS 2003 Intermediate Russian I 3
- RUSS 2013 Intermediate Russian II 3
Accounting Major Requirements

</tbody>
</table>

Maximum of 30 hours of ACCT courses in department (core, major, elective). More than 30 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.

Total Hours 24

Junior/Senior Business Electives (12 hours)

Selection of electives should be made in consultation with academic advisers. Students planning on taking professional examinations should ascertain course requirements by examining authorities. Successful completion of a Master of Accountancy Degree from the University of Arkansas will qualify a student to take the CPA examination in Arkansas. B.S.B.A. graduates would need additional accounting hours and other courses amounting to a total of 150 semester hours to sit for the CPA exam in Arkansas.

The following courses are highly recommended to satisfy the junior/senior business elective requirement: ACCT 310V, ACCT 410V, ACCT 4003H, FINN 3013, FINN 3103, FINN 3703, ISYS 4213 or any 3-hour Walton College Study Abroad Course. Students in the online program are encouraged to complete ACCT 310V, FINN 3013, ISYS 4213, or any 3-hour Walton College Study Abroad Course. No more than six hours of accounting may be in the major.

Accounting Students are encouraged to utilize ACCT 310V in the Spring of Year 4 for Internship Credit as a business elective (in combination with compressed sections of ACCT 4673 and ACCT 4963). To do so requires the student to defer 3 credit hours of General Education electives to an alternative Fall, Spring, or Summer semester. This also strengthens the ability of the student to transition into the Masters of Accounting Program.

Accounting B.S.B.A.

Eight-Semester Degree Program:

Students wishing to follow the eight-semester degree plan should see the Eight Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

Courses in **BOLD** must be taken in the designated semester. Courses in *ITALIC* may be taken in varied sequences as long as other designated requirements for these courses are met. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.

---

1. Must be completed prior to MGMT 3013.
2. Must be completed prior to taking any 3000 or 4000 level business courses.

Students are encouraged to take the following courses to satisfy the junior/senior business elective requirement: ACCT 310V, ACCT 410V, ACCT 4003H, FINN 3013, FINN 3103, FINN 3703, ISYS 4213 or any 3-hour Walton College Study Abroad Course. No more than six hours of accounting may be in the major.

Accounting Students are encouraged to utilize ACCT 310V in the Spring of Year 4 for Internship Credit as a business elective (in combination with compressed sections of ACCT 4673 and ACCT 4963). To do so requires the student to defer 3 credit hours of General Education electives to an alternative Fall, Spring, or Summer semester. This also strengthens the ability of the student to transition into the Masters of Accounting Program.

### Accounting Minor for Business Students

The Department of Accounting offers a minor for Walton College students desiring more knowledge of accounting to assist them in their business careers. The minor requires the completion of 15 specific hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include the following courses:

<table>
<thead>
<tr>
<th></th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 3723 Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3753 Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3843 Fundamentals of Taxation I</td>
<td>3</td>
</tr>
</tbody>
</table>

Choose two of the following four courses:

<table>
<thead>
<tr>
<th></th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 3533 Accounting Technology</td>
<td>6</td>
</tr>
<tr>
<td>ACCT 4673 Product, Project and Service Costing</td>
<td>6</td>
</tr>
<tr>
<td>ACCT 4753 Intermediate Accounting III</td>
<td>6</td>
</tr>
<tr>
<td>ACCT 4963 Audit and Assurance Services</td>
<td>6</td>
</tr>
</tbody>
</table>

Students who desire to earn an Accounting minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

### Admission

Students are admitted to the integrated program according to the following requirements. Admission is granted only for the fall semester; February 15 of the junior year is the application deadline for those who wish to begin the integrated program the following fall. Students interested in this program must have completed 90 credit hours of study towards the baccalaureate degree (including ACCT 2013, ACCT 3723 and ACCT 3843) by the February 15 deadline.
Acceptance into the integrated program is based upon the discretion of
the admissions committee. The committee considers the overall
quality of the applications, including the overall grade point average, the
grades in ACCT 2013, ACCT 3723 and ACCT 3843, and the Graduate
Management Admission Test (GMAT), as well as other relevant examples of
academic ability and leadership. To receive serious consideration by
the admissions committee, a student should have a minimum GPA of 3.0
within the applicant’s overall university and accounting coursework.
Due to the demand for seats in the program, the admissions committee
selectively restricts admission into the program based upon the availability
of instructional resources. Students must complete at least two long-
session semesters in residence in the M.Acc. program.
Transfer students will be handled on a case-by-case basis.

Satisfactory Progress

Students are expected to make continuous progress toward the degree by
completing required accounting coursework each semester. Students who
fail to meet the requirements for the M.Acc. program must choose another
major of study or finalize their B.S.B.A. in Accounting. Students will be
notified before this action is taken and should meet with an academic
advisor in the Undergraduate Programs Office upon notification.

Probation

A student is placed on probation if his or her grade point average in core
undergraduate accounting courses falls below 3.00. Except with the
consent of the M.Acc. Program Director a student on probation may not
take graduate accounting courses.

Graduation

To receive an integrated B.S.B.A/M.Acc. degree, a student must have a
grade point average of at least 3.00 in all coursework taken as part of the
minimum thirty hour M.Acc. degree. He or she must also have a grade
point average in graduate accounting coursework of at least 3.00.

Degree Requirements

The requirements of B.S.B.A./M.Acc. Integrated program are:

1. Undergraduate coursework
   a. Complete the requirements for the B.S.B.A. degree requirements
      and Accounting Major Requirements detailed above.
   b. Students are strongly encouraged, but not required, to participate
      in an accounting internship, ACCT 310V.

2. Graduate coursework

Students with appropriate backgrounds in business administration and
economics and with an undergraduate concentration in accounting will
be required to complete 30 semester hours of course work beyond the
baccalaureate degree, at least 21 semester hours of which must be in
courses reserved exclusively for graduate students.

All students must be enrolled for a minimum of 12 hours during
consecutive fall/spring semesters. The student must be in residence a
minimum of 24 weeks (see residency requirements of the Master of Arts/
Master of Science).

A minimum of 18 semester hours of accounting are required, 12 hours of
which are specified:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5413</td>
<td>Advanced Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 5433</td>
<td>Fraud Prevention and Detection</td>
<td>3</td>
</tr>
</tbody>
</table>

A minimum of six semester hours of the student’s graduate program must be
non-accounting electives.

The M.Acc. degree program does not require a thesis. Successful
completion of integrated B.S.B.A/M.Acc program from the University of
Arkansas will qualify a student to take relevant professional examinations.

For further information, write to the M.Acc. Adviser, Department of
Accounting, Walton College of Business, University of Arkansas,
Fayetteville, AR 72701 or contact the Graduate School of Business at
gsb@walton.uark.edu.

Economics (ECON)

Raja Kali
Department Chair
402 Business Building
479-575-ECON (3266)
Economics Department Website (https://economics.uark.edu)

The department of economics offers two concentrations within the business economics major:

1. Business Economics

The concentration in business economics is intended for those students who are interested primarily in business, but at the same time have a desire to understand the more advanced tools of economic analysis. Such a background is excellent preparation for careers in corporate research and planning, as well as careers with government and regulatory agencies, for graduate study in business and economics, and for law school. Students who want to pursue an advanced degree in business economics can, with appropriate planning, complete a master’s degree at the University of Arkansas within 12 months after receiving a B.S.B.A. degree. Please see the economics department chair for more information.

The international economics and business concentration is intended for students who wish to learn more about the international aspects of economics and business. It provides preparation for a broad range of careers in business, including management, marketing, and finance.

It is strongly recommended that economics majors who plan to continue their studies at the graduate level take at least two semesters of calculus (MATH 2554 and MATH 2564) and linear algebra (MATH 3083). These courses will substitute for the math courses required within Walton College core (MATH 2043 and MATH 2053).

Economics Minors for Business Students

The Department of Economics offers two minors for Walton College students desiring more knowledge of economics to assist them in their business careers. The minors require completion of 15 hours of study and all of the upper division courses applied toward the minor must be taken in residence.

Business Economics Concentration

The major in Business Economics requires 21 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a WCOB major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See an adviser for selection of courses.

The courses required for the business economics concentration include those required in Walton College and Fulbright College. In addition, 15 hours of specified courses (listed below) are required:

Major Course Requirements in the concentration

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 3033</td>
<td>Microeconomic Theory</td>
</tr>
<tr>

<td>ECON 4333</td>
<td>Economics of Organizations</td>
</tr>
</tbody>
</table>

ECON 4743   Introduction to Econometrics
or ECON 4753 Forecasting

Nine hours of ECON 3000/4000

Maximum of 27 hours of ECON courses in department (core, major, elective). More than 27 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.

Total Hours: 21

Junior/Senior Business Electives (15 hours)

Economics B.S.B.A. with Business Economics Concentration

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Courses in ITALIC may be taken in varied sequences as long as other designated requirements for these courses are met. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.

First Year

<td>Other courses may fulfill this requirement as approved by the Department Chair</td>
</tr>
</tbody>
</table>

Total Hours: 21

**Junior/Senior Business Electives (15 hours)**

**Foreign Language Requirements (9 Hours)**

Students whose native language is English or whose native language is not taught at the University of Arkansas must complete nine hours of university course work in a single foreign language — three hours of intermediate language and six hours of 3000 level or higher. Students who, on the basis of prior knowledge of language, may receive degree credit for courses if they validate their higher placement by passing the business language course (or equivalent) with a grade of “C” or above. Students with no previous foreign language training or only rudimentary knowledge of a foreign language will be required to complete up to six hours of elementary language — at 1003 and 1013 level — in addition to the hours of language specified above.

Students may select one of the following language tracks:

### Arabic

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARAB 2013</td>
<td>Intermediate Arabic II</td>
</tr>
<tr>
<td>ARAB 2016</td>

</tr>
</thead>
<tbody>
<tr>
<td>GERM 2003</td>
<td>Intermediate German I (ACTS Equivalency = GERM 2013)</td>
</tr>
</tbody>
</table>

---

1. Must be completed prior to MGMT 3013.
2. Must be completed prior to taking any 3000 or 4000 level business courses.
Students whose native language is not English but is taught at the University of Arkansas must select a third language from the list above, or substitute six hours of upper-division English language courses (i.e., speech, writing, or U.S. literature), to be selected with the consent of the department chair. Those students whose native language is not taught at the University of Arkansas will normally be required to select a third language.

Area Studies Requirements (6 Hours)

For students taking a foreign language, six hours of upper-division English language courses (i.e., speech, writing, or U.S. literature), to be selected with the consent of the department chair. Those students whose native language is not taught at the University of Arkansas will normally be required to select a third language.

For students taking a foreign language, six hours of upper-division English language courses (i.e., speech, writing, or U.S. literature), to be selected with the consent of the department chair. Those students whose native language is not taught at the University of Arkansas will normally be required to select a third language.

Students whose native language is not English but is taught at the University of Arkansas must select a third language from the list above, or substitute six hours of upper-division English language courses (i.e., speech, writing, or U.S. literature), to be selected with the consent of the department chair. Those students whose native language is not taught at the University of Arkansas will normally be required to select a third language.

Economics B.A. with Emphasis in International Economics and Business

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) for University requirements of the program.

Students who desire to earn an Economics minor must notify the Walton College Undergraduate Programs Office of their intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

Balthrop, Andrew, Ph.D. (Georgia State University), Visiting Assistant Professor, 2017.
Brownback, Andrew P., Ph.D. (University of California, San Diego), B.A. (Kansas State University), Assistant Professor, 2015.
Civelli, Andrea, Ph.D. (Princeton Theological Seminary), M.A. (Princeton University), B.A. (Bocconi University, Milan), Associate Professor, 2010.
Embeye, Abel, Ph.D. (Georgia State University), M.A. (Tilburg University), B.A. (University of Asmara), Clinical Assistant Professor, 2010.
Farmer, Amy Lynn, Ph.D., M.A. (Duke University), B.S. (Purdue University), University Professor, 1999.
Ferrier, Gary D., Ph.D. (University of North Carolina–Chapel Hill), B.A. (University of Wisconsin-Madison), University Professor, 1993.
Gaduh, Arvya, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California-Berkeley), Assistant Professor, 2013.
Geng, Difei, Ph.D. (Vanderbilt University), M.A. (Southern Methodist University), M.A. (Nankai University), B.A. (Tianjin University of Finance Economics), Assistant Professor, 2016.
Gu, Jingping, Ph.D. (Texas A&M University), M.A. (Peking University), B.A. (Renmin University of China, Beijing), Associate Professor, 2008.
Hao, Li, Ph.D. (George Mason University), M.S.C.E. (Hong Kong University of Science and Technology), B.A. (Fudan University, China), Assistant Professor, 2011.
Horowitz, Andrew W., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Maryland), Professor, 1998.
Jaduh, Arva, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California, Berkeley), Assistant Professor, 2013.
Kali, Raja, Ph.D., M.A. (University of Maryland University College), B.S.C. (University of Calcutta), Professor, 1999.
Koh, Dongva, Ph.D. (Washington University-St. Louis), M.A. (Boston University), B.A. (Keio University), Assistant Professor, 2014.
Lee, Dou Young, B.A., B.S. (Korea University), Visiting Instructor, 2016.
Li, Jing, Ph.D., (University of Tennessee), Assistant Professor, 2017.
McGee, Peter J., Ph.D. (Ohio State University), B.S. (Tulane University), Associate Professor, 2014.
Stapp, Robert Bruce, Ph.D., M.S. (Oklahoma State University), B.S.B.A. (Oklahoma City University), Clinical Professor, 1995.

Economics Minor
The minor in Economics requires completion of 15 hours of study:

<table>

Finance (FINN)

Pu Liu
Department Chair
343 Business Building
479-575-4505

Finance Department Website (https://finance.uark.edu)

The academic mission of the department of finance is to provide an educational experience that:

- Stimulates student learning through open dialogue and informative discussion both inside and outside the classroom;
- Actively engages students in their own learning through problem-based casework, participation in real-world business activities, and internships in the financial community; and
- Prepares students to successfully meet the rigors of the challenging and diverse career opportunities in finance.

Students who elect to major in finance can choose from one of five concentrations: banking, energy finance, financial management/investment, insurance, and real estate. This choice should reflect the student’s primary career focus and electives should be used to complement the coursework in the chosen concentration. Careers in finance that are analytically oriented will generally require proficiency in accounting, economics, and quantitative methods. In contrast, careers in finance that are sales or management oriented will generally require marketing and management skills. Finance majors are strongly encouraged to consult with departmental faculty advisers and/or the department chair in developing their curriculum.

Finance Major with Banking Concentration

Finance Major Requirements

Major Course Requirements
FINN 3013 Financial Analysis 3
FINN 3053 Financial Markets and Institutions 3
FINN 3703 International Finance 3

Maximum of 27 hours of FINN courses in department (core, major, elective). More than 27 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.

Junior/Senior Level Business Electives 12
Concentration hours 15
Total Hours 36

Banking Concentration
FINN 3103 Financial Modeling 3
FINN 3133 Commercial Banking 3
FINN 4313 Advanced Commercial Banking 3

Any two of the following courses, which are highly recommended, satisfy the 6-credit-hour interdisciplinary requirement in the finance major:

Accounting
ACCT 3723 Intermediate Accounting I
ACCT 3753 Intermediate Accounting II

Economics
ECON 4433 Experimental Economics

Information Systems
ISYS 2263 Principles of Information Systems
ISYS 4213 ERP Fundamentals

Management
MGMT 3933 Entrepreneurship and New Venture Development
MGMT 4433 Small Enterprise Management

Marketing
MKTG 3553 Consumer Behavior
MKTG 3633 Marketing Research

Supply Chain Management
SCMT 3613 Supply Management
SCMT 3623 Advanced Inventory Management and Forecasting

Total Hours 9

Finance B.S.B.A. with Banking Concentration

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Courses in ITALIC may be taken in varied sequences as long as other designated requirements for these courses are met. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.

Total Units in Sequence: 120

1 Must be completed prior to MGMT 3013.
2 Must be completed prior to taking any 3000 or 4000 level business courses.
Finance Major with Risk Management Concentration

Finance Major Requirements

Major Course Requirements
FINN 3013 Financial Analysis 3
FINN 3053 Financial Markets and Institutions 3
FINN 3703 International Finance 3

Maximum of 27 hours of FINN courses in department (core, major, elective). More than 27 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.

Junior/Senior Level Business Electives 12
Concentration hours 15

Total Hours 36

Risk Management Concentration
FINN 3623 Risk Management 3
FINN 4733 Life and Health Insurance I 3
FINN 4833 Property and Casualty Insurance I 3

Any two of the following courses, which are highly recommended, satisfy the 6-credit-hour interdisciplinary requirement in the finance major:

Accounting
ACCT 3723 Intermediate Accounting I
ACCT 3753 Intermediate Accounting II

Economics
ECON 4433 Experimental Economics

Information Systems
ISYS 2263 Principles of Information Systems
ISYS 4213 ERP Fundamentals

Management
MGMT 3933 Entrepreneurship and New Venture Development
MGMT 4433 Small Enterprise Management

Marketing
MKTG 3553 Consumer Behavior
MKTG 3633 Marketing Research

Supply Chain Management
SCMT 3613 Supply Management
SCMT 3623 Advanced Inventory Management and Forecasting

Total Hours 15

Finance B.S.B.A. with Risk Management Concentration

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Courses in ITALIC may be taken in varied sequences as long as other designated requirements for these courses are met. 2. Must be completed prior to taking any 3000 or 4000 level courses.

Finance Minors for Business Students

The Department of Finance offers two minor options for Walton College students in the areas of Banking/Financial Management/Investment and Insurance/Real Estate. The minors require completion of 15 hours of study with all of the upper level courses applied toward the minor taken in residence. The 15 hours include the following options and courses:

1. Banking/Financial Management/Investment
   - FINN 3013 Financial Analysis
   - Select two of the following:
     - FINN 3053 Financial Markets and Institutions
     - FINN 3103 Financial Modeling
     - FINN 3703 International Finance
   - Select two of the following:
     - FINN 3063 Investments
     - FINN 3133 Commercial Banking
     - FINN 3603 Corporate Finance
     - FINN 4133 Advanced Investments
     - FINN 4233 Advanced Corporate Finance
     - FINN 4313 Advanced Commercial Banking
   - Total Hours: 15

2. Insurance/Real Estate
   - Select five of the following:
     - FINN 3003 Personal Financial Management
     - FINN 3623 Risk Management
     - FINN 4733 Life and Health Insurance I
     - FINN 4833 Property and Casualty Insurance I
     - FINN 3933 Real Estate Principles
     - FINN 4413 Real Estate Appraisal
     - FINN 4433 Real Estate Finance and Investment
   - Total Hours: 15

Students who desire to earn a Finance minor must notify the Walton College Undergraduate Programs Office of their intent to pursue a minor. All requirements for a minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor.

Ashour, Samar, Ph.D. (University of Texas at Arlington), M.B.A. (Tanta University), Clinical Assistant Professor, 2017.

Dominick, John Andrew, Ph.D., M.S. (University of Alabama), B.S.B.A. (Louisiana Polytechnic Institute), Professor, 1970.

Hearth, Douglas P., Ph.D. (University of Iowa), M.A. (University of Iowa), B.A. (University of Wisconsin, Madison), Associate Professor, 1989.

Hsu, Hung-Chia Scott, Ph.D. (University of North Carolina-Chapel Hill), M.A. (University of Southern California), B.A. (National Taiwan University), Assistant Professor, 2015.

Jandik, Tomas, Ph.D. (University of Pittsburgh), M.S., B.S. (Czech Technical University), Professor, 2000.

Jandik, Dobrina, Ph.D. (University of Arkansas), M.Sc. Eng. (University of Chemical Technology), M.B.A. (University of Montana), Clinical Associate Professor, 2017.

Li, Xi, Ph.D. (Vanderbilt University), M.A. (Tulane University), B.S. (Hunan University), Associate Professor, 2018.

Liu, Pu, Ph.D., M.B.A. (Indiana University Bloomington), B.S. (National Cheng Kung University), Professor, 1984.

Malakhov, Alexey, Ph.D. (Northwestern University), Ph.D. (University of North Carolina at Charlotte), M.S. (Moscow State University), Associate Professor, 2006.

Rennie, Craig, Ph.D. (University of Oregon), M.B.A. (Dalhousie University), B.A. (University of Toronto), Associate Professor, 2001.

Riley, Timothy B., Ph.D. (University of Kentucky), Assistant Professor, 2016.

Sirmans, Corbitt Stace, Ph.D., B.S. (Florida State University), Assistant Professor, 2014.

Tompkins, Chris, J.D. (Vanderbilt University), B.S. (U.S. Naval Academy), Instructor, 2011.

Webster, Jim, Ph.D. (Arizona State University), M.B.A. (University of Arkansas), B.S.C.E. (Indiana University-Purdue University-Indianapolis), Instructor, 2007.

Yeager, Timothy J., Ph.D., M.A. (Washington University in St. Louis), Professor, 2006.

Information Systems (ISYS)

Rajiv Sabherwal
Department Chair
204 Business Building
479-575-4500
Information Systems Department Website (https://information-systems.uark.edu)

The curriculum in information systems is designed to prepare graduates for careers in solving business problems with applications of computer technology.

Graduates with a degree in Information Systems are sought by hundreds of companies for many different types of positions, such as programmer, analyst, database administrator, and web developer, among others.
Graduates are now programming, analyzing and designing systems, consulting, teaching, and solving business problems across the country.

Three concentrations are offered:

- Business Analytics
- Enterprise Resource Planning
- Enterprise Systems

The department also offers two minors: one in business analytics and one in information systems for business students.

**Information Systems Major Requirements**

The major in Information Systems requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in the Information Systems major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor. The Information Systems department encourages its majors to seek an interdisciplinary minor. See an adviser for selection of courses.

NOTE: Course requirements in the Information Systems major total 24 credit hours. Because of prerequisites, students should allow two full years (24 months) to complete this coursework. Prerequisites are strictly enforced.

Business Analytics Minor

The Walton College offers an interdisciplinary minor in Business Analytics. Analytics are currently used by many companies for applications ranging from strategic management of data to day operations to customer insights to retail analytics to developing and maintaining a competitive edge. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor in residence. The 15 hours include:

- ISYS 4193 Business Analytics and Visualization (Fa) 3
- ISYS 4293 Business Intelligence (Sp) 3
- ISYS 4393 Seminar in Applied Business Analytics (Sp) 3

Total Units in Sequence: 120

1 Must be completed prior to MGMT 3013.
2 Must be completed prior to taking any 3000 or 4000 level business courses.

Information Systems Minor for Business Students

The Department of Information Systems offers a minor for Walton College students desiring more knowledge of information systems to assist them in their careers. The minor requires completion of 15 hours of study with all of the upper level courses applied toward the minor in residence. The 15 hours include the following courses:

- ISYS 2263 Principles of Information Systems 3
- ISYS 3293 Systems Analysis and Design 3
- ISYS 3393 Business Application Development Fundamentals 3
- ISYS 4213 ERP Fundamentals 3
- MGMT 3013 Strategic Management 3
- Junior Senior Business Electives 3
- General Education Elective 3

Year Total: 12 15

Fourth Year

- ISYS 4283 Business Database Systems 3
- ISYS 4453 Introduction to Enterprise Servers (Fa) 3
- Junior Senior Business Electives 6
- General Education Electives 3
- ISYS 4363 Business Project Development 3
- ISYS 4463 Enterprise Transaction Systems (Sp) 3
- Fine Arts/Humanities 3
- General Education Electives 6

Year Total: 15 15

Total Hours 15

Students who desire to earn an Information Systems minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for a minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper division minor requirements must be taken in residence.

Management Department Website (https://management.uark.edu)

Management is the force responsible for directing organizations toward goals or objectives. Therefore, the management curriculum focuses on the nature and capabilities of human and other resources, as well as how the manager plans, organizes, staffs, coordinates, and evaluates those resources in an organization and its environment. The study of management prepares men and women for positions of leadership in profit and nonprofit organizations of all sizes. Management majors gain insight and skill needed for careers as professional managers or as self-employed entrepreneurs. These skills include technical knowledge, communicative capacity, human understanding, and conceptual and problem-solving ability. Two majors are offered in the management department. Requirements of the management major are listed below. Find out more about the general business (p. 377) major.

Students may choose from among three concentrations:

- Human Resource Management
- Small Business and Entrepreneurship
- Organizational Leadership

Management Major with Human Resource Management Concentration

The Human Resource Management Concentration is designed to prepare students for careers in human resource-related occupations. Among issues and areas addressed are management-employee relations, quality of work life, compensation and other reward systems, organizational staffing, and training and development. The Human Resource Management track emphasizes the importance of integrating individual goals and organizational objectives.

All management majors must complete MGMT 4243 Ethics and Corporate Responsibility. An additional 21 hours of credit are required for students majoring in management. Six of these credit hours are specified in the concentration. Beyond this, students can choose from specified management and non-management courses in order to complete the requirements for the major.

Management Major Requirements

The major in management requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a management major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See an adviser for selection of courses.

Management Major with Small Business and Entrepreneurship Concentration
The Small Business and Entrepreneurship Concentration is suggested for students who are interested in starting and/or operating a small business or independent company after graduation. The Small Business and Entrepreneurship focus provides excellent preparation for students wishing to obtain a highly integrated view of business operations.

All management majors must complete MGMT 4243 Ethics and Corporate Responsibility. An additional 21 hours of credit are required for students majoring in management. Six of these credit hours are specified in the concentration. Beyond this, students can choose from specified management and non-management courses in order to complete the requirements for the major.

Management Major Requirements
The major in management requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a management major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. 2 Must be completed prior to taking any 3000 or 4000 level business course.

Marketing Minor for Business Students

The Department of Marketing offers a minor for Walton College students desiring more knowledge of marketing to assist them in their careers. The minor requires the completion of 15 hours of study with all of the courses applied toward the minor taken in residence. The 15 hours include the following courses:

- MKTG 3433 Introduction to Marketing 3
- MKTG 3553 Consumer Behavior 3
- Select three of the following: 9
  - MKTG 3653 Category Management Topics
  - MKTG 4233 Integrated Marketing Communications
  - MKTG 4343 Selling and Sales Management
  - MKTG 3633 Marketing Research
  - MKTG 4633 Global Marketing
  - MKTG 4433 Retail Strategy
  - MKTG 4443 Retail Buying and Merchandise
  - MKTG 4513 Nonprofit Marketing

Total Hours: 15

Students who desire to earn a Marketing minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student’s undergraduate degree. All specific course pre-requisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

Retail (RETL)

Jeff B. Murray
Marketing Department Chair
302 Business Building
479-575-4055

The Department of Marketing offers a retail major that leads to a B.S.B.A. degree. The department also offers a marketing major (http://catalog.uark.edu/undergraduatedepartment/samwaltونcollegeofbusiness/marketingmktg).

The major in retail is designed to prepare students for careers in retailing or in companies that manufacture, sell, and distribute consumer goods to retailers. In addition to a broad view of the business and retail environments students can select to concentrate their retail studies in accounting, economics, finance, information systems, international retail, management, marketing, or supply chain management. A general retail concentration is also available.

Retail Major Requirements

The retail major requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a retail major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See an adviser for selection of courses.

Supply Chain Management (SCMT)

Brian Fugate  
Department Chair  
475 Business Building  
479-575-4051  
Supply Chain Management Department Website (https://supplychain.uark.edu)

The Department of Supply Chain Management offers an undergraduate major leading to a Bachelor of Science in Business Administration degree. The major in supply chain management has two concentrations: Transportation and Logistics, and Retail Supply Chain Management.

The transportation and logistics concentration is designed to prepare students for careers in carrier management and logistics management. Carrier management is the management of domestic and international modes of transportation. Logistic management applies analytical techniques and uses the systems approach in managing the flow of materials into and through the production and manufacturing processes of a firm to its customers. Basic employment opportunities exist in marketing, sales, and operations positions with carriers in all transportation modes, and in positions with shippers having responsibility in one or more areas under logistics management, warehousing, packaging, and materials handling. Opportunities also exist in governmental agencies.

The retail supply chain management concentration is designed to prepare students for careers at retailers or in companies that manufacture, sell, and distribute consumer goods to retailers. Analytical techniques and the total cost approach will be applied in managing the flow of materials through production and distribution processes and to retailers. There will be an emphasis on business process integration.

Year Total: 15 12

Total Units in Sequence: 120

1 Must be completed prior to MGMT 3013.
2 Must be completed prior to taking any 3000 or 4000 level business courses.

Supply Chain Management Major Requirements

Major Course Requirements 24
SCMT 3443 Transportation and Distribution Management 3
SCMT 3613 Supply Management 3
SCMT 3623 Advanced Inventory Management and Forecasting 3
SCMT 3643 International Transportation and Logistics 3
SCMT 4653 Supply Chain Strategy 3

Concentration Hours 9
Maximum of 27 hours of SCMT courses in department (core, major, elective). More than 27 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.

Junior/Senior Business Electives 12
Total Hours 60

Retail Supply Chain Management Concentration

SCMT 3653 Retail Supply Chain Analysis 3
Plus two courses from the following: 6
ECON 4743 Introduction to Econometrics
ECON 4753 Forecasting
ISYS 4293 Business Intelligence (Sp)
ISYS 4213 ERP Fundamentals
MKTG 3633 Behavioral Supply Chain Management
SCMT 4003H Honors Supply Chain Management Colloquium

Concentration Hours 9

Supply Chain Management B.S.B.A. with a concentration in Retail Supply Chain Management

Eight-Semester Degree Program:

Students wishing to follow the eight-semester degree plan should see Eight Semester Degree Policy in the Academic Regulations chapter for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Courses in ITALIC may be taken in varied sequence as long as other designated requirements for these courses are met. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.
Supply Chain Management Minor for Business Students

The Department of Supply Chain Management offers a minor for Walton College students desiring more knowledge of supply chain management to assist them in their careers. The minor requires the completion of 15 hours of study from the following courses:

2. Must be completed prior to taking any 3000 or 4000 level business courses.

Walton College of Business (WCOB)

Alan E. Ellstrand
Associate Dean for Programs and Research
328 Business Building
479-575-7105

Walton College offers three minor programs for business majors, each of which is interdisciplinary and not attached to a specific department in the college. Requirements for each of the three minors are listed under the tabs.

Similarly, courses that are interdisciplinary and not assigned to a specific department in Walton College are listed here under the WCOB subject code.

Enterprise Resource Planning Minor

The Walton College offers an interdisciplinary minor in Enterprise Resource Planning (ERP). ERP systems are large-scale programs, which are used by many large companies to integrate their business processes and run the organization using primarily one software system. The minor

Aloysius, John, Ph.D. (Temple University), B.S. (University of Colombo, Sri Lanka), Professor, 1995.
Bechtel, Don, B.A. (Lebanon Valley College), Instructor, 2006.
Esper, Terry L., Ph.D., M.B.A. (University of Arkansas), B.A. (Philander Smith College), Associate Professor, 2013.
Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, 2015.
Garcia-Dastugue, Sebastian, Ph.D., M.A. (The Ohio State University), M.B.A. (Instituto de Altos Estudios, Universidad Austral), Clinical Assistant Professor, 2015.
Hofer, Christian, Ph.D. (University of Maryland University College), B.A. (European School of Business), Associate Professor, 2007.
Hyatt, David Graham, M.B.A., B.S.B.A. (University of Arkansas), Clinical Associate Professor, 2011.
Kent, John, Ph.D. (University of Tennessee), M.B.A. (University of Dallas), B.S. (Henderson State University), Clinical Associate Professor, 2014.
Murphey, William C., M.S. (National Defenses University), M.A. (George Washington University), Instructor, 2014.
Rossiter-Hofer, Adriana, Ph.D. (University of Maryland-College Park), M.S. (Federal University of Rio de Janeiro, Brazil), B.S. (Federal University of Pernambuco, Brazil), Associate Professor, 2008.
Scott, Marc, Ph.D. (North Dakota State University), M.S., B.S. (South Carolina State University), Clinical Assistant Professor, 2016.
Sodero, Annibal Camara, Ph.D. (Arizona State University), M.S.C. (Warkwick University), B.S.C. (UFMG-Brazil), Assistant Professor, 2013.
Thomas, Rodney W., Ph.D., M.B.A. (University of Tennessee), B.S.B.A. (Greensboro College), Associate Professor, 2017.
Van Hoek, Remko, Ph.D. (University of Utrecht), M.B.A. (London School of Economics), B.S.B.A. (Vanderbilt University), Clinical Full Professor, 2018.
Waller, Matthew A., Ph.D., M.S. (Pennsylvania State University), B.S. (University of Missouri-Columbia), Professor, 2002.
Williams, Brent D., Ph.D., M.S. (University of Arkansas), B.A. (Lyon College), Associate Professor, 2011.
requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include:

Students who desire to earn an Enterprise Resource Planning minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

**Financial Economics Minor**

The Walton College offers an interdisciplinary minor in Financial Economics. The minor will provide students with the background needed for research in finance and industry. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include:

<table>
<thead>
<tr>

Students who desire to earn a Financial Economics minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point-average in the courses offered for the minor. All upper division level minor requirements must be taken in residence.

**Nonprofit Studies Minor**

The Walton College offers an interdisciplinary minor in Nonprofit Studies. This minor will prepare students for working in the nonprofit sector as well as educating students who may be on boards and participate in other civic organizations. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include:

<table>

</tr>
</tbody>
</table>

Students who desire to earn a Nonprofit Studies minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point-average in the courses offered for the minor. All upper division level minor requirements must be taken in residence.

**Minors for Non-Business Students**

For students who are business majors, the requirements for business minors are listed with each major business program.

To facilitate students outside Walton College in obtaining knowledge that will assist them in making sustained contributions to organizations and society in a global, diverse, and dynamic environment, the Walton College offers a business minor for non-business majors. The minor requires completion of 21 required hours of study (including equivalencies) with at least 50 percent of the courses applied toward the minor taken in residence. Each student must have a 2.00 cumulative grade-point-average in the courses offered for the minor.

Non-business, degree-seeking students working toward a minor should note the following:

1. Students who elect to obtain a business minor must provide written notice of their intent to the dean’s office of the college in which they are receiving a degree. This notice and all requirements for the business minor must be completed prior to the awarding of the student’s undergraduate degree.

2. Business minor students must complete all 1000- and 2000-level courses required for the business minor and be a junior- or senior-level student to enroll in 3000- or 4000-level business courses.

3. All specific course prerequisites must be met. Although business minor students are not required to satisfy the entire pre-business core, they must complete the required courses and any other prerequisite course specified prior to enrolling in a 3000/4000-level course.

4. Business minor students may complete multiple minors with the exception of General Business and an additional area of business study. Students may not use more than three hours of minor courses toward additional minor requirements.

5. ECON 2143 will substitute for ECON 2013/ECON 2023 for prerequisite purposes. In addition, students who take both ECON 2013 Principles of Macroeconomics (ACTS Equivalency =
ECON 2103) and ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203) will satisfy the economics requirements of the minor.

6. Business minor students are ineligible to take MGMT 3013 Strategic Management.

7. ECON 3053 and WCOB 3043 may not count toward the junior- or senior-level course requirements for the minor.

8. All equivalencies must be approved by the assistant dean for undergraduate programs.

9. Students may choose to pursue Concentration 1–General Business online, as long as they adhere to the requirements for online programs (p. 377).

All upper level minor requirements must be taken in residence. All students seeking a business minor are required to complete the Walton College computer competency requirement ISYS 1120 and the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>

SCMT 3613  Supply Management 3
Two more courses of 3000/4000 level SCMT 6

Total Hours 12

College of Education and Health Professions

Mission and Objectives

The mission of the College of Education and Health Professions is to enhance the quality of life of the citizens of Arkansas, the nation, and the world through the development of scholar-practitioners in education, health, and human services.

The goals of the College of Education and Health Professions are to:

- Strengthen the academic quality and reputation of the college by developing and enhancing programs of excellence in teaching, research, and service.
- Improve the quality and diversity of our students, faculty, and staff.
- Generate increased private and public support for the college’s research, academic, and service initiatives.

Facilities and Resources

The Sylvia Hack Boyer Office of Academic Student Initiatives and Services (OASIS)
The office provides advising and student support services to undergraduate students in the College of Education and Health Professions from matriculation to graduation.

The Office for Teacher Education
The office provides field placement, teacher licensure, and student assessment. The office also provides support to the academic departments as they pursue state and national accreditation.

Organization

For administrative purposes, the undergraduate programs of the college are organized under four academic units, with majors shown after each unit:

1. Curriculum and Instruction
   a. Career and Technical Education
   b. Childhood Education
   c. Educational Studies
   d. Elementary Education
   e. Special Education

2. Eleanor Mann School of Nursing
   a. Nursing

3. Health, Human Performance and Recreation
   a. Kinesiology
   b. Public Health
   c. Recreation and Sport Management

4. Rehabilitation, Human Resources, and Communication Disorders
   a. Communication Disorders
   b. Human Resource and Workforce Development

Facilities

The Graduate Education Building, Peabody Hall, Epley Center for Health Professions, and the Health, Physical Education and Recreation Building serve as the nucleus of the College of Education and Health Profession’s activities.

The Graduate Education Building houses the Department of Rehabilitation, Human Resources and Communication disorders, an auditorium, several conference and seminar rooms, classrooms, and offices for individual professors, along with administrative and service units such as the Dean’s office, OASIS, and computer laboratory.

Peabody Hall houses the Department of Curriculum and Instruction, classrooms and offices for individual professors, along with the Office for Teacher Education for the College and University.

The Health, Physical Education and Recreation (HPER) Building houses the majority of faculty offices and classrooms for Athletic Training, Public Health, Kinesiology, Recreation and Sport Management, the Office for Studies on Aging, the Exercise Science Research Center, and the University Recreation offices.

The department of University Recreation serves the university community by providing a diverse selection of recreational opportunities and facilities that are designed to enhance the quality of life of each participant. University Recreation is organized into eight program area: Accessible Recreation, Club Sports, Facility Management, Fitness/Wellness,
Instructional Programs, Intramural Sports, and the Outdoor Connection Center. University Recreation operates its main facility in the Health, Physical Education and Recreation Building, which houses an Olympic-sized swimming pool, multiple gymnasiums, an indoor track, the Donna Axum Fitness Center, racquetball courts and the Outdoor Connection Center. In addition to the HPER building, UREC also operates the University Recreation Fitness Center, located on the second floor of the Arkansas Union, which features almost 6,000-square feet of fitness floor space, a 1,500-square foot group exercise room, and men's and women's locker and shower facilities. Memberships may be purchased by university faculty, staff and alumni for both the HPER Building and the University Recreation Fitness Center. For additional information, please visit the department of University Recreation website (http://urec.uark.edu).

The Communication Disorders program and the Speech and Hearing Clinic are housed in Epley Center for Health Professions. The clinic contains faculty offices, a classroom, a graduate seminar room, teaching and research laboratories, and space and facilities for the provision of services to the speech, language, and hearing impaired. University services are provided through the clinic to university students and the community.

The Eleanor Mann School of Nursing is also housed in Epley Center for Health Professions. The nursing program facilities include administrative offices, faculty offices, two classrooms, simulation laboratories, a conference room, and a computer classroom. The school has affiliation agreements for clinical practice with area health care agencies.

The West Avenue Annex building houses research and service units: the Center for Mathematics and Science Education (CMASE), the Center for Children and Youth, the Arkansas Leadership Academy (ALA) and the Office for Innovation in Education (OIE). Established in 1991, the Arkansas Leadership Academy is a nationally recognized statewide partnership of 13 universities, 9 professional associations, 15 educational cooperatives, the Arkansas Departments of Education, Higher Education, and Workforce Education, the Arkansas Educational Television Network, Tyson Foods Inc., Wal-Mart Stores Inc., and the Walton Family Foundation. The Center for Mathematics and Science Education provides quality resources to private and public educators. The center also serves as the Arkansas NASA Educator Resource Center, disseminating educational materials provided by NASA. The Office for Innovation in Education is funded by the Arkansas Department of Education to develop and test new approaches to deliver and assess K-12 education innovations.

Established in 1974, the Center for the Utilization of Rehabilitation Resources for Education, Networking, Training and Service (CURRENTS) provides customized training and consulting for organizations ranging from large state agencies to small not-for-profits and is nationally recognized for the high level of commitment and responsiveness to their customers and their efforts to expand, improve, and strengthen services to people with disabilities. The center is located at the Arkansas School for Mathematics, Sciences and the Arts, Hot Springs, Arkansas.

**Academic Journals**

The college is host to the *Journal of Research on the College President*, edited by G. David Gearhart, a professor of higher education and Chancellor Emeritus and the *Journal of School Choice*, edited by Robert Maranto. 21st Century Endowed Chair in Leadership in the Department of Education Reform.

**Degrees Offered**

The college offers curricula leading to three degrees - the Bachelor of Science in Education degree (B.S.E.), the Bachelor of Science (B.S.), and the Bachelor of Science in Nursing (B.S.N.). Some of these degree programs have concentrations and specialties that are described within their section(s).

**College Admission Requirements**

All entering students (including freshmen, international, and transfer) admitted to the University of Arkansas, Fayetteville, are eligible for admission to the college. Some undergraduate programs require additional admission criteria to complete.

**Transfer of Credit**

The policies controlling the granting of credit for course work taken at other institutions apply as follows:

1. **Courses completed at the lower-division (freshman or sophomore) level at another institution may not count as equivalents of upper-division (junior or senior) level courses offered in the college unless student requests program modification with proper petition approvals.**

2. **Students should be prepared to submit official course descriptions of transfer course work if there is any question as to whether the college will grant degree credit for such work.**

**Exploring Majors**

Students enrolled in the College of Education and Health Professions are encouraged to declare a major as soon as possible. For assistance contact the Sylvia Hack Boyer Office of Academic Student Initiatives and Services, 336 Graduate Education Building, 479-575-4203.

**College Scholarships**

The College of Education and Health Professions offers a number of scholarships in varying amounts. Recipient selection is based on a variety of attributes that are specific to each award. Attributes may include but are not limited to: the basis of promise, character, leadership skills, scholarship, or financial need.

Scholarship applications are available in December or January of each year via the College website (http://coehp.uark.edu). All current and future students of the college are strongly encouraged to take advantage of these scholarship opportunities. For further information regarding scholarships and the application process, visit the Scholarships link on the College of Education and Health Professions' website or contact the Dean's office.

**Student Organizations**

There are many general-interest societies and organizations on the campus, and nearly every department of the university maintains an honor society through which high scholarship is rewarded. Of special interest to students in the college are the following:

- Eta Sigma Gamma - honor society for Public Health
- Kappa Delta Pi – honor society for education
- Phi Delta Kappa – honor fraternity for graduate students
- Kinesiology Club – for kinesiology majors
- Recreation and Sport Management Majors Club – for recreation and sport management students
- Razorback Athletic Training Association (RATA) – for undergraduate kinesiology majors with a concentration in exercise science – pre
athletic training, entry level graduate athletic training students and graduate assistant athletic trainers in women’s and men’s athletics.

- National Student Speech-Language-Hearing Association – for communication disorders majors
- Arkansas Nursing Students Association, National Student Nurse Association, and the Pi Theta chapter of Sigma Theta Tau International Honor Society of Nursing – for nursing majors

College Academic Regulations

Admission Process for Initial Teacher Licensure

Stage I: Enrollment

Enroll in an undergraduate degree program leading to a potential teacher licensure field. Potential fields include the following:

- Agricultural Education – B.S.A.
- Art Education – B.F.A.
- Career & Technical Education (Business Education) – B.S.E. Licensure Program
- Career & Technical Education (Family & Consumer Science) – B.S.E. Licensure Program
- Career & Technical Education (Technology Education) – B.S.E. Licensure Program
- Childhood Education – B.S.E.
- Elementary Education – B.S.E. Licensure Program
- Human Environmental Sciences Education – B.S.H.E.S.
- Kinesiology K-12 – B.S. Licensure Program
- Music Education – B.M.
- Secondary Education – B.A., B.S.
- Special Education - B.S.E. Licensure Program
- Speech-Language Pathology – B.S.

Stage II: Admission to Teacher Education

Complete the Admission to Teacher Education application on the Office of Field Placement and Licensure website (http://teacher-education.uark.edu/admissions) for details. Satisfactory completion of this form does not guarantee admission to the student teaching semester or the Masters of Arts in Teaching (M.A.T.) degree program or other teacher education programs.

Stage III: Program Admission

The following minimum criteria are necessary to be eligible for consideration for admission to a teacher education program:

1. Meet all requirements in stages I and II.
2. Consult with faculty adviser for additional requirements set by the chosen program.

Initial Licensure

Students who have completed the stages listed above must obtain a licensure packet from the Teacher Certification Officer, 338 Graduate Education Building, prior to entering internship/student teaching. A mandatory meeting is held each semester before starting either an internship or a student teaching experience.

Students should always consult the Teacher Certification Officer or adviser regarding licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

College Honor Roll

At the close of each semester, the college recognizes students who qualify for the Honor Roll. Students must carry a minimum of 12 semester hours to be eligible for the Honor Roll and obtain a minimum term GPA of 3.75.

Graduation with Distinction

Graduation with Distinction will be conferred to College of Education and Health Professions students (who are not participating in the college “Honors Program”) based upon their University of Arkansas cumulative grade-point average at the time of graduation. To earn this distinction, a student must have completed at least one-half of the course work required for his or her degree at the University of Arkansas, Fayetteville. The graduation with distinction designation will be assigned as follows:

1. For highest distinction, the student must have a minimum cumulative grade point average of 3.95 and rank in the top 10 percent of the graduating class.
2. For high distinction, the student must have a minimum cumulative grade point average of 3.75 and rank in the top 10 percent of the graduating class.

Degree Requirements

Minimum Requirements for the B.S.E. or B.S. or B.S.N. Degree

The candidates for a baccalaureate degree from the college must meet university requirements, which specify at least 120 semester hours of work with a grade-point average of at least 2.00 on all work attempted in the university. Students exempting any course must still meet the 120-hour graduation requirement and should consult their adviser for specific program requirements. Exemption of courses does not result in credit earned. The students must comply with the prescriptions and restrictions listed below and under General Studies and must complete the requirements in one or more of the approved degree programs.

Students must also meet all other university requirements for graduation, including the University Core requirements (p. 84). Students are required to have a pre-graduation check at least one semester prior to the graduation term. Students who complete the pre-graduation check and meet all university and College of Education and Health Professions requirements may apply for graduation under the guidelines detailed on the Graduation Requirements page (p. 78). All course work, university requirements, and college requirements must be completed by the deadline for the term in which applied. Students not graduating in spring, but wishing to participate in the spring commencement ceremony, must apply for graduation by the established priority deadline for the spring term. For clarification, please contact the Sylvia Hack Boyer Center for Student Services, 336 Graduate Education Building, at 479-575-4203.

Graduate Studies

The Graduate School, in cooperation with the college, offers advanced work in education and health professions leading to the degrees of Master of Arts in Teaching, Master of Science, Master of Education, Educational Specialist, Doctor of Education, and Doctor of Philosophy.

The graduate programs include:
The Graduate School awards the graduate degrees. Students who are interested in registering for graduate courses or in becoming candidates for these degrees should consult the dean of the Graduate School and the Graduate School Catalog.

Students who plan to study for an advanced degree in the subject-matter field should consult with the head of the department concerning course requirements to be eligible to begin graduate study. Specialization requirements for a B.S.E. degree in the College of Education and Health Professions may not be sufficient in every field to gain admission for graduate study without deficiencies.

Accreditations

The University of Arkansas holds membership in and is accredited by the North Central Association of Colleges and Secondary Schools. The college is also a member of the American Association of Colleges for Teacher Education.

The graduate program in communication disorders is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, but the program is currently on probation. Find out more in the Graduate Catalog (http://catalog.uark.edu/graduatemajor/programsofstudy/communicationdisorderscdis).

The counselor education graduate program is nationally accredited through the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the Commission on Collegiate Nursing Education. It is also approved by the Arkansas State Board of Nursing.

The M.S. degree program in Rehabilitation Counseling is accredited by the Council on Rehabilitation Education (CORE). Graduates of the accredited program are eligible to sit for the Certified Rehabilitation Counselor (CRC) examination.

The B.S. degree program in Public Health is accredited by the Council on Education for Public Health (CEPH).

The teacher education program of the College of Education and Health Professions is accredited by the Council for the Accreditation of Educator Preparation (CAEP). This accreditation covers the initial teacher preparation programs and/or advanced educator preparation programs. Because of the accreditation by the Council for the Accreditation of Educator Preparation, students who complete the curricula as outlined in this catalog are eligible to be recommended for licensure in states that agree to certify graduates who are recommended by the College of Education and Health Professions as having fulfilled its requirements. Students who complete the approved program of study leading to initial licensure are eligible to receive licenses to teach at the grade level or in the fields for which they have made preparation upon application and presentation of acceptable scores on the appropriate Praxis exams. However, students must follow licensure guidelines set forth by the Arkansas Department of Education to be licensed to teach.

Below the majors, concentrations and minors are listed the requirements for teaching licensure.
Majors, Concentrations and Minors

Majors and Concentrations

- Career and Technical Education (p. 427)
  - Business Education
  - Family and Consumer Sciences Education
  - Technology Education
- Childhood Education (p. 434)
- Communication Disorders (p. 444)
- Educational Studies (p. 448)
- Elementary Education (p. 456)
- Human Resource and Workforce Development (p. 460)
- Kinesiology (p. 462)
  - Exercise Science
  - K-12 Teaching Physical Education/Wellness & Leisure
- Nursing (p. 449)
- Public Health (p. 466)
- Recreation and Sport Management (p. 468)
- Special Education (p. 471)

Minors

- UAtch (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/collegeofeducationandhealthprofessions/uatch)

Undergraduate students in the college may declare any official academic minor available at the University of Arkansas. Students must notify the Sylvia Hack Boyer Office of Academic Student Initiatives and Services of their intent to pursue a minor. The college, with the assistance of the college offering the minor, will certify that the requirements of the minor have been satisfied. The academic minor will be designated on the student’s official transcript. Requirements for the minor are listed in the catalog under the department offering the minor.

Other Programs

Curricula Offered for Initial Licensure

Nursing Licensure: Completing the minimum requirements for the degree of Bachelor of Science in Nursing will satisfy the academic requirements for licensure as a Registered Professional Nurse. Students must complete all of the requirements set forth by the Arkansas State Board of Nursing to be licensed as a registered nurse. See adviser for details.

Teacher Licensure and Licensure of other School Personnel

The University of Arkansas offers approved undergraduate programs of study for initial licensure in childhood education, career and technical education (business education, family and consumer science, technology education), kinesiology (P-12 physical education), school counseling, special education, speech-language pathology, music and art education, and agriculture education, initial teacher licensure programs in secondary education (English/language arts, drama/speech, social studies, science, mathematics, world language), and childhood education in the Masters of Arts In Teaching (M.A.T.) degree program. The M.A.T. degree program is offered in consecutive summer, fall, and spring semesters with initial enrollment in the summer semester. The M.A.T. is a graduate degree program and requires a minimum of 33 semester hours. The M.A.T. degree program has two areas of emphasis: childhood education and secondary education in drama/speech, English, foreign language, mathematics, science and social studies. Consult the Admissions Process for Initial Teacher Licensure Stages I-III and the Graduate School Catalog for admission and graduation requirements for the M.A.T. degree program. The approved program of study for initial licensure in speech-language pathology is the Master of Science degree in Communication Disorders. Procedures for obtaining licensure parallel those used with M.A.T. graduates. There are some non-M.A.T. licensure programs. See the appropriate sections of this catalog for that information. For bachelor’s degree licensure requirements in career and technical education, music and art education, and some areas of agriculture education, see appropriate sections of this catalog.

The State Board of Education issues the regulations governing the licensure of teachers in Arkansas. The Board specifies minimum cut-off scores for all Praxis exams. Each application for a teacher’s license requires completion of an approved program of study, completion of a state and national background check, and documentation of passing the Praxis exams. Those wishing to add an additional license or endorsement, should contact the Teacher Certification Officer in 338 Graduate Education Building for the approved programs of study or go to the menu “Additional Licensure Plan (http://coehp.uark.edu/licensure.html)” on the college’s website.

University Teacher Education Board

The University Teacher Education Board is composed of the associate deans; faculty representatives from the College of Education and Health Professions; the J. William Fulbright College of Arts and Sciences; the Dale Bumpers College of Agricultural, Food and Life Sciences; public school teachers and/or administrators, and students. The functions are to

- Govern the teacher education and licensure program.
- Establish general policies and procedures necessary to maintain quality in degree programs.
- Oversee the general coordination of the initial licensure process
- Approve new courses and course changes in individual licensure program.

The Board serves as a liaison for the faculties involved and emphasizes the importance of teacher education as one of the primary responsibilities of the university.

Honors Program

The College of Education and Health Professions (COEHP) Honors Program is designed for students who value and want to be challenged by an exceptional educational experience and want to focus their studies intensively. The program creates and supports an academic environment of intellectual adventure and provides a carefully integrated and demanding curriculum. The rewards are immense: high academic achievement; involvement in undergraduate research; academic distinction of summa cum laude, magna cum laude, or cum laude and confirmation of an honors degree on the student’s transcript; and recognition at commencement.

The mission of the Honors Program is to: establish and maintain an Honors community of learning that is intellectually rigorous, personally and culturally enriching, and fosters learning and discovery through independent and collaborative inquiry; allow students to be creative, inquisitive and innovative; support student research and analysis of ideas; support student academic ventures through mentoring, travel, and supplies when presenting work at undergraduate research symposia; challenge students to connect the classroom with the larger world by expanding social and cultural experiences and promoting leadership,
and prepare students for admission to and success within graduate and professional schools in the United States and abroad.

Benefits of participating in the Honors Program include: small class sizes, close contact with talented faculty, opportunity for independent study that counts toward the requirements of the Honors Program, special academic counseling and priority registration, increased confidence and skill in writing, honors housing, Latin Honors designation on transcript, enhanced career opportunities, and increased advantages for graduate or professional school applicants.

Admission to the University of Arkansas Honors College assures automatic admission to the COEHP Honors Program for incoming freshmen. The student can apply for admission electronically through the Honors College website (https://honorscollege.uark.edu/apply). The following are admission criteria for students seeking admission to the COEHP Honors Program:

**Entering Freshmen**

- 28 ACT or 1310 SAT score (Critical Reading plus Math). Honors admission is based on your highest composite ACT or SAT score, not on superscores.
- 3.5 or greater high school GPA

**Students Applying as Continuing or Transfer**

(within and outside the University of Arkansas)

- 3.5 or greater cumulative GPA
- Applications will not be accepted from students who are within three full semesters of anticipated graduation date.

**Expectations**

At the end of each academic semester, the COEHP Honors Council will review academic records of all enrolled COEHP honors students. A student’s cumulative GPA must be 3.50 or greater to remain in good standing within the COEHP Honors Program; if the cumulative GPA falls between 3.00 and 3.49, the student will be placed on probation for one academic semester. At that time, the student must remove any Honors courses from their schedule. At the end of the probationary period if the student’s cumulative GPA is 3.50 or greater, they will be reinstated in good standing within the COEHP Honors Program; if the cumulative GPA is less than 3.50, the student will be removed from the COEHP Honors Program. If the student’s cumulative GPA falls below 3.00 at any point, the student will be immediately removed from the COEHP Honors Program.

All COEHP honors students are held to the highest standard with regard to academic achievement and academic integrity. Students violating the Academic Integrity Policy that receive a sanction of 1.0 or greater at the University of Arkansas will be permanently removed from the COEHP Honors Program without the ability to reapply. The student may appeal the decision to the University’s Academic Integrity Board; if the sanction is overturned and removed, the student will be reinstated into the COEHP Honors Program.

**Honors Degrees**

The College of Education and Health Professions is dedicated to providing programs designed to meet the honors student’s needs. To achieve this aim, the college faculty has developed the COEHP Honors Program — an honors program for students of superior academic talent.

Students successfully completing the COEHP Honors Program will receive the following academic accolades:

- GPA of 3.9 or greater – cum laude
- GPA of 3.7 or greater – magna cum laude
- GPA of 3.5 or greater – summa cum laude

**Requirements for COEHP Honors Program:** Requirements for the COEHP College Honors include meeting all university, COEHP, and department degree requirements. Additionally, students must maintain a cumulative GPA of 3.5, complete a minimum of 18 credit hours of honors courses, and complete and defend an honors thesis/project. Of the 18 honors credit hours, a minimum of 10 must be completed within the student’s program of study, including the Honors Tutorial (3901H) and Honors Thesis (498VH).

Honors courses must be completed in residence at the University of Arkansas, Fayetteville campus in order to satisfy the required 18 hours. Transfer students from other four-year institutions may initiate an appeal with the COEHP Honors Council if they wish to have transfer Honors credit satisfy part of the 18 hour requirement.

For more information about the COEHP Honors Program or to complete an application form, please visit hono.uark.edu.

**Career and Technical Education (CATE)**

Betsy Orr
Program Coordinator
315 Peabody Hall

b (csweare@uark.edu)orr@uark.edu (borr@uark.edu)

The program in Career and Technical Education offers a degree program leading to a Bachelor of Science in Education for the preparation of teachers, supervisors, and administrators in career and technical education. Students must choose one of three concentrations, each of which leads to teacher licensure:

- The concentration in Business Education offers on-campus students the chance to become effective educators and communicators as they learn to teach the latest computer technologies and subject matter focused on the core areas of business. The concentration provides rigorous and intellectually stimulating programs that offer students a broad variety of professional careers in business education and technology.
- The concentration in Family and Consumer Sciences Education offers on-campus students the ability to learn critical and creative thinking skills through a variety of courses including parenting and human development; family studies; nutrition and foods; textiles and apparel production; and housing and design. The diverse curriculum offers studies that mirror real life, enabling students in this concentration to develop both personal and professional skills.
- The concentration in Technology Education prepares students to teach technology, pre-engineering, or other technical subject matter at the high school, middle-level, or community college. Additionally, the program prepares students to enter mid-level technical/management careers in business and industry.
Admission to the B.S.E. in Career and Technical Education is competitive and admission will be determined by the Career and Education faculty based on the items listed with the concentration requirements. Students seeking admission to the Career and Technical Education program at the University of Arkansas must be aware of the deadlines and admissions policies. These deadlines and limitations are designed to ensure that all students have a high quality experience.

The University of Arkansas program in career and technical education has been approved by the State Board for Career and Technical Education for the preparation of teachers, supervisors, and administrators in career and technical education.

Requirements for B.S.E. in Career and Technical Education with Business Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of "C" or better.
3. Complete pre-education core courses with a grade of "C" or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103 Introduction to Professionalism.

The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:
   • Completing and passing the criminal background check
   • Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each CATE concentration area.
2. Submission of the CATE application.
3. Oral interview with CATE faculty.
4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.
2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.
3. All professional education courses must have a grade "C" or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.
2. All professional education courses must have a grade of "C" or better. No teaching methods courses may be taken by as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 3103 are spring-only courses. All technical courses must be completed prior to the student teaching semester.
3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.
4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.
5. Candidate must complete a successful “internship admission interview” with Career and Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.
6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

All CATE program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

Year Total: 16 14

Total Units in Sequence: 120
Requirements for B.S.E. in Career and Technical Education with Family and Consumer Sciences Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of “C” or better.
3. Complete pre-education core courses with a grade of “C” or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103. The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:
   - Completing and passing the criminal background check
   - Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each CATE concentration area.

2. Submission of the CATE application.
3. Oral interview with CATE faculty.
4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.
2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.
3. All professional education courses must have a grade “C” or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.
2. All professional education courses must have a grade of “C” or better. No teaching methods courses may be taken by as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 3103 are spring-only courses. All technical courses must be completed prior to the student teaching semester.
3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.
4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.
5. Candidate must complete a successful “internship admission interview” with Career and Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.
6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

In addition to the General Studies, the following courses are required for a concentration in Family and Consumer Sciences Education.

Requirements for B.S.E. in Career and Technical Education with Technology Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of "C" or better.
3. Complete pre-education core courses with a grade of "C" or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103 Introduction to Professionalism.

The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:
   - Completing and passing the criminal background check
   - Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each CATE concentration area.
2. Submission of the CATE application.
3. Oral interview with CATE faculty.
4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.

2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.

3. All professional education courses must have a grade "C" or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.

2. All professional education courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 3103 are spring-only courses. All technical courses must be completed prior to the student teaching semester.

3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.

4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.

5. Candidate must complete a successful “internship admission interview” with Career and Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.

6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

Total Hours 120

1. See the University Core (p. 84) page.
2. All professional education courses must have grade "C" or better to award degree credit.

Internship Semester (Spring Semester/Senior Year) Admission Criteria:
1. Candidate must hold a cumulative GPA of 2.70 or higher.
2. Candidate must have completed the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee (p. 62)) during spring semester of sophomore year. This includes passing the Praxis Core exam and successfully completing the required criminal background check.
3. Candidate must have taken and passed the Praxis II content examination during the previous semester or earlier.
4. Candidate must complete a successful “internship admission interview” with Career & Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.

Note: All students seeking licensure in the State of Arkansas are subject to a criminal background check. Forms needed to complete this procedure may be obtained in 340 Graduate Education Building on the University of Arkansas campus. These forms may also be obtained from any police station (including the University of Arkansas Police station) or directly from the Arkansas State Department. These background checks take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

Career and Technical Education B.S.E. with Technology Education Concentration Eight-Semester Degree Program
Students wishing to follow the eight-semester degree plan in Technology Education should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

Requirements for B.S.E. in Childhood Education with EASL Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)

Complete all 63 hours of program pre-requisites (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a “C” or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30. At this point applicants must decide which program option they will follow; either CHED B.S.E. leading to M.A.T. option or ELEL B.S.E. licensure option. Both of these options are described on the application, which can be found on the College of Education and Health Professions website (http://cied.uark.edu/2360.htm).

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 62)) through the university-wide Teacher Education Office.
2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

All program courses must have a grade of “C” or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat) in the Graduate Catalog.

Teacher Licensure

Requirements for teacher licensure vary from state to state and may differ among teacher preparation programs. Please note that Arkansas requires all applicants to successfully complete a criminal background check. Background checks must be cleared before the candidate begins student teaching.

1. Must meet University Core

Childhood Education (CHED)

The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Elementary Education (K-6). The B.S.E. degree in Childhood Education is not an initial teacher licensure program but instead leads to the Master of Arts in Teaching (M.A.T.), which is the initial teacher licensure preparation program. Information about the M.A.T. degree program can be found in the University of Arkansas Graduate Catalog, on the Elementary Education (http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat) page or the Teacher Education (http://catalog.uark.edu/graduatecatalog/programsofstudy/teachereducation) page.

Students majoring in Childhood Education must choose from among four concentrations:

- English as a Second Language Concentration
- Gifted and Talented Concentration
- Reading Concentration
- Science, Technology, Engineering and Math Concentration

Requirements for B.S.E. in Childhood Education with Gifted and Talented Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.
Stage I: Pre-Elementary Education (PELED)

Complete all 63 hours of program pre-requisites (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a “C” or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30. At this point applicants must decide which program option they will follow; either CHED B.S.E. leading to M.A.T. or ELEL B.S.E. licensure option. Both of these options are described on the application, which can be found on the College of Education and Health Professions website (http://cie.d.uark.edu/2360.htm).

The application process includes:
1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 62)) through the university-wide Teacher Education Office.
2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

All program courses must have a grade of “C” or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat) in the Graduate Catalog.

Childhood Education Requirements

Students in the Childhood Education program must choose one of four concentrations: English as a Second Language Concentration, a Gifted and Talented Concentration, a Reading Concentration, or a STEM Concentration.

Total Units in Sequence: 122

Requirements for B.S.E. in Childhood Education with STEM Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)

Complete all 63 hours of program pre-requisites (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a “C” or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30. At this point applicants must decide which program option they will follow; either CHED B.S.E.
leading to M.A.T. option or ELEL B.S.E. licensure option. Both of these options are described on the application, which can be found on the College of Education and Health Professions website (http://cied.uark.edu/2360.htm).

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 62)) through the university-wide Teacher Education Office.
2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

All program courses must have a grade of “C” or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat) in the Graduate Catalog.

Childhood Education Requirements

Students in the Childhood Education program must choose one of four concentrations: English as a Second Language Concentration, a Gifted and Talented Concentration, a Reading Concentration, or a STEM Concentration.

An undergraduate major in communication disorders leads to the B.S.E. degree and prepares students for graduate studies (master's level) in speech-language pathology and/or the professional doctorate in audiology. The minimum requirements for all students in the college are listed under general studies (p. 422).

Admission to the B.S.E. Major Degree Program in Communication Disorders is competitive and consists of a three-stage process. Students must apply for formal admission to the undergraduate B.S.E. degree program in Communication Disorders prior to taking junior- and senior-level classes in the major.

Stage I: Pre-Communication Disorders (PCDIS)

All students declaring a major in communication disorders are accepted as tentative candidates to the undergraduate program and assigned the pre-communication code - PCDIS.

The PCDIS program includes:

1. Complete all program pre-requisites courses.
2. Obtain a minimum cumulative grade-point average of 3.0 on all college level coursework.
3. Complete the following courses with a “C” or better: ENGL 1013 and ENGL 1023, MATH 1203 or equivalent, and COMM 1313.
4. Obtain passing scores on the Core Academic Skills for Educator: Math, Reading, and Writing sections of the Praxis Core Exam.

Students who do not meet admission criteria for the B.S.E. degree program in communication disorders in any given year may reapply in subsequent years.

Stage II: Admission to the Communication Disorders Program (CDIS)

Admission to the Communication Disorders Program is competitive and occurs after completion of all Pre-Communication Disorders requirements and prior to the beginning of the fall semester of the junior year.

Applications to the Communication Disorders (CDIS) program must be submitted by January 30th.

The application process includes:

2. Submission of transcripts for all coursework.
3. Submission of passing score on Math, Reading, and Writing sections of Praxis Core Exam.
4. Satisfactory completion of an admission interview with designated faculty.

As a result of the competitive process, not all applicants meeting the minimum requirements will be admitted to the program.
Stage III: Requirements for Program Continuation and Completion

1. Maintain a minimum cumulative GPA of 3.0.
2. In order to enroll in CDIS 4001 Clinical Practicum: Undergraduate, students must have an overall GPA of 3.0 in the following courses: CDIS 2253, CDIS 3124, CDIS 3213, CDIS 3223, CDIS 3203, CDIS 4223 and a “B” in CDIS 3233. Clinical Practice is an elective for undergraduates and is taken for course credit hours, not a grade.
3. Meet all university requirements for graduation.

Requirements for Communication Disorders (CDIS)

University Core (State Minimum Core) 35

Of which Communications Disorders requires the following specific courses:

- BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
- PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
- ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)
- Select one of the following:
  - PHYS 1023 Physics and Human Affairs & PHYS 1021L Physics and Human Affairs Laboratory
  - PHYS 2013 College Physics I (ACTS Equivalency = PHYS 2014 Lecture) & PHYS 2011L College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)
  - CHEM 1073 Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture) & CHEM 1071L Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)

Program specific course requirements for Communication Disorders - 9 hours total

Select one of the following:

- ENGL 2003 Advanced Composition
- ENGL 2013 Essay Writing
- ENGL 3053 Technical and Report Writing (ACTS Equivalency = ENGL 2023)
- CDIS 498VH Honors Communication Disorders Thesis/Project
- COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)
- STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

Communication Disorders Major Requirements 43

- CDIS 2253 Introduction to Communicative Disorders
- CDIS 3103 Introduction to Audiology
- CDIS 3124 Normal Phonology and Articulatory Process
- CDIS 3213 Anatomy of Physiology of the Speech and Hearing Mechanisms
- CDIS 3230 Articulation Disorders
- CDIS 3223 Language Development in Children
- CDIS 3233 Introduction to Clinical Practice
- CDIS 3253 Cultural Diversity in Communication Disorders
- CDIS 4133 Introduction to Aural Rehabilitation
- CDIS 4253 Neurological Bases of Communication
- CDIS 4273 Communication Behavior and Aging
- CDIS 4213 Introduction to Speech and Hearing Science
- CDIS 4183 Clinical Assessment of Speech and Language Disorders
- CDIS 4223 Language Disorders in Children

Electives 33

Total Hours 120

1 Option only for students successfully completing Honors Program

Communication Disorders B.S.E. Eight-Semester Plan

All CDIS students are accepted as tentative candidates and thus not eligible for the eight-semester degree plan. Students must apply for formal admission to the undergraduate B.S.E. degree program in CDIS prior to taking junior- and senior-level classes in the major. However, students who qualify to finish a degree in four years can follow the suggested order of classes below.

1 Must meet University Core requirements (p. 84).
2 Required Social Science Core for CDIS majors.
3 CDIS 498VH: Option only for students successfully completing Honors Program.

Barker, Mitchell D., Ph.D. (University of Chicago), Lecturer, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
Bowers, Lisa Marie, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
Bowers, Andrew L., Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
Cook, Aletha, M.S., B.A. (University of Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
Frazier, Kimberly Frances, Ph.D. (University of South Carolina–Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.
Gilbertson, Margie, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.
Glade, Rachel E., Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.
Hoffield, Christine, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2017.
Perry, Kim, M.S. (University of Arkansas), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Curriculum and Instruction (CIED)

Cheryl Murphy
Department Head
216 Peabody Hall
479-575-4209
Email: cmurphy@uark.edu

Curriculum and Instruction Website (https://cied.uark.edu)

The Department of Curriculum and Instruction sponsors initial teacher licensure programs in the areas of career and technical education (p. 427), elementary education (p. 456), childhood education (p. 434) and special education (p. 471). The department also offers additional licensure plans in ESL, gifted and talented, special education and selected other areas (please see College Web Site licensure link). The Special Education Program also offers a Graduate Certificate in Autism Spectrum Disorders (ASD) as well as a Graduate Certificate in STEM education for Childhood Education candidates. Additional secondary school licensure programs are made available with the cooperation of the Department of Health Science, Kinesiology, Recreation, and Dance; the Department of Rehabilitation, Human...
Resources and Communication Disorders; the J. William Fulbright College of Arts and Sciences; and the Dale Bumpers College of Agricultural, Food and Life Sciences.

The department offers a non-licensure program in educational studies (p. 448) for students wishing to focus on general theory and practice of learning and teaching. This major gives students the cognitive ability to apply teaching strategies to a variety of employers in private sector businesses, nonprofit organizations, and community agencies.

The department also offers a minor in Secondary Mathematics and/or Science Teacher Education (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/collegeofeducationandhealthprofessions/uateach) through the UTeach program.

B
Barth, Daniel, Ph.D., M.A. (Claremont Graduate University), B.S. (Eureka College), Clinical Assistant Professor, 2014.
Beasley, Jennifer G., Ed.D. (University of Virginia), M.A. (Wichita State University), B.A. (Kansas State University), Clinical Associate Professor, 2009.
Beck, Dennis E., Ph.D. (University of Florida), B.S. (Pennsylvania State University), Associate Professor, 2010.
Bell, Carmen V., M.Ed. (Indiana Wesleyan University), Clinical Instructor, 2015.
Ben Idris, Anisa A., Ph.D. (University of Arkansas), Lecturer, 2017.
Ben Idris, Anisa A., Lecturer, 2018.
Beuston, Ed., Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-Sacramento), B.S. (Pennsylvania State University), Associate Professor, 2010.
Bowies, Freddie A., Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, 2004.
Brady, Kevin P., Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Associate Professor, 2014.
Brown, Deborah A., Ed.D. (University of Missouri-Columbia), M.A., B.A. (Southeast Missouri State University), Clinical Assistant Professor, 2011.

C
Carmago, Elsa, Ph.D. (Virginia Tech), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, 2018.
Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Assistant Professor, 2008.
Collet, Vicki S., Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Associate Professor, 2012.
Collins, Kathleen, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, 2002.
Connors, Sean P., Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, 2010.

D
Daughtery, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Professor, 2005.
Deaton, Sheri, M.A.T., B.S. (University of Arkansas), Instructor, 2016.

E
Ellers, Linda Hale, Ph.D. (Louisiana State University at Shreveport), M.Ed., B.S.E. (University of Arkansas at Little Rock), Clinical Associate Professor, 2001.
Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, 2010.
Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, 2011.

G
Gist, Conra D., Ph.D. (City University of New York-City College), M.S. (Brooklyn College), B.S. (Southwestern University), Associate Professor, 2012.
Goering, Christian Z., Ph.D., M.S. (Kansas State University), B.A. (Washburn University), Professor, 2007.
Greene, Aleza R.S., Ph.D., M.A. (Brandeis University), B.A. (Tufts University), Clinical Assistant Professor, 2006.

H
Howlett, Kristina-Marie, Ph.D. (University of Arkansas), M.P.S. (Manhattanville College), B.A. (University of Connecticut), Assistant Professor, 2016.
Hutchins, Rhett J., Ph.D. (University of Georgia), M.Ed., B.S. (Clemson University), Clinical Assistant Professor, 2014.

I
Imbeau, Marcia B., Ph.D. (University of Connecticut), M.Ed. (University of Arkansas at Little Rock), B.A. (Hendrix College), Professor, 1991.

J
Johnson-Carter, Charlene M., Ph.D. (Emory University), M.B.A. (Atlanta University), M.Ed., B.A. (University of Cincinnati), Associate Professor, 1992.

K
Kent, Laura B., Ph.D. (University of Wisconsin-Madison), M.S. (Purdue University Calumet), B.S. (Purdue University), Associate Professor, 2006.
Kerr, Grace R., M.A. (Texas A&M University), B.A. (Sam Houston State University), Clinical Instructor, 2006.
King, Bonnie, M.A.T., B.S.E. (University of Arkansas), Clinical Instructor, 2015.
Kucharczyk, Suzanne, Ed.D. (Columbia University Teacher's College), M.Ed., B.S. (University of Illinois-Urbana-Champaign), Assistant Professor, 2014.

L
Lasater, Kara A., Ed.D. (University of Arkansas), Ed.S., M.S. (Pittsburg State University), B.A. (Drury University), Assistant Professor, 2014.
Lincoln, Felicia, Ph.D. (University of Pennsylvania), M.Ed., B.S.E. (Arkansas Tech University), Associate Professor, 2000.
Lorah, Elizabeth R., Ph.D., M.S.Ed., B.A. (Temple University), Associate Professor, 2013.

M
McComas, William, Ph.D. (University of Iowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, 2006.
McComas, Kim Krusen, Ph.D. (University of Arkansas), M.A. (West Chester University of Pennsylvania), B.A. (University of Arizona), Clinical Assistant Professor, 2012.
Mears, Derrick, Ph.D. (University of Arkansas), M.S., B.S. (University of Central Missouri), Clinical Associate Professor, 2014.
Mounts, Denise Ann, Ed.D. (Saint Louis University), B.S.E. (Northwest Missouri State University), Clinical Associate Professor, 2005.
Murphy, Cheryl Ann, Ed.D., M.A., B.A. (West Virginia University), Professor, 1996.

Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, 1989.

Owen, Donna S., M.S., B.S., B.A. (University of Arkansas), Clinical Instructor, 2005.

Penner-Williams, Janet, Ed.D., M.Ed., B.S.E. (University of Houston), Associate Professor, 2005.

Pijanowski, John C., Ph.D., M.S. (Cornell University), B.A. (Brown University), Professor, 2007.

Ralston, Christine R., Ph.D. (Purdue University), M.Ed., B.S. (Indiana Wesleyan University), Clinical Assistant Professor, 2015.

Schaefer-Whitby, Peggy, Ph.D. (University of Central Florida), M.A. (University of Houston-Clear Lake), B.A. (St. Cloud State University), Clinical Assistant Professor, 2012.

Smith, Tom E.C., Ed.D. (Texas Tech University), M.Ed., B.S.E. (University of Mississippi), University Professor, 2002.

Ward, Peggy, Ph.D. (University of Arkansas), M.S. (Texas A&M University), B.S.Ed. (Southern Arkansas University), Clinical Assistant Professor, 2010.

Wissehr, Cathy, Ed.D. (University of Missouri-Columbia), M.N.S.Ed., B.S. (Southeast Missouri State University), Clinical Associate Professor, 2009.

Young, Heather D., Ph.D. (University of Arkansas), M.S. (University of Tennessee), B.S. (Arkansas Tech University), Assistant Professor, 2007.

Dance Activity (DEAC)
The Department of Health, Human Performance and Recreation offers coursework in Dance Activity but has no degree program in dance.

Educational Studies (EDST)
The Bachelor of Science in Education in Educational Studies (B.S.E.) is a customizable degree for all students within the College of Education and Health Professions. It focuses on the general theory and practice of learning and teaching. This degree, in itself, does not include licensure. Students completing this program will have the cognitive ability to apply teaching strategies to a variety of employers such as private sector businesses, nonprofit organizations and community agencies. With additional training and licensure, students can also work in school settings.

Eleanor Mann School of Nursing (NURS)

Susan Kane Patton
Director
Epley Center for Health Professions
479-575-3904
Email: nursing@uark.edu

Eleanor Mann School of Nursing Website (https://nurs.uark.edu)

The Eleanor Mann School of Nursing contributes to the three purposes of the university: education, research and service. The mission of Eleanor Mann School of Nursing is to transform lives through nursing education and inspire leadership in nursing practice and academics to improve the health and well-being of society.

Professional nursing begins with a Bachelor of Science in Nursing (B.S.N.) degree. Nursing education offers a research base for nursing practice that promotes the ability of the nurse to effect change needed to improve health. In the study of professional nursing, the student builds on a planned general education for the academic disciplines and acquires theoretical and specific knowledge to meet health care needs of diverse clients in various settings. In addition, the curriculum provides opportunity for students with technical nursing education to expand their knowledge and scope of practice. The baccalaureate program establishes a foundation for graduate education in nursing and for continued personal and professional development.

Graduates of the pre-licensure B.S.N. program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN) for licensure as a registered nurse (R.N.).

Admission to the B.S.N. Program

Admission Policies

Conditional Admission to the Generic B.S.N. Program

Admission to the Generic B.S.N. program is limited. Conditional admission will be determined by the Eleanor Mann School of Nursing faculty.
To be eligible to apply, students must have a cumulative GPA of at least
#3.0. Admission requirements for the professional program of study are as follows:

1. Nursing prerequisite GPA ≥ 3.0 (GPA 4.0 X 7) – 28 points maximum
2. Completion of 4 required science courses (see below) with at least a C grade in each. Points will be awarded as follows: 4 points for each course taken at the UA, and 4 points for 1st attempt As and 2 points for first attempt Bs - 32 points maximum
   - CHEM 1073/1071L Chemistry with Lab
   - BIOL 2443/2441L Human Anatomy with Lab
   - BIOL 2213/2211L Human Physiology with Lab
   - BIOL 2013/2011L Microbiology with Lab
3. Admitted Honors Program students with 18 or more honors credit hours – 10 points
4. Successful completion of required* nursing prerequisite courses (20 points for 75% completion of the required* nursing prerequisite courses at UA; 10 points for 50% required* nursing prerequisite courses at UA excluding electives) OR an additional degree completion: Bachelor’s degree 25 points; Master’s degree 30 points.
   a. *Required nursing prerequisite courses include: English 6 credits, Mathematics/Statistics 6 credits, Sciences 16 credits, Fine Arts/ Humanities 6 credits, U.S. History 3 credits, Social Sciences 9 credits, Pre-Nursing 6 credits.
   b. For students entering the University of Arkansas as freshmen, credits transferred in from high school dual enrollment or AP credit will be counted in the required nursing prerequisite courses at the UA.

Total points possible = 100.

1. Applications for admission must be submitted between November 1 and December 1 to be considered for fall semester admission and between April 1 and May 1 for spring semester admission. Late applications will not be accepted.
2. Students must meet the performance standards for the professional program of study.
3. Students transferring from another nursing program must provide a letter from the nursing program that they are eligible to return and are in good standing to be considered for admission.
4. Letter of Intent to be considered for admission must be received in the nursing school's office by date specified in admission letter.
5. Students who are conditionally accepted into the nursing program must maintain their GPA.
6. Multiple withdraws from courses will be evaluated on a case by case basis.

**Full Admission to the Generic B.S.N. Program**

Full admission to the Eleanor Mann School of Nursing is contingent upon meeting all the conditional requirements and successfully meeting the following requirements:

1. All requisite coursework for a fall admission into the Professional Program of Study in Nursing must be completed by the end of the spring semester with the exception of the three pre-nursing courses (NURS 2012, NURS 2022, NURS 2032) which may be taken in the summer session prior to entering the program of study in nursing in the fall. All coursework for spring admission must be completed by the end of the fall semester prior to entering the Professional Program of Study in Nursing.
2. Maintain the individual GPA that was present at the time of conditional admission. Any decrease in GPA is subject to review by the nursing school’s faculty.
3. Proof of the following:
   a. CPR certification (American Heart Association Basic Certified Life Support and Automated Emergency Defibrillation CPR for Health Care Providers)
   b. Completed Hepatitis B vaccine with dates of each injection or immune titer. Three (3) HBV injections are needed. Students are required to have obtained HBV Injection 1 within two weeks of the beginning of the scheduled semester, followed by Injection 2 in one month, and Injection 3 within six months of Injection 1, in order to enter the clinical setting. A student who fails to obtain the complete series (3 injections), according to the Centers for Disease Control (CDC) established timeframe, will not be permitted to participate in patient care contact required in clinical experiences.
   c. Negative Tuberculin skin test or negative T-Spot test, if T-Spot is positive, a chest X-ray must be completed and updated yearly.
   d. Diphtheria-Tetanus (DT) required.
   e. Varicella required and (any other immunizations that may be required by clinical agencies)
   f. MMR required and (any other immunizations that may be required by clinical agencies)
   g. Health insurance: Students must submit proof of current coverage.
   h. Liability insurance is provided through an established student fee at the University of Arkansas.
   i. A criminal background check is required. Results will be reported to the college administration and school officials and any health-care facility in which the students are placed as part of the clinical education. An unsatisfactory background check result may lead to denial of admission to the nursing program. The criminal background check must be completed by prior to the first day of class.
   j. A negative drug screen is required within four weeks prior to entrance into the nursing program. Results are reported to the Eleanor Mann School of Nursing. A positive drug screen will lead to denial of admission to the nursing program. Student failure to submit to a drug screen, attempting to tamper with, contaminate, or switch a sample will result in the student not being admitted to the nursing program and will be referred to the Dean of Students in the Division of Student Affairs at the University of Arkansas.

Procedures for the criminal background check and the drug screen are available on the Eleanor Mann School of Nursing website (http://nurs.uark.edu/6576.htm).

NURS 4442 Nursing Concepts: Critical Care 2

NURS 4452 Professional Role Implementation VI: Role Synthesis 2

NURS 4603 Nursing Concepts: Community 3

NURS 4613 Professional Role Implementation VII: Role Synthesis 3

NURS 4712 Seminar in Nursing 2

NURS 4722 Professional Role Implementation VIII: Role Synthesis 2

Total Hours 120

1 Denotes required nursing pre-requisite courses.

2 BIOL 1543/BIOL 1541L is a prerequisite for BIOL 2013/BIOL 2011L and BIOL 2443/BIOL 2441L and may be used as part of the elective hours.

Progression, Withdrawal, and Dismissal

1. For progression in the nursing program, only grades of “C” or above will be accepted. Students who make less than a “C” may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.

2. If a student earns a “D”, “F”, or “W” in a course, the course may be repeated. The course must be passed on the second attempt. If a student earns a “D”, “F”, or “W” in a second course, the student will be dismissed from the program and may not be eligible for re-admission.

3. If the student does not earn a grade of at least “C” upon repeating the nursing course, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.

4. The one “D” policy includes only pre-nursing and nursing courses. Independent Study courses are NOT counted in the one “D” policy.

5. Students in their J2, S1, or S2 level who do not pass the medication calculation examination with a 100 percent on the second attempt will be administratively withdrawn from all clinical courses and associated co-requisite didactic courses.

6. For students enrolled in NURS 3424 Professional Role Implementation 1: Caregiver - Failure to pass the Dosage Calculation Exam on the third attempt in NURS 3424 Professional Role Implementation 1 course will result in a failing grade for the course and will count in the one “D” policy.

Didactic/Professional Role Implementation Courses

1. A student who needs to repeat a course must make petition to the Student Affairs Committee and are encouraged to do so as soon as they are aware of the need to repeat a course.

2. Students will be readmitted on a space-available basis according to the following priority system:

Priority Groups for Placement in Required Clinical Courses

a. First Priority – Continuing full-time students in good academic standing.
b. Second Priority – Continuing part-time students in good academic standing.

c. Third Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a “W” for failing the medication calculation test who were unable to repeat a course for one or more semesters.

d. Fourth Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a “W” for failing the medication calculation test who were in the preceding semester.

3. Spaces in clinical courses are limited and tightly controlled by accreditation, the Arkansas State Board of Nursing, and clinical agency policies. Space in Didactic courses are limited to space available. A student re-enrolling in a Professional Role Implementation Course (whether due to illness, course failure, or other reasons) will not be assured a clinical placement space in subsequent courses.

4. NOTE: Readmission will not be considered for any student dismissed from the School of Nursing who obtained a “D” or “F” in one (1) nursing course and was unable to make a “C” or better upon repeating this course. Also, a student dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues will be administratively withdrawn from a course, and may be subject to administrative withdrawal from the School of Nursing following a full review. Readmission is not guaranteed to these students.

5. Students should note that a flagrant or established pattern of disregard to Eleanor Mann School of Nursing policies can result in failure of the course and/or dismissal from the program without prior warnings (See Counseling Record Guidelines (http://nurs.uark.edu/Counseling_Record_Guidelines.pdf)).

Readmission Policies

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (If applicable).
2. Complete Readmission Application to the School of Nursing during the application periods. (Readmission is limited by space availability).
3. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a “D” or “F” in one (1) nursing course and was unable to make a “C” or better upon repeating this course or who was dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues. Exceptions to this policy will be considered by the Student Affairs Committee on an individual basis.

Exit Policies

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-division nursing course. If the student does not complete the Professional Program of Study within the five-year limit, nursing credits must be reevaluated.

2. All University of Arkansas requirements must be met. NOTE: In addition to the program requirements, students must meet the university and college graduation requirements. This curriculum is subject to change to comply with national accreditation and the Arkansas State Board of Nursing Standards.

R.N. to B.S.N. Admission Policies

1. Complete university admission requirements.
2. Complete R.N. to B.S.N. Online Program application with supporting R.N. licensure documentation and practice experience verification as indicated below
   a. R.N.s with 12-months or greater since nursing program completion:
      i. Documentation from current and/or recent employer(s) where applicant is hired as an R.N. including institution or organization name, address, and supervisor contact information, area or unit of service, position title, and employment status (e.g., full-time, part-time, per diem). Applicants should include documentation of one of the following:
         1. Employer verification of 1,000-R.N. practice-hours completed within 12-24 months of beginning the program.
         2. Completion of a state board of nursing approved RN-refresher course within 12-24 months of beginning the program.
   b. Nursing students enrolled in final semester of an accredited nursing program may be eligible for conditional program admission pending R.N. licensure. Supporting documents required with program application are listed below.
      i. A letter of good standing from the director or dean of the respective nursing program from which the applicant is transferring from.
      ii. In addition, students may enroll in a maximum of 6 credit hours of course work within the RN to BSN program of study and enrollment duration may not exceed one academic semester or 6 months following Pre-RN Licensure program completion
3. Complete pre-admission advising with pre-nursing academic advisor to evaluate general education requirements.
4. Graduation from an NLNAC/ACEN-accredited nursing program.
   *Graduates from non NLN-AC/ACEN-accredited nursing programs will be evaluated for admission on an individual basis.
5. Verification and maintenance of, unencumbered licensure to practice as a R.N. in Arkansas and/or any other state.
6. Credit for courses listed below will be held in escrow. The student will receive credit for these courses upon successful completion of the program.

Total Hours 120

1 Denotes required nursing pre-requisite courses.

NOTE: The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 120 semester hours. The Nursing major is exempt from the eight-semester degree plan since the program is admissions-based. There is no guarantee that a student meeting the minimal GPA requirement will be admitted. Please refer to the College of Education and Health Profession’s website (http://nurs.uark.edu/prospective-nursing-students) for specific information related to the admission criteria.

Progression, Withdrawal, and Dismissal

1. For progression in the nursing program, only grades of “C” or above will be accepted. Students who make less than a “C” may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.

2. If a student earns a “D”, “F”, or “W” in a course, the course may be repeated. The course must be passed on the second attempt. If a student earns a “D”, “F”, or “W” in a second course, the student will be dismissed from the program and may not be eligible for re-admission.

3. If the student does not earn a grade of at least “C” upon repeating the nursing course, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.

4. The one “D” policy includes only pre-nursing and nursing courses. Independent Study courses are NOT counted in the one “D” policy.

5. Students in their J2, S1, or S2 level who do not pass the medication calculation examination with a 100 percent on the second attempt will be administratively withdrawn from all clinical courses and associated co-requisite didactic courses.

6. For students enrolled in NURS 3424 Professional Role Implementation 1: Caregiver - Failure to pass the Dosage Calculation Exam on the third attempt in NURS 3424 Professional Role Implementation 1 course will result in a failing grade for the course and will count in the one “D” policy.

Elementary Education (ELEL)
The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Elementary Education (K-6).

Admission to the Elementary Licensure B.S.E. is competitive and consists of a three-stage process; simply meeting the minimum admission requirements will not guarantee admission. Admission will be determined by the Elementary Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)
Complete all 63 hours of program pre-requisites (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a “C” or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Elementary Licensure B.S.E. (ELEL)
Admission to the Elementary Licensure Program is competitive and occurs after completion of all Pre-Elementary Education requirements and prior to the beginning of the fall semester of the junior year. Not all applicants who meet the minimum requirements will be admitted.
to the program. Applications to the Elementary Licensure (ELEL) program must be submitted by January 30. At this point, applicants must decide which program option they will follow: either CHED B.S.E. leading to M.A.T. option or ELEL B.S.E. licensure option. Both of these options are described on the application which can be found on the College of Education and Health Professions website (http://cied.uark.edu/2360.htm).

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 62)) through the university-wide Teacher Education Office.
2. Submission of Elementary Education application
3. Submission of transcripts for all coursework
4. Oral interview with Elementary Education faculty
5. Submission of Writing Sample
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam
7. Current background check

**Stage III: Requirements for Program Continuation and Student Teaching/Internship**

1. Maintain a cumulative GPA of 3.0 or better
2. Submission of Internship Application
3. Passing score on Praxis II, Elementary Education, Multiple Subjects
4. Successful teaching audition
5. Submission of letters of recommendation
6. Maintain a current background check
7. Earn a CPR card

This B.S.E. (4-year) degree includes approximately 9 months of student teaching/internship experience in public elementary schools. Senior-level students must therefore attend full-time.

Requirements for teacher licensure vary from state to state and may differ in teacher preparation programs. Please note that Arkansas requires all applicants to successfully complete a criminal background check. Arkansas Teacher Licensure requirements can be found at http://arkansased.org/teachers/licensureinitial.html.

All program courses must have a grade of “C” or better. No teaching methods courses may be taken as self-paced (correspondence) courses. A grade of “B” or better must be earned in both the fall and spring semesters of CIED 4173 Student Teaching.

---

The Elementary Education Requirements (ELEL) are designed to prepare future educators for teaching in elementary schools. Courses are structured to build a strong foundation in both content knowledge and pedagogical skills, ensuring that graduates are well-equipped to enter the classroom. The program includes a combination of coursework, field experience, and professional development opportunities. Graduates are eligible to pursue initial teacher licensure, which is a critical step in becoming a certified educator.

**University Core (State Minimum Core)**

- ENGL 1013: Composition I
- ENGL 1023: Composition II
- MATH 1203: College Algebra
- BIOL 1543: Principles of Biology
- GEOS 1113: General Geology
- HIST 2003: History of the American People
- ARHS 1003: Basic Course in the Arts: Art Lecture
- CIED 1013: Introduction to Education

**Total Hours:** 125

† Complete all requirements with grade 'C' or better unless otherwise noted.

1 Or any 3-hour Arkansas history course

2 Two semesters required for licensure; one taken Fall, other taken Spring

3 Must have a grade of "B" or better for graduation

### Elementary Education B.S.E.

#### Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university’s Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

<table>
<thead>
<tr>

Health, Human Performance and Recreation (HHPR)

Matthew S. Ganio  
Department Head  
306 HPER Building  
479-575-2857  
msganio@uark.edu (bhammig@uark.edu)

Stephen W. Dittmore  
Assistant Department Head  
306C HPER Building  
479-575-6625  
dittmore@uark.edu

The department offers programs leading to the B.S. degree with major emphasis in kinesiology (p. 462), public health (p. 466), or recreation and sport management (p. 468). The department also offers coursework in dance activity (p. 448).

Bonacci, Jeff, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, 2000.

Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, 2003.

Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, 2018.

Dillmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, 2008.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, 2016.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Assistant Professor, 2013.

Forbess, Janet B., M.Ed. (University of Florida), B.S.E. (Georgia Southern College), Instructor, 1978.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, 2015.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, 2011.

Gorman, Dean Richard, Ph.D. (University of Kansas), M.S., B.A. (Arizona State University), Professor, 1979.

Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, 2010.

Greene, Nicholas P., Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Assistant Professor, 2013.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, 2008.

Henry, Leah Jean, Ph.D. (Texas Woman’s University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, 2008.

Howie, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, 2016.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, 1994.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, 2011.

Kavouras, Stavros Anastassios, Ph.D. (University of Connecticut), M.S. (University of Colorado-Colorado Springs), B.S. (University of Athens-Greece), Associate Professor, 2012.

Kern, Jack C., Ph.D. (Texas Woman’s University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, 1996.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, 1989.

Lens, Joshua, J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, 2018.

Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Miskingham College), Professor, 1991.
Human Resource and Workforce Development Education (HRWD)

Academic Adviser, Undergraduate HRWD
106 Graduate Education Building
479-575-4690
hrwd@uark.edu (pgerke@uark.edu)

The undergraduate Human Resource and Workforce Development Education (HRWD) program is specifically designed for adults who want to complete a bachelor’s degree that opens doors to opportunity and personal growth. HRWD curriculum prepares individuals to apply integrated training, organizational development, and career planning and counseling skills to the design, management, and evaluation of programs to improve individual productivity, employability, job satisfaction, and organizational effectiveness. Undergraduates also obtain a solid academic base to pursue a graduate degree. This major does not lead to traditional licensure for teachers in Arkansas.

All students start the program as pre-HRWD majors. To be admitted into the HRWD major, the students must meet the following criteria:

1. Have three or more years of full-time work experience or equivalent.
2. Complete all 35 hours of university core courses, including the Pre-HRWD Math requirement:
   - Math course chosen from:
     - MATH 1313 Quantitative Reasoning (ACTS Equivalency = MATH 1113)
     - MATH 2053 Finite Mathematics
     - MATH 2183 Mathematical Reasoning in a Quantitative World (Sp, Fa)
     - STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

   Economics course or courses chosen from:
   - ECON 2143 Basic Economics: Theory and Practice
   - ECON 2143 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
   - ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)

3. Have a 2.5 or higher GPA, or have a 2.5 or higher GPA on HRWD required courses after completing 12 hours of HRWD coursework.

Human Resource and Workforce Development (HRWD) Major

University Core Requirements 35

3-6 hours Pre-HRWD Economics Requirement chosen from:
- ECON 2143 Basic Economics: Theory and Practice
- or ECON 20 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
- or Principles of Microeconomics (ACTS Equivalency = ECON 2203)

3 hours Pre-HRWD Math requirement chosen from:
- MATH 2183 Mathematical Reasoning in a Quantitative World (Sp, Fa)
- or MATH 20 Finite Mathematics
- or STAT 230 Principles of Statistics (ACTS Equivalency = MATH 2103)
- or MATH 1113 Quantitative Reasoning (ACTS Equivalency = MATH 1113)

Electives 34

Up to 19 credit hours of electives can include technical credit that can be obtained through experiential learning credits and/or faculty approved courses.

HRWD Required Courses

18 hour Career Development Pillar
- HRWD 3113 Foundations of Human Resource Development (Sp, Su, Fa) 3
- HRWD 3123 Career Development (Su, Fa) 3
- HRWD 4113 The Generational Dynamics in the Workplace (Sp, Su, Fa) 3
- HRWD 3133 Writing for Human Resource and Workforce Development Professionals 3
- HRWD 4123 Strategic Human Resource Development 3
- HRWD 4133 International Human Resource Development and Cultural Differentiation 3

15 hour Organization Development Pillar
- HRWD 3213 Organization Development (Sp, Su) 3
- HRWD 3223 Managing Human Resource Development Programs 3
- HRWD 4213 Workplace Diversity and Human Resource Development 3
- HRWD 4223 Professional and Leadership Development 3
- HRWD 4233 HRD Legal and Ethical Issues (Sp, Fa) 3

18 hour Training and Development Pillar
- HRWD 3313 Training and Development (Sp, Fa) 3
- HRWD 3323 Designing and Developing Human Resource Development Programs 3
- HRWD 3333 Communication in Human Resource and Workforce Development 3
- HRWD 4313 Human Resource Development Program and Product Evaluation 3
Human Resource and Workforce Development Education

Semester Plan

The nature of the Human Resource Development major excludes it from ACT 1014 eight-semester degree-completion program requirements. The HRWD degree is a 120 hour degree in accordance with ACT 747.

Presented below is a typical plan for completing this degree in four semesters; individual student plans may vary significantly.

If fewer credits than needed are earned through technical credits, completing additional appropriate coursework will require heavier course loads and/or additional semesters to graduate. The 19 hours of technical requirements can be completed at any time during the four semester program. Students are not required to complete courses during the summer, but courses may be offered. Students may be able to finish the program sooner if they enroll in summer courses.

Earned prior to Fall Semester Year 1

<table>

</tr>
</thead>
<tbody>
<tr>
<td>21</td>
</tr>
</tbody>
</table>

To include:

HRWD 4323 Instructional Technology and Design 3
HRWD 4333 Human Resource Development Capstone 3

Total Hours 120

1. Experiential Learning HRWD 450V
   a. Credits from HRWD faculty approved National Occupational Competency Testing Institute (NOCTI) assessments accepted and assessed by the HRWD faculty NOCTI coordinator.
   b. American Council on Education (ACE) and Council on Adult and Experiential Learning (CAEL) credits as accepted by the University of Arkansas’ undergraduate policy will also be accepted by the undergraduate HRWD program for Experiential Learning HRWD 450V credits.
   c. 3 credit hours will be awarded for recognition from the American Society for Training and Development (ASTD) as a Certified Professional in Learning and Performance (CPLP).
   d. Credits will be given for earning from Society for Human Resource Management (SHRM) Professional in Human Resources (PHR) and Senior Professional in Human Resources (SPHR) certification. 1 credit hour will be awarded for PHR certification, 3 credit hours for SPHR certification. If a student enters the undergraduate HRWD program with PHR certification and obtains SPHR certification while in the program, they will be given an additional 2 credit hours for a maximum of 3 credit hours.
   e. A maximum of 3 credit hours of Continuing Education Unit (CEU) will be accepted. 15 hours of continuing education equals 1 CEU and equals 1 credit hour.
   f. A maximum of 6 hours of ROTC credit will be granted for military service in accordance with the current University of Arkansas Policy.

2. Faculty Approved courses
   a. Sanctioned by HRWD faculty.
   b. Related to one of the HRWD areas, including psychology, organizational behavior, adult education, occupational counseling, skill testing and evaluation, program design and evaluation, consulting practice, organizational development, training, management, development, customer service, or total quality management.

Year Total: 12
The program in kinesiology is designed to prepare candidates for a variety of career options in the vast field of movement science. Depending upon the choice of concentrations, career opportunities may include teaching physical education, coaching, analyzing and prescribing fitness programs, pre-athletic training, or preparation for professional programs in allied health. Graduates of this program should be well prepared to enter graduate programs of study in such areas as pedagogy or adapted physical education, exercise physiology, biomechanics, athletic training, sport management, medical school, physical therapy school, occupational school and other allied health professional schools.

The candidate for the Bachelor of Science degree with a major in kinesiology must select one of two concentrations:

- Exercise Science
- K-12 Teaching Physical Education, Wellness and Leisure

Undergraduate students in the Kinesiology (Exercise Science) program area are required to complete a minimum of 120 hours of coursework to graduate. Include within this requirement are courses in kinesiology, exercise science, and health science and a strong variety of interdisciplinary courses to include areas of nutrition, biological sciences, physics, chemistry, mathematics, English, communications, psychology, social sciences, fine arts, humanities, and statistics. Students are also provided with opportunities to connect classroom learning with actual research or hands-on experiences through courses such as Independent Study, Laboratory Practicums, and Internships. In addition to the required coursework, Exercise Science students have the opportunity to select related electives that will give the student the ability to create the best opportunity for their post-baccalaureate plans. Kinesiology has a high rate of students who qualify and are involved in the Honors College/COEHP College Honors curriculum.

Undergraduate students in the Kinesiology (K-12 Teaching Physical Education/Wellness & Leisure) program are also required to complete a minimum of 120 hours of coursework to graduate. The program of study works through the College of Education and Health Professions to ensure that these students are ready for application to Arkansas Teacher licensure if they are accepted and able to complete all of the steps of admissions and completion.

### Kinesiology K-12 Teaching Physical Education, Wellness and Leisure Concentration

A student preparing to teach in the public schools must select the K-12 teaching concentration in Kinesiology. Admission to the Kinesiology K-12 Teaching Physical Education, Wellness and Leisure Concentration requires the following:

- must be admitted to the teacher education program in kinesiology K-12 (see the Teacher Education Application Fee (p. 62)) after their sophomore year (45 hours of coursework).
- pass all three parts of Core Academic Skills for Educator: Math, Reading, and Writing according to current Arkansas State Department of Education requirements
- successfully complete an Arkansas State Police and Arkansas Child Maltreatment Registry background check (Background checks must be current, there is a fee for this process.)
- prior to taking the following pedagogical courses PHED 3003, PHED 3033, PHED 3043, students are required to have a cumulative grade point average of 2.5 or above
- prior to taking the following pedagogical courses PHED 4703, PHED 4743, PHED 432V, students are required to have a cumulative grade point average of 2.7 or above.

To be eligible to enroll in the Senior Block Internship semester (PHED 4023, PHED 407V, PHED 4733), students are required to:

- have a cumulative grade point average of 2.7 and maintain through degree completion
- successfully complete an Arkansas State Police and Arkansas Child Maltreatment Registry background check (Background checks must be current, there is a fee for this process.)
- complete or present proof of registration for the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure

In order to complete the Kinesiology K-12 Teaching Physical Education, Wellness and Leisure students must maintain a 2.7 cumulative grade point average and complete all university requirements for graduation.

Students interested in obtaining an endorsement in coaching should contact the Coordinator of Teacher Education.

**General Electives**

11-12 Units

As needed for total hours based on waivers, exemptions and transfer inequalities.

Total Hours: 120

1 Students may also count completion of the Anatomy and Physiology I course at another Arkansas institution for this requirement.

Note: All students seeking licensure in the state of Arkansas are subject to a criminal background check. Forms for this procedure may be obtained at the office of the Teacher Certification Officer, at the State Department, or any police station, including the campus police. These background checks take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities six months in advance of actually applying for a license. Arkansas will not certify anyone who has been convicted of a felony. Although not required for the Kinesiology concentration in Physical Education, Wellness and Leisure, students seeking coaching endorsement will need to take PHED 4001, take the appropriate PRAXIS exams as designated by the Arkansas State Department of Education, and make a “C” or better in all courses required by the University of Arkansas for the Coaching Endorsement. Please see the College of Education and Health Professions PDF (http://coe.hp.uark.edu/CoachingALP.pdf) for these specific course numbers.

### Kinesiology B.S. K-12 Teaching Physical Education, Wellness & Leisure Concentration Eight-Semester Degree Program (KINSBS-PEWL)

The teacher education program for Kinesiology K-12 Teaching Physical Education/Wellness & Leisure does not qualify for the eight semester degree plan due to Praxis and cumulative GPA requirements for progression. However, the following 8-semester sample plan shows how a first-year student could select their courses.

2. Course requires C or better for degree award
3. Students must have 40 hours of 3000/4000-level classes to graduate.
Public Health (PBHL)

Public health is an exciting, diverse major that focuses on disease prevention and health promotion needs at the community level. Public health work is conducted by teams of clinicians, epidemiologists, behavioral scientists, environmental scientists, health education specialists, health inspectors, statisticians, and health administrators. Students receiving a B.S. in Public Health will be trained for entry-level public health positions found in government agencies, health corporations, and community non-profit organizations. Graduates are employed in a variety of settings, including: public health departments, non-governmental agencies, hospitals, health care management organizations, and health care accrediting agencies. The public health degree at the University of Arkansas is specifically focused on health promotion, health behavior and health education. In accordance,
graduates are eligible for the Certified Health Education Specialist credential.

Public health is delivered in a variety of capacities to:

- Impact behavioral factors that are linked to chronic diseases, such as heart disease, diabetes, and cancer.
- Promote behaviors that positively impact outcomes related to issues such as physical activity, nutrition, and sexual health.
- Prevent and control the spread of infectious diseases
- Improve access to health care
- Affect issues related to the health of the environment
- Prevent violent and unintentional injuries
- Participate in global health endeavors
- Prevent drug use and abuse
- Assure the safety of our food supply
- Manage the delivery of health services

An undergraduate major in public health leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

Public Health Major Requirements 33

- PBHL 1103 Personal Health and Safety
- PBHL 3202 Health Care and Public Health Policy
- PBHL 3443 Introduction to Public Health
- PBHL 3643 Public Health Program Planning and Evaluation
- PBHL 4043 Internship in Public Health
- ENSC 1003 Environmental Science & ENSC 1001L and Environmental Science Laboratory
- PBHL 4603 Health Behavior: Theories and Application
- PBHL 4613 Principles of Epidemiology
- PBHL 4643 Multicultural Health

ENGL 3053 Technical and Report Writing (ACTS Equivalency = ENGL 2023)

STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

or ESRM 241 Statistics in Nursing

Related Required Courses 21

- PBHL 1203 Prevention of Drug Abuse
- PBHL 1303 Introduction to Human Sexuality
- NUTR 1213 Fundamentals of Nutrition
- COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)
- PBHL 2663 Terminology for the Health Professions
- SCWK 4183 Social Work With Elders
- PSYC 3093 Developmental Psychology (ACTS Equivalency = PSYC 2103)

Sciences 12

- BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
- & BIOL 2011L and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
- BIOL 2443 Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture)
- & BIOL 2441L and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)
- BIOL 2213 Human Physiology (ACTS Equivalency = BIOL 2414 Lecture)
- & BIOL 2211L and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)

Electives: 19 hours total (11 must be 3000 or above) 19

- General electives (9 hours)

Public Health related electives (10 hours) selected from BIOL, CHEM, COMM, EXSC, any Foreign Language, HESC, KINS, MATH, NURS, PBHL, PHYS, PSYC, SCWK, SOCI, STAT, SUST

Total Hours 120

\(^1\) Course requires C or better for degree award.

Public Health B.S. Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan for the Public Health major should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university core requirements.

Recreation and Sport Management (RESM)

The program in recreation and sport management is designed to prepare candidates for a variety of career opportunities in the field of recreation and sport management. Career opportunities may include park and recreation directors for a city, college and professional sports management, fitness center managers, state and national park managers, camp administrators, or work in YMCAs, Boys and Girls Clubs, or other youth-serving agencies. Graduates of this program should be well prepared to enter the recreation and sport workforce at an entry level position or pursue graduate studies in such areas as recreation management and sport management.

All students must complete the University Core requirements. In addition, all students must take the required general studies for the recreation and sport management core requirements listed. Recreation and sport management majors must obtain a ‘C’ or better in all courses beginning with Year Total: 16 16

Total Units in Sequence: 120

1 Course requires C or better for degree award.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, Department of Health, Human Performance and Recreation, 2011.
with the alpha code RESM. To enroll in RESM 440V, students must have a 2.50 GPA or better in RESM core and professional elective courses, have senior standing and have completed RESM 3873 and two RESM 2011 practicums.

There are several experiential requirements within the recreation and sport management core. Students are required to do three practicum experiences (RESM 2011). Each experience totals 45 hours. A more intense experience of an internship (RESM 440V) requires a minimum of 400 hours or work full time for 12-15 weeks in an agency with a qualified park, recreation, or sport management professional.

An undergraduate major in Recreation and Sport Management leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

### Curriculum for a Major in Recreation and Sport Management

**University Minimum Core (State Minimum Core)**  
35

**Required University Core for Major in Recreation and Sport Management:**

- PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
- SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013)
- ECON 2143 Basic Economics: Theory and Practice

**Recreation and Sport Management Major Requirements**  
54

- Three Hours Literature/History/World Civilization Elective
- COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)
- Science Core w/lab
- PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
- Humanities Core or Fine Arts Core
- RESM Electives (select 3 hours from the following)  
  - RESM 1023 Recreation and Natural Resources
  - RESM 3023 Sport Management Fundamentals
  - RESM 4023 Outdoor Adventure Leadership
  - RESM 405V Independent Study in Recreation and Sport
  - RESM 4273 The Intramural Sports Program
  - RESM 480V Workshop

**HHPR Departmental Electives (EXSC, KINS, PBHL, PHED, RESM)**  
6

**General Electives**  
4

**RESM-related Electives of which 6 hours must be 3000/4000 level**  
18

- From ACCT, ANTH, COMM, FINN, GEOG, GEOL, HESC, HOSP, ISYS, JOUR, MGMT, MKTG, NUTR, SCWK, SUST, any WCOB prefix, CNED 3053, GEOS 4563

**Total Hours**  
120

The Recreation and Sport Management major is exempt from eight-semester degree plans, because students are recommended to register for RESM 440V Internship after the completion of their course work, because the recreation and sport management agencies have their busiest season in the summer. The following nine-semester plan, however, will guide students who wish to graduate in four years.

### Rehabilitaion, Human Resources, and Communication Disorders (RHRC)

The Department of Rehabilitation, Human Resources, and Communication Disorders offers two degree programs:

- B.S.E. in Human Resource and Workforce Development (p. 460)
- B.S.E. in Communication Disorders (p. 444)

At the graduate level, the department also offers an M.S. with an emphasis in speech-language pathology, M.S. and Ed.D. in higher education (http://catalog.uark.edu/graduatecatalog/programsofstudy/highereducation), M.S. and Ed.D. in human resource and workforce development (http://catalog.uark.edu/graduatecatalog/programsofstudy/humanresourceandworkforceeducation), M.S. and Ph.D. in counselor education (http://catalog.uark.edu/graduatecatalog/programsofstudy/counseloreducation).

### Faculty

- **Moiseichik, Merry Lynn**, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989.
- **Stokowski, Sarah**, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.

---

- **Barker, Mitchell D.**, Ph.D. (University of Chicago), Lecturer, 2015.
- **Blisard, Paul**, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, 2014.
- **Bowers, Andrew L.**, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Assistant Professor, 2012.
- **Cook, Aletha**, M.S., B.A. (University of Arkansas), Clinical Instructor, 2015.
- **Edmonston, Craig**, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.
- **Langsner, Steve**, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.

Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, 2002.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, 2006.

Hoffield, Christine, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, 2017.

Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, 1997.

Koch, Lynn C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, 2006.

Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, 2014.

Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, 2008.

Lusk, Stephanie Lisanne, Ph.D. (University of Arkansas), M.A (Arkansas State University), B.A. (University of Arkansas), Associate Professor, 2012.

Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Associate Professor, 2008.

McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, 2010.

Perryman, Kristi Leann, Ph.D. (University of Arizona), M.S., B.S. (Southwest Missouri State University), Assistant Professor, 2014.

Perry, Kim, M.S. (University of Arkansas), Instructor, 2007.

Perryman, Kristi Leann, Ph.D. (University of Arizona), M.S., B.S. (Southwest Missouri State University), Assistant Professor, 2014.

Popejoy, Erin O., Ph.D. (University of Texas–San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, 2015.

Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Assistant Professor, 2016.

Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, 2014.

Stegman, Charles E., Ph.D., M.A. (University of Missouri-Kansas City), B.A. (St. Mary’s College), Professor, 1995.

Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, 1997.

Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, 2018.

Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, 2002.

Special Education (SPED)

Peggy Schaefer-Whitby
Program Coordinator
ARKA 308
479-575-3302
pschaefe@uark.edu (bgartin@uark.edu)

The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Special Education. Graduates of the B.S.E. in Special Education will prepare students to teach special education to students with diverse disabilities from kindergarten to 12th grade.

Students wishing to pursue a major in Special Education declare the Pre-Special Education (PSPED) preparation emphasis until formal admission to the major is approved by program faculty.

General Requirements

1. Students must pass Praxis Core or ACT by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203. Enrollment for the spring semester, sophomore year is not permitted unless all three parts of Praxis Core are passed, and

2. All CIED courses must have a grade of "C" or higher. All SPED courses must have a "B" or higher prior to the student teaching semesters. No teaching methods courses may be taken by as self-paced (correspondence) courses.

3. Students must complete and successfully pass the criminal background check before beginning field experiences in the schools in the fall semester of the sophomore year and every year as needed.

4. Application to the Special Education Professional Course of Study is made through the Teacher Education Office (see the Teacher Education Application Fee (p. 62)) in the fall semester of the sophomore year after completing the first 30 hours on the program of study. A maximum number of special education candidates will be accepted each year. Thus, admission is competitive and meeting minimum requirements does not automatically result in admission to the program. Candidates will be ranked according to the following:
   • Praxis Core scores
   • Cumulative GPA
   • Criminal background check
   • Interview

5. Continuation to senior year Teaching Internship block is based on the following:

6. Praxis II: Special Education: Core Knowledge and Applications scores

7. Cumulative GPA

8. Criminal background check

6. Licensure requirements include the following.
   • Students must successfully complete the 2 semesters of Teaching Internship with a "B" or higher.
   • Students must have a cumulative GPA of 3.0 or higher.
   • Students must pass Praxis II: Special Education: Core Knowledge and Applications by meeting or exceeding the Arkansas Department of Education cut-off scores.

## UAteach

### UAteach Program

teach@uark.edu  
479-575-3280  
946 W. Clinton Drive  
Fayetteville, AR 72701

The Department of Curriculum and Instruction offers an undergraduate minor in Secondary Mathematics and/or Science Education through UAteach, a joint program between College of Education and Health Professions, Fulbright College of Arts and Sciences and College of Engineering.

Students pursuing teacher licensure in Mathematics, Biology, Chemistry, Physics, or Computer Science are eligible for the UAteach minor.

### Minor in Secondary Mathematics and/or Science Teacher Education UAteach

**Total Hours:** 18

In addition to these courses, students must successfully pass the Praxis Core (Reading, Writing, and Math), Praxis II (Principles of Learning and Teaching), Praxis content tests, submit a portfolio, and pass a state criminal background check.

Please note that individuals may become teachers in a variety of subjects including mathematics and science through the Master of Arts in Teaching program at the graduate level. For more information about UAteach contact teach@uark.edu

### Teacher Licensure for Computer Science 4-12

For initial teacher licensure in Computer Science, the following 47 hours of courses are required:

1. Also UAteach requirement  
2. Course cannot be counted in both elective areas

### College of Engineering Mission and Objectives

Ever since people first began to use tools and manipulate their surroundings, engineering has been a vital aspect of human life, and these days, engineering is as important as it ever was. Society turns
to engineers to solve a range of social, economic and environmental problems, and an engineering degree can prepare students to work as managers and leaders, in the public or private spheres. Engineering education combines math and science with creativity, innovation and a passion to change the world.

The College of Engineering adds personal, social and economic value to the region, the state, the nation, and the world through engineering education and cutting-edge research in emerging technologies.

Recognizing that the University of Arkansas, Fayetteville, is a land-grant institution with consequent responsibilities in teaching, research, and service, and realizing that these are mutually dependent and necessary responsibilities, the College of Engineering adopts and seeks to fulfill the following statements of purpose.

**Undergraduate Education** — Offer a high-quality and fully accredited course of instruction involving classroom, laboratory, and extracurricular activities that will result in professionals qualified to begin careers in the field of engineering and prepared to assume responsible places of leadership in society.

**Graduate Education and Research** — Offer state-of-the-art coursework and research experiences that result in all graduates being capable of independent analysis and design, and all Ph.D. graduates capable of extending the state-of-the-art in their areas of expertise.

**Continuing Education** — Provide local, regional, national, and international seminars, symposia, short courses, and credit courses to engineers and others in the technical community to help them further their formal education and keep abreast of new developments in technology.

**Technology Development and Job Creation** — Assist actively and vigorously in the growth and development of the state of Arkansas and the nation by performing research and developing innovative new technology, by updating the existing technology within industrial circles, by providing educational support services, and by attracting and creating new industry.

The College of Engineering focuses on research, teaching and outreach in the following areas:

- Health care and healthcare systems
- Cyber and Homeland Security
- Big Data and Data Analytics
- Sustainability and the built environment
- Electric power systems and advanced power electronics
- Electronics manufacturing
- Environmental and ecosystems analysis
- Mixed signal electric systems
- Materials and manufacturing
- Nanotechnologies
- Transportation, logistics and infrastructure

More information about the College of Engineering can be found at the College of Engineering website (http://www.engr.uark.edu).

---

**College of Engineering Strategic Plan**

**“Preparing You for Your Tomorrow”**

For more than 100 years, the College of Engineering has successfully fulfilled its primary mission: to provide an excellent engineering education to undergraduate and graduate students at the University of Arkansas.

The College of Engineering faculty, staff, alumni and students decided to accept the challenge to become one of the best. Specifically, the college’s collective goal is:

*To become and be recognized as one of the top tier graduate and undergraduate engineering programs in the U.S.*

The College’s strategic plan encompasses seven main goals. By successfully accomplishing these objectives, the College of Engineering will contribute to the University of Arkansas becoming a nationally competitive, student-centered research institution serving Arkansas and the world, effectively fulfilling its purpose.

**Strategic Goals**

1. **Provide a student-centered educational experience that attracts diverse, high-quality students, helps them to realize their potential, inspires them to pursue excellence at all degree levels and grooms them to become leaders in their profession.**

2. **Create a supportive research environment that enhances and recognizes scholarship while stimulating entrepreneurship and economic development within Arkansas, the nation and world.**

3. **Recruit, mentor and retain high-quality and diverse faculty members who value and promote world-class scholarship.**

4. **Attract, develop and retain well-qualified, diverse and skilled staff members who are equipped to support the growth and potential of the College of Engineering.**

5. **Implement service and outreach to enhance the impact of the College of Engineering both within and outside the university through service and outreach.**

6. **Become a catalyst for economic development to achieve the long-term economic goals of Arkansas through entrepreneurship, research and collaboration with industry and government.**

7. **Cultivate corporate and alumni relationships to improve educational opportunities and assist in providing a high quality educational infrastructure.**

---

**College Admission Requirements**

**Undergraduate Students**

Freshmen admitted to the University of Arkansas, Fayetteville, are eligible to enroll in the College of Engineering. The freshman curriculum stresses a basic foundation in mathematics, physics, and chemistry, which will be required in later years. The sophomore, junior, and senior years are spent in a strong concentration on the student’s chosen field, with emphasis on industrial applications of classroom and laboratory work. By the selection of electives, a student can concentrate in depth in a particular subject, have the flexibility to study several subjects, and minor in an area of interest. Provisions are made for electives in the humanities and social sciences as a means of providing a well-rounded education.

**International Students**

Before being admitted all computer engineering applicants must submit a Test of Spoken English (TSE) score of at least 5.0, or a 7.0 on the spoken
section of the IELTS, and an ACT score of 25 (or SAT score of 1140(R)) or above, to be eligible for admission.

Transfer Students
In addition to the university policies controlling the granting of credit for course work taken at other institutions, the College of Engineering specifies that advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have engineering programs accredited by the Engineering Accreditation Commission or the Computing Accreditation Commission of ABET.

College Scholarships
The College of Engineering awards numerous scholarships, and most are based primarily on academic performance. However, scholarships may also be awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments. College scholarships are available to any engineering student, and departmental scholarships are meant for students enrolled in a particular discipline of engineering. College and departmental scholarships are not available for entering freshmen. Students must be admitted to the University of Arkansas and enrolled in the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows a student to be considered for all college-level and departmental scholarships.

For more information concerning scholarship and diversity opportunities, contact the Engineering Student Affairs Office at 575-3051 or e-mail engrdean@uark.edu.

Facilities and Resources
Instructional, Computer, and Laboratory Facilities
Undergraduate instruction in engineering takes place in Bell Engineering Center, John H. White Jr. Engineering Hall, J.B. Hunt Center for Academic Excellence, and the Mechanical Engineering building. These facilities contain state-of-the-art classrooms and instructional equipment. Undergraduate laboratories are located both on the main campus as well as at the Engineering Research Center. Laboratories offer students hands-on experience relating to the subject matter addressed in the classroom.

The College of Engineering utilizes a wide variety of computing equipment to assist in engineering education. Students have easy access to computers through general computer laboratories or computer facilities located in specialized laboratories within the college. The computers are networked so that all the computing power of the university, including the mainframe computers, can be accessed from the PCs or workstations provided for engineering students. Owning a personal computer is not required; however, it is beneficial.

Laboratory Fee
In order to maintain the college’s state-of-the-art instructional and computer laboratories, each student enrolled in an engineering course is assessed a laboratory fee for that term. This fee is used only to purchase and maintain equipment and staff the engineering laboratories and classrooms to assist students.

Library
The books and references used by engineering students and faculty are housed principally in the University of Arkansas Mullins Library. This collection is the most useful and comprehensive engineering library in the state. Many publications pertinent to the engineering profession are being added continuously. Mullins Library is the depository for water resources papers, geological survey materials, and NASA publications, as well as other governmental and industrial series.

Engineering Research Center
The 178,000-square-foot Engineering Research Center is located approximately two miles south of the main campus. The center provides the facilities and support services for a wide variety of research activities. It houses the Engineering Experiment Station through which the research of individual departments in the college is administered. Centers and laboratories located at the Engineering Research Center include GENESIS, the High Density Electronics Center, the Center for Training Transportation Professionals, and the Chemical Hazards Research Center.

Distance Learning
A Master of Science in Engineering (M.S.E.) degree is available for students who wish to take a broad range of engineering courses. See the Graduate School Catalog for details.

Professional development and continuing education credits can be earned through the College of Engineering’s Center for Distance Learning. These courses provide ongoing training on technical and engineering topics for professional engineers, land surveyors, and others in the technical and engineering professions.

The Master of Science in Operations Management (MSOM) degree program at the University of Arkansas offers students the philosophy, concepts, and techniques needed to manage available resources to achieve maximum efficiency and effectiveness in meeting operational goals. It provides the tools needed for successful management in industrial and/or military settings. Geared toward the working student, classes meet in the evenings in five 8-week terms per year. The program is offered at military installations at Little Rock Air Force Base (Jacksonville, Ark.), Naval Support Activity Mid-South (Millington, Tenn.), Hurlburt Field, Fla., and at in-state sites at Fayetteville, Bentonville, Camden, and Blytheville. Students in remote locations may also earn the MSOM degree by taking video courses. This is a non-engineering degree that is open to students from all undergraduate backgrounds. See the Graduate School catalog for details.

Student Organizations
The following are honor societies, social organizations and professional societies to which engineering students at the University of Arkansas may aspire:

- Alpha Chi Sigma (a professional chemistry fraternity)
- Alpha Epsilon (Biological/Agricultural Engineering)
- Alpha Pi Mu (Industrial Engineering)
- Alpha Epsilon (Civil Engineering)
- Alpha Epsilon (Chemical Engineering)
- Order of the Engineer (professional engineering society)
- Phi Eta Sigma (freshmen)
- Phi Kappa Phi (juniors and seniors)
- Phi Sigma Rho, (professional engineering sorority)
- Pi Mu Epsilon (Mathematics)
- Pi Tau Sigma (Mechanical Engineering)
College Academic Regulations

Students are expected to keep themselves informed concerning current regulations, policies, and program requirements in their fields of study and must meet all requirements of the degree programs in which they are enrolled. Courses that are modified or added to a curriculum and that are incorporated into the curriculum at a level lower than the student is enrolled may become graduation requirements for that student. Courses that are incorporated into the curriculum at a level lower than the student is enrolled are not required for that student.

Eligibility

Only students enrolled in the College of Engineering or enrolled in programs in which curricula require engineering courses will be allowed to take engineering courses. Exceptions to this requirement must be approved by the dean of engineering. This does not apply to graduate students.

Code of Ethics

Students in the College of Engineering are obligated to comply with pertinent provisions of the Code of Ethics applicable to professional practice following graduation. The Code requires "honesty, impartiality, fairness, and equity," and "adherence to the highest principles of ethical conduct." Most particularly, it states that engineers shall:

1. Be objective and truthful in professional reports, statements, or testimony;
2. Not falsify or permit misrepresentation of their academic or professional qualifications;
3. Give credit for engineering work to those whom credit is due;
4. Not compete unfairly with other engineers by attempting to obtain employment or advancement by improper or questionable methods;
5. Avoid any act tending to promote their own interest at the expense of the dignity and integrity of the profession.

Degree Requirements

The basic requirement for a Bachelor of Science degree in engineering is 124-128 semester hours of academic work, depending on the career field chosen. Students coming from high school with adequate preparation will be able to satisfy this requirement in eight semesters; however, some students require preparatory courses, and others choose to enroll in slightly lighter loads and graduate in nine or ten semesters. Students enrolled in ROTC require an additional 19 semester hours to meet all graduation requirements and graduate in ten semesters (five years).

Engineering is a rapidly changing profession, and the departmental curricula are updated continuously to keep pace with these changes. Students entering under this catalog will be required to comply with such curriculum changes to earn their degree. However, the total number of semester hours required for the degree may not be increased, and all work completed in accordance with this catalog prior to the curriculum change will be applied toward the student's degree requirements. Former students of the college must meet the curriculum requirements in effect at the time of their readmission.

Graduation Requirements

In addition to university requirements for enrollment and graduation, the College of Engineering has these additional requirements. Individual departments may have additional requirements.

1. Grade-Point Average – A candidate for a degree from the College of Engineering must have earned a grade-point average of no less than 2.00 on all courses in the student’s major area of study.
2. Courses That Do Not Count Toward a Degree – The following courses, which may be required, do not count toward degree credit for bachelor degrees in the College of Engineering: MATH 1203, MATH 1203C, MATH 1204, MATH 1213, GNEG 1514, GNEG 1515 and MATH 1284C or their equivalents.
3. “D” Rule – No student will be allowed to graduate if the student has “D” grades in more than 8 hours presented to meet the requirements for a degree.
4. **Transfer of Courses** – Advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have programs accredited by the Engineering Accreditation Commission.

5. **Resident Requirements** – A candidate must earn a minimum of 20 credit hours at the 3000 level and above in the College of Engineering from the University of Arkansas.

6. **University Core (State Minimum Core)** – The University of Arkansas has adopted a University Core of 35 semester-credit-hours of general education courses that are required of all baccalaureate degree candidates. This is in compliance with Arkansas Act 98 of 1989 and the subsequent action of the Arkansas State Board of Higher Education. Beginning in the fall semester of 1991, all state institutions of higher education in Arkansas have a 35-hour minimum core requirement with specified hours in each of six academic areas. The university and the College of Engineering have identified those courses that meet the minimum requirement, and they are listed in the chart below.

### Specific University Core Requirements for Engineering Students

**English**
- ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) 3
- ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) 3

**Mathematics**
- MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) 4

**Science**
- PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034) 4

Select one of the following: 4
- PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture)
- CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1223 Lecture)
- BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)

**U.S. History or Government**
- HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113) 3
- HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) (Sp, Su, Fa)

**Fine Arts, Humanities and Social Sciences**
- Fine Arts 3
- Humanities 3
- Social Sciences 9

Total Hours 36

* Must be selected from the university-approved list of lower level Humanities, Fine Arts and Social Science courses found in the main University Core (p. 84) list.

### Minors in Other Colleges and Schools

Students in the College of Engineering may pursue an academic minor in other colleges. For example, a minor in business is popular among engineering students. For requirements regarding minors, check the catalog listing for the department offering the minor. Students must notify the College of Engineering dean’s office of their intent to pursue a minor.

### Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at graduation by the honors designation of *cum laude*, *magna cum laude*, or *summa cum laude*. To earn this designation, the student must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. Must have at least a 3.50 GPA on University of Arkansas course work, computed at graduation (students with grade-point averages lower than 3.50 do not receive honors designation at graduation);
3. Must successfully complete the Engineering Honors Program, which includes a minimum of 12 hours of honors courses (at least 6 of these hours in engineering), an undergraduate research experience and thesis, and any additional departmental requirements;
4. Research and thesis material shall be evaluated by each department;
5. For *cum laude*, the student must achieve a GPA of 3.50 or higher and have good or better performance on the undergraduate research and thesis;
6. For *magna cum laude*, the student must achieve a GPA of 3.75 or higher and have good or better performance on the undergraduate research and thesis;
7. For *summa cum laude*, the student must achieve a GPA of 3.90 or higher and have outstanding performance on the undergraduate research and thesis.

The criteria may be evaluated and changed periodically by the College of Engineering.

### Requirements to Graduate with Distinction

Students who have not completed the Engineering Honors Program but have demonstrated excellent academic performance in baccalaureate degree programs will be recognized at graduation by the designation of “with distinction,” “with high distinction,” or “with highest distinction.” To earn these designations, the student must meet the following criteria on his or her University of Arkansas course work:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. For “with distinction,” the student must achieve a GPA of 3.60 or higher;
3. For “with high distinction,” the student must achieve a GPA of 3.75 or higher;
4. For “with highest distinction,” the student must achieve a GPA of 3.90 or higher.

The criteria may be evaluated and changed periodically by the College of Engineering.
Graduate Studies
The College of Engineering, in cooperation with the UA Graduate School, offers programs leading to the following graduate degrees:

- Master of Science in Biological Engineering (M.S.B.E.)
- Master of Science in Biomedical Engineering (M.S.Bm.E.)
- Master of Science in Chemical Engineering (M.S.Ch.E.)
- Master of Science in Civil Engineering (M.S.C.E.)
- Master of Science in Computer Engineering (M.S.Cmp.E.)
- Master of Science in Computer Science (M.S.)
- Master of Science in Electrical Engineering (M.S.E.E.)
- Master of Science in Engineering (M.S.E.)
- Master of Science in Environmental Engineering (M.S.En.E.)
- Master of Science in Industrial Engineering (M.S.I.E.)
- Master of Science in Mechanical Engineering (M.S.M.E.)
- Master of Science in Operations Management (M.S.O.M.)
- Doctor of Philosophy in Computer Science (Ph.D.)
- Doctor of Philosophy in Engineering (Ph.D.)

In addition, the College of Engineering supports the following interdisciplinary graduate programs:

- Master of Science in Cellular and Molecular Biology (M.S.)
- Master of Science in Microelectronics-Photonics (M.S.)
- Master of Science in Space and Planetary Sciences (M.S.)
- Doctor of Philosophy in Cellular and Molecular Biology (Ph.D.)
- Doctor of Philosophy in Microelectronics-Photonics (Ph.D.)
- Doctor of Philosophy in Space and Planetary Sciences (Ph.D.)

Further information concerning these programs may be found in the Graduate School Catalog or in the office of the dean of the Graduate School.

Accreditations
As the only comprehensive engineering program in Arkansas, the College of Engineering offers undergraduate, graduate, and doctoral degrees through eight academic departments. UA engineering programs have been continuously accredited by ABET since 1936.

The College of Engineering offers the following programs accredited by the Engineering Accreditation Commission of ABET. Visit http://www.abet.org.

- Bachelor of Science in Biological Engineering (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (B.S.Bm. E)
- Bachelor of Science in Chemical Engineering (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cmp.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)

The College Engineering offers the following program accredited by the Computing Accreditation Commission of ABET. Visit http://www.abet.org.

- Bachelor of Science in Computer Science (B.S.)

Degrees Offered
The College of Engineering offers programs leading to the following eight undergraduate degrees:

- Bachelor of Science in Biological Engineering (p. 480) (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (p. 482) (B.S.Bm.E.)
- Bachelor of Science in Chemical Engineering (p. 501) (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (p. 484) (B.S.C.E.)
- Bachelor of Science in Computer Engineering (p. 487) (B.S.Cmp.E.)
- Bachelor of Science in Computer Science (p. 487) (B.S.)
- Bachelor of Arts in Computer Science (p. 487) (B.A.)
- Bachelor of Science in Electrical Engineering (p. 491) (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (p. 494) (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (p. 497) (B.S.M.E.)

Minors
- Data Analytics (p. 490)

Other Programs
Off-Campus Programs
The College of Engineering at the University of Arkansas (UofA) is offering the Bachelor of Science degrees in Electrical Engineering and Mechanical Engineering at the University of Arkansas at Fort Smith (UAFS). Upper-division courses are taught in person or through distance-learning technology by UAF faculty, and lower-division courses are taught by UAFS faculty. The degree is awarded by University of Arkansas (UofA), but all classes are offered at the UAFS campus.

Cooperative education (co-op) is an academic program that allows students to gain practical work experience prior to graduation. Over the years thousands of engineering students have participated in the co-op program at the University of Arkansas, gaining experience related to their major locally, within the state, across the nation, and internationally. Students work either full- or part-time in paid, degree-related jobs, and the skills they acquire allow them to step into their first full-time positions ready to contribute in ways that other students cannot. The material below will give more information about the co-op program.

**Forms of Cooperative Education: Alternating and Parallel**

In an alternating plan, students alternate between semesters of on-campus study and semesters off-campus at their co-op work site. Students can take a maximum of 3 credit hours of course work during the off-campus co-op periods. In a parallel co-op, students work part-time for a local company (less than 25 hours each week) and attend school at least half-time (6 credit hours). In either plan the student is considered a full-time student.

By participating in Cooperative Education, students have the chance to:

- Gain hands-on experience in a real world setting
- Confirm the choice of their major
- Make valuable industry contacts
- Enhance their communication skills
- Make money while also taking classes
- Lay the foundations for a future full-time job

**Requirements and Conditions**

**GNEG 3801** (undergraduate students working part-time):
- Must have completed 30 hours towards engineering degree.
- Must have a minimum of 2.25 cumulative GPA.
- Must be enrolled at least half-time and must be working part-time at co-op.

**GNEG 3811** (undergraduate students working full-time):
- Must have completed 30 hours toward engineering degree.
- Must have a minimum of a 2.25 cumulative GPA.
- Must be working full-time and must not be enrolled in more than 3 credit hours.
- Must have at least 12 hours of coursework in their major remaining upon return to campus.

**GNEG 5801** (graduate students working part-time):
- Completed at least 6 hours towards engineering degree.
- Have a minimum of a 3.0 cumulative GPA.
- Must be enrolled at least half-time and must be working part-time at co-op.
- Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.

**GNEG 5811** (graduate students working full-time):
- Completed at least 6 hours towards engineering degree.
- Have a minimum of a 3.0 cumulative GPA.
- Must be working full-time and must not be enrolled in more than 3 credit hours.
- Must have at least 3 hours of non-thesis, -dissertation, or -research hours remaining upon return to campus.
- Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.

- Students who are TA's, GA's, or RA's in the term of their work experience are not eligible for this course.
- Transfer Students
  - Must have completed one semester of full-time study in the College of Engineering.
  - Must meet all other co-op requirements.
- F-1 Students
  - Must have completed nine months of study in the United States.
  - Must meet all other co-op requirements.

Full-time co-op assignments consist of the following scenarios:

- One semester away from campus (Spring, Summer, or Fall).
- One summer and one semester away from campus (Spring & Summer OR Summer & Fall).
- Alternating Semesters between Spring, Summer, and Fall.

Students who are away from campus for 2 semesters in one year, are eligible for only one semester away the following year with no more than three co-op semesters in a 24-month period. (Exceptions to this must be approved in advance by their departmental co-op representative.) Students who are going to be away from campus for the Fall and Spring semester in the same academic must receive prior approval from their departmental co-op representative.

**Study Abroad Programs**

The College of Engineering actively encourages engineering students to obtain an international experience while pursuing an engineering degree. Students have several opportunities to join engineering faculty-led programs in India, Belize and Spain as well as opportunities within the Southeastern Conference Academic Consortium (SEAC). For more information on study abroad opportunities, contact the Assistant Dean for International Programs, 479-575-7236.

**Dual-Degree Transfer Programs**

The College of Engineering recognizes that a graduate engineer, to be of full service to community, must be educated in the social sciences and humanities as well as in technical subjects. The practice of industry to elevate engineers to managerial and administrative positions elevates the desirability of a broad educational background. Likewise, most universities within Arkansas do not offer a degree in engineering. Accordingly, the College of Engineering of the University of Arkansas has entered into a cooperative program with several Arkansas “partner” universities to provide for dual-degree programs that lead to a Bachelor of Science degree from the partner university and an engineering degree from the University of Arkansas. Typically, a student spends two to three years at the partner university and then completes an engineering curriculum in two to three years at the University of Arkansas. The student is awarded the Bachelor of Art/Bachelor of Science degree by the partner university and the Bachelor of Science in an engineering discipline by the University of Arkansas. More information is available at www.engr.uark.edu/transfer

**Honors Program**

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research related careers that require considerable critical and original independent thinking. Admission requirements for the college’s Honors Program are as follows: entering freshmen must have at least a 3.5
high school GPA and at least a 28 composite score on the ACT or SAT equivalent; entering transfer students must have at least a 3.5 GPA on their transfer work. Students not initially qualifying for the Engineering Honors Program are eligible if they earn a 3.500 cumulative GPA at the University of Arkansas.

Students must formally apply for admission to the Honors Program by completing the online application. The application is available at http://honorscollege.uark.edu/195.php. Once accepted into the program, Honors students take a minimum of 12 hours of Honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To receive Latin honors distinction at graduation, a student must hold a cumulative GPA of 3.500 or better (for all course work, computed at graduation).

Deadlines related to the Honors Program are as follows:
1. A Honors Advising Form is to be completed prior to a student earning 100 semester hours.
2. Honors College Graduation Certification is to be completed prior to one week before the last day of classes of the student’s last semester.

All freshman enrolling in the College of Engineering may participate in an Eight-Semester Degree Completion Program (p. 74).

All students who want to pursue an engineering degree or a Bachelor of Science in Computer Science should follow the plan below for the first two semesters, at the end of which they may finish an eight-semester plan in Computer Science (p. 487) (B.S.) or choose from among any of the engineering fields: Biological Engineering (p. 480), Biomedical Engineering (p. 482), Chemical Engineering (p. 501), Civil Engineering (p. 484), Computer Engineering (p. 487), Electrical Engineering (p. 491), Industrial Engineering (p. 494), or Mechanical Engineering (p. 497).

### Specific University Core Requirements for Engineering Students

#### English
- ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
- ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
- MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)

#### Mathematics
- MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)

#### Science
- Engineering students are required to take two additional science courses with matching labs beyond the minimum 8 hours required by university core.
- CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
- PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034)

#### U.S. History or Government
- HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)
- HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) (Sp, Su, Fa)

#### Fine Arts
- 3 credits

#### Humanities
- 3 credits

#### Social Sciences
- 9 credits

### Biological and Agricultural Engineering (BAEG)

Lalit Verma  
Head of the Department  
203 Engineering Hall  
479-575-2351

Biological and Agricultural Engineering Website (https://bio-ag-engineering.uark.edu)

Healthy Planet, Healthy People: this is the aspiration for the Biological Engineering program at the University of Arkansas. We improve people’s lives today and help assure a prosperous world for tomorrow by designing sustainable water, food, and energy systems. Where challenges exist, we create solutions by optimizing the living systems of our world (the interactions of human, plant, animal, environment, food, and microbes) using the tools of engineering and biotechnology. Biological engineers contribute significantly to human health and prosperity by ensuring a safe and readily available water supply, a safe and nutritious food supply, and a healthy ecosystem upon which both water and food depend.

The educational objectives of the Biological Engineering program at the University of Arkansas are to produce graduates who:

1. Competently and ethically practice engineering in the design and management of water, food, energy and related systems.
2. Make valuable and life-long contributions that benefit employers, clients and communities in Arkansas and the world.
3. Succeed in continuing professional development, including graduate studies, as needed for professional growth.
A Bachelor of Science degree in Biological Engineering is a job-ready degree with opportunities in a variety of industries, government agencies, and consulting firms. It is also excellent preparation for graduate studies (M.S. or Ph.D.) in engineering and related fields, as well as entry into other professional schools (e.g., medical, veterinary, dental, pharmacy, etc.).

The B.S. in Biological Engineering degree can lead immediately to careers in:

- Ecological Engineering (water quality and watershed management, water resources and irrigation, low impact development in urban watersheds, stream and habitat restoration, and air quality remediation).
- Food and Bio-Product Process Engineering (food processing, forest products, biotechnology, biofuels, waste treatment and by-product utilization);
- Sustainable Resource Engineering (sustainable agriculture to expand the food supply for a growing population; renewable and bio-energy development; life cycle analysis to assess, design and manage complex biological systems; efficient utilization of organic residues and by-products; conservation of Earth's finite resources).

Requirements for B.S. in Biological Engineering

The undergraduate program in biological engineering, leading to a Bachelor of Science degree in Biological Engineering, is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org). The B.S. in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.

Diverse applications of biological engineering can be pursued through elective coursework. Each student is required to complete 12 semester hours of biological/engineering/technical electives that are relevant to their career goals. At least 3 hours must be selected from a list of acceptable biological electives. At least 3 hours must be engineering courses within BENG or other engineering programs. The remaining hours can be selected from engineering, math, biology, agriculture, sustainability, and other science/technical areas. A list of suggested electives is maintained by the department. Students may petition their adviser to seek approval of other electives that are not on this list. Courses must provide engineering or technical content that is value-added (i.e., not duplicating or remedial) and meet the career goals of the student.

Biological Engineering B.S.B.E.

Eight-Semester Degree Program

The Bachelor of Science in Biological Engineering program is eligible for students who want to participate in an Eight Semester Degree Program. See the Eight-Semester Degree Policy (p. 74) for more details. The plan below lists a semester-by-semester sequence of courses to finish the degree in eight semesters. University core courses for engineering are listed at the bottom of this page. Students may submit a maximum of four (4) hours of “D” in BENG Courses for their degree.

Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course pre-requisites.

Technical Elective

Total Units in Sequence: 128

The Freshman Engineering Science Elective must be chosen from either CHEM 1123/CHEM 1121L or PHYS 2074.

The Sophomore Science Elective must be: PHYS 2074 if CHEM 1123/CHEM 1121L was chosen as the Freshman Engineering Science Elective; or CHEM 1123/CHEM 1121L if PHYS 2074 was chosen as the Freshman Engineering Science Elective. That is, both courses are required for the degree.

Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, 1986.
Haggard, Brian Edward, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, 2006.
Henry, Christopher Garrett, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Assistant Professor, 2011.
Kim, Jin-Woo, Ph.D. (Texas A&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of Iowa), Professor, 2001.

• Being aware of the limits of their knowledge and initiate self-directed learning to create future professional opportunities for themselves in biomedical engineering.

Biomedical Engineering Website (http://biomedical-engineering.eark.edu)

Biomedical engineering encompasses the creation, design, and operation, of processes / technology related to the broad field of human healthcare. The profession traditionally has focused on applications related to the development of instrumentation and diagnostic equipment, discovery of novel treatment options, production of new therapeutics, and the elucidation of underlying biophysical phenomena. Newer applications of bioengineering take advantage of the ever deepening understanding of human physiology and molecular genetics, as related to prevention, detection, and treatment of medical conditions. The program objectives of the Biomedical Engineering undergraduate program are to produce graduates who are capable of:

• Succeeding in practice at the interface between life science and engineering, in other professional activities, or in post-baccalaureate studies, and

• Utilizing their engineering education/experience in creating new knowledge or enabling technologies for improvement of human health and healthcare, and

• Conducting themselves with high standards of professional ethics and integrity, and

• Being aware of the limits of their knowledge and initiate self-directed learning to create future professional opportunities for themselves in biomedical engineering.

Completion of the degree requirements provides for the following educational outcomes:
• An ability to apply knowledge of mathematics, science, and engineering
• An ability to design and conduct experiments, as well as to analyze and interpret data
• An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
• An ability to function on multidisciplinary teams
• An ability to identify, formulate, and solve engineering problems
• An understanding of professional and ethical responsibility
• An ability to communicate effectively
• The broad education necessary to understand the impact of engineering solutions in global, economic, environmental, and societal contexts
• A recognition of the need for, and an ability to engage in life-long learning
• A knowledge of contemporary issues
• An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

These educational outcomes are experienced within the context of biology and physiology appropriate to solving problems at the interface of engineering and biology.

Requirements for B.S. in Biomedical Engineering
Technical Options in Biomedical Engineering
Each student in biomedical engineering is required to complete nine semester hours of biomedical engineering technical electives. Biomedical engineering technical elective courses must be selected from a faculty-approved list of courses found in the department's Undergraduate Advising Handbook, which is available on the department's website (http://biomedical-engineering.uark.edu). Elective courses are chosen with the aid of an academic adviser to better prepare for employment or further study in areas such as:

• Bioengineering
• Pharmaceutical manufacturing or pharmacology
• Biomedical device design
• Medicine
• Business
• Law

Technical Elective Course
Each student in biomedical engineering is required to complete three semester hours of upper level science electives. Upper level (3000 and above) science electives will be chosen from courses in mathematics, engineering, and the sciences with the approval of their adviser. The department maintains a list of approved upper level science electives that may be found in the department's Undergraduate Advising Handbook, which is available on the department's website (http://biomedical-engineering.uark.edu).

Biomedical Engineering B.S.Bm.E.
Eight-Semester Degree Program
The following section contains the list of courses required for the Bachelor of Science in Biomedical Engineering degree and a suggested sequence for students who enter the College through the Freshman Engineering Program. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

### Honors Program Requirements

Students enrolled in the Honors College who are to receive the Bachelor of Science in Biomedical Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Biomedical Engineering program including at least 3 hours resulting in an Honors Thesis. The BMEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses.

**Balachandran, Kartik**, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Assistant Professor, 2012.

**Jensen, Morten O.**, Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, 2014.

**Jensen, Hanna Katarina**, Ph.D. (University of Oulu, Finland), Research Assistant Professor, 2015.

**Kim, Myunghee Michelle**, Ph.D., B.S. (University of Texas at Austin), Clinical Assistant Professor, 2013.

**Muldoon, Timothy J.**, M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Assistant Professor, 2012.

**Puvanakrishnan, Priyaveena**, Ph.D. (University of Texas at Austin), Instructor, 2015.

**Qian, Xianghong**, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, 2011.

**Quinn, Kyle P.**, Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, 2014.

**Rajaram, Narasimhan**, Ph.D. (University of Texas, Austin), B.E. (Birla Institute of Technology and Sciences, India), Professor, 2016.

**Rao, Raj R.**, Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, 2011.

**Wolchok, Jeffrey Collins**, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, 2011.

### Civil Engineering (CVEG)

Micah Hale  
Head of the Department  
4190 Bell Engineering Center  
479-575-4954

Department of Civil Engineering Website (https://civil-engineering.uark.edu)

Civil engineering is the oldest of all the engineering fields, yet it is as contemporary as the need to provide solutions to today's environmental, structural, and transportation problems. The civil engineer plans, designs, builds, and operates projects for the advancement and well-being of society while coordinating and conserving human and natural resources. Civil engineering projects range from small to monumental and include public water systems, buildings, bridges, rail and highway networks, water and wastewater treatment plants, solid and hazardous waste disposal facilities, airports, and soil conservation and flood diversion controls.

The civil engineering profession offers a vast array of opportunities. Civil engineers may work in private employment or with public agencies. They may work indoors in activities such as planning and design, or outdoors in areas such as construction supervision. Employment is possible anywhere in the world.
The objective of the Civil Engineering undergraduate program is to produce graduates who are prepared to pursue:

- careers in the broad field of Civil Engineering
- licensure as a Professional Engineer
- advanced education

To fulfill this objective, all students must take courses in geotechnical, environmental, transportation, and structural engineering. Courses are designed to present “real world” applications without sacrificing conceptual and theoretical basics. Students complete design problems in each of these areas; and, as part of the senior year, they participate in two major design projects.

Requirements for B.S. in Civil Engineering Elective Courses

Students must select three 3-hour civil engineering elective courses in conference with their adviser. Normally, the civil engineering courses are selected from among the 4000-level elective CVEG courses. Exceptional students may be allowed to choose from the 5000 (graduate-level) course series.

Students must also choose one elective course in science, engineering, technology, or math (STEM) field.

Humanities and social science electives are selected from courses approved by the university which satisfy the University Core general education requirement. Lists of approved electives are on file in the department office.

Civil Engineering Design Electives

Students must complete two of the following four CVEG design project electives: CVEG 4812 Environmental Design Project, CVEG 4822 Geotechnical Design Project, CVEG 4832 Structural Design Project, and CVEG 4842 Transportation Design Project. Each design project elective is associated with a specific design-oriented course. The associated course must be taken at the same time as the design project elective. The associated courses may be taken alone but the design electives cannot.

STEM Electives

Students must also choose one elective course in science, engineering, technology, or math (STEM) from among the following:

- CSCE 2004 Programming Foundations I
- ELEG 3903 Electric Circuits and Machines
- GNEG 3113 Special Topics-Study Abroad
- GNEG 3811 Alternating Cooperative Education (must get 3 separate rotations)
- MEEG 2013 Dynamics
- MEEG 2403 Thermodynamics
- MEEG 2703 Computer Methods in Mechanical Engineering
- GEOS 3023 Introduction to Cartography
- GEOS 3543 Geospatial Applications and Information Science
- GEOS 4533 Introduction to Petroleum Geophysics
- MATH 3083 Linear Algebra
- MATH 4363 Numerical Analysis

Any 3000-level or above science, technology, engineering or math course. (It is recommended that students consult with their adviser when making this selection.)

Civil Engineering B.S.C.E.
Eight-Semester Degree Program

The Civil Engineering B.S.C.E. program is eligible for freshman students who want to participate in an Eight-Semester Degree Program. See the Eight-Semester Degree Policy (p. 74) for details of the program.

The following section contains the list of courses required for the Bachelor of Science in Civil Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

See the list of university core courses (p. 84) available for engineering students.

### Third Year

**Honors Program Requirements**

Students enrolled in the Honors College who are to receive the Bachelor of Science in Civil Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Civil Engineering program including at least 3 hours resulting in an Honors Thesis. The CVEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses.

The following Civil Engineering courses are offered for honors credit: CVEG 491VH Honors Studies in Geotechnical Engineering, CVEG 492VH Honors Studies in Environmental Engineering, CVEG 493VH Honors Studies in Structural Engineering, CVEG 494VH Honors Studies in Transportation Engineering, and CVEG 4983H Honors Undergraduate Thesis.

### Fourth Year

**Honors Program Requirements**

Students enrolled in the Honors College who are to receive the Bachelor of Science in Civil Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Civil Engineering program including at least 3 hours resulting in an Honors Thesis. The CVEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses.

The following Civil Engineering courses are offered for honors credit: CVEG 491VH Honors Studies in Geotechnical Engineering, CVEG 492VH Honors Studies in Environmental Engineering, CVEG 493VH Honors Studies in Structural Engineering, CVEG 494VH Honors Studies in Transportation Engineering, and CVEG 4983H Honors Undergraduate Thesis.

### Bernhardt, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A&M University), Assistant Professor, 2013.

### Brahm, Andrew F., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Assistant Professor, 2010.

### Coffman, Rick, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Associate Professor, 2009.

### Dennis, Norman D., Ph.D. (University of Texas at Austin), M.B.A. (Boston University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, 1996.

### Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (University of New Mexico State University), Associate Professor, 1999.

### Fairey, Julian, Ph.D. (Texas A&M University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, 1999.

### Fleck, Mary, Ph.D. (University of Arkansas), Instructor, 2014.

### Fornstrom, Eric, Ph.D. (University of Arkansas), Instructor, 2014.

### Gattis, J. L., Ph.D. (Texas A&M University), M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Texas at Austin), B.S. (University of Alberta, Canada), Associate Professor, 2008.

### Hall, Kevin D., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, 1993.

### Hall, Morrie E., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, 1993.

### Hernandez, Sarah, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Assistant Professor, 2015.

### Heymsfield, Ernie, Ph.D. (City College of New York), M.S.C.E. (Polytechnic University), Associate Professor, 2001.

### Johnson, Michael, M.S.C.E. (University of Pittsburgh), B.S.C.E. (University of Arkansas), Professor, 1993.

### Hale, Micah, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, 2002.

### Prinz, Gary S., Ph.D. (Brigham Young University), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, 2014.

### Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, 1986.

### Williams, Stacy Goad, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, 1997.

### Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, 1998.

### Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Assistant Professor, 2013.

### Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, 2011.

---

* See the elective list among the program requirements.
Computer Science and Computer Engineering (CSCE)

Xiaoqing “Frank” Liu  
Head of the Department  
504 J.B. Hunt Center for Academic Excellence  
479-575-6197

Department of Computer Science and Computer Engineering Website (https://computer-science-and-computer-engineering.uark.edu)

The faculty of the Computer Science and Computer Engineering Department is engaged in multidisciplinary academic research, course offerings, and student projects in areas such as: networking, data security, low power chip design, Web search, embedded systems, and graphics.

The educational objectives of the department are to produce graduates who are recruited in a competitive market and make valuable contributions to a wide variety of industries, particularly in computer and information technology; succeed in graduate or professional studies; pursue life-long learning and continued professional development; and undertake leadership roles in their profession, in their communities, and in the global society.

Accreditations

The B.S. in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET (www.ABET.org). The B.S. in Computer Science is accredited by the Computing Accreditation Commission of ABET (www.ABET.org (http://www.abet.org))

Requirements for B.S. in Computer Engineering

The computer engineering degree has required sequences of courses in both hardware and software aspects of computer applications and design. Since almost all of today’s complex systems encompass hardware and software elements, computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with open-ended problems with opportunities for research and design.

Humanities and social science electives are selected from the University Core Requirements listed in the Catalog of Studies. To satisfy the University Core, all CSCE students are required to take the following 18 hours of humanities/social science courses:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
<tr>
<td>Social Science</td>
<td>9</td>
</tr>
</tbody>
</table>

The Undergraduate Handbook has a list of approved basic science, mathematics, and technical electives. Any course not included in these lists requires faculty approval.

The Bachelor of Arts in Computer Science degree has the same educational objectives as the Bachelor of Science degree. However, the course requirements differ greatly to allow students to double major or pursue other interests.

Degree Program Changes

Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in the curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

Computer Engineering B.S.Cmp.E. Eight-Semester Degree Program

The following sections contain the list of courses required for the Bachelor of Science in Computer Engineering (B.S.Cmp.E.) with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

# Requirements for B.S.C.S. in Computer Science

A degree in computer science provides a wide variety of career choices. Computer science graduates can design, implement, or manage computer systems, as well as adapt computers to new applications. Computer science core courses include the fundamentals of programming concepts, data structures, operating systems, algorithms, formal languages, and database management systems.

The Bachelor of Science programs in Computer Engineering and Computer Science culminate in a capstone project completed in two consecutive semesters. In the first semester, students form teams and develop a project proposal. In the second semester, students develop, implement, and present the final project.

Humanities and social science electives are selected from the University Core Requirements listed in the Catalog of Studies. To satisfy the University Core, all CSCE students are required to take the following 18 hours of humanities/social science courses:

- **PHIL 3103** Ethics and the Professions
- Fine Arts From Category “A”
- U.S. History or Government

# Social Science

The Undergraduate Handbook has a list of approved basic science, mathematics, and technical electives. Any course not included in these lists requires faculty approval.

### Degree Program Changes

Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in the curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

### Computer Science B.S.C.S. Eight-Semester Degree Program

### Computer Science B.A. Eight-Semester Degree Program

The following sections contain the list of courses required for the Bachelor of Arts in Computer Science (B.A.) degrees with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

Total Units in Sequence: 120

Requirements for a Minor in Computer Science:

- CSCE 2004 Programming Foundations I 4
- CSCE 2014 Programming Foundations II 4
- CSCE 3193 Programming Paradigms 3
- Three additional CSCE courses numbered above 2000. 9
Total Hours 20

Requirements for Departmental Honors in Computer Science and Computer Engineering

The Honors Program in Computer Science and Computer Engineering is designed for the superior student and is intended to help the student develop a more comprehensive view of Computer Science and Computer Engineering. The program provides a vehicle for the recognition of achievements beyond the usual course of study. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate’s whole program of honors studies. A minimum of 12 hours of honors coursework is required.

The following requirements are necessary for graduation with honors in either the Computer Engineering or Computer Science Bachelor of Science program:

1. The candidate must satisfy the requirements set forth by the College of Engineering.
2. The student must obtain at least a 3.50 grade-point average in required Computer Engineering and/or Computer Science courses.
3. The student must complete 6 hours of Honors credit in the major, which includes 3 hours of Honors Thesis taken as successive semesters of CSCE 491VH and 3 hours of CSCE coursework.

- Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, 2008.
- Beavers, M. Gordon, Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Texas at Austin), Associate Professor, 1999.
- Bobda, Christophe, Ph.D., M.S. (University of Paderborn, Germany), B.S. (University of Yaounde, Cameroon), Professor, 2010.
- Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, 2004.
- Gashler, Michael S., Ph.D., M.S., B.S. (Brigham Young University), Assistant Professor, 2012.
- Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, 2007.
- Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, 2008.
- Huang, Miaoping, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, 2010.
- Li, Wing Ning, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, 1989.
- Li, Qingshu, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi’an Jiaotong University), Assistant Professor, 2013.
- Liu, Xiaoming Frank, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, 2015.
- Moustafa, Rida, Ph.D., M.S. (George Mason University), B.S. (Zagazig University, Egypt), Visiting Lecturer, 2015.
- Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, 2017.
- Panda, Brajendra Nath, Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, 1999.
- Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, 1990.
- Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, 2012.
- Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, 2017.
- Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, 2000.
- Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, 2014.

Data Analytics (DATA)

A minor in Data Analytics is offered through the Department of Industrial Engineering in the College of Engineering.
Information technology, manufacturing, marketing, recreation, renewable energy resources, outer space and underwater exploration, transportation, and many others. As a result, electrical engineering is the largest of all scientific disciplines and assures a continuing demand for electrical engineering graduates throughout private industry and government.

The University of Arkansas, the state land-grant university, is a nationally competitive, student-centered, research university serving Arkansas and the world. As such, the department’s mission is education, research, and service. Hence, the electrical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that results in graduates qualified and prepared to meet the demands of a professional career in the present and future work places as well as to assume a responsible role of leadership in a complex technological society.

The department also actively participates in the Honors Program to challenge superior students with a more in-depth academic program and research experience. The Honors program enables students to work more closely with faculty members and other students in a team environment. Please see the requirements given below.

The educational mission of the department is conducted through both the undergraduate and graduate programs.

**Graduate Program in Electrical Engineering**

The graduate program offers a Master of Science degree in Electrical Engineering (on campus and online) and a Doctor of Philosophy degree in Engineering. The graduate program provides additional instruction and hands-on experience beyond the undergraduate level, and produces graduates who are prepared to promptly address critical issues and assume advanced positions in the profession, including management, design, teaching, research and development.

The research mission of the department is conducted mainly through the graduate program. Internal and external funded research projects serve to:

1. Discover new knowledge, address technical problems, and develop new electrical/electronic technologies;
2. Provide the tools and resources which keep the faculty at the cutting edge of electrical engineering;
3. Provide financial support for graduate students and gifted undergraduate students; and
4. Improve the quality of life for citizens of Arkansas and the world.

The graduate program supports the undergraduate program by giving top undergraduate students access to research laboratories with state-of-the-art equipment and software. Topics covered in graduate courses often migrate into senior undergraduate technical elective courses and eventually into required undergraduate courses.

**Departmental Service Mission**

Faculty, administrators, and staff work to provide the education necessary to establish the best foundation for electrical engineering students at all degree levels, and prepare them to be competitive local and national leaders, skillful at undertaking the current and future challenges facing our world. Everyone is encouraged to provide services to both the community and the profession. Hence, they are active in local,
state, national, and international professional and service organizations, as well as public and private schools involving grades K-12.

Degree Program Changes
A student must meet all requirements of the degree program and is expected to stay informed concerning current regulations, policies, and program requirements in a chosen field of study. Changes made in the electrical engineering curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not normally required for that student. Students should consult their adviser for additional information.

Potential Minors
Although ELEG students can pursue any minor they desire, there are several minors that require a minimal number of extra courses, such as Computer Science, Mathematics, Microelectronics-Photonics, Physics, etc. Students are advised to review the specific rules pertaining to the minor of interest in the section of the UA Catalog of Studies corresponding to the department granting that minor.

Undergraduate Program in Electrical Engineering
The educational objectives for the undergraduate program, which leads to a Bachelor of Science degree in electrical engineering, are to produce graduates who:

1. Are recruited in a competitive market and valued as reliable and competent employees by a wide variety of industries, in particular, electrical and computer engineering industries;
2. Succeed, if pursued, in graduate studies such as engineering, science, law, medicine, business, and other professions;
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career; and
4. Accept responsibility for leadership roles in their profession, in their communities, and in the global society.

Therefore, the electrical engineering curriculum is designed to provide students with knowledge of scientific principles and methods of engineering analysis to form a solid foundation for a career in design, research and development, manufacturing and processing, measurement and characterization, or management. Students progressively build their design experience throughout the curriculum and demonstrate this ability in the senior electrical engineering design laboratories. The curriculum also introduces students to subjects in the humanities, social sciences, and ethics so they may better understand the interaction of technology and society.

The electrical engineering curriculum is divided into three phases. The first year concentrates on the development of a sound understanding of basic sciences and mathematics. The second and third years further develop scientific principles and cover the basic core of electrical engineering. The fourth year is composed primarily of senior-level elective courses. At this time, the students in consultation with their advisers may choose classes related to one or more of the major areas of electrical engineering detailed (e.g., analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics, nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy and power). This final year permits the student to tailor a program suited to her or his individual career objectives. The graduation requirement in electrical engineering is 125 semester hours as given below.

Recommended Technical Studies
Students in electrical engineering are required to complete 21 semester hours of technical electives of which a minimum of 9 semester hours must be 4000- or 5000-level electrical engineering elective courses. A student may select the remaining 12 semester hours from 4000- or 5000-level electrical engineering elective courses or upper-division technical courses in mathematics, engineering, and the sciences with the approval of an adviser. One of these courses may be an approved Math/Science Elective and another may be an approved Engineering Science Elective. History and social science courses taught by Math and Science departments are not eligible for technical elective credit. Not more than 6 semester hours total of ELEG 488V and ELEG 400VH may be credited toward technical electives. Students who have taken full-time co-op experiences under GNEG 3811, and whose grades in these courses were A or B, may get credit for not more than three hours of non-ELEG technical electives if the work performed is of comparable quality to a technical elective; consult with the Department Co-op Coordinator. Descriptions of all electrical engineering courses are in the Course Descriptions chapter of this Catalog of Studies. The schedule of technical electives offered in a given semester is determined the previous semester since the selection depends on a number of varying factors such as student interest in a particular topic, the importance of a particular technology for the student's professional career, and teaching faculty availability.

Electrical Engineering B.S.E.E. Eight-Semester Degree Program
The following section contains the list of courses required for the Bachelor of Science in Electrical Engineering and a suggested eight-semester sequence. See the Eight-Semester Degree Policy (p. 74) for more details. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

**Total Units in Sequence:** 125

---

- Freshman Science Elective - CHEM 1123/CHEM 1121L University Chemistry II or PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture)
- If CHEM 1123/CHEM 1121L University Chemistry II was taken for Freshman Science Elective, then PHYS 2074 University Physics II was taken for the Freshman Science Elective, then CHEM 1123/CHEM 1121 University Chemistry II or BIOL 1543/BIOL 1541L Principles of Biology or BIOL 2213/BIOL 2211L Human Physiology, PHYS 2094 University Physics III
- Engineering Science/Technical Elective: MEEG 2103 Introduction to Machine Analysis (Sp, Su), MEEG 2303 Introduction to Materials (Sp, Fa), MEEG 2403 Thermodynamics (Sp, Su, Fa), CHEG 2313 Thermodynamics of Single-Component Systems, INEG 2413 Engineering Economic Analysis (Sp, Fa), or another Technical Elective
- CSCE 4114, CSCE 4613, CSCE 4233 are approved ELEG Technical Electives for students pursuing a dual ELEG / CSCE undergraduate degree.

Students should become very familiar with the Academic Regulations chapter for university requirements that apply to the electrical engineering program as well as the College of Engineering requirements (in particular the “D rule” and the “Transfer of Credit” for courses taken at another institution). In addition to these graduation requirements, candidates for an electrical engineering degree must have earned a grade-point average of no less than 2.00 on all ELEG courses.

### Electrical Engineering Honors Program

To graduate with Honors in electrical engineering, students must be a member of the Honors College, have a minimum cumulative GPA of 3.50, and complete a minimum of 12 hours of honors credit of which 6 hours must be Electrical Engineering Honors courses that include the following: ELEG 4063H Honors Electrical Engineering Design I, ELEG 4071H Honors Electrical Engineering Design II, and ELEG 400VH Honors Senior Thesis. Special problems credit hours (ELEG 488V) will not be counted in the requirement for graduation with Honors in Electrical Engineering.

### Electrical Engineering Honors Courses:

- ELEG 3124H, ELEG 3143H, ELEG 3214H, ELEG 3224H, ELEG 3304H, ELEG 3704H, ELEG 3924H: Required ELEG junior courses with Honors section (all junior required courses include honors sections).
- ELEG 4061H Honors Electrical Engineering Design I (Sp, Fa)
- ELEG 4073H Honors Electrical Engineering Design II
- ELEG 400VH Honors Senior Thesis (Sp, Su, Fa)
- ELEG 4203H, ELEG 4233H, ELEG 4403H, ELEG 4503H, ELEG 4703H, ELEG 4783H, ELEG 4914H, ELEG 4963H: ELEG technical elective courses that have an Honors section (Please check the offering of these Honors Sections for a particular semester).
- ELEG 5000 or above: Any graduate level course.
Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E.E. (University of Arkansas), Professor, 1988.
Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, 1989.
Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, 2015.

Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, 1998.
Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, 1990.
McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, 2003.
Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, 1985.
Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, 2012.
Spiesshoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2014.
Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, 2005.
Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, 2008.
Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, 2008.
Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, 2015.

Industrial Engineering (INEG)

Ed Pohl
Head of the Department
4207 Bell Engineering Center
479-575-3156

Industrial Engineering Website (http://www.ineg.uark.edu)

The mission of the industrial engineering department at the University of Arkansas is to be a nationally competitive, student-centered industrial engineering program serving Arkansas and the world through undergraduate and graduate studies and leading-edge research programs.

Industrial engineers are concerned with improving organized activity. The physical arrangement of people, equipment, and material significantly influences the effectiveness of any organization – whether the organization is industrial, governmental, or commercial.

Today’s industrial engineers develop applications of new processing automation and control technology; install data processing systems, performance measures and standards, job evaluation and wage and salary programs; research new products and product applications; devise ways to improve productivity through application of technology and human factors; select operating processes and methods to accomplish a given task using proper tools and equipment; design facilities, management systems, operations procedures, storage systems; improve allocation of resources, planning and control systems for distribution of goods and services, production, inventory, quality and plant maintenance; enhance plant environment and the quality of working life; evaluate reliability and quality performance; implement office systems, procedures, and policies; analyze complex business problems through operations research; conduct long-range organization studies, plant location surveys, system effectiveness studies; and study potential markets for goods and services, raw material sources, labor supply, energy resources, financing and taxes.

Industrial engineers integrate engineering skills with mathematics and computer science tools, providing systematic ways to maximize productivity and quality while minimizing time and cost.

The goal of the Industrial Engineering Undergraduate Program at the University of Arkansas is to prepare men and women for professional careers and graduate studies in Industrial Engineering. We provide a foundation in mathematics, science, humanities and social sciences, engineering science, and engineering design to produce Industrial Engineers with the intellectual, technical, and professional competence to develop, implement, and manage industrial engineering solutions to complex problems in industry, government, and society.

The program’s objectives have been developed to address the needs of the industrial engineering constituencies and to be consistent with and supportive of the department’s mission and programmatic goals. The IE program educational objectives represent and describe the expected accomplishments of graduates resulting from participation within the program within the first few years after graduation. The program’s objectives have been developed to address the needs of departmental constituencies and to be consistent with and support the mission and programmatic goals.

Within 3-5 years of graduation, graduates of the U of A undergraduate program in industrial engineering will have:

1. Successfully applied core industrial engineering knowledge and skills for industrial or public sector organizations.
2. Successfully pursued advanced professional degrees, graduate studies in industrial engineering, professional training, or engineering certification.
3. Demonstrated professional and intellectual growth as managers and leaders in industrial engineering, society, and their communities.

Requirements for B.S. in Industrial Engineering

The total graduation requirement in industrial engineering is 126 hours. For further information please visit the departmental website (http://www.ineg.uark.edu).

Technical Electives

The purpose of technical electives is to provide students with the opportunity to expand their education within a particular area of interest. The approved list of technical electives is available in the industrial engineering department. At least 12 hours must be selected from INEG courses.
Humanities/Social Science Electives
Although any elective included on the approved University Core humanities/social science list may be selected, PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103) is recommended for industrial engineers.

Science Electives
The approved list of science electives is available in the industrial engineering departmental office.

Technical Elective Requirements
Each student is responsible for his or her technical elective program. Students may seek specific advice on technical elective selections from their advisor. Courses satisfying technical elective requirements cannot fulfill more than one industrial engineering degree requirement.

A minimum of 18 credit hours from the approved technical elective course list must be taken to satisfy technical elective requirements within the Industrial Engineering program. At least 12 of these 18 credit hours must be chosen from INEG courses. No more than 3 of these credits may be based in individual/independent study, no more than 3 of these credits may be based in honors thesis, and no more than 3 of these credits may be based in cooperative education.

Approved Technical Elective Course List
1. Any BENG, BIOL, BMEG, CHEG, CHEM, CVEG, CSCE, ELEG, GNEG, INEG, MATH, MEEG, and PHYS course that is at the 3000 level or above and not required for the BSIE is approved. Exceptions are:
   a. GNEG 3801 is not approved.
   b. GNEG 3811 is approved only if the student has completed at least three semesters of GNEG 3811.
   c. CVEG 4513 is not approved if the student is also seeking technical elective credit for INEG 4443.
   d. MATH 3133 is not approved.
   e. PHYS 3603, PHYS 4103, and PHYS 4203 are not approved.
2. Courses at the 3000 level or above that are explicitly listed (not part of a blanket statement like “… 3000-to-4000-level …”) in the Catalog of Studies under Minors for Non-Business Students (p. 420) are approved. Exceptions are:
   a. ISYS 3393 is not approved if the student is also seeking technical elective credit for INEG 4683.
3. Courses at the 3000 level or above that are explicitly listed on the Sustainability Minor Courses website (http://sustainability.uark.edu/academics/minor) under Natural, Managed, or Built Systems are approved.
4. Additional approved courses are CSCE 2014, EXSC 3153, and EXSC 353.

Industrial Engineering B.S.I.E.
Eight-Semester Degree Program
The following section contains the list of courses required for the Bachelor of Science in Industrial Engineering degree and a suggested sequence.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

At least 12 hours of technical electives must be selected from INEG courses.

Total Units in Sequence: 126

Cassady, Richard, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, 2000.
Chaovailitwongse, Wanpracha Art, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, 2016.
Chimka, Justin Robert, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, 2002.
Geunes, Joseph Patrick, Ph.D., M.B.A. (Pennsylvania State University), B.S.E.E. (Drexel University), Professor, 2016.
Liao, Hai Tao, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, 2015.
Liu, Xiao, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, 2017.
Milburn, Ashlea R., Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Assistant Professor, 2010.
Needy, Kim LaScola, Ph.D. (Wichita State University), P.E., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, 2008.
Nurre, Sarah, Ph.D., M.Eng., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, 2015.
Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, 2013.
Piersen, Harry A., Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, 2014.
Pohl, Letitia, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, 2013.
Rainwater, Chase E., Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Associate Professor, 2009.
Rossetti, Manuel D., Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, 1999.
Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, 2012.
White, John A., Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytech Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, 1997.
Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, 2011.

Mechanical Engineering (MEEG)

Department of Mechanical Engineering Website (http://mechanical-engineering.uark.edu)

The mechanical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that results in graduates who are qualified and prepared to meet the demands of a professional career in the present and future work place and be able to assume a responsible place of leadership in a complex technological society.

The mission of the department is three-fold:

- Teaching — To provide a high-quality educational experience for undergraduate and graduate students that enables them to become leaders in their chosen professions.
- Research — To create, explore, and develop innovations in engineering and science through undergraduate and graduate research.
- Service — To provide beneficial service to the local, state, national, and international industries and communities via educational, technical, entrepreneurial, and professional activities.

The courses offered in mechanical engineering provide the student with a broad understanding of fundamental scientific principles that serve as a background for many fields of specialization. The undergraduate curriculum is designed to stress basic engineering principles and to assist in developing creative thinking. Emphasis is placed on the science and art of designing machines and systems, of converting energy into useful forms, and developing a basic understanding of engineering mechanics. The undergraduate program leads to a Bachelor of Science degree in Mechanical Engineering; its educational objectives are to produce graduates who:

1. Effectively analyze and design mechanical systems and energy systems;
2. Contribute to the economic development of Arkansas and the world through the practice of mechanical engineering;
3. Meet or exceed the needs and expectations of mechanical engineering employers in industry, government, and private practice;
4. Engage in professional activities that promote the mechanical engineering profession and provide continuing self-development, and
5. Succeed in graduate study and research, if pursued.

Requirements for B.S. in Mechanical Engineering

Requirements for the B.S.M.E.: The Bachelor of Science in Mechanical Engineering curriculum includes, in addition to the required 18 hours of history, government, fine arts/humanities/social science elective courses, a total of 12 hours of technical and science electives. A student must select all electives with the approval of his or her adviser. The fine arts/humanities/social science electives must be selected from the University Core (p. 84) in the Academic Regulations chapter for university requirements for the program. It is expected that technical and science electives will be chosen to provide a coherent program within one or more areas of specialization or options available to mechanical engineers. Traditional areas of specialization are available in mechanical systems, materials, and energy systems. Other areas include pre-medical, management, and aerospace.

The first-year curriculum is essentially the same as prescribed for all engineering freshmen. Students entering the mechanical engineering program are required to take two, four hour laboratory based science electives. One of the four hour science electives must be PHYS 2074. The other four hour science elective must be chosen from one of the following:

ASTR 2003 & ASTR 2001L Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture)

& Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab)

BIOL 1543 & BIOL 1541L Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)

& Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)

BIOL 2213 & BIOL 2211L Human Physiology (ACTS Equivalency = BIOL 2414 Lecture)

& Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)

CHEM 1103 & CHEM 1101L University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)

& University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

GEOS 1113 & GEOS 1111L General Geology (ACTS Equivalency = GEOL 1114 Lecture)

& General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)

PHYS 2094 University Physics III

PHYS 3544 Optics

PHYS 3603 & PHYS 360VL Introduction to Modern Physics

and Modern Physics Laboratory
Fine Arts/Humanities/Social Science Electives
Students must follow the University Core curriculum in selecting their history, government, fine arts, humanities, and social science electives. Each student in the College of Engineering is required to complete 18 semester hours in the humanities and social sciences.

The courses taken must include:

- HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)
- or HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) (Sp, Su, Fa)
- or PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)
- ECON 2143 Basic Economics: Theory and Practice
  - or ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
- PHIL 3103 Ethics and the Professions

The remaining three courses must be selected from an approved list. The humanities and social science chart from the University Core (p. 84) page should be used as a guide for selecting these courses.

Mechanical Engineering Concentration Electives
The purpose of technical/science electives is to provide students with the opportunity to expand their education along lines of particular interest to them.

As part of the mechanical engineering curriculum, students are required to complete 12 hours of technical/science electives. These electives can be categorized into three groups: Mechanical Engineering Electives, Other Engineering Electives, and Science-Math Electives.

1. Mechanical Engineering Electives. All mechanical engineering courses at or above the 4000 level not already required in the BSME curriculum are acceptable. Special Project courses, MEEG 491V, are allowed as electives only after approval in advance by the department head.

2. Other Engineering Electives. The rules governing the selection of engineering electives are:
   - Engineering or Computer Science/Computer Engineering courses at or above the 3000 level not already required in the BSME curriculum are allowed as technical-science electives. Courses with content remedial to required courses are not allowed, and courses considered redundant to required courses are not allowed.

3. Science-Math Electives. The approved list of science and math courses accepted as technical-science electives is available in the Mechanical Engineering department office.

Mechanical Engineering B.S.M.E.
Eight-Semester Degree Program
The following section contains the list of courses required for the Bachelor of Science in Mechanical Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students interested in obtaining a sequencing schedule of courses may contact the Mechanical Engineering office.

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program.

Either the science elective in the second semester of Year 1 or the science elective in the first semester of Year 2 must include PHYS 2074. Other science electives should be chosen from an approved list. See the mechanical engineering office.

Year Total: 15 15
The first-year curriculum is essentially the same as prescribed for all engineering freshmen. Students entering the mechanical engineering program are required to take two, four hour laboratory based science electives. One of the four hour science electives must be PHYS 2074. The other four hour science elective must be chosen from one of the following:

- ASTR 2003 Survey of the Universe (ACTS Equivalency = 4 units)
- BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) 4 units
- CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) 4 units
- ECON 2143 Principles of Macroeconomics (ACTS Equivalency = ECON 2103) 3 units
- PHIL 3103 Ethics and the Professions 3 units

**Fine Arts/Humanities/Social Science Electives**

Students must follow the University Core curriculum in selecting their history, government, fine arts, humanities, and social science electives. Each student in the College of Engineering is required to complete 18 semester hours in the humanities and social sciences.

The courses taken must include:

- HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113) 3 units
- or HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) (Sp, Su, Fa) 3 units
- or PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003) 3 units
- ECON 2143 Basic Economics: Theory and Practice 3 units
- or ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103) 3 units
- PHIL 3103 Ethics and the Professions 3 units

The remaining three courses must be selected from an approved list. The humanities and social sciences chart from the University Core page should be used as a guide for selecting these courses.

**Requirements for Aerospace Concentration**

The Aerospace Concentration in Mechanical Engineering provides students an opportunity to concentrate on engineering and scientific issues associated with aircraft, spacecraft, and space exploration. The Aerospace Concentration consists of the 112-credit hour Mechanical Engineering B.S. core and 12 hours of specified elective courses.
Choose at least two of the following courses: 6

- MEEG 4503 Introduction to Flight (Fa)
- MEEG 4523 Astronautics (Irregular)
- MEEG 4433 Aerospace Propulsion (Irregular)
- MEEG 5503 Advanced Fluid Dynamics I
- MEEG 5533 Fundamentals of Aerodynamics

Choose an additional 6 hours from any of the above courses not yet taken or any following technical elective: 6

- MEEG 4903H Honors Mechanical Engineering Research
- MEEG 491V Special Topics in Mechanical Engineering
- MEEG 492V Individual Study in Mechanical Engineering
- ASTR 4033 Astrophysics I: Stars and Planetary Systems
- ASTR 4043 Astrophysics II: Galaxies and the Large-Scale Universe
- GEOS 4413 Principles of Remote Sensing
- SPAC 5033 Stars and Planetary Systems

Ralph E. Martin  
Department of Chemical Engineering Website (https://chemical-engineering.uark.edu)

Chemical engineering deals with the creation, design, operation, and optimization of processes that derive practical benefits from chemical or physical changes principally involving chemical and biochemical reactions. The profession is quite broad and has traditionally provided the technology for: supplying energy and fuel; synthesizing materials such as plastics, chemicals, fertilizers, and pharmaceuticals; and managing environmental and safety concerns of physical and chemical processes. Some new applications of the principles of chemical engineering at nanoscales are being made in sustainable energy production and detection of gene mutations, protein configurations, and virus serotypes as well as thermal destruction of cancer cells.

Chemical engineers have a variety of traditional job opportunities in industries such as petroleum production and processing, chemical manufacturing, food processing, pharmaceutical production, and process equipment manufacturing. Job opportunities may involve research, development, design, manufacturing, sales, or teaching as professional activities. The chemical engineer can also move easily into environmental engineering, nuclear engineering, oceanography, biomedical engineering, pharmacology, law, medicine, or other multidisciplinary fields.

In chemical engineering, students obtain a broad foundation in chemistry, mathematics, physics, communication skills, economics, and the humanities. Courses in material and energy balances, thermodynamics, reaction kinetics, fluid mechanics, heat and mass transfer, process control, computer methods, safety, and design provide students with the background and learning skills required of the practicing chemical engineer. The curriculum includes elective courses that enable a student to prepare for immediate employment or further study at the graduate level or the professional level, such as for medical school. The chemical
The educational objective of the undergraduate program in the Ralph E. Martin Department of Chemical Engineering is to prepare students for careers and professional accomplishment after graduating, including:

- Successful practice as an engineer or in some other professional pursuit, including traditional or emerging fields of chemical engineering;
- Entrance and successful participation in a graduate or professional program (such as medical school) that continues their career development.

The program prepares graduates to achieve these educational objectives through development of their skills as outlined in our educational outcomes and taught in our curriculum.

By the time of graduation, students have the opportunity to attain the following educational outcomes:

- An ability to apply knowledge of mathematics, science, and engineering;
- An ability to design and conduct experiments, as well as analyze and interpret data;
- An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- An ability to function on multidisciplinary teams;
- An ability to identify, formulate, and solve engineering problems;
- An understanding of professional and ethical responsibility;
- An ability to communicate effectively;
- The broad education necessary to understand the impact of engineering solutions in global, economic, environmental, and societal contexts;
- A recognition of the need for, and an ability to engage in, life-long learning;
- A knowledge of contemporary issues;
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

These outcomes are reinforced and demonstrated in a senior capstone safety, design, and laboratory course sequence.

**Requirements for B.S. in Chemical Engineering**

Each student in chemical engineering is required to complete 128 hours of coursework including the 35-hour University Core. To be eligible for graduation, all students must complete at least 30 hours of Chemical Engineering (CHEG) classes at the University of Arkansas, Fayetteville that are required for the degree. Each student in chemical engineering is also required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. As discussed in the department’s Undergraduate Advising Manual, students can select elective courses to better prepare for employment or further study in areas such as:

- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

**Chemical Engineering B.S.Ch.E. Eight-Semester Degree Program**

The following section contains the list of courses required for the Bachelor of Science in Chemical Engineering degree. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 74) in the Academic Regulations chapter for university requirements of the program. Entering freshmen will be required to participate in selected Freshman Engineering Student Services.

Elective Options in Chemical Engineering

Each student in chemical engineering is required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives.

Technical Electives

In general, any upper level (3000-level or above) course in the sciences, math or engineering may serve as a technical elective, with prior approval by your academic adviser. BIOL 2103, BIOL 2213, BIOL 2323 and BIOL 2443 are 2000-level courses that can also serve as technical electives, and are also useful for students applying to medical school. INEG 2313, INEG 2333, INEG 2413 and INEG 3513 are statistics-oriented classes, and may be used for technical elective credit. Upper-level courses in non-technical areas such as business may also serve as technical electives with prior approval by your academic adviser. There is no specific list of approved technical electives.

Advanced Science and Chemical Engineering Electives

A list of the approved Advanced Science or Chemical Engineering courses is shown below. Once again, each student in chemical engineering is required to complete three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. Courses not on the list may satisfy the requirement with student appeal and approval by the Chemical Engineering faculty.

Students are encouraged to select elective courses to better prepare for employment or further study in areas such as:

- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

**Honors Program Requirements**

Chemical engineering students enrolled in the Honors College are encouraged to complete the requirements to graduate with honors. In addition to grade point requirements, Honors College students must complete a total of at least 12 hours of honors course credits including a minimum of 6 hours of honors course credits in chemical engineering. The student must also participate in a design or research project culminating in an Honors Thesis. Thesis credit in the department will be satisfied by Honors College students in one of the following ways:

- Completion of CHEG 488V Special Problems at the direction of a faculty mentor.

Regardless of the thesis project, an Honors Thesis and oral presentation will be prepared by the student and approved by the Department Honors Committee and the faculty mentor.

**Ackerson, Michael D.,** Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, 1986.

**Babcock, Robert Earl,** Ph.D., M.S.Ch.E., B.S. (University of Oklahoma), Professor, 1965.

**Beitie, Robert R.,** Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Oklahoma), Professor, 1993.

School of Law Website (http://law.uark.edu)

This page provides undergraduate students with information about the School of Law. Find out more in the School of Law Catalog (http://catalog.uark.edu/lawcatalog).

Mission and Objectives
The primary goal of the University of Arkansas School of Law is to prepare lawyers who will render high-quality professional service to their clients, who are interested in and capable of advancing legal progress and reform, and who are prepared to be leaders in their communities. These objectives can best be realized by a talented and dedicated full-time faculty working in partnership with an interested and involved bench and bar. The faculty and administrative staff at the School of Law strive to maintain mutually beneficial relationships with judges and practicing lawyers. Appellate courts regularly schedule cases at the School of Law, and the judges meet with students informally after the arguments. Full-time faculty members teach first-year courses and other required substantive law courses, while practice skill courses such as legal clinic and activities such as moot court and client counseling depend on the assistance of the practicing bar.

The University of Arkansas School of Law also has a strong sense of responsibility to the people of Arkansas. Members of the faculty and student body are active in numerous public service activities. Legal counsel to the indigent is provided through the clinical education program and by special court appointments from time to time. Students and faculty also serve on the bar, in civic and legislative committees, and on task forces. A number of faculty and students contribute time and expertise to state agencies and law reform groups. All of these activities offer students real legal work, serving the people of Arkansas.

Teaching Methods
Legal training teaches principles through discussion and skills through practice. The student must be, by definition, an active participant in that process.

The Socratic “case method” is the basic tool of traditional American legal education. This method involves the study and discussion of litigated cases. The teacher calls upon students to respond in a stimulating question-and-answer dialogue, frequently involving several class members and often including more questions than answers. The learning experience occurs not only in the interchange between teacher and student, but also among the students themselves. This process, applied skillfully by expert teachers and by students possessing a sense of awareness and curiosity, hones the minds of students, develops their respect for facts, and creates a sensitivity to essential differences among issues, policies, reasons, and arguments. Intensive and consistent daily preparation is necessary for students to participate effectively in this process.

In some of the first-year courses, and in many later courses, students are given practical legal problems to solve. These problems may involve drafting legal documents or formulating a course of action for a hypothetical client.

By the time students reach their third year, they will be prepared to engage in significant legal research in selected areas of specialization. A primary source for such experience will be seminars taught informally in small groups by professors who are experts in selected subjects. Frequently, a student will be expected to defend a seminar paper before classmates under circumstances that provide lively and constructive discussion. During the second and third years, students are also permitted to engage in research and writing projects for credit under the supervision and consultation of a selected faculty member, in an area of particular interest to the student.

Of increasing importance in legal education is the role of practical, on-the-job training involving legal problems of actual clients. Legal clinic courses provide valuable client counseling experience, as well as participation in actual trials and appeals under the supervision of a member of the faculty who is also a licensed attorney. Representation is provided for students and indigent local residents. Both civil and certain referred criminal cases are accepted by the clinic.

Many classes in the School of Law involve a significant skills component in which students are placed in a simulated client-based situation and asked to respond appropriately. The curriculum includes a number of specially designated-skills classes that focus on practice skills. All law students are required to take at least one skills class prior to graduation.

Facilities and Resources
Robert A. Leflar Law Center

Additions to the Robert A. Leflar Law Center were completed in spring 2008, and the building was dedicated in October 2008 by former Associate Supreme Court Justice Sandra Day O’Connor. A new addition was opened for students in fall 2006, and faculty and staff moved into new offices in August 2007. The expanded facilities include a new entry hall facing the Arkansas Union and Mullins Library, a two-story lobby, four state-of-the-art classrooms on the third floor, a gourmet coffee shop on the second floor, the 203-seat E.J. Ball Courtroom and a new Student Services office. The Richard B. Atkinson Memorial Courtyard, designed by world-renowned artist and sculptor Jesús Moroles, was completed in fall 2008.

Robert A. and Vivian Young Law Library

The Robert A. and Vivian Young Law Library includes more than 300,000 volumes, including cases and statutes from every American jurisdiction. The law library also contains a current and complete collection of legal encyclopedia, digests, tests, treatises, law reviews, reports of administrative agencies, and other government publications.

The Young Law Library is a depository for federal, state, and United Nations documents. It is the only U.N. documents library in the state and one of a few in the Midwest. The library includes a growing collection of agricultural law materials developed with assistance from the National Agricultural Law Center.

Students researching legal problems use traditional printed resources and electronic resources available across the Internet. Portals such as Loislaw.com, LEXIS, WESTLAW, the State of Arkansas Web page, the National Agriculture Law Center Web page, and the Young Law Library’s Web page help students identify and use appropriate resources. Computer labs are available for student use. The School of Law also has a wireless network accessible to all students, faculty, and staff.

While primarily designed for the use of Arkansas students, the Young Law Library also serves the research needs of the bench, the bar, and the University community. The Young Law Library provides an attractive and comfortable atmosphere for study and research. Included within the Young Law Library is the Barrett Hamilton Law Library Mezzanine, a
particularly attractive study and shelf space area. In addition, the main campus library, Mullins Library, is located near the Young Law Library. The two libraries work closely together to identify, acquire, and share resources throughout the campus.

Law Faculty

- Robert A. Leflar Professor Bailey (C.)
- Vincent Foster University Professor of Legal Ethics and Professional Responsibility Brill
- Clayton N. Little Professor Goforth
- E.J. Ball Professor Judges
- Wylie H. Davis Distinguished Professor Killenbeck (M.)
- Ben J. Altheimer Professor of Legal Advocacy Leflar
- Sidney Parker Davis Jr. Professor of Business and Commercial Law Matthews
- Nathan G. Gordon Professor Nance
- William H. Enfield Distinguished Professor Sheppard
- Professors Beard, Brummer, Circo, Ewelukwa, Flaccus, Leeds, Moberly, Norvell, Schneider
- Associate Professors Buehler, Foster, Gallini, Hughes, Kelley, Killenbeck (A.), Sacharoff, Tarvin, Thompson, Young
- Assistant Professor Sampson
- Visiting Clinical Assistant Professors Doss, Gaithe
- Professor of Law Emeritus Witte

Other Programs

Joint J.D./M.B.A. Program (Business Administration)

The School of Law and the Sam M. Walton College of Business offer students a juris doctor (J.D.) degree and a master’s of business administration (M.B.A.) degree concurrently. Students working to pursue their degrees in this joint program must gain admission to both the School of Law and the Graduate School and be accepted into the program of study leading to the M.B.A. degree. If the student is accepted into both programs, a maximum of six hours of approved upper-level elective law courses may be used as duplicate credit toward the M.B.A. degree and a maximum of six hours of approved graduate courses in business administration may be used as duplicate credit toward the J.D. degree, thus reducing the total time necessary for completion of the degrees.

Joint J.D./M.P.A. Program (Public Administration)

The department of political science, the Graduate School, and the School of Law cooperate in a dual-degree program that allows a student to pursue a juris doctor (J.D.) degree and a master’s of public administration (M.P.A.) degree concurrently. Students must be admitted to the M.P.A. program, the School of Law, and the dual-degree program. If students enter the dual-degree program after enrolling in either the School of Law or the M.P.A. program, they must obtain admission to the other degree program and the dual-degree program during the first year of study.

The School of Law accepts a maximum of nine hours of M.P.A. courses to satisfy requirements for the J.D. degree. To qualify for J.D. credit, the M.P.A. courses must come from a set of core courses and must be approved by the School of Law. For purposes of the M.P.A. degree, 15 hours of elective courses may be taken in the School of Law, provided they are in an area of concentration approved by the director of the M.P.A. program. Students must earn a grade of B or higher in any M.P.A. course offered for credit toward the J.D.

Students admitted to the dual-degree program may commence their studies in either the School of Law or in the M.P.A. program but must complete first year course requirements before taking courses in the other degree program. If they do not maintain the academic or ethical standards of either degree program, students may be terminated from the dual degree program. Students in good standing in one degree program but not the other may be allowed to continue in the program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.P.A. degree, he or she cannot count any hours of M.P.A. courses toward the J.D. degree. Likewise, M.P.A. students may not be able to count certain law courses if they decide to discontinue their studies in the School of Law. The J.D. degree will be awarded upon completion of all degree requirements; the M.P.A. will be awarded upon completion of the comprehensive examination and the internship (and internship report), or alternately, six hours of additional coursework.

Joint J.D./M.A. Program

The School of Law and the Department of Political Science provide a dual J.D./M.A. in International Law and Politics. This program’s students must be admitted both to the School of Law and the Graduate School in the Department of Political Science.

A maximum of 12 hours of approved, upper-level elective law courses may be used as credit toward the M.A. and a maximum of nine hours of approved graduate courses in political science may be used as credit toward the J.D. degree, reducing the time necessary to complete both degrees by about one academic year. The M.A. program offers a six-hour thesis or a paid, six-month internship option designed to prepare students for a career in international politics or law.

The 12 hours of M.A. courses taken in the School of Law must relate to the study of international law and be approved by the student’s M.A. adviser and the Law School’s Associate Dean of Academic Affairs. The nine hours of approved graduate courses in political science may include: Comparative Political Analysis; Seminar in International Politics; Seminar in Contemporary Problems; International Political Economy; and International Trade Policy. Other political science and graduate-level courses may be taken by permission. Paid internship credits cannot be applied toward the juris doctorate.

School Admission Requirements

For complete details concerning admission to the School of Law, go to the school’s admission page (http://law.uark.edu/academics/jd) or write to School of Law Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701, or telephone 479-575-3102.

General Information

The School of Law’s deadline for receiving a completed application is April 1. The school does not charge an application fee. Admission is only for the fall of each year, and only a full-time program is offered.

The School of Law prefers online applications. The school may request more information than is listed below, but please do not send additional materials unless requested. Each student application file will be reviewed when it is completed.
Prerequisites
Except for students in the 3/3 programs, applicants must have completed all requirements for a bachelor’s degree from an accredited institution prior to the date of enrolling in the School of Law.

CAS
Applicants must participate in the Credential Assembly Service (CAS) and be registered with CAS during the application year. Through CAS, applicants are required to send the Law School Admission Council (LSAC) official transcripts from all higher education institutions that the applicant has attended.

LSAT
Applicants also must take the Law School Admission Test (LSAT) before the end of February and within the five years preceding the date of application. Applications may be submitted prior to taking the LSAT. The School of Law will use an applicant’s highest LSAT score in calculating the applicant’s prediction index.

Prediction Index
The School of Law will grant index admission to non-residents who have a prediction index of 205 or above and to Arkansas residents who have a prediction index of 200 or above. If space permits, we may offer index admissions to other applicants. All admitted students must satisfy the legal profession’s character and fitness requirements.

The prediction index is calculated as follows: (LSAT score) + (13.4 x UGPA) = Prediction Index. For example, if you have an LSAT score of 160 and a 3.00 UGPA, your prediction index would be 202.

Transfer Students
A law student who has completed one year of legal studies with satisfactory scholarship in a law school accredited by the American Bar Association is eligible to be considered for transfer to the University of Arkansas School of Law. The amount of transfer credit to be granted will depend on the quality of performance and the relation of completed courses to this school’s program. A maximum of 30 credits may be accepted for transfer credit. Credit or units only (not grades) are transferable. Credits will not be accepted for any course or other work in which a grade below 2.00 or equivalent is given at another law school. Failure to disclose attendance at another college or law school or expulsion or suspension is sufficient grounds to require withdrawal from the School of Law.

Pre-Law Study
No pre-law curriculum is prescribed at the University of Arkansas School of Law or at any other American law school. Experience has shown that students do equally well in law school and in law practice regardless of their differing educational backgrounds. As a result, no single “pre-law major” is required or even recommended. Students in a position to structure their college curricula should select courses that emphasize analytical and problem-solving skills and courses in which written work is vigorously edited. Arkansas admits applicants from a wide variety of college majors. The resulting diversity enhances and enriches the educational experience of all students.

LSAT: The Law School Admission Test (LSAT) is given four times per year in Fayetteville and at other locations throughout Arkansas and in other states. Registration may be arranged online at www.lsac.org (http://www.lsac.org). Applicants for admission are urged to take the test at least nine months prior to expected entrance in the School of Law.

3/3 Programs
The School of Law and the J. William Fulbright College of Arts and Sciences have collaborated in developing a program that will enable outstanding students to enter the School of Law after their third year of undergraduate studies. A student enrolled in the Fulbright College is eligible to begin study in the UA School of Law after the completion of at least 94 hours of college work if the following criteria are met:

1. Completion of all University, college, and major course requirements for their undergraduate degrees;
2. A cumulative grade-point average of at least 3.50; and
3. A score of at least 159 on the LSAT.

Such students will receive a Bachelor of Arts or a Bachelor of Science after the completion of sufficient hours at the School of Law in order to meet the regular requirements of Fulbright College. These students will then receive a juris doctor (J.D.) degree after completing the required number of hours at the School of Law.

In addition to the 3/3 program with the J. William Fulbright College of Arts and Sciences, the School of Law has a similar program with the department of agricultural economics and agribusiness in the Dale Bumpers College of Agricultural, Food, and Life Sciences. Exceptional students may enroll in the Law School in their fourth year of undergraduate study. Students will be required to have (1) completed at least 95 credit hours in the pre-law program, (2) a cumulative grade-point average in all college or University course work of at least 3.50 without grade renewal, and (3) an LSAT score of at least 159. The B.S.A. Agricultural Business degree will be granted after successfully completing 29 credit hours from the first-year School of Law course work.

It is a requirement of the School of Law’s accreditation standards that no student be admitted to the University of Arkansas School of Law until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in these 3/3 programs satisfy this requirement.

College Scholarships
Students are expected to make sufficient financial arrangements for the first year of study without the necessity of seeking employment. All law students are required to be full-time students, and no law student is permitted more than 20 hours per week of employment. First-year students are strongly discouraged from working while enrolled in classes. First-year students are expected to adhere to a standard curriculum; some courses in the upper-division curriculum are also required.

Applications for financial aid may be obtained from the Office of Financial Aid, University of Arkansas, Hunt Hall 114, Fayetteville, AR 72701, 479-575-3806. You may also find more information about financial aid opportunities online at the Financial Aid website (http://www.uark.edu/admin/fininfo). Applications for financial aid must be submitted to the Office of Financial Aid by April 1. Specific fees and costs are listed in the School of Law Catalog.

Degree Requirements
For course information and degree requirements, see the School of Law Catalog (http://catalog.uark.edu/lawcatalog) or by writing or calling the
University of Arkansas School of Law, Leflar Law Center, Waterman Hall 147, Fayetteville, AR 72701, 479-575-7645.

Graduate Studies
The University of Arkansas School of Law is a professional degree program. In addition to the law degree, the Law School offers a graduate degree in agricultural law. The Graduate Program in Agricultural Law at the University of Arkansas is the only program in the United States that offers a Master of Laws (LL.M.) degree in agricultural law. Students enrolled in this unique and selective program have the opportunity for advanced study, creative research, and specialized professional training in the legal issues involved with agricultural production, marketing, and distribution. Graduates of the program are among the leaders of today’s agricultural law community, working in private practice, government, agribusiness, public policy, and academia. For more information, visit the Agricultural Law page (http://catalog.uark.edu/lawcatalog/lminalternativeandfoodlaw) or e-mail the graduate program at llm@uark.edu.

Accreditations
The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.

Reserve Officers' Training Corps
The Reserve Officers' Training Corps (ROTC) programs at the University of Arkansas provide physical and mental challenges that are not offered anywhere else on campus. The ROTC programs prepare young men and women for careers as professional military officers. In addition to academic studies, each service requires that all students attend a weekly leadership laboratory.

The freshman and sophomore courses are electives offered to male and female students who may earn four hours of academic credit in Aerospace Studies or up to six hours in Military Science. Absolutely no military obligation is incurred by non-scholarship students as a result of their enrollment in or completion of any or all of their freshman or sophomore ROTC courses.

Air Force ROTC

Professor of Aerospace Studies
Lieutenant Colonel Marc E. Wolfe
319 Memorial Hall, 479-575-3651
Email: rotc030@uark.edu

Air Force ROTC Website (http://afrotc.uark.edu)

The University of Arkansas hosts the award-winning Air Force ROTC Detachment 030, ThunderHawks, part of a nationwide program that allows students to pursue commissions as officers in the United States Air Force while simultaneously attending college. Students can register through normal course registration processes.

Air Force ROTC consists of four years of Aerospace Studies classes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>AERO 1011</td>
<td>The Foundations of the United States Air Force I</td>
<td>1</td>
</tr>
<tr>
<td>AERO 1021</td>
<td>The Foundations of the United States Air Force II</td>
<td>1</td>
</tr>
<tr>
<td>AERO 2011</td>
<td>The Evolution of Air and Space Power I</td>
<td>1</td>
</tr>
<tr>
<td>AERO 2021</td>
<td>The Evolution of Air and Space Power II</td>
<td>1</td>
</tr>
</tbody>
</table>

And a corresponding Leadership Laboratory for each year, at which students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies.

College students enrolled in the Air Force ROTC program (known as “cadets”) who successfully complete both Air Force ROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Additional information about Air Force ROTC can be found on the web at www.afrotc.com (http://www.afrotc.com).

Army ROTC

Professor of Military Science and Leadership

World Wide Web: armyrotc.uark.edu

Army ROTC teaches you how to lead. It is one of the best leadership courses in the country and you can make it a part of your academic curriculum here at the University of Arkansas. Army ROTC is an elective curriculum you take along with your required college courses that gives you the tools, training and experiences that will help you succeed in any competitive environment. Participation in the Army ROTC program while pursuing your academic degree offers you the opportunity to earn a commission as a second lieutenant and serve on active duty or in the National Guard or Army Reserve upon graduation.

The traditional four-year Army ROTC Program is divided into a two-year basic course (1000- and 2000-level Military Science classes) and a two-year advanced course (3000- and 4000-level Military Science classes). Students may enroll in the basic course without incurring any military service obligation.

Basic Course Requirements
The first two years of instruction introduce the student to fundamental military and leadership subjects. Students normally take the basic course sequence over four successive semesters, but the basic courses can be completed in as few as two semesters. Students should discuss available options with the Recruitment and Operations Officer before registering for courses if they have fewer than four semesters to complete the basic course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take MILS 1001 Basic Introductory Course to Military Leadership I (Fa) in the fall and MILS 1011 Introduction to Military Leadership II (Sp) in the spring. Both classes are 1 credit hour classes that have 1 hour of classroom instruction and 2 hours of lab per week. Sophomores are encouraged to take MILS 2002 Leadership Development I (Fa) in the fall and MILS 2012 Leadership Development II
(Sp) in the spring. Both of the 2000-level classes are 2 credit hour classes that have 2 hours of classroom instruction and 3 hours of lab per week. Labs provide the opportunity for the practical application of leadership concepts and tactical military skills training such as map reading, land navigation, field training, and rifle/pistol marksmanship.

Advanced Course Requirements

Students who have completed the basic course sequence or an equivalency (see Two-Year Program), have met all enrollment eligibility criteria continue into the advanced course. To enroll in the advanced course, students must meet eligibility and age requirements, be physically qualified, have two academic years to complete before graduation or reception of a graduate degree, have a minimum grade point average of 2.0, be accepted by the professor of military science, and be a U.S. citizen. This advanced course curriculum consists of the following courses that include corresponding leadership labs, physical fitness training sessions, and a four-week summer camp (Advanced Camp) at Fort Knox, Kentucky.

Course List

| MILS 3004 | Applied Leadership I (Fa) | 4 |
| MILS 3014 | Applied Leadership II (Sp) | 4 |
| MILS 4004 | Advanced Leadership I (Fa) | 4 |
| MILS 4014 | Advanced Leadership II (Sp) | 4 |

During labs and physical training sessions students receive practical leadership opportunities to prepare them for summer camp and their future military careers. Students normally attend Advanced Camp in the summer between their junior and senior years. Students must complete all of the courses listed above and satisfactorily complete Advanced Camp to earn a commission.

Army ROTC students who receive an Army ROTC scholarship or enter the Army ROTC Advanced Course must agree to complete a period of service with the U.S. Army. You can serve full time in the Army for three years (four years for scholarship winners). Selected cadets may choose to serve part time in the U.S. Army Reserve or Army National Guard while pursuing a civilian career.

Two-Year Program

Students who are veterans, members of the Army National Guard/Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the advanced course with the approval of the Professor of Military Science. Students who did not complete the ROTC basic course curriculum (see above) but have two years of academic study remaining may be eligible to attend Basic Camp to satisfy the basic course requirements. Basic Camp, held at Fort Knox, Kentucky, during the summer, introduces the student to the Army and covers the requirements for the basic course in 28 days. Students who believe they qualify for this program should consult with the Service Learning Steering Committee.

Scholarships

Qualified students may compete for Army ROTC scholarships ranging from two to four years in duration. The Army provides scholarships for those who desire to serve on Active Duty, in the National Guard, or in the Army Reserve. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition and fees (both in and out-of-state) or room and board (capped at $5,000/semester) but not both, $600 per semester for textbooks and laboratory expenses, and a tax fee subsistence stipend of $300–$500 for each month of the regular school year depending on Military Science level. Interested students should consult with the Scholarship and Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Mr. Oscar Rayford in the Department of Military Science, 479-575-5853, olrayford@uark.edu.

The Service Learning Initiative

The Service Learning Initiative is a joint initiative between the University of Arkansas Provost Office, the Honors College, and the Division of Student Affairs. Service learning builds critical thinking skills while engaging in academic courses that promote experiential, community-based activities. Formulated service learning courses must meet the committee-approved service learning definition and criteria, and be approved for designation by the Service Learning Committee.

Service Learning Definition

Service learning is a credit-bearing, faculty-directed, teaching-learning experience that is course specific. Service Learning strengthens academic content knowledge and sense of civic responsibility. Students build critical thinking skills as they engage in experiential, community-based activities that are aligned with and integral to academic course work. At the same time, the community (real people in real situations) benefits from assistance that would otherwise not be available.

Courses Page

Students can visit the Service Learning program course page (https://servicelearning.uark.edu/courses) to find courses that have been designated with service-learning components. Faculty can find criteria (http://servicelearning.uark.edu) to develop courses that will be considered for designation as service learning courses.

Service Learning Steering Committee

• Alison Turner, Fay Jones School of Architecture and Design
• Casey Kayser, J. William Fulbright College of Arts and Sciences
• Fran Hagstrom, College of Education and Health Professions
• Sarah Hernandez, College of Engineering
• Lisa Wood, Dale Bumpers College of Agricultural, Food and Life Sciences
Undergraduate Faculty

Faculty and instructional staff are listed in alphabetical order. The first date after the listing of each name indicates the year of first appointment at the University of Arkansas; the second date indicates the year of appointment to present faculty rank. Where they coincide, only one date is given.

A
Abrahams, Daniel, Ph.D. (Oakland University), M.M. (University of Nebraska at Omaha), B.M.E. (Temple University), Assistant Professor, Department of Music, 2016.
Ackerson, Michael D., Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 1986.
Acrey, Cash, M.B.A. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Clinical Assistant Professor, Department of Information Systems, 2015.
Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, Department of Sociology and Criminology, 1995.
Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, Department of Chemistry and Biochemistry, 2006.
Adams, Justin J., Ph.D. (University of South Carolina, M.Ed. (Winthrop University), B.A. (Winthrop University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.
Adler, Jacob, Ph.D., A.B. (Harvard University), Associate Professor, Department of Philosophy, 1994.
Agana, Carol E., M.N.Sc. (University of Arkansas for Medical Sciences), B.S.E. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 1998.

Bacon, Robert Keith, Ph.D. (Purdue University), M.S., B.S.A., (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1984.

Bailey, Carlton, J.D. (University of Chicago), B.A. (Tallahade College), Professor, School of Law, 1978.

Bailey, Mechelle, M.S. (University of Tennessee), B.S. (University of Arkansas), Clinical Instructor, School of Human Environmental Sciences, 2012.

Bailey, Clayton, Ph.D. (University of Arizona), M.S., B.S. (University of Arkansas), Adjunct Assistant Professor, Department of Animal Science, 2015.

Bailey, Constance, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Alcorn State University), Assistant Professor, Department of English, 2016.

Baird, Douglas H., D.V.M. (Louisiana State University), Adjunct Professor, Department of Animal Science, 2011.

Balaichandran, Kartik, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Assistant Professor, Department of Biomedical Engineering, 2012.

Balasubramanian, Mahendran, Ph.D. (Oklahoma State University), M.S. (Auburn University), B.Tech. (Anna University), Assistant Professor, School of Human Environmental Sciences, 2017.

Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, Department of Electrical Engineering, 1989.

Ballentine, Hope, M.S. (Vanderbilt University), B.A. (Harding University), Instructor, Eleanor Mann School of Nursing, 2014.

Balthrop, Andrew, Ph.D. (Georgia State University), Visiting Assistant Professor, Department of Economics, 2017.

Banton, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Assistant Professor, Department of History, 2013.

Barabote, Ravi Damodar, Ph.D. (Texas Tech University), M.S. (Madurai Kamaraj University, Madurai, India), B.S. (Osmania University, Hyderabad, India), Assistant Professor, Department of Biological Sciences, 2012.

Baranello, Micaela, Ph.D., M.A. (Princeton University), B.A. (Swarthmore College), Assistant Professor, Department of Music, 2017.

Barber, Thomas, Ph.D., M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 2007.

Barker, Mitchell D., Ph.D. (University of Chicago), Lecturer, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Barnum, Anthony Justin, Ph.D. (Howard University), M.A. (University of Arkansas), B.A. (Hendrix College), Visiting Assistant Professor, Department of Sociology and Criminology, 2016.

Barrasa-Lopez, Salvador, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (Instituto Politecnico Nacional de Mexico), Associate Professor, Department of Physics, 2011.

Barrett, David A., B.A. (Hendrix College), Instructor, Department of Philosophy, 2006.

Bar, Kathleen M., Ed.D. (University of Arkansas), M.S. (Boston College), B.S. (Marquette University), Associate Professor, 1984.

Barthe, Daniel, Ph.D., M.A. (Claremont Graduate University), B.S. (Eureka College), Clinical Assistant Professor, Department of Curriculum and Instruction, 2014.

Bartlett, Andrew, Ph.D., M.S. (University of Georgia), M.S. (College of Charleston), B.S. (Coastal Carolina University), Clinical Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.

Barton, Ariel, Ph.D., M.S. (University of Chicago), B.S. (Harvey Mudd College), Assistant Professor, Department of Mathematical Sciences, 2016.

Bate, Ann, Ph.D. (University of Arkansas), B.S. (University of Arkansas-Monticello), Assistant Professor, Department of Entomology, 2016.

Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Food Science, 2011.

Bavon, Tai, Ph.D., M.S. (Florida State University), Professor, Clinton School of Public Service, 2008.

Bayram, A. Burcu, Ph.D. (Ohio State University), M.I.S. (North Carolina State University), B.A. (Middle East Technical University), Assistant Professor, Department of Political Science, 2016.

Beam, Caroline, Ph.D., M.S. (University of California), B.S. (Princeton University), Clinical Assistant Professor, Program in Operations Management, 2014.

Bean, Jeffrey, M.B.A. (University of Arkansas), B.A. (Rhodes College), Instructor, Program in Operations Management, 2014.

Beard, Lonnie Ray, LL.M. (New York University), J.D. (University of Arkansas), B.A. (Arkansas State University), Professor, School of Law, 1983.
Beasley, Jennifer G., Ed.D. (University of Virginia), M.A. (Wichita State University), B.A. (Kansas State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009.

Beaulieu, Jeremy M., Ph.D. (Yale University), M.S., B.S. (California Polytechnic State University), Assistant Professor, Department of Biological Sciences, 2016.

Beauvre, Steven J., Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, Department of Biological Sciences, 1995.

Beavers, M. Gordon, Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Texas at Austin), Associate Professor, Department of Computer Science and Computer Engineering, 1999.

Bechtel, Don, B.A. (Lebanon Valley College), Instructor, Department of Supply Chain Management, 2006.

Beck, Paul Arthur, Ph.D. (University of Arkansas), M.S., B.S. (Oklahoma State University), Professor, Department of Animal Science, 1997.

Beck, Dennis E., Ph.D. (University of Florida), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010.

Becknell, Natalie K., M.S.C.E., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2012.

Becnel, Jennifer N., Ph.D. (Arizona State University), M.A. (University of California-San Francisco), B.A. (San Diego State University), Assistant Professor, School of Human Environmental Sciences, 2014.

Behrend, Douglas A., Ph.D. (University of Minnesota), B.A. (Kalamazoo College), Professor, Department of Psychological Science, 1989.

Beike, Denise R., Ph.D., B.A. (Indiana University), Professor, Department of Psychological Science, 1995.

Beitie, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.

Bell, Steven M., Ph.D. (University of Kansas), M.A. (University of Kentucky), B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1992.

Bell, Carmen V., M.Ed. (Indiana Wesleyan University), Clinical Instructor, Department of Curriculum and Instruction, 2015.

Bellache, Laurent, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, Department of Physics, 1999.

Ben Idris, Anisa A., Ph.D. (University of Arkansas), Lecturer, Department of Curriculum and Instruction, 2017.

Benn, Karen A., Lecturer, Department of Curriculum and Instruction, 2018.

Benamara, Mourad, Ph.D., M.S. (University of Toulouse III, France), Assistant Professor, Nanotechnology, 2007.

Bengtson, Ed, Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-Sacramento), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010.

Benton, Hilda Morayma, M.A. (University of Arkansas), B.A. (Foreign Institution), Instructor, Department of World Languages, Literatures and Cultures, 2009.

Bergman-Lanier, Leyah, Ph.D. (Claremont Graduate University), Instructor, English Language and Cultural Studies, 2014.

Berkovich, Nadja, Ph.D. (University of Illinois), M.A. (Boston College), B.A. (St. Petersburg Pedagogical Herzen University), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Bernhardt, Michelle, Ph.D., M.S.C.E., B.S.C.E. (Texas A&M University), Assistant Professor, Department of Civil Engineering, 2013.

Beyzavi, M. Hassan, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, Department of Chemistry and Biochemistry, 2017.

Biehle, Scott, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Clinical Assistant Professor, Department of Landscape Architecture, 2015.

Biggs, Bobbie T., Ph.D. (Texas A&M University), M.S., B.S. (University of Arkansas), Professor, Department of Human Resource and Workforce Development Education, 1979.

Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Assistant Professor, Department of Landscape Architecture, 2011.

Bills, Ken, Ph.D. (University of Oklahoma), M.A., B.A. (Southern Utah University), Associate Professor, Department of Accounting, 2015.

Bingham, D. James, M.B.A. (Northwestern University), B.S. (Brigham Young University), Instructor, Program in Operations Management, 2013.

Blackwell, Marlon, M.Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, Department of Architecture, 1992.

Blissard, Paul, Ed.D. (University of Arkansas), M.C., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, Department of Plant Pathology, 2008.

Bobda, Christophe, Ph.D., M.S. (University of Paderborn, Germany), B.S. (University of Yaounde, Cameroon), Professor, Department of Computer Science and Computer Engineering, 2010.

Bolin, Aaron, Ph.D., M.A. (Northern Illinois University), B.S. (Rockford College), Instructor, Program in Operations Management, 2014.

Bonacci, Jeff, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2000.

Booker, M. Keith, Ph.D. (University of Florida), M.S., M.A. (University of Tennessee), B.A. (Vanderbilt University), Professor, Department of English, 1990.

Bos, Steve K., Ph.D. (University of North Carolina at Chapel Hill), M.S. (Utah State University), B.S. (Bemidji State University), Professor, Department of Geosciences, 1996.

Bostian-Neal, Elisabeth, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2018.

Boston, Paisley L., M.P.P., B.A. (Mississippi Valley State University), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Bottje, Walter G., Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, Department of Poultry Science, 1985.

Bourland, Fred, Ph.D. (Texas A&M University), M.S., B.S.A. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1988.

Bowers, Lisa Marie, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.

Bowers, Andrew L., Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
Bowles, Freddie A., Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, Department of Curriculum and Instruction, 2004.
Bowling, Hilary, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2014.
Bowman, Margaret Warigia, Ph.D. (Harvard University), Professor, 2012.
Brady, Laurie, M.A. (University of Arkansas), Instructor, Department of Communication, 1997.
Brady, Robert M., Ph.D. (University of Michigan-Ann Arbor), M.A. (Western Kentucky University), B.S. (Murray State University), Associate Professor, Department of Communication, 1979.
Brady, Kevin P., Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Associate Professor, Department of Curriculum and Instruction, 2014.
Braham, Andrew F., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Assistant Professor, Department of Civil Engineering, 2010.
Brandon, Jamie, Ph.D. (University of Texas), M.A. (University of Arkansas), B.A. (University of Memphis), Associate Research Professor, Department of Anthropology, 2014.
Breaux-Soignet, Denise, Ph.D. (Florida State University), M.B.A., B.S. (Nicholls State University), Clinical Assistant Professor, Department of Management, 2010.
Breen, Gina Marie, Ph.D. (Louisiana State University), M.A., B.A. (Southern Illinois University, Carbondale), Instructor, Department of World Languages, Literatures and Cultures, 2016.
Bresnick, Terry A., M.S. (Stanford University), M.B.A. (George Mason University), B.S. (United States Military Academy), Instructor, Program in Operations Management, 2014.
Brewer, Lorraine C., M.S. (University of Wisconsin-Madison), Instructor, Department of Chemistry and Biochemistry, 1997.
Brewer, Dennis W., Ph.D., M.A. (University of Wisconsin), B.A. (Sterling College), Professor, Department of Mathematical Sciences, 1975.
Bridges, Ana Julia, Ph.D. (University of Rhode Island), M.S. (Illinois State University), B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Psychological Science, 2007.
Bright, Brittany Michelle, M.I.S. (University of Arkansas), B.S. (University of Arkansas, Fort Smith), Instructor, Department of Information Systems, 2010.
Brill, Howard W., J.D. (University of Florida), LL.M. (University of Illinois at Chicago), B.A. (Duke University), University Professor, School of Law, 1975.
Bristow, Susan E., Ed.D., M.B.A., B.S.B.A. (University of Arkansas), Clinical Assistant Professor, Department of Information Systems, 1996.
Brito, Edvan P., Ph.D., M.S. (Georgetown University), M.A. (Howard University), B.A. (Universidade de Sao Paulo, Brazil), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.
Brock, Geoffrey Arthur, Ph.D. (University of Pennsylvania), M.F.A. (University of Florida), M.A. (University of Pennsylvania), B.A. (Florida State University), Professor, Department of English, 2005.
Brogi, Alessandro, Ph.D. (Ohio University), Ph.D. (University of Florence, Italy), M.A. (Ohio University), B.A. (University of Florence, Italy), Professor, Department of History, 2002.
Brown, Deborah A., Ed.D. (University of Missouri-Columbia), M.A., B.A. (Southeast Missouri State University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2011.
Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Clinical Assistant Professor, School of Journalism and Strategic Media, 2013.
Brown, Brandon, M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2014.
Brownback, Andrew P., Ph.D. (University of California, San Diego), B.A. (Kansas State University), Assistant Professor, Department of Economics, 2015.
Brubaker, Robert P., Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Wisconsin-Madison), B.A. (University of Wisconsin–Stevens Point), Professor, Department of Crop, Soil and Environmental Sciences, 2001.
Bryson, Sarah J., M.S.W. (Colorado State University), Lecturer, School of Social Work, 2014.
Buege, David, M.A. (Princeton University), Professor, Department of Architecture, 2009.
Burgin, James, M.B.A. (Golden Gate University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2014.
Burgin, Stephen, Ph.D., Ed.S., M.Ed., B.S. (University of Florida), Assistant Professor, Department of Curriculum and Instruction, 2014.
Burgos, Nilda Roma, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, Department of Crop, Soil and Environmental Sciences, 1998.
Burris, Sidney J., Ph.D., M.A. (University of Virginia), B.A. (Duke University), Professor, Department of English, 1986.
Burrow, Jason E., M.M. (Ohio University), B.M. (University of Arkansas), Assistant Professor, Department of Theatre, 2015.
Burson, Claudia, Lecturer, 1998.
Burton, Scot, Ph.D. (University of Houston), M.B.A., B.S.B.A. (University of Texas), Distinguished Professor, Department of Marketing, 1993.
Bustamante, Juan Jose, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, Department of Sociology and Criminology, 2012.
Butler, Kaitlyn, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2017.
C
Calabretta-Sajder, Ryan C., Ph.D. (Middlebury College), M.A. (Indiana University-Bloomington), B.A. (Dominican University), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.
Caldwell, Stephen E., D.M.A. (Rutgers State University-New Brunswick), M.M. (Temple University), B.M.E. (University of Northern Colorado), Assistant Professor, Department of Music, 2012.
Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, School of Art, 2017.
Callander, Neil, M.F.A. (Rutgers University), B.F.A. (Indiana University at Bloomington), Assistant Professor, School of Art, 2017.
Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, Department of Health, Human Performance and Recreation, 2003.
Camargo, Elsa, Ph.D. (Virginia Polytechnic Institute and State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.
Cambria, Jenna, Ph.D. (University of Maryland, College Park), B.A. (Rutgers University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.
Candido, Joseph D., Ph.D. (Indiana University at Bloomington), M.A. (University of New Hampshire), B.A. (Colby College), Professor, Department of English, 1979.
Carbonero, Franck, Ph.D. (University of Warwick, U.K.), M.S. (Université Blaise Pascal, France), B.S. (Université Joseph Fourier, France), Assistant Professor, Department of Food Science, 2013.

Carmago, Elsa, Ph.D. (Virginia Tech), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, Department of Curriculum and Instruction, 2018.

Carpenter, Dale, M.A. (Emory University), B.A. (Vanderbilt University), Professor, School of Journalism and Strategic Media, 1994.

Carson, Janet B., M.S. (University of Arkansas), Associate Professor, Department of Horticulture, 1992.

Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Assistant Professor, Department of Curriculum and Instruction, 2008.

Cartwright, Richard D., Ph.D. (University of California at Davis), M.S., B.S. (University of Arkansas), Extension Professor, Department of Plant Pathology, 1993.

Cassady, Richard, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, Department of Industrial Engineering, 2000.

Cassell, Cory A., Ph.D. (Texas A&M University), M.S., B.S. (Trinity University), Associate Professor, Department of Accounting, 2009.

Castro Salas, Raquel, M.A. (University of Arkansas), B.A. (John Brown University), Instructor, Department of World Languages, Literatures and Cultures, 2014.

Catanzaro, Donald G., Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, Department of Biological Sciences, 2014.

Catron-Ping, Peggy Lee, Ed.D. (University of Arkansas), M.A. (Missouri State University), Instructor, Department of Communication, 2004.

Cavell, Timothy A., Ph.D. (Louisiana State University), M.S. (Texas A&M University), B.A. (Louisiana State University), Professor, Department of Psychological Science, 2002.

Ceballos, Ruben M., Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S.(University of Alabama-Huntsville), Assistant Professor, Department of Biological Sciences, 2016.

Chaffin, David J., Ph.D. (University of Tennessee), Assistant Professor, High-Performance Computing Center, 2009.

Chakraborty, Avishek, Ph.D. (Duke University), M.S., B.S. (Indian Statistical Institute), Assistant Professor, Department of Mathematical Sciences, 2014.

Chaoavittongwee, Wanpracha Art, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, Department of Industrial Engineering, 2016.

Chapman, Kate M., Ph.D., M.S. (Penn State University), B.A. (New Florida College), Visiting Assistant Professor, Department of Psychological Science, 2016.

Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Associate Professor, Department of Chemistry and Biochemistry, 2010.

Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, Department of Electrical Engineering, 2015.

Chen, Yue, Ph.D. (Vanderbilt University), M.S. (Hong Kong Polytechnic University), B.S. (Hunan University), Assistant Professor, Department of Mechanical Engineering, 2017.

Chen, Jiale, Ph.D. (Cornell University), B.A. (Shanghai University of Finance and Economics), Assistant Professor, Department of Marketing, 2018.

Cheng, Albert, Ph.D. (University of Arkansas), M.A. (Biola University), B.A. (University of California-Berkeley), Assistant Professor, Department of Education Reform, 2018.

Cheramie, Lance M., M.S. (University of Arkansas), B.S. (Nicholls State University), Instructor, School of Human Environmental Sciences, 2002.

Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versaille, France), Assistant Professor, Space and Planetary Sciences, 2005.

Cheuning, Jeffrey, Ph.D. (University of Arkansas), M.S. (University of Missouri), B.S. (Western Kentucky University), Adjunct Professor, Department of Animal Science, 1997.

Chick, Cathy, M.L.S. (Louisiana State University at Shreveport), B.A. (Louisiana Tech University), Associate Librarian, University Libraries, 1983.

Chimka, Justin Robert, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, Department of Industrial Engineering, 2002.

Chioffi, David Charles, M.A. (Wesleyan University), B.F.A. (The Rochester Institute of Technology), Associate Professor, School of Art, 2013.

Cho, Eunjoo, Ph.D. (Iowa State University), M.S., B.S. (Hanyang University, Seoul), Assistant Professor, School of Human Environmental Sciences, 2013.

Choithitchanta, Nopchachai, D.M.A. (University of Missouri-Kansas City), M.M. (University of Northern Colorado), B.M. (Chulalongkorn University, Thailand), Associate Professor, Department of Music, 2001.

Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Christiansen, Hope L., Ph.D. (University of Kansas), M.A., B.A. (Kansas State University), Associate Professor, Department of World Languages, Literatures and Cultures, 1990.

Christy, Kameri, Ph.D., M.S.W. (University of Kansas), B.A. (University of Missouri-Kansas City), Professor, School of Social Work, 2003.

Chung, Jee-Young, Ph.D. (University of Alabama), M.A. (University of Houston), B.S., B.A. (Seoul Women’s University), Assistant Professor, School of Journalism and Strategic Media, 2015.

Churchill, Hugh O.H., Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Assistant Professor, Department of Physics, 2015.

Cliff, Matthew, Ph.D. (Stevens Institute of Technology), M.S. (New York University Polytechnic), M.S. (University of Pennsylvania), B.S. (Villanova University), Instructor, Program in Operations Management, 2015.

Circo, Carl J., J.D., B.A. (University of Nebraska), Professor, School of Law, 2003.

Cirgin, Benjamin, M.F.A. (California College of Arts), B.F.A. (Indiana University), Instructor, School of Art, 2016.

Civelli, Andrea, Ph.D. (Princeton Theological Seminary), M.A. (Princeton University), B.A. (Bocconi University, Milan), Associate Professor, Department of Economics, 2010.

Clark, John R., Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, Department of Horticulture, 1983.

Clark, Fred D., Ph.D., D.V.M., M.S., B.S. (Texas A&M University), Extension Professor, Department of Poultry Science, 1994.

Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Professor, Ralph E. Martin Department of Chemical Engineering, 1981.

Clay, Matt, Ph.D., M.S. (University of Utah), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012.

Cleaveland, Lynn L., Ed.D. (University of Arkansas), M.S. (Clemson University), Instructor, Department of Mathematical Sciences, 1997.

Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Assistant Professor, Department of History, 2015.

Clingan, Shelley Diane, M.S.W. (University of Arkansas at Little Rock), Lecturer, School of Social Work, 2014.

Clowney, Stephen, J.D. (Yale University), A.B. (Princeton University), Associate Professor, School of Law, 2014.
Clowney, Nicole, J.D. (Yale University), M.A. (University of Kentucky), B.A. (University of Chicago), Lecturer, Department of World Languages, Literatures and Cultures, 2014.

Cochran, Robert Brady, Ph.D. (University of Toronto), M.A., B.S. (Northwestern University), Professor, Department of English, 1976.

Cochran, Mark J., Ph.D., M.S. (Michigan State University), B.S. (New Mexico State University), Professor, Department of Agricultural Economics and Agribusiness, 1982.

Coffey, Ken, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, Department of Animal Science, 1996.

Coffman, Rick, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Associate Professor, Department of Civil Engineering, 2009.

Cohea, Ashley, B.A. (University of Arkansas), Instructor, Department of Theatre, 2013.

Coleman, James S., Ph.D., M.S., M.Phil (Yale University), B.S. (University of Maine), Professor, Department of Biological Sciences, 2017.

Collet, Vicki S., Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Associate Professor, Department of Curriculum and Instruction, 2012.

Collie, Sara J., M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Associate Professor, School of Social Work, 2011.

Collins, Kathleen, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, Department of Curriculum and Instruction, 2002.

Collins, Joshua, Ed.D. (Florida International University), M.S., B.A. (Texas A&M University-College Station), Assistant Professor, 2014.

Comfort, Kathy, Ph.D. (University of Kansas), M.A., B.A. (Illinois State University), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.

Condray, Kathleen, Ph.D., M.A., (University of Illinois-Urbana-Champaign), B.A. (University of Arkansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1999.

Conge, Patrick J., Ph.D. (University of Texas at Austin), M.A., B.S. (Arizona State University), Associate Professor, Department of Political Science, 1995.

Conley, Nathaniel, Ph.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Instructor, Department of History, 2018.

Connors, Sean P., Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, Department of Curriculum and Instruction, 2010.

Cook, Aletha, M.S., B.A. (University of Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Coon, Lynda L., Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, Department of History, 1990.

Coon, Craig N., Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 1997.

Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, Department of Chemistry and Biochemistry, 2015.

Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, Department of Plant Pathology, 1989.

Corrigan, Lisa, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Associate Professor, Department of Communication, 2007.

Costello, Thomas A., Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, Department of Biological and Agricultural Engineering, 1986.

Coston, Corey, M.A., B.S.B.A. (University of Arkansas), Instructor, Department of Accounting, 2010.

Costrell, Robert M., Ph.D. (Harvard University), B.A. (University of Michigan), Professor, Department of Education Reform, 2006.

Cothren, Jackson David, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Associate Professor, Department of Geosciences, 2002.

Cotton, Marge, M.A. (University of Arkansas), Assistant Professor, 2012.

Counce, Paul Allen, Ph.D. (University of Georgia), M.S. (Purdue University), B.S. (University of Tennessee-Martin), Professor, Department of Crop, Soil and Environmental Sciences, 1983.

Council, Julie, M.S.W (University of Arkansas at Little Rock), B.A. (University of Arkansas), Lecturer, School of Social Work, 2012.

Couvillion, Rick J., Ph.D., M.S.M.E. (Georgia Institute of Technology), B.S.M.E. (University of Arkansas), Associate Professor, Department of Mechanical Engineering, 1981.

Covey, Joe, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2015.

Covington, Matthew D., Ph.D. (University of California-Santa Cruz), B.S. (University of Arkansas), Assistant Professor, Department of Geosciences, 2012.

Cox, Nicole R., M.B.A. (University of Arkansas), B.S. (College of the Ozarks), Instructor, Department of Marketing, 2003.

Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2003.

Crabtree, Susan, M.A., B.A. (University of Northern Colorado), Instructor, Department of Theatre, 2016.

Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, Department of Food Science, 1989.

Crawford, Brandon L., Ph.D., (University of Oklahoma), M.A. (University of Arkansas), B.A. (McMurry University), Research Assistant Professor, Department of Sociology and Criminology, 2018.

Crawley, Michael, Ph.D. (University of Texas at Austin), M.B.A., B.S. (Indiana University), Assistant Professor, Department of Accounting, 2016.

Crisel, Brandon L., M.S., B.S. (Arkansas State University), Instructor, Department of Mathematical Sciences, 2009.

Cronan, Timothy P., Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, 1979.

Cummings, Michael, Ph.D. (University of Minnesota), J.D. and M.P.A. (Brigham Young University), B.S. (Utah Valley), Assistant Professor, Department of Management, 2017.

D

D’Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, Department of Anthropology, 1999.

Daily, Cynthia, D.B.A. (Louisiana Tech University), M.B.A., B.B.A. (Henderson State University), Clinical Associate Professor, Department of Accounting, 2016.

Daniels, Donna E., M.L.S., B.A. (Western Michigan University), Associate Librarian, University Libraries, 1982.

Daniels, Michael B., Ph.D., M.S. (University of Arkansas), B.S. (Pennsylvania State University), Professor, Department of Crop, Soil and Environmental Sciences, 1996.
Datta, Jyotishka, Ph.D. (Purdue University), M.Stat., B.Stat. (Indian Statistical Institute, Kolkata, India), Assistant Professor, Department of Mathematical Sciences, 2016.

Daugherty, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Professor, Department of Curriculum and Instruction, 2005.

Davidson, Fiona M., Ph.D., M.A. (University of Nebraska-Lincoln), B.A. (Newcastle Upon Tyne Polytechnic), Associate Professor, Department of Geosciences, 1992.

Davies, David G., M.P.A., B.A. (University of Arkansas), Associate Professor, Vice Provost for Student Affairs, 2010.

Davis, James Allen, Ph.D., M.S.M.E., B.S.M.E. (University of Arkansas), Instructor, Department of Mechanical Engineering, 1997.

Davis, Ralph K., Ph.D., M.S., B.S. (University of Nebraska, Lincoln), Professor, Department of Geosciences, 1994.

Davis, Geoffrey, Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Assistant Professor, Department of English, 2014.

Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, Department of Health, Human Performance and Recreation, 2018.

Davis, Ryan Y., M.S.W. (University of Texas at Austin), Lecturer, School of Social Work, 2018.

Day, Matthew B., Ph.D., M.S. (University of Chicago), B.S. (University of Texas), Associate Professor, Department of Mathematical Sciences, 2011.

Dean, Jason W., M.S. (Syracuse University), B.B.S. (Hardin-Simmons University), Assistant Librarian, University Libraries, 2013.

Deaton, Sheri, M.A.T., B.S. (University of Arkansas), Instructor, Department of Curriculum and Instruction, 2016.

DeGrange, Walter, M.S. (Naval Postgraduate School), B.E. (Vanderbilt University), Adjunct Assistant Professor, Program in Operations Management, 2014.

Del Gesso, Emilio, B.A. (University of Rome), Assistant Professor, Department of Architecture, 1997.

Delaplain, Theresa R., D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.M. (University of Michigan), Instructor, Department of Music, 1997.

DelCastillo, David, M.A.S. (Embry Riddle Aeronautical University), B.S (Embry Riddle Aeronautical University), Instructor, Program in Operations Management, 2014.

Delery, John, Ph.D. (Texas A&M University), M.S. (Memphis State University), B.S. (Tulane University of Louisiana), Professor, Department of Management, 1992.

Delezene, Lucas, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Instructor, Department of Anthropology, 2011.

Dempsey, Sean A., Ph.D., M.A. (Boston University), B.A. (Connecticut College), Assistant Professor, Department of English, 2009.

Denison, Sarah, M.A. (University of Arkansas), B.S. (University of Texas at Tyler), Instructor, Department of Communication, 2007.

Dennis, Norman D., Ph.D. (University of Texas at Austin), M.B.A. (Boston University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, Department of Civil Engineering, 1996.

Devich, Claudia Maria, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2011.

DeWitt, Dylan, M.F.A. (Yale University), Assistant Professor, School of Art, 2014.

Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, Department of Computer Science and Computer Engineering, 2004.

Diallo, Anne B., Ph.D., M.P.A., B.A. (University of Arkansas), Visiting Assistant Professor, Department of Political Science, 2012.

Diaz, Eva I., Ph.D., M.Ed. (Pennsylvania State University), B.A. (University of Puerto Rico), Research Associate, Department of Curriculum and Instruction, 2014.

DiBrezzo, Rosalie, Ph.D. (Texas Woman’s University), M.S. (Indiana University), B.S. (Brooklyn College), University Professor, Department of Health, Human Performance and Recreation, 1983.

Dickerson, Elizabeth B., B.S. (Mississippi State University), Lecturer, Department of Mathematical Sciences, 2013.

Diefenderfer, Vicki, Ph.D., M.S., B.S. (University of Tennessee), Clinical Assistant Professor, Department of Human Resource and Workforce Development Education, 2015.

Dingman, Shannon Wayne, Ph.D., M.S. (University of Missouri-Columbia), M.S. (Pittsburg State University), Associate Professor, Department of Mathematical Sciences, 2007.

DiPippa, Nikolai Shiro, B.S. (Hendrix College), Instructor, Clinton School of Public Service, 2006.

Dittmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, Department of Health, Human Performance and Recreation, 2008.

Ditzfeld, Christopher, M.S. (University of Oklahoma), Instructor, Department of Psychological Science, 2011.

Dixon, Bruce Lawrence, Ph.D., M.S. (University of California-Davis), B.A. (University of California-Santa Barbara), Professor, Department of Agricultural Economics and Agribusiness, 1984.

Dominick, John Andrew, Ph.D., M.S. (University of Alabama), B.S.B.A. (Louisiana Polytechnic Institute), Professor, Department of Finance, 1970.

Domínguez, Freddy C., Ph.D., M.A. (Princeton University), B.A. (Brown University), Assistant Professor, Department of History, 2014.

Domínguez Barajas, Elias, Ph.D., M.A., B.A. (University of Illinois at Chicago), Associate Professor, Department of English, 2011.

Donatelli, David, M.A. (Central Michigan University), B.A. (University of Pittsburgh), Instructor, Program in Operations Management, 2014.

Donoghue, Dan, Ph.D. (Texas A&M University), M.S. (Brigham Young University), B.S. (Medical University of South Carolina), Professor, Department of Poultry Science, 2000.

Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, Department of Poultry Science, 2000.

Dopp, Alex R., Ph.D., M.A. (University of Missouri), B.A. (University of Michigan), Assistant Professor, Department of Psychological Science, 2016.

Dorjee, Thupten, Ph.D. (Foreign Institution), Instructor, Humanities, 2008.

Dorogan, Vitaliy, Ph.D. (University of Arkansas), Assistant Professor, Nanotechnology, 2011.

Douglas, David, Ph.D., M.S.I.E., B.S.I.E. (University of Arkansas), University Professor, Department of Information Systems, 1975.

Douglas, Michael Edward, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, Department of Biological Sciences, 2011.

Douglas, Marlis R., Ph.D., M.S., B.S. (University of Tennessee), Professor, Department of Biological Sciences, 2012.

Dowdle, Andrew J., Ph.D. (Miami University), M.A. (University of Iowa), B.A. (University of Tennessee), Professor, Department of Political Science, 2003.

Dowdy, Gary, M.B.A. (Purdue University), B.S. (University of Arkansas), Instructor, Department of Management, 2014.

Dowe, Pearl Karen, Ph.D. (Howard University), M.A. (Georgia Southern University), B.S. (Savannah State University), Associate Professor, Department of Political Science, 2008.
Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, Department of Entomology, 2008.

Drawe, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Assistant Professor, Department of Sociology and Criminology, 2016.

Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, Department of Poultry Science, 2013.

Driver, Nelson G., B.S. (University of Arkansas), Instructor, Department of Finance, 1997.

Droven, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Visiting Assistant Professor, School of Art, 2015.

Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, Department of Biological Sciences, 2007.

Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Assistant Professor, Department of Geosciences, 2010.

Dunavant, Kristen, M.S.W. (Augustus College), B.S.W. (St. Olaf College), Lecturer, School of Social Work, 2017.

Duncan, Jamal, D.M.A., B.M. (University of Michigan), Instructor, Department of Music, 2013.

Durand-Morat, Alvaro, Ph.D., M.S. (University of Arkansas), B.S.E. (National University of Entre Rios), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2016.

DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Assistant Professor, Department of Biological Sciences, 2017.

Durdik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, Department of Biological Sciences, 1994.

Dwyer, Mavourneen, M.F.A. (University of Texas at Austin), B.A. (University of Montreal), Associate Professor, Department of Theatre, 1998.

E

Edgar, Don, Ph.D. (Texas A&M University), M.S., B.S. (Tarleton State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2008.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.

Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (New Mexico State University), Associate Professor, Department of Civil Engineering, 1999.

Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, Department of Plant Pathology, 2015.

Ehrhardt, Joseph, M.I.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.

Eidelman, Scott H., Ph.D. (University of Kansas), B.A. (University of Wisconsin-Madison), Associate Professor, Department of Psychological Science, 2008.

Eilers, Linda Hale, Ph.D. (Louisiana State University at Shreveport), M.Ed., B.S.E. (University of Arkansas at Little Rock), Clinical Associate Professor, Department of Curriculum and Instruction, 2001.

El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, Department of Electrical Engineering, 2007.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, Department of Electrical Engineering, 2001.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Assistant Professor, Department of Health, Human Performance and Recreation, 2013.

Elkin, Daniel, M.A., B.A. (University of San Diego), Instructor, Department of History, 2018.

Elkins, Cynthia, M.S., B.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2015.

Ellison, Marita, M.B.A. (Andrew Jackson University), B.S. (University of Central Florida), Instructor, Program in Operations Management, 2014.

Ellstrand, Alan E., Ph.D. (Indiana University at Bloomington), M.B.A. (North Illinois University), B.S. (University of Illinois-Urbana), Professor, Department of Management, 2000.

Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, Department of Curriculum and Instruction, 2010.

Embaye, Abel, Ph.D. (Georgia State University), M.A. (Tilburg University), B.A. (University of Asmara), Clinical Assistant Professor, Department of Economics, 2010.

Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, Eleanor Mann School of Nursing, 2012.

Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, Department of Curriculum and Instruction, 2011.

Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, Department of Sociology and Criminology, 2005.

Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S. (University of Wisconsin-Milwaukee), Associate Professor, Department of Sociology and Criminology, 2009.

English, John R., Ph.D. (Oklahoma State University) P.E., M.S.O.R., B.S.E.E. (University of Arkansas), Professor, Department of Industrial Engineering, 1991.

Entreklin, Sally A., Ph.D. (University of Notre Dame), Adjunct Assistant Professor, Department of Biological Sciences, 2014.

Erdman, Kimball Douglas, M.L.A. (University of Oregon), B.L.A. (Utah State University), Associate Professor, Department of Landscape Architecture, 2009.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Department of Poultry Science, 1994.

Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, Department of Anthropology, 2001.

Eskitch, Paolo, M.M. (Brooklyn College), Lecturer, Department of Music, 2012.

Esper, Terry L., Ph.D., M.B.A. (University of Arkansas), B.A. (Philander Smith College), Associate Professor, Department of Supply Chain Management, 2013.

Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (Iowa State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.

Estes, Hanna, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2014.

Etges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, Department of Biological Sciences, 1987.
Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock University), Assistant Professor, Department of Biological Sciences, 2013.

Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Associate Professor, Department of Biological Sciences, 2008.

Ewelukwa, Uche U., S.J.D., L.L.M. (Harvard University), L.L.M. (University College, London), J.D. equivalent (University of Nigeria), Professor, School of Law, 2001.

F

Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, Department of Civil Engineering, 2008.

Fan, Chenguang, Ph.D. (Iowa State University), B.S. (Nanjing University), Assistant Professor, Department of Chemistry and Biochemistry, 2016.

Fang, Di, Ph.D., W.P. (Arizona State University), B.A. (Nankai University), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2015.

Farmer, Amy Lynn, Ph.D., M.A. (Duke University), B.S. (Purdue University), Professor, Department of Economics, 1999.

Faske, Travis, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, Department of Plant Pathology, 2015.

Feldman, William A., Ph.D. (Queen’s University), M.S. (Northwestern University), B.S. (Tufts University), Professor, Department of Mathematical Sciences, 1971.

Feldner, Matthew T., Ph.D. (University of Vermont), M.A. (West Virginia University), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Psychological Science, 2005.

Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Assistant Professor, Department of Geosciences, 2013.

Ferguson, Alishia Juanelle, Ph.D., M.S., B.A. (University of Texas Arlington), Clinical Assistant Professor, School of Social Work, 2008.

Fernstrom, Eric, Ph.D. (University of Arkansas), Instructor, Department of Civil Engineering, 2014.

Ferrier, Gary D., Ph.D. (University of North Carolina–Chapel Hill), B.A. (University of Wisconsin-Madison), University Professor, Department of Economics, 1993.

Fincher, Samuel Mack Edwin, M.S. (University of Arkansas), B.S. (University of the Ozarks), Instructor, Department of Mathematical Sciences, 2009.

Fitzpatrick, Lynn, M.Arch. (Rice University), B.S. (Cornell University), Assistant Professor, Department of Architecture, 1999.

Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Department of Sociology and Criminology, 2005.

Fitzpatrick, Ellen Therese, Ph.D. (Michigan State University), Professor, Clinton School of Public Service, 2012.

Flaccus, Janet A., LL.M. (University of Illinois-Urbana-Champaign), J.D., M.A. (University of California-Davis), Professor, School of Law, 1984.

Flanigan, J. Michael, Ph.D. (University of Arkansas), M.P.H., M.A., B.A. (University of Minnesota), Lecturer, Department of Political Science, 2016.

Fleck, Mary, Instructor, Department of Civil Engineering, 2007.

Flynn, John, M.B.A., J.D. (Case Western Reserve University), B.S. (John Carroll University), Instructor, Program in Operations Management, 2014.

Foley, Larry D., M.S. (University of Central Arkansas), B.A. (University of Arkansas), Professor, School of Journalism and Strategic Media, 1993.

Foote, Rebecca K., Ph.D. (University of Illinois at Urbana-Champaign), M.A. (Rice University), B.A. (University of Houston), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Forscher, Patrick, Ph.D. (University of Wisconsin), B.A. (Macalester College), Assistant Professor, Department of Psychological Science, 2017.

Foster, Sharon Elaine, Ph.D., LL.M. (University of Edinburgh, Scotland), J.D. (Loyola Marymount University), B.A. (University of California-Los Angeles), Associate Professor, School of Law, 2000.

Foster, William, LL.M. (New York University), J.D. (University of Arkansas), B.S. (University of Central Arkansas), Assistant Professor, School of Law, .

Foster, Bobbie, M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2015.

Fosu, Ignatius, Ph.D., M.A. (University of Alabama), B.A. (University of Ghana, Accra), Associate Professor, School of Journalism and Strategic Media, 2005.

Fowler, Jason, M.B.A. (John Brown University), B.S.B.A. (University of Arkansas), Instructor, Department of Accounting, 2015.

Frank, Kate L., M.F.A. (John Brown University), B.S. (California State University-Los Angeles), Lecturer, Department of Theatre, 2006.

Franklin, Carly T.S., M.S.W. (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2014.

Franks, Lisa, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2014.

Frazier, Kimberly Frances, Ph.D. (University of South Carolina–Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Fredrick, David Charles, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.

Freeman, Katherine, M.S.W. (University of Georgia), B.A. (University of Arkansas), Lecturer, School of Social Work, 2017.

Freeze, Ron, Ph.D. (Arizona State University), M.B.A. (University of Missouri–Kansas City), B.S. (General Motors Institute), Clinical Associate Professor, Department of Information Systems, 2015.

French, Mandy, B.B.A. (University of Oklahoma), Instructor, Department of Accounting, 2015.

Frentz, Tom, Ph.D., M.S., B.S. (University of Wisconsin-Madison), Professor, Department of Communication, 1985.

Friscoe, Louis F., M.S., B.S. (Emby Riddle Aeronautical University), Instructor, Program in Operations Management, 2014.

Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, Department of Chemistry and Biochemistry, 1992.

Fritz, Angela I., Ph.D. (Loyola University), M.A. (University of Wisconsin-Madison), B.A. (University of Iowa), Associate Librarian, University Libraries, 2014.

Fu, Huaxiang, Ph.D., M.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, Department of Physics, 2002.

Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, Department of Supply Chain Management, 2015.

Fukushima, Tatsuya, Ph.D., M.A. (University of Science and Technology of China), Assistant Professor, Department of World Languages, Literatures and Cultures, 2000.
G

Gab, John, Ph.D. (Columbia University), M.A. (University of Southern California), B.A. (University of California-Los Angeles), Professor, Department of Political Science, 2009.

Gaddberry, M. Shane, Ph.D., M.S., B.S. (University of Arkansas), Associate Professor, Department of Animal Science, 2006.

Gaduh, Arya, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California-Berkeley), Assistant Professor, Department of Economics, 2013.

Gage, Justin, Ph.D., M.A., B.A. (University of Arkansas), Instructor, Department of History, 2016.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, Department of Health, Human Performance and Recreation, 2015.

Gallagher, John M., Ph.D., M.S.W. (Arizona State University), B.A. (State University of New York at Plattsburgh), Assistant Professor, School of Social Work, 2016.

Gallini, Brian R., J.D. (University of Michigan-Ann Arbor), LL.M. (Temple University), B.A. (College of the Holy Cross), Professor, School of Law, 2008.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Ganson, Judy, M.P.A. (University of California-Riverside), M.S. (University of Illinois-Urbana-Champaign), B.A. (Purdue University), Associate Librarian, University Libraries, 2001.

Garcia, M. Elena, Ph.D., M.S. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Professor, Department of Horticulture, 2005.

Garcia-Dastugue, Sebastien, Ph.D., M.A. (The Ohio State University), M.B.A. (Instituto de Altos Estudios, Universidad Austral), Clinical Assistant Professor, Department of Supply Chain Management, 2015.

Garner, Jerald, M.S. (University of Arkansas), B.S. (Park University), Instructor, Program in Operations Management, 2014.

Garrett, B. J., M.S.N. (Angelo State University), Instructor, Eleanor Mann School of Nursing, 2018.

Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, School of Human Environmental Sciences, 2014.

Gasher, Michael S., Ph.D., M.S., B.S. (Brigham Young University), Assistant Professor, Department of Computer Science and Computer Engineering, 2012.

Gastineau, Jana M., M.S., M.A., B.S. (Arkansas State University), Instructor, Department of Mathematical Sciences, 2011.

Gattis, J. L., Ph.D. (Texas A&M University), M.S.C.E. (University of Texas Arlington), B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.

Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, Department of Computer Science and Computer Engineering, 2007.

Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen’s University, Canada), Professor, Department of Computer Science and Computer Engineering, 2008.

Gauri, Dinesh K., Ph.D., M.A. (State University of New York-Buffalo), M.S. (Indian Institute of Technology, New Delhi), Professor, Department of Marketing, 2016.

Gbur, Edward E., Ph.D., M.S. (The Ohio State University), B.S. (Saint Francis University), Professor, Department of Crop, Soil and Environmental Sciences, 1987.
Undergraduate Faculty

Goforth, Robyn, Ph.D., B.S. (University of Arkansas), Research Assistant Professor, Department of Biological Sciences, 2001.

Goggin, Fiona, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, Department of Entomology, 2001.

Gomez, Rocio, Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Assistant Professor, Department of History, 2014.

Goodman-Strauss, Chaim, Ph.D., B.S. (University of Texas at Austin), Professor, Department of Mathematical Sciences, 1994.

Gosman, Sara, J.D., M.P.A. (Harvard University), A.B. (Princeton University), Assistant Professor, School of Law, 2014.

Gosman, Alan R., Ph.D. (Harvard University), Associate Professor, Department of Music, 2014.

Gould, Kara, Ph.D. (University of Utah), M.A. (Wheaton College), B.A. (Wheaton College), Assistant Professor, School of Journalism and Strategic Media, 2016.

Goussevskaia, Anna, Ph.D. (University of Warwick, United Kingdom), B.Sc. (Federal University of Minas, Brazil), Clinical Assistant Professor, Department of Management, 2013.

Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), Professor, Department of Agricultural Education, Communications and Technology, 1985.

Grant, Alphonso W., Ph.D. (Pennsylvania State University), Assistant Professor, School of Art, 2017.

Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, Department of Health, Human Performance and Recreation, 2010.

Greathouse, Denise A., Ph.D. (University of Arkansas), Research Associate Professor, Department of Chemistry and Biochemistry, 1997.

Greene, Jay Phillip, Ph.D., A.M. (Harvard University), B.A. (Tufts University), Distinguished Professor, Department of Education Reform, 2005.

Greene, Aleza R.S., Ph.D., M.A. (Brandeis University), B.A. (Tufts University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2006.

Greene, Nicholas P., Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Assistant Professor, Department of Health, Human Performance and Recreation, 2013.

Greenhaw, William Karl, J.D. (University of Arkansas), B.A. (Westminster College), Instructor, Department of Accounting, 2001.

Greenlee, Lauren F., Ph.D., M.S. (University of Texas, Austin), BSChE (University of Michigan), Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2015.

Griffith, Lauren Miller, Ph.D., M.A. (Indiana University), B.A. (Texas A&M University), Visiting Assistant Professor, Department of Anthropology, 2013.

Grover, Varun, Ph.D. (University of Pittsburgh), M.B.A. (Southern Illinois University), B.S. (Indian Institute of Technology), Distinguished Professor, Department of Information Systems, 2017.

Gu, Jingping, Ph.D. (Texas A&M University), M.A. (Peking University), B.A. (Renmin University of China, Beijing), Associate Professor, Department of Economics, 2008.

Gunter, Stacey A., Ph.D. (Oklahoma State University), M.S. (University of Nevada Reno), B.S. (Oregon State University), Adjunct Professor, Department of Animal Science, 1996.

Gupta, Nina, Ph.D., A.M. (University of Michigan-Ann Arbor), M.A., B.A. (University of Allahabad), Distinguished Professor, Department of Management, 1984.

H

Hackstadt, Angela, M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Professor, University Libraries.

Haggard, Brian Edward, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, Department of Biological and Agricultural Engineering, 2006.

Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.

Halbrook, Steve A., J.D. (Drake University), Ph.D. (Iowa State University), B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2008.

Hale, Micah, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, Department of Civil Engineering, 2002.

Hale, Cathy J., M.S.N. (University of Arkansas), M.S. (University of Central Arkansas), B.S.N. (Arkansas Tech University), Clinical Instructor, Eleanor Mann School of Nursing, 2013.

Hall, Kevin D., Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.

Hallett, LewEllyn, M.F.A. (Bowling Green State University), B.A. (University of New Mexico), Instructor, Department of English, 2013.

Ham, Richard, Ed.D. (University of Arkansas at Little Rock), M.A.S. (Embry-Riddle Aeronautical University), B.S. (Park University), Instructor, Program in Operations Management, 2014.

Ham-Holm, Lindsay S., Ph.D., M.A., B.A. (University of Nebraska-Lincoln), Associate Professor, Department of Psychological Science, 2007.

Hamad, Bothina, Ph.D. (University of Jordan), Research Associate Professor, Department of Physics, 2016.

Hamilton, John H., M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2002.

Hamm, Cora, M.S. (New York University), Instructor, School of Human Environmental Sciences, 2016.

Hammel, Alice, D.M.A. (Shenandoah University), M.M. (Florida State University), B.M. (Shenandoah University), Instructor, Department of Music, 2016.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008.

Hammond, Kelly, Ph.D. (Georgetown University), M.A. (Simon Fraser University), B.A. (Bishop’s University), Assistant Professor, Department of History, 2015.
Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 2000.

Hanson, Alexander J., M.F.A. (University of Iowa), Instructor, School of Art, 2015.

Hao, Li, Ph.D. (George Mason University), M.S.C.E. (Hong Kong University of Science and Technology), B.A. (Fudan University, China), Assistant Professor, Department of Economics, 2011.

Happgood, Thomas Layley, M.F.A., B.A. (University of Arizona), Associate Professor, School of Art, 2005.

Harding, Lorna, M.S. (University of Alberta, Canada), B.A. (University of Western Ontario, Canada), Instructor, School of Human Environmental Sciences, 2004.

Hardke, Jarrod T., Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2013.

Hare, Laurence, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A. (University of Tennessee at Chattanooga), Associate Professor, Department of History, 2010.

Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Department of Poultry Science, 2000.

Harper, Misti, Ph.D., (University of Arkansas), M.A. (University of Central Arkansas), B.A. (University of the Ozarks), Instructor, Department of History, 2017.

Harrington, Phil, Ph.D., M.S. (University of Notre Dame), B.S. (Whitworth College), Associate Professor, Department of Mathematical Sciences, 2009.

Harris, Casey Taggart, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A&M University), Associate Professor, Department of Sociology and Criminology, 2011.

Harrison, Edmund O., Ph.D. (Imperial College, London), M.M. (University of Warwick), Clinical Assistant Professor, Department of Mathematical Sciences, 2010.

Harter, William G., Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, Department of Physics, 1986.

Hason, Alexander, M.F.A., M.A. (University of Iowa), B.F.A. (University of Minnesota, Duluth), Instructor, School of Art, 2015.

Havens, Jerry A., Ph.D. (University of Oklahoma), M.S.Ch.E. (University of Colorado-Boulder), B.S.Ch.E. (University of Arkansas), Distinguished Professor, Ralph E. Martin Department of Chemical Engineering, 1970.

Haydar, Paula Marie, Ph.D., M.F.A. (University of Arkansas), M.Ed., B.S. (University of Massachusetts), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2006.

Haydar, Adnan Fuad, Ph.D. (University of California-San Diego), M.A., B.A. (American University of Beirut), Professor, Department of World Languages, Literatures and Cultures, 1993.

Hayes, David, M.S. (Murray State University), B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2007.

Hayes, Phil, Ph.D., M.S. (Texas A&M University), B.S. (University of Arkansas), Associate Professor, Department of Geosciences, 2000.

Hearne, Brittany Nicole, Ph.D., M.A., (Vanderbilt University), B.S. (Texas A&M), Assistant Professor, Department of Sociology and Criminology, 2018.

Hearth, Douglas P., Ph.D. (University of Iowa), M.A. (University of Iowa), B.A. (University of Wisconsin, Madison), Associate Professor, Department of Finance, 1989.

Heffernan, Michael Joseph, Ph.D., M.A. (University of Massachusetts), A.B. (University of Detroit), Professor, Department of English, 1986.

Hemphill, Dewey, M.S. (University of Arkansas), B.A. (Memphis State University), Instructor, Program in Operations Management, 2014.

Henderson, Jaye, M.S.N., B.S.N. (Arkansas Tech University), Clinical Instructor, Eleanor Mann School of Nursing, 2013.

Henderson, Craig, M.B.A. (University of Nevada), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2014.

Henry, Ralph Leroy, Ph.D., M.S. (University of Florida), B.S.E. (University of Kansas), Distinguished Professor, Department of Biological Sciences, 1996.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008.

Henry, Christopher Garrett, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Assistant Professor, Department of Biological and Agricultural Engineering, 2011.

Herman, Greg, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, Department of Architecture, 1991.

Herman, Jeremy J., Ph.D. (University of Arkansas), B.S.Ch.E. (University of Toledo), Clinical Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2013.

Hernandez, Sarah, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Assistant Professor, Department of Civil Engineering, 2015.

Hernandez-Miranda, Michael, Ph.D., M.A. (Texas A&M University), B.A. (University of Oriente), Instructor, Department of World Languages, Literatures and Cultures, 2015.

Herald, Warren, Ph.D. (University of Michigan), Assistant Professor, Department of Philosophy, 2014.

Herald, Laura K., Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Clinical Assistant Professor, School of Human Environmental Sciences, 2015.

Hersberger, Margaret, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.

Herzberg, Amy, M.F.A. (California Institute of the Arts), B.A. (Arizona State University), Distinguished Professor, Department of Theatre, 1989.

Hergen, Joseph B., Ph.D. (University of Notre Dame), B.S. (Louisiana State University), Assistant Professor, Department of Physics, 2013.

Hergen, Jacob, M.M. (Manhattan School of Music), B.M. (Berkeley College of Music), Instructor, Department of Music, 2016.

Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Ralph E. Martin Department of Chemical Engineering, 2006.

Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2006.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, Department of Food Science, 1992.

Hevel, Michael Stephen, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Assistant Professor, Higher Education, 2012.

Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Heymsfield, Ernie, Ph.D. (City University of New York), M.S.C.E. (Polytechnic University), Associate Professor, Department of Civil Engineering, 2001.

Hicks, Morgan, M.F.A. (University of Arkansas), M.A. (Missouri State University), B.F.A. (Arkansas State University), Assistant Professor, Department of Theatre, 2007.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.
Hill, Laura, Ph.D., M.S. (University of Arkansas), B.S. (John Brown University), Instructor, School of Human Environmental Sciences, 2017.

Hinds, Heather Rae, M.A. (University of Arkansas), B.S. (University of Central Missouri), Instructor, Department of World Languages, Literatures and Cultures, 2008.

Hinrichsen, Lisa, Ph.D., M.A. (Boston University), B.A. (Wellesley College), Associate Professor, Department of English, 2008.

Hodges, Amy M., B.A. (Louisiana Tech College Acadian Campus), Instructor, 2005.

Hoehele, Hartmut, Ph.D., B.Com. (Victoria University of Wellington), Associate Professor, Department of Information Systems, 2013.

Hofer, Christian, Ph.D. (University of Maryland University College), B.A. (European School of Business), Associate Professor, Department of Supply Chain Management, 2007.

Hoffpaur, Susan Annette, Ph.D. (University of Michigan-Ann Arbor), Distinguished Professor, Clinton School of Public Service, 2011.

Hofffield, Christine, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2017.

Holland, Edward C., Ph.D., M.A. (University of Colorado, Boulder), B.A. (Princeton University), Assistant Professor, Department of Geosciences, 2016.

Holliayd, Erica, Ed.D., M.Ed., B.S.E. (University of Arkansas), Assistant Professor, Department of Information Systems, 2014.

Hollingsworth, Cathy A., M.A. (University of Arkansas), Instructor, Department of Communication, 2011.

Holloway, Ginger L., M.S.N. (Walden University), B.S.N. (Northeastern State University), Instructor, Eleanor Mann School of Nursing, 2013.

Holloway, Bradford, Ph.D. (Kennedy Western University), M.S.W. (University of Arkansas at Little Rock), B.S.W. (Harding University), Lecturer, School of Social Work, 2018.

Holm, Jeremy, M.A., B.S. (University of Nebraska), Instructor, Department of Psychological Science, 2008.

Holyfield, Lori C., Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, Department of Sociology and Criminology, 1995.

Hopkins, John D., Ph.D. (University of Arkansas), M.S., B.S. (Clemson), Associate Professor, Department of Entomology, 2002.

Horii, Yoko, M.A. (University of Kansas), B.A. (William Jewell College), Instructor, Department of World Languages, Literatures and Cultures, 2017.

Hornitz, Andrew W., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Maryland), Professor, Department of Economics, 1998.

House, Glenda J., M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Clinical Associate Professor, Department of Social Work, 1997.

Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, Department of Food Science, 2002.

Howie, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, Department of Health, Human Performance and Recreation, 2016.

Howlett, Betsy, Ph.D. (Duke University), M.S., B.A. (Lehigh University), Professor, Department of Marketing, 1995.

Howlett, Kristina-Marie, Ph.D. (University of Arkansas), M.P.S. (Manhattanville College), B.A. (University of Connecticut), Assistant Professor, Department of Curriculum and Instruction, 2016.

Hoyer, Jennifer M., Ph.D., M.A. (University of Minnesota-Twin Cities), B.A. (University of Tulsa), Associate Professor, Department of World Languages, Literatures and Cultures, 2007.

Hsu, Hung-Chia Scott, Ph.D. (University of North Carolina-Chapel Hill), M.A. (University of Southern California), B.A. (National Taiwan University), Assistant Professor, Department of Finance, 2015.

Hsue, V. Jo, Ph.D., M.F.A. (Pennsylvania State University), B.A. (Rice University), Assistant Professor, Department of English, 2017.

Hu, Jing, Ph.D. (Tulane University), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2016.

Huang, Po-Hao Adam, Ph.D., M.S., B.S. (University of California-Los Angeles), Associate Professor, Department of Mechanical Engineering, 2006.

Huang, Miaoning, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, Department of Computer Science and Computer Engineering, 2010.

Huang, Quiqiong, Ph.D. (University of California-Davis), B.S. (Remin University of China), Professor, Department of Agricultural Economics and Agribusiness, 2013.

Huang, Yan, Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.

Hubert, Stephanie K., M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, School of Human Environmental Sciences, 2015.

Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, Department of Human Resource and Workforce Development Education, 2004.

Huitink, David, Ph.D., M.S.M.E., B.S.M.E. (Texas A&M University), Assistant Professor, Department of Mechanical Engineering, 2017.

Hulen, Jeannie, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Associate Professor, School of Art, 2002.

Hunt, Valerie H., Ph.D., J.D., B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2005.

Hunter, Justin R., Ph.D. (University of Hawai‘i at Manoa), M.M., B.A. (University of Arkansas), Lecturer, Department of Music, 2017.

Hutchins, Rhett J., Ph.D. (University of Georgia), M.Ed., B.S. (Clemson University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2014.

Hutto, Gregory T., M.S. (Stanford University), B.S. (U.S. Naval Academy), Instructor, Program in Operations Management, 2014.

Hyatt, David Graham, M.B.A., B.S.B.A. (University of Arkansas), Clinical Associate Professor, Department of Supply Chain Management, 2011.

Hyman, Jeremy S., C.Phil. (University of California, Los Angeles), M.A. (Princeton University), B.A. (University of Michigan), Instructor, Department of Philosophy, 2013.

Imbeau, Marcia B., Ph.D. (University of Connecticut), M.Ed. (University of Arkansas at Little Rock), B.A. (Hendrix College), Professor, Department of Curriculum and Instruction, 1991.

Irish, Shawn D., M.F.A. (University of Arkansas), B.A. (Missouri Southern State University), Assistant Professor, Department of Theatre, 2013.

Irungu, David M., M.A (University of Mississippi), B.Ed. (University of Nairobi, Kenya), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Isbell, Bradley, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Economics and Agribusiness, 2017.

Ivey, Mack, Ph.D., B.S. (University of Georgia), Associate Professor, Department of Biological Sciences, 1992.

Iyer, Shilpa, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, Department of Biological Sciences, 2016.
Jackson, Brandon, Ph.D. (Florida State University), Assistant Professor, Department of Sociology and Criminology, 2013.

Jacobs, Lynn Frances, Ph.D., M.A. (New York University), B.A. (Princeton University), Distinguished Professor, School of Art, 1989.

Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, Department of Architecture, 2012.

Jadhav, Arva, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California, Berkeley), Assistant Professor, Department of Economics, 2013.

Jandik, Tomas, Ph.D. (University of Pittsburgh), M.S., B.S. (Czech Technical University), Professor, Department of Finance, 2000.

Jandik, Dobrina, Ph.D. (University of Arkansas), M.Sc.Eng. (University of Chemical Technology), M.B.A. (University of Montana), Clinical Associate Professor, Department of Finance, 2017.

Janicke, Sophie H., Ph.D. (Florida State University), M.S. (Eberhard Karls University), B.A. (Friedrich Willhelms University), Visiting Assistant Professor, Department of Communication, 2014.

Jarnagin, Robyn, LL.M. (New York University), J.D., B.S. (University of Montana), Visiting Assistant Professor, Department of Accounting, 2016.

Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, Eleanor Mann School of Nursing, 2012.

Jeffers, Neal, M.S.Ed. (Old Dominion University), B.E.S.(University of Missouri), Instructor, Program in Operations Management, 2017.

Jennings, John A., Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, Department of Animal Science, 1998.

Jennings, Jackson, Ph.D. (University of Jyväskylä), M.S. (University of Arkansas), B.A. (Hendrix College), Clinical Assistant Professor, Department of Biological Sciences, 2013.

Jennings, Tameka A., Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Clinical Assistant Professor, Department of Biological Sciences, 2017.

Jensen, Thomas D., Ph.D., M.A., B.A. (University of Arkansas), Professor, Department of Marketing, 1982.

Jensen, Molly R., Ph.D., M.A. (University of Arkansas), B.S. (Southwest Missouri State University), Clinical Associate Professor, Department of Marketing, 2003.

Jensen, Sarah, M.B.A., B.A. (Webster University), Instructor, Department of Marketing, 2009.

Jensen, David C., Ph.D., M.S., B.S. (Oregon State University), Assistant Professor, Department of Mechanical Engineering, 2012.

Jensen, Toni, Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Assistant Professor, Department of English, 2014.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, Department of Biomedical Engineering, 2014.

Jensen, Hanna Katarina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, Department of Biomedical Engineering, 2015.

Jilka, Elizabeth C., M.F.A., B.A. (University of Arkansas), Lecturer, Department of Theatre, 2017.

Joffe Minor, Tacy Marie, Ph.D. (Northwestern University), M.A., B.S. (University of Arkansas), Visiting Assistant Professor, Department of Physics, 2011.

Jogan, Kathleen, Ed.D., M.S. (University of Arkansas), B.S. (Ursinus College), Instructor, Department of Animal Science, 2015.

Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), Professor, Department of Agricultural Education, Communications and Technology, 1993.

Johnson, Jon, Ph.D. (Indiana University at Bloomington), M.B.A., B.S. (University of Arkansas), Professor, Department of Management, 1996.

Johnson, Donn T., Ph.D., M.S. (Michigan State University), B.S. (University of Minnesota), Professor, Department of Entomology, 1978.

Johnson, Mark, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (City University of New York, Brooklyn College), Professor, Department of Mathematical Sciences, 1995.

Johnson, Michael, M.S.C.E. (University of Pittsburgh), B.S.C.E. (University of Minnesota), B.A. (Chapman College), Professor, Department of Civil Engineering, 2010.

Johnson, Michele, M.A., B.A. (Sam Houston State University), Instructor, Department of History, 2018.

Johnson-Carter, Charlene M., Ph.D. (Emory University), M.B.A. (Atlanta University), M.Ed., B.A. (University of Cincinnati), Associate Professor, Department of Curriculum and Instruction, 1992.

Jones, Linda Carol, Ph.D. (University of New Mexico), M.A. (University of Arkansas), M.A. (University of Arizona), B.A. (Northeast Louisiana University), Associate Professor, Department of World Languages, Literatures and Cultures, 1988.

Jones, Chesh, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.

Jones, Phillip, M.B.A., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2014.

Jong, Ing-Chang, Ph.D. (Northwestern University), M.S.C.E. (South Dakota School of Mines and Technology), B.S.C.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 1965.

Jordan, Gerald Bernard, M.S.J. (Northwestern University), B.A. (University of Arkansas), Associate Professor, School of Journalism and Strategic Media, 1995.

Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, Department of Entomology, 2015.

Joźkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Judges, Donald P., Ph.D. (University of Tulsa), J.D. (University of Maryland University College), B.A. (Johns Hopkins University), Professor, School of Law, 1989.

Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Kahf, Mohja, Ph.D., B.A. (Rutgers State University-New Brunswick), Associate Professor, Department of English, 1995.

Kahng, Er-Gene, D.M. (Northwestern University), A.D., M.M. (Yale University), B.A. (University of California-Los Angeles), Associate Professor, Department of Music, 2007.

Kali, Raja, Ph.D., M.A. (University of Maryland University College), B.S.C. (University of Calcutta), Professor, Department of Economics, 1999.

Karcher, Douglas Edward, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, Department of Horticulture, 2000.
Kashiwagi, Tomoko, D.M.A. (University of Texas at Austin), M.M., B.M. (Indiana University), Assistant Professor, Department of Music, 2012.

Kavouras, Stavros Anastasios, Ph.D. (University of Connecticut), M.S. (University of Colorado-Colorado Springs), B.S. (University of Athens-Greece), Associate Professor, Department of Health, Human Performance and Recreation, 2012.

Kay, Marvin, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Missouri-Columbia), Professor, Department of Anthropology, 1980.

Kayser, Casey Lee, Ph.D. (Louisiana State University), M.A. (University of Missouri-Columbia), B.A. (Westminster College), Assistant Professor, Department of English, 2012.

Kegley, Beth, Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytech Institute and State University), Professor, Department of Animal Science, 1996.

Keiffer, Elizabeth, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Instructor, Department of Information Systems, 2016.

Kelley, Donald R., Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Pittsburgh), Professor, Department of Political Science, 1980.

Kelley, Christopher Rowand, LL.M. (University of Arkansas), J.D. (Howard University), B.A. (Louisiana State University at Shreveport), Associate Professor, School of Law, 1998.

Kelley, Jason, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.

Kemper, Nathan, M.S., B.S. (University of Arkansas), Clinical Professor, Department of Agricultural Economics and Agribusiness, 2014.

Kennellick, Julia Dusk, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, Department of Physics, 2003.

Kennellick, Daniel John, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Associate Professor, Department of Physics, 2004.

Kennemer, Jerilyn Laura, M.A., B.S. (Oklahoma State University), Instructor, Department of Communication, 2013.

Kent, Laura B., Ph.D. (University of Wisconsin-Madison), M.S. (Purdue University Calumet), B.S. (Purdue University), Associate Professor, Department of Curriculum and Instruction, 2006.

Kent, John, Ph.D. (University of Tennessee), M.B.A. (University of Dallas), B.S. (Henderson State University), Clinical Associate Professor, Department of Supply Chain Management, 2014.

Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S.S. (University of Wisconsin-LaCrosse), Clinical Professor, Department of Health, Human Performance and Recreation, 1996.

Kerr, Grace R., M.A. (Texas A&M University), B.A. (Sam Houston State University), Clinical Instructor, Department of Curriculum and Instruction, 2006.

Kerr, Brinck, Ph.D. (Texas A&M University), B.A. (University of Texas at Austin), Professor, Department of Political Science, 1994.

Keskek, Sami, Ph.D. (Texas A&M University), M.S. (Fatih University), B.S. (Bogazici University), Assistant Professor, Department of Accounting, 2011.

Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, Department of Poultry Science, 2010.

Killenbeck, Mark R., J.D., Ph.D. (University of Nebraska-Lincoln), B.A. (Boston College), Distinguished Professor, School of Law, 1988.

Killenbeck, Ann Mallatt, Ph.D. (University of Michigan-Ann Arbor), J.D. (University of Nebraska-Lincoln), Associate Professor, School of Law, 2003.

Killian, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, School of Human Environmental Sciences, 2001.

Kilyanek, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Assistant Professor, Department of Chemistry and Biochemistry, 2014.

Kim, Jin-Woo, Ph.D. (Texas A&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of Iowa), Professor, Department of Biological and Agricultural Engineering, 2001.

Kim, Myungeon Michelle, Ph.D., B.S. (University of Texas at Austin), Clinical Assistant Professor, Department of Biomedical Engineering, 2013.

Kim, Jae Kyeom, Ph.D. (University of Minnesota), M.S., B.S. (Korea University), Assistant Professor, School of Human Environmental Sciences, 2016.

Kimbrough, Hanna A.D., M.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.

Kindy, Phillip D., M.I.S. (University of Arkansas), B.S. (DeVry Institute of Technology), Instructor, Department of Information Systems, 2012.

King, Leldon Dale, B.S. (University of Central Oklahoma), Instructor, 2010.

King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, School of Art, 2011.

King, Tiffany, M.A. (University of Arkansas), B.J. (University of Missouri), Instructor, School of Journalism and Strategic Media, 2014.

King, Bonnie, M.A.T., B.S.E. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2015.

Kippenbrock, Thomas A., Ed.D. (Indiana University at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, Eleanor Mann School of Nursing, 2003.

Kirkpatrick, Terry, Ph.D. (North Carolina State University), M.S., B.S. (University of Arkansas), Professor, Department of Plant Pathology, 1984.

Kirkwood, Patricia Elaine, M.S. (University of Illinois-Urbana-Champaign), B.S. (Pacific Lutheran University), Associate Librarian, University Libraries, 2004.

Kish-Gephart, Jennifer, Ph.D. (Pennsylvania State University), M.B.A., B.S. (Drexel University), Associate Professor, Department of Management, 2010.

Knighten, Christ, D.M.A., M.M. (University of Colorado), B.M. (Baylor University), Associate Professor, Department of Music, 2009.

Knighten, Janet Whitman, M.M., B.M. (East Carolina University), Assistant Professor, Department of Music, 2009.

Koch, Lynn C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.

Koeppe, Roger E., Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, Department of Chemistry and Biochemistry, 1979.

Koh, Dongva, Ph.D. (Washington University-St. Louis), M.A. (Boston University), B.A. (Keio University), Assistant Professor, Department of Economics, 2014.

Koltes, Dawn A., Ph.D. (Iowa State University), Adjunct Assistant Professor, Department of Animal Science, 2015.

Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, Department of Poultry Science, 2006.
Kopp, Steven W., Ph.D. (Michigan State University), M.B.A. (University of Southern Mississippi), B.S. (University of Missouri-Rolla), Associate Professor, Department of Marketing, 1992.

Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, Department of Plant Pathology, 1999.

Korth, Deborah, Ed.D. (University of Arkansas), M.Ed. (North Carolina State University), B.S. (University of Nebraska-Lincoln), Clinical Associate Professor, J. William Fulbright College of Arts and Sciences, 2004.

Koski, Patricia, B.A., M.A., Ph.D. (Washington State University), Associate Professor, Department of Sociology and Criminology, 1984.

Kovacs, Kent F., Ph.D. (University of California-Davis), B.A. (Vassar College), Associate Professor, Department of Agricultural Economics and Agribusiness, 2012.

Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, Department of Biological Sciences, 1981.

Kristian, Allee, Ph.D., M.B.A. (Indiana University), B.S. (Bringham Young University), Associate Professor, Department of Accounting, 2016.

Kucharczyk, Suzanne, Ed.D. (Columbia University Teacher’s College), M.Ed., B.S. (University of Illinois-Urbana-Champaign), Assistant Professor, Department of Curriculum and Instruction, 2014.

Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, Department of Poultry Science, 2000.

Kuilen, Susie S., Ph.D. (Louisiana State University), M.S. (Army War College), M.A. (Northwestern State University), B.A. (Henderson State University), Instructor, 2011.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Assistant Professor, Department of Physics, 2013.

Kutz, Bryan Richard, M.S. (Western Kentucky University), B.S. (Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, Department of Animal Science, 1997.

Kvamme, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, Department of Anthropology, 1999.

Kwon, Young Min, Ph.D. (Texas A&M University), M.S., B.S. (Seoul National University), Associate Professor, Department of Poultry Science, 2002.

L

Laincz, Jozef, Ph.D. (University of Arkansas), Magister, B.S. (Comenius University Bratislava), Assistant Librarian, University Libraries, 2015.

Lamb, Andrew P., Ph.D. (Boise State University), M.S. (Florida Institute of Technology), B.S. (University of Dublin, Trinity), Assistant Professor, Department of Geosciences, 2017.

Lamm, Connie, Ph.D., M.A. (University of Toronto, Canada), B.A. (University of Waterloo), Assistant Professor, Department of Psychological Science, 2016.

Lampinen, James Michael, Ph.D., M.S. (Northwestern University), B.S. (Elmhurst College), Distinguished Professor, Department of Psychological Science, 1998.

Landman, Michael, M.F.A. (Columbia University), B.A. (State University of New York at Binghamton), Associate Professor, Department of Theatre, 2004.

Lane, Valerie Jean, M.F.A. (Pennsylvania State University), B.F.A. (Memphis College of Art), Instructor, Department of Theatre, 2008.

Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Assistant Professor, School of Art, 2014.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.

LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, School of Art, 1998.

LaRue, Cheri Sue, M.S. (University of Tennessee), B.S. (Appalachian State University), Instructor, Department of Biological Sciences, 2010.

Lasater, Kara A., Ed.D. (University of Arkansas), Ed.S., M.S. (Pittsburg State University), B.A. (Drury University), Assistant Professor, Department of Curriculum and Instruction, 2014.

Lattanzi, Paula, J.D. (University of Arkansas), M.S. (West Virginia University), Instructor, Program in Operations Management, 2014.

Lau, Wing, Ph.D. University of Oregon, M.M. (Indiana University), Lecturer, Department of Music, 2016.

Lauder, John, M.A. (University of Missouri), B.A. (Westminster College), Instructor, Department of Management, 2011.

Laverty, Richard J., B.A. (University of South Florida), Assistant Professor, Air Force ROTC, 2016.

Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, Department of Chemistry and Biochemistry, 2002.

Lee, Richard N., Ph.D. (Stanford University), B.A. (Luther College), Associate Professor, Department of Philosophy, 1982.

Lee, Jeannie A., B.A. (University of Arkansas), Lecturer, Department of Theatre, 2000.

Lee, Wayne Y., Ph.D. (University of California-Los Angeles), M.B.A. (Santa Clara University), B.S.M.E. (De La Salle College, Philippines), Professor, Department of Finance, 1998.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women’s University), Associate Professor, Department of Food Science, 2008.

Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2009.

Lee, Christine, Ph.D. (Arizona State University), Assistant Professor, Department of Anthropology, 2012.

Lee, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, Department of Horticulture, 2016.

Lee, Dou Young, B.A., B.S. (Korea University), Visiting Instructor, Department of Economics, 2016.

Lee, Amanda, M.F.A. (Indiana University), B.A. (University of Washington), Instructor, School of Art, 2016.

Lee, Jung Ae, Ph.D., M.S. (University of Georgia), M.A., B.A., (Ewha Womans University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.

Leeds, Stacy, LL.M. (University of Wisconsin-Madison), J.D. (University of Tulsa), M.B.A. (University of Tennessee), B.A. (Washington University in St. Louis), Professor, School of Law.

Leen-Feldner, Ellen Winifred, Ph.D. (University of Vermont), M.A. (West Virginia University), B.A. (University of Notre Dame), Professor, Department of Psychological Science, 2005.

Lefflar, Rob, M.P.H., J.D., A.B. (Harvard University), Professor, School of Law, 1982.

Lefflar, Charles Joseph, Ph.D., M.A. (University of Missouri-Columbia), B.S.B.A. (University of Arkansas), Clinical Professor, Department of Accounting, 1993.

Leftwich, Gail, B.S. (University of Arkansas), Lecturer, Department of Theatre, 1997.

Lehman, Michael Herbert, Ph.D., Diploma in Biology (Philips University of Marburg, Germany), Associate Professor, Department of Biological Sciences, 2002.
Lehner, Bret Darby, Ph.D. (Pennsylvania State University), B.S. (University of Iowa), Assistant Professor, Department of Physics, 2015.

Lens, Joshua D., J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2018.

Lessner, Daniel J., Ph.D. (University of Iowa), B.S. (University of Wisconsin-Stevens Point), Associate Professor, Department of Biological Sciences, 2008.

Lessner, Faith H., Ph.D. (University of Iowa), B.S. (Cornell University), Instructor, Department of Biological Sciences, 2016.

Levenson, Abra, Ph.D., M.A. (Princeton), B.A. (University of California, Berkeley), Assistant Professor, School of Art, 2018.

Levine, Daniel P., Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, Department of World Languages, Literatures and Cultures, 1980.

Levine, William H., Ph.D., M.S. (State University of New York at Binghamton), B.S. (DePaul University), Associate Professor, Department of Psychological Science, 2001.

Lewis, Jacob C., Ph.D. (University of Arkansas), M.A. (University of Arkansas), B.A. (University of Arkansas), Instructor, 2004.

Lewis, Jeffrey A., Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Assistant Professor, Department of Biological Sciences, 2013.

Leylek, Jim, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Illinois at Chicago), Professor, Department of Mechanical Engineering, 2011.

Li, Wing Ning, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, Department of Computer Science and Computer Engineering, 1989.

Li, Yanbin, Ph.D. (Pennsylvania State University), M.S. (University of Nebraska-Lincoln), B.S. (Shenyang Agricultural University), Distinguished Professor, Department of Biological and Agricultural Engineering, 1989.

Li, Jiali, Ph.D., M.S. (City University of New York-City College), M.S. (University of Science and Technology of China), B.S. (Hei Long Jiang University), Professor, Department of Physics, 2002.

Li, Qinhua, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi’an Jiaotong University), Assistant Professor, Department of Computer Science and Computer Engineering, 2013.

Li, Jing, Ph.D., (University of Tennessee), Assistant Professor, Department of Economics, 2017.

Li, Xi, Ph.D. (Vanderbilt University), M.A. (Tulane University), B.S. (Hunan University), Associate Professor, Department of Finance, 2018.

Liang, Yi, Ph.D. (University of Alberta, Canada), M.S., B.S. (China Agricultural University, Beijing, China), Associate Professor, Department of Biological and Agricultural Engineering, 2007.

Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Liao, Haitao, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, Department of Industrial Engineering, 2015.

Limp, Fred, Ph.D., M.A., B.A. (Indiana University at Bloomington), University Professor, Department of Geosciences, 1979.

Lincoln, Felicia, Ph.D. (University of Pennsylvania), M.Ed., B.S.E. (Arkansas Tech University), Associate Professor, Department of Curriculum and Instruction, 2000.

Liner, Christopher L., Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, Department of Geosciences, 2012.

Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, Department of Health, Human Performance and Recreation, 1991.

Liu, Pu, Ph.D., M.B.A. (Indiana University at Bloomington), B.S. (National Cheng Kung University), Professor, Department of Finance, 1984.

Liu, Xiaofeng, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, Department of Computer Science and Computer Engineering, 2015.

Liu, Xiao, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, Department of Industrial Engineering, 2017.

Liu, Tingting, Ph.D. (Emory University), Assistant Professor, Eleanor Mann School of Nursing, 2018.

Livingston, Mark A., Ph.D. (University of Maryland), Instructor, Program in Operations Management, 2017.

Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.

Loewer, Otto J., Ph.D. (Purdue University), M.S. (Michigan State University), B.S. (Louisiana State University), Professor, Department of Biological and Agricultural Engineering, 1996.

Loftin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, Department of Entomology, 2002.

Lofton, Annette L., M.S.N. (University of Arkansas), B.S.N. (University of Arkansas), Clinical Instructor, Eleanor Mann School of Nursing, 2013.

Long, Mary Beth, Ph.D., M.A. (University of Massachusetts, Amherst), B.A. (Ouachita Baptist University), Visiting Assistant Professor, Department of English, 2014.

Looney, Nathan C., J.D. (University of Arkansas at Little Rock), M.P.S. (University of Arkansas Clinton School of Public Service), B.A. (University of Arkansas), Lecturer, Department of Political Science, 2012.

Looper, Michael L., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 2011.

Lorah, Elizabeth R., Ph.D., M.S.Ed., B.A. (Temple University), Associate Professor, Department of Curriculum and Instruction, 2013.

Lorenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, Department of Entomology, 1997.

Lorenzo, Violeta, Ph.D. (University of Toronto), M.A., B.A. (University of Florida), Assistant Professor, Department of World Languages, Literatures and Cultures, 2014.

Lorenzo, Benjamin, D.M.A., M.M. (University of Texas), B.M. (Florida International University), Assistant Professor, Department of Music, 2015.

Lorince, Tammy, M.A., B.S. (University of Arkansas), Instructor, Department of Biological Sciences, 2000.

Lowe, James, Ph.D., M.S. (Georgia Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2014.

Luckstead, Jeff A., Ph.D. (Washington State University), M.S., B.S. (University of Idaho), Associate Professor, Department of Agricultural Economics and Agribusiness, 2013.

Lucieking, Daniel H., Ph.D., M.S., B.A. (University of Illinois-Urbana-Champaign), Professor, Department of Mathematical Sciences, 1981.
Luo, Fang, Ph.D. (Huazhong University of Science and Technology), Assistant Professor, Department of Electrical Engineering, 2017.
Luo, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, Department of Architecture, 2003.
Lusk, Stephanie Lisanne, Ph.D. (University of Arkansas), M.A (Arkansas State University), B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
Lyons, Jack C., Ph.D. (University of Arizona), B.A. (Valparaiso University), Professor, Department of Philosophy, 2001.
Ma, Xiao, Ph.D. (University of Wisconsin), M.A. (Syracuse University), B.A. (Nanjing University), Assistant Professor, Department of Information Systems, 2014.
Ma, Weiyi, Ph.D. M.A. (University of Delaware), B.A. (China West Normal University), Assistant Professor, School of Human Environmental Sciences, 2017.
Mackay, Wayne A., Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, Department of Horticulture, 2014.
MacKeith, Peter, M.Arch. (Yale University), B.A. (University of Virginia), Professor, Department of Architecture, 2014.
Mackey, Andrew, M.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.
MacRae, Christopher J., D.M.A. (Boston University), Instructor, Department of Music, 2015.
Madison, Karen, Ph.D., M.A., B.A. (University of Arkansas), Instructor, Department of English, 2008.
Madison, Robert Durwood, Ph.D. (Northwestern University), M.A. (Clark University), B.A. (University of Rhode Island), Instructor, Department of English, 2009.
Magnetti, Brenda Monica, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, Department of World Languages, Literatures and Cultures, 2007.
Magoulick, Daniel D., Ph.D. (University of Pittsburgh), M.S. (Eastern Michigan University), B.S. (Michigan State University), Research Professor, Department of Biological Sciences, 2000.
Mahmoud, Rania, Ph.D. (University of Washington), M.A. (Old Dominion University), B.A. (University of Alexandria, Egypt), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.
Mains, Ronda M., D.M.A. (University of Oregon), M.A., B.M. (Boise State University), Professor, Department of Music, 1987.
Maizels, Michael, Ph.D. (University of Virginia), M.A. (University of Chicago), B.A. (University of Southern California), Assistant Professor, School of Art, 2016.
Maksymchuk, Oksana, Ph.D. (Northwestern University), B.A. (Bryn Mawr College), Assistant Professor, Department of Philosophy, 2013.
Malakhow, Alexey, Ph.D. (Northwestern University), Ph.D. (University of North Carolina at Charlotte), M.S. (Moscow State University), Associate Professor, Department of Finance, 2006.
Malis, David, M.M. (University of Cincinnati), Assistant Professor, Department of Music, 2013.
Maladi, Suresh, Ph.D. (University of Michigan), M.S. (Carnegie Mellon University), M.B.A. (National Institute of Technology), B.E. (Osmania University), Assistant Professor, Department of Information Systems, 2014.
Malshe, Ajay P., Ph.D., M.S., B.S. (University of Poona, India), Distinguished Professor, Department of Mechanical Engineering, 1995.
Maistrom, Derek, M.S.I.E., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2015.
Manaseghvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.
Manack, Marc A., M.Arch. (The Ohio State University), Assistant Professor, Department of Architecture, 2012.
Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, Department of Electrical Engineering, 2003.
Manterol, Paolo, Ph.D. (Purdue University), M.Sc., B.Sc. (University of Genova, Italy), Assistant Professor, Department of Mathematical Sciences, 2015.
Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, Department of Electrical Engineering, 1998.
Maranto, Robert Anthony, Ph.D. (University of Minnesota), B.S. (University of Maryland), Professor, Department of Education Reform, 2008.
Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, Department of Poultry Science, 1993.
Margaret, Hershberger, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.
Margulis, Jura, Graduate Performance Diploma (Peabody Conservatory of Music, Johns Hopkins University) M.M. (Musikhochschule Freiburg, Germany), B.M. (Musikhochschule Freiburg, Germany), Professor, Department of Music, 1999.
Margulis, Elizabeth Hellmuth, Ph.D., M.A., M.Phil. (Columbia University), B.M. (Peabody Conservatory), Professor, Department of Music, 2006.
Marion, Jonathan S., Ph.D., M.A. (University of California-San Diego), B.A. (University of Redlands), Associate Professor, Department of Anthropology, 2012.
Markham, Elizabeth Jane, Ph.D. (Cambridge University), B.A. (University of Otago, New Zealand), Professor, Department of History, 2000.
Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, Department of English, 1995.
Marshall, Jill A., Ph.D. (University of Oregon), Assistant Professor, Department of Geosciences, 2017.
Marshfield, Jonathan, LL.M. (New York University), J.D. (Rutgers University-Camden), B.A. (Cedarville University), Associate Professor, School of Law, 2013.
Martin, Kim I., M.A., B.S.Ed. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 1997.
Martin, Patricia, M.F.A. (Purdue University), B.A. (Rollins College), Professor, Department of Theatre, 1995.
Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1990.
Marzolf, Steven, M.F.A. (University of San Diego), B.A. (University of Wisconsin–Green Bay), Lecturer, Department of Theatre, 2015.
Mason, Scott, Ph.D. (Arizona State University), M.S., B.S. (University of Texas), Instructor, Program in Operations Management, 2014.
Mason, Richard Esten, Ph.D., B.A. (Texas A&M University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010.
Matlock, Marty D., Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Biological and Agricultural Engineering, 2001.
Matthews, Mary Beth, J.D., B.S.E. (University of Arkansas), Professor, School of Law, 1981.
Matthews, Carl W., M.S. (Pratt Institute), Professor, Department of Interior Design, 2012.
Mauromoustakos, Andy, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, Department of Crop, Soil and Environmental Sciences, 1989.

Maxwell, Charles, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, Department of Animal Science, 1996.

Maxwell, Angie, Ph.D., M.A. (University of Texas at Austin), B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2008.

May, Sheryl Denise, M.S.W. (University of Arkansas at Little Rock), B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2018.

Mazar, Yuri, Ph.D. (Institute of General Physics, Moscow), M.S. (Moscow Institute of Physics and Engineering, Russia), Professor, Nanotechnology, 2001.

Mazzanti, Chris, Ph.D., M.S. (University of Arkansas), B.S. (University of Arkansas at Monticello), Instructor, Department of Chemistry and Biochemistry, 2012.

McCaffrey, Raymond, Ph.D. (University of Maryland), M.A. (University of Colorado), M.A. (Columbia University), B.A. (Fairfield University), Assistant Professor, School of Journalism and Strategic Media, 2014.

McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, Department of Electrical Engineering, 2003.

McCartney, Nancy Glover, Ph.D., M.A., B.A. (University of Wisconsin-Madison), Assistant Curator, Assistant Professor, University Museum, 1974.

McComas, William, Ph.D. (University of Iowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, Department of Curriculum and Instruction, 2006.

McComas, Kim Krusen, Ph.D. (University of Arkansas), M.A. (West Chester University of Pennsylvania), B.A. (University of Arizona), Clinical Assistant Professor, Department of Curriculum and Instruction, 2012.

McCombs, Davis, M.F.A. (University of Virginia), A.B. (Harvard), Associate Professor, Department of English, 2002.

McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, School of Art, 2011.

Mccray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2010.

McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Associate Professor, Department of Health, Human Performance and Recreation, 2012.

McDonald, Garry Vernon, Ph.D., M.S., B.S.A. (Texas A&M University), Clinical Assistant Professor, Department of Horticulture, 2016.

McGee, Peter J., Ph.D. (Ohio State University), B.S. (Tulane University), Associate Professor, Department of Economics, 2014.

McGlynn, Moira, Ph.D., M.B.A. (Union College of Union University), Instructor, Program in Operations Management, 2014.

Mclntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, Department of Chemistry and Biochemistry, 1996.

McKenzie, Andrew Malcolm, Ph.D. (North Carolina State University), M.Sc. (Stirling University), B.Admin. (University of Dundee), Professor, Department of Agricultural Economics and Agribusiness, 1998.

McKinney, Nathan, Ph.D. (Kansas State University), M.S., B.S. (University of Arkansas), Professor, 2008.

McKnight, Jennifer Ann, M.F.A., B.A. (University of Alabama), Instructor, Department of Theatre, 2015.

McKnight, Rebecca, M.B.A. (University of Arkansas), Instructor, Department of Management, 2016.

McNabb, David S., Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, Department of Biological Sciences, 2000.

McNally, Shelley Ann, Ph.D. (University of Toledo), M.S., B.S. (Ohio University), Clinical Assistant Professor, School of Human Environmental Sciences, 2016.

McNeal, Travis G., M.A. (University of Nevada), B.S. (Utah State University), Instructor, Program in Operations Management, 2014.

McWhirt, Amanda L., Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, Department of Horticulture, 2016.

Mears, Derrick, Ph.D. (University of Arkansas), M.S., B.S. (University of Central Missouri), Clinical Associate Professor, Department of Curriculum and Instruction, 2014.

Medders, Jon, M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2017.

Medina Vidal, D. Xavier, Ph.D. (University of California-Riverside), M.A. (University of New Mexico), Assistant Professor, Department of Political Science, 2015.

Melton, Kerry D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2014.

Meng, Xiangbo, Ph.D. (University of Western Ontario), M.S.E.E. (China University of Petroleum), B.S.C.E. (Northwestern University), Assistant Professor, Department of Mechanical Engineering, 2016.

Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, Department of Architecture, 2003.

Meuillenet, Jean-Francois, Ph.D. (University of Georgia), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Professor, Department of Food Science, 1996.

Meyer, Joseph Matthew, M.A. (Hofstra University), Instructor, 2008.

Michealson, Kirk, M.S. (Naval Postgraduate School), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2014.

Michael, Tyler, M.F.A., B.F.A. (Dakota State University), Instructor, Department of Theatre, 2016.

Mihalka, Matthew W., Ph.D. (University of Minnesota), M.A. (University of Minnesota-Duluth), M.A. (University of Minnesota-Twin Cities), Instructor, Department of Music, 2011.

Milburn, Ashlea R., Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Assistant Professor, Department of Industrial Engineering, 2010.

Miles, Rebecca S., Ph.D. (Oklahoma Christian University), M.Ed. (Central State University), B.S. (Oklahoma Christian College), Clinical Assistant Professor, Department of Marketing, 2007.

Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, Department of Crop, Soil and Environmental Sciences, 1988.

Miller, Douglas James, M.A. (University of Arkansas), B.A. (Johns Hopkins University), Instructor, Department of World Languages, Literatures and Cultures, 1999.
Murray, Jeff B., Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Northern Colorado), Professor, Department of Marketing, 1989.

Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Instructor, Eleanor Mann School of Nursing, 2015.

Musgnug, Kristin Ann, M.F.A. (Indiana University at Bloomington), B.A. (Williams College), Associate Professor, School of Art, 1991.

Na, Dominic K., D.M.A. (University of North Texas), A.D. (Southern Methodist University), Instructor, Department of Music, 2016.

Nachtmann, Heather, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2000.

Nair, Arun, Ph.D. (Virginia Tech), M.S. (Colorado State University), B.T. (Mahalma Gandhi University), Assistant Professor, Department of Mechanical Engineering, 2013.

Naithani, Kusum, Ph.D. (University of Wyoming), M.Sc. (G.B. Pant University of Agriculture and Technology-India), B.Sc. (University of Lucknow), Assistant Professor, Department of Biological Sciences, 2014.

Nakanishi, Nagayasu, Ph.D. (University of California, Los Angeles), B.S. (University of California, San Diego), Assistant Professor, Department of Biological Sciences, 2017.

Nalley, Lawton Lanier, Ph.D. (Kansas State University), M.S. (Mississippi State University), B.S. (The Ohio State University), Professor, Department of Agricultural Economics and Agribusiness, 2008.

Nance, Cynthia, M.A., J.D. (University of Iowa), B.S. (Chicago State University), Professor, School of Law, 1994.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Punjab University), University Professor, Department of Electrical Engineering, 1985.

Natarajan, Venkatesan Ram, Ph.D., M.A. (New York University), B.A. (Johns Hopkins University), Assistant Professor, Department of Anthropology, 2015.

Nayga, Rudy, Ph.D. (Texas A&M University), M.S. (University of Delaware), B.S. (Foreign Institution), Distinguished Professor, Department of Agricultural Economics and Agribusiness, 2009.

Naylor, Zoe E., J.D., M.A. (University of Arkansas), B.A. (Graceland University), Instructor, Department of Political Science, 2000.

Needy, Kim LaScola, Ph.D. (Wichita State University), P.E., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2008.

Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.

Neville-Shepard, Meredith D., Ph.D. (University of Kansas), Clinical Assistant Professor, Department of Communication, 2016.

Neville-Shepard, Ryan M., Ph.D. (University of Kansas), Assistant Professor, Department of Communication, 2016.

Newman, Winifred E., Ph.D. M.PhiL, M.Arch (Harvard), B.Arch, B.S. (University of Texas at Austin), Professor, Department of Architecture, 2015.

Nichols, Emily M., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Fort Smith), Instructor, Program in Operations Management, 2015.

Nickol, Benjamin T., B.A. (University of Notre Dame), Instructor, 2007.

Niu, Wenbo, Ph.D. (University of Illinois at Chicago), M.S., B.S. (Fudan University, China), Assistant Professor, Department of Mathematical Sciences, 2015.

Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, Department of Anthropology, 2002.

Norman, Richard J., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Missouri), Professor, Department of Crop, Soil and Environmental Sciences, 1983.

Norman, Mya A., Ph.D. (University of Colorado-Boulder), M.S., B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2006.

Norris, Greg, Ph.D. (University of New Hampshire), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (Massachusetts Institute of Technology), Professor, Walton College of Business, 2009.

Norsworthy, Jason Keith, Ph.D., M.S. (University of Arkansas), B.S. (Louisiana Tech University), Professor, Department of Crop, Soil and Environmental Sciences, 2006.

Norvell, Phillip E., J.D. (University of Oklahoma), B.A. (University of Oklahoma), Professor, School of Law, 1975.

Norwood, John Martel, J.D. (Tulane University), M.B.A., B.A. (Louisiana State University), Professor, Department of Accounting, 1981.

Nugent, Russell A., Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Pennsylvania State University), Adjunct Professor, Department of Animal Science, 2011.

Nurre, Sarah, Ph.D., M.Eng., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, Department of Industrial Engineering, 2015.

Nutter, Darin W., Ph.D. (Texas A&M University), M.S.M.E., B.S.M.E. (Texas A&M University), Professor, Department of Mechanical Engineering, 1994.

O'Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, School of Human Environmental Sciences, 2016.

O'Loughlin, J. Brian, Ph.D. (University of Alabama), M.A. (Syracuse University), B.S. (Boston College), Visiting Assistant Professor, Department of Communication, 2016.

Oelke, Kim Knighten, Ph.D. (University of Arkansas), B.S.N. (University of Arkansas for Medical Sciences), Instructor, Eleanor Mann School of Nursing, 2014.

Oliver, William, Ph.D., M.S. (University of Colorado-Boulder), B.S. (University of Arizona), Associate Professor, Department of Physics, 1992.

Omura, Mafumi, M.A. (University of Iowa), B.A. (Kansai Gaidai University), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Oommen, Thomas, Ph.D. (Tufts University), Visiting Assistant Professor, Department of Communication, 2015.

Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, Department of Curriculum and Instruction, 1989.

Ortega, Catalina, M.M. (University of Arkansas), B.A. (Pontificia Universidad Javeriana, Colombia), Instructor, Department of Music, 2014.

Osborn, G. Scott, Ph.D. (North Carolina State University), M.S., Ag.E., B.S. (University of Kentucky), Associate Professor, Department of Biological and Agricultural Engineering, 2001.
Osborne, Cara, Sc.D. (Harvard University), Assistant Professor, Eleanor Mann School of Nursing, 2018.
Owen, Donna S., M.S., B.S., B.A. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2005.
O’Leary-Kelly, Anne M., Ph.D. (Michigan State University), B.A. (University of Michigan), Professor, Department of Management, 1997.

P
Padilla, Yajaira, Ph.D. (University of California, San Diego), B.A. (University of California, Santa Cruz), Associate Professor, Department of English, 2013.
Paez, Rocío Alejandra, Ph.D., M.A., B.A. (University of Arkansas at Little Rock), Visiting Assistant Professor, Department of Sociology and Criminology, 2018.
Page, Patricia, J.D. (University of Arkansas at Little Rock), M.S.W. (Florida State University), B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.
Panayotova, Miroslava Saltur, Ph.D. (University of Arizona), Instructor, Department of Music, 2014.
Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, Department of Computer Science and Computer Engineering, 2001.
Paradise, Thomas R., Ph.D. (Arizona State University), M.A. (Georgia State University), F.G.A., G.G. (Gemological Institute of America), B.S. (University of Nevada), University Professor, Department of Geosciences, 2000.
Park, Moon, D.M.A. (University of Cincinnati), M.M. (Staatliche Hochschule fur Musik in Freiburg), B.M. (University of Seoul National), Assistant Professor, Department of Music, 2012.
Park, Joon, Ph.D. (University of Oregon), M.A., B.M. (Eastman School of Music), Assistant Professor, Department of Music, 2016.
Parker, Betty, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2013.
Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, Department of Computer Science and Computer Engineering, 1990.
Parks, Nathan A., Ph.D., M.S. (Georgia Institute of Technology), B.A. (University of Virginia), Assistant Professor, Department of Psychological Science, 2012.
Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, Department of Industrial Engineering, 2013.
Parry, Janine A., Ph.D., M.A. (Washington State University), B.A. (Western Washington University), Professor, Department of Political Science, 1998.
Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, Department of Computer Science and Computer Engineering, 2012.
Paton, Susan Kane, Ph.D., M.S.N. (University of Arkansas), M.H.S.A. (University of Arkansas at Little Rock), B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2010.
Paul, David W., Ph.D. (University of Cincinnati), B.S. (Southwestern University), Associate Professor, Department of Chemistry and Biochemistry, 1980.
Payne, Whitney, M.S.W (University of Arkansas), B.S.W (University of Alaska–Anchorage), Clinical Assistant Professor, School of Social Work, 2012.
Peng, Yaru, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.
Penner-Williams, Janet, Ed.D., M.Ed., B.S.E. (University of Houston), Associate Professor, Department of Curriculum and Instruction, 2005.
Pepitone, Lauren, Ph.D., M.A. (Johns Hopkins University), B.A., Vassar University, Assistant Professor, Department of History, 2016.
Perera, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Department of Crop, Soil and Environmental Sciences, 2011.
Perry, Kim, M.S. (University of Arkansas), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.
Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
Peters, Gary F., Ph.D. (University of Oregon), M.S. (University of Missouri-Columbia), B.S. (Arkansas Tech University), Professor, Department of Accounting, 2003.
Petretic, Patricia Ann Louise, Ph.D., M.A. (Bowling Green State University), B.A. (Youngstown State University), Associate Professor, Department of Psychological Science, 1990.
Petris, Giovanni, Ph.D., M.S. (Duke University), B.S. (Universita degli Studi di Milano, Italy), Professor, Department of Mathematical Sciences, 1999.
Petrone, Kim, J.D. (Northwestern University), B.A. (Southern Methodist University), Instructor, Department of Accounting, 2014.
Philipp, Dirk, Ph.D. (Texas Tech University), M.S., B.S. (University of Leipzig, Germany), Associate Professor, Department of Animal Science, 2007.
Phillips, Jared, Ph.D., M.A., B.A. (University of Arkansas), Clinical Assistant Professor, International and Global Studies, 2017.
Pierce, Michael C., Ph.D., M.A. (The Ohio State University), B.A. (Kenyon College), Associate Professor, Department of History, 2001.
Pierce, Lisa, M.S. (University of Georgia), B.S. (University of Tennessee), Instructor, Department of Information Systems, 2014.
Piersson, Harry A., Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, Department of Industrial Engineering, 2014.
Pijanowski, John C., Ph.D., M.S. (Cornell University), B.A. (Brown University), Professor, Department of Curriculum and Instruction, 2007.
Pincus, Karen V., Ph.D., M.B.A., B.S. (University of Maryland-College Park), Professor, Department of Accounting, 1995.
Pinto, Ines, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, Department of Biological Sciences, 2000.
Pittman, Harrison Mauryy, LL.M. (University of Arkansas), J.D., B.A. (University of Arkansas at Little Rock), Assistant Professor, 2001.
Plavcan, Joseph M., Ph.D., B.A. (Duke University), Professor, Department of Anthropology, 2001.
Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.E.M. (University of Dayton), B.S.E.E.
(Boston University), Professor, Department of Industrial Engineering, 2004.

Pohl, Letitia, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, Department of Industrial Engineering, 2013.

Pohiman, Fred W., Ph.D. (Kansas State University), M.S. (University of Tennessee), B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1997.

Poling, Richard L., Ph.D., B.S., M.S. (Ohio State University), Adjunct Associate Professor, Department of Agricultural Education, Communications and Technology, 2009.

Pollock, Chad Aaron, M.A. (University of Missouri-Columbia), M.Div. (Baylor University), B.A. (Ouachita Baptist University), Assistant Librarian, University Libraries, 2011.

Pope, Adam, Ph.D. (Purdue University), M.A. (University of Arkansas), B.A. (Freed-Hardeman University), Visiting Assistant Professor, Department of English, 2013.

Popejoy, Erin O., Ph.D. (University of Texas—San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Popp, Michael P., Ph.D. (Colorado State University), M.B.A. (University of Colorado-Boulder), B.Comm. (University of Manitoba), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Popp, Jennie Sheerin, Ph.D., M.S. (Colorado State University), B.S. (University of Scranton), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Porter, Errol, M.S.E.E., B.S.E.E. (University of Arkansas), Research Associate, Microelectronics-Photonics, 1997.

Post, Rana, M.B.A. (William Woods University), B.S. (University of Missouri, Columbia), Instructor, School of Human Environmental Sciences, 2008.

Potra, Adriana, Ph.D. (Florida International University), M.S., B.S. (University of Babes-Bolyai, Romania), Assistant Professor, Department of Geosciences, 2012.

Powell, Jeremy G., Ph.D. (University of Arkansas), D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Professor, Department of Animal Science, 2009.

Powers, Michael, M.A. (Clemson University), B.A. (University of Florida), Instructor, Department of History, 2018.

Price, Heather Arielle, M.S., B.S. (University of Arkansas), Lecturer, Department of Mathematical Sciences, 2006.

Prinz, Gary S., Ph.D., M.S., B.S. (Brigham Young University), Assistant Professor, Department of Civil Engineering, 2014.

Proctor, Andy, Ph.D., M.S. (University of Arkansas), B.S. (Queen Mary College, University of London), University Professor, Department of Food Science, 1992.

Prosandeev, Sergey, Ph.D., M.S. (Rostov State University), Research Professor, Department of Physics, 2005.

Puckett, Latisha, Ph.D., B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2015.

Pulido Rull, Ana, Ph.D., M.A. (Harvard University), B.A. (National Autonomous University of Mexico), Assistant Professor, School of Art, 2012.

Pullen, Brian K., M.B.A. (University of Arkansas), B.S. (Arkansas Tech University), Instructor, Department of Management, 2000.

Purcell, Larry C., Ph.D. (University of Florida), M.S., B.S. (University of Georgia), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, 1993.

Puvanakrishnan, Priyaveena, Ph.D. (University of Texas at Austin), Instructor, Department of Biomedical Engineering, 2015.

Pérez Arroyo, Elkin Javier, M.A. (University of Arkansas), B.A. (Universidad de Córdoba, Montería, Colombia), Instructor, Department of World Languages, Literatures and Cultures, 2017.

Q

Qian, Xianghong, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, Department of Biomedical Engineering, 2011.

Quinn, William A., Ph.D., M.A. (The Ohio State University), B.A. (Xavier University), Professor, Department of English, 1979.

Quinn, Elizabeth Hart, M.F.A. (Virginia Commonwealth University), B.A. (Sewanee University), Instructor, 2011.

Quinn, Kyle P., Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, Department of Biomedical Engineering, 2014.

R

Ragsdale, Chal, M.M. (East Carolina University), B.S. (Auburn University), University Professor, Department of Music, 1975.

Raich, Andrew Seth, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (Williams College), Associate Professor, Department of Mathematical Sciences, 2008.

Rainey, Daniel V., Ph.D., M.S. (Purdue University), B.S.A. (University of Arkansas), Associate Professor, Department of Agricultural Economics and Agribusiness, 2000.

Rainey, Ronald L., Ph.D., M.S., B.S.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 1993.

Rainwater, Candace Auburn, Ph.D. (University of Florida), Instructor, Engineering, 2012.

Rainwater, Chase E., Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2009.

Rajaram, Narasimhan, Ph.D. (University of Texas, Austin), B.E. (Anna University, India), Assistant Professor, Department of Biomedical Engineering, 2014.

Ralston, Christine R., Ph.D. (Purdue University), M.Ed., B.S. (Indiana Wesleyan University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2015.

Ramirez, Kasey, M.F.A. (Indiana University, Bloomington), B.F.A. (Rhode Island School of Design), Instructor, School of Art, 2015.

Rankin, Sandy, Ph.D., M.F.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, 2011.

Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, Department of Biomedical Engineering, 2016.

Rapert, Molly, Ph.D. (University of Memphis), M.B.A., B.S.B.A. (University of Arkansas), Associate Professor, Department of Marketing, 1991.

Rath, Narayan C., Ph.D., M.S. (University of Delhi-India), B.S. (Utkal University-India), Research Professor, Department of Poultry Science, 1992.

Rauth, Cynthia A., M.A. (University of Washington), Instructor, English Language and Cultural Studies, 2014.

Rawson, Caleb, Ph.D. (University of Colorado at Boulder), B.S. (Colorado Christian University), Assistant Professor, Department of Accounting, 2018.

Rawwagah, Fuad, Ph.D., M.A. (University of Arkansas), B.S. (Yarmouk University), Assistant Professor, Department of Physics, 2010.

Raynor, James, M.S. (University of Arkansas), B.S. (Texas A & M University), Instructor, Program in Operations Management, 2014.
Reeder, Joy Elisabeth, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (University of North Carolina), Instructor, Department of World Languages, Literatures and Cultures, 2012.

Reeves, Carol, Ph.D. (University of Georgia), M.A. (University of South Carolina), B.S. (Georgia Southern College), Professor, Department of Management, 1990.

Reid, Margaret F., Ph.D. (University of Oklahoma), M.B.A. (Central State University), M.P.A. (University of Oklahoma), M.A. (University of Bonn), B.A. (University of Marburg, West Germany), Professor, Department of Political Science, 1993.

Ren, Wei, Ph.D. (University of Hong Kong), B.S. (Shanxi University), Assistant Professor, Department of Physics, 2008.

Rennie, Craig, Ph.D. (University of Oregon), M.B.A. (Dalhousie University), B.A. (University of Toronto), Associate Professor, Department of Finance, 2001.

Restrepo, Luis Fernando, Ph.D., M.A. (University of Maryland-College Park), B.A. (Universidad Pontificia Bolivariana), University Professor, Department of World Languages, Literatures and Cultures, 1995.

Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, Department of Biological Sciences, 1990.

Rice, Lanny, M.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2012.

Richardson, Mike, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Louisiana Tech University), Professor, Department of Horticulture, 1998.

Richardson, Vernon J., Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, Department of Accounting, 2005.

Richardson, Tracey, Ed.D. (Argosy University), M.S., B.A.Sc. (Troy University), Instructor, Program in Operations Management, 2014.

Ricke, Steven C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Illinois), Professor, Department of Food Science, 2005.

Ridge, Jason, Ph.D., M.A., B.A. (Oklahoma State University), Associate Professor, Department of Management, 2015.

Rieck, Yo'av, Ph.D. (University of Texas at Austin), B.A. (Israel Institute of Technology), Professor, Department of Mathematical Sciences, 2000.

Rieske, David, M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2014.

Rhina, Michael, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Wisconsin), Professor, Department of Theatre, 1992.

Riley, Anastasia, M.M. (Florida State University), Lecturer, Department of Music, 2014.

Riley, Timothy B., Ph.D. (University of Kentucky), Assistant Professor, Department of Finance, 2016.

Risk, Mark E., M.B.A., B.S.B.A. (University of Arkansas), Instructor, Department of Finance, 1981.

Riva, Fernando, Ph.D. (Yale University), Visiting Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Robbins, Robert Thomas, Ph.D. (North Carolina State University), M.S., B.S. (Kansas State University), University Professor, Department of Plant Pathology, 1979.

Robbins, James A., Ph.D. (University of California-Davis), M.S. (University of Georgia), B.S. (University of Wisconsin), Professor, Department of Horticulture, 1998.

Roberts, Monty, M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2011.

Roberts, Trenton L., Ph.D. (University of Arkansas), M.S. (University of Arizona), B.S. (Oklahoma State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010.

Robert, Robin, Ph.D., M.A. (University of Pennsylvania), B.A. (Mount Holyoke College), Professor, Department of English, 2011.

Robertson, Lona, Ed.D. (Indiana University, Bloomington), M.S., B.S. (Florida State University), Professor, School of Human Environmental Sciences, 2006.

Robertson, Bill, Ph.D., M.S. (Texas A&M University), B.S. (West Texas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2014.

Robinson, Charles F., Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, Department of History, 1999.

Robinson, Eddie, Ph.D. (Northcentral University), M.A.S. (Embry Riddle Aeronautical University), M.S. (University of Arkansas), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2014.

Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, Department of Poultry Science, 2016.

Rodeffer, Carolyn, M.B.A. (University of Chicago), B.A. (University of Maryland), Instructor, Department of Management, 2015.

Rodriguez, Sarah, Ph.D., B.A. (University of Pennsylvania), Assistant Professor, Department of History, 2016.

Roe, Larry, Ph.D. (University of Florida), M.S., B.S.M.E. (University of Mississippi), Associate Professor, Department of Mechanical Engineering, 1994.

Roeder, Richard A., Ph.D., M.S. (Texas A&M University), B.A. (Glassboro State College), Professor, Department of Animal Science, 2002.

Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.

Rojas, Clemencia, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, Department of Plant Pathology, 2015.

Rom, Curt R., Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, Department of Horticulture, 1989.

Roper, Donald K., Ph.D. (University of Wisconsin-Madison), B.S., B.S.Ch.E. (Brigham Young University), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2008.

Rorie, Rick, Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 1989.

Rosa, Ananda, M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2010.

Rosales, Steven, Ph.D. (University of California-Irvine), B.A. (University of California-San Diego), Associate Professor, Department of History, 2013.

Rose, Jerry, Ph.D., M.A. (University of Massachusetts), B.A. (University of Colorado), University Professor, Department of Anthropology, 1976.

Rosen, Chris, Ph.D. (University of Akron), M.A. (Appalachian State University), B.A. (Washington and Lee University), Professor, Department of Management, 2006.

Rosenkranz, Charles F., Ph.D. (Kansas State University), M.S., B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1991.

Ross, Jeremy, Ph.D., M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1996.

Rossetti, Manuel D., Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, Department of Industrial Engineering, 1999.
Rossetti, Amy H., M.S., B.S. (Ohio State University), Instructor, Program in Operations Management, 2014.

Rossiter-Hofer, Adriana, Ph.D. (University of Maryland-College Park), M.S. (Federal University of Rio de Janeiro, Brazil), B.S. (Federal University of Pernambuco, Brazil), Associate Professor, Department of Supply Chain Management, 2008.

Rostek, Thomas, Ph.D. (University of Wisconsin-Madison), M.A. (Brown University), A.B. (Washington University), Associate Professor, Department of Communication, 1990.

Rotolo, Chuck, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, Department of Architecture, 2005.

Rowe, Stephen, Ph.D. (University of Illinois), M.S. (Loyola University Chicago), B.A. (Covenant College), Assistant Professor, Department of Accounting, 2016.

Roy, William, M.S. (University of Arkansas), B.S. (University of Memphis), Instructor, Program in Operations Management, 2014.

Rozier, Louise L., D.M.L. (Middlebury College), M.A. (University of Arkansas), B.A. (Licence es Lettres, Université de Besançon, France), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.

Rucker, Kathryn Jill, Ph.D., M.B.A., B.S. (Oklahoma State University), Assistant Professor, Department of Agricultural Education, Communications and Technology, 2013.

Rudzinski, Russell D., M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, Department of Architecture, 2000.

Rui, M. Reina, Ph.D. (Washington University in St. Louis), M.A. (Kansas State University), B.A. (University of Leon, Spain), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.

Rumley, Elizabeth Rebecca, LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2008.

Rumley, Rusty W., J.D. (University of Oklahoma), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2009.

Runkle, Benjamin R.K., Ph.D., M.S. (University of California–Berkeley), B.S. (Princeton University), Assistant Professor, Department of Biological and Agricultural Engineering, 2014.

Runkles, Henry S., M.M. (University of Arkansas), Lecturer, Department of Music, 2002.

Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), Professor, Department of Plant Pathology, 1984.

Russell, Mark, Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, Department of Animal Science, 2010.

Ryan, Jeffrey J., Ph.D., M.A. (Rice University), B.A. (Colorado State University), Associate Professor, Department of Political Science, 1990.

Ryan, John, Ph.D. (University of York), M.Sc. (University of Warwick), B.A. (University of York, Britain), Professor, Department of Mathematical Sciences, 1990.

Sabatini, Lindsey Rachel, M.S., B.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2012.

Saherwal, Rajiv, Ph.D. (University of Pittsburgh), P.G.D.M. (Indian Institute of Management), B.S.E.E. (Regional Engineering College, India), Professor, Department of Information Systems, 2011.

Sabo, George, Ph.D., M.A., B.S. (Michigan State University), Professor, Department of Anthropology, 1980.

Sabon, Lauren, Ph.D. (University of Tennessee-Knoxville), M.S/M.A. (Marshall University), B.S., B.A. (West Virginia University), Clinical Assistant Professor, Department of Sociology and Criminology, 2014.

Sacharoff, Lauren A., J.D. (Columbia University), B.A. (Princeton University), Associate Professor, School of Law, 2010.

Sadaka, Sammy, Ph.D. (Dalhousie University, Canada, and Alexandria University, Egypt), M.S. , B.S. (Alexandria University, Egypt), Assistant Professor, Department of Biological and Agricultural Engineering, 2007.

Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, Department of Chemistry and Biochemistry, 1997.

Salamo, Gregory J., Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, Department of Physics, 1975.

Salonen, Rick, Ed.D., M.M. (University of Arkansas), B.M. (Central Michigan University), Instructor, Department of Music, 2008.

Salter, Kandy, M.S. (University of Central Arkansas), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2018.

Sargenti, Anthony, M.A. (San Francisco State University), B.A. (San José State University), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, Department of Electrical Engineering, 2012.

Savin, Mary Cathleen, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, Department of Crop, Soil and Environmental Sciences, 2002.

Saxena, Ashok, Ph.D., M.S. (University of Cincinnati), Distinguished Professor, Department of Mechanical Engineering, 2003.

Schafer-Whitby, Peggy, Ph.D. (University of Central Florida), M.A. (University of Houston-Clear Lake), B.A. (St. Cloud State University), Associate Professor, Department of Curriculum and Instruction, 2012.

Scheide, Frank Milo, Ph.D. (University of Wisconsin-Madison), M.A. (New York University), B.S. (University of Wisconsin-River Falls), Professor, Department of Communication, 1977.

Schluterman, Heath A., Ph.D., B.S. (University of Arkansas), Instructor, Engineering, 2009.

Schneider, Susan, LL.M. (University of Arkansas), J.D. (University of Minnesota-Twin Cities), B.A. (College of Saint Catherine), Professor, School of Law, 1998.

Schott, Elizabeth W., Ph.D., M.S. (New Mexico State University), M.S.I.E. (Georgia Institute of Technology), Instructor, Program in Operations Management, 2017.

Schreckhise, William D., Ph.D., M.A., B.A. (Washington State University), Associate Professor, Department of Political Science, 1998.

Schuetz, Sebastian, Ph.D. (City University of Hong Kong), M.S., B.S. (University of Mannheim), Assistant Professor, Department of Information Systems, 2017.

Schulte, Stephanie Ricker, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Associate Professor, Department of Communication, 2008.
Schulte, Bret J., M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Associate Professor, School of Journalism and Strategic Media, 2008.
Schwab, Bill, Ph.D., M.A. (The Ohio State University), M.A. (University of Akron), B.A. (Miami University), University Professor, Department of Sociology and Criminology, 1976.
Scott, Allison L., D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2006.
Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, Department of Crop, Soil and Environmental Sciences, 2002.
Scott, Adrienne R., M.S.W. (University of Texas, Arlington), B.A. (University of Arkansas), Lecturer, School of Social Work, 2014.
Scott, Marc, Ph.D. (North Dakota State University), M.S., B.S. (South Carolina State University), Clinical Assistant Professor, Department of Supply Chain Management, 2016.
Sebold, Karen Denice, Ph.D., M.A. (University of Arkansas), B.S. (Campbell College), B.S. (Rogers State University), Clinical Assistant Professor, Department of Political Science, 2011.
Selvam, R. Panneer, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, Department of Civil Engineering, 1986.
Senor, Thomas D., Ph.D., M.A. (University of Arizona), B.S. (University of Oregon), Professor, Department of Philosophy, 1989.
Seo, Han-Seok, Dr rer. Med. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University), B.S. (Korea University, Seoul), Associate Professor, Department of Food Science, 2012.
Serrano, Christina, Ph.D. (University of Georgia), B.B.A. (Armstrong Atlantic State University), Assistant Professor, Department of Information Systems, 2011.
Servoss, Shannon, Ph.D. (Northwestern University), B.S.Ch.E. (University of Michigan-Ann Arbor), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2007.
Setia, Pankaj, Ph.D. (Michigan State University), M.B.A. (Management Development Institute), B.S. (University of Delhi, India), Associate Professor, Department of Information Systems, 2008.
Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, Department of Architecture, 1999.
Sha, Xueyan, Ph.D. (Louisiana State University), Professor, Department of Crop, Soil and Environmental Sciences, 2012.
Sha, Zhenghui, Ph.D. (Purdue University), M.S.M.E. (Xi’an Jiaotong University), B.S.M.E. (Xi’an University of Technology), Assistant Professor, Department of Mechanical Engineering, 2016.
Shadwick, John D.L., M.S. (University of Arkansas), B.S. (University of Central Arkansas), Instructor, Department of Biological Sciences, 2011.
Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2015.
Shanks, Bruce C., Ph.D. (South Dakota State University), M.S. (Montana State University), B.S. (Missouri State University), Adjunct Assistant Professor, Department of Animal Science, 2011.
Shannon, Graham F., M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, Department of Architecture, 1979.
Sharman, Glenn R., Ph.D (Stanford University), B.S. (Wheaton College), Assistant Professor, Department of Geosciences, 2017.
Sharpley, Andrew N., Ph.D. (Massey University, New Zealand), B.S. (University College of North Wales), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, 2006.
Shaulls, Barry J., Ph.D., M.S., B.S. (University of Houston), B.B.A. (University of Georgia), Research Associate, Department of Geosciences, 2016.
Shaw, John B., Ph.D. (University of Texas at Austin), B.A. (Oberlin College), Assistant Professor, Department of Geosciences, 2014.
Shelton, Gina, B.A. (Mississippi State University), Instructor, School of Journalism and Strategic Media, 2013.
Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
Shew, Woodrow L., Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, Department of Physics, 2012.
Shi, Wei, Ph.D. (University of Alberta), M.S. (East China University of Science and Technology), B.S. (Shanghai Jiao Tong University), Assistant Professor, Department of Chemistry and Biochemistry, 2012.
Shi, Xuan, Ph.D. (West Virginia University), M.S. (Indiana University of Pennsylvania), B.S. (Hubei University), Assistant Professor, Department of Geosciences, 2012.
Shi, Ainhong, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, Department of Horticulture, 2013.
Shields, Christopher A., Ph.D., J.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Clinical Assistant Professor, Department of Sociology and Criminology, 2003.
Shields, Todd G., Ph.D., M.A. (University of Kentucky), B.A. (Miami University), Professor, Department of Political Science, 1994.
Shipman, Jonathan, Ph.D. (University of Tennessee), B.S. (University of Central Arkansas), Assistant Professor, Department of Accounting, 2015.
Shobe, Marcia A., Ph.D. (University of Kansas), M.S.W. (University of Hawaii at Manoa), B.A. (State University of New York at Plattsburgh), Professor, School of Social Work, 2007.
Shook, Carole, M.S.B.A., B.S.B.A. (University of Arkansas), Instructor, Department of Supply Chain Management, 1999.
Shoulders, Kate, Ph.D. (University of Florida), M.S., M.A. (Murray State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2012.
Shreve, Marliou D., D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Clinical Instructor, Eleanor Mann School of Nursing, 2013.
Shuler, Kimberly M., M.S.W. (University of Arkansas at Little Rock), B.S.W. (University of Arkansas), Instructor, School of Social Work, 2015.
Shuman, S. Michael, M.M. (University of Arkansas), M.M. (University of Nebraska at Omaha), B.M. (Delta State University), Lecturer, Department of Music, 2006.
Shuman, Hannah Mindeman, , Lecturer, .
Siahmakoun, Lobat, M.S. (University of Arkansas), B.S. (Missouri Southern State University), Instructor, School of Human Environmental Sciences, 2015.
Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, Department of Food Science, 1984.
Siepielski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Assistant Professor, Department of Biological Sciences, 2015.
Simon, Lauren, Ph.D., B.S.B.A., B.S. (University of Florida), Associate Professor, Department of Management, 2016.
Singh, Surendra P., Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, Department of Physics, 1982.
Sirmans, Corbitt Stace, Ph.D., B.S. (Florida State University), Assistant Professor, Department of Finance, 2014.
Sites, Joanna, M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.

Skinner, Stephen R., M.S., B.S. (University of Arkansas), Instructor, Department of Physics, 1998.

Skinner, Jerral V., Ph.D. (University of Arkansas), Lecturer, Department of Crop, Soil and Environmental Sciences, 1990.

Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Slattery, Patrick Joseph, Ph.D. (Indiana University at Bloomington), A.B. (College of the Holy Cross), Associate Professor, Department of English, 1991.

Sloan, Kathryn Ann, Ph.D., M.A., M.B.A. (University of Kansas), B.A. (Kansas State University), Professor, Department of History, 2004.

Smith, Kimberly G., Ph.D. (Utah State University), M.S. (University of Arkansas), B.S. (Tufts University), Distinguished Professor, Department of Biological Sciences, 1981.

Smith, Kathy, Ed.D., M.S. (University of Arkansas), B.S. (The Ohio State University), Clinical Associate Professor, School of Human Environmental Sciences, 1999.

Smith, Brent Lamar, Ph.D., M.S. (Purdue University), B.A. (Ouachita Baptist University), Distinguished Professor, Department of Sociology and Criminology, 2003.

Smith, Ronn J., Ph.D. (Washington State University), M.S., B.S. (Montana State University), Associate Professor, Department of Marketing, 2006.

Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, Department of Landscape Architecture, 2008.

Smith, Joshua Byron, Ph.D., M.A. (Northwestern University), B.A. (University of Illinois at Chicago), Assistant Professor, Department of English, 2011.

Smith, Annie B., LL.M. (George Washington University), J.D. (University of Wisconsin-Madison), Associate Professor, School of Law, 2012.

Smith, Tom E.C., Ed.D. (Texas Tech University), M.Ed., B.S.E. (University of Mississippi), University Professor, Department of Curriculum and Instruction, 2002.

Smith, Scott, M.S. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2006.

Smith, Christopher, Ph.D. (University of Virginia), M.S. (University of Missouri-Rolla), M.S. (University of Texas at Austin), B.S. (U.S. Military Academy), Instructor, Program in Operations Management, 2015.

Smith, Martin, B.S. (Oklahoma State University), Assistant Professor, Air Force ROTC, 2018.

Smith-Blair, Nancy J., Ph.D. (University of Kansas), M.S.N. (Northwestern State University), B.S.N. (Texas Christian University), Associate Professor, Eleanor Mann School of Nursing, 1994.

Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 1989.

Snyder, Tamara D., M.S. (University of Arkansas), B.S. (University of California-Los Angeles), Clinical Assistant Professor, Department of Physics, 2004.

Sodero, Annibal Camara, Ph.D. (Arizona State University), M.S.C. (Warkwick University), B.S.C. (UFMG-Brazil), Assistant Professor, Department of Supply Chain Management, 2013.

Song, Geoboob, Ph.D. (University of Oklahoma), B.A. (Korea University), B.A. (Hanyang University), Assistant Professor, Department of Political Science, 2012.

Southward, Cheryl Leigh, Ph.D., M.S., B.S. (University of Tennessee), Associate Professor, School of Human Environmental Sciences, 2008.

Soysal, Gonca, Ph.D. (Northwestern University), M.S. (Northwestern University), M.E. (University of Florida), B.S. (Middle East Technical University), Assistant Professor, Department of Marketing, 2017.

Sparks, Leigh Pryor, Ph.D. (University of Arkansas), M.A., B.A. (Stanford University), Instructor, Department of English, 2009.

Spear, Kari R., M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.

Specking, Eric A., M.S.I.E., B.S. (University of Arkansas), Lecturer, Program in Operations Management.

Spialek, Matthew L., Ph.D. (University of Missouri), Assistant Professor, Department of Communication, 2017.

Spicer, Tom O., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1981.

Spiegel, Frederick W., Ph.D. (University of North Carolina at Chapel Hill), B.A. (Drew University), Distinguished Professor, Department of Biological Sciences, 1982.

Spiegel, Sarah E., M.S. (University of Illinois-Urbana-Champaign), B.A. (Bryn Mawr College), Assistant Librarian, University Libraries, 2007.

Spießhoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Department of Electrical Engineering, 2014.

Spradley, J. Ples, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, Department of Plant Pathology, 1984.

Sprandel, Heather, Ed.D., M.Ed. (University of Arkansas), B.A. (DePaul University), Instructor, Walton College of Business, 1999.

Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, School of Art, 2006.

Spurlock, Terry, Ph.D. (University of Arkansas), Extension Assistant Professor, Department of Plant Pathology, 2015.

Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.

Stahle, David William, Ph.D. (Arizona State University), M.A. (University of Arizona), Distinguished Professor, Department of Geosciences, 1982.

Standerfer, Christina Corrado, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Arkansas at Little Rock), Professor, Clinton School of Public Service, 2007.

Stapp, Robert Bruce, Ph.D., M.S. (Oklahoma City University), B.S.B.A. (Oklahoma State University), Clinical Professor, Department of Economics, 1995.

Starks, Trish, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Associate Professor, Department of History, 2000.

Starling-Ledbetter, Robyn M., M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2007.

Stassen, Robert E., Ph.D., M.B.A. (University of Nebraska-Lincoln), B.S. (University of Minnesota), Associate Professor, Department of Marketing, 1989.

Stauss, Kim, Ph.D. (University of Utah), M.S.W. (California State University at Sacramento), B.S. (Stephen F. Austin State University), Associate Professor, School of Social Work, 2006.

Steelman, Zach, Ph.D., M.S. (University of Arkansas), B.B.A. (Northeastern State University), Assistant Professor, Department of Information Systems, 2017.

Steegman, Charles E., Ph.D., M.A. (University of Missouri-Kansas City), B.A. (St. Mary’s College), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1995.
Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, Department of Entomology, 1989.

Steinmetz, Joseph E., Ph.D. (Ohio University), M.A., B.S. (Central Michigan University), Distinguished Professor of Psychological and Brain Science, Department of Psychological Science, 2016.

Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, Department of Chemistry and Biochemistry, 2007.

Stephen, Fred M., Ph.D. (University of California-Berkeley), B.S. (San Jose State University), University Professor, Department of Entomology, 1974.

Stephens, Dorothy Anne, Ph.D. (University of California-Berkeley), M.A. (University of Illinois-Chicago), B.A. (Northwestern University), Professor, Department of English, 1992.

Stephens, Mary Paige, M.S.W., B.A. (University of Missouri-Columbia), Lecturer, School of Social Work, 2013.

Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, Department of Biological Sciences, 2003.

Stephenson, Barbara C., M.S. (West Virginia University), Instructor, Department of Mathematical Sciences, 2004.

Sterling, Brett E., Ph.D., M.A. (Vanderbilt University), B.A. (University of Arkansas), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.

Stevens, Christopher W., Ph.D. (University of Maryland College Park), M.A. (City University of New York-The Graduate Center), B.A. (Humboldt State University), Instructor, Department of Philosophy, 2015.

Stewart, Patrick A., Ph.D. (Northern Illinois University), M.A., B.A. (University of Central Florida), Associate Professor, Department of Political Science, 2008.

Stewart, Angela, D.N.P. (University of Arkansas), M.N.Sc., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2015.

Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, Department of Chemistry and Biochemistry, 1991.

Stockdell, Rick, M.A. (Kansas State University), B.S. (Northwest Missouri State University), Associate Professor, School of Journalism and Strategic Media, 1980.

Stokowski, Sarah, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.

Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Assistant Professor, Department of Anthropology, 2014.

Stoverink, Adam, Ph.D., (Texas A&M University), M.B.A. (St. Louis University), B.S.B.A. (University of Missouri), Assistant Professor, Department of Management, 2017.

Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, Department of Chemistry and Biochemistry, 2012.

Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern University), Associate Professor, Department of Entomology, 1993.

Su, Danjie, Ph.D. (University of California, Los Angeles), M.A., B.A. (Sun Yat-sen University, China), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Suarez, Celina A., Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Assistant Professor, Department of Geosciences, 2012.

Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2010.

Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, Department of Industrial Engineering, 2012.

Sullivan, Bailey A., Ph.D. (Texas A&M University), M.S., B.S. (Kansas State University), Instructor, Department of Biological and Agricultural Engineering, 2015.

Sullivan, W. Curt, M.A. (University of Arkansas), B.A. (Harding University), Lecturer, Department of Political Science, 2015.

Sun, Xiaolun, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, Department of Poultry Science, 2016.

Sutherland, Daniel E., Ph.D., M.A., B.A. (Wayne State University), Distinguished Professor, Department of History, 1989.

Sutton, James M., M.S. (Southern Methodist University), B.S. (University of West Florida), B.M. (University of Southern Mississippi), Instructor, Program in Operations Management, 2014.

Swedenburg, Ted R., Ph.D., M.A., (University of Texas at Austin), B.A. (University of Beirut), Professor, Department of Anthropology, 1996.

Sykes, Tracy Ann, Ph.D. (University of Arkansas), B.S. (University of Maryland-College Park), Associate Professor, Department of Information Systems, 2011.

Syler, Rhonda A., Ph.D. (Auburn University), M.B.A. (Columbus State University), M.S. (Kansas State University), B.S. (Middle Tennessee State University), Clinical Assistant Professor, Department of Information Systems, 2016.

Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, School of Art, 2016.

Szakasits, Monika, J.D. (Baylor University), B.A. (Sam Houston State University), Associate Librarian, University Libraries, 2004.

Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, Department of Entomology, 2001.

Szwydky-Davis, Lissette López, Ph.D., M.A. (Penn State University), B.A. (University of Miami), Assistant Professor, Department of English, 2013.

T

Tarvin, Tim, J.D. (University of Arkansas), B.A. (Hendrix College), Associate Professor, School of Law, 1993.

Taylor, Jennifer, Ph.D. (University of Missouri-Kansas City), M.A. (University of Northern Iowa), B.A. (University of Kentucky), Research Professor, Department of Marketing, 2014.

Teague, Rick, M.S. (Webster University), B.B.A. (University of Memphis), Instructor, Program in Operations Management, 2001.

Teal, Tabatha, M.S.N. (University of Arkansas), B.S.N. (Arkansas Tech University), Instructor, Eleanor Mann School of Nursing, 2014.

Teal, Kimberly Hannon, Ph.D., M.M. (Eastman School of Music), B.A. (University of Oregon), Assistant Professor, Department of Music, 2016.

Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, Department of Poultry Science, 2002.

Ten Haaf, Rachel E., Ph.D. (University of Michigan), M.A. (University of Illinois, Urbana-Champaign), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.

Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Assistant Professor, Department of Anthropology, 2013.

Terrell, Katie, M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Department of Accounting, 2012.

Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn University), Associate Professor, Department of Architecture, 1998.
Teuton, Sean Kicummah, Ph.D., M.A. (Cornell University), B.A. (University of Colorado-Boulder), Associate Professor, Department of English, 2013.

Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, Department of Chemistry and Biochemistry, 2003.

Thein, Ricky, M.A. (Southern Illinois University), B.A. (University of Central Florida), Clinical Assistant Professor, School of Journalism and Strategic Media, 2013.

Thibado, Paul M., Ph.D. (University of Pennsylvania), B.S. (San Diego State University), Professor, Department of Physics, 1996.

Thoma, Greg, Ph.D. (Louisiana State University), M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.

Thomas, JaLynn D., B.S. (Louisiana Tech College Ruston Campus), Instructor, Department of Accounting, 2011.

Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A. (University of Akron), Associate Professor, Department of Sociology and Criminology, 2015.

Thomas, Johanna, Ph.D., M.S.W. (Louisiana State University), B.A. (University of Akron), Assistant Professor, School of Social Work, 2015.

Thomas, Lauren, D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Clinical Assistant Professor, Department of Animal Science, 2016.

Thomas, Stephanie, M.S.W. (University of Maryland at Baltimore), B.S. (Old Dominion University), Lecturer, School of Social Work, 2017.

Thomas, Rodney W., Ph.D., M.B.A. (University of Tennessee), B.S.B.A. (Greensboro College), Associate Professor, Department of Supply Chain Management, 2017.

Thomas, Stephanie, Ph.D. (Georgia Southern University), M.B.A., B.A. (University of Tennessee), Clinical Assistant Professor, Department of Supply Chain Management, 2017.

Thompson, Timothy F., D.M.A., M.M. (University of Wisconsin-Madison), Professor, Department of Music, 1979.

Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, Department of Computer Science and Computer Engineering, 2000.

Thompson, Randy, J.D. (University of Illinois-Urbana-Champaign), M.L.S., B.A. (Indiana University), Associate Professor, School of Law, 2008.

Thomson, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Throgmorton, Molly Kathryn, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, 2012.

Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, Department of Chemistry and Biochemistry, 2004.

Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, Department of Biological Sciences, 2010.

Tjani, Maria, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (University of Ioannina, Greece), Associate Professor, Department of Mathematical Sciences, 2003.

Tompkins, Chris, J.D. (Vanderbilt University), B.S. (U.S. Naval Academy), Instructor, Department of Finance, 2011.

Tonymon, Susan, M.S.W. (University of Arkansas at Little Rock), B.S.W. (Arkansas State University), Instructor, School of Social Work, 2014.

Torres Mesa, Nelson Augusto, M.A. (University of Arkansas), B.S. (University of Antioquia), Instructor, Department of World Languages, Literatures and Cultures, 2010.

Traywick, La Vona, Ph.D. (University of Kentucky), Associate Professor, School of Human Environmental Sciences, 2007.

Trivitt, Julie R., Ph.D. (University of Arkansas), M.A. (University of Arkansas at Fort Smith), M.A. (University of Arkansas), Clinical Associate Professor, Department of Education Reform, 2012.

Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, School of Human Environmental Sciences, 2015.

Tullis, Jason A., Ph.D., M.S. (University of South Carolina at Columbia), B.S. (Brigham Young University), Associate Professor, Department of Geosciences, 2004.

Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 2000.

Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Turner, Alison, M.A. (Parsons School of Design), B.A. (Kentucky State University), Assistant Professor, Department of Architecture, 2008.

Turner, Henry L., Ph.D., M.S. (University of Arkansas), B.S. (University of Oregon), Instructor, Department of Geosciences, 2008.

Tuychiev, Hayot A., M.A. (University of Arkansas), B.A. (Tashkent State University of Economics), Instructor, School of Journalism and Strategic Media, 2010.

Tyler, Susan, M.S.W., B.S.W (University of Arkansas), Lecturer, School of Social Work, 2018.

Tzanetakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, Department of Plant Pathology, 2008.

U

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghampton), Distinguished Professor, Department of Anthropology, 1995.

Uribe, Lia, D.M.A. (University of Kansas), M.M. (University of Arkansas), B.M. (Universidad Nacional de Colombia, Bogotá), Assistant Professor, Department of Music, 2013.

V

Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S. (University of Nebraska at Omaha), Assistant Professor, School of Social Work, 2013.

Van Hoek, Remko, Ph.D. (University of Utrecht), M.B.A.(London School of Economics), B.S.B.A.(Vanderbilt University), Clinical Full Professor, Department of Supply Chain Management, 2018.

Van Horn-Morris, Jeremy, Ph.D. (University of Texas at Austin), B.S. (University of Oregon), Assistant Professor, Department of Mathematical Sciences, 2012.

Van Winkle, Holly M., M.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2013.

Vandermark, Lesley, Ph.D., M.S. (University of Connecticut), B.S. (California University of Pennsylvania), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2016.

VanDevender, Karl, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, Department of Biological and Agricultural Engineering, 1995.
Veilleux, Jennifer Celene, Ph.D., M.A. (University of Illinois at Chicago), B.A. (Macalaster College), Associate Professor, Department of Psychological Science, 2011.

Velligquete, Anne M., Ph.D. (University of Arkansas), M.A.B., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Marketing, 2014.

Venkatesh, Viswanath, Ph.D. (University of Minnesota-Twin Cities), B.E. (Bharathiar University, India), Distinguished Professor, Department of Information Systems, 2004.

Vennarucci, Rhodora, Ph.D., M.A. (University at Buffalo, New York), B.A. (University of Michigan), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.

Verma, Lalit R., Ph.D. (University of Nebraska-Lincoln), M.S. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpur, India), Professor, Department of Biological and Agricultural Engineering, 2000.

Venniot, Gilles André Fernand, Ph.D. (University of Kansas), M.A. (University of Paris VII Jussieu), M.A. (University of Besançon), Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Vilató, Claudia, M.A. (Penn State University), B.A. (University of Miami), Instructor, Department of English, 2015.

Villanova, Daniel, Ph.D. (Virginia Tech University), B.S.B.A. (Appalachian State University), Assistant Professor, Department of Marketing, 2018.

Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Assistant Professor, Department of Anthropology, 2016.

Vinti, Heather D., Ph.D., M.P.H. (University of South Florida), B.A. (University of Waterloo), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.

Viswanathan, Padma, M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Assistant Professor, Department of English, 2010.

Vitale, Davide, M.Arch. (Harvard University), Diploma in Architecture (University of Rome), Professor, Department of Architecture, 1985.

Vo, Charles, D.C. (Parker College of Chiropractic), M.A. (University of Arkansas), B.S. (University of Missouri), Instructor, Department of Biological Sciences, 2013.

Vowell-Johnson, Kelly, Ed.D. (University of Arkansas), M.N.Sc. (University of Arkansas for Medical Sciences), B.S.N. (Arkansas Tech University), Assistant Professor, Eleanor Mann School of Nursing, 2011.

Vyas, Reeta, Ph.D. (State University of New York at Buffalo), M.S., B.S. (Banaras Hindu University), Professor, Department of Physics, 1984.

Wade, Les, Ph.D. (University of California-Santa Barbara), M.F.A. (University of Georgia), M.A. (Duke University), B.A. (Tulane University), Professor, Department of Theatre, 2011.

Wai, Jonathan, Ph.D. (Vanderbilt University), M.A. (Claremont Graduate University), B.A. (Claremont McKenna College), Assistant Professor, Department of Education Reform, 2018.

Wailles, Eric J., Ph.D. (Michigan State University), B.S. (Cornell University), Distinguished Professor, Department of Agricultural Economics and Agribusiness, 1980.

Walch, John S., M.F.A. (University of Texas at Austin), B.A. (Colorado College), Assistant Professor, Department of Theatre, 2016.

Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2008.

Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, Department of Biological Sciences, 1965.

Walker, Kate Ireton, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, Department of Biological Sciences, 2014.

Waller, Matthew A., Ph.D., M.S. (Pennsylvania State University), B.S. (University of Missouri–Columbia), Professor, Department of Supply Chain Management, 2002.

Walsh, Lora, Ph.D. (Northwestern University), M.Sc. (University of Edinburgh), B.A. (Pepperdine University), Visiting Assistant Professor, 2014.

Wamishe, Yeshi Andenow, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, Department of Plant Pathology, 2011.

Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), Associate Professor, Department of Chemistry and Biochemistry, 2012.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, Department of Food Science, 1999.

Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2015.

Wang, Yao-Chin, Ph.D. (Oklahoma State University), M.B.A., B.Ec. (National Chung Cheng University), Assistant Professor, School of Human Environmental Sciences, 2017.

Ward, Barry M., Ph.D. (Rutgers State University-New Brunswick), M.Sc., B.A.Mod. (Trinity College, Dublin), Associate Professor, Department of Philosophy, 2002.

Ward, Cortez, M.S. (Troy University), B.S. (University of Maryland), Instructor, Program in Operations Management, 2006.

Ward, Peggy, Ph.D. (University of Arkansas), M.S. (Texas A&M University), B.S.Ed. (Southern Arkansas University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2010.

War, Heidi, Ph.D. (University of Oklahoma), D.V.M. (Oklahoma State University), B.S. (University of Oklahoma), Assistant Professor, Department of Animal Science, 2015.

Warlow, George W., Ph.D. (The Ohio State University), M.Ed., B.S. (University of Missouri-Columbia), Professor, Department of Agricultural Education, Communications and Technology, 1992.

Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, Department of Electrical Engineering, 2005.

Warren, W. Dale, M.M. (University of Kentucky), B.S. (Austin Peay State University), Professor, Department of Music, 1991.

Warren, Ron, Ph.D. (Indiana University), M.A. (Colorado State University), B.A. (Michigan State University), Associate Professor, Department of Communication, 1997.

Washburn, Lisa T., Ph.D. (University of Arkansas for Medical Sciences), Assistant Professor, School of Human Environmental Sciences, 2001.

Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Watkins, Kenton Bradley, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2002.

Watkins, Patsy, Ph.D. (University of Iowa), M.A., B.A. (University of Texas, Austin), Associate Professor, School of Journalism and Strategic Media, 1983.

Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, School of Human Environmental Sciences, 2006.

Weatherby, Danielle, J.D. (University of Florida), B.A. (Franklin and Marshall College), Associate Professor, School of Law, 2013.
Webb, Jennifer D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Tennessee), Associate Professor, Department of Interior Design, 1999.

Webster, Jim, Ph.D. (Arizona State University), M.B.A. (University of Arkansas), B.S.C.E. (Indiana University-Purdue University-Indianapolis), Instructor, Department of Finance, 2007.

Weijinya, Uchechukwu C., Ph.D., M.S., B.S. (Michigan State University), Associate Professor, Department of Mechanical Engineering, 2008.

Wells, Michael, M.S. (Florida State University), B.S. (East Stroudsburg University), Instructor, Program in Operations Management, 2014.

Wells, Peggy, M.B.A. (University of Houston), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2012.

Wells, Rob, Ph.D. (University of Maryland), M.A. (St. John's College), Assistant Professor, School of Journalism and Strategic Media, 2016.

West, Elliott, Ph.D., M.A. (University of Colorado-Boulder), B.A. (University of Texas, Austin), Alumni Distinguished Professor, Department of History, 1979.

Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, Department of Biological Sciences, 2016.

Weymiller, Audrey, Ph.D. (University of Minnesota), M.N. (University of Washington), B.S. (University of Wisconsin), Associate Professor, Eleanor Mann School of Nursing, 2015.

Whayne, Jeannie, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990.

White, John A., Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytech Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, Department of Industrial Engineering, 1997.

White, Calvin, Ph.D. (University of Mississippi), M.A., B.A. (University of Central Arkansas), Associate Professor, Department of History, 2007.

Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Professor, Ralph E. Martin Department of Chemical Engineering, 2011.

Wicks, Robert Howard, Ph.D. (Michigan State University), M.A. (University of Missouri-Columbia), B.A. (American University), Professor, Department of Communication, 1994.

Wicks, Jan L., Ph.D., M.A. (Michigan State University), B.A. (University of Southwest Louisiana), Professor, School of Journalism and Strategic Media, 1994.

Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, Department of Poultry Science, 1993.

Wiebe, Zac, M.A. (University of Kansas), B.S. (University of Saskatchewan), B.S. (North Carolina State University), Assistant Professor, Department of Accounting, 2018.

Wiedenmann, Robert N., Ph.D., B.S. (Purdue University), Professor, Department of Entomology, 2005.

Wilke, Stephen, J.D., M.P.A. (University of Memphis), Instructor, Program in Operations Management, 1996.

Wilkinson, Weston, M.F.A. (University of Tennessee), B.A. (Texas A&M University), Assistant Professor, Department of Theatre, 2014.

Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, Department of Chemistry and Biochemistry, 1998.

Willett, Cammy, Ph.D., M.S. (University of Missouri), B.S. (Evangel University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.

Williams, Stacy Goad, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, Department of Civil Engineering, 1997.

Williams, Rodney D., Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 1998.

Williams, Patrick George, Ph.D., M.A. (Columbia University), B.A. (University of Texas at Austin), Professor, Department of History, 1998.

Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.

Williams, Brent D., Ph.D., M.S. (University of Arkansas), B.A. (Lyon College), Associate Professor, Department of Supply Chain Management, 2011.

Williams, Colleen C., J.D. (Washington University in St. Louis), B.A. (Western Washington University), Associate Librarian, University Libraries, 2006.

Williams, Charlotte Lewellen, Ph.D., M.S. (University of Arkansas for Medical Sciences), B.S. (Howard University), Professor, Clinton School of Public Service, 2007.

Williams, Darron, Ph.D. (Northcentral University), M.S., M.B.A., B.S. (University of Memphis), Instructor, Program in Operations Management, 2015.

Williams, Amanda, Ph.D., M.S., B.S. (Oklahoma State University), Assistant Professor, School of Human Environmental Sciences, 2017.

Willison, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Assistant Professor, Department of Biological Sciences, 2012.

Willison, Anna E., M.A. (Central Missouri State University), Instructor, English Language and Cultural Studies, 2014.

Wilson, Charles E., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Wise, Rick, Ph.D., M.S. (Southern Methodist University), B.S. (University of Arkansas), Research Professor, Department of Physics, 2014.

Wiseman, Cindy, M.F.A. (New Mexico State University), B.F.A. (University of Arkansas), Instructor, School of Art, 2009.

Wisewehr, Cathy, Ed.D. (University of Missouri-Columbia), M.N.S.Ed., B.S. (Southeast Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009.

Wistuba, Troy, Ph.D. (University of Arkansas), M.S., B.S. (Kansas State University), Adjunct Assistant Professor, Department of Animal Science, 2014.

Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, Department of Biomedical Engineering, 2011.

Wolf, Patrick J., Ph.D., M.A. (Harvard University), B.A. (University of Saint Thomas), Distinguished Professor, Department of Education Reform, 2006.

Wolfe, Marc E., M.S.A. (Central Michigan University), B.S. (Harvard University), Professor, Air Force ROTC, 2016.

Wong, Christopher William, B.A. (University of Notre Dame), Lecturer, 2010.

Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2012.
Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 2013.

Woodland, Janet C., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (King’s College), Clinical Assistant Professor, Department of Mathematical Sciences, 1993.

Woods, Randall B., Ph.D., M.A., B.A. (University of Texas at Austin), Distinguished Professor, Department of History, 1971.

Woods, Jordan Blair, Ph.D., M.Phil (University of Cambridge), J.D. (University of California, Los Angeles), Assistant Professor, School of Law, 2016.

Worden, Steven K., Ph.D. (University of Texas at Austin), M.A. (Portland State University), Associate Professor, Department of Sociology and Criminology, 1986.

Worrell, Dan, Ph.D., M.S., B.S. (Louisiana State University), Professor, Department of Management, 2005.

Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, Department of Horticulture, 2016.

Wright, Nia, M.B.A. (Tulane University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2009.

Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, Department of Electrical Engineering, 2008.

Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, Department of Computer Science and Computer Engineering, 2014.

X

Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, Department of Physics, 1990.

Xiao, Jie, Ph.D. (State University of New York-Binghamton), M.S., B.S. (Wuhan University), Associate Professor, Department of Chemistry and Biochemistry, 2016.

Xinya, Liang, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, ESMR, 2014.

Xu, Jenny, M.A. (University of Texas at Austin), Clinical Associate Professor, Department of World Languages, Literatures and Cultures, 1992.

Y

Yandell, Kay, Ph.D., M.A. (Cornell University), B.A. (University of Arkansas), Assistant Professor, Department of English, 2013.

Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, Department of Sociology and Criminology, 2002.

Yang, Li, M.A. (Brandeis University and Beijing Language and Culture University), B.A. (Beijing Language and Culture University), Instructor, Department of World Languages, Literatures and Cultures, 2014.

Yates, Michael, M.B.A. (Harvard University), M.S. (Naval Postgraduate School), B.A. (University of California), Instructor, Department of Management, 1999.

Yates-Knepp, Triny, M.A. (University of Texas, Austin), Instructor, English Language and Cultural Studies.

Yazwinski, Tom, Ph.D. (North Carolina State University), M.S. (University of Maine), B.S. (University of Vermont), Adjunct University Professor, Department of Animal Science, 1977.

Yeager, Timothy J., Ph.D., M.A. (Washington University in St. Louis), Professor, Department of Finance, 2006.

Yeager, Mickey, M.S. (University of Arkansas), M.A. (Liberty Baptist Theological Seminary), B.S. (University of Southern Mississippi), Instructor, Program in Operations Management, 1989.

Yoon, InJeong, Ph.D. (University of Arizona), Assistant Professor, School of Art, 2017.

Young, Elizabeth Lee, J.D. (George Washington University), B.A. (Hendrix College), Associate Professor, School of Law, 2008.

Young, Heather D., Ph.D. (University of Arkansas), M.S. (University of Tennessee), B.S. (Arkansas Tech University), Assistant Professor, Department of Curriculum and Instruction, 2007.

Youngblood, Joshua Cobb, M.A. (Florida State University), B.A. (University of Louisiana at Monroe), Assistant Librarian, University Libraries, 2011.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008.

Z

Zabelina, Darya, Ph.D. (Northwestern University), Assistant Professor, Department of Psychological Science, 2017.

Zajac, Mark, Ph.D., M.Sc. (University of Notre Dame), B.Sc. (McMaster University, Hamilton Ontario, Canada), Visiting Assistant Professor, Department of Physics, 2013.

Zajicek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, Department of Sociology and Criminology, 1994.

Zamarro Rodriguez, Gema, Ph.D., M.S. (Centro de Estudios Monetarios y Financieros, Spain), B.A. (Universidad Carlos III de Madrid, Spain), Associate Professor, Department of Education Reform, 2014.

Zeng, Ka, Ph.D. (University of Virginia), M.A. (Virginia Polytech Institute and State University), B.A. (Foreign Affairs College, Beijing), Professor, Department of Political Science, 2000.

Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, Department of Industrial Engineering, 2011.

Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, Department of Civil Engineering, 2011.

Zhang, Qingyang, Ph.D. (Northwestern University), M.S. (Loyola University–Chicago), B.S. (Beijing Normal University), Assistant Professor, Department of Mathematical Sciences, 2015.

Zha, Jiangchao, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.

Zha, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, Department of Electrical Engineering, 2015.

Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi’an Jiaotong University, Xi’an, China), Assistant Professor, Department of Mechanical Engineering, 2014.

Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), B.S. (Zhejiang University, Hangzhou, China), Professor, Department of Biological and Agricultural Engineering, 2013.

Zies, Brenda June, Ph.D., M.A. (University of Arkansas), B.S. (East Texas State University), Visiting Assistant Professor, Department of Psychological Science, 2005.

Courses of Instruction

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by subject with the subject code in parenthesis following. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course that has been scheduled during a semester or summer session with a certain number of prescribed meetings each week. Many courses are offered as classes every semester while many others are offered less frequently. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

To see a Schedule of Classes, which lists classes available in a specific semester, along with the instructor of record, time and place the class is being held, go to UAConnect (https://uaconnect.uark.edu).

How to Read a Course Description

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course scheduled during a semester or summer session with a certain number of prescribed meetings each week. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

The Schedule of Classes lists classes available in a specific semester, along with the instructor of record, time and place the class is being held.

Course Description Explanations

A course listing comprises the following elements, in order:

Course Prefix: This alpha descriptor is the first identifying part of a course. This four-letter code represents the course prefix name. Usually the course prefix will be the same as the department offering the course, but occasionally the prefix is one of many different courses offered in a single department. For example, ARAB refers to Arabic courses, which are offered through the Department of World Languages, Literatures and Cultures; HIST refers to History courses.

Course Number: Each course is designated by a four-digit number. The first digit identifies the level of the course: 1, freshman level; 2, sophomore level; 3 and 4, junior-senior level; 5, 6, and 7, graduate level. Any exceptions to this practice are stated in the course descriptions.

Course Title: The title of the course is printed in bold letters.

Course Semester Offering: Course titles are followed by abbreviations (in parentheses) for the semester in which the course is normally offered. Cross-check with the Schedule of Classes to determine if a course is being offered. Courses marked (Sp) will be offered in the spring, courses marked (Fa) will be offered in the fall, courses marked (Su) will be offered in the summer, and courses marked (Irregular) will be offered irregularly. Consult the Schedule of Classes to verify that a course is being offered for a given term.

Course Description: A brief description of the course content and its major emphasis are stated. If the course is cross-listed (also offered under another course number) a statement to that effect will be included in the description. If the course is eligible to be repeated for degree credit more than once, a statement will appear to indicate the total hours or times a course may be repeated. If no repeat statement is listed, the course may be used for degree credit only once.

Requisites: Requisites are requirements that must be fulfilled either before a course may be taken or at the same time a course is taken. It is the student’s responsibility to make sure the proper prerequisites have been completed before enrolling in any class. Prerequisites are courses or requirements that must be completed prior to enrolling in a certain course. Courses may have prerequisites from inside and outside the department. It is the student’s responsibility to make sure he/she has completed the proper prerequisites before enrolling in any class. Courses listed as corequisite are to be taken in the same semester as the course desired.

A course listed as both a pre- and corequisite are requirements that if not taken prior to enrolling in a course, must be taken during the same semester as the course.

Adult and Lifelong Learning (ADLL)

Courses

ADLL 5113. Perspectives in Adult Education. 3 Hours.
Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts.

ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.
Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations.

ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.
Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to assess student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs.

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.
Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners.

ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.
Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education.

ADLL 5163. Managing Change in Adult and Lifelong Learning. 3 Hours.
Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations.

ADLL 5173. Program Planning. 3 Hours.
Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans.

ADLL 5183. Technology and Innovation in Adult Learning. 3 Hours.
Techniques for designing, developing, implementing, and assessing technology-mediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes.

ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.
Seminars focused on topics related to adult and lifelong learning.

ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours.
Internship in adult and lifelong learning settings.

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.
Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. May be repeated for up to 9 hours of degree credit.

ADLL 5233. Independent Study. 3 Hours.
Provides students with an opportunity to pursue special study in adult and lifelong learning. May be repeated for up to 6 hours of degree credit.
ADLL 6113. Advanced Adult Learning Theory. 3 Hours.
Advanced study of theories and models of adult and lifelong learning with an emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development.

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours.
This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field.

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours.
Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies.

ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong Learning. 3 Hours.
An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms.

ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning Programs. 3 Hours.
Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning.

ADLL 6163. Adult Development and Psychology. 3 Hours.
Focus on adult developmental psychology with emphasis on lifespan development and specific issues related to learning in the various stages of adulthood. Work-life balance, meaning of work, generational issues.

ADLL 6173. Current Issues. 3 Hours.
Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. May be repeated for up to 6 hours of degree credit.

ADLL 6183. Organization Development, Learning, and Change. 3 Hours.
Using a system perspective, this course examines the theories and practices associated with organization development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influences organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance.

ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.
Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies.

ADLL 6223. Workforce and Community Development. 3 Hours.
This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college’s expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders.

ADLL 6233. Survey and Significance of the American Community College. 3 Hours.
A comprehensive overview of the American community college, its history, its ever-evolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community.

ADLL 6243. Current Trends in Community Colleges. 3 Hours.
This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission.

ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.
This course examines career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions.

ADLL 6313. Independent Study. 3 Hours.
Independent study of topics in adult and lifelong learning.

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.
Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory.

ADLL 6413. Quantitative Reasoning II in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing descriptive, correlational, and experimental studies. Development of research questions, definition of variables, selection or development of instruments, data collection, analysis, interpretation and reporting of research results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or equivalent.

ADLL 6423. Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.
Methodologies for designing qualitative research studies in adult and lifelong learning settings. Selection of the appropriate qualitative tradition, selection of research subjects, development of data collection protocols, field work strategies, data analysis, data interpretation and presentation of data results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory.
ADLL 6433. Program Evaluation. 3 Hours.
Overview of evaluation strategies in adult and lifelong learning programs that include: development of evaluation questions, selection or development of instrumentation, data collection methods, data analysis, and reporting of evaluation results. Emphasis on practical and ethical issues associated with evaluation processes. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423, or equivalent.

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours.
Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent.

ADLL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

African and African American Studies (AAST)

Courses

AAST 1003. Introduction to African and African American Studies. 3 Hours.
This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact's manifestations in the United States of America.

AAST 2023. The African American Experience. 3 Hours.
Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and socio-political context to understand and appreciate African American impacts on the United States.

AAST 3023. African Americans in Sport. 3 Hours.
Historical, sociological, and political issues and debate surrounding African Americans in sport. Contemporary issues facing African American athletes and sports figures.

AAST 3033. The African American Experience in Business. 3 Hours.
This course is designed to provide the student with a comprehensive and critical analysis of the history of the African American experience as a member of the business sector of the United States economics. The course will review information that includes and demonstrates activities prior to slavery, during, and after slavery. This course is cross-listed with WCOB 3033.

AAST 3123. African American Students in Higher Education. 3 Hours.
Examines the impact of college environments on African American students. Focuses on the following topics regarding African American students: retention, student demographics, student characteristics, current trends, issues and problems, student success, sub-populations, student values, and implications for higher education.

AAST 3133. History of Sports in Africa. 3 Hours.
This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. This course is cross-listed with HIST 3133.

AAST 3183. Popular Culture in the Caribbean. 3 Hours.
History of the Caribbean through a historically-situated analysis of popular culture production, including literature, dance, music, cuisine, film, carnival, television, and sexuality. This course is cross-listed with HIST 3183.

AAST 3193. The Making of the Modern Caribbean. 3 Hours.
History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region. This course is cross-listed with HIST 3193.

AAST 3233. African American History to 1877. 3 Hours.
History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. This course is cross-listed with HIST 3233.

AAST 3243. African American History Since 1877. 3 Hours.
The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. This course is cross-listed with HIST 3243.

AAST 3253. The History of Sub-Saharan Africa. 3 Hours.
Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor.

AAST 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing.

AAST 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing.

AAST 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing.

AAST 3283. Civil Rights Policy and Politics. 3 Hours.
This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations.

AAST 3293. African American Politics. 3 Hours.
This is a survey course designed to provide students with a comprehensive overview of African American political participation in the United States. In addition to analyzing important events in African American Politics, the course attempts to explain evolving patterns of political participation in Black America.

This course is cross-listed with PLSC 3293.
AAST 3853. Topics in African-American Literature and Culture. 3 Hours.
The study of works of African-American literature, with attention to particular themes, 
genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit. This course is cross-listed with ENGL 3853.

AAST 3923H. Honors Colloquium. 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in AAST). May be repeated for degree credit.

AAST 399VH. Honors African & African American Studies Thesis. 1-6 Hour.
Independent thesis research and writing under the direction of an AAST faculty member. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

AAST 4003. African & African American Studies Study Abroad. 3 Hours.
Examination of selected topics in conjunction with student participation in the bi-
annual African & African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. May be repeated for up to 6 hours of degree credit.

AAST 4003H. Honors African & African American Studies Study Abroad. 3 Hours.
Examination of selected topics in conjunction with student participation in the bi-
annual African & African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. May be repeated for up to 6 hours of degree credit.

AAST 4063. Women in Africa. 3 Hours.
Diversity of women's life experiences throughout sub-Saharan Africa will be examined. The class will investigate a range of topics, from marriage and motherhood to prostitution and popular culture. A historical dimension will be present throughout the course, and perspectives from literature and film will also be incorporated.
This course is cross-listed with ANTH 4063.

AAST 4073. African Sociolinguistics. 3 Hours.
Explores how language use intersects, constructs, and reflects social life in Africa. Covers key topics in sociolinguistics as they apply to current sociolinguistic issues on the African continent today.
This course is cross-listed with ANTH 4083.

AAST 4083. African Popular Culture. 3 Hours.
This class explores popular cultural expression across Africa. Topics range from hip hop and film, to second-hand clothing fashions and the media. We will consider how popular culture, while often inspired by global trends, is rooted in local circumstances and often reflects attempts to grapple with important issues.
This course is cross-listed with ANTH 4083.

AAST 4093. The History of African Americans and Social Justice. 3 Hours.
Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. This course is cross-listed with HIST 4093.

AAST 4123. Africa and the Trans-Atlantic Slave Trade. 3 Hours.
Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world.
This course is cross-listed with HIST 4123.

AAST 4153. Race and Society. 3 Hours.
Introduction to the sociological study of race and ethnicity within the United States, with emphasis on understanding how race and ethnicity operate within contemporary social institutions. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023. This course is cross-listed with SOCI 4153.

AAST 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.
Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States. Prerequisite: Junior standing or instructor consent.

AAST 4173. Social Work with African American Families. 3 Hours.
An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent.
This course is cross-listed with SCWK 4173.

AAST 4263. Modern Africa. 3 Hours.
Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today.
This course is cross-listed with HIST 4263.

AAST 4273. Comparative Slavery. 3 Hours.
Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history.
This course is cross-listed with HIST 4273.

AAST 4323. Racial Identity, Politics, and Public Policy. 3 Hours.
Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 4293 or AAST 1003 or Junior standing.
This course is cross-listed with PLSC 4323.

AAST 4383. The American Civil Rights Movement. 3 Hours.
Introduction to the history and development of the civil rights movement in the United States.
This course is cross-listed with HIST 4383.

AAST 4463. African American Theatre History - 1950 to Present. 3 Hours.
A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course, the student should be familiar with the major works of African-American theatre and have a deeper understanding of American history.

AAST 4483. African American Biographies. 3 Hours.
Introduction to the history and intellectual development of famous and not-so-famous African Americans. This course is cross-listed with HIST 4483.

AAST 4563. The Old South, 1607-1865. 3 Hours.
Survey of the political, social, and economic development of the antebellum South. This course is cross-listed with HIST 4563.

AAST 4573. The New South, 1860 to the Present. 3 Hours.
Survey of the development of the Civil War and postwar South to the present. This course is cross-listed with HIST 4573.
AAST 4583. Cultures of Africa. 3 Hours.  
An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. This course is cross-listed with ANTH 4583.

AAST 4813. Africans and Slavery in Colonial Latin America. 3 Hours.  
Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. This course is cross-listed with HIST 4813.

AAST 4823. Black Freedom in the Age of Emancipation. 3 Hours.  
Comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. Focuses on the histories, meanings, and legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them.

AAST 4853. Studies in African American Literature and Culture. 3 Hours.  
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit. This course is cross-listed with ENGL 4853.

AAST 489V. African & African American Independent Study. 1-6 Hours.  
An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. May be repeated for up to 6 hours of degree credit.

AAST 4923. History of the Black Press. 3 Hours.  
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. This course is cross-listed with JOUR 4923.

AAST 4933. African American Political Ideology. 3 Hours.  
A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. This course is cross-listed with PLSC 4933.

AAST 4953. The History of Sub-Saharan African Women. 3 Hours.  
Introduction to the history of women in Sub-Saharan Africa, starting in the early 18th century through the 20th century. Focus on women and the transatlantic slave trade, women's influence in pre-colonial religious, political, and cultural institutions, and women's experiences under colonial rule and in post-colonial Africa. This course is cross-listed with HIST 4953.

AAST 4963. Third World Underdevelopment and Modernization. 3 Hours.  
Examines key issues related to societal change in the Third World, including various views and theories of international development and modernization. Other major issues explored include social inequalities, food and hunger, population, environment, trade and globalization, international aid, and the roles of state, market, and civil society. This course is cross-listed with HIST 4963.

AAST 499V. African and African American Studies Seminar. 1-12 Hours.  
Explores the various aspects of the African & African American experience as it relates to the development of relationships in American society and the world at large. Variable topic each semester. May be repeated for up to 12 hours of degree credit.

AAST 5003. Graduate Seminar in African & African American Studies. 3 Hours.  
Introduction to graduate study of African & African American Studies through an interdisciplinary examination of the history of the discipline, research methods employed, and its relationship to other disciplines.

AAST 5103. Graduate Readings in African & African American Studies. 3 Hours.  
An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. May be repeated for up to 6 hours of degree credit.

### Agricultural Economics (AGEC) Courses

**AGEC 1103. Principles of Agricultural Microeconomics. 3 Hours.**  
Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. This course is cross-listed with ECON 2023, AGEC 1103.

**AGEC 2103. Principles of Agricultural Macroeconomics. 3 Hours.**  
Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. This course is cross-listed with ECON 2013.

**AGEC 2103H. Honors Principles of Agricultural Macroeconomics. 3 Hours.**  
Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. Prerequisite: Honors standing.

**AGENT 2141L. Agribusiness Financial Records Lab. 1 Hour.**  
A computer lab section for the AGEC 2142 Agribusiness Financial Records class is required to teach students accounting software and spreadsheet applications related to financial record keeping. Corequisite: AGEC 2142. Prerequisite: AGME 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143.

**AGEC 2142. Agribusiness Financial Records. 2 Hours.**  
Principles of small agricultural business management accounting practices are taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Corequisite: AGEC 2141L. Prerequisite: AGME 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143.
AGEC 2303. Introduction to Agribusiness. 3 Hours.
Introduction to agribusiness issues as they relate to the food processing, wholesale and retail sectors of the agricultural industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023.

AGEC 2403. Quantitative Tools for Agribusiness. 3 Hours.
Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisite: (AGEC 1103 or ECON 2023 or ECON 2143) and (MATH 2043 or MATH 2053).

AGEC 3303. Food and Agricultural Marketing. 3 Hours.
Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food system; and current agricultural marketing topics. Prerequisite: AGEC 1103 or ECON 2023 or ECON 2143.

AGEC 3313. Agribusiness Sales. 3 Hours.
Principles of professional sales and sales management techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Corequisite: Drill. Prerequisite: AGEC 1103 or AGEC 2103 or ECON 2013 or ECON 2023 or ECON 2143 or equivalent.

AGEC 3373. Futures and Options Markets. 3 Hours.
Theory and mechanics of commodity futures and options markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for producers and users of agricultural commodity marketing plan. Speculative and hedging simulation exercises. Prerequisite: AGEC 1103 or ECON 2023.

AGEC 3403. Farm Business Management. 3 Hours.
Application of economic principles for the profitable organization and operation of the farm business. Focuses upon agricultural production management decision-making tools: budgeting techniques (enterprise, partial, cash flow), balance sheet, income statement, cash flow, investment analysis and risk management. Recommended: AGEC 1103 (or ECON 2023), AGEC 2142, and AGME 2903.

AGEC 3413. Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. This course is cross-listed with ENSC 3413.

AGEC 3413H. Honors Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Corequisite: Drill component. Prerequisite: AGEC 1103 or ECON 2023. This course is cross-listed with AGEC 3413, ENSC 3413.

AGEC 3503. Agricultural Law I. 3 Hours.
Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of major areas of agricultural law; acquisition and disposal of farmland; farm tenancies; rights and limitations in the use and ownership of farmland; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context.

AGEC 3523. Environmental and Natural Resources Law. 3 Hours.
Principles of environmental and natural resources law relevant to agriculture, food and the environmental sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other developing legal and regulatory issues relating to agriculture and natural resources.

AGEC 400V. Special Problems. 1-6 Hour.
Special studies and readings conducted under the direct supervision of staff members to satisfy the requirements of individual students. May be repeated for up to 6 hours of degree credit.

AGEC 401V. Internship in Agribusiness. 1-6 Hour.
A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisite: junior standing. May be repeated for up to 8 hours of degree credit.

AGEC 4113. Agricultural Prices and Forecasting. 3 Hours.
Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: (AGEC 1103 (or ECON 2023), AGEC 2403, AGST 4023 or STAT 2303 or WCOB 1033) and MATH 2053.

AGEC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. This course is cross-listed with ANSC 4123, POSC 4123.

AGEC 4143. Agricultural Finance. 3 Hours.
Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2142 or AGEC 2143 or ACCT 2013 or WCOB 1023).

AGEC 4163. Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023).

AGEC 4303. Agribusiness Marketing Management. 3 Hours.
Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Prerequisite: AGEC 2303 and AGEC 3303.

AGEC 4313. Agricultural Business Management. 3 Hours.
The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Prerequisite: (AGEC 2142 and AGEC 2141L) or AGEC 2143 or equivalent, AGEC 2303 or equivalent, and senior standing is recommended.
AGEC 4323. Agribusiness Entrepreneurship. 3 Hours.
Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Prerequisite: AGEC 1103 or equivalent.

Use of futures markets as risk shifting institutions. Students design and implement hedging and cross hedging strategies for grain farmers, country elevators, soybean crushers, poultry firms, etc. Spreadsheets and statistical techniques are used to develop optimal hedging ratios. Prerequisite: AGEC 3373 or consent of instructor.

AGEC 4383. Basis Trading: Case Study. 3 Hours.
This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Prerequisite: AGEC 4373.

AGEC 4403. Advanced Farm Business Management. 3 Hours.
Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Prerequisite: AGEC 3403 and AGME 2903 or equivalent.

AGEC 4603. Food Economics and Health. 3 Hours.
This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2403 or WCOB 1033).

AGEC 4613. Political Economy of Agriculture and Food. 3 Hours.
Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2023 or HESC 2603).

AGEC 4623. International Agricultural Trade and Commercial Policy. 3 Hours.
Analysis of international agricultural trade and commercial policy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013).

AGEC 500V. Special Problems. 1-3 Hour.
Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing.

AGEC 5011. Seminar. 1 Hour.
Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedures, and presentation of results. Prerequisite: Graduate standing.

AGEC 502V. Special Topics. 1-3 Hour.
Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: Graduate standing. May be repeated for degree credit.

AGEC 503V. Internship in Agricultural Economics. 1-3 Hour.
On-the-job application of skills developed in the M.S. program.

AGEC 5043. Agricultural Finance. 3 Hours.
(Formerly AGEC 4143) Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Graduate degree credit will not be given for both AGEC 4143 and AGEC 5043. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2142 or AGEC 2143 or ACCT 2013 or WCOB 1023).

AGEC 5053. Advanced Farm Business Management. 3 Hours.
(Formerly AGEC 4403) Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Graduate degree credit will not be given for both AGEC 4403 and AGEC 5053. Prerequisite: AGEC 3403 and AGME 2903 or equivalent.

AGEC 5063. Agricultural and Rural Development. 3 Hours.
(Formerly AGEC 4163) Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Graduate degree credit will not be given for both AGEC 4163 and AGEC 5063. Prerequisite: AGEC 1103 (or ECON 2023).

(Formerly AGEC 4373) Use of futures markets as risk shifting institutions. Students design and implement hedging and cross hedging strategies for grain farmers, country elevators, soybean crushers, poultry firms, etc. Spreadsheets and statistical techniques are used to develop optimal hedging ratios. Graduate degree credit will not be given for both AGEC 4373 and AGEC 5073. Prerequisite: AGEC 3373 or consent of instructor.

AGEC 5083. Basis Trading: Case Study. 3 Hours.
(Formerly AGEC 4383) This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Graduate degree credit will not be given for both AGEC 4383 and AGEC 5083. Prerequisite: AGEC 4373 or AGEC 5073 (formerly AGEC 4373).

AGEC 5103. Agricultural Microeconomics. 3 Hours.
Masters-level training in agricultural microeconomic theory and its application to food, agriculture and the environment. The course covers behavior of firms, households and markets, in more depth and rigor than encountered in undergraduate courses. Theories are explained and then applied to relevant food, agricultural, environment and resource issues.

AGEC 5113. Agricultural Prices and Forecasting. 3 Hours.
(Formerly AGEC 4113) Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGEC 4113 and AGEC 5113. Prerequisite: (AGEC 1103 or ECON 2023), AGEC 2403, (AGST 4023 or STAT 2303 or WCOB 1033) and MATH 2053.
AGEC 5123. AgriBusiness Entrepreneurship. 3 Hours. 
(Formerly AGEC 4323.) Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems, and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness products. Graduate degree credit will not be given for both AGEC 4323 and AGEC 5123. Prerequisite: AGEC 1103 or equivalent.

AGEC 5133. Agricultural and Environmental Resource Economics. 3 Hours. 
An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: Minimum of 3 hours Agricultural Economics or Economics at 3000 level or higher or PhD standing.

AGEC 5143. Financial Management in Agriculture. 3 Hours. 
Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate firms. Covers the basic tools of financial analysis including financial arithmetic, asset valuation under risk, and financial analysis and planning using econometric models. Such topics covered include management of current assets, capital budgeting, capital structure, and institutions involved in agricultural finance. Prerequisite: Graduate standing.

AGEC 5153. The Economics of Public Policy. 3 Hours. 
This class will examine the impact of public policy on agricultural and other businesses as well as households and individuals, particularly in rural areas. Emphasis will also be placed on analyzing the potential impact of future policy changes. The course will focus on the application of welfare criteria and economic analyses to the problems and policies affecting resource adjustments in agriculture and rural communities. Prerequisite: Graduate standing.

AGEC 5203. Agribusiness Marketing Management. 3 Hours. 
(Formerly AGEC 4303.) Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Graduate degree credit will not be given for both AGEC 4303 and AGEC 5203. Prerequisite: AGEC 2303 and AGEC 3303.

AGEC 5213. Agricultural Business Management. 3 Hours. 
(Formerly AGEC 4313.) The planning, organizing, leading, and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting, and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Graduate degree credit will not be given for both AGEC 4313 and AGEC 5213. Prerequisite: (AGEC 2142 and AGEC 2141L) or AGEC 2143 or equivalent, AGEC 2303 or equivalent.

AGEC 5223. International Agricultural Trade and Commercial Policy. 3 Hours. 
(Formerly AGEC 4623.) Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Graduate degree credit will not be given for both AGEC 4623 and AGEC 5223. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013).

AGEC 5233. Political Economy of Agriculture and Food. 3 Hours. 
(Formerly AGEC 4613.) Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Graduate degree credit will not be given for both AGEC 4613 and AGEC 5233. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HESC 2603).

AGEC 5303. Agricultural Marketing Theory. 3 Hours. 
Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: Graduate standing.

AGEC 5403. Quantitative Methods for Agribusiness. 3 Hours. 
Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with conceptual linkage to economic theory. Prerequisite: Graduate standing.

AGEC 5413. Agribusiness Strategy. 3 Hours. 
Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: Graduate standing.

AGEC 5603. Food Economics and Health. 3 Hours. 
This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: Graduate standing.

AGEC 5613. Econometrics. 3 Hours. 
Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags and model specification. Prerequisite: MATH 2043 and knowledge of matrix methods, (which may be acquired as a corequisite), and (AGEC 1103 or ECON 2023) and (AGEC 2403 or AGST 4023 or STAT 2303 or WCOB 1033).

AGEC 5623. Quantitative Food and Agricultural Policy Analysis. 3 Hours. 
Introduction to applied analysis of domestic and international food and agricultural policies using quantitative tools. This course will provide hands-on experience with simulation modeling in microeconomics. An emphasis is placed on policy analysis through computer applications with theoretical underpinnings. Corequisite: Lab component. Prerequisite: (AGEC 5103 and AGEC 5403) or instructor consent.

AGEC 5713. Food Safety Law. 3 Hours. 
This course provides students with an introduction to food law and policy, including the legal and regulatory frameworks for food regulation, the organization of federal food law and regulatory agencies, government inspection and enforcement powers, food safety standards, food labeling, food advertising and product liability. Web-based course.

AGEC 5723. Bioenergy and Resource Economics. 3 Hours. 
This course surveys the allocation and conservation of natural resources from a perspective of optimal use and the sustainability of resources. The development and distribution issues relating to energy, land, water, and other resource areas are addressed in the course, with emphasis placed on the bioproducts and bioenergy concerns.
AGED 5733. Bioenergy Economics and Sustainability. 3 Hours.
This course will provide an understanding of the economic issues relating to overall
supply chains producing bioenergy and bio-based products. The course will address
the economic, sustainability and social dimensions of these industries.

AGED 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

AGED 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Agricultural Education (AGED) Courses

AGED 1001. Orientation to Agricultural and Extension Education. 1 Hour.
Continuation of AFLS 1011, Freshman Orientation, with attention given to sharing
possible solutions to individual problems. Exploration of anticipated collegiate
experiences for departmental majors as well as post-graduation opportunities.
Student and faculty interaction is stressed. The class meets during the last half of
the fall semester twice a week. The class also meets 1 or 2 evenings for up to two
hours each time.

AGED 1031. Introduction to Early Field Experience. 1 Hour.
A thirty hour field experience designed to give prospective agricultural education
teachers an opportunity to observe and participate in a variety of school settings.
Corequisite: AGED 1123.

AGED 1123. Foundations of Agricultural Education. 3 Hours.
A preparatory course evaluating the historical foundations of agricultural education
with an introduction to the psychological, sociological and philosophical foundations
of education. This course will encourage reflective practice through understanding
of educational trends, classroom environment creation and utilization, and effective
program planning.

AGED 1133. Lifelong Agricultural Advocacy. 3 Hours.
This course will supply students with the necessary information and skills to evaluate
and seek out opportunities and methods for advocating for agricultural industries.
This course will equip students with the knowledge and skills to become active
agricultural leaders serving at the intersection of policy, consumer engagement, and
best agricultural practice.

AGED 2143. Introduction to Agricultural Communications and Leadership. 3
Hours.
A survey of agricultural communications and leadership theories and practices for
students in the ACOM and AGLE concentrations and minors and anyone seeking
a basic understanding of these disciplines. The course provides an overview of the
history, philosophy, and theories of the disciplines and introduces students to career
options, skills and practical competencies required of agricultural communicators
and leaders.

AGED 3111. Student Management. 1 Hour.
To guide students in the development of realistic, proactive classroom management
strategies that establish a safe culture of student learning and academic success.

AGED 3133. Instructional and Presentation Strategies. 3 Hours.
Methods and techniques in teaching agriculture at the secondary level. Lecture 2
hours, laboratory 2 hours per week. Corequisite: Lab component and AGED 1123.
Prerequisite: AGED 1031.

AGED 3143. Communicating Agriculture to the Public. 3 Hours.
An overview of public communications theory and practices in the agricultural, food,
and life sciences with a particular focus on technical writing, public relations and
media relations writing, campaign planning, public speaking, and various mass
media communication techniques, including print, broadcast, electronic, and social
media.

AGED 3153. Leadership Development in Agriculture. 3 Hours.
Identification of styles and roles of leadership; development of leadership techniques
and skills required in working with organizations; dynamics of group action;
methods of resolving conflict; ethical considerations for leaders; and personal skills
development.

AGED 3153H. Honors Leadership Development in Agriculture. 3 Hours.
Identification of styles and roles of leadership; development of leadership techniques
and skills required in working with organizations; dynamics of group action;
methods of resolving conflict; ethical considerations for leaders; and personal skills
development. Prerequisite: Junior standing.
This course is equivalent to AGED 3153.

AGED 3161L. Curriculum Development and Assessment Techniques in Career
and Technical Education Laboratory. 1 Hour.
To supply students with opportunities to apply skills in creating curricula, lesson
plans, and assessment strategies for courses in career and technical education.
Materials created as a result of this course will apply principles learned in
AGED 3162, and will align with anticipated courses to be taught by the student
during his/her teaching internship.

AGED 3162. Curriculum Development and Assessment Techniques in AGED. 2
Hours.
To supply students with the necessary information and skills to select and apply
appropriate teaching techniques, curricula, resources, and assessment strategies
when designing a course in career and technical education.

AGED 3173. Research Methods in the Social Sciences. 3 Hours.
This course offers undergraduate students the basics and explanation for
appropriate research procedures, data collection, analysis, and reporting. Course
objectives to include identifying appropriate components of research works,
evaluation of research in social science and creation of research projects. The
purpose of the course is to prepare undergraduate students to be better producers
and consumers of research in the social sciences.
This course is cross-listed with AGED 3173H.

AGED 3173H. Honors Research Methods in the Social Sciences. 3 Hours.
This course offers undergraduate students the basics and explanation for
appropriate research procedures, data collection, analysis, and reporting. Course
objectives to include identifying appropriate components of research works,
evaluation of research in social science and creation of research projects. The
purpose of the course is to prepare undergraduate students to be better producers
and consumers of research in the social sciences.
This course is cross-listed with AGED 3173.

AGED 3243. Ag Reporting and Feature Writing. 3 Hours.
This course will provide students an exposure to writing, interviewing, and editing
news on agricultural issues in agricultural industry publications. Students will gain
practical experience with journalistic interviewing, news writing, feature writing,
digital photography, and writing for broadcast on agricultural issues. This course
is designed for students with at least six hours of upper division courses. Pre-
or Corequisite: JOUR 1033 and lab component.

AGED 3943. Professional Development in Agricultural Communications. 3
Hours.
Overview of professional and technical skills needed to succeed in internships and
jobs in the field of agricultural communications.

AGED 4003. Issues in Agriculture. 3 Hours.
Lecture and discussion on local, regional, national and international issues related to
agricultural policy, ethics, environment, society, and science. Designed for students
with at least six hours of upper division agricultural science courses. Prerequisite:
Junior standing.
AGED 400V. Special Problems in Agricultural and Extension Education. 1-6 Hour.
Individual study or research for advanced undergraduates in the field of agricultural and extension education. May be repeated for up to 6 hours of degree credit.

AGED 401V. Special Topics. 1-3 Hour.
Studies of selected topics in agricultural or extension education not covered in other courses. May be repeated for up to 4 hours of degree credit.
This course is equivalent to AGED 401.

AGED 4113. Undergraduate Researchers Improving Student Experience. 3 Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course.

AGED 4143. Electronic Communications in Agriculture. 3 Hours.
An overview of communication technology in the agricultural, food and life sciences.

AGED 4153. Survey of Leadership Theory in Agriculture. 3 Hours.
An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Prerequisite: AGED 3153.
This course is equivalent to AGEC 4153.

AGED 4163. Leadership Analysis Through Film. 3 Hours.
Films are a catalyst* (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Prerequisite: AGED 3153 or AGED 4153 or graduate standing or instructor consent.
This course is equivalent to AGEC 4153.

AGED 4211. Teachers as Professionals. 1 Hour.
To expose students to the roles and responsibilities of professional teachers. Students will understand the characteristics common to professionals and apply these to the teaching setting. Real-world examples of “grey-area” situations will allow students to evaluate issues holistically and determine appropriate solutions following the ethical and professional guidelines of the teaching discipline. Additionally, students will prepare resumes and engage in mock interviews to enhance their professional dispositions as they consider employment opportunities.

AGED 4231. Program Development. 1 Hour.
Principles and concepts of leadership, program organization, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133.

AGED 4243. Graphic Design in AFLS. 3 Hours.
This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Prerequisite: AGME 2903 or ISYS 1123 or equivalent.
This course is equivalent to AGEC 4243.

AGED 4343. Communication Campaigns in Agriculture. 3 Hours.
Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Prerequisite: Junior, senior or graduate status.
This course is equivalent to AGEC 4343.

AGED 4443. Principles of Technological Change. 3 Hours.
This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Prerequisite: Junior standing.
This course is equivalent to AGEC 4443.

AGED 4543. Ag Publications. 3 Hours.
Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Prerequisite: JOUR 1033.
This course is equivalent to AGEC 4543.

AGED 4632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. This course is equivalent to AGEC 4632.

AGED 475V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. Successful completion of a criminal background check required before a student can begin internship. Prerequisite: Admission into Clinical Practice. May be repeated for up to 6 hours of degree credit.
This course is equivalent to AGEC 475V.

AGED 4843. Methods in Agricultural Laboratories. 3 Hours.
Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, and materials. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: AGME 2123.

AGED 5001. Seminar. 1 Hour.
Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing.

AGED 5013. Advanced Methods in Agricultural Mechanics. 3 Hours.
Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics.
AGED 5033. Developing Leadership in Agricultural Organizations. 3 Hours. Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing.

AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours. An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing.

AGED 510V. Special Problems. 1-6 Hour. Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

AGED 5113. Undergraduate Researchers Improving Student Experiences. 3 Hours. To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. Prerequisite: AGED 5463 or HESC 5463 or other instructor approved Research Methods course.

AGED 5143. Electronic Communications in Agriculture. 3 Hours. (Formerly AGED 4143.) An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not be given for both AGED 4143 and AGED 5143.

AGED 5153. Survey of Leadership Theory in Agriculture. 3 Hours. (Formerly AGED 4153.) An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Graduate degree credit will not be given for both AGED 4153 and AGED 5153. Prerequisite: AGED 3153.

AGED 5163. Leadership Analysis Through Film. 3 Hours. (Formerly AGED 4163.) Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Graduate degree credit will not be given for both AGED 4163 and AGED 5163.

AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour. Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. May be repeated for degree credit.

AGED 5243. Graphic Design in AFLS. 3 Hours. (Formerly AGED 4243.) This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both AGED 4243 and AGED 5243. Prerequisite: AGME 2903 or ISYS 1123 or equivalent.

AGED 5343. Communication Campaigns in Agriculture. 3 Hours. (Formerly AGED 4343.) Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both AGED 4343 and AGED 5343. Prerequisite: Graduate standing.

AGED 5363. Educational Delivery Techniques. 3 Hours. Students will learn to apply teaching and learning theory in the development of engaging instruction delivered through electronic media. The goal of the course is not to make experts in “programming” or “theory”, but rather to prepare students with the knowledge/practical skills necessary to deliver curriculum through various methods. Prerequisite: Graduate standing.

AGED 5443. Principles of Technological Change. 3 Hours. (Formerly AGED 4443.) This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Graduate degree credit will not be given for both AGED 4443 and AGED 5443.

AGED 5463. Research Methodology in the Social Sciences. 3 Hours. Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. This course is cross-listed with HESC 5463.

AGED 5473. Interpreting Social Data in Agriculture. 3 Hours. The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form.

AGED 5483. Technical Communication in the Social Sciences. 3 Hours. This course will provide students with the basic principles and techniques in communicating social science information relevant to human subject research in agriculture, natural resources, and life sciences to the general public. Communication processes covered in the course include audience identification, writing, editing, and production of social science-based materials for popular and refereed publications. Focus will also be placed on thesis preparation and writing and research manuscript development and dissemination of social science research. Web delivered course. Prerequisite: Graduate standing.

AGED 550V. College Teaching in Agriculture and Related Disciplines. 1-3 Hour. For students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing a college-level course.

AGED 5543. Ag Publications. 3 Hours. (Formerly AGED 4543.) Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both AGED 4543 and AGED 5543.

AGED 5563. Thesis Proposal Development. 3 Hours. The purpose of this course is to assist graduate students in the preparation of their thesis research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463.
AGED 5632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
(Formerly AGED 4632.) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Graduate degree credit will not be given for both AGED 4632 and AGED 5632.

AGED 575V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation.

AGED 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

Agricultural Mechanization (AGME)

Courses

AGME 1611L. Fundamentals of Agricultural Systems Technology Laboratory. 1 Hour.
Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in AGME 1613, optional for others enrolled in AGME 1613. Corequisite: AGME 1613.

AGME 1613. Fundamentals of Agricultural Systems Technology. 3 Hours.
Introduction to basic mathematical concepts important in agricultural technical systems: applied mechanics, power and machinery management, structures and electrification, and soil and water conservation. Lecture 3 hours per week. Corequisite: AGME 1611L (for AECT Majors).

AGME 2123. Metals and Welding. 3 Hours.
An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component.

AGME 2903. Agricultural and Human Environmental Sciences Applications of Microcomputers. 3 Hours.
Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural, food and life sciences. Emphasis placed on learning to use selected, appropriate Microsoft (Windows, Word, Excel, PowerPoint and Access), email/Internet, and collaboration software packages.

AGME 3042. Agricultural Construction Technology. 2 Hours.
Principles of building design and construction. Includes site selection calculating structural loads and computerized packages for building design. Safety practices, selection of building materials and determining costs are also included. Lecture is one hour and lab is two hours per week. Prerequisite: MATH 1203 and junior standing.

AGME 3101L. Small Power Units/Turf Equipment Laboratory. 1 Hour.
Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscaping industries. Corequisite: AGME 3102. Prerequisite: MATH 1203.

AGME 3102. Small Power Units/Turf Equipment. 2 Hours.
Principles of operation, adjustment, repair, maintenance, and trouble shooting of small air-cooled engines and power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: AGME 3101L. Prerequisite: MATH 1203.

AGME 3153. Surveying in Agriculture and Forestry. 3 Hours.
Techniques and procedures normally used in determining areas and characterizing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, distance measuring equipment; topographic mapping and public land surveys.

AGME 3173. Electricity in Agriculture. 3 Hours.
Principles of electricity; wiring of home, farmstead and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

AGME 400V. Special Problems. 1-6 Hour.
Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Prerequisite: Senior standing. May be repeated for up to 6 hours of degree credit.

AGME 402V. Special Topics in Agricultural Mechanization. 1-4 Hour.
Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. May be repeated for degree credit.

AGME 4203. Mechanized Systems Management. 3 Hours.
Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: MATH 1203.

AGME 4973. Irrigation. 3 Hours.
Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

AGME 500V. Special Problems. 1-6 Hour.
(Formerly AGME 400V.) Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Graduate degree credit will not be given for both AGME 400V and AGME 500V. May be repeated for up to 6 hours of degree credit.

AGME 501V. Special Topics in Agricultural Mechanization. 1-4 Hour.
(Formerly AGME 402V.) Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. Graduate degree credit will not be given for both AGME 402V and AGME 501V. May be repeated for degree credit.

AGME 5203. Mechanized Systems Management. 3 Hours.
(Formerly AGME 4203.) Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Graduate degree credit will not be given for both AGME 4203 and AGME 5203. Corequisite: Lab component. Prerequisite: MATH 1203.

AGME 5973. Irrigation. 3 Hours.
(Formerly AGME 4973.) Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGME 4973 and AGME 5973. Corequisite: Lab component.

Agricultural Statistics (AGST)

Courses

AGST 4011. SAS Programming for Agricultural Sciences. 1 Hour.
An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach.
AGST 4023. Principles of Experimentation. 3 Hours.
Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. Prerequisite: MATH 1203 or higher level.

AGST 500V. Special Problems. 1-6 Hour.
Individual investigation of a special problem in some area of statistics applicable to the agricultural, food, environmental, and life sciences not available under existing courses. May be repeated for up to 6 hours of degree credit.

AGST 5014. Experimental Design. 4 Hours.
Types of experimental designs, their analysis and application to agricultural research. Lecture 3 hours and laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: (AGST 4011 or AGST 5031 (formerly AGST 4011)) and (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003).

AGST 5023. Principles of Experimentation. 3 Hours.
(Formerly AGST 4023.) Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week.

AGST 5031. SAS Programming for Agricultural Sciences. 1 Hour.
(Formerly AGST 4011.) An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach. Graduate degree credit will not be given for both AGST 4011 and AGST 5031.

AGST 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a broader-based study of specific topics in statistics and related areas. Prerequisite: Graduate standing. May be repeated for degree credit.

AGST 5713. Applied Regression Analysis for Agricultural Sciences. 3 Hours.
Analysis of agricultural experiments which contain quantitative factors through regression procedures. Lecture 3 hours per week. Prerequisite: (AGST 4011 or AGST 5031 (formerly AGST 4011)) and (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003).

AGST 5901. Statistical Consulting Process. 1 Hour.
Examines the components of statistical consulting with emphasis on the interpersonal aspects.

Agriculture, Food and Life Sciences (AFLS)

Courses

AFLS 1023H. Bumpers College Honors Program Perspectives. 3 Hours.
This course is intended to meet the requirements of UNIV 1001 and provide Bumpers College Honors students with an overview of the Honors Program as well as provide insight into research and creative project development and expectations. Pre- or Corequisite: Honors standing. This course is equivalent to AFLS 1011.

AFLS 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

AFLS 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

AFLS 3413H. Honors Proposal Development and Research Methods. 3 Hours.
This course will include creative process, ethics, proposal writing, literature review, qualitative and quantitative/experimental design, scientific theory and methods, data collection, and analysis. At the end if this course, students will have developed a proposal for their Honors thesis. The course also offers an opportunity for students to present their proposals orally as preparation for their proposal meeting. Prerequisite: Sophomore, junior or senior standing.

AFLS 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

AFLS 3993. Professional Growth and Critical Career Skills. 3 Hours.
The MERIT Profile will be utilized to identify students behavioral and character profiles so they may “know themselves” based upon strengths and tendencies. Throughout the term, students will be engaged in topics to help them identify their core values and strengths and develop their weaknesses. Course topics will include; adjusting to mistakes, cast off the negatives, verifying your values, scheduling priorities, building character, framing decisions/choices, personal improvement plans, and more. Upon course completion students should be able to utilize personal leadership approaches, strategic thinking and behavior, critical thinking and problem identification techniques and verbal and written communication to effectively convey their suitability specific feasible careers. Prerequisite: Junior standing.

AFLS 400VH. Honors Thesis. 1-6 Hour.
May be repeated for up to 6 hours of degree credit.

AFLS 401V. Special Topics in AFLS. 1-6 Hour.
Studies of selected topics not covered in other courses. May be repeated for up to 6 hours of degree credit.

AFLS 401VH. Honors Special Topics. 1-6 Hour.
Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course. May be repeated for up to 6 hours of degree credit.

AFLS 403V. Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent. May be repeated for up to 6 hours of degree credit.

AFLS 403VH. Honors Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent and honors standing. May be repeated for up to 6 hours of degree credit.

AFLS 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

AFLS 501V. Special Topics. 1-3 Hour.
Studies of selected topics not covered in other courses. May be repeated for up to 6 hours of degree credit.

Air Force ROTC (AERO)

Courses

AERO 1011. The Foundations of the United States Air Force I. 1 Hour.
A survey course designed to introduce cadets to the United States Air Force and Air Force Reserve Officer Training Corps. Topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills. Leadership LAB mandatory for cadets. Corequisite: Lab component.

AERO 1021. The Foundations of the United States Air Force II. 1 Hour.
A survey course designed to introduce cadets to the United States Air Force and Air Force Reserve Officer Training Corps. Topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and an introduction to communication skills. Leadership LAB mandatory for cadets. Corequisite: Lab component.

AERO 2011. The Evolution of Air and Space Power I. 1 Hour.
This historical survey features topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to Air Force ROTC officer candidate. Corequisite: Lab component.
AERO 2021. The Evolution of Air and Space Power II. 1 Hour.
This historical survey features topics on Air Force heritage and leaders; introduction to air power through examination of the Air Force Core Functions and continued application of communication skills. Its purpose is to instill an appreciation of the development and employment of air power and to motivate sophomore students to transition from AFROTC cadet to Air Force officer candidate. Corequisite: Lab component.

AERO 3013. Air Force Leadership Studies I. 3 Hours.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations. Corequisite: Lab component.

AERO 3023. Air Force Leadership Studies II. 3 Hours.
A study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations. Corequisite: Lab component.

AERO 4013. National Security Affairs and Preparation for Active Duty I. 3 Hours.
Examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Communication skills are honed within this structure. Corequisite: Lab component.

AERO 4023. National Security Affairs and Preparation for Active Duty II. 3 Hours.
Examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Communication skills are honed within this structure. Corequisite: Lab component.

Animal Science (ANSC)

Courses

ANSC 1051. Introduction to the Livestock Industry. 1 Hour.
The importance of livestock and their allied industries will be discussed. Application of scientific principles to the care and management of livestock, specifically beef and dairy cattle, swine, sheep, and goats will be emphasized. Meets second eight weeks for fall and spring.

ANSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented.
This course is cross-listed with POSC 1062.

ANSC 1123. The Animals in our Lives. 3 Hours.
Address the controversies and focus on animal welfare, environmental issues and sustainability.
This course is cross-listed with POSC 1123.

ANSC 2003. Introduction to Equine Industry. 3 Hours.
Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership.

ANSC 2213. Behavior of Domestic Animals. 3 Hours.
Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals.

ANSC 2252L. Introduction to Livestock and Meat Evaluation. 2 Hours.
Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine.

ANSC 2230L. Introduction to Horsemanship. 3 Hours.
A study of modern horsemanship training techniques involving the psychology and ethology (reason for the behavior) of equine social behavior and how it pertains to learning patterns; application of fundamental behavioral concepts in training of horses, and modification of desirable and undesirable behavioral patterns. Prerequisite: Instructor consent.

ANSC 2213. Behavior of Domestic Animals. 3 Hours.
Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals.

ANSC 2302H. Honors Animal Physiology I. 2 Hours.
Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and functions of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073).
This course is cross-listed with POSC 3032.

ANSC 2303L. Animal Physiology I. 2 Hours.
Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and functions of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073).
This course is cross-listed with ANSC 3032, POSC 3032.
ANSC 3042. Animal Physiology II. 2 Hours.
Fundamental aspects of renal, respiratory, digestive, and endocrine physiology will be covered. The normal structure and function of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1073. This course is cross-listed with POSC 3042.

ANSC 3072. Equine Selection and Evaluation. 2 Hours.
Students will learn criteria for evaluation and selection of breeding and show animals and will gain expertise in the evaluation of breed types and show ring characteristics. Includes field trips to various breed operations. Students in this class will be well prepared to participate in equine judging team activities. Prerequisite: Instructor consent.

ANSC 3123. Principles of Genetics. 3 Hours.
Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 or MATH 1203 or higher. This course is cross-listed with POSC 3123.

ANSC 3133. Animal Breeding and Genetics. 3 Hours.
Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher.

ANSC 3143. Principles of Animal Nutrition. 3 Hours.
Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 3 hours per week. Prerequisite: ANSC 1032.

ANSC 3151L. Applied Animal Nutrition Laboratory. 1 Hour.
Practical approach to animal nutrition; use of various methods of feedstuff evaluation and ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: ANSC 3152. Prerequisite: ANSC 3143 and MATH 1203.

ANSC 3152. Applied Animal Nutrition. 2 Hours.
Practical approach to animal nutrition; physical and chemical composition of feedstuffs, feed processing and preparation, nutrient interactions, and application of nutritional principles to feeding domestic animals. Lecture 2 hours per week. Corequisite: ANSC 3151L. Prerequisite: ANSC 3143 and MATH 1203.

ANSC 3282. Livestock Judging and Selection. 2 Hours.
Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisite: ANSC 1032 or ANSC 2252L.

ANSC 3291. Livestock Junior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation.

ANSC 3333. Diseases of Livestock. 3 Hours.
Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Prerequisite: BIOL 1543.

ANSC 3433. Fundamentals of Reproductive Physiology. 3 Hours.
Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Pre- or Corequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L) and ANSC 2252L and ANSC 2781 and BIOL 2013 and BIOL 2011L. Prerequisite: BIOL 1543.

ANSC 3491L. Artificial Insemination in Cattle. 1 Hour.
Experience with artificial insemination technique in cattle including estrus detection, semen storage and handling, insemination equipment maintenance and technique. Laboratory 4 hours per week. The course is offered the second 8 weeks of the spring semester. Prerequisite: ANSC 3433 or instructor consent.

ANSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543.

ANSC 3613. Meat Science. 3 Hours.
The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603.

ANSC 3723. Horse and Livestock Merchandising. 3 Hours.
Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock.

ANSC 3753. Equine Assisted Activities and Therapies. 3 Hours.
Animal Science 3753 introduces students to the field of equine assisted activities and therapies. A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior. Students will gain experience in the practical application of an equine assisted therapy program.

ANSC 400V. Special Problems. 1-6 Hour.
Special problems in the animal sciences for advanced undergraduate students. May be repeated for up to 6 hours of degree credit.

ANSC 401V. Internship in Animal Sciences. 1-6 Hour.
Supervised work experience with private or government organizations. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

ANSC 4072. Advanced Equine Selection and Evaluation. 2 Hours.
Advanced evaluation and selection of breeding and show animals, evaluation of breed types and show characteristics. Field trips to breeding operations. Competitive Judging team members come from this course and participation in competitive events will be required. Prior equine evaluation is not necessary, but instructor consent is required. Some Saturday activities. Prerequisite: ANSC 3072 or instructor consent.

ANSC 410V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. May be repeated for degree credit.

ANSC 410VH. Honors Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Honors standing. May be repeated for degree credit.

ANSC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. This course is cross-listed with AGEC 4123, POSC 4123.

ANSC 4142. Advanced Animal Handling Techniques. 2 Hours.
This course is designed to familiarize students with handling techniques of a variety of animals, including cattle, sheep, horses, pigs, dogs, and others. Students will learn and practice handling, restraint, and common husbandry procedures with a variety of domestic species. The course will provide valuable preparation for careers in livestock management, veterinary medicine, animal-based research, and other fields in animal science. Prerequisite: Junior standing or consent.
ANSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343.

ANSC 4173. Thoroughbred Horse Industry. 3 Hours.
This course is designed to give you an overview of the Thoroughbred breed and industry. Students will gain an understanding of the Thoroughbred industry, its history, and modern practices. Students will also gain an understanding of career potential in the Thoroughbred industry. Prerequisite: Instructor consent and Junior or Senior standing.

ANSC 4252. Cow-Calf Management. 2 Hours.
Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher.

ANSC 4262. Swine Production. 2 Hours.
Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Prerequisite: Laboratory 3 hours per week. Corequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher.

ANSC 4272. Sheep Production. 2 Hours.
Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher.

ANSC 4283. Horse Production. 3 Hours.
Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: Junior standing or higher.

ANSC 4291. Livestock Senior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation.

ANSC 4303. Comparative Veterinary Anatomy. 3 Hours.
Study of structures and principles of anatomy of major domestic species. The dog, horse, and cow will be used as models for anatomical structures and the application of anatomical knowledge in animal science; focus on veterinary applications. 3 hours of lecture each week. Spring semesters. Corequisite: Lab component. Prerequisite: ANSC 1032 or BIOL 1543, junior standing or instructor consent.

ANSC 4452. Milk Production. 2 Hours.
Principles of breeding, feeding, and management of dairy cattle will be studied. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher.

ANSC 4482. Companion Animal Management. 2 Hours.
The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Prerequisite: BIOL 1543 or equivalent or consent of instructor.

ANSC 4552. Forage-Ruminant Relations. 2 Hours.
Chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake, digestion, behavior, and nutrient cycling at the plant-animal interface. CSES 1203 recommended. Prerequisite: ANSC 3143.

ANSC 4652. Stocker-Feedlot Cattle Management. 2 Hours.
Production and management systems for stocker and feedlot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher.

ANSC 4923. Brain & Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. This course is cross-listed with POSC 4923.

ANSC 500V. Special Problems. 1-6 Hour.
Work in special problems of animal industry. May be repeated for up to 6 hours of degree credit.

ANSC 5013. Domestic Animal Energetics. 3 Hours.
Physical, physiological and biochemical aspects of energy metabolism of domestic animals and their applications to livestock production. Lecture 3 hours per week. Prerequisite: Graduate standing.

ANSC 5023. Legal Issues in Animal Agriculture. 3 Hours.
(Formerly ANSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation—from local to state to federal, depending on the issue—will be studied and discussed. Graduate degree credit will not be given for both ANSC 4123 and ANSC 5023.

ANSC 5052. Cow-Calf Management. 2 Hours.
(Formerly ANSC 4252.) Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Graduate degree credit will not be given for both ANSC 4252 and ANSC 5052.

ANSC 510V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Graduate standing. May be repeated for degree credit.

ANSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123. This course is cross-listed with POSC 5123.

ANSC 5133. Quantitative Inheritance. 3 Hours.
Advanced study of the genetic basis of variation and the genetic control of quantitative traits in populations. Lecture 3 hours per week. Prerequisite: ANSC 3133.

ANSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. This course is cross-listed with POSC 5143.

ANSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. This course is cross-listed with POSC 5152.
ANSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4433.

ANSC 5253. Advanced Livestock Production. 3 Hours.
Comprehensive review of recent advances in research relative to the various phases of livestock production.

ANSC 5262. Swine Production. 2 Hours.
(Formerly ANSC 4262.) Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Graduate degree credit will not be given for both ANSC 4262 and ANSC 5262.

ANSC 5272. Sheep Production. 2 Hours.
(Formerly ANSC 4272.) Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Graduate degree credit will not be given for both ANSC 4272 and ANSC 5272.

ANSC 5283. Horse Production. 3 Hours.
(Formerly ANSC 4452.) Principles of breeding, feeding, and management of dairy cattle will be studied. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5283.

ANSC 5452. Milk Production. 2 Hours.
(Formerly ANSC 4452.) Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5452.

ANSC 5482. Companion Animal Management. 2 Hours.
(Formerly ANSC 4482.) The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Graduate degree credit will not be given for both ANSC 4482 and ANSC 5482. Prerequisite: BIOL 1543 or equivalent or consent of instructor.

ANSC 5553. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. CSES 1203 recommended. Prerequisite: ANSC 3143. This course is cross-listed with CSES 5553.

ANSC 5652. Stocker-Feedlot Cattle Management. 2 Hours.
(Formerly ANSC 4652.) Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Graduate degree credit will not be given for both ANSC 4652 and ANSC 5652.

ANSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. This course is cross-listed with POSC 5743L.

ANSC 5853. Advanced Meats Technology. 3 Hours.
An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiology, nutritional aspects, and product labeling are covered. Prerequisite: POSC 4314 or ANSC 3613.

ANSC 5901. Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of animal science. Oral reports. Lecture 1 hour per week. Prerequisite: Senior standing.

ANSC 5923. Brain & Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. This course is equivalent to POSC 5923.

ANSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or ANSC 3032) and (ANSC 3042 or ANSC 3042). This course is cross-listed with POSC 5932.

ANSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for first 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or ANSC 3032) and (ANSC 3042 or ANSC 3042). This course is cross-listed with POSC 5942.

ANSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or ANSC 3032) and (ANSC 3042 or ANSC 3042). This course is cross-listed with POSC 5952.

ANSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week for second 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or ANSC 3032) and (ANSC 3042 or ANSC 3042). This course is cross-listed with POSC 5962.

ANSC 5972. Renal Physiology. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (ANSC 3032 or ANSC 3032) and (ANSC 3042 or ANSC 3042). This course is cross-listed with POSC 5972.

ANSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

ANSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. This course is cross-listed with POSC 6123.
ANTH 6143. Minerals in Animal Nutrition. 3 Hours.
Mineral nutrients, their sources and functions, as related to nutrition of domestic
animals. Lecture 3 hours per week. Prerequisite: ANSC 3143 or POSC 4343.

ANTH 6243. Ruminant Nutrition. 3 Hours.
Anatomy and physiology of the rumen. The nutrient requirements of microbial
organisms and the relation of microbial digestion in the rumen to the nutrition of
cattle, sheep and other ruminants. Lecture 3 hours per week. Prerequisite: Graduate
standing.

ANTH 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in
animal nutrition, physiological functions, and consequences of failure to meet the
requirement of the animal. Lecture 3 hours per week. Prerequisite: ANSC 3143 (or
POSC 4343) and CHEM 3813.
This course is cross-listed with POSC 6343.

ANTH 6833. Reproduction in Domestic Animals. 3 Hours.
Comprehensive review of current theory of reproductive function in domestic
animals. Lecture 3 hours per week. Prerequisite: ANSC 3433.

ANTH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. May be repeated for degree
credit.

Anthropology (ANTH) Courses

ANTH 1011L. Introduction to Biological Anthropology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of physical anthropology. Corequisite:
ANTH 1013.

ANTH 1011M. Honors Introduction to Biological Anthropology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of physical anthropology. Corequisite:
ANTH 1013.
This course is equivalent to ANTH 1011L.

ANTH 1013. Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of physical anthropology using human evolution as a
unifying concept. Areas include human genetics, race, specialization, primate evolution,
and human variation and adaptation. Corequisite: ANTH 1011L.

ANTH 1013H. Honors Introduction to Biological Anthropology. 3 Hours.
An introduction to the field of physical anthropology using human evolution as a
unifying concept. Areas include human genetics, race, specialization, primate evolution,
and human variation and adaptation. Corequisite: ANTH 1011M.
This course is equivalent to ANTH 1013.

ANTH 1023. Introduction to Cultural Anthropology (ACTS Equivalency = ANTH
2013). 3 Hours.
Introduction to the nature of culture and its influence on human behavior and
personality: comparative study of custom, social organization, and processes of
change and integration of culture. Corequisite: Drill component.

ANTH 1023H. Honors Introduction to Cultural Anthropology. 3 Hours.
Introduction to the nature of culture and its influence on human behavior and
personality: comparative study of custom, social organization, and processes of
change and integration of culture.
This course is equivalent to ANTH 1023.

ANTH 1033. Introduction to Archaeology. 3 Hours.
Archaeology studies the human past through contextual analysis of artifacts,
arcaeological sites, and landscapes. This course introduces archaeological
methods and theories, significant discoveries and current debates in the discipline.
Corequisite: Lab component.

ANTH 2013. Introduction to Latin American Studies. 3 Hours.
This course provides an interdisciplinary introduction to Latin America. Drawing
on Latin American literature, history, sociology, and political science, the course
examines the broad forces that have shaped the region.
This course is cross-listed with LAST 2013.

ANTH 3003. World Prehistory. 3 Hours.
Survey of the prehistoric and early historic cultures of the Americas, Asia, and Africa.

ANTH 3023. Approaches to Archeology. 3 Hours.
Study of the field of archeology including method, theory, analysis and interpretation
with substantive worldwide examples. Prerequisite: ANTH 1033.

ANTH 3033. Egyptology. 3 Hours.
Explores multiple aspects of Ancient Egyptian civilization including chronology, art,
religion, literature and daily life. Prerequisite: Junior standing.

ANTH 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.
This course will review the anatomy of the human body, comparing this anatomy
with primates, mollusks, and vertebrates, and it will consider how the major features
of the human body emerged throughout evolution.

ANTH 3123. The Anthropology of Religion. 3 Hours.
An exploration of rituals, symbols, and rules that shape religious life. Religion is
viewed broadly, considering activities that invoke powers beyond the reach of
ordinary senses. Examining a variety of cultures, we explore what people say and do
as they participate in activities such as magic, healing, pilgrimage, and contemporary
religious movements.

ANTH 3143. Language and Expressive Culture. 3 Hours.
This course explores the complex interrelationship of language, culture, and
social identity. Verbal art and expressive culture are examined from a variety of
anthropological perspectives. Topics include ethnographies of speaking, discourse
analysis, cultural performances, and the performative aspects of oral expression.
This course is cross-listed with ENGL 3143, COMM 3143.

ANTH 3163. Male and Female: A Cultural and Biological Overview. 3 Hours.
A comparative study of male and female roles in culture in relation to human biology
and socialization.

ANTH 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and
analysis. Data drawn from various languages reveal linguistic universals as well as
phonological, syntactic, and semantic systems of individual languages. Related
topics: language history, dialectology, language and its relation to culture and
society, the history of linguistic scholarship. Prerequisite: Junior standing.
This course is cross-listed with COMM 3173, ENGL 3173, WLLC 3173.

ANTH 3213. Indigenous Peoples of North America: Anthropological
Perspectives. 3 Hours.
An exploration of indigenous societies and cultures of North America from an
anthropological perspective. Using examples from diverse Native Nations from the
time of European contact to the present, we will examine colonialism and resistance,
odigenous cosmologies, memory culture and oral tradition, and the politics of
representation.

ANTH 3263. Indians of Arkansas and the South. 3 Hours.
Study of the traditional lifeways and prehistoric backgrounds of Indians living in the
Southern United States, including Arkansas.

ANTH 3421L. Human Osteology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of human osteology. Corequisite:
ANTH 3423.

ANTH 3423. Human Osteology. 3 Hours.
Study of the human skeleton, identification of bones, allometric growth, sexual
dimorphism, osteological genetic inheritance and environmental stresses. Lectures
and demonstration. Corequisite: ANTH 3421L.
ANTH 3433. Human Evolution. 3 Hours.
A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction.

ANTH 3443. Criminalistics: Forensic Sciences. 3 Hours.
Introduction to forensics focused on the scientific analysis of physical and biological evidence encountered in criminal investigations. Chemical, microscopic, biological, and observational techniques employed in the analysis of material evidence are described, discussed, and illustrated within an investigative framework. Topics include inorganic remains, fiber, tissue, human identification, fingerprints, tools, and weapons.

ANTH 3473. North American Prehistory. 3 Hours.
Survey of the aboriginal prehistory of the North American Continent north of Mexico.

ANTH 3503. Power and Popular Protest in Latin America. 3 Hours.
This course focuses on the historical formation of Latin America by examining conflicts between the region's rich and poor. It includes both an historical perspective on the formation of ethnic, gender, and class relations in Latin America, and a discussion of contemporary social problems.

ANTH 3523. Gender and Politics in Latin America. 3 Hours.
This course examines the ways in which political struggles surrounding land, labor, and the environment have been shaped by gender relations in Latin America. Why and how do peasant-workers engage their political worlds and how are such struggles shaped by gender?

ANTH 3533. Medical Anthropology. 3 Hours.
Survey of the interrelationship of human biology, culture and environment as reflected in disease experience from an evolutionary and cross cultural perspective. Special emphasis on stress.

ANTH 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. This course is cross-listed with GEOS 3543.

ANTH 3553. Religion in Latin America. 3 Hours.
Examines contemporary implications of Latin America's unique religious heritage. An exploration of multiple Latin American religious traditions, with sustained focus on key theoretical concerns: conversion, vernacular vs. orthodox expressions, the blending of indigenous and European cosmologies, devotion and ritual, and the articulation of ethnic, gendered, and religious identities.

ANTH 3563. Culture and Medicine. 3 Hours.
Study of health and medicine within cultural contexts, including attention to cross-cultural healers and healing systems. Special emphasis on biomedicine as a cultural system.

ANTH 3573. Ballroom Culture and Performance in the West. 3 Hours.
This course focuses on competitive ballroom dancing in the West, highlighting issues of spectacle, sport, art, festival, ritual, dress, performance, identity, and gender construction.

ANTH 3583. Body and Identity. 3 Hours.
This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. This course is cross-listed with GNST 3583.

ANTH 3903. Topics in Anthropology. 3 Hours.
Covers a special topic or issue. May be repeated for up to 12 hours of degree credit.

ANTH 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in anthropology). May be repeated for degree credit.

ANTH 399VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

ANTH 4013. History of Anthropological Thought. 3 Hours.
Detailed consideration of anthropological theory through study of its historical development. The research paper in this course fulfills the Fulbright College research paper requirement for anthropology majors.

ANTH 4033. Popular Culture. 3 Hours.
Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle.

ANTH 4063. Women in Africa. 3 Hours.
Diversity of women's life experiences throughout sub-Saharan Africa will be examined. The class will investigate a range of topics, from marriage and motherhood to prostitution and popular culture. A historical dimension will be present throughout the course, and perspectives from literature and film will also be incorporated.

This course is cross-listed with AAST 4063.

ANTH 4073. African Sociolinguistics. 3 Hours.
Explores how language use intersects, constructs, and reflects social life in Africa. Covers key topics in sociolinguistics as they apply to current sociolinguistic issues on the African continent today.

This course is cross-listed with AAST 4073, WLLC 4073.

ANTH 4083. African Popular Culture. 3 Hours.
This class explores popular cultural expression across Africa. Topics range from hip hop and film, to second-hand clothing fashions and the media. We will consider how popular culture, while often inspired by global trends, is rooted in local circumstances and often reflects attempts to grapple with important issues.

This course is cross-listed with AAST 4083.

ANTH 4093. The Archeology of Death. 3 Hours.
Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed.

ANTH 4123. Ancient Middle East. 3 Hours.
The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization.

ANTH 4133. Settlement Archaeology. 3 Hours.
Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Prerequisite: ANTH 3023.

ANTH 4143. Ecological Anthropology. 3 Hours.
Anthropological perspectives on the study of relationships among human populations and their ecosystems.

ANTH 4243. Archeology of the Midsouth. 3 Hours.
Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Prerequisite: Junior standing.
ANTH 4256. Archeological Field Session. 6 Hours.
Practical field and laboratory experiences in archeological research. May be repeated for up to 12 hours of degree credit.

ANTH 4263. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.
An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality.

ANTH 4273. Photography for Fieldwork. 3 Hours.
This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved.

ANTH 4283. Survey in Ethnographic Film. 3 Hours.
Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology.

ANTH 4353. Laboratory Methods in Archeology. 3 Hours.
Theory and practice of describing, analyzing, and reporting upon archeological materials.

ANTH 4363. Museums, Material Culture, and Popular Imagination. 3 Hours.
Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed.

ANTH 4443. Cultural Resource Management I. 3 Hours.
Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal and scientific management problems. May be repeated for degree credit.

ANTH 448V. Individual Study of Anthropology. 1-6 Hour.
Reading course for advanced students with special interests in anthropology. May be repeated for up to 6 hours of degree credit.

ANTH 4513. African Religions: Gods, Witches, Ancestors. 3 Hours.
An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa.

ANTH 4523. Dental Science. 3 Hours.
Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology.

ANTH 4533. Middle East Cultures. 3 Hours.
Study of the peoples and cultures of the Middle East; ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change. May be repeated for up to 9 hours of degree credit.

ANTH 4553. Introduction to Raster GIS. 3 Hours.
Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods.
This course is cross-listed with GEOS 4553.

ANTH 4553. Vector GIS. 3 Hours.
Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Prerequisite: GEOS 3023 or GEOS 3543.
This course is cross-listed with GEOS 4583.

ANTH 4583. Cultures of Africa. 3 Hours.
An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world.
This course is cross-listed with AAST 4583.

ANTH 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, BeiDou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Prerequisite: GEOS 3543 or ANTH 3543.
This course is cross-listed with GEOS 4593.

ANTH 4603. Landscape Archaeology. 3 Hours.
This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships.

ANTH 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: ANTH 1013 (or BIOL 1543 and BIOL 1541L).
This course is cross-listed with BIOL 4613.

ANTH 4633. Archeological Prospecting and Remote Sensing. 3 Hours.
Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments.

ANTH 4653. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making.
This course is cross-listed with GEOS 4653.

ANTH 4703. Mammalian Evolution and Osteology. 3 Hours.
This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L or BIOL 1543 and BIOL 1541L or instructor consent.

ANTH 4803. Historical Archeology. 3 Hours.
Review of the development of historical archaeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis.
ANTH 4813. Ethnographic Approaches to the Past. 3 Hours. Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation.

ANTH 482V. Applied Visual Research. 1-6 Hour. This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Pre- or Corequisite: ANTH 4273 or ANTH 4283.

ANTH 4863. Quantitative Anthropology. 3 Hours. Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. This course is cross-listed with GEO 4863.

ANTH 4903. Seminar in Anthropology. 3 Hours. Research, discussion, and projects focusing on a variety of topics. May be repeated for up to 12 hours of degree credit.

ANTH 4913. Topics of the Middle East. 3 Hours. Covers a special topic or issue. May be repeated for up to 9 hours of degree credit.

ANTH 500V. Advanced Problems in Anthropology. 1-18 Hour. Individual research at graduate level on clearly defined problems or problem areas. May be repeated for up to 18 hours of degree credit.

ANTH 5043. Advanced Vector Geographic Information Systems. 3 Hours. Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: ((ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. This course is cross-listed with GEO 5043.

ANTH 5053. Quaternary Environments. 3 Hours. An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. This course is cross-listed with ENDY 5053, GEO 5053.

ANTH 5063. Popular Culture. 3 Hours. (Formerly ANTH 4033.) Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle. Graduate degree credit will not be given for both ANTH 4033 and ANTH 5063.

ANTH 5093. The Archeology of Death. 3 Hours. (Formerly ANTH 4093.) Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. Graduate degree credit will not be given for both ANTH 4093 and ANTH 5093.

ANTH 5103. Applications of Cultural Method and Theory. 3 Hours. Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing and interpreting cultural anthropological data.

ANTH 5113. Anthropology of the City. 3 Hours. Examines cities as both products of culture, and sites where culture is made and received. Explores the implications of several pivotal urban and cultural trends and the way in which representations of the city have informed dominant ideas about city space, function, and feel.

ANTH 5123. Ancient Middle East. 3 Hours. (Formerly ANTH 4123.) The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization. Graduate degree credit will not be given for both ANTH 4123 and ANTH 5123.

ANTH 5133. Settlement Archaeology. 3 Hours. (Formerly ANTH 4133.) Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133.

ANTH 5143. Ecological Anthropology. 3 Hours. (Formerly ANTH 4143.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4143 and ANTH 5143.

ANTH 5153. Topics in Anthropology. 3 Hours. Graduate level seminar with varied emphasis on topics relating to cultural anthropology. May be repeated for degree credit.

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours. Review of the nature and history of archeology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting archeological data.

ANTH 5243. Archeology of the Midsouth. 3 Hours. (Formerly ANTH 4243.) Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Graduate degree credit will not be given for both ANTH 4243 and ANTH 5243.

ANTH 5256. Archeological Field Session. 6 Hours. (Formerly ANTH 4256.) Practical field and laboratory experiences in archeological research. Graduate degree credit will not be given for both ANTH 4256 and ANTH 5256.

ANTH 5263. Indians of Arkansas and the South. 3 Hours. Study of the traditional lifeways and prehistoric backgrounds of Indians living in the southern United States, including Arkansas.

ANTH 5273. Photography for Fieldwork. 3 Hours. (Formerly ANTH 4273.) This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. Graduate degree credit will not be given for both ANTH 4273 and ANTH 5273.

ANTH 5283. Survey in Ethnographic Film. 3 Hours. (Formerly ANTH 4283.) Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. Graduate degree credit will not be given for both ANTH 4283 and ANTH 5283.

ANTH 5293. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours. (Formerly ANTH 4263.) An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. Graduate degree credit will not be given for both ANTH 4263 and ANTH 5293.

ANTH 5303. Applications of Method and Theory in Biological Anthropology. 3 Hours. Review of the nature and history of biological anthropology; recent theories and the practical implications and applications of various methods of acquiring, analyzing, and interpreting data.
ANTH 5313. Laboratory Methods in Archeology. 3 Hours.
(Formerly ANTH 4353.) Theory and practice of describing, analyzing, and reporting upon archeological materials. Graduate degree credit will not be given for both ANTH 4353 and ANTH 5313.

ANTH 535V. Topics in Physical Anthropology. 1-6 Hour.
Graduate level seminar with varied emphasis on topics relating to physical anthropology. May be repeated for degree credit.

ANTH 5363. Museums, Material Culture, and Popular Imagination. 3 Hours.
(Formerly ANTH 4363.) Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. Graduate degree credit will not be given for both ANTH 4363 and ANTH 5363.

ANTH 5413. Bioarcheology Seminar. 3 Hours.
Intensive coverage of bioarcheological method and theory with the context of both academic and cultural resources management research.

ANTH 5423. Human Evolutionary Anatomy. 3 Hours.
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. This course is cross-listed with BIOL 5423.

ANTH 5443. Cultural Resource Management I. 3 Hours.
Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal, and scientific management problems.

ANTH 5473. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. This course is cross-listed with WLLC 5463, ENGL 5463.

ANTH 548V. Individual Study of Anthropology. 1-6 Hour.
(Formerly ANTH 448V.) Reading course for advanced students with special interests in anthropology. Graduate degree credit will not be given for both ANTH 448V and ANTH 548V. May be repeated for up to 6 hours of degree credit.

ANTH 5513. African Religions: Gods, Witches, Ancestors. 3 Hours.
(Formerly ANTH 4513.) An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. Graduate degree credit will not be given for both ANTH 4513 and ANTH 5513.

ANTH 5523. Dental Science. 3 Hours.
(Formerly ANTH 4523.) Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. Graduate degree credit will not be given for both ANTH 4523 and ANTH 5523.

ANTH 5553. Introduction to Raster GIS. 3 Hours.
(Formerly ANTH 4553.) Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Credit will not be given for both ANTH 4553 and ANTH 5553.

This course is cross-listed with GEOS 5453.

ANTH 5563. Vector GIS. 3 Hours.
(Formerly ANTH 4563.) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Credit will not be given for both ANTH 4563 and ANTH 5563.

This course is cross-listed with GEOS 5583.

ANTH 5583. Peoples and Cultures of Sub-Saharan Africa. 3 Hours.
(Formerly ANTH 4583.) An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. Credit will not be given for both ANTH 4583 and ANTH 5583.

ANTH 5593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
(Formerly ANTH 4593.) Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Credit will not be given for both ANTH 4593 and ANTH 5593.

This course is cross-listed with GEOS 5293.

ANTH 5603. Landscape Archaeology. 3 Hours.
(Formerly ANTH 4603.) This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. Credit will not be given for both ANTH 4603 and ANTH 5603.

ANTH 561V. Field Research in Archaeology. 1-6 Hour.
Directed graduate level archeological fieldwork. May be repeated for up to 6 hours of degree credit.

ANTH 5623. Primate Adaptation and Evolution. 3 Hours.
(Formerly ANTH 4613.) Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Credit will not be given for both ANTH 4613 and ANTH 5623.

ANTH 5633. Archeological Prospecting & Remote Sensing. 3 Hours.
(Formerly ANTH 4633.) Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. Credit will not be given for both ANTH 4633 and ANTH 5633.
ANTH 5653. GIS Analysis and Modeling. 3 Hours.
(Formerly ANTH 4653.) Unlike conventional GIS courses that focus on studying “where”, this course will teach students to address beyond “where” using various GIS analysis and modeling techniques to explore “why” and “how”. The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Credit will not be given for both ANTH 4653 and ANTH 5653.
This course is cross-listed with GEOS 5653, ENDY 5043.

ANTH 5703. Mammalian Evolution and Osteology. 3 Hours.
(Formerly ANTH 4703.) This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: ANTH 1013 and ANTH 1011L, BIOL 1543 and BIOL 1544L, or instructor consent.

ANTH 5803. Historical Archeology. 3 Hours.
(Formerly ANTH 4803.) Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. Graduate degree credit will not be given for both ANTH 4803 and ANTH 5803.

ANTH 5813. Ethnographic Approaches to the Past. 3 Hours.
(Formerly ANTH 4813.) Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. Credit will not be given for both ANTH 4813 and ANTH 5813.

ANTH 582V. Applied Visual Research. 1-6 Hour.
(Formerly ANTH 482V.) This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Credit will not be given for both ANTH 482V and ANTH 582V.

ANTH 5863. Quantitative Anthropology. 3 Hours.
(Formerly ANTH 4863.) Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. Credit will not be given for both ANTH 4863 and ANTH 5863.
This course is cross-listed with GEOS 5863.

ANTH 5903. Seminar in Anthropology. 3 Hours.
(Formerly ANTH 4903.) Research, discussion, and projects focusing on a variety of topics. Credit will not be given for both ANTH 4903 and ANTH 5903. May be repeated for up to 12 hours of degree credit.

ANTH 5913. Topics of the Middle East. 3 Hours.
(Formerly ANTH 4913.) Covers a special topic or issue. Credit will not be given for both ANTH 4913 and ANTH 5913. May be repeated for up to 9 hours of degree credit.

ANTH 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

ANTH 6033. Society and Environment. 3 Hours.
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. May be repeated for degree credit. This course is cross-listed with ENDY 6033.

ANTH 610V. Internship. 1-18 Hour.
Internship. May be repeated for up to 18 hours of degree credit.

ANTH 6813. Seminar: Cultural Anthropology. 3 Hours.
Variable topics in Anthropology will be explored in depth. May be repeated for up to 9 hours of degree credit.

ANTH 6823. Seminar: Archeology. 3 Hours.
Various topics in Archeology will be explored in depth. May be repeated for up to 9 hours of degree credit.

ANTH 6833. Seminar: Biological Anthropology. 3 Hours.
Various topics in Biological Anthropology will be explored in depth. May be repeated for up to 9 hours of degree credit.

ANTH 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Apparel Merchandising and Product Development (AMPD) Courses

AMPD 1013. Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week.

AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing.
This course is equivalent to AMPD 1013.

AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only.

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013.

AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing.
This course is equivalent to AMPD 2013.

AMPD 2033. Computer Based Methods for Apparel. 3 Hours.
This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and AGME 2903 or ISYS 1123 or equivalent.

AMPD 2053. Introduction to Textile Science. 3 Hours.
Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC or AMPD students only.
AMPD 2063. Quality Assessment of Apparel. 3 Hours.
Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053.

AMPD 3003. Apparel Production. 3 Hours.
A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063.

AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.
Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or MATH 1204 or three credit hours of STAT and AMPD 2013.

AMPD 3043. Fashion Brand Management. 3 Hours.
This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013.

AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4082, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only.

AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course.

AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.
Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043.

AMPD 4033. Computer Aided Textile Design. 3 Hours.
This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Prerequisite: AMPD 2033 and AMPD 2053.

AMPD 4053. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Junior or senior standing or instructor consent.

AMPD 4063. Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003.

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003 and honors candidacy. This course is equivalent to AMPD 4063.

AMPD 4082. Apparel Merchandising and Product Development Internship. 2 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 3003, AMPD 3033, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. May be repeated for up to 4 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours.
Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: AMPD 3033.

AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends.

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course.

AMPD 4901. AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. May be repeated for up to 4 hours of degree credit.

AMPD 4901H. Honors AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. May be repeated for up to 4 hours of degree credit. This course is equivalent to AMPD 4901.
AMPD 491V. AMPD Study Tour. 2-6 Hour.
An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. May be repeated for up to 24 hours of degree credit.

AMPD 491VH. Honors AMPD Study Tour. 2-6 Hour.
An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. May be repeated for up to 24 hours of degree credit.

AMPD 5003. Apparel Sourcing and Merchandising Systems in the Global Economy. 3 Hours.
Evaluation of key issues facing textiles and apparel supply chain businesses in the global economy considering economic, political, and social perspectives and professional implications. Lecture 3 hours.

AMPD 5013. Advanced Apparel Pattern Design. 3 Hours.
Use of computer aided design technology to perform pattern making techniques for apparel production. Laboratory 5 hours per week. Prerequisite: AMPD 5003.

AMPD 5023. Social, Psychological and Cultural Aspects of Dress. 3 Hours.
Integration of social, psychological and cultural theories as they apply to appearance and clothing behavior. Lecture 3 hours.

AMPD 5033. Issues and Trends in Textile Studies. 3 Hours.
Studies of advances in textile science and recent developments in the textile industry. Lecture 3 hours.

AMPD 5043. Theories and Practices in Apparel Merchandising. 3 Hours.
Theoretical perspectives, concepts and current practices that influence apparel merchandising. Lecture 3 hours.

AMPD 5053. Survey Design and Scale Development. 3 Hours.
This course is designed to provide the expertise required to design and conduct survey research. Students will understand the instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments. This course uses both theory and practice. Hands-on training will be provided via SPSS package for data analyses, and Qualtrics will be used for web-based surveys. Prerequisite: 3 hours of graduate-level statistics coursework and HESC 5463 or AGED 5463 or instructor consent.

AMPD 5211. History of Apparel Through Film to 1900. 1 Hour.
(Formerly AMPD 4011.) This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. Graduate degree credit will not be given for both AMPD 4011 and AMPD 5211.

Applied Music (Class) (MUAC)

Courses

MUAC 1121. English and Italian Diction for Singers. 1 Hour.
Training in proper pronunciation and inflections of English and Italian as applied to singers. Two meetings per week.

MUAC 1141. German and French Diction for Singers. 1 Hour.
Training in proper pronunciation and inflection of German and French as applied to singing. Two meetings per week. Prerequisite: MUAC 1121.

MUAC 1161. Class Instruction in Piano for Non-Music Majors. 1 Hour.
Beginning instruction in piano. Does not fulfill the class piano requirement for music majors.

MUAC 1221. Piano Class for Music Majors I. 1 Hour.
Training in functional piano skills for music majors. Two meetings per week. Prerequisite: Music major and MUTH 1003.

MUAC 1231. Piano Class for Music Majors II. 1 Hour.
A continuation of MUAC 1221. Two meetings per week. Upon successful completion of MUAC 1231 with a grade of B or better, credit for MUAC 1221 will also be given. Prerequisite: MUAC 1221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music.

MUAC 1301. Class Instruction in Violin and Viola. 1 Hour.
Beginning class instruction in violin and viola. For music education majors only or with instructor's consent. Prerequisite: Music Education majors pursuing a concentration in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 1311. Class Instruction in Violoncello and String Bass. 1 Hour.
Beginning class instruction in violoncello and string bass. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 1321. Class Instruction in Guitar. 1 Hour.
Beginning class instruction in guitar. Students must provide their own instruments.

MUAC 1331. Class Instruction in Clarinet and Saxophone. 1 Hour.
The elementary study of clarinet and saxophone. Beginning class instruction designed to familiarize the student with the basic playing skills and teaching techniques for the instruments. Corequisite: MUAC 1341 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 1341. Class Instruction in Flute. 1 Hour.
The elementary study of flute. Beginning class instruction designed to familiarize the student with basic playing skills and teaching techniques of the instrument. Corequisite: MUAC 1331 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 1351. Class Instruction in High Brass Instruments. 1 Hour.
The elementary study of the cornet, trumpet, and horn. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the high brass family. Corequisite: MUAC 1361 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.
MUAC 1361. Class Instruction in Low Brass Instruments. 1 Hour.
The elementary study of the trombone, euphonium and tuba. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the low brass family. Corequisite: MUAC 1351 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 1381. Class Instruction in Voice. 1 Hour.
Fundamentals of vocalization and singing of English songs, including breathing, vowel clarity, and pronunciation of consonants.

MUAC 2112. Music Technology. 2 Hours.
Introduces skills for transcribing music using music notation software and sound reinforcement systems. Covers MIDI sequencing and audio recording and editing software to produce accompaniment tracks and create compact discs of music and multimedia projects. Prerequisite: Music major pursuing a Bachelor of Music or Honors Bachelor of Music degree, and sophomore standing.

MUAC 2141. Class Instruction in Oboe and Bassoon. 1 Hour.
The elementary study of oboe and bassoon. Class instruction designed to familiarize the student with basic playing skills and teaching techniques of the instruments. Prerequisite: MUAC 1331 or MUAC 1341 and a Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent.

MUAC 2221. Piano Class for Music Majors III. 1 Hour.
A continuation of MUAC 1231. Two meetings per week. Upon successful completion of MUAC 2221 with a grade of B or better, credit for MUAC 1221 and MUAC 1231 will also be given. Prerequisite: MUAC 1231 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music.

MUAC 2231. Piano Class for Music Major IV. 1 Hour.
A continuation of MUAC 2221. Two meetings per week. Upon successful completion of MUAC 2231 with a grade of B or better, credit for MUAC 1221, MUAC 1231, and MUAC 2221 will also be given. Prerequisite: MUAC 2221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music.

MUAC 3401. Jazz Improvisation I. 1 Hour.
This course is the first in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 1371.

MUAC 3411. Jazz Improvisation II. 1 Hour.
This course is the second in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3401.

MUAC 4371. Teaching the High School Percussionist. 1 Hour.
A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Prerequisite: MUAC 1371.

MUAC 4401. Jazz Improvisation III. 1 Hour.
This course is the third in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3411.

MUAC 4411. Jazz Improvisation IV. 1 Hour.
This course is the fourth in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 4401.

Applied Music (Private Instruction) (MUAP)

Courses
Private study of secondary voice/instrument. Prerequisite: Instructor consent. May be repeated for up to 2 hours of degree credit.

MUAP 110V. Applied Major Voice/Instrument I. 1-4 Hour.
Private study of the primary voice/instrument for music majors. Admission to MUAP 110V requires the successful completion of audition for the instructor. Prerequisite: Music major. May be repeated for up to 8 hours of degree credit.

MUAP 130V. Applied Skills Voice/Instrument I. 1-4 Hour.
Private study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 110V. Prerequisite: Music major; recommendation of instructor. May be repeated for up to 8 hours of degree credit.

Continued private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 1001 and recommendation of the instructor. May be repeated for up to 2 hours of degree credit.

MUAP 210V. Applied Major Voice/Instrument II. 1-4 Hour.
Continued private study of the primary voice/instrument for music majors. Prerequisite: Two semesters of MUAP 110V with grades of B or better or MUAP 130V with a grade of B or better. May be repeated for up to 8 hours of degree credit.

MUAP 230V. Applied Skills Voice/Instrument II. 1-4 Hour.
Continued study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 210V. Prerequisite: Two semesters of MUAP 210V and recommendation of instructor. May be repeated for up to 8 hours of degree credit.
Advanced private study of secondary voice/instrument. Prerequisite: Two semesters of MUAP 200V and recommendation of the instructor. May be repeated for up to 2 hours of degree credit.

MUAP 310V. Applied Major Voice/Instrument III. 1-4 Hour.
Continuation of MUAP 210V. Private study of the primary instrument/voice for music majors at the advanced level. Admission requires approval of the faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210V with grades of B or better or MUAP 230V with a grade of B or better. May be repeated for up to 8 hours of degree credit.

MUAP 310VH. Honors Applied Major Voice/Instrument III. 1-4 Hour.
Continuation of MUAP 210V. Private study of the primary voice/instrument for honors music majors at the advanced level. Admission requires approval of faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210V with grades of B or better or MUAP 230V with a grade of B or better; honors standing. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUAP 310V.

MUAP 3201. Applied Recital I. 1 Hour.
Preparation and performance of a public recital of a minimum of 25 minutes of music. May be repeated for degree credit.

MUAP 3201H. Honors Applied Recital I. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 310VH. May be repeated for degree credit. This course is equivalent to MUAP 3201.

Private study of the primary voice/instrument for music majors at the advanced level. Continued development of musical and technical skills introduced in MUAP 310V. Prerequisite: Two semesters of MUAP 310V and recommendation of instructor. May be repeated for up to 8 hours of degree credit.

Continued advanced private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 300V and recommendation of the instructor. May be repeated for up to 2 hours of degree credit.

MUAP 410V. Applied Major Voice/Instrument IV. 1-4 Hour.
Continuation of MUAP 310V. Private study of the primary voice/instrument for music majors at the advanced level. Prerequisite: Two semesters of MUAP 310V with recommendation of instructor. May be repeated for up to 8 hours of degree credit.

MUAP 410VH. Honors Applied Major Voice/Instrument IV. 1-4 Hour.
Continuation of MUAP 310VH. Private study of the primary voice/instrument for honors music majors at the advanced level. Prerequisite: Two semesters of MUAP 310VH, recommendation of instructor and honors standing. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUAP 410V.

MUAP 415V. Applied Skills Voice/Instrument IV. 1-4 Hour.
Private study of the primary voice/instrument for music majors at the advanced level in preparation for recital. Continued development of musical and technical skills introduced in MUAP 410V. Prerequisite: Two semesters of MUAP 410V and recommendation of instructor. May be repeated for up to 8 hours of degree credit.

MUAP 4201. Applied Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. Prerequisite: MUAP 3201. May be repeated for degree credit.

MUAP 4201H. Honors Applied Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 410VH. May be repeated for degree credit. This course is equivalent to MUAP 4201.

MUAP 4301. Composition Recital. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes consisting of original musical compositions. May be repeated for degree credit.

MUAP 4301H. Honors Composition Recital. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes consisting of original musical compositions. Prerequisite: Honors standing. May be repeated for degree credit. This course is equivalent to MUAP 4301.

Private study at the graduate secondary level. May be repeated for degree credit.

MUAP 510V. Applied Voice/Instrument. 1-5 Hour.
Private study at the graduate level. May be repeated for degree credit.

MUAP 5201. Graduate Recital I. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. May be repeated for degree credit.

MUAP 5211. Graduate Recital II. 1 Hour.
Preparation and performance of a public recital of a minimum of 50 minutes of music. May be repeated for degree credit.

**Arabic (ARAB) Courses**

**ARAB 1003. Elementary Arabic I. 3 Hours.**
Stresses correct pronunciation, aural comprehension, simple speaking ability. Basic grammar is taught inductively through oral and written skills.

**ARAB 1013. Elementary Arabic II. 3 Hours.**
Continues to stress correct pronunciation, aural comprehension, simple speaking ability. Continued presentation of grammar with special attention to basic morphology. Prerequisite: ARAB 1003 or equivalent.

**ARAB 1016. Intensive Arabic I. 6 Hours.**
Equivalent to 1003 and 1013. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Basic grammar is taught inductively through oral and written skills.

**ARAB 2003. Intermediate Arabic I. 3 Hours.**
Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Prerequisite: ARAB 1013 or ARAB 1016 or equivalent.

**ARAB 2013. Intermediate Arabic II. 3 Hours.**
Continued development of speaking, comprehension, reading, and writing. Emphasizes morphology and syntax.

**ARAB 2016. Intensive Arabic II. 6 Hours.**
Equivalent to 2003-2013 sequence. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax.

**ARAB 2016H. Honors Intensive Arabic II. 6 Hours.**
Equivalent to 2003-2013 sequence. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax. Prerequisite: Honors standing. This course is equivalent to ARAB 2016.
ARAB 3016. Intensive Arabic III. 6 Hours.
Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued emphasis on morphology and syntax. Prerequisite: ARAB 2016.
This course is cross-listed with ARAB 3016H.

ARAB 3016H. Honors Intensive Arabic III. 6 Hours.
Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued emphasis on morphology and syntax. Prerequisite: ARAB 2016.
This course is cross-listed with ARAB 3016.

ARAB 4016. Intensive Arabic IV. 6 Hours.
Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse.

ARAB 4016H. Honors Intensive Arabic IV. 6 Hours.
Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse. Prerequisite: Honors standing.
This course is equivalent to ARAB 4016.

ARAB 4023. Advanced Arabic I. 3 Hours.
Development of advanced speaking and writing skills. Extensive reading and writing assignments and translating exercises from English into Arabic. Prerequisite: ARAB 4016.

ARAB 4033. Advanced Arabic II. 3 Hours.
Continued advanced speaking, reading, and writing skills. Prerequisite: ARAB 4023.

ARAB 470V. Special Topics. 1-6 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. May be repeated for degree credit.

Architecture (ARCH) Courses

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees.

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy.
This course is equivalent to ARCH 1003.

ARCH 1013. Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed.

ARCH 1013H. Honors Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. Prerequisite: Honors candidacy.
This course is equivalent to ARCH 1013.

ARCH 1015. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills.

ARCH 1025. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal orderings; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015.

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form.

ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212.

ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ARCH 2016. Architectural Design III. 6 Hours.
Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite: ARCH 1025 and ARCH 1222.

ARCH 2026. Architectural Design IV. 6 Hours.
An elaboration of space-making, addressing three-dimensional aspects of form-making, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233.

ARCH 2113. Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212.

ARCH 2113H. Honors Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. This course is equivalent to ARCH 2113.
ARCH 2123. Architectural Structures II. 3 Hours.
Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. This course is equivalent to ARCH 2124.

ARCH 2132. Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212.

ARCH 2132H. Honors Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. This course is equivalent to ARCH 2132.

ARCH 2233. History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods.

ARCH 2233H. Honors History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. This course is equivalent to ARCH 2233.

ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233.

ARCH 2243H. Honors History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. This course is equivalent to ARCH 2243.

ARCH 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester.

ARCH 3016. Architectural Design V. 6 Hours.
Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 3134 and ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. This course is equivalent to ARCH 301.

ARCH 3026. Architectural Design VI. 6 Hours.
Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143.

ARCH 303V. Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. May be repeated for degree credit. This course is equivalent to ARCH 303.

ARCH 303VH. Honors Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. May be repeated for degree credit. This course is equivalent to ARCH 303.

ARCH 3143. Building Materials and Assemblies. 3 Hours.
Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123.

ARCH 3253. Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. This course is cross-listed with ARCH 3253H.

ARCH 3253H. Honors Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 2016 and ARCH 3143. This course is cross-listed with ARCH 3253.

ARCH 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ARCH 3743. Furniture Design. 3 Hours.
Design concepts and techniques to acquaint the student with the design of furniture. Emphasis on issues of typology, context and technological suitability as sources of analysis of function, development of design and construction of small pieces of furniture.

ARCH 4016. Comprehensive Studio. 6 Hours.
Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026.

ARCH 4023. Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. May be repeated for degree credit.
ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. Prerequisite: Honors candidacy. May be repeated for degree credit. This course is equivalent to ARCH 4023.

ARCH 4026. Comprehensive Studio. 6 Hours.
Continuation of Architectural Design VII. Corequisite: ARCH 4154. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126.

ARCH 4116. Architectural Design - Rome. 6 Hours.
Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016.

ARCH 4126. Architectural Design Latin America. 6 Hours.
Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016 or ARCH 4026.

ARCH 4152. Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. This course is cross-listed with ARCH 4152H.

ARCH 4152H. Honors Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. This course is cross-listed with ARCH 4152.

ARCH 4433. History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IDES 2883.

ARCH 4433H. Honors History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. This course is equivalent to ARCH 4433.

ARCH 4483. Architecture of the Americas. 3 Hours.
Study of the development of architecture in the Americas from the Pre-Columbian cultures to the present day. Lecture and slides 3 hours per week.

ARCH 4483H. Honors Architecture of the Americas. 3 Hours.
Study of the development of architecture in the Americas from the Pre-Columbian cultures to the present day. Lecture and slides 3 hours per week. Prerequisite: Honors candidacy. This course is equivalent to ARCH 4483.

ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433.

ARCH 4523H. Honors Architectural Theory. 3 Hours.
Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. This course is equivalent to ARCH 4523.

ARCH 4553. Modern Architecture in Mexico. 3 Hours.
Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester.

ARCH 4553H. Honors Modern Architecture in Mexico. 3 Hours.
Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester. This course is equivalent to ARCH 4553.

ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ARCH 4610. Architecture Cooperative Education I. 0 Hours.
A practicum which introduces and engages the student in the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty.

ARCH 4643. Principles of Sustainable Design. 3 Hours.
In collaboration with the Green Building Council Italia. Provides a basic understanding of key aspects of sustainable design in architecture with particular reference to the experiences and methods developed in Italy and Europe.

ARCH 4653. Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester.

ARCH 4673. Modern and Contemporary Rome. 3 Hours.
Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome.

ARCH 4723. Architectural Research Methods. 3 Hours.
Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon architectural inquiry and discourse at a sophisticated level, for instance, in the form of a year-long thesis or independent project. Practical issues of method, such as research skills, literature review, and argument analysis are examined. The classic range of tools for interpreting architecture are surveyed from single-cause explanations (e.g., formalism) to more recent multi-causal theories (e.g., Semiotics, Deconstruction, Post-colonial theory, etc.) for architectural design. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433.
ARCH 4843. Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. This course is cross-listed with ARHS 4743.

ARCH 4843H. Honors Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. This course is cross-listed with ARHS 4743, ARCH 4843.

ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. This course is cross-listed with ARHS 4753.

ARCH 4853H. Honors Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. This course is cross-listed with ARHS 4753, ARCH 4853.

ARCH 4863. Saint Peter’s and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter’s Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. This course is cross-listed with ARHS 4733.

ARCH 4863H. Honors St. Peter’s and the Vatican. 3 Hours.
Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. This course is cross-listed with ARCH 4863, ARHS 4733.

ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture.

ARCH 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. This course is cross-listed with LARC 4943, IDES 4943.

ARCH 4943H. Honors Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.

ARCH 5016. Option Studio I. 6 Hours.
Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4026, or ARCH 4116, or ARCH 4126.

ARCH 5016H. Honors Thesis Project I. 6 Hours.
Degree project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: Honors candidacy. This course is equivalent to ARCH 5016.

ARCH 5026. Option Studio II. 6 Hours.
Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. Prerequisite: ARCH 5016.

ARCH 5026H. Honors Thesis Project II. 6 Hours.
Degree project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. Prerequisite: Honors candidacy. This course is equivalent to ARCH 5026.

ARCH 5253. Architectural Structures Seminar. 3 Hours.
Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. May be repeated for up to 6 hours of degree credit.

ARCH 5314. Architectural Professional Practice. 4 Hours.
Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics: organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4026 or ARCH 4116 or ARCH 4126.

ARCH 5493. History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433.
ARCH 5493H. Honors History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. This course is equivalent to ARCH 5493.

ARCH 5933. Preservation and Restoration. 3 Hours.
History of the preservation and restoration movement in Europe and the U.S.; its relation to the contemporary urban planning and renewal. Modern economic and administrative techniques of preservation. Participation in history surveys at regional and state levels. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433.

ARCH 5943. Preservation Design Technology. 3 Hours.
This course prepares students to work with historic structures by providing an introduction to the history and principles of historic and traditional construction systems, including: concepts and techniques for building conservation, historic materials and technologies, identification of treatments, recordation and research, material properties and behavior, and building forensics. Prerequisite: ARCH 4943 or instructor consent.

ARCH 5953. Preservation Practice Field Trip. 3 Hours.
Intensive field study of a domestic or foreign site of significant or precedent-setting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. May be repeated for up to 6 hours of degree credit.

Army ROTC (MILS) Courses

MILS 1001. Basic Introductory Course to Military Leadership I (Fa). 1 Hour.
Incorporates various outdoor field craft skills involving both classroom and outdoor instruction. Subjects include small group leadership, rappelling, basic map reading, water safety and first aid. Introduction to organization, values, ethics, personal development and the role of the Army. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component.

MILS 1011. Introduction to Military Leadership II (Sp). 1 Hour.
Incorporates various outdoor field craft involving both classroom and outdoor instruction, intermediate map reading/orienteering, first aid and outdoor cold/hot weather survival skills. Introduction to small group leadership principles. Personal development, ethics, values and the 7 Army values and the role that the Army plays in today's society and world. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component.

MILS 1101. Basic Marksmanship. 1 Hour.
Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at a local indoor rifle range. Materials and equipment furnished by Department of Military Science.

MILS 1211. Basic Outdoor Field Craft and Skills. 1 Hour.
Introduction to basic military survival skills and outdoor field craft. Subjects include cold/hot weather survival, water procurement methods, expedient field shelters, signaling, map reading and rappelling technique. Materials and equipment furnished by Department of Military Science. Classroom 2 hours per week.

MILS 2002. Leadership Development I (Fa). 2 Hours.
Continuation of basic skills presented in MILS 1001 and MILS 1011. Course focus is on small unit leadership, team building and management skills. Includes an introduction to small unit tactics. Students develop leadership foundations by leading discussions, developing and briefing operation plans using the military decision making model. Classroom 2 hours per week. Lab 1 hour per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or approval of Professor of Military Science.

MILS 2012. Leadership Development II (Sp). 2 Hours.
Continuation of leadership skills presented in MILS 2002. Course focus is on decision making process, time management, and leadership skills. Includes an introduction to military writing and basic tactics. Cadets continue training in land navigation, first aid, and outdoor field craft. Classroom 2 hours per week. Lab 1 hour per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or approval of Professor of Military Science.

MILS 2101. Advanced Rifle Marksmanship. 1 Hour.
Course to teach students the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air rifle, small bore firing, advanced practical exercises of different shooting positions and marksmanship competition with other universities. Prerequisite: MILS 1101.

MILS 3004. Applied Leadership I (Fa). 4 Hours.
Development of managerial and leadership abilities, maximizing performance-oriented 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training are conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component. Prerequisite: Junior standing plus one of the following conditions: completion of ROTC basic camp, veteran status, or completion of basic training with any component of the U.S. Armed Forces. Students must also obtain consent from the MSIII Advisor and the Professor of Military Science.

MILS 3014. Applied Leadership II (Sp). 4 Hours.
Development of managerial and leadership abilities, maximizing performance-oriented 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical infantry situations. The training is intended to prepare the student for the ROTC Advanced Camp experienced normally in the summer prior to the senior year or 4th year of ROTC. Lecture 3 hours, laboratory 3 hours per week, plus 3 hours of physical training are conducted weekly. One weekend field training exercise is required per semester. Corequisite: Lab component. Prerequisite: Junior standing plus one of the following conditions: completion of ROTC basic camp, veteran status, or completion of basic training with any component of the U.S. Armed Forces. Students must also obtain consent from the MSIII advisor and the Professor of Military Science.

MILS 4001. Advanced Military Issues. 1 Hour.
Individual study for advanced undergraduates. Students will research, write a paper, and give an oral presentation of a current military issue. Prerequisite: PMS approval.

MILS 4004. Advanced Leadership I (Fa). 4 Hours.
The study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army's training and maintenance management system. Lecture 3 hours, laboratory 3 hours, physical training 3 hours per week. MS IV cadets plan and participate in 1 field training exercise per semester. Corequisite: Lab component. Prerequisite: Successful completion of MS III course work (MILS 3004 and MILS 3014).
MILS 4011. Advanced Military Correspondence. 1 Hour.
Practicum for advanced undergraduates. Students submit prepared military correspondence projects written in the military style using military forms and formats. Prerequisite: PMS approval.

MILS 4014. Advanced Leadership II (Sp). 4 Hours.
The study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army’s training and maintenance management system. Lecture 3 hours, laboratory 3 hours, physical training 3 hours per week. MS IV cadets plan and participate in 1 field training exercise per semester. Corequisite: Lab component. Prerequisite: Successful completion of MS III course work.

Art (ARTS)

Courses

ARTS 1013. Introduction to Drawing from Observation. 3 Hours.
Problems dealing with materials and techniques of drawing, including basic concepts of line, perspective, and value.

ARTS 1313. Two-Dimensional Design. 3 Hours.
Studio problems in the use of line, shape, texture, value, and color and their relationships.
This course is equivalent to ART 1313.

ARTS 1323. Three-Dimensional Design. 3 Hours.
Studio problems with the elements of three-dimensional design: structure, space, form, surface, and their relationship.
This course is equivalent to ART 1323.

ARTS 1919C. Studio Foundation I. 9 Hours.
Intensive, studio-format coursework in a variety of two-dimensional, three-dimensional, and time-based media provides an introduction to fundamentals of art and design with emphasis on components of the creative process: research and critical thinking; investigation of materials; and instruction in software and fabrication techniques. 9 credit hours. Corequisite: Drill component.

ARTS 1929C. Studio Foundation II. 9 Hours.
Continuation of Studio Foundation I. Intensive intermediate studio projects in a variety of two-dimensional, three-dimensional, and time-based mediums; instruction in software and fabrication techniques; and the introduction of professional practices, including the assemblage and maintenance of a foundational portfolio; required attendance at weekly seminar. Corequisite: Drill component. Prerequisite: ARTS 1919C.

ARTS 2313. Digital Tools and Concepts. 3 Hours.
Introduces Visual Design students to design concepts with a concentration on professional industry tools. Emphasizes development of visual problem solving while creating well-crafted solutions. Prerequisite: ARTS 1919C and ARTS 1929C.

ARTS 3003. Intermediate Drawing. 3 Hours.
Continued training in fundamental drawing skills. Builds upon observational drawing skills with analytic approaches, including the spatial logic of translating three dimensions to two, constructing global value relationships, and making meaningful compositions by linking formal decisions to conceptual intent. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 1013 and instructor consent.

ARTS 3013. Figure Drawing I. 3 Hours.
Investigation of the human form through drawing, with special emphasis on gestural modes of working. Careful analysis of human anatomy, including internal and externally visible structures, position and movement of joints, as well as anatomical proportions and their variations among different individuals. Prerequisite: ARTS 3003.

ARTS 3023. Drawing: Advanced Form and Content. 3 Hours.
This course will provide a technical and conceptual basis for independent exploration in the medium of drawing. A variety of approaches and starting points will be explored, including abstract/non-representational drawing, conceptual drawing, process-based drawing, and interpretive representational drawing. Experimental methods and media will be encouraged. Prerequisite: ARTS 3003 and junior or senior standing.

ARTS 3033. Drawing With Color. 3 Hours.
Color issues pertaining to drawing. Projects will challenge students to accurately perceive and recreate color relationships by building optical mixtures of colored marks to create a continuous world of color from a limited set of starting colors. Prerequisite: ARTS 3003.

ARTS 3043. Illustration: Communicating With Drawing. 3 Hours.
How to create images that carry specific, unambiguous meanings - to speak with pictures. Projects will explore various modes of visual communication and relationships to texts, including narrative, editorial and sequential illustrations. Prerequisite: ARTS 3003 or instructor consent.

ARTS 3053. Drawing in the Expanded Field. 3 Hours.
A philosophical examination of the discipline of drawing through experimental works. Initial projects will question the essential aspects of drawing-ness, pushing beyond the typical materials and processes to make drawings with unusual properties. In the second half of the course, students will take on a sustained independent exploration. Prerequisite: ARTS 3003 or instructor consent.

ARTS 3103. Painting I. 3 Hours.
An introduction to oil painting, focusing on painting from direct observation. Topics to be covered include: materials, palette, understanding perceptual color and color theory, and development of the painting through use of layers, value, mark-making, composition, light, and space. Prerequisite: ARTS 1313 and ARTS 2013; or ARTS 1919C and ARTS 1929C.

ARTS 3123. Painting: Water Media. 3 Hours.
Introduction to materials and techniques of watercolor and acrylic painting. Form, composition, and content to be studied through observation and imagination. Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 3103 or ARTS 2003.

ARTS 3133. Figure Painting. 3 Hours.
Introduction to representational and interpretive figure painting and to contemporary issues in figurative painting. The model as well as other visual sources will be used as a basis for observation, interpretation and invention. Prerequisite: ARTS 2013, ARTS 3103.

ARTS 3153. Painting Perception Into Abstraction. 3 Hours.
Investigation of the abstraction of visual phenomena. Various starting points and approaches will be studied. Emphasis on the analysis of form, the creation of pictorial structure, and the conceptual basis of perceptual abstraction. Prerequisite: ARTS 3103.

ARTS 3163. Abstract Painting. 3 Hours.
An introduction to the material, formal, and conceptual aspects of abstract painting. Projects will explore a variety of starting points for the invention of form in painting. Examines the construction of meaning in modern and contemporary abstract painting through studio work, discussion, writing assignments and lectures. Prerequisite: ARTS 3103.

ARTS 3173. Contemporary Representational Painting. 3 Hours.
Contemporary approaches to the use of imagery in painting. Projects emphasize the systematic alteration of color, form and space through strategies of reduction, omission, distortion and compositional. Prerequisite: ARTS 3103.
ARTS 3203. Beginning Sculpture: Fundamentals of Modeling, Mold Making & Casting. 3 Hours.
An introduction to fundamental additive and subtractive sculpture techniques and methods of seeing and working that give expression to material form. Beginning techniques in modeling, carving, mold making, and basic casting are demonstrated. Lectures, readings, and critiques will develop student awareness of traditional building techniques which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C.

ARTS 3213. Beginning Sculpture: Construction Methods I. 3 Hours.
A focus on material sensitivity through thoughtful and skillful additive approaches. Woodworking and metalworking are introduced as methods to examine structural and spatial possibilities. Through examining and questioning the interplay of form, material, technique, and content, students will develop their knowledge of traditional fabrication processes, which inform contemporary sculpture. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C.

ARTS 3223. Beginning Sculpture: Critical Issues I. 3 Hours.
An experimental lab focused on critical issues in contemporary sculpture. Students will be challenged to dissect their process of making, to question the nature of sculpture and art-making in the 21st century, and the context in which art is created, shown, and distributed. Prerequisite: ARTS 1323 or (ARTS 1919C and 1929C).

ARTS 3313. Introduction to Typography. 3 Hours.
Examination of letterform construction, including anatomy and architecture. Analysis through a historical lens, exploring technological and cultural contexts. Typographic nuance and connotation. Introduction of the grid as a means to understand layout and organize typography. Prerequisite: ARTS 1919C and ARTS 1929C and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 3323. Typographic Systems. 3 Hours.
Will introduce the complexity of adding imagery, both photographic and illustrative, into typographic layout. Management of hierarchy in a more advanced way through grid usage. Artifacts will span print to web, exploring how typography must always adapt to new contexts and audiences. Prerequisite: ARTS 2313 and ARTS 3313 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 3363. Graphic Design I. 3 Hours.
An overview of design principles and the application of design processes to posters, logos, stationery, and publication design. Conceptual development and visual and technical problem solving skills are emphasized. Prerequisite: ARTS 1013 and ARTS 2313; or ARTS 1919C and 1929C.

ARTS 3383. User Experience. 3 Hours.
Prepare students to design with usability and function at the forefront of their decision making. Personas, user scenarios and research to guide the design process. Exploration of the field of information architecture in order to clearly structure information and experience. Introduction to HTML, CSS, and other interactive languages. Prerequisite: ARTS 3323 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 3393. Identity Design. 3 Hours.
Beginning identity design course, focusing on theory and application of semiotics, through creation of icon sets and small scale applications. Emphasis placed on connotation, creating messaging and formal development. Prerequisite: ARTS 3323 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 3403. Printmaking: Introduction. 3 Hours.
Introduction to the technical, formal, conceptual, and historical aspects of printmaking through methods of relief, intaglio (etching), monoprint, serigraphic (screenprinting), and lithographic printing techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025.

ARTS 3413. Printmaking: Etching. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of intaglio printmaking through traditional and current methods of metal plate etching, aquatint, color inking and printing, collagraph, photo processes, and other techniques. Prerequisite: ARTS 3403.

ARTS 3423. Printmaking: Lithography. 3 Hours.
Introduction to lithographic printmaking processes including wet and dry media on stone and plate, photo processes, and various inking methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325.

ARTS 3433. Printmaking: Relief. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of relief printmaking through traditional and current methods of woodcut, wood engraving, linoleum, CNC routing, digital technologies, moku hanga, and other methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325.

ARTS 3443. Printmaking: Screenprinting. 3 Hours.
Introduction to serigraphic techniques, including cut stencils, photosensitive stencils, resist methods, additive and reductive printing, and other processes. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325.

ARTS 3453. Printmaking: Monoprint & Monotype. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of monotype and monoprint printmaking through a variety of traditional and current methods to create singular works on paper. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325.

ARTS 3463. Printmaking: Digital Inquiries. 3 Hours.
Exploration of the technical, formal, and conceptual aspects of both traditional printmaking techniques and contemporary digital media and their application to contemporary art and visual culture. Prerequisite: ARTS 3403 or ARTS 3443.

ARTS 3473. Printmaking: Book & Letterpress. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of book arts through traditional and current Eastern and Western methods of various book forms, book construction, binding, design, content, letterpress printing, and conceptual considerations. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325.

ARTS 3503. Ceramics: Handbuilding I. 3 Hours.
This introductory course investigates the techniques, materials, and themes common to hand-built ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, low temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323; or ARTS 1919C and ARTS 1929C.

ARTS 3523. Ceramics: Wheelthrowing I. 3 Hours.
This introductory course investigates the techniques, materials, and themes common in wheel-thrown ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, high temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323; or ARTS 1919C and ARTS 1929C.

ARTS 3533. Ceramics: Wheelthrowing II. 3 Hours.
This concept-driven intermediate-level course focuses on expanding the students' skills and knowledge of wheel-thrown and hand-built forms. Additional emphasis will be placed on clay and glaze testing, and understanding the processes of firing in electric, gas, salt/soda, and wood-firing kilns. Prerequisite: ARTS 3523.
ARTS 3543. Ceramics: Slip-Casting. 3 Hours.
This concept-driven intermediate-level course focuses on the techniques and approaches common to ceramic slip-casting. Plaster mold-making, model development and preparation, slip mixing, and slip-casting are emphasized. Students will utilize low and high temperature gas and electric firings. Prerequisite: ARTS 3503.

ARTS 3803. Photography I. 3 Hours.
Beginning photography. Introduction to analog and digital B & W materials, techniques, and theory. Development of visual ideas through assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 1313; or ARTS 1919C and ARTS 1929C.

ARTS 8313. Alternative Photographic Processes. 3 Hours.
Advanced B & W materials, techniques, and theory. Introduction to "non-traditional" materials, techniques, and theory (Cyanotype, Van Dyck Brownprint, Gum Biochromate, KWIK-PRINT, etc.). Assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 3803.

ARTS 3933. Color Studies. 3 Hours.
Investigation of color qualities and relationships through research and studio problems. Prerequisite: ARTS 1313 and ARTS 1323 and ARTS 2013; or ARTS 1919C and ARTS 1929C.

ARTS 4003. Drawing Projects. 3 Hours.
Individual studio projects in Drawing. Each student will propose a project to pursue over the course of the semester. Prerequisite: Senior standing as a Studio Art BA or BFA concentrating in drawing.

ARTS 4023. Figure Drawing II. 3 Hours.
Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Prerequisite: ARTS 2013.

ARTS 404V. Special Problems in Drawing. 1-6 Hour.
Individual projects in drawing arranged with the instructor. Prerequisite: ARTS 3023. May be repeated for up to 6 hours of degree credit.

ARTS 4133. Landscape Painting. 3 Hours.
Exploration of perceptual and conceptual approaches to painting the landscape. Both traditional and experimental techniques of oil painting will be studied. Includes outdoor on-site painting. Prerequisite: ARTS 3103.

ARTS 4153. Topics in Advanced Painting. 3 Hours.
Topics in advanced and experimental painting. Prerequisite: 6 hours of painting. May be repeated for up to 12 hours of degree credit.

ARTS 417V. Special Problems in Painting. 1-6 Hour.
Individual studio projects in painting. Prerequisite: ARTS 3103. May be repeated for up to 6 hours of degree credit.

ARTS 4183. Contemporary Issues in Painting. 3 Hours.
Examination of concepts and themes relevant to the contemporary practice of painting, accompanied by the production of an individually determined body of work. Emphasis on studio work supplemented by research, critique, reading and writing. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 4133, or ARTS 4153. Prerequisite: ARTS 3103. May be repeated for up to 6 hours of degree credit.

ARTS 4193. Advanced Painting. 3 Hours.
Intensive course for those art majors concentrating in painting. Extended, individually determined projects will emphasize production of a well researched, conceptually grounded and cohesive body of work. Supplemented by reading, writing and discussion of contemporary issues in painting. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 4133, or ARTS 4153. May be repeated for up to 6 hours of degree credit.

ARTS 4203. Intermediate Sculpture: Modeling, Moldmaking, & Casting II. 3 Hours.
Merging historical methodology and advanced technology from lost-wax metal casting to digital fabrication, a continuation of additive and subtractive techniques in modeling, carving, moldmaking, and casting. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3203.

ARTS 4213. Intermediate Sculpture: Mixed Media & Spatial Context. 3 Hours.
An exploration in assemblage, installation, environmental art, light, and kinetics as they apply to contemporary sculptural language. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3213.

ARTS 4223. Advanced Sculpture: Critical Issues II. 3 Hours.
A directed analysis of form and its relationship to content based on the development of work in students' medium of choice. Students will acquire the technical skills needed to meet personal vision through guidance of the instructor. Research evidence work, discussions, and critiques is emphasized. Prerequisite: 6 hours of intermediate level sculpture courses: Choose from ARTS 4203, ARTS 4213, and ARTS 4243.

ARTS 423V. Special Problems in Sculpture. 1-6 Hour.
Individual projects in sculpture with emphasis on materials exploration. Prerequisite: ARTS 4223. May be repeated for up to 6 hours of degree credit.

ARTS 4243. Intermediate Sculpture: Construction Methods II. 3 Hours.
A deeper investigation into construction techniques to further examine structural and spatial possibilities and question the relationship between traditional and contemporary sculptural materials. Through a more profound and critical analysis of form, material, process, content, and context, construction methodology will be established as a foundation for individual practice. Prerequisite: ARTS 3213.

ARTS 4303. Professional Development and Seminar. 3 Hours.
Preparation of students for professional practice and job seeking. Development of online and print portfolio and other collateral. Contemporary design practice through discussions, reading, writing, guest speakers and studio visits. Emphasis on assisting each student in preparing for their unique future. Prerequisite: ARTS 3383 and ARTS 3393 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4313. Interactive Language. 3 Hours.
Advanced course utilizing interactive languages to create responsive experiences for the web, touch screens. Exploration of the intersection of linear and non-linear design experiences in the application of motion to web. Prerequisite: ARTS 3383 and ARTS 3393 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4323. Technology in Context. 3 Hours.
Advanced course focusing on speculative explorations in the world of interaction design. Much of the work will be touch and gesture based and dealing with the built environment. Application of knowledge about proper workflow and execution in an advanced way. Prerequisite: ARTS 4303 and ARTS 4313 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4343. Identity Systems. 3 Hours.
Advanced identity design course emphasizing creating cohesive messaging systems that cover a wide range of media. Creation of identity systems that are based on research and appropriate to content, context and audience. Media may span environmental, motion, print, web and packaging. Prerequisite: ARTS 4303 and ARTS 4313 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4353. Human Centered Design. 3 Hours.
Research-based studio introducing design methods that focus on an audience centric process. Exposure to communication theory, modes of persuasion, sustainability, how to design for niche audiences. Prerequisite: ARTS 4303 and ARTS 4313 and Bachelor of Fine Arts in Graphic Design majors only.
ARTS 4363. Design Co-op. 3 Hours.
Collaboration with an organization, or design firm, providing opportunity to address problems existing outside of the classroom with the focus shifting between design for good initiatives. Collaboration, research, problem seeking and solving will be addressed. Prerequisite: ARTS 4323, ARTS 4343, and ARTS 4353 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4373. Advanced Typography. 3 Hours.
Culminating typography course, exploration of typography at an advanced level through a variety of projects. Projects may range from type design to type in motion to complex publication design. Exhibition of the utmost professional ideation, process, execution and craft expected. Prerequisite: ARTS 4323, ARTS 4343, and ARTS 4353 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4383. Degree Project. 3 Hours.
Capstone course requiring completion of a self-directed project through in-depth research, writing and making, offering an opportunity to specialize prior to entering the job market. Prerequisite: ARTS 4323, ARTS 4343, and ARTS 4353 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 439V. Special Problems in Graphic Design. 1-6 Hour.
Advanced individual projects in graphic design. Prerequisite: Any 4000 level ARTS visual design course except ARTS 4343. May be repeated for up to 6 hours of degree credit.

ARTS 4413. Printmaking: Intermediate. 3 Hours.
Continued study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Two 3000-level printmaking courses required. Prerequisite: ARTS 3403 and ARTS 3443. This course is cross-listed with ARTS 4413H.

ARTS 4483. Printmaking: Advanced. 3 Hours.
Continued advanced study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 4413.

ARTS 449V. Special Problems in Prints. 1-6 Hour.
Advanced individual study of one or more printmaking processes with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403. May be repeated for up to 6 hours of degree credit.

ARTS 4503. Intermediate Ceramics. 3 Hours.
Focuses on discovering and developing a personal approach to the creation of ceramic objects. Students will explore and test clay bodies, surface treatments, and firing methods while simultaneously exploring ideas, formats, contexts, and interpretations to their work. Any or all ceramic processes may be used. Pre- or corequisite: ARTS 3503 or ARTS 3523 or ARTS 3543.

ARTS 4513. Technical Ceramics. 3 Hours.
Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Prerequisite: ARTS 4503.

ARTS 4553. Ceramics-Handbuilding III. 3 Hours.
Continued advanced work in handbuilding techniques and glaze calculation. Prerequisite: ARTS 3513.

ARTS 4573. Advanced Ceramics. 3 Hours.
This course focuses on the generation and development of ideas and objects to form a cohesive body of work. Students will lead their own explorations, technically and conceptually, while working toward a professional-level standard of output. Any or all ceramic processes may be used. Prerequisite: ARTS 3503 and ARTS 3523 and ARTS 3543 and ARTS 4503. May be repeated for up to 6 hours of degree credit.

ARTS 458V. Special Problems in Ceramics. 1-3 Hour.
Individual projects in ceramic techniques. Prerequisite: ARTS 3503 or ARTS 3523. May be repeated for up to 6 hours of degree credit.

ARTS 459V. Individual Instruction. 1-6 Hour.
Special projects on an arranged basis for advanced students in any area of art in which the catalog sequence of courses has been completed. May be repeated for up to 6 hours of degree credit.

ARTS 4663. Visual Design: Motion Design. 3 Hours.
In this course, students will explore motion graphic design as it combines 2D and 3D animation, typography, video footage photography and sound. The projects will explore elements of storytelling, moving compositions and animation principles that focus on Web delivery, using mainly Apple Final Cut Pro and Adobe After Effects. Prerequisite: ARTS 3363.

ARTS 469V. Special Problems in Interactive Design. 1-6 Hour.
Students work on special projects on an individual basis with instructor, exploring innovative interface design, in-depth projects potentially exploring solutions to and awareness of social issues, with various types of media, from DVD and digital video to Web and motion graphics. Cross-discipline collaboration is encouraged. Prerequisite: ARTS 4613 and ARTS 4623. May be repeated for up to 6 hours of degree credit.

ARTS 4823. Color Photography I. 3 Hours.
Introduction to color production. Color materials, techniques and theory. Direct reversal transparencies and prints, color negative processing and printing, and manipulation of color materials. Assignments, demonstrations, critiques, and lectures. Prerequisite: ARTS 3803.

ARTS 4833. Advanced Black and White Photography. 3 Hours.
Advanced black and white theory, practice and techniques including: Zone System, large format camera and studio lighting. Prerequisite: ARTS 3803.

ARTS 484V. Special Problems in Photography. 1-6 Hour.
Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). May be repeated for up to 6 hours of degree credit.

ARTS 4853. Documentary Photography. 3 Hours.
Culminating typography course, exploration of typography at an advanced level through a variety of projects. Projects may range from type design to type in motion to complex publication design. Exhibition of the utmost professional ideation, process, execution and craft expected. Prerequisite: ARTS 4323, ARTS 4343, and ARTS 4353 and Bachelor of Fine Arts in Graphic Design majors only.

ARTS 4883. Bookmaking. 3 Hours.
Introduction to the creation of unique, limited edition artist’s bookworks -- with emphasis on technical knowledge and conceptual understanding of the book form as a means of artistic expression.

ARTS 490VH. Honors Thesis in Studio Art. 1-6 Hour.
Special problems in studio art. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

ARTS 491V. Internships in Art. 1-3 Hour.
Credit for practical experience gained through internships in studio art, gallery practices and/or art education. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: Junior standing and art major. May be repeated for up to 6 hours of degree credit.
ARTS 4923. Professional Development. 3 Hours.
The creation and presentation of a portfolio of work in the student's area of concentration, accompanied by creation of relevant materials for successful professional practice. Art Education students may choose ARED 476V, Student Teaching, (12 credit hours) as a substitution. Prerequisite: Art majors only. Requires junior, senior or graduate standing.

ARTS 493V. Fine Arts Gallery Internship. 1-3 Hour.
Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media.

ARTS 494V. Graphic Design Internship. 1-6 Hour.
Credit for practical experience gained through internship in graphic design. Report required form intern and field supervisor on progress and significant accomplishments. 3 credit hours per semester. Prerequisite: Any 4000 level ARTS visual design course except ARTS 4343. May be repeated for up to 6 hours of degree credit.

ARTS 495V. Special Topics. 1-6 Hour.
May be offered in a subject not specifically covered by the courses otherwise listed. May be repeated for up to 6 hours of degree credit.

ARTS 4963. Introduction to Web Design. 3 Hours.
This course introduces students to design and coding for responsive web sites. Lessons include internet and web history, interactivity, usability and accessibility with an emphasis on basic design and standards-based hand-coding.

ARTS 498V. Senior Thesis. 1-6 Hour.
Senior thesis.

ARTS 5013. Graduate Drawing. 3 Hours.
Graduate level study of drawing materials and techniques. Prerequisite: Graduate standing.

ARTS 5913. Graduate Seminar in Studio Art. 3 Hours.
Special seminars at the graduate level in Studio Art. Subject matter changes depending on student interest and faculty expertise. Prerequisite: Admission to MFA program. May be repeated for up to 6 hours of degree credit.

ARTS 5923. MFA First Year Seminar. 3 Hours.
Introduction to graduate level study in art, including pedagogy related to teaching art at the college level. Topics to be covered include: development of research interests, critical thinking within studio practice, situating work in the contemporary context, expectations at the graduate level, and an introduction to techniques and theories of studio art education. Prerequisite: Admission to MFA program.

ARTS 5933. MFA Second Year Seminar. 3 Hours.
Preparation for a professional art practice. Examination of theoretical and practical aspects of career development for contemporary artists. Prerequisite: ARTS 5923.

ARTS 601V. Master of Fine Arts Exhibition. 1-6 Hour.
Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for making three acceptable slide sets of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy.

ARTS 602V. Graduate Drawing. 1-6 Hour.
Individual problems in drawing techniques. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6033. Graduate Drawing Studio. 3 Hours.
Intensive studio practice in drawing combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. May be repeated for up to 18 hours of degree credit.

ARTS 612V. Graduate Painting. 1-6 Hour.
Individual problems in painting techniques. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6133. Graduate Painting Studio. 3 Hours.
Intensive studio practice in painting combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. May be repeated for up to 18 hours of degree credit.

ARTS 622V. Graduate Sculpture. 1-6 Hour.
Individual problems in sculpture techniques. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6233. Graduate Sculpture Studio. 3 Hours.
Intensive studio practice in sculpture combined with reading, writing, and discussion of relevant contemporary issues in the field of sculpture and new media. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. May be repeated for up to 18 hours of degree credit.

ARTS 632V. Graduate Design. 1-6 Hour.
Individual problems in two and three dimensional design. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6333. Graduate Graphic Design Studio. 3 Hours.
Research-based studio which introduces students to design methods, focusing on an audience-centric process. This exploratory study will provide both artists and designers a broader perspective into creating work that strongly resonates with audiences. Through reading, writing, discussion, critique, and research, students will examine and question contemporary discourse. May be repeated for up to 18 hours of degree credit.

ARTS 642V. Graduate Printmaking. 1-6 Hour.
Individual problems in printmaking techniques. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6433. Graduate Printmaking Studio. 3 Hours.
Intensive studio practice in printmaking combined with reading, writing, and discussion of relevant contemporary issues in the fields of printmaking. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. May be repeated for up to 18 hours of degree credit.

ARTS 652V. Graduate Ceramics. 1-6 Hour.
Individual problems in ceramic techniques. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6533. Graduate Ceramics Studio. 3 Hours.
Discussion of contemporary ceramics issues in tandem with the development of a cohesive body of work. Students lead their own explorations, technically and conceptually, while working toward a professional standard of output. Includes regular critiques, both with the group and individually with the instructor. Any ceramic processes may be used. Prerequisite: MFA Studio Art Graduate Standing. May be repeated for up to 18 hours of degree credit.

ARTS 662V. Graduate Photography. 1-6 Hour.
Individual problems in photography. Prerequisite: Graduate standing. May be repeated for degree credit.

ARTS 6633. Graduate Photography Studio. 3 Hours.
Intensive studio practice with reading and discussion of contemporary issues in photography for MFA students. Prerequisite: Admission to MFA program in Art. May be repeated for up to 18 hours of degree credit.

ARTS 695V. Special Topics. 1-6 Hour.
Subject matter not covered in other courses. Prerequisite: Graduate standing. May be repeated for up to 12 hours of degree credit.
Art Education (ARED) Courses
ARED 3613. Public School Art I. 3 Hours.
Selection, preparation and use of instructional materials in elementary and secondary schools. For students seeking teaching certification in art. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323 and ARTS 2013.
ARED 3643. Teaching Art in Elementary Schools. 3 Hours.
Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613.
ARED 3643H. Honors Teaching Art in Elementary Schools. 3 Hours.
Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613. This course is equivalent to ARED 3643.
ARED 3653. Teaching Art in Secondary Schools. 3 Hours.
Methods and materials used in teaching secondary school art. Prerequisite: ARED 3603 or ARED 3613.
ARED 3653H. Honors Teaching Art in Secondary Schools. 3 Hours.
Methods and materials used in teaching secondary school art. Prerequisite: ARED 3603 or ARED 3613. This course is equivalent to ARED 3653.
ARED 4633. Individual Research in Art Education. 3 Hours.
Independent study in specific areas of art education. Prerequisite: 6 hours of art education.
ARED 476V. Student Teaching in Art. 6-12 Hour.
A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Successful completion of a criminal background check required before student can begin student teaching. Prerequisite: ARTBFA major.
ARED 490VH. Honors Thesis in Art Education. 1-6 Hour.
Special problems in Art Education. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.
ARED 4953. Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. May be repeated for up to 6 hours of degree credit.
ARED 4953H. Honors Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. May be repeated for up to 6 hours of degree credit. This course is equivalent to ARED 4953.
ARED 695V. Special Topics in Art Education. 1-6 Hour.
Subject matter not covered in regularly offered courses, and relating to art education. May be repeated for different topics. May be repeated for up to 12 hours of degree credit.

Art History (ARHS) Courses
ARHS 1003. Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003). 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, and slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. This course is equivalent to ARTS 1003.
ARHS 1003H. Honors Basic Course in the Arts: Art Lecture. 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. This course is equivalent to ARTS 1003.
ARHS 2913. Art History Survey I (ACTS Equivalency = ARTA 2003). 3 Hours.
Survey of art works from Stone Age through Medieval. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core.
ARHS 2923. Art History Survey II (ACTS Equivalency = ARTA 2103). 3 Hours.
Survey of art works from Renaissance to the present. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core.
ARHS 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in art).
ARHS 4413. Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913.
ARHS 4413H. Honors Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing.
ARHS 4423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913.
ARHS 4423H. Honors Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing.
ARHS 451V. Internship in Art History. 1-3 Hour.
Credit for practical experience gained through an internship in art history. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: 9 hours of ARHS courses. May be repeated for up to 6 hours of degree credit.
ARHS 4563. Pre-Columbian Art. 3 Hours.
An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content.
ARHS 4563H. Honors Pre-Columbian Art. 3 Hours.
An introduction to pre-Columbian art from Mexico (3000 BC - 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. This course is equivalent to ARHS 4563.

ARHS 4573. Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru.

ARHS 4573H. Honors Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. This course is equivalent to ARHS 4573.

ARHS 4733. Saint Peter’s and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923. This course is cross-listed with ARCH 4863.

ARHS 4733H. Honors Saint Peter’s and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923 and honors standing. This course is cross-listed with ARCH 4863, ARHS 4733.

ARHS 4743. Medieval Architecture. 3 Hours.
Traces the history of architecture in Western Europe from c. 300 - 1400. Focus is predominantly, though not exclusively, on the history of Christian architecture. Major architectural sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, Romanesque monastery, and Gothic cathedrals. Prerequisite: ARHS 2913 or ARCH 4433. This course is cross-listed with ARCH 4843.

ARHS 4743H. Honors Medieval Architecture. 3 Hours.
Traces the history of architecture in Western Europe from c. 300 - 1400. Focus is predominantly, though not exclusively, on the history of Christian architecture. Major architectural sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARHS 2913 or ARCH 4433. This course is cross-listed with ARHS 4743, ARCH 4843.

ARHS 4753. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. This course is cross-listed with ARCH 4853.

ARHS 4753H. Honors Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. This course is cross-listed with ARHS 4753, ARCH 4853.

ARHS 4763. Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework.

ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. This course is equivalent to ARHS 4763.

ARHS 4773. History of New Media Art. 3 Hours.
Examines the history of “new media” art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework.

ARHS 4773H. Honors History of New Media Art. 3 Hours.
Examines the history of “new media” art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923, honors standing and 3 hours of 3000 level and above art history coursework.

ARHS 4793. Making the Museum: History, Theory and Practice. 3 Hours.
Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. Prerequisite: Any 3 credit hour, 3000 level or higher art history course.

ARHS 4813. The History of Photography. 3 Hours.
Survey of photography from 1685 to present.

ARHS 4823. History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923.

ARHS 4833. Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913.

ARHS 4833H. Honors Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. This course is equivalent to ARHS 4833.

ARHS 4843. Medieval Art. 3 Hours.
Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913.

ARHS 4843H. Honors Medieval Art. 3 Hours.
Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. This course is equivalent to ARHS 4843.

ARHS 4853. Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923.
ARHS 4853H. Honors Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4853.

ARHS 4863. Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923.

ARHS 4863H. Honors Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4863.

ARHS 4873. Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923.

ARHS 4873H. Honors Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4873.

ARHS 4883. 18th and 19th Century European Art. 3 Hours.
Study of eighteenth- and nineteenth-century art and architecture in Europe. Prerequisite: ARHS 2923.

ARHS 4883H. Honors 18th and 19th Century European Art. 3 Hours.
Study of eighteenth and nineteenth century art and architecture in Europe. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4883.

ARHS 4893. 20th Century European Art. 3 Hours.
Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923.

ARHS 4893H. Honors 20th Century European Art. 3 Hours.
Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4893.

ARHS 490VH. Honors Thesis in Art History. 1-6 Hour.
Special problems in art history. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

ARHS 4913. American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923.

ARHS 4913H. Honors American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4913.

ARHS 4923. American Art 1860-1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923.

ARHS 4923H. Honors American Art 1860 - 1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923.
This course is equivalent to ARHS 4923.

ARHS 4933. Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923.

ARHS 4933H. Honors Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923 and ARHS 4923.
This course is equivalent to ARHS 4933.

ARHS 4943. Seminar in Art Criticism. 3 Hours.
Study and problems in the criticism of art forms and styles. Prerequisite: 9 hours of art history.

ARHS 4943H. Honors Seminar in Art Criticism. 3 Hours.
Study and problems in the criticism of art forms and styles. Prerequisite: 9 hours of art history.
This course is equivalent to ARHS 4943.

ARHS 4953. Art Museum Studies. 3 Hours.
A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing.

ARHS 4963. Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor.

ARHS 4963H. Honors Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor.
This course is equivalent to ARHS 4963.

ARHS 4973. Seminar in Art History. 3 Hours.
Special studies of periods and styles of art. Prerequisite: 9 hours of Art History. May be repeated for up to 6 hours of degree credit.

ARHS 4983. Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. May be repeated for up to 9 hours of degree credit.

ARHS 4983H. Honors Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. May be repeated for up to 9 hours of degree credit.
This course is equivalent to ARHS 4983.

ARHS 4993. Special Topics in Modern Art. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. May be repeated for up to 9 hours of degree credit.

ARHS 5793. Making the Museum: History, Theory and Practice. 3 Hours.
Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions.

ARHS 6413. Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces.

ARHS 6423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces.
ARHS 6933. Graduate Research In Art History. 3 Hours.
Independent study in specific areas of art history and criticism.

ARHS 6943. Seminar: Critical Thought in Art. 3 Hours.
Explore topics of concern to the studio artist involving underlying concepts and purposes of art as well as models and methods for the analysis of art. Course based on discussions of selected readings, prepared papers and seminar reports. Prerequisite: graduate standing. May be repeated for up to 3 hours of degree credit.

**Arts and Sciences (ARSC)**

**Courses**

**ARSC 1001. Fulbright Perspectives. 1 Hour.**
Open to incoming freshmen and transfer students participating in the university's First Year Experience. Available for credit only. Prerequisite: New freshman or freshman transfer student and a ARSC college major.

**ARSC 1201. Inquiry Approaches to Teaching: UTeach Step I. 1 Hour.**
For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. This course is cross-listed with EDHP 1201.

**ARSC 1221. Inquiry-Based Lesson Design: UTeach Step II. 1 Hour.**
For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. Prerequisite: ARSC 1201 or EDHP 1201.

**ARSC 1600. Undergraduate Research Assistant. 0 Hours.**
Undergraduate research.

**ARSC 2303. Perspectives on Science and Mathematics. 3 Hours.**
A course for prospective science and mathematics teachers exploring topics and episodes in the history and philosophy of science and mathematics, including whether mathematics is itself a science. Sciences include biology, physics, geology, astronomy, and chemistry. The course traces development of key ideas and seeks to correct common myths. Prerequisite: ARSC 1201 and ARSC 1221.

**ARSC 2600. Undergraduate Research Assistant. 0 Hours.**
Undergraduate research.

**ARSC 3013. Fulbright College Career Connections. 3 Hours.**
This course teaches students how to capitalize on their strengths, skills, experience, professional connections, and academic discipline. Key components of this course are guest lectures from on-campus and off-campus professionals, interactive group activities to practice professional skills, and the creation of an online portfolio. Prerequisite: Sophomore standing.

**ARSC 310V. Cooperative Education. 1-4 Hour.**
Required of participants in cooperative education work assignments. Available for credit only. May be repeated for up to 4 hours of degree credit.

**ARSC 3600. Undergraduate Research Assistant. 0 Hours.**
Undergraduate research.

**ARSC 4600. Undergraduate Research Assistant. 0 Hours.**
Undergraduate research.

**Asian Studies (AIST)**

**Courses**

**AIST 4003. Asian Studies Colloquium. 3 Hours.**
An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.

**AIST 4003H. Honors Asian Studies Colloquium. 3 Hours.**
An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit. This course is equivalent to AIST 4003.

**ASTR 2001L. Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab). 1 Hour.**
Daytime and nighttime observing with telescopes and indoor exercises on selected topics. Pre- or Corequisite: ASTR 2003.

**ASTR 2001M. Honors Survey of the Universe Laboratory. 1 Hour.**
An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the sun, normal stars and interstellar medium, birth and death of stars, neutron stars, and black holes. Pre- or Corequisite: ASTR 2003 or ASTR 2003H.
This course is equivalent to ASTR 2001L.

**ASTR 2003. Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture). 3 Hours.**
An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001L or ASTR 2001M.

**ASTR 2003H. Honors Survey of the Universe. 3 Hours.**
An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001M.
This course is equivalent to ASTR 2003.

**ASTR 301V. Observational Astronomy. 1-3 Hour.**
Individual experimental or observational problems studied with small telescopes, cameras, and other basic equipment. No credit is given toward a B.S. degree in physics. Prerequisite: ASTR 2003.

**ASTR 4033. Astrophysics I: Stars and Planetary Systems. 3 Hours.**
An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. Prerequisite: PHYS 3613 or CHEM 3504.

**ASTR 4043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours.**
An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 4033.

**ASTR 4073. Cosmology. 3 Hours.**
An introduction to modern Big Bang cosmology. The course covers the origin, evolution, and structure of the Universe, based on the Theory of Relativity. Prerequisite: PHYS 3613 or CHEM 3504.

**ASTR 5033. Astrophysics I: Stars and Planetary Systems. 3 Hours.**
An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems.

**ASTR 5043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours.**
An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 5033 or SPAC 5033.
Athletic Training (ATTR)

Courses

ATTR 5213. Athletic Training Clinical I - Application of Athletic Preventive Devices. 3 Hours.
This course will serve as an introduction to the athletic training clinical program. Procedures and policies of the clinical program and application of athletic preventive devices will be included as well. Prerequisite: Admission to the graduate program in athletic training.

ATTR 5223. Athletic Training Clinical II - Emergency Procedures. 3 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce and instruct new emergency procedures. Prerequisite: ATTR 5213.

ATTR 5232. Athletic Training Clinical III - Lower Extremity Evaluation. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of the lower extremities, head, neck, and posture. Prerequisite: ATTR 5232.

ATTR 5242. Athletic Training Clinical IV - Evaluation of Upper Extremity. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic exercise and rehabilitation.

ATTR 5272. Athletic Training Clinical VI - Athletic Training Seminar. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of gait, lower extremity, and spine/pelvis. Prerequisite: ATTR 5223.

ATTR 5262. Athletic Training Clinical V - Rehabilitation Lab. 2 Hours.
This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic exercise and rehabilitation.

ATTR 5313. Clinical Anatomy for Athletic Trainers. 3 Hours.
Instruction of human anatomy for the athletic training professional using lecture, diagrams, textbook readings, and demonstrations. Focus will be placed on anatomy of structures related to athletic injuries; and can be used in the evaluation, treatment, and rehabilitation of injuries in a variety of athletic training settings. Prerequisite: Acceptance into the graduate athletic training program or instructor consent.

ATTR 5363. Evaluation Techniques of Athletic Injuries - Upper Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: Admission to graduate athletic training program.

ATTR 5373. Evaluation Techniques of Athletic Injuries - Lower Extremity. 3 Hours.
Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: Admission to graduate athletic training program.

ATTR 5403. Pathophysiology and Treatment I. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: Admission to the athletic training program.

ATTR 5413. Pathophysiology and Treatment II. 3 Hours.
This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: ATTR 5403.

ATTR 5453. Therapeutic Modalities in Athletic Training. 3 Hours.
Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications (and contraindications), and clinical application. Prerequisite: Admission to graduate athletic training program.

ATTR 5463. Therapeutic Exercise and Rehabilitation of Athletic Injuries. 3 Hours.
A systematic approach to exercise program development, techniques, indications and contraindications of exercise, and progression as related to athletic injury, prevention, and return to play guidelines. Prerequisite: Admission to graduate athletic training program.

ATTR 5473. Administration in Athletic Training. 3 Hours.
Administrative components of athletic training. Basic concepts of legal liability, leadership and management principles, financial management, day to day scheduling and supervision, maintenance, and general administration. Prerequisite: Admission to graduate athletic training program.

ATTR 5483. Medical Conditions in Athletic Training. 3 Hours.
This course will provide a collection of knowledge, skills, and values that the entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions and disabilities of athletes and others involved in physical activity. Prerequisite: Admission to the graduate athletic training program or permission of instructor.

ATTR 5493. Evidence-Based Practice in Athletic Training. 3 Hours.
In-depth analysis of current literature, research, case studies, and musculoskeletal evaluation and rehabilitation directed toward musculoskeletal injuries of the physically active. Prerequisite: Admission into the Athletic Training Education Program.

Biological Engineering (BENG)

Courses

BENG 2632. Biological Engineering Design Studio. 2 Hours.
Application of the engineering design process to projects involving living systems. Projects are team-based open-ended design with hands-on construction and testing of design prototypes. Emphasis is placed on understanding, quantifying and controlling complex interacting living systems involving humans, animals, plants and microbes with the goal of creating economically and ecologically sustainable systems. 4 hours of design studio per week. Pre- or Corequisite: PHYS 2054 and BIOL 1543 and BIOL 1541L, and (GNEG 1111 or GNEG 1103).

BENG 2643. Biological Engineering Methods I. 3 Hours.
BENG 3113. Measurement and Control for Biological Systems. 3 Hours.
Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074.

BENG 3113H. Honors Measurement and Control for Biological Systems. 3 Hours.
Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074 and honors candidacy.

This course is equivalent to BENG 3113.

BENG 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.
Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward addressing agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. This course is cross-listed with CSES 3603.

BENG 3653. Global Bio-Energy Engineering. 3 Hours.
Global energy sources with a focus on renewable energy, solar and biomass derived fuels. Biomass energy production from crops and organic residues or waste products. Conversion of biomass to usable fuels. Utilization of renewable energy in society. Includes detailed systems analyses to examine inputs, efficiencies, usable outputs and by-products. Systems design to select and integrate components which meet client needs while maximizing sustainable global impacts. Three hours of lecture per week. Pre- or Corequisite: MEEG 2403 or CHEG 2313.

BENG 3663. Biological Engineering Methods II. 3 Hours.
Modeling biological processes to predict system behavior as part of the design process. Development and use of spreadsheets and script programming code to represent biological phenomena and processes. Introduction to experimental design as applied to biological processes, including data collection and analysis, and elementary statistics. Use of engineering economics to aid comparisons of alternatives. Analysis of engineering designs and management practices to best meet the needs of society and the client in areas of sustainable water, food and energy systems. Lecture 3 hours per week. Prerequisite: PHYS 2054 and MATH 2564.

BENG 3723. Unit Operations in Biological Engineering. 3 Hours.
Design of basic unit operations typical of biological engineering practice; unit operations include pump-pipe, fan-duct, moist air (psychrometric) processes (cool/heater/humidifier/dryer), air mixing, aeration, and refrigeration; unit operations design will account for unique constraints imposed by biological systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: (MEEG 2403 or CHEG 2313) and (CVEG 3213 or CHEG 2133 or MEEG 3503).

BENG 3733. Transport Phenomena in Biological Systems. 3 Hours.
Basic principles governing transport of energy and mass. Estimating transfer of energy (heat) through solid bodies and liquid/gas boundary layers through conduction, convection, and radiation. Modeling the rates at which biological reactions occur (kinetics). Estimating the transfer of diffusing mass (gas or liquid) through solid bodies and liquid/gas boundary layers, including processes such as drying and oxygen diffusion. Three hours lecture per week. Pre- or Corequisite: (CVEG 3213 or MEEG 3503 or CHEG 2133.) Prerequisite: (MEEG 2403 or CHEG 2313) and MATH 2584.

BENG 4123. Biosensors & Bioinstrumentation. 3 Hours.
Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113.

BENG 450V. Special Problems. 1-4 Hour.
Selected problems in biological engineering are pursued in detail. Prerequisite: Senior standing. May be repeated for up to 4 hours of degree credit.

BENG 451VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Honors candidacy.

BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.
Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. May be repeated for up to 8 hours of degree credit.

BENG 4663. Sustainable Biosystems Designs. 3 Hours.
Process and methodologies associated with measuring, assessing, and designing sustainable systems in water, energy and food. Quantitatively rigorous methodology for life cycle analysis (LCA) for inventory, assessment and impact analyses. Use of other systems analyses and process control theory to evaluate and design sustainable systems. Application of the methods to a project to gain experience in defining, quantifying and utilizing sustainable metrics. Three hours of lecture per week. Prerequisite: BENG 3653.

BENG 4703. Biotechnology Engineering. 3 Hours.
Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Prerequisite: BENG 2632. Corequisite: Lab component.

BENG 4743. Food and Bio-Product Systems Engineering. 3 Hours.
Sustainable bio-product engineering through biosystem design, analysis, modeling, control, and optimization. Life cycle phases for bio-products (food, fiber, feed, and fuel). System analysis of inputs and outputs of energy, water and mass for the purpose of producing and processing biomass for human uses. Advanced bioprocess design topics to utilize enzymes, cells, tissues and organisms to create bio-products and methods for deactivating biological agents to preserve the quality and safety of food and other bio-products. Three hours lecture per week. Prerequisite: BENG 3723 and BENG 3733.

BENG 4753L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133. This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.
BENG 4753M. Honors Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, CHEG 4153L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133. This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BENG 4812. Senior Biological Engineering Design I. 2 Hours.
Initiation of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Practice in following the design process, including the definition of design objectives and constraints, establishing functions and performance criteria, generating alternatives and evaluating alternatives through analysis, modeling and prototype testing; exploring relevant design considerations including performance, efficiency, costs, environmental impacts, sustainability and stewardship, safety and ethics. Developing analytic capability; and practicing design optimization to find best alternative for the client. Lecture 1 hour, laboratory 3 hours per week. Prerequisite: Instructor consent. Corequisite: Lab component.

BENG 4823. Senior Biological Engineering Design II. 3 Hours.
Completion of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Focus on building of prototypes or models, system optimization, evaluation and improvement. Final design details packaged to meet the needs of the client. Interaction with appropriate persons from other disciplines. Written and oral reporting. Communications with peers, supervisor, clients and the public. Lecture 1 hour per week, two 2-hour lab periods per week. Prerequisite: BENG 4812. Corequisite: Lab component.

BENG 4831. Biological Engineering Professionalism. 1 Hour.
Preparation to be job-ready, employable and successful in transition to a professional career and further study in Biological Engineering. Introduction to job and graduate study searches. Professional and ethical responsibilities; professional registration. Conflict, change and project management. Effective communications and interactions with supervisors, peers, clients, and stakeholders. Two hour discussion section per week. Prerequisite: Senior standing.

BENG 4933. Sustainable Watershed Engineering. 3 Hours.
Provides students with expertise in using advanced tools in watershed monitoring, assessment, and design. Builds on core competencies in hydrology and hydraulics to allow student to evaluate water used by sector in water management regions; evaluate and quantify water demands by sector with emphasis on irrigation; develop risk-based simulations of hydrologic processes, including precipitation, evapotranspiration, infiltration, runoff, and stream flow; quantify and simulate constituent loading to watersheds using GIS-based models, and understand the applications of these methods in water resource management policy. Three hours lecture per week. Prerequisite: CVEG 3223.

BENG 500V. Advanced Topics in Biological Engineering. 1-6 Hour.
Special problems in fundamental and applied research. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

BENG 5103. Advanced Instrumentation in Biological Engineering. 3 Hours.
Applications of advanced instrumentation in biological systems. Emphasis on updated sensing and transducing technologies, data acquisition and analytical instruments. Lecture 2 hours, lab 3 hours per week. Corequisite: Lab component. Prerequisite: BENG 3113.

BENG 5253. Bio-Mems. 3 Hours.
Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hour per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. This course is cross-listed with MEEG 5253.

BENG 5303. Fundamentals of Biomass Conversion. 3 Hours.
Web-based overview of the technology involved in the conversion of biomass to energy, including associated sustainability issues. Overview of biomass structure and chemical composition; biochemical and thermochemical conversion platforms; issues, such as energy crop production related to water consumption and soil conservation. Further topics include: biomass chemistry, logistics and resources; biological processes; and thermochemical processes. Two web-based lectures/meetings per week. Prerequisite: Graduate standing or instructor consent.

BENG 5313. Fundamentals of Bioprocessing. 3 Hours.
This course covers the fundamentals of mass and energy balances, fluid dynamics, heat and mass transfer, as applied to Bioprocessing. The microbial growth, kinetics and fermenter operation as applicable to Bioprocessing will be covered in this course. Industrial Bioprocessing case studies that involve the integration of the course contents will be discussed. This course is offered on-line in collaboration with the AG*IDEA consortium of land grant universities. The principal instructor will be a non-UA faculty member at a participating university. Prerequisite: MATH 2554, CHEM 3813, and PHYS 2054.

BENG 5323. Bioseparations. 3 Hours.
Study of separations important in food and biochemical engineering such as leaching, extraction, expression, absorption, ion exchange, filtration, centrifugation, membrane separation, and chromatographic separations. This course is offered on-line in collaboration with the AG*IDEA consortium of land grant universities. The principal instructor will be a non-UA faculty member at a participating university. Prerequisite: Instructor Consent.

BENG 5333. Biochemical Engineering. 3 Hours.
The analysis and design of biochemical processing systems with emphasis on fermentation kinetics, continuous fermentations, aeration, agitation, scale up, sterilization, and control. This course is offered on-line in collaboration with the AG*IDEA consortium of land grant universities. The principal instructor will be a non-UA faculty member at a participating university. Prerequisite: Instructor Consent Required.

BENG 5343. Advanced Biomass Thermochemical Conversion. 3 Hours.
Advanced study, evaluation, and application of thermochemical conversion pathways in biofuel production. Specific topics include biomass gasification, pyrolysis, liquefaction, and heterogeneous catalysts. This course is offered on-line in collaboration with the AG*IDEA consortium of land grant universities. The principal instructor will be a non-UA faculty member at a participating university. Prerequisite: Instructor Consent.

BENG 5351. Sustainability Seminar. 1 Hour.
Topics in environmental sustainability, green engineering, life cycle analysis, sustainable development and sustainability science. This course is offered on-line in collaboration with the AG*IDEA consortium of land grant universities. The principal instructor will be a non-UA faculty member at a participating university. Prerequisite: CHEM 1123.
BENG 5613. Simulation Modeling of Biological Systems. 3 Hours. Application of computer modeling and simulation of discrete-event and continuous-time systems to solve biological and agricultural engineering problems. Philosophy and ethics of representing complex processes in simplified form. Deterministic and stochastic modeling of complex systems, algorithm development, application limits, and simulation interpretation. Emphasis on calibration, validation and testing of biological systems models for the purposes of system optimization, resource allocation, real-time control and/or conceptual understanding. Prerequisite: (AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003 or INEG 2313.

BENG 5623. Life Cycle Assessment. 3 Hours. This course will examine the process and methodologies associated with life cycle analysis (LCA). The course will explore the quantitatively rigorous methodology for life cycle inventory (LCI), LCA and life cycle impact assessment (LCIA). This course is offered on-line. The principal instructor will be a UA faculty member.

BENG 5633. Linkages Among Technology, Economics and Societal Values. 3 Hours. Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society’s current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society’s goal of achieving sustainable prosperity and well-being in the foreseeable future. Prerequisite: Graduate standing or instructor permission. This course is cross-listed with OMGT 5633.

BENG 5703. Design and Analysis of Experiments for Engineering Research. 3 Hours. Principles of planning and design of experiments for engineering research. Propagation of experimental error. Improving precision of experiments. Analysis of experimental data for optimal design and control of engineering systems using computer techniques. Students must have an introductory background in statistics. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component.

BENG 5733. Advanced Biotechnology Engineering. 3 Hours. Applications of the principles of bioprocess/biochemical engineering to microbiological and biomedical problems. Topics include applied enzymology, metabolic engineering, molecular genetics and control, and bioinformatics and nanobiotechnology in addition to classical applied enzyme and cell-growth kinetics and advanced bioreactor design. Prerequisite: BENG 3733 or BENG 4703 or BENG 5743 or equivalent.

BENG 5743. Biotechnology Engineering. 3 Hours. Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Students may not earn credit for both BENG 5743 and BENG 4703. Prerequisite: Graduate standing. Corequisite: Lab component.

BENG 5801. Graduate Seminar. 1 Hour. Reports presented by graduate students on topics dealing with current research in biological engineering. Prerequisite: Graduate standing.

BENG 5923. Nonpoint Source Pollution Control and Modeling. 3 Hours. Control of hydrologic, meteorologic, and land use factors on nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation, and uncertainty analysis. Prerequisite: CVEG 3223.

BENG 5953. Ecological Engineering Design. 3 Hours. Design of low impact development techniques to enhance ecological services, reduce peak runoff, and capture sediments, nutrients and other pollutants resulting from urban development. Techniques may include: bio-swales, retention basins, filter strips. Design of sustainable ecological processes for the treatment and utilization of wastes/residues. Techniques may include: direct land application to soils/crops, composting systems, lagoons and constructed wetlands. Design goals include optimization of ecological services to maintain designated uses of land, water and air; including enhancement of habitat for wildlife and recreation, and the discovery of economically viable methods for co-existence of urban and agricultural land uses. Lecture 3 hours per week. Students may not earn credit for both BENG 5953 and BENG 4923.

BENG 600V. Master's Thesis. 1-6 Hour. Graduate standing required for enrollment. May be repeated for degree credit.

BENG 700V. Doctoral Dissertation. 1-18 Hour. Candidacy is required for enrollment. May be repeated for degree credit.
BIOL 1543. Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture). 3 Hours.
Principles that unify biology with emphasis on scientific study that demonstrates how all organisms are the product of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541L.

BIOL 1543H. Honors Principles of Biology. 3 Hours.
This course is designed for the well prepared student in Honors program. It focuses on the principles that unify the science of biology. Students will be exposed to how scientific principles have been used to demonstrate that all organisms are the products of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541M or BIOL 1541L. This course is equivalent to BIOL 1543.

BIOL 1584. Biology for Majors. 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre- or Corequisite: CHEM 1103 or CHEM 1213.

BIOL 1584H. Honors Biology for Majors. 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre or Corequisite: CHEM 1103 or CHEM 1213. This course is equivalent to BIOL 1584.

BIOL 1601L. Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab). 1 Hour.
(Formerly ZOOL 1611L) Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603.

BIOL 1601M. Honors Principles of Zoology Laboratory. 1 Hour.
(Formerly ZOOL 1611M) Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. This course is equivalent to BIOL 1601L.

(Formerly ZOOL 1613) Introduction to zoological principles relating to cells, organ systems, development, genetics, ecology, and animal phyla. Corequisite: BIOL 1601L or BIOL 1601M. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L.

BIOL 1611L. Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab). 1 Hour.
(Formerly BOTY 1611L) Laboratory exercises illustrating plant structure, physiology, genetics, ecology, and animal phyla. Corequisite: BIOL 1613.

BIOL 1611M. Honors Plant Biology Laboratory. 1 Hour.
(Formerly BOTY 1611M) Pre- or Corequisite: BIOL 1613. This course is equivalent to BIOL 1611L.

BIOL 1613. Plant Biology (ACTS Equivalency = BIOL 1034 Lecture). 3 Hours.
(Formerly BOTY 1613) Consideration of basic flowering plant structure, growth, development, physiology, genetics, ecology, and a brief survey of other plant groups. Lecture 3 hours per week. BIOL 1611L is recommended as a corequisite and both are required for partial fulfillment of the Fulbright College natural sciences requirement. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L.

BIOL 2011L. General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab). 1 Hour.

BIOL 2011M. Honors General Microbiology Laboratory. 1 Hour.
Techniques for handling microorganisms. Does not count towards BS in Biology. Corequisite: BIOL 2013. This course is equivalent to BIOL 2011L.

Basic concepts of microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Does not count towards BS in Biology. Corequisite: BIOL 2011L. Prerequisite: (BIOL 1543 and BIOL 1541L or BIOL 1584) and (CHEM 1073 and CHEM 1071L or CHEM 1103 or CHEM 1123 and CHEM 1121L or CHEM 1213 and CHEM 1211L).

BIOL 2211L. Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab). 1 Hour.
(Formerly ZOOL 2211L) Exercises include experiments on osmosis, reflexes, senses, muscle, cardiovascular system, ventilation, metabolism, renal function, etc. Data collection, analysis, and report writing. Does not satisfy the Fulbright College writing requirement. Does not count toward BS in Biology. Corequisite: BIOL 2213.

BIOL 2213. Human Physiology (ACTS Equivalency = BIOL 2414 Lecture). 3 Hours.
(Formerly ZOOL 2213) Fundamental concepts of physiology with emphasis in the human. Does not count toward BS in Biology. Corequisite: BIOL 2211L. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1103) or (CHEM 1123 and CHEM 1121L) and MATH 1203.

BIOL 2321L. General Genetics Laboratory. 1 Hour.
Analysis of genetic problems and experiments with emphasis on “hands-on” experience with a variety of organisms. May require time outside laboratory period. Laboratory 3 hours per week. Pre- or Corequisite: BIOL 2323.

BIOL 2323. General Genetics. 3 Hours.
Surveys of Mendelian, molecular, and population mechanisms of inheritance and gene expression in prokaryotes and eukaryotes. Lecture 3 hours per week. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and (CHEM 1123 and CHEM 1121L or CHEM 1223 and 1221L) and (MATH 1203 or STAT 2023 or equivalent).

BIOL 2441L. Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab). 1 Hour.
Laboratory 3 hours exercises in mammalian anatomy. Cannot be taken without prior credit in BIOL 2443 or concurrent enrollment in BIOL 2443. Does not count toward BS in Biology. Corequisite: BIOL 2443.

BIOL 2443. Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture). 3 Hours.
Description of human body as a series of organ systems and their interrelationships. Does not count towards BS in Biology. Corequisite: BIOL 2441L. Prerequisite: Four hours of biological sciences.

BIOL 2531L. Cell Biology Laboratory. 1 Hour.
Introduction to methods and techniques used in Cell Biology research. Laboratory experiences to highlight topics covered in BIOL 2533. Pre- or Corequisite: BIOL 2533.

BIOL 2533. Cell Biology. 3 Hours.
Introduction to cell structure, cell processes, biological polymers, energetics, and diversity. An introduction to biochemistry and cell chemistry. Pre- or Corequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or (CHEM 1133 and CHEM 1131L) or equivalent. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L.

BIOL 3004. Principles of Plant Pathology. 4 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Corequisite: Lab component. This course is cross-listed with PLPA 3004.
BIOL 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to BIOL 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or corequisite: BIOL 3013.

BIOL 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab BIOL 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. This course is cross-listed with ENTO 3013.

BIOL 3023. Evolutionary Biology. 3 Hours.
An introduction to the mechanisms and patterns of evolutionary change. Seeks to develop logical, scientific skills and to apply them in understanding how life has changed during the history of the earth. Corequisite: Drill component. Prerequisite: (BIOL 1584 or BIOL 1543, BIOL 1541L) and BIOL 2323.

BIOL 3123. Prokaryote Biology. 3 Hours.
An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533.

BIOL 3123H. Honors Prokaryote Biology. 3 Hours.
An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. This course is equivalent to BIOL 3123.

BIOL 3273. UAt each Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221. This course is cross-listed with PHYS 3273, CHEM 3273.

BIOL 3273H. Honors UAt each Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221, junior standing and honors. This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

BIOL 3404. Comparative Vertebrate Morphology. 4 Hours.
Anatomy of selected vertebrate animals with emphasis upon homologous structures in various animal groups. The recommended anatomy course for Biology BS majors. Lecture 2 or 3 hours, laboratory 4 or 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L.

BIOL 3861L. General Ecology Laboratory. 1 Hour.
General ecology lab. Pre- or Corequisite: BIOL 3863.

BIOL 3863. General Ecology. 3 Hours.
Ecological principles and concepts; environmental factors and interactions that determine distribution and abundance of organisms. Prerequisite: 7 hours of biological science.

BIOL 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in biological sciences). May be repeated for degree credit.

BIOL 4003. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123.

BIOL 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. This course is cross-listed with ENTO 4013.

BIOL 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. This course is cross-listed with ENTO 4024.

BIOL 4053. Insect Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. This course is cross-listed with ENTO 4053.

BIOL 4104. Taxonomy of Flowering Plants. 4 Hours.
Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023.

BIOL 4114. Dendrology. 4 Hours.
Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Prerequisite: BIOL 3863.

BIOL 4122. Food Microbiology. 2 Hours.
The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011 or BIOL 2533. This course is cross-listed with FDSC 4122.

BIOL 4133. Plant Disease Control. 3 Hours.
Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3004. This course is cross-listed with PLPA 4223.

BIOL 4143. Advanced Methods in Microscopy. 3 Hours.
Stand alone course on laboratory methods course emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: BIOL 2533 and BIOL 2531L. May be repeated for up to 6 hours of degree credit.

BIOL 4153. Biology of Global Change. 3 Hours.
Covers impact of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4252. Prerequisite: BIOL 1543 and BIOL 1541L. This course is equivalent to BIOL 4154.

BIOL 4154H. Honors Biology of Global Change. 4 Hours.
Covers impact of global change on sustainability and adaptability of biological systems. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and junior standing. This course is equivalent to BIOL 4154.
BIOL 4163. Dynamic Models in Biology. 3 Hours.
Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Prerequisite: BIOL 2533. This course is cross-listed with MATH 4163.

BIOL 4174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component and drill. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent), and Junior standing.

BIOL 4213. Biological Regulation and Subcellular Communication. 3 Hours.
Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL 4233. Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323.

BIOL 4233H. Honors Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. This course is equivalent to BIOL 4233.

BIOL 4234. Comparative Physiology. 4 Hours.
Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M).

BIOL 4252. Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L.

BIOL 4252H. Honors Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. This course is equivalent to BIOL 4252.

BIOL 4263. Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033.

BIOL 4263H. Honors Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. This course is equivalent to BIOL 4263.

BIOL 4273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes as all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. Prerequisite: BIOL 2533 or equivalent.

BIOL 4303. Plant Physiology. 3 Hours.
An introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: BIOL 2533 or CHEM 3813 or CHEM 5843.

BIOL 4313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3611L.

BIOL 4313H. Honors Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3611L. This course is equivalent to BIOL 4313.

BIOL 4323. Comparative Neurobiology. 3 Hours.
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: BIOL 2323 and BIOL 2533 or equivalent.

BIOL 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. This course is cross-listed with PLPA 4333.

BIOL 4353. Ecological Genetics/Genomics. 3 Hours.
Analysis of the genetics of natural and laboratory populations with emphasis on evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L and MATH 2554 and STAT 2023 or equivalents.

BIOL 4404. Comparative Botany. 4 Hours.
A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL 4424. Mycology. 4 Hours.
Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL 4433. Principles of Evolution. 3 Hours.
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863.

BIOL 4463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234 and its lab component.

BIOL 4511L. Population Ecology Laboratory. 1 Hour.
Population Ecology Lab. Pre- or Corequisite: BIOL 4513.

BIOL 4513. Population Ecology. 3 Hours.
Survey of theoretical and applied aspects of population processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Prerequisite: BIOL 3863.
BIOL 4523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of
dynamics relationships among plants and their environment. To become familiar with
the literature of plant ecology, and interpretation and critique of ecological research.
Prerequisite: BIOL 3863.

BIOL 4543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the
embryonic and postembryonic development of animals. Prerequisite: BIOL 2533 and
BIOL 2323.

BIOL 4554. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts of mechanisms of development emphasizing the
experimental approach. Lecture 3 hours, laboratory 3 hours per week. Students
may not receive degree credit for both BIOL 4543 and BIOL 4554. Corequisite: Lab
component. Prerequisite: BIOL 2533 and BIOL 2323 or graduate standing.

BIOL 4563. Cancer Biology. 3 Hours.
An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. May
be repeated for up to 6 hours of degree credit.

BIOL 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order Primates. This course considers the
comparative anatomy, behavioral ecology and paleontology of our nearest living
relatives. Prerequisite: BIOL 3023 or ANTH 1013.
This course is cross-listed with ANTH 4613.

BIOL 4634. Wetlands Ecology and Management. 4 Hours.
To familiarize students with the ecology and management of wetlands. Students
will be exposed to the characteristics of wetlands, the environmental factors that
produce wetland types, and the management techniques used to meet desired
wetland goals. Primary lecture topics will include: wetland definition, wetlands of the
world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants,
wetland plant adaptations, wetland wildlife, wetland wildlife adaptations, wetland
ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3
hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL 4693. Forest Ecology. 3 Hours.
Introduction to the various biological, ecological and historical aspects of forest
communities, with particular emphasis on the forests of the central and southeastern
United States. Prerequisite: BIOL 3863.

BIOL 4703. Mechanisms of Pathogenesis. 3 Hours.
A survey of the events causing human disease at the molecular, cellular and genetic
levels. Seeks to develop an appreciation that both the tricks pathogens use and the
body’s own defenses contribute to pathology. Prerequisite: BIOL 2533.

BIOL 4703H. Honors Mechanisms of Pathogenesis. 3 Hours.
A survey of the events causing human disease at the molecular, cellular and genetic
levels. Seeks to develop an appreciation that both the tricks pathogens use and the
body’s own defenses contribute to pathology. Prerequisite: BIOL 2533.
This course is equivalent to BIOL 4703.

BIOL 4711L. Basic Immunology Laboratory. 1 Hour.
Basic immunology laboratory. Corequisite: BIOL 4713.

BIOL 4713. Basic Immunology. 3 Hours.
(Formerly MBIO 4714) A general overview of immunity with emphasis on the
underlying cellular, molecular, and genetic events, and discussions of more
specialized issues in immunology, such as disease states involving the immune
system, and other interesting problems in modern immunology. Lecture 2 hours,
laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533.

BIOL 4713H. Honors Basic Immunology. 3 Hours.
A general overview of Immunity with emphasis on the underlying cellular, molecular,
and genetic events, and discussions of more specialized issues in Immunology, such
as disease states involving the Immune system, and other interesting problems in
modern Immunology. Prerequisite: BIOL 2323 and BIOL 2533.
This course is equivalent to BIOL 4713.

BIOL 4724. Protistology. 4 Hours.
The biology of eukaryotes other than animals, land plants, and fungi with emphasis
on morphology and modern approaches to phylogenetic systematics. Three
hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab
component. Prerequisite: BIOL 2533 and BIOL 2323.

BIOL 4734. Wildlife Management Techniques. 4 Hours.
To familiarize students with techniques used in the management of wildlife
populations. Students will be exposed to field methods, approaches to data analysis,
experimental design, and how to write a scientific paper. Management applications
will be emphasized. Lecture 3 hours, Laboratory 3 hours per week. Corequisite: Lab
component. Prerequisite: BIOL 3863.

BIOL 4744. Fish Biology. 4 Hours.
Morphology, classification, life history, population dynamics, and natural history
of fishes and fish-like vertebrates. Lecture 3 hours, laboratory 3 hours per week.
Corequisite: Lab component. Prerequisite: 12 hours of biological science.

BIOL 4753. General Virology. 3 Hours.
An introduction to viral life-cycles, structure, and host cell interactions. Emphasis
placed on molecular and biochemical aspects of virology. Two hour lecture and one
hour discussion. Prerequisite: BIOL 2533 and BIOL 2323.

BIOL 4763. Ornithology. 3 Hours.
Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture,
laboratory, and field work. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL 4774. Biometry. 4 Hours.
Students learn biological statistics and experimental design by actually designing
experiments and analyzing data, as well as through lecture, discussion, reading,
writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week.
Corequisite: Lab component. Prerequisite: STAT 2023 or equivalent, BIOL 3863.

BIOL 4783. Mammalogy. 3 Hours.
Lectures and laboratory dealing with classification, morphology, distribution, ecology,
behavior, and physiology of mammals. Two hours lecture, 4 hours laboratory.
Corequisite: Lab component. Prerequisite: 10 hours Biological Sciences.

BIOL 4793. Introduction to Neurobiology. 3 Hours.
Exploration of the neurological underpinnings of perception, action, and experience
including: how sense receptors convert information in the world into electricity, how
information flows through the nervous systems, how neural wiring makes vision
possible, how the nervous system changes with experience, and how the system
develops. Prerequisite: BIOL 2533.

BIOL 480V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other
courses. Prerequisite: 8 hours of biological sciences. May be repeated for degree
credit.

BIOL 480VH. Honors Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other
courses. Prerequisite: 8 hours of biological sciences. May be repeated for degree
credit.
This course is equivalent to BIOL 480V.

BIOL 4814. Limnology. 4 Hours.
Physical, chemical and biological conditions of inland waters. Lecture 3 hours,
laboratory by arrangement. Corequisite: Lab component. Prerequisite: (CHEM 1123
and CHEM 1121L) or equivalent and BIOL 3863 or instructor's permission.
BIOL 4833. Animal Behavior. 3 Hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component.

BIOL 4844. Community and Ecosystem Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL 485V. Field Ecology. 1-3 Hour.
Project oriented approach employing current field and laboratory techniques, experimental design, and data analysis. Field trip is required.

BIOL 4863. Analysis of Animal Populations. 3 Hours.
Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL 4873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533.

BIOL 4873H. Honors Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533.

This course is equivalent to BIOL 4873.

BIOL 496V. Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. May be repeated for up to 12 hours of degree credit.

BIOL 496VH. Honors Culture and Environment: Field Studies. 1-6 Hour.
May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. May be repeated for up to 12 hours of degree credit.

This course is equivalent to BIOL 496V.

BIOL 498V. Senior Thesis. 1-6 Hour.
Senior thesis.

BIOL 499V. Research In Biological Sciences. 1-4 Hour.
Research. Prerequisite: Senior standing. May be repeated for up to 8 hours of degree credit.

This course is equivalent to BIOL 499.

BIOL 499VH. Honors Research in Biological Sciences. 1-4 Hour.
Honors research. Prerequisite: Senior standing. May be repeated for up to 8 hours of degree credit.

This course is equivalent to BIOL 499.

BIOL 5001. Seminar in Biology. 1 Hour.
Discussion of selected topics and review of current literature in any area of the biological sciences. May be repeated for up to 2 hours of degree credit.

This course is cross-listed with CEMB 5911.

BIOL 5003. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123.

BIOL 5133. Insect Molecular Genetics. 3 Hours.
A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. This course is cross-listed with ENTO 5133.

BIOL 5143. Advanced Methods in Microscopy. 3 Hours.
Stand alone course on laboratory methods emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

BIOL 5153. Practical Programming for Biologists. 3 Hours.
Hands-on instruction in the fundamentals of biological computing. Students learn how to set up a Unix work station, work from the command line, install software, build databases, and program in Perl, a popular scripting language for biological applications. Most examples focus on the analysis of genomic data.

BIOL 5174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent) and graduate standing.

BIOL 5213. Biological Regulation and Subcellular Communication. 3 Hours.
Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: Graduate standing.

BIOL 5233. Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 or BIOL 2323.

BIOL 5263. Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2323, BIOL 2533, BIOL 2531L, CHEM 3813, and PHYS 2033.

BIOL 5273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes at all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest.

BIOL 5303. Plant Physiology. 3 Hours.
Introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: 3 hours of cell biology or biochemistry.

BIOL 5313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L.

BIOL 5323. Comparative Neurobiology. 3 Hours.
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: Graduate standing.
BIOL 5343. Advanced Immunology. 3 Hours.
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. This course is cross-listed with POSC 5343.

BIOL 5352L. Immunology in the Laboratory. 2 Hours.
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: BIOL 5343 or BIOL 5343. This course is cross-listed with POSC 5352L.

BIOL 5353. Ecological Genetics/genomics. 3 Hours.
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L, BIOL 3023 and MATH 2554 and STAT 2023 or equivalents.

BIOL 5404. Comparative Botany. 4 Hours.
A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: BIOL 5354 or BIOL 5343. This course is cross-listed with POSC 5354.

BIOL 5414. Mycology. 4 Hours.
Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Laboratory component.

BIOL 5423. Human Evolutionary Anatomy. 3 Hours.
Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. This course is cross-listed with ANTH 5423.

BIOL 5433. Principles of Evolution. 3 Hours.
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended: BIOL 3023 and BIOL 3021L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863.

BIOL 5463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234.

BIOL 5511L. Population Ecology Laboratory. 1 Hour.
Demonstration of the models and concepts from BIOL 5513. Pre- or Corequisite: BIOL 5513.

BIOL 5513. Population Ecology. 3 Hours.
Survey of theoretical and applied aspects of populations processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3863.

BIOL 5523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863.

BIOL 5524. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts and mechanisms of development emphasizing the experimental approach. Students may not receive degree credit for both BIOL 5543 Developmental Biology and BIOL 5524 Developmental Biology with Laboratory. Corequisite: Lab component.

BIOL 5534. Biochemical Genetics. 4 Hours.
Lectures and laboratories based on modern molecular genetic techniques for analyses of eukaryotes and manipulation of prokaryotes. A hands-on course in recombinant DNA techniques: laboratory practices in gene identification, cloning, and characterization. Lecture 2 hours, laboratory 6 hours per week. Corequisite: BIOL 2323 (or equivalent) and CHEM 3813 (or equivalent).

BIOL 5543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524.

BIOL 5553. Astrobiology. 3 Hours.
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes the origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent. This course is cross-listed with SPAC 5553.

BIOL 5563. Cancer Biology. 3 Hours.
An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. May be repeated for up to 6 hours of degree credit.

BIOL 5634. Wetlands Ecology and Management. 4 Hours.
To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3 hours per week. Prerequisite: BIOL 3863.

BIOL 5643. Eukaryote Phylogeny. 3 Hours.
Molecular analysis of the eukaryotic tree of life, phylogenetic tree reconstruction, and eukaryote diversity and evolutionary relationships.

BIOL 5703. Mechanisms of Pathogenesis. 3 Hours.
A survey of events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology.

BIOL 5713. Basic Immunology. 3 Hours.
A general overview of Immunity with emphasis on the underlying cellular, molecular and genetic events controlling immune reactions. Reading of the primary literature on disease states involving the immune system.

BIOL 5723. Fish Biology. 3 Hours.
Morphology, classification, life histories, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological sciences.

BIOL 5734. Protistology. 4 Hours.
The biology of eukaryotes other than animals, land plants, and fungi with emphasis on morphology and modern approaches to phylogenetic systematics. Three hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab component.

BIOL 5743. Herpetology. 3 Hours.
Morphology, classification and ecology of amphibians and reptiles. Lecture 2 hours, laboratory 1 hour per week. Corequisite: Lab component.
BIOL 5753. General Virology. 3 Hours.
An introduction to viral life-cycles, structure, and host cell interactions. Emphasis placed on molecular and biochemical aspects of virology. Two hour lecture and one hour discussion. Prerequisite: BIOL 2533 and BIOL 2323.

BIOL 5763. Ornithology. 3 Hours.
Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: 10 hours of biological sciences.

BIOL 5783. Mammalogy. 3 Hours.
Lectures and laboratory dealing with classification, morphology, distribution, ecology, behavior, and physiology of mammals. Two hours lecture, 4 hours laboratory. Corequisite: Lab component.

BIOL 580V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. May be repeated for up to 6 hours of degree credit.

BIOL 5814. Limnology. 4 Hours.
Physical, chemical and biological conditions of inland waters. Lecture 3 hours per week, laboratory arranged. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or equivalent and 12 hours of biological sciences.

BIOL 5833. Animal Behavior. 3 Hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component.

BIOL 5843. Conservation Biology. 3 Hours.
The study of direct and indirect factors by which biodiversity is impacted by human activity. It is a synthetic field of study that incorporates principles of ecology, biogeography, population genetics, economics, sociology, anthropology, philosophy, geology, and geography. Prerequisite: BIOL 3863.

BIOL 5844. Community Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863.

BIOL 585V. Field Ecology. 1-3 Hour.
Project-oriented approach employing current field and laboratory techniques, experimental design and data analysis. Field trip is required. May be repeated for degree credit.

BIOL 5873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: Graduate status.

BIOL 5914. Stream Ecology. 4 Hours.
Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: 3 hours of ecology-related coursework.

BIOL 5933. Global Biogeochemistry: Elemental Cycles and Environmental Change. 3 Hours.
This course explores the chemical, biological, and geological processes occurring within ecosystems. An understanding of these processes is used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on global change and the effects of more recent anthropogenic influences. Prerequisite: 3 hours of chemistry or biochemistry and ecology.

BIOL 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

BIOL 6113. Insect Physiology. 3 Hours.
General and comparative physiology of insects. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. This course is cross-listed with ENTO 6113.

BIOL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.

Biomedical Engineering (BMEG) Courses

BMEG 2614. Introduction to Biomedical Engineering. 4 Hours.
An introductory course for undergraduate biomedical engineering students. It covers topics such as recombinant DNA technologies, cell and tissue engineering, stem cell and organ regeneration, the biomechanics, bioinstrumentation, engineering of immunity, and bio- and medical imaging, etc. The application of nano-biotechnology in developing clinical products such as tissue engineered products, drug delivery systems, etc. will be emphasized in the course. Prerequisite: (GNEG 1322H or GNEG 1121, or GNEG 1103), (CHEM 1113 or CHEM 1103, each with a grade of C or better), MATH 2554 and PHYS 2054.

BMEG 2813. Biomechanical Engineering. 3 Hours.
This course introduces basic concepts and principles of biomechanics to biomedical and other engineering students. The course topics include mechanics and materials, viscoelastic properties, bone, cartilage, ligament, tendon, muscle, cardiovascular dynamics, clinical gait analysis, etc. After taking this course, students are expected to understand the application of engineering kinetics to describe motions of human body and mechanic properties of tissues. MATLAB will be used to write and solve biomechanical static and dynamic equations. Lecture 3 hours per week. Prerequisite: BMEG 2613, CHEM 1123 or CHEM 1133, MATH 2564, and PHYS 2074.

BMEG 2904. Biomedical Instrumentation. 4 Hours.
This course is designed for biomedical engineering undergraduate students to learn both theoretical and practical concepts of bioinstrumentation and their applications in modern life science and medicine. Analytical experiments will be practiced in the laboratory along with the lecture section. This course covers basic topics in circuits such as charge current, voltage, resistance, power energy, linear network analysis, inductors, capacitors, operational amplifier, time-varying signals, active analog filters, bioinstrumentation design etc. The application of these principles and theories in bioinstrumentation design and development is particularly emphasized in this course. The lab section requires team work, planning, and data sharing. Corequisite: Lab component. Prerequisite: BMEG 2613, MATH 2564 and PHYS 2074.

BMEG 3124. Biomedical Signals and Systems. 4 Hours.
This course will introduce students to the basics of signals - continuous and digital signals, and signal processing tools, such as filters, Laplace and Fourier transforms. The ‘systems’ aspect of the course will focus on physiological systems and methods to model such systems. The course will also focus on the biomedical applications of these methods through lab components. Prerequisite: BMEG 2904.

BMEG 3634. Biomaterials. 4 Hours.
Introduction to the engineering properties of materials used in biomedical devices and applications. Topics include: atomic properties, structure-property-processing relationships, bulk engineering properties, surface and interfacial properties and applications of materials in biology and medicine. All topics will be reviewed in the context of specific biomedical devices and the engineering principles involved in their design. Corequisite: Lab component. Prerequisite: BMEG 2813, CHEM 1123 or CHEM 1133, and BIOL 1543 and BIOL 1541L.
BMEG 3653. Biomedical Modeling and Numerical Methods. 3 Hours.
Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Prerequisite: BMEG 2613, MATH 2574, and MATH 2584.

BMEG 3653H. Honors Biomedical Modeling and Numerical Methods. 3 Hours.
Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Prerequisite: BMEG 2613, MATH 2574, and MATH 2584.

This course is equivalent to BMEG 3653.

BMEG 3801. Clinical Observations and Needs Finding. 1 Hour.
This course involves the introduction of clinical procedures and biomedical devices and technology to biomedical engineering students. Students will tour medical facilities, clinics and hospitals and will participate in medical seminars, workshops and medical rounds. The course prepares students to successfully select and complete a project in the senior capstone course. Prerequisite: BMEG 2813 or BMEG 2904.

BMEG 3824. Biomolecular Engineering. 4 Hours.
Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123 or CHEM 1133, and BIOL 2533.

BMEG 3824H. Honors Biomolecular Engineering. 4 Hours.
Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123 or CHEM 1133, and BIOL 2533.

This course is equivalent to BMEG 3824.

BMEG 4023L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4033L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133.

This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BMEG 4103M. Honors Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4033L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133.

This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BMEG 4213. Tissue Mechanics. 3 Hours.
The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813, BMEG major and Senior standing.

BMEG 4243. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Topics include: biocompatibility; biofouling; hemocompatibility; wound healing response; foreign body response; design of orthopedic, dental and cardiovascular implants; ophthalmological and dermatological materials; degradable polymers for drug delivery; nanobiomaterials; smart biomaterials and the regulation of devices and materials by the FDA. Pre- or Corequisite: BMEG 4623. Prerequisite: BMEG 3634.

BMEG 4403. Biomedical Microscopy. 3 Hours.
An advanced course covering light microscopy techniques, conjugate image planes, principles of contrast, fluorescence imaging, confocal and multi-photon microscopy, electron microscopy, atomic force microscopy, image reconstruction and digital image processing with supporting units in tissue culture and histology. Prerequisite: BMEG 2904, PHYS 2074, BMEG major and Senior standing.

BMEG 4413. Tissue Engineering. 3 Hours.
This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Corequisite: Lab component. Prerequisite: BMEG 3824 and BIOL 2533.

BMEG 450VH. Honors Thesis. 1-4 Hour.
Provides Biomedical Engineering students an opportunity to explore a topic in depth through an independent research or design project. Prerequisite: Honors standing. May be repeated for degree credit.
BMEG 4513. Biomedical Optics and Imaging. 3 Hours.
This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. Prerequisite: BMEG 2904 and senior standing.

BMEG 4523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: BMEG 3124 and BMEG 3653.

BMEG 460V. Individual Study. 1-3 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. May be repeated for degree credit.

BMEG 460VH. Honors Individual Study. 1-3 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. May be repeated for degree credit.

This course is equivalent to BMEG 460V.

BMEG 4623. Biomedical Transport Phenomena. 3 Hours.
An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, MATH 2574 and MATH 2584.

BMEG 4623H. Honors Biomedical Transport Phenomena. 3 Hours.
An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, MATH 2574 and MATH 2584.

This course is equivalent to BMEG 4623.

BMEG 470V. Special Topics in Biomedical Engineering. 1-4 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Senior standing. May be repeated for degree credit.

BMEG 4713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: CHEG 2133 or MEEG 3503, and BIOL 2213.

BMEG 4743. Drug and Gene Delivery. 3 Hours.
An advanced course covering important issues in drug and gene delivery in tumor and normal tissues. The course emphasizes quantitative analysis of molecule and nanoparticle transport through mathematical modeling and computer simulation. Various engineering-related topics on drug and gene delivery are discussed. These topics include physiologically-based pharmacokinetic analysis, transvascular transport, interstitial transport, transport across cell membrane, drug and gene carriers, targeted delivery of drugs, oxygen transport, delivery of effector cells and genes. Pre- or Corequisite: BMEG 4623.

BMEG 4813. Biomedical Engineering Design I. 3 Hours.
This is part one of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Pre- or Corequisite: BMEG 4623.

BMEG 4823. Biomedical Engineering Design II. 3 Hours.
This is part two of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Pre- or Corequisite: BMEG 4813.

BMEG 4873. Bionanotechnology. 3 Hours.
This is an introductory course relevant to bionanotechnology. The topics covered in this course include nanobiomaterials, nanoparticles, nanowires, nanobiosensors, and nanobiodevices. The applications of these nanomaterials and devices in clinical diagnostics, disease treatment, point-of-care test and/or point-of-care diagnostics, tele-medical cares, controlled and targeted drug delivery, etc. will be particularly emphasized in the lecture. Prerequisite: BMEG 2813, BMEG 3824, and CHEG 2133 or MEEG 3503.

BMEG 4973. Regenerative Medicine. 3 Hours.
This is an advanced course focusing on tissue engineering and regenerative medicine. Topics include stem cell tissue engineering, cell signaling, transport and kinetics, biomaterials and scaffolds, surface interactions, viral and nonviral-based gene delivery, tissue engineered organs, organ transplantation, nanomedicine, cell replacement therapy, and organ regenerative therapy. Technologies used to grow clinical relevant cells and tissues in lab will also be discussed in this course. Pre- or Corequisite: Senior standing.

BMEG 5103. Design and Analysis of Experiments in Biomedical Research. 3 Hours.
An advanced course covering sample size estimation with power calculations, protection of vertebrate animals and human subjects, factorial design, multivariate analysis of variance, parametric and non-parametrics data analysis, Kaplan-meier analysis, and post-test correction of multiple comparisons as related to biomedical data. Prerequisite: MATH 2584 and BMEG 3653 or equivalents.
BMEG 5203. Mathematical Modeling of Physiological Systems. 3 Hours.
Application of numerical methods and mathematical techniques to physiological systems. Cellular physiology topics include models of cellular metabolism, diffusion, membrane potential, excitability, calcium dynamics and intercellular signalling. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Other physiology topics include respiration, muscle, vision, hearing, voice, and speech. Prerequisite: MATH 2584 or BMEG 3653 or BMEG 4623 or equivalents.

BMEG 5213. Tissue Mechanics. 3 Hours.
The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813 and BMEG 4623 or equivalents.

BMEG 5313. Advanced Biomaterials and Biocompatibility. 3 Hours.
From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Prerequisite: BMEG 3634 and BMEG 4623 or equivalents.

BMEG 5413. Tissue Engineering. 3 Hours.
This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in-vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Students may not earn credit for both BMEG 5413 and BMEG 4413. Corequisite: Lab component. Prerequisite: BIOL 2533 and BMEG 3824.

BMEG 5423. Regenerative Medicine. 3 Hours.
The course covers five broad areas: Biological and molecular basis for regenerative medicine, tissue development, regenerative medicine and innovative technologies, clinical applications of regenerative medicine, and regulation and ethics. Prerequisite: BIOL 2533 and BMEG 3824 or equivalents.

BMEG 5513. Biomedical Optics and Imaging. 3 Hours.
This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques - spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances - X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513.

BMEG 5523. Biomedical Data and Image Analysis. 3 Hours.
This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: Graduate standing.

BMEG 560V. Advanced Individual Study. 1-6 Hour.
Individual study and research of a topic mutually agreeable to the student and faculty member. Prerequisite: Graduate standing.

BMEG 570V. Advanced Special Topics. 1-6 Hour.
Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. May be repeated for up to 15 hours of degree credit.

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.
Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing.

BMEG 5800. Graduate Seminar I. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. Prerequisite: BMEG 5801. May be repeated for up to 8 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research.

BMEG 5810. Graduate Seminar II. 0 Hours.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. May be repeated for up to 8 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.
A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property.

BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. This course is cross-listed with MEEG 5953, CVEG 5953.

BMEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

BMEG 700V. Doctoral Dissertation. 1-6 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.
Business Law (BLAW)

Courses

Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics.

BLAW 2013H. Honors The Legal Environment of Business. 3 Hours.
Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics.

BLAW 3033. Commercial Law. 3 Hours.
A study of the laws applicable to commercial transactions. Topics covered include the common law of contracts, Articles Two (Sales) and Three (Commercial Paper) of the Uniform Commercial Code, secured transactions, suretyship, and bankruptcy.

BLAW 5003. Commercial Transactions. 3 Hours.
A study of laws applicable to business. Topics covered include the law of Contracts and UCC Sales, Payment Systems (checking accounts and E-payments); Bankruptcy, Intellectual Property, Principal-Agent Relationships, Business Entities, Data Security, Federal Securities Law, and Accountant's Legal Liability. Prerequisite: Graduate standing.

Career and Technical Education (CATE)

Courses

CATE 3003. Teaching Housing and Interior Design to Secondary Students. 3 Hours.
This course prepares students to teach housing and interior design concepts to students in secondary school settings. Topics to be covered include housing needs and decisions, architectural design and construction, furnishings, safety and security, and careers related to the housing industry. Problem-based and project-based learning will provide the foundation for content delivery in this course.

CATE 3103. Introduction to Professionalism. 3 Hours.
Studying and developing educational concepts in career and technical education with accepted principles of professionalism in secondary education settings. Prerequisite: Career and Technical Education (CATE) students only.
This course is equivalent to CATE 4003.

CATE 380V. Supervised Work Experience. 1-9 Hour.
Supervision in business and industry under guidance. Designed for students who desire or need directed occupational experience. May be repeated for up to 6 hours of degree credit.

CATE 390V. Competency Based Teacher Development: Program Organization. 3-12 Hour.
Development of competencies related to the methodology of instructional planning, execution, and evaluation. Provided by PBTE modules and University resource person. Enroll before CATE 391V and CATE 392V. Prerequisite: Employed in service vocational-technical education field based instructor. May be repeated for up to 12 hours of degree credit.

CATE 391V. Competency Based Teacher Development - Teaching Adults. 3-12 Hour.
Development of competencies related to vocational guidance, contemporary instructional techniques, and student vocational organizations. Provided by PBTE modules and University resource person. Prerequisite: Completion of 12 credit hours of CATE 390V and employee in-service-vocational-technical education field based instructor. May be repeated for up to 24 hours of degree credit.

CATE 392V. Competency Based Teacher Development: Teaching & Learning. 3-12 Hour.
Development of competencies related to program planning, development, evaluation; school community relations; and professional development. Provided by CBTD modules and University resource person. Prerequisite: Completion of 12 credit hours of CATE 391V and employee in-service-vocational-technical education field based instructor. May be repeated for up to 12 hours of degree credit.

CATE 393V. Competency Based Internship: Educational Legal Issues. 3-6 Hour.
In an actual school setting the student will satisfactorily demonstrate the competencies required to conduct a total vocational-technical education program. Instruction and follow-up will be provided by a University resource person. Prerequisite: Completion of 12 credit hours of CATE 392V and employee in-service-vocational-technical education field based instructor. May be repeated for up to 24 hours of degree credit.

CATE 4003H. Honors Introduction to Professionalism. 3 Hours.
Studying and developing professional concepts in vocational education with accepted principles of professionalism applied to career and technical education settings. This course is equivalent to CATE 4003.

CATE 4013. Teaching Strategies. 3 Hours.
Methods and techniques in the preparation and delivery of teaching. Prerequisite: CATE 3103.

CATE 4023. Classroom Management. 3 Hours.
Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Prerequisite: CATE 3103.

CATE 4033. Assessment / Program Evaluation. 3 Hours.
An introduction to constructing, evaluating and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program valuations. Prerequisite: CATE 3103.

CATE 4052. Seminar Teaching Internship. 2 Hours.
Site-based field experiences are integrated with the course content to provide continuity between theory and practice. Classroom management, ethics and diversity are emphasized. Corequisite: CATE 406X.

CATE 406X. Teaching Internship. 12 Hours.
A minimum of 15 weeks will be spent in an off-campus school, at which time the student will have an opportunity under supervision to observe, to teach and to participate in other activities involving the school and the community. Successful completion of a criminal background check required before student can begin internship. Prerequisite: Senior status, CATE 4003, CATE 4013, CATE 4023, CATE 4033, CIED 3023 or CIED 4023 and CIED 3033.

CATE 4073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.
This course provides an introduction to the foundations of teaching methods for computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, developing computational thinking, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required.
CATE 4803. Problems in Career & Technical Education. 3 Hours.
Problems and issues relating to instruction in career and technical education. You must have approval by the instructor of this course to enroll.

CATE 5003. Introduction to Professionalism. 3 Hours.
This course examines the principles and concepts of professionalism in the teaching profession, with an emphasis on developing professional concepts in the profession. Added emphasis is on career and technical education organizations. Prerequisite: Admission to the CATE teacher education program.

CATE 5013. Teaching Strategies. 3 Hours.
This course is designed to offer a variety of ideas and experiences concerning methods of teaching, planning and presenting instruction.

CATE 5016. Cohort Teaching Internship. 6 Hours.
A minimum of 12 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: Admission to the College of Education and Health Professions Teacher Education and CATE Master's program.

CATE 5033. Assessment/Program Evaluation. 3 Hours.
An introduction to constructing, evaluating, and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: Graduate standing.

CATE 5443. Teaching Career Development in Public Schools. 3 Hours.
This course provides a study of curricula, methods, and techniques involved in teaching career development as related to the 16 occupational clusters. Successful completion of this course is required for licensed teachers to earn their 418 Career Development endorsement. Corequisite: Lab component.

CATE 5453. Methods of Teaching Middle School Career Development. 3 Hours.
Provides a survey of types and sources of occupational information and methods of providing occupational-oriented experiences. Designed for teachers and future teachers of career orientation and is 1 of 2 required courses for vocational career orientation.

CATE 5463. Applications in Career Orientation. 3 Hours.
Student is introduced to various teaching methods and techniques of managing hands-on activities in career orientation class setting.

CATE 5503. Trends and Issues in Technology Education. 3 Hours.
A comprehensive technology education methods course pertaining to the teaching of standards-based curriculum materials.

CATE 5543. Technology for Teaching and Learning. 3 Hours.
A study of computer technology as it relates to teacher education. This course concentrates on knowledge and performance and includes hands-on technology activities that can be incorporated in an educational setting. Students interact with the instructor and other students via BlackBoard and engage in weekly discussions and acquire hands-on computer technology experience.

CATE 5573. Instructional Materials. 3 Hours.
A comprehensive course designed to give students the opportunity to understand, prepare, and test materials leading toward excellence in instruction. The focus of this course is the design and development of instructional media and materials utilizing different multimedia and software for use in educational programs. This includes the development of computer based, general instructional materials.

CATE 5803. Teaching Apparel Production to Secondary Students. 3 Hours.
This course prepares students to teach apparel production concepts to students in secondary school settings. Topics to be covered include clothing selection, textiles, clothing care and laundry, clothing construction, and careers and technology. Problem- and project-based learning will provide the foundation for content delivery in this course. The focus on this course is on preparing preservice teachers in secondary schools to teach apparel production utilizing a variety of teaching methods.

Cell and Molecular Biology (CEMB)

Courses

CEMG 590V. Special Topics in Cell and Molecular Biology. 1-6 Hour.
Consideration of new areas in Cell and Molecular Biology not yet treated adequately in textbooks or in other courses. May be repeated for up to 6 hours of degree credit.

CEMG 5911. Seminar in Cell and Molecular Biology. 1 Hour.
Discussion of current topics in Cell and Molecular Biology. All graduate students in the Cell and Molecular Biology degree program must enroll every fall and spring semester in this course or an approved alternate seminar course. Prerequisite: Graduate standing. May be repeated for degree credit.
This course is cross-listed with BIOL 5001.

CEMG 600V. Master's Thesis. 1-6 Hour.
Master's thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

CEMG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.

Chemical Engineering (CHEG)

Courses

CHEG 2113. Introduction to Chemical Engineering I. 3 Hours.
Introduction to the field of chemical engineering. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed and the application of computers to chemical engineering problems is introduced. Pre- or Corequisite: CHEG 2113 or CHEG 2133H.

CHEG 2133. Fluid Mechanics. 3 Hours.
Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2613 or INEG 2103).

CHEG 2133H. Honors Fluid Mechanics. 3 Hours.
Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2613 or INEG 2103).
This course is equivalent to CHEG 2133.

CHEG 2313. Thermodynamics of Single-Component Systems. 3 Hours.
A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving single-component physical systems and processes. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2613 or INEG 2103).

CHEG 2313H. Honors Thermodynamics of Single-Component Systems. 3 Hours.
A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving single-component physical systems and processes. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2613 or INEG 2103).
This course is equivalent to CHEG 2313.

CHEG 3144. Heat and Mass Transfer. 4 Hours.
Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Corequisite: Drill component. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 and MATH 2584.
CHEG 3144H. Honors Heat and Mass Transfer. 4 Hours.
Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Prerequisite: CHEG 3333H. Honors Chemical Engineering Reactor Design. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design I. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design II. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design III. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design IV. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design V. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design VI. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design VII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design VIII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design IX. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design X. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XI. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XIII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XIV. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XV. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XVI. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XVII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XVIII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XIX. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XX. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXI. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXIII. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXIV. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXV. 3 Hours.
CHEG 3144H. Honors Chemical Engineering Design XXVI. 3 Hours.
CHEG 5013. Membrane Separation and System Design. 3 Hours.
Theory and system design of cross flow membrane process—reverse osmosis, nanofiltration, ultrafiltration, and microfiltration—and applications for pollution control, water treatment, food and pharmaceutical processing.

CHEG 5033. Technical Administration. 3 Hours.
Contemporary issues affecting the domestic and global Chemical Process Industries (CPI). Emphasis is on process economics, market and corporate strategy as well as advances in technology to improve corporate earnings while addressing the threats and opportunities in the CPI. Prerequisite: Senior or graduate standing.

CHEG 5043. Colloid and Interface Science. 3 Hours.
This course aims to provide essential knowledge about surface, interface, and molecular self-organization. At the end of this course students should understand (i) basic concepts to describe phenomena at surfaces, (ii) molecular self-organization, and (iii) basic techniques for characterization of surfaces and interfaces.

CHEG 5113. Transport Processes I. 3 Hours.
Fundamental concepts and laws governing the transfer of momentum, mass, and heat.

CHEG 5133. Advanced Reactor Design. 3 Hours.
Applied reaction kinetics with emphasis on the design of heterogeneous reacting systems including solid surface catalysis, enzyme catalysis, and transport phenomena effects. Various types of industrial reactors, such as packed bed, fluidized beds, and other non-ideal flow systems are considered.

CHEG 5213. Advanced Chemical Engineering Calculations. 3 Hours.
Developments of and solutions of equations and mathematical models of chemical processes and mechanisms.

CHEG 5273. Corrosion Control. 3 Hours.
Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized.

CHEG 5333. Advanced Thermodynamics. 3 Hours.
Methods of statistical thermodynamics, the correlation of classical and statistical thermodynamics, and the theory of thermodynamics of continuous systems (non-equilibrium thermodynamics).

CHEG 5353. Advanced Separations. 3 Hours.
Phase equilibrium in non-ideal and multiphase systems, digital and other methods of computation are included to cover the fundamentals of distillation, absorption, and extraction.

CHEG 5513. Biochemical Engineering Fundamentals. 3 Hours.
An introduction to bioprocessing with an emphasis on modern biochemical engineering techniques and biotechnology. Topics include: basic metabolism (procaryote and eucaryote), biochemical pathways, enzyme kinetics (including immobilized systems), separation processes (e.g. chromatography) and recombinant DNA methods. Material is covered within the context of mathematical descriptions (calculus, linear algebra) of biochemical phenomenon.

CHEG 5733. Polymer Theory and Practice. 3 Hours.
Theory and methods for converting monomers into polymers are presented. Topics include principles of polymer science, commercial processes, rheology, and fabrication.

CHEG 5801. Graduate Seminar. 1 Hour.
Oral presentations are given by master’s candidates on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing.

CHEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of an advanced chemical engineering problem not sufficiently comprehensive to be a thesis. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

CHEG 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

CHEG 6123. Transport Processes II. 3 Hours.
Continuation of CHEG 5113. Prerequisite: CHEG 5113.

CHEG 6203. Preparation of Research Proposals. 3 Hours.
This course will cover technical communication in both written and oral presentation. Prerequisite: Instructor consent.

CHEG 688V. Special Topics in Chemical Engineering. 1-3 Hour.
Advanced study of current Chemical Engineering topics not covered in other courses. Prerequisite: Doctoral students only. May be repeated for up to 3 hours of degree credit.

CHEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Chemistry and Biochemistry (CHEM)

CHEM 1051L. Chemistry in the Modern World Laboratory (ACTS Equivalency = CHEM 1004 Lab). 1 Hour.
Basic laboratory exercises involving measurements of mass and volume, acids and bases, hardness of water, energy content in fuel, sugar content in drinks, and radioactivity. Meets 2 hours per week. Corequisite: CHEM 1053.

The impact of chemical developments upon contemporary society. Chemical problems of ecological, environmental, nutritional, economic, and sociological concern. Designed for non-science majors. Lecture 3 hours per week. Corequisite: CHEM 1051L.

CHEM 1071L. Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab). 1 Hour.
Laboratory exercises in principles and practices of Fundamental Chemistry. Corequisite: CHEM 1073.

CHEM 1073. Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture). 3 Hours.
Fundamental principles of chemistry for students majoring in Home Economics or Nursing. Lecture 3 hours, recitation 1 hour per week. Corequisite: CHEM 1071L and related course component drill section for CHEM 1073.

CHEM 1101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab). 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Meets 3 hours per week for 1 hour credit.

CHEM 1103. University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture). 3 Hours.
An introductory course for science, engineering or agriculture majors. Atomic structure, electron configurations and periodic properties, nomenclature and bonding in compounds, Lewis structure and resonance forms, molecular geometries and polarity, stoichiometry, solution chemistry and aqueous reactions, thermochemistry, gas laws and molecular theory. Corequisite: Drill component. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP 54 or higher.
CHEM 1101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.
Quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory 3 hours per week. Upon completion of CHEM 1101L on the UAF campus with a grade of "C" or better, credit for CHEM 1101 can be requested. Corequisite: CHEM 1103 and related course component drill section for CHEM 1123.
CHEM 1112L. University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.
Introductory course for science, engineering or agriculture majors. Liquids, solids, intermolecular forces, phase diagrams, solution chemistry, solubility, colligative properties, chemical kinetics, chemical equilibria, acid-base equilibria, aqueous ionic equilibria, titrations, buffers, solubility equilibria, thermodynamics, electrochemistry, and nuclear chemistry. Lecture 3 hours per week. Corequisite: CHEM 1121L and related course component drill section for CHEM 1123. Prerequisite: CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or MATH 1203 CLEP 54 or higher.
CHEM 1123. University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.
Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors should take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2623. Prerequisite: (CHEM 1121L and CHEM 1121M) or (CHEM 1221L and CHEM 1101L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus BC 4C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher.
CHEM 2261L. Analytical Chemistry Laboratory. 1 Hour.
Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher.
CHEM 2263L. Analytical Chemistry Laboratory Lecture. 3 Hours.
Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher.
CHEM 2611L. Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.
Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2623. Prerequisite: (CHEM 1121L and CHEM 1101L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher.
CHEM 2613. Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture). 3 Hours.
One semester survey of organic chemistry necessary for understanding of biological systems, with some related physiological chemistry. Lecture 3 hours per week. Pre- or Corequisite: CHEM 2611L and related course component drill section for CHEM 2613. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L).
CHEM 3203. Forensic Chemistry. 3 Hours.
Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713.
CHEM 3203H. Honors Forensic Chemistry. 3 Hours.
Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. As a requirement of honors designation additional honors-level work is required of students enrolled in this section. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713. This course is equivalent to CHEM 3203.

CHEM 3273. UATeach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Corequisite: Drill component. Prerequisite: ARSC 1201 and ARSC 1221.
This course is cross-listed with PHYS 3273, BIOL 3273.

CHEM 3273H. Honors UATeach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221 and junior standing.
This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

CHEM 3451L. Elements of Physical Chemistry Laboratory. 1 Hour.
Experimental measurements of the physical properties, chemical systems, error analysis and report writing. Experiments cover topics in thermochromy, heat capacity, chemical kinetics, spectroscopy, and phase/chemical equilibrium using a variety of physical chemistry techniques. Laboratory 4 hours per week. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3453 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074).

CHEM 3453. Elements of Physical Chemistry. 3 Hours.
One semester accelerated course in physical chemistry primarily for students majoring/minoring in chemistry with biochemistry option, or pre-professional and agriculture students. Topics include thermodynamics, phase & chemical equilibrium, chemical kinetics, quantum chemistry and spectroscopy. Presented at the same level as the 2-semester course with some recourse to calculus, although covering fewer topics in quantum chemistry. Lecture 3 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3451L concurrently. Prerequisite: CHEM 2263 and PHYS 2033 (or PHYS 2074), and MATH 2554 (or MATH 2043).

CHEM 3504. Physical Chemistry I. 4 Hours.
First semester of a 2-semester course in physical chemistry designed for chemistry majors and chemistry minors with topics covering wave-particle duality, quantum chemistry, atomic and molecular structure, bonding, spectroscopy and elementary statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite: MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074.

CHEM 3512L. Physical Chemistry Laboratory. 2 Hours.
Experimental studies of molecular structure, thermochromy, and chemical kinetics, and the determination of other physicochemical properties of matter. Laboratory 8 hours per week. Students cannot earn credit for both CHEM 3451L and CHEM 3512L. Corequisite: Chemistry majors and chemistry minors must take CHEM 3514 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074).

CHEM 3514. Physical Chemistry II. 4 Hours.
Second semester of a 2-semester course in physical chemistry aimed for B.S. chemistry majors/minors with topics covering the laws of thermodynamics, phase & chemical equilibria; structure and properties of solutions, chemical potential, and chemical kinetics. Lecture and recitation 4 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3512L concurrently. Prerequisite: CHEM 3504.

CHEM 3601L. Organic Chemistry I Laboratory. 1 Hour.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3603 and related course component drill for CHEM 3603.

CHEM 3602M. Honors Organic Chemistry I Laboratory. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3603H and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy. This course is equivalent to CHEM 3601L.

CHEM 3603. Organic Chemistry I. 3 Hours.
Introduction to organic compounds including alkanes, haloalkanes, alkenes and alkenes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3601L and related course component drill section for CHEM 3603. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L).

CHEM 3603H. Honors Organic Chemistry I. 3 Hours.
In-depth introduction to organic compounds; properties and reactions. Including alkanes, haloalkanes, alkenes and alkenes; nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3602M and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy and ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L)). This course is equivalent to CHEM 3603.

CHEM 3611L. Organic Chemistry II Laboratory. 1 Hour.
Continuation of CHEM 3601L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3613 and related course component drill for CHEM 3613. Prerequisite: CHEM 3601L.

CHEM 3612M. Honors Organic Chemistry II Laboratory. 2 Hours.
Continuation of CHEM 3602M and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3613H and related course component drill sections for CHEM 3612M and CHEM 3613H. Prerequisite: Honors candidacy and CHEM 3602M. This course is equivalent to CHEM 3611L.

CHEM 3613. Organic Chemistry II. 3 Hours.
Basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3611L and related course component drill section for CHEM 3613. Prerequisite: (CHEM 3603 and CHEM 3601L) or (CHEM 3603H and CHEM 3602M) or (CHEM 3703 and CHEM 3702L).

CHEM 3613H. Honors Organic Chemistry II. 3 Hours.
In-depth coverage of the basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week.Corequisite: CHEM 3612M and related course component drill sections for CHEM 3613H and CHEM 3612M. Prerequisite: Honors candidacy and CHEM 3603H and CHEM 3602M. This course is equivalent to CHEM 3613.

CHEM 3702L. Organic Chemistry I Lab for Chemistry Majors. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3703 and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor.
CHEM 3703. Organic Chemistry I Lecture for Chemistry Majors. 3 Hours.
In-depth introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition. Lecture 3 hours per week. Corequisite: CHEM 3702L and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor and (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L).

CHEM 3712L. Organic Chemistry II Lab for Chemistry Majors. 2 Hours.
Continuation of CHEM 3702L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3713 and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3702L.

CHEM 3713. Organic Chemistry II Lecture for Chemistry Majors. 3 Hours.
Continuation of in-depth coverage of the basic chemistry of the compounds of carbon. Properties and reactions of aromatic and carbonyl functional groups. Lecture 3 hours per week. Corequisite: CHEM 3712L and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3703 and CHEM 3702L.

This course is equivalent to CHEM 3613.

CHEM 3813. Elements of Biochemistry. 3 Hours.
One semester survey course of the fundamentals of biochemistry. Structures, properties, and reactions of major classes of biomolecules. Basics of enzyme catalysis. Overview of metabolism. Credit for both CHEM 3813 and 4813H may not be counted toward a chemistry degree. Lecture 3 hours per week. Prerequisite: (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L).

CHEM 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: Honors candidacy.

CHEM 400V. Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. May be repeated for degree credit.

CHEM 400VH. Honors Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. May be repeated for degree credit. This course is equivalent to CHEM 400V.

CHEM 4011H. Honors Seminar. 1 Hour.
Research seminar for chemistry majors enrolled in the honors program. Enrollment is required the spring semester of the junior and senior years for honors students. Senior honors students must make one research presentation to graduate with honors. Prerequisite: Honors candidacy, chemistry major and junior or senior standing. May be repeated for up to 2 hours of degree credit.

CHEM 405V. Special Topics in Chemistry. 1-4 Hour.
Potential topics include: advanced spectroscopic methods, biochemical chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. Prerequisite: Instructor consent.

CHEM 4123. Advanced Inorganic Chemistry I. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3453.

CHEM 4153L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, MEEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133.

This course is cross-listed with MEEG 4323L, PHYS 4793L.

CHEM 4153M. Honors Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, MEEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123 or CHEM 1133.

This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

CHEM 4211L. Instrumental Analysis Laboratory. 1 Hour.
Provides laboratory experience in parallel with the lecture material in CHEM 4211. Laboratory 3 hours per week. Corequisite: CHEM 4213.

CHEM 4213. Instrumental Analysis. 3 Hours.
Provides students, especially those in the agricultural, biological, and physical sciences, with an understanding of modern instrumental techniques of analysis. Lecture 3 hours per week. Corequisite: CHEM 4211L. Prerequisite: (CHEM 2263 and CHEM 2261L) and ((CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L).

CHEM 4283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion, with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. Prerequisite: CHEM 1123 and PHYS 2074.

CHEM 4443. Physical Chemistry of Materials. 3 Hours.
Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Prereq. or Corequisite: CHEM 3514. Prerequisite: CHEM 3453 or CHEM 3713 or MEEG 2403.

CHEM 4723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Other laboratory techniques applicable to chemical research will be included. Lecture 3 hours and laboratory 3 hours per week. Lecture only meets the first half of the term. Laboratory meets the entire term. Corequisite: Lab component. Prerequisite: CHEM 3613 and CHEM 3611L, (or CHEM 3613H or CHEM 3612M), (or CHEM 3713 and CHEM 3712L).
CHEM 4813H. Honors Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for undergraduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Credit cannot be earned in both CHEM 3813 and CHEM 4813H.
Additional honors-level work required in this section. Prerequisite: Honors candidacy and (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L).
This course is cross-listed with CHEM 5813.

CHEM 4843H. Honors Biochemistry II. 3 Hours.
A continuation of CHEM 4813H covering topics including biological membranes and bienergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure, structure and synthesis, and molecular biology. Credit cannot be earned in both CHEM 3813 and CHEM 4843H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and CHEM 4813H.

CHEM 4853. Biochemical Techniques. 3 Hours.
Techniques for handling, purifying and analyzing enzymes, structural proteins, and nucleic acids. Lecture 1 hour, laboratory 6 hours per week. Corequisite: Lab component. Pre or Corequisite: CHEM 3813 or CHEM 4843H.

CHEM 5101. Introduction to Research. 1 Hour.
This eight week course introduces new graduate students to research opportunities and skills in chemistry and biochemistry. Meets 2 hours per week in the first half of the semester. Safety and ethics in research and scholarship are discussed. Students learn about research programs in the department to aid in choosing an advisor.

CHEM 5123. Advanced Inorganic Chemistry. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Knowledge comparable to material in CHEM 3453 is recommended.

CHEM 5143. Advanced Inorganic Chemistry II. 3 Hours.
Chemistry of metallic and non-metallic elements emphasizing molecular structure, bonding and the classification of reactions. Knowledge of inorganic chemistry comparable to material in CHEM 4123 and CHEM 5123 is recommended.

CHEM 5153. Structural Chemistry. 3 Hours.
Determination of molecular structure by diffraction, spectroscopic, and other techniques. Illustrative examples will be chosen from inorganic chemistry and biochemistry.

CHEM 5213. Instrumental Analysis. 3 Hours.
Provides students, especially those in the physical, agricultural, and biological sciences, with an understanding of the theory and practice of modern instrumental techniques of analysis. Lecture 3 hours per week. Knowledge comparable to material in CHEM 2263 and CHEM 3603 is recommended.

CHEM 5223. Chemical Instrumentation. 3 Hours.
Use and application of operational amplifiers to chemical instrumentation; digital electronic microprocessor interfacing; software development and real-time data acquisition. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended.

CHEM 5233. Chemical Separations. 3 Hours.
Modern separation methods including liquid chromatography (adsorption, liquid-liquid partition, ion exchange, exclusion) and gas chromatography. Theory and instrumentation is discussed with emphasis on practical aspects of separation science. Prerequisite: CHEM 4213.

CHEM 5243. Electrochemical Methods of Analysis. 3 Hours.
Topics will include diffusion, electron transfer kinetics, and reversible and irreversible electrode processes followed by a discussion of chronopotentiometry, chronocoulometry, polarography, voltammetry, and chronopotentiometry. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended.

CHEM 5253. Spectrochemical Methods of Analysis. 3 Hours.
Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include atomic and molecular absorption and emission techniques in the ultraviolet, visible, and infrared spectral regions. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended.

CHEM 5263. Nuclear Chemistry. 3 Hours.
Nuclear structure and properties, natural and artificial radioactivity, radioactive decay processes, nuclear reaction and interactions of radiation with matter. Prerequisite: CHEM 3514.

CHEM 5273. Cosmochemistry. 3 Hours.
Laws of distribution of the chemical elements in nature, cosmic and terrestrial abundance of elements; origin and age of the earth, solar system, and the universe. Prerequisite: CHEM 3514.

CHEM 5283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion.

CHEM 5383. Chemometrics. 3 Hours.
Chemometrics is the process of extracting relevant information from chemical data by mathematical and statistical tools. These tools allow for designing optimal experimental procedures, extracting important information from complex chemical systems, and better understanding of complex chemical systems.

CHEM 5443. Physical Chemistry of Materials. 3 Hours.
Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Knowledge comparable to material in CHEM 3514 and CHEM 3504 or CHEM 3453 or CHEG 3713 or MEEG 2403 is recommended.

CHEM 5453. Quantum Chemistry I. 3 Hours.
Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrodinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotator, hydrogen atom, and interaction of matter with radiation. Knowledge of physical chemistry comparable to material in CHEM 3504 is recommended.

CHEM 5473. Chemical Kinetics. 3 Hours.
Theory and applications of the principles of kinetics to reactions between substances, both in the gaseous state and in solution. Knowledge of physical chemistry comparable to material in CHEM 3514 is recommended.

CHEM 5513. Biochemical Evolution. 3 Hours.
Abiotic synthesis of biomolecules on Earth, the origin of cells, genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, eukaryotes, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data and evolution. Prerequisite: CHEM 5813.

CHEM 5573. Statistical Thermodynamics. 3 Hours.
Covers fundamentals in thermodynamics, molecular dynamics, Monte Carlo, phase transitions, behavior of gases and liquids and basic concepts in chemical kinetics and physical kinetics. Knowledge comparable to physical chemistry materials in CHEM 3514 is recommended.

CHEM 5603. Physical Organic Chemistry. 3 Hours.
Introduction to the theoretical interpretation of reactivity, reaction mechanisms, and molecular structure of organic compounds. Application of theories of electronic structure; emphasis on recent developments. Knowledge of material comparable to CHEM 3613, CHEM 3613H, CHEM 3713 and CHEM 3514 is recommended.
CHEM 5633. Organic Reactions. 3 Hours.
The more important types of organic reactions and their applications to various classes of compounds. Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended.

CHEM 5723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Lecture 3 hours per week. Knowledge comparable to material in CHEM 3613 is recommended.

CHEM 5753. Methods of Organic Analysis. 3 Hours.
Interpretation of physical measurements of organic compounds in terms of molecular structure. Emphasis on spectroscopic methods (infrared, ultraviolet, magnet resonance, and mass spectra). Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended.

CHEM 5813. Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for graduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. This course is cross-listed with CHEM 4813H.

CHEM 5943. Biochemistry II. 3 Hours.
A continuation of CHEM 5813 covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid and amino acid metabolism, and molecular biology. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. Prerequisite: CHEM 5813.

CHEM 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Chemistry graduate students enroll in this course as needed until all CUMES are passed and the student is officially a doctoral candidate. Prerequisite: Chemistry graduate student. May be repeated for degree credit.

CHEM 6011. Chemistry Seminar. 1 Hour.
Weekly discussion of current chemical research. Departmental and divisional seminars in analytical chemistry, biochemistry, inorganic, organic, and physical chemistry are held weekly. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. May be repeated for up to 1 hours of degree credit.

CHEM 619V. Special Topics in Inorganic Chemistry. 1-3 Hour.
Topics which have been covered in the past include: technique and theory of x-ray diffraction, electronic structure of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry. May be repeated for degree credit.

CHEM 6283. Mass Spectrometry. 3 Hours.
This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with magnetic and electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Representative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: Graduate standing.

CHEM 629V. Special Topics in Analytical Chemistry. 1-3 Hour.
Topics that have been presented in the past include: electroanalytical techniques, kinetics of crystal growth, studies of electrode processes, lasers in chemical analysis, nucleosynthesis and isotopic properties of meteorites, thermoluminescence of geological materials, early solar system chemistry and analytical cosmochemistry. May be repeated for degree credit.

CHEM 649V. Special Topics in Physical Chemistry. 1-3 Hour.
Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectra, nuclear magnetic resonance spectroscopy, and methods of theoretical chemistry. May be repeated for degree credit.

CHEM 6633. Chemistry of Organic Natural Products. 3 Hours.
Selected topics concerned with structure elucidation and synthesis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633.

CHEM 6643. Organometallic Chemistry. 3 Hours.
Theories and principles of organometallic chemistry. Concepts include bonding, stereochemistry, structure and reactivity, stereochemical principles, conformational, steric and stereoelectronic effects. Transition metal catalysis of organic reactions will also be described. Knowledge of material comparable to CHEM 3713 and CHEM 3514 is recommended.

CHEM 6673. Organic Reaction Mechanisms. 3 Hours.
A detailed description of the fundamental reactions and mechanisms of organic chemistry. Prerequisite: CHEM 5633.

CHEM 669V. Special Topics in Organic Chemistry. 1-3 Hour.
Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereochemistry, photochemistry, and carbanion chemistry. May be repeated for degree credit.

CHEM 6823. Physical Biochemistry. 3 Hours.
Physical chemistry of proteins, nucleic acids, and biological membranes. Ultracentrifugation, absorption and fluorescent spectrophotometry, nuclear magnetic resonance spectrometry, x-ray diffraction, and other techniques. Prerequisite: CHEM 5813.

CHEM 6863. Enzymes. 3 Hours.
Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: CHEM 5813 and CHEM 5843.

CHEM 6873. Molecular Biochemistry. 3 Hours.
Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry and genetic engineering. Prerequisite: CHEM 5813 and CHEM 5843.

CHEM 6883. Bioenergetics and Biomembranes. 3 Hours.
Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843.

CHEM 700V. Doctoral Dissertation. 1-12 Hour.
Doctoral Dissertation. For chemistry graduate students who have passed all CUMES and have officially been admitted to doctoral candidacy. Prerequisite: Chemistry graduate student. May be repeated for degree credit.

Chinese (CHIN) Courses

CHIN 1003. Elementary Chinese I. 3 Hours.
Elementary Chinese.

CHIN 1013. Elementary Chinese II. 3 Hours.
Elementary courses stress correct pronunciation, Aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.
CHIN 2013. Intermediate Chinese II. 3 Hours.
Continued development of basic speaking comprehension and writing skills and intensive development of reading skills.

CHIN 3003. Advanced Chinese. 3 Hours.
Continues to develop speaking, listening, reading and writing skills and presents more complex forms and structures of the language as well as additional characters. Prerequisite: CHIN 2013.

CHIN 3033. Conversation. 3 Hours.
Guided conversation practice for the post-intermediate student. Prerequisite: CHIN 2013 or equivalent.

CHIN 3103. Chinese Culture through Film. 3 Hours.
This course explores Chinese culture through the lens of Chinese films and with an emphasis on contemporary Chinese communicative culture. The course is designed to give students analytical insights into Chinese culture, especially how Chinese history, philosophy, society, language, education, customs, and economic developments shape contemporary Chinese culture and Chinese people's communication. This course is taught in English; no knowledge of the Chinese language is required. May be repeated for up to 6 hours of degree credit.

CHIN 3983. Special Studies. 3 Hours.
May be offered in subject not specifically covered by courses otherwise listed. May be repeated for up to 6 hours of degree credit.

CHIN 4313. Culture and Society in China. 3 Hours.
Introduction of key principles, customs, and behaviors in Chinese society to help students understand the Chinese business context. This course is taught in English.

CHIN 4333. Business Chinese Language in Speaking and Writing. 3 Hours.
Introduction of Chinese vocabulary, formats, and expressions in business environments, such as company structures, management, banking and accounting, as well as how to read and write contracts, letters, and other business documents. Prerequisite: CHIN 3003 or equivalent Chinese proficiency.

Civil Engineering (CVEG) Courses

CVEG 2002. Introduction to Civil Engineering Plans and CADD. 2 Hours.
Development and preparation of design and construction plans; plan terminology and features; introduction to computer-aided drafting and design (CADD) software. Corequisite: Drill component. Prerequisite: Civil Engineering major or departmental consent.

CVEG 2015. Fundamentals of Mechanics for Civil Engineers. 5 Hours.
Provides the students with a foundation in the theory and principles of Statics and Mechanics of Materials for use in subsequent civil engineering courses. The course applies mathematics and physics to solve practical problems of mechanics. A general analysis approach is emphasized for problem solving and as an introduction to the Engineering Design Process. Pre- or Corequisite: MATH 3083 or MATH 2574. Prerequisite: MATH 2564 and PHYS 2054 with grades of C or higher.

CVEG 2051L. Surveying Systems Laboratory. 1 Hour.
Laboratory exercises demonstrating the principles and practices of surveying systems. Corequisite: CVEG 2053.

CVEG 2053. Surveying Systems. 3 Hours.
Coordinate geometry, measurements, and total integrated surveying systems; total stations, electronic data collection, and reduction; error analysis; applications to civil engineering and surveying practice. Corequisite: CVEG 2051L. Prerequisite: MATH 2554 or MATH 2445.

CVEG 2113. Structural Materials. 3 Hours.
Production, properties, behavior, and structural applications of concrete, steel, timber, masonry, and plastic. Statistical analysis methods for quality control are also covered. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2015 (formerly CVEG 2014) with a grade of C or better or MEEG 3013 with a grade of C or better.

CVEG 2851. Engineering Professional Practice Issues. 1 Hour.
Study of various issues related to the professional practice of engineering including ethics, professionalism, professional licensure, project procurement, social and political issues, globalization, and other legal issues.

CVEG 3131L. Soil Mechanics Laboratory. 1 Hour.
Index, strength, and consolidation properties of soils; test methods and specifications for soil sampling and testing. Corequisite: CVEG 3133.

CVEG 3133. Soil Mechanics. 3 Hours.
Introduction to geotechnical engineering. Properties of soils related to foundations, retaining walls, earth structures, and highways. Lecture 2 hours, laboratory 3 hours per week. Corequisite: CVEG 3131L. Pre- or Corequisite: CVEG 3213 and MATH 2584. Prerequisite: (MEEG 3013 or CVEG 2014) and (GEOL 1113 or GEOL 3002) and CVEG 2002, each with grades of C or better.

CVEG 3213. Hydraulics. 3 Hours.
Study of incompressible fluids. Topics include fluid properties, fluid statics, continuity, energy and hydraulic gradients, fundamentals of flow in pipes and open channels. Hardy Cross analyses, measurement of flow of incompressible fluids, hydraulic similitude and dimensional analysis. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2014 or MEEG 2003, either with a grade of C or better.

CVEG 3223. Hydrology. 3 Hours.
Flood routing procedures in storage reservoirs and channels. Hydrologic planning including storage reservoir design, frequency duration analysis, and related techniques. Prerequisite: (CVEG 2053 or BENG 2643), (CVEG 3213 or MEEG 3503 or CHEG 2133) and INEG 2313, each with grades of C or better.

CVEG 3243. Environmental Engineering. 3 Hours.
Introduction to theories and fundamentals of physical, chemical, and biological processes with emphasis on water supply and wastewater collection, transportation, and treatment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2584 with a grade of C or better, and CHEM 1103 or CHEM 1113 with a grade of C or better.

CVEG 3303. Structural Analysis. 3 Hours.
Truss analysis, influence lines for beams and frames, and effects of moving loads. Deformation of beams, frames, and trusses. Analysis of indeterminate structures by moment area, slope deflection, and moment distribution methods; approximate methods of analysis. Lecture 3 hours, drill 3 hours per week. Corequisite: Drill component. Prerequisite: MEEG 3013 or CVEG 2014, each with a grade of C or better.

CVEG 3413. Transportation Systems Engineering. 3 Hours.
Transportation Systems Engineering: Introduction to transportation systems engineering and planning. Includes the following topics: transportation governance, financing, and the effect on the environment; traffic flow theory; safety; traffic operations and control; capacity; and travel demand modeling. Prerequisite: CVEG 2053 and INEG 2313, each with a grade of C or better.

CVEG 4053. Land Surveying. 3 Hours.
Historical background of property surveys. Detailed consideration of original surveys and the United States Public Land Surveys. Writing adequate land descriptions. Interpretation of old descriptions. Excess and deficiency. Riparian rights. Field practice in relocation of old corners. Prerequisite: Senior standing and CVEG 2053 with a grade of C or better.
CVEG 4083. Control Surveys. 3 Hours.
Sun and Polaris observations for astronomic azimuth, solar access studies; control traversing, leveling, triangulation; state plane coordinate systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2053 and CVEG 2051L with grades of C or better.

CVEG 4143. Foundation Engineering. 3 Hours.
Analysis and design of retaining walls, footings, sheet piles, and piles. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 3133, INEG 2313 and INEG 2413, each with a grade of C or better.

CVEG 4153. Earth Structures. 3 Hours.
The use of soil as a construction material including compaction, cement, lime, and fly ash stabilization. Special topics include seepage, slope stability, swelling, and collapsible soils. Prerequisite: CVEG 3133 with a grade of C or better.

CVEG 4203. Environmental Regulations and Permits. 3 Hours.
Topics include federal and state environmental regulations, the permitting process, permit requirements and related issues. Prerequisite: CVEG 3243 with a grade of C or better and senior standing.

CVEG 4223. Groundwater Hydrology. 3 Hours.
Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223.

CVEG 4243. Environmental Engineering Design. 3 Hours.
Application of physical, biological, and chemical operations and processes to the design of water supply and wastewater treatment systems. Prerequisite: CVEG 3243, INEG 2313 and INEG 2413, each with a grade of C or better.

CVEG 4253. Small Community Wastewater Systems. 3 Hours.
Design of innovative and alternative wastewater collection, transport, and treatment systems typically suited for rural and small community applications. Recitation 3 hours per week. Prerequisite: CVEG 3243.

CVEG 4263. Air Pollution Control. 3 Hours.
Fundamentals of air pollution causes, effects, and measurements; as well as, control methods with application to current industrial problems. Prerequisite: CVEG 3213 or MEEG 3503.

CVEG 4273. Open Channel Flow. 3 Hours.
Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223.

CVEG 4303. Reinforced Concrete Design I. 3 Hours.
Design of reinforced concrete elements with emphasis on ultimate strength design supplemented by working stress design for deflection and crack analysis. Prerequisite: CVEG 2113 and CVEG 3304 with grades of C or better.

CVEG 4313. Structural Steel Design I. 3 Hours.
Design of structural steel elements by elastic design the Load and Resistance Factor Design method. Intensive treatment of tension members, beams, columns, and connections. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3304 with a grade of C or better.

CVEG 4323. Structural Loadings. 3 Hours.
Theoretical background to and practical code requirements for various structural loadings. These include dead loads, occupancy loads, roof loads and ponding, snow loads, granular loads, vehicular loads, wind loading, and seismic loads. Prerequisite: (CVEG 3304 or CVEG 3303), INEG 2413 and (CVEG 4303 or CVEG 4313), each with a grade of C or better.

CVEG 4343. Reinforced Masonry Design. 3 Hours.

CVEG 4353. Timber Design. 3 Hours.
Selection of timber beams, columns, and beam-columns. Physical properties of wood, analysis and design of timber connections. Truss design, glulam members, timber bridge design, treatment for decay, and fire protection. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3304 with a grade of C or better.

CVEG 4393. Reinforced Concrete Design II. 3 Hours.
Shear strength, minimum thickness requirements, and deflection calculations for reinforced concrete structural slabs. Design of one-way and two-way structural slabs by the direct design and equivalent frame methods. Prerequisite: CVEG 4303 with a grade of C or better.

CVEG 4413. Pavement Evaluation and Rehabilitation. 3 Hours.
Introduction of concepts and procedures for pavement condition surveys; evaluation by nondestructive and destructive testing; maintenance strategies; rehabilitation of pavement systems for highway and airfields; pavement management systems. Prerequisite: CVEG 4433 with a grade of C or better.

CVEG 4423. Geometric Design. 3 Hours.
The geometric design of streets and highways, based on theory and application of driver and vehicle characteristics. Corequisite: Lab component. Prerequisite: CVEG 3413 with grade of C or better.

CVEG 4433. Transportation Pavements and Materials. 3 Hours.
Study of the engineering properties and behavior of materials commonly used in transportation facilities as they relate to the design and performance of flexible and rigid pavement systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 3133, CVEG 3413, and INEG 2313 with grades of C or better.

CVEG 4453. Construction Management. 3 Hours.
Introduction to methods and procedures for management of civil engineering construction projects including organization, plans and specs, cost estimating and bidding, project planning and finance, quality control/ assurance, construction safety, cost management, labor issues, change orders, and subcontractor issues. Prerequisite: Senior standing and Civil Engineering majors only.

CVEG 4482. Geotechnical Design Project. 2 Hours.
Comprehensive engineering design project primarily related to environmental issues. Corequisite: CVEG 4423.

CVEG 4483. Geotechnical Design Project. 2 Hours.
Comprehensive engineering design project primarily related to geotechnical issues. Prerequisite: CVEG 4303 with a grade of C or better.

CVEG 4484. Transportation Design Project. 2 Hours.
Comprehensive engineering design project primarily related to transportation issues. Corequisite: CVEG 4423. Prerequisite: CVEG 2002 with a grade of C or better.

CVEG 4486. Sustainability in Civil Engineering. 3 Hours.
Qualify and quantify the economic, environmental, societal, and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural, and transportation engineering through verbal and written communications. Prerequisite: Senior standing.
CVEG 488V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Senior standing. May be repeated for up to 6 hours of degree credit.

CVEG 488VH. Honors Special Problems. 1-6 Hour.
Service Learning in Belize. Prerequisite: Senior standing. This course is equivalent to CVEG 488V.

CVEG 490. Fundamentals of Engineering Seminar. 0 Hours.
Preparation for students taking the Fundamentals of Engineering (FE) examination, administered by the National Council of Examiners for Engineering and Surveying (NCEES). Concept review and problem-solving drills for topics covered on the FE-Civil exam. Prerequisite: Civil Engineering major and senior standing.

CVEG 491VH. Honors Studies in Geotechnical Engineering. 1-6 Hour.
The study of advanced topics in the geotechnical engineering field. May include participation in geotechnical engineering courses normally available only to graduate students. Prerequisite: CVEG 3133 with a grade of C or better. May be repeated for up to 6 hours of degree credit.

CVEG 492VH. Honors Studies in Environmental Engineering. 1-6 Hour.
The study of advanced topics in the environmental engineering field. May include participation in environmental engineering courses normally available only to graduate students. Prerequisite: CVEG 3243 with a grade of C or better. May be repeated for up to 6 hours of degree credit.

CVEG 493VH. Honors Studies in Structural Engineering. 1-6 Hour.
The study of advanced topics in the structural engineering field. May include participation in structural engineering courses normally available only to graduate students. Prerequisite: CVEG 3304 with a grade of C or better. May be repeated for up to 6 hours of degree credit.

CVEG 494VH. Honors Studies in Transportation Engineering. 1-6 Hour.
The study of advanced topics in the transportation engineering field. May include participation in transportation engineering courses normally available only to graduate students. Prerequisite: CVEG 3413 with a grade of C or better. May be repeated for up to 6 hours of degree credit.

CVEG 498VH. Honors Undergraduate Thesis. 3 Hours.
Thesis research for civil engineering students enrolled in the honors college. Prerequisite: Honors College.

CVEG 5100. Graduate Seminar in Civil Engineering. 0 Hours.
A weekly seminar devoted to civil engineering research topics. Appropriate grade to be "S".

CVEG 5113. Soil Dynamics. 3 Hours.
This course covers propagation of stress waves in elastic and inelastic materials, dynamic loading of soils, and stiffness and damping properties of soils. Use of field and laboratory techniques to determine shear wave velocity of soils. Also includes applications of dynamic soil properties in site stiffness characterization, geotechnical earthquake engineering, evaluation of ground improvement, and design of machine foundations. Prerequisite: CVEG 4143 with a grade of C or better.

CVEG 5123. Measurement of Soil Properties. 3 Hours.
Consideration of basic principles involved in measuring properties of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4143 with a grade of C or better.

CVEG 5143. Transportation Soils Engineering. 3 Hours.
Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade evaluation procedures; repeated load behavior of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3133 with a grade of C or better.

CVEG 5163. Seepage and Consolidation. 3 Hours.
Investigation of the flow of water through soils and the time rate of compression of soils. Characterization of the hydraulic conductivity of soils in the field, seepage through earth dams, excavation cut-off walls, and other seepage control systems. Analytical and experimental investigations of soil volume change under hydraulic and mechanical loading. Design of earth and rock dams, well pumping, and vertical and radial consolidation in embankments. Prerequisite: CVEG 4143 with a grade of C or better.

CVEG 5173. Advanced Foundations. 3 Hours.
Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Dutch cone, and other specialized foundation design topics. Prerequisite: CVEG 4143 with a grade of C or better.

CVEG 5183. Geo-Environmental Engineering. 3 Hours.
Study of the geotechnical aspects of waste containment systems and contaminant remediation applications. Analysis and measurement of flow of water and contaminants through saturated and unsaturated soils, clay mineralogy and soil-chemical compatibility, and mechanical and hydraulic behavior of geomembranes, geotextiles, and geosynthetic clay liners. Design and construction aspects of compacted clay and composite landfill liners, drainage systems, and landfill covers. Prerequisite: CVEG 3133 with a grade of C or better.

CVEG 5193. Geotechnical Earthquake Engineering. 3 Hours.
This course covers stress wave propagation in soil and rock; influence of soil conditions on seismic ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; seismic response of earth structures and slopes. Prerequisite: CVEG 4143 with a grade of C or better.

CVEG 5203. Water Chemistry. 3 Hours.
This course provides a basis for applying principles of physical chemistry to understanding the composition of natural waters and to the engineering of water and wastewater treatment processes. Topics covered include chemical equilibrium (algebraic, graphical, and computer-aided solution techniques); acid-base equilibria and buffering; oxidation and reduction reactions; and solid precipitation and dissolution. Prerequisite: Graduate standing or CVEG 3243 and instructor approval.

CVEG 5213. Water Treatment & Distribution System Design. 3 Hours.
Design of industrial and municipal water treatment plants. Discussion of raw and treated water requirements for the several uses. Distribution system analysis and design including distribution storage and pumping. Prerequisite: CVEG 3243 with a grade of C or better.

CVEG 5214. Advanced Wastewater Process Design and Analysis. 4 Hours.
Application of advanced techniques for the analysis of wastewater treatment facilities. Physical, chemical and biological processes for removing suspended solids, organics, nitrogen, and phosphorus. Laboratory treatability studies will be used to develop design relationships. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4243 with a grade of C or better.

CVEG 5233. Microbiology for Environmental Engineers. 3 Hours.
Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and stream pollution. Prerequisite: CVEG 3243 with a grade of C or better.

CVEG 5243. Groundwater Hydrology. 3 Hours.
Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223.
CVEC 5253. Physical-Chemical Processes for Water and Wastewater Treatment. 3 Hours.
This course provides a fundamental understanding of physical and chemical processes used in the treatment of drinking water and wastewater. Principals of mass balance are applied to understand the impact of reactor hydraulics (ideal and non-ideal flow) and reaction kinetics on process performance and identify important process variables. Chemical processes covered include disinfection, gas transfer, adsorption, and ion exchange; physical processes covered include coagulation, flocculation, sedimentation, filtration, and membranes. Prerequisite: CVEG 3213 or CVEG 3223.

CVEC 5273. Open Channel Flow. 3 Hours.
Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage facility design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223.

CVEC 5293. Water Reuse. 3 Hours.
CVEC 5293 is a graduate-level course that discusses topics related to water reclamation and reuse. Topics include past and current practices of water reuse, health and environmental issues related to water reuse, water technologies and systems for water reuse, and water reuse applications. Prerequisite: CVEG 3243 or equivalent course.

CVEC 5303. Theory of Stability. 3 Hours.
Study of structural members subjected to compression. Analysis of compression members considering support conditions and within frame configurations. Analysis of beams considering lateral torsional buckling. AISC Steel Manual strength equations related to columns and beams are derived and discussed. Prerequisite: Graduate standing.

CVEC 5313. Matrix Analysis of Structures. 3 Hours.
Energy and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3304 with a grade of C or better.

CVEC 5323. Structural Dynamics. 3 Hours.
Dynamics response of single and multidegree of freedom systems. Modal analysis. Response spectra. Computer programs for dynamic analysis. Design considerations for structures subjected to time-varying forces including earthquake, wind, and blast loads. Prerequisite: CVEG 3303 with a grade of C or better.

CVEC 5333. Concrete Materials. 3 Hours.
Topics include portland cement production, supplementary cementing materials, fresh and hardened concrete properties, mixture proportioning, chemical admixtures, curing, and specialty concretes. Corequisite: Lab component. Prerequisite: CVEG 4303 with a grade of C or better.

CVEC 5343. Highway Bridges. 3 Hours.
Economics of spans, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 3413 and CVEG 4303 with grades of C or better.

CVEC 5353. Prestressed Concrete Design. 3 Hours.
Analysis and design of prestressed concrete beams. Topics include flexural analysis, prestress bond, draping and debonding, allowable stresses, shear analysis and design, camber prediction, and prestress losses. Prerequisite: CVEG 4303 with a grade of C or better.

CVEC 5363. Advanced Topics in Reinforced Concrete. 3 Hours.
Analysis and design of reinforced concrete members. Topics include slender columns, one-way and two-way slab design, strut and tie design, and torsion. Prerequisite: CVEG 4303 with a grade of C or better.

CVEC 5373. Advanced Structural Steel Design. 3 Hours.
Design of structural steel components using the Load and Resistance Factor Design method. Intensive treatment of simple and eccentric connections, composite construction, plate girders, and plastic analysis and design. Prerequisite: CVEG 4313 with a grade of C or better.

CVEC 5383. Finite Element Methods in Civil Engineering. 3 Hours.
An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: Graduate standing.

CVEC 5393. Advanced Strength of Materials. 3 Hours.
The course will continue from the basic material addressed in the undergraduate course and investigate in more detail stress analysis as it pertains to civil engineering type problems. Topics addressed in the course will include stress analysis (two-dimensional), constitutive relationships, solutions for two-dimensional problems, flexure, torsion, beams on elastic foundations, and energy methods. Prerequisite: CVEG 2015 or MEEG 3013 with a grade of C or better.

CVEC 5403. Advanced Reinforced Concrete II. 3 Hours.
Design of circular and rectangular reinforced concrete tanks for fluid and granular loads. Prerequisite: CVEG 4303 with a grade of C or better.

CVEC 5413. Transportation and Land Development. 3 Hours.
Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: Graduate standing.

CVEC 5423. Structural Design of Pavement Systems. 3 Hours.
An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement jointing and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4433 with a grade of C or better.

CVEC 5433. Traffic Engineering. 3 Hours.
A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite: CVEG 3413 with a grade of C or better or graduate standing.

CVEC 5463. Transportation Modeling. 3 Hours.
The use of mathematical techniques and/or computer software to model significant transportation system attributes. May compare model results with actual measured traffic attributes, using existing data sources and/or collecting and analyzing field data. Pre- or Corequisite: Lab component. Prerequisite: Graduate standing.

CVEC 5473. Transportation System Characteristics. 3 Hours.
Introduction to traffic flow theory, including traffic stream interactions and capacity. Applications for planning, design, operations. Prerequisite: CVEG 3413 with a grade of C or better and graduate standing.

CVEC 5483. Transportation Management Systems. 3 Hours.
Six transportation management systems are explored: pavement, bridge, intermodal, public transportation, safety, and congestion. System approaches are presented. Techniques are introduced on how to optimally allocate resources. Pavement and bridge structure basics are discussed and their performance parameters are presented. Case studies are used to illustrate the interfaces among various modes of transportation. Safety and congestion problems in transportation are addressed.

CVEC 562V. Research. 1-6 Hour.
Fundamental and applied research. Prerequisite: Graduate standing.
CVEG 563V. Special Problems. 1-6 Hour. Special problems in CVEG. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

CVEG 5863. Fundamentals of Sustainability in Civil Engineering. 3 Hours. Qualify and quantify the economic, environmental, societal and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural and transportation through verbal and written communications. Students cannot receive credit for both CVEG 4863 and CVEG 5863. Prerequisite: Graduate standing or instructor consent.

CVEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours. The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. This course is cross-listed with BMEG 5953, MEEG 5953.

CVEG 600V. Master's Thesis. 1-6 Hour. Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

CVEG 700V. Doctoral Dissertation. 1-18 Hour. Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Classical Studies (CLST) Courses

CLST 1003. Introduction to Classical Studies: Greece. 3 Hours. An introduction to the world of Ancient Greece, from the Trojan War to Alexander the Great. Progresses chronologically, focusing on the literary, artistic, political, and philosophical ideas of the Greeks. Who were they and how are we like them?.

CLST 1003H. Honors Introduction to Classical Studies: Greece. 3 Hours. Honors. Prerequisite: Honors candidacy. This course is equivalent to CLST 1003.

CLST 1013H. Honors Introduction to Classical Studies: Rome. 3 Hours. Honors introduction to Classical Studies: Rome. Prerequisite: Honors candidacy. This course is equivalent to CLST 1013.

CLST 2323. Greek and Roman Mythology. 3 Hours. A study of the stories, figures, and motifs in the mythology of Greece and Rome. Prerequisite: ENGL 1013 and ENGL 1023.

CLST 3003. Special Topics in Classical Studies. 3 Hours. Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. May be repeated for up to 9 hours of degree credit.

CLST 3003H. Honors Special Topics in Classical Studies. 3 Hours. Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. Prerequisite: Honors standing. May be repeated for up to 9 hours of degree credit.

CLST 399VH. Honors Course Classical Studies. 1-6 Hour. CLST honors thesis projects or CLST honors study abroad programs. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

CLST 4003H. Honors Classical Studies Colloquium. 3 Hours. Covers a special topic or issue in classical studies. Appropriate for honors program students and students pursuing classical studies. May be repeated when the content is changed. Prerequisite: Junior standing. May be repeated for up to 9 hours of degree credit.

CLST 4413. Greek Art and Archaeology. 3 Hours. Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces.

CLST 4413H. Honors Greek Art and Archaeology. 3 Hours. Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces.

CLST 4423. Roman Art and Archaeology. 3 Hours. Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces.

Communication (COMM) Courses

COMM 1003. Basic Course in the Arts: Film Lecture. 3 Hours. Introduction to film as entertainment and art. How to look at film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time.

COMM 1003H. Honors Basic Course in the Arts: Film Lecture. 3 Hours. Introduction to film as entertainment and art. How to look at film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. Corequisite: Drill component. This course is equivalent to COMM 1003.

COMM 1023. Communication in a Diverse World. 3 Hours. Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts.

COMM 1023H. Honors Communication in a Diverse World. 3 Hours. Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. Prerequisite: Honors standing. This course is equivalent to COMM 1023.

COMM 1233. Media, Community and Citizenship. 3 Hours. Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizen'ship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems.
COMM 1233H. Honors Media, Community and Citizenship. 3 Hours.
Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. Prerequisite: Honors standing. This course is equivalent to COMM 1233.

COMM 1313. Public Speaking (ACTS Equivalency = SPCH 1003). 3 Hours.
Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentation skills including multimedia support, speech criticism, and the listening process.

COMM 1313H. Honors Public Speaking. 3 Hours.
Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentation skills including multimedia support, speech criticism, and the listening process. This course is equivalent to COMM 1313.

COMM 2303. Advanced Public Speaking. 3 Hours.
Continuing study of the invention and adaptation or oral discourse to the needs of listeners. Consideration of the problems of communication in platform presentation. Prerequisite: COMM 1313.

COMM 2323. Interpersonal Communication. 3 Hours.
Personal and interpersonal factors affecting communication in everyday life. Emphasis upon ways in which interpersonal perception, physical environment, semantic choices, and nonverbal cues affect communication primarily in the context of work, family, and other personal experiences.

COMM 2333. Introduction to Communication Research. 3 Hours.
Introduction to the basic assumptions underlying communication inquiry; resources for and methods of data collection in communication research; and techniques for organization, interpretation, reporting, and evaluation of communication research.

COMM 2343. Introduction to Small-Group Communication. 3 Hours.
An introduction to procedures used in exchanging information, solving problems, determining policies, and resolving differences in committees and other small groups. Prerequisite: COMM 1313.

COMM 2613. Nonverbal Communication. 3 Hours.
Creates an understanding of the functions of nonverbal cues operating in human communication processes and develops familiarity with recent research in the field of nonverbal communication. Prerequisite: COMM 1023.

COMM 2813. Introduction to Electronic Media. 3 Hours.
Introduction to the industries centered around electronic media, including radio, broadcast and cable television, telephony, computer information systems, and digital media. Emphasis on the historical development, organizational patterns, and cultural functions of the media.

COMM 298V. Topics in Communication. 1-3 Hours.
Topics in communication not represented in other lower division courses. Prerequisite: Completion of at least 3 hours of COMM coursework.

COMM 3143. Language and Expressive Culture. 3 Hours.
This course explores the complex interrelationship of language, culture, and social identity. Verbal art and expressive culture are examined from a variety of anthropological perspectives. Topics include ethnographies of speaking, discourse analysis, cultural performances, and the performative aspects of oral expression. This course is cross-listed with ANTH 3143, ENGL 3143.

COMM 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, and the history of linguistic scholarship. Prerequisite: Junior standing. This course is cross-listed with ANTH 3173, ENGL 3173, WLLC 3173.

COMM 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023, COMM 1003, and junior or senior standing. This course is cross-listed with AAST 3263, ENGL 3263, JOUR 3263.

COMM 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians Prerequisite: Junior or senior standing. This course is cross-listed with JOUR 3273, AAST 3273.

COMM 3333. Communication Criticism. 3 Hours.
Basic elements and theoretical perspectives on criticism of public communication. Extensive practice in written analysis of events in public address, film, television, and other mass media. Prerequisite: COMM 1233.

COMM 3343. Contemporary Communication Theory. 3 Hours.
Study of the nature of the communication process as it is reflected in the individual, in interpersonal settings, in one-to-many situations, and in the mass media. Prerequisite: COMM 1023 and COMM 2333 or permission of instructor.

COMM 3353. Argumentation: Reason in Communication. 3 Hours.
Concepts characterizing rational discourse, with a concern for examining validity and fallacy. Consider traditional and contemporary models for analyzing argument, including an examination of the philosophy of argument and a practical inquiry into the uses of argument in contemporary rhetorical discourse. Prerequisite: COMM 1313.

COMM 3373. Leadership Communication. 3 Hours.
An analysis of leadership as a discursive process, focusing on how leadership emerges and is enacted on a daily basis through communication-related behaviors. Prerequisite: COMM 1023 or permission of instructor.

COMM 3383. Persuasion. 3 Hours.
Introduction to theories of persuasion with emphasis on application and effect. Prerequisite: COMM 1313.

COMM 3423. Science Fiction Film. 3 Hours.
This class concentrates on how science fiction in various communication media influences and is, in turn, influenced by broad features of cultural life. The class considers the impact of science fiction on science fact, the military, space travel, religion, race, gender, social class, education, politics, technology, and fashion styles. Prerequisite: COMM 1003 and COMM 1233.

COMM 3433. Family Communication. 3 Hours.
Study of the nature, functions, and management of communication patterns in the family. Focus is on understanding routine interpersonal interactions, conflict patterns, authority structures, and decision-making processes within the context of the contemporary family. Prerequisite: COMM 2323.

COMM 3443. Introduction to Rhetorical Theory. 3 Hours.
Interpretive-critical study of rhetoric in public contexts. Prerequisite: COMM 1313.
COMM 3503. Popular Communication and Culture. 3 Hours.
This course is an introduction to basic theories and topics of Popular Communication and Culture studies. The course will emphasize understanding popular media communication forms. Prerequisite: COMM 1023 and COMM 1233.

COMM 3673. Mediated Communication. 3 Hours.
Focuses on media messages and their social/cultural effects. Includes a critical examination of media institutions and the ways they vie for audiences. Other topics include the ways people construct meaning from messages, media's influence on attitudes, media's role in cultural life, and audiences as critical consumers of media. Prerequisite: COMM 1233.

COMM 3703. Organizational Communication. 3 Hours.
An introduction to the theory, processes, and management of communication in organizations, with opportunities for simulated application. Prerequisite: COMM 1023 and COMM 1313.

COMM 3763. Health Communication. 3 Hours.
Examines communication within health care organizations and teams. Issues may include patient-provider communication, communication among health care professionals, negative consequences of poor communication in health care delivery, and the use of technology in health-related information dissemination and campaigns. Prerequisite: COMM 1023.

COMM 3803. Survey of Social Media. 3 Hours.
Surveys research on social media, focusing on the potential cognitive, social, cultural, political, and/or economic consequences of social media and on strategies for engaging with and through social media to promote personal, social and civic goals. Pre- or Corequisite: COMM 1233.

COMM 3883. Rhetoric of Social Movements. 3 Hours.
Study of the functions of rhetoric as it appears in the context of social movements such as American independence, women's equality, civil rights, populism, and new conservatism. Prerequisite: COMM 1313.

COMM 3923H. Honors Colloquium. 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in communication). May be repeated for degree credit.

COMM 3983. Special Topics. 3 Hours.
Communication topics which are not usually presented in depth in regular courses. Prerequisite: At least 3 hours of COMM coursework. May be repeated for degree credit.

COMM 3991H. Honors Course in Communication Research. 1 Hour.
The Honors Course in Communication is the student's first step toward developing an honors thesis project. The course is designed to facilitate the exploration of potential thesis topics, selection of a viable study for the thesis, and the conceptualization of that study. Prerequisite: Honors candidacy.

COMM 4113. Legal Communication. 3 Hours.
Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and juries. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. Prerequisite: COMM 1313 or permission of instructor.

COMM 4133. Media and the Family. 3 Hours.
This course is designed to examine our culture's images, definitions, and ideas regarding family and domestic life. This examination involves a critical analysis of media messages regarding families, as well as an in-depth exploration of media's roles in daily domestic life. Prerequisite: COMM 1233 and COMM 2813.

COMM 4143. American Film Survey. 3 Hours.
A survey of major American film genres, major directors and films that have influenced the development of motion pictures. Prerequisite: COMM 1003 or permission of instructor.

COMM 4283. Communication in Contemporary Society. 3 Hours.
An examination of research and theory on the process and effects of communication in modern society. Prerequisite: COMM 1023 and COMM 1233 or permission of instructor.

COMM 4313. Language and Society of Japan. 3 Hours.
The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and customs of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Prerequisite: Junior standing.

COMM 4323. Communication and Conflict. 3 Hours.
Study of the processes, effects, and management of communicative conflict, including a consideration of conflict styles, power, goals, tactics, assessment, self-intervention and third-party intervention. Prerequisite: COMM 1023 or COMM 1313 or permission of instructor.

COMM 4333. Communication and Gender. 3 Hours.
Study of the nature, construction, functions, and effects of gender and gender-role stereotypes related to verbal and nonverbal communication, small-group and organizational interaction, and mass mediated images in contemporary culture. Prerequisite: COMM 2323 or permission of instructor.

COMM 4343. Intercultural Communication. 3 Hours.
Study of intercultural communication skills, intercultural issues and their impact at home and abroad, and cross-cultural comparisons of communication phenomena from a variety of theoretical perspectives. Prerequisite: COMM 1023 or COMM 1233.

COMM 4353. American Public Address. 3 Hours.
Historical and critical study of the leading American speakers, their speeches, the issues with which they were identified. Lectures, discussion, reports, and critical papers. Prerequisite: Junior standing.

COMM 4363. Gender, Race and Power. 3 Hours.
Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. This course is cross-listed with GNST 4363.

COMM 4373. Political Communication. 3 Hours.
Study of the nature and function of the communication process as it operates in the political environment.

COMM 4383. Rhetoric of the Modern American Presidency. 3 Hours.
A study of the increasing reliance of contemporary presidents on public persuasion through rhetorical discourse.

COMM 4393. Freedom of Speech: Cases & Issues. 3 Hours.
Study of philosophy, cases, and issues relevant to the first amendment right to the free expression, with focus on issues relevant to internal security, obscenity, pornography, slander, and the regulation of communication. Prerequisite: COMM 1313 and COMM 2333.

COMM 4613. Rhetoric of American Women. 3 Hours.
Examines the social and cultural assumptions that have limited the role of women in public communication. Focus is on the rhetorical biographies of selected women and their arguments on important social and political issues. Prerequisite: At least 6 hours of communication courses.

COMM 4623. Relational Communication. 3 Hours.
Review of the major theories and concepts in a relational approach to interpersonal communication. Provides exposure to a sampling of the research findings in relational communication. Prerequisite: COMM 2323 or permission of instructor.
COMM 4633. History and Development of International Film I. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. Prerequisite: COMM 1003.

COMM 4643. Environmental Communication. 3 Hours.
Explores how communication is used by individuals, corporations, and governments to shape public debates about environmental issues. Topics include rhetorical strategies, the publics’ right to information and input, dispute resolution techniques, advocacy campaigns, and green marketing. Prerequisite: COMM 1233 and COMM 1313 and COMM 2333 or permission of instructor.

COMM 4683. Documentary Film. 3 Hours.
A study and analysis of the documentary film as a discrete film form and as an important contribution to the international cinematic scene. Prerequisite: COMM 1003.

COMM 4733. Reel Women. 3 Hours.
An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives. Prerequisite: COMM 1003.
This course is cross-listed with GNST 4733.

COMM 4743. Representational Issues in Film. 3 Hours.
An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film - both historically and culturally. Prerequisite: COMM 1003.
This course is cross-listed with GNST 4743.

COMM 4763. Health Communication Campaigns. 3 Hours.
Canvasses the theoretical frameworks used in the conceptualization of communication campaigns focused on health information dissemination and the purposes these campaigns serve. Students participate in a service learning project by defining campaign goals; identifying, segmenting, and assessing target audiences; and designing messages for multi-mediated health campaigns. Prerequisite: COMM 1023.

COMM 4773. Treatment of Native Americans in Film. 3 Hours.
This course compares the treatment of Native Americans in film with how representatives of this group identify themselves. Particular attention is paid to how motion pictures focusing on Native Americans produced by indigenous filmmakers compare to treatments of this people produced by Hollywood and others. Prerequisite: COMM 1003.

COMM 4803. Seminar in Social Media. 3 Hours.
This class encourages in depth examination of contemporary theory and research on the potential effects of social media on cognitive, social, cultural, political, affective, and economic structures. Focus is on critical thinking and contextualization of social media. Pre- or Corequisite: COMM 1233.

COMM 4823. Children and Media. 3 Hours.
An in-depth examination of children's use of media and the effects of media content on child and adolescent development. Topics may include violence and sex in media, commercialism, and new media. Prerequisite: COMM 3673.

COMM 4843. Computer-Mediated Communication. 3 Hours.
Provides an in-depth consideration of the nature of computer-mediated communication by examining its use and effects in interpersonal, work, educational, and societal contexts.

COMM 4853. Telecommunication Policy. 3 Hours.
Research and discussion of social, ethical, education, cultural, and technological aspects of telecommunications with attention given to changing programming patterns, world systems of broadcasting, data transmission, emerging technology, international politics, and regulatory policies. Prerequisite: COMM 2813 or permission of instructor.

COMM 4863. Seminar in Media. 3 Hours.
Research/discussion of contemporary issues in media. Emphasis on the economic and social impact of advertising, news, censorship, programs directed toward children, portrayals of women and minorities, future trends in media technologies, and analysis of the changing media landscape. Prerequisite: COMM 1233 or permission of instructor.

COMM 4883. Television and American Culture. 3 Hours.
Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of television history, programs and audiences; particularly how race and gender shape content and reception of programming. Prerequisite: COMM 1233 and COMM 2813.

COMM 490V. Special Problems. 1-6 Hour.
Credit arranged. Prerequisite: COMM 2333 and at least 9 hours of COMM coursework. May be repeated for up to 6 hours of degree credit.

COMM 4913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations. Prerequisite: Junior standing and completion of 18 hours in communication courses. May be repeated for up to 6 hours of degree credit.

COMM 499VH. Honors Thesis. 1-3 Hour.
Honors thesis under the direction of a faculty member in the Department of Communication. Pre- or Corequisite: COMM 3991H. Prerequisite: Honors standing. May be repeated for up to 6 hours of degree credit.

COMM 5111. Colloquium in Communication Research. 1 Hour.
Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence. May be repeated for degree credit.

COMM 5113. Historical and Legal Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of historical and legal research methods in communication. May be repeated for up to 3 hours of degree credit.

COMM 5123. Quantitative Research Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of social scientific research methods in communication.

COMM 5133. Media Processes & Effects. 3 Hours.
Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory.

COMM 5143. Ethnographic Methods in Communication. 3 Hours.
This class focuses upon the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills.

COMM 5163. Introduction to Communication Paradigms. 3 Hours.
Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research.

COMM 5173. Qualitative Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior.

COMM 5183. Interpretive Research Methods in Communication. 3 Hours.
Examines various perspectives used to analyze and critique various texts (e.g., media programming, speeches).

COMM 5193. Historical and Legal Research Methods in Communication. 3 Hours.
Focuses on historical and legal research methods in communication and the purposes these campaigns serve. May be repeated for up to 6 hours of degree credit.

COMM 5203. Research Methods in Communication. 3 Hours.
Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research.

COMM 5213. Quantitative Research Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of social scientific research methods in communication.

COMM 5233. Media Processes & Effects. 3 Hours.
Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory.

COMM 5513. Media Processes & Effects. 3 Hours.
Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory.

COMM 5514. Ethnographic Methods in Communication. 3 Hours.
This class focuses upon the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills.

COMM 5563. Introduction to Communication Paradigms. 3 Hours.
Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research.

COMM 5573. Qualitative Methods in Communication. 3 Hours.
Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior.
COMM 5193. Seminar in Communication. 3 Hours.
Research, discussion, and papers focus on one of a variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours. Prerequisite: Graduate standing. May be repeated for up to 3 hours of degree credit.

COMM 5303. Seminar in Rhetorical Theory. 3 Hours.
Humanistic theories of communication and rhetoric with emphasis upon the development of rhetorical theory in the classical world and upon contributions of contemporary theorists. Prerequisite: Graduate standing.

COMM 5323. Seminar in Persuasion. 3 Hours.
Focus is on comparing theoretical accounts of persuasion and research evidence concerning the effects of various factors on persuasion.

COMM 5333. Interpersonal Communication Theory. 3 Hours.
Survey of the theoretical orientations in interpersonal communication with primary focus on conceptual, philosophical and research issues.

COMM 5343. Interpersonal Communication. 3 Hours.
Theory and research concerning the exchange of information and the mutual influencing of behavior among people. Prerequisite: Graduate standing.

COMM 5353. Rhetorical Criticism. 3 Hours.
A seminar in rhetorical criticism. A study of the development of standards of rhetorical appraisal from the foundations of the art of speaking to the modern period; examination of contemporary approaches to rhetorical appraisal and practice in critical analysis of contemporary address.

COMM 5363. Seminar in Small Group Communication. 3 Hours.
A consideration of recent developments in small group research which relate to problem solving tasks, leadership and other kinds of human interaction through speech communication. Emphasis given to the interpersonal speech transaction and to the emergence of participant roles. Prerequisite: COMM 2343. This course is cross-listed with SOCI 5363.

COMM 5373. Content Analysis. 3 Hours.
Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: Graduate standing.

COMM 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. This course is cross-listed with PLSC 5383.

COMM 5403. Organizational Communication Theory. 3 Hours.
A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports. Prerequisite: Graduate standing.

COMM 5413. Organizational Communication Research. 3 Hours.
A seminar on conducting applied research within an organizational setting. Prerequisite: COMM 5403 and graduate standing.

COMM 5423. Seminar in Mass Media Cognition. 3 Hours.
Seminar exploring how people learn from written, aural and visual mass media messages. Topics to include attention, memory, comprehension, emotional response, arousal, unconscious processing, picture perception and person perception. Seminar will be concerned with most popular media (e.g., television radio, newspaper, and film), and with several content genres (e.g., entertainment, news, advertising).

COMM 5433. Marital Communication. 3 Hours.
An exploration of the major theories and lines of research that examine marital communication in contemporary American life.

COMM 5443. Issues of Race and Gender in Interpersonal Communication. 3 Hours.
An exploration of the major theories and lines of research that examine how race and gender influence interpersonal communication in everyday life in America.

COMM 5453. Myth and Communication Criticism. 3 Hours.
Seminar in major theories of mythology, including archetypal and ideological perspectives, and their applications to the criticism of public communicative events. Practice in written critical analysis. Prerequisite: Graduate standing.

COMM 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

COMM 5473. Treatment of Native Americans in Film. 3 Hours.
Examines the role of communication in modern culture. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing.

COMM 5513. Sustainability and Communication. 3 Hours.
Communication's role in creating and conveying an organization's environmental sustainability philosophy and initiatives. Discusses internal communication when establishing and communicating sustainability goals and initiatives. Covers communicating sustainability to external groups through websites, sustainability reports, and advocacy initiatives. For profit, nonprofit, governmental, NGOs, and/or advocacy organizations discussed.

COMM 5533. Family Communication. 3 Hours.
An exploration of the major theories and lines of research that examine family communication in contemporary American life.

COMM 559V. Seminar in Film Studies. 1-3 Hours.
Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, and the film musical. May be repeated for up to 6 hours of degree credit.

COMM 5763. Health Communication. 3 Hours.
Examines the difficulties of effective communication between health care providers and recipients including the following: issues of social support, conveying bad news, cultural issues, and identifying relevant communication skills associated with effective health care provision. Explores medical education models for training in effective patient-provider communication.

COMM 5823. Political Communication. 3 Hours.
Covers contemporary political communication theory and applies them to understand modern political campaigns. Topics covered include the rhetoric of politics, political advertising, the role of the media and public opinion, the impact of new technology, campaign speech genres, political debates, and the role of social identity in presidential campaigns.

COMM 5833. The Rhetoric of the Modern American Presidency. 3 Hours.
Study contemporary presidents' reliance on public persuasion, especially in efforts to bypass Congress and accomplish complicated political goals. Explore the origins of the concept of the "rhetorical presidency," specifically how it developed and changed the nature of the executive branch of government. Examine major genres of modern presidential rhetoric illustrating that trend.
COMM 5843. Legal Communication. 3 Hours.
Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions.

COMM 5853. American Film Survey. 3 Hours.
A survey of major American film genres, major directors and films that have influenced the development of motion pictures.

COMM 5863. History and Development of International Film I. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975.

COMM 5873. History and Development of International Film II. 3 Hours.
A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from 1975 to the present.

COMM 590V. Special Problems. 1-6 Hour.
Credit by arrangement. Prerequisite: Graduate standing. May be repeated for degree credit.

COMM 5913. Internship in Communication. 3 Hours.
Internship in applied communication within public and private organizations. Prerequisite: 15 hours graduate level communication in residence.

COMM 5923. Capstone Course in Communication. 3 Hours.
Students organize and synthesize knowledge developed throughout their graduate coursework into a tangible capstone product which becomes part of their professional portfolio.

COMM 5993. Readings in Cultural Studies. 3 Hours.
Classic and current theoretical approaches to cultural studies. Subject matter changes depending on student interest and faculty expertise.

COMM 600V. Master's Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

Communication Disorders (CDIS) Courses

CDIS 2253. Introduction to Communicative Disorders. 3 Hours.
An introductory course which surveys the professional interests of speech-language pathology and audiology with specific attention to the general recognition and classification of disorders of speech, language, and hearing, and general trends in rehabilitation. Consideration given to the classroom teacher’s involvement in communication disorders.

CDIS 2901H. Honors Introduction to Research in Communication Sciences and Disorders. 1 Hour.
This course introduces students to the research process in the field of communication sciences and disorders. Prerequisite: Acceptance into the COEHP Honors Program and instructor consent. May be repeated for up to 2 hours of degree credit.

CDIS 3103. Introduction to Audiology. 3 Hours.
Introduction to the basic concepts for administering and interpreting hearing tests, including the anatomy and physiology of the auditory system, disorders of the ear, and techniques for administering and interpreting basic pure tone threshold tests. Prerequisite or Corequisite: PHYS 1023 and PHYS 1021L, PHYS 2013 and PHYS 2011L or CHEM 1073 and CHEM 1071L.

CDIS 3124. Normal Phonology and Articulatory Process. 4 Hours.
Analysis of the English speech sounds as a basis for speech improvement; physiological positions and movements; acoustic qualities and transcription in the international phonetic alphabet. Corequisite: Lab component.

CDIS 3203. Articulation Disorders. 3 Hours.
A study of the definition, etiology, pathology, and treatment procedures of problems of articulation. Prerequisite: CDIS 3124 and CDIS 3213.

CDIS 3213. Anatomy of Physiology of the Speech and Hearing Mechanisms. 3 Hours.
Structure and function of the organic mechanisms responsible for speech, language, and audition. Pre or Corequisite: BIOL 1543 and BIOL 1541L or higher.

CDIS 3223. Language Development in Children. 3 Hours.
Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003. This course is equivalent to CDIS 3224.

CDIS 3223H. Honors Language Development in Children. 3 Hours.
Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological, and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003. Prerequisite: Honors candidacy. This course is equivalent to CDIS 3224.

CDIS 3233. Introduction to Clinical Practice. 3 Hours.
An introduction to the various aspects of clinical operations including technical and interpersonal relationship skills necessary for case management and a survey of professional standards. Pre- or Corequisite: COMM 1313.

CDIS 3253. Cultural Diversity in Communication Disorders. 3 Hours.
An introduction to various cultures, customs, and professional standards in health-related fields that helps to develop intercultural communication skills necessary to manage the increasingly diverse caseloads of health-related professionals. Pre- or Corequisite: COMM 1313.

CDIS 3901H. Honors Communication Disorders Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work “one-on-one” exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy.

CDIS 3923H. Honors Colloquium. 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in speech or dramatic art). May be repeated for degree credit.

CDIS 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

CDIS 4001. Clinical Practicum Undergrad. 1 Hour.
Enter-level training in speech-language clinical practicum activities. This course is taken for satisfactory or unsatisfactory credit. Prerequisite: CDIS 3124 and CDIS 3203 and CDIS 3224 and CDIS 3233 plus satisfactory completion of specific program requirements for admission to clinical practice.

CDIS 4103. Sign Language and Deafness. 3 Hours.
An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be studied through videotapes and readings. Issues in Deaf Education will also be introduced.
CDIS 4133. Introduction to Aural Rehabilitation. 3 Hours.
Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Prerequisite: CDIS 3103.

CDIS 4183. Clinical Assessment of Speech and Language Disorders. 3 Hours.
Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023.

CDIS 4213. Introduction to Speech and Hearing Science. 3 Hours.
Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Pre- or Corequisite: MATH 1203 or higher. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3124 and its lab component.

CDIS 4223. Language Disorders in Children. 3 Hours.
Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Prerequisite: CDIS 3224.

CDIS 4253. Neurological Bases of Communication. 3 Hours.
A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Prerequisite: CDIS 3213.

CDIS 4263. Advanced Audiology. 3 Hours.
Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Prerequisite: CDIS 3103.

CDIS 4273. Communication Behavior and Aging. 3 Hours.
Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed.

CDIS 490V. Special Problems. 1-3 Hour.
Special problems. Prerequisite: Advanced standing. May be repeated for up to 3 hours of degree credit.

CDIS 498VH. Honors Communication Disorders Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work “one-on-one” to complete the honors thesis/project. Prerequisite: Honors candidacy and CDIS 390H. May be repeated for up to 3 hours of degree credit.

CDIS 5103. Research Methodology in Communication Disorders. 3 Hours.
An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing.

CDIS 5113. Seminar in Early Intervention. 3 Hours.
Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing.

CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.
Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3213 and graduate standing.

CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.
Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3213 or equivalent, and graduate standing.

CDIS 5133. Discourse Analysis and Treatment. 3 Hours.
Study of discourse behaviors and discourse analysis procedures appropriate for communicatively disordered children and adults, along with review of management approaches associated with impaired discourse performance. Prerequisite: Previous course work in language process and disorders, and graduate standing.

CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.
Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3224.

CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.
Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and graduate standing.

CDIS 5163. Seminar in Language Topics. 3 Hours.
Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing.

CDIS 5181. Advanced Clinical Practicum I. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing.

CDIS 5193. Seminar in Problems of Oral Communication. 3 Hours.
Investigation of research in selected problems of oral communication; recent developments in speech-language pathology and audiology; individual problems for investigation. Prerequisite: Graduate standing.

CDIS 5213. Voice and Resonance Disorders. 3 Hours.
Study of disorders of phonation and resonance, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing.

CDIS 5223. Fluency Disorders. 3 Hours.
An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing.

CDIS 5233. Speech Sound Disorders. 3 Hours.
Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing.

CDIS 5243. Language Disorders in Adults. 3 Hours.
Cognitive and communicative breakdown due to neurological trauma, including etiology, characteristics, assessment and treatment for aphasia, traumatic brain injury, and right hemisphere disorders. Prerequisite: Graduate standing.

CDIS 5253. Motor Speech Disorders. 3 Hours.
Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: CDIS 4253 or equivalent, and graduate standing.

CDIS 5273. Language, Learning and Literacy. 3 Hours.
An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention.

CDIS 5281. Advanced Clinical Practicum II. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5181.

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.
Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing.
CDIS 5381. Advanced Clinical Practicum III. 1 Hour.
Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281.

CDIS 5391. Clinical Practicum: Hearing Disorders. 1 Hour.
Practicum in audiology.

CDIS 548V. Off-Campus Practicum: Public School Site. 1-6 Hour.
Practicum activities in speech-language disorders in a public school setting. Prerequisite: Graduate standing.

CDIS 5511. Professional Issues I. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.

CDIS 5521. Professional Issues II. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.

CDIS 5531. Professional Issues III. 1 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders.

CDIS 555V. Internship: Clinical Site. 3-6 Hour.
Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treatment. Students in the master's program must enroll in a minimum of 3 credit hours of CDIS 558V or CDIS 578V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. May be repeated for up to 6 hours of degree credit.

CDIS 568V. Off-Campus Practicum: Clinical Site. 1-6 Hour.
Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: Graduate standing and completion of at least 2 semesters of CDIS 528V.

CDIS 578V. Internship: Public School Site. 3-6 Hour.
Field placement in approved public school setting for clock hours in speech-language pathology assessment and treatment. Students in the Master's program must enroll in a minimum of 3 credit hours of CDIS 578V or CDIS 588V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. May be repeated for up to 6 hours of degree credit.

CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.
This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing.

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.
Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing.

CDIS 5843. Communication and Swallowing in Dementia. 3 Hours.
This course provides an in-depth examination of the communication and feeding/swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for the most common forms of dementia are addressed. Prerequisite: Graduate standing.

CDIS 5883. Policies & Procedures in Educational Speech-Language Pathology. 3 Hours.
Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate Standing.

CDIS 590V. Special Problems. 1-6 Hour.
Special problems. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

CDIS 599V. Seminar in Professional Issues. 1-3 Hour.
Selected topics in professional issues in speech-language pathology and audiology.

CDIS 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour.
Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. May be repeated for up to 18 hours of degree credit.

Community Health Promotion (CHLP)

Courses

CHLP 310V. Health Coaches I. 1-3 Hour.
This course, designed for students whose career goals are focused on community/healthcare service, is a study of key issues concerning community health care, aimed at developing practical approaches to supporting patients. Students study the medical, social, cultural, and economic challenges as well as opportunities that exist within evolving health care systems, and consider how these forces, in addition to behavioral and psychological factors, affect health outcomes of individual patients. Obstacles to effective health care as well as strategies for enabling at-risk patients to play more active roles in promoting their health and well-being are key issues. This course provides students with the academic foundation for the field-based Health Coaches II and III.

CHLP 320V. Health Coaches II. 1-3 Hour.
Health Coaches II is the field-based second course in the three-course Health Coaches sequence. Health Coaches will become engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being. Students are required to make scheduled visits to their assigned patients' homes, potentially attend doctor appointments with the patient, engage in phone interactions with patients and the healthcare team as needed, and meet face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. Prerequisite: CHLP 310V. May be repeated for up to 3 hours of degree credit.

CHLP 330V. Health Coaches III. 1-3 Hour.
Health Coaches III is the field-based third course in the three-course Health Coaches sequence. Health Coaches will to continue to be engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being through scheduled visits to their assigned patients' homes or by phone, potentially attending doctor appointments with the patient, and participating in face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. In addition, students at this level will provide leadership within student care teams and provide community outreach under the direction of the professional healthcare team. Prerequisite: CHLP 310V and CHLP 320V. May be repeated for up to 3 hours of degree credit.
Computer Science and Computer Engineering (CSCE)

Courses

Introductory programming course for students majoring in computer science or computer engineering. Software development process: problem specification, program design, implementation, testing and documentation. Programming topics: data representation, conditional and iterative statements, functions, arrays, strings, file I/O and classes. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: MATH 2554 or MATH 2554C with a grade of C or better.

This course continues developing problem solving techniques by focusing on fundamental data structures and associated algorithms. Topics include: abstract data types, introduction to object-oriented programming, linked lists, stacks, queues, hash tables, binary trees, graphs, recursion, and searching and sorting algorithms. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: CSCE 2004 with a grade of C or better.

CSCE 2114. Digital Design. 4 Hours.
Introduction to the hardware aspects of digital computers, logic gates, flip-flops, reduction, finite state machines, sequential logic design, digital systems, software design tools, hardware description language (VHDL), and implementation technologies. Corequisite: Lab component. Prerequisite: MATH 2554 or MATH 2554C with a grade of C or better.

This course is cross-listed with ELEG 2904.

CSCE 2214. Computer Organization. 4 Hours.
Presents the relationship between computing hardware and software with a focus on the concepts for current computers. CPU design topics are covered including various techniques for microprocessor design and performance evaluation. Corequisite: Lab component. Prerequisite: CSCE 2014 with a grade of C or better.

CSCE 3193. Programming Paradigms. 3 Hours.
Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2114 with a grade of C or better.

CSCE 3193H. Honors Programming Paradigms. 3 Hours.
Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2114 with a grade of C or better.

This course is equivalent to CSCE 3193.

CSCE 3213. Cluster Computing. 3 Hours.
Cluster computing solves problems too large in terms of memory or run time for a single workstation. Common approaches to these problems combine the resources of multiple computers to collectively find the solution. High performance computing is quickly expanding to areas including: chemistry, physics, mathematics, engineering, bio-informatics, finance, logistics, etc.

CSCE 3513. Software Engineering. 3 Hours.
An approach to the current techniques used in software design and development. This course emphasizes the use of modern software development tools, multi-module programming, and team design and engineering. Prerequisite: CSCE 3193 or CSCE 3193H with a grade of C or better.

CSCE 3613. Operating Systems. 3 Hours.
An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of C or better.

CSCE 3613H. Honors Operating Systems. 3 Hours.
An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of C or better. This course is equivalent to CSCE 3613.

CSCE 3953. System Synthesis and Modeling. 3 Hours.
This course teaches students the use of modern synthesis and modeling languages and approaches for design automation. This course will teach students the use of HDLs and modeling languages for representing and implementing digital computer systems. Prerequisite: CSCE 2214 with a grade of C or better.

CSCE 4013. Special Topics. 3 Hours.
Consideration of computer science topics not covered in other courses. Prerequisite: CSCE 3193 and CSCE 2214. May be repeated for up to 12 hours of degree credit.

CSCE 4023H. Honors Special Topics. 3 Hours.
Consideration of current computer engineering honors topics not covered in other courses. Prerequisite: Honors standing.

CSCE 4043. RFID Information Systems Security. 3 Hours.
Radio frequency identification (RFID) information systems provide information to users about objects with RFID tags. They require the application of information systems security (INFOSEC) to protect the information from tampering, unauthorized information disclosure, and denial of service to authorized users. This course addresses security and privacy in an RFID system. Prerequisite: INEG 2313.

CSCE 4114. Embedded Systems. 4 Hours.
The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better.

CSCE 4123. Programming Challenges. 3 Hours.
This course studies the principles used in the solution of programming contest problems, e.g., data structures strings, sorting, machine arithmetic and algebra, combinatorics, number theory, backtracking, graph traversal, graph algorithms, dynamic programming, grids, and computational geometry. Prerequisite: CSCE 2014.

CSCE 4133. Algorithms. 3 Hours.
Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Prerequisite: CSCE 3193 and (MATH 2603 or MATH 2803) or MATH 3423.

CSCE 4143. Data Mining. 3 Hours.
Topics include data preprocessing; data warehousing and online analytical processing; data cube; mining frequent patterns, associations and correlations; supervised learning including decision tree induction, naïve Bayesian classification, support vector machine and K-nearest neighbor learning; unsupervised learning including K-means clustering and hierarchical clustering; outlier analysis; and data mining in cloud computing, social media, bioinformatics and healthcare applications. Prerequisite: CSCE 4133 and INEG 2313.

CSCE 4213. Computer Architecture. 3 Hours.
The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Prerequisite: CSCE 2214 with a grade of C or better. This course is cross-listed with ELEG 4983.
CSCE 4233. Low Power Digital Systems. 3 Hours.
The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Prerequisite: CSCE 2214 with a grade of C or better.

CSCE 4253. Concurrent Computing. 3 Hours.
Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Prerequisite: CSCE 3193.

CSCE 4263. Advanced Data Structures. 3 Hours.
This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Prerequisite: CSCE 3193.

CSCE 4323. Formal Languages and Computability. 3 Hours.
Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Prerequisite: CSCE 4133.

CSCE 4333. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584.

CSCE 4353. CPLD/FPGA-Based System Design. 3 Hours.
Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Prerequisite: CSCE 2214 with a grade of C or better.
This course is cross-listed with ELEG 4963.

CSCE 4423. Computer Systems Modeling. 3 Hours.
Basic concepts of problem analysis, model design, and simulation experiments. A simulation will be introduced and used in this course. Prerequisite: CSCE 2014 with a grade of C or better and INEG 2313.

CSCE 4433. Cryptography. 3 Hours.
This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Prerequisite: CSCE 2014 with a grade of C or better and (MATH 2603 or MATH 2803).

CSCE 4523. Database Management Systems. 3 Hours.
Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Prerequisite: CSCE 3193 or CSCE 3193H with a C or better.

CSCE 4543. Software Architecture. 3 Hours.
A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Prerequisite: CSCE 4133 and CSCE 3513.

CSCE 4561. Capstone I. 1 Hour.
CSCE students complete a comprehensive software capstone project during their final year of undergraduate studies. The project is done over 2 semesters in phases: concept, formal proposal, implementation, and presentation. The projects include and may require the integration of software and hardware components and are developed to software engineering methodologies. Prerequisite: CSCE 3513 and (CSCE 3613 or CSCE 3613H) and completion of 96 credit hours.

CSCE 4613. Artificial Intelligence. 3 Hours.
Introduction to intelligent agents, AI languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCE 2014 with a grade of C or better.

CSCE 4623. Mobile Programming. 3 Hours.
An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Prerequisite: CSCE 3193 or CSCE 3193H.

CSCE 4643. Graphics Processing Units Programming. 3 Hours.
This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Prerequisite: CSCE 2014 with a grade of C or better.

CSCE 4753. Computer Networks. 3 Hours.
This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Prerequisite: INEG 2313.

CSCE 4813. Computer Graphics. 3 Hours.
Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Prerequisite: CSCE 2014 with a grade of C or better.

CSCE 4853. Information Security. 3 Hours.
This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Prerequisite: CSCE 3193 or CSCE 3193H.

CSCE 490V. Individual Study. 1-3 Hour.
Individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. May be repeated for up to 3 hours of degree credit.

CSCE 4914. Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904.
This course is cross-listed with ELEG 4914.

CSCE 491VH. Honors Thesis. 1-3 Hour.
To provide honors students with experience in presenting their research accomplishments to their peers and faculty. Prerequisite: Honors standing. May be repeated for up to 3 hours of degree credit.
CSCE 4963. Capstone II. 3 Hours.
CSCE students complete a comprehensive capstone project during their final year of undergraduate studies. The project is done over two consecutive semesters in phases: concepts, formal proposal, implementation, and presentation. The projects include and may require the integration of software, human factors, and hardware elements and are developed using software engineering methodologies. Prerequisite: CSCE 4561.

CSCE 5013. Advanced Special Topics in Computer Science or Computer Engineering. 3 Hours.
Consideration of current computer engineering or computer science topics not covered in other courses. May be repeated for up to 18 hours of degree credit.

CSCE 5033. Advanced Algorithms. 3 Hours.
Design of computer algorithms, with primary emphasis on the development of efficient implementation.

CSCE 5043. Advanced Artificial Intelligence. 3 Hours.
In-depth introduction to AI. Topics include: philosophical foundations, cognition, intelligent agents, AI languages, search, genetic algorithms, first order and modal logic, inference, resolution, knowledge representation, ontologies, problem solving, planning, expert systems, uncertainty, probabilistic reasoning, fuzzy logic, machine learning, natural language processing, machine vision, and robotics. Prerequisite: CSCE 4613.

CSCE 5053. Advanced Virtual Worlds. 3 Hours.
In depth study of 3D multi-user virtual worlds covering application domains like retail and healthcare logistics, simulations, training, and gaming as well as platform architectures. Students will apply their knowledge of programming and data structures while using synthetic worlds to explore, model and script future smart worlds where computing is pervasive.

CSCE 5063. Machine Learning. 3 Hours.
An introduction to machine learning, with particular emphasis on neural network techniques. This course presents the basic principles underlying algorithms that improve with experience, and covers using them effectively for modeling data and making predictions.

CSCE 5073. Data Mining. 3 Hours.
This course surveys the most common methods used in data mining and machine learning. It involves several projects in which students will implement tools that are useful for mining knowledge from data and making predictions. The course will study both heuristic algorithms and statistical techniques. Prerequisite: CSCE 3193 and (INEG 2313 or STAT 3013).

CSCE 5203. Advanced Database Systems. 3 Hours.
Topics include: object databases, distributed databases, XML query, data warehouses, network as database systems, peer-peer data sharing architectures, data grids, data mining, logic foundations, semantic databases, spatial and temporal databases, and knowledge bases. Prerequisite: CSCE 4523 and graduate standing.

CSCE 5213. Bioinformatics. 3 Hours.
Application of algorithmic techniques to the analysis and solution of biological problems. Topics include an introduction to molecular biology and recombinant DNA technology, biological sequence comparison, and phylogenetics, as well as topics of current interest. Prerequisite: Instructor consent. This course is cross-listed with BENG 5213.

CSCE 5223. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584.

CSCE 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check and simulate digital integrated circuits which will be fabricated, and tested in I.C. Design Laboratory II. Topics include computer aided design, circuit timing, and wire delay. Prerequisite: CSCE 4333. This course is cross-listed with ELEG 5253L.

CSCE 5263. Computational Complexity. 3 Hours.
Turing machines, recursion theory and computability, complexity measures, NP-completeness, analysis on NP-complete problems, pseudo-polynomial and approximation.

CSCE 5273. Big Data Analytics and Management. 3 Hours.
Topics include principles of distributed data computing and management, design and implementation of non-relational data systems, crowd sourcing and human computation, big data analytics and scalable machine learning, real-time streaming data analysis, and social aware computing. Prerequisite: CSCE 3193 and INEG 2313.

CSCE 5283. Graph and Combinatorial Algorithms. 3 Hours.
A study of algorithms for graphs and combinatorics with special attention to computer implementation and runtime efficiency.

CSCE 5313. Advanced Operating Systems. 3 Hours.
Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; and case studies of specific operating systems. Prerequisite: CSCE 3613.

CSCE 5323. Computer Security. 3 Hours.
Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 3613.

CSCE 5333. Computer Forensics. 3 Hours.
Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officers, legal issues related to computer and network forensics. Prerequisite: CSCE 5323.

CSCE 5343. Advanced Software Engineering. 3 Hours.
This course is about software metrics and models. It will focus on quantitative methods and techniques for management of software projects, design of software systems, and improvement of software quality. The material covered will be metrics and models used in the software lifecycle, such as software requirements metrics, design metrics, implementation metrics, testing metrics, effort estimation model. Prerequisite: CSCE 3513.

CSCE 5363L. Integrated Circuit Design Laboratory II. 3 Hours.
Students test the I.C. chips they designed in I.C. Design Laboratory I, and propose design corrections where needed. Topics include bipolar chip design, gate arrays, BICMOS, memory design, design for testability, and dynamic & domino logic. Prerequisite: CSCE 5253L. This course is cross-listed with ELEG 5263L.

CSCE 5433. Advanced Cryptography. 3 Hours.
This course provides an in-depth look into some facet of either cryptographic theory or the implementation of cryptography. Topics may include: the discrete logarithm problem, integer factorization, information theory, elliptic curves, lattices, pseudorandom number generators, zero-knowledge proofs, and quantum cryptography. Prerequisite: CSCE 4433 or instructor consent.
CSCE 5533. Advanced Information Retrieval. 3 Hours.
Study of the architecture, implementation, and evaluation of current information retrieval systems. Students will apply their knowledge of programming and data structures to implement a large system with an emphasis on efficiency and scalability. They will study current research in the field and implement individual or group projects on advanced topics.

CSCE 5543. Statistical Natural Language Processing. 3 Hours.
Introduction to statistical natural language processing (NLP). Covers the theory and algorithms needed for building NLP tools, provides broad coverage of mathematical and linguistic foundations, and detailed discussion of statistical methods for text mining and information extraction. Current research and applications of statistical NLP will be discussed. Prerequisite: CSCE 2014 and (STAT 3013 or INEG 2313).

CSCE 5623. Secure Digital System Design. 3 Hours.
This course is intended to give graduate students an insight of contemporary security-related issues in modern digital systems. In addition to lectures, students will be practicing secure digital system design during a project.

CSCE 5633. Network Performance Evaluation. 3 Hours.
A study of performance modeling tools for telecommunication networks, computer networks, and wireless networks. Prerequisite: STAT 3013.

CSCE 5643. Computer Communications Networks. 3 Hours.
A study of computer communication networks, including the data link layer, routing, flow-control, local area networks, TCP/IP, ATM, B-ISDN, queuing analysis, and recent developments in computer communications.

CSCE 5653. Network Security. 3 Hours.
This course introduces security and secrecy in a networked environment. It is intended to familiarize students with the elements of secure communication, and how they inter-relate to provide secure networks in public and private settings.

CSCE 5663. Database Security. 3 Hours.
This is an advanced course covering security issues in database systems. Topics to be covered include discretionary and mandatory access control policies, multilevel secure database systems, auditing, data recovery, database intrusion detection, database insider threat, etc. Prerequisite: CSCE 4523.

CSCE 5683. Image Processing. 3 Hours.
The objective of this class is to give students a hands-on introduction to the fundamentals of image processing. A variety of image processing techniques and applications will be discussed including image enhancement, noise removal, spatial domain and frequency domain filtering, image restoration, color image processing, image compression, edge detection and image segmentation. Prerequisite: CSCE 4813.

CSCE 5703. Computer Vision. 3 Hours.
The objective of this course is to give students a hands-on introduction to the fundamentals of computer vision. Topics include image formation, object modeling, image processing, feature and edge detection, image segmentation, motion estimation, depth from stereo, shape description and object recognition. Prerequisite: CSCE 4813 or CSCE 5683.

CSCE 5753. Wireless Systems Security. 3 Hours.
Wireless systems such as wireless local area networks, cellular and mobile networks, and sensor networks are vulnerable to attacks. The goal of the class is for students to understand how to design secure wireless systems. Security topics include confidentiality, integrity, availability, privacy, and control of fraudulent usage of networks. Issues addressed include basic wireless theory, cryptography, threat modeling, risks, and mitigation techniques.

CSCE 5763. Privacy Enhancing Technologies. 3 Hours.
This course introduces privacy enhancing technologies and hot privacy topics in modern computing systems. Students will be exposed to many interesting privacy problems, study privacy enhancing technologies, and apply their knowledge to explore an open research problem in a research-oriented project. After completing this course, students will gain broad knowledge of the state-of-the-art privacy enhancing technologies and open research problems. They will also develop skills and enhance potentials to do research on privacy and security.

CSCE 5823. Multiprocessor Systems on Chip. 3 Hours.
This course covers the latest trends in advanced computer architecture for multiprocessor systems on chip for embedded and real time systems. Topics covered include multicore architectures, modeling abstractions, run time systems, and MIMD/SIMD heterogeneous architectures, Hw/Sw co-design techniques. Prerequisite: CSCE 3613 and CSCE 4213.

CSCE 5833. Computer Architecture Security. 3 Hours.
This course will cover fundamental principles and emerging implementation strategies to reason about, design and construct architecture level security capabilities in the manycore era. Coverage includes formal security models, new and emerging considerations for heterogeneous multiprocessor system on chip architectures, hardware and software implementation methods, operating systems for run time security enforcement. Prerequisite: CSCE 4213.

CSCE 5843. Reconfigurable Computing. 3 Hours.
This course will cover emerging and proposed techniques and issues in Reconfigurable Computing. Topics will include FPGA technologies, CAD/CAE tools, Hw/Sw co-design, system level synthesis, programming models and abstractions. Prerequisite: CSCE 4213 and CSCE 3613.

CSCE 590V. Advanced Individual Study. 1-3 Hour.
Advanced graduate level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas.

CSCE 5943. Computer Arithmetic Circuits. 3 Hours.
Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course provides sufficient theoretical and practical information to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits.

CSCE 5983. Application Specific Integrated Circuit Design. 3 Hours.
ASIC design is taught with emphasis on industrial preparation. Topics include ASIC technologies, design entry, simulation, and synthesis. Advanced design methods and techniques are studied for cell based and gate array ASICs. Prerequisite: CSCE 4213.

CSCE 610V. Master’s Thesis. 1-6 Hour.
Master’s thesis.

CSCE 620V. Post-Master’s Research. 1-18 Hour.
Post-master’s research.

CSCE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Counselor Education (CNED) Courses

CNED 1002. Life Skills Development. 2 Hours.
Study and practice of problem solving, decision making, goals and values clarification and other developmental skills affecting personal issues and academic success. Prerequisite: Instructor consent required.

CNED 1011. Seminar. 1 Hour.
Single topic seminar focusing on further knowledge acquisition and training in specific developmental skills. Topics offered as needed. Prerequisite: Instructor consent required. May be repeated for up to 3 hours of degree credit.
CNED 3053. The Helping Relationship. 3 Hours.
Development of an understanding of the helping relationship. Topics include establishing a working alliance, problem recognition and referral to appropriate resources. Prerequisite: PSYC 2003.

CNED 3053H. Honors The Helping Relationship. 3 Hours.
Development of an understanding of the helping relationship. Topics include establishing a working alliance, problem recognition and referral to appropriate resources. Prerequisite: PSYC 2003. This course is equivalent to CNED 3053.

CNED 4003. Classroom Human Relations Skills. 3 Hours.
A study of interpersonal skills important to improving teacher-student relationships and achievement in classrooms. Human communication systems related to motivation, achievement, and educator-student relationships are studied. The attainment of effective human relations skills is emphasized. Prerequisite: Junior or Senior standing required.

CNED 5003. Counseling and Human Development. 3 Hours.
This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern & post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing.

CNED 5193. Clinical Mental Health Counseling. 3 Hours.
An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, and psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status.

CNED 5203. Foundations of the Counseling Profession. 3 Hours.
A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for professional practice. Prerequisite: Must be taken first year in program.

CNED 5213. Lifestyle & Career Development. 3 Hours.
Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite: CNED 5333.

CNED 5223. Introduction to School Counseling. 3 Hours.
Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues.

CNED 5303. Individual Appraisal. 3 Hours.
Analysis of concepts, methods, and procedures utilized in individual appraisal.

CNED 5313. Program Organization and Information Management. 3 Hours.
This course addresses needs and strategies for effective development and management of school counseling programs and guidance curriculum. Prerequisite: CNED 5223.

CNED 5323. Counseling Theory. 3 Hours.
Introductory survey and critical analysis of major alternative theoretical perspectives in counseling.

CNED 5333. Basic Counseling Techniques. 3 Hours.
Introduction to basic counseling techniques and skills common to multiple theoretical perspectives. Prerequisite: Master's students in Counseling.

CNED 5343. Counseling Practicum. 3 Hours.
Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite: CNED 5303 and CNED 5363 and CNED 5373. Prerequisite: CNED 5203, CNED 5323, CNED 5333, CNED 5403.

CNED 5353. Psychopharmacology. 3 Hours.
Study of theory, research, & practice issues pertaining to psychopharmacology for non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333.

CNED 5363. Dynamics of Group Counseling. 3 Hours.
Therapeutic and other theoretical information is presented regarding group process and the counselor's role in that process. An experiential group experience is required. Prerequisite: CNED 5333 and CNED 5323.

CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.
Review of ethical and legal standards governing professional counselor training, research, and counseling practice; including client rights; confidentiality; the client-counselor relationship; and counseling research, training, and supervision. Prerequisite: CNED 5003 and CNED 5203.

CNED 5383. Crisis Intervention Counseling. 3 Hours.
Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CNED 5333.

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.
Procedures in case management utilizing both clinical and interview data in assisting children, adolescents, and adults in educational, vocational, personal, and social planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333.

CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.
Survey of the philosophy of vocational rehabilitation, including history and legislation.

CNED 5453. Medical Aspects of Disability. 3 Hours.
Orientation to medical and medically related aspects of various disabling conditions with emphasis on the severely disabled.

CNED 5463. Rehabilitation Case Management. 3 Hours.
Counseling process in the rehabilitation setting. Focusing upon effective counseling strategies, representative cases, and effective case management methods.

CNED 5473. Psychological Aspects of Disability. 3 Hours.
Intensive study of the psychological aspects of adjustment to atypical physique and prolonged handicapping condition.

CNED 5483. Counseling Research. 3 Hours.
An in-depth examination of counseling research methodology and issues to prepare students to critically evaluate and use counseling research in their professional practice.

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.
The course introduces students to the principles and practices of recovery-oriented, evidence-based psychiatric rehabilitation. Through lectures, guest presentations, films, discussions, and readings, students (a) explore the clinical, psychosocial, and vocational aspects of psychiatric disabilities and (b) examine psychiatric rehabilitation principles and practices to facilitate community integration and successful employment outcomes for individuals with psychiatric disabilities.

CNED 5513. Counseling and Human Diversity. 3 Hours.
Examination of human and cultural diversity, emphasizing issues of race, class, and socioeconomic status, and how they impact our clients as individuals and as family and society members.

CNED 5523. Process and Behavioral Addictions. 3 Hours.
This course provides an overview of non-substance related addictive disorders such as technology (e.g., video games, Internet, television), gambling, eating, sex, shopping/buying and work as well as potential treatment options for these disorders.
CNED 5583. Placement of Persons with Disabilities. 3 Hours.
Focuses on placement theory and practice as they apply to persons who experience disabilities. Special attention is given to RehabMark approach.

CNED 574V. Counseling Internship. 1-9 Hour.
A 600-clock-hour field placement in an approved setting over a minimum of two continuous semesters. For students completing a counseling internship in a school setting, successful completion of a criminal background check is required before beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203, CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373, CNED 5403, CNED 5513. CNED faculty consent required. May be repeated for up to 6 hours of degree credit.

CNED 599V. Seminar. 1-6 Hour.
Seminar. May be repeated for up to 6 hours of degree credit.

CNED 6003. Theories and Foundations of Addictions. 3 Hours.
A study of behavioral and substance addictions, including an overview of differential treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED masters or doctoral program or departmental consent.

CNED 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.
Critical analysis of major theoretical perspectives in counseling, including both group and individual counseling strategies for dealing with affective, cognitive, and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission.

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours.
Comprehensive exploration of the current theories/techniques of marriage, family, and couple counseling. Prerequisite: CNED 5232 and CNED 5333 and CNED doctoral or masters standing or permission.

CNED 6033. Advanced Group Theory and Methods. 3 Hours.
Comparative study of theories and processes of group counseling. Includes supervised experience in group facilitation with video recording and playback. Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or permission.

CNED 6043. Supervision of Counselors. 3 Hours.
Analysis, assessment, and practical application of counselor supervision techniques in treatment and training programs. Prerequisite: CNED doctoral standing and CNED faculty consent.

CNED 605V. Independent Study. 1-18 Hour.
Independent study. May be repeated for up to 18 hours of degree credit.

CNED 6073. Advanced Research in Counseling. 3 Hours.
This course involves acquiring a knowledge and understanding of the use of research in counseling and the development of new research in the counseling profession that has heuristic value. Prerequisite: Graduate standing.

CNED 6083. Consultation Theory and Methods. 3 Hours.
Strategies, practical application, and techniques for effective consultation with parents, teachers, and community agencies. Prerequisite: CNED 5333 (preferred) CNED doctoral or masters standing or permission.

CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours.
Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission.

CNED 6113. Theory to Practice: Working with Co-occurring Disorders. 3 Hours.
This course is designed to demonstrate the application of theory to practice in the treatment of co-occurring disorders. Specifically, it is intended to carefully review current research and literature on counseling individuals presenting with both a substance abuse disorder and mental-emotional challenges. Pre- or Corequisite: CNED 6003. Prerequisite: Graduate or license eligible.

CNED 6123. Clinical Applications of Marriage and Family Counseling and Therapy. 3 Hours.
Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling (in all settings), with emphasis on solution-focused systems, Satir model and psychoeducational family work in schools. Includes supervision of clinical experience in marriage, family and couple counseling, video recording and school/community outreach. Prerequisite: CNED doctoral standing or permission.

CNED 6133. Introduction to Play Therapy. 3 Hours.
This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent.

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours.
This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED doctoral status or permission.

CNED 6233. Employment Practices and Interventions. 3 Hours.
An intensive study of the employment experiences of workers with disabilities with emphasis on disincentives and barriers to employment and interventions to enable people with disabilities to participate in employment. Prerequisite: RHAB 5493 or equivalent.

CNED 6243. Disability Policy in the U.S. 3 Hours.
An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. This course is cross-listed with PLSC 5233, RHAB 6203.

CNED 6253. Advanced Psychosocial Aspects of Disability. 3 Hours.
A theoretical and applied study of techniques that enable people to cope with 2 major life events: disability and unemployment.

CNED 6343. Cultural Foundations and Counseling. 3 Hours.
To gain learning experiences in pedagogy relevant to multicultural issues and competencies, including social change theory and advocacy action planning. To identify current multicultural issues as they relate to social change theories, ethical and legal considerations, disability, gender, sexuality, social justice, and advocacy models. Prerequisite: CNED or RHAB Doctoral Standing or Permission.

CNED 6413. Advanced Individual Appraisal. 3 Hours.
To provide advanced knowledge and experience with those psychoeducational instruments and procedures used in conducting school related assessment. Prerequisite: CNED 5303 or equivalent and CNED doctoral standing or permission.

CNED 6713. Advanced Counseling Practicum. 3 Hours.
Supervised counseling practice. A 100-clock hour approved practical counseling experience. Prerequisite: CNED doctoral standing and permission of CNED faculty and Clinical Coordinator. May be repeated for up to 3 hours of degree credit.
An introduction to the history, development, and theoretical underpinnings of the criminal justice system, including aspects such as law enforcement, the courts, and corrections. This course is equivalent to CMJS 2003.

CRIM 2003H. Honors Introduction to Criminal Justice. 3 Hours.
An introduction to the history, development, and theoretical underpinnings of the criminal justice system, including aspects such as law enforcement, the courts, and corrections. Prerequisite: Honors standing. This course is equivalent to CMJS 2003.

CRIM 2023. Introduction to Criminology. 3 Hours.
Introduction to the field of criminology, including theories and patterns of criminal behavior, how criminal justice data are collected, social research methods, historical foundations of the field, and types of crimes and offenders. Provides a foundation for further criminological and theoretical studies.

CRIM 2043. Criminal Law and Society. 3 Hours.
Explores the history of criminal law in the United States, the construction of crime and punishment, and issues facing the contemporary legal system.

CRIM 2513. Criminal Investigation. 3 Hours.
Survey of the theories, concepts, and legal conditions concerning the techniques used in the location, preservation, and presentation of evidence. Prerequisite: CRIM 2003.

CRIM 3023. Criminology. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013 and junior standing. This course is cross-listed with CMJS 3023, SOCI 3023.

CRIM 3023H. Honors Criminology. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013 and junior standing. This course is cross-listed with CMJS 3023, SOCI 3023.

CRIM 3043. The Police and Society. 3 Hours.
Overview of origins, theories, development, practice, and current issues in policing in contemporary society. Prerequisite: CRIM 2003.

CRIM 3053. Serial Crime. 3 Hours.
Historical development of criminal profiling in serial homicide, including sex crimes, stalking, and arson. Focuses on behavioral and criminological theory and a critical examination of different profiling methodologies. Prerequisite: SOCI 2013. This course is cross-listed with SOCI 3053, CMJS 3053.

CRIM 3063. Victimization. 3 Hours.
Introduction to the scientific study of victimization. Examines conceptual boundaries of victimology research, covers theories, statistics and trends relevant to victimology, reviews the victim blaming and defending perspectives, explores practical applications of victimology, and the social, legal, and evaluates criminological issues that stem from concern over victims. Prerequisite: SOCI 2013. This course is cross-listed with SOCI 3063, CMJS 3063.

CRIM 3203. Corrections. 3 Hours.
Overview of correctional systems and punishment. Focuses on theories of correctional philosophies, practices, and procedures, along with the historical development and modern practices of corrections, sentencing, facilities, and issues facing correctional populations. Examines principles and practices of treatment and rehabilitation. Prerequisite: CRIM 2003. This course is cross-listed with CMJS 3203, SOCI 3203.

CRIM 3413. Special Topics. 3 Hours.
Designed to cover specialized topics not usually presented in regular courses. Prerequisite: SOCI 2013. May be repeated for up to 6 hours of degree credit. This course is equivalent to CMJS 3413.

CRIM 3413H. Honors Special Topics. 3 Hours.
Designed to cover specialized topics not usually presented in regular courses. Prerequisite: Honors standing and SOCI 2013. May be repeated for up to 6 hours of degree credit. This course is equivalent to CMJS 3413.

CRIM 3503. Criminal Procedures. 3 Hours.
Critical examination of how individual rights and police procedures are balanced with focus on arrests, use of force, identification, and search and seizure. Prerequisite: CRIM 2003.

CRIM 3513. Criminal Evidence. 3 Hours.
Examination of how evidence is collected, processed, and presented in court, with an emphasis on the competing interests of crime control and individual liberties. Prerequisite: CRIM 2003. This course is cross-listed with SOCI 3513, CMJS 3513.

CRIM 3723. Deviant Behavior. 3 Hours.
Sociological overview of disconcerting conduct, its definition, theoretical understandings and research. Specific topics may include: interpersonal violence, self-destructive disorders, controversial lifestyles, substance abuse, as well as the relationship between inequality and disturbing acts. Prerequisite: SOCI 2013. This course is cross-listed with SOCI 3723, CMJS 3723.

CRIM 399VH. Honors Course. 1-6 Hour.
Undergraduate honors thesis hours designed to engage in advanced undergraduate research under the direction of a faculty advisor. Prerequisite: Honors standing. May be repeated for up to 12 hours of degree credit.

CRIM 4003. Internship in Criminal Justice. 3 Hours.
Supervised experience in municipal, county or state criminal justice agency, or any other agency which is approved by instructor. Prerequisite: CRIM 2003. May be repeated for up to 6 hours of degree credit.
Crop, Soil and Environmental Sciences (CSES)

Courses

CSES 1011. Introduction to Crop, Soil, and Environmental Science. 1 Hour.
An introduction to the CSES department and majors in Environmental Soil and Water Sciences and Crop Management. Emphasis will be placed on issues and opportunities within these disciplines and orienting students to the department and University of Arkansas. Required of all department majors with less than 24 semester credit hours. Recitation 1 hour 20 minutes per week for the first eight weeks of the semester. Prerequisite: Freshman and sophomore standing only.

CSES 1203. Introduction to Plant Sciences. 3 Hours.
An introduction to basics of agricultural crop plant structure, growth, and production. Prerequisite: Junior standing. May be repeated for up to 9 hours of degree credit. This course is equivalent to CMJS 4013.

CSES 2103. Crop Science. 3 Hours.
Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. Pre- or Corequisite: CSES 2103.

CSES 2012. Introduction to Organic Crop Production. 2 Hours.
An introduction to the principles of organic agriculture and ecology and the regulations defining organic production and certification. Additional topics include crop rotations for pest management and for increasing soil organic matter, feeding the soil and plant nutrition, soil health, and green manuring, corporate agriculture and genetically modified organisms.

CSES 2010L. Crop Science Laboratory. 1 Hour.
A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103.

CSES 2103. Crop Science. 3 Hours.
Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. Pre- or Corequisite: CSES 2103.

CSES 2201L. Soil Science Laboratory. 1 Hour.
Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203.

CSES 2203. Soil Science. 3 Hours.
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 and CHEM 1103 or CHEM 1073.

CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours.
A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only.

CSES 3112. Forage Management. 2 Hours.
Forage crops for pasture, hay, and silage with reference to growth and development, production, nutritional quality, and grazing systems. Lecture 2 hours per week. Prerequisite: CSES 2103 or CSES 2103.

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203.

CSES 3312. Cotton Production. 2 Hours.
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103.

CSES 3322. Soybean Production. 2 Hours.
An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103.

CSES 3332. Rice Production. 2 Hours.
A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103.
CSES 3342. Cereal Grain Production. 2 Hours.
An overview of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103.

CSES 355V. Soil Profile Description. 1-2 Hour.
Training for soil profile description writing and membership of judging teams. May be repeated for up to 8 hours of degree credit.

CSES 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.
Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. This course is cross-listed with BENG 3603.

CSES 400V. Special Problems. 1-6 Hour.
Work on special problems in crop, soil and environmental sciences or related field. May be repeated for up to 6 hours of degree credit.

CSES 4013. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203.

CSES 402V. Special Topics. 1-3 Hour.
Studies of selected topics in crop, soil and environmental sciences not available in other courses. May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours.
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323.

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003.

CSES 4143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L.

CSES 4224. Soil Fertility. 4 Hours.
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Pre- or Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203.

CSES 4253. Soil Classification and Genesis. 3 Hours.
Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L.

CSES 4303. Bioenergy Feedstock Production. 3 Hours.
Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. Courses in introductory chemistry or soil science are preferred.

CSES 4553. Wetland Soils. 3 Hours.
This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V.

CSES 462V. Internship. 1-6 Hour.
Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. May be repeated for up to 6 hours of degree credit.

CSES 5001. Weed Science Practicum. 1 Hour.
Training for membership on weed team, through participation. Prerequisite: Graduate standing.

CSES 5013. Crop Physiology. 3 Hours.
Understanding and quantitative measurement of physiological processes, plant responses, and environmental parameters in relation to the production of crops. Prerequisite: BIOL 4303.

CSES 5023. Physiology of Herbicide and Plant Interaction. 3 Hours.
The reproduction, growth, and development of weeds and the ecological factors affecting these processes; development and mechanisms of herbicide resistance, flow of herbicide-resistance genes; and development of herbicide-resistant crops. Corequisite: Lab component. Prerequisite: CSES 4143 or CSES 5143 (formerly CSES 4143) and (BIOL 4303 or CHEM 5813).

CSES 502V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in agronomy. Prerequisite: Graduate standing.

CSES 5033. Advanced Soil Fertility and Plant Nutrition. 3 Hours.
Study of water uptake, ion absorption, translocation and metabolism in higher plants. Lecture 3 hours per week. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L.

CSES 504V. Special Topics. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in agronomy. Prerequisite: Graduate standing. May be repeated for degree credit.

CSES 5053. Scientific Writing. 3 Hours.
Open to graduate students, especially those in agricultural and life sciences. The course will cover searching the scientific literature, writing theses, proposals, journal articles, and other scientific documents. Emphasis on style and techniques used in scientific publication. Lecture and workshop 3 hours per week. Prerequisite: Graduate standing.
CSES 5073. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Graduate degree credit will not be given for both CSES 4013 and CSES 5073.

CSES 5093. Plant Breeding. 3 Hours.
(Formerly CSES 4103.) Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4103 and CSES 5093. Corequisite: Lab component. Prerequisite: CSES 3523 or BIOL 2233.

CSES 5103. Scientific Presentations. 3 Hours.
Experience in procedures required for professional presentations of scientific papers, seminars, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: Graduate standing.

CSES 5114. Soil Fertility. 4 Hours.
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4224 and CSES 5114. Corequisite: Lab component.

CSES 5133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
(Formerly CSES 4133.) Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habit of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Graduate degree credit will not be given for both CSES 4133 and CSES 5133. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003.

CSES 5143. Principles of Weed Control. 3 Hours.
(Formerly CSES 4143.) Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4143 and CSES 5143. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L.

CSES 5214. Analytical Research Techniques in Agronomy. 4 Hours.
Preparation and analysis of plant and soil samples utilizing spectrophotometry, isotopes, and chromatographic separation methods. Additionally, measurements are made of photosyntheses, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L.

CSES 5224. Soil Physics. 4 Hours.
Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and MATH 1203.

CSES 5233. Plant Genetic Engineering. 3 Hours.
Topics will be covered in the field of in vitro plant biology, transgene genetics and crop genetic engineering. Concepts and applications of transgenic plant technology will be discussed, with the emphasis on the strategies for crop improvement and gene discovery. Lecture 3 hours.

CSES 5253. Soil Classification and Genesis. 3 Hours.
(Formerly CSES 4253.) Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4253 and CSES 5253. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L.

CSES 5264. Microbial Ecology. 4 Hours.
A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Additional suggested prerequisites are BIOL 2013, CSES 2203, and ENSC 3003. Corequisite: Lab component. Prerequisite: BIOL 1543 and BIOL 3863 or ENSC 3223.

CSES 5303. Bioenergy Feedstock Production. 3 Hours.
(Formerly CSES 4303.) Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Graduate degree credit will not be given for both CSES 4303 and CSES 5303. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203.

CSES 5313. Crop Simulation Models in Research, Management and Policy. 3 Hours.
The basics of theory and practice of crop simulation models and their applications in crop research and management, and cropping systems planning and policy. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203 or consent of instructor. Courses in introductory chemistry and plant physiology are preferred.

CSES 5323. Soil/Water Quality in Bioenergy Feedstock Production Systems. 3 Hours.
Examine concepts of soil and water quality in relation to bioenergy feedstock production, explore research related to biomass removal and by-product addition to soils, and examine the potential effects of proposed feedstock production systems on soil and water quality. Prerequisite: MATH 1203 and CSES 2203 or equivalent or consent of instructor, and CSES 4303 or CSES 5303 (formerly CSES 4303) preferred.

CSES 5453. Soil Chemistry. 3 Hours.
Application of the principles of chemistry to processes of agronomic and environmental importance in soils. Soil clay mineralogy, soil solution thermodynamics, structure and reactivity of humus, surface complexation and ion exchange, electro-chemical phenomena, and colloidal stability. Prerequisite: CSES 2203 and CHEM 1123 and CHEM 1121L.

CSES 5533. Wetland Soils. 3 Hours.
(Formerly CSES 4553.) This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Graduate degree credit will not be given for both CSES 4553 and CSES 5533. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V.

CSES 5543. Plant Genomics. 3 Hours.
Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of genome research including structural, comparative and functional genomics as well as proteomics. Prerequisite: CHEM 5843 or any graduate level genetics course.

CSES 5553. Forage-Ruminant Relations. 3 Hours.
Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. This course is cross-listed with ANSC 5553.
CIES 5653. Fate and Transport of Organic Contaminants. 3 Hours.
Fate and Transport of Organic Contaminants will present an overview of the transformation and transport processes that influence the environmental fate of organic contaminants, with an emphasis on agricultural pesticides. Biotic and abiotic factors influencing the movement and behavior of organic contaminants in soil and water will be covered extensively, with an emphasis on chemical mechanisms. Prerequisite: CHEM 1123 and CHEM 1121L and CSES 2203, or instructor consent.

CIES 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

CIES 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.

Curriculum and Instruction (CIED)

Courses

CIES 1003. Introduction to Technology in Education. 3 Hours.
A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning.

CIES 1013. Introduction to Education. 3 Hours.
Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education.

CIES 2173. Literacy in America. 3 Hours.
A course that examines the myriad definitions of literacy (and illiteracy) and their connections to issues of social class, occupational status, economic and political structures, educational institutions, cultural organizations, and the media. This course is cross-listed with ENGL 2173.

CIES 3001. Early Childhood Education Practicum. 1 Hour.
This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIES 3003.

CIES 3003. Early Childhood Education. 3 Hours.
The study of kindergarten and preschool programs: social context of early childhood education, purposes, research basis, curriculum development, methods, and materials. Corequisite: CIES 3001. Prerequisite: CIES 1013.

CIES 3013. Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or EELBS major.

CIES 3013H. Honors Development and Learning Theories in the K-6 Classroom. 3 Hours.
This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or EELBS major and honors.

CIES 3023. Survey of Exceptionalities. 3 Hours.
A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIES 1013 or MUED 212; or AGED 1123 and AGED 1031, or HESC 1501 or PSYC 2003.

CIES 3033. Classroom Learning Theory. 3 Hours.
A survey of the major theories of learning with special emphasis on human learning and implications for education. Prerequisite: CIES 1002 and CIES 1011; or MUED 212; or PHED 1003; or AGED 1123 and AGED 1031; and PSYC 2003.

CIES 3043. Introduction to Middle Level Principles and Methods. 3 Hours.
A comprehensive overview of the key components, principles, methodologies, and research foundations to middle level education. Reflective activities and site-based field experience are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: CIES 3053.

CIES 3053. The Emerging Adolescent. 3 Hours.
This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIES 1013. Pre- or Corequisite: CIES 3033.

CIES 3063. Literacy Strategies for Middle Level Learners. 3 Hours.
This course is designed to examine theories and practice regarding literacy development and assessment grounded in the knowledge of the characteristics of the middle level learner. A ten-hour field experience is required. Corequisite: CIES 3073. Prerequisite: CIES 3043.

CIES 3063H. Honors Literacy Strategies for Middle Level Learners. 3 Hours.
This course is designed to examine theories and practice regarding literacy development and assessment grounded in the knowledge of the characteristics of the middle level learner. A ten-hour field experience is required. Corequisite: CIES 3073 and honors candidacy. Prerequisite: CIES 3043. This course is equivalent to CIES 3063.

CIES 3073. Early Adolescent Literature. 3 Hours.
A study of rationales and strategies for incorporating early adolescent literature across the middle level curriculum. Includes an examination of genres and selected texts from each. Corequisite: CIES 3063. Prerequisite: CIES 3043.

CIES 3073H. Honors Early Adolescent Literature. 3 Hours.
A study of rationales and strategies for incorporating early adolescent literature across the middle level curriculum. Includes an examination of genres and selected texts from each. Corequisite: CIES 3063. Prerequisite: CIES 3043 and honors candidacy. This course is equivalent to CIES 3073.

CIES 3083. Arts Integration in the Classroom. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which teach skills through the visual and performing arts to students.

CIES 3093. Essentials of Literacy. 3 Hours.
An undergraduate foundational course focusing on literacy development and processes of children from the emergent to developmental stages, materials and effective research-based teaching strategies for classroom practice. Not for credit in Childhood Education (CHED) degree program.

CIES 3103. Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or HDFSBS BRKD or HDFSBS CDEV or PSPED major.
CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.
A survey of children's literary works, authors, and illustrators with emphasis on
elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite:
CHEDBS or ELELBS major and honors.
This course is equivalent to CIED 3103.

CIED 3113. Emergent and Developmental Literacy. 3 Hours.
This course focuses on theories of children's emerging literacy and on the continuing
development of literacy abilities in pre-kindergarten and early elementary years.
Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262 and CHEDBS or ELELBS or
HDFSBS BRKD or HDFSBS CDEV or SPEDBS major.

CIED 3113H. Honors Emergent and Developmental Literacy. 3 Hours.
This course focuses on theories of children's emerging literacy and on the continuing
development of literacy abilities in pre-kindergarten and early elementary years.
Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major
and honors.
This course is equivalent to CIED 3113.

CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.
An examination of the content of elementary mathematics courses. Special
emphasis given to methods of teaching the content as well as enrichment materials.
Prerequisite: MATH 1203, MATH 2213, MATH 2223, STAT 2303, and CHEDBS or
ELELBS major.

CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' development in
language arts and social studies. Integrates the curriculum and teaching strategies
in language arts and social studies. Prerequisite: CHEDBS or ELELBS major, and
PLSC 2003 and HIST 2003 and HIST 2013, and (HIST 1113 or HIST 1123), and
(GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and ARHS 1003,
and MLIT 1003.

CIED 3143. Teaching Science in the Elementary Grades. 3 Hours.
Study of the methods and materials in teaching science. Classroom applications of
teaching strategies with analysis of teacher effectiveness in seminar settings are
emphasized. Prerequisite: (BIOL 1543 and BIOL 1541L), and (GEOS 1113 and
GEOS 1111L), and (PHYS 1034 or ASTR 2003 and ASTR 2001L), and CHEDBS or
ELELBS major.

CIED 3262. Language Development for the Educator. 2 Hours.
Nature of speech-language development in preschool and school-aged children,
including cognitive prerequisites, social contexts, and relationships between
language acquisition and literacy. Language differences (dialectal, bilingual) and
speech-language disorders are explored. The role of the educator in facilitating
language acquisition is emphasized. Prerequisite: CHEDBS or ELELBS major.

CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1
Hour.
Designed to provide the foundation for the Honors Thesis. Students and faculty
tutors work "one-on-one" exploring a specific topic which has been agreed upon by
the student and the professor. Prerequisite: Honors candidacy.

CIED 4003. Elementary Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the
Bachelor of Science in Education, Elementary Education program. It focuses on
refinement of generalized knowledge to accommodate specialized content relevant
to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS
major.

CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.
This course is designed to identify and provide evidence of content language specific
proficiencies in the four skills of reading, writing, listening, and speaking a foreign
language.

CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.
This course is designed to prepare pre-service teachers to teach in inclusive
classroom settings at the secondary level. Course content will focus on the ways in
which exceptionality, specifically focused on high-incidence disabilities and culture,
specifically focused on English language learners mediate the learning experiences of
secondary level students.

CIED 4083. Creativity in Daily Practice. 3 Hours.
Arts integration course including the ideas, design, and implementation of practices
in the classroom, board room, and professional field that enrich the experiences of
all stakeholders while building right-brain thinking skills for the new millennium. May
be repeated for up to 6 hours of degree credit.

CIED 4101. Practicum. 1 Hour.
Practicum. Corequisite: CIED 3133.

CIED 4101H. Honors Practicum. 1 Hour.
Practicum. Corequisite: CIED 4113.
This course is equivalent to CIED 4101.

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours.
Focuses on the methodology of facilitating elementary students' literacy
development. Emphasis is on the integration of the communication skills of reading,
writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or
COMM 2323 and CHEDBS or ELELBS major.

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3
Hours.
Focuses on the methodology of facilitating elementary students' literacy
development. Emphasis is on the integration of the communication skills of reading,
writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or
COMM 2323 and CHEDBS or ELELBS major and honors.
This course is equivalent to CIED 4113.

CIED 4123. Literacy Assessment and Interventions in the Elementary
Classroom. 3 Hours.
An undergraduate course focusing on literacy assessment and intervention for
prospective classroom teachers. Participants become familiar with assessment
procedures and instruments for identifying student strengths and weaknesses in
literacy, determining effective intervention strategies for literacy improvement,
and principles of reporting assessment and intervention outcomes. Corequisite:
CIED 4173. Prerequisite: CHEDBS or ELELBS major.

CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1
Hour.
This practicum is a requirement for entry into the EDUC MA, Master of Arts in
Teaching program. Students will be involved in documented experiences with
children for a minimum of 60 hours in grades K-12. Students enrolled in the
multilevel track will be placed in a combination of elementary, middle, and high
school settings. Students enrolled in the secondary track will be placed in a
combination of middle and high school settings. Prerequisite: Cleared background
check.

CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.
This course is designed to provide an introduction to educational assessment,
research methods, and what research has to say about trends and topics in
elementary education. Prerequisite: CHEDBS or ELELBS major.

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3
Hours.
A course in the design and adaptation of curriculum for students in regular,
elementary classrooms. Theoretical bases and curriculum models will be reviewed.
Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major.
CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.
This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major.

CIED 4163. Senior Project. 3 Hours.
This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major.

CIED 4173. Student Teaching. 3 Hours.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. May be repeated for up to 6 hours of degree credit.

CIED 4286. Teaching Experience. 6 Hours.
The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the B.A.T. program.

CIED 4323. Instructional Design for Teachers. 3 Hours.
Study of the design of instruction for students with exceptionalities. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives and methods of instruction and applying them to practical classroom practice. Prerequisite: CIED 3023 and CHEDBS or ELELBS major.

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.
Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major.

CIED 4403. Understanding Cultures in the Classroom. 3 Hours.
This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. Some sections of this course will contain a service learning component.

CIED 4413. Acquiring a Second Language. 3 Hours.
The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English.

CIED 4423. Teaching English as a Second Language. 3 Hours.
This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major.

CIED 4433. The Moral Mind in Action. 3 Hours.
The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed.

CIED 4443. Moral Courage. 3 Hours.
Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed.

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours.
This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature.

CIED 4513. Teaching Children with Mild Disabilities. 3 Hours.
This course is a study of the characteristics of young students with disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4.

CIED 4513H. Honors Teaching Children with Mild Disabilities. 3 Hours.
This course is a study of the characteristics of young students with disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. This course is equivalent to CIED 4513.

CIED 4523. Teaching Children with Severe Disabilities. 3 Hours.
This course is a study of the characteristics of young students with severe disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4.

CIED 4523H. Honors Teaching Children with Severe Disabilities. 3 Hours.
This course is a study of the characteristics of young students with severe disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. This course is equivalent to CIED 4523.

CIED 458VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work “one-on-one” to complete the honors thesis/project. Prerequisite: Honors candidacy and CIED 3901H. May be repeated for up to 3 hours of degree credit.

CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. May be repeated for up to 18 hours of degree credit.

CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. This course is equivalent to CIED 499V.
CIED 5003. Elementary Education Seminar. 3 Hours.
This course is designed to synthesize the foundational content presented in the Master of Arts in Teaching core courses. It focuses on refinement of the generalized knowledge to accommodate specialized content children. Professional attitudes, knowledge and skills relevant to elementary students. Professional attitudes, knowledge and skills applicable to today’s elementary educator are addressed. Prerequisite: Admission to the M.A.T. program.

An introduction to constructing, analyzing, and interpreting tests, types of research and the research process, qualitative and quantitative techniques for assessment, and descriptive and inferential statistics.

CIED 5013. Measurement, Research and Statistical Concepts in the Schools. 3 Hours.
An introduction to constructing, analyzing, and interpreting tests; types of research and the research process; qualitative and quantitative techniques for assessment; and descriptive and inferential statistics. Prerequisite: Admission to graduate school.

CIED 5022. Classroom Management Concepts. 2 Hours.
A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to the M.A.T. program.

CIED 5032. Curriculum Design Concepts for Teachers. 2 Hours.
The design and adaptation of curriculum for students in regular and special K-6 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program.

CIED 5043. Content Area Reading in Elementary Grades. 3 Hours.
This course teaches the integration of reading and writing in the content areas. Reading and writing as integrated strands of the language process is presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to the M.A.T. program.

CIED 5052. Seminar: Multicultural Issues. 2 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education. The ways in which race, ethnicity, class, gender, and exceptionality influence students’ behavior are discussed. Prerequisite: Admission to the M.A.T. program.

CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.
This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to graduate school.

CIED 5063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.
This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to Teacher Education M.A.T. Program. May be repeated for up to 6 hours of degree credit.

CIED 5073. Action Research in Elementary Education. 3 Hours.
Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to M.A.T. program.

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour.
Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. May be repeated for up to 6 hours of degree credit.

CIED 5093. Methods of Instruction for Middle Level I. 3 Hours.
A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). The planning of instruction, microteaching, and the development of middle school instructional materials are included. Prerequisite: Admission to M.A.T. program.

CIED 5103. Advanced Middle Level Principles. 3 Hours.
An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on analysis of cutting-edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: Admission to Masters of Arts in Teaching program.

CIED 5113. Reading in Middle Schools. 3 Hours.
An overview of methods and materials for teaching reading to early adolescents. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: Admission to the middle level education program and CIED 3113.

CIED 5123. Writing Process Across the Curriculum (Middle Level). 3 Hours.
This course will provide an overview of the research, and methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content. Prerequisite: Admission to M.A.T. Program.

CIED 5132. Research in Middle Level Curriculum and Instruction. 2 Hours.
An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practice in educational research and evaluation is done as part of the class. Prerequisite: Admission to the MAT program.

CIED 5143. Internship: Middle Level. 3 Hours.
The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in education classes with practice in the field. Prerequisite: Admission to the M.A.T. program.

CIED 5162. Applied Practicum. 2 Hours.
Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention) and CIED 5183 (Readings in Early Childhood Education). Corequisite: CIED 5183 and CIED 5173. Prerequisite: Admission to the M.A.T. program.

CIED 5173. Literacy Assessment and Intervention. 3 Hours.
Focuses on assessment of young children’s literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment. Prerequisite: Admission to graduate school.

CIED 5183. Readings in Early Childhood Education. 3 Hours.
Will continue to develop understandings of classic studies and will explore the impact these have had on the most recent issues in early childhood education. Prerequisite: Admission to the CHED M.A.T.

CIED 5193. Methods of Instruction for Middle School II. 3 Hours.
Second special methods course for teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5093 and admission to the M.A.T. program.
CIED 5203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching the content area provide the major tenets of instruction.

CIED 5213. Issues and Trends in Literacy. 3 Hours.
This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. Prerequisite: Admission to M.A.T. (EDUCMA) Secondary program or instructor consent. May be repeated for up to 6 hours of degree credit.

CIED 5223. Learning Theory. 3 Hours.
This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to M.A.T. degree program.

CIED 5232. Interdisciplinary Studies. 2 Hours.
Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: Admission to the M.A.T. program.

CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours.
A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to the M.A.T. program.

CIED 5273. Research in Curriculum and Instruction. 3 Hours.
An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the M.A.T. program.

CIED 528V. Teaching Experience. 1-6 Hour.
The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the M.A.T. Program. May be repeated for up to 6 hours of degree credit.

CIED 5293. Special Methods, Interdisciplinary Section. 3 Hours.
The third and final part of the middle level special methods course. Provides interns with the knowledge, dispositions, and skills for developing an interdisciplinary course of study in conjunction with the members of their interdisciplinary team. Prerequisite: CIED 5093 and admission to M.A.T. program.

CIED 5303. Adolescence and Learning. 3 Hours.
Study of the developmental characteristics (physical, emotional, social and intellectual) of early and late adolescence (ages 10-18; grades 5 to 12). The progression from early to late adolescence and the implications this evolution has for learning, motivation, instruction and classroom practices are emphasized. Prerequisite: PSYC 2003.

CIED 5313. Principles of Qualitative Research in Curriculum & Instruction. 3 Hours.
Designed specifically for aspiring qualitative researchers who wish to conduct research in settings unique to curriculum and instruction. Methods of research design, data analysis, and writing for publication will be emphasized. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction.

CIED 5323. Transition Planning for Persons with Disabilities. 3 Hours.
Prepares students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels.

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.
The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 6 hours of degree credit.

CIED 5343. Analysis of Behavior for Teachers. 3 Hours.
An advanced course in managing behaviors in students with exceptionalities. Students are provided with experiences in applying theoretical bases of classroom management through identifying, assessing graphing, and analyzing behavioral data and implementing management plans. Ethical issues in the use of functional analysis are addressed.

CIED 5353. Teaching Students with Diverse Needs in Middle Education Settings. 3 Hours.
To provide future scholar-practitioners with a knowledge base concerning the issues involved in the successful instruction of persons with special learning needs during middle school years.

CIED 5363. Methods and Assessment in K-12 Online Teaching. 3 Hours.
The study of curriculum, instructional methods and assessment techniques to facilitate student learning in K-12 virtual and hybrid teaching environments. Students enrolled in the course will be required to demonstrate knowledge of prevalent and relevant models of K-12 curriculum, web-based instructional methods, assessment techniques and utilize tools for the development and implementation of effective instruction in the K-12 virtual classroom. Prerequisite: Graduate standing.

CIED 5393. Introduction to Linguistics. 3 Hours.
This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context).

CIED 5403. Early Childhood Education: Rationale and Curriculum. 3 Hours.
Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies.

CIED 5423. Curriculum and Instruction: Models and Implementation. 3 Hours.
The study of models of curriculum and instruction and their implementation to facilitate student learning in a variety of instructional environments.

CIED 5433. Methods and Materials for Teaching Children’s and Adolescent Literature. 3 Hours.
Issues and trends in children’s literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children's literature is emphasized. Prerequisite: Undergraduate course in children's literature.
CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the MAT program. May be repeated for up to 6 hours of degree credit.

CIED 5453. Evaluation Techniques. 3 Hours.
Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques.

CIED 5461. Capstone Research Seminar. 1 Hour.
This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to M.A.T. program. May be repeated for up to 2 hours of degree credit.

CIED 5483. Teaching Mathematics. 3 Hours.
Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning mathematics. Prerequisite: Undergrad coursework in teaching elementary or early childhood mathematics.

CIED 5493. Teaching Social Studies. 3 Hours.
Purpose, content, psychology, materials, and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Undergraduate coursework in teaching elementary or early childhood social studies.

CIED 5503. Teaching Science. 3 Hours.
The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school.

CIED 5513. Sound System of American English. 3 Hours.
This course will study the structure and development of American English (AE). Topics include: 1) the structure/systems of American English pronunciation, 2) vowels, 3) consonant system (including such features as minimal pairs, 4) prosody, intonation, rhythm, and stress, and 5) regionalism and social varieties, and 6) pedagogical approaches to teaching the features of American English.

CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to M.A.T. Program. May be repeated for up to 6 hours of degree credit.

CIED 5533. Teaching Language Arts. 3 Hours.
The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in reading, speaking, listening, and writing experiences.

CIED 5543. Structures of American English. 3 Hours.
This course provides an introduction to the grammars of English, including (but not restricted to) traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars.

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.
This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and learning and the effects on educational systems. Prerequisite: Admission to MAT. May be repeated for up to 6 hours of degree credit.

CIED 5563. Teaching Internship/Action Research. 3 Hours.
During this course, Master's candidates will be provided with classroom time to prepare to teach and then will be assigned to a classroom or classrooms. During this time the candidates will have an opportunity (under supervision) to observe, to teach and to participate in classroom activities. Additionally, candidates will research some area of their own pedagogy relevant to the experience.

CIED 5573. Foundations of Literacy. 3 Hours.
Teaching of reading to children; techniques, research, and modern practices.

CIED 5583. Correlates of Reading Process. 3 Hours.
The developmental program is emphasized through a student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of reading process. Prerequisite: CIED 5573.

CIED 5593. Advanced Diagnosis and Intervention. 3 Hours.
Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with cause of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is offered to graduate students with instructor's consent. Enrollment limited to 20. Prerequisite: CIED 5573.

CIED 5603. Innovations in School Education. 3 Hours.
An examination of the change process in education with emphasis on those elements which support or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels.

CIED 5613. Contemporary Issues in Education. 3 Hours.
A study of issues pertaining to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher's role in dealing with current concerns in these areas.

CIED 5623. The School Curriculum. 3 Hours.
General principles and techniques of selecting and organizing curricular materials.

CIED 5633. Analysis of Instruction. 3 Hours.
A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues.

CIED 564V. Science Instructional Strategies. 1-6 Hour.
Methods and materials in teaching specific science content with a focus on that content and/or the pedagogical perspectives necessary for effective and engaging instruction. May be repeated for up to 6 hours of degree credit.

CIED 5653. Methods of Middle School Instruction. 3 Hours.
Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: Graduate standing.

CIED 5663. Evaluation of Instruction. 3 Hours.
Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of behavioral objectives and test items.

CIED 567V. Teaching Foreign Cultures in Social Studies Curricula. 1-6 Hour.
Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies.

CIED 5683. Adolescent Literature. 3 Hours.
Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. Prerequisite: PSYC 3093 or equivalent.
CIED 5703. English Language Arts and Reading Standards: Contents and Quality. 3 Hours.
This course will (1) examine the purposes, contents, and quality of K-12 English language arts and reading standards, (2) analyze their relationship to classroom and school district curricula, student assessment, educator licensing regulations, licensure tests, and professional development, (3) and explore educational, social, and political issues raised by ELA/R standards.

CIED 5713. Integrating the Elementary Curriculum. 3 Hours.
This course focuses on meaningful integration of science, mathematics, literacy, social studies, art, and music in the elementary classroom. A strong foundation for integrating the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to classroom practice. Strategies to coordinate the integration of these subject areas for the K-4 classroom will be modeled.

CIED 5723. Nature and Needs of Persons with Mild Disabilities. 3 Hours.
Educational, psychological, and social characteristics of individuals who have mild disabilities with emphasis on educational methods and modifications. Prerequisite: CIED 3023.

CIED 5793. Practicum in Literacy. 3 Hours.
Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CIED 5593.

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.
Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing.

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.
Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803.

CIED 5823. Gifted and Talented (Structured) Practicum. 3 Hours.
Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CIED 5813.

CIED 5833. Gifted and Talented (Flex) Practicum. 3 Hours.
Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5823.

CIED 5843. Representations of American Education in Film. 3 Hours.
This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies.

CIED 5853. Issues in Mathematics Education. 3 Hours.
Study of research in mathematics education and applications to classroom teaching and learning. Emphasis will be given past and current research in the areas of students' cognitive development in mathematics, mathematics curriculum development, and teaching practices and assessment.

CIED 5863. Teaching Global Issues. 3 Hours.
Global interdependence and its consequent issues have become an integral part of most social studies programs in American schools. Some schools developed specific courses, required or elective, and others include them in existing history, economics, government and civic courses. Social studies teachers and their students explore these issues as part of current events discussions. Prerequisite: Graduate standing.

CIED 5923. Second Language Acquisition. 3 Hours.
This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL.

CIED 5933. Second Language Methodologies. 3 Hours.
This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL.

CIED 5943. Teaching People of Other Cultures. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum.

CIED 5953. Second Language Assessment. 3 Hours.
This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance.

CIED 5963. Reading in Middle and Secondary Schools. 3 Hours.
Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students.

CIED 5973. Practicum in Secondary Education. 3 Hours.
Students will engage in action research in a school setting to advance their knowledge of teaching and learning venues including schools and informal learning environments. Prerequisite: Permission.

CIED 5983. Practicum in Curriculum & Instruction. 3 Hours.
This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semester-long practicum during which an action research project will be designed, enacted, and reported. May be repeated for up to 6 hours of degree credit.

CIED 599V. Special Topics. 1-18 Hour.
Special topics. May be repeated for up to 18 hours of degree credit.

CIED 600V. Master's Thesis. 1-6 Hour.
This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing. May be repeated for degree credit.

CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.
Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation.

CIED 6023. Instructional Theory. 3 Hours.
Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning.

CIED 6033. Content Specific Pedagogy. 3 Hours.
This course explores the relationship between the content of courses taught in schools and the pedagogical principles that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from personal investigation.
CIED 6043. Analysis of Teacher Education. 3 Hours.
This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. Prerequisite: CIED 6023.

CIED 6053. Curriculum and Instruction: Learner Assessment and Program Evaluation. 3 Hours.
This course provides an overview of designing, implementing and analyzing learner assessments as well as systemic and program evaluations in a variety of instructional environments. Prerequisite: Admissions to Ed.S. or Ph.D. program.

CIED 6063. Systemic Change In Education. 3 Hours.
This course is designed to critically examine education and society and interplay their interdependence between them, to differentiate between meaningful and superficial change, and to explore the agents of change in a diverse and complex social environment. Prerequisite: Admission to Ed.S. or Ph.D. program.

CIED 6073. Seminar in Developing Creativity. 3 Hours.
A study of the facets of creativity, how they can be applied to be used in one’s everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students.

CIED 6083. Piaget’s Theory and Instruction. 3 Hours.
Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will devise application. Prerequisite: CIED 6023.

CIED 6093. Vygotsky in the Classroom. 3 Hours.
This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky’s heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings.

CIED 6113. Trends and Issues in Social Studies Education. 3 Hours.
Analysis of social studies education including an examination of the historical, political and social issues that have shaped curriculum, pedagogy and the educator's role in the increasingly complex endeavor to prepare future citizens.

CIED 6123. New Literacy Studies. 3 Hours.
In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign system, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. May be repeated for up to 12 hours of degree credit.

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours.
Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admission to Ed.D, Ed.S. or Ph.D. program.

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.
Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners.

CIED 6153. Theories of Literacy Learning. 3 Hours.
In this seminar, students consider theories of literacy learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored.

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.
Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students.

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours.
In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider implicit and explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core).

CIED 6183. Theory and Research in Arts Integration. 3 Hours.
Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent.

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.
This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults.

CIED 6233. Organization of Reading Programs. 3 Hours.
Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching-learning setting.

CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.
This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science.

CIED 6333. Nature of Science: Philosophy of Science for Science Educators. 3 Hours.
The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. Prerequisite: Admission to grad school.

CIED 6343. Advanced Science Teaching Methods. 3 Hours.
This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional growth in science instruction. Prerequisite: Admission to graduate school.

CIED 6443. Mixed Methods Research. 3 Hours.
This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data.

CIED 6503. Effective Teaching: Concepts and Processes. 3 Hours.
This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: Admission to the Ph.D. program.

CIED 6533. Problem-Based Learning and Teaching. 3 Hours.
A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL.
CIED 6603. Multicultural Education. 3 Hours.
This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, different views of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis is upon schooling experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: Admission to the Ed.S. or Ph.D. program.

CIED 660V. Workshop. 1-18 Hour.
Workshop. May be repeated for up to 18 hours of degree credit.

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.
In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program.

CIED 674V. PhD Research Internship. 1-6 Hour.
This research internship is for doctoral level students in curriculum and instruction. The goal is provide research experience within the doctoral course of study. May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.
Instructor permission required to register. Prerequisite: Instructor permission.

CIED 684V. PhD Teaching Internship. 1-6 Hour.
This teaching internship is for doctoral level students in curriculum and instruction. The goal is to provide teaching experience within the doctoral course of study.

CIED 694V. Special Topics. 1-6 Hour.
Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.
Independent study.

CIED 699V. Doctoral Seminar. 1-3 Hour.
Doctoral seminar. May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.
Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Dance (DANC)

Courses

DANC 1003. Basic Course in the Arts: Movement and Dance. 3 Hours.
Introduction to the nature and scope of ballet, modern dance, and ethnic-ritual-world dance forms, their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of Studio Labs.

DANC 1003H. Honors Basic Course in the Arts: Movement and Dance. 3 Hours.
Introduction to the nature and scope of ballet, ethnic, and modern dance forms, their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of studio labs. Prerequisite: Honors standing. This course is equivalent to DANC 1003.

DANC 1912. Beginning Modern Dance. 2 Hours.
Introduction to basic techniques with an emphasis on acquiring flexibility, strength, and coordination.

DANC 1912. Beginning Modern Dance II. 2 Hours.
A continuation of basic modern dance techniques from DANC 1912, with emphasis on weight, time, and shape in movement.

DANC 1922. Beginning Modern Dance II. 2 Hours.
A continuation of basic modern dance techniques from DANC 1912, with emphasis on weight, time, and shape in movement.

DANC 1932. Beginning Ballet. 2 Hours.
Introduction to the basic techniques of ballet in the recognized classic form including barre exercises, port de bras, and center practice.

DANC 1942. Beginning Ballet II. 2 Hours.
A continuation of the basic techniques of classical ballet from DANC 1932. This course is not recommended for those students who have extensive training, but the student must be versed in the basic fundamentals of ballet.

Dance Education Activity (DEAC)

Courses

DEAC 1961. Ballroom Dance. 1 Hour.
The fundamentals of ballroom dance.

Economics (ECON)

Courses

ECON 2013. Principles of Microeconomics (ACTS Equivalency = ECON 2203). 3 Hours.
Microeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013 and AGEC 2103. Prerequisite: MATH 1203 or higher, or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT. This course is cross-listed with AGEC 2103.

ECON 2013H. Honors Principles of Microeconomics. 3 Hours.
Microeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013H and AGEC 2103. Prerequisite: MATH 1203 or higher or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. This course is cross-listed with ECON 2013, AGEC 2103.

Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023 and AGEC 1103. Prerequisite: MATH 1203 or higher, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT. This course is cross-listed with AGEC 1103.

ECON 2023H. Honors Principles of Microeconomics. 3 Hours.
Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023H and AGEC 1103. Prerequisite: MATH 1203 or higher or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. This course is cross-listed with ECON 2023, AGEC 1103.

ECON 2143. Basic Economics: Theory and Practice. 3 Hours.
Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors.
ECON 2143H. Honors Basic Economics: Theory and Practice. 3 Hours.
Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Not open to students majoring in Economics or Business Administration. This course is equivalent to ECON 2143.

ECON 3033. Microeconomic Theory. 3 Hours.
Nature, scope, and purpose of economic analysis; theories of demand, production, cost, firm behavior, allocation of resources, etc., in a market-oriented system. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554).

ECON 3053. Economics for Elementary Teachers. 3 Hours.
For students who plan to become teachers in elementary schools. Acquaints students with basic concepts and functioning of the American economic system. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work.

ECON 3063. Economics for Secondary Educators. 3 Hours.
Economics for Secondary Educators teaches basic economics understandings equipping students to make sound economics decisions as consumers, investors, voters and savers. Lessons and activities appropriate for secondary classes will be demonstrated. The course will survey materials available for government, economics, world and U.S. history, environmental science, language arts, business education, personal finance and entrepreneurship classes. Walton College majors are not eligible to register for the course. Degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work.

ECON 3133. Macroeconomic Theory. 3 Hours.
Theoretical determinations of national aggregate employment, income, consumption, investment, price level, etc. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143 and ((MATH 2043 or MATH 2554)).

ECON 330V. Economics Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in Economics in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Departmental consent. Junior standing and completion of pre-business course requirements, each with a grade of C or better, a pre-business cumulative GPA of 2.5 or better and an overall GPA of 2.5 or better.

ECON 3333. Public Economics. 3 Hours.
Governmental functions, revenues; tax shifting, incidence; public expenditures, their effects; and fiscal policy. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 3433. Money and Banking. 3 Hours.
Financial history; theory and practice of financial institutions; monetary policy in theory and practice. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 3533. Labor Economics. 3 Hours.
Economic analysis of labor markets. Topics include analysis of labor demand and supply; human capital investment; wage differentials; discrimination; economic effects of labor unions and collective bargaining; public sector labor markets; unemployment; and labor market effects on inflation. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 3633. Economics of Advertising. 3 Hours.
An examination of how economists define and categorize types of products and advertising campaigns. Alternative views of advertising -- persuasive vs. informative -- are discussed. Models of the relationship between advertising and sales, profits, market structure, product quality, and price are examined. Prerequisite: ECON 2023 or ECON 2143.

ECON 3843. Economic Development, Poverty & the Role of the World Bank and IMF in Low-Income Countries. 3 Hours.
Examine theories and patterns of economic development in emerging economies. The role of the World Bank and IMF as multilateral lenders and examination of their success and failures in fostering development. Measures of poverty and inequality and their implications for economic development. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 3853. Emerging Markets. 3 Hours.
An analysis of the business and economic environment in emerging countries; focusing in Latin America, South East Asia and Transition Economies. The topics and issues covered include market structure and market failures, financial and legal background, current institutions and political economy issues, and current business opportunities. Prerequisite: ECON 2143; or ECON 2013 and ECON 2023.

ECON 3933. The Japanese Economic System. 3 Hours.
This course presents essential facts about the Japanese economy and then subjects them to modern economic analyses. Japanese institutions and policies are contrasted with their American counterparts, and these economies are compared in terms of performance. Current issues including contemporary economic conditions and US - Japanese trade relations are also examined. Prerequisite: ECON 2013 or ECON 2143.

ECON 399VH. Honors Course. 1-3 Hour.
Primarily for students participating in Honors program. May be repeated for up to 6 hours of degree credit.

ECON 4003H. Honors Economics Colloquium. 3 Hours.
Explores events, concepts and/or new developments in the field of Economics. Prerequisite: Senior standing.

ECON 4033. History of Economic Thought. 3 Hours.
Historical, critical analysis of economic theories relative to their instructional background. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143 or ECON 3053.

ECON 410V. Special Topics in Economics. 1-6 Hour.
Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. May be repeated for up to 6 hours of degree credit.

ECON 410VH. Honors Special Topics in Economics. 1-6 Hour.
Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. May be repeated for up to 6 hours of degree credit.

This course is equivalent to ECON 410V.

ECON 4173. Nation Model United Nations. 3 Hours.
This class is designed to prepare students for their participation in a Nation Model United Nations (NMUN) Conference. The NMUN Conference is sponsored by The National Collegiate Conference Association (NCCA), which is the largest college-level Model United Nations conference. This course is designed to advance the research skills of the students by requiring extensive background position papers covering various economic and social issues of their assigned committee and ultimately preparing resolution documents they develop during the conference. They will present their positions via speeches and in caucus settings. This course will broaden the students’ international perspective while they gain a thorough understanding of the primary activities of the United Nations. Prerequisite: Junior standing and departmental consent.

ECON 4333. Economics of Organizations. 3 Hours.
An economic perspective on the design of organizations. Applies developments in game theory and contract theory to analyze the role of information and incentives within and between firms. Covers the boundaries of firms, integration and outsourcing, authority and incentives, and alternative organizational structures in an evolving business environment. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.
ECON 4423. Behavioral Economics. 3 Hours.
Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Prerequisite: ECON 2023 or ECON 2143.

ECON 4433. Experimental Economics. 3 Hours.
The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Prerequisite: ECON 2023 or ECON 2143.

ECON 450V. Independent Study. 1-6 Hour.
Permits students on individual basis to explore selected topics in economics. May be repeated for up to 6 hours of degree credit.

ECON 4533. China's Foreign Trade and International Order: History, Policy, and Theory. 3 Hours.
This interdisciplinary course explores China's foreign trade and international order by introducing students to the historical context and economic theory necessary for understanding China's role in the international trading system from the ancient past to the contemporary era. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 4633. International Trade. 3 Hours.
Problems of the international economy from a microeconomic perspective. Topics include analysis of the pattern and content of trade; trade in factors of production; and the applications of trade theory to the study of trade barriers such as tariffs and quotas. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 4643. International Macroeconomics and Finance. 3 Hours.
Problems of the international economy from a macroeconomic perspective. Topics include national income accounting and the balance of payments; exchange rates and the foreign exchange markets; exchange rate policy; macroeconomic policy coordination; developing countries and the problem of 3rd world debt; and the global capital market. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

ECON 468V. International Economics and Business Seminar. 1-6 Hour.
Offered primarily in conjunction with international study abroad programs with an emphasis on international economics and business. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. May be repeated for up to 6 hours of degree credit.

ECON 4743. Introduction to Econometrics. 3 Hours.
Introduction to the application of statistical methods to problems in economics. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (WCOB 1033 or STAT 2303).

ECON 4753. Forecasting. 3 Hours.
The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (WCOB 1033 or STAT 2303).

ECON 5243. Managerial Economics. 3 Hours.
This course will provide students with a strong foundation in core economics principles, with emphasis on industrial organization issues and applications geared toward the supply-chain and retail focus of the redesigned MBA program.

ECON 5253. Economics of Management and Strategy. 3 Hours.
Information economics and applied game theory.

ECON 537V. Global Business. 1-3 Hour.
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. This course is cross-listed with MGMT 5373, ECON 5373.

ECON 5853. International Economics Policy. 3 Hours.
An intensive analysis of the operation of the international economy with emphasis on issues of current policy interest.

ECON 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

ECON 6133. Mathematics for Economic Analysis. 3 Hours.
This course will develop mathematical and statistical skills for learning economics and related fields. Topics include calculus, static optimization, real analysis, linear algebra, convex analysis, and dynamic optimization. Prerequisite: Graduate standing and MATH 2554 or equivalent.

ECON 6213. Microeconomic Theory I. 3 Hours.
Introductory microeconomic theory at the graduate level. Mathematical formulation of the consumer choice, producer behavior, and market equilibrium problems at the level of introductory calculus. Discussion of monopoly, oligopoly, public goods, and externalities.

ECON 6223. Microeconomic Theory II. 3 Hours.
Advanced treatment of the central microeconomic issues using basic real analysis. Formal discussion of duality, general equilibrium, welfare economics, choice under uncertainty, and game theory.

ECON 6313. Macroeconomic Theory I. 3 Hours.
Theoretical development of macroeconomic models that include and explain the natural rate of unemployment hypothesis and rational expectations, consumer behavior, demand for money, market clearing models, investment, and fiscal policy.

ECON 6323. Macroeconomic Theory II. 3 Hours.
Further development of macroeconomic models to include uncertainty and asset pricing theory. Application of macroeconomic models to explain real world situations.

ECON 636V. Special Problems in Economics. 1-6 Hour.
Independent reading and investigation in economics. May be repeated for up to 9 hours of degree credit.

ECON 643V. Seminar in Economic Theory and Research I. 1-3 Hour.
Seminar. May be repeated for up to 6 hours of degree credit.

ECON 644V. Seminar in Economic Theory and Research II. 1-3 Hour.
Independent research and group discussion.

ECON 6533. Seminar in Advanced Economics I. 3 Hours.
This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing.

ECON 6543. Seminar in Advanced Economics II. 3 Hours.
This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing.

ECON 6613. Econometrics I. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite, and ECON 2023, and an introductory statistics course or equivalent.
ECON 6623. Econometrics II. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. The treatment of measurement error and limited dependent variables and the estimation of multiple equation models and basic panel data models will be covered. Additional frontier techniques may be introduced. Prerequisite: ECON 6613.

ECON 6633. Econometrics III. 3 Hours.
Use of economic theory and statistical methods to estimate economic models. Nonlinear and semiparametric/nonparametric methods, dynamic panel data methods, and time series analysis (both stationary and nonstationary processes) will be covered. Additional frontier techniques may be covered. Prerequisite: ECON 6613.

ECON 6713. Industrial Organization I. 3 Hours.
This course will develop the theory of modern industrial organization. The latest advances in microeconomics theory, including game theory, information economics and auction theory will be applied to understand the behavior and organization of firms and industries. Theory will be combined with empirical evidence on firms, industries and markets. Prerequisite: ECON 6213 and ECON 6223.

ECON 6723. Industrial Organization II. 3 Hours.
This course surveys firm decisions, including setting prices, choosing product lines and product quality, employing price discrimination, and taking advantage of market structure. It will also cover behavioral IO, which reconsiders the assumption that firms and consumers are perfectly rational and examines the role of regulation. Prerequisite: ECON 6133.

ECON 6833. International Development I. 3 Hours.
A first graduate level course in development economics with a focus on foundational theoretical issues. We explore the causation, implications, and remedies for pervasive and persistent poverty in low-income countries. Emphasis will be primarily on microeconomics topics. May be taken either as a precursor to International Development Economics II or stand-alone. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or by instructor's permission.

ECON 6843. International Development II. 3 Hours.
A second graduate level course in development economics that focuses on the empirical aspect of development in low-income countries. The course explores various microeconomics topics related to poverty, human capital accumulation, and their interactions with role of public policy. Prerequisite: ECON 6213, (ECON 6613 or AGEC 5613) or instructor consent.

ECON 6913. Experimental Economics. 3 Hours.
The course develops advanced concepts in the use of controlled experiments to test economic theory and explore behavioral regularities relating to economics. The class focuses on the methodology of experimental economics while reviewing a variety of established results. Prerequisite: ECON 6213.

ECON 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Education (EDHP) Courses

EDHP 1001. Freshman Seminar. 1 Hour.
The course is designed to support and assist freshmen in becoming successful, self-directed learners. Focus will be upon campus resources to help learners accomplish this goal and upon strategies for successful learning. The course will meet twice a week for the first eight weeks. Students will receive one hour of ungraded credit or a grade of F.

EDHP 1012. College Learning I. 2 Hours.
EDUC 1012 supports students as they make the transition into a university environment. The focus is on developing and applying college-level thinking and learning skills to specific University courses and on developing a student support base through a class learning community. The course is required for students admitted provisionally to the University.

EDHP 1201. Inquiry Approaches to Teaching: UTeach Step I. 1 Hour.
For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation.

This course is cross-listed with ARSC 1201.

EDHP 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

EDHP 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

EDHP 3003. Seminar in Education. 3 Hours.
This course provides a seminar experience on a topic in the field of education. The topics covered vary by semester and offering, but might include leadership, issues in public education, educational politics and finance, and trends in education. May be repeated for up to 6 hours of degree credit.

EDHP 3013. Introduction to Human Wellness Studies. 3 Hours.
This seminar provides an overview of Human Wellness Studies as an academic major and the primary constructs that comprise how different populations approach the idea of wellness.

EDHP 3103. Seminar in Health Professions. 3 Hours.
This course provides a seminar experience on a topic in the field of health professions. The topics covered vary by semester and offering, but might include leadership, issues in public health, the politics and financing of American health, and trends in health professions.

EDHP 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

EDHP 3923H. Honors Education Seminar. 3 Hours.
Special topics or issues in education for the Honors student. Prerequisite: Honors candidacy. May be repeated for degree credit.

EDHP 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

Education Reform (EDRE) Courses

EDRE 4913H. Honors Social Studies through Fiction. 3 Hours.
As common references to utopian schemes and Orwellian newspeak show, some of the most important works of politics are fictional. This course explores classic and contemporary works of political fiction, to better understand recent political history and such concepts as power, freedom, totalitarianism, discrimination, and social class.

EDRE 498VH. Honors Seminar. 1-3 Hour.
Topics vary by instructor.

EDRE 499V. Special Topics in Education Policy. 1-3 Hour.
Topics vary by instructor. May be repeated for up to 6 hours of degree credit.

EDRE 5053. Philosophy and History of Education and Education Reform. 3 Hours.
This course traces the historical development of the philosophical debates concerning education and its role in society as well as how those ideas and consequent demands for reform affected the educational system and its structures.
EDRE 559V. Field Research. 1-6 Hour.
Directed graduate-level field research in education policy settings. Prerequisite: Approval of EDRE Graduate Director. May be repeated for up to 6 hours of degree credit.

EDRE 6023. Economics of Education. 3 Hours.
This course applies the principles of economic analysis to education and education reform. Topics include: Human capital and signaling theories; education labor markets; educational production functions; public policy and market forces. The course also features empirical evidence evaluating economic theories of education.

EDRE 6033. Politics of Education. 3 Hours.
This course explores historical and institutional forces that help shape education policymaking. Particular attention will be paid to the experience of past education reform movements as well as the influence of interest groups, federalism, bureaucracy, governance structures, public opinion, and judicial review on education policy.

EDRE 6043. Finance and Education Policy. 3 Hours.
This course examines K-12 education finance from the standpoint of education reform policy. The tools of analysis include economics, public finance, law and political science. Topics include: revenue sources and fiscal federalism, standards-based reform and school finance, school funding formulas, adequacy lawsuits, the politics of school funding, school funding and markets. The course also features empirical evidence on the educational impact of education finance.

EDRE 6053. Measurement of Educational Outcomes. 3 Hours.
This course will train students to consider the various types of outcome and assessment measures used for education at the K-12 level throughout the United States; further, the students will engage in analyses of research that relies on these various outcome measures.

EDRE 6103. Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to the quantitative techniques required for the evaluation of education policies and interventions. The class will focus on the identification and estimation of causal effects, necessary assumptions, and how to deal with the failure of these assumptions. Major topics covered include randomized experiments, the ordinary least squares regression method, matching estimators, instrumental variable methods, regression discontinuity, difference in difference methods, and introduction to estimation strategies with panel data models.

EDRE 6113. Advanced Quantitative Analytical Techniques for Education Policy. 3 Hours.
This course introduces students to advanced estimation methods and empirical models often used in education policy empirical research, such as Maximum Likelihood to estimate discrete choice models, censored models and selection models, duration models, Generalized Method of Moments to estimate dynamic panel data models, and bootstrapping of standard errors and simulation-based inference. Prerequisite: EDRE 6103.

EDRE 6213. Program Evaluation and Research Design. 3 Hours.
This course provides students with training in the methods used to generate evidence-based answers to questions regarding the efficacy and impacts of education programs. The central questions that motivate most educational program evaluations are: (1) What is the problem? (2) What policies or programs are in place to address the problem? (3) What is their effect? (4) What works better? (5) What are the relative benefits and costs of alternatives?. This course is cross-listed with ESRM 6613.

EDRE 6223. Research Seminar in Education Policy. 3 Hours.
This course provides students with the opportunity to learn about education policy research by interacting directly with the leading scholars and practitioners in the field. Students will also gain a foundation in the field of education policy research by reading and discussing some of the founding works of the field.

EDRE 636V. Special Problems. 1-6 Hour.
Independent reading and investigation in education policy under faculty supervision. Prerequisite: Approval of EDRE Graduate Director. May be repeated for up to 6 hours of degree credit.

EDRE 6413. Issues in Education Policy. 3 Hours.
This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. In great measure, the goals of the course will be accomplished through the consideration of opposing stances on key educational policy debates and issues that are of current import. This course is cross-listed with EDFD 5683.

EDRE 6423. Seminar in School Choice Policy. 3 Hours.
This course examines parental school choice - perhaps the most controversial education reform of our age. Students will be introduced to the full set of school choice policies, including charter schools and vouchers, and evaluate their benefits and drawbacks as educational interventions.

EDRE 6433. Seminar in Education Accountability Policy. 3 Hours.
This course examines K-12 school and district accountability under state and Federal law (e.g. NCLB), as well as teacher and student accountability (e.g. exit exams). Topics include the theory of incentives and politics of tradeoffs, measurement issues of policy implementation, and statistical evidence on policy effects on performance.

EDRE 6443. Seminar in Education Leadership Policy. 3 Hours.
This course will examine the individual and systemic prerequisites of effective leadership of schools and school systems, and effective leadership techniques. It will consider the differences between public and private sector leadership. It will also explore ways to identify effective and ineffective leaders, and design and evaluate systems to recruit and train the former and reassign the latter.

EDRE 6453. Seminar in Teacher Quality and Public Policy. 3 Hours.
Examines how our public system of education shapes the preparation and continued professional development of K-12 teachers, and how that system has been influenced by standards-based education reform as well as efforts to enhance the quality of teaching and learning in public schools. Uses education reform legislation in several states as case studies to illustrate the successes and pitfalls of attempts to reform teacher education and licensure through public policy.

EDRE 674V. Internship in Education Policy. 1-6 Hour.
Internship at a public or private entity involved in the making or implementation of education policy. Paper required on a significant aspect of the internship experience. Prerequisite: Approval of EDRE Graduate Director.

EDRE 699V. Special Topics. 1-3 Hour.
Topics vary depending on instructor. Prerequisite: Approval of EDRE Graduate Director. May be repeated for up to 9 hours of degree credit.

EDRE 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Educational Foundations (EDFD) Courses

EDFD 5303. Historical Foundations of Modern Education. 3 Hours.
Critical analysis and interpretation of the historical antecedents of contemporary education, focusing upon the American experience from the colonial period to the present.

EDFD 5353. Philosophy of Education. 3 Hours.
Introduction to the method and attitude essential to effective analysis and interpretation of issues and values within a society reflecting cultural, ethnic, gender, and global diversity. Prerequisite: Graduate standing.
EDFD 5373. Psychological Foundations of Teaching and Learning. 3 Hours.  
Psychological principles and research applied to classroom learning and instruction.  
Social, emotional, and intellectual factors relevant to topics such as readiness,  
motivation, discipline, and evaluation in the classroom.

EDFD 5573. Life-Span Human Development. 3 Hours.  
Basic principles of development throughout the human life-cycle. Physical, cognitive,  
social, emotional, and personality development.

EDFD 5673. Principles of Motivation. 3 Hours.  
This course focuses on theories and concepts of human motivation. Students explore  
what motivates students to learn and examine strategies, techniques, and  
interventions that promote and sustain learner motivation.

EDFD 5683. Issues in Educational Policy. 3 Hours.  
This course examines how K-12 education policy is designed and implemented  
in the United States. Students will develop a working knowledge of policymaking  
frameworks to examine major education policies of current interest and debate key  
policy issues that arise at each level of government.

This course is cross-listed with EDRE 6413.

EDFD 5773. Advanced Topics in Educational Psychology. 3 Hours.  
This course provides an opportunity for advanced study of socio-cognitive variables  
that play a crucial role in working in administration, teaching, and the evaluation  
of the success of students and academic programs. Prerequisite: ESRM 6403 and  
EDFD 5373.

Educational Leadership (EDLE) Courses

EDLE 5003. Schools and Society. 3 Hours.  
Schools and Society is an introduction to the social, structural, political and historical  
forces that have created the American school system.

EDLE 5013. School Organization and Administration. 3 Hours.  
Analysis of structure and organization of American public education; fundamental  
principles of school management and administration.

EDLE 5023. The School Principalship. 3 Hours.  
Duties and responsibilities of the public school building administrator; examination  
and analysis of problems, issues, and current trends in the theory and practice of the  
principalship.

EDLE 5033. Psychology of Learning. 3 Hours.  
This course prepares educational leaders to create and sustain a learning centered  
environment in school settings. Students will study learning theory across the  
lifespan and apply it to the practice of instructional leadership, curriculum design,  
and staff development.

EDLE 5043. Leadership Ethics. 3 Hours.  
Leadership Ethics is an experiential based course grounded in ethical decision  
making theory that uses case study and practice to study school based ethical  
dilemmas.

EDLE 5053. School Law. 3 Hours.  
Legal aspects of public and private schooling: federal and state legislative statues  
and judicial decisions, with emphasis upon Arkansas public education.

EDLE 5063. Instructional Leadership, Planning, and Supervision. 3 Hours.  
Instructional Leadership, Planning, and Supervision is designed to prepare  
practitioners to seize the role of educational leader at the school site level through  
the development of a vision that will be used to drive a data driven instructional  
school plan.

EDLE 5073. Research for Leaders. 3 Hours.  
This course introduces research methodology that will support school leaders as  
consumers of educational research and supervisors of action research within their  
schools. Practical application of research for school leaders is emphasized.

EDLE 5083. Analytical Decision-Making. 3 Hours.  
Analytical Decision Making is a performance based examination of the principles  
and practices related to the building administrator’s role in the development,  
admission, and evaluation of curricular programs in public schools. This includes  
creating a school culture, fostering communication, aligning curriculum with state  
mandated standards, and staff development.

EDLE 5093. Effective Leadership for School Improvement. 3 Hours.  
A performance based examination of strategic planning, group facilitation and  
decision-making, organizational behavior and development, professional ethics and  
standards, student services administration, and principles of effective leadership.

EDLE 574V. Internship. 1-6 Hour.  
Supervised in-school/district experiences individually designed to afford  
opportunities to apply previously-acquired knowledge and skills in administrative  
workplace settings. May be repeated for up to 3 hours of degree credit.

EDLE 599V. Seminar. 1-6 Hour.  
Important foundational topics in educational leadership that are current and critical  
will be taught in this Master’s-level seminar. Topics range from the psychology of  
learning and leading to how schools and society interact in the 21st century. May be  
repeated for up to 6 hours of degree credit.

EDLE 600V. Master’s Thesis. 1-6 Hour.  
Master’s Thesis. May be repeated for degree credit.

EDLE 6023. School Facilities Planning and Management. 3 Hours.  
School facilities planning, management, cost analysis, operations, and maintenance  
of the school plant.

EDLE 6053. School-Community Relations. 3 Hours.  
Community analysis, politics and education; power groups and influences; school  
issues and public responses; local policy development and implementation; effective  
communication and public relations strategies.

EDLE 605V. Independent Study. 1-6 Hour.  
Independent study. May be repeated for up to 6 hours of degree credit.

EDLE 6093. School District Governance: The Superintendency. 3 Hours.  
Analysis of the organizational and governance structures of American public  
education at national, state, and local levels.

EDLE 6103. School Finance. 3 Hours.  
Principles, issues and problems of school funding formulae and fiscal allocations to  
school districts.

EDLE 6173. School Business Management. 3 Hours.  
Fiscal and resource management in public schools: budgeting, insurance,  
purchasing, and accounting.

EDLE 6333. Advanced Legal Issues in Education. 3 Hours.  
The examination and discussion of advanced legal issues affecting public school  
education. Prerequisite: Advanced graduate standing.

EDLE 6433. Legal Aspects of Special Education. 3 Hours.  
A study of litigation and legislation in special education, federal and state laws and  
court cases, and due process hearings.  
This course is cross-listed with SPED 6433.

EDLE 6503. Topics in Educational Research for School Administration. 3 Hours.  
Application of educational research in the school setting by educational  
administrators. Emphasis placed on the use of state and local school or district data,  
data analysis, interpretation and reporting, hands-on experience with SPSS, and  
the formal process of writing a research report. Prerequisite: Advanced graduate  
standing.

</thead>
<tbody>
<tr>
<td>EDLE 6513. Program Evaluation in Education. 3 Hours.</td>
<td></td>
<td>Program Evaluation in Education is designed to introduce students to concepts and methods of policy and program evaluation. Emphasis will be placed on preparing educational leadership students to conduct a program evaluation specialist project of dissertation.</td>
</tr>
<tr>
<td>EDLE 6523. Advanced Application of Educational Leadership. 3 Hours.</td>
<td></td>
<td>A review of seminal and current works on leadership as applied to the educational setting. Provides knowledge of classic and contemporary strategies for leadership.</td>
</tr>
<tr>
<td>EDLE 6533. Educational Policy. 3 Hours.</td>
<td></td>
<td>Examination of the research and theory related to the evolution of local, state, and federal governance and educational policy. Emphasis given to the consideration of procedures involving policy formulation, implementation, and analysis.</td>
</tr>
<tr>
<td>EDLE 6543. Introduction to Qualitative Research. 3 Hours.</td>
<td></td>
<td>This course offers an introduction to the qualitative approach to research in the Social Sciences. In particular, this course focuses on initial qualitative research designs that support planning, problem solving, and evaluation for educational leaders. Developing a conceptual framework, gaining an initial understanding of the methods of data collection and analysis, and establishing credibility in qualitative research are discussed. This course will be taught online using Blackboard and will require synchronous online class meetings that will require a webcam and microphone.</td>
</tr>
<tr>
<td>EDLE 6553. Advanced Qualitative Methods in Educational Research. 3 Hours.</td>
<td></td>
<td>This course has been designed to provide graduate students with a more in-depth understanding of qualitative research methods. Emphasis will be placed on preparing educational leadership students to design a qualitative or mixed-method dissertation study. Prerequisite: ESRM 6543 or HRWD 572V.</td>
</tr>
<tr>
<td>EDLE 6563. Advanced Data Collection for Program Evaluation. 3 Hours.</td>
<td></td>
<td>This course is designed to provide graduate students with an in-depth understanding of how to effectively collect data for a program evaluation. Emphasis will be placed on guiding educational leadership students through the data collection procedures they will use for their dissertation. Prerequisite: ESRM 6543 or EDLE 6553.</td>
</tr>
<tr>
<td>EDLE 6573. Advanced Empirical Analysis for Program Evaluation. 3 Hours.</td>
<td></td>
<td>This course is designed to provide graduate students with an in-depth understanding of how to effectively analyze data for a program evaluation. Emphasis will be placed on guiding educational leadership students through the data analysis procedures they will use for their dissertation. Prerequisite: ESRM 6543 or EDLE 6553.</td>
</tr>
<tr>
<td>EDLE 674V. Internship. 1-6 Hour.</td>
<td></td>
<td>Internship. May be repeated for up to 6 hours of degree credit.</td>
</tr>
<tr>
<td>EDLE 680V. Educational Specialist Project. 1-6 Hour.</td>
<td></td>
<td>An original project, research project, or report required of all Ed.S. Degree candidates. Prerequisite: Admission to the Ed.S. program.</td>
</tr>
<tr>
<td>ESRM 599V. Seminar. 1-6 Hour.</td>
<td></td>
<td>Seminar. Prerequisite: Advanced graduate standing. May be repeated for up to 6 hours of degree credit.</td>

<td>ESRM 605V. Independent Study. 1-6 Hour.</td>
<td></td>
<td>Independent study.</td>
</tr>
<tr>
<td>ESRM 6403. Educational Statistics and Data Processing. 3 Hours.</td>
<td></td>
<td>Theory and application of frequency distributions, graphical methods, central tendency, variability, simple regression and correlation indexes, chi-square, sampling, and parameter estimation, and hypothesis testing. Use of the computer for the organization, reduction, and analysis of data (required of doctoral candidates). Prerequisite: ESRM 5013 or equivalent.</td>
</tr>
<tr>
<td>ESRM 6423. Multiple Regression Techniques for Education. 3 Hours.</td>
<td></td>
<td>Introduction to multiple regression procedures for analyzing data as applied in educational settings, including multicollinearity, dummy variables, analysis of covariance, curvilinear regression, and path analysis. Prerequisite: ESRM 6403.</td>
</tr>
<tr>
<td>ESRM 6453. Applied Multivariate Statistics. 3 Hours.</td>
<td></td>
<td>Multivariate statistical procedures as applied to educational research settings including discriminant analysis, principal components analysis, factor analysis, canonical correlation, and cluster analysis. Emphasis on use of existing computer statistical packages. Prerequisite: ESRM 6413.</td>
</tr>
<tr>
<td>ESRM 6513. Hierarchical Linear Modeling. 3 Hours.</td>
<td></td>
<td>This course covers the theory and applications of hierarchical linear modeling (HLM) also known as multilevel modeling. Both the conceptual and methodological issues for analyses of nested (clustered) data in using HLM will be reviewed, including linear models, non-linear models, growth models, and some alternative designs. Prerequisite: ESRM 6413 and ESRM 6423.</td>
</tr>
<tr>
<td>ESRM 6523. Structural Equation Modeling. 3 Hours.</td>
<td></td>
<td>This course provides a detailed introduction to structural equation modeling (SEM) based on students' previous knowledge of multiple linear regression. Topics include path analysis, confirmatory factor analysis, full latent variable models, estimation techniques, data-model fit analysis, model comparison, and other topics, potentially equivalent models, specification searches, latent mean models, parameter invariance, multi-group models, and models of discrete data. Prerequisite: ESRM 6423.</td>
</tr>
<tr>
<td>ESRM 6533. Qualitative Research. 3 Hours.</td>
<td></td>
<td>Introduction of non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Prerequisite: ESRM 6403.</td>
</tr>
<tr>
<td>ESRM 6543. Advanced Qualitative Research. 3 Hours.</td>
<td></td>
<td>Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: ESRM 6533. May be repeated for up to 6 hours of degree credit.</td>

EDST 3333. Children's & Young Adult Literature in Educational Settings. 3 Hours.
This course provides a comprehensive overview of children's, adolescent, and young adult literature across educational settings, both formal and informal. Picture books, novels, informational texts, and the novelization of movies and vice versa for children and adolescent audiences will be explored. This course is not part of the K-6 license program.

EDST 3003. Formative Readings for Cultural Education. 3 Hours.
This course examines some of the historically important readings stemming from identification of the America Reads project produced by the Library of Congress (2014-2016). Special attention will be devoted to the understanding of the relevance of these historical documents and texts to the American identity. The course will focus on the role education plays in the creation of the current society through cultural transmission. The role of education through public schooling in the formations of citizens has been historically documented and deemed necessary under American political thought. This course is constructed to establish linkages of educational trends in the promotion of literacy and the popularization of popular cultural literature of the 18th, 19th, and 20th century that has shaped the social, economic, environmental, and political landscape that a citizen may navigate over their lifetime.

EDST 3023. Internship in Educational Studies. 3 Hours.
The internship is a prearranged onsite work experience serving in an educationally related field. Internships my be served at a variety of public or private based educational services or agencies. The internship experience must include a minimum number of practical work hours (120), reflective journaling, mid-semester evaluation, and final report. All arrangements for internships should be coordinated through the COEHP Office of Field Placement must be approved prior to the start of the semester by the Educational Studies program coordinator and Director of Field Placement. State of Arkansas background checks may be required for individuals completing internships at locations serving populations of minors. Prerequisite: Junior standing and EDSTBS majors only. May be repeated for up to 9 hours of degree credit.

EDST 3113. Legal & Historical Developments in Education. 3 Hours.
This lecture provides an overview of issues in the field of education coming out of political and legal developments in the United States over the last two centuries. Special interest is paid to educational legislation, case law, and global comparative education.

EDST 3203. Multicultural Education Issues. 3 Hours.
The purpose of this course is to give pre-service educators an opportunity to explore various facets of multiculturalism and their implications for future practice. We will examine the impact of race, class, gender, sexual orientation, religion, and other aspects of social group identities on teaching and learning as they relate to contexts in multiple learning environments. While this course is broad in scope, the primary aim is to assist future educators in exploring what it means to be an educator in a society that is multicultural, within a vast educational system (public and private) which is stratified according to multiple factors. Students should not be in enrolled in EDST 3203 & CIED 4403 during the same semester.

EDST 3223. American Educational History. 3 Hours.
This course is designed to offer a comprehensive study of the history of the American education system. Students completing this course will be able to document the diverse and often competing influences into what has become the public school structure, as well as, the second system of American schools, parochial schools, arising out of the schooling conflict of the 1880's. Starting with the development of literacy skills and the formation of township or colony schools, the linage of schooling will be investigated from the late 1600's to the present time.

EDST 3333. Children's & Young Adult Literature in Educational Settings. 3 Hours.
This course provides a comprehensive overview of children's, adolescent, and young adult literature across educational settings, both formal and informal. Picture books, novels, informational texts, and the novelization of movies and vice versa for children and adolescent audiences will be explored. This course is not part of the K-6 license program.
EDST 399V. Special Topics in Educational Studies. 1-3 Hours.
Discussion and advanced studies on selected topics in educational studies. Special
focus on recent and emerging topics in education. Junior (3000) level course
offerings. Course may be repeated only for unique topic enrollments. May be
repeated for up to 9 hours of degree credit.

EDST 399VH. Honors Special Topics in Educational Studies. 1-3 Hours.
Discussion and advanced studies on selected topics in educational studies. Special
focus on recent and emerging topics in education. Junior (3000) level course
offerings. Each offering of EDST 399VH must be unique. Student may not repeat
the same topic for degree credit multiple times. May be repeated for up to 9 hours of
degree credit.

EDST 4003. Philosophy and Inquiry in Education. 3 Hours.
This course provides a review of philosophical ideas in education and an introduction
to research, methodologies, foundation theories in education. Students explore
historical ideas in philosophy pertaining to education and how those ideas
contribute to current educational practices. Students in the course learn about
the nature of research, both theoretical and applied, and the process of developing
future research based agendas. Prerequisite: (EDST 3113 and EDST 4113) OR

EDST 4003H. Honors Philosophy & Inquiry in Education. 3 Hours.
This course provides a review of philosophical ideas in education and an introduction
to research, methodologies, foundation theories in education. Students explore
historical ideas in philosophy pertaining to education and how those ideas
contribute to current educational practices. Students in the course learn about
the nature of research, both theoretical and applied, and the process of developing
future research based agendas. Prerequisite: (EDST 3113 and EDST 4113) OR

EDST 4013. Capstone Seminar and Final Internship in Education. 3 Hours.
The capstone course provides students with a culminating experience for
Educational Studies. The course provides an opportunity for students to develop
a portfolio of their learning and to evaluate their overall program performance in
preparation for completion of their degrees. This course contains 100 hours of
internship experience and will serve as the final internship experience for EDSTBS
majors. This course includes 20 hours of coursework along with the required
internship experience. This course should only be enrolled in after the completion
of two EDST 3023 internship and during the students final year or coursework.
Prerequisite: EDSTBS major, senior standing in EDSTBS program, and completion
of 6 hours of EDST 3023.

EDST 4113. Teaching and Funding Outdoor & Informal Education. 3 Hours.
In-depth exploration of natural/outdoors education and informal education and grant
writing for education will be covered. Methods and techniques in the preparation
and delivery of teaching in nontraditional instructional settings (informal education)
will be developed. Course participants will be required to teach an outdoor and/or
informal education class and participate in a collaborative grant application process.
Prerequisite: EDST 3113.

EDST 4213. Religion, Education, & Religious Education. 3 Hours.
This course provides a comprehensive introduction on the influences of religion
in education, particularly in relation to the dynamic of religion in public education
in the United States. Students in the course learn about the nature of the study of
religion, religious studies, and religious education, as well as the teaching of religion.
Prerequisite: (EDST 3113 and EDST 3223) or Religious Studies minor, or instructor
consent.

Educational Technology (ETEC)

Courses

ETEC 5203. Foundations of Educational Technology. 3 Hours.
Provides learners with a comprehensive survey of the major trends, issues, people,
processes, and products that have significantly affected the evolution of the field of
educational technology.

ETEC 5213. Educational Media. 3 Hours.
Instruction in selecting, utilizing and evaluating instructional materials and
equipment. Prerequisite: Graduate standing.

ETEC 5243. Instructional Design Theory & Models. 3 Hours.
A study of the instructional development process as it pertains to the design
and production of instructional materials which use modern technologies. Goal
analysis, objectives, evaluation, instructional strategy development, production of
an educational product, and revision of the instructional materials are considered.
Prerequisite: Graduate standing.

ETEC 5253. Information Technologies. 3 Hours.
Students perform intensive examinations of the role of new technologies and their
implications for instructional practice. Emphasis is on identification and evaluation
of new technologies in instructional environments. Establishing and maintaining
learning environments, exploring selected theories and concepts, assessing
potential uses of IT, and utilization of new technologies will occur.

ETEC 5263. Grant Writing in Instructional Technology. 3 Hours.
Students will have an opportunity to find grant funding sources, write a grant, and
submit an actual grant proposal to an agency for consideration. Will survey research
in instructional media over the past 60 years and learn specific criteria for reading
and evaluating research reports and articles. Will investigate current issues and
topics related to research and grant writing in instructional media.

ETEC 5273. Advanced Design of Educational Media. 3 Hours.
Instruction in the planning and local production of instructional materials.
Prerequisite: ETEC 5213.

ETEC 5283. Field Experiences in Educational Technology. 3 Hours.
Field experience in educational technology settings. Prerequisite: Graduate standing
and 6 hours of graduate work in educational technology.

ETEC 5303. Learning with Computers in K-12 Classrooms. 3 Hours.
Students learn how technology can be used to support K-12 classroom
environments. Various learning theories and technologies will be explored and
projects will be developed that utilize technologies and current learning theories
in K-12 settings. Emphasis is on identification, evaluation, and the effective use of
technologies to support classroom environments. Prerequisite: Graduate standing.

ETEC 5313. Principles in Visual Literacy. 3 Hours.
Students gain understanding of visual literacy research and learn to create graphics
that support learning. Literature in the area of visual literacy and learning theories
as well as tools that facilitate effective visual literacy will be used to create visuals that
are clear, communicate well, and help enhance learner performance.

ETEC 5373. Web Design. 3 Hours.
Students design, create, and analyze Web sites by applying processes, standards
and techniques used to identify target audience; ensure compliance with copyright
and disability laws, measure effectiveness, and coordinate Web design. Topics
include copyright and fair use, user and task analysis, usability, accessibility,
testing, search engine optimization, and web analytics. Prerequisite: ETEC 5213 or
equivalent experience. May be repeated for up to 3 hours of degree credit.
ETEC 5743. Internship. 3 Hours.
A supervised field placement in educational technology that provides experience consistent with the student’s professional goals and training emphasis. Internship experiences are planning and directed under the guidance of a faculty member. On-campus and on-site supervision is required. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

ETEC 5981. Eportfolio Production. 1 Hour.
This is a capstone course that is typically taken in the last semester of coursework and designed to: 1) review key constructs presented within the Educational Technology curriculum; 2) provide ETEC students the opportunity for reflection relative to his/her learning of the key concepts; and 3) utilize technology to assemble student-created artifacts that demonstrate mastery of the key concepts.

ETEC 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. May be repeated for degree credit.

ETEC 6053. Special Problems in Educational Technology. 3 Hours.
Individually designed and conducted studies of educational technology under the guidance of a faculty member. Negotiated learning contract with supervising faculty required before enrollment. On-campus supervision required. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

ETEC 6223. Strategic Planning and IDT Programs. 3 Hours.
The course offers readings and experiences intended to develop strategic planning knowledge, values, attitudes, and skills in future instructional design and technology leaders. Topics covered include strategic planning and leadership.

ETEC 6243. Advanced Instructional Design. 3 Hours.
This course explores advanced topics in instructional design to facilitate understanding of grounded models, advanced theories, and research. This course focuses on: 1) design and development of contextualized technology-supported learning environments; 2) analysis and application of advanced theoretical foundations of design; and 3) examination and critique of instructional design research. Prerequisite: ETEC 5243 or equivalent.

ETEC 6253. Distance Learning. 3 Hours.
An intensive examination of the role of telecommunications and distance education technologies and their implications for educational practices. Emphasis is on techniques of development, utilization and evaluation of telecommunication and distance education technologies in classroom environments.

ETEC 6393. Issues and Trends in Instructional Design and Technology. 3 Hours.
Critical challenges posed as a result of the increasing infusion of technology into the school and training environments are explored. The course prepares students to make and defend policy decisions and become conversant with current trends and issues in the field.

Electrical Engineering (ELEG) Courses

ELEG 2104. Electric Circuits I. 4 Hours.
Introduction to circuit variables, elements, and simple resistive circuits. Analysis techniques applied to resistive circuits. The concept of inductance, capacitance and mutual inductance. The natural and step responses of RL, RC, and RLC circuits. Corequisite: Lab component. Pre- or Corequisite: MATH 2564 or MATH 2564C.

ELEG 2114. Electric Circuits II. 4 Hours.
Introduction to complex numbers. Sinusoidal steady-state analysis of electric circuits, active, reactive, apparent and complex power; balanced and unbalanced three-phase circuits; mutual inductance; the use of the Laplace transform for electric circuit analysis and two-port networks. Corequisite: Lab component. Pre- or Corequisite: MATH 2584. Prerequisite: ELEG 2104.

ELEG 287V. Special Topics in Electrical Engineering. 1-4 Hour.
Consideration of current electrical engineering topics not covered in other courses. May be repeated for up to 4 hours of degree credit.

ELEG 2904. Digital Design. 4 Hours.
To introduce students to modern logic concepts, problem solving and design principles, and vocabulary and philosophy of the digital world. Corequisite: Lab component. Prerequisite: Engineering major. This course is cross-listed with CSCE 2114.

ELEG 3124. System & Signal Analysis. 4 Hours.
Definition and description of signals and systems; analog, digital, continuous- and discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Pre- or Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2104 or ELEG 3903 or BMEG 2904.

ELEG 3124H. Honors System & Signal Analysis. 4 Hours.
Definition and description of signals and systems; analog, digital, continuous- and discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Pre- or Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2104 or ELEG 3903 or BMEG 2904.

This course is equivalent to ELEG 3124.

ELEG 3143. Probability & Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124.

ELEG 3143H. Honors Probability & Stochastic Processes. 3 Hours.
Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124.

This course is equivalent to ELEG 3143.

ELEG 3124. System & Signal Analysis. 4 Hours.
Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Course has a lab component. Pre- or Corequisite: MATH 2574. Corequisite: Lab component. Prerequisite: ELEG 2114 and PHYS 2074.

ELEG 3124H. Honors System & Signal Analysis. 4 Hours.
Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Pre- or Corequisite: MATH 2574. Corequisite: Lab component. Prerequisite: ELEG 2114 and PHYS 2074.

This course is equivalent to ELEG 3124.

ELEG 3124. System & Signal Analysis. 4 Hours.
Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications. Pre- or Corequisite: MATH 2574 or ELEG 3124. Corequisite: Lab component. Prerequisite: ELEG 3124H.

ELEG 3124H. Honors System & Signal Analysis. 4 Hours.
Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications. Pre- or Corequisite: MATH 2574 or ELEG 3124H. Corequisite: Lab component. Prerequisite: ELEG 3124H.

ELEG 3304. Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2114.
ELEG 3304H. Honors Energy Systems. 4 Hours.
Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2114. This course is equivalent to ELEG 3304.

ELEG 3704. Applied Electromagnetics. 4 Hours.
This course is equivalent to ELEG 3704.

ELEG 3704H. Honors Applied Electromagnetics. 4 Hours.
This course is equivalent to ELEG 3704.

ELEG 387V. Special Topics in Electrical Engineering. 1-4 Hour.
Consideration of current electrical engineering topics not covered in other courses.

ELEG 3903. Electric Circuits and Machines. 3 Hours.
Basic electrical principles and circuits; Introduction to sinusoidal steady-state analysis of electric circuits, active, reactive, and complex power; balanced three-phase circuits; Steady-state analysis of electric machines and transformers. Introduction to power electronics for machine speed control and alternative energy sources. For engineering students other than those in electrical engineering. Prerequisite: MATH 2564 and PHYS 2074.

ELEG 3924. Microprocessor Systems Design. 4 Hours.
Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Pre- or Corequisite: ELEG 2904.

ELEG 3924H. Honors Microprocessor Systems Design. 4 Hours.
Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Prerequisite: ELEG 2904. This course is equivalent to ELEG 3924.

ELEG 3933. Circuits & Electronics. 3 Hours.
Basic principles of electric and electronic circuits and devices. For engineering students who are not pursuing a degree in electrical engineering. Prerequisite: MATH 2584 and PHYS 2074.

ELEG 400VH. Honors Senior Thesis. 1-3 Hour.
Honors senior thesis. Prerequisite: Senior standing. This course is equivalent to ELEG 400V.

ELEG 4063. Electrical Engineering Design I. 3 Hours.
Capstone design and application in electrical engineering. Prerequisite: ELEG 3224 and ELEG 3924.

ELEG 4063H. Honors Electrical Engineering Design I. 3 Hours.
Design and application in electrical engineering. Prerequisite: ELEG 3224 and ELEG 3924. This course is equivalent to ELEG 4063.

ELEG 4071. Electrical Engineering Design II. 1 Hour.
Design and application in electrical engineering. Prerequisite: ELEG 4063.

ELEG 4071H. Honors Electrical Engineering Design II. 1 Hour.
Design and application in electrical engineering. Prerequisite: ELEG 4063. This course is equivalent to ELEG 4071.

ELEG 4203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3214, or graduate standing.

ELEG 4203H. Honors Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3214, or graduate standing. This course is equivalent to ELEG 4203.

ELEG 4213. MEMS and Microsensors. 3 Hours.
The aim of this course is to teach the theory and developments in MEMS, microsensors, NEMS and smart devices and to train the students for the fabrication using microfabrication tools in the clean room. The students will design, fabricate and characterize a MEMS/Microsensor device during the lab hours at the HiDEC clean room. Prerequisite: Engineering student.

ELEG 4223. Design and Fabrication of Solar Cells. 3 Hours.
Solar insolation and its spectral distribution; p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students may not receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203.

ELEG 4233. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and ELEG 2904 or equivalent. This course is cross-listed with ELEG 5923.

ELEG 4233H. Honors Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using NMOS and CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale NMOS and CMOS circuits. Prerequisite: ELEG 3214 or ELEG 3933 and ELEG 2904 or equivalent. This course is cross-listed with ELEG 4233, ELEG 5923.

ELEG 4243. Analog Integrated Circuits. 3 Hours.
Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3224.

ELEG 4253. Nanotechnology in Engineering & Medicine. 3 Hours.
The objective of this course is to present a concise and concurrent introduction to Nanotechnology and its applications in engineering and medicine, particularly for nanoelectronics, nanosensors and nanocomputing. This course presents basic aspects of the nanotechnology, its fabrication and imaging technologies and integration of biomolecules with electronic systems for the design of devices in nanoelectronics, nanobioelectronics and Nanomedicine. Prerequisite: Senior standing or instructor consent. May be repeated for up to 6 hours of degree credit.

ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.
Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSP-based testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing.
ELEG 4293. Mixed-Signal Modeling & Simulation. 3 Hours.
Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3214.

ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.
This course provides students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3214 and PHYS 2074. May be repeated for up to 6 hours of degree credit.

ELEG 4343. Organic Electronics Technology. 3 Hours.
Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands on experience with fabrication processes using micro-fabrication tools in the lab. Students may not receive credit for both ELEG 4343 and ELEG 5343.

ELEG 4403. Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124.

ELEG 4403H. Honors Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124.

ELEG 4413. Advanced Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Students may not receive credit for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 4403 or equivalent course.

ELEG 4423. Optimal Control. 3 Hours.
Introductory theory of optimizing dynamic systems: Formulation of performance objectives; calculus of variations; linear quadratic optimal control; discrete-time optimization; robustness and frequency domain techniques; reinforcement learning and optimal adaptive control. Prerequisite: ELEG 4403.

ELEG 4463L. Control Systems Laboratory. 3 Hours.
Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladder-logic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124.

ELEG 4473. Power System Operation and Control. 3 Hours.
Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Students may not receive credit for both ELEG 4473 and ELEG 5473. Prerequisite: ELEG 3124 and ELEG 3304.

ELEG 4503. Design of Advanced Electric Power Distribution Systems. 3 Hours.
Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Prerequisite: ELEG 3304.

ELEG 4503H. Honors Design of Advanced Electric Power Distribution Systems. 3 Hours.
Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive credit for both ELEG 4503H and ELEG 5503. Prerequisite: ELEG 3304. This course is equivalent to ELEG 4503.

ELEG 4513. Power and Energy Systems Analysis. 3 Hours.
Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Students may not receive credit for both ELEG 4513 and ELEG 5513. Prerequisite: ELEG 2114.

ELEG 4523. Quality of Electric Power. 3 Hours.
This course addresses concepts related to the quality of electric power (in particular wiring and grounding, voltage sags and interruptions, harmonics, and transients), distributed generation and power electronic systems, power quality benchmarking, as well as instrumentation and PQ analyzers. Students may not receive credit for both ELEG 4523 and ELEG 5523. Prerequisite: ELEG 3304.

ELEG 4533. Power Electronics and Motor Drives. 3 Hours.
Characteristics of Insulated Gate Bipolar Transistors (IGBTs), Silicon Carbide (SiC) MOSFETs, Gallium Nitride (GaN) devices, Design of driver and snubber circuits for IGBTs and SiC MOSFETs, and an introduction to electric motor drives. Students may not receive credit for both ELEG 4533 and 5533. Prerequisite: ELEG 3304 and ELEG 3224.

ELEG 4543. Introduction to Power Electronics. 3 Hours.
Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and 4543. Prerequisite: ELEG 2114 and ELEG 3214.

ELEG 4553. Switch Mode Power Conversion. 3 Hours.
Basic switching converter topologies: buck, boost, buck-boost, Cuk, flyback, resonant; pulse-width modulation; integrated circuit controllers; switching converter design case studies; SPICE analyses of switching converters; state-space averaging and linearization; and switching converter transfer functions. Prerequisite: ELEG 3224 and ELEG 3124.

ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours.
Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124.

ELEG 4623. Communication Systems. 3 Hours.
Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FSK, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Prerequisite: ELEG 3143.

ELEG 4703. Introduction to RF and Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704.
ELEG 4703H. Honors Introduction to RF and Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704.
This course is equivalent to ELEG 4703.

ELEG 4773. Electronic Response of Biological Tissues. 3 Hours.
Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave. Prerequisite: ELEG 3704 or equivalent; MATH 2584 or equivalent; basic Biology.
This course is cross-listed with BENG 4283.

ELEG 4783. Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704.

ELEG 4783H. Honors Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704.
This course is equivalent to ELEG 4783.

ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. May be repeated for up to 6 hours of degree credit.

ELEG 487VH. Honors Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. May be repeated for up to 6 hours of degree credit.
This course is equivalent to ELEG 487V.

ELEG 488V. Special Problems. 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing. May be repeated for up to 3 hours of degree credit.

ELEG 488VH. Honors Special Problems. 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing.
This course is equivalent to ELEG 488V.

ELEG 4914. Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 4914 and CSCE 4914 or ELEG 5914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114.
This course is cross-listed with CSCE 4914.

ELEG 4914H. Honors Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 4914H and ELEG 5914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114.
This course is cross-listed with ELEG 4914, CSCE 4914.

ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.
Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914.
This course is cross-listed with ELEG 4963, CSCE 4353.

ELEG 4963H. Honors CPLD/FPGA Based System Design. 3 Hours.
Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914.
This course is cross-listed with ELEG 4963, CSCE 4353.

ELEG 4983. Computer Architecture. 3 Hours.
Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924.
This course is cross-listed with CSCE 4213.

ELEG 5173L. Digital Signal Processing Laboratory. 3 Hours.

ELEG 5193L. Advanced DSP Processors Laboratory. 3 Hours.
Familiarization with, and use of, advanced DSP processors. Parallel processor configurations, timing consideration, specialized programming techniques, and complex pipelines. Prerequisite: ELEG 5173L.

ELEG 5203. Semiconductor Devices. 3 Hours.
Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: Graduate standing.

ELEG 5213. Integrated Circuit Fabrication Technology. 3 Hours.
Theory and techniques of integrated circuit fabrication technology; crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and multilayer. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203.
ELEG 5223. Design and Fabrication of Solar Cells. 3 Hours.
Solar insolation and its spectral distribution; p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students cannot receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203 or ELEG 5203.

ELEG 5243L. Microelectronic Fabrication Techniques and Procedures. 3 Hours.
The Thin-Film Fabrication course is designed to prepare students to use the thin-film equipment and processes available at the Engineering Research Center's thin-film cleanroom. The process modules to be trained on include lithography, metal deposition and etching, oxide deposition, growth and etching, reactive dry etching, tantalum anodization, photodefinable spin-on dielectric and electroplating. The related metrology modules include microscope inspection, spectrophotometric measurement of oxide, profilometry and four-point probe measurements. Prerequisite: ELEG 5273.

ELEG 5253L. Integrated Circuit Design Laboratory I. 3 Hours.
Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, more in-depth coverage of topics from ELEG 4233, and design of very large scale chips. Prerequisite: ELEG 4233. This course is cross-listed with CSCE 5253L.

ELEG 5263L. Integrated Circuit Design Laboratory II. 3 Hours.
Students test the I.C. chips they designed in I.C. Design Laboratory I and propose design corrections where needed. Topics include gate arrays, bipolar design, I2L, memory design, and microprocessor design. Prerequisite: ELEG 5253L. This course is cross-listed with CSCE 5363L.

ELEG 5273. Electronic Packaging. 3 Hours.
An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: Graduate standing. This course is cross-listed with MEEG 5273.

ELEG 5283. Mixed Signal Test Engineering II. 3 Hours.
Focus calibrations, DAC testing, ADC testing, DIB design, Design for Test, Data Analysis, and Test Economics. Prerequisite: ELEG 4283.

ELEG 5293L. Integrated Circuits Fabrication Laboratory. 3 Hours.
Experimental studies of silicon oxidation, solid-state diffusion, photolithographical materials and techniques, bonding and encapsulation. Fabrication and testing of PN diodes, NPN transistors and MOS transistors. Prerequisite: ELEG 5213.

ELEG 5313. Power Semiconductor Devices. 3 Hours.
Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect transistors, and power MOS-bipolar devices. Prerequisite: ELEG 4203 or graduate standing.

ELEG 5323. Semiconductor Nanostructures I. 3 Hours.
This course is focused on the basic theoretical and experimental analyses of low dimensional systems encountered in semiconductor heterojunctions and nanostructures with the emphasis on device applications and innovations. Prerequisite: ELEG 4203 or instructor permission.

ELEG 5333. Semiconductor Nanostructures II. 3 Hours.
This course is a continuation of ELEG 5323. It is focused on the transport properties, growth, electrical and optical properties of semiconductor nanostructures, and optoelectronic devices. Prerequisite: ELEG 5323 or instructor permission.

ELEG 5343. Organic Electronics Technology. 3 Hours.
Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands-on experience with fabrication processes using micro-fabrication tools in the lab.

ELEG 5353. Semiconductor Optoelectronic Devices. 3 Hours.
This course will provide graduate students a detailed background in semiconductor optoelectronic devices such as light emitting diodes and lasers, photodetectors, solar cells, modulators. The applications of these devices will also be discussed. Prerequisite: ELEG 4203 or ELEG 5203.

ELEG 5363. Semiconductor Material and Device Characterization. 3 Hours.
This course provides an overview of semiconductor characterization techniques in industry: Electrical measurements, Optical measurements, Electron and Ion beam measurements, X-ray and probe measurements. Prerequisite: ELEG 4203 or ELEG 5203 and instructor consent.

ELEG 5383. Introduction of Integrated Photonics. 3 Hours.
This course is designed to provide junior and senior graduate students detailed knowledge of integrated photonics by using silicon photonics as an example. The course covers a cycle of design, fabrication, and testing of photonic devices by using analytic and numerical methods. The course will focus on designing an interferometer, which is widely used in communication and sensing applications. Students will be exposed to use the state-of-art design simulation tool, Lumerical, to design the photonic circuits and to evaluate the performances. In the course project, students will extend the design rules to design a set of components to be used for integrated microwave photonics based on Ge on Si, SiGeSn, or Si3N4 on sapphire platform. Prerequisite: ELEG 4203 and ELEG 5953.

ELEG 5403. Control Systems. 3 Hours.
Mathematical modeling of dynamic systems, stability analysis, control systems architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics on microprocessor implementation. Credit not given for both ELEG 4413 and ELEG 5403. Prerequisite: Graduate standing or ELEG 3124.

ELEG 5413. Modern Control Systems. 3 Hours.
A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Credit not given for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 5403 or equivalent.

ELEG 5423. Optimal Control Systems. 3 Hours.
Basic concepts, conditions for optimality, the minimum principle, the Hamilton Jacobi equation, structure and properties of optimal systems. Prerequisite: ELEG 4403 or graduate standing.

ELEG 5433. Digital Control Systems. 3 Hours.
Signal processing in continuous-discrete systems. System modeling using the z-transform and state-variable techniques. Analysis and design of digital control systems. Digital redesign for continuous control. Prerequisite: ELEG 4403 or graduate standing.

ELEG 5443. Nonlinear Systems Analysis and Control. 3 Hours.

ELEG 5453. Adaptive Filtering and Control. 3 Hours.
ELEG 5463. Biomedical Control Systems. 3 Hours.
Study of control systems analysis and design as applied to human physiological systems: Modeling and dynamics of biological processes, biomedical sensors, time and frequency domain analysis, identification of physiological systems. Overview of medical device regulations. Prerequisite: ELEG 4403 or graduate standing.

ELEG 5473. Power System Operation and Control. 3 Hours.
Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Prerequisite: ELEG 4403 or graduate standing.

ELEG 5503. Design of Advanced Power Distribution Systems. 3 Hours.
ELEG 5503 Design of Advanced Power Distribution Systems. 3 credit hours.
Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive graduate credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304 or graduate standing.

ELEG 5513. Power Systems Analysis. 3 Hours.
Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Credit not given for both ELEG 4513 and ELEG 5513. Prerequisite: Graduate standing.

ELEG 5523. Electric Power Quality. 3 Hours.
The theory and analysis of electric power quality for commercial, industrial and residential power systems. Specific topics include harmonics, voltage sags, wiring and grounding, instrumentation, distributed generation and power electronic systems, and site surveys. Case studies complement the theoretical concepts. Prerequisite: ELEG 3304 or graduate standing.

ELEG 5533. Power Electronics and Motor Drives. 3 Hours.
Fundamentals of power electronics, diode bridge rectifiers, inverters, general concepts on motor drives, induction motor drives, synchronous motor drives, and dc motor drives. Students may not receive credit for both ELEG 4533 and 5533. Prerequisite: Graduate standing or ELEG 3224 and ELEG 3304.

ELEG 5543. Introduction to Power Electronics. 3 Hours.
Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and 4543. Prerequisite: ELEG 2114 and ELEG 3214, or graduate standing.

ELEG 5553. Switch Mode Power Conversion. 3 Hours.
Basic switching converter topologies, control scheme of switching converters, simulation of switching converters, resonant converters, isolated converters, dynamic analysis of switching converters. Students will not receive graduate credit for both ELEG 4553 and 5553. Prerequisite: Graduate standing.

ELEG 5613. Introduction to Telecommunications. 3 Hours.
Overview of public and private telecommunication systems; traffic engineering; communications systems basics, information technology, electromagnetics, and data transmission. Prerequisite: ELEG Graduate Standing or ELEG 3124. This course is cross-listed with CSCE 5613.

ELEG 5623. Information Theory. 3 Hours.
Continuous and discrete source and channel models, measure of information, channel capacity, noisy-channel coding theorem, coding and decoding techniques. Prerequisite: ELEG 3143 or ELEG 4623 or graduate standing.

ELEG 5633. Detection and Estimation. 3 Hours.
Binary and multiple decisions for single and multiple observations; sequential, composite, and non-parametric decision theory; estimation theory; sequential, non-linear, and state estimation; optimum receiver principles. Prerequisite: Graduate standing.

ELEG 5653. Artificial Neural Networks. 3 Hours.
Fundamentals of artificial neural networks, both theory and practice. Teaches basic concepts of both supervised and unsupervised learning, and how they are implemented using artificial neural networks. Topics include the perceptron, back propagation, the competitive Hamming net, self-organizing feature maps, topological considerations, requirements for effective generalization, subpattern analysis, etc. Prerequisite: MATH 2584.

ELEG 5663. Communication Theory. 3 Hours.
Principles of communications. Channels and digital modulation. Optimum receivers and algorithms in the AWGN and fading channels. Coherent, non-coherent detectors and matched filters. Bounds on the performance of communications, and comparison of communications systems. Background in stochastic processes and probabilities, communication systems is desirable. Prerequisite: Graduate standing. May be repeated for degree credit.

ELEG 5693. Wireless Communications. 3 Hours.
Comprehensive course in fast developing field of wireless mobile/cellular personal telecommunications. Topics include cellular system structures, mobile radio propagation channels, etc. Prerequisite: Graduate standing.

ELEG 5703. RF & Microwave Design. 3 Hours.
An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Selected topics for device fabrication and measurements will be covered. Cannot get credit if student has taken ELEG 4703. Prerequisite: ELEG 3704.

ELEG 5723. Advanced Microwave Design. 3 Hours.
This course is an advanced course in microwave design building on the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwave Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3704 and ELEG 4703 or ELEG 5703.

ELEG 5763. Advanced Electromagnetic Scattering & Transmission. 3 Hours.
Reflection and transmission of electromagnetic waves from a flat interface, the Poynting theorem, the complex and average power, the rectangular wave guides, TE and TM modes, radiation from antennas in free space and introduction to computational electromagnetics. Prerequisite: ELEG 3704.

ELEG 5773. Electronic Response of Biological Tissues. 3 Hours.
Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed. Students may not receive credit for both ELEG 4773 and ELEG 5773. Prerequisite: MATH 2584, ELEG 3704 or PHYS 3414, BIOL 2533 or equivalent.
ELEG 5783. Introduction to Antennas. 3 Hours.
Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Students cannot get credit for ELEG 5783 if they have taken ELEG 4783. Prerequisite: ELEG 3704.

ELEG 5801. Written and Oral Communication. 1 Hour.
This course is designed to improve the oral presentations and technical writing of graduate students. Emphasis is placed on writing journal articles, theses and dissertations, and on giving oral presentations at conferences and job interviews. Each student delivers a 20 minute PowerPoint presentation to other students in the class. Prerequisite: Readiness to begin writing thesis.

ELEG 587V. Special Topics in Electrical Engineering. 1-3 Hour.
Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Graduate standing. May be repeated for up to 3 hours of degree credit.

ELEG 588V. Special Problems. 1-6 Hour.
Opportunity for individual study of advanced subjects related to a graduate electrical engineering program to suit individual requirements. May be repeated for up to 6 hours of degree credit.

ELEG 5903. Engineering Technical Writing. 3 Hours.
In this course, advanced graduate students (PhD candidates and selected MS students) will be trained in rephrasing and preparing technical papers, including scientific reports. Illustrations step by step will be explained. Each student is required to prepare technical papers based on their own research results and will be guided from selecting a title to a finished product. The emphasis will be placed on the structures of the articles including figures and table preparation, abstract writing, citations and references, and acknowledgments. The students will also be trained to prepare letters to the journals' editors and how to respond to reviewers' comments. Prerequisite: Graduate standing.

ELEG 5914. Advanced Digital Design. 4 Hours.
To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 5914 and ELEG 4914 or CSCE 4914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114.

ELEG 5923. Introduction to Integrated Circuit Design. 3 Hours.
Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. This course is cross-listed with ELEG 4233.

ELEG 5993. Mixed-signal Modeling and Simulation. 3 Hours.
Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3224 or graduate standing.

ELEG 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

ELEG 6801. Graduate Seminar. 1 Hour.
Papers presented by candidates for the Doctor of Philosophy degree in electrical engineering on current research or design problems in the field of electrical engineering.

ELEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Engineering (ENGR) Courses
ENGR 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ENGR 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ENGR 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

ENGR 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

English (ENGL) Courses
ENGL 1002. Basic Writing. 2 Hours.
A required course for entering freshmen with ACT English scores lower than 19 or SAT verbal scores lower than 470. These students must also enroll in ENGL 1013. Composition I, as a corequisite and successfully complete both courses to fulfill the remediation requirement. Credit earned in this course may not be applied to the total required for a degree. Corequisite: ENGL 1013.

ENGL 1013. Reading Strategies for College Students. 3 Hours.
The course focuses on developing reading and learning skills and strategies essential for college success with frequent application to college textbooks in a variety of disciplines. University credit is earned, but the course does not count toward a degree. Required of students not meeting U of A reading placement standards.

ENGL 1013H. Honors Composition I. 3 Hours.
A course for freshmen with high placement scores. This course is equivalent to ENGL 1013.

ENGL 1023. Composition II (ACTS Equivalency = ENGL 1023). 3 Hours.
Continuation of ENGL 1013. Prerequisite: ENGL 1013 or equivalent. This course is cross-listed with ENGL 1023H, ENGL 1033.

ENGL 1023H. Honors Composition II. 3 Hours.
Continuation of ENGL 1013H. Prerequisite: Honors candidacy and ENGL 1013H or ENGL 1013 and an acceptable score on the English section of the ACT or another approved test. This course is cross-listed with ENGL 1023, ENGL 1033.

ENGL 1033. Technical Composition II. 3 Hours.
Continuation of ENGL 1013, intended for students majoring in Engineering or Business. Prerequisite: ENGL 1013 or equivalent and ENGR or WCOB majors only. This course is cross-listed with ENGR 1023, ENGR 1023H.

ENGL 1213. Introduction to Literature. 3 Hours.
Approaches to reading and writing about fiction, drama, and poetry at the college level.

ENGL 1213H. Honors Introduction to Literature. 3 Hours.
Approaches to reading and writing about fiction, drama, and poetry at the college level. Prerequisite: Honors standing.
ENGL 2303. Advanced Composition. 3 Hours.
Review course in English composition. Exemption for this course may be granted for certain majors that require it by a grade of at least a “B” in ENGL 1013 and ENGL 1023 (or equivalent courses from an accredited institution), by achieving a score of 4 or 5 on the AP Language and Composition Examination and the AP Literature and Composition Examination, or by achieving a 6 HL or 7 HL on the IB Examination in English. Cannot be counted toward a major in English. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2013. Essay Writing. 3 Hours.
This course focuses on analyzing and writing creative nonfiction, paying special attention to essay forms: memoir, braided essay, collage or hermit crab essay, and personal reportage. Students enrolling in this course must possess a sound knowledge of sentence structure and standard usage. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2023. Creative Writing I (ACTS Equivalency = ENGL 2013). 3 Hours.
Beginning level workshop course in which students write original poems and stories. Reading and detailed discussion of poems and stories in anthologies is required. Designed to teach the student the fundamental techniques of fiction and poetry. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2173. Literary America. 3 Hours.
A course that examines the myriad definitions of literary (and illiteracy) and their connections to issues of social class, occupational status, economic and political structures, educational institutions, cultural organizations, and the media. This course is cross-listed with CIED 2173.

ENGL 2303. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2303C. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Lecture and drill. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2313. Survey of English Literature from 1700 to 1900 (ACTS Equivalency = ENGL 2683). 3 Hours.
A critical and historical survey of the development of literature in the British Isles from 1700 to 1900. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2323. Survey of Modern and Contemporary British, Irish, and Postcolonial Literature. 3 Hours.
A survey of modern and contemporary literature in English written in Great Britain, Ireland, Africa, Asia, and the Caribbean. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2343. Survey of American Lit from the Colonial Period through Naturalism (ACTS Equiv=ENGL 2653). 3 Hours.
A survey of major American writers from the colonial period to 1900. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2353. Survey of Modern and Contemporary American Literature (ACTS Equivalency = ENGL 2663). 3 Hours.
A survey of American writers after 1900. Prerequisite: ENGL 1013 and ENGL 1023.

ENGL 2413. Introductory Topics in English. 3 Hours.
Students will understand concepts and issues of theme, form, and motif in literary works about the designated topic. Students will improve in their abilities to read literary works carefully and critically and to write about literature correctly and cogently. Topics and content will vary from semester to semester.

ENGL 3013. Creative Writing II. 3 Hours.
Laboratory course for students who wish to attempt original work in the various literary forms. Prerequisite: ENGL 2023 or equivalent.

Intensive practice in such types of writing as processes, descriptions of mechanism, abstracts, and laboratory and research reports. The criteria for effective written exposition in the scientific areas, including agriculture and engineering. Prerequisite: ENGL 1013 and ENGL 1023 or equivalent.

ENGL 3113. Folklore. 3 Hours.
Popular literature (ballads, folktales, etc.). Prerequisite: Junior standing.

ENGL 3123. Folk and Popular Music Traditions. 3 Hours.
Introduction to folk and popular music studies. Emphasis on American traditions.

ENGL 3143. Language and Expressive Culture. 3 Hours.
This course explores the complex interrelationships of language, culture, and social identity. Verbal art and expressive culture are examined from a variety of anthropological perspectives. Topics include ethnographies of speaking, discourse analysis, cultural performances, and the performative aspects of oral expression. This course is cross-listed with ANTH 3143, COMM 3143.

ENGL 3173. Introduction to Linguistics. 3 Hours.
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: Junior standing. This course is cross-listed with ANTH 3173, COMM 3173, WLLC 3173.

ENGL 3203. Poetry. 3 Hours.
A critical introduction to the genre.

ENGL 3213. Fiction. 3 Hours.
A critical introduction to the genre.

ENGL 3223. Drama. 3 Hours.
A critical introduction to the genre.

ENGL 3253. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and advanced standing. This course is cross-listed with AAST 3263, JOUR 3263, COMM 3263.

ENGL 3283. Topics in Popular Culture and Popular Genres. 3 Hours.
Survey of a broad topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3433. Introduction to Chaucer. 3 Hours.
Course designed primarily for undergraduates. Extensive reading in Chaucer’s major works.

ENGL 3543. Topics in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/Latina literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3553. Topics in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.
ENGL 3573. Special Topics in Diversity. 3 Hours.
The study of literature and culture with specific focus on issues of diversity, inclusion, and equality. Courses may be organized around specific theories, themes, genres, authors, historical moments, artistic movements, comparative and intersectional approaches, or other organizing principles. Content varies.

ENGL 3583. Topics in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. No knowledge of Arabic necessary. May be repeated for up to 9 hours of degree credit.

ENGL 3593. Topics in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3603. Topics in Rhetoric and Composition. 3 Hours.
The study of special topics in the field of Rhetoric and Composition. Content will vary. May be repeated for up to 9 hours of degree credit.

ENGL 3623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. This course is cross-listed with WLIT 3623.

ENGL 3713. Topics in Medieval Literature and Culture. 3 Hours.
Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, Anglo-Norman, and Scandinavian). Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3723. Topics in Renaissance Literature and Culture. 3 Hours.
The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3723H. Honors Topics in Renaissance Literature and Culture. 3 Hours.
The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. Prerequisite: Honors standing. May be repeated for up to 9 hours of degree credit.

ENGL 3723. Topics in Restoration and Eighteenth-Century Literature and Culture. 3 Hours.
The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3743. Topics in Nineteenth-Century British Literature and Culture. 3 Hours.
The study of literature of the 19th century, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3753. Topics in Modern and Contemporary British Literature and Culture. 3 Hours.
The study of a special topic in the field of modern and contemporary British literature and culture. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3763. Topics in Postcolonial Literature and Culture. 3 Hours.
Survey of a broad topical area related to postcolonial literature and culture. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3833. Topics in American Literature and Culture to 1900. 3 Hours.
The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3843. Topics in Modern and Contemporary American Literature and Culture. 3 Hours.
The study of a special topic in the field of modern and contemporary American literature and culture. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3853. Topics in African-American Literature and Culture. 3 Hours.
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. May be repeated for up to 9 hours of degree credit.

This course is cross-listed with AAST 3853.

ENGL 3863. Topics in Literature and Culture of the American South. 3 Hours.
The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3903. Special Topics. 3 Hours.
Survey of a broad topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as part of the honors program. Prerequisite: honor candidacy (not restricted to candidacy in English). May be repeated for degree credit.

This course is equivalent to ENGL 3923.

ENGL 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

ENGL 4003. English Language and Composition for Teachers. 3 Hours.
Subject matter and methods of approach for the teaching of composition in high school.

ENGL 4013. Undergraduate Poetry Workshop. 3 Hours.
Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent.

ENGL 4023. Undergraduate Fiction Workshop. 3 Hours.
Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent.

ENGL 4073. Film Writing Workshop. 3 Hours.
A workshop in writing the screenplay with close attention given to student manuscripts and adaptations. Prerequisite: Advanced standing.

ENGL 4113. Undergraduate Independent Study. 3 Hours.
Undergraduate original research and writing. Prerequisite: "B" average and two-thirds (21 hours) of regular requirements for English major completed. Departmental approval and instructor approval required. May be repeated for up to 3 hours of degree credit.

ENGL 4133. Writing Nature. 3 Hours.
Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. May be repeated for up to 9 hours of degree credit.
ENGL 4133H. Honors Writing Nature. 3 Hours.
Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. May be repeated for up to 9 hours of degree credit. This course is equivalent to ENGL 4133.

ENGL 4143. American Film Survey. 3 Hours.
A survey of major American genres, major directors, and films that have influenced the development of motion pictures. This course is cross-listed with COMM 4143.

ENGL 4213. Senior Research Seminar. 3 Hours.
Seminar on a topic in literature in English with a substantial research paper required. May be repeated for up to 3 hours of degree credit.

ENGL 4303. Introduction to Shakespeare. 3 Hours.
Extensive reading in Shakespeare's comedies, histories, tragedies, and nondramatic poetry.

ENGL 4503. Introduction to Literary Theory. 3 Hours.
A historical survey of literary theory from Plato onwards.

ENGL 4513. Studies in Literary Criticism and Theory. 3 Hours.
A survey of contemporary trends in literary criticism. Emphasis will be placed on engaging the practices of a particular theory. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 4523. Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4533. Studies in Restoration and Eighteenth-Century Literature. 3 Hours.
The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4543. Studies in Major Literary Movements. 3 Hours.
This course focuses on the literature either of a major literary movement such as Romanticism or Modernism or of a more specific topic such as Utopianism in twentieth-century writing. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 4553. Studies in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4563. Studies in Major Authors. 3 Hours.
The concentrated study of works by one or more major authors. At least one major paper will be required. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 4573. Studies in Medieval Literature and Culture. 3 Hours.
The study of literature of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, Anglo-Norman, and Scandinavian). Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4583. Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
The study of American literature and culture to 1900, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4593. Studies in Gender, Sexuality, and Literature (Irregular). 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4603. Special Studies. 3 Hours.
Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated for up to 3 hours of degree credit.

ENGL 4603H. Honors Special Studies. 3 Hours.
Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. May be repeated for degree credit. This course is equivalent to ENGL 4603.

ENGL 4673. Special Studies in Diversity. 3 Hours.
The study of literature and culture with specific focus on issues of diversity and inclusion. May be organized around specific theories, themes, genres, authors, or other organizing principles. At least one major research paper will be required. Content varies.

ENGL 4713. Studies in Medieval Literature and Culture. 3 Hours.
Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, Anglo-Norman, and Scandinavian). Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4723. Studies in Renaissance Literature and Culture. 3 Hours.
The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4733. Studies in Restoration and Eighteenth-Century Literature. 3 Hours.
The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4743. Studies in Nineteenth-Century British Literature and Culture. 3 Hours.
The study of literature of the nineteenth century, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4753. Studies in Modern and Contemporary British Literature and Culture. 3 Hours.
The study of modern and contemporary British literature and culture. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4763. Studies in Postcolonial Literature and Culture. 3 Hours.
The study of postcolonial literature and culture. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4833. Studies in American Literature and Culture to 1900. 3 Hours.
The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4843. Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
The study of modern and contemporary American literature and culture, with attention to particular themes, genres, authors, or other organizing principles. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 4853. Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit. This course is cross-listed with AAST 4853.
ENGL 4863. Studies in Literature and Culture of the American South. 3 Hours.
The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 4903. Studies in Rhetoric and Composition. 3 Hours.
Concentrated study of a specific topical area related to Rhetoric and Composition. Content varies. May be repeated for up to 9 hours of degree credit.

ENGL 4933. Studies in Popular Culture and Popular Genres. 3 Hours.
The study of a focused topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. At least one major research paper will be required. May be repeated for up to 9 hours of degree credit.

ENGL 490V. Senior Thesis. 1-6 Hour.
Honors thesis under the direction of a faculty member in the Department of English. May be repeated for up to 6 hours of degree credit.

ENGL 5003. Composition Pedagogy. 3 Hours.
Introduction to teaching college composition. Designed for graduate assistants at the University of Arkansas.

ENGL 5013. Creative Writing Workshop. 3 Hours.
Creative writing workshop.

ENGL 5023. Writing Workshop: Fiction. 3 Hours.
Fiction writing workshop. Prerequisite: Creative Writing MFA students only.

ENGL 5033. Writing Workshop: Poetry. 3 Hours.
Poetry writing workshop. Prerequisite: Creative Writing MFA students only.

ENGL 5043. Translation Workshop. 3 Hours.
Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language and Creative Writing MFA students only. May be repeated for up to 15 hours of degree credit.

This course is cross-listed with WLLC 504V.

ENGL 5053. English Language and Composition for Teachers. 3 Hours.
Subject matter and methods of approach for the teaching of composition in high school.

ENGL 507V. Creative Non-Fiction Workshop. 1-3 Hour.
The theory and practice of the "New Journalism" with a study of its antecedents and special attention to the use of "fictional" techniques and narrator point of view to make more vivid the account of real people and real events.

ENGL 5083. Professing Literature. 3 Hours.
An introduction to the profession of English studies and the teaching of English at the college level.

ENGL 510V. Readings in English and American Literature. 1-6 Hour.
Open to Honors candidates and graduate students. Prerequisite: Departmental approval and instructor approval required. May be repeated for degree credit.

ENGL 5173. Advanced Studies in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5183. The Structure of Present English. 3 Hours.
Structural analysis of the language.

ENGL 5193. Graduate Internship in English. 3 Hours.
Internship changes depending on availability and student interest. Departmental consent required.

ENGL 5203. Introduction to Graduate Studies. 3 Hours.
Develop knowledge and strategies for successfully negotiating graduate work and the profession. Topics covered include, but are not limited to, scholarly habits and practices, writing and publishing skills, scholarly associations, journals, conferences, university structures, and career paths. Emphasis on the development of individual academic and professional goals.

ENGL 5213. Portfolio Workshop. 3 Hours.
Workshop designed for students in the M.A. Program in English who are using the Portfolio Option to complete the program. Instructor consent required.

ENGL 5223. Advanced Studies in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5233. Craft of Translation: I. 3 Hours.
An examination of the principal challenges that confront translators of literature, including the recreation of style, dialect, ambiguities, and formal poetry; vertical translation; translation where multiple manuscripts exist; and the question of how literal a translation should be.

ENGL 5243. Special Topics. 3 Hours.
Designed to cover subject matter not offered in other courses. May be repeated for degree credit.

ENGL 5253. Craft of Fiction: I. 3 Hours.
Such aspects of the genre as scene, transition, character, and conflict. Discussion is limited to the novel.

ENGL 5273. Craft of Poetry: I. 3 Hours.
An examination of perception, diction, form, irony, resolution, and the critical theories of the major writers on poetry, such as Dryden, Coleridge, and Arnold.

ENGL 5283. Craft of Fiction: II. 3 Hours.
Second part of the study of the techniques of fiction. Discussion is limited to the short story. Prerequisite: ENGL 5263.

ENGL 5293. Craft of Poetry: II. 3 Hours.
Second part of the study of the techniques of poetry; independent study of a poet or a problem in writing or criticism of poetry.

ENGL 5303. Advanced Studies in Restoration and Eighteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5313. Introduction to Literary Theory. 3 Hours.
An advanced introductory survey of a number of theoretical approaches to literature.

ENGL 5403. Advanced Studies in Nineteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5413. Advanced Studies in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5423. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. This course is cross-listed with WLLC 5463, ANTH 5473.

ENGL 5513. Document Design for Technical Writers. 3 Hours.
Focuses on the role of document design in technical and professional writing. Covers industry standard software and theories of rhetorically-centered document design. Special emphasis on creating print-ready technical documents such as manuals, catalogs, and infographics.
ENGL 5523. Technical Writing for Online Audiences. 3 Hours.
Investigates the medium-specific challenges of preparing technical documents for online audiences. Covers user-centered theory, strategies, and skills for online writing. HTML, CSS, and web standards. Specific focus on creating organizational websites with editorial workflows geared towards technical writers.

ENGL 5533. Technical Writing Praxis. 3 Hours.
Focuses on the process of applying theory to situated practice in technical writing. The first portion of the course will lay out the fundamentals of technical writing theory, with the second half situating that theory within genre-specific practice. Second-half topics will vary by instructor interest and expertise. May be repeated for up to 6 hours of degree credit.

ENGL 5543. Advanced Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 12 hours of degree credit.

ENGL 5563. Advanced Studies in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 12 hours of degree credit.

ENGL 5583. Advanced Studies in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 12 hours of degree credit.

ENGL 5593. Advanced Studies in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. May be repeated for up to 12 hours of degree credit.

ENGL 5603. World Literature and Culture in English. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. This course is cross-listed with WLIT 5623.

ENGL 5633. English Drama from Its Beginning to 1642. 3 Hours.
Early forms, Tudor drama, Shakespeare's contemporaries, and Stuart drama to the closing of the theatres.

ENGL 5653. Shakespeare: Plays and Poems. 3 Hours.
An introduction to a broad selection of Shakespeare's work.

ENGL 569V. Seminar in Film Studies. 1-3 Hour.
Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, the film musical. May be repeated for up to 6 hours of degree credit. This course is cross-listed with COMM 569V.

ENGL 5703. Advanced Studies in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5723. Advanced Studies in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5763. Advanced Studies in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5803. Advanced Studies in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5863. Advanced Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. May be repeated for up to 12 hours of degree credit.

ENGL 5923. Advanced Studies in Film and Media. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5933. Advanced Studies in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5943. Advanced Studies in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5953. Advanced Studies in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 5963. Advanced Studies in Technical Writing and Public Rhetorics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. Course will cover various topics relevant to students working in Technical Writing and Public Rhetorics. May be repeated for up to 6 hours of degree credit.

ENGL 5973. Advanced Studies in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6113. Seminar in Medieval Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6193. The Development of English. 3 Hours.
Intensive course in the fundamentals of linguistic study and their application to the history of English from prehistoric times to the present.

ENGL 6203. Seminar in Renaissance Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6243. Seminar in Special Topics. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6313. Seminar in Restoration and Eighteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.
ENGL 6443. Seminar in Nineteenth-Century British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6513. Seminar in Modern and Contemporary British Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6443. Seminar in U.S. Latino/Latina Literature and Culture. 3 Hours.
The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in Native American Literature and Culture. 3 Hours.
The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6583. Seminar in Arab American Literature and Culture. 3 Hours.
The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. May be repeated for up to 12 hours of degree credit.

ENGL 6593. Seminar in Gender, Sexuality, and Literature. 3 Hours.
The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6613. Seminar in World Literature and Culture in English. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6723. Seminar in American Literature and Culture Before 1900. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6733. Seminar in Literature and Culture of the American South. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6763. Seminar in Postcolonial Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6803. Seminar in Modern and Contemporary American Literature and Culture. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6853. Seminar in African American Literature and Culture. 3 Hours.
The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. May be repeated for up to 12 hours of degree credit.

ENGL 6923. Seminar in Film and Media. 3 Hours.
Extensive research into, and discussion of, a focused topic in film studies, with emphasis upon film as text. Extended project required. Course topic varies. May be repeated for up to 12 hours of degree credit.

ENGL 6933. Seminar in Popular Culture and Popular Genres. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6943. Seminar in Criticism and Literary Theory. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6953. Seminar in Literary History. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 6973. Seminar in Rhetoric and Composition. 3 Hours.
Subject matter changes depending on student interest and faculty expertise. May be repeated for up to 12 hours of degree credit.

ENGL 698V. Master's Thesis. 1-6 Hour.
Master's thesis.

ENGL 699V. Master of Fine Arts Thesis. 1-6 Hour.
Thesis.

ENGL 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

English Language and Cultural Studies (ELAC)

Courses

ELAC 0011. Writing Workshop: Grammar through Editing. 1 Hour.

The class is designed to improve the academic writing and critical thinking skills for non-native speakers of English in all fields. Through focused instruction and extensive practice, students will improve their academic lexicon, grammatical accuracy, discourse organization and fluency in formal academic writing. Not for degree credit in the Fulbright College of Arts and Sciences.Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative.

ELAC 1033. English Language through Mass Media. 3 Hours.
Students expand their communicative language skills through the study of news and media. By analyzing the messages and methods used in a variety of sources, students improve their listening, speaking, reading and writing skills. Students develop critical thinking skills as they evaluate and synthesize ideas from the texts. Not for degree credit in the Fulbright College of Arts and Sciences.Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative.
ELAC 1202. English Phonology for Non-Native Speakers. 2 Hours.
In this course students study the basic principles of phonetics and phonology of English in order to develop their ability to produce the standard American accents. Not for degree credit in the Fulbright College of Arts and Sciences.

ELAC 2023. Business English Communications. 3 Hours.
This is a course for non-native English speakers to develop their oral communication skills for professional business settings. From informal dialogues to formal business presentations, students learn appropriate verbal and non-verbal communication strategies and develop confidence to communicate effectively and comprehensibly. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative.

ELAC 2033. Principles of Research Writing for Non-Native Speakers. 3 Hours.
This advanced level, research-focused writing class is designed to help non-native speakers of English communicate their understanding of course material and research more accurately and effectively. Students also improve their ability to orally present their ideas with confidence and clarity. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. Undergraduates require instructor permission.

ELAC 2043. Seminar in United States Culture, Communication, and Institutions. 3 Hours.
Through an in-depth study of American life, culture, communicative style and institutions, non-native speakers of English improve their oral and written communication skills. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing). Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test.

ELAC 2053. Academic Presentations. 3 Hours.
For advanced non-native speakers of English to build skills and strategies for delivering effective, clear presentations in academic and professional settings. Students learn about organization, best use of visual aids, connecting with an audience, facilitating questions and answers, and intercultural issues that affect perception and comprehensibility. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: At the request of an instructor or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT).

ELAC 4033. Research Writing for the Social Sciences and Education. 3 Hours.
This research-focused writing class will help non-native English speakers in the social sciences and education communicate their understanding of course material and research more accurately and effectively. Students will focus on the genres specific to their fields. They will also improve their ability to orally present their ideas. Prerequisite: Language assessment required.

ELAC 4043. Research Writing in the STEM Fields. 3 Hours.
A research-based writing class for non-native speakers of English that focuses on the demands of writing in the STEM fields. Students will develop their ability to accurately and effectively use the conventions of scientific writing. Students will improve their ability to orally present their research. Prerequisite: Language assessment required.

ELAC 5033. Research Writing for the Social Sciences and Education. 3 Hours.
This research-focused writing class will help graduate-level non-native English speakers in the social sciences and education communicate their understanding of course material and research more accurately and effectively. Students will focus on the genres specific to their fields. They will also improve their ability to orally present their ideas. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative.

ELAC 5043. Research Writing in the STEM Fields. 3 Hours.
A research-based writing class for graduate-level non-native speakers of English that focuses on the demands of writing in the STEM fields. Students will develop their ability to accurately and effectively use the conventions of scientific writing. Students will improve their ability to orally present their research. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative.

ELAC 5050. International Graduate Teaching Assistant Training. 0 Hours.
To prepare international graduate assistants to assist or teach in U.S. university classes. The course focuses on enhancing teaching and communication skills, and cultural knowledge. Students are non-native speakers of English who currently have a teaching assistantship or plan to obtain one in the following semester. Not for degree credit. Prerequisite: Language assessment required.

ELAC 5060. Intensive Training for International Graduate Teaching Assistants. 0 Hours.
This is a three-week intensive training course to prepare international graduate assistants to assist or teach in university classes. The course content focuses on enhancing teaching and communication skills, and cultural knowledge. Not for degree credit. Pre- or Corequisite: This course is for students that have already been awarded a teaching assistantship. Prerequisite: At the request of an instructor or self-placement or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT).

English as Second Language (EASL)
Courses
EASL 0021. Advanced English Grammar. 1 Hour.
Presentation of a general overview of the verb, modal, and article in English. Review and practice on compound and complex sentences. Practice of grammatical structure orally and in writing. Not for degree credit. Prerequisite: ESL placement test.

EASL 0023. Reading and Writing I. 3 Hours.
Work on improving skills necessary to write a well-organized, thought-provoking essay incorporating paraphrased, summarized, and quoted ideas from various sources. Introduction to several rhetorical patterns. Critical reading skills practice, understanding inferences, and improving reading skills comprehension. Not for degree credit. Corequisite: Lab component. Prerequisite: ESL placement test.

EASL 0033. Reading and Writing II. 3 Hours.
Advanced writing of formal documented, organized, and thought-provoking essays. Students will learn to read passages/articles in English proficiently and maintain discussion with near-native abilities and confidence. Not for degree credit. Corequisite: Lab component. Prerequisite: ESL placement test.

EASL 0041. Pronunciation. 1 Hour.
Students learn to generate native-sounding speech and increase their intelligibility by working specifically on accent reduction, pronunciation, intonation patterns, and fluency. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test.

EASL 0053. ESL Listening and Speaking. 3 Hours.
For improvement of aura/oral skills by international students. Includes the basic practice in fluency, clarity, intonation, stress, and pronunciation. Students give presentations and participate in academic discussions. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test.
Entomology (ENTO)

Courses

ENTO 1021L. Insects in Science, the Arts, and Human History Laboratory. 1 Hour.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. The lab will be a hands-on approach to reinforcing entomological concepts addressed in lecture. Pre- or corequisite: ENTO 1023.

ENTO 1023. Insects, Science and Society. 3 Hours.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1021L.

ENTO 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to ENTO 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or Corequisite: ENTO 3013. This course is equivalent to BIOL 3011L.

ENTO 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab ENTO 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. This course is cross-listed with BIOL 3013.

ENTO 400V. Special Problems. 1-4 Hour.
Special problems.

ENTO 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. This course is cross-listed with BIOL 4013.

ENTO 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. This course is cross-listed with BIOL 4024.

ENTO 4043. Apiculture. 3 Hours.
Review of social behavior of insects and its exemplification in Honeybees. Previous knowledge of basic entomology is helpful but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

ENTO 4053. Insect Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. This course is cross-listed with BIOL 4053.

ENTO 410V. Special Topics. 1-3 Hour.
Special Topics course available to both undergraduate and graduate students, to address emerging issues and timely topics. This would supplement our graduate-only special topics course. May be repeated for degree credit.

ENTO 4123. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013.

ENTO 4133. Advanced Applied Entomology. 3 Hours.
Prerequisite: Instructor consent.

ENTO 4163. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013.

ENTO 417V. Special Problems. 1-4 Hour.
Special problems. Prerequisite: Graduate standing. May be repeated for up to 4 hours of degree credit.

ENTO 5013. Morphology of Insects. 3 Hours.
Origin, evolution, and functional significance of external insect structure. Structure and function of major internal systems. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component.

ENTO 5043. Apiculture. 3 Hours.
To acquaint the student with social insects in general and honey bees in particular, to promote an interest in apiculture as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Prerequisite: Instructor consent.

ENTO 5123. Biological Control. 3 Hours.
Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

ENTO 5133. Insect Molecular Genetics. 3 Hours.
A hands-on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. This course is cross-listed with BIOL 5133.

ENTO 5153. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: Instructor consent.

ENTO 5163. Advanced Applied Entomology. 3 Hours.
Topics will include the integration of tactics, integration of disciplines and specific case histories in insect management, or use of insects to manage weeds. Prerequisite: Instructor consent.

ENTO 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

ENTO 6071. Seminar. 1 Hour.
Fall: special topics not covered in regular course work. Spring: critical review of research papers in entomology. Seminar will be taken by graduate student majors for both semesters. May be repeated for up to 6 hours of degree credit.
Environmental Dynamics (ENDY) Courses

ENDY 5043. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making.
This course is cross-listed with GEOS 5653, ANTH 5653.

ENDY 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics and human adaptations.
This course is cross-listed with ANTH 5053, GEOS 5053.

ENDY 5113. Global Change. 3 Hours.
Examines the interacting natural and anthropogenic factors involved in global change, concentrating on climate variability and change. Prerequisite: Graduate standing or instructor's approval.
This course is cross-listed with GEOS 5113.

ENDY 5153. Environmental Site Assessment. 3 Hours.
Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033).
This course is cross-listed with GEOS 5153.

ENDY 5853. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotopic fractionation and distribution in geological environments isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil and biochemical processes.
This course is cross-listed with GEOS 5853.

ENDY 6013. Environmental Dynamics. 3 Hours.
Required course for ENDY doctoral candidates. Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global self-regulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: Graduate standing.

ENDY 6023. Seminar in Environmental Dynamics. 3 Hours.
Seminar examining specific contemporary topic of topics in Environmental Dynamics. Topics will change with each offering. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

ENDY 620V. Current Topics Seminar. 1-2 Hour.
Various aspects of the environment will be explored through topic specific seminars. Subject matter will change each semester addressing current environmental issues and research. Seminars will be one or two hours credit. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

ENDY 6033. Society and Environment. 3 Hours.
This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time.
This course is cross-listed with ANTH 6033.

ENDY 689V. Special Problems in Environmental Dynamics. 1-6 Hour.
Independent study of a topic related to environmental dynamics under the guidance of an ENDY faculty member. May be repeated for up to 6 hours of degree credit.

ENDY 699I. Environmental Dynamics Colloquium. 1 Hour.
Weekly meetings for discussion of current research in environmental dynamics. Graduate students must register for colloquium each semester. Colloquium credit does not count towards minimum hours required for the doctorate. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

ENDY 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.

Environmental Science (ENSC) Courses

ENSC 1001L. Environmental Science Laboratory. 1 Hour.
Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003.
This course is cross-listed with BIOL 1001L.

ENSC 1001M. Honors Environmental Science Laboratory. 1 Hour.
Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003.
This course is cross-listed with ENSC 1001L, BIOL 1001L.

ENSC 1003. Environmental Science. 3 Hours.
Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. Corequisite: ENSC 1001L.
This course is cross-listed with BIOL 1003.

ENSC 1003H. Honors Environmental Science. 3 Hours.
Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. If taking course for University core Natural Science credit, ENSC 1001L is a co-requisite. Corequisite: ENSC 1001L.
This course is cross-listed with ENSC 1003, BIOL 1003.
ENSC 1833. Soils and Civilization. 3 Hours.
Humankind's use of and dependence on soil from the Neolithic Revolution to the present day. The composition and basic properties of soils. The importance of soils as components of ecosystems, and ecosystem services provided by soils. The nature and causes of soil degradation. The need for conservation of soils. Soil as a key factor in sustaining life on Earth.

ENSC 3003. Introduction to Water Science. 3 Hours.
Properties, occurrence, and description of the types, functions, quality and quantity, potential contaminants, uses, and guiding policies and regulations of the various water resources in the environment. Prerequisite: MATH 1203 AND (ENSC 1003 OR CHEM 1053 (or higher) OR GEOS 1113 (or higher) OR BIOL 1543).

ENSC 3103. Plants and Environmental Restoration. 3 Hours.
Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613.

ENSC 3103H. Honors Plants and Environmental Restoration. 3 Hours.
Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613 and honors standing. This course is equivalent to ENSC 3103.

ENSC 3221L. Ecosystems Assessment Laboratory. 1 Hour.
The purpose of this laboratory is to complement concepts learned in lecture by carrying out experiments that familiarize students with methods used in soil and aquatic ecology. Students will collect samples, analyze and interpret data obtained from soil and water samples. Lab will meet once per week for 3 hours. Corequisite: ENSC 3223.

ENSC 3223. Ecosystems Assessment. 3 Hours.
Application of basic ecological principles to gain an appreciation for ecosystem assessment and management. Lecture 3 hours per week. Prerequisite: BIOL 1543.

ENSC 3263. Soil and Water Conservation. 3 Hours.
Effect of land use on water quality. Major sources of agricultural nonpoint pollutants. Best management practices used to minimize water quality impacts. Prerequisite: CSES 2203.

ENSC 3413. Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. What is involved in society making decisions about environmental quality will be studied. Environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. This course is cross-listed with AGEC 3413.

ENSC 3603. GIS for Environmental Science. 3 Hours.
Provide instruction on the uses of GIS techniques in solving practical environmental and agricultural land use problems. Areas include: 1) an introduction to spatial variability in soils with an emphasis on the application of GIS techniques to map and understand spatial parameters important to different land uses, and 2) development of individual experience in the use of GIS in solving environmental and agricultural problems using an oral and written term project. Prerequisite: CSES 2203.

ENSC 3933. Environmental Ethics. 3 Hours.
The course addresses ethical questions about nature and the natural environment. Topics of discussion include anthropocentric and biocentric ethics, population control, obligations to future generations, animal rights, moral considerability, Leopold's land ethic, deep ecology, and ecofeminism. Lecture/discussions 3 hours per week. Prerequisite: ENSC 1003 or PHIL 2003 or PHIL 2103. This course is cross-listed with PHIL 3113.

ENSC 400V. Special Problems. 1-3 Hour.
Work on special problems in environmental science or related fields. May be repeated for up to 8 hours of degree credit.

ENSC 4021L. Water Quality Laboratory. 1 Hour.
Field and laboratory experience in physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Laboratory experiments in water sampling, measurement of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc., and instrumentation. Prerequisite or Corequisite: ENSC 4023.

ENSC 4023. Water Quality. 3 Hours.
Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Prerequisite: CHEM 1123 and CHEM 1121L and BIOL 1543 and BIOL 1541L.

ENSC 4034. Analysis of Environmental Contaminants. 4 Hours.
Methods of analysis for inorganic and organic contaminants, radionuclides and microorganisms in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Lecture 2 hours and laboratory 4 hours per week. Corequisite: Lab component. Pre- or Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and 3601L.

ENSC 404V. Special Topics. 1-3 Hour.
Studies of selected topics in environmental sciences not available in other courses. May be repeated for up to 12 hours of degree credit.

ENSC 4263. Environmental Soil Science. 3 Hours.
Study of the behavior of pesticides, toxic organic compounds, metals, nutrients, and pathogenic microorganisms in the soil/plant/water continuum. Lecture 3 hours per week. Pre- or Corequisite: PHYS 2013 and PHYS 2011L. Prerequisite: CSES 3214.

ENSC 4401. Professional Certification Preparation. 1 Hour.
This class is meant to reinforce concepts and skills already learned in other soil and environmental science and related courses and to provide the opportunity to prepare to take a national certification examination. If so chosen, students may pursue certification as soil or environmental science professionals. Prerequisite: Senior standing.

ENSC 5021L. Water Quality Laboratory. 1 Hour.
Field and laboratory experience in physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Laboratory experiments in water sampling, measurement of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc., and instrumentation. Prerequisite: CHEM 1121L, BIOL 1543 and BIOL 1541L.

ENSC 5023. Water Quality. 3 Hours.
Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Prerequisite: BIOL 1541L or equivalent courses from undergraduate institution.

ENSC 5034. Analysis of Environmental Contaminants. 4 Hours.
Methods of analysis for inorganic and organic contaminants in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Corequisite: Lab component. Prerequisite: (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and 3601L) or equivalent chemistry course.

ENSC 5401. Professional Certification Preparation. 1 Hour.
This class is meant to reinforce concepts and skills already learned in other soil and environmental science and related courses and to provide the opportunity to prepare to take a national certification examination. If so chosen, students may pursue certification as soil or environmental science professionals.
Ethnomusicology (MUSY)

Courses

MUSY 2003. Music in World Cultures. 3 Hours.
Provides an overview of music from around the world. Examines the role of music in different social and cultural contexts. A variety of indigenous, folk, religious, popular, and art music traditions will be explored, along with the people and cultures that create them.

MUSY 2003H. Honors Music in World Cultures. 3 Hours.
Provides an overview of music from around the world. Examines the role of music in different social and cultural contexts. A variety of indigenous, folk, religious, popular, and art music traditions will be explored, along with the people and cultures that create them.
This course is equivalent to MUSY 2003.

MUSY 4113. Pro-Seminar: Ethnomusicology. 3 Hours.
An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. May be repeated for up to 6 hours of degree credit.

MUSY 4113H. Honors Pro-Seminar: Honors Ethnomusicology. 3 Hours.
An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. May be repeated for up to 6 hours of degree credit.
This course is equivalent to MUSY 4113.

MUSY 4313H. Honors Special Topics in Asian and Middle Eastern Musics. 3 Hours.
Research seminars on selected topics in Asian and Middle Eastern Musics.

MUSY 477V. Independent Research in Ethnomusicology. 1-4 Hour.
Subject matter not covered in other courses. In-depth study of specialized topics in contemporary, historical, or systematic ethnomusicology, and practical instruction in essay-structuring and presentation. May be repeated for up to 4 hours of degree credit.

MUSY 477VH. Honors Independent Research in Ethnomusicology. 1-4 Hour.
Subject matter not covered in other courses. In depth study of specialized topics in contemporary, historical, or systematic ethnomusicology, and practical instruction in essay-structuring and presentation. May be repeated for up to 4 hours of degree credit.
This course is equivalent to MUSY 477V.

MUSY 5113. Proseminar: Ethnomusicology. 3 Hours.
An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. May be repeated for up to 6 hours of degree credit.
This course is equivalent to MUSY 4113.

MUSY 5313. Proseminar: Topics in Asian and Middle Eastern Musics. 3 Hours.
Research seminars on selected topics, such as The Performing Arts in East Asia; and Music and Ritual. May be repeated for up to 6 hours of degree credit.

MUSY 5323. Seminar: Topics in Asian and Middle Eastern Poetry and Music. 3 Hours.
Reading seminars on selected topics, such as Poetry and Music in Persian, Arabic and Turkish Cultures of the Islamic World; and Poetry and Song in Early East Asia. May be repeated for up to 6 hours of degree credit.

MUSY 5343. Seminar: Special Topics in Traditional Musics and Dance of Europe and the Americas. 3 Hours.
Topics including, but not limited to: European Folk Music; the musical or scholarly legacy of a particular figure.

MUSY 5413. Proseminar: Cross-cultural Performance Practices. 3 Hours.
A survey of performance practices from historic western art music through modern non-western music. An introductory course with readings from seventeenth- and eighteenth-century performance treatises as well as a study of written and aural traditions of non-western music.

MUSY 6333. Advanced Studies in Ethnomusicology. 3 Hours.
Advanced level studies, individually tailored and supervised, including Ethnomusicology (prerequisite MUSY 5113); The Music or Dance of a Selected Area (prerequisite at least one of MUSY 5313, MUSY 5323, MUSY 5343); Historic Performance Practices (prerequisite MUSY 5413); Historical East Asian Musicology (prerequisite MUSY 5313 or MUSY 5323); and Historical Central Asian or Middle-and Near-Eastern Musicology (prerequisite MUSY 5313 or MUSY 5323).

Exercise Science (EXSC)

Courses

EXSC 2733. Introduction to Exercise Science. 3 Hours.
This class will cover introductory topics for the Exercise Science students in preparation for entry into the profession. In addition to specific topics, students will prepare their resumes and make a formal presentation. Prerequisite: EXSC major or instructor consent.

EXSC 2733H. Honors Introduction to Exercise Science. 3 Hours.
This class will cover introductory topics for the Exercise Science students in preparation for entry into the profession. In addition to specific topics, students will prepare their resumes and make a formal presentation.
This course is equivalent to EXSC 2733.

EXSC 3013. Functional Anatomy for Exercise Science. 3 Hours.
This course will include the study of functional human anatomy with emphasis on musculoskeletal and neurological systems. There will be an introduction to the clinical application and location of anatomical structures with some common injuries from a health professions perspective. Prerequisite: BIOL 2443 and BIOL 2441L.

EXSC 3153. Exercise Physiology. 3 Hours.
Examination of effects of exercise on the physiology of the systems of the body. The exploration includes effects during, immediately after, and as long term results of work and exercise. Prerequisite: (BIOL 2213 and BIOL 2211L) and (BIOL 2443 and BIOL 2441L).

EXSC 3153H. Honors Exercise Physiology. 3 Hours.
Examination of effects of exercise on the physiology of the systems of the body. The exploration includes effects during, immediately after, and as long term results of work and exercise. Prerequisite: (BIOL 2213 and BIOL 2211L) and (BIOL 2443 and BIOL 2441L) and honors standing.
This course is equivalent to EXSC 3153.

EXSC 3353. Mechanics of Human Movement. 3 Hours.
An introduction to basic analysis of motor skills. No credit given toward major in Zoology. Prerequisite: (BIOL 2213 and BIOL 2211L), (BIOL 2443 and BIOL 2441L), and KINSBS major or by instructor consent.

EXSC 3353H. Honors Mechanics of Human Movement. 3 Hours.
An introduction to basic analysis of motor skills. No credit given toward major in Zoology. Prerequisite: Honors standing, (BIOL 2213 and BIOL 2211L), (BIOL 2443 and BIOL 2441L), and KINSBS major or by instructor consent.
This course is equivalent to EXSC 3353.

EXSC 3393. Prevention and Care of Athletic Injuries. 3 Hours.
Introduction to the prevention and care of athletic related injuries. Includes athletic injury recognition and management. Prerequisite: BIOL 2443 and BIOL 2441L.
EXSC 3423. Principles and Theories of Strength and Conditioning. 3 Hours.
This course will provide the practical skills necessary to design strength and conditioning programs. Special emphasis is placed on the ability to evaluate exercise movements, prescribe appropriate exercise programs, administer tests, and support program prescription with a sound knowledge of anatomical and physiological adaptation to exercise. The course will include laboratory experiences integrated with didactic learning. The laboratory experiences will in teach students various skills such as how to set up and run speed, agility, and quickness drills, how to select and administer the appropriate tests for athletic performance, and how to evaluate Olympic lifting technique. Everyone must participate in the labs as subjects. Come to lab prepared to exercise. When students are finished with this course, they should be well prepared to take the CSCS exam given by the National Strength and Conditioning Association. Prerequisite: (BIOL 2443 and BIOL 2441L) and (BIOL 2213 and BIOL 2211L).

EXSC 3423H. Honors Principles and Theories of Strength and Conditioning. 3 Hours.
This course will provide the practical skills necessary to design strength and conditioning programs. Special emphasis is placed on the ability to evaluate exercise movements, prescribe appropriate exercise programs, administer tests, and support program prescription with a sound knowledge of anatomical and physiological adaptation to exercise. The course will include laboratory experiences integrated with didactic learning. The laboratory experiences will in teach students various skills such as how to set up and run speed, agility, and quickness drills, how to select and administer the appropriate tests for athletic performance, and how to evaluate Olympic lifting technique. Everyone must participate in the labs as subjects. Come to lab prepared to exercise. When students are finished with this course, they should be well prepared to take the CSCS exam given by the National Strength and Conditioning Association. Prerequisite: (BIOL 2443 and BIOL 2441L) and (BIOL 2213 and BIOL 2211L). This course is equivalent to EXSC 3423.

EXSC 3533. Laboratory Techniques. 3 Hours.
Practical experience in testing physical fitness in both the laboratory and non-laboratory settings. Pre- or Corequisite: EXSC 3153.

EXSC 3533H. Honors Lab Techniques. 3 Hours.
Practical experience in testing physical fitness in both the laboratory and non-laboratory settings. Pre- or Corequisite: EXSC 3153 or EXSC 3153H. This course is equivalent to EXSC 3533.

EXSC 3723. Research Methods in Exercise Science. 3 Hours.
This course will provide an overview of research methods for experimental research designs in an exercise science setting. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for exercise science honor students in spring of their junior year or the summer prior to their senior year to prepare them for their honor’s thesis. This course is cross-listed with EXSC 3723H.

EXSC 3723H. Honors Research Methods in Exercise Science. 3 Hours.
This course will provide an overview of research methods for experimental research designs in an exercise science setting. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for exercise science honor students in spring of their junior year or the summer prior to their senior year to prepare them for their honor’s thesis. Prerequisite: Honors standing. This course is cross-listed with EXSC 3723.

EXSC 4013. Clinical Exercise Physiology. 3 Hours.
The course is designed to build upon prior knowledge of Exercise Physiology and Exercise Testing. We will examine the physiological impacts of exercise and exercise training with specific emphasis on how they relate to clinical outcomes and clinical testing. At the end of the course students should have developed competencies congruent with the objectives of the American College of Sports Medicine’s (ACSM) certification for Clinical Exercise Physiologist. Prerequisite: EXSC 3153 and EXSC 3533.

EXSC 405V. Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of research problems. May be repeated for up to 12 hours of degree credit.

EXSC 405VH. Honors Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of research problems. Prerequisite: Instructor consent. May be repeated for up to 12 hours of degree credit.

EXSC 4323. Exercise Prescription. 3 Hours.
This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespiratory fitness, muscular fitness, body composition, flexibility, and balance. Prerequisite: EXSC 3153, EXSC 3353 and EXSC 3533.

EXSC 4323H. Honors Exercise Prescription. 3 Hours.
This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespiratory fitness, muscular fitness, body composition, flexibility, and balance. Prerequisite: EXSC 3153, EXSC 3353 and EXSC 3533. This course is equivalent to EXSC 4323.

EXSC 4353. Advanced Mechanics of Human Movement. 3 Hours.
Students will build upon their foundation in qualitative biomechanics to quantitatively analyze human movement. Biomechanics of the musculoskeletal system will be covered in the first half of the course, and fundamental laws and principles of mechanics will be covered in the second course half of the course. Examples will be provided throughout the course to demonstrate how biomechanics can be used to enhance and maintain human health, fitness, and performance. Prerequisite: EXSC 3353 and PHYS 2013. This course is cross-listed with EXSC 4353H.

EXSC 4353H. Honors Advanced Mechanics of Human Movement. 3 Hours.
Students will build upon their foundation in qualitative biomechanics to quantitatively analyze human movement. Biomechanics of the musculoskeletal system will be covered in the first half of the course, and fundamental laws and principles of mechanics will be covered in the second course half of the course. Examples will be provided throughout the course to demonstrate how biomechanics can be used to enhance and maintain human health, fitness, and performance. Prerequisite: EXSC 3353 and PHYS 2013.

EXSC 4443. Psychology of Sports Injury and Rehabilitation. 3 Hours.
The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation.

EXSC 4773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153.
EXSC 4773H. Honors Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153 and honors standing. This course is equivalent to EXSC 4773.

EXSC 4783. Sport and Exercise Psychology. 3 Hours.
This course examines how individuals behave in physical activity, exercise, and sport settings. Psychological antecedents and consequences of primary and secondary involvement in exercise, sport, and related physical activities will be introduced. This course is equivalent to EXSC 4783.

EXSC 4833. Exercise Applications for Special Populations. 3 Hours.
The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Pre- or Corequisite: EXSC 3533. Prerequisite: EXSC 3353 and EXSC 3153.

EXSC 4833H. Honors Exercise Applications for Special Populations. 3 Hours.
The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Pre- or Corequisite: EXSC 3533 or EXSC 3533H. Prerequisite: EXSC 3353 or EXSC 3353H and EXSC 3153 or EXSC 3153H. This course is equivalent to EXSC 4833.

EXSC 4903. Internship in Exercise Science. 3 Hours.
Provides opportunities for students in Exercise Science to gain experience in clinics, hospitals, fitness centers, athletic training facilities or related settings. Pre- or Corequisite: EXSC 3533. Prerequisite: EXSC 3353 and EXSC 3153.

EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.
Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. May be repeated for up to 6 hours of degree credit.

EXSC 5323. Biomechanics I. 3 Hours.
Intended to serve as an introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion.

EXSC 5333. Instrumentation in Biomechanics. 3 Hours.
The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323.

EXSC 5353. Exercise Psychology. 3 Hours.
Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence.

EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.
The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decisions are made. This course will introduce you to research in a variety of fields that include physiology, neurology, and neuropsychology through primary source material in the form of book chapters and journal articles.

EXSC 5513. Physiology Exercise I. 3 Hours.
A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems.

EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.
A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent.

EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.
An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions.

EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.
Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent.

EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.
Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantify physiological parameters, leading to the individualized exercise prescription. Corequisite: Lab component.

EXSC 5613. Physical Dimensions of Aging. 3 Hours.
This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513.

EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.
The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite: Students must be accepted into the Masters of Athletic Training graduate program.

EXSC 5773. Performance and Drugs. 3 Hours.
The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance.

EXSC 6313. Muscle Physiology. 3 Hours.
To expand the student's knowledge of the skeletal muscle form and function. Specifically, how muscle is formed to how it can adapt as a post-mitotic tissue. This course will focus on the morphological, physiological, cellular, and molecular factors that affect skeletal muscle form and function.

EXSC 6323. Biomechanics II. 3 Hours.
Analysis of human movement with emphasis on sports skills by application of principles of anatomy, kinesiology, and cinematographical analysis. Prerequisite: EXSC 5323.
EXSC 6343. Physiology of Exercise II. 3 Hours.
Detailed study of the body systems affected by exercise, the functions of these systems during exercise, the effects of age, sex, body type, and nutrition on capacity for exercise, the techniques of assessing work capacity, and a critical analysis of research literature in this area.

EXSC 6443. Thermoregulation and Fluid Balance. 3 Hours.
Comprehensive overview of human thermoregulatory responses to exercise in heat and cold.

Extension Education (EXED) Courses

EXED 4183. Management of Volunteer Programs. 3 Hours.
Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Prerequisite: Junior standing.

EXED 475V. Internship in Extension. 3-6 Hour.
A supervised practical work experience in Cooperative Extension which is designed to give the student an insight into the role of Extension employees and an opportunity to gain professional competence in this area. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

EXED 5113. Program Development and Evaluation. 3 Hours.
Principles and proceedings of program development process including planning, designing, implementing, and evaluating of extension education programs. An emphasis on the framework for applying adult and non-formal education principles to the change process.

EXED 5183. Management of Volunteer Programs. 3 Hours.
(Formerly EXED 4183.) Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Graduate degree credit will not be given for both EXED 4183 and EXED 5183.

Finance (FINN) Courses

FINN 1003. Your Money and Credit. 3 Hours.
Introduction to personal finance. Topics include building wealth, do’s and don’ts of credit, car and home ownership. Lectures on theory and concepts; ‘learning from the masters’ video on best practices; financial simulations and case exercises.

FINN 3003. Personal Financial Management. 3 Hours.
Topics covered include budgeting, financial planning, managing credit, taxes, insurance, investments, and retirement planning.

FINN 3013. Financial Analysis. 3 Hours.
Focuses on how information contained in financial statements can be used in financial decision-making; in particular, to assess financial performance, evaluate credit and default risk, forecast future funds needs, weigh the risk-reward of debt vs. equity financing, and develop estimates of intrinsic value using relative valuation metrics and discounted cash flow methods. Prerequisite: WCOB 2043 or FINN 3043.

FINN 3043. Principles of Finance. 3 Hours.
Introduction to the financial system and financial management. Addresses the role and functions of financial intermediaries and markets for fixed income and equity securities; understand how interest rates are determined and assets valued; learn how firms effectively manage financial resources and create value through investment and financing decisions. Prerequisite: ACCT 2013, ECON 2013, ECON 2023, WCOB 1033 and (ACCT 2023 or MGMT 2053), each with a grade of C or better.

FINN 3043H. Honors Principles of Finance. 3 Hours.
Introduction to the financial system and financial management. Addresses the role and functions of financial intermediaries and markets for fixed income and equity securities; understand how interest rates are determined and assets valued; learn how firms effectively manage financial resources and create value through investment and financing decisions. Prerequisite: ACCT 2013, ECON 2013, ECON 2023, WCOB 1033 and (ACCT 2023 or MGMT 2053), each with a grade of C or better.

FINN 3053. Financial Markets and Institutions. 3 Hours.
Role and operations of financial markets and institutions in the economy. Supply of, demand for, funds, interest rates and flow of funds analysis. Financial policies, practices of bank and nonbank financial institutions. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

FINN 3063. Investments. 3 Hours.
Introduction to basic investment concepts including: risk-return and mean-variance efficient frontiers, diversification and the pricing of risk, security valuation. Corequisite: FINN 3013. Prerequisite: WCOB 2043 or FINN 3043.

FINN 3103. Financial Modeling. 3 Hours.
Develop strong computer skills in financial analysis by integrating conceptual material with spreadsheet-based numerical solution and simulation techniques. Prerequisite: WCOB 2043 or FINN 3043.

FINN 3133. Commercial Banking. 3 Hours.
Commercial bank administration, management; loans; bond portfolios; credit analysis; public relations; analysis and interpretations of Federal Reserve regulations and publications. Prerequisite: WCOB 2043 or FINN 3043.

FINN 3163. Fixed Income Securities I. 3 Hours.
The markets and institutional settings of fixed income securities; valuation and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate; and interest rate derivatives as hedging tools. Corequisite: FINN 3103 and FINN 3063. Prerequisite: Departmental consent.

FINN 3173. Fixed Income Securities II. 3 Hours.
Continuation of FINN 4163. The markets and institutional settings of fixed income securities; valuation, and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate; and interest rate derivatives as hedging tools. Prerequisite: FINN 3163.

FINN 3603. Corporate Finance. 3 Hours.
Develop analytical competencies in financial planning, cost of capital estimation, application of discounted cash flow approach to valuation and capital allocation, lease analysis, evaluation of merger and organizational restructuring strategies. Prerequisite: WCOB 2043 or FINN 3043 and FINN 3013.

FINN 3623. Risk Management. 3 Hours.
A survey of the extent and types of risk in business; ways of dealing with business risk; use of security and commodity exchanges; survey of insurance for risk bearing purposes.

FINN 3703. International Finance. 3 Hours.
Introduction to international financial markets, exchange rates and exchange rate determination, balance of trade measures, and vehicles for foreign trade financing.

FINN 3933. Real Estate Principles. 3 Hours.
Comprehensive, covering economics of real estate, real estate value, real estate finance, rights in real property and their transfer, public programs, policies relating to real property.

FINN 4003H. Honors Finance Colloquium. 3 Hours.
Explores important concepts, significant events and/or new developments in the field of Finance. Prerequisite: Senior standing.
FINN 4013. Seminar in Personal Financial Planning. 3 Hours.
Explores financial planning function, including contact, data acquisition, plan development and implementation; covers all areas of personal financial planning including investments, insurance, taxes, and estate planning; addresses planning techniques and financial planning ethical issues; emphasis on case studies. Prerequisite: FINN 3063. Corequisite: FINN 3063 and ACCT 3843.

FINN 410V. Special Topics in Finance. 1-6 Hour.
Explore current events, new developments and special topics in Finance not covered in other courses. Prerequisite: FINN 3043. May be repeated for up to 6 hours of degree credit.

FINN 4133. Advanced Investments. 3 Hours.
Sound training in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Prerequisite: FINN 3063.

FINN 4143. Portfolio Management I. 3 Hours.
This course applies modern investment theory to the practical management of the Rebsamen Trust. Students prepare a statement of investment objectives, recommend an asset allocation strategy based on a quantitative analysis of asset class returns, and select securities using fundamental analysis. Classes are organized as management meetings and visits to investment firms are an important part of the class. Application, interview and instructor approval are required. Prerequisite: FINN 3063 and ACCT 3723. Prerequisite: Departmental consent.

FINN 4153. Portfolio Management II. 3 Hours.
This course is a continuation of FINN 4143. Topics covered include technical analysis, dynamic asset allocation and derivative strategies. Visits to major investments firms and organized exchanges in New York City or other locations are generally planned. Selection is by invitation. Prerequisite: FINN 4143 and by invitation only.

FINN 4173. Energy Finance. 3 Hours.
This course is as a comprehensive introduction to the field of Energy Finance, i.e., the application of Finance principles to energy, energy-service, and related industries. Topics covered include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterparty, and country risk. Prerequisite: FINN 3013 and FINN 3043.

FINN 4233. Advanced Corporate Finance. 3 Hours.
Addresses complex and multifaceted issues and problems in financial decision-making. Prerequisite: FINN 3603.

FINN 4313. Advanced Commercial Banking. 3 Hours.
Focus on financial policy issues using real situational cases. Topics include cost of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: FINN 5223.

FINN 4333. Investment Theory and Management. 3 Hours.
Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5333.

FINN 4411. Real Estate Appraisal. 3 Hours.
Value theories applied to real estate. Characteristics which affect value are studied and valuation methodologies are learned and performed by the students. Focus is on residential real estate but all types of real estate are addressed. Students prepare in actual residential appraisal report. Prerequisite: FINN 3933.

FINN 4433. Real Estate Finance and Investment. 3 Hours.
Consideration of professional aspects of the real estate field. Emphasis is placed upon finance techniques and investment analysis. The focus is on commercial real estate. Brokerage, property management, appraisal, property development and current problems are also addressed. Students prepare a feasibility study on a commercial development project. Prerequisite: FINN 3933.

FINN 4450V. Independent Study. 1-3 Hour.
Permits students on an individual basis to explore selected topics in finance, with the consent of instructor.

FINN 4733. Life and Health Insurance I. 3 Hours.
Basic principles, functions, uses of life and health insurance; types of policy contracts; calculation of premiums, reserves; organizations, management, supervision, of companies.

FINN 4833. Property and Casualty Insurance I. 3 Hours.
Forms and functions of fire, marine, inland marine, automobile title, miscellaneous types insurance and bonds for business, personal use.

FINN 5113. Corporate Financial Management. 3 Hours.
Financial analysis, planning and control; decision making and modeling for financial managers; and financial policies for management.

FINN 5173. Energy Finance and Risk Management. 3 Hours.
This course provides an advanced introduction to energy finance, defined as the application of finance principles to energy, energy service, and related industries, concerning all aspects of the energy value chain. Topics include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterparty, country, and enterprise risk. It also introduces students to business valuation and investment banking applications in the energy industry vertical. Prerequisite: FINN 5113 or FINN 5223.

FINN 5223. Financial Markets & Valuation. 3 Hours.
Analysis of financial information by capital markets in the determination of security values with specific applications to retail and logistics companies. This course views these and other companies from the point of view of the capital markets. May be repeated for degree credit.

FINN 5303. Advanced Corporate Financial Management. 3 Hours.
Focus on financial policy issues using real situational cases. Topics include cost of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: FINN 5223.

FINN 5333. Investment Theory and Management. 3 Hours.
Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5223.

FINN 541V. Shollmier Investment Project. 1-3 Hour.
Provide students with the opportunity to design and apply complex investment strategies used in institutional portfolio management on the Shollmier MBA Fund that can involve fixed income and equity securities as well as derivatives. Students will use top down asset allocation models, bottom up security selection, and hedge fund strategies. Prerequisite: FINN 5223 and FINN 5333. May be repeated for up to 9 hours of degree credit.

FINN 5443. Retail Finance. 3 Hours.
The financial success of retail product and service offerings depends on a clear understanding of the socio-economic as well as demographic and environmental factors that drive the changing patterns of consumption. This course introduces the fundamentals and use of consumer and trade area analysis tools, specifically geographic information systems (GIS) and psychographic market analysis, to make informed financial decisions. Extensive case studies are utilized throughout the course to learn concepts and best practices. Prerequisite: FINN 5223.

FINN 5703. Multinational Business Finance. 3 Hours.
Problems pertinent to managers of firms in multinational business environments, including international institutions, risks, investments and capital budgeting.

FINN 6043. Finance Theory. 3 Hours.
Provides a conceptual understanding of key theoretical developments in the field of financial economics, including firm decisions under risk within a world of uncertainty.
FINN 6133. Seminar in Investment Theory. 3 Hours.
Study advanced literature in field investments, with special reference to theory of
random walks, stock valuation models, portfolio management.

FINN 6233. Seminar in Financial Management. 3 Hours.
Financial management of firm with emphasis on financial theory or firm, quantitative
methods used in financial analysis, planning.

FINN 6333. Empirical Research in Finance. 3 Hours.
A study of recent empirically based research in finance.

FINN 636V. Special Problems in Finance. 1-6 Hour.
Case studies in investments, corporation finance, money and banking, monetary
theory, international finance, public finance. By arrangement. May be repeated for up
to 6 hours of degree credit.

FINN 6733. Seminar in Financial Markets and Institutions. 3 Hours.
Recent developments in the literature of financial markets and institutions.
Participants will be involved in the extensive study of existing theories and empirical
tests of the theories.

FINN 683V. Contemporary Issues in Doctoral Colloquium. 1-3 Hour.
To explore and evaluate contemporary research issues in finance. Course
content to reflect the most recent developments in theory and empirical research
methodologies. Prerequisite: Doctoral student status and instructor consent. May be
repeated for up to 18 hours of degree credit.

FINN 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Food Science (FDSC)

Courses

FDSC 1011. Exploring Topics in Food Science. 1 Hour.
Introduces the depth and scope of Food Science as a profession. This course
emphasizes the importance of science in processing and preservation of food and
discusses current topics and issues. Practical information on food processing,
composition, additives, labeling, environmental issues, regulations, safety, sensory
analysis, and health benefits will be provided. Curriculum offerings in Food Science
will be related to job responsibilities as a Food Scientist. Lecture/discussions, 2
hours per week for 8 weeks.

FDSC 1103. Introduction to Food Science. 3 Hours.
This course is designed to provide students with a general application and
understanding of current issues associated with food products and food ingredients.
Discussions will focus on controversial subjects involving food products, food
additives, food safety and preservation techniques based on scientific principles and
popular belief. Lecture/discussions/demonstrations, 3 hours per week.

FDSC 2111. Math Elements for Food Science and Technology. 1 Hour.
Basic data interpretation and analysis, problem interpretation and equation
formulation, manipulation of algebraic functions representing applications in food
science and technology, predictive models and curve fittings to determine model
constants applied in food science and processing. Pre- or Corequisite: MATH 2043
or MATH 2554.

FDSC 2401. Uncorked: Vines to Wines. 1 Hour.
This introductory course is designed to provide students with an understanding of
the basic concepts of growing grapes and winemaking, including history, grape
growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations,
wine marketing, and the sensory and appreciation of wine. Coursework is expected
to integrate lecture and guest presenters with supplement reading assignments.
This course will not include wine tasting, therefore there are no age restrictions for
enrollment.

FDSC 2401H. Honors Uncorked: Vines to Wines. 1 Hour.
This introductory course is designed to provide students with an understanding of
the basic concepts of growing grapes and winemaking, including history, grape
growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations,
wine marketing, and the sensory and appreciation of wine. Coursework is expected
to integrate lecture and guest presenters with supplement reading assignments.
This course will not include wine tasting, therefore there are no age restrictions for
enrollment. Prerequisite: Honors standing.

FDSC 2503. Food Safety and Sanitation. 3 Hours.
Principles of sanitation, cleaners and sanitizers, sanitary equipment and plant
design, and microbial growth and control in food processing operations. Lecture/
discussion/demonstrations, 3 hours per week. Students may not receive credit for
both FDSC 2503 and FDSC 2523.

FDSC 2523. Sanitation and Safety in Food Processing Operations. 3 Hours.
Topics to be covered include understanding and control of microbial, chemical,
and physical food hazards as well as emerging food safety issues. Course will
include a study of cleaners and sanitizers and sanitary equipment and plant designs.
Bioterrorism and food safety will also be discussed. Students may not receive credit
for both FDSC 2523 and FDSC 2503. Web-based course.

FDSC 2523. Food Safety and Sanitation. 3 Hours.
Principles of sanitation, cleaners and sanitizers, sanitary equipment and plant
design, and microbial growth and control in food processing operations. Lecture/
discussion/demonstrations, 3 hours per week. Students may not receive credit for
both FDSC 2503 and FDSC 2523.

FDSC 2603. Science in the Kitchen. 3 Hours.
In recent years science has found its way into the kitchen and cooking into
laboratories and food processing plants. This course is designed to integrate science
and cooking to help students appreciate the chemical and physical properties of
foods and understand how the processes used when handling, preparing, and
storing foods affect these properties.

FDSC 2701. Food for Health. 1 Hour.
The course is designed for students interested in how foods affect one's health. This
course provides students with a background of functional food that will enable them
to understand, discuss, and evaluate functionality of food in relation to health. This
class is designed to appeal to students studying food science, nutrition, biology,
chemistry, nursing, and health and human performance.

FDSC 3103. Principles of Food Processing. 3 Hours.
The course is designed as an overview of the unit; food processing operations
common to all types of food processing plants. Examples will be drawn from
international food processing operations processing fruits and vegetables, poultry
and meats, and oil seeds and cereal grains. Emphasis on oral communication and
critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 1123 and
CHEM 1121L and (MATH 2043 or MATH 2554).

FDSC 3202. Introduction to Food Law. 2 Hours.
Discussion of government laws and regulations affecting the manufacture of food.
Emphasis is on federal regulations relating to food safety, labeling, and the FDA.
Discussion relates to practical use of food law. Lecture 2 hours per week.

FDSC 3923H. Honors Molecular Gastronomy. 3 Hours.
Lecture, demonstration, and hands-on exercises will be used to explain and
demonstrate selected principles of chemistry by utilizing a modern culinary
approach. Hands-on exercises will provide students with experience in applying the
knowledge learned from the class to explicate fundamental principles in chemistry.
Demonstrations and hands-on exercises will take place during scheduled lecture
time. High school physics and chemistry will be useful in this course.

FDSC 400V. Special Problems. 1-4 Hour.
Investigation of assigned problems in food science. Prerequisite: Junior standing.

FDSC 4111L. Food Analysis Lab. 1 Hour.
Laboratory exercises providing students with experience of analytical techniques and
instrumentation used in food analysis. Laboratory 3 hours per week. Corequisite:
FDSC 4113. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and
CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).
FDSC 4113. Food Analysis. 3 Hours.
Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Corequisite: FDSC 4111L. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and AGST 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).

FDSC 4121L. Food Microbiology Lab. 1 Hour.
A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Pre- or Corequisite: FDSC 4122.

FDSC 4122. Food Microbiology. 2 Hours.
The study of food microbiology including classification/ taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and 2011L or BIOL 2533.

This course is cross-listed with BIOL 4122.

FDSC 4304. Food Chemistry. 4 Hours.
Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).

FDSC 431V. Internship in Food Science. 1-4 Hour.
The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: Junior standing and consent. May be repeated for up to 4 hours of degree credit.

FDSC 4333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.
This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Junior or senior standing.

FDSC 4413. Sensory Evaluation of Food. 3 Hours.
Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: STAT 2303 or WCOB 1033 or AGST 4023 or STAT 2023 or PSYC 2013.

FDSC 4563. Experiencing the Food Industry. 3 Hours.
This course will expose students to the food industry by providing insight into the food processing, packaging, distribution and retailing components of the food industry. The course will include local and regional food industry related tours. May be repeated for up to 6 hours of degree credit.

FDSC 4713. Product Innovation for the Food Scientist. 3 Hours.
This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 and FDSC 4111L. Prerequisite: Senior standing, FDSC 4304, FDSC 3103, and FDSC 4413.

FDSC 472V. Special Topics in Food Science. 1-4 Hour.
Discussion focused on selected topics of particular fields of raw product physiology, food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation. May be repeated for up to 4 hours of degree credit.

FDSC 4754. Engineering Principles of Food Processing. 4 Hours.
Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L.

FDSC 4823. Principles of Food Microbiology. 3 Hours.
This web-based course is a study of the fundamentals of food microbiology to include its history, classifications, spores and their importance, and the most common and serious pathogenic food microorganisms. Fermentation, spoilage microorganisms and control methodology are also discussed.

FDSC 5001. Seminar. 1 Hour.
Presentation and discussion of graduate student research. Prerequisite: Graduate standing.

FDSC 509V. Special Problems Research. 1-6 Hour.
Original investigation on assigned problems in food science. Prerequisite: Graduate standing.

FDSC 511L. Food Analysis Lab. 1 Hour.
(Formerly FDSC 4111L) Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4111L and FDSC 511L. Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).

FDSC 5113. Food Analysis. 3 Hours.
(Formerly FDSC 4113.) Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Graduate degree credit will not be given for both FDSC 4113 and FDSC 5113. Corequisite: FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).

FDSC 5121L. Food Microbiology Lab. 1 Hour.
(Formerly FDSC 4121L) A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Graduate degree credit will not be given for both FDSC 4121L and FDSC 5121L. Pre- or Corequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122).

FDSC 5122. Food Microbiology. 2 Hours.
(Formerly FDSC 4122.) The study of food microbiology including classification/ taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both FDSC 4122 and FDSC 5122. Prerequisite: BIOL 2013 and 2011L or BIOL 2533.
FDSC 5223. Food Biosecurity. 3 Hours.
This course is the study of the security of agricultural products and the protection of our food supply from intentional and accidental, domestic and international contamination. Prerequisite: Graduate standing.

FDSC 5304. Food Chemistry. 4 Hours.
(Formerly FDSC 4304.) Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both FDSC 4304 and FDSC 5304. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L).

FDSC 531V. Internship in Food Science. 1-4 Hour.
(Formerly FDSC 431V.) The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Graduate degree credit will not be given for both FDSC 431V and FDSC 531V. Prerequisite: Completion of first year of graduate studies and instructor consent. May be repeated for up to 4 hours of degree credit.

FDSC 5333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.
This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Graduate standing.

FDSC 5413. Sensory Evaluation of Food. 3 Hours.
(Formerly FDSC 4413.) Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both FDSC 4413 and FDSC 5413. Corequisite: Lab component. Prerequisite: STAT 2303 or WOBC 1033 or AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 2023 or PSYC 2013.

FDSC 5423. Foodborne Diseases. 3 Hours.
This course will introduce students to the major pathogens associated with foodborne diseases, their epidemiology, and approaches to outbreak investigation and control of foodborne illness. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. The student will gain knowledge through lectures, case studies, readings, and an individual project. Prerequisite: BIOL 1543 or equivalent.

FDSC 5503. Safety and Sanitation for the Food Industry. 3 Hours.
This web-based course will provide an appreciation of the need for sanitation in food processing and increase the students' knowledge of sanitary techniques. Topics will include contamination sources, plant and equipment design, cleaners and sanitizers, HACCP, and food biosecurity. Also covered will be considerations in selecting, establishing and maintaining a sanitation program. Prerequisite: General Microbiology or Food Microbiology; General Chemistry.

FDSC 5563. Experiencing the Food Industry. 3 Hours.
(Formerly FDSC 4563.) This course will expose students to the food industry by providing insight into the food processing, packaging, distribution and retailing components of the food industry. The course will include local and regional food industry related tours. Graduate degree credit will not be given for both FDSC 4563 and FDSC 5563. May be repeated for up to 6 hours of degree credit.

FDSC 5713. Product Innovation for the Food Scientist. 3 Hours.
(Formerly FDSC 4713.) This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Graduate degree credit will not be given for both FDSC 4713 and FDSC 5713. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113) and FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304), FDSC 4113, and FDSC 4413 or FDSC 5413 (formerly FDSC 4413).

FDSC 5754. Engineering Principles of Food Processing. 4 Hours.
(Formerly FDSC 4754.) Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4754 and FDSC 5754. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L.

FDSC 5823. Principles of Food Microbiology. 3 Hours.
(Formerly FDSC 4823.) This web-based course is a study of the fundamentals of food microbiology to include its history, classifications, spores and their importance, and the most common and serious pathogenic food microorganisms. Fermentation, spoilage microorganisms and control methodology are also discussed. Graduate degree credit will not be given for both FDSC 4823 and FDSC 5823.

FDSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

FDSC 602V. Special Topics. 1-3 Hour.
Discussions focused on selected topics of particular fields of raw product physiology and food processing. chemistry, physiology, microbiology, evaluation, sensory analysis and preservation. Prerequisite: Graduate standing. May be repeated for degree credit.

FDSC 6033. Food Biochemistry. 3 Hours.
Biochemical characteristics, functions, regulation and impact of components in raw and processed foods of plant origin. Lecture/discussion 3 hours per week. Prerequisite: CHEM 3813.

FDSC 6123. Food Carbohydrate Chemistry. 3 Hours.
Focus is on carbohydrate chemistry including molecular structures and physical properties, production and food applications, analytical methods for food carbohydrates, and interactions among food polysaccharides. Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304).

FDSC 6133. Food Lipid Chemistry. 3 Hours.
Chemistry and technology of commercial fats and oils in food systems with discussion of lipid changes affecting food quality and human health. Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304).

FDSC 6143. Advanced Food Processing and Packaging and their Environmental Impact. 3 Hours.
The course is directed to graduate students in food science and related fields. Students will learn advanced food processing technologies and packaging as well as the environmental issues associated to food production, processing, and distribution. Prerequisite: FDSC 3103 or equivalent, or food processing/engineering background with knowledge of basic food processing operations.

FDSC 6323. Nutraceuticals and Functional Foods. 3 Hours.
Course will include past, present and future of nutraceuticals and functional foods, chemistry, mechanism, novel technologies, nutrigenomics, processing, healthy lifestyle, regulation, safety, marketing, international aspects, and industry project. Prerequisite: CHEM 2613 (or CHEM 3603) and CHEM 3813 and FDSC 4304 or instructor consent.
FDSC 6333. Food Protein Chemistry and Functionality. 3 Hours.
This course is a study in advanced food protein chemistry, including molecular structures, characteristic, physicochemical bases of food protein functionality, structure-function relationship, processing technologies to improve functionality, as well as hands-on experiences with timely, practical projects related to food proteins. Lecture and problem solving projects for 3 hours per week. Pre- or Corequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304).

FDSC 6403. Epidemiologic Principles in Food Safety and Public Health. 3 Hours.
This course will provide an introduction to epidemiologic methods used in foodborne disease outbreak investigations. The importance of surveillance systems in detecting outbreaks and in the development of effective disease prevention and control strategies will also be presented. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. In addition, molecular methods utilized for the identification of etiologic agents will be discussed. Selected important foodborne diseases will be discussed in detail to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and communities. Prerequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122) or equivalent.

FDSC 6443. Metabolism of Xenobiotics. 3 Hours.
This course is designed to provide in-depth knowledge of the integration of molecular, cellular, and physiologic aspects of xenobiotics (e.g. phytochemicals)/micronutrients and metabolism. This course will also discuss the current understanding of the mechanism and regulation of gene expression by xenobiotics/micronutrients. Examination of current research literature to understand how xenobiotics/micronutrients and physiological states metabolize and influence gene expression, as well as the research methodology used to address these relations. Prerequisite: CHEM 3813.

FDSC 700V. Doctoral Dissertation. 1-18 Hour.
The doctoral program in food science is an interdepartmental program offered by the departments of Food Science, Animal and Poultry Sciences, and Human Environmental Sciences. Prerequisite: Graduate standing. May be repeated for degree credit.

French (FREN) Courses

FREN 1003. Elementary French I (ACTS Equivalency = FREN 1013). 3 Hours.
Elementary French I.

FREN 1013. Elementary French II (ACTS Equivalency = FREN 1023). 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.

Continued development of basic speaking comprehension and writing skills and intensive development of reading skills.

FREN 2013H. Honors Intermediate French II. 3 Hours.
Honors intermediate French II.
This course is equivalent to FREN 2013.

FREN 3003. Advanced French. 3 Hours.
Further intensive practice for the purpose of strengthening written and oral expression. Includes a review of the essentials of French grammar. Prerequisite: FREN 2013 or equivalent.

FREN 3033. French Conversation. 3 Hours.
Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: FREN 2013.

FREN 3063. Ph.D. Reading Requirement I. 3 Hours.
Ph.D. reading requirement I.

FREN 3103. Cultural Readings. 3 Hours.
A course designed to build vocabulary and to strengthen reading skills and oral expression through extensive practice with culturally authentic materials. Prerequisite: FREN 2013.

FREN 3113. Introduction to Literature. 3 Hours.
Further development of reading skills and introduction to literary commentary and analysis. Prerequisite: FREN 3003 or FREN 3103.

FREN 3123. French Phonetics. 3 Hours.
Improves students' pronunciation of French while they acquire the basic rules of standardized spoken French. The course takes into account the major contrastive features of the sounds of French and English and addresses the particular challenges the native speaker of American English faces when learning to pronounce French. Prerequisite: FREN 3003.

FREN 399VH. Honors French Course. 1-6 Hour.
Honors French. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

FREN 4003. French Grammar and Composition. 3 Hours.
French grammar and composition. Prerequisite: FREN 3003 or FREN 3103.

FREN 4033. French for Oral Proficiency. 3 Hours.
Three hours per week of conversation practice for the advanced undergraduate. Prerequisite: FREN 3003 or FREN 3103.

FREN 4113. Special Themes in French. 3 Hours.
Topics not normally covered in period courses. Sample topics: "The Comic Tradition in French Literature," "French Cinema." Topics announced one semester in advance. Prerequisite: FREN 3113. May be repeated for up to 3 hours of degree credit.

FREN 4213. French Civilization. 3 Hours.
French civilization. Prerequisite: FREN 3113.

FREN 4223. Survey of French Literature I. 3 Hours.
A survey of French literature, its forms and themes from the medieval period through the 18th century. Prerequisite: FREN 3113.

FREN 4233. Survey of French Literature II. 3 Hours.
A survey of French literature, its forms and themes in the 19th and 20th centuries. Prerequisite: FREN 3113.

FREN 4243. Studies in Francophone Literature. 3 Hours.
Introduction to seminal writers from Francophone cultures, mainly Quebec, the Maghreb and West Africa. Exploration of the following topics: national identity, morality, religion, and exile. Study of socio-political and cultural problems, while discovering recent trends in the globalization of Francophone literature. Prerequisite: FREN 3113.

FREN 4333. Introduction to Business French. 3 Hours.
Introduction and orientation to the French world of business and commerce through the study of vocabulary, forms, and formulas and expression used in commercial correspondence. Prerequisite: FREN 3113 or FREN 3103.

FREN 4433. Business Culture and Practices. 3 Hours.
A practical application of French to the business world focusing on the cultural challenges faced by Americans doing business in France and francophone countries. Case studies and translations of authentic documents from French to English and English to French reinforce the specialized vocabulary of the business world. Prerequisite: FREN 3103 or FREN 3113.
FREN 4663. French Short Story. 3 Hours.
Introduces the genre of the French Short Story, focusing on close readings of the stories and providing an overview of the most important literary movements of the periods from the Middle Ages to the twentieth century. Prerequisite: FREN 3113.

FREN 475V. Special Investigations. 1-6 Hour.
Special investigations. May be repeated for degree credit.

FREN 5003. French Grammar and Phonetics. 3 Hours.
Systematic review of principles of French grammar and syntax; comprehensive presentation of French phonetics.

FREN 5033. Advanced French Conversation. 3 Hours.
This course will provide a small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world.

FREN 5213. French Culture & Civilization. 3 Hours.
An analysis of French cultural symbols and attitudes as observed in their historical, economical, political, social, educational, and linguistic aspects.

FREN 5333. Old French Literature. 3 Hours.
An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the times.

FREN 5353. Survey of French Poetry. 3 Hours.
A comprehensive study of French poetry from the Middle Ages to the twentieth century, focusing on close readings of individual poems. This course will cover literary movements and trends of the periods and presents the terminology required to do explication de texte.

FREN 5433. French 16th-Century Literature. 3 Hours.
A survey of representative writers of the sixteenth century.

FREN 5543. French 17th-Century Literature. 3 Hours.
A survey of representative writers of the seventeenth century.

FREN 5663. French Short Story. 3 Hours.
An introduction to the French short story, focusing on close readings of a variety of contes and nouvelles from the Middle Ages through the twenty-first century.

FREN 5673. French 18th-Century Literature. 3 Hours.
French 18th-Century literature.

FREN 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. May be repeated for up to 6 hours of degree credit.

FREN 575V. Special Investigations. 1-6 Hour.
Special investigations. May be repeated for degree credit.

FREN 5773. Survey of Francophone Literature. 3 Hours.
A survey of representative texts in the field of sub-Saharan and North African literature concentrating on postcolonial novels using contemporary critical approaches.

FREN 5783. The French Nineteenth-Century Novel. 3 Hours.
The French Nineteenth-Century novel.

FREN 5813. French 20th-Century Theatre. 3 Hours.

FREN 5833. French 20th-Century Novel. 3 Hours.
French 20th-Century novel.

Gender Studies (GNST)

Courses

GNST 2003. Introduction to Gender Studies. 3 Hours.
This course explores cultural constructions of gender and sexuality using a variety of media, including literature, film, and architecture.

GNST 2003H. Honors Introduction to Gender Studies. 3 Hours.
This course explores cultural constructions of gender and sexuality using a variety of media, including literature, film, and architecture. This course is equivalent to GNST 2003.

GNST 3583. Body and Identity. 3 Hours.
This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. This course is cross-listed with ANTH 3583.

GNST 4363. Gender, Race, and Power. 3 Hours.
Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. This course is cross-listed with COMM 4363.

GNST 4733. Reel Women. 3 Hours.
An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women’s daily lives. Prerequisite: COMM 1003. This course is cross-listed with COMM 4733.

GNST 4743. Representational Issues in Film (Irregular). 3 Hours.
An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film — both historically and culturally. Prerequisite: COMM 1003.

This course is cross-listed with COMM 4743.

GNST 490V. Independent Study. 1-6 Hour.
An exploration of gender studies topics studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: GNST 2003 or GNST 2003H or instructor consent. May be repeated for up to 6 hours of degree credit.

GNST 490VH. Honors Independent Study. 1-6 Hour.
An exploration of gender studies topics studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: GNST 2003 or GNST 2003H or instructor consent and honors standing. May be repeated for up to 6 hours of degree credit.

This course is cross-listed with GNST 490V.

GNST 4913. Internship in Gender Studies. 3 Hours.
Internship in applied gender work within public and private organizations. Prerequisite: 3 hours of GNST coursework and instructor consent. May be repeated for up to 6 hours of degree credit.

GNST 4983. Special Topics in Gender Studies. 3 Hours.
This course covers gender topics that are not usually offered in-depth in regularly offered courses. Prerequisite: GNST 2003 or GNST 2003H. May be repeated for up to 6 hours of degree credit.
General Engineering (GNEG) Courses

GNEG 1103. Introduction to Engineering. 3 Hours.
This introductory course for first year engineering students introduces them to the fields of engineering and many of the modeling and problem solving techniques used by engineers. It also introduces the students to the engineering profession and some of the computer tools necessary for pursuing a degree in engineering. This course is designed for current and future transfer students. Freshman engineering students on campus should select GNEG 1201 or GNEG 1111 as appropriate.
Pre- or Corequisite: MATH 1203 or MATH 1204 or MATH 1213 or MATH 1284C or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Corequisite: Engineering major.

GNEG 1111. Introduction to Engineering I. 1 Hour.
Fundamentals of engineering problem-solving including skills from mathematics, science, and computing. Introduction to the engineering design process through team-based activities. Study of the contemporary engineering profession and the disciplines within the College of Engineering. Corequisite: Drill component and MATH 1284 or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: Engineering First Year majors only.

GNEG 1111H. Honors Introduction to Engineering I. 1 Hour.
Fundamentals of engineering problem-solving including skills from mathematics, science, and computing. Introduction to the engineering design process through team-based activities. Study of the contemporary engineering profession and the disciplines within the College of Engineering. Corequisite: Drill component and MATH 1284 or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: Engineering First Year majors only and Honors College students only.
This course is equivalent to GNEG 1111.

GNEG 1121. Introduction to Engineering II. 1 Hour.
Further study of engineering problem-solving including skills from mathematics, science, and computing. Experience with the engineering design process through a major, team-based project. Selecting a major within the College of Engineering. Discussion of academic and professional opportunities for engineering students. Corequisite: Drill component and MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: GNEG 1111 or GNEG 1111H or GNEG 1515 and Engineering First Year majors only.

GNEG 1121H. Honors Introduction to Engineering II. 1 Hour.
Further study of engineering problem-solving including skills from mathematics, science, and computing. Experience with the engineering design process through a major, team-based project. Selecting a major within the College of Engineering. Discussion of academic and professional opportunities for engineering students. Corequisite: Drill component and MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: GNEG 1111H or GNEG 1111 or GNEG 1515, Engineering First Year majors only and Honors College students only.
This course is equivalent to GNEG 1121.

GNEG 1122. Introduction CAD. 2 Hours.
General course in the use of engineering drawings for communications and design. Proper use of computer for computer-aided drafting and design; 2-dimensional, 3-dimensional, and solid modeling; use of manual drafting equipment; geometrical exercises; orthographic projections; auxiliary view; sketching; dimensioning. Corequisite: Lab component. Pre- or Corequisite: MATH 1213 or higher.

GNEG 1201. Fundamentals of Success in Engineering Study. 1 Hour.
Assisting Engineering First Year students in developing skills for successful completion of engineering course work. Building a supportive learning community, assisting students in developing positive attitudes and productive behaviors resulting in both academic and personal success, and informing students of the resources available for maintaining their academic and personal wellness. Corequisite: Drill component and MATH 1204 or MATH 1203 or MATH 1284. Prerequisite: Engineering First Year student only.

GNEG 1301H. Honors Research Colloquium. 1 Hour.
Exploration of topics and processes associated with academic research in the engineering profession. Offered to a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1301H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603.

GNEG 1311H. Honors Research Experience I. 1 Hour.
An initial undergraduate research experience for a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1311H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603.

GNEG 1321H. Honors Research Experience II. 1 Hour.
Continuation of GNEG 1311H culminating with the annual Freshman Engineering Program Honors Research Symposium. Pre- or Corequisite: MATH 2564. Prerequisite: GNEG 1311H.

GNEG 1401H. Honors Innovation Colloquium. 1 Hour.
Exploration of topics and processes associated with innovation, entrepreneurship, and design in the engineering profession. Offered to a select group of Engineering First Year students enrolled in the Honors College. Corequisite: Drill component, GNEG 1411H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603.

GNEG 1411H. Honors Innovation Experience I. 1 Hour.
An initial undergraduate innovation experience for a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1111H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603.

GNEG 1421H. Honors Innovation Experience II. 1 Hour.
Continuation of GNEG 1411H. Pre- or Corequisite: MATH 2564. Prerequisite: GNEG 1411H and honors standing.

GNEG 1503. Pre-Engineering Applications of Mathematics. 3 Hours.
Overview of the basic algebra and trigonometry skills used in engineering. All topics are motivated by engineering applications. Prerequisite: Departmental consent.

GNEG 1514. Engineering Applications of Mathematics. 4 Hours.
Overview of the mathematics topics heavily used in sophomore-level engineering courses. Topics include algebraic analysis, trigonometry, vectors and complex numbers, sinusoids and harmonic signals, systems of equations and matrices, differentiation, integration, and differential equations. All topics motivated by engineering applications. Usage of mathematical analysis software is emphasized. Prerequisite: (MATH 1203 or MATH 1204) or a score of 80% or better on the Preparedness for Algebra Exam or a score of at least 23 on the math component of the ACT or a score of at least 540 on the math component of the old SAT or 570 on the new SAT.

GNEG 190V. Special Topics. 1-5 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent.

GNEG 290V. Special Topics. 1-5 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent.
GNEG 3103. Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 4103 or 5103.

GNEG 3103H. Honors Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 4103 or 5103.

This course is equivalent to GNEG 3103.

GNEG 3113. Special Topics-Study Abroad. 3 Hours.
Students travel abroad to gain a global perspective on a particular facet of the engineering discipline. Students are required to complete pre-travel investigative or background assignments, participate in all activities of the actual trip and will produce a post travel reflective or comparative product relative to the special topic. Prerequisite: Instructor's consent. May be repeated for up to 9 hours of degree credit.

GNEG 3801. Parallel Cooperative Education. 1 Hour.
Part time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Credit may not be applicable to degree programs in engineering. Prerequisite: Instructor permission.

GNEG 3811. Alternating Cooperative Education. 1 Hour.
Full time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Application of credit to a degree program is at the discretion of the department owning the degree program. Prerequisite: Instructor consent.

GNEG 390V. Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. May be repeated for up to 4 hours of degree credit.

GNEG 390VH. Honors Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. May be repeated for up to 4 hours of degree credit.

This course is equivalent to GNEG 390V.

GNEG 4103. Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or 5103.

GNEG 4103H. Honors Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or 5103.

This course is equivalent to GNEG 4103.

GNEG 490V. Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. May be repeated for up to 4 hours of degree credit.

GNEG 490VH. Honors Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. May be repeated for up to 4 hours of degree credit.

This course is equivalent to GNEG 490V.

GNEG 5103. Globalization and Innovation. 3 Hours.
Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or 4103.

GNEG 5801. Parallel Cooperative Education. 1 Hour.
Part time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional workplace setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission.

GNEG 5811. Alternating Cooperative Education. 1 Hour.
Full time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional workplace setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission.

GNEG 590V. Special Topics. 1-4 Hour.
Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. May be repeated for up to 4 hours of degree credit.

Geosciences (GEOS)
Courses
GEOS 1111L. General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab). 1 Hour.
Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre- or Corequisite: GEOS 1113.
This course is equivalent to GEOL 1111L.

GEOS 1111M. Honors General Geology Laboratory. 1 Hour.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1113H.
This course is equivalent to GEOL 1111L.

GEOS 1113. General Geology (ACTS Equivalency = GEOL 1114 Lecture). 3 Hours.
Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Lecture 3 hours per week. GEOS 1111L is recommended as a corequisite.
This course is equivalent to GEOL 1113.
GEOS 1133H. Honors General Geology. 3 Hours.
Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1111M. This course is equivalent to GEOL 1113.

GEOS 1123. Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours.
Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities.

GEOS 1131L. Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab). 1 Hour.
Laboratory exercises concerning human interactions with the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal.

GEOS 1133. Earth Science (ACTS Equivalency = GEOL 1124 Lecture). 3 Hours.
The application of earth science principles and knowledge of problems created by human occupancy and exploitation of the physical environment.

Survey of problems, development potential, and physical and human resources of the developing and developed world.

GEOS 2003H. Honors World Regional Geography. 3 Hours.
Survey of problems, development potential, and physical and human resources of the developing and developed world. Prerequisite: Honors candidacy. This course is equivalent to GEOS 2003.

GEOS 2313. Mineralogy and Petrology. 3 Hours.
General principles of mineralogy and petrology, study and identification of common minerals, igneous & metamorphic rocks using hand samples. Corequisite: Lab component. Prerequisite: GEOS 1113 and CHEM 1103.

GEOS 2813. Digital Earth. 3 Hours.
This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications.

GEOS 2813H. Honors Digital Earth. 3 Hours.
This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. Prerequisite: Honors standing.

GEOS 3013. Foundations of Geospatial Data Analysis. 3 Hours.
Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Students may receive credit for the course through testing. Prerequisite: GEOS 3543.

GEOS 3023. Introduction to Cartography. 3 Hours.
Students learn basic principles of map design, cartographic theory and field surveying to produce a variety of computer-generated maps. An introductory course designed for students in a variety of different disciplines using AutoCad software and various new technologies. Field trips may be required.

GEOS 3033. Building Materials Field Studies. 3 Hours.
Study of durable building materials, their availability, strength, deterioration, limitation and utility. Historic construction techniques, identification of architectural materials, architectural elements assessment, causes and mechanisms of deterioration, conservation and treatment of architectural materials, preservation philosophies and standards and creation of a practical field identification kit will also be covered. Corequisite: Lab component.

GEOS 3043. Sustaining Earth. 3 Hours.
Theory and growth of conservation and sustainability, the wise use of the major natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing. This course is cross-listed with GEOS 3043H.

GEOS 3043H. Honors Sustaining Earth. 3 Hours.
Theory and growth of conservation and the wise use of the major natural resources of the United States. This course meets the requirement in conservation for teachers. Prerequisite: Junior standing. This course is cross-listed with GEOS 3043.

GEOS 3052. Geology for Engineers. 2 Hours.
Geologic principles involved in construction, reservoir location, etc. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

GEOS 3062. Geology of Arkansas. 2 Hours.
A survey of the distribution, genesis, and age of the rocks, fossils, structures, landforms and geological processes of Arkansas. Equivalent to two hours of lecture per week. Field trips required. Prerequisite: GEOS 1113 or GEOS 1113H.

GEOS 3103. Geospatial Technologies Computational Toolkit. 3 Hours.
Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Students may receive credit for the course through testing. Prerequisite: GEOS 3543.

GEOS 3114. Invertebrate Paleontology. 4 Hours.
Survey of the invertebrate phyla commonly preserved as fossils emphasizing their physical and biological characteristics. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOL 1133 or (BIOL 1543 and BIOL 1541L) or equivalent.

GEOS 3313. Igneous and Metamorphic Rocks. 3 Hours.
Megascopic study and classification of igneous and metamorphic rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 1113H.

GEOS 3543H. Honors Sustaining Earth. 3 Hours.
Theory and growth of conservation and sustainability, the wise use of the major natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing.

GEOS 3603. Geospatial Technologies Computational Toolkit. 3 Hours.
Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Students may receive credit for the course through testing. Prerequisite: GEOS 3543.

GEOS 3761. Conservation and Sustainability for Teachers. 3 Hours.
A study of natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing.

GEOS 3823. Building Materials Field Studies. 3 Hours.
Study of durable building materials, their availability, strength, deterioration, limitation and utility. Historic construction techniques, identification of architectural materials, architectural elements assessment, causes and mechanisms of deterioration, conservation and treatment of architectural materials, preservation philosophies and standards and creation of a practical field identification kit will also be covered. Corequisite: Lab component.

GEOS 3833. Principles of Landscape Evolution. 3 Hours.
Examines the role of waves, rivers, wind, and tectonics in shaping and modifying the surface of the earth. Considers the way in which an understanding of landscape processes is essential to the effective solution of environmental problems. Lecture 3 hours. May be repeated for up to 3 hours of degree credit.

GEOS 3843. Sedimentary Rocks & Fossils. 3 Hours.
An introductory study of sedimentary rocks and fossils from the standpoint of classification, field and laboratory description, genesis, and preservation. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313.
GEOS 3514. Structural Geology. 4 Hours.
Survey of deformatonal features and their geological significance in the crust of the earth. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052.

GEOS 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. This course is cross-listed with ANTH 3543.

GEOS 3553. Spatial Analysis Using ArcGIS. 3 Hours.
Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patternning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543.

GEOS 3563. Geospatial Data Mining. 3 Hours.
Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 3003 and GEOS 3103 or equivalent.

GEOS 3593. Introduction to Geodatabases. 3 Hours.
Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Prerequisite: GEOS 3543, GEOS 3003 and GEOS 3103.

GEOS 360V. Undergraduate Special Problems. 1-6 Hour.
Library, laboratory, or field research in different phases of geology. May be repeated for up to 6 hours of degree credit.

GEOS 3901. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing.

GEOS 3911. Junior Honors Course. 1 Hour.
Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing.

GEOS 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in geology or geography). May be repeated for degree credit.

GEOS 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

GEOS 4033. Hydrogeology. 3 Hours.
Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514.

GEOS 4043. Geography of the Middle East. 3 Hours.
Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing.

GEOS 4043H. Honors Geography of the Middle East. 3 Hours.
Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing.

This course is equivalent to GEOS 4043.

GEOS 4053. Geomorphology. 3 Hours.
Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052.

GEOS 4063. Principles of Geochemistry. 3 Hours.
Introduction to fundamental principles of geochemistry from historic development to modern concepts. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313.

GEOS 4073. Urban Geography. 3 Hours.
Area patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Prerequisite: Junior standing.

GEOS 4083. Economic Geology. 3 Hours.
Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Prerequisite: GEOS 2313.

GEOS 4093. History and Philosophy of Geography. 3 Hours.
This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas.

GEOS 410V. Special Problems in Geosciences. 1-6 Hour.
Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

GEOS 410VH. Honors Special Problems in Geosciences. 1-6 Hour.
Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

This course is equivalent to GEOS 410V.

GEOS 4113. Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined.

GEOS 4113H. Honors Global Change. 3 Hours.
Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: Honors candidacy.

GEOS 4133. Radar Remote Sensing. 3 Hours.
Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth’s surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent.
GEOS 4153. Karst Hydrogeology. 3 Hours.
Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Prerequisite: GEOS 4033.

GEOS 4223. Stratigraphy and Sedimentation. 3 Hours.
Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Corequisite: Lab component. Prerequisite: GEOS 3413.

GEOS 4233. Geography of Religion & Sacrality. 3 Hours.
Explores the spatial nature of the World's major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Junior or senior standing.

GEOS 4243. Political Geography. 3 Hours.
Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Prerequisite: Junior or senior standing.

GEOS 4253. Petroleum Geology. 3 Hours.
Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Geology major and senior standing.

GEOS 430V. Internship in Physical Geography. 3-6 Hour.
Supervised experience in municipal, county, or private natural resource management agency, or any other such organization approved by instructor.

GEOS 4353. Meteorology. 3 Hours.
Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Prerequisite: Junior standing.

GEOS 4363. Climatology. 3 Hours.
Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Prerequisite: GEOS 1133 or GEOS 4353.

GEOS 437V. Geology Field Trip. 1-2 Hour.
Camping field trip to areas of geologic interest, usually conducted during Spring Break. Prerequisite: GEOS 3313. May be repeated for up to 4 hours of degree credit.

GEOS 4383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. May be repeated for up to 4 hours of degree credit.

GEOS 4383H. Honors Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.
Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. This course is equivalent to GEOS 4383.

GEOS 4393. American Public Lands & Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Junior or senior standing.

GEOS 4393H. Honors American Public Lands & Policy. 3 Hours.
The course examines the role of American federal public lands in 19th-21st century history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Honors standing and Junior or senior standing. This course is equivalent to GEOS 4393.

GEOS 440V. Internship in GIS & Cartography. 3-6 Hour.
Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. May be repeated for up to 6 hours of degree credit.

GEOS 4413. Principles of Remote Sensing. 3 Hours.
Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. Prerequisite: GEOS 3023 or GEOS 3543.

GEOS 4433. Geophysics. 3 Hours.
Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514.

GEOS 4443. The Solid Earth: Structure, Composition and Evolution. 3 Hours.
Modern views of the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: CHEM 1123, GEOS 3313, MATH 2564, PHYS 2074 or instructor consent.

This course is cross-listed with GEOS 5443.

GEOS 4463. 3D Seismic Exploration. 3 Hours.
Interpretation of the spatial component of three-dimensional seismic data in geologic structure and stratigraphy with emphasis on hydrocarbon exploration. Prerequisite: GEOS 3514 or instructor consent.

GEOS 4473. Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment.

GEOS 4473H. Honors Applied Climatology. 3 Hours.
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. This course is equivalent to GEOS 4473.

GEOS 4483. Severe Weather. 3 Hours.
Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Prerequisite: GEOL 1133 and GEOL 1131L.

GEOS 4493. Geography of Political Violence. 3 Hours.
This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextually-informed understanding of the international system and how it is shaped by civil war. Pre- or Corequisite: INST 2013. Prerequisite: Junior or senior standing.
GEOS 4493H. Honors Geography of Political Violence. 3 Hours.
This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextually-informed understanding of the international system and how it is shaped by civil war. Pre- or Corequisite: INST 2013. Prerequisite: Junior or senior standing and honors standing.

GEOS 4503. Advanced Cartographic Techniques & Production. 3 Hours.
Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523.

GEOS 4513. Introduction to GIS Programming. 3 Hours.
This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using ArcGIS through programming ArcObjects in VBA / VA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability to develop customized ArcGIS applications.

GEOS 4523. Cartographic Design and Production. 3 Hours.
This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Prerequisite: GEOS 3023.

GEOS 4533. Introduction to Petroleum Geophysics. 3 Hours.
Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent.

GEOS 4533H. Honors Introduction to Petroleum Geophysics. 3 Hours.
Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent.

GEOS 4553. Introduction to Raster GIS. 3 Hours.
Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Prerequisite: GEOS 3543 or ANTH 3543.
This course is cross-listed with ANTH 4553.

GEOS 4563. Geology of Our National Parks. 3 Hours.
This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOL 1113.

GEOS 4563H. Honors Geology of Our National Parks. 3 Hours.
This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOL 1113.
This course is equivalent to GEOS 4563.

GEOS 4583. Vector GIS. 3 Hours.
Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Prerequisite: GEOS 3023 or GEOS 3543.
This course is cross-listed with ANTH 4563.

GEOS 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Prerequisite: GEOS 3543 or GEOS 5543.
This course is cross-listed with ANTH 4593.

GEOS 4643. Introduction to Internet GIS. 3 Hours.
This course introduces Internet computing and Web GIS and offers hands-on tutorials in customized applications using ArcGIS Server JavaScript API. Topics covered include Internet protocols and Web standards, Web services, and fundamental routines and functions in ArcGIS server development. Students will have the capability to develop customized ArcGIS server applications. Prerequisite: GEOS 4513 or equivalent.

GEOS 4653. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. This course is cross-listed with ANTH 4653.

GEOS 4653H. Honors GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. This course is cross-listed with GEOS 4653, ANTH 4653.

GEOS 4663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.
Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geochemistry. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L.

GEOS 4673. Volcanology. 3 Hours.
A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313.
This course is cross-listed with GEOS 5673.

GEOS 4683. Geology Field Camp. 6 Hours.
A professional course taught off campus emphasizing occurrence, description, mapping, and interpretation of major rock types. May not be taken for graduate credit. Prerequisite: GEOS 3413 and GEOS 3514.
GEOS 4693. Environmental Justice. 3 Hours.
This course deals with the ethical, environmental, legal, economic, and social implications of society’s treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. This course is cross-listed with GEOS 4693H, SUST 4693.

GEOS 4693H. Honors Environmental Justice. 3 Hours.
This course deals with the ethical, environmental, legal, economic, and social implications of society’s treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. This course is cross-listed with GEOS 4693, SUST 4693.

GEOS 4783. Geography of Europe. 3 Hours.
Geographic regions of the area with emphasis on their present development. Prerequisite: Junior standing.

GEOS 4793. Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LiDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: GEOS 4413 and GEOS 4593 or equivalent.

GEOS 4793H. Honors Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LiDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: Honors standing, GEOS 4413 and GEOS 4593 or equivalent. This course is equivalent to GEOS 4793.

GEOS 481V. Cooperative Education Program. 1-6 Hour.
Credit for off-campus, compensated work experience related to geology arranged through the Cooperative Education Office and Department of Geology. May be repeated for degree credit.

GEOS 4863. Quantitative Techniques in Geosciences. 3 Hours.
An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. This course is cross-listed with ANTH 4863.

GEOS 4873. Geological Data Analysis. 3 Hours.
Quantitative methods and techniques for analysis and interpretation of geological data. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514.

GEOS 4924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.
Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOL 3514. This course is equivalent to GEOL 4924.

GEOS 4933. Ancient Forest Science and Sustainability. 3 Hours.
Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources.

GEOS 4972H. Senior Honors Course I. 2 Hours.
Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors.

GEOS 4982H. Senior Honors Course II. 2 Hours.
Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors.

GEOS 4993. Dynamics of Sediment Transport. 3 Hours.
This is a course focused on how fluids transport sediment and construct stratigraphy. Lectures will develop environmental fluid mechanics and sediment transport from first principles so they can be used to evaluate sedimentological and stratigraphic problems. This framework will be applied to a sedimentological problem using original data and analysis. Pre- or Corequisite: GEOS 4223. Prerequisite: GEOS 3413.

GEOS 5003. Seminar in Geography. 3 Hours.
Selected topics, the nature of which varies with the need. Prerequisite: Graduate standing. May be repeated for up to 3 hours of degree credit.

GEOS 5011. Colloquium. 1 Hour.
Weekly meetings of faculty, graduates, advanced students and guests to discuss research and trends in the field of geography. May be repeated for up to 2 hours of degree credit.

GEOS 5023. Technical and Proposal Writing for the Geosciences. 3 Hours.
Preparation of technical reports, research proposals, and manuscripts for publication in the area of geosciences.

GEOS 5033. Advanced Vector Geographic Information Systems. 3 Hours.
Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: (ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent).

GEOS 5043. Foundations of Geospatial Data Analysis. 3 Hours.
Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Pre- or Corequisite: GEOS 5543.

GEOS 5053. Quaternary Environments. 3 Hours.
An interdisciplinary study of the Quaternary Period, including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Graduate standing. This course is cross-listed with ANTH 5053, ENDY 5053.

GEOS 5073. Geospatial Technologies Computational Toolkit. 3 Hours.
Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Pre- or Corequisite: GEOS 5543.

GEOS 5083. Geospatial Data Mining. 3 Hours.
Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 5043 and GEOS 5073 or equivalent.
GEOS 5093. History and Philosophy of Geography. 3 Hours.
This course familiarizes students with the history of geography, the contributions of
geographers to scientific thought and theory, and research techniques that are
used in geography. Emphasis is given to the integration of statistical and spatial
analysis, and their applications in field research. The course includes short field-
based projects in and around Northwest Arkansas.

GEOS 510V. Special Problems in Physical Geosciences. 1-6 Hour.
Special problems in Geosciences. Prerequisite: Graduate standing. May be repeated
for up to 6 hours of degree credit.

GEOS 5113. Global Change. 3 Hours.
Examines central issues of global change including natural and human induced
climate change, air pollution, deforestation, desertification, wetland loss urbanization,
and the biodiversity crisis. The U.S. Global Change Research Program is also
examined. This course is cross-listed with ENDY 5113.

GEOS 5123. Stratigraphic Principles and Practice. 3 Hours.
Physical and biological characteristics of sedimentary environments and their
correlation in time with emphasis on the local geologic section. Corequisite: Lab
component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223).

GEOS 5133. Radar Remote Sensing. 3 Hours.
Introduction to radar remote sensing and its applications in geology, geography,
archeology, engineering, and agriculture. Focuses on Synthetic Aperture
Radar (SAR) and advanced techniques including radar stereo, polarimetry, and
interferometry. Covers Interferometric SAR (InSAR) for mapping topography and
modeling Earth's surface motions due to earthquakes, volcanic eruptions, landslides,
and subsidence. Prerequisite: GEOS 3023 or equivalent.

GEOS 5143. 3D Seismic Exploration. 3 Hours.
(Formerly GEOS 4463.) Interpretation of 3D seismic data for geological structure,
stratigraphy, and pore fluid variations with emphasis on hydrocarbon exploration.
Credit will not be given for both GEOS 4463 and GEOS 5143. Prerequisite:
GEOS 4463 or GEOS 5433 (formerly GEOS 4433).

GEOS 5153. Environmental Site Assessment. 3 Hours.
Principles, problems, and methods related to conducting an environmental
site assessment. An applied course covering field site assessment, regulatory
documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263
(formerly 4033).

GEOS 5163. Hydrogeologic Modeling. 3 Hours.
Topics include numerical simulation of ground water flow, solute transport,
aqueous geochemistry, theoretical development of equations, hypothesis testing of
conceptual models, limitations of specific methods, and error analysis. Emphasis on
practical applications and problem solving. Prerequisite: GEOS 4033 or GEOS 5263
(formerly 4033) and computer literacy.

GEOS 5173. Urban Geography. 3 Hours.
(Formerly GEOS 4073.) Areal patterns of modern urban regions and the focus
shaping these patterns. Emphasis is placed on American urban areas and their
evolution and functional areas. Field work. Graduate degree credit will not be given
for both GEOS 4073 and GEOS 5173.

GEOS 5183. Geography of the Middle East. 3 Hours.
(Formerly GEOS 4043.) Physical and cultural landscapes, natural and cultural
resources, art and architecture, land use, political history, OPEC, and current
problems of North Africa and the Middle East region west of Afghanistan are
discussed. Class participation, discussions, slides and films, and student
presentations will round out the class. Graduate degree credit will not be given for
both GEOS 4043 and GEOS 5183.

GEOS 5196. Advanced Field Methods of Applied Hydrogeology. 6 Hours.
Applied field course emphasizing collection and interpretation of ground water
data. Three hours may be applied toward an M.S. degree in geology. Prerequisite:
GEOS 4033 or GEOS 5263 (formerly 4033).

GEOS 520V. Special Problems in Human Geography. 1-6 Hour.
Special problems in human geography. Prerequisite: Graduate standing. May be
repeated for up to 6 hours of degree credit.

GEOS 5213. Principles of Remote Sensing. 3 Hours.
Fundamental concepts of remote sensing of the environment. Optical, infrared,
microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing
of vegetation, water, urban landscapes, soils, minerals, and geomorphology is
discussed. The course includes laboratory exercises in GIS software and field
spectroscopy.

GEOS 5223. Sedimentary Petrology. 3 Hours.
Sediments and sedimentary rocks. Lecture 2 hours, laboratory 2 hours per week.
Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly
GEOS 4223).

GEOS 5233. Geography of Religion & Sacratity. 3 Hours.
Explores the spatial nature of the World's major faiths and religious institutions,
ocusing on the distribution and origins of these religions. Examines the religious
beliefs, rituals, architecture, demographics, and art in different societies, cultures,
and countries. Considers the tenets and practices of what is sacred and/or spiritual,
held in common by a group or community. Prerequisite: Graduate standing.

GEOS 5243. Political Geography. 3 Hours.
(Formerly GEOS 4243.) Contemporary world political problems in their geographic
context. Development of the principles of political geography with emphasis upon the
problems of Eastern Europe, Africa, and Southeast Asia. Graduate degree credit will
not be given for both GEOS 4243 and GEOS 5243.

GEOS 5253. Geomorphology. 3 Hours.
(Formerly GEOS 4053.) Mechanics of landform development. Lecture 2 hours,
laboratory 3 hours per week. Several local field trips are required during the
semester. Graduate degree credit will not be given for both GEOS 4053 and
GEOS 5253.

GEOS 5263. Hydrogeology. 3 Hours.
(Formerly GEOS 4033.) Occurrence, movement, and interaction of water with
geologic and cultural features. Lecture 3 hours per week. Graduate degree credit will
not be given for both GEOS 4033 and GEOS 5263. Corequisite: Lab component.
Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514.

GEOS 5273. Principles of Geochemistry. 3 Hours.
(Formerly GEOS 4063.) Introduction to fundamental principles of geochemistry from
historic development to modern concepts. Graduate degree credit will not be given
for both GEOS 4063 and GEOS 5273. Corequisite: Lab component. Prerequisite:
CHEM 1121L, CHEM 1123 and GEOS 2313.

GEOS 5283. Economic Geology. 3 Hours.
(Formerly GEOS 4083.) Introduction to mineral deposits used as economic
resources. Covers basic geology and geochemistry of mineral deposit formations
and the formation of major classes of deposits. Examines the relationship between
the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental
issues associated with the extraction of earth resources. Graduate degree credit will
not be given for both GEOS 4083 and GEOS 5283. Prerequisite: GEOS 2313.
GEOS 5293. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours. 
(Formerly GEOS 4593.) Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Graduate degree credit will not be given for both GEOS 4593 and GEOS 5293.
This course is cross-listed with ANTH 5593.

GEOS 530V. Special Problems in Regional Geography. 1-6 Hour. Special problems in regional geography. Prerequisite: Graduate standing.

GEOS 5313. Planetary Atmospheres. 3 Hours. 
Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, comparative planetology of atmospheres.

GEOS 5323. Stratigraphy and Sedimentation. 3 Hours. 
(Formerly GEOS 4223.) Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Graduate degree credit will not be given for both GEOS 4223 and GEOS 5323. Corequisite: Lab component. Prerequisite: GEOS 3413.

GEOS 5333. Research Methods and Materials in Geography. 3 Hours. 
Geographical research and the preparation of research papers. Prerequisite: Graduate standing.

GEOS 534V. Internship in Physical Geography. 3-6 Hour. 
(Formerly GEOS 430V.) Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. Graduate degree credit will not be given for both GEOS 430V and GEOS 534V.

GEOS 5353. Meteorology. 3 Hours. 
(Formerly GEOS 4353.) Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Graduate degree credit will not be given for both GEOS 4353 and GEOS 5353.

GEOS 5363. Climatology. 3 Hours. 
(Formerly GEOS 4363.) Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Graduate degree credit will not be given for both GEOS 4363 and GEOS 5363.

GEOS 537V. Geology Field Trip. 1-2 Hour. 
(Formerly GEOS 437V.) Camping field trip to areas of geologic interest, usually conducted during Spring Break. Graduate degree credit will not be given for both GEOS 437V and GEOS 537V. Prerequisite: GEOS 3313. May be repeated for up to 4 hours of degree credit.

GEOS 5383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours. 
(Formerly GEOS 4383.) Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Graduate degree credit will not be given for both GEOS 4383 and GEOS 5383. May be repeated for up to 6 hours of degree credit.

GEOS 5393. Mathematical Modeling of Geological Processes. 3 Hours. 
This course explores a variety of topics in applied mathematics and computational methods within the context of studying geological processes and from the perspective of a modeling practitioner. Programming is conducted in Python. Knowledge of Calculus II is necessary.

GEOS 5403. American Public Lands and Policy. 3 Hours. 
The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America’s national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Graduate standing.

GEOS 5413. Planetary Geology. 3 Hours. 
Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary crusts, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets.

GEOS 5423. Remote Sensing of Natural Resources. 3 Hours. 
Introductory digital image processing of remotely sensed data. Topics include data collection, laboratory design, scientific visualization, radiometric and geometric correction, enhancement, pattern recognition, artificial intelligence, and change detection in natural resource remote sensing. GIS-based exercises and a course project are included. Prerequisite: GEOS 4413 or GEOS 5213.

GEOS 5433. Geophysics. 3 Hours. 
(Formerly GEOS 4433.) Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4433 and GEOS 5433. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514.

GEOS 5443. The Solid Earth. 3 Hours. 
Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: GEOS 3313, MATH 2564, CHEM 1123, PHYS 2074 or instructor consent.
This course is cross-listed with GEOS 4443.

GEOS 5453. Introduction to Raster GIS. 3 Hours. 
(Formerly GEOS 4553.) Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Graduate degree credit will not be given for both GEOS 4553 and GEOS 5453.
This course is cross-listed with ANTH 5553.

GEOS 5463. Microtectonics. 3 Hours. 
Focuses on the microstructural evolution of tectonite rocks and the constraints that can be gleaned from optical microscopic evaluation of rocks in petrographic thin-sections and hand samples. Results are evaluated in the context of plate tectonic theory and geodynamics. Knowledge of mineralogy and petrology equivalent to GEOS 2313 is required. Pre- or Corequisite: GEOS 5556. Corequisite: Lab component.

GEOS 5473. Applied Climatology. 3 Hours. 
Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment.

GEOS 5483. Severe Weather. 3 Hours. 
(Formerly GEOS 4483.) Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Graduate degree credit will not be given for both GEOS 4483 and GEOS 5483.
GEOS 550V. Internship in GIS & Cartography. 3-6 Hour.
(Formerly GEOS 440V.) Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. Graduate degree credit will not be given for both GEOS 440V and GEOS 550V. May be repeated for up to 6 hours of degree credit.

GEOS 5513. Introduction to GIS Programming. 3 Hours.
This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using Arc GIS through programming ArcObjects in VBA/VA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability to develop customized ArcGIS applications.

GEOS 5523. Cartographic Design & Production. 3 Hours.
(Formerly GEOS 4523.) This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Graduate degree credit will not be given for both GEOS 4523 and GEOS 5523.

GEOS 5533. Introduction to Petroleum Geophysics. 3 Hours.
(Formerly GEOS 4533.) Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Credit will not be given for both GEOS 4533 and GEOS 5533. Prerequisite: MATH 2564, PHYS 2033, and GEOL 3514 or consent of instructor.

GEOS 5543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others.

GEOS 5553. Spatial Analysis Using ArcGIS. 3 Hours.
Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543 or GEOS 5543.

GEOS 5563. Tectonics. 3 Hours.
Development of ramifications of the plate tectonics theory. Analysis of the evolution of mountain belts. Lecture 3 hours per week. Prerequisite: GEOS 3514.

GEOS 5573. Advanced Cartographic Techniques & Production. 3 Hours.
Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523 or GEOS 5523.

GEOS 5583. Vector GIS. 3 Hours.
(Formerly GEOS 4583.) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Graduate degree credit will not be given for both GEOS 4583 and GEOS 5583. This course is cross-listed with ANTH 5563.

GEOS 5593. Introduction to Geodatabases. 3 Hours.
Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Course will use PostGIS, ESRI File Geodatabases, and MS-SQL. Prerequisite: GEOS 3543 and GEOS 3103 or equivalent.

GEOS 560V. Graduate Special Problems. 2-6 Hour.
Library, laboratory, or field research in different phases of geology. May be repeated for up to 4 hours of degree credit.

GEOS 5612. Research Methods in Geosciences. 2 Hours.
Survey of research methodologies used in both geology and geography, with an emphasis on quantitative analysis. Preparation of research proposals and presentations in the field of geosciences. Prerequisite: Graduate standing.

GEOS 5643. Introduction to Internet GIS. 3 Hours.
This course introduces Internet computing and Web GIS and offers hands-on tutorials in customized applications using ArcGIS Server Java Server API. Topics covered include Internet protocols and Web standards, Web services, and fundamental routines and functions in Arc GIS server development. Students will have the capability to develop customized ArcGIS server applications. Prerequisite: GEOS 5513 or equivalent.

GEOS 5653. GIS Analysis and Modeling. 3 Hours.
(Formerly GEOS 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Graduate degree credit will not be given for both GEOS 4653 and GEOS 5653. This course is cross-listed with ANTH 5653, ENDY 5043.

GEOS 5663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.
(Formerly GEOS 4663.) Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Credit will not be given for both GEOS 4663 and GEOS 5663. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOL 1111L.

GEOS 5673. Volcanology. 3 Hours.
A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2513. This course is cross-listed with GEOS 4673.

GEOS 5693. Environmental Justice. 3 Hours.
(Formerly GEOS 4693.) This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. Credit will not be given for both GEOS 4693 and GEOS 5693.

GEOS 5713. Geology of Our National Parks. 3 Hours.
(Formerly GEOS 4563.) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Credit will not be given for both GEOS 4563 and GEOS 5713. Prerequisite: GEOS 1113.

GEOS 5743. Petroleum Geology. 3 Hours.
(Formerly GEOS 4253.) Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4253 and GEOS 5743. Corequisite: Lab component. Prerequisite: Admission to the Geology graduate program.
GEOS 5753. Karst Hydrogeology. 3 Hours.
(Formerly GEOS 4153.) Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Graduate degree credit will not be given for both GEOS 4153 and GEOS 5753. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033).

GEOS 5783. Geography of Europe. 3 Hours.
(Formerly GEOS 4783.) Geographic regions of the area with emphasis on their present development. Graduate degree credit will not be given for both GEOS 4783 and GEOS 5783.

GEOS 5793. Geospatial Unmanned Aircraft Systems. 3 Hours.
Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LiDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: (GEOS 4413 or GEOS 5213 (formerly GEOS 4413)) and (GEOS 4593 or GEOS 5293 (formerly GEOS 4593)) or equivalent.

GEOS 5853. Environmental Isotope Geochemistry. 3 Hours.
Introduction to principles of isotope fractionation and distribution in geologic environments, isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation; paleothermometry soil, and biogeochemical processes. May be repeated for up to 3 hours of degree credit. This course is cross-listed with ENDY 5853.

GEOS 5863. Quantitative Techniques in Geosciences. 3 Hours.
(Formerly GEOS 4863.) An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. Graduate degree credit will not be given for both GEOS 4863 and GEOS 5863. This course is cross-listed with ANTH 5863.

GEOS 5873. Geological Data Analysis. 3 Hours.
(Formerly GEOS 4873.) Quantitative methods and techniques for analysis and interpretation of geological data. Credit will not be given for both GEOS 4873 and GEOS 5873. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514.

GEOS 5924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.
(Formerly GEOS 4924.) Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Credit will not be given for both GEOS 4924 and GEOS 5924. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514.

GEOS 5933. Ancient Forest Science and Sustainability. 3 Hours.
Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources.

GEOS 5993. Dynamics of Sediment Transport. 3 Hours.
The course will give aspiring geologists and civil engineers tools for solving sedimentological problems in their fields. Starting from a grounding in fluid mechanics, we will learn how sediment is transported and stratigraphy accumulated. This will be applied to problems in sedimentology at all scales.

GEOS 600V. Master's Thesis. 1-6 Hour.
Master's thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

GEOS 6013. Seminar in Geoinformatics. 3 Hours.
Geographic information science and technology research topics of particular interest to the graduate student class. May be repeated for up to 9 hours of degree credit.

GEOS 700V. Doctoral Dissertation. 1-9 Hour.
Dissertation research. Prerequisite: Graduate standing and Ph.D. candidacy. May be repeated for degree credit.

German (GERM)

Courses
GERM 1003. Elementary German I (ACTS Equivalency = GERM 1013). 3 Hours.
Elementary German I.

GERM 1013. Elementary German II (ACTS Equivalency = GERM 1023). 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.

Continued development of basic speaking comprehension and writing skills and intensive development of reading skills.

GERM 3003. Advanced German I. 3 Hours.
Development of reading, writing, listening, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 2013.

GERM 3013. Introduction to Literature. 3 Hours.
Development of reading skills and introduction to literary analysis. Prerequisite: GERM 2013 or equivalent.

GERM 3033. Conversation. 3 Hours.
Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: GERM 2013 or instructor consent.

GERM 3063. Ph.D. Reading Requirement I. 3 Hours.
Ph.D. reading requirement I.

GERM 399VH. Honors German Course. 1-6 Hour.
Honors german. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

GERM 4003. Advanced German II. 3 Hours.
Further development of reading, writing, listening, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 2013.

GERM 4013. Germany and the Holocaust: The Significance of the Holocaust in Differentiated Contexts. 3 Hours.
Taught in English. Topics covering the role of the Holocaust in German history, culture, art, language and German Studies. Equal emphasis will be placed on historical competence and philosophical/theoretical inquiry, addressed from a variety of media and primary and secondary sources. May be repeated for up to 6 hours of degree credit.

GERM 4043. German Cinema. 3 Hours.
Presents a range of German films in cultural-historical context; vocabulary and structures for discussing film, film history, and film theory in German. Prerequisite: GERM 3003.

GERM 4123. The German Novella. 3 Hours.
An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013.

GERM 4133. The German Drama. 3 Hours.
A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013.
GERM 4143. German Lyric Poetry. 3 Hours.
A study of the forms and themes of German lyric poetry from the middle ages to the present. Prerequisite: GERM 3013. This course is cross-listed with GERM 5143.

GERM 4213. German Civilization. 3 Hours.
German civilization. Prerequisite: GERM 3003 or equivalent.

GERM 4333. Professional German I. 3 Hours.
Introduces students to the language of German used in the workplace and provides insights into business practices in German-speaking countries. Follows a project based approach and covers aspects of professional presentations, team assignments, business correspondence, resume writing and job application. Open to all majors; no business prerequisites. Prerequisite: GERM 3003, 3013, or consent of the instructor. May be repeated for up to 6 hours of degree credit.

GERM 470V. Special Topics. 1-3 Hour.
May be offered in a topic not specifically covered by courses otherwise listed. May be repeated for up to 6 hours of degree credit.

GERM 475V. Special Investigations. 1-6 Hour.
Special investigations. May be repeated for degree credit.

GERM 5123. The German Novella. 3 Hours.
An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013.

GERM 5133. The German Drama. 3 Hours.
A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013.

GERM 5143. German Lyric Poetry. 3 Hours.
A study of the forms and themes of German lyric poetry from the middle ages to the present. Prerequisite: GERM 3013. This course is cross-listed with GERM 4143.

GERM 5223. Early German Literature: Middle Ages to the Enlightenment. 3 Hours.
Early German literature.

GERM 5273. German Literature: Enlightenment, Storm and Stress, and Classicism. 3 Hours.
German literature.

GERM 5343. Early Modern German Literature: Late 19th and Early 20th Century. 3 Hours.
Early modern German literature.

GERM 5363. German Literature after 1945. 3 Hours.
German literature after 1945.

GERM 5703. Special Topics. 3 Hours.
May be offered in a subject not specifically covered by the courses otherwise listed. May be repeated for up to 6 hours of degree credit.

Greek (GREK) Courses

GREK 1003. Elementary Ancient Greek I. 3 Hours.
The rudiments of classical Greek, with concentration on grammar, vocabulary, and syntax. Short selections from ancient authors lead to basic reading ability.

GREK 1013. Elementary Ancient Greek II. 3 Hours.
A continuation of the rudiments of classical Greek, with concentration on grammar, vocabulary, and syntax. Short selections from ancient authors lead to basic reading ability.

GREK 1203. Beginning Modern Greek I. 3 Hours.
Conversational language of Greece today. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Leads to active mastery of basic grammar and limited reading ability.

GREK 1213. Beginning Modern Greek II. 3 Hours.
A continuation of GREK 1203. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Leads to active mastery of basic grammar and limited reading ability.

GREK 2003. Intermediate Ancient Greek I. 3 Hours.
Ancient Greek grammar and syntax, with readings in Greek prose. Prerequisite: GREK 1013 or equivalent.

GREK 2013. Homer. 3 Hours.
Selections from the Iliad or the Odyssey: a survey of Greek epic poetry. Prerequisite: GREK 2003 or equivalent.

GREK 2203. Intermediate Modern Greek I. 3 Hours.
Continuation of Beginning Modern Greek. Prerequisite: GREK 1203 and GREK 1213, or equivalent.

GREK 2213. Intermediate Modern Greek II. 3 Hours.
Continuation of Intermediate Modern Greek I. Prerequisite: GREK 2203 or equivalent.
GREK 4003. Greek Lyric Poetry. 3 Hours.
Readings from selected Greek lyric poems, to be chosen from several appropriate authors from the 7th through the 5th centuries BCE: Archilochus, Hipponax, Sappho, Alcaeus, Tyrtaios, Minnemus, Semonides, Solon, Xenophanes, Theognis, Pindar, Bacchylides. Prerequisite: GREK 2013 or equivalent.

GREK 4013. Greek Epic Poetry. 3 Hours.
Study of the primary works of Greek hexameter poetry, including Homer, Hesiod, and/or the Homeric Hymns, with special attention to issues of oral composition and performance. Prerequisite: GREK 2013.

GREK 4023. Greek Philosophy. 3 Hours.
Study of representative works of Greek philosophy, including those of the Pre-Socratics, Plato, and/or Aristotle. Prerequisite: GREK 2013 or equivalent.

GREK 4033. Herodotus or Thucydides. 3 Hours.
Readings of Herodotus, Book VII, and Thucydides, Book VI; collateral readings on the Persian and Peloponnesian Wars. Prerequisite: GREK 2013 or equivalent.

GREK 4043. Greek Drama. 3 Hours.
Readings of 2 tragedies and one comedy; a study of the Greek theatre. Prerequisite: GREK 2013 or equivalent.

GREK 4053. Greek Syntax and Composition. 3 Hours.
Greek syntax and composition. Prerequisite: GREK 2013 or equivalent.

GREK 4063. Hellenistic Poetry. 3 Hours.
Selections from significant post-classical authors, including Callimachus, Theocritus, Bion, Moschus, Herondas, Apollonius of Rhodes, and/or poets of the Greek Anthology. Special attention to archaic and classical influences, contemporary Hellenistic culture, and Roman responses. Prerequisite: GREK 2013.

GREK 4073. Ancient Greek Novel. 3 Hours.
Study of the development of the Greek novel including the works of Lucian, Longus, Heliodorus, and/or Achilles Tatius. Prerequisite: GREK 2013 or equivalent.

GREK 4083. Greek Epigraphy. 3 Hours.
Study of inscriptions, especially Attic, in their historical and social contexts, from the 8th century BCE to the Hellenistic/Roman period. Training in epigraphical conventions and symbols. Prerequisite: GREK 2013 or equivalent.

GREK 4093. Biblical and Patristic Greek. 3 Hours.
Selected readings from appropriate texts, varying by semester, including the Septuagint, New Testament, Apostolic Fathers, and other patristic literature to the 5th century CE. Reading and discussion of selected texts in major genres. Prerequisite: GREK 2013 or equivalent.

GREK 4103. Greek Oratory. 3 Hours.
Readings from selected speeches, to be chosen from one or more appropriate authors: Lysias, Antiphon, Demosthenes, Isocrates, Andocides. Study of sophism and rhetoric of Athens in the 5th and 4th centuries BCE. Prerequisite: GREK 2013 or equivalent.

GREK 475V. Special Investigations. 1-6 Hour.
Special investigations. May be repeated for degree credit.

GREK 575V. Special Investigations. 1-6 Hour.
May be repeated for up to 12 hours of degree credit.

Health, Human Performance and Recreation (HHPR)

Courses

HHPR 5353. Research in Health, Human Performance and Recreation. 3 Hours.
Methods and techniques of research in health, human performance and recreation including an analysis of examples of their use and practice in their application to problems of interest to the student.

HHPR 560V. Workshop. 1-6 Hour.
Workshop.

HHPR 6233. Management in HHPR. 3 Hours.
Deals with principles, procedures, relationships, problems, and current practices in the supervision of health education and kinesiology. Includes management of facilities, programs, personnel, and processes.

HHPR 6333. Measurement in HHPR. 3 Hours.
Competencies for analysis and application of evaluation and measurement in HHPR.

HHPR 689V. Directed Research. 1-6 Hour.
Laboratory investigations, in basic and applied research.

HHPR 699V. Seminar. 1-3 Hour.
Seminar. May be repeated for up to 3 hours of degree credit.

HHPR 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Higher Education (HIED)

Courses

HIED 5003. Overview-American Higher Education. 3 Hours.
A basic course in the study of higher education open to all students seeking careers in colleges and universities. Serves as an introduction to the programs, problems, issues, and trends in higher education.

HIED 5033. Student Affairs in Higher Education. 3 Hours.
Study of origins, functions, and policies in student personnel services in contemporary 2- and 4-year colleges and universities with emphasis on the student and student development.

HIED 5043. Student Development in Higher Education. 3 Hours.
Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities.

HIED 504V. Practicum in Higher Education. 1-6 Hour.
Students are assigned to a department or agency within or outside the university for professional experience under the joint supervision of on-site personnel and university faculty. Periodic meetings are scheduled for evaluation, discussion, and examination of techniques.

HIED 5053. The Community College. 3 Hours.
An overview of the community college. Topics include the history and philosophy of the community college movement, students, curriculum, state and local campus governance, teaching, student personnel work, finance and issues, problems, and trends.

HIED 5063. Diversity in Higher Education (Irregular). 3 Hours.
Broadly explores how sociocultural contexts influence diversity at colleges and universities. Focuses on the responsibilities of higher education leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations.

HIED 5073. Management of Higher Education Institutions. 3 Hours.
Principles and concepts of management and their application in college and university settings.

HIED 5083. History and Philosophy of Higher Education. 3 Hours.
An examination of the history and development of higher education including the study of the philosophy, objectives, and functions of various types of institutions.

HIED 5093. Research in Higher Education and Student Affairs (Sp, Su, Fa). 3 Hours.
This course provides master's students an overview of research and literature applicable to the discipline; teaches students how to understand academic literature and use empirical evidence to inform practices and policies at colleges and universities. Prerequisite: MEd students in the Higher Education Program.
HIED 5103. Higher Education in International Contexts (Irregular). 3 Hours. Explores various systems of higher education around the world. Equips students with the knowledge and skills to work in the increasingly internationalized field of higher education.

HIED 5303. Non-Profit Fundraising. 3 Hours. Non-Profit Fundraising examines the theory and practice of the professional field of fundraising and development, which is dedicated to attracting philanthropic support from constituents for colleges, universities, health organizations, hospitals, non-profit organizations, museums and other philanthropic endeavors.

HIED 5643. Reflective Practice in Higher Education and Student Affairs (Sp, Su, Fa). 3 Hours. Provides students an opportunity to work in a functional area of higher education, reflect on how their experiences inform their career goals as higher education professionals, and learn job search strategies in higher education. May be repeated for up to 6 hours of degree credit.

HIED 574V. Internship. 1-3 Hour. Supervised field experiences in student personnel services, college administration, academic advising, institutional research, development, or other areas of college and university work.

HIED 600V. Master's Thesis. 1-6 Hour. Master's Thesis. May be repeated for degree credit.

HIED 6013. The Professoriate: Problems and Issues. 3 Hours. An examination of the vital issues and trends affecting college faculty personnel with emphasis upon institutional practices and policies.

HIED 6023. Introduction to the Study of Higher Education. 3 Hours. A requirement for all new doctoral and specialist students. Familiarization with writing requirements, library search procedures, library resources, and program requirements. Prerequisite: Admission to Higher Education Ed.D. program.

HIED 605V. Independent Study (Sp, Su, Fa). 1-6 Hour. Provides students with an opportunity to pursue special study in higher education.

HIED 6083. Management Skills for Effective Leadership (Irregular). 3 Hours. Development of management skills that enhance leadership includes understanding yourself, managing yourself, team building, personnel selection, group and individual decision-making, problem solving, managing conflict, developing valid performance appraisal systems, conducting performance appraisal interview, and other topics of current interest. Prerequisite: Doctoral students in Higher Education or permission of the instructor.

HIED 6093. Leading Change (Irregular). 3 Hours. An in-depth examination of leadership, change, and culture in postsecondary education.

HIED 6183. Organization Development and Change in Higher Education (Irregular). 3 Hours. An examination of the theory and practice of organization development as it relates to planned change in colleges and universities.

HIED 6303. Advancement in Higher Education. 3 Hours. Advancement in Higher Education examines the theory and practice of the professional field and function referred to as "institutional advancement", which is dedicated to attracting philanthropic support as well as building attitudinal and behavioral support among key constituents for colleges and universities.

HIED 6333. Curriculum Design in Higher Education (Irregular). 3 Hours. Types of undergraduate curricula and their supporting philosophies; approaches to curricula planning and assessment; curricular reforms; and factors influencing curricular policy making.

HIED 6343. Strategies for Effective College Teaching. 3 Hours. An examination of traditional and innovative instructional strategies for use in college teaching.

HIED 6353. The College and University Presidency. 3 Hours. The course explores the basic elements of the presidency of an academic institution and examines the critical issues facing the college and university presidents/chancellors.

HIED 6423. Trends, Issues and Problems in Higher Education. 3 Hours. A study of the current problems and trends related to the field of higher education.

HIED 6483. Strategic Enrollment Management (Irregular). 3 Hours. An examination of admissions marketing strategies, communications plans, branding, and forecasting as well as how other areas (financial aid, honors, scholarships, and student affairs) contribute to successful recruitment efforts. Other key enrollment management areas of focus for the class include academic records, registration, degree audits, FERPA, student support, and most importantly, retention. Major state and federal legislation that underscores any of these activities will be discussed as well.

HIED 6533. Assessment of Institutional Effectiveness in Higher Education (Irregular). 3 Hours. The course examines the fundamentals of assessment of learning outcomes and institutional effectiveness and introduces assessment as a tool to inform strategic planning and data-driven decision-making in higher education.

HIED 6643. College Students in the United States (Irregular). 3 Hours. Students will engage with the leading theoretical and empirical scholarship related to college students and use this information to engage in class discussion, complete course assignments, consider implications for practice, and contemplate opportunities for new scholarship. Prerequisite: Doctoral student in the Higher Education Program or instructor consent.

HIED 6653. Legal Aspects of Higher Education (Sp, Fa). 3 Hours. An examination of the legal status of higher education in the United States; the rights and responsibilities of educators and students including fair employment; due process; torts liability and contracts; student rights; landmark court decisions; federal and state legislation having an impact on education.

HIED 6663. Finance and Fiscal Management. 3 Hours. Higher education finance and budgeting practices: problems, issues, trends, and policy issues in higher education.

HIED 6683. Governance and Policy Making in Higher Education. 3 Hours. An analysis of governance and policy making affecting the control of colleges and universities. Attention is given to policy generation, governing board supervision, and the impact of institutional, professional, and regional groups as well as community, state, and federal pressures.

HIED 6693. Research Techniques in Higher Education (Irregular). 3 Hours. Techniques of research applicable to Higher Education.

HIED 674V. Internship. 1-6 Hour. Supervised field experiences in student personnel services, college administration, college teaching, institutional research, development, or other areas of college and university work.

HIED 699V. Seminar (Sp, Su, Fa). 1-6 Hour. A series of seminars for specialized study into areas of current significance in postsecondary education, such as leadership and planning; organization, development, and change; human resource development and appraisal; the student in higher education; etc. May be repeated for up to 6 hours of degree credit.

HIED 700V. Doctoral Dissertation (Sp, Su, Fa). 1-18 Hour. Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.
History (HIST)

Courses

HIST 1003. Perspectives in History (Irregular). 3 Hours.
Introduction to the history major and to college life, emphasizing essential collegiate academic skills and the methods and techniques of the professional historian.
Designed for history majors, history minors, and those with an interest in learning skills relevant to history, other humanities, or other social sciences.

HIST 1003H. Honors Perspectives in History (Irregular). 3 Hours.
Introduction to the history major and to college life, emphasizing essential collegiate academic skills and the methods and techniques of the professional historian.
Designed for history majors, history minors, and those with an interest in learning skills relevant to history, other humanities, or other social sciences. Prerequisite: Honors standing.
This course is equivalent to HIST 1003.

HIST 1113. Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113) (Sp, Fa). 3 Hours.
Introduces the major civilizations of the world in their historical context to 1500.

HIST 1113H. Honors Institutions and Ideas of World Civilizations I (Irregular). 3 Hours.
Study of Western and non-Western civilizations.
This course is equivalent to HIST 1113.

HIST 1123. Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123) (Sp, Fa). 3 Hours.
Introduces the major civilizations of the world in their historical context, since 1500.

HIST 1123H. Honors Institutions and Ideas of World Civilizations II (Irregular). 3 Hours.
Study of Western and non-Western civilizations.
This course is equivalent to HIST 1123.

A history of American life encompassing constitutional, political, social, intellectual and economic development from prior to European colonization to 1877.

HIST 2013. History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) (Sp, Su, Fa). 3 Hours.
A history of American life encompassing constitutional, political, social, intellectual and economic development from Reconstruction to the present.

HIST 3003. History of Christianity (Irregular). 3 Hours.
This course surveys the theological, political, and cultural history of Mediterranean Christianity, c. 30-600 CE. Special topics include patristics, Christianity and Empire, and the formation of Christian sacred space.

HIST 300V. Internship in History (Sp, Su, Fa). 1-3 Hour.
Work experience in a historical agency arranged by the student under the guidance of a faculty member. Paper required. May be repeated for up to 6 hours of degree credit.

HIST 3013. Ancient Historians (Fa). 3 Hours.
Survey of ancient historiography from Herodotus (5th c BCE) to Ammianus Marcellinus (4th c CE). Topics covered include the development of ancient history, historical causality, rhetoric and history, military history, historical biography, use of polemic, Roman adaptations of Greek models, and the portrayal of the "other" in history.

HIST 3033. Islamic Civilization. 3 Hours.
A survey of the foundation, evolution, and distinctive character of Islam, with attention to religion, literature, art, architecture, science, and political society. Particular attention given to the development of Islamic doctrines, sectarian movements, and systematic theology. Concludes with a look at Islamic resurgence movements and their place in the contemporary world.

HIST 3043. History of the Modern Middle East. 3 Hours.
Examines the history of the Islamic Middle East from the rise of the Ottoman and Safavid Persian empires up to World War I and then concludes with the issues and patterns of 20th century Middle Eastern political and socio-economic life. Topics include Islam and politics, Arab nationalism, Western imperialism, the Arab-Zionist conflict, petroleum politics, and modernization vs. traditionalism.

HIST 3053. Women, Gender, and Sexuality in Colonial Latin America (Irregular). 3 Hours.
This course examines women, gender, and sexuality in colonial Latin America. It explores the lives of indigenous, Spanish, African, and mixed-race women from all social ranks. A central question is: does the current status of women in Latin America stem from a colonial legacy of gender oppression and sexual repression?.

HIST 3063. Military History (Irregular). 3 Hours.
Survey of the basic principles and problems of strategy, tactics, and military organization from Alexander the Great to the present. Special attention will be given to the operation of these factors in the American Revolution, the Napoleonic Wars, the American Civil War, and World War II.

HIST 3073. Women and Gender in Modern Latin American History (Irregular). 3 Hours.
Examines the role of women in Latin America and the Spanish Caribbean from independence to modern times. Special emphasis will be on women's changing gender roles and expectations as they confronted legal, political, and social institutions.

HIST 3083. Women and Christianity. 3 Hours.
From Paul to the mystics of the late medieval church, this course considers women's religious expression, symbolic action, interaction with holy men, and their relationship with the ecclesiastical hierarchy. Other important questions include women's institutional subordination opportunities for autonomous action.

HIST 3093. Women in U.S. History (Irregular). 3 Hours.
Examines women in U.S. History from the early encounters of North American colonization to the gendered experiences of American women in the present day.

This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time.
This course is cross-listed with AAST 3133.

HIST 3183. Popular Culture in the Caribbean (Irregular). 3 Hours.
History of the Caribbean through a historically-situated analysis of popular culture production, including literature, dance, music, cuisine, film, carnival, television, and sexuality.
This course is cross-listed with AAST 3183.

HIST 3193. The Making of the Modern Caribbean (Fa). 3 Hours.
History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region.
This course is cross-listed with AAST 3193.

HIST 3203. Colonial Latin America (Odd years, Fa). 3 Hours.
An introduction to the social, cultural, and political economic formation of Latin America, during the period from 1492 to the movements for independence.
HIST 3213. Modern Latin America. 3 Hours.
An investigation of the varying courses of modernization in Latin America, covering popular revolution, urban populism and military dictatorship.

HIST 3233. African American History to 1877 (Sp, Fa). 3 Hours.
History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans.

This course is cross-listed with AAST 3233.

HIST 3243. African American History Since 1877 (Sp, Fa). 3 Hours.
The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include, all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present.

This course is cross-listed with AAST 3243.

HIST 3253. The History of Sub-Saharan Africa (Fa). 3 Hours.
Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor.

HIST 3263. History of the American Indian (Fa). 3 Hours.
Survey of North American Indian history from their arrival include pre-Columbian Indian history, the interaction of Indian and white societies, U.S. Government policy, and the role of Indians in modern American culture.

HIST 3273. Agricultural and Rural History of the United States (Irregular). 3 Hours.
The history of U.S. agriculture from the pre-Columbian period through the twenty-first century. Focuses on the social and economic implications of agricultural development and the changing nature of rural life in the late twentieth century.

HIST 3283. U.S. Latinos and Latinas through Film (Sp). 3 Hours.
This course will examine the portrayal of U.S. Latinos and Latinas in Hollywood films and how those images have changed over time. While coverage will extend to the early years of the twentieth century, the chosen films will place particular emphasis on the century's second half, from the Cold War to the modern day.

HIST 3293. History of Popular Culture (Irregular). 3 Hours.
Historical survey of the popular arts in American with emphasis upon 20th century. Principal topics are the history of bestsellers, the theatre, popular music, movies, radio, television, and sports.

HIST 3303. U.S. Immigration History (Sp). 3 Hours.
Examines the migration of ethnic groups into the United States from geographical areas that include Europe, Asia, Africa, and Latin America. Special emphasis will be given to cultural history, and will trace the impact of industrialization, urbanization, class formation, and popular culture on various ethnic groups.

HIST 3313. Latinos and Latinas in the U.S. (Fa). 3 Hours.
Examines the emergence and growth of the Latino population of the United States. A broad survey of the Latino experience will complement more specific case studies focusing on cultural identity and the generational process of acculturation into the American mainstream.

HIST 3323. The West of the Imagination (Irregular). 3 Hours.
The changing image of the American West from the colonial period to the present and how popular impressions have reflected national attitudes and values. Special attention given to the West's portrayal in folklore, literature, art, films, and television.

HIST 3383. Arkansas and the Southwest (Sp, Fa). 3 Hours.
Political, economic, social, and cultural development of Arkansas from the coming of the Indian to the 20th century, with special emphasis on Arkansas as a national and regional component.
HIST 3613. Early National and Antebellum America, 1789-1850 (Irregular). 3 Hours.
Survey of early national and antebellum America emphasizing economic, social, and cultural perspectives. Topics include the impact of westward expansion, slavery, religion, gender, the market economy, and political developments on the new nation.

HIST 3623. Black Movements and Messiahs (Irregular). 3 Hours.
This course will focus on global African history since the Age of Revolutions to the present with special attention to the movements and leaders in various fields who proposed strategies and led movements to advance Africa, Africans and the diaspora.

HIST 3683. Europe in the 19th Century, 3 Hours.
Examines the political, social, and cultural history of Europe during the "long" nineteenth century from the French Revolution of 1789 to the outbreak of the First World War in 1914.

HIST 3693. Europe in the 20th Century, 3 Hours.
Examines the political, social, and cultural history of Europe during the twentieth century from the outbreak of the First World War to the collapse of Communist states in Eastern Europe in 1989.

HIST 3703. Urban History: The Modern Metropolis (Irregular). 3 Hours.
This course explores transformations to major cities from the late-eighteenth century to the present day. Course themes include: industrialization, urban expansion, metropolitan regulation, imperial influence, identity formation, and the city as laboratory for monarchy/democracy/communism/fascism. We consider primary sources, secondary historical scholarship, and the writing of key figures in urban theory.

HIST 3773. Introduction to Early South Asia (Irregular), 3 Hours.
This survey course provides students with an overview of the development of civilization in South Asia (a region encompassing the countries of India, Pakistan, Bangladesh, Nepal and Sri Lanka) from its earliest human occupants through the point of the heyday of the Mughal empire in the early 18th century CE.

HIST 3783. Islam and Early South Asia (Irregular). 3 Hours.
Although Islam originated in Arabia, South Asian countries such as Pakistan, India, and Bangladesh today host among the largest populations of Muslims in the world. This survey course examines the introduction of Islam to South Asia in the 7th century CE and its subsequent development through the mid-18th century.

HIST 3803. Special Topics in Ancient History (Irregular). 3 Hours.
Special topics in ancient history that are not presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3813. Special Topics in African History (Irregular). 3 Hours.
Special topics related to African history which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3823. Special Topics in Asian History. 3 Hours.
Historical topics in Asian history, including the eastern Pacific region, which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3833. Special Topics in European History. 3 Hours.
Historical topics in European history which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3843. Special Topics in Latin American and Caribbean History (Irregular). 3 Hours.
Historical topics in Latin American and Caribbean history which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3853. Special Topics in Middle East History (Irregular). 3 Hours.
Historical topics in the history of the Middle East which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3863. Special Topics in U.S. History (Irregular). 3 Hours.
Historical topics in the history of the United States which are usually not covered in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 3893. History of Brazil. 3 Hours.
Examines the history of Brazil from pre-Columbian roots to present political controversies. Approaches environmental and cultural histories, including indigenous and Afro-Brazilian voices. Students will include primary sources and cultural artifacts, such as music, art, and poetry in their research.

HIST 3923H. Honors Colloquium (Irregular). 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in history). May be repeated for degree credit.

HIST 3963. Art as History (Irregular). 3 Hours.
Explores how historians can use art as historical source and how people have historically interpreted and analyzed art. Focus on art production/interpretation in Early Modern Europe (14th to 18th century), contemporary tastes, and cultural practices informing art production.

HIST 3973H. Honors Methods. 3 Hours.
A practical introduction to historical research and writing. Examines research methods and current theories of interpreting and evaluating the past. Prepares students for honors thesis development and writing. Required for and restricted to history honors students. Prerequisite: Junior standing as honors history major.

HIST 3983. Special Topics. 3 Hours.
Historical topics which are not usually presented in depth in regular courses. May be repeated for up to 9 hours of degree credit.

HIST 399 VH. Honors History Thesis (Sp, Su, Fa). 1-6 Hours.
Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

HIST 4003. Democratic Athens (Irregular). 3 Hours.
History of the Athenian city-state from the sixth century BCE to the end of the fourth. Topics include origins and evolution of democracy, the Persian wars, the rise and fall of the Athenian Empire, and the development of historiography, literature, art, and philosophy during the period.

HIST 4013. Alexander the Great and the Hellenistic World (Irregular). 3 Hours.
A survey of the achievements of Alexander and the culture of the new world he created. The personality and career of Alexander are examined as well as the rich diversity of the Hellenistic world: trade with India, religious syncretism, and the development of Hellenistic science and philosophy.

HIST 4023. Roman Republic (Irregular). 3 Hours.
History of Rome from its origins in the eighth century BCE to the fall of the Republic in the first century BCE. Topics include the sources for Roman history, the development, functioning, and ultimate failure of republican government, the Roman army, and Roman imperialism in Italy and the Mediterranean.

HIST 4033. Roman Empire (Irregular). 3 Hours.
History of Rome from the Emperor Augustus to Constantine, ca. 30 BCE - 337 CE. Topics include the sources for imperial Rome, the organization of imperial government, the provinces of Rome and provincial government, art and literature under the empire, the rise of Christianity, and the conversion of the Empire.

HIST 4043. Late Antiquity and the Early Middle Ages. 3 Hours.
This course examines the political, spiritual, intellectual, and social-economic developments of European history, c. 300-1000 CE. Special topics include the Christianization of the late Roman Empire and Byzantium, as well as the formation of Celtic and Germanic Kingdoms in the West.

HIST 4053. Late Middle Ages. 3 Hours.
This course examines the political, social-economic, intellectual, and spiritual developments of European history, c. 1000-1400 CE. Special topics include monasticism, sacral kingship, the crusades, and the medieval university.
HIST 406V. Independent Study. 1-6 Hour.
Study Abroad project. May be repeated for up to 6 hours of degree credit.

HIST 4073. Renaissance and Reformation, 1300-1600. 3 Hours.
Examines the history of Europe from the end of the Middle Ages through the Renaissance to the Reformation and Counter-Reformation. Special attention is paid to changes in popular piety, political thought, religious representation, and the discovery of the New World.

HIST 4083. Early Modern Europe, 1600-1800. 3 Hours.
 Begins with the upheaval of the reformation, moves through the crisis of the 17th century and culminates with the democratic revolution of the 18th century. Examines the consolidation of the European state system, the propagation of modern science, discovery of overseas worlds, and the advent of the Industrial Revolution.

HIST 4093. The History of African Americans and Social Justice (Irregular). 3 Hours.
Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. This course is cross-listed with AAST 4093.

HIST 4103. Byzantine Empire (Irregular). 3 Hours.
Examines the history and culture of the Byzantine Empire from the reign of Constantine I to the fall of Constantinople in 1453. Topics include the development of Christianity and the schism with the western church, the crusades, and Byzantine influence on Islam, Russia, the Ottomans, and the Renaissance.

HIST 4113. Archaic Greece (Irregular). 3 Hours.
History of Greece from the late Bronze Age to the end of the Persian Wars. This class will focus particularly on the sources involved with reconstructing early Greek history, especially Herodotus and Herodotus, on the development of the Greek city-state or polis, and on the interaction between the Greeks and Near-eastern civilizations during this period, culminating in the wars between the Greeks and the Persian Empire.

HIST 4123. Africa and the Transatlantic Slave Trade (Irregular). 3 Hours.
Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. This course is cross-listed with AAST 4123.

HIST 4133. Society and Gender in Modern Europe. 3 Hours.
Changing values and attitudes toward childhood, family life, sexuality, and gender roles in Europe from the Renaissance to the present. The social impact of the Industrial Revolution, urbanization, demographic change, and the two world wars.

HIST 4143. Intellectual History of Europe Since the Enlightenment. 3 Hours.
A survey of the major developments in European thought and culture since the emergence of Romanticism. Topics include Romanticism, Darwinism, Marxism, and Modernism.

HIST 4163. Tudor-Stuart England, 1485-1714. 3 Hours.
Examines the history of the British Isles from the ascension of Henry VII and the Tudor dynasty until the close of the Stuart Era in 1714. Special attention is given to the English Reformation, the Elizabethan years, the 17th Century Revolutions, and the birth of an overseas Empire.

HIST 4173. The Latin American City (Irregular). 3 Hours.
This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. The course includes an introduction to urban studies concepts, and each semester is organized around a specific set of case studies.

HIST 4183. Great Britain, 1707-1901. 3 Hours.
Examines the history of the British Isles from the 1707 Act of Union between Scotland and England until the death of Queen Victoria in 1901. Special attention is given to the spread of Empire, industrialization, and the political, social, and cultural aspects of the Georgian and Victorian Eras.

HIST 4193. Great Britain, 1901-2001. 3 Hours.
Examines the history of the British Isles from the death of Queen Victoria in 1901 to the re-election of Prime Minister Tony Blair in 2001. Special attention is given to the collapse of the British Empire, the birth of the welfare state, and the challenges inherent in the decline of British world power.

HIST 4203. History of the Holocaust (Irregular). 3 Hours.
Examines the origins, history, and legacies of the European Holocaust. Traces the origins of anti-Semitism in Europe, the rise of Nazism in Germany, the path to genocide during World War II, and the role of victims, perpetrators, rescuers, and bystanders. Considers issues of memory and justice in the postwar era.

HIST 4213. The Era of the French Revolution. 3 Hours.
France from the salons of the Enlightenment to the Napoleonic Wars. The French Revolution will be explored in terms of politics and personalities, ideas and symbols, class and gender relations, and violence and terror.

HIST 4223. France Since 1815. 3 Hours.
Survey of French history from the overthrow of Napoleon to the 5th Republic, with emphasis on French politics, society, and culture.

HIST 4233. The Atlantic World, 1400-1850 (Irregular). 3 Hours.
Explores the political, economic, cultural, and social engagement of Africans, Europeans, and Native Americans across the Atlantic from 1400 to 1850. It uses a comparative lens to understand how interactions between Europe, Africa, and the Americas created enduring ties throughout the Atlantic Basin.

HIST 4243. Germany, 1789-1918 (Irregular). 3 Hours.
Study of German history from the Age of Absolutism to the collapse of the German Empire at the end of the First World War. Special attention is paid to the Enlightenment and Romantic movements; nationalism and the unification of Germany; and evolving conflicts over the political and social order.

HIST 4253. Germany, 1918-1945 (Irregular). 3 Hours.
Study of German history from advent of the Weimar Republic to the end of the Third Reich with emphasis upon the failure of democratic government in the 1920s and the rise and fall of the National Socialist dictatorship.

HIST 4263. Modern Africa. 3 Hours.
Examines the last half-century of Africa’s history, focusing on the last few decades. Introduction of Africa’s colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today.
This course is cross-listed with AAST 4263.

HIST 4273. Comparative Slavery (Irregular). 3 Hours.
Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. This course is cross-listed with AAST 4273.

HIST 4273H. Honors Comparative Slavery (Irregular). 3 Hours.
Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. This course is cross-listed with HIST 4273, AAST 4273.

HIST 4293. Latin American Environmental History. 3 Hours.
Explores the challenges, debates, and ecologies of Latin America in order to understand the historical roots of current environmental crises. It engages a historiography on ecosystems found in the region. Uses environmental history texts and scholarly articles to build a layered and transnational approach.
HIST 4303. Transatlantic Relations, 1919-Present (irregular). 3 Hours.
US-Western European Relations, from the Wilsonian era to the present, covering strategic, economic, and cultural aspects.

HIST 4323. Wars of Religion: From the Crusades to 9/11 (Irregular). 3 Hours.
Examines the place of religion in combat across the centuries. A case study approach is used to explore different conflicts from the twelfth century crusades against Muslim forces to 9/11. Investigates how religious motivations may or may not be related to other political, social, cultural, economic concerns.

HIST 4333. Modern Islamic Thought (Irregular). 3 Hours.
Main currents in Islamic theology and political philosophy from the Ottoman Empire to the end of the twentieth century.

HIST 4343. Golden Age Portugal and Spain. 3 Hours.
This course will examine the diverging and converging paths of Portugal and Spain during the early modern period (15th-17th centuries). We will chart their rise as global imperial powers and their initial declines. We'll explore the political, social, and religious contexts in which Golden Age Iberia flourished.

HIST 4363. The Middle East since 1914 (Irregular). 3 Hours.
Middle East since 1914 addresses European colonialism, the rise of new social elites, independence, revolution, globalization, economic self-determination, persistent regional conflicts and ongoing battles over "cultural authenticity".

HIST 4383. The American Civil Rights Movement (Irregular). 3 Hours.
Introduction to the history and development of the civil rights movement in the United States. This course is cross-listed with AAST 4383.

HIST 4393. Early Modern Islamic Empires, 1300-1750. 3 Hours.
An examination of the historical development of the three great Islamic empires in the early modern period- the Ottomans, the Safavids of Iran, and the Mughals of India. Special attention given to imperial expansion, administrative structures, religious-legal establishment, and the formation of distinct traditions in political ideology, historiography, and the arts and sciences.

HIST 4403. Islam in Asia (Irregular). 3 Hours.
Introduces students to the history of Islam in East and Southeast Asia over the past 1,200 years. It focuses on the 18th-21st centuries when Muslims were part of everyday life in Asia and participated in the formation of majority and minority identities in the region.

HIST 4413. New Women in the Middle East (Irregular). 3 Hours.
This course covers the transformation of social and cultural roles of women in the Middle East since the 19th Century. Emphases include political emancipation, religious reformation, artistic representation, and gendered re-definition.

HIST 4433. Social and Cultural History of the Modern Middle East (Irregular). 3 Hours.
An analysis of Middle East history in the 17th-20th centuries which focuses on the social transformation of urban and rural life. Particular emphasis is given to the roles of economics, genealogy, art, and popular culture.

HIST 4443. Frontiers and Borderlands in Colonial Latin America (Irregular). 3 Hours.
This course examines frontiers and borderlands in colonial Latin America and focuses on the regions of California, New Mexico, Texas, Brazil, and the Rio de la Plata. It demonstrates that frontiers and borderlands are defined by the absence of a hegemonic European power and associated with the prevalence of Indigenous norms.

HIST 4463. The American Frontier. 3 Hours.
American westward expansion and its influence on national institutions and character. Emphasis on the pioneer family and the frontier's role in shaping American society, culture, economy, and politics. Topics include exploration, the fur trade, the cattle kingdom and the mining, farming, and military frontiers.

HIST 4473. Environmental History (Irregular). 3 Hours.
Examines the interactions between human culture and the natural environments: Concepts of nature in the West and elsewhere, dynamics of the Physical Environment, case studies in Regional Environmental History and the Politics of Environmental movements.

HIST 4483. African American Biographies (Irregular). 3 Hours.
Introduction to the history and intellectual development of famous and not-so-famous African Americans. This course is cross-listed with AAST 4483.

HIST 4493. Religion in America to 1860 (Irregular). 3 Hours.
History of religion in early America, primarily from a social and cultural perspective. Topics will include region, social class, growth of institutions, slavery, print culture, and social reform in traditions including Protestantism, West African religion, Catholicism, Native American religion, and Judaism.

HIST 4503. History of Political Parties in the United States, 1789-1896. 3 Hours.
Origin and development of the American party system from the implementation of the constitution to the election of McKinley. This course is cross-listed with PLSC 4303.

HIST 4513. History of Political Parties in the United States Since 1896. 3 Hours.
Response of the party system to America's emergence as an industrial nation and world power from the election of 1896 to present. This course is cross-listed with PLSC 4313.

HIST 4543. American Social and Intellectual History Since 1865. 3 Hours.
Survey of thought and society since the Civil War.

HIST 4553. The Recluse in Early East Asia. 3 Hours.
A cross-cultural study of those who chose or needed to leave the world of officialdom for the world of nature in early East Asia.

HIST 4563. The Old South, 1607-1865. 3 Hours.
Survey of the political, social, and economic development of the antebellum South. This course is cross-listed with AAST 4563.

HIST 4573. The New South, 1860 to the Present. 3 Hours.
Survey of the development of the Civil War and postwar South to the present. This course is cross-listed with AAST 4573.

HIST 4583. Arkansas in the Nation. 3 Hours.
Designed to provide advanced undergraduate and graduate students with a comprehensive understanding of the full sweep of Arkansas history. The focus will be on social, economic and political history, and historiography.

HIST 4593. The Colonial French in the Mississippi Valley. 3 Hours.
This course focuses on the French Colonial Mississippi Valley from 1698 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. This course is cross-listed with WLLC 4053, WLLC 4053H.

HIST 4603. U.S. Labor History to 1877. 3 Hours.
Examines the changing nature of work in U.S. history from 1607 until 1877 including the ways that workers--individually and collectively-- understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings.

HIST 4613. Colonial America 1600-1763 (Irregular). 3 Hours.
History of colonial America from 1600 to the end of the Seven Years War emphasizing economic, social, and cultural perspectives. Topics include Native American, French, Spanish, English, Dutch, and Russian interactions in North America and the larger Atlantic World.
HIST 4623. Revolutionary America, 1763 to 1789 (Irregular). 3 Hours.
History of revolutionary America emphasizing economic, social, and cultural perspectives. Topics include historical interpretations of the causes of the war, the impact of war on African Americans, women, loyalists, elite, and poor Americans. The course also examines the formation of the new national government.

HIST 4633. Heian Japan (794-1192) (Irregular). 3 Hours.
A study of courtly culture and the religious world of Heian Japan.

HIST 4633H. Honors Heian Japan (794-1192) (Irregular). 3 Hours.
A study of courtly culture and the religious world of Heian Japan. This course is equivalent to HIST 4633.

HIST 4643. Early American Republic, 1789-1828 (Irregular). 3 Hours.
History of the early United States emphasizing social and cultural perspectives. Topics addressed will include westward expansion, slavery, religion, and economic change.

HIST 4653. Antebellum America, 1828-1850 (Irregular). 3 Hours.
History of antebellum U.S. emphasizing social and cultural perspectives. Topics addressed will include slavery, religion, gender, the market economy, regionalism, and political developments.

HIST 4663. Rebellion to Reconstruction, 1850-1877 (Irregular). 3 Hours.
A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the Civil War and the problems of postwar America. A brief examination of the Civil War is included.

HIST 4673. The American Civil War. 3 Hours.
An intensive study of the political, social, military, and economic aspects of the American Civil War period.

HIST 4693. Approaching Global History. 3 Hours.
Explores theoretical perspectives on global history through a treatment of the historiographical development of the field, readings of landmark texts, and selected case studies of global themes.

HIST 4703. Emergence of Modern America, 1876-1917. 3 Hours.
A survey of the impact of the Industrial Revolution, Imperialism, and progressivism upon American life and institutions.

HIST 4723. America Between the Wars, 1917-1941 (Irregular). 3 Hours.
The impact of World War I, the 1920s, and the Great Depression upon American society and culture.

HIST 4733. Recent America, 1941 to the Present (Irregular). 3 Hours.
A general survey of American history since World War II with emphasis upon the presidency, reform movements, the Cold War, and cultural developments.

HIST 4743. The Cold War in Latin America: Revolutions, Violence, and Politics (Irregular). 3 Hours.
This course will trace the rise of the ideological and political struggles over social and economic development and the security regimes designed to thwart socialist revolution and political mobilization. The influence of the United States in Latin American security regimes and "containment" activities will receive special attention.

HIST 4753. Diplomatic History of the United States, 1776-1900. 3 Hours.
Survey of American foreign relations from the American Revolution through the Spanish-American War. Principal topics include isolationism, freedom of the seas, manifest destiny and continental expansion, overseas expansion, and the diplomacy of war and peace. Emphasis on the relationship between domestic politics and foreign affairs. Prerequisite: HIST 2003.

HIST 4763. Diplomatic History of the United States, 1900-1945. 3 Hours.
America's development as a world power. The course examines U.S. relations with Europe, Latin America, and East Asia, plus America's first approach to the Middle East. Particular emphasis is placed on America's involvement in World War I and World War II. Prerequisite: HIST 2013.

HIST 4773. Diplomatic History of the US, 1945 to Present. 3 Hours.
U.S. involvement in world affairs since WWII. The Cold War from an international perspective, including strategies, nuclear deterrence, conflicts, economic developments, cultural relations among allies and adversaries. Post-Cold War scenarios, including war on terrorism.

HIST 4783. History of Modern Mexico. 3 Hours.
This course examines the history of Mexico from the wars of independence to the present. Emphasis will be placed on the turbulent nineteenth century and the Mexican Revolution. Themes covered include colonial legacies, national identities, popular culture, emigration, and relations with the United States.

HIST 4793. Colonial India, 1758-1948 (Irregular). 3 Hours.
Examines the course of Indian history from the 1758 Battle of Plassey to eventual independence from Great Britain in 1948. Special attention is given to India's place within the British Empire, particularly the East Indian Company, the Indian Mutiny, the Raj, the rise of Gandhi, and India's independence movement.

HIST 4803. Modern Scandinavia (Irregular). 3 Hours.
Examines the history of the Nordic lands, including Denmark, Finland, Iceland, Norway, and Sweden, from 1500 to the present.

HIST 4813. Africans and Slavery in Colonial Latin America (Irregular). 3 Hours.
Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. This course is cross-listed with AAST 4813.

HIST 4823. Black Freedom in the Age of Emancipation. 3 Hours.
This course centers on the comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them.

HIST 4833. Classical Thought in East Asia. 3 Hours.
This course centers on the comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them.

HIST 4843. Colonial India, 1758-1948 (Irregular). 3 Hours.
Examines the course of Indian history from the 1758 Battle of Plassey to eventual independence from Great Britain in 1948. Special attention is given to India's place within the British Empire, particularly the East Indian Company, the Indian Mutiny, the Raj, the rise of Gandhi, and India's independence movement.

HIST 4853. Early Chinese Empires: Mythology, Archeology, and Historiography. 3 Hours.
A critical introduction to the most important sources and major themes, both textual and archeological, for the study of early China.

HIST 4853H. Honors Early Chinese Empires: Mythology, Archeology, and Historiography (Sp). 3 Hours.
A critical introduction to the most important sources and major themes, both textual and archeological, for the study of early China. This course is equivalent to HIST 4853.

HIST 4863. Classical Thought in East Asia. 3 Hours.
Introduces the major East Asian philosophical and religious traditions including Confucianism, Daoism, Buddhism, and Shintoism. Read original sources in translation, such as Analects, and explore perspectives that stem from the traditions as they bear on contemporary global issues.

HIST 4863H. Honors Classical Thought in East Asia (Fa). 3 Hours.
Introduces the major East Asian philosophical and religious traditions including Confucianism, Daoism, Buddhism, and Shintoism. Read original sources in translation, such as Analects, and explore perspectives that stem from the traditions as they bear on contemporary global issues. This course is equivalent to HIST 4863.

HIST 4873. Germany since 1945 (Irregular). 3 Hours.
Examines the history of Germany since the end of the Second World War including political division and economic recovery, dissident movements in East Germany and alternative cultures in West Germany, reunification in 1990, and the legacy of Nazism and the Holocaust.
HIST 4883. Health and Disease: 1500 to the Present (Irregular). 3 Hours.
Explores the emergence of epidemics against the backdrop of the nation state and
anxieties over women, the lower classes, and other marginalized groups. The rise of
modern health programs illuminates the cultural construction of medicine, the biases
of scientific inquiry, and the tensions among paternalism, liberty, and prejudice.

HIST 4893. Senior Capstone Seminar. 3 Hours.
Required for all history majors. Examines research methods and current theories of
interpreting and evaluating the past. Emphasizes skills of analysis, synthesis, and
integration. Students produce a primary source-based research paper. A grade of a
B or better will satisfy the Fulbright senior writing requirement. Prerequisite: History
major; senior standing.

HIST 4903. Music and the Arts of Edo Japan 1600-1868 (Irregular). 3 Hours.
A music and arts view of urban and popular culture of the Edo period of Japan
(1600-1868). Readings drawn from history, literature, aesthetics, religion and
science.

HIST 4903H. Honors Music and the Arts of Edo Japan (1600-1868) (Irregular). 3 Hours.
A music and arts view of urban and popular culture of the Edo period of Japan
(1600-1868). Readings drawn from history, literature, aesthetics, religion and
science.

This course is equivalent to HIST 4903.

HIST 4913. Reading Japanese Noh as Cultural History (Irregular). 3 Hours.
A historical, sociocultural, and inter-arts approach to the medieval lyric-drama
Japanese Noh, a form of masked theater with roots reaching beyond the 14th
century.

HIST 4913H. Honors Reading Japanese Noh as Cultural History (Irregular). 3 Hours.
A historical, sociocultural, and inter-arts approach to the medieval lyric-drama
Japanese Noh, a form of masked theater with roots reaching beyond the 14th
century.

This course is equivalent to HIST 4913.

HIST 4923. Song China 960-1279 (Irregular). 3 Hours.
Examination of the Song dynasty (960-1279) concentrating on the education and
role of the scholar-official and the literatus. Readings drawn from history, literature,
personal diaries, travel accounts, political memoranda, and scientific writings.

HIST 4923H. Honors Song China (960-1279) (Irregular). 3 Hours.
Examination of the Song dynasty (960-1279) concentrating on the education and
role of the scholar-official and the literatus. Readings drawn from history, literature,
personal diaries, travel accounts, political memoranda, and scientific writings.

This course is equivalent to HIST 4923.

HIST 4933. Ad Paradisum: Utopias, imaginary places, and the afterlife in East
Asia (Irregular). 3 Hours.
Confucian, Daoist, and Buddhist ideas of ideal communities (‘utopias’), of imaginary
places (‘paradise islands’), and of the afterlife (‘heaven and hell’) in East Asia will be
traced in a broad sweep across literature, painting, and the performing arts.

HIST 4933H. Hon Ad Paradisum: Utopias, imaginary places, and the afterlife in
East Asia (Irregular). 3 Hours.
Confucian, Daoist, and Buddhist ideas of ideal communities (‘utopias’), of imaginary
places (‘paradise islands’), and of the afterlife (‘heaven and hell’) in East Asia will be
traced in a broad sweep across literature, painting, and the performing arts.

This course is equivalent to HIST 4933.

HIST 4943. U.S. Labor History, from 1877-present. 3 Hours.
This course will examine the changing nature of work in U.S. history from 1877 until
the present. It will pay particular attention to the ways that workers—individually and
collectively—understand the meanings of their labor and to the ways that notions of
class, gender, ethnicity, and race inform these understandings.

HIST 4953. The History of Sub-Saharan African Women. 3 Hours.
Introduction to the history of women in Sub-Saharan Africa, starting in the early
18th century through the 20th century. Focus on women and the transatlantic slave
trade, women’s influence in pre-colonial religious, political, and cultural institutions,
and women’s experiences under colonial rule and in post-colonial Africa. May be
repeated for up to 6 hours of degree credit.

This course is cross-listed with AAST 4953.

HIST 4953H. Honors The History of Sub-Saharan African Women (Irregular). 3 Hours.
Introduction to the history of women in Sub-Saharan Africa, starting in the early
18th century through the 20th century. Focus on women and the transatlantic slave
trade, women’s influence in pre-colonial religious, political, and cultural institutions,
and women’s experiences under colonial rule and in post-colonial Africa. May be
repeated for up to 6 hours of degree credit.

This course is cross-listed with HIST 4953, AAST 4953.

HIST 4963. Third World Underdevelopment and Modernization (Irregular). 3 Hours.
Examines key issues related to societal change in the Third World, including
various views and theories of international development and modernization. Other
major issues explored include social inequalities, food and hunger, population,
environment, trade and globalization, international aid, and the roles of state, market,
and civil society.

This course is cross-listed with AAST 4963.

HIST 4973. The Civilization of the Renaissance in Italy (Irregular). 3 Hours.
Important trends in Italian culture between the 14th and 16th centuries, including
the birth of humanism, new understandings of the past, “new” political ideologies,
scientific innovation, and famous art produced in the Western tradition.

HIST 4973V. Senior Thesis (Irregular). 1-6 Hour.

HIST 4993. History of the Ottoman Empire, 1300-1923. 3 Hours.
History of the Ottoman Empire from its emergence as frontier principality in Anatolia
ca. 1300, through its heyday as a major imperial power on three continents in the
fifteenth through the eighteenth centuries, ending with its encounter with western
imperialism and nationalism in the nineteenth and early twentieth centuries.

HIST 5003. Democratic Athens (Irregular). 3 Hours.
(Formerly HIST 4003.) History of the Athens from the sixth century BCE to the end
of the fourth. Topics include origins and evolution of democracy, the Persian wars,
the rise and fall of the Athenian Empire, and the development of historiography,
literature, art, and philosophy during the period. Graduate degree credit will not be
given for both HIST 4003 and HIST 5003.

HIST 5013. Alexander the Great and the Hellenistic World (Irregular). 3 Hours.
(Formerly HIST 4013.) A survey of the achievements of Alexander and the culture
of the new world he created. The personality and career of Alexander are examined
as well as the rich diversity of the Hellenistic world: trade with India, religious
syncretism, and the development of Hellenistic science and philosophy. Graduate
degree credit will not be given for both HIST 4013 and HIST 5013.

HIST 5033. Roman Empire. 3 Hours.
(Formerly HIST 4033.) History of Rome from the Emperor Augustus to Constantine,
ca. 30 BCE - 337 CE. Topics include the sources for imperial Rome, the organization
of imperial government, the provinces of Rome and provincial government, art and
literature under the empire, the rise of Christianity, and the conversion of the Empire.
Graduate degree credit will not be given for both HIST 4033 and HIST 5033.

HIST 506V. Readings in European History. 1-6 Hour.
Directed readings in the field of European history. Prerequisite: Graduate standing.
May be repeated for up to 12 hours of degree credit.

HIST 507V. Readings in American History. 1-6 Hour.
Readings. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.
HIST 508V. Research Problems in European History. 1-6 Hour. Research problems. Prerequisite: Graduate standing.

HIST 509V. Research Problems in American History. 1-6 Hour. Research problems. Prerequisite: Graduate standing.

HIST 511V. Research Problems in Latin American History (Irregular). 1-6 Hour.

HIST 517V. Readings in Asian History. 1-6 Hour. Readings. Prerequisite: Graduate standing.

HIST 518V. Research Problems in Asian History (Irregular). 1-18 Hour. Prerequisite: graduate standing.

HIST 5193. Great Britain, 1901-2001. 3 Hours. (Formerly HIST 4193.) Examines the history of the British Isles from the death of Queen Victoria in 1901 to the reelection of Prime Minister Tony Blair in 2001. Special attention is given to the collapse of the British Empire, the birth of the welfare state, and the challenges inherent in the decline of British world power. Graduate degree credit will not be given for both HIST 4193 and HIST 5193.

HIST 5203. History of the Holocaust (Irregular). 3 Hours. (Formerly HIST 4203.) Examines the origins, history, and legacies of the European Holocaust. Traces the origins of anti-Semitism in Europe, the rise of Nazism in Germany, the path to genocide during World War II, and the role of victims, perpetrators, rescuers, and bystanders. Considers issues of memory and justice in the postwar era. Graduate degree credit will not be given for both HIST 4203 and HIST 5203.

HIST 522V. Readings in Latin America History (Irregular). 1-6 Hour.

HIST 524V. Readings in African History (Irregular). 1-6 Hour.

HIST 525V. Research Problems in African History (Irregular). 1-6 Hour.

HIST 526V. Readings in Middle Eastern History (Irregular). 1-6 Hour.

HIST 527V. Readings in Medieval History (Irregular). 1-6 Hour. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 528V. Research Problems in Middle Eastern History (Irregular). 1-6 Hour. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 529V. Research Problems in Medieval History (Irregular). 1-6 Hour. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 530V. Readings in British History (Irregular). 1-6 Hour. Directed readings in the field of British history. Prerequisite: Graduate standing. May be repeated for up to 12 hours of degree credit.

HIST 533V. Readings in Ancient History (Irregular). 1-6 Hour. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 534V. Research Problems in Ancient History (Irregular). 1-6 Hour. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 5393. Early Modern Islamic Empires, 1300-1750. 3 Hours. (Formerly HIST 4393.) An examination of the historical development of the three great Islamic empires in the early modern period—the Ottomans, the Safavids of Iran, and the Mughals of India. Special attention given to imperial expansion, administrative structures, religious-legal establishment, and the formation of distinct traditions in political ideology, historiography, and the arts and sciences. Graduate degree credit will not be given for both HIST 4393 and HIST 5393.

HIST 5403. Islam in Asia (Irregular). 3 Hours. (Formerly HIST 4403.) Introduces students to the history of Islam in East and Southeast Asia over the past 1,200 years. It focuses on the 18th-21st centuries when Muslims were part of everyday life in Asia and participated in the formation of majority and minority identities in the region. Graduate degree credit will not be given for both HIST 4403 and HIST 5403.

HIST 545V. Readings in Caribbean History (Irregular). 1-6 Hour. Graduate readings in Caribbean history. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 546V. Research Problems in Caribbean History (Irregular). 1-6 Hour. Independent research in Caribbean history. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 547V. Readings in Atlantic History (Irregular). 1-6 Hour. Graduate readings in Atlantic world history. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HIST 5483. African American Biographies (Irregular). 3 Hours. (Formerly HIST 4483.) Introduction to the history and intellectual development of famous and not-so-famous African Americans. Graduate degree credit will not be given for both HIST 4483 and HIST 5483.

HIST 5493. Religion in America to 1860 (Irregular). 3 Hours. (Formerly HIST 4493.) History of religion in early America, primarily from a social and cultural perspective. Topics will include region, social class, growth of institutions, slavery, print culture, and social reform in traditions including Protestantism, West African religion, Catholicism, Native American religion, and Judaism. Graduate degree credit will not be given for both HIST 4493 and HIST 5493.

HIST 5503. History of Political Parties in the United States, 1789-1896. 3 Hours. (Formerly HIST 4503.) Origin and development of the American party system from the implementation of the constitution to the election of McKinley. Graduate degree credit will not be given for both HIST 4503 and HIST 5503.

HIST 5513. History of Political Parties in the United States Since 1896. 3 Hours. (Formerly HIST 4513.) Response of the party system to America's emergence as an industrial nation and world power from the election of 1896 to present. Graduate degree credit will not be given for both HIST 4513 and HIST 5513.

HIST 5523. Roman Republic (Irregular). 3 Hours. (Formerly HIST 4523.) History of Rome from its origins in the eighth century BCE to the fall of the Republic in the first century BCE. Topics include the sources for Roman history, the development, functioning, and ultimate failure of republican government, the Roman army, and Roman imperialism in Italy and the Mediterranean. Graduate degree credit will not be given for both HIST 4523 and HIST 5523.

HIST 5543. American Social and Intellectual History Since 1865. 3 Hours. (Formerly HIST 4543.) Survey of thought and society since the Civil War. Graduate degree credit will not be given for both HIST 4543 and HIST 5543.

HIST 5553. The Recluse in Early East Asia. 3 Hours. (Formerly HIST 4553.) A cross-cultural study of those who chose or needed to leave the world of officialdom for the world of nature in early East Asia. Graduate degree credit will not be given for both HIST 4553 and HIST 5553.

HIST 5563. The Old South, 1807-1865. 3 Hours. (Formerly HIST 4563.) Survey of the political, social, and economic development of the antebellum South. Graduate degree credit will not be given for both HIST 4563 and HIST 5563.

HIST 5573. The New South, 1860 to the Present. 3 Hours. (Formerly HIST 4573.) Survey of the development of the Civil War and postwar South to the present. Graduate degree credit will not be given for both HIST 4573 and HIST 5573.

HIST 5583. Arkansas in the Nation. 3 Hours. (Formerly HIST 4583.) Designed to provide advanced undergraduate and graduate students with a comprehensive understanding of the full sweep of Arkansas history. The focus will be on social, economic and political history, and historiography. Graduate degree credit will not be given for both HIST 4583 and HIST 5583.
HIST 5593. The Colonial French in the Mississippi Valley. 3 Hours. 
(Formerly HIST 4593.) This course focuses on the French Colonial Mississippi Valley from 1689 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. Graduate degree credit will not be given for both HIST 4593 and HIST 5593.

HIST 5603. U.S. Labor History to 1877. 3 Hours. 
(Formerly HIST 4603.) Examines the changing nature of work in U.S. history from 1607 until 1877 including the ways that workers--individually and collectively--understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4603 and HIST 5603.

HIST 5613. Colonial America 1600-1763 (Irregular). 3 Hours. 
(Formerly HIST 4613.) History of colonial America from 1600 to the end of the Seven Years War emphasizing economic, social, and cultural perspectives. Topics include Native American, French, Spanish, English, Dutch, and Russian interactions in North America and the larger Atlantic World. Graduate degree credit will not be given for both HIST 4613 and HIST 5613.

HIST 5623. Revolutionary America, 1763 to 1789 (Irregular). 3 Hours. 
(Formerly HIST 4623.) History of revolutionary America emphasizing economic, social, and cultural perspectives. Topics include historical interpretations of the causes of the war, the impact of war on African Americans, women, loyalists, elite, and poor Americans. The course also examines the formation of the new national government. Graduate degree credit will not be given for both HIST 4623 and HIST 5623.

HIST 5633. Heian Japan 794-1192 (Irregular). 3 Hours. 
(Formerly HIST 4633.) A study of courtly culture and the religious world of Heian Japan. Graduate degree credit will not be given for both HIST 4633 and HIST 5633.

HIST 5643. Early American Republic, 1789-1828 (Irregular). 3 Hours. 
(Formerly HIST 4643.) History of the early United States emphasizing social and cultural perspectives. Topics addressed will include westward expansion, slavery, religion, and economic change. Graduate degree credit will not be given for both HIST 4643 and HIST 5643.

HIST 5653. Antebellum America, 1828-1850 (Irregular). 3 Hours. 
(Formerly HIST 4653.) History of antebellum U.S. emphasizing social and cultural perspectives. Topics addressed will include slavery, religion, gender, the market economy, regionalism, and political developments. Graduate degree credit will not be given for both HIST 4653 and HIST 5653.

HIST 5663. Rebellion to Reconstruction, 1850-1877 (Irregular). 3 Hours. 
(Formerly HIST 4663.) A survey of political, social, and economic issues from the late antebellum period through Reconstruction. Emphasis is placed on the causes of the Civil War and the problems of postwar America. A brief examination of the Civil War is included. Graduate degree credit will not be given for both HIST 4663 and HIST 5663.

HIST 5673. The American Civil War. 3 Hours. 
(Formerly HIST 4673.) An intensive study of the political, social, military, and economic aspects of the American Civil War period. Graduate degree credit will not be given for both HIST 4673 and HIST 5673.

HIST 5683. The American Civil Rights Movement (Irregular). 3 Hours. 
(Formerly HIST 4383.) Introduction to the history and development of the civil rights movement in the United States. Graduate degree credit will not be given for both HIST 4383 and HIST 5683.

HIST 5693. Late Middle Ages (Odd years, Sp). 3 Hours. 
(Formerly HIST 4053.) This course examines the political, social-economic, intellectual, and spiritual developments of European history, c. 1000-1400 CE. Special topics include monasticism, sacral kingship, the crusades, and the medieval university. Graduate degree credit will not be given for both HIST 4053 and HIST 5693.

HIST 570V. Special Topics. 1-6 Hour. 
Special topics. Prerequisite: Graduate standing. May be repeated for up to 9 hours of degree credit.

HIST 5723. America Between the Wars, 1917-1941 (Irregular). 3 Hours. 
(Formerly HIST 4723.) The impact of World War I, the 1920s, and the Great Depression upon American society and culture. Graduate degree credit will not be given for both HIST 4723 and HIST 5723.

HIST 573V. Readings in Global History (Irregular). 1-6 Hour. 
Directed readings in the field of Global History. Prerequisite: Graduate standing. May be repeated for up to 12 hours of degree credit.

HIST 5753. Diplomatic History of the United States, 1776-1900. 3 Hours. 
(Formerly HIST 4753.) Survey of American foreign relations from the American Revolution through the Spanish-American War. Principal topics include isolationism, freedom of the seas, manifest destiny and continental expansion, overseas expansion, and the diplomacy of war and peace. Emphasis on the relationship between domestic politics and foreign affairs. Graduate degree credit will not be given for both HIST 4753 and HIST 5753. Prerequisite: HIST 2003.

HIST 5763. Diplomatic History of the United States, 1900-1945. 3 Hours. 
(Formerly HIST 4763.) America's development as a world power. The course examines U.S. relations with Europe, Latin America, and East Asia, plus America's first approach to the Middle East. Particular emphasis is placed on America's involvement in World War I and World War II. Graduate degree credit will not be given for both HIST 4763 and HIST 5763. Prerequisite: HIST 2013.

HIST 5773. Diplomatic History of the US, 1945 to Present. 3 Hours. 
(Formerly HIST 4773.) U.S. involvement in world affairs since WWII. The Cold War from an international perspective, including strategies, nuclear deterrence, conflicts, economic developments, cultural relations among allies and adversaries. Post-Cold War scenarios, including war on terrorism. Graduate degree credit will not be given for both HIST 4773 and HIST 5773.

HIST 5783. History of Modern Mexico. 3 Hours. 
(Formerly HIST 4783.) This course examines the history of Mexico from the wars of independence to the present. Emphasis will be placed on the turbulent nineteenth century and the Mexican Revolution. Themes covered include colonial legacies, national identities, popular culture, emigration, and relations with the United States. Graduate degree credit will not be given for both HIST 4783 and HIST 5783.

HIST 5793. Colonial India, 1758-1948 (Irregular). 3 Hours. 
(Formerly HIST 4793.) Examines the course of Indian history from the 1758 Battle of Plassey to eventual independence from Great Britain in 1948. Special attention is given to India's place within the British Empire, particularly the East Indian Company, the Indian Mutiny, the Raj, the rise of Gandhi, and India's independence movement. Graduate degree credit will not be given for both HIST 4793 and HIST 5793.

HIST 5803. Modern Scandinavia (Irregular). 3 Hours. 
(Formerly HIST 4803.) Examines the history of the Nordic lands, including Denmark, Finland, Iceland, Norway, and Sweden, from 1500 to the present. Graduate degree credit will not be given for both HIST 4803 and HIST 5803.

HIST 5813. Africans and Slavery in Colonial Latin America (Irregular). 3 Hours. 
(Formerly HIST 4813.) Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. Graduate degree credit will not be given for both HIST 4813 and HIST 5813.
HIST 5823. Black Freedom in the Age of Emancipation. 3 Hours.
(Formerly HIST 4823.) This course centers on the comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. Graduate degree credit will not be given for both HIST 4823 and HIST 5823.

HIST 5833. Social and Cultural History of the Modern Middle East (Irregular). 3 Hours.
(Formerly HIST 4433.) An analysis of Middle East history in the 17th-20th centuries which focuses on the social transformation of urban and rural life. Particular emphasis is given to the roles of economics, genealogy, art, and popular culture. Graduate degree credit will not be given for both HIST 4433 and HIST 5833.

HIST 5843. The Atlantic World, 1400-1850 (Irregular). 3 Hours.
(Formerly HIST 4233.) Explores the political, economic, cultural, and social engagement of Africans, Europeans, and Native Americans across the Atlantic from 1400 to 1850. It uses a comparative lens to understand how interactions between Europe, Africa, and the Americas created enduring ties throughout the Atlantic Basin. Graduate degree credit will not be given for both HIST 4233 and HIST 5843.

HIST 5853. Early Chinese Empires: Mythology, Archeology, and Historiography. 3 Hours.
(Formerly HIST 4853.) A critical introduction to the most important sources and major themes, both textual and archeological, for the study of early China. Graduate degree credit will not be given for both HIST 4853 and HIST 5853.

HIST 5863. Classical Thought in East Asia. 3 Hours.
(Formerly HIST 4863.) Introduces the major East Asian philosophical and religious traditions including Confucianism, Daoism, Buddhism, and Shintoism. Read original sources in translation, such as Analects, and explore perspectives that stem from the traditions as they bear on contemporary global issues. Graduate degree credit will not be given for both HIST 4863 and HIST 5863.

HIST 5873. Germany since 1945 (Irregular). 3 Hours.
(Formerly HIST 4873.) Examines the history of Germany since the end of the Second World War including political division and economic recovery, dissident movements in East Germany and alternative cultures in West Germany, reunification in 1990, and the legacy of Nazism and the Holocaust. Graduate degree credit will not be given for both HIST 4873 and HIST 5873.

HIST 5883. Health and Disease: 1500 to the Present (Irregular). 3 Hours.
(Formerly HIST 4883.) Explores the emergence of epidemics against the backdrop of the nation state and anxieties over women, the lower classes, and other marginalized groups. The rise of modern health programs illuminates the cultural construction of medicine, the biases of scientific inquiry, and the tensions among paternalism, liberty, and prejudice. Graduate degree credit will not be given for both HIST 4883 and HIST 5883.

HIST 5893. Germany, 1918-1945 (Irregular). 3 Hours.
(Formerly HIST 4253.) Study of German history from advent of the Weimar Republic to the end of the Third Reich with emphasis upon the failure of democratic government in the 1920s and the rise and fall of the National Socialist dictatorship. Graduate degree credit will not be given for both HIST 4253 and HIST 5893.

HIST 5903. Music and the Arts of Edo Japan 1600-1868 (Irregular). 3 Hours.
(Formerly HIST 4903.) A music and arts view of urban and popular culture of the Edo period of Japan (1600-1868). Readings drawn from history, literature, aesthetics, religion and science. Graduate degree credit will not be given for both HIST 4903 and HIST 5903.

HIST 5913. Reading Japanese Noh as Cultural History (Irregular). 3 Hours.
(Formerly HIST 4913.) A historical, sociocultural, and inter-arts approach to the medieval lyric-drama Japanese Noh, a form of masked theater with roots reaching beyond the 14th century. Graduate degree credit will not be given for both HIST 4913 and HIST 5913.

HIST 5923. Song China 960-1279 (Irregular). 3 Hours.
(Formerly HIST 4923.) Examination of the Song dynasty (960-1279) concentrating on the education and role of the scholar-official and the literatus. Readings drawn from history, literature, personal diaries, travel accounts, political memoranda, and scientific writings. Graduate degree credit will not be given for both HIST 4923 and HIST 5923.

HIST 5933. Ad Paradisum: Utopias, imaginary places, and the afterlife in East Asia (Irregular). 3 Hours.
(Formerly HIST 4933.) Confucian, Daoist, and Buddhist ideas of ideal communities ('utopias'), of imaginary places ('paradise islands'), and of the afterlife ('heaven and hell') in East Asia will be traced in a broad sweep across literature, painting, and the performing arts. Graduate degree credit will not be given for both HIST 4933 and HIST 5933.

HIST 5943. U.S. Labor History, from 1877-present. 3 Hours.
(Formerly HIST 4943.) This course will examine the changing nature of work in U.S. history from 1877 until the present. It will pay particular attention to the ways that workers--individually and collectively--understand the meanings of their labor and to the ways that notions of class, gender, ethnicity, and race inform these understandings. Graduate degree credit will not be given for both HIST 4943 and HIST 5943.

HIST 5953. The History of Sub-Saharan African Women. 3 Hours.
(Formerly HIST 4953.) Introduction to the history of women in Sub-Saharan Africa, starting in the early 18th century through the 20th century. Focus on women and the transatlantic slave trade, women's influence in pre-colonial religious, political, and cultural institutions, and women's experiences under colonial rule and in post-colonial Africa. Graduate degree credit will not be given for both HIST 4953 and HIST 5953.

HIST 5963. Third World Underdevelopment and Modernization (Irregular). 3 Hours.
(Formerly HIST 4963.) Examines key issues related to societal change in the Third World, including various views and theories of international development and modernization. Other major issues explored include social inequalities, food and hunger, population, environment, trade and globalization, international aid, and the roles of state, market, and civil society. Graduate degree credit will not be given for both HIST 4963 and HIST 5963.

HIST 5973. The Civilization of the Renaissance in Italy (Irregular). 3 Hours.
Important trends in Italian culture between the 14th and 16th centuries, including the birth of humanism, new understandings of the past, "new" political ideologies, scientific innovation, and famous art produced in the Western tradition.

HIST 5983. Intellectual History of Europe Since the Enlightenment. 3 Hours.
(Formerly HIST 4143.) A survey of the major developments in European thought and culture since the emergence of Romanticism. Topics include Romanticism, Darwinism, Marxism, and Modernism. Graduate degree credit will not be given for both HIST 4143 and HIST 5983.

HIST 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

HIST 6013. The Era of the French Revolution. 3 Hours.
(Formerly HIST 4213.) France from the salons of the Enlightenment to the Napoleonic Wars. The French Revolution will be explored in terms of politics and personalities, ideas and symbols, class and gender relations, and violence and terror. Graduate degree credit will not be given for both HIST 4213 and HIST 6013.

HIST 6033. Society and Gender in Modern Europe. 3 Hours.
(Formerly HIST 4133.) Changing values and attitudes toward childhood, family life, sexuality, and gender roles in Europe from the Renaissance to the present. The social impact of the Industrial Revolution, urbanization, demographic change, and the two world wars. Graduate degree credit will not be given for both HIST 4133 and HIST 6033.
HIST 6063. Tudor-Stuart England, 1485-1714. 3 Hours.  
(Formerly HIST 4163.) Examines the history of the British Isles from the ascension of Henry VII and the Tudor dynasty until the close of the Stuart Era in 1714. Special attention is given to the English Reformation, the Elizabethan years, the 17th Century Revolutions, and the birth of an overseas Empire. Graduate degree credit will not be given for both HIST 4163 and HIST 6063.

HIST 6073. Renaissance and Reformation, 1300-1600. 3 Hours.  
(Formerly HIST 4073.) Examines the history of Europe from the end of the Middle Ages through the Renaissance to the Reformation and Counter-Reformation. Special attention is paid to changes in popular piety, political thought, religious representation, and the discovery of the New World. Graduate degree credit will not be given for both HIST 4073 and HIST 6073.

HIST 6083. Early Modern Europe, 1600-1800. 3 Hours.  
(Formerly HIST 4083.) Begins with the upheaval of the reformation, moves through the crisis of the 17th century and culminates with the democratic revolution of the 18th century. Examines the consolidation of the European state system, the propagation of modern science, discovery of overseas worlds, and the advent of the Industrial Revolution. Graduate degree credit will not be given for both HIST 4083 and HIST 6083.

HIST 6093. The History of African Americans and Social Justice (Irregular). 3 Hours.  
(Formerly HIST 4093.) Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. Graduate degree credit will not be given for both HIST 4093 and HIST 6093.

HIST 6113. Archaic Greece (Irregular). 3 Hours.  
(Formerly HIST 4113.) History of Greece from the late Bronze Age to the end of the Persian Wars. This class will focus particularly on the sources involved with reconstructing early Greek history, especially Herodotus and Homer, on the development of the Greek city-state or polis, and on the interaction between the Greeks and Near-eastern civilizations during this period, culminating in the wars between the Greeks and the Persian Empire. Graduate degree credit will not be given for both HIST 4113 and HIST 6113.

HIST 6173. The Latin American City (Irregular). 3 Hours.  
(Formerly HIST 4173.) This course examines the social, political, and cultural aspects of the modern Latin American city from an interdisciplinary perspective. The course includes an introduction to urban studies concepts, and each semester is organized around a specific set of case studies. Graduate degree credit will not be given for both HIST 4173 and HIST 6173.

HIST 6183. Great Britain 1707-1901. 3 Hours.  
(Formerly HIST 4183.) Examines the history of the British Isles from the 1707 Act of Union between Scotland and England until the death of Queen Victoria in 1901. Special attention is given to the spread of Empire, industrialization, and the political, social, and cultural aspects of the Georgian and Victorian Eras. Graduate degree credit will not be given for both HIST 4183 and HIST 6183.

HIST 6203. Byzantine Empire (Irregular). 3 Hours.  
(Formerly HIST 4103.) Examines the history and culture of the Byzantine Empire from the reign of Constantine I to the fall of Constantinople in 1453. Topics include the development of Christianity and the schism with the western church, the crusades, and Byzantine influence on Islam, Russia, the Ottomans, and the Renaissance. Graduate degree credit will not be given for both HIST 4103 and HIST 6203.

HIST 6223. France Since 1815. 3 Hours.  
(Formerly HIST 4223.) Survey of French history from the overthrow of Napoleon to the 5th Republic, with emphasis on French politics, society, and culture. Graduate degree credit will not be given for both HIST 4223 and HIST 6223.

HIST 6243. Germany, 1789-1918 (Irregular). 3 Hours.  
(Formerly HIST 4243.) Study of German history from the Age of Absolutism to the collapse of the German Empire at the end of the First World War. Special attention is paid to the Enlightenment and Romantic movements; nationalism and the unification of Germany; and evolving conflicts over the political and social order. Graduate degree credit will not be given for both HIST 4243 and HIST 6243.

HIST 6263. Independence and Africa Today. 3 Hours.  
(Formerly HIST 4263.) Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. Graduate degree credit will not be given for both HIST 4263 and HIST 6263.

HIST 6273. Comparative Slavery (Irregular). 3 Hours.  
(Formerly HIST 4273.) Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. Graduate degree credit will not be given for both HIST 4273 and HIST 6273.

HIST 6303. Transatlantic Relations, 1919-Present (Irregular). 3 Hours.  
(Formerly HIST 4303.) US-Western European Relations, from the Wilsonian era to the present, covering strategic, economic, and cultural aspects. Graduate degree credit will not be given for both HIST 4303 and HIST 6303.

HIST 6333. Modern Islamic Thought (Irregular). 3 Hours.  
(Formerly HIST 4333.) Main currents in Islamic theology and political philosophy from the Ottoman Empire to the end of the twentieth century. Graduate degree credit will not be given for both HIST 4333 and HIST 6333.

HIST 6343. Golden Age Portugal and Spain. 3 Hours.  
(Formerly HIST 4343.) This course will examine the diverging and converging paths of Portugal and Spain during the early modern period (15th-17th centuries). We will chart their rise as global imperial powers and their initial declines. We'll explore the political, social, and religious contexts in which Golden Age Iberia flourished. Graduate degree credit will not be given for both HIST 4343 and HIST 6343.

HIST 6463. The American Frontier. 3 Hours.  
(Formerly HIST 4463.) American westward expansion and its influence on national institutions and character. Emphasis on the pioneer family and the frontier's role in shaping American society, culture, economy, and politics. Topics include exploration, the fur trade, the cattle kingdom and the mining, farming, and military frontiers. Graduate degree credit will not be given for both HIST 4463 and HIST 6463.

HIST 6473. Environmental History (Irregular). 3 Hours.  
(Formerly HIST 4473.) Examines the interactions between human culture and the natural environments: Concepts of nature in the West and elsewhere, dynamics of the Physical Environment, case studies in Regional Environmental History and the Politics of Environmental movements. Graduate degree credit will not be given for both HIST 4473 and HIST 6473.

HIST 6513. New Women in the Middle East (Irregular). 3 Hours.  
(Formerly HIST 4413.) This course covers the transformation of social and cultural roles of women in the Middle East since the 19th Century. Emphasizes include political emancipation, religious reformation, artistic representation, and gendered re-definition. Graduate degree credit will not be given for both HIST 4413 and HIST 6513.
HIST 6523. Wars of Religion: From the Crusades to 9/11 (Irregular). 3 Hours. 
(Formerly HIST 4323.) Examines the place of religion in combat across the centuries. A case study approach is used to explore different conflicts from the twelfth century crusades against Muslim forces to 9/11. Investigates how religious motivations may or may not be related to other political, social, cultural, economic concerns. Graduate degree credit will not be given for both HIST 4323 and HIST 6523.

HIST 6543. Late Antiquity and the Early Middle Ages. 3 Hours. 
(Formerly HIST 4043.) This course examines the political, spiritual, intellectual, and social-economic developments of European history, c. 300-1000 CE. Special topics include the Christianization of the late Roman Empire and Byzantium, as well as the formation of Celtic and Germanic Kingdoms in the West. Graduate degree credit will not be given for both HIST 4043 and HIST 6543.

HIST 6563. The Middle East since 1914 (Irregular). 3 Hours. 
(Formerly HIST 4363.) Middle East since 1914 addresses European colonialism, the rise of new social elites, independence, revolution, globalization, economic self-determination, persistent regional conflicts and ongoing battles over "cultural authenticity". Graduate degree credit will not be given for both HIST 4363 and HIST 6563.

HIST 6623. Africa and the Trans-Atlantic Slave Trade (Irregular). 3 Hours. 
(Formerly HIST 4123.) Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. Graduate degree credit will not be given for both HIST 4123 and HIST 6623.

HIST 6643. Frontiers and Borderlands in Colonial Latin America (Irregular). 3 Hours. 
(Formerly HIST 4443.) This course examines frontiers and borderlands in colonial Latin America and focuses on the regions of California, New Mexico, Texas, Brazil, and the Río de la Plata. It demonstrates that frontiers and borderlands are defined by the absence of a hegemonic European power and associated with the prevalence of Indigenous norms. Graduate degree credit will not be given for both HIST 4443 and HIST 6643.

HIST 6703. Emergence of Modern America, 1876-1917. 3 Hours. 
(Formerly HIST 4703.) A survey of the impact of the Industrial Revolution, Imperialism, and progressivism upon American life and institutions. Graduate degree credit will not be given for both HIST 4703 and HIST 6703.

HIST 6733. Recent America, 1941 to the Present (Irregular). 3 Hours. 
(Formerly HIST 4733.) A general survey of American history since World War II with emphasis upon the presidency, reform movements, the Cold War, and cultural developments. Graduate degree credit will not be given for both HIST 4733 and HIST 6733.

HIST 6743. The Cold War in Latin America: Revolutions, Violence, and Politics (Irregular). 3 Hours. 
(Formerly HIST 4743.) This course will trace the rise of the ideological and political struggles over social and economic development and the security regimes designed to thwart socialist revolution and political mobilization. The influence of the United States in Latin American security regimes and "containment" activities will receive special attention. Graduate degree credit will not be given for both HIST 4743 and HIST 6743.

HIST 6983. History of the Ottoman Empire, 1300-1923. 3 Hours. 
History of the Ottoman Empire from its emergence as frontier principality in Anatolia ca. 1300, through its heyday as a major imperial power on three continents in the fifteenth through the eighteenth centuries, ending with its encounter with western imperialism and nationalism in the nineteenth and early twentieth centuries.

HIST 700V. Doctoral Dissertation. 1-18 Hour. 
Independent research and writing leading to the completion of a doctoral dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.

HIST 7023. Historical Methods. 3 Hours. 
(Formerly HIST 5023.) Practical introduction to historical research and writing. Consists of lecture, library reading, and class criticism of research papers. Prerequisite: Graduate standing. This course is equivalent to HIST 6023.

HIST 7043. Historiography (Irregular). 3 Hours. 
(Formerly HIST 5043.) Survey of the history of historical writing and a study of the important schools and historical interpretation. Prerequisite: Graduate standing. This course is equivalent to HIST 6043.

HIST 7053. Reading Seminar in Asian History (Irregular). 3 Hours. 
(Formerly HIST 5053.) Concentrated reading in selected specialized areas of Asian history. Prerequisite: Advanced graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6053.

HIST 7103. Reading Seminar in American History (Irregular). 3 Hours. 
(Formerly HIST 5103.) Historiographical and bibliographical study of special areas of U.S. history, such as Antebellum America, the Civil War, etc. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6103.

(Formerly HIST 5123.) Research projects in selected fields of American history, such as the Civil War, Antebellum America, etc. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6123.

HIST 7133. Reading Seminar in European History (Irregular). 3 Hours. 
(Formerly HIST 5133.) Historiographical and bibliographical study of special periods in European history, such as the Roman Empire, the late Middle Ages, the French Revolution, etc. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6133.

HIST 7143. Research Seminar in European History (Irregular). 3 Hours. 
(Formerly HIST 5143.) Research projects in selected fields of European history, such as the French Revolution, humanism, etc. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6143.

HIST 7153. Reading Seminar in British History (Irregular). 3 Hours. 
(Formerly HIST 5153.) Historiographical and bibliographical study of selected periods of British history. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6153.

HIST 7163. Research Seminar in British History (Irregular). 3 Hours. 
(Formerly HIST 5163.) Research projects in selected fields of British history. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6163.

HIST 7213. Reading Seminar in Middle Eastern History (Irregular). 3 Hours. 
(Formerly HIST 5213.) Historiographical and bibliographical study of special areas of Middle Eastern history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6213.

HIST 7233. Research Seminar in Middle Eastern History (Irregular). 3 Hours. 
(Formerly HIST 5233.) Research projects in selected fields of Middle Eastern history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6233.
HIST 7313. Reading Seminar in Latin American History (Irregular). 3 Hours. (Formerly HIST 5313.) Historiographical and bibliographical study of special areas in Latin American history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6313.

HIST 7323. Research Seminar in Latin American History (Irregular). 3 Hours. (Formerly HIST 5323.) A research seminar for the production of a major research project in Latin American history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6323.

HIST 7353. Reading Seminar in Medieval History (Irregular). 3 Hours. (Formerly HIST 5353.) A research seminar for the production of a major research project in medieval history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6353.

HIST 7363. Research Seminar in Medieval History (Irregular). 3 Hours. (Formerly HIST 5363.) A seminar for the production of a major research project in medieval history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6363.

HIST 7373. Reading Seminar in Ancient History (Irregular). 3 Hours. (Formerly HIST 5373.) Historiographical and bibliographical study of special areas in ancient history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6373.

HIST 7383. Research Seminar in Ancient History (Irregular). 3 Hours. (Formerly HIST 5383.) A seminar for the production of a major research project in ancient history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6383.

HIST 7413. Reading Seminar in African History (Irregular). 3 Hours. (Formerly HIST 5413.) Historiographical and bibliographical study of selected periods and/or topics in African history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6413.

HIST 7423. Research Seminar in African History (Irregular). 3 Hours. (Formerly HIST 5423.) A seminar for the production of a major research project in selected fields of African history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6423.

HIST 7433. Reading Seminar in Caribbean History (Irregular). 3 Hours. (Formerly HIST 5433.) Historiographical and bibliographical study of special areas in Caribbean history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6433.

HIST 7443. Research Seminar in Caribbean History (Irregular). 3 Hours. (Formerly HIST 5443.) A research seminar for the production of a major research project in Caribbean history. Prerequisite: Graduate standing. May be repeated for up to 30 hours of degree credit. This course is equivalent to HIST 6443.

HIST 7453. Reading Seminar in Global History (Irregular). 3 Hours. Graduate seminar adopting global perspectives on Europe, US, Asia, Africa, Latin America. Decentering narratives focusing on regional approaches, the course examines the global implications of various historical developments. May be repeated for up to 6 hours of degree credit. This course is equivalent to HIST 6453.

Honors College (HNRC) Courses

HNRC 300VH. Honors College Forum (Irregular). 1-3 Hour. The Honors College Forum centers on contemporary issues sparking intense national and international media scrutiny. Faculty experts partner with honors students in a seminar-style, discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. May be repeated for up to 6 hours of degree credit.

HNRC 301VH. Honors College Retro Readings (Irregular). 1-3 Hour. Honors College Retro Readings centers on classic authors read through a contemporary lens. Faculty experts partner with honors students from all undergraduate colleges in a seminar-style discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. May be repeated for up to 6 hours of degree credit.

HNRC 3801H. Honors College Catapult. 1 Hour. This course is designed to place ambitious, high-achieving students on a trajectory toward nationally competitive awards and/or graduate and professional programs of study. Students in the course will prepare their academic resume, construct a personal statement, and answer essay prompts as each component may relate to nationally competitive awards and graduate or professional school admission. Additional topics include studying for advanced tests such as the Graduate Record Exam (GRE), building a graduate or professional school timeline, and preparing for interviews. Learning outcomes will be achieved through active engagement in writing and compilation exercises, research, and discussion. Prerequisite: Honors standing.

HNRC 4013H. Honors College Signature Seminar. 3 Hours. The Honors College Signature Seminar Series features leading scholars who will offer courses bridging multiple colleges and having broad appeal. These signature seminars will develop from the current research of the faculty who offer them, thereby inviting honors students into their scholarly world at a very high level. The goal of the signature seminar series is to spark undergraduate research projects and to stimulate career trajectories, including nationally competitive fellowships and/or admittance to graduate and professional programs. Topics vary by semester. Eligible students must be in good standing in the Honors College. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. May be repeated for up to 6 hours of degree credit.

HNRC 403VH. Honors College International Research. 3-6 Hour. The Honors College International Research hours are intended for undergraduates who have already begun their research on campus and will travel abroad for a significant period of time to enhance and extend this research. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre or corequisite: Honors standing.

Horticulture (HORT) Courses

HORT 1103. Plants, People and You. 3 Hours. Plants, People and You is a course designed to introduce students to the world of horticulture, with an emphasis on how plants can be used for food, fun, health, economic value or environmental contribution.
HORT 1303. Introduction to Floral Design (Sp). 3 Hours.
Students in this introductory class in Floral Design will learn basic design elements such as line, form, mass, balance, texture and color as used in floral art. Students will gain an appreciation of the various types and species of flowers and foliage used in various floral arrangements such as bouquets and centerpieces. In addition, students will learn common post-harvest handling techniques of fresh cut floral plant material to prolong vase-life from the purchasing stage to the final design.

A course introducing students to the biological and technologies underlying the propagation, production, handling and use of horticultural crops, turf and landscape plants. Students will be introduced to the various disciplines and commodities of horticulture. The use of plants for the benefit of humankind because of their aesthetic and nutritional value will be explored. Previous instruction in Plant Science, Plant Biology, or general Botany is strongly encouraged. Corequisite: Lab component.

HORT 2303. Introduction to Turfgrass Management. 3 Hours.
An introductory course in turfgrass management emphasizing turfgrass growth, adaptation, and management. Methods for establishment, fertilization, mowing, cultivation, irrigation, and pest management are presented, and their impact on culture of lawns, golf courses, athletic fields, and other managed turf areas discussed.

HORT 3103. Woody Landscape Plants (Fa). 3 Hours.
Identification, climatic adaptation and landscape design values of woody ornamental trees, shrubs and vines. Lecture 2 hours per week. Corequisite: Lab component.

HORT 3113. Herbaceous and Indoor Plant Materials (Odd years, Sp). 3 Hours.
Identification, culture, and use of annuals, perennials in landscapes and foliage plants in interiors. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component.

HORT 3123. International Horticulture (Sp). 3 Hours.
Considerable globalization of agriculture has occurred over the past several decades, especially in the area of horticultural crops. This course provides a base of knowledge of the international horticulture industry focusing on principles and practices of development and trade of horticultural crops.

HORT 3203. Sustainable Landscape Practices (Fa). 3 Hours.
New methods of landscape management are required to restore or protect the ecological services provided by developed landscapes. This course is focused on methods for sustainable land management. Included as part of the curriculum is a survey of sustainable management as it applies to site resources, including water, nutrients, energy and biodiversity. Retrofitting existing development, organic lawn, tree, and shrub care, successional landscapes, permaculture, sustainable material selection, and best available equipment will be covered in depth. Prerequisite: HORT 2003.

HORT 3303. Vegetable Crops (Irregular). 3 Hours.
General course in vegetable crops with attention to the principles underlying methods of production and handling related to yields and quality of the products. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: HORT 2003 and CSES 2203.

HORT 3403. Turfgrass Management (Even years, Sp). 3 Hours.
Cultural and management practices of commercial and residential lawns. Principles and practices of mowing, fertilizing, irrigating, and control of weed, disease, and insects. Identification of turfgrass; equipment selection. Corequisite: Lab component. Prerequisite: HORT 2303.

HORT 3503. Sustainable and Organic Horticulture (Even years, Fa). 3 Hours.
This course will provide a base of knowledge of the principles and practices of sustainable, organic, and alternative horticulture management systems. The class will review and evaluate topics including soil biological processes (compost, humus and fertility), pest management, alternative farming systems, and organic agriculture. After this foundation information is studied, the class will study applications of sustainable agriculture principles to production systems such as greenhouse vegetable production, ornamental production, fruit production, and landscape and turf management.

HORT 3901. Horticultural Career Development (Sp). 1 Hour.
A course which presents concepts necessary for developing a career and becoming a professional in horticulture industries or businesses. Concepts of goal setting, effective communication and interpersonal skills, behaviors and performance, portfolio and resume, development and job hunting skills will be presented.

HORT 400V. Special Problems. 1-6 Hour.
Original investigations on assigned problems in horticulture. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

HORT 401V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour.
Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. May be repeated for degree credit.

HORT 402V. Horticulture Judging and Competition Activity (Irregular). 1-6 Hour.
Training for and participation on horticultural identification, judging and competitive teams. Prerequisite: HORT 2003. May be repeated for up to 6 hours of degree credit.

HORT 4033. Professional Landscape Installation and Construction. 3 Hours.
Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, cement and masonry construction, and low-voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003.

HORT 4043. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include low maintenance and seasonal color design, pruning and hazard tree management, water and fertilizer management, pesticide use, and other maintenance activities. Basic elements of marketing, specifications and contracts, estimating, personnel management, and equipment selection and acquisition relevant for landscape services will be introduced. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003 and HORT 3103.

HORT 4103. Fruit Production Science and Technology. 3 Hours.
The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberries, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Corequisite: Lab component. Prerequisite: HORT 2003.

HORT 4403. Plant Propagation. 3 Hours.
Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003.
HORT 4413. Horticulture Physiology. 3 Hours.
This course provides students with a background into the physiological processes of plants with an emphasis on horticultural crops and how the processes relate to horticultural crop production practices. Among the topics covered are photosynthesis, respiration, water relations and morphogenesis. Prerequisite: HORT 2003 and CHEM 1073.

HORT 4503. Sustainable Nursery Production. 3 Hours.
This course addresses issues and practices involved in production of quality woody nursery crops (e.g. trees and shrubs produced in open filed and containerized systems).

HORT 4603. Practical Landscape Planning (Even years, Sp). 3 Hours.
Ornamental planting design and landscape planning concepts. Preparing planting plans, materials sheets, and cost estimates for residential properties. Prerequisite: HORT 3103.

HORT 462V. Horticulture, Landscape, Turf Sciences Internship Experience. 1-6 Hour.
A supervised practical work experience in a horticulture, landscape design, or turf business or research program to gain professional competence and insight into employment opportunities. Prerequisite: COMM 1313 and HORT 2101. May be repeated for up to 6 hours of degree credit.

HORT 4701L. Greenhouse Management and Controlled Environment Horticulture Laboratory. 1 Hour.
Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Corequisite: HORT 4703.

HORT 4703. Greenhouse Management and Controlled Environment Horticulture. 3 Hours.
Operation and management of greenhouses and other controlled environments used in horticultural production. Emphasis on system design and construction, control of light intensity and photoperiod, heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems. Prerequisite: HORT 2003 and CHEM 1073.

HORT 4801L. Greenhouse Crops Production Laboratory. 1 Hour.
Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Corequisite: HORT 4803.

HORT 4803. Greenhouse Crops Production. 3 Hours.
Principles and practices of production and marketing of crops commonly grown in controlled environments including flowering containerized herbaceous species, geophytes, annual and perennial bedding plants, hydroponic vegetables and herbs. Prerequisite: HORT 4703.

HORT 4903. Golf and Sports Turf Management. 3 Hours.
Turf management techniques for golf courses, and athletic fields including species selection, root-zone construction and modification, fertilization, mowing, irrigation and pest control. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L and (HORT 2303 or HORT 3403).

HORT 4913. Rootzone Management for Golf and Sports Turf. 3 Hours.
An overview of the fundamental concepts of the physical and chemical properties of rootzones as related to construction and turfgrass management. Prerequisite: HORT 2303 and CSES 2203.

HORT 4921. Golf Course Operations. 1 Hour.
This course is designed to cover specific aspects of golf course operations that would not be included in traditional turfgrass management courses. Topics will include budgeting, personnel management, tournament setup and operation, dealing with golf club committees, communication, and other relevant topics related to managing a golf course maintenance operation. Prerequisite: HORT 4903.

HORT 4932. Turf Best Management Practices. 2 Hours.
The course covers the impacts of turfgrass management practices on turf quality and the environment. In addition, the identification, biology, and control practices for the major insects, diseases, and weeds that infest turf will be covered. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests. Prerequisite: HORT 4903.

HORT 5001. Seminar (Sp, Fa). 1 Hour.
Review of scientific literature and oral reports on current research in horticulture. May be repeated for up to 4 hours of degree credit.

HORT 501V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour.
(Formerly HORT 401V.) Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. Graduate degree credit will not be given for both HORT 401V and HORT 501V. May be repeated for degree credit.

HORT 502V. Horticulture Judging and Competition Activity (Irregular). 1-6 Hour.
(Formerly HORT 402V.) Training for and participation on horticultural identification, judging and competitive teams. Graduate degree credit will not be given for both HORT 402V and HORT 502V. Prerequisite: HORT 2003. May be repeated for up to 6 hours of degree credit.

HORT 503V. Special Problems Research. 1-6 Hour.
Original investigations on assigned problems in horticulture. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HORT 5043. Advanced Plant Breeding (Odd years, Sp). 3 Hours.
Application of genetic principles to the improvement of crop plants. Presentation of conventional plant breeding methods and special techniques such as polyploidy, interspecific hybridization and induced mutation. Lecture 3 hours per week. Prerequisite: BIOL 2323 and BIOL 2321L or (ANSC 3123 and CSES 4103).

HORT 5103. Plant Growth and Development (Fa). 3 Hours.
This course will focus on environmental and developmental processes of plant growth and development. A student completing this course should have an understanding of the developmental processes of plant growth and how environmental factors interact to affect and control plant growth and development.

HORT 5113. Fruit Production Science and Technology. 3 Hours.
(Formerly HORT 4103.) The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberries, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Graduate degree credit will not be given for both HORT 4103 and HORT 5113. Corequisite: Lab component. Prerequisite: HORT 2003.

HORT 5143. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include low maintenance and seasonal color design, pruning and hazard tree management, water and fertilizer management, pesticide use, and other maintenance activities. Basic elements of marketing, specifications and contracts, estimating, personnel management, and equipment selection and acquisition relevant for landscape services will be introduced. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003 and HORT 3103.

HORT 5203. Temperature Stress Physiology (Sp). 3 Hours.
This course will teach students how to apply biological, chemical and physical principles to models of how plants are damaged by temperature extremes and how they change to increase resistance. Student will apply these principles to better understand plant responses to other environmental challenges, including both biotic and abiotic stresses.
HORT 530V. Special Problems. 1-6 Hour.
(Formerly HORT 400V.) Original investigations on assigned problems in horticulture. Graduate degree credit will not be given for both HORT 400V and HORT 530V. May be repeated for up to 6 hours of degree credit.

HORT 5333. Professional Landscape Installation and Construction. 3 Hours.
(Formerly HORT 4033.) Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, cement and masonry construction, and low-voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or business is suggested. Graduate degree credit will not be given for both HORT 4033 and HORT 5333. Prerequisite: HORT 2003.

HORT 5403. Plant Propagation. 3 Hours.
(Formerly HORT 4403.) Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both HORT 4403 and HORT 5403. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L.

HORT 5413. Horticulture Physiology. 3 Hours.
(Formerly HORT 4413.) This course provides students with a background into the physiological processes of plants with an emphasis on horticultural crops and how the processes relate to horticultural crop production practices. Among the topics covered are photosynthesis, respiration, water relations and morphogenesis. Graduate degree credit will not be given for both HORT 4413 and HORT 5413. Prerequisite: HORT 2003 and CHEM 1073.

HORT 5503. Sustainable Nursery Production. 3 Hours.
(Formerly HORT 4503.) This course addresses issues and practices involved in production of quality woody nursery crops (e.g. trees and shrubs produced in open filed and containerized systems). Graduate degree credit will not be given for both HORT 4503 and HORT 5503.

HORT 5701L. Greenhouse Management and Controlled Environment Horticulture Laboratory. 1 Hour.
(Formerly HORT 4701L.) Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Graduate degree credit will not be given for both HORT 4701L and HORT 5701L. Corequisite: HORT 5703.

HORT 5703. Greenhouse Management and Controlled Environment Horticulture. 3 Hours.
(Formerly HORT 4703.) Operation and management of greenhouses and other controlled environments used in horticultural production. Emphasis on system design and construction, control of light intensity and photoperiod, heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems. Graduate degree credit will not be given for both HORT 4703 and HORT 5703. Prerequisite: HORT 2003 and CHEM 1073.

HORT 5801L. Greenhouse Crops Production Laboratory. 1 Hour.
(Formerly HORT 4801L.) Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Graduate degree credit will not be given for both HORT 4801L and HORT 5801L. Corequisite: HORT 5803.

HORT 5803. Greenhouse Crops Production. 3 Hours.
(Formerly HORT 4803.) Principles and practices of production and marketing of crops commonly grown in controlled environments including flowering containerized herbaceous species, geophytes, annual and perennial bedding plants, hydroponic vegetables and herbs. Graduate degree credit will not be given for both HORT 4803 and HORT 5803. Prerequisite: HORT 4703 or HORT 5703 (formerly HORT 4703).

HORT 5903. Golf and Sports Turf Management. 3 Hours.
(Formerly HORT 4903.) Turf management techniques for golf courses, and athletic fields including species selection, root-zone construction and modification, fertilization, mowing, irrigation and pest control. Graduate degree credit will not be given for both HORT 4903 and HORT 5903. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L and (HORT 2303 or HORT 3403).

HORT 5913. Rootzone Management for Golf and Sports Turf. 3 Hours.
(Formerly HORT 4913.) An overview of the fundamental concepts of the physical and chemical properties of rootzones as related to construction and turfgrass management. Graduate degree credit will not be given for both HORT 4913 and HORT 5913. Prerequisite: HORT 2303.

HORT 5921. Golf Course Operations. 1 Hour.
(Formerly HORT 4921.) This course is designed to cover specific aspects of golf course operations that would not be included in traditional turfgrass management courses. Topics will include budgeting, personnel management, tournament setup and operation, dealing with golf club committees, communication, and other relevant topics related to managing a golf course maintenance operation. Graduate degree credit will not be given for both HORT 4921 and HORT 5921. Prerequisite: HORT 4903 or HORT 5903 (formerly HORT 4903).

HORT 5932. Turf Best Management Practices. 2 Hours.
(Formerly HORT 4932.) The course covers the impacts of turfgrass management practices on turf quality and the environment. In addition, the identification, biology, and control practices for the major insects, diseases, and weeds that infest turf will be covered. Emphasis will be placed on management strategies that include both chemical and non-chemical approaches to the prevention and control of common turfgrass pests. Graduate degree credit will not be given for both HORT 4932 and HORT 5932. Prerequisite: HORT 2303 and 6 hours selected from CSES 2003, PLPA 3004, and ENTO 3013.

HORT 600V. Master's Thesis (Sp, Su, Fa). 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

HORT 602V. Special Topics in Horticulture. 1-3 Hour.
Discussion and advanced studies on selected topics in genetics, plant breeding, physiology and culture of horticultural crops. Prerequisite: Graduate standing. May be repeated for degree credit.

HORT 6033. Molecular Plant Breeding. 3 Hours.
In-depth study of genetic improvement and techniques. Covers both current and classical literature. Topics to be discussed: haploidy, genetic control of pairing, somatic instability, tissue culture and protoplast fusion, and male sterility. Lecture discussion 3 hours per week. Prerequisite: BIOL 2323 and BIOL 2321L (or ANSC 3123 and CSES 4103 or equivalent).

Hospitality Management (HOSP) Courses

HOSP 1301. Hospitality Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume and portfolio development in preparation for HOSP 4693 Hospitality Management Internship. Lecture 1 hour per week. Prerequisite: HOSP 1603 and sophomore standing.

HOSP 1603. Introduction to Hospitality Management (Sp, Fa). 3 Hours.
Study of the hospitality industry from a global perspective. Emphasizes an introduction to the different sectors of the hospitality industry: food service, lodging, travel & tourism, and marketing of the sectors. Exposes students to experienced practitioners who provide real life case studies and perspectives on management in the hospitality environment. Provides career development perspectives and instruction as well as management roles and techniques.
HOSP 2603. Purchasing and Cost Control (Sp, Fa). 3 Hours.
Food purchasing with emphasis on specifications. Relationship of food purchasing to available equipment. Receiving, storage, distribution, and inventory control. Meal quality control and costing. Food and nonfood materials, management of the purchasing process, and communication. Specification writing, menu analysis, and costing. Prerequisite: HESC or HNHI majors only.

HOSP 2611. Foodservice Sanitation. 1 Hour.
Principles and theory of food safety and sanitation in the hospitality and foodservice industries, focused on prevention of food borne illnesses and ensuring public health and consumer safety. Prerequisite: HNAD; FNHA or HOSP majors.

HOSP 2633. Lodging Property Management. 3 Hours.
Examines the organization, duties and administration of the hotel. Includes: the rooms division, convention/meeting spaces, and general business operations. Pre- or Corequisite: HOSP 1603.

HOSP 3601L. Culture and Cuisines of the World Practicum. 1 Hour.
Development of service management skills for the hospitality industry through preparation and service of food, staffing, professionalism, recipe standardization, menu planning, cost control, sanitation, safety, and overall quality assurance. Instruction for planning food flow from receiving to service of meals, including choosing proper equipment for the flow plan and service items. Laboratory 7 hrs per week. Pre- or Corequisite: HOSP 3603. Prerequisite: NUTR 1213, HOSP 2603, HOSP 2611, Junior standing and HOSP majors only.

HOSP 3603. Menu, Layout & Food Preparation (Sp, Fa). 3 Hours.
Preparation and service of food for large groups. Course includes recipe standardization, menu planning, cost control, sanitation, safety, and overall quality assurance. Instruction for planning food flow from receiving to service of meals, including choosing proper equipment for the flow plan and service items. Lecture 2 hours, laboratory 6 hours per week. Prerequisite: NUTR 1213 and HOSP 2603 and Junior standing.

HOSP 3623. Introduction to Meetings and Events Management. 3 Hours.
Focuses on the planning and management of meetings and events in the hospitality industry. Includes developing event goals and objectives, site planning and management, event set up, risk management, food and beverage planning and management, budgeting, working with event services vendors, and marketing and promotion of events and meetings. Prerequisite: HOSP 1603, HOSP 2603 and HOSP 2633.

HOSP 3653. Hospitality, Dietetic Management and Human Resources. 3 Hours.
Function and methods of management as related to the hospitality, nutrition and dietetic industries. Management principles, decision-making, organizations, interpersonal relationships, and production systems. Prerequisite: HOSP 1603 and Junior standing.

HOSP 3673. Venues Management. 3 Hours.
This course will provide students with the information, skills, and tools necessary to help provide a safe environment, reduce liability, and guide individual and group behavior at events. Students will learn how to develop a risk management and safety plan for an event and/or venue, how to identify and plan to avoid potential problems, and how to implement safety and crowd management plans to ensure a safe event. The primary focus of the course will be on live event and venue safety planning. Prerequisite: HOSP 1603 and HOSP 2603.

This course is an in-depth, comprehensive study of hospitality operations, with emphasis on financial statements and other accounting reports that are usually used by management staffs for strategic decision making. It includes the application of computer software and human resource management skills. Pre- or Corequisite: AGME 2903 or ISYS 1123 and HOSP 3633. Prerequisite: AGEC 2142 and AGEC 2141L or ACCT 2013.

HOSP 4643. Special Events Management. 3 Hours.
Hands-on study of special events. Planning activities include conception, planning, implementation, execution of the hospitality program's annual fundraising event and evaluation. The interaction between staff, customers, guests, vendors, and others necessary to implement a successful special event. Topics including marketing, public relations and volunteer coordination are implemented. Additional focus on catering through, hotels, restaurants, and private companies. Prerequisite: HOSP 1603, HOSP 2603, HOSP 3623 and HOSP majors only.

HOSP 4653. Global Travel and Tourism Management. 3 Hours.
Course recounts the history of travel, explores the future, and discusses the components of tourism from a global perspective. An overview of tourism planning at the global level will be presented. A variety of planning theories, procedures and tourism guidelines to meet the diverse needs of travelers, destination communities, hospitality organizations, public, non-governmental organizations, and the private sector will be introduced in this class. Prerequisite: HOSP 1603 and PSYC 2003 or SOCI 2013.

HOSP 4663. Hospitality Management Capstone. 3 Hours.
Integration of previous classroom, laboratory, and practical experiences through development of a comprehensive project. Additional focus on application of critical thinking, demonstration of leadership principles, interaction with industry professionals and development of an awareness of societal and ethical issues and their application to the hospitality industry. Prerequisite: HOSP 1603, HOSP 3653 and Junior standing. May be repeated for up to 6 hours of degree credit.

HOSP 4673. Destination Marketing & Operations (Fa). 3 Hours.
This course is designed to provide students with a basic understanding of the tasks and processes involved in running a successful destination management organization (DMO). The course places heavy emphasis on destination marketing. Prerequisite: HOSP 1603 and Junior standing.

HOSP 4683. Food and Wine Management, Service and Evaluation. 3 Hours.
This course provides students with knowledge of the sensory relationship of wine and food and the important role this process has on gastronomic satisfaction and gastronomic tourism. Course topics will include developing and marketing the wine/food tourism product, wine and food pairing as a hierarchical process, gastronomic identity, Old and New World traditions, managing a food and wine program, trends in food and wine, and promoting Arkansas food and wine. Students must have Junior standing and be at least 21 years old. Students who may not imbibe for any reason should speak with the instructor about an accommodation and alternative assignments. Prerequisite: Junior standing and HOSP majors only and instructor consent required.

HOSP 4693. Hospitality Management Internship. 3 Hours.
Supervised experience in an instructor approved work/learning situation relating to the hospitality industry in multiple aspects of a hospitality organization. Emphasis on application of knowledge and skills to actual job roles and responsibilities related to a future career in the hospitality industry. Requires employment in a hospitality setting for a minimum of 250 clock hours that must be completed in the semester of enrollment. Prerequisite: HOSP 1301, Junior standing, restricted to HOSP students, 500 hours of documented work-related hospitality industry experience and instructor consent. May be repeated for up to 6 hours of degree credit.

HOSP 5633. Hospitality Operations and Financial Analysis. 3 Hours.
In-depth comprehensive study, strategic planning and analysis of the manager's role in successful hotel operations including application of human resource management skills. Emphasis will be placed on strategic decision making, operating procedures, budgeting, financial analysis, problem solving skills, and the technical skills necessary for effective hospitality operations.

HOSP 5643. Meetings and Convention Management (Fa). 3 Hours.
Focuses on the planning and management of meetings and conventions in the hospitality industry.
HDFS 5653. Global Travel and Tourism Management (Sp). 3 Hours.
The course recounts the history of travel, explores the future, and discusses the components of tourism from a global perspective.

HDFS 5663. Critical Issues and Trends in Hospitality and Tourism. 3 Hours.
The hospitality industry is arguably one of the most important sources of income and foreign exchange and is growing rapidly. However, national and international crises have huge negative economic consequences. This course explores change in the world and applies this to forecasting change in the hospitality and tourism industries. This course examines the current state of the industry and makes educated predictions to the future of the lodging, cruise, restaurant, technology, and travel and tourism industries.

HDFS 5673. Destination Marketing and Operations (Sp). 3 Hours.
This course is designed to provide students with a basic understanding of the tasks and processes involved in running a successful destination management organization (DMO). This course places heavy emphasis on destination marketing. Prerequisite: HOSP 1603.

HOSP 5683. Food and Wine Management, Service and Evaluation (Fa). 3 Hours.
This course provides students with knowledge of the sensory relationship of wine and food and the important role this process has on gastronomic satisfaction and gastronomic tourism. Course topics will include developing and marketing the wine/food tourism product, wine and food pairing as a hierarchical process, gastronomic identity, Old and New World traditions, managing a food and wine program, trends in food and wine, and promoting Arkansas food and wine. Students must be at least 21 years old. Students are required to complete an alcohol compliance education program prior to taking course. Students who may not imbibe for any reason should speak with the instructor about an accommodation and alternative assignments. Prerequisite: HOSP graduate students only and instructor consent required.

HOSP 5693. Hospitality Management Internship. 3 Hours.
Supervised experience in an instructor approved work/learning situation relating to the hospitality industry in multiple aspects of a hospitality organization. Emphasis on application of knowledge and skills to actual job roles and responsibilities. Requires employment in a hospitality setting for a minimum of 250 clock hours. Prerequisite: Instructor consent.

Human Development and Family Sciences (HDFS)

Courses

HDFS 1403. Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week.

HDFS 1403H. Honors Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. Prerequisite: Honors standing.

HDFS 1423. Observation and Foundations for Teaching Young Children. 3 Hours.
Designed to acquaint students with the historical importance of early childhood education, the recognized standards for practice, the variety of program models, and career opportunities available. Emphasis will be placed on theories, evidence-based practice, ethics, diversity, and professional preparation for this knowledge-based, skill-driven field. Students will also obtain knowledge of state and federal laws pertaining to the care and education of young children.

HDFS 2401L. Infant and Toddler Development Laboratory. 1 Hour.
Introduction to infant and toddler development. Focus on observation and applied experience with children 0-3 documenting cognitive, emotional, physical, and social development, and demonstrating developmentally appropriate practice. Corequisite: HDFS 2403. Prerequisite: HDFSBS majors or HDFS minors or CATEBS-FCSE majors or instructor consent.

HDFS 2403. Infant and Toddler Development. 3 Hours.
Infant and toddler development from conception through toddlerhood with emphasis on physical, emotional, social, language, and cognitive domains. Theoretical and research-based information will be applied to developmentally appropriate practice. Historical and future perspectives will be explored as will the expanding opportunities for professional work with infants and toddlers. Observations in care centers will be assigned. Corequisite: HDFS 2401L. Prerequisite: HDFSBS majors or HDFS minors or CATEBS-FCSE majors or by instructor consent.

HDFS 2413. Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week.
This course is equivalent to HESC 2413.

HDFS 2413H. Honors Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. Prerequisite: Honors standing.
This course is equivalent to HESC 2413.

HDFS 2433. Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: HDFS 1403 or PSYC 2003.

HDFS 2433H. Honors Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: Honors standing and HDFS 1403 or PSYC 2003.

HDFS 2443. The Hospitalized Child: Child Life Programming. 3 Hours.
Introduces child life programming in health care settings. Topics include: roles and responsibilities of a Child Life Specialist, importance of play, coping techniques, family advocacy, administration and professionalism. Lecture 3 hours per week.

HDFS 2471L. Child Guidance Laboratory. 1 Hour.
Introduction to the guidance system. Focus on discipline techniques that are positive and stage-appropriate for children ages 3-8. Corequisite: HDFS 2473. Prerequisite: HDFS 2433.

HDFS 2473. Child Guidance. 3 Hours.
Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Lecture 3 hours per week plus 1 hour demonstration. Corequisite: HDFS 2471L. Prerequisite: HDFS 2433.

HDFS 2483. Family Financial Management. 3 Hours.
Economic considerations of the family in a rapidly changing society. Family finance and consumer problems are emphasized.

HDFS 2603. Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. This course is equivalent to HESC 2603.
HDFS 2603H. Honors Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. Prerequisite: Honors standing.
This course is equivalent to HESC 2603.

HDFS 3333. Language and Literacy Pedagogy for Birth through Kindergarten Educators. 3 Hours.
This course combines theory on emergent language and literacy development with research-based pedagogy for birth through kindergarten classrooms. Topics include: language and literacy development and exceptionalities, English Language Learners, environmental influences, best practice pedagogy, identifying language and literacy delays, and intervention strategies. This course includes a service learning component. Prerequisite: HDFS 2433, HDFS 2403 and HDFS 2401L.

HDFS 3423. Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003.

HDFS 3443. Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week.

HDFS 3443H. Honors Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: Honors standing.
This course is equivalent to HDFS 3443.

HDFS 3453. Parenting and Family Dynamics. 3 Hours.
Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childbearing techniques, family influences on cognitive and social development, and changes in family relationships during the life cycle. Prerequisite: HDFS majors or HDFS minors or CATEBS-FCSE majors and (HDFS 1403 or PSYC 2003) and COMM 1313.

HDFS 4313. Building Family and Community Relationships. 3 Hours.
This course will help students interested in early childhood to value the role parents play in schools and the role schools play in a community. Various models of parent involvement will be explored. Students will plan a school-community collaborative which values diverse cultures. Prerequisite: HDFS majors or HDFS minors, or instructor consent.

HDFS 4332. Curriculum and Assessment: Birth to Three Years. 2 Hours.
The course will introduce students to curriculum planning and assessment in programs serving children from birth to three years of age. Emphasis will be on responsive relationships and curriculum focused on routines and activities. Corequisite: HDFS 4332L. Prerequisite: HDFS 2403 and HDFS 2401L.

HDFS 4332L. Curriculum and Assessment: Birth to Three Years Laboratory. 2 Hours.
Laboratory. Corequisite: HDFS 4332. Prerequisite: HDFS 2403 and HDFS 2401L.

HDFS 4342. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Students will plan curriculum and assessment for children three years of age through kindergarten. Emphasis will be on professionalism, philosophy and a code of ethics. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4342L. Prerequisite: HDFS 2473 and HDFS 2471L.

HDFS 4342L. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Laboratory. Corequisite: HDFS 4342.

HDFS 4373. Field Experience in Birth through Kindergarten Programs. 3 Hours.
This course provides the student with interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 3323, HDFS 4323L, HDFS 4342, and HDFS 4342L.

HDFS 4383. Field Experience in Birth through Kindergarten Program II. 3 Hours.
This course provides students with advanced interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 4332 and HDFS 4332L and HDFS 4342 and HDFS 4342L.

HDFS 4413. Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: HDFS 2433 or PSYC 3093.

HDFS 4413H. Honors Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: Honors standing and HDFS 2433 or PSYC 3093.

HDFS 4423. Adult Development. 3 Hours.
Examine individual development beginning with the transition adulthood through middle age; approximate age ranges are 18-60 years. Content focuses on physical, cognitive, psychological, and social changes that occur throughout this period of the life span. The impact of love, work, and family on men’s and women’s movement through the transitions that comprise adulthood are emphasized. Prerequisite: HDFS 1403 or PSYC 2003 and junior standing.

HDFS 4443. Gerontology. 3 Hours.
Physiological and psychological development of the aging individual, extended family relations, service networks for the elderly, and retirement activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HDFS 1403 (or HDFS 2413 or PSYC 2003 or SCWK 2133) and junior standing.

HDFS 4451. Pre-Internship in Human Development and Family Sciences. 1 Hour.
This course prepares students for their internship experience (HDFS 4483) in Human Development and Family Sciences. Topics covered include professional and ethical behavior when working with people, families, and communities. The course will also cover professional and career development topics. By the end of the course students are expected to have secured an internship position suitable for HDFS 4483. Prerequisite: Junior standing.
HDFS 4463. Administration and Leadership in the Helping Professions. 3 Hours.
Planning, developing, operating, and evaluating programs in the helping professions, including child care and family-related agencies. Emphasis will be on administrators' roles as leaders in organizations. Topics include facilities, budget, staff development, and policy manuals. Prerequisite: HESC or HDFS majors or HDFS minors, or departmental consent.

HDFS 4473. Multicultural Families. 3 Hours.
The course provides students with opportunities to gain awareness of their own cultures and families, reflect on families from a diverse array of cultures, and develop critical thinking skills needed to effectively engage with people and families from cultures different than their own. Prerequisite: HDFS 2413.

HDFS 4483. Internship in Human Development and Family Studies. 3 Hours.
The internship experience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 60 hours per credit hour in the setting. Must be taken no sooner than the summer following completion of junior year. May be taken for an additional 3 hours of elective credit if second experience is distinctly different from first internship. Prerequisite: Junior standing and HDFS 4451. May be repeated for up to 3 hours of degree credit.

HDFS 4493. Public Policy Advocacy for Children and Families. 3 Hours.
Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: HDFS 2603 or SOCI 2013.

HDFS 4603. Environmental Sociology. 3 Hours.
The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change.
This course is cross-listed with SOCI 4603, SUST 4603.

HDFS 4763. Analytical Approaches to Research in Human Development and Family Sciences I. 3 Hours.
This course is an introduction to analytical approaches to research in human environmental sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphases in this course will be on conducting and evaluating research relevant to human development and family science majors. Students will become critical consumers of research and develop basic skills to design and interpret their own studies. Prerequisite: HDFS major.

HDFS 4773. Analytical Approaches to Research in Human Development & Family Sciences II. 3 Hours.
This course is an introduction to analytical approaches to research in human development and family sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphases in this course will be on conducting and evaluating data analyses relevant to human environmental sciences majors. Students will become critical consumers of data and develop basic skills to analyze and interpret their own data. Prerequisite: HDFS major and HDFS 4763.

HDFS 5013. Field Experience in Gerontology. 3 Hours.
Supervised research/practical experience in field setting. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HDFS 5023. Critical Issues in Aging. 3 Hours.
Consideration of current issues of aging not covered in depth in other courses. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

HDFS 5403. Family Theories and Methods. 3 Hours.
This course is an introduction to graduate study in families. The course focuses on historical and contemporary family theories and research methods that have influenced research on families. Prerequisite: Graduate standing.

HDFS 5413. Adult Development. 3 Hours.
The course covers physical, cognitive, social, and personal dimensions of adult development. The information is presented from a lifespan developmental framework which encompasses (a) a multidisciplinary perspective, (b) consideration of the impact of prior development on late life as well as socio-historical influences (c) recognition of individual differences among older persons, and (d) concern for promoting optimal functioning. Prerequisite: Graduate standing.

HDFS 5423. Theories of Human Development. 3 Hours.
Classic and contemporary theories and theoretical issues concerning human development across the life span. Prerequisite: Graduate standing.

HDFS 5433. Advanced Studies in Child Development. 3 Hours.
An in-depth examination of issues in development during infancy, early, and middle childhood. Developmental theory and accomplishments/milestones are studied in the biocultural context. Emphasis is on review and analysis of classic and recent research literature and on evaluation of theoretical perspectives based on research evidence. Prerequisite: Graduate standing.

HDFS 5443. Gerontology. 3 Hours.
Examines physiological and psychological development of the aging individual, extended family relationships, service networks for older adults, and retirement activities. Some attention given to housing and care needs of persons in advanced years. Lecture 3 hours per week, seminar format. Prerequisite: Graduate standing. This course is cross-listed with HESC 5443, GERO 5443.

HDFS 5453. Aging in the Family. 3 Hours.
This course considers theories and research on personal and family transitions and experiences in mid to late life that impact individuals and their family relationships. Applied assignments address these same issues. Prerequisite: Graduate standing.

HDFS 5473. Cognitive Health. 3 Hours.
Cognitive skills form the foundation for functioning in everyday life and these skills take on added importance in older adulthood. This course focuses on selected theoretical approaches and current research related to cognitive aging. We will review normative and non-normative cognitive changes, assessment techniques, and prevention/intervention efforts. Throughout the course we will keep the role of environment and lifespan implications in the forefront of our discussion. Prerequisite: Graduate standing.

HDFS 5483. Creativity and Aging. 3 Hours.
What happens to creativity as a person ages? This unique class will help students to understand developmental and pathological changes in the brain that can lead to changes in creative output over time. Through hands-on experiences and direct association with older adults, students will grow an appreciation for creativity produced and inspired by older people. This course is intended to provide experiences that will help the student to be able to create art programs for older adults. Prerequisite: Graduate standing.

HDFS 5493. Environments and Aging. 3 Hours.
Designing for aging is big business. The older population of the U.S. is increasing in numbers, and lives in more varied kinds of housing, from single family homes to specially designed residential units for people experiencing dementia. This course uses interdisciplinary perspectives in an on-line web-based format to explore the preferences and needs of older adults and the attributes of various physical environments that enhance their lives. Students apply this knowledge to the design and management of housing, institutional facilities, neighborhoods, and communities. Prerequisite: Graduate standing.
HDFS 5803. Gender and Aging. 3 Hours.
This course is designed to expose students to an overview of conceptual and applied issues related to how women age. Instead of focusing exclusively on women, this course will focus on women and men in order to understand the dynamic role of gender for the aging process. Students will be introduced to current theoretical and empirical work on the intersections between gender and aging. Using both life course and lifespan perspectives; biological, social, and behavioral aspects of human development and aging will be examined with respect to gender differences and similarities. Prerequisite: Graduate standing.

HDFS 5813. Gerontechnology. 3 Hours.
Population aging is combining with technological advancement to create and change the world of modern older people, their families, and their communities. This course takes an interdisciplinary approach to the understanding of the biological, environmental, and social spheres where technology and gerontology meet. Prerequisite: Graduate standing.

HDFS 5823. Mental Health and Aging. 3 Hours.
This is an advanced level course in Mental Health and Aging. The student will be introduced to the range of issues involved in this subject utilizing several theoretical perspectives within an overall systems framework. The major emotional, mental, and psychiatric problems encountered in old age will be examined along with the normal processes of the aging individual's personality, mental and brain functions. Common interventions and treatments available will be explored, as well as the consequences of no or inappropriate services. Challenges and barriers on the macro and micro systems levels will be presented with implications for the future of this field. Prerequisite: Graduate standing.

HDFS 5843. Physical Health and Nutrition in Aging. 3 Hours.
This course identifies the basic physiological changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. Prerequisite: Graduate standing.

HDFS 5853. Policy and Aging. 3 Hours.
This course introduces much of the history behind the policies and programs addressed. Prerequisite: Graduate standing.

HDFS 5873. Seminar in Long Term Care-. 3 Hours.
This course provides valuable information to the person interested in a leadership role in long-term care, but is also useful to persons who think their careers might intersect with senior living organizations or for those students who have a potential interest in long-term care options for their own parents or loved ones. The class is designed to benefit from a very successful intercession course taught each December/January intercession by adjunct professor, Steve Shields. Steve was the CEO at Meadowlark Hills Retirement Community from 1994 until 2010. He is nationally known for his ability to motivate change in long-term care settings. Taped lectures and presentations from the intercession course will provide some of the content for this class. Prerequisite: Graduate standing.

Human Environmental Sciences (HESC)

Courses

HESC 1501. Issues and Trends in Human Environmental Sciences. 1 Hour.
History of human environmental sciences and breadth of its professional opportunities. Prerequisite: AMPD, HESC, HOSP, NUTR, HDFS majors only or departmental consent.

HESC 255V. Special Topics. 1-6 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. May be repeated for degree credit.

HESC 400V. Special Problems. 1-6 Hour.
May be repeated for up to 6 hours of degree credit.

HESC 4233. Childhood Obesity: Context and Preventions. 3 Hours.
A multidisciplinary course that focuses on the context and prevention of childhood obesity. Directed readings and discussion will center on an ecological approach: identifying the problem(s) and behavioral and environmental factors and their interactions, as well as predisposing, enabling, and reinforcing factors, and action plan(s). The issue is addressed from a multidisciplinary perspective, including economics, marketing, child development, nutrition, and health behavior.

HESC 4233H. Honors Childhood Obesity: Context and Preventions. 3 Hours.
A multidisciplinary course that focuses on the context and prevention of childhood obesity. Directed readings and discussion will center on an ecological approach: identifying the problem(s) and behavioral and environmental factors and their interactions, as well as predisposing, enabling, and reinforcing factors, and action plan(s). The issue is addressed from a multidisciplinary perspective, including economics, marketing, child development, nutrition, and health behavior. This course is equivalent to HESC 4233.

HESC 455V. Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. May be repeated for up to 6 hours of degree credit.

HESC 455VH. Honors Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. Prerequisite: Honors standing. May be repeated for up to 6 hours of degree credit.

HESC 502V. Special Problems Research. 1-6 Hour.
Individual study or research for graduates in the field of human environmental sciences.

HESC 5233. Childhood Obesity: Context and Preventions. 3 Hours.
A multidisciplinary course that focuses on the context and prevention of childhood obesity. Directed readings and discussion will center on an ecological approach: identifying the problem(s) and behavioral and environmental factors and their interactions, as well as predisposing, enabling, and reinforcing factors, and action plan(s). The issue is addressed from a multidisciplinary perspective, including economics, marketing, child development, nutrition, and health behavior.

HESC 5463. Research Methodology in Social Sciences. 3 Hours.
Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in the economic and sociological problems of agriculture and Human Environmental Sciences. Prerequisite: Graduate standing. This course is cross-listed with AGED 5463.

HESC 555V. Special Topics in Human Environmental Sciences. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences.

HESC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

HESC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Human Resource and Workforce Development Education (HRWD)

Courses

HRWD 200V. Work Knowledge (Irregular). 1-19 Hour.
Credit by advanced standing examination for job knowledge as measured by program approved National Occupational Competency Testing Institute (NOCTI) assessments. May be repeated for up to 19 hours of degree credit.

Presents the theory and processes associated with human resource development (HRD) used to design and measure interventions in the areas of organization development, personnel training and development, and career development. Students will analyze organizations and study global implications of HRD, and survey topics in human resource management (HRM) that distinguish HRM from HRD. Prerequisite: Students must be admitted to the University of Arkansas and to the HRWD program.

HRWD 3123. Career Development (Su, Fa). 3 Hours.

This course introduces the concepts of career development and career theories. Career development in both the private and public sectors will be explored. Students will gain knowledge that should enable them to be effective in developing their careers and those of others.

HRWD 3133. Writing for Human Resource and Workforce Development Professionals. 3 Hours.

This course focuses on the types of formal reports typically prepared by Human Resource Development professionals with an emphasis on preparation, data collection and research, organization, style, format, graphics, and technical descriptions.

HRWD 3213. Organization Development (Sp, Su). 3 Hours.

This undergraduate-level course presents the theory and practice of organization development (OD) as a means for performance improvement at various levels, including organization, departmental unit, work group, and individual. The course covers the processes of OD, interventions, theories, and practice of OD life goals.

HRWD 3223. Managing Human Resource Development Programs. 3 Hours.

The basic aim of this course is to equip the students to examine the essential aspects of the theory and practice of managing human resource development programs. Employees require higher level of analytical, problem solving and creative skills. This course aims to help students develop the skills of employee through better understanding of mechanisms for employment equity, transparency, intellectual capital, e-learning, and career development. This course is designed to guide students through an in depth process of identifying, analyzing, and synthesizing elements related to developing, articulating, and implementing an organizational vision, mission, and strategic plan for HRD programs. Prerequisite: Junior standing.

HRWD 3313. Training and Development (Sp, Fa). 3 Hours.

This course addresses the acquisition of professional skills and strategies associated with creating and maintaining training and development activities in the workplace. It involves a regular class/workshop situation where training and development skills are practiced and encouraged and a work-based situation where skills are tried and implemented as well as assessed.

HRWD 3323. Designing and Developing Human Resource Development Programs. 3 Hours.

Students will learn to design and develop training programs. The focus is on need for training, application of learning principles, writing instructional objectives and plans, designing active training methods, using visual aids, working with groups, and evaluating training. Pre- or Corequisite: HRWD 3113 and HRWD 3313. Prerequisite: Junior standing.

HRWD 3333. Communication in Human Resource and Workforce Development. 3 Hours.

This course offers instruction on types of communication commonly encountered by Human Resource Development professionals. Emphasis is on audience and purpose analysis, topic research, visual aids, and delivery methods. Activities include preparation and delivery of extemporaneous speeches, team communication, communication with clients, and preparation and delivery of training sessions.

HRWD 4113. The Generational Dynamics in the Workplace. 3 Hours.

Focus of study on the concepts of individual and generational differences among employees in the workplace; what they are and how they affect workplace teaching and learning. Prerequisite: Senior standing.

HRWD 4123. Strategic Human Resource Development. 3 Hours.

This course introduces students to the theories and principles of Strategic HRD. Methods of aligning HRD strategy with the business strategy of the organization are discussed. Prerequisite: Junior standing.

HRWD 4133. International Human Resource Development and Cultural Differentiation. 3 Hours.

This course is designed to introduce students to concepts of international HRD and cultural differentiation that must be acknowledged when developing programs for all employees in the workplace. Prerequisite: Senior standing.

HRWD 4213. Workplace Diversity and Human Resource Development. 3 Hours.

Students will study workplace diversity and the role of HRD in implementing workplace diversity strategies and programs. Prerequisite: Senior standing.

HRWD 4223. Professional and Leadership Development. 3 Hours.

Students are introduced to professional and leadership development theories and principles. Methods and strategies for succession planning, self-development, and change are discussed. Prerequisite: Junior standing.

HRWD 4233. HRD Legal and Ethical Issues (Sp, Fa). 3 Hours.

This course covers the major employment law facts and concepts used in human resource development. Applications of the key concepts and facts are emphasized in the class. Knowledge of the employment law facts and concepts and their applications at the workplace is vital for the human resource development professional. Prerequisite: Junior standing.

HRWD 4313. Human Resource Development Program and Product Evaluation. 3 Hours.

This course covers the evaluation of HRD programs and products used in the workplace. Students will develop methods of assessing the viability of programs and products to best meet the needs of the organization. Prerequisite: Senior standing.

HRWD 4323. Instructional Technology and Design. 3 Hours.

This course addresses the application of instructional technology and design associated with the needs assessment and design of course materials in human resource development. The emphasis is on the learner in workplace situations. The course will cover the history of the field and its current status. Prerequisite: Junior standing.

HRWD 4333. Human Resource Development Capstone. 3 Hours.

This course will serve as the assessment course for students in the HRWD program. The course work will evaluate all aspects of the HRD curriculum, specifically the three pillars of HRD: career development, organization development, and training and development. Prerequisite: HRWD 3113, HRWD 3213, HRWD 3313 and senior standing.

HRWD 440V. Human Resource Development Practicum/Internship (Irregular). 1-6 Hour.

The purpose of this course is to apply the HRD theories and best practices studied in the program curriculum with the workplace. May be repeated for up to 12 hours of degree credit.

HRWD 450V. Experiential Learning (Irregular). 1-19 Hour.

This course is limited to persons qualifying for experiential credit to be applied to the Human Resource Development Concentration only. Credit is awarded for documented experiential or occupational learning based on a standardized format as suggested by the Council for the Advancement of Experiential Learning (CAEL). Credit for certain occupational training or professional certifications may also be earned using the American Council on Education (ACE) guidelines. May be repeated for up to 19 hours of degree credit.
An overview of human resource and workforce development (HRWD) in organizations. Focus on the integration of training and development, career development, and organization development. Topics include strategic planning for human resource and workforce development, needs assessment, program development, application of workplace learning theories, career development theories and methods, and application of organization learning theories.

HRWD 5123. Career Transitions (Sp). 3 Hours.
This advanced level course is intended for career development professionals and/or subject-matter experts interested in improving their career development skills within a structured or unstructured learning environment. The emphasis in this course is on gaining career development techniques and planning formal and informal career development strategies for the individual or the organization.

HRWD 5133. HRWD Diversity Issues (Fa). 3 Hours.
This course emphasis is on current trends and case studies of diversity in the workplace. Prerequisite: Graduate standing.

HRWD 5213. Organizational Analysis. 3 Hours.
This course introduces the analysis process in organizations. The instruction and activities will enable students to develop skills in conducting organizational needs analysis (OA) as a basis for performance improvement in the workplace.

HRWD 5223. Strategic Human Resource and Workforce Development Education. 3 Hours.
A comprehensive examination of the issues, topics, principles, theories, philosophies and concepts facing tomorrow's HRD professionals. Includes the transformation of strategic HRD; the role of strategic HRD leaders as change agents; the principles of strategic HRD; professional practice do mains of strategic HRD; organizational learning, performance, and change; and analysis, design, and evaluation of HPI interventions. Students will identify practices for informing decisions related to the formation of strategic HRD planning and implementation efforts.

HRWD 5233. HRWD Employment, Legal, and Ethical Issues (Sp). 3 Hours.
This course focuses on employment, legal and ethical issues within the workplace. Students will gain knowledge that should enable them to be effective in understanding current employment concerns, equal employment opportunity (EEO) laws, and ethical practices within the workplace and how these employment concerns, laws, and practices impact society.

HRWD 5313. Facilitating Learning in the Workplace (Sp). 3 Hours.
Facilitation of learning and performance improvement in the workplace. Application of instructional methods, formal and informal learning strategies, coaching, team building, and formal and informal on-the-job learning tactics. Focus on facilitating individual and group learning to affect organizational change.

HRWD 5323. International HRWD. 3 Hours.
Exploration of how globalization and culture affect the workplace and the human resource development profession. Difference between global HRD and HRD practiced in a single country. Impact of culture on every aspect of HRD implementation and practice. Examination of HRD practices in different regions of the world.

HRWD 5333. HRWD Technological Resources (Fa). 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology resources used in HRWD. Primary course elements are instructional design characteristics of technology, theoretical and practical uses of technology resources to facilitate and manage learning, and selecting the best or most appropriate technological resources. The course uses online technologies and learning experiences.

HRWD 5433. HRWD Capstone (Sp, Su, Fa). 3 Hours.
This course is the final course for the degree in Human Resource and Workforce Development. Students will be assessed on their overall knowledge and understanding of the field. The focus of this course will be research and analysis of classic works and current trends. Pre- or Corequisite: 27 MED credit hours completed.

HRWD 571V. Independent Study. 1-3 Hour.
Independent study. May be repeated for up to 3 hours of degree credit.

HRWD 572V. Workshop. 1-3 Hour.
Workshop. Prerequisite: Advanced graduate standing. May be repeated for up to 3 hours of degree credit.

HRWD 573V. Experiential Learning. 1-18 Hour.
This course is designed for the student to attain paid or unpaid experiential development. May be repeated for up to 18 hours of degree credit.

HRWD 6313. Project and Program Evaluation (Even years, Sp). 3 Hours.
This course is a doctoral level course designed as an introduction to project and program evaluation in human resource and workforce development. Emphasis is on (a) project design and development, (b) program development and improvement, and (c) the integration of evaluation with strategic planning and performance improvement.

HRWD 6323. Qualitative Research Design and Analysis (Even years, Sp). 3 Hours.
This course is designed to introduce HRWD students to qualitative research design, data collection and data analysis. Course content includes data collection through interviews, field observation, records research, ethical issues associated with conducting research in organizational settings, and internal and external validity problems. Prerequisite: ESRM 5013 and ESRM 6403.

HRWD 6333. Quantitative Research Design and Analysis (Even years, Fa). 3 Hours.
This course provides HRWD students with the tools and abilities to design and implement an original research project using quantitative measures. Primary course elements are research design application, theoretical settings of research, and nesting research within an appropriate literature base. The course uses online technologies and on-campus learning experiences. Prerequisite: ESRM 5013 and ESRM 6403.

HRWD 6343. Principles and Techniques of Research in HRWD. 3 Hours.
This course addresses the principles and techniques underlying organizational research, both experimental and non-experimental. It covers the basic philosophy of science and research methods and gives attention to the practical problems of design, data collection sampling, and data analysis. Prerequisite: ESRM 5013 and ESRM 6403.

HRWD 6413. Career Theory and Decision Making (Fa). 3 Hours.
This course focuses on comprehensive understanding of career theory and decision making to enhance career development that emphasizes technology, cross-cultural issues, practical application, and the global economy. Career development in both the private and public sectors will be explored. Students will gain knowledge that should enable them to be effective in developing their careers and those of others using multicultural considerations and a global perspective.

HRWD 6423. Practicum. 3 Hours.
Practicum is designed to allow doctoral students in workforce development education an opportunity to apply the theoretical knowledge, skills and abilities to training, teaching, or research projects. May be repeated for up to 6 hours of degree credit.
HRWD 6513. Organization Development (Odd years, Su). 3 Hours.
This course teaches development of organization activities that intervene in the interaction of people systems to increase the effectiveness of using a variety of applied behavioral sciences. It includes the dynamics of organizations, the genesis of organizational theory and evolution of organizational dynamics, including examination of system structure, chaos theory, group dynamics and interaction, leadership theories, diversity issues impacting organizations, and techniques of change agent intervention.

HRWD 6523. Leadership Models and Concepts (Odd years, Fa). 3 Hours.
This doctoral course concentrates on using commonly accepted principles of leadership to develop skills needed in workforce development education settings.

HRWD 6533. HRWD Ethical and Legal Issues (Fa). 3 Hours.
Focuses on ethical and legal issues within the workplace and behavioral science research. Students gain knowledge that should enable them to understand ethical and legal issues within their workplace and how they can impact society.

HRWD 6613. Learning and Teaching Theories (Odd years, Sp). 3 Hours.
Models and philosophies of important theorists in the field of teaching and learning.

HRWD 6633. Technology Systems in Human Resource and Workforce Development (Odd years, Fa). 3 Hours.
This course provides students with the tools and abilities to evaluate and understand technology systems in HRWD. Primary course elements are instructional design characteristics of technology systems, theoretical and practical settings that use technology systems to facilitate and manage learning, and selecting the best or most appropriate system for organizational use. The course uses online technologies and learning experiences.

HRWD 6643. History and Foundations of HRWD. 3 Hours.
This course focuses on the history of human resource development as a practice and a profession. Particular emphasis in this course is placed on the influence of philosophy on developing HRD theory and practice. As students progress through this course they can expect to gain greater understanding of how HRD developed as a profession, the historical root of its theory and practice, and an understanding of how to evaluate the philosophical assumptions of current HRD theory and practice.

HRWD 6713. HRWD Curriculum Design (Su). 3 Hours.
Determining principles of curriculum development, implementation, and evaluation with emphasis in human resource development education.

HRWD 6723. Entrepreneurial Development (Irregular). 3 Hours.
An advanced graduate-level course examining the history, economics, theory and practice of developing Entrepreneurial enterprises. This course presents an overview of the business and organizational systems with which an entrepreneur should be familiar.

HRWD 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Humanities (HUMN) Courses

HUMN 1114H. Honors Roots of Culture to 500 C.E. (Fa). 4 Hours.
This course constitutes the first segment of a four-semester interdisciplinary study of the Egyptian Book of the Dead, the Torah, the Roman Colosseum, Hinduism, and Confucianism. Open to first-year Honors students by invitation only. Corequisite: Drill component.

HUMN 1124H. Honors Equilibrium of Cultures 500-1600 (Sp), 4 Hours.
This course constitutes the second segment of a four-semester sequence focusing on world cultures. Semester 2 may include the interdisciplinary study of Islam, early Byzantium, Gothic architecture, Heian Japan, and the ancient Maya. Open to first-year Honors students by invitation only. Corequisite: Drill component.

HUMN 2013. Introduction to Buddhism (Fa). 3 Hours.
Beginning with an analysis of the fundamental principles that underlie all Buddhist thought and practice, students will proceed through the major precepts that have historically distinguished the traditions of Southern and Northern Asia. Attention will also be given to Buddhism's spread through Europe and North America in the twentieth century.

HUMN 2114H. Honors Birth of Modern Culture 1600-1900 (Fa). 4 Hours.
This course constitutes the second segment of a four-semester sequence focusing on world cultures. Semester 3 may include the interdisciplinary study of Renaissance Venice, feudal Japan, Moghul India, Jefferson's Monticello, and Darwinism. Open to second-year Honors students by invitation only. Corequisite: Drill component.

HUMN 2124H. Honors Twentieth Century Global Culture (Sp). 4 Hours.
This course constitutes the fourth segment of a four-semester sequence focusing on world cultures. Semester 4 may include the interdisciplinary study of the Brooklyn Bridge, the Mexican Revolution, African literature, the Vietnam Memorial, and the atomic age. Open to second-year Honors students by invitation only. Corequisite: Lab component.

HUMN 2203H. Honors Humanities Abroad (Irregular). 3 Hours.
This course is intended as a companion to the Honors Humanities Project (H2P). Students participate in faculty-led site visits to selected countries to facilitate an interdisciplinary exploration of global humanities topics covered in the H2P sequence (HUMN 1114, HUMN 1124, and HUMN 2114). Prerequisite: HUMN 1114H or HUMN 1124H or HUMN 2114H or HUMN 2124H and honors standing. May be repeated for up to 6 hours of degree credit.

HUMN 2213. Introduction to World Religions (Sp). 3 Hours.
A survey of the major religions, including--but not limited to--Hinduism, Buddhism, Judaism, Islam, and Christianity.

HUMN 2303. Religions of Asia (Sp). 3 Hours.
This course explores the narrative, ritual, and communal practices of Hinduism, Jainism, Buddhism, Taoism, Confucianism, Shinto, Islam, and Sikhism.

HUMN 3163. On Death and Dying (Sp, Su, Fa). 3 Hours.
Reviews the theory and humanistic importance of the concepts of death and dying in society. An experimental option and interdisciplinary faculty presenters will be part of the format. Prerequisite: Junior standing. This course is cross-listed with SCWK 3163.

HUMN 3923H. Honors Colloquium (Irregular). 3 Hours.
Treats a special topic or issue offered as a part of the Honors Program. Prerequisite: Honors candidacy. May be repeated for degree credit.

HUMN 425V. Colloquium (Irregular). 1-6 Hour.
An interdisciplinary, value-oriented discussion course. May be repeated for up to 6 hours of degree credit.

HUMN 425VH. Honors Colloquium (Irregular). 1-6 Hour.
An interdisciplinary, value-oriented discussion course. May be repeated for up to 6 hours of degree credit. This course is equivalent to HUMN 425V.

Industrial Engineering (INEG) Courses

INEG 2001. Industrial Engineering Seminar (Fa). 1 Hour.
Overview of the Department of Industrial Engineering: faculty and their backgrounds and interests, staff and the services they provide, facilities, curricular requirements, extracurricular opportunities, post-graduate opportunities.
INEG 2103. Introduction to Industrial Engineering (Fa). 3 Hours.
Introduction to the technical content of industrial engineering and the use of computing in the solution of traditional industrial engineering problems. Computer tools include spreadsheets, programming, and mathematical analysis software. Corequisite: Lab component.

Applications to engineering problems of probability theory, discrete and continuous random variables, descriptive statistics, single-population point and interval estimation, single-population hypothesis testing, goodness-of-fit testing, and contingency table testing. Corequisite: Drill component. Prerequisite: MATH 2564.

INEG 2313H. Honors Applied Probability and Statistics for Engineers I (Sp, Fa). 3 Hours.
Applications to engineering problems of probability theory, discrete and continuous random variables, descriptive statistics, single-population point and interval estimation, single-population hypothesis testing, goodness-of-fit testing, and contingency table testing. Corequisite: Drill component. Prerequisite: MATH 2564. This course is equivalent to INEG 2313.

INEG 2333. Applied Probability and Statistics for Engineers II (Sp, Fa). 3 Hours.
Applications to engineering problems of two-population point and interval estimation, two-population hypothesis testing, linear regression, correlation, design of experiments, analysis of variance, and nonparametric statistics. Introduction to statistical quality control. Prerequisite: INEG 2313.

INEG 2403. Industrial Cost Analysis (Sp). 3 Hours.
Use of accounting information for planning and control with emphasis on the engineering viewpoint; introduction to general accounting procedures; principles of cost accounting and other aspects of production costs; budgeting, depreciation, taxes, distribution of profits, securities, sources of corporate capital, interpretation of financial statements, and other related topics. Laboratory required. Corequisite: Lab component.

INEG 2413. Engineering Economic Analysis (Sp, Fa). 3 Hours.
Economic aspects of engineering, including current economic problems and the treatment of estimates when evaluating alternative courses of action. Methods of selection and replacement of equipment and break-even points of operation; desirability of new processes or projects where asset life, rate of return on investment, and first, fixed, differential, marginal, and sunk costs must be considered. Corequisite: Drill component. Prerequisite: MATH 2554.

INEG 2812H. Honors Industrial Engineering Research Experience I. 2 Hours.
Introduction to the research of the faculty of the Department of Industrial Engineering for the purpose of matching students with an undergraduate research advisor. Development of skills in using electronic resources to conduct background research on individuals and topics in the industrial engineering academic community. Prerequisite: Instructor consent and honors standing.

INEG 3513. Manufacturing Processes (Sp). 3 Hours.
This course focuses on the manufacturing processes that impart geometry and properties to engineering materials including casting, metalworking, machining, joining, heat treatment, and polymer processes. Process selection and analysis, design-for-manufacturing principles, cost estimation, and selection of process parameters are covered. Lab component covers communication of manufacturing specifications via engineering drawings. Prerequisite: MEEG 2303. Corequisite: Lab component.

INEG 3613. Introduction to Operations Research (Sp). 3 Hours.
Introduction to modeling and analysis of deterministic operations design and planning problems using formal optimization algorithms and software. Identification and formulation of appropriate applications, linear programming, sensitivity, network flows/transportation/assignment problems, shortest paths, and integer linear programming. Prerequisite: INEG 2103 and MATH 2574.

INEG 3623. Simulation (Fa). 3 Hours.
The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Corequisite: Drill component. Pre- or Corequisite: INEG 2333. Prerequisite: INEG 2413 and CSCE 2004.

INEG 3623H. Honors Simulation (Fa). 3 Hours.
The development and use of discrete-event simulation models for the analysis and design of systems found in manufacturing, distribution, and service contexts. Coverage includes conceptual modeling, model translation to computer form, statistical input models, random number generation and Monte Carlo methods, experimentation and statistical output analysis, and queuing analysis. Includes the use of modern computer simulation languages. Corequisite: INEG 2333 and drill component. Prerequisite: INEG 2413 and CSCE 2004. This course is equivalent to INEG 3623.

INEG 3714. Work Methods and Ergonomics. 4 Hours.
Ways of designing jobs, machines, operations and work environments so they are compatible with human capacities and limitations. Work methods topics include methods analysis, time studies, work sampling and learning curves. Cognitive and physical capabilities and limitations of humans are addressed through the study of human information processing, motor control theory, anthropometry, biomechanics, work physiology and manual material handling. Design of controls and displays, hand tools and workstations, along with work related musculoskeletal disorders. Laboratory required. Corequisite: Lab component. Pre- or Corequisite: INEG 2333.

INEG 3812H. Honors Industrial Engineering Research Experience II. 2 Hours.
Development of an undergraduate research proposal. Introduction to the peer review process. Examination of conference travel, nationally-competitive award, and graduate fellowships. Emphasis on technical communication skills. Prerequisite: INEG 2812H and honors standing.

INEG 400VH. Honors Thesis (Sp, Su, Fa). 1-3 Hour.
For Honors College students majoring in Industrial Engineering only. Prerequisite: Honors college students only and instructor consent.

INEG 410V. Special Topics in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Senior standing. May be repeated for up to 3 hours of degree credit.

INEG 410VH. Honors Special Topics in Industrial Engineering (Irregular). 1-3 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: senior standing. May be repeated for up to 3 hours of degree credit. This course is equivalent to INEG 410V.

INEG 411V. Individual Study in Industrial Engineering (Sp, Su, Fa). 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Instructor consent.

INEG 411VH. Honors Individual Study in Industrial Engineering (Sp, Su, Fa). 1-3 Hour.
Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Instructor consent and honors candidacy. This course is equivalent to INEG 411V.

INEG 4223. Occupational Safety and Health Standards. 3 Hours.
Survey of existing and proposed standards by examining fundamental physical, economic, and legal bases. Performance vs. specific standards. Enforceability and data collection. National consensus and promulgation process. Includes a computer-based design project. Prerequisite: INEG 2313.
INEG 4223H. Honors Occupational Safety and Health Standards (Irregular). 3 Hours.
Survey of existing and proposed standards by examining fundamental physical, economic, and legal bases. Performance vs. specific standards, enforceability and data collection. National consensus and promulgation process. Includes a computer-based design project. Prerequisite: INEG 2313.
This course is equivalent to INEG 4223.

INEG 4253. Leadership Principles and Practices (Fa). 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessons learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253.
Prerequisite: Instructor consent.
This course is cross-listed with INEG 4253H.

INEG 4253H. Honors Leadership Principles and Practices (Fa). 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessons learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253.
Prerequisite: Honors standing and instructor consent.
This course is cross-listed with INEG 4253.

INEG 4323. Quality Engineering and Management. 3 Hours.
Provides the student with complete coverage of the functional area of "Quality Assurance" ranging from the need for such a function, how it works, techniques utilized, and managerial approaches for insuring its effectiveness. Prerequisite: INEG 2333.

INEG 4343. Cognitive Ergonomics. 3 Hours.
Studies of human cognition in work settings in order to enhance performance of cognitive tasks through an understanding of cognitive processes (e.g., attention, perception errors, decision making, workload) required of operators in modern industries. Emphasis lies on how to (re)design human-machine interfaces and cognitive artifacts so that human well-being and system performance are optimized in work environments. Prerequisite: CSCE 2004.

Fundamentals of modeling risk, analyzing risk, and managing risk in a variety of industrial and government decision-making settings. Risk measurement and model building, uncertainty quantification, and multi-objective trade-offs. Prerequisite: INEG 2313 and INEG 4553.

INEG 4423. Advanced Engineering Economy. 3 Hours.
Preparation of feasibility studies, including cost estimation, risk and uncertainty, sensitivity analysis and decision making. Effects of taxes, depreciation and financing costs on cash flows. Prerequisite: INEG 2413.

INEG 4423H. Honors Advanced Engineering Economy. 3 Hours.
Preparation of feasibility studies, including cost estimation, risk and uncertainty, sensitivity analysis and decision making. Effects of taxes, depreciation and financing costs on cash flows. Prerequisite: INEG 2413.
This course is equivalent to INEG 4423.

INEG 4433. Systems Engineering and Management. 3 Hours.
Overview of the fundamental concepts underlying the management of engineering. Reviews the engineering decision process within the life cycle. Examines implementation of basic management functions in technical organizations and development of strategy tools within a complex organization. Prerequisite: INEG 2403.

INEG 4433H. Honors Systems Engineering and Management (Fa). 3 Hours.
Overview of the fundamental concepts underlying the management of engineering. Reviews the engineering decision process within the life cycle. Examines implementation of basic management functions in technical organizations and development of strategy tools within a complex organization. Prerequisite: INEG 2403.
This course is equivalent to INEG 4433.

INEG 4443. Project Management (Irregular). 3 Hours.
Analysis of the strategic level of project management including planning, organizing, and staffing for successful project execution. Professional creativity, motivation, leadership, and ethics are also explored. At the tactical level, project selection, control, and systems management are analyzed. Systems development and decision support tools for project management are studied. Prerequisite: Senior standing.

INEG 4443H. Honors Project Management (Irregular). 3 Hours.
Analysis of the strategic level of project management including planning, organizing, and staffing for successful project execution. Professional creativity, motivation, leadership, and ethics are also explored. At the tactical level, project selection, control, and systems management are analyzed. Systems development and decision support tools for project management are studied. Prerequisite: Senior standing.
This course is equivalent to INEG 4443.

INEG 4453. Productivity Improvement. 3 Hours.
Analysis of common productivity problems. Development of skills required to diagnose problems; measure productivity; develop improvement strategies; and provide for the implementation and maintenance of productivity measurement and improvement systems. Prerequisite: Senior standing.

INEG 4533. Application of Machine Vision. 3 Hours.
Automated machine vision applied to assembly and inspection tasks traditionally performed by human operators; development of application by acquiring image, processing image data, analyzing image and transmitting results; application analysis, selection and economics. Laboratory required. Corequisite: Lab component. Prerequisite: Senior standing.

INEG 4543. Facility Logistics (Irregular). 3 Hours.
The design and analysis of efficient logistics systems at the facility level, with an emphasis on distribution facilities. Unit load, break bulk, crossdock and order fulfillment centers and their component systems and software. Automated and manual systems. Corequisite: Lab component. Prerequisite: INEG 2413 and INEG 3613.

INEG 4553. Production Planning and Control. 3 Hours.
Strategy and competition, forecasting, aggregate planning, inventory control subject to known demand, inventory control subject to uncertain demand, supply chain management, push and pull production control systems, and operations scheduling. Pre or Corequisite: INEG 3613. Prerequisite: INEG 2333.
INEG 4563. Industrial Robotics (Fa), 3 Hours.
An interdisciplinary treatment of: industrial robotics; manipulator anatomy, control, and programming; end-of-arm tooling; sensors & sensing; system integration and safety; future trends. Significant out-of-class programming assignments to solve common industrial automation problems. Corequisite: Lab component. Prerequisite: Senior standing.

INEG 4583. Renewable Energy: Green Power Sources. 3 Hours.
Current developments in renewable energy from a green power source where electricity, heating and fuel supply can be obtained other than typical energy sources. Technical and economical feasibilities and economic analyses of renewable energy considered for use in residential, small businesses, and industrial complexes. Prerequisite: Senior standing.

INEG 4593. Manufacturing Systems. 3 Hours.
This course is designed to highlight the major topics in manufacturing systems. Different manufacturing models and metrics are emphasized. This course also introduces classification, general terminology, technical aspects, economics, and analysis of manufacturing systems. Corequisite: Lab component. Prerequisite: INEG 3513 or graduate standing.

INEG 4633. Transportation Logistics (Irregular). 3 Hours.
Quantitative aspects of transportation and logistics involving analysis and optimization. Topics include: facility location analysis, network design, network flow and transportation modeling, vehicle routing, fleet sizing, driver assignment, and supply chain issues (logistics demand, role of inventory in the network, role of technology, etc.). Prerequisite: INEG 2333 and INEG 3613.

INEG 4683. Decision Support in Industrial Engineering (Sp). 3 Hours.
Reinforcing important computer programming methods using industrial engineering-based applications. Students will utilize Microsoft Excel and Visual Basic for Applications to develop custom solutions to challenging industrial engineering problems. Emphasis on computational proficiency and computing productivity in a spreadsheet-based setting. Prerequisite: CSCE 2004 and INEG 2313.

INEG 4733. Industrial Ergonomics. 3 Hours.
Gives background and experience in measurement and evaluation of human performance as it pertains to the working environment. The physical, physiological and psychological capabilities of the tasks they are to perform. Laboratory projects required. Prerequisite: INEG 4723 and INEG 2333.

INEG 4812H. Honors Industrial Engineering Research Experience III. 2 Hours.
Completion of an undergraduate research thesis. Introduction to the identification of outlets for dissemination of industrial engineering research. Introduction to the process of identifying opportunities for future extensions of completed research. Prerequisite: INEG 3812H and honors standing.

INEG 4833. Introduction to Database Concepts for Industrial Engineers. 3 Hours.
An introduction to the basic principles of database modeling and technologies for industrial engineers. Coverage includes analyzing user requirements, representing data using conceptual modeling techniques (e.g., UML, ERD), converting conceptual models to relational implementations via database design methodologies, extracting data via structured query language processing, and understanding the role of database technology in industrial engineering application areas such as inventory systems, manufacturing control, etc. The application of a desktop database application such as Access will be emphasized. Prerequisite: CSCE 2004.

INEG 4911. Industrial Engineering Capstone Experience I. 1 Hour.
Develop a written and oral proposal for a comprehensive project for an industrial sponsor. Conduct background research, data collection, and preliminary analysis using industrial engineering tools; define objectives, performance measures, and deliverables; identify and schedule required tasks. Pre- or Corequisite: INEG 2001, INEG 3613, INEG 3623, INEG 3714 or INEG 3723, INEG 4433, and INEG 4553.

INEG 4923. Industrial Engineering Capstone Experience II. 3 Hours.
Develop a written and oral report for a comprehensive project for an industrial sponsor. Complete identified tasks and measure success in achieving defined objectives using industrial engineering tools; create and document deliverables. Students must have successfully completed INEG 4911 in the immediately prior semester. Prerequisite: INEG 3613, INEG 3623, and INEG 4911.

INEG 5123. Industrial Engineering in the Service Sector (Irregular). 3 Hours.
Review of the development of industrial engineering into the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service. Emphasizes those principles and methodologies applicable to the solutions of problems within the service industries. Prerequisite: Graduate standing. This course is cross-listed with OMGT 5133.

INEG 513V. Master's Research Project and Report (Sp, Su, Fa). 1-6 Hour.
Required course for students electing the report option.

INEG 514V. Special Topics in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics not covered in other courses. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

INEG 515V. Individual Study in Industrial Engineering (Sp, Su, Fa). 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate industrial engineering program to suit individual requirements. Prerequisite: Graduate standing.

INEG 5243. Automated Manufacturing (Irregular). 3 Hours.
Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality, and economics. Emphasis on manufacturability.

INEG 5253. Leadership Principles and Practices (Fa). 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessens learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253.

INEG 5253. Special Topics in Industrial Engineering. 3 Hours.
Introduction to manufacturing processes and concurrent engineering in the electronics industry. Survey of electronics components and products and the processes of fabrication and assembly. Principles of design, productivity, quality, and economics. Emphasis on manufacturability.

INEG 5263. Engineering Statistics. 3 Hours.
A graduate level engineering statistics course covering functions of random variables, properties and distributions of random samples, theory of statistical inference, and rationales of testing hypotheses and constructing confidence intervals. Prerequisite: MATH 2574 and INEG 2313.

INEG 5313. Engineering Applications of Probability Theory. 3 Hours.
Introduction to probability, discrete random variables, continuous random variables, multiple random variables, sequences of Bernoulli trials. Applications of these topics from inventory, reliability, quality control.

INEG 5323. Engineering Applications of Stochastic Processes. 3 Hours.
Renewal processes, Poisson processes, discrete-time Markov chains, continuous-time Markov chains. Applications of these topics from inventory, reliability, quality control, queueing.

INEG 5333. Design of Industrial Experiments (Irregular). 3 Hours.
Statistical analysis as applied to problems and experiments in engineering and industrial research; experiment design and analysis; probability; and response surface analysis. Prerequisite: INEG 2313 or equivalent.
INEG 5343. Advanced Quality Control Methods (Irregular). 3 Hours.
Acceptance sampling by attributes; single, double, sequential, and multiple sampling plans; sampling plans; sampling plans of Department of Defense; acceptance sampling by variables; Bayesian acceptance sampling; rectifying inspection for lot-by-lot sampling; control charts; special devices; and procedures. Prerequisite: INEG 2313.

INEG 5373. Repairable Systems Modeling (Irregular). 3 Hours.
Applications of probability, statistics, simulation and optimization to problems related to 1) modeling the performance of repairable equipment; 2) designing optimal inspection and maintenance policies for repairable equipment; and 3) optimizing the allocation of maintenance resources.

Fundamentals of modeling risk, analyzing risk, and managing risk in a variety of industrial and government decision-making settings. Risk measurement and model building, uncertainty quantification, and multi-objective trade-offs. Credit cannot be earned for both INEG 4383 and INEG 5383.

INEG 5393. Applied Regression Analysis for Engineers (Irregular). 3 Hours.
Present concepts and applications to introduce statistical tools for discovering relationships among variables. Focus on fitting and checking linear and nonlinear regression models. Practical tools for engineers.

Overview of cost estimation techniques and methodologies applied to manufacturing and service organizations. Accomplished through detailed analysis of the cost estimation development process and various cost estimation models. Topics include data collection and management, learning curves, activity based costing, detailed and parametric estimation models, and handling risk and uncertainty. Prerequisite: INEG 2313.
This course is cross-listed with OMGT 5433.

INEG 5443. Decision Models. 3 Hours.
Focus on quantitative decision models for technical and managerial problems for private and public organizations. Topics include shareholder value, stakeholder value, Value-Focused Thinking, axioms of decision analysis, decision making challenges, decision traps, cognitive biases, decision processes, decision framing, influence diagrams, value hierarchy structuring, designing creative alternatives, singe objective models, multiobjective additive value model, swing weights, sensitivity analysis, portfolio decision models with binary linear programming, probability elicitation, Bayes Law, decision trees, Monte Carlo simulation, expected value, dominance (deterministic and stochastic), tornado diagrams, value of information, risk preference, utility models, expected utility, and communicating analysis insights. Prerequisite: INEG 2313.
This course is cross-listed with OMGT 5443.

INEG 5523. Topics in Automated Systems (Irregular). 3 Hours.
To understand current developments in applications of flexible automation to industrial processes. Robotics, machine vision and other sensors, human machine interface, AML/2 and V+ programming languages.

INEG 5533. Network Optimization in Transportation Logistics (Sp). 3 Hours.
Focus on quantitative modeling and analysis of network optimization problems and their application in logistics system design and operation. Topics include network design and routing and location analysis, with emphasis on the application of both exact and heuristic solution techniques for large-scale instances of such problems. Prerequisite: INEG 5613.

INEG 5543. Distribution Center Design & Operations (Irregular). 3 Hours.
To introduce the student to the field of facility logistics, as applied to distribution centers (DCs). The fundamental areas of facility design and operations (material handling systems) will be covered. Prerequisite: INEG 5613.
INEG 5813. Introduction to Simulation (Irregular). 3 Hours.
Development and use of discrete-event simulation models for the analysis and
design of systems found in manufacturing, distribution, and service contexts.
Coverage includes conceptual modeling, model translation to computer form,
statistical input models, random number generation and Monte Carlo methods,
experimentation and statistical output analysis, and queuing analysis. For off-
campus, distance education students only.

INEG 5823. Systems Simulation I (Irregular). 3 Hours.
Random number generation, random variate generation, timekeeping in simulations,
discrete event modeling, construction of digital simulation models, statistical analysis
of simulation results, and analysis of simulation experiments utilizing a computer
programming language. Prerequisite: INEG 3623 or INEG 5803 or equivalent.

INEG 5843. Scheduling and Sequencing I (Irregular). 3 Hours.
An introduction to constructive algorithms and various operations research
approaches for solving sequencing and scheduling problems. The NP-completeness
of most scheduling problems leads to a discussion of computational complexity,
the use of heuristic solution methods, and the development of worst case bounds.
Prerequisite: INEG 3613 and computer programming proficiency.

INEG 600V. Master's Thesis (Sp, Su, Fa). 1-3 Hour.
Master's Thesis. May be repeated for degree credit.

INEG 6113. Linear Optimization (Fa). 3 Hours.
A precise treatment of linear programming. Theory of convex sets, linear
inequalities; development of the simplex method; duality theory; post optimality
application and interpretation. Variants of the simplex methods and interior-point
algorithms are discussed. Prerequisite: INEG 5613.

INEG 614V. Special Topics for Doctoral Students in Industrial Engineering. 1-3 Hour.
Consideration of current industrial engineering topics at the doctoral level that are
not covered in other courses. Prerequisite: PhD student in Industrial Engineering or
consent of the instructor. May be repeated for up to 6 hours of degree credit.

INEG 6213. Integer Programming (Sp). 3 Hours.
This course offers the theory needed to model and efficiently solve large-scale
binary, mixed and general integer programs. The tools needed to assess the
computational complexity of these problems will be fully studied. Additional topics
include the conceptual foundation required for the development of cutting plane,
branch-and-price, Lagrange relaxation and constraint programming approaches.
Implementation considerations specific to preprocessing, valid inequality generation
and solution methodology convergence will be emphasized. Prerequisite:
INEG 6113.

INEG 6313. Network Optimization (Fa). 3 Hours.
A theorem-proof based advanced study providing rigorous exposition of foundational
network optimization concepts including relevant optimization theory, algorithm
development techniques, complexity analysis, data structures, and important
applications. Prerequisite: INEG 6113.

INEG 6363. Generalized Linear Models (Irregular). 3 Hours.
Introduce the generalized linear model (GLM), inference, likelihood and diagnostics.
Apply log linear and logistic models. Develop techniques for growth curves, and
longitudinal and survival data. Cover spatial and normal linear models, and dynamic
GLM for dependent data.

INEG 6443. Advanced Decision Analysis. 3 Hours.
The purpose of this course is to prepare the student to perform PhD and MS
development coursework. Also includes management of information systems
concepts. This course requires extensive use of computer systems. Prerequisite:
ACCT 2013 or WCOB 1023, and MATH 2053 each with a grade of C or better.
ISYS 3293. Systems Analysis and Design. 3 Hours.
Practice and application of one structured analysis methodology; development of structured analysis specification; exposure to other methodologies; quality assurance and walkthroughs; survey of real systems and their components. Prerequisite: ISYS 2263 or CSCE 2014 with a grade of C or better.

ISYS 3393. Business Application Development Fundamentals. 3 Hours.
Principles of design and development of windows and web applications using cutting edge visual development tools. The programming language will be a modern language used widely in industry, and the focus will be on its use in client-server, web, and/or mobile applications. Pre- or Corequisite: ISYS 3293. Prerequisite: ISYS 2263 or CSCE 2014 with a grade of "C" or better.

ISYS 4003H. Honors Information Systems Colloquium. 3 Hours.
Explores events, concepts and/or new developments in the field of Computer Information Systems and Quantitative Analysis. Prerequisite: Senior standing.

ISYS 4193. Business Analytics and Visualization (Fa). 3 Hours.
Introductory study of business analytics, visualization, and systems to provide analytics-based information derived from data within and/or external to the organization. Business analytics used to support management in the decision making. Application of tools in business analytics, problem solving, visualization, and decision making. Prerequisite: WCOB 1033 with a grade of "C" or better.

ISYS 4213. ERP Fundamentals. 3 Hours.
An introduction to enterprise resource planning systems. Students should gain an understanding of the scope of these integrated systems that reach across organizational boundaries and can change how a company does business. Implementation issues are covered, including the importance of change management. Prerequisite: (WCOB 2023 or ISYS 2103) and (ACCT 2013 with a grade of C or better) or CSCE 2004 each with a grade of C or better.

ISYS 4223. ERP Configuration and Implementation (Fa). 3 Hours.
The process of configuring and implementing an enterprise resource planning system. Business process analysis and integration. Students will develop a company and set up several modules in SAP R/3 for use. Develop understanding of how the business processes work and integrate. Prerequisite: WCOB 4213 with a grade of "C" or better.

ISYS 4233. Seminar in ERP Development (Sp). 3 Hours.
ERP administration and system development practices. Advanced system support issues related to Enterprise Resource Planning systems that are used in global organizations. Basic ABAP programming. In addition, students will learn how to provide basic systems administration support of the operating system, database, and application systems software levels or ERP systems. Pre- or Corequisite: WCOB 4223 with a grade of "C" or better.

ISYS 4243. Current Topics in Computer Information (Irregular). 3 Hours.
Intensive investigation of selected developments in computer information systems hardware, software, and organization having current impact on computer information systems design and application. Offering an extension of lower-level CIS courses through individual student research and faculty team-teaching of advanced topics. Topical selection made with each course offering. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

ISYS 4283. Business Database Systems. 3 Hours.
Introduces student to centralized information system design and implementation for business applications. In-depth study of logical systems modeling; physical file management; and software requirements. Pre- or Corequisite: ISYS 3393. Prerequisite: ISYS 3293 with a grade of C or better.

ISYS 4293. Business Intelligence (Sp). 3 Hours.
Business intelligence focuses on creating, developing and storing information and knowledge from internal and external sources to better support business decisions. We will consider techniques from machine learning, data mining, and information retrieval to extract useful knowledge from data, which could be used for business intelligence, personalization or user profiling. Prerequisite: ISYS 4193 with a grade of "C" or better.

ISYS 4363. Business Project Development. 3 Hours.
Review of fundamentals of application processing systems design and development; implementation of such a system by class. Prerequisite: ISYS 3393 and ISYS 4283 each with a grade of C or better.

ISYS 4373. Application Development with Java. 3 Hours.
This course covers object-oriented programming concepts and illustrates them via an appropriate object-oriented programming language. Students will be exposed to the design of software objects, creation of software objects, and the use of objects in constructing an information system. Prerequisite: ISYS 3293 with a grade of C or better.

ISYS 4393. Seminar in Applied Business Analytics (Sp). 3 Hours.
Application of business analytics, business intelligence, data mining, and data visualization to business problem solving. Business Analytics techniques using current and relevant software are applied to current business problems for presentation to management. Pre- or Corequisite: ISYS 4293.

ISYS 4453. Introduction to Enterprise Servers (Fa). 3 Hours.
The focus of this course is to expose students to working with large scale mainframe computer systems. Mainframe computers are the heart of large company's transaction processing systems. This course provides the opportunity for students to gain valuable insight into computing in a mainframe operating environment. Prerequisite: ISYS 2263 or CSCE 2014 with a grade of "C" or better.

ISYS 4463. Enterprise Transaction Systems (Sp). 3 Hours.
Being able to accurately capture and store business transactions is an important processing function in many businesses. For many large companies with high volume processing, the tools of choice for transaction processing are CICS/Cobol/DB2. This course provides students with the necessary understanding and skills to work in this type environment. Prerequisite: ISYS 2263 or CSCE 2014 or ISYS 4453 with a grade of "C" or better.

ISYS 450V. Independent Study (Sp, Fa). 1-3 Hour.
Permits students on individual basis to explore selected topics in data processing and/or Quantitative Analysis.

ISYS 5103. Data Analytics Fundamentals. 3 Hours.
Fundamental knowledge and skills in several major areas of business data analytics. Emphasis on the management and use of data in modern organizations, intermediate & advanced spreadsheet topics; relational databases & SQL; and programming (such as Python). Prerequisite: MIS Director approval.

ISYS 511V. IT Toolkit & Skills Seminar. 1-3 Hour.
Seminar in Information Systems solutions and concepts (such as applications development, VB.NET, analysis of problems and design of solutions via application systems, etc.) designed for students entering the MIS program--may not be used for MIS degree credit. Prerequisite: MIS Director approval. May be repeated for up to 3 hours of degree credit.

ISYS 5133. E Business Development and Analytics. 3 Hours.
This course explores various e-business development technologies and then utilizes the technologies for developing a relatively realistic business-to-consumer (B2C) e-business site. Students will also learn about Business to Business (B2B) strategies, market exchanges, XML and XML Web services applications. Simple XML Web services will also be created. Prerequisite: ISYS 511V.

ISYS 5203. Experimental Design. 3 Hours.
ANOVA, experimental design, introduction to basis of statistics. Prerequisite: Graduate standing and WCOB 1033 or equivalent.
ISYS 5213. ERP Fundamentals. 3 Hours.
An introduction to enterprise resource planning systems. Students should gain an understanding of the scope of these integrated systems that reach across organizational boundaries and can change how a company does business. Implementation issues are covered, including the importance of change management. Prerequisite: Graduate standing.

ISYS 5223. ERP Configuration and Implementation. 3 Hours.
The process of configuring and implementing an enterprise resource planning system. Business process analysis and integration. Students will develop a company and set up several modules in SAP for use. Develop understanding of how the business processes work and integrate. Prerequisite: ISYS 5213 or equivalent.

ISYS 5233. Seminar in ERP Development. 3 Hours.
ERP administration and system development practices. Advanced system support issues related to Enterprise Resource Planning systems that are used in global organizations. Basic ABAP programming. In addition, students will learn how to provide basic systems administration support of the operating system, database, and application systems software levels of ERP systems. Pre- or Corequisite: ISYS 5223. Prerequisite: ISYS 5213. May be repeated for up to 6 hours of degree credit.

ISYS 535V. Internship Experience. 1-6 Hour.
This course allows a student to experience an internship within a business and benefit from the work experience. The internship focuses on applications and business problems and is supervised by a faculty member as well as a member of the company/firm. Prerequisite: MIS Director approval is required. May be repeated for up to 6 hours of degree credit.

ISYS 5363. Business Analytics. 3 Hours.
This course in managerial business analytics provides future managers with the key concepts of decision modeling and information technology management concepts. Students will learn to utilize real time operational business data, as well as quickly process and effectively leverage information. In addition, students will exercise strategic IT deployment skills for supply chain and marketing processes as well as develop strong decision modeling abilities.

ISYS 5403. Quantitative Methods and Decision Making. 3 Hours.
Utilization of information, quantitative techniques, and computer application in decision making and problem solving for managers.
This course is cross-listed with SCMT 5133.

ISYS 5423. Seminar in Systems Development. 3 Hours.
Advanced study of structured systems development. Emphasis on strategies and techniques of structured analysis and structured design for producing logical systems specifications and for deriving physical systems designs. Coverage of methodologies for dealing with complexity in the development of information systems. Prerequisite: ISYS 511V.

ISYS 5433. Enterprise Systems. 3 Hours.
Enterprise Systems comprises the entire class of information technology and systems that support the mission of the company including decision support and business processes. This managerial enterprise systems course focuses on strategic issues of information technology. Students study the various elements and integration of an organization's business processes; as a result, students gain an understanding and working knowledge of systems used to support these business processes and their use in decision making. In addition, students will study concepts and develop skills needed to utilize decision-centric business intelligence and knowledge management applications.

ISYS 5453. Enterprise Data. 3 Hours.
The focus of this course is to expose students to working with large scale mainframe computer systems. Mainframe computers are the heart of large company's transaction processing systems. This course provides the opportunity for students to gain valuable insight into computing in a mainframe operating environment. Pre- or Corequisite: ISYS 5833.

ISYS 5463. Enterprise Transaction Systems. 3 Hours.
Being able to accurately capture and store business transactions is an important processing function in many businesses. For many large companies with high volume processing, the tools of choice for transaction processing are CICS/Cobol/DB2. This course provides students with the necessary understanding and skills to work in this type environment. Pre- or Corequisite: ISYS 5453 or equivalent or MIS Director approval.

ISYS 5503. Decision Support and Analytics. 3 Hours.
Analysis of the highest level of information support for the manager-user. A study of systems providing analytics-based information derived from databases within and/or external to the organization and used to support management in the decision making. Application of tools in business analytics, problem solving, and decision making. Prerequisite: MIS Director approval.

ISYS 5603. Analytics and Visualization. 3 Hours.
This course focuses on how to discern and tell your story visually using data based on traditional graphical data representation as well as the latest data and information technologies. Coverage includes both visualization theory and hands-on exercises using appropriate computing tools. The course will also include utilization of predictive, clustering, and association models. The opportunities and challenges of Big Data visualization will be explored. Prerequisite: (ISYS 5503) or (ISYS 5133 and departmental consent).

ISYS 5613. Business Applications of Nonparametric Techniques. 3 Hours.
Consideration of business and economic research related to sampling and experimental design, testing of hypothesis, and using nonparametric tests. Prerequisite: ISYS 5203 or equivalent.

ISYS 5623. Multivariate Analysis. 3 Hours.
Principal component analysis, regression analyses. Prerequisite: ISYS 5203.

ISYS 5713. Seminar in IS Topics. 3 Hours.
Intensive seminar in selected information systems topics. Topical selection made with each course offering. Prerequisite: ISYS 511V or MIS Director approval. May be repeated for up to 9 hours of degree credit.

ISYS 5723. Advanced Multivariate Analysis. 3 Hours.
Factor analysis and other advanced techniques. Prerequisite: ISYS 5623.

ISYS 5833. Data Management Systems. 3 Hours.
Investigation and application of advanced database concepts include database administration, database technology, and selection and acquisition of database management systems. Data modeling and system development in a database environment. Prerequisite: ISYS 5103.

ISYS 5843. Seminar in Business Intelligence and Knowledge Management. 3 Hours.
Business intelligence focuses on assessing and creating information and knowledge from internal and external sources to support business decision making process. In this seminar, data mining and information retrieval techniques will be used to extract useful knowledge from data, which could be used for business intelligence, and knowledge management. Pre- or Corequisite: ISYS 5833 or equivalent. Prerequisite: ISYS 5503 or equivalent.

ISYS 5933. Global Technology and Analytics Seminar. 3 Hours.
This course is designed to provide an updated, comprehensive, and rigorous treatment of emerging global topics. Includes, but is not limited to, global study experiences, business insights, and foundational perspectives; examines significant issues from global perspectives. Prerequisite: Graduate standing and MIS Director approval.

ISYS 5943. Management of Information Technology Seminar. 3 Hours.
Presented in a way that allows you to play an active role in the design, use, and management of information technology. Using IT to transform the organization, as competitive strategy, and creating new relationship with other firms is included. Pre- or Corequisite: ISYS 5833. Prerequisite: ISYS 5423.
ISYS 599V. Practicum Seminar. 3-6 Hour.
This course is designed to introduce and engage the student in the practice, application, and problem solving in the business environment. Hands-on application of a business problem. Students will gain experience working on, making decisions about, and developing solutions for business applications. Topics include but not limited to analytics, data, and information technology. Prerequisite: Graduate standing and MIS Director approval. May be repeated for up to 6 hours of degree credit.

ISYS 601V. Graduate Colloquium. 1-6 Hour.
Presentation and critique of research papers and proposals.

ISYS 6133. Survey of IS Research (Fa). 3 Hours.
This is an introductory seminar in information systems research for doctoral students. Its objective is to introduce participants to major streams of IS research and discuss many of the important roles and responsibilities of an IS researcher. Also, this course will play the important role of introducing participants to the research of the current IS faculty.

ISYS 6233. IS Research Projects (Irregular). 3 Hours.
The students will understand the ideas underlying a scientific contribution; understand the practical challenges in designing and executing a study; Design and execute a study; Write an empirical journal article.

ISYS 6333. Individual-level Research in IS. 3 Hours.
This course aims to expose students to individual-level research in IS. It provides a window into major streams of individual-level research in IS and reference disciplines. May be repeated for up to 18 hours of degree credit.

ISYS 636V. Special Problems (Irregular). 1-6 Hour.
Independent reading and research under supervision of senior staff member. May be repeated for up to 6 hours of degree credit.

ISYS 6423. Structural Equation Modeling. 3 Hours.
Structural equation modeling using current tools, such as AMOS. This course is cross-listed with MKTG 6423, SCMT 6423.

ISYS 6433. Team-level Research in IS (Irregular). 3 Hours.
This course aims to expose students to team-level research in IS. It provides a window into major streams of team-level research in IS and reference disciplines.

ISYS 6533. Macro- and Meso-level IS Research (Irregular). 3 Hours.
This course aims to expose students to research at the macro- and meso-levels. For example, it could provide a window into major streams of organizational-level research in IS and reference disciplines. Topics could also include: change management, ERP research models, implementation, applications, and successes/failures, and ERP simulation models. Other topics that fall within the purview of the course are: large-scale technology and process innovations in organizations—e.g., software development process innovations and RFID will be examined at various levels (e.g., organizational).

ISYS 6633. Systems Development (Irregular). 3 Hours.
The course provides an in-depth study of systems development as an area of research, understanding of the theoretical and conceptual foundations, insight into the current state of the research area, utilizes both IS and reference discipline literature as appropriate, guidance for conducting research projects and producing publishable research, an opportunity to work on cutting-edge research.

ISYS 6733. Emerging Topics (Irregular). 3 Hours.
Various emerging topics, such as RFID applications and RFID supply chain, ethical decision models, behavioral modeling, piracy and privacy issues, and virtual worlds.

ISYS 6833. Theory Development (Irregular). 3 Hours.
To acquire theory development and writing skills, to understand challenges in developing and writing theory sections of papers, and to discuss approaches to writing good empirical journal articles. This course is suited for all social sciences students and is particularly appropriate for students conducting behavioral research in the business disciplines.

ISYS 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Interdisciplinary Studies (IDST) Courses

IDST 2003. Introduction to Interdisciplinary Studies (Fa). 3 Hours.
Introduces students to the concept of interdisciplinary studies. May be taken by students considering pursuit of an Interdisciplinary Studies major or by students in their first semester following acceptance into the program. Required of all Interdisciplinary Studies majors.

Interior Design (IDES) Courses

IDES 1003. Basic Course in the Arts: Interior Design Lecture. 3 Hours.
A general introduction to the field and the profession of interior design, as well as increasing the student’s appreciation of the relationship between the enclosing architecture of the space and the interior environment.

IDES 1003H. Honors Basic Course in the Arts: Interior Design Lecture (Su, Fa). 3 Hours.
A general introduction to the field and the profession of interior design, as well as increasing the student’s appreciation of the relationship between the enclosing architecture of the space and the interior environment. This course is equivalent to IDES 1003.

IDES 1035. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills.

IDES 1045. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and oral communication skills. Prerequisite: IDES 1035.

IDES 2723. Digital Media in Design. 3 Hours.
Develops conceptual and practical knowledge of digital techniques on architectural and interior design production. The aim is to provide a foundation in digital modeling, drawings, renderings, and an introduction to digital fabrication. Prerequisite: Interior Design majors only.

IDES 2804. Interior Design Studio III. 4 Hours.
An introduction to interior space articulation and the creation of small scale spaces. Components of various presentation methods and formats. Overnight travel requires additional fees. Prerequisite: IDES 1045.

IDES 2814. Interior Design Studio IV. 4 Hours.
Studio activities with emphasis on conceptualization, design theory and applications, ideation, programming and computer application. Overnight travel required. Prerequisite: IDES 2804.

IDES 2823. Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in interior spaces.

IDES 2823H. Honors Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in designing interior spaces. This course is equivalent to IDES 2823.

IDES 2883. History of Interior Design. 3 Hours.
Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized.
IDES 2883H. Honors History of Interior Design. 3 Hours.
Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized. This course is equivalent to IDES 2883.

IDES 3805. Interior Design Studio V. 5 Hours.
Emphasis on residential and/or commercial building systems. Continued development of presentation skills including hand and computer-based techniques. Prerequisite: IDES 2814.

IDES 3815. Interior Design Studio VI. 5 Hours.
Advanced studio problems involving larger-scale interior spaces and contract documents for public use. Overnight field trip requires additional fees. Prerequisite: IDES 3805.

IDES 3833. Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice/and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IDES 2814 and IDES 2823.

IDES 3833H. Honors Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice/and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IDES 2814 and IDES 2823. This course is equivalent to IDES 3833.

IDES 3843. Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems.

IDES 3843H. Honors Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems. Prerequisite: Honors standing.
This course is equivalent to IDES 3843.

IDES 465V. Special Topics (Irregular). 1-6 Hour.
A focused study of specialized topics in interior design. May be repeated for up to 6 hours of degree credit.

IDES 4805. Interior Design Studio VII (Fa). 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge and critical thinking skills with emphasis on research, programming and process. Prerequisite: IDES 3815 and IDES 4823.

IDES 4811. Internship for Interior Design (Su). 1 Hour.
Supervised work experience and observation of operations/management procedures in approved design, government or service business. Prerequisite: IDES 3815.

IDES 4813. Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to the design disciplines. Types of interior spaces, environmental effects on behavior, ergonomics, and design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HESC 1403 or GEOG 1123.

IDES 4813H. Honors Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to interior design. Types of interior spaces, environmental effects on behavior, ergonomics, interior design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HESC 1403 or GEOG 1123. This course is equivalent to IDES 4813.

IDES 4815. Interior Design Studio VIII (Sp). 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge, and critical thinking skills developed in previous design studios, including ideation, programming, construction, and human factors. Prerequisite: IDES 4805.

IDES 4815H. Honors Interior Design Studio VIII. 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge, and critical thinking skills developed in previous design studios, including ideation, programming, construction, and human factors. Prerequisite: IDES 4805. This course is equivalent to IDES 4815.

IDES 4823. Professional Practice for Interior Design (Fa). 3 Hours.
General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IDES 3805.

IDES 4823H. Honors Professional Practice for Interior Design (Fa). 3 Hours.
General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IDES 3805. This course is equivalent to IDES 4823.

IDES 485V. Design Tours (Irregular). 1-3 Hour.
Domestic and international study tours of a variety of design locations that contribute to the body of knowledge. Prerequisite: IDES 2814.

IDES 4943. Perspectives on Historic Preservation (Fa). 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. This course is cross-listed with LARC 4943, ARCH 4943.

International Studies (INST) Courses

INST 2013. Introduction to International and Global Studies. 3 Hours.
A historical and contemporary overview of the relations and interactions between peoples across borders, between cultures and societies, states and non-state actors, governments and non-governmental organizations, and economies, both local and global. Focus on differing disciplinary approaches to international and global studies, the transformations caused by the process of globalization, and a survey of current global issues and problems.

INST 300V. Internship in International Studies. 1-6 Hour.
Internship in international studies-related agency or organization, arranged by the student and/or faculty member, under the guidance of a faculty member. May be repeated for up to 6 hours of degree credit.

INST 3303. European Integration and Globalization. 3 Hours.
Interdisciplinary study of the cultural, economic, and political processes of modern European integration in the context of a changing relationship between Europe and the wider world during the 20th and 21st centuries.

INST 3603. Universal Human Rights: History and Practice since 1945. 3 Hours.
Study of the development and growth of the universal human rights movement since the end of the Second World War. Emphasis on using human rights as a lens to understand and assess global affairs in the late 20th and early 21st centuries.

INST 399VH. Honors Thesis. 1-6 Hour.
To be used for completing an International Studies Honors Thesis. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.
ITAL 2013. Intermediate Italian II (Sp). 3 Hours.
Continued development of basic speaking comprehension, and writing skills and intensive development of reading skills.

ITAL 3033. Italian Conversation (Fa). 3 Hours.
Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: ITAL 2013.

ITAL 3103. Italian Cinema (Fa). 3 Hours.
Examines Italian culture (history, language, politics, religion, and society) through the lens of the camera. Content begins with the 1860's, covers the Unification of Italy, and continues to contemporary Italy. Students will analyze and examine diverse cultural themes within films.

ITAL 3113. Introduction to Literature (Sp). 3 Hours.
Development of reading skills and introduction to literary analysis. Prerequisite: ITAL 2013 or equivalent. May be repeated for up to 3 hours of degree credit.

ITAL 3123. Advanced Italian (Sp). 3 Hours.
Further intensive development of writing, listening and speaking skills. It will include a review of the essentials of Italian grammar. Prerequisite: ITAL 2013 or equivalent.

ITAL 3983. Special Studies (Irregular). 3 Hours.
May be offered in a subject not specifically covered by courses otherwise listed. May be repeated for up to 6 hours of degree credit.

ITAL 4033. Advanced Italian Conversation (Fa). 3 Hours.
Conversation practice for advanced undergraduates. Intended to refine language comprehension while providing in-depth understanding of Italian life and culture. Prerequisite: ITAL 3033 or ITAL 3113 or instructor consent.

ITAL 475V. Special Investigations (Irregular). 1-6 Hour.
Special investigation of one or more topics related to the Italian language. May be repeated for up to 6 hours of degree credit.

Japanese (JAPN) Courses

JAPN 1003. Elementary Japanese I. 3 Hours.
Designed for true beginners of Japanese, this course aims to introduce general concepts of the Japanese language: the writing system, basic conversational expressions, vocabulary, and sentence patterns.

JAPN 1013. Elementary Japanese II (Sp). 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

Equivalent to JAPN 1003 and JAPN 1013. Intended for true beginners of Japanese who have never learned or spoken the language before. Emphasis on all skill areas: correct pronunciation, aural comprehension, speaking ability, reading, and writing. Focuses on developing the students' command of Japanese sentence patterns and vocabulary.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.

JAPN 2013. Intermediate Japanese II (Sp). 3 Hours.
Continued development of basic reading comprehension and writing skills and intensive development of reading skills. Prerequisite: JAPN 2003 or equivalent.

JAPN 2013H. Honors Intermediate Japanese II (Sp). 3 Hours.
Continued development of basic reading comprehension and writing skills and intensive development of reading skills. Prerequisite: JAPN 2003 or equivalent. This course is equivalent to JAPN 2013.

Italian (ITAL) Courses

ITAL 1003. Elementary Italian I (Fa). 3 Hours.

ITAL 1013. Elementary Italian II (Sp). 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

ITAL 2003. Intermediate Italian I (Fa). 3 Hours.
Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.

ITAL 2013. Intermediate Italian II (Sp). 3 Hours.
Continued development of basic speaking comprehension, and writing skills and intensive development of reading skills.

ITAL 4033. Advanced Italian Conversation (Fa). 3 Hours.
Conversation practice for advanced undergraduates. Intended to refine language comprehension while providing in-depth understanding of Italian life and culture. Prerequisite: ITAL 3033 or ITAL 3113 or instructor consent.

ITAL 475V. Special Investigations (Irregular). 1-6 Hour.
Special investigation of one or more topics related to the Italian language. May be repeated for up to 6 hours of degree credit.
Supplemental to JAPN 2003. Provides 2 hours of guided conversation per week with
the objective of building the listening/speaking skills.

JAPN 2032. Intermediate Conversation II (Sp, Fa). 2 Hours.
Supplemental to JAPN 2013. Provides 2 hours of guided conversation per week with
the objective of building the listening/speaking skills.

Equivalent to JAPN 2013. Emphasizes intensive oral/aural drills and reading/speaking exercises and intensive grammar drills. Prerequisite: JAPN 1013 or equivalent.

JAPN 3003. Advanced Japanese I (Irregular). 3 Hours.
Introduces more complex forms and structures of the language as well as more Kanji (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 2013.

JAPN 3003H. Honors Advanced Japanese I (Irregular). 3 Hours.
Introduces more complex forms and structures of the language as well as more Kanji (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 2013. This course is equivalent to JAPN 3003.

JAPN 3013. Advanced Japanese II (Irregular). 3 Hours.
Continuation of JAPN 3003 with more complex forms and structures of the language as well as more Kanji (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 3003.

JAPN 3013H. Honors Advanced Japanese II (Irregular). 3 Hours.
Continuation of JAPN 3003 with more complex forms and structures of the language as well as more Kanji (Chinese Characters) aiming at the improvement of all the skills: speaking, listening, writing and reading. Prerequisite: JAPN 3003. This course is equivalent to JAPN 3013.

JAPN 3033. Advanced Japanese Conversation (Sp). 3 Hours.
Conversational practice for advanced learners of Japanese. Designed primarily for students who intend to use Japanese in business and other formal settings. Honorific and humble expressions will be emphasized. Prerequisite: JAPN 2013.

JAPN 3033H. Honors Advanced Japanese Conversation (Fa). 3 Hours.
Conversational practice for advanced learners of Japanese. Designed primarily for students who intend to use Japanese in business and other formal settings. Honorific and humble expressions will be emphasized. Prerequisite: JAPN 2013. This course is equivalent to JAPN 3033.

JAPN 3103. Advanced Reading in Japanese (Fa). 3 Hours.
Designed to build vocabulary and to strengthen students' Japanese reading skills through extensive practice with authentic materials such as readings of on-line newspapers, advertisements, Web pages, and excerpts from Japanese Haiku poetry and literature. Prerequisite: JAPN 3013 or JAPN 3116, or equivalent Japanese proficiency.

JAPN 3103H. Honors Advanced Reading in Japanese (Fa). 3 Hours.
Designed to build vocabulary and to strengthen students' Japanese reading skills through extensive practice with authentic materials such as readings of on-line newspapers, advertisements, Web pages, and excerpts from Japanese Haiku poetry and literature. Prerequisite: JAPN 3013 or JAPN 3116, or equivalent Japanese proficiency. This course is equivalent to JAPN 3103.

This course aims to improve students' Japanese proficiency further in all skill areas through intensive practice. Prerequisite: JAPN 2013 or equivalent Japanese proficiency.

JAPN 3116H. Honors Intensive Advanced Japanese (Fa). 6 Hours.
This course aims to improve students' Japanese proficiency further in all skill areas through intensive practice. Prerequisite: JAPN 2013 or equivalent Japanese proficiency. This course is equivalent to JAPN 3116.

JAPN 3983. Special Studies (Irregular). 3 Hours.
May be offered in a subject not specifically covered by courses otherwise listed. May be repeated for up to 6 hours of degree credit.

JAPN 3983H. Honors Special Studies (Irregular). 3 Hours.
May be offered in a subject not specifically covered by courses otherwise listed. Prerequisite: Honors candidacy. May be repeated for up to 6 hours of degree credit. This course is equivalent to JAPN 3983.

Designed to strengthen Japanese language skills in oral communication and writing. Consists of conversational activities, presentations and debates, and composition in settings such as business, school, and everyday life. Prerequisite: JAPN 3013 or JAPN 3116, or equivalent Japanese proficiency.

JAPN 4033H. Honors Oral Communication & Composition in Japanese (Fa). 3 Hours.
Designed to strengthen Japanese language skills in oral communication and writing. Consists of conversational activities, presentations and debates, and composition in settings such as business, school, and everyday life. Prerequisite: JAPN 3013 or JAPN 3116, or equivalent Japanese proficiency. This course is equivalent to JAPN 4033.

JAPN 4213. Japanese Culture (Irregular). 3 Hours.
Insight into Japanese civilization and culture with special emphasis on the areas such as social life and environment, education, religion and customs, and visual and performing arts. This course also discusses western influence on Japanese society, culture and language and how traditional and modern values are manifested in Japanese society. Prerequisite: JAPN 2013. May be repeated for up to 6 hours of degree credit.

JAPN 4313. Language and Society of Japan (Fa). 3 Hours.
The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and custom of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Prerequisite: Junior standing.

JAPN 4313H. Honors Language and Society of Japan (Fa). 3 Hours.
The primary objective of this course is to investigate the way the Japanese language reflects the beliefs and custom of the Japanese people as a social group. For comparison purposes, this course makes reference to studies in American language and culture. Proficiency in Japanese not required. Prerequisite: Junior standing. This course is equivalent to JAPN 4313.

JAPN 4333. Professional Japanese I: Business Writing (Sp). 3 Hours.
This course aims to familiarize the students with formats, vocabulary, and expressions in Japanese business correspondence. Emphasizes career-ready Japanese language proficiency. Prerequisite: JAPN 3116 or equivalent Japanese proficiency.

JAPN 4333H. Honors Business Writing in Japanese (Sp). 3 Hours.
This course aims to familiarize the students with formats, vocabulary, and situationally specific expressions in Japanese business correspondence. Prerequisite: JAPN 2013 or equivalent Japanese proficiency. This course is equivalent to JAPN 4333.
JAPN 4343. Professional Japanese II: Translation (Fa). 3 Hours.
Continuation of Professional Japanese I. Emphasizes translation, career-ready Japanese language proficiency, and further advancement of Japanese language proficiency in all skill areas. Completion of a professional translation project based on contemporary material is required. Prerequisite: JAPN 4343 or equivalent.

JAPN 4343H. Honors Professional Japanese II: Translation (Fa). 3 Hours.
Continuation of Professional Japanese I. Emphasizes translation, career-ready Japanese language proficiency, and further advancement of Japanese language proficiency in all skill areas. Completion of a professional translation project based on contemporary material is required. Prerequisite: JAPN 4333 or equivalent. This course is equivalent to JAPN 4343.

Jewish Studies (JWST)

Courses

JWST 2003. Introduction to Judaism (Odd years, Fa). 3 Hours.
An introduction to the practices, teachings, and scriptures of Judaism, focusing on the post-Biblical period up to the present.

JWST 3103. Introduction to Jewish Languages (Even years, Fa). 3 Hours.
An introduction to the alphabet, grammar, syntax, and basic vocabulary of Hebrew, Jewish Aramaic and Yiddish.

JWST 4003. Modern Jewish Thought (Irregular). 3 Hours.
A survey of the main trends in Jewish thought from the seventeenth through the nineteenth century. This course is cross-listed with PHIL 4103.

JWST 4013. Contemporary Jewish Thought. 3 Hours.
A survey of trends in Jewish thought in the twentieth and twenty-first centuries, focusing on the ways in which Jewish thinkers have responded to the events affecting Jews and the conditions of Jewish life in from approximately 1900 to the present. This course is cross-listed with PHIL 4313.

JWST 470V. Special Topics in Jewish Studies. 1-3 Hour.
Irregular course offerings that focus on a specialized area of Jewish Studies not covered in depth in regular JWST or affiliated courses. May be repeated for up to 6 hours of degree credit.

JWST 475V. Independent Investigations in Jewish Studies (Irregular). 1-3 Hour.
This course can be offered to allow a student to pursue reading and research on a topic of interest not covered in regular JWST courses. Prerequisite: Instructor consent. May be repeated for up to 6 hours of degree credit.

Journalism (JOUR)

Courses

JOUR 1003. Journalistic Writing Skills. 3 Hours.
Provides a functional approach to improving language and writing skills specific to journalistic writing. Covers introductory journalistic writing and correct grammar usage, the logic governing syntax and punctuation use, analysis of grammar and syntax, sentence structure, word selection to convey proper meaning, memory aids, and other language topics relevant to journalistic writing.

JOUR 1023. Media and Society. 3 Hours.
A survey of mass media (newspaper, radio, TV, magazine, advertising, public relations, photography, etc.) which stresses their importance in today's society and introduces the student to the various areas in journalism. Recommended for students considering journalism as a major. Prerequisite: Journalism major or department consent.

JOUR 1033. Fundamentals of Journalism. 3 Hours.
Introduces students to the skills of observation, critical thinking and concise writing required in all aspects of journalism, as well as to the technology needed in upper-upper-level courses. Practice using references for grammar and journalistic style. A prerequisite to JOUR 2013, JOUR 2032, JOUR 2063 and JOUR 4143. Corequisite: Lab component. Prerequisite: Journalism major or department consent.

JOUR 2003. Writing for Today's Media. 3 Hours.
Writing preparation for newspaper, broadcast, online, public relations and social media. Emphasizes clear writing, prioritizing and synthesizing information, performance on deadline pressure, and writing style differences among media. Focuses on reporting, research, interviewing, grammar, Associated Press Style, and concise writing. Explores news bias, fairness, multi-platform journalism and ethics. Prerequisite: JOUR 1023 and JOUR 1033 with a grade of C or better.

JOUR 2013. News Reporting I. 3 Hours.
Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: JOUR 1023 and JOUR 1033, each with a grade of C or better.

JOUR 2013H. Honors News Reporting I. 3 Hours.
Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Honors standing, JOUR 1023 and JOUR 1033, each with a grade of C or better. This course is equivalent to JOUR 2013.

JOUR 2031L. Broadcast News Reporting I Laboratory. 1 Hour.
Provides experience in basic broadcast news reporting techniques. Laboratory 3 hours per week. Corequisite: JOUR 2032. Prerequisite: JOUR 1033 with a grade of C or better.

JOUR 2032. Broadcast News Reporting I. 2 Hours.
Intensive training in the methods of gathering and writing broadcast news. Lecture 2 hours per week. Corequisite: JOUR 2031L. Prerequisite: Sophomore standing and JOUR 1033 with a grade of C or better.

JOUR 2053. Multimedia Journalism. 3 Hours.
Provides students with the skills of visual literacy, photo editing, audio processing, video editing and web publishing. Good writing will be emphasized. The course examines basic aesthetic principles in visual composition and techniques applicable to audio, video and web production. Prerequisite: JOUR 1023 and JOUR 1033, each with a grade of C or better.

JOUR 2063. Media Technology. 3 Hours.
Introduction to computer skills required in journalism; focus is training in the major computer software used in the profession. Prerequisite: JOUR 1023 and JOUR 1033, each with a grade of C or better.

JOUR 2311L. Photojournalism I Laboratory. 1 Hour.
Photojournalism 1 Lab involves the transfer of images from a digital camera to a computer, and involves the use of image editing and enhancing software as well as layout and design software. Corequisite: JOUR 2332.

JOUR 2332. Photo Journalism I. 2 Hours.
Beginning course in the fundamentals of photography, including digital photography, composition, file transfer and management, image enhancement, and layout and design. Corequisite: JOUR 2331L.

JOUR 2453. Introduction to Sports Television Production I. 3 Hours.
Introduction to the specialized field of sports television production. Focuses on multi-camera, single-camera and studio production. Studio lab and field work outside of regularly scheduled class time required.

JOUR 3013. Editing. 3 Hours.
Theories and practices in newspaper editing, copyreading, headline writing, page layout and the gathering and publication of written and pictorial information. Prerequisite: JOUR 1023 and JOUR 2013, each with a grade of C or better.
JOUR 3023. News Reporting II. 3 Hours.
Continuation of JOUR 3013. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2013 with a grade of C or better.

JOUR 3071L. Broadcast News Reporting II Laboratory. 1 Hour.
Continuation of JOUR 2031L. Including advanced skills in broadcast news techniques. Corequisite: JOUR 3072. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better.

JOUR 3072. Broadcast News Reporting II. 2 Hours.
Continuation of JOUR 2032. Including advanced methods of gathering and writing broadcast news. Corequisite: JOUR 3071L. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better.

JOUR 3083. Photojournalism II. 3 Hours.
Study of news and feature photography. Includes planning and shooting photographs for newspapers and magazines, and instills in the student photojournalistic techniques, and ethical considerations of photographing for publication. Includes producing multimedia presentations and working with audio as well as still images. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2332 and JOUR 2331L, each with a grade of C or better.

JOUR 3093. Presentation Design for Journalism, Advertising and Public Relations. 3 Hours.
Covers presenting stories, campaigns and other ideas via traditional and new media. Covers web and paper presentations using leading design software.

JOUR 3123. Feature Writing. 3 Hours.
Study of non-fiction newspaper and magazine feature articles with emphasis on locating subjects, and on writing techniques and practice in article writing. Prerequisite: JOUR 2013 with a grade of C or better.

JOUR 3133. Editorial Writing. 3 Hours.
Study of the opinion function of the news media. Includes editorial writing, the newspaper editorial/opinion columns, letters from readers, and broadcast commentary. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better, and junior standing.

JOUR 3163. Sports Journalism. 3 Hours.
Emphasis on techniques and principles of coverage of sports and sports-related subjects on and off the field, and on the relationship between sports and the mass media. Prerequisite: JOUR 1033 with a grade of C or better.

JOUR 3263. African Americans in Film (Irregular). 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing.
This course is cross-listed with AAST 3263, ENGL 3263, COMM 3263.

JOUR 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing.
This course is cross-listed with AAST 3273, COMM 3273.

JOUR 3453. Sports Television Production II. 3 Hours.
Advanced production techniques in the specialized field of sports television production. Focuses on multi-camera, single-camera and studio production. Studio lab and field work outside of regularly scheduled class time required. Prerequisite: JOUR 2453 with a grade of C or better, or instructor consent.

JOUR 3633. Media Law. 3 Hours.
Constitutional guarantees, statutory laws and court cases applicable to mass communications. Prerequisite: Junior standing.

JOUR 3723. Advertising Principles. 3 Hours.
Introductory course to the broad field of advertising. The course includes a study of the role of advertising in modern society with emphasis being given to the extent and manner of use of advertising in newspapers, magazines, radio, television, and other media. Prerequisite: Minimum of 60 hours completed, 2.5 overall grade point average, and completion of JOUR 1033 with a grade of C or better; no in-progress hours or coursework accepted.

JOUR 3733. Covering the Courts. 3 Hours.
Explores the mechanics of covering trials and other aspects of legal affairs reporting. Prerequisite: JOUR 3633 with a grade of C or better.

JOUR 3743. Public Relations Principles. 3 Hours.
Study of theory, methods, and ethics of public relations in modern society, business, and communications. Influencing opinion through acceptable performance and 2-way communication. Recommended for students in many fields. Prerequisite: Minimum of 60 hours completed, 2.5 overall grade point average, and completion of JOUR 1033 with a grade of C or better; no in-progress hours or coursework accepted.

JOUR 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as a part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in journalism). May be repeated for degree credit.

JOUR 401V. Advanced Journalistic Practices. 1-4 Hour.
Study of advanced journalistic practices and methods, individual or group projects. Prerequisite: Junior standing and 10 hours of journalism and a 2.5 cumulative grade average.

JOUR 402V. Internship in Journalism. 1-3 Hour.
Credit for practical experience gained through a journalistic internship. Report required on significant aspect of internship experience. Prerequisite: JOUR major and junior standing and 10 hours JOUR and 2.50 cumulative grade point average. May be repeated for up to 3 hours of degree credit.

JOUR 4033. Advanced Radio News Reporting. 3 Hours.
Intensive training in the production of in-depth, public radio style news stories. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better.

JOUR 4043. Government and the Media. 3 Hours.
Focuses on the links between mass media and government and the increasingly significant role of media in politics and government. Examines the power, responsibility, and performance of the press and public officials/government agencies in their relationship with each other. Prerequisite: Junior standing.

JOUR 405V. Specialized Journalism Seminar. 1-3 Hour.
Primary purpose of course is to enlarge the journalistic skills of students interested in advanced forms of mass communication. Students undertake projects related to particular aspects or problems of journalism. Content varies. May be repeated for up to 12 hours of degree credit.

In-depth, hands-on exploration of computer hardware and software in the design and production of media messages. Examination of developing media technologies and the computer's influence on design and conceptualization.

JOUR 4073. Social Media and Journalism. 3 Hours.
Social Media and Journalism teaches conceptual knowledge and skills to develop news judgment and use changing technological tools to disseminate news quickly and to different audiences. The value of interacting with sources and the audience is stressed as are ethical, legal and accuracy issues. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better.
JOUR 4143. Public Relations Writing. 3 Hours.
Instructional and writing practice to develop the professional-level writing skills required of public relations practitioners. Emphasizes different approaches required for different audiences and media. Prerequisite: Minimum of 90 hours completed, 2.5 overall grade point average, Journalism major in the AD/PR sequence, completion of JOUR 1033 with a grade of C or better, and completion of JOUR 3723 and JOUR 3743, each with a grade of B or better; no in-progress hours or coursework accepted.

JOUR 4333. Ethics in Journalism. 3 Hours.
Critical examination of specific ethical problems confronting professionals in all areas of mass communications. Reading and writing assignments are aimed at familiarizing students with the nature of the mass media and their social responsibilities. Prerequisite: Junior standing.

JOUR 4413. Broadcast Advertising and Sales. 3 Hours.
The creation of advertising campaigns for the broadcast media and techniques involved in the presentation of these campaigns to prospective media buyers. Emphasis is also placed on the gathering and use of rating systems for broadcasting. Prerequisite: JOUR 3723 with a grade of B or better.

JOUR 4423. Creative Strategy and Execution. 3 Hours.
The creation of advertising copy and layout for the mass media with emphasis on strategy, the written message, and the physical appearance for the advertisement. Includes laboratory component. Prerequisite: Min. 90 hrs. completed, 2.5 overall GPA, JOUR major with AD/PR sequence, completion of JOUR 1033 with a grade of C or better, and completion of JOUR 3723 and JOUR 3743, with a grade of B or better; no in-progress hours or coursework accepted.

JOUR 443V. Event Promotion and Execution. 1-3 Hour.
Practicum for students to plan, design, promote and execute several Journalism Days events, to include the Roy Reed Lecture, a scholarship reception, a job fair, Senior Salute and a fundraiser. Prerequisite: Junior standing.

JOUR 4453. Media Planning & Strategy. 3 Hours.
Includes the study of media characteristics, market research, media strategies, media analysis, media-market measurements and the development of media plans. Emphasis is placed on the analysis of major mass media strategies, tactics, and planning. Prerequisite: Min. 90 hrs. completed, 2.5 overall GPA, JOUR major with AD/PR sequence, completion of JOUR 1033 with a grade of C or better, and completion of JOUR 3723 and JOUR 3743, with a grade of B or better; no in-progress hours or coursework accepted.

JOUR 4463. Campaigns. 3 Hours.
Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Prerequisite: JOUR 3723 and JOUR 3743, each with a grade of B or better, and 2.5 overall GPA.

JOUR 4473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers’ perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Minimum 90 hours completed, no in-progress hours or coursework accepted, 2.5 overall GPA, JOUR 1033 with a grade of C or better, and JOUR 3723 and JOUR 3743, with a grade of B or better.

JOUR 4483. Issues in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical and persuasion theories and/or issues relevant to advertising and public relations affecting individuals, organizations and societies. Prerequisite: Completion of both JOUR 3723 and JOUR 3743 with a grade of B or better, and 2.5 overall GPA.

JOUR 4503. Magazine Writing. 3 Hours.
This intensive writing and reporting course is for students with proven feature-writing skills and an interest in the human-interest stories found in such leading magazines as The New Yorker, Esquire, Harper’s, the Atlantic, and others. Students will compose magazine-length nonfiction stories on timely subjects under deadline. Stories are submitted for contests and publication, when possible. Prerequisite: JOUR 2013 with a grade of C or better.

JOUR 4553. Magazine Editing and Production I. 3 Hours.
Instruction with lab work in editing and producing various types of magazines. Course includes magazine design, selecting and editing stories and photographs, laying out the story and photo pages, and other mechanical processes. Lecture 2 hours, laboratory 2 hours per week.

JOUR 4863. Television News Reporting I. 3 Hours.
Continuation of JOUR 3072 and JOUR 3071L. Includes the specialized knowledge and skills needed in field reporting, anchoring, writing, and producing news for commercial television. Lab component arranged. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better.

JOUR 4873. Television News Reporting II. 3 Hours.
Continuation of JOUR 4863. Laboratory component arranged. Prerequisite: JOUR 4863 with a grade of C or better.

JOUR 4883. Advanced Television News Production. 3 Hours.
Continuation of JOUR 4873. Students prepare and present television newscasts for air. Laboratory component arranged. Corequisite: Lab component. Prerequisite: JOUR 4873 with a grade of C or better.

JOUR 4893. Television News Producing. 3 Hours.
Intensive training in methods of producing a live television news broadcast, including news gathering, writing broadcast copy and production strategies. Lab 6 hours. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better.

JOUR 4903. Community Journalism. 3 Hours.
This three-hour course will blend student reporting and editing skills with instruction on how regional newspapers select and present news to a local audience. This course will instruct students in deciding news stories for regional readers, how those stories can best be written and displayed. The semester goal is to publish a paper. Prerequisite: Junior standing.

JOUR 4923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing.

This intensive writing and reporting course is for students with proven feature-writing skills and an interest in the human-interest stories found in such leading magazines as The New Yorker, Esquire, Harper’s, the Atlantic, and others. Students will compose magazine-length nonfiction stories on timely subjects under deadline. Stories are submitted for contests and publication, when possible. Prerequisite: JOUR 2013 with a grade of C or better.

JOUR 4943H. Honors Research Methods in Journalism. 3 Hours.
Emphasis on the major types of qualitative and quantitative research, electronic data base searching, and traditional library research. Prerequisite: Journalism honors major.

JOUR 4981. Journalism Writing Requirement. 1 Hour.
Directed study in conceptualizing, researching, and writing a major paper to meet the college writing requirement; includes presentations and discussions on current issues in journalism news and strategic communication. Students must make a C in order to satisfy the college writing requirement. Prerequisite: 90 hours.

JOUR 498VH. Honors Journalism Writing Requirement. 1-6 Hour.
Honors journalism writing requirement. May be repeated for up to 6 hours of degree credit. This course is equivalent to JOUR 4981.

JOUR 5003. Advanced Reporting. 3 Hours.
Stresses public affairs coverage, interpretive, investigative, and analytic journalism, involving research, work with documents, public records, and budgets and specialized reporting.
JOUR 5023. Journalism Theory. 3 Hours.
Examination of the major journalism and mass media theories and conceptual perspectives regarding journalism, news, mass media, advertising and public relations relevant to industry and academic researchers and professionals.

JOUR 5033. Critical and Opinion Writing and Commentary. 3 Hours.
Experience in writing and analyzing columns, editorials, criticism, and other forms of opinion and commentary in the media and in examining the media’s role as a forum for opinion and commentary and its impact and influence.

JOUR 5043. Research Methods in Journalism. 3 Hours.
Research methods of utility in journalism. Emphasis on survey research, electronic data base searching, and traditional library research. Prerequisite: Graduate standing or honors program standing.

JOUR 5063. Issues in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical, and persuasion theories and/or issues relevant to advertising and public relations affecting individuals, organizations, societies. Prerequisite: Graduate standing.

JOUR 5073. Propaganda and Public Opinion. 3 Hours.
Examines and analyzes the means of influencing and measuring public opinion, with an emphasis on survey research and polling.

JOUR 5133. Ethics in Journalism. 3 Hours.
A seminar examining the professional ethical principles and ethical performance in the journalism field. The ethical performance of the mass media dedicated to news, public relations and advertising is evaluated based on ethical theories and industry standards. Prerequisite: Graduate standing.

JOUR 5183. International Mass Communications. 3 Hours.
Examination of national media systems, issues in international communications, the role of the media in coverage of international affairs, and the impact of new technologies on mass communications.

JOUR 5193. Professional Journalism Seminar. 3 Hours.
Examination of complex problems encountered by professional journalists with focus on research and analysis of the role of journalism in major social, economic, and political developments. May be repeated for up to 6 hours of degree credit.

JOUR 5233. Media and Public Policy. 3 Hours.
Focuses on the interaction between media, politics, government, and public policy, particularly on the impact and influence of the media on the public policy agenda.

JOUR 5313. Literature of Journalism. 3 Hours.
A study of superior works of non-fiction journalism, past and present. Includes authors from Daniel Defoe to John McPhee.

JOUR 5323. Documentary Production I. 3 Hours.
In-depth study of documentary film as non-fiction, long form journalism. Covers subject, funding, research and development, pre-production planning, field production, talent, music, post production, promotion, broadcast and distribution. Required trip to Hot Springs Documentary Film Festival.

JOUR 5333. Documentary Production II. 3 Hours.
A continuation of JOUR 5323, Documentary Production I. Students photograph, write, and edit a documentary begun in the fall semester. Prerequisite: JOUR 5323.

JOUR 5473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers’ perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Graduate standing.

JOUR 5923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement.

JOUR 600V. Master's Thesis. 1-6 Hour.
Required of all M.A. journalism students. May be repeated for degree credit.

Kinesiology (KINS)

Courses

KINS 3901H. Kinesiology Honors Thesis Tutorial (Sp, Su, Fa). 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work “one-on-one” exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and instructor consent.

KINS 405V. Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of research problems. May be repeated for up to 12 hours of degree credit.

KINS 405VH. Honors Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of research problems. Prerequisite: Honors candidacy. May be repeated for up to 12 hours of degree credit.

This course is equivalent to KINS 405V.

KINS 496VH. Kinesiology Honors Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work “one-on-one” to complete the honors thesis/project. Prerequisite: Honors candidacy and KINS 3901H or EXSC 3723H. May be repeated for up to 3 hours of degree credit.

KINS 5413. Adapted Movement Science. 3 Hours.
Methods and techniques for working with individuals with disabilities in an adapted movement science.

KINS 5423. Assessment and Prescriptive Programming in Adapted Movement Science (Odd years, Sp). 3 Hours.
Instruction in the assessment, prescription, and use of instruction methods, materials, and equipment relevant to working with people with disabilities.

KINS 5493. Practicum in Adapted Physical Education (Irregular). 3 Hours.
Deals with the application of skills, knowledge and concepts necessary for planning, organizing and conducting adapted physical education programs through supervised field experiences.

KINS 574V. Internship (Sp). 1-6 Hour.
May be repeated for up to 6 hours of degree credit.

KINS 589V. Independent Research. 1-3 Hour.
Development, implementation, and completion of basic or applied research project. Prerequisite: Admission to the KINSM 589V. Independent Research. 1-3 Hour.

KINS 5900V. Master's Thesis (Sp, Su, Fa). 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

KINS 605V. Independent Study. 1-3 Hour.
Provides students an opportunity to pursue special study of educational problems. May be repeated for up to 3 hours of degree credit.

KINS 674V. Internship (Irregular). 1-3 Hour.
May be repeated for up to 3 hours of degree credit.
Landscape Architecture (LARC) Courses

LARC 1003. Basic Course in the Arts: The American Landscape (Sp, Fa). 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space.

LARC 1003H. Honors Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space.

LARC 1315. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensional and 3-dimensional through analog and digital tools; creative and critical thinking skills.

LARC 1325. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: LARC 1315.

LARC 2113. Design Communications I (Fa). 3 Hours.
Introduces basic graphic techniques fundamental to the communication of landscape design and landscape architecture. Emphasis on effective and efficient communication using free-hand and digital tools and techniques most frequently utilized in landscape architecture. Limitations and advantages are identified, and shared principles in both hand and computer graphics are emphasized.

LARC 2123. Design Communications II (Sp). 3 Hours.
Builds upon LARC 2113 by introducing advanced graphic techniques increasingly utilized in the communication of landscape design and planning, and in professional practice. Focus is on software required for sophisticated renderings and visualizations, and to manage and interpret landscape data to the regional level.

LARC 2236. Landscape Architecture Design III (Fa). 6 Hours.
Introduction to design process which responds to site and context. Reinforcement of design principles and organization systems applied to small scale design projects. Studio and lecture. Prerequisite: LARC 1326.

LARC 2346. Landscape Architecture Design IV (Sp). 6 Hours.
(Formerly LARC 3345) Expansion of abilities to analyze existing conditions of site and develop methods for interpreting and synthesizing information and perceptions into spatial design proposals. Emphasis on design form and the use of meaning and landscape narrative applied to increased scale projects within a larger or more complex context. Studio and lecture. Prerequisite: LARC 2336 and LARC 3413.

LARC 2346H. Honors Landscape Architecture Design IV (Sp). 6 Hours.
(Formerly LARC 3345) Expansion of abilities to analyze existing conditions of site and develop methods for interpreting and synthesizing information and perceptions into spatial design proposals. Emphasis on design form and the use of meaning and landscape narrative applied to increased scale projects within a larger or more complex context. Studio and lecture. Prerequisite: LARC 2336 and LARC 3413 and Honors candidacy. This course is equivalent to LARC 2346.

LARC 2714. Landscape Architecture Construction I (Sp). 4 Hours.
(Grading) Introduction to landscape architectural construction with an emphasis on grading, earthwork computations, and technical drawing skills. Introduction to roadway alignment, the land survey system, and construction documents. Lecture and laboratory.

LARC 302V. Special Studies (Irregular). 1-6 Hour.
Individual or group study and practicum and travel involving landscape design, history, and environmental analysis. May be repeated for up to 6 hours of degree credit.

LARC 302VH. Honors Special Studies (Irregular). 1-6 Hour.
Individual or group study and practicum and travel involving landscape design, history and environmental analysis. Prerequisite: Honors candidacy. This course is equivalent to LARC 302V.

LARC 303V. Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. May be repeated for degree credit.

LARC 303VH. Honors Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. Prerequisite: Honors candidacy. This course is equivalent to LARC 303V.

LARC 3356. Landscape Architecture Design V (Fa). 6 Hours.
Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution with a detailed design component. Studio and lecture. Prerequisite: LARC 2346 and LARC 2714 and acceptance into the professional program.

LARC 3356H. Honors Landscape Architecture Design V (Fa). 6 Hours.
Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution with a detailed design component. Studio and lecture. Prerequisite: LARC 2346 and LARC 2714; honors candidacy and acceptance into the professional program. This course is equivalent to LARC 3356.

LARC 3366. Landscape Architecture Design VI (Sp). 6 Hours.
Investigation of ecological determinism, historic and contemporary planning, and sustainable design as distinct approaches to landscape architecture. Studio and lecture. Prerequisite: LARC 3356.

LARC 3366H. Honors Landscape Architecture Design VI (Sp). 6 Hours.
Investigation of ecological determinism, historic and contemporary planning, and sustainable design as distinct approaches to landscape architecture. Studio and lecture. Prerequisite: LARC 3356 and Honors candidacy. This course is equivalent to LARC 3366.

LARC 3413. History of Landscape Architecture I (Fa). 3 Hours.
Analysis of the interaction between existing landscapes and human cultural development as reflected in the meaning and organization of landscape designs at garden and community scales from the Neolithic period to the mid-nineteenth century.

LARC 3413H. Honors History of Landscape Architecture I (Fa). 3 Hours.
Analysis of the interaction between existing landscapes and human cultural development as reflected in the meaning and organization of landscape designs at garden and community scales from the Neolithic period to the mid-nineteenth century. Prerequisite: Honors candidacy. This course is equivalent to LARC 3413.
LARC 3724. Landscape Construction II (Fa). 4 Hours.
Introduction to landscape architectural materials and methods of construction and assembly. Emphasis on material properties and how those properties affect the materials use in the landscape and interactions with other materials. Introduction to dimensioning and layout systems and parking requirements with increased complexity of construction documents. Lecture and laboratory.

LARC 3724H. Honors Landscape Construction II (Fa). 4 Hours.
Introduction to landscape architectural materials and methods of construction and assembly. Emphasis on material properties and how those properties affect the materials use in the landscape and interactions with other materials. Introduction to dimensioning and layout systems and parking requirements with increased complexity of construction documents. Lecture and laboratory. Prerequisite: Honors candidacy. This course is equivalent to LARC 3724.

LARC 3734. Landscape Architecture Construction III (Sp). 4 Hours.
Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drawing production. Lecture and laboratory. Prerequisite: LARC 3724.

LARC 3734H. Honors Landscape Architecture Construction III (Sp). 4 Hours.
Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drawing production. Lecture and laboratory. Prerequisite: LARC 3724 and Honors candidacy. This course is equivalent to LARC 3734.

LARC 3914. Planting Design I (Fa). 4 Hours.
Introduction to small scale projects involving use of plant materials in relation to other landscape elements, formulation of a vocabulary of plant materials and preparation of integrated planting plans and applicable specifications. Includes laboratory. Prerequisite: HORT 3103.

LARC 3914H. Honors Planting Design I (Fa). 4 Hours.
Introduction to small scale projects involving use of plant materials in relation to other landscape elements, formulation of a vocabulary of plant materials and preparation of integrated planting plans and applicable specifications. Includes laboratory. Prerequisite: HORT 3103 and Honors candidacy. This course is equivalent to LARC 3914.

LARC 3933. Cultural Landscape Studies (Su). 3 Hours.
The examination of landscape forms, and their historic and evolutionary development. Includes study of cultural, political, and site context influences. Required field trip component of study abroad. Prerequisite: LARC 3413.

LARC 402V. Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. May be repeated for up to 6 hours of degree credit.

LARC 402VH. Honors Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. May be repeated for up to 6 hours of degree credit. This course is equivalent to LARC 402V.

LARC 4033. Theory (Fa). 3 Hours.
Introduction to seminal theories in landscape architecture, environmental design and planning. Readings and case studies will be utilized to explore interaction and connection across a range of disciplinary theoretical intersections. Prerequisite: LARC 3413 and LARC 4413 or instructor consent.

LARC 4033H. Honors Theory (Fa). 3 Hours.
Introduction to seminal theories in landscape architecture, environmental design and planning. Readings and case studies will be utilized to explore interaction and connection across a range of disciplinary theoretical intersections. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. This course is equivalent to LARC 4033.

LARC 4123. Urban Form Studies (Su). 3 Hours.
The examination of urban, village, and suburban form and its influencing forces. Includes study of cultural forces, technological developments, and physical shape, scale, and materials that define urban areas. Required field trip component of study abroad. Prerequisite: LARC 3413.

LARC 4376. Landscape Architecture Design VII (Fa). 6 Hours.
(Formerly LARC 4375) Synthesis of all previous course work; an introduction to the theory and practice of larger scale planning with an emphasis on design of systems in urbanizing environments. Studio and lecture. Prerequisite: LARC 3366 and LARC 4413.

LARC 4376H. Honors Landscape Architecture Design VII (Fa). 6 Hours.
Synthesis of all previous course work; an introduction to the theory and practice of larger scale planning with an emphasis on design of systems in urbanizing environments. Studio and lecture. Prerequisite: LARC 3366 and LARC 4413 and Honors candidacy. This course is equivalent to LARC 4376.

LARC 4413. History of Landscape Architecture II (Sp). 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophical and design theories that have influenced the form of gardens, parks, and cities.

LARC 4413H. Honors History of Landscape Architecture II (Sp). 3 Hours.
Critical study and analysis of landscape architecture from mid-nineteenth century to the present. Emphasis on the philosophical and design theories that have influenced the form of gardens, parks, and cities. Prerequisite: Honors candidacy. This course is equivalent to LARC 4413.

LARC 4523H. Landscape Architecture Honors Thesis (Irregular). 3 Hours.
Development and production of an honors thesis proposal and thesis. Required for all landscape architecture honors students. Prerequisite: Honors standing.

LARC 4714. Landscape Architecture Construction IV (Fa). 4 Hours.
(Structures) Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drawing production. Lecture and laboratory. Prerequisite: Honors candidacy. This course is equivalent to LARC 4714.

LARC 4743. Public Participation in Design and Planning (Irregular). 3 Hours.
The course analyzes the role and participation of multiple stakeholders in planning, design and development scenarios. Public participation techniques covered include questionnaire design, charrettes, grassroots organizing, stakeholder identification and analysis, and other strategies for involving the public, including engaging underrepresented groups.

LARC 4743H. Honors Public Participation in Design and Planning (Irregular). 3 Hours.
The course analyzes the role and participation of multiple stakeholders in planning, design and development scenarios. Public participation techniques covered include questionnaire design, charrettes, grassroots organizing, stakeholder identification and analysis, and other strategies for involving the public, including engaging underrepresented groups. This course is equivalent to LARC 4743.
LARC 4753. Incremental Sprawl Repair (Irregular). 3 Hours.
Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval.

LARC 4753H. Honors Incremental Sprawl Repair (Irregular). 3 Hours.
Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval.
This course is equivalent to LARC 4753.

LARC 4943. Perspectives on Historic Preservation (Fa). 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883.
This course is cross-listed with IDES 4943, ARCH 4943.

LARC 4943H. Honors Perspectives on Historic Preservation (Fa). 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883.
This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.

LARC 5043. Landscape Architecture Seminar (Irregular). 3 Hours.
The role of the landscape architect in contemporary society; how this is affected by technological change and awareness of ecological problems. Group discussions, individual research projects, and guest lectures. Prerequisite: Fourth-year standing.

LARC 5053. Historic Landscape Preservation (Irregular). 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413.

LARC 5053H. Honors Historic Landscape Preservation (Irregular). 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413 and Honors candidacy.
This course is equivalent to LARC 5053.

LARC 5063. Alternative Stormwater Management (Irregular). 3 Hours.
Introduction to the role of alternative stormwater management techniques toward a more sustainable development to include constructed wetlands, bioswales, rain water harvesting, green roofs, and other stormwater reduction techniques. Emphasis on multidisciplinary team approach to problem solving. This course is open to non-majors and includes both lecture and laboratory time.

LARC 5386. Landscape Architecture Design VIII. 6 Hours.
Investigation of the relationship between development, stewardship and land use of the regional scale. Natural resource systems, public policies, regional economics, and social contexts inform environmental land use planning and design decisions. Geographic information systems (GIS) used as an analysis tool. Lecture and GIS lab. Prerequisite: LARC 4376 or instructor approval.

LARC 5386H. Honors Landscape Architecture Design VIII. 6 Hours.
Investigation of the relationship between development, stewardship and land use of the regional scale. Natural resource systems, public policies, regional economics, and social contexts inform environmental land use planning and design decisions. Geographic information systems (GIS) used as an analysis tool. Lecture and GIS lab. Prerequisite: LARC 4376 and Honors candidacy. This course is equivalent to LARC 5386.

LARC 5396. Landscape Architecture Design IX. 6 Hours.
Advanced design studio with an emphasis on individual or team research and design resolution. Includes all aspects of design process: inventory, programming, graphic documentation, formal oral presentation, and a written report. Prerequisite: LARC 5386.

LARC 5396H. Honors Landscape Architecture Design IX. 6 Hours.
Advanced design studio with an emphasis on individual or team research and design resolution. Includes all aspects of design process: inventory, programming, graphic documentation, formal oral presentation, and a written report. Prerequisite: LARC 5386. This course is equivalent to LARC 5396.

LARC 5493. Environmental Land Use Planning (Sp). 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval.

LARC 5493H. Honors Environmental Land Use Planning (Sp). 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. This course is equivalent to LARC 5493.

LARC 5613. Landscape Architectural Professional Practice (Sp). 3 Hours.
Professional responsibilities and related aspects of landscape architecture practice: ethics; office organization; client, contractor and landscape architect relationships; legal issues, contracts and documents; regulations; review of bidding and contractual documents.

Latin (LATN)
Courses
LATN 1003. Elementary Latin I (Fa). 3 Hours.
The rudiments of classical Latin, with concentration on grammar, vocabulary, and syntax. Short selections from ancient authors lead to basic reading ability.

LATN 1013. Elementary Latin II (Sp). 3 Hours.
A continuation of the rudiments of classical Latin, with concentration on grammar, vocabulary, and syntax. Short selections from ancient authors lead to basic reading ability.

LATN 2003. Petronius' Satyricon (Fa). 3 Hours.
Development of reading skills through selections from Satyricon, and an introduction to universal history and culture through critical study of the novel in translation. Prerequisite: LATN 1013 or equivalent.
LATN 2013. Catullus (Sp). 3 Hours.
Development of reading skills through selections from Catullus’ poems, and an introduction to the culture and history of the late republic through critical study of Catullus in translation and secondary works. Prerequisite: LATN 2003 or equivalent.

LATN 3003. Virgil and Ovid (Fa). 3 Hours.
Selections from the Aeneid and/or the Metamorphoses, and an introduction to Roman literary history through the critical study of these works in translation. Prerequisite: LATN 2013 or equivalent.

LATN 3013. Caesar (Sp). 3 Hours.
Selected readings from Caesar's commentaries on Gallic or Civil Wars, and an overview of Republican political and military history through the critical study of the commentaries in translation and secondary works. Prerequisite: LATN 3003 or equivalent.

LATN 3063. Intensive Elementary Latin Reading (Su). 3 Hours.
Overview of Latin grammar, vocabulary and syntax, leading to reading prose texts. For undergraduates who want short, intensive introduction to Latin and graduate students working towards reading proficiency. Successful completion fulfills graduate student research reading proficiency requirement. LATN 3063 alone cannot fulfill the Foreign Language requirement in Fulbright College. No credit for this course and LATN 1003 and/or LATN 1013.

LATN 4003. Roman History (Irregular). 3 Hours.
Selections from Sallust, Livy, Tactius, or Suetonius. An overview of Roman Historiography through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4013. Roman Satire (Irregular). 3 Hours.
Selections from the satires of Horace, Juvenal, Persius, or Seneca. An overview of Roman humor and the genre of satire through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4023. Roman Didactic Epic (Irregular). 3 Hours.
Selections from Virgil's Georgics, Lucretius' De Rerum Natura, or Manilius' Astronomica. An overview of Roman philosophical poetry through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4033. Roman Drama (Irregular). 3 Hours.
Selections from Plautus, Terence, or Seneca. An overview of Roman theater through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4043. Roman Elegy (Irregular). 3 Hours.
Selections from Propertius, Tibullus, or Ovid. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4063. Roman Pastoral and Lyric (Irregular). 3 Hours.
Selections from Catullus, Virgil's Eclogues, Horace's Odes, or Calpurnius Siculus. An overview of the two genres through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent. May be repeated for up to 6 hours of degree credit.

LATN 4073. Roman Novel (Irregular). 3 Hours.
Selections from Petronius or Apuleius. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent.

LATN 4083. Roman Oratory (Irregular). 3 Hours.
Selections from the orations and theoretical works of Cicero, Seneca the Elder, or Quintilian. An overview of the genre through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent. May be repeated for up to 6 hours of degree credit.

LATN 4093. Roman Philosophy (Irregular). 3 Hours.
Selections from the philosophical works of Cicero or Seneca. An overview of Roman philosophy through the critical study of complete works in translation and secondary works. Prerequisite: LATN 3013 or equivalent. May be repeated for up to 6 hours of degree credit.

LATN 475V. Special Investigations (Irregular). 1-6 Hour.
May be repeated for degree credit.

LATN 5633. Medieval Latin (Irregular). 3 Hours.
Selections from medieval writers from the 4th to the 17th century. Prerequisite: LATN 3003 or equivalent.

LATN 575V. Special Investigations (Irregular). 1-6 Hour.
May be repeated for degree credit.

Latin American and Latino Studies (LAST)

Courses

This course provides an interdisciplinary introduction to Latin America. Drawing on Latin American literature, history, sociology, and political science, the course examines the broad forces that have shaped the region. This course is cross-listed with ANTH 2013.

LAST 399VH. Honors Thesis (Sp, Fa). 1-6 Hour.
Prerequisite: Junior standing.

LAST 4003. Latin American Studies Colloquium. 3 Hours.
Required of all Latin American studies majors. Prerequisite: Sophomore standing for Latin American studies majors and honors students. May be repeated for up to 6 hours of degree credit.

LAST 4003H. Honors Latin American Studies Colloquium (Sp). 3 Hours.
An interdepartmental colloquium with an annual change in subject of investigation, required of all Latin American studies majors. Prerequisite: sophomore standing for Latin American studies majors and honors students. May be repeated for up to 6 hours of degree credit.

Law (LAWW)

Courses

LAWW 400V. Entertainment Law (Irregular). 1-6 Hour.
Examines the legal principles and relationships of the entertainment industry, with a primary emphasis on the music industry; provides an introduction to the practice of entertainment law and the negotiation of entertainment contracts; highlights a variety of legal and practical issues that arise when representing clients in the entertainment industry.

LAWW 4013. Legal Research & Writing I (Fa). 3 Hours.
An introduction to the special problems posed by the legal analysis and the expression of the results of that process. The primary emphasis will be on basic legal analysis techniques, basic legal writing skills, and proper citation form. Students will complete a series of writing assignments.

LAWW 4024. Contracts (Irregular). 4 Hours.
Formation and enforcement by litigation and commercial arbitration of commercial and family agreements. Mutual assent or consideration; third-party beneficiaries; assignments; joint obligation; performance; anticipatory breach; discharge of contractual duties; and the Statute of Frauds.
LAW 4054. Property (Irregular). 4 Hours.
This course deals with the creation and transfer of rights over property. The primary emphasis will be on entitlements in land. Subject to variations among professors, topics will include the rights of landowners to exclude others, estates in land, co-ownership, landlord-tenant law, real estate and personal property transactions, and servitudes.

LAW 406V. Upper Level Writing. 1-3 Hour.
Second year students must take at least one 2 or 3-hour course in upper level research and writing which has been certified by the faculty as an Upper Level Writing course. The course, which is constructed around a special topic or specific area of the law, focuses on writing or drafting. Writing component accounts for at least 2/3 of the final grade. Prerequisite: LAWW 4013 and LAWW 4113. May be repeated for up to 10 hours of degree credit.

LAW 4074. Criminal Law (Irregular). 4 Hours.
Deals with the questions of what conduct society punishes through a criminal code and of the appropriate punishment for the forbidden conduct. In this context the course includes an analysis of the theories of punishment, the definitions of various crimes, the defenses available to one charged with criminal conduct, and the limitations placed by the Constitution on governmental power in the criminal law area. Throughout the course, special emphasis is placed on the legislature's role in creating statutes alongside the judiciary's corresponding role in interpreting those statutes.

LAW 4104. Civil Procedure (Fa). 4 Hours.
Study of the process of civil litigation from preliminary matters such as court selection and jurisdiction, through joinder of parties and discovery techniques, to disposition of cases and finality of judgments. Some attempt is made to cover the antecedents of modern procedure; where appropriate, suggestions for reform are developed in class discussion. Emphasis is on the Federal Rules of Civil Procedure.

LAW 4113. Legal Research & Writing II (Sp). 3 Hours.
An introduction to persuasive writing techniques and computer research. Student will write a full appellate brief and deliver an oral argument. Prerequisite: LAWW 4013.

LAW 413V. ULW: Gender-Based Violence & Human Rights Policies & Procedures. 2-3 Hour.
The course explores various forms of gender-based violence in public and private spheres and the relationship between this violence and discourse on human rights in both the legal and policy arenas. Also considers additional solutions to the prevention of sexual violence including the economic empowerment of women, the education of girls, and others. Meets the Upper Level Writing Requirement.

LAW 4144. Torts (Irregular). 4 Hours.
An introduction to basic principles of liability for harm to persons and property. The course analyzes various categories of tortious conduct, defenses and immunities, damages, and underlying principles and policies justifying liability.

LAW 4153. Property II (Sp). 3 Hours.
Emphasis is on real property. Basic concepts are covered, including property rights in lost and found articles (general property concepts), types and historical origins of estates, and other interests in land. Property transfer techniques, such as gifts, leases (landlord and tenant), and the sale of land are also considered. Land transfer techniques, including the land sale contract, the deed, the recording system, and methods of real property title assurance are discussed. Certain aspects of land use controls are explored briefly.

LAW 4173. Criminal Procedure I (Irregular). 3 Hours.
Generally this course focuses on: (1) criminal investigation practices, more precisely, contacts between the police and persons suspected or accused of crime, at the time of or shortly before and after arrest; (2) the federal constitutional rights of suspects in their contacts with the police or, stated another way, the federal constitutional restrictions (or lack of restrictions) on the police, based on the 4th, 5th, 6th, and 14th amendments; (3) the exclusionary rule, which limits the admissibility of evidence obtained by the police from suspects in violation of their federal constitutional rights; and (4) United States Supreme Court jurisprudence.

LAW 4182. Upper Level Writing - Business Drafting (Irregular). 2 Hours.
ULW-Business Drafting is an advanced writing course that takes students through a number of writing assignments. It is geared at teaching students to produce prescriptive writing, as oppose to predicting how the law would apply or persuading a reader about how the law should apply. This class therefore requires students to use information that they have gained in other classes, notably Business Organizations, and use it in drafting appropriate documents ranging from organizational forms, to documents describing how a business is to be operated, to commercial contracts. Students will also work on professionally communicating with various constituents such as clients and other attorneys about the contents of and rationale behind drafting choices in these documents. Prerequisite: LAWW 4294.

LAW 4212. Upper Level Writing: Police Discretion (Irregular). 2 Hours.
This course will analyze the role of police discretion in the criminal justice system particularly in the context of traffic stops, interrogations, and suppression hearings. Although there are no prerequisites, students have ideally already taken Criminal Procedure and Criminal Procedure II.

LAW 4233. Criminal Procedure I (Irregular). 3 Hours.
This course critically examines criminal law and procedure cases currently pending before the Supreme Court. Students will construct hypothetical Supreme Court, argue selected cases, take a vote, and then produce an actual series of judicial opinions, and make an appellate argument. Prerequisite: LAWW 4013 and LAWW 4113.

LAW 4249. Business Organizations (Irregular). 4 Hours.
This is an introductory, survey course focusing primarily on the law applicable to closely held businesses, including agency rules and the law applicable to general and limited partnerships, LLCs and LLPs, limited liability companies, and corporations.

LAW 4442. Law & Accounting (Irregular). 2 Hours.
Study of basic accounting principles and their importance to attorneys engaged in business related activities. Topics covered include the fundamental accounting equation, the nature of accrual accounting, understanding financial statements, and accounting for assets and liabilities. Also a review of basic principles associated with financial statement analysis and valuation principles. Intended for students with little or no business training, and may not be taken for credit by students who have previously earned 6 or more hours of undergraduate or graduate credit in accounting courses.

LAW 445V. Mastering Legal Analysis (Irregular). 1-2 Hour.
In this course students will revisit and expand upon the core principles of legal analysis. This course will be based on an active-learning model with a focus on practicing legal analysis under time-pressured conditions. The professor will provide extensive individualized feedback on exercises. The materials for this course will largely be drawn from the written portions of the bar exam (both Arkansas and UBE).

LAW 500V. Special Topics. 1-18 Hour.
Included under this heading will be a variety of variable credit law courses taught by law faculty on topics that are not included elsewhere in the curriculum. May be repeated for up to 18 hours of degree credit.
LAWW 5013. Professional Responsibility (Irregular), 3 Hours.
Role of the lawyer as counselor, advocate, and public servant; obligation to society of the individual lawyer and the profession as a whole; ethical problems of the profession; representation of the unpopular cause and the desirable client, lawyers' obligation to law reform; lawyer and the press; the lawyer in public service; the aspects of law office management.

LAWW 502V. Remedies (Irregular), 3-4 Hour.
Covers equity (jurisdiction and powers of courts of equity, injunctions, including adequacy of legal remedies, balancing of equities, interests protected, and defenses), damages (compensatory, exemplary, and nominal damages; direct and consequential damages; mitigation; special application in contract and tort actions) and restitution (relief afforded by the judicial process, to prevent unjust retention of benefits).

LAWW 5031. Basic Title Examination (Fa), 1 Hour.
Basic Title Examination is a course designed to teach students how to examine abstracts of title and other compilations of public real estate records to determine ownership and marketability of surface title. The course utilizes the theoretical understanding gained from traditional substantive law courses including Property and Decedents? Estates but teaches applied practical skills not usually taught in those courses.

LAWW 5041. Oil and Gas Title Examination (Fa), 1 Hour.
Oil and Gas Title Examination is a course designed to teach students who have successfully completed Basic Title Examination how to use abstracts of title and other compilations of public real estate records to determine ownership and marketability of minerals, including oil and gas, and oil and gas leasehold, royalty, overriding royalty and other similar interests. The course utilizes the theoretical understanding gained from traditional real property and oil and gas law courses, but teach practical skills not currently taught in the usual classroom setting. Pre- or Corequisite: LAWW 5031.

LAWW 5053. Energy Law (Irregular), 3 Hours.
Energy law governs the life cycle of energy resources, from resource development and generation of electricity to the end use in homes, businesses, and cars. In this growing area of practice, energy lawyers represent energy companies, public utilities, government agencies, and non-profit organizations. The course provides a survey of how different sources of energy - hydropower, oil and natural gas, coal, nuclear energy, and renewables - are regulated. Through this survey, we will consider important policy issues such as public utility regulation and the role of markets; the federal-state balance; and environmental impacts and the future of clean energy.

LAWW 5073. Domestic Relations (Irregular), 3 Hours.
Devoted primarily to the problems generated by family relationships. There is a large section on formation and dissolution of marriage. Substantial time is also given to paternity and legitimacy, obligations toward and of children, custody, adoption, guardianship, general property law as it is affected by family relationships, and divorce and custody in the federal system (focusing primarily on enforceability of decrees in one state by courts sitting in another state).

LAWW 5083. First Amendment (Irregular), 3 Hours.
An intensive examination of the legal issues arising under the First Amendment to the United States Constitution, with an emphasis on basic free speech doctrines and the dilemmas posed by interplay between the free exercise and establishment clauses. Prerequisite: LAWW 5114.

LAWW 510V. Law: Study Abroad (Irregular), 1-6 Hour.
Open to law students studying abroad in officially sanctioned programs.

LAWW 5114. Constitutional Law (Sp), 4 Hours.
An introduction to the basic principles of constitutional law and to current constitutional doctrines and problems. The primary focus will be on the structure of the federal system and on the rights of individuals under the Due Process and Equal Protection clauses of the Fifth and Fourteenth Amendments.

LAWW 5122. ABOTA Trial Practice Lecture Series (Sp), 2 Hours.
Lecture series by experienced and prominent Arkansas trial attorneys, lecturing on case evaluation, jury instructions, witness preparation, scheduling orders, courtroom civility, voir dire, opening statement, direct and cross-examination, objections, and closing arguments.

LAWW 5133. Real Estate Transactions (Irregular), 3 Hours.
Focuses on real estate transfer, real estate finance and real estate development. Issues relating to the sale of land and conveyances of real property, mortgages and the planning, financing, constructing and marketing of modern real estate developments are treated.

LAWW 5163. Administrative Law. 3 Hours.
Course is constructed around Federal materials, but with some state references. Considers the origin and constitutional basis for the administrative process; executive and legislative controls with particular emphasis upon the judicial "control" of the administrative process (delegations, procedural and substantive due process, judicial assistance and enforcement and review of administrative decisions).

LAWW 5191. Deposition Practice (Irregular), 1 Hour.
The focus of this class is to teach how to take, defend and use depositions in civil cases. There will be extensive study of Rules 26-32 of the Arkansas and Federal Rules of Civil Procedure. Additionally, the State and Federal cases applicable to depositions will be discussed and reviewed. Discussion on the practicality of a deposition such as the timing, scheduling and expenses in depositions. Students will observe parts of several video depositions followed by a discussion.

LAWW 520V. Employment Discrimination (Irregular), 2-3 Hour.
The study of the significant cases and statutes that protect employees from discrimination based on race, color, religion, sex, national origin, age, and disability, with emphasis on Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, and the Americans with Disabilities Act.

LAWW 5213. Business Lawyering Skills. 3 Hours.
Provides practical skills instruction through exercises that simulate business client interviews, negotiations, mediation, and arbitration. Multiple written projects are also involved. Prerequisite: LAWW 4294.

LAWW 5252. International Commercial Arbitration (Irregular), 2 Hours.
This course will survey the history, purposes, and processes of international commercial arbitration.

LAWW 527V. Law and Economics (Irregular), 2-3 Hour.
Law and Economics examines legal and policy issues by critically analyzing whether legal rules provide the greatest good to the greatest number of people. The class offers an introduction to basic economic principles, while providing a useful review of many core law school and bar exam subjects.

LAWW 5293. Cyber Crime (Irregular), 3 Hours.
This course examines the law governing computer crime and the limits on law enforcement surveillance. We consider substantive crimes such as hacking, identity theft, economic espionage, and online threats before we examine the Fourth Amendment, the Wiretap Act, and other limits on law enforcement.

LAWW 5303. International and Domestic Sales and Leasing (Irregular), 3 Hours.

LAWW 5313. Payment Systems (Irregular), 3 Hours.
This course summarizes and explains the fundamental law applicable to a broad variety of current payment systems. Coverage includes issues of liability, transfer, holder in due course status, and check collection applicable to negotiable instruments (checks, notes, drafts) governed by UCC Articles 3 and 4, as well as letters of credit and documents of title governed by UCC Articles 5 and 7. The course further examines the rights, obligations, and federal protection applicable to credit and debit cards. Finally, it addresses recent legal developments in regard to a variety of electronic fund transfers, prepaid cards and digital currencies.
LAWW 5351. Arkansas Constitutional Law (Irregular). 1 Hour.
This course covers provisions of the Arkansas Constitution, including the Declaration of Rights, the separation of powers, the power of the executive and legislative branches, sovereign immunity, independent commissions, gambling and morality provisions, elections and term limits, taxation and exemptions, taxpayer lawsuits, and other topics.

LAWW 536V. Securities Regulation. 2-3 Hour.
This course explores the federal regulation of securities, with emphasis on the Securities Act of 1933 and the Securities Exchange Act of 1934. Topics examined include: the definition of a securities, public company disclosures, enforcement issues, anti-fraud rules, and insider trading liability, public offering mechanics, and exempt offerings. Prerequisite: LAWW 4294.

LAWW 5382. Employment Discrimination (Irregular). 2 Hours.
This course focuses on the study of the significant cases and statutes that protect employees from discrimination based on race, color, religion, sex, national origin, age, and disability, with emphasis on Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, and the Americans with Disabilities Act. Final exam will be a take-home exam.

LAWW 5391. Effective Corporate Compliance Program (Irregular). 1 Hour.
This course will provide a high-level overview of the importance and structure of an effective compliance program within a business, with the purpose of mitigating legal risk. The Federal Sentencing Guidelines specify the elements of an effective compliance program, and federal agencies like the Office of Inspector General for the Department of Health and Human Services, as well as some state agencies (New York Office of Medicaid Inspector General) have interpreted these or implemented them through regulation. Students who choose to work for a corporation (even in the legal department) will need to be familiar with how that corporation implements the elements of an effective compliance program, so as to effectively defend or advise the corporation.

LAWW 5451. Environmental Torts (Irregular). 1 Hour.
The focus of this class is common law environmental torts resulting in property damage, including negligence, trespass, strict liability, and nuisance. Presented are the elements of those causes of action and a review of common environmental tort fact patterns. Also discussed are issues associated with environmental torts, such as imputed liability, and defenses. Review remedies for damage to property and individuals.

LAWW 547V. State and Local Government (Irregular). 2-3 Hour.
As citizens, much of our interaction with the law is local. Local governments determine the location of our nearest grocery store, how high (or low) property taxes will be, whether to maintain a public library, how late bars can serve alcohol, and even whether it is lawful to keep a pet python. Local government activity is significant, immediate, and pervasive. Despite the importance of local government law and institutions, most law school courses focus only on federal and state sources of law with little or no mention of local government. This course aims to address this void by providing a useful overview of core legal doctrines affecting the structure, authority, financing, and liabilities of local government in the United States. The course also covers the theoretical and empirical research underlying those doctrines, and is structured to provide a broad understanding of local government relevant to most United States jurisdictions.

LAWW 550V. Wills, Trusts, and Estates (Irregular). 1-4 Hour.
This is the study of the traditional areas of wills and trusts (intestate and testate succession). The trust areas include both the private trust and the charitable trust. Taxation problems are not covered in depth but are instead reserved for the Federal Estate & Gift Taxation course.

LAWW 5513. Labor Law (Regular). 3 Hours.
The right to organize; organization of labor unions; strikes; picketing; boycotts; collective bargaining; collective labor agreements and their enforcement; unfair labor practices by employers and by unions; the union membership and his union; state labor relations legislation; the National Labor Relations Act and the Labor Management Relations Act. Not offered every year.

LAWW 5523. General Practice Capstone I (Fa). 3 Hours.
General Practice Capstone I is designed to provide students with practical information to help them transition from law school to a general practice. Experienced practitioners will present a series of workshops on discrete practice areas like criminal defense, family law, personal injury, depositions, estate planning and probate, legal ethics, and small business advisement. Includes access to practice checklists, pleadings, forms, and law practice aids.

LAWW 5533. General Practice Capstone II (Sp). 3 Hours.
General Practice Capstone II complements Capstone I, and moves the focus topically to practical lawyering in common administrative law areas. The spring workshop series focuses on administrative proceedings in criminal law (probation, parole, drug court, habeas corpus), in-house details on employment law (employee manuals and termination policies); termination and unemployment including Workers Compensation, Social Security Disability, Veterans Benefits, Nursing Home Administration, Medicare and Medicaid.

LAWW 5600. Law Research Assistant (Sp, Su, Fa). 0 Hours.
Law Research Assistant is a zero-credit course available to students who work with or under the supervision of a faculty member on a research project that contributes significantly to faculty research, course preparation or presentation, or other scholarly work for or under the direction of a faculty member. Except as otherwise approved by the supervising faculty member with the concurrence of the Associate Dean for Academic Affairs, only students who have successfully completed or are currently registered for Law 5622 Essential Legal Research may enroll. Students who are working on research with or under the direction of a faculty member must have the written pre-approval of the supervising faculty to be registered and must obtain from the Law School Registrar and complete and submit to the Registrar the course request form.

LAWW 5613. Capital Punishment (Irregular). 3 Hours.
This course examines the death penalty in America. It considers whether we can ever justify imposing the death penalty and whether we can do so fairly. But we will focus on Supreme Court cases to understand how the death penalty works in practice.

LAWW 5622. Essential Legal Research (Sp, Fa). 2 Hours.
This course covers the strategies, techniques, books, and databases essential to perform cost-effective legal research necessary for the practice of law and to assist faculty members as research assistants.

LAWW 5633. International Business Transactions. 3 Hours.
Course is designed to provide students with a general knowledge of the kinds of laws applicable to international business issues, and increased expertise in problem-solving.

This course will survey important topics in international criminal law such as genocide, war crimes, and crimes against humanity. It will trace the use of international tribunals from the Nuremberg and Tokyo tribunals to the International Criminal Court to enforce these international criminal laws.

LAWW 5662. Mergers and Acquisitions (Irregular). 2 Hours.
This course examines the legal and business considerations involved in the purchase and sale of a business, including an in-depth look at various transactional structures and the implications for shareholder voting, appraisal rights, along with an extensive review of director duties at all stages of the deal.Pre- or Corequisite: LAWW 4294.
LAWW 5673. Nonprofit Organizations. 3 Hours.
This course examines issues relating to the organization, operation, governance, and dissolution of various nonprofit entities, including charitable and public benefit corporations. Topics covered include the regulation of charitable contributions and their solicitation, obtaining and protecting tax-exempt status, and political and business activities of nonprofit organizations.

LAWW 5692. Rule of Law Colloquium (Irregular). 2 Hours.
Course is about inquiry and exploration. Course covers the Foreign Corrupt Practices Act, the UK Bribery Act, and other anti-corruption initiatives. The context of why corruption exists and ways to address it, including through means other than legal prohibitions.

This course includes cases on the power of the commissioner; the taxes of a Dodger shortstop; antitrust law and Curt Flood; ownership of Barry Bond's home run ball #73; negligence at Wrigley Field; removal jurisdiction and Pete Rose; publicity rights to the Babe; criminal law and the Black Sox; trademark law.

LAWW 5771. Mergers and Acquisitions Drafting Lab (Irregular). 1 Hour.
This course exposes students to an array of documents used to accomplish mergers and acquisitions of companies. Throughout the semester, students draft a series of agreements, which parallel the development of a typical acquisition, including confidentiality agreements, letters of intent, purchase agreements, and opinion letters. Pre- or Corequisite: LAWW 5662.

LAWW 5881. Arkansas Landlord Tenant Law (Irregular). 1 Hour.
The course will explore Arkansas landlord tenant law along with proposals for revision of the law. Topics covered will be forcible entry and detainer statute, the security deposit statute, the failure to vacate statute, the residential landlord tenant act, and Arkansas's limitation on tort liability for landlords. Discussion on the federal laws governing HUD tenancies and the greater rights afforded in those tenancies. The course will discuss both theory and practice.

LAWW 599V. Debtor-Creditor Relations (Irregular). 3-4 Hour.
Study of Article 9 of the Uniform Commercial Code and of the remedies of unsecured creditors.

LAWW 602V. Independent Legal Research (Sp, Su, Fa). 1-3 Hour.
Independent legal research conducted under the supervision of faculty members. Ordinarily a student may not accumulate more than two semester hours of credit for Independent Legal Research. This cumulative maximum may be exceeded only by special permission of the dean; who in exceptional circumstances may approve a cumulative maximum credit of three semester hours of credit for Independent Legal Research.

LAWW 603V. Federal Courts (Irregular). 1-3 Hour.
Focus is on essential aspects of federal court procedure, the scope and limits of federal judicial power, and the underlying principles of federalism and separation of powers. Topics will include federal court jurisdiction, the power of Congress to limit that jurisdiction, Supreme Court review of state court judgments, and abstention and justiciability doctrines.

LAWW 6063. Advanced Evidence (Irregular). 3 Hours.
Deals with the use of expert witnesses, forensic sciences and scientific evidence, organization of proof, burden of proof, presumptions, and the law of privileges.

LAWW 607V. Conflict of Laws (Irregular). 2-3 Hour.
Study of the legal principles involved in problems which have connections with two or more states requiring a choice-of-law, choice-of-law in federal courts, and jurisdiction in multi-state situations.

LAWW 6093. Basic Evidence (Irregular). 3 Hours.
Study of the rules of evidence under which trials are conducted; the methods by which items of evidence and admitted or excluded; relevancy, real evidence, testimonial proof, and hearsay and its exceptions.

LAWW 611V. Interschool Competition Team. 1-2 Hour.
Interschool Competition Team provides an avenue for outstanding student advocates to register their completion of a rigorous interschool competition for purposes of academic credit. Students may register for this credit after satisfying the standards for approval of non-graded credit for Interschool Competition Credit, as outlined in the University of Arkansas School of Law Board of Advocates Bylaws and relevant Bylaw and Academic Standards provisions, as promulgated by the Faculty.

LAWW 6133. Antitrust Law (Irregular). 3 Hours.
Federal anti-trust laws and their relationship to concentrations of economic power in the contexts of monopoly mergers, price fixing, economic boycotts and discrimination, re-sale price maintenance, dealer franchises, and exclusive dealing. Comparative analysis of free enterprise market and government regulated industries. Recommended for second- and third-year students interested in business practice or government service, as well as social welfare, or students with an interest in the subject.

LAWW 6143. Oil and Gas (Irregular). 3 Hours.
Study of the law of oil and gas with emphasis on the interests that may be created in oil and gas, the rights of the landowner, provisions in the oil and gas lease, the rights of assignees, and legislation dealing with production and conservation.

LAWW 614V. Board of Advocates Credit (Sp, Su, Fa). 1-4 Hour.
Members of the Board of Advocates may receive ungraded academic credit, to be awarded in the spring semester of the member's third year in law school, upon completion of duties for the fall and spring semesters.

LAWW 615V. Elder Law (Irregular). 1-2 Hour.
Course covers the unique legal issues of the elderly including physical and mental characteristics of the elderly and how to adequately represent their needs; unique housing issues that progress from help at home to nursing home placement and how to pay for services with Medicaid and VA benefits; Medicaid and VA rules and planning for benefits; and the need for specific documents dealing with their impending incapacity, eventual death and passing with dignity.

LAWW 616V. Law Review Credit (Sp, Su, Fa). 1-4 Hour.

This is an overview course covering the basics of intellectual property law (IP law). Thus, this course focuses on the protection of proprietary rights in inventions, writings, creative expression, software, trade secrets, trade designations, and other intangible intellectual products by federal patent, copyright, trademark and unfair competition law, and by state trade secrecy and unfair competition law. The course aims to give students entering a general business or civil litigation practice an overview of the various intellectual property doctrines. The course is designed both for those who are interested in pursuing IP as a career, and those who are looking only for a basic knowledge of the subject. There are no prerequisites, and a scientific background is not required. J.D. students and non-law students are welcomed.

LAWW 6182. Advanced Torts: Dignitary and Economic Harm (Irregular). 2 Hours.
Course will cover defamation, the rights of privacy (including information privacy) and publicity, harm to family relationships, malicious prosecution and interference with common law civil rights.

LAWW 618V. Journal of Food Law & Policy Credit (Sp). 1-5 Hour.
Students receive credit for completion of duties on the Law School's publication of The Journal of Food Law & Policy.

LAWW 6192. Workers' Compensation (Irregular). 2 Hours.
Study of state legislation providing remedies for workers injured in the course of their employment. Not offered every year.

LAWW 6193. Workplace Legislation (Irregular). 3 Hours.
An in-depth look at workplace statutes and the interpretive regulations along with significant and recent case law. Emphasis on wage and hour law, the Family Medical Leave Act, Occupational Safety and Health law and Arkansas Unemployment Compensation law.
LAW 6203. Trial Advocacy (Sp, Fa). 3 Hours.
An introduction to actual trial work and trial techniques through simulated exercises and the conduct of a mock trial. This course will satisfy the skills requirement. Pre- or Corequisite: LAWW 6093.

LAW 6213. Product Liability. 3 Hours.
An intensive study of the area including a review of the theories of liability; the concepts of product and defect; potential defendants; defenses; problems of proof and causation.

LAW 6223. Oil & Gas Regulation and Agreements (Irregular). 3 Hours.
Oil and gas exploration and production is an important component of the economy of Arkansas and neighboring states. Out of necessity, this industry is highly regulated in every jurisdiction, but the manner of regulation varies widely from state to state. This course examines the rationale for such regulation, while comparing the regulatory approach of three neighboring states, Arkansas, Texas and Oklahoma which are typical examples of varying types of regulation. This course is designed to complement, rather than duplicate the basic Oil and Gas course, and will normally use the same casebook. A primary goal of this course is to learn how this regulation both shapes and constrains the ways that oil and gas industry operates. We also examine forms of agreement commonly used in oil and gas transactions to help students understand the functions of those, as well as their typical provisions. The course should be helpful to anyone whose practice may involve representing those who interact with the oil and gas industry, such as landowners, as well as those students considering an oil and gas related career. The guiding approach to the class is to provide the student with familiarity and understanding of the law that is involved in the real-world drilling, completing, and selling production from oil and gas operations, including today’s unconventional plays, such as the Fayetteville Shale Play in Central Arkansas.

Fundamentals of the federal income taxation of individuals. Topics covered include gross income, deductions, assignments of income, basis, taxation of property transactions, and tax accounting.

LAW 6243. Federal Estate and Gift Taxation (Irregular). 3 Hours.
Fundamentals of the federal estate and gift transfer tax system. Topics covered include the determination of gifts for tax purposes, amounts included in decedents' gross estates, valuation, deductions and credits.

Focus on tax issues in business formation, operation, distributions, and liquidations. Prerequisite: LAWW 6233.

LAW 6262. Estate Planning (Irregular). 2 Hours.
Study of the role of lawyers (including ethical considerations) in fact gathering and analysis of data; testamentary and nonprobate transfers; planning for incapacity; Medicaid, income tax, and transfer tax considerations in small and large estates; gift techniques; planning for the surviving spouse; revocable and irrevocable trusts; life insurance; disposition of business interests; and post-mortem tax planning. Students are strongly encouraged to take either Wills, Trust and Estates or Federal Estate and Gift Taxation prior to taking the course.

LAW 629V. Public Corporations. 2-3 Hour.
A survey of topics applicable to publicly owned corporations, including: corporate governance; shareholder communication and proxy regulation; introduction to corporate finance and dividend policies; mergers and acquisitions; tender offer regulation; aspects of securities regulation; and insider trading. Prerequisite: LAWW 4294.

LAW 631V. Interschool Competition Team. 1-2 Hour.
Interschool Competition Team provides an avenue for outstanding student advocates to register their completion of a rigorous interschool competition for purposes of academic credit. Students may register for this credit after satisfying the standards for approval of non-graded credit for Interschool Competition Credit, as outlined in the University of Arkansas School of Law Board of Advocates Bylaws and relevant Bylaw and Academic Standards provisions, as promulgated by the Faculty.

Considers the implications of statutory and constitutional provisions that relate to several substantive areas of poverty law practice including public benefits, employment, consumer, health and family law. Prerequisite: LAWW 5114.

LAW 633V. Intellectual Property (Irregular). 2-3 Hour.
This course involves an introductory survey of topics in intellectual property, including copyright, trademark, patent, and unfair competition issues. If time permits, the course may also cover certain aspects of e-commerce.

LAW 6343. Conflict Resolution. 3 Hours.
Explores methods utilized in the legal profession for resolving disputes. Students develop skills by participating in simulation exercises designed to identify and apply processes. Class readings/discussion on theory and practice will be followed by student simulations.

LAW 635V. Arkansas Law Notes Credit. 1-4 Hour.
Arkansas Law Notes is published online as a student-run law journal by the University of Arkansas School of Law to members of the bar and the law school community at arkansaslawnotes.com. The publication features articles and current research, including student works. Law Notes is a tradition of the School of Law, dedicated to providing timely and insightful research on a variety of subjects to members of the bar. Law Notes is produced under the guidance of Professors Lonnie Beard, Uche Ewelukwa, and Brian Gallini. A mark of “CR” will be given.

LAW 6364. Legal Clinic: Immigration (Irregular). 4 Hours.
Immigration Clinic will provide opportunities for students preparing for a career in immigration law or general practice by developing skills that are critical in legal practice through an experiential learning model. Working under the supervision of a clinical faculty member, students will represent sectors of the immigrant population for graded credit. Criminal Procedure and Professional Responsibility are prerequisites, as well as the completion of at least forty-eight credit hours prior to enrollment. Prerequisite: LAWW 5013.

LAW 6374. Legal Clinic: Federal Practice (Sp, Fa). 4 Hours.
Students receive clinical legal experiences in federal courts and before federal administrative agencies. Although the particular experiences vary, Chapter 7 (no asset) bankruptcies and farm foreclosures are often emphasized.

LAW 6393. Legal Clinic: Transactional (Irregular). 3 Hours.
Rule 15 certification requires completion of 48 hours, including all first year classes and Professional Responsibility. Students receive clinical legal experience counseling and representing non-profit organizations serving Northwest Arkansas in a wide range of non-litigation business law matters. Services include startup, incorporation, obtaining federal and state tax exemptions, change of business form, purchase and lease of real and personal property, employment and labor law issues, and general contract negotiation, drafting and execution. In addition, students prepare and participate as presenters in a workshop on matters of general interest to non-profit organizations. Legal Clinic Faculty supervise and review the student attorney’s work, and provide personal feedback to the individual student attorneys. Prerequisite: LAWW 5013.

LAW 6403. Land Use (Irregular). 3 Hours.
Covers public land use controls such as zoning, subdivision regulations, and eminent domain (including private property rights, takings, and inverse condemnation). Heavy emphasis is placed on planning at state and local levels.
LAWW 6413. Legal Clinic: Advanced Criminal Practice (Irregular). 3 Hours.
The Advanced Criminal Practice Clinic is a 3-credit course offered after a student has successfully completed Criminal Practice Clinic. Students who wish to continue work on existing cases or work on more complicated criminal matters, may apply to enroll in the Advanced Criminal Practice Clinic. Professor approval is required for enrollment. Prerequisite: LAWW 6424.

LAWW 6424. Law Clinic: Criminal Practice Clinic (Irregular). 4 Hours.
The Criminal Practice Clinic represents clients charged with misdemeanor and simple felony charges primarily in Washington County. Under close faculty supervision, students develop their ability to effectively and ethically practice law while providing much-needed legal assistance. In addition to client representation, and court appearances, students participate in a weekly seminar. Qualification for Rule XV practice. Prerequisite: LAWW 6093, LAWW 4173, and LAWW 5013.

LAWW 6453. American Legal History (Irregular). 3 Hours.
An examination of major themes in American legal history, with an emphasis on the origins and meaning of the United States Constitution. Various topics will be explored in the light of the original understandings, developments over time, and current interpretations by the courts and the body politic.

LAWW 646V. Student Coordinating Attorney (Sp, Fa). 1-3 Hour.
The School of Law recognizes the educational value of placements under the supervision of licensed, experienced attorneys, and offers students the possibility of public service learning opportunity serving as a student coordinating attorney for 2-3 credits of ungraded credit if approved by the designated Faculty Supervisor. This option shall be available only to a student with a cumulative GPA of at least 2.0 who has successfully completed 30 hours of Law School classes including Professional Responsibility, and who has obtained and submitted at least one recommendation from a faculty member who has had that student in at least one class in the past 12 months. A student coordinating attorney is a pro-bono position involving exposure to real world situations, involving some aspect of public service, where a lawyer’s expertise and insights will be called for and can be observed. Placement is restricted to the courses offered in the all of the clinics offered at the law school. This position covers an entire semester (15 weeks during the spring and fall, and 10-12 weeks during the summer). For a two-credit student coordinating attorney position, the average work load must be no less than 8 hours per week in the fall and spring, or 10 hours per week in the summer. For a three-credit student coordinating attorney position, the average work load would be no less than 12 hours per week in the fall and spring, or 15 hours per week in the summer. Application required and must be completed in writing and delivered to the Faculty Supervisor no later than October 15 of the preceding semester for a spring semester student coordinating attorney position, no later than March 15 for a summer or fall semester student coordinating attorney position.

LAWW 648V. Special Topics (Skills) (Sp, Su, Fa). 1-3 Hour.
Special Topics (Skills) is a course where “class names” allow for a menu of course titles that provide substantial instruction in professional skills related to the responsibilities which lawyers are called upon to meet such as trial and appellate advocacy, alternative methods of dispute resolution, counseling, interviewing, negotiating, problem solving, factual investigation, organization and management of legal work, drafting, and analytical processes for applying those skills in ethical fashion. May be repeated for up to 15 hours of degree credit.

LAWW 6493. Law and Psychology (Irregular). 3 Hours.
This course covers key aspects of the relationship between law and psychology. Examples include: the regulatory effect on clinical practice of statutes, administrative regulations, and court decisions; and the influence of psychological expertise on legal decision-making through expert testimony in trial courts and amici briefs in appellate courts, testimony before legislative and administrative bodies, publication of research results, and provision of clinical services to correctional populations and public service occupations.

LAWW 650V. International Externship (Irregular). 1-5 Hour.
International Externships are experiences available in the summer to students having completed 30 hours toward the JD degree. Students work variable hours and weeks, in law offices, non-profit/ public interest/government agencies dealing with international matters. By participating in/ observing various tasks, students are exposed to international legal practice and issues of professional responsibility in an international context. There is a Field and an Academic Component to this course. May be repeated for up to 10 hours of degree credit.

Study of immigration and nationality, including exclusion and deportation; political asylum and refugee status; visa allocation and distribution; labor certification; and naturalization and citizenship. It is recommended that Administrative Law be taken first.

LAWW 6523. Employment Law (Irregular). 3 Hours.
An overview of the law governing various aspects of the employment relationship, both statutory and common law. Covers the establishment and parameters of employment, the security of the worker, employer’s rights, and terminations.

LAWW 654V. Public Interest Externship (Sp, Su, Fa). 1-3 Hour.
Public Interest Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time – 12 hours/week over 14 weeks (variable in summer) – serving an underprivileged population in traditional and non-traditional public service and public interest sectors. By participating in/ observing various tasks, students develop legal and professional skills appropriate to various areas and types of law. There is a Field and an Academic Component to this course. May be repeated for up to 12 hours of degree credit.

LAWW 6553. Arbitration Skills (Irregular). 3 Hours.
This course explores the practical as well as the legal problems presented by the use of alternative dispute resolution (ADR) to resolve disputes, with an emphasis on employment. While other areas of ADR will be touched upon, such as mediation and peer-review, the primary focus of the course will be on arbitration as the means to resolve problems in the workplace and commercial context generally. The course provides instruction and practice (through a variety of simulations) assessing all aspects of arbitration, including when/whether to arbitrate, selecting the arbitrator, conducting an arbitration, and post-hearing issues. Students will become familiar with the most common techniques and strategies that lawyers use in employment arbitration, and should be better prepared to represent your client's interests in that proceeding.

LAWW 6562. Legal Clinic: Advanced Immigration (Sp, Fa). 2 Hours.
The Advanced Immigration Law Clinic allows students to obtain an additional 2 credits of experience. Only students who have completed the Immigration Law Clinic may take the Advanced course in a subsequent semester. The Clinic provides opportunities for students preparing for a career in immigration law by developing skills that are critical in legal practice through an experiential learning model. The Clinic allows for continuity in cases, as well as opportunities to handle more advanced and diverse cases. The Clinic is offered to 2-3 students per semester. Each will receive 2 credits. Students are expected to work approximately 4 hours per credit hour, per week, including work done for class preparation, group work, individual meetings, and representation. Students are chosen through an application process including a brief statement on interest in Immigration Law and goals for study in the Advanced Clinic. Prerequisite: LAWW 6364.

LAWW 660V. Government Externship (Sp, Fa). 1-3 Hour.
Government Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time – 12 hours/week over 14 weeks (variable in summer) – alongside government attorneys, exposing students to legal issues and practice in government agencies. By participating in/ observing various tasks, students develop legal and professional skills appropriate to government work. There is a Field and an Academic Component to this course. May be repeated for up to 12 hours of degree credit.
Criminal Prosecution Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time - 12 hours/week over 14 weeks (variable in summer) - alongside prosecutors, exposing students to legal and professional skills appropriate to criminal prosecution. The nature of the rights, acquisition and enforcement, and property and contract interests in copyrights.

Criminal Defense Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time -- 12 hours/week over 14 weeks (variable in summer) -- alongside Public Defenders, exposing students to criminal law and strategy from the defense perspective. By participating in/observing various tasks, students develop legal and professional skills appropriate to criminal defense. There is a Field and an Academic Component to this course. May be repeated for up to 12 hours of degree credit.

Corporate Counsel Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time -- 16 hours/week over 14 weeks (variable in summer) -- alongside attorneys in traditional legal departments/non-traditional business-compliance areas, exposing students to legal issues facing these attorneys daily. By observing/participating in various tasks, students develop legal and professional skills appropriate to corporations. There is a Field and an Academic component to this course. May be repeated for up to 12 hours of degree credit.

Legal Clinic: Advanced Civil Litigation and Advocacy Clinic (Irregular). 3 Hours.

The advanced clinic is a 3-credit course offered after a student has successfully completed the Civil Litigation and Advocacy Clinic. Students who wish to continue working on existing cases or work on more complex clinic matters, may apply to enroll. Prerequisite: LAWW 6824.

Corporate Counsel Externships are experiences available to students having completed 30 hours toward the JD degree. Students work part-time -- 16 hours/week over 14 weeks (variable in summer) -- alongside attorneys in traditional legal departments/non-traditional business-compliance areas, exposing students to legal issues facing these attorneys daily. By observing/participating in various tasks, students develop legal and professional skills appropriate to corporations. There is a Field and an Academic component to this course. May be repeated for up to 12 hours of degree credit.

Legal Clinic: Advanced Transactional Clinic (Irregular). 3 Hours.

Students who have successfully completed the Transactional Clinic in the fall or spring semester may enroll for 3 hours of graded credit in the Advanced Transactional Clinic in any subsequent semester. Students will be assigned a normal client load during both semesters. In the summer students may enroll in Transactional Clinic and Advanced Transactional Clinic during the same term. Students will be assigned to provide legal representation to qualified nonprofit organizations under the supervision of a faculty member. Students will have the opportunity interview and counsel nonprofit entities and perform a number of transactional legal services for corporate clients including: drafting bylaws, preparing and filing articles of incorporation, completing and submitting applications for tax exempt status with state and federal tax agencies; and preparing and filing articles of dissolution. Admission to Advanced Clinic in connection with any of the eligible clinic courses is limited and by approval of the faculty member. Prerequisite: Qualification for Rule XV practice.

Environmental Law (Irregular). 3 Hours.

Devoted primarily to the legal problems related to the environment. Included is consideration of environmental impact in public and private decision making.

Civil Litigation and Advocacy Clinic (Sp, Fa). 4 Hours.

Students will represent low-income clients seeking to enforce their rights in civil matters. Under close faculty supervision, students will develop and refine their ability to effectively and ethically practice law. Students will handle all aspects of client representation, including interviewing and counseling, fact investigation and discovery, negotiation, and court appearances. Students will also participate in a weekly seminar and may have the opportunity to engage in other forms of advocacy. Cumulative GPA of 2.00, successful completion of 48 semester hours, including Civil Procedure I and II, Criminal Procedure, Evidence, and Professional Responsibility, and qualifying for Rule XV practice. Prerequisite: LAWW 4173, LAWW 5013 and LAWW 6093.

Public International Law (Irregular). 3 Hours.

Principles of international law involving relations among government. The function of international tribunals and organizations.

Legal Clinic: Advanced Federal Practice (Sp, Fa). 2-3 Hour.

Legal Clinic: Advanced Federal Practice provides opportunities for students preparing for a career in consumer bankruptcy law by developing skills that are critical in legal practice through an experiential learning model. The Advanced Federal Practice Clinic will allow for continuity in cases, as well as opportunities to handle more advanced and diverse cases. Offered to 2-3 students each semester, students enrolled in this course must have taken Federal Practice Clinic, gaining basic knowledge of bankruptcy law and procedure. Students are expected to work approximately 4 hours per credit hour, per week, including work done for class preparation, group work, individual meetings, and representation. Students are chosen through the application process. Prerequisite: LAWW 6374.
LAWW 7012. Juvenile Justice Seminar (Irregular). 2 Hours.
Examines procedural and substantive law in the context of the distinctive goals, structure, and procedure of the Juvenile Court. Special attention is given to alternative ways of dealing with two categories of juveniles, i.e., status offenders who are within the jurisdiction of the court although not accused of criminal conduct, and youthful offenders who commit serious crimes.

LAWW 7031. Regulation of Livestock Marketing and Sales (Sp). 1 Hour.
Study of the regulation of livestock and poultry sales under the Packers and Stockyards Act, with a particular focus on production contracting, mandatory price reporting, industry concentration, and antitrust issues.

LAWW 7042. Federal Regulation of Food Labeling. 2 Hours.
Study of the federal laws regarding the labeling of food, considering both FDA and USDA regulation. The course includes the study of nutrition labeling, health claims, advertising issues, and efforts to curb the obesity epidemic through educational labeling.

LAWW 706V. Sports Law (Irregular). 2-3 Hour.
The major topics covered include significant contract issues, tort liability involving participants, institutions, physicians and equipment manufacturers, criminal liability, drug testing, constitutional and related issues dealing with sports associations and Title 9 and gender equity issues. Other relevant topics may also be covered if possible.

LAWW 7071. Agricultural Cooperatives and Local Food Systems (Irregular). 1 Hour.
Introduction to the legal structure of a cooperative and examination of the recent use of the cooperative model in encouraging local and regional food systems.

LAWW 7073. Mediation in Practice. 3 Hours.
This three credit course is an introduction to the process of mediation and focuses on mediation theory and practice. The course provides a comprehensive overview of the mediation process, including the role of the mediator, litigants, attorneys, the courts and other relevant participants. Students are taught the basic skills needed to participate in a mediation as a mediator or as an advocate, and introduced to the ways in which mediation is used in various settings such as state and federal courts, and government agencies. Because this is skills class, it includes a lot of interactive work, including simulated mediations. All students are required to actively participate in the simulated mediations.

LAWW 708V. Selected Issues in Agricultural and Food Law. 1-3 Hour.
Specialized study of one or more current issues in agricultural and food law, regulation, and policy.

LAWW 709V. Agricultural Bankruptcy (Even years, Sp). 1-2 Hour.
Examines the rules and tactics governing the reorganization of a struggling business or farm under Chapter 11 of the Bankruptcy Code. Students will reorganize a hypothetical failing business as a part of the course.

LAWW 7112. Juvenile Justice Seminar (Irregular). 2 Hours.
Examines procedural and substantive law in the context of the distinctive goals, structure, and procedure of the Juvenile Court. Special attention is given to alternative ways of dealing with two categories of juveniles, i.e., status offenders who are within the jurisdiction of the court although not accused of criminal conduct, and youthful offenders who commit serious crimes.

LAWW 713V. Agricultural Water Law (Sp). 1-2 Hour.
Study of the basic legal principles applicable to water rights through consideration of water rights for agricultural use.
LAWW 7612. Advanced Consumer Bankruptcy (Irregular). 2 Hours.
Study of recent developments in the law of bankruptcy as it applies to consumer and non-consumer transactions.

LAWW 762V. Legal Issues: Indigenous Food and Agriculture. 1-2 Hour.
Overview of the legal, historic, social, and economic issues important to sustainable food and agriculture development in Indian Country. It features in-depth discussion of historic and emerging issues including land use challenges, tribal food and agriculture code development, and barriers to effective agriculture development.

LAWW 763V. Regulated Markets in Agriculture (Sp). 1-2 Hour.
Study of the economic regulation of specific sectors of the agricultural industry focusing on perishable agricultural commodities (fruits and vegetables), and dairy products. Included is the study of formal and informal administrative review.

LAWW 764V. Practicum in Agricultural & Food Law. 1-4 Hour.
This experiential course provides LL.M. candidates with an opportunity to work with agencies, advocacy organizations, businesses, and others engaged in agricultural & food law practice and policy throughout the country. Work can be performed on-site or via distance. Prerequisite: Only available to students admitted to the LL.M. Program.

LAWW 765V. Intellectual Property Issues in the Food & Agricultural Sector. 1-3 Hour.
This course offers an overview of the key IP issues in food and agriculture. The focus is on five types of IP - Trademarks, Trade Secrets, Geographical Indicators (GIs), Copyrights, and Patents. The course will introduce students to IP law (domestic, regional and global) and will look at the expansion of IPRs in food and agriculture.

LAWW 7662. American Indian Law (Irregular). 2 Hours.
Study of the domestic federal law of the United States as it applies to Native Americans and their tribes. The general concept of tribal self-determination is the unifying theme of the course. Particular topics include tribal sovereignty and government; American Indian civil rights; administrative justice on and off the reservation; American Indian land claims; land, hunting, and fishing rights; water rights; American Indian health, education, and welfare; Bureau of Indian Affairs; state taxation; individual and tribal treaty rights; federal Indian policy; and zoning and environmental controls.

LAWW 770V. Advanced Writing in Agricultural and Food Law. 1-4 Hour.
Research in a specialized area of agricultural or food law and development of a paper that demonstrates rigorous legal analysis and quality legal writing.

LAWW 771V. Independent Research in Agricultural and Food Law (Sp, Su, Fa). 1-2 Hour.
Independent research in agricultural and food law conducted under the supervision of a faculty member.

LAWW 7721. Administrative Process and Practice in Agricultural and Food Law (Fa). 1 Hour.
Study of administrative law and practice in the specialized areas of agricultural and food law. Relevant regulatory agencies are introduced. Rulemaking, adjudication, and judicial review are covered.

Study of the legal issues raised by the rising interest in urban agricultural activities. Topics of study include land use and zoning issues, farmers market issues, and legal issues associated with community sponsored agriculture.

LAWW 776V. Agricultural Finance and Credit (Irregular). 1-3 Hour.
Study of the legal issues surrounding the financing of agricultural operations, including credit availability, agricultural security issues under the Uniform Commercial Code, and debt restructuring opportunities. Special focus is on lending options offered by the Farm Service Agency and the Farm Credit System.

LAWW 7773. Water Law (Irregular). 3 Hours.
Study of real property principles governing ownership rights in water and the federal and state statutes controlling the use of water.

LAWW 778V. Agricultural Labor Law (Sp). 1-2 Hour.
Study of the legal, social, and economic issues that arise from the extensive use of migrant labor in U.S. agricultural operations. Topics include agricultural exemptions from labor laws, the Migrant & Seasonal Agricultural Worker Protection Act, and agriculture’s reliance on undocumented alien workers.

LAWW 781V. Local-Regional Food Systems and the Law (Irregular). 1-2 Hour.
This course examines recent efforts to re-establish local and regional food systems and explores the attendant legal and policy issues.

LAWW 782V. Food Justice: Law and Policy. 1-2 Hour.
Survey of the legal and policy issues raised by the food justice movement. Topics covered include food insecurity and poverty, public health concerns such as obesity, the economics of healthy eating, food deserts, and food waste. Each will be considered in light of the legal and governmental policy issues raised.

LAWW 785V. Federal Nutrition Law and Policy. 1-2 Hour.
Study of federal nutrition policy, including the development of the federal nutrition standards, the framework for the food assistance programs, the federal school lunch program, and the government’s efforts to encourage healthy eating. Prerequisite: LAWW 786V.

LAWW 786V. Food Law and Policy (Irregular). 1-3 Hour.
An introduction to the network of laws that govern our food system. An overview of regulation by both the Food & Drug Administration and the USDA is provided. Policy considerations are discussed in light of current issues.

LAWW 7872. Federal Regulation of Food Safety. 2 Hours.
Study of the federal laws that regulate food safety, considering the FDA authority under the Food, Drug and Cosmetic Act, as expanded by the Food Safety Modernization Act and USDA authority to regulate meat and poultry safety. Current issues and concerns are addressed.

LAWW 7932. Environmental Regulation of Agriculture (Sp). 2 Hours.
This course examines the major federal environmental statutes applicable to agricultural operations with attention to current cases and controversies under those laws. It also explores the regulatory authority and enforcement practices of the EPA and other agencies.

LAWW 794V. Business, Human Rights, & Corporate Social Responsibility. 1-3 Hour.
Business has helped lift people around the world out of poverty. However, businesses can have a serious impact on human rights. This is true for businesses in the food and agricultural sector. Around the globe companies in all sectors are contributing to human rights abuses. With globalization, the proliferation of multinational corporations, and increase in the scale and volume of foreign direct investment, the situation appears to be getting worse. The course explores the business-human rights nexus with a particular focus on the food and agricultural sector and on case studies from around the world.

LAWW 796V. Agriculture and the Environment (Fa). 1-3 Hour.
Agriculture is increasingly critized for its impact on the environment. This course examines the tensions between the desire to produce food and fiber efficiently and concern for sustainability and the protection of natural resources.
Management (MGMT) Courses

MGMT 2053. Business Foundations. 3 Hours.
This course surveys the areas of business and presents business processes that are common to most enterprises through a hands-on, interactive business experience. It reinforces the use of financial accounting for reporting the results of business operations, and introduces managerial accounting concepts and techniques for improving the quality business decisions. Prerequisite: ISYS 1120 or ISYS 1123 and ACCT 2013 each with a grade of "C" or better.

MGMT 2103. Managing People and Organizations. 3 Hours.
Study of the process of acquiring and managing Human Capital, focusing on the organizational behavior, legal, economic, and technical issues concerned with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics. Prerequisite: WCOB 2053 or ACCT 2023 and WCOB 1033 each with a grade of C or better.

MGMT 2103H. Honors Managing People and Organizations. 3 Hours.
Study of the process of acquiring and managing Human Capital, focusing on the organizational behavior, legal, economic, and technical issues concerned with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics. Prerequisite: WCOB 2053 or ACCT 2023 and WCOB 1033 with a grade of C or better.
This course is equivalent to MGMT 2103.

MGMT 3013. Strategic Management. 3 Hours.
Integrative study of managerial decisions; introduces students to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and applied approaches to analyzing key business decisions, implementing these decisions, and monitoring their effects. Corequisite: Drill component. Prerequisite: ACCT 2013, (ACCT 2023 or WCOB 2053), WCOB 1033, ECON 2013, ECON 2023, (MATH 2053 or MATH 2564), (MATH 2043 or MATH 2554), COMM 1313, BLAW 2013, ISYS 2103, SCMT 2103, MGMT 2103, FINN 3043 and MKTG 3433, all with a grade of C or better, and (ISYS 1120 or (ISYS 1123 with a grade of C or better)).

MGMT 3013H. Honors Strategic Management. 3 Hours.
Integrative study of managerial decisions; introduces students to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and applied approaches to analyzing key business decisions, implementing these decisions, and monitoring their effects. Prerequisite: ACCT 2013, (ACCT 2023 or WCOB 2053), WCOB 1033, ECON 2013, ECON 2023, (MATH 2053 or MATH 2564), (MATH 2043 or MATH 2554), COMM 1313, BLAW 2013, ISYS 2103, SCMT 2103, MGMT 2103, FINN 3043 and MKTG 3433, all with a grade of C or better, and (ISYS 1120 or (ISYS 1123 with a grade of C or better)).
This course is equivalent to MGMT 3013.

MGMT 3533. Alternative Dispute Resolution. 3 Hours.
This immersion into the divergent forms of conflict/dispute resolution will expose students to the dynamics of one of the leading disciplines in the workplace and society as a whole. Students will be presented with a comprehensive analysis of divergent aspects of conflict resolution strategies such as negotiation, mediation, arbitration, neutral fact finding, settlement conferences, summary trials, conciliation and facilitation. Confrontational negotiating styles and illustrations will be contrasted with topical strategies such as mutual gains. Prerequisite: Junior standing.

MGMT 3563. Management Concepts and Organizational Behavior. 3 Hours.
Business students may not receive credit for this course. Course introduces students to fundamental concepts of management practice with particular emphasis on managing human behavior in organizations. Addresses the planning, organizing, directing, and controlling functions performed by managers as these functions relate to managing human resources. Provides survey of critical management concepts; enables students to develop analytical and problem solving skills through case studies and experimental exercises. Students may not receive credit for both WCOB 2033 or MGMT 2103 and MGMT 3563. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors.

MGMT 3653. A Competitive Advantage: Creating and Leading a Diverse Workforce. 3 Hours.
Study of the process of creating and leading a diverse workforce, focusing on the knowledge and skills necessary for creating a culture that embraces and makes diversity work; examines the many dimensions of diversity with emphasis on understanding the range of cultural behaviors and expectations, cultural communication, and building diverse work teams. Special attention will be given to developing talent management competencies, such as recruiting, coaching, mentoring, career development, and evaluating and measuring the effects of diversity initiatives. Prerequisite: Junior standing.

MGMT 3673. Social Entrepreneurship. 3 Hours.
The course explores the notion of social entrepreneurship both, as a movement and as an alternative to engage with the market economy. Students will explore the possibility of opening their own business with a strong social mission; adopting some sustainable practices to advance their social or environmental causes; advocating for new ways of measuring impact and returns to investment; or simply by becoming responsible consumers, conscious about the consequences of their decision making power. Prerequisite: Junior standing.

MGMT 3933. Entrepreneurship and New Venture Development. 3 Hours.
The role of the entrepreneur in starting up new businesses. Identification of new venture opportunities and the evaluation of their feasibility.

MGMT 4003H. Honors Management Colloquium. 3 Hours.
Explores events, concepts and/or new developments in the field of Management. Prerequisite: Senior standing. May be repeated for degree credit.

MGMT 4103. Special Topics in Management. 3 Hours.
Explores trends, concepts, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered. May be repeated for degree credit.

MGMT 4103H. Honors Special Topics in Management. 3 Hours.
Explores trends, concepts, and important developments in management as they impact on organizational performance. Topics are selected by the Management Department faculty for each semester the course is offered. May be repeated for degree credit.
This course is equivalent to MGMT 4103.

MGMT 4243. Ethics and Corporate Responsibility. 3 Hours.
A comprehensive and critical examination of traditional and current ethical theories and approaches that guide business decision-making, ethical issues that affect business decisions, and ethics related to the various business disciplines.

MGMT 4253. Leadership. 3 Hours.
This course offers a foundation for understanding and evaluating organizational leadership. It is designed to assist students in developing frameworks for understanding and enacting leadership. This course examines topics such as the nature and foundation of the leader-follower relationship, models that explain effective leadership, and the interface of leadership with gender, ethics, and culture. Prerequisite: WCOB 2033 or MGMT 2103 or MGMT 3563.
MGMT 4253. Organizational Change and Development. 3 Hours.
This course will develop diagnostic and intervention skills that can be applied to identifying and overcoming problems of morale and productivity in organizations. A variety of behavioral methods will be covered. Prerequisite: WCOB 2033 or MGMT 2103 or MGMT 3563.

MGMT 4433. Small Enterprise Management. 3 Hours.
Small enterprise opportunities and problems emphasizing innovation, management planning and control, financing, marketing and legal requirements. Emphasis on application of management knowledge to small enterprise management. Prerequisite: MGMT 3933.

MGMT 450V. Independent Study. 1-3 Hour.
Permits students on individual basis to explore selected topics in management. May be repeated for up to 3 hours of degree credit.

MGMT 4543. Students Acquiring Knowledge Through Enterprise (S.A.K.E.) Product Innovation Lab. 3 Hours.
Provides a structured stage-gate framework for new product development through a hands-on, interactive product innovation experience. Students will learn and apply skills related to the development and testing of new concepts and products including: ideation techniques; concept writing; designing and implementing effective qualitative and quantitative consumer research; prototyping; financial profile development; and developing impactful presentations. Prerequisite: Junior standing.

MGMT 4583. International Management. 3 Hours.
Develops an understanding of international business management and the cultural environments in which IB exists today. Students examine international business practices and learn about unique elements of business as it practiced in selected nations and diverse cultures.

MGMT 4943. Organizational Staffing. 3 Hours.
In-depth study of theoretical, legal, methodological, and substantive issues related to selection, performance appraisal, and development of employees. Students participate in individual and group projects designed to provide theoretical and practical skills related to staffing. Prerequisite: WCOB 1033.

MGMT 4993. Entrepreneurship Practicum. 3 Hours.
Hands-on management of an actual on-going business. Students will gain experience working in, making decisions about, and managing a business. Topics covered include accounting, economics, finance, information systems, law, logistics, management, and marketing. Entrance by application only. May be repeated for up to 6 hours of degree credit.

MGMT 5213. Business Foundations for Entrepreneurs. 3 Hours.
Introduction to the fundamental business concepts an entrepreneur needs to know to evaluate and launch a successful new venture. Topic areas include recruitment, selection, motivation and management of employees, market analysis and the marketing mix, financial strategies and accounting for funds, economic considerations, and the management of operations. Prerequisite: Graduate standing.

MGMT 5223. Business Leadership and Ethics. 3 Hours.
Management for a global environment. The class will cover interpersonal workplace skills such as leadership and motivation, along with the management of human capital through well designed recruitment, selection, performance evaluation, compensation, and quality control systems. May be repeated for degree credit.

MGMT 5313. Strategic Management. 3 Hours.
Strategy formulation, strategy implementation, and other topics related to the long-term success of the firm. Includes role of the general manager, international issues, and the impact of management fads on decision making.

MGMT 5323. New Venture Development. 3 Hours.
Focuses on the identification and analysis of new venture opportunities and how entrepreneurs acquire the human and financial resources needed to develop successful businesses. Topics include market analysis, development of products and services, negotiation, developing and executing business plans, and new venture financing. Students are required to complete summer assignments before the course begins in the fall semester. Prerequisite: MGMT 5213 or an undergraduate degree in business or permission of the instructor.

MGMT 5363. Innovation & Creativity. 3 Hours.
This class will provide a framework for developing, assessing and implementing innovations in start-ups and established businesses. Focus is on creative decision making, managing for innovation, strategic analysis of innovations, and implementation of innovations. Aimed at entrepreneurs, brand managers, and managers in industries where innovation is a key strategic capability.

MGMT 537V. Global Business. 1-3 Hour.
Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return.
This course is cross-listed with MGMT 5373, ECON 5373.

MGMT 5391. Business History and Practice. 1 Hour.
This course provides students with an overview of how businesses evolve over the years, and how they are run today. Using examples from research and practitioner articles, it allows students to learn about hands on concepts such as business models, Integrative Performance, Organization Structure, Competitive Advantage, Value Networks, and Business Obligations in an experiential manner.

MGMT 5413. New Venture Development II. 3 Hours.
A large-scale, real world, 10 week project involving hands-on work addressing issues faced by managers in partnering firms. Corequisite: Instructor consent. Prerequisite: MGMT 5323.

MGMT 5602. Introduction to Strategy. 2 Hours.
An introduction to the value chain concept, the underlying framework of the Managerial MBA program. Topics include the primary value chain activities of inbound logistics, operations, outbound logistics, marketing and sales, and service, as well as the support activities of procurement, technology development, human resource management and firm infrastructure.

MGMT 5613. Leadership and Organizational Behavior. 3 Hours.
Managing in a global workforce, including human resource issues, motivation, performance evaluation, quality concepts, transformational leadership, and selection/recruitment/development of employees.

MGMT 5993. Entrepreneurship Practicum. 3 Hours.
Hands-on management of an actual on-going business. Students will gain experience working in, making decisions about, and managing a competitive business. Students will be required to analyze the business in a term paper or other integrative assignment. Entrance by application only.

MGMT 6011. Graduate Colloquium. 1 Hour.
Presentation and critique of research papers and proposals. May be repeated for degree credit.

MGMT 6113. Seminar in Organizational Behavior. 3 Hours.
Survey of theoretical and empirical literature in organizational behavior. Stresses critical evaluation of current writing in the field and its integration with prior research. Covers topics relating to motivation, individual differences, job attitudes, social influence processes, and group dynamics. Prerequisite: Admission to a Ph.D. program.
MGMT 6123. Seminar in Organization Theory. 3 Hours.  
This Ph.D.-level seminar presents an overview and introduction into organization theory literature. Emphasis on the development of relevant schools of thought, changes in the content of the traditional or ‘mainstream’ themes, current topics, schools of thought, and future directions are examined. Prerequisite: Admission to a Ph.D. program.

MGMT 6133. Seminar in Strategy Research. 3 Hours.  
This Ph.D.-level seminar presents an overview and introduction into the strategic management literature. Emphasis on both the content and process of the extant research. Relevant theory, methods, ‘mainstream’ themes, current topics, schools of thought, and future directions are examined. Prerequisite: Admission to a Ph.D. program.

MGMT 6213. Seminar in Research Methods. 3 Hours.  
Familiarizes students with the principles and techniques underlying research in management and organizations. Issues of basic philosophy of science and research methods are covered. Special attention given to the practical problems of research design, measurement, data collection, sampling, and interpretation in conducting research in management and in organizations. Prerequisite: Admission to a Ph.D. program.

MGMT 6223. Seminar in Management Topics. 3 Hours.  
Seminar in special research topics in management. Topics vary depending upon instructor. Prerequisite: Admission to a Ph.D. program. May be repeated for up to 3 hours of degree credit.

MGMT 6233. Seminar in Human Resource Management. 3 Hours.  
Provides an overview of major issues in human resource management. Designed to familiarize students with the seminal research in human resource management, and to provide them with the conceptual and methodological tools necessary to do research in the area. Prerequisite: Admission to a Ph.D. program.

MGMT 636V. Special Problems in Management. 1-6 Hour.  
Individual reading and research. May be repeated for up to 6 hours of degree credit.

MGMT 700V. Doctoral Dissertation. 1-18 Hour.  
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Marketing (MKTG) Courses

MKTG 3433. Introduction to Marketing. 3 Hours.  
Examines strategies, tactical, and operational decisions related to contemporary marketing activities. Topics covered include product, services and international strategies in consumer and business markets. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and WCOB 1033, each with a grade of C or better. This course is cross-listed with MKTG 3433H.

MKTG 3433H. Honors Introduction to Marketing. 3 Hours.  
Examines strategies, tactical, and operational decisions related to contemporary marketing activities. Topics covered include product, services and international strategies in consumer and business markets. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and WCOB 1033 each with a grade of C or better. This course is cross-listed with MKTG 3433.

MKTG 3553. Consumer Behavior. 3 Hours.  
Analyzes consumer motivation, buying behavior, market adjustment, product innovation and adaptation; consumer market measurement, including survey of economic, behavioral science theories of consumer market behavior, producer and intermediary reactions. Consumer decision making is evaluated as to psychological drives, sociological concepts used by producers, channel intermediaries, consumers; considers methods, techniques for measuring consumer behavior, and analyzing consumer markets. Prerequisite: MKTG 3433.

MKTG 3633. Marketing Research. 3 Hours.  
Research designs, techniques, and analyses of primary and secondary data for the purposes of (1) developing market forecasts and segmentation analyses; (2) strategy implementation determining product development, pricing, distribution, and promotion decisions; and (3) monitoring customer attitudes, motivations and satisfaction. Prerequisite: MKTG 3433.

MKTG 3653. Category Management Topics. 3 Hours.  
This course exposes new majors in Marketing and Supply Chain Management to the current thinking of management and supply chain professionals in consumer packaged goods (CPG) and the tools to determine consumer demand in the CPG industry. Corequisite: MKTG 3433. Prerequisite: SCMT 2103.

MKTG 4003H. Honors Marketing and Transportation Colloquium. 3 Hours.  
Explores events, concepts and/or new developments in the field of Marketing and/or Transportation. Prerequisite: Senior standing.

MKTG 4103. Marketing Topics. 3 Hours.  
Special topics in marketing not available in other courses. Topics are selected by the Marketing faculty for each semester each course is offered. Prerequisite: MKTG 3433. May be repeated for up to 6 hours of degree credit.

MKTG 4233. Integrated Marketing Communications. 3 Hours.  
The theory, knowledge, and application relevant to the coordination of marketing communications including advertising, personal selling, sales promotion, public relations, and publicity. Prerequisite: MKTG 3433.

MKTG 4433. Selling and Sales Management. 3 Hours.  
Examines how organizations and individuals communicate value and obtain desired results through the process of personal selling and customer relationship management, along with the role of sales management in the development of people and resource utilization within the firm. Prerequisite: MKTG 3433.

MKTG 4433H. Retail Strategy. 3 Hours.  
Focuses on planning to meet the objectives and satisfy the retail marketing concept. Attention is devoted to retail format, competition among retail institutions, determination of store location, merchandise lines, atmospherics, and levels of customer service provided with the sale of consumer products. Prerequisite: MKTG 3433.

MKTG 4443. Retail Buying and Merchandise. 3 Hours.  
Examination of supplier and buyer responsibilities and decisions associated with product assortment depth, budgets, promotions, inventory investment and control, and gross margin management for consumer goods including apparel, food, and durables. Prerequisite: MKTG 3433.

MKTG 4453. New Product Development. 3 Hours.  
The course is structured along the three main dimensions of new product development: designing, manufacturing, and marketing of new products. An analytical approach is taken consistent with current thinking and practice of the industry. Students learn the best approaches from a marketing manager’s perspective to effectively manage the NPD process. Prerequisite: MKTG 3433.

MKTG 450V. Independent Study. 1-3 Hour.  
The Marketing Independent Study course permits students on an individual basis to explore select topics in Marketing and Retail. Independent study projects will explore topics relevant for marketing and retail that typically are not covered in the existing curriculum. Prerequisite: Junior standing.

MKTG 4513. Nonprofit Marketing. 3 Hours.  
This course is designed to give students a deeper understanding of marketing in the nonprofit sector, how it functions and how nonprofit marketing differs from traditional for profit marketing through leadership opportunities. Students will work with local nonprofits on various marketing projects throughout the semester. The class will use a service learning model of instruction where students take a leadership role in project development and execution. Prerequisite: MKTG 3433.
MKTG 4633. Global Marketing. 3 Hours.
Examines differences in global environment; how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for global environments. Prerequisite: MKTG 3433.

MKTG 4853. Marketing Management. 3 Hours.
Strategic planning and management of the marketing function within the firm from a managerial viewpoint. Focus on the development and management of marketing strategies and tactics related to product, pricing, promotion, and distribution decisions. Prerequisite: MKTG 3633 and MKTG 3553.

MKTG 5103. Introduction to Marketing. 3 Hours.
Introduction to marketing concepts and practices as applied to the retail consumer environment. Focuses on the strategic development, positioning, and management of products, promotion, distribution, pricing, and store environments in building customer relationships from retailer and supplier perspectives. (Core). May be repeated for degree credit.

MKTG 5223. Marketing. 3 Hours.
Product management, market research, marketing communications, retailing and distribution, consumer behavior, and social and ethical implications of marketing.

MKTG 5333. Retailing Strategy and Processes. 3 Hours.
Strategic planning and operation of retailing organizations. Investigation of the various types of retailing with emphasis on both the strategic and functional aspects in retail processes.

MKTG 5433. Consumer and Market Research. 3 Hours.
Modern marketing research methods and analyses applied to consumers, shoppers, and buyers of goods and services sold in competitive retail environments. Attention is given to both quantitative and qualitative methods, analyses, interpretation, and decision making. Prerequisite: MKTG 5103.

MKTG 5523. Marketing Analytics. 3 Hours.
This course is intended to teach students how to use data analytics to improve marketing decision making at every stage of the Strategic Marketing Process. The focus will be on the skills and tools needed to obtain, process, and analyze data to formulate and answer critical marketing questions and make managerial recommendations. This is a hands-on course that employs real-world databases, lectures, cases, and exercises. Prerequisite: MKTG 5103.

MKTG 5533. Strategic Category Management. 3 Hours.
Strategic planning and management of brands and product categories from both manufacturing and retailing perspectives. Focus is on the product brand development, pricing, distribution, and promotion of brands and their strategic and functional roles in the product mix.

MKTG 5543. Category Analysis and Management. 3 Hours.
Analysis and management of brands and product categories from supplier and retailing strategic perspectives. Focus is on brand category strategic and functional roles in the merchandising mix as well as their development, pricing, distribution, promotion, and in-store placement. May be repeated for degree credit.

MKTG 5553. New Product Development and Strategy. 3 Hours.
Behavioral and social science concepts applied to retail shoppers, buyers, and consumers of products and services. Attention is given to research on the cognitive, affective, and experiential aspects involved in the acquisition, consumption, and disposal of products and services by individuals and households. Prerequisite: MKTG 5103.

MKTG 5563. Retail Strategy. 3 Hours.
The purpose of this course is to investigate the changing landscape of the retail industry. It should be noted that "retail" is an incredibly broad topic covering everything from consumer insights to supply chain to sales management. Retail is currently experiencing somewhat of a revolution as companies experiment with new technology, innovative ways to make shopping more enjoyable, or ways of engaging the customer in a way they are not likely to forget. This course will be based on identification and discussion of new trends that emerge in the retail environment. Prerequisite: MKTG 5223.

MKTG 636V. Special Problems in Marketing. 1-6 Hour.
Individual research problems. May be repeated for up to 6 hours of degree credit.

MKTG 6413. Special Topics in Marketing. 3 Hours.
Seminar in special topics in marketing. Topics vary depending upon the instructor. May be repeated for up to 3 hours of degree credit.

MKTG 6433. Seminar in Research Methods. 3 Hours.
Extensive review of literature illustrative of marketing research studies. Focuses upon theoretical foundations of research design, methodology, and analysis as well as interpretation of univariate, bivariate, and multivariate data in marketing theory exploration. May be repeated for up to 3 hours of degree credit.

MKTG 6443. Seminar in Marketing Theory. 3 Hours.
Comprehensive survey and critical review of the history of marketing thought and contemporary schools of thought in marketing discipline. In-depth research, review, synthesis, and a research proposal will be required in a selected topic from the perspectives of advancing marketing theory.

MKTG 6453. Seminar in Transportation and Business Logistics. 3 Hours.
Underlying theories and problems related to the development of logistical systems in the U.S. Attention focused on transport economics, the role of government in providing transportation facilities, and managerial issues related to integrating transportation, inventory control, warehousing, customer service levels, and facility location.

MKTG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Master of Business Administration (MBAD) Courses

MBAD 5241. Ethical Decision Making (Fa). 1 Hour.
Business Ethics will address business ethics issues from a personal, professional, and organizational perspective. We will cover basic ethical decision-making frameworks to help inform students' personal moral frameworks, ethical issues that are most relevant to managers of modern organizations, and the role of business in society.

MBAD 535V. MBA Internship (Su). 1-3 Hour.
This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of business experiences. The internship must be supervised by a faculty member as well as a member of the firm. MBA Director approval required. May be repeated for up to 3 hours of degree credit.

MBAD 536V. Study Abroad-Special Problems (Su). 1-3 Hour.
Provides MBA students with the opportunity to explore a business problem in depth under the guidance of a graduate faculty member. MBA Director approval required. May be repeated for degree credit.

MBAD 5433. Capstone Project (Su). 3 Hours.
A large-scale project integrating various business topics. Prerequisite: MGMT 5313.
MBAD 5511. Professional Development -- Special Topics In Business (Sp, Fa). 1 Hour.
A concentrated emphasis on one business topic. Corequisite: MBAD 5212, MBAD 5122 and MBAD 5232. May be repeated for up to 5 hours of degree credit.

MBAD 5613. Financial Accounting (Fa). 3 Hours.
This course covers the preparation and use of financial statements of publicly held corporations in the United States. Topics include the theory and rules used in financial statement preparation, a comparison of United States rules to International Accounting Standards, the analysis of financial statements to provide inter-company and industry comparisons and information about the financial statements of non-profit and governmental organizations.

Business law in China that is relevant to managers; Chinese regulations particularly relevant to consumer products and retail; business ethics in China.

MBAD 591V. Capstone Project Definition (Irregular). 1-3 Hour.
Identification of business processes for capstone project, including: estimation of the size of the opportunity, identification of key decisions, and proposal write up.

MBAD 592V. Capstone Project Plan (Irregular). 1-3 Hour.
Second estimation of the size of the project benefit, identification of how the current process operates, assumptions identified, literature investigated, performance metrics, and Gantt chart for project.

MBAD 593V. Capstone Project Management (Irregular). 1-3 Hour.
Management of the project, including frequent updates, milestone accomplishment, strategies to overcome challenges, and creation of an implementation plan.

MBAD 594V. Capstone Project Final Deliverables (Irregular). 1-3 Hour.
Write up of entire capstone project, presentation of project, estimates of value, implementation plan, performance metrics, and change management plan.

Mathematics (MATH)

Courses
MATH 0001L. College Algebra Laboratory I. 1 Hour.
This course provides additional support and instruction for students enrolled in MATH 1203 who are required to take it based on the placement requirements stipulated for that course. Credit earned in this course will not be applied to the total hours required for a degree. One lab hour.

MATH 0002L. College Algebra Laboratory II. 2 Hours.
This course provides additional support and instruction for students enrolled in MATH 1203 who are required to take it based on the placement requirements stipulated for that course. Credit earned in this course will not be applied to the total hours required for a degree. Two lab hours.

MATH 0131L. Quantitative Reasoning Laboratory. 1 Hour.
This course provides additional support and instruction for students enrolled in MATH 1313 who are required to take it based on the placement requirements stipulated for that course. Credit earned in this course will not be applied to the total hours required for a degree. One lab hour.

MATH 1203. College Algebra (ACTS Equivalency = MATH 1103). 3 Hours.
Topics include the solution and application of linear and quadratic equations and inequalities; functions, graphs, and theory of equations; matrix solutions of systems of equations and basic properties of matrices. Prerequisite: a score of at least 80% on the University of Arkansas Preparedness for Algebra exam, or a score of at least 23 on the math component of the ACT exam, or a score of at least 570 on the math component of the new SAT or 500 on the math component of the old SAT. Students who score at least 70% on the University of Arkansas Preparedness for Algebra exam, or at least 19 on the math component of the ACT exam, or at least 510 on the math component of the new SAT or 460 on the math component of the old SAT must also register for MATH 0001L as a corequisite. Students who score below 70% on the University of Arkansas Preparedness for Algebra exam, or below 19 on the math component of the ACT exam, or below 510 on the math component of the new SAT or below 460 on the math component of the old SAT must also register for MATH 0002L as a corequisite.

MATH 1204. College Algebra with Review (ACTS Equivalency = MATH 1103). 4 Hours.
Same as MATH 1203 with additional support, increased class time, additional review, and computerized lab component. Prerequisite: MATH 0003 with a grade of D or better, or a score of at least 70% on the University of Arkansas Preparedness for Algebra Exam, or a score of at least 19 on the math component of the ACT exam, or a score of at least 460 on the math component of the old SAT or 500 on the math component of the new SAT. This course is equivalent to MATH 1203.

MATH 1213. Plane Trigonometry (ACTS Equivalency = MATH 1203). 3 Hours.
Basic topics in trigonometry including identities, formulas, and polar coordinate system. Credit will be allowed for only one of either MATH 1213 or MATH 1264C. Prerequisite: MATH 1203 or MATH 1204 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 1284C. Precalculus Mathematics (ACTS Equivalency = MATH 1305). 4 Hours.
Topics in algebra and trigonometry. To be taken by students who expect to take MATH 2554. Corequisite: Drill component. Prerequisite: MATH 1203 or MATH 1204 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 1313. Quantitative Reasoning (ACTS Equivalency = MATH 1113). 3 Hours.
Reasoning about quantitative information, and the use of mathematical tools and models as citizens, consumers, entrepreneurs and employees in today’s complex technological society. Topics include modeling with functions; quantity, measurement and indices; finance; counting, probability, odds and risk. Prerequisite: a score of at least 70% on the University of Arkansas Preparedness for Algebra exam, or a score of at least 19 on the math component of the ACT exam, or a score of at least 510 on the math component of the new SAT or 460 on the math component of the old SAT. Students who score below 70% on the University of Arkansas Preparedness for Algebra exam, or below 19 on the math component of the ACT exam, or below 510 on the math component of the new SAT or below 460 on the math component of the old SAT must also register for MATH 0131L as a corequisite.
MATH 1514. Calculus with Algebra and Trigonometry I. 4 Hours.
Topics in algebra, trigonometry and precalculus are integrated with elementary differential calculus. Part of a two semester sequence with MATH 2514; these two courses together are equivalent to MATH 1284C and MATH 2554C. MATH 1514 BY ITSELF NOT EQUIVALENT TO EITHER MATH 1284C OR MATH 2554C. This course must be taken with MATH 2514. Intended for students who place into MATH 1284C, but who would profit from an earlier exposure to calculus concepts. Closed to students with credit for MATH 2554C. Prerequisite: MATH 1203 or MATH 1204 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 2031M. Honors Mathematical Thought Lab (Sp, Fa). 1 Hour.
Supplemental honors laboratory for MATH 2033, Mathematical Thought. Pre- or Corequisite: MATH 2033. Prerequisite: Honors standing or departmental consent.

MATH 2033. Mathematical Thought (Sp, Fa). 3 Hours.
This course introduces students to a variety of topics in modern mathematics. Topics vary and can include graph theory, game theory, voting systems, foundations of logic, cardinality, discrete geometry combinatorics, geometry of surfaces, topology and symmetry. Prerequisite: MATH 1203 or MATH 1204 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 2043. Survey of Calculus (ACTS Equivalency = MATH 2203). 3 Hours.
Selected topics in elementary calculus and analytic geometry for students in business, agriculture, and social sciences. Credit will be allowed for only one of MATH 2043 and MATH 2554. Prerequisite: MATH 1203 or MATH 1204 or MATH 1213 or MATH 1284C or MATH 2053 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 2043C. Survey of Calculus (Sp, Su, Fa). 3 Hours.
Selected topics in elementary calculus and analytic geometry for students in business, agriculture, and social sciences. Credit will be allowed for only one of MATH 2043 and MATH 2554. Corequisite: Drill component. Prerequisite: MATH 1203 or MATH 1204 or MATH 1213 or MATH 1284C or MATH 2053 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT. This course is equivalent to MATH 2043.

MATH 2053. Finite Mathematics. 3 Hours.
Topics in probability and statistics, review of algebraic matrices, and graphic analysis of linear programming for students in business, agriculture, and social sciences. Taught with a two-day-per-week lecture and one-day-per-week drill. Corequisite: Drill component. Prerequisite: MATH 1203 or MATH 1204 or MATH 1213 or MATH 1284C or MATH 2043 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT. This course is equivalent to MATH 2053.

MATH 2183. Mathematical Reasoning in a Quantitative World (Sp, Fa). 3 Hours.
Mathematical and statistical reasoning are required in contexts of growing complexity and sophistication. The purpose of this course is to cause students to possess the power and habit of mind to search out quantitative information, critique it, reflect upon it, and apply it in their public, personal and professional lives. Prerequisite: MATH 1203, MATH 1204, or MATH 1313, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 2213. Survey of Mathematical Structures I (Sp, Su, Fa). 3 Hours.
Sets and logic, systems of numerations, number systems and operations, and elementary number theory. Prerequisite: A grade of C or better in any of MATH 1203, MATH 1204, MATH 1213, MATH 1284C, MATH 2033, MATH 2043, MATH 2053, MATH 2183 or MATH 2554, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

MATH 2223. Survey of Mathematical Structures II (Sp, Su, Fa). 3 Hours.
Geometry and measurement, and statistics and probability. Prerequisite: A grade of C or better in MATH 2213.

MATH 2445. Calculus I with Review (Sp, Su, Fa). 5 Hours.
Derivative of functions of one variable, applications of the derivative, introduction of the integral, and applications. Credit will be allowed for only one of MATH 2445, MATH 2554 or MATH 2043. Prerequisite: MATH 1213 with a grade of C or better, or MATH 1284C with a grade of C or better, or a score of at least 70% on the University of Arkansas Preparedness for Calculus Exam, or a score of at least 28 on the math component of the ACT exam, or a score of at least 640 on the math component of the old SAT or 660 on the math component of the new SAT, or a score of at least 2 on the Calculus AB or BC Advanced Placement Exam. This course is equivalent to MATH 2554.

MATH 2514. Calculus with Algebra and Trigonometry II. 4 Hours.
Continuation of MATH 1514. Topics in algebra, trigonometry and precalculus are integrated with elementary differential and integral calculus. Completion of MATH 1514 and MATH 2514 is equivalent to completion of MATH 1284C and MATH 2554C. This course is meant exclusively for students who have previously taken MATH 1514. MATH 2514 BY ITSELF NOT EQUIVALENT TO EITHER MATH 1284C OR MATH 2554C. Closed to students with credit for MATH 2554C. Prerequisite: MATH 1514 with a grade of C or better.

MATH 2554. Calculus I (ACTS Equivalency = MATH 2405). 4 Hours.
Derivative of functions of one variable, applications of the derivative, introduction of the integral, and applications. Credit will be allowed for only one of MATH 2554 and MATH 2043. Prerequisite: MATH 1213 with a grade of C or better, or MATH 1284C with a grade of C or better, or a score of at least 80% on the University of Arkansas Preparedness for Calculus Exam, or a score of at least 28 on the math component of the ACT exam, or a score of at least 640 on the math component of the old SAT or 660 on the math component of the new SAT, or a score of at least 2 on the Calculus AB or BC Advanced Placement Exam.
MATH 2554C. Calculus I (ACTS Equivalency = MATH 2405). 4 Hours.
Derivative of functions of one variable, applications of the derivative, introduction of the integral, and applications. Credit will be allowed for only one of MATH 2554 and MATH 2043. Corequisite: Drill component. Prerequisite: MATH 1213 with a grade of C or better, or MATH 1284C with a grade of C or better, or a score of at least 80% on the University of Arkansas Preparedness for Calculus Exam, or a score of at least 28 on the math component of the ACT exam, or a score of at least 640 on the math component of the old SAT or 660 on the math component of the new SAT, or a score of at least 2 on the Calculus AB or BC Advanced Placement Exam. This course is equivalent to MATH 2554.

MATH 2554H. Honors Calculus I (Sp, Fa). 4 Hours.
Topics in analytic geometry and calculus presented in a rigorous manner suitable for an honors student. Students may not receive credit for both MATH 2043 and MATH 2554. Prerequisite: Honors standing or departmental consent; and a score of at least 30 on the math component of the ACT exam, or a score of at least 680 on the math component of the old SAT or 710 on the math component of the new SAT. This course is equivalent to MATH 2554.

MATH 2564. Calculus II (ACTS Equivalency = MATH 2505) (Sp, Su, Fa). 4 Hours.
Integral calculus of one variable and infinite series. Prerequisite: MATH 2554 with a grade of C or better.

MATH 2564C. Calculus II (Sp, Su, Fa). 4 Hours.
Integral calculus of one variable and infinite series. Three hours of lecture and two hours of drill (recitation) per week. Corequisite: Drill component. Prerequisite: MATH 2554 with a grade of C or better.
This course is equivalent to MATH 2564.

MATH 2564H. Honors Calculus II (Sp). 4 Hours.
Integral calculus of one variable and infinite series. Prerequisite: MATH 2554 with a grade of A, or MATH 2554H with a grade of A or B, or a score of 5 on the AP AB Calculus Exam. This course is equivalent to MATH 2564.

MATH 2574. Calculus III (ACTS Equivalency = MATH 2603) (Sp, Su, Fa). 4 Hours.
Differential and integral calculus of several variables, and vector calculus. Prerequisite: MATH 2564 with a grade of C or better.

MATH 2574C. Calculus III (Sp, Su, Fa). 4 Hours.
Differential and integral calculus of several variables, and vector calculus. Three hours of lecture and two hours of drill (recitation) per week. Corequisite: Drill component. Prerequisite: MATH 2564 with a grade of C or better.
This course is equivalent to MATH 2574.

MATH 2574H. Honors Calculus III (Sp, Fa). 4 Hours.
Differential and integral calculus of several variables, and vector calculus. Prerequisite: MATH 2564 with a grade of A, or MATH 2564H with a grade of A or B, or a score of 5 on the AP BC Calculus Exam. This course is equivalent to MATH 2574.

MATH 2584. Elementary Differential Equations (Sp, Su, Fa). 4 Hours.
First and second order ordinary differential equations, the Laplace transform, and matrix systems of ordinary differential equations. Prerequisite: MATH 2564 or MATH 2564C with a grade of C or better.

MATH 2584C. Elementary Differential Equations (Sp, Su, Fa). 4 Hours.
First and second order ordinary differential equations, the Laplace transform, and matrix systems of ordinary differential equations. Three hours of lecture and two hours of drill (recitation) per week. Corequisite: Drill component. Prerequisite: MATH 2564 or MATH 2564C with a grade of C or better.
This course is equivalent to MATH 2584.

MATH 2584H. Honors Elementary Differential Equations (Irregular). 4 Hours.
Topics in ordinary differential equations, systems of differential equations and the Laplace transform presented with an emphasis on modeling. Prerequisite: MATH 2564 with a grade of A, or MATH 2564H with a grade of A or B, or a score of 5 on the AP BC Calculus exam.

MATH 2603. Discrete Mathematics (Sp, Su, Fa). 3 Hours.
Introductory study of sets, relations, logic, proofs, algorithms, counting methods, graph theory, trees, and Boolean algebras. Prerequisite: MATH 2554 with a grade of C or better or the equivalent.

MATH 2603C. Discrete Mathematics (Sp, Su, Fa). 3 Hours.
Introductory study of sets, relations, logic, proofs, algorithms, counting methods, graph theory, trees, and Boolean algebras. Corequisite: Drill component. Prerequisite: MATH 2554 with a grade of C or better or the equivalent.
This course is equivalent to MATH 2603.

MATH 2701. Survey of Higher Math (Sp). 1 Hour.
This course overviews the landscape of higher mathematics, touching on many of the themes of modern mathematics: proof, logic, cardinality, analysis, modeling, abstract algebra, number theory, topology, and geometry. Pre- or Corequisite: MATH 2564.

MATH 2803. Transition to Advanced Mathematics. 3 Hours.
An introduction to concepts encountered in advanced mathematics. Emphasis is placed on developing the student's problem solving skills and ability to correctly communicate abstract concepts. Topics to include set theory, logic, relations, functions and mathematical induction presented in the context of intriguing mathematical problems. Pre- or Corequisite: MATH 2554 or MATH 2554C.

MATH 2903. Functions, Foundations and Models (Sp, Fa). 3 Hours.
An in-depth study of topics from secondary school mathematics, emphasizing the development of the concept function, function patterns in data sets, connections among the main topics associated with a secondary school curriculum, and the appropriate use of technology. Pre- or Corequisite: MATH 2564 or MATH 2564C.

MATH 3013. Introduction to Probability (Sp, Su, Fa). 3 Hours.
A calculus-based introduction to probability. Discrete probability spaces and counting techniques, discrete and continuous probability distributions, random variables, random samples, law of large numbers, central limit theorem. Prerequisite: MATH 2564 or MATH 2564C. This course is cross-listed with STAT 3013.

MATH 3083. Linear Algebra (Sp, Su, Fa). 3 Hours.
Systems of linear equations, vector spaces, linear transformations, matrices, and determinants. Only one of MATH 3083 and MATH 3093 will count for credit. Prerequisite: MATH 2554 or MATH 2043, with a grade of C or better.

MATH 3093. Abstract Linear Algebra. 3 Hours.
A proof-based course on vector spaces, linear transformations, matrices, determinants, eigenspaces and eigenvalues, with applications. Recommended for mathematics majors. Only one of MATH 3083 and MATH 3093 may be counted for credit. Pre- or Corequisite: MATH 2564 with a C or better. Prerequisite: MATH 2803 with a C or better.

MATH 3103. Combinatorial and Discrete Mathematics (Sp, Fa). 3 Hours.
Basic combinatorial techniques including the study of networks, generating functions, principles of inclusion/ exclusion, Zn, Hamming coding theory, graph theory, and block designs. Prerequisite: MATH 2603 or MATH 2803.

MATH 3113. Introduction to Abstract Algebra I (Sp, Fa). 3 Hours.
Introduction to algebraic structures with emphasis on rigorous justification of results. Prerequisite: MATH 2803 with a grade of C or better; and MATH 3083 or MATH 3093 with a grade of C or better.
MATH 3133. History of Mathematics (Sp). 3 Hours.
Survey of the development of mathematical ideas from the ancient to the modern
styles. Prerequisite: MATH 2554, and MATH 2603 or MATH 2803, with both a grade of
See the departmental approval.
MATH 3203. Number Theory (Irregular). 3 Hours.
Topics in elementary number theory. Prerequisite: MATH 2554, and MATH 2603 or
MATH 2803, with both a grade of C or better.
MATH 3513. Elementary Analysis. 3 Hours.
A first rigorous course in analysis. The formal basis of the real number system,
sequences and series, the Bolzano-Weierstrass Theorem, limits and continuity,
the Intermediate Value Theorem, Rolle’s Theorem, differentiation, the Mean
Value Theorem and its consequences, Taylor’s Theorem, L’Hospital’s rules,
convexity, Riemann integration, the Fundamental Theorem of Calculus. Only
one of MATH 3513 and MATH 4513 may be counted for credit toward the major.
Prerequisite: A grade of C or better in each of MATH 2554 or MATH 2554C,
MATH 2564 or MATH 2564C, MATH 2574 or MATH 2574C, MATH 3083 or
MATH 3093, and MATH 2803.
MATH 3773. Foundations of Geometry I (Fa). 3 Hours.
Axiomatic method; Euclidean geometry; non-Euclidean geometry. Prerequisite:
MATH 2554, and MATH 2603 or MATH 2803, each with a grade of C or better.
MATH 3923H. Honors Colloquium (Irregular). 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite:
Honors candidacy (not restricted to candidacy in mathematics). May be repeated for
degree credit.
MATH 399VH. Honors Mathematics Course (Sp, Su, Fa). 1-6 Hour.
Prerequisite: Departmental consent. May be repeated for up to 12 hours of degree
credit.
MATH 400V. Directed Readings (Sp, Su, Fa). 1-7 Hour.
Prerequisite: Departmental consent. May be repeated for up to 7 hours of degree
credit.
MATH 404V. Classroom Practices in Mathematics (Sp, Fa). 1-3 Hour.
The pedagogy of curricular materials in mathematics acquired through participation
in the classroom as an apprentice teacher. Non-major elective credit only.
Prerequisite: MATH 2574 and departmental approval.
MATH 405V. Internship in Professional Practice (Fa, Sp, Su). 1-3 Hour.
Professional work experience involving significant use of mathematics or statistics
in business, industry or government. Prerequisite: Departmental consent. May be
repeated for up to 3 hours of degree credit.
MATH 4103. Advanced Linear Algebra (Irregular). 3 Hours.
Linear functionals, matrix representation of linear transformations, scalar product,
and spectral representation of linear transformations. Prerequisite: MATH 3083 or
MATH 3093.
MATH 4113. Introduction to Abstract Algebra II (Sp). 3 Hours.
Topics in abstract algebra including finite abelian groups, linear groups, factorization
in commutative rings and Galois theory. Prerequisite: MATH 3113.
MATH 4153. Mathematical Modeling (Irregular). 3 Hours.
Mathematical techniques for formulating, analyzing, and criticizing deterministic
models taken from the biological, social, and physical sciences. Techniques include
graphical methods, stability, optimization, and phase plane analysis. Prerequisite:
MATH 2584.
MATH 4163. Dynamic Models in Biology (Irregular). 3 Hours.
Mathematical and computational techniques for developing, executing, and
analyzing dynamic models arising in the biological sciences. Both discrete and
continuous time models are studied. Applications include population dynamics,
cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554.
This course is cross-listed with BIOL 4163.
MATH 4173. Mathematical CAM Design (Irregular). 3 Hours.
Mathematical and computational techniques for Computer aided manufacturing.
Applying linear algebra to model 3d space, representation of curves and surfaces
in 3d models, converting between smooth and discrete approximations of curves,
algorithms to create surfaces from machine toolpaths, inverse kinematics, basic G-
Code programming. Prerequisite: MATH 2574 or MATH 2574C.
MATH 4253. Symbolic Logic I (Fa). 3 Hours.
Rigorous analyses of the concepts of proof, consistency, equivalence, validity,
implication, and truth. Full coverage of truth-functional logic and quantification theory
(predicate calculus). Discussion of the nature and limits of mechanical procedures
(algorithms) for proving theorems in logic and mathematics. Informal accounts of the
basic facts about infinite sets. Prerequisite: MATH 2603, MATH 2803, or PHIL 2203.
This course is cross-listed with PHIL 4253.
MATH 4303. Ordinary Differential Equations. 3 Hours.
Existence, uniqueness, stability, qualitative behavior, and numerical solutions.
Prerequisite: MATH 2584 and (MATH 4513 or MATH 3513).
MATH 4353. Numerical Linear Algebra. 3 Hours.
Numerical methods for problems of linear algebra, including the solution of very
large systems, eigenvalues, and eigenvectors. Prerequisite: MATH 3083 or
MATH 3093.
MATH 4363. Numerical Analysis. 3 Hours.
General iterative techniques, error analysis, root finding, interpolation,
approximation, numerical integration, and numerical solution of differential
equations. Prerequisite: MATH 2584.
MATH 4423. Introduction to Partial Differential Equations (Sp, Su, Fa). 3 Hours.
Matrices, Fourier analysis, and partial differential equations. Prerequisite:
MATH 2584 or MATH 2584C with a grade of C or better.
MATH 4443. Complex Variables (Fa). 3 Hours.
Complex analysis, series, and conformal mapping. Additional applications for
graduate credit. Prerequisite: MATH 2603 or MATH 2803, and MATH 2584 or
MATH 2584C.
MATH 4503. Differential Geometry (Irregular). 3 Hours.
Topics include: classical differential geometry of curves and surfaces in 3-space,
differential forms and vector fields. Prerequisite: MATH 2574 or MATH 2574C.
MATH 4513. Advanced Calculus I. 3 Hours.
The real and complex number systems, basic set theory and topology, sequences
and series, continuity, differentiation, and Taylor’s theorem. Emphasis is placed on
careful mathematical reasoning. Only one of MATH 3513 and MATH 4513 may be
counted for credit toward the major. Prerequisite: MATH 2574 or MATH 2574C.
MATH 4523. Advanced Calculus II. 3 Hours.
The Riemann-Stieljes integral, uniform convergence of functions, Fourier series,
implicit function theorem, Jacobians, and derivatives of higher order. Prerequisite:
MATH 4513.
MATH 4703. Introduction to Point-Set Topology. 3 Hours.
A study of topological spaces including continuous transformations, connectedness
and compactness. Prerequisite: MATH 4513.
MATH 4933. Honors Colloquium (Irregular). 3 Hours.
Prerequisite: Departmental consent. May be repeated for up to 7 hours of degree
credit.
MATH 499VH. Honors Mathematics Course (Sp, Su, Fa). 1-6 Hour.
Prerequisite: Departmental consent. May be repeated for up to 12 hours of degree
credit.
MATH 500V. Directed Readings (Sp, Su, Fa). 1-7 Hour.
Prerequisite: Departmental consent. May be repeated for up to 7 hours of degree
credit.
MATH 5103. Advanced Linear Algebra (Irregular). 3 Hours.
Linear functionals, matrix representation of linear transformations, scalar product,
and spectral representation of linear transformations. Prerequisite: MATH 3083 or
MATH 3093.
MATH 5113. Introduction to Abstract Algebra II (Sp). 3 Hours.
Topics in abstract algebra including finite abelian groups, linear groups, factorization
in commutative rings and Galois theory. Prerequisite: MATH 3113.
MATH 5153. Mathematical Modeling (Irregular). 3 Hours.
Mathematical techniques for formulating, analyzing, and criticizing deterministic
models taken from the biological, social, and physical sciences. Techniques include
graphical methods, stability, optimization, and phase plane analysis. Prerequisite:
MATH 2584.
MATH 5163. Dynamic Models in Biology (Irregular). 3 Hours.
Mathematical and computational techniques for developing, executing, and
analyzing dynamic models arising in the biological sciences. Both discrete and
continuous time models are studied. Applications include population dynamics,
cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554.
This course is cross-listed with BIOL 4163.
MATH 498V. Senior Thesis (Sp, Su, Fa). 1-6 Hour.

MATH 499V. Research Topics in Mathematics (Irregular). 1-3 Hour.
Current research interests in mathematics, at an advanced undergraduate or beginning graduate level. Prerequisite: Departmental consent. May be repeated for up to 12 hours of degree credit.

MATH 499VH. Honors Research Topics in Mathematics (Irregular). 1-3 Hour.
Current research interests in mathematics, at an advanced undergraduate or beginning graduate level. Prerequisite: Departmental consent. May be repeated for up to 12 hours of degree credit.

This course is equivalent to MATH 499V.

MATH 5001. Connections to School Mathematics (Irregular). 1 Hour.
This course is a supplement to any graduate course in statistics, algebra, analysis, or geometry. The purpose is to connect the content of the graduate course to school mathematics. Prerequisite: Departmental consent. May be repeated for up to 6 hours of degree credit.

MATH 5013. Abstract Algebra with Connections to School Mathematics (Irregular). 3 Hours.
Basic structures of abstract algebra (rings, fields, groups, modules and vector spaces) with emphasis on rings and fields as generalizations of the ring of integers and field of rational numbers. Degree credit will not be awarded for both MATH 4113 (or MATH 5123) plus MATH 5001 and for MATH 5013. Prerequisite: Graduate standing or departmental consent.

MATH 5023. Geometry with Connections to School Mathematics. 3 Hours.
School geometry from an advanced perspective including conformity to the Common Core State Standards for Mathematics. Study will include historical developments and geometry based on transformations of two- and three-dimensional space. Prerequisite: Graduate standing or departmental consent.

MATH 5033. Advanced Calculus with Connections to School Mathematics Teaching. 3 Hours.
Rigorous development of the real numbers, continuity, differentiation, and integration. Degree credit will not be awarded for both MATH 4513 (or MATH 5503) plus MATH 5001 and for MATH 5033. Prerequisite: Departmental consent.

MATH 504V. Special Topics for Teachers. 1-6 Hour.
Current topics in mathematics of interest to secondary school teachers. Prerequisite: Graduate standing or departmental consent. May be repeated for degree credit.

MATH 5053. Probability & Statistics with Connections to School Mathematics (Sp). 3 Hours.
An advanced perspective of probability and statistics as contained in the high school mathematics curriculum with connections to other components of school mathematics. The content is guided by the content of the high school probability and statistics of the Common Core State Standards for Mathematics. Prerequisite: Graduate standing.

MATH 507V. Professional Development for Secondary Mathematics Teaching. 1-6 Hour.
Validated participation in professional development mathematics workshops or institutes sanctioned by national or international educational organizations such as the College Board, International Baccalaureate Program, and the National Board for Professional Teaching Standards. Prerequisite: Enrollment in Secondary Mathematics Teaching, MA degree program or departmental consent. May be repeated for up to 6 hours of degree credit.

MATH 510V. Mathematical Seminar (Sp, Fa). 1-3 Hour.
Members of the faculty and advanced students meet for presentation and discussion of topics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent.

MATH 5123. Algebra I (Fa). 3 Hours.
What the beginning graduate student should know about algebra: groups, rings, fields, modules, algebras, categories, homological algebra, and Galois Theory. Prerequisite: MATH 3113, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5133. Algebra II (Sp). 3 Hours.
Continuation of MATH 5123. Prerequisite: MATH 5123, and graduate standing in mathematics or statistics.

MATH 5153. Advanced Linear Algebra. 3 Hours.
(Formerly MATH 4103.) Linear functionals, matrix representation of linear transformations, scalar product, and spectral representation of linear transformations. Graduate degree credit will not be given for both MATH 4103 and MATH 5153. Prerequisite: Graduate standing.

MATH 5213. Advanced Calculus I. 3 Hours.
(Formerly MATH 4513.) The real and complex number systems, basic set theory and topology, sequences and series, continuity, differentiation, and Taylor's theorem. Emphasis is placed on careful mathematical reasoning. Graduate degree credit will not be given for both MATH 4513 and MATH 5213. Prerequisite: Graduate standing.

MATH 5223. Advanced Calculus II. 3 Hours.
(Formerly MATH 4523.) The Riemann-Stieltjes integral, uniform convergence of functions, Fourier series, implicit function theorem, Jacobians, and derivatives of higher order. Graduate degree credit will not be given for both MATH 4523 and MATH 5223. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513).

MATH 5303. Ordinary Differential Equations (Fa). 3 Hours.
Existence, uniqueness, stability, qualitative behavior, and numerical solutions. Prerequisite: MATH 2584 and MATH 4513, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5313. Partial Differential Equations. 3 Hours.
Laplace's equation, Heat equation, Wave Equation, Method of Characteristics. Prerequisite: MATH 4423, MATH 4513, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5323. Partial Differential Equations II. 3 Hours.
Fourier Transforms, Sobolev Spaces, Elliptic Regularity. Prerequisite: MATH 5313, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5363. Scientific Computation and Numerical Methods (Fa). 3 Hours.
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent.

This course is cross-listed with PHYS 5363.

MATH 5383. Numerical Analysis. 3 Hours.
(Formerly MATH 4363.) General iterative techniques, error analysis, root finding, interpolation, approximation, numerical integration, and numerical solution of differential equations. Graduate degree credit will not be given for both MATH 4363 and MATH 5383. Prerequisite: Graduate standing.

MATH 5393. Numerical Linear Algebra. 3 Hours.
(Formerly MATH 4353.) Numerical methods for problems of linear algebra, including the solution of very large systems, eigenvectors, and eigenvectors. Graduate degree credit will not be given for both MATH 4353 and MATH 5393. Prerequisite: Graduate standing.

MATH 5423. Introduction to Partial Differential Equations (Sp, Fa). 3 Hours.
Matrices, Fourier analysis, and partial differential equations. Does not count towards degree credit in MATH. Prerequisite: Graduate standing.
MATH 5453. Functional Analysis I (Odd years, Sp). 3 Hours.
Banach Spaces, Hilbert Spaces, operator theory, compact operators, dual spaces and adjoints, spectral theory, Hahn-Banach, open mapping and closed graph theorems, uniform boundedness principle, weak topologies. Prerequisite: MATH 5513, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5503. Theory of Functions of a Real Variable I. 3 Hours.
Real number system, Lebesgue measure, Lebesgue integral, convergence theorems, differentiation of monotone functions, absolute continuity and the fundamental theorem of calculus L^P spaces, Holder and Minkowski inequalities, and bounded linear functionals on the L^P spaces. Prerequisite: MATH 4523 or MATH 5223 (formerly MATH 4523), and graduate standing in mathematics or statistics, or departmental consent.

MATH 5513. Theory of Functions of a Real Variable II (Sp). 3 Hours.
Measure and integration on abstract measure spaces, signed measures, Hahn decomposition, Radon-Nikodym theorem, Lebesgue decomposition, measures on algebras and their extensions, product measures, and Fubini's theorem. Prerequisite: MATH 5503, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5523. Theory of Functions of a Complex Variable I. 3 Hours.
Complex numbers, analytic functions, power series, complex integration, Cauchy's Theorem and integral formula, maximum principle, singularities, Laurent series, and Mobius maps. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513).

MATH 5533. Theory of Functions of a Complex Variable II (Sp). 3 Hours.
Riemann Mapping Theorem, analytic continuation, harmonic functions, and entire functions. Prerequisite: MATH 5523, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5703. Topology I. 3 Hours.
An introduction to topology. Topics include metric spaces, topological spaces and general point-set topology, homotopy and the fundamental group, covering spaces, the classification of surfaces. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513), and graduate standing in mathematics or statistics, or departmental consent.

MATH 5713. Topology II (Odd years, Sp). 3 Hours.
The continuation of Topology I. Topics include: advanced homotopy and covering spaces, the Seifert-van Kampen theorem, homology and the Mayer-Vietoris sequence. Prerequisite: MATH 5703, and graduate standing in mathematics or statistics, or departmental consent.

MATH 5723. Differential Topology I. 3 Hours.
An introduction to the topology of smooth manifolds: applications of the inverse function theorem to smooth maps, Sard's theorem, transversality, intersection theory, degrees of maps, vector fields and differential forms on manifolds, integration on manifolds. Prerequisite: MATH 4513 or MATH 5213 (formerly MATH 4513) and graduate standing in mathematics or statistics, or departmental consent.

MATH 5733. Differential Topology II (Even years, Sp). 3 Hours.
The continuation of Differential Topology I, with additional advanced topics. Possible advanced topics may include: Morse theory, de Rham cohomology theory, Poincare duality, Riemannian geometry, and Lie groups and Lie algebras. Prerequisite: MATH 5723 and graduate standing in mathematics or statistics, or departmental consent.

MATH 609V. Topics in Math Education (Sp, Su, Fa). 1-6 Hour.
Topics in mathematics education research including curriculum, teacher education, learning theory, and assessment. Prerequisite: Graduate standing. May be repeated for up to 12 hours of degree credit.

MATH 610V. Directed Readings (Irregular). 1-6 Hour.
Directed readings. Prerequisite: Departmental consent.

MATH 619V. Topics in Algebra (Sp, Su, Fa). 1-6 Hour.
Current research interests in algebra. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. May be repeated for degree credit.

MATH 6203. Theory of Probability. 3 Hours.
A rigorous mathematical treatment based on measure theory of the fundamental notions and results of the theory of probability. Topics covered include laws of large numbers, central limit theorems, conditional expectations. Additional topics that may be covered include martingales, Markov chains, Brownian motion and stochastic integration. Prerequisite: MATH 5513.

MATH 6213. Mathematical Statistics. 3 Hours.
A rigorous mathematical treatment of the fundamental principles and results in the theory of Statistics. Topics include exponential families of distributions, estimation of unknown parameters, the classical theory of theory of hypothesis testing, Large sample approximations, large sample properties of estimators. Prerequisite: MATH 6203.

MATH 659V. Topics in Analysis (Sp, Su, Fa). 1-6 Hour.
Current research interests in analysis. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. May be repeated for degree credit.

MATH 670V. Topics in Topology (Sp, Su, Fa). 1-6 Hour.
Current research interest in topology. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. May be repeated for degree credit.

MATH 700V. Doctoral Dissertation (Sp, Su, Fa). 1-18 Hour.
Doctoral Dissertation. Prerequisite: Doctoral candidacy in mathematics. May be repeated for degree credit.

Mechanical Engineering (MEEG) Courses

Equilibrium and resultant for force systems in a plane and in space; analysis of structures, friction, centroids, moments of inertia, and virtual work method. Methods of analysis are emphasized. Corequisite: Drill component. Pre- or Corequisite: MATH 2574 or MATH 2574C. Prerequisite: PHYS 2054.
This course is cross-listed with MEEG 2003H.

MEEG 2003H. Honors Statics. 3 Hours.
Equilibrium and resultant for force systems in a plane and in space; analysis of structures, friction, centroids, moments of inertia, and virtual work method. Methods of analysis are emphasized. Corequisite: Drill component. Pre- or Corequisite: MATH 2574 or MATH 2574C. Prerequisite: PHYS 2054 and honors standing.
This course is cross-listed with MEEG 2003.

MEEG 2013. Dynamics (Sp, Su, Fa). 3 Hours.
Kinematics and kinetics of particle and of rigid bodies; work and energy; impulse and momentum, and special topics. Corequisite: Drill component. Prerequisite: (MEEG 2003 or CVEG 2015) and MATH 2574.

MEEG 2100. Computer-aided Design Competency (Sp, Fa). 0 Hours.
Students entering the Mechanical Engineering Department are expected to possess basic competency in computer-aided design. Students need to pass a competency test. Deficiencies may be remedied through self-paced, computer-based instruction. Prerequisite: GNEG 1121 or GNEG 1121H or GNEG 1103.

MEEG 2103. Introduction to Machine Analysis (Sp, Su). 3 Hours.
Introduction to kinematics and kinetics of mechanisms, static and dynamic forces, gears and cam design and analysis. Recitation three hours per week and drill one hour per week. Corequisite: Drill component. Pre- or Corequisite: MEEG 2013. Prerequisite: PHYS 2054 and MEEG 2100.
MEEG 2303. Introduction to Materials (Sp, Fa). 3 Hours.
A study of chemical, physical, and electrical properties of materials using fundamental atomistic approach. The materials of interest are: metals, polymers, ceramics, and composites. The interactive relationship between structure, properties, and processing of materials will be emphasized. For various engineering applications. Corequisite: Drill component. Prerequisite: MATH 2554, PHYS 2054 and either CHEM 1103 or CHEM 1113.

MEEG 2403. Thermodynamics (Sp, Su, Fa). 3 Hours.
A study of the 1st and 2nd laws of thermodynamics. Availability of energy, properties of liquids, gases, and vapors; nonflow and flow processes. Recitation 3 hours, drill 2 hours per week. Corequisite: Drill component. Prerequisite: PHYS 2054 and MATH 2564.

MEEG 2703. Computer Methods in Mechanical Engineering (Sp, Su). 3 Hours.
Use of computers and programming for solving engineering problems. Basic numerical methods including errors, equation solution, matrices, optimization, regression, integration, and differential equations. Corequisite: Drill component. Prerequisite: MATH 2564.

Stress and deformation of members in tension, compression, torsion, and bending, and the design of these members. Columns, statically indeterminate beams, and simple connections. Corequisite: Drill component. Prerequisite: MEEG 2003.

MEEG 3013H. Honors Mechanics of Materials. 3 Hours.
Stress and deformation of members in tension, compression, torsion, and bending, and the design of these members. Columns, statically indeterminate beams, and simple connections. Corequisite: Drill component. Prerequisite: MEEG 2003 and honors standing.

This course is equivalent to MEEG 3013.

The principles of kinematics and kinetics for rigid body motion from dynamics are reviewed and applied to machine components with the goal being to determine their impact on machine behavior and performance. The time varying forces created by the movement of machine components are used to describe the machine’s vibrational motion and elementary control principles are introduced with the goal of describing how these motions might be reduced or eliminated. Corequisite: Drill component. Prerequisite: MEEG 2103, MATH 2584 or MATH 2584C, MEEG 2703, and MEEG 2013.

MEEG 3202L. Mechanical Engineering Laboratory I. 2 Hours.
Introduction to measurement, uncertainty, data acquisition, and instrumentation with an emphasis in materials and manufacturing. Corequisite: Drill component. Pre- or Corequisite: MEEG 3013 and ELEG 3903. Prerequisite: MEEG 2303 and PHYS 2074.

MEEG 3212L. Mechanical Engineering Laboratory II. 2 Hours.
Design and implementation of measurements, fabrication processes, data acquisition, and data analysis with emphasis in mechanical and fluid systems. Corequisite: Drill component. Prerequisite: MEEG 3202L, MEEG 3503 and MEEG 3113.

MEEG 3503. Mechanics of Fluids (Su, Fa). 3 Hours.
A study of fluids including properties, pressure forces, and field flow utilizing conservation of mass, conservation of energy, and momentum principles. Pre- or Corequisite: MATH 2584. Prerequisite: MEEG 2403.

MEEG 4003. Intermediate Dynamics (Irregular). 3 Hours.
Review of central-force motion of spacecraft, use of rotating reference frames, Coriolis acceleration. Kinematics of rigid bodies in 3-D space: velocities and accelerations in different moving reference frames, addition theorem of angular accelerations. Kinetics of rigid bodies in 3-D space: eigenvalues and eigenvectors of inertia matrices, momentum and kinetic energy of a rigid body in 3-D motion, Euler’s equations of motion; precession, nutation, and spin of a gyroscope; forced steady precession, torque free steady precession, space cone, and body cone. Prerequisite: MEEG 2013.

A study of fibrous composite materials with emphasis on mechanical behavior, synthesis, and application. Topics include macro- and micromechanical analysis lamina, lamina theory, failure analysis in design, and manufacturing techniques. Prerequisite: MEEG 3013.

Select design components commonly used in modern machines, principally for energy transmission. Students will be required to design a small system and present their design to the class. Pre- or Corequisite: MEEG 3113. Prerequisite: MEEG 3013.

This course is equivalent to MEEG 4103.

MEEG 4104H. Honors Machine Element Design. 4 Hours.
Select design components commonly used in modern machines, principally for energy transmission. Students will be required to design a small system and present their design to the class. Advanced project required of honors students. Advanced project required. Pre- or Corequisite: MEEG 3113. Prerequisite: MEEG 3013.

This course is equivalent to MEEG 4103.

MEEG 4123. Finite Element Methods I (Irregular). 3 Hours.
Introduction to the use of the finite element method in mechanical engineering analysis and design. Use of commercial software to solve thermal and mechanical problems. Pre- or Corequisite: MEEG 3013 and MEEG 4413.

MEEG 4132. Professional Engineering Practices (Sp, Fa). 2 Hours.
Design proposal preparation, design codes, professional ethics, engineering economics, and the role of the engineer in society. Pre- or Corequisite: MEEG 4104 or MEEG 4483.

MEEG 4143. Design for Safety (Irregular). 3 Hours.
This course provides an overview of safety engineering and a framework from which the students can evaluate and develop mechanical and thermal systems from a safety perspective. Pre- or Corequisite: MEEG 4413. Prerequisite: MEEG 3013.

MEEG 4153. Fundamentals of Mechanical Design (Fa). 3 Hours.
This class is designed to provide engineering students with a head start in industry as design engineers or working in an engineering related function. The course contents cover machine design and analysis experiences as related to working in industry and performing consulting work. Major topics include the design process, design procedures, fasteners, general design and numerous consulting experiences. A concept design exercise and two special design projects will be assigned to the students as homework. Prerequisite: MEEG 4104.

MEEG 4162. Creative Project Design I. 2 Hours.
Students will select a capstone design project, and each student group will prepare a formal written proposal on their project for presentation to a panel of judges. This group project will be carried to completion in MEEG 4192. Pre- or Corequisite: MEEG 4104 or MEEG 4483.

MEEG 4192. Creative Project Design II. 2 Hours.
Student groups will present their final capstone design proposal to a faculty panel and then carry out their project to completion. Each student group will make timely progress reports, complete their design project, and present their final report to a panel of judges. Prerequisite: MEEG 4182.
MEEG 4202L. Mechanical Engineering Laboratory III. 2 Hours.
Application of measurement techniques to mechanical engineering problems which emphasize mechanical and thermal systems. Corequisite: MEEG 4483. Prerequisite: MEEG 3212L and MEEG 4104.

MEEG 4213. Control of Mechanical Systems (Irregular). 3 Hours.
Mathematical modeling for feedback control of dynamic mechanical systems with design techniques using LaPlace transforms, state variables, root locus, frequency analysis, and criteria for performance and stability. Prerequisite: MEEG 3113.

Microcomputer architectural, programming, and interfacing. Smart product design (microprocessor-based design). Control of DC and stepper motors and interfacing to sensors. Applications to robotics and real-time control. Mobile robot project. Digital and analog electronics are reviewed where required. Prerequisite: ELEG 3903.

MEEG 4253. Introduction to Robotics. 3 Hours.
This course serves as an introduction to robotics. The course covers the historical development of robotics as a field, and as mechatronic systems, the importance of integrating sensors, actuators and end-effectors. Topics covered in this course will include but not limited to the following: mathematical modeling of robots, rigid motions and homogeneous transformation, forward/inverse kinematics, and velocity kinematics. Prerequisite: MEEG 2703, MEEG 3113 and instructor consent.

MEEG 4303. Materials Laboratory (Irregular). 3 Hours.
A study of properties, uses, testing, and heat treatment of basic engineering materials and related analytical techniques. Corequisite: Lab component. Prerequisite: MEEG 2303.

MEEG 4303H. Honors Materials Laboratory. 3 Hours.
A study of properties, uses, testing, and heat treatment of basic engineering materials. Corequisite: Lab component. Prerequisite: MEEG 2303 and MEEG 3013. This course is equivalent to MEEG 4303.

MEEG 4313. Introduction to Tribology (Irregular). 3 Hours.
A study of science and technology of interacting surfaces in relative motion. Topics include solid surface characterization, contact between solid surfaces, adhesion, friction, wear, lubrication, micro/nanotribology, friction and wear screening test methods, and tribological components and applications. Prerequisite: MEEG 3013 and MEEG 3503 or graduate standing.

MEEG 4323L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564 and PHYS 2074. This course is cross-listed with CHEM 4153L, PHYS 4793L.

MEEG 4323M. Honors Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564 and PHYS 2074.

MEEG 4413. Heat Transfer. 3 Hours.
Basic thermal energy transport processes; conduction, convection, and radiation; and the mathematical analysis of systems involving these processes in both steady and time-dependent cases. Prerequisite: MEEG 3503.

MEEG 4423. Power Generation (Irregular). 3 Hours.
Study of design and operational aspects of steam, gas, and combined cycle power plants. Brief study of Nuclear and Alternative energy systems. Prerequisite: MEEG 3503.

MEEG 4433. Aerospace Propulsion (Irregular). 3 Hours.
Principles, operation, and characteristics of gas turbine and rocket engines. Brief study of novel spacecraft propulsion systems. Prerequisite: MEEG 3503.

MEEG 4453. Industrial Waste and Energy Management (Irregular). 3 Hours.
Applications of thermodynamics, heat transfer, fluid mechanics, and electric machinery to the analysis of waste streams and energy consumption for industrial facilities. Current techniques and technologies for waste minimization and energy conservation including energy-consuming systems and processes, utility rate analysis, economic analysis and auditing are taught. Prerequisite: MEEG 4413.

MEEG 4473. Indoor Environmental Control (Irregular). 3 Hours.
Gives student a thorough understanding of the fundamental theory of air conditioning design for commercial buildings, including calculating heating and cooling loads along with the proper selection and sizing of air conditioning equipment. Prerequisite: MEEG 4413.

MEEG 4483. Thermal Systems Analysis and Design (Su, Fa). 3 Hours.
Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion. Availability loss characteristics of energy systems and availability conservation methods. Prerequisite: MEEG 4413.

MEEG 4483H. Honors Thermal Systems Analysis and Design. 3 Hours.
Analysis design and optimization of thermal systems and components with examples from such areas as power generation, refrigeration, and propulsion. Availability loss characteristics of energy systems and availability conservation methods. Additional topics, with an additional design project and/or more rigorous approach to design projects for honors course. Advanced project required. Prerequisite: MEEG 4413. This course is equivalent to MEEG 4483.

MEEG 4493. Internal Combustion Engines (Irregular). 3 Hours.
Study of the design of internal combustion engines, including emissions and performance issues. Pre- or Corequisite: MEEG 3503.

MEEG 4503. Introduction to Flight (Fa). 3 Hours.
The course will provide understanding in basic aerodynamics, airfoil design and characteristics, and flight control surfaces. Prerequisite: MATH 2584, MEEG 3503.

MEEG 4503H. Honors Introduction to Flight. 3 Hours.
The course will provide understanding in basic aerodynamics, airfoil design and characteristics, and flight control surfaces. Prerequisite: MATH 2584 and MEEG 3503. This course is equivalent to MEEG 4503.

MEEG 4523. Astronautics (Irregular). 3 Hours.
Study of spacecraft design and operations. Prerequisite: MEEG 2013 and MEEG 2403 or consent of instructor.

MEEG 4633. Additive Manufacturing. 3 Hours.
This course provides an overview of developing opportunities and critical challenges of additive manufacturing (AM, also known as 3-D printing). It covers existing and emerging additive manufacturing processes in the context of product design, materials selection and processing, and industrial and consumer applications. Students will learn to take advantage of new capabilities of additive manufacturing technologies (e.g., design freedom) for existing and new applications and the implementation of their designs in a laboratory through project-based learning. Students may not receive credit for both MEEG 4633 and MEEG 5633. Prerequisite: MEEG 2100, MEEG 2303, MEEG 3013, and MEEG 3503 or instructor consent.

MEEG 4903H. Honors Mechanical Engineering Research. 3 Hours. Independent research for mechanical engineering honors students. Prerequisite: Honors standing and instructor consent.

MEEG 491V. Special Topics in Mechanical Engineering. 1-6 Hour. Consideration of current mechanical engineering topics not covered in other courses. May be repeated for up to 6 hours of degree credit.

MEEG 491VH. Honors Special Topics in Mechanical Engineering. 1-6 Hour. Consideration of current mechanical engineering topics not covered in other courses. Prerequisite: Honors standing. May be repeated for up to 6 hours of degree credit.

MEEG 492V. Individual Study in Mechanical Engineering. 1-3 Hour. Individual study and research on a topic of mutually agreeable interest to the student and a faculty member. Prerequisite: Senior standing.

MEEG 492VH. Honors Individual Study in Mechanical Engineering. 1-3 Hour. Individual study and research on a topic of mutually agreeable interest to the student and a faculty member. Prerequisite: Senior standing. This course is equivalent to MEEG 492V.

MEEG 5033. Advanced Mechanics of Materials I (Irregular). 3 Hours. Combined stress, theories of failure, thick-walled cylinders, bending of unsymmetrical sections, torsion in noncircular section, plate stresses, and strain energy analysis. Prerequisite: MEEG 2013 and MEEG 3013.

MEEG 5103. Structural Dynamics (Irregular). 3 Hours. The forced and random vibration response of complex structural systems are studied through the use of the finite element method. Computational aspects of these problems are discussed and digital computer applications undertaken. Prerequisite: MEEG 3113 and MEEG 4104 and graduate standing.

MEEG 5113. Modal Analysis Methods (Irregular). 3 Hours. Fundamental concepts of both analytical and experimental modal analysis methods are examined and applied to the study of complex structural systems. Computational aspects of these problems are discussed, and digital computer applications undertaken with experimental verification. Prerequisite: MEEG 5103 and graduate standing.

MEEG 5123. Finite Elements Methods II (Irregular). 3 Hours. Development and application of finite element (FE) methods used to solve transient and two-dimensional boundary value problems. Applications are taken from solid and fluid mechanics, heat transfer, and acoustics. Emphasis is placed on the FE methodology in order to make accessible the research literature and commercial software manuals, and to encourage responsible use and interpretation of FE analysis. Prerequisite: MEEG 4123 and graduate standing or consent.

MEEG 5143. Advanced Machine Design (Irregular). 3 Hours. Application of advanced topics such as probability theory, fracture mechanics, and computer methods to the design and analysis of complex mechanical systems. Prerequisite: MEEG 4104 and graduate standing.

MEEG 5203. Robot Modeling and Simulation (Sp). 3 Hours. This is a graduate level course in Robotics dealing with the behavioral study of robots. Topics covered in this course will include but not limited to the following: mathematical modeling of robots, rigid motions and homogeneous transformation, forward/inverse kinematics of robots, velocity kinematics, path and trajectory planning, robot dynamics, joint control, PD/PID control, and multivariable control. Advanced topics may include passivity-based motion control, geometric nonlinear control, computer vision, vision-based control, and sensor fusion. Prerequisite: Graduate standing in MEEG or ELEG and consent of the instructor.

MEEG 5253. Bio-Mems (Sp). 3 Hours. Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hours per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. This course is cross-listed with BENG 5253.

MEEG 5263. Introduction to Micro Electro Mechanical Systems (Fa). 3 Hours. A study of mechanics and devices on the micro scale. Course topics will include: introduction to micro scales, fundamentals of microfabrication, surface and bulk micromachining, device packaging, device reliability, examples of micro sensors and actuators. Recitation three hours per week.

MEEG 5273. Electronic Packaging (Irregular). 3 Hours. An introductory treatment of electronic packaging from single chip to multichip including materials, electrical design, thermal design, mechanical design, package modeling and simulation, processing considerations, reliability, and testing. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: (ELEG 3214 or ELEG 3933) and MATH 2584. This course is cross-listed with ELEG 5273.

MEEG 5303. Physical Metallurgy. 3 Hours. Physical and chemical properties of solids and the application of materials in commerce. Prerequisite: MEEG 2303.

MEEG 5323. Physical and Chemical Vapor Deposition Processes. 3 Hours. Fundamental principles of materials behavior in the deposition of films by PVD/CVD. Topics include kinetic theory of gases, statistical mechanics, plasmas, diagnostics, reaction rate theory, nucleation and growth, crystal structures and defects in thin films, advanced characterization techniques for thin films, and applications in microelectronics, tribology, corrosion, bio- and nano-materials. Prerequisite: Graduate standing in Engineering or consent of instructor.

MEEG 5333. Introduction to Tribology. 3 Hours. A study of science and technology of interacting surfaces in relative motion. Topics include solid surface characterization, contact between solid surfaces, adhesion, friction, wear, lubrication, micro/nanotribology, friction and wear screening test methods, and tribological components and applications. Students may not earn credit for both MEEG 5333 and MEEG 4313. Prerequisite: Graduate standing.

MEEG 5343. Computational Material Science. 3 Hours. This course provides students with an overview of different modeling techniques in material science. Applications will be presented on a broad range of modeling techniques including atomistic simulation methods, Monte Carlo techniques, molecular mechanics, and molecular dynamics. Prerequisite: Graduate standing.

MEEG 5403. Advanced Thermodynamics. 3 Hours. An in-depth review of classical thermodynamics, including availability analysis, combustion, and equilibrium, with an introduction to quantum mechanics and statistical thermodynamics. Prerequisite: Graduate standing in Engineering or consent of instructor.
MEEG 5423. Statistical Thermodynamics. 3 Hours.
Concepts and techniques for describing high temperature and chemically reactive gases from a molecular point of view. Introductory kinetic theory, chemical thermodynamics, and statistical mechanics applied. Prerequisite: MEEG 2403 and MATH 2574.

MEEG 5433. Combustion. 3 Hours.
Introduction to combustion of solid, liquid, and gaseous fuels. Equilibrium and kinetics of hydrocarbon oxidation, laminar and turbulent flames, premixed and non-premixed combustion processes, ignition, quenching, stability, emissions and diagnostics. Prerequisite: Graduate standing in Engineering or consent of instructor.

MEEG 5453. Advanced Heat Transfer. 3 Hours.
More in-depth study of topics covered in MEEG 4413, Heat Transfer, and coverage of some additional topics. Prerequisite: MEEG 4413 or equivalent.

MEEG 5473. Radiation Heat Transfer. 3 Hours.
Spectral analysis, radiant exchange in gray and non-gray enclosures, gas radiation, and multi-mode heat transfer. Prerequisite: MEEG 5453 or equivalent.

MEEG 5503. Advanced Fluid Dynamics I. 3 Hours.
A basic survey of the characteristics of fluid flow under a variety of conditions with examples. Begins with a derivation of the Navier-Stokes equations and an evaluation of the dimensionless groups found from these equations. Topics to be covered include viscous laminar and turbulent boundary layers, jets and wakes, Stokes flow, inviscid flows with and without free surfaces and turbulence. Prerequisite: MEEG 3503 and MATH 2584.

MEEG 5533. Fundamentals of Aerodynamics. 3 Hours.
A study of external-flow fluid mechanics applied to Aerodynamics. Topics include integral and differential forms of the basic fluid equations (continuity, momentum, and energy), potential flow, and supersonic flow. Prerequisite: MEEG 3503.

MEEG 5633. Additive Manufacturing. 3 Hours.
This course provides an overview of developing opportunities and critical challenges of additive manufacturing (AM, also known as 3-D printing). It covers existing and emerging additive manufacturing processes in the context of product design, materials selection and processing, and industrial and consumer applications. Students may not receive credit for both MEEG 4633 and MEEG 5633. Prerequisite: MEEG 2100, MEEG 2303, MEEG 3013, and MEEG 3503 or instructor consent.

MEEG 5733. Advanced Numerical Methods. 3 Hours.
Numerical methods for the solution of linear and non-linear ordinary and partial differential equations; initial and boundary value problems; one-step and multi-step methods; predominantly finite difference but also finite element and control volume techniques; and computer applications. Graduate standing in Engineering or consent of instructor.

MEEG 590V. Master’s Research Topic and Report. 1-3 Hour.
Fundamental or applied research project required course for students electing the report option. Prerequisite: Graduate standing.

MEEG 591V. Special Topics in Mechanical Engineering. 1-6 Hour.
Consideration of current advanced mechanical engineering topics not covered in other courses. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

MEEG 592V. Individual Study in Mechanical Engineering. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate mechanical engineering program to suit individual requirements. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

MEEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.
The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor.
This course is cross-listed with BMEG 5953, CVEG 5953.

MEEG 600V. Master’s Thesis. 1-6 Hour.
Master’s Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

MEEG 6800. Graduate Seminar. 0 Hours.
A periodic seminar devoted to mechanical engineering research topics. Course includes letter grades A, B, C, D, and F as well as CR.

MEEG 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Medieval and Renaissance Studies (MRST) Courses

MRST 2013. Introduction to Medieval and Renaissance Studies. 3 Hours.
An interdisciplinary introduction to the major historical and cultural developments in northern Europe and the Mediterranean basin from approximately 500 to 1600 C.E.

MRST 2013H. Honors Introduction to Medieval and Renaissance Studies. 3 Hours.
An interdisciplinary introduction to the major historical and cultural developments in northern Europe and the Mediterranean basin from approximately 500 to 1600 C.E. May be repeated for up to 6 hours of degree credit.
This course is equivalent to MRST 2013.

MRST 3013. Special Topics in Medieval Studies. 3 Hours.
In-depth study of some topic or period of medieval literature, art, history and philosophy. Prerequisite: Sophomore standing. May be repeated for up to 12 hours of degree credit.

MRST 3013H. Honors Special Topics in Medieval Studies. 3 Hours.
In-depth study of some topic or period of medieval literature, art, history and philosophy. Prerequisite: Sophomore standing. May be repeated for up to 12 hours of degree credit.
This course is equivalent to MRST 3013.

MRST 3023. Special Topics in Early Modern Studies. 3 Hours.
In-depth study of some topic or period of Early Modern literature, art, history and philosophy. May be repeated for up to 12 hours of degree credit.

MRST 3023H. Honors Special Topics in Early Modern Studies. 3 Hours.
In-depth study of some topic or period of Early Modern literature, art, history and philosophy. May be repeated for up to 12 hours of degree credit.
This course is equivalent to MRST 3023.

MRST 4003. Medieval and Renaissance Studies Colloquium. 3 Hours.
Advanced study of some more narrowly focused aspect of medieval and/or Renaissance studies. Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.

MRST 4003H. Honors Medieval and Renaissance Studies Colloquium. 3 Hours.
Advanced study of some more narrowly focused aspect of medieval and/or Renaissance studies. Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.
This course is equivalent to MRST 4003.
MRST 470V. Special Topics in Medieval and Renaissance Studies. 1-6 Hour.
An examination of pertinent issues in medieval and/or Renaissance studies.
Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.

MRST 470VH. Honors Special Topics in Medieval and Renaissance Studies. 1-6 Hour.
An examination of pertinent issues in medieval and/or Renaissance studies.
Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.

This course is equivalent to MRST 470V.

Microelectronics-Photonics (MEPH)

Courses

MEPH 488V. MicroEP Undergraduate Research. 1-3 Hour.
Special research topics associated with undergraduates enrolled in the Microelectronics-Photonics minor program, or by special permission of the microEP Director to undergraduate students engaged in research with microEP faculty members. May be repeated for up to 6 hours of degree credit.

MEPH 5253. Emerging Technologies in Industry. 3 Hours.
Business leaders present technologies used by their companies. Focusing on Arkansas-based companies, technology needs for the industry and innovative ideas for solutions or advancements are discussed. Students work to develop solutions to address company needs or further develop a company's current technology. May be repeated for up to 9 hours of degree credit.

MEPH 5383. Research Commercialization and Product Development. 3 Hours.
This survey course examines research commercialization through analysis of IP, technology space, market space, manufacturability, financials, and business plans. Entrepreneurial behaviors and product development within large companies are also discussed. A case study using a current UA faculty member's research commercialization effort will be developed. Prerequisite: Graduate Standing.

MEPH 5393. Product Development Process. 3 Hours.
Demonstration of a student's technical and management knowledge integration by creating a commercially viable product development process to meet a new societal need, with the technical solution based on micro to nanoscale technology. Final grade based on a detailed written report and oral presentation to a panel. Non-thesis students only. Pre- or Corequisite: MEPH 5383. Prerequisite: Instructor permission.

MEPH 5513. Applied Research in External Technical Organizations. 3 Hours.
A one semester narrow focus graduate level research effort while working at an external technical organization's site. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students, and may substitute for an MEPH 588V External Internship. May be repeated for up to 9 hours of degree credit.

MEPH 5523. Applied On-Campus Collaborative Research with External Technical Organizations. 3 Hours.
A one semester narrow focus graduate level on-campus research effort performed in collaboration with an external technical organization. Requires a final report of style and quality suitable for journal submission. This course available only to Professional Path M.S. microEP students. May be repeated for up to 6 hours of degree credit.

MEPH 555V. Internship in External Technical Organization. 1-3 Hour.
Used to document a microEP grad student internship experience in an external technical organization for a minimum duration of six weeks (6-9 weeks=one hour, 10-12 weeks=two hours, and 13-15 weeks=three hours). It may not be used to meet the research requirements of a M.S. degree. Prerequisite: Graduate standing.

MEPH 5611. Research Communication Seminar of MS Students. 1 Hour.
This course serves as a forum for MS students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing, and devices, with research management and planning also being addressed. Prerequisite: Graduate standing.

MEPH 5713. Advanced Nanomaterials Chemistry. 3 Hours.
Science and engineering graduates are using more nanomaterials, and modern industry demands that its scientists and engineers have materials chemistry knowledge. Materials from the micro to nanoscale will be examined in this course from the perspective of fundamental chemistry principles to build a picture of tomorrow's materials. May be repeated for up to 3 hours of degree credit.

MEPH 5733L. Fabrication at the Nanoscale. 3 Hours.
This hands-on lab course will cover the disciplines needed to make active electronic and photonic devices utilizing nanoscale structures and fabrication techniques presently used in research and industry. Prerequisite: Graduate standing and permission of the instructor.

MEPH 5742. Transmission Electron Microscopy Theory and Operation. 2 Hours.
This new laboratory course will introduce students to practical electron microscopy and to the operation of the Titan S/TEM for examination of sub-angstrom examination of materials. Students will learn how to conduct a TEM study, how to operate the TEM, and how to extract and interpret useful information. Prerequisite: Graduate standing.

MEPH 5811. 1st Year Operations Seminar - Infrastructure Management. 1 Hour.
Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect organizational infrastructure, career planning, organizational structures, and may include examples from current events. Prerequisite: Graduate standing.

MEPH 5821. Ethics for Scientists and Engineers. 1 Hour.
This course will introduce methods useful in the practice of ethical decision making in the high technology academic and industrial work place. An emphasis will be placed on applying the methods discussed in the text to student and instructor past professional experiences. Prerequisite: graduate standing.

MEPH 5832. Proposal Writing and Management. 2 Hours.
This course introduces factors that affect proposal success in both the academic and industrial arenas; demonstrates different approaches to writing successful proposals; and introduces students to the legal responsibilities and ramifications of proposal management. Students will write two proposals for peer review and formal evaluation. Prerequisite: Graduate standing.

MEPH 587V. Special Topics in Microelectronics-Photonics. 1-4 Hour.
Consideration of current microelectronics-photonic topics not covered in other courses. One section will be created for each topic only after a syllabus is submitted to the microEP office by the faculty member teaching the course. May be repeated for up to 9 hours of degree credit.

MEPH 588V. Special Problems in Microelectronics-Photonics. 1-3 Hour.
Opportunity for individual study of advanced subjects related to a graduate degree in Microelectronics-Photonics to suit individual requirements. One section will be created for each student only after a syllabus is submitted to the microEP office by the supervising faculty member. May be repeated for up to 6 hours of degree credit.

MEPH 5911. 1st Year Operations Seminar - Personnel Management. 1 Hour.
Weekly seminar for 1st year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect personnel management, team building and structures, and may include examples from current events. Prerequisite: Graduate standing.
MEPH 626V. Emerging Technologies in Industry Practicum. 1-3 Hour.
Students engage in demand-driven research projects inspired by Arkansas companies as part of the interdisciplinary IGNITE (Industry Generating New Ideas and Technology through Education) program. These projects, which often result from interactions with companies during MEPH 5253, include visiting company locations; developing project goals, budgets, and timelines; and performing research. May be repeated for up to 9 hours of degree credit.

MEPH 6611. Research Communication Seminar of PhD Students. 1 Hour.
This course serves as a forum for Ph.D. students to develop oral presentation skills and to exchange research ideas. Research presentations will be on various topics in the area of micro to nanoscale materials, processing and devices, with research management and planning also being addressed. Prerequisite: Graduate standing.

MEPH 6811. 2nd Year Operations Seminar - Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss issues that increase professional performance in technology-centered organizations. The discussions will focus on issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing.

MEPH 6911. 2nd Year Operations Seminar - Advanced Management and Leadership. 1 Hour.
Weekly seminar for 2nd year Microelectronics-Photonics graduate students to discuss advanced issues that increase professional performance in technology-centered organizations. The discussions will focus on the complex issues that affect management and leadership effectiveness and efficiency, and may include examples from current events. Prerequisite: Graduate standing.

Middle East Studies (MEST)

Courses

MEST 2003. Introduction to Islam. 3 Hours.
This course introduces Islam as a global religion and world civilization, including study of the Qur’an, prophet Muhammad, ritual and community practices, metaphysics, mysticism, art, literature, and sacred and critical history. This course is cross-listed with MEST 2003H.

MEST 2003H. Honors Introduction to Islam. 3 Hours.
This course introduces Islam as a global religion and world civilization, including study of the Qur’an, prophet Muhammad, ritual and community practices, metaphysics, mysticism, art, literature, and sacred and critical history. This course is cross-listed with MEST 2003.

MEST 2013. Introduction to Middle East Studies. 3 Hours.
This course is designed to provide students with fundamental building blocks for understanding the contemporary Middle East/Islamic World. Students will be introduced to a variety of disciplinary approaches to the study of the geo-cultural region, including history, politics, arts and literature, religions and cultures, social geography, and economics.

MEST 2203. Introduction to Christianity in the Middle East (Fa). 3 Hours.
Introduces the geography, events, characters, and histories that formed Christianity across the Mediterranean, North Africa, and the Middle East - from early band of Jews into its global and colonial ascendancy today. Focus on people, conflicts, disagreements, theological locations and the influence of geo-politics and effects of financial, political and/or military control. This course is cross-listed with MEST 2203H.

MEST 2203H. Honors Christianity in the Middle East (Fa). 3 Hours.
Introduces the geography, events, characters, and histories that formed Christianity in the Middle East and North Africa - from early band of Jews into its global and colonial ascendancy today. Focus on people, conflicts, disagreements, theological locations and the influence of geo-politics and effects of financial, political and/or military control. This course is cross-listed with MEST 2203.

MEST 3003. Islam: Beliefs and Practices. 3 Hours.
Explores the relationship between teachings, norms, customary practices and Muslim perception of Islam. Examines theoretical concepts and practices, such as war and peace, democracy, pluralism, modernity, human rights, environment, gender, Islamic law, nation-state, and citizenship in addition to the basic tenets of Islam. Prerequisite: Honors standing. This course is equivalent to MEST 3003.

MEST 3003H. Honors Islam: Beliefs and Practices. 3 Hours.
Explores the relationship between teachings, norms, customary practices and Muslim perception of Islam. Examines theoretical concepts and practices, such as war and peace, democracy, pluralism, modernity, human rights, environment, gender, Islamic law, nation-state, and citizenship in addition to the basic tenets of Islam. Prerequisite: Honors standing.

Focuses on the new testament and essential doctrines of the Christian faith, with special focus on the Middle East and North Africa, using historical contexts from which these doctrines developed, and the arguments made by different theological positions in both ancient and modern debates. Examines the experiential side of Christianity, emphasizing the worship and ritualistic observances of various ancient and modern communities in the region.

MEST 3303. Hebrew Literature & Language I (Fa). 3 Hours.
Introduction to biblical Israel and Judah. Examines the ancient Hebrew language, focusing on sacred texts produced during Israel's Iron Age II period. Introduces the ancient Hebrew alphabet, biblical Hebrew vocabulary, morphology, and syntax in the context of the Old Testament. Some extra-biblical Hebrew texts will also be considered.

MEST 340V. MEST Independent Study. 1-3 Hour.
An exploration of varied topics related to the Middle East and North Africa studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: Instructor consent and junior standing. May be repeated for up to 9 hours of degree credit.

MEST 340VH. Honors MEST Independent Study. 1-3 Hour.
An exploration of varied topics related to the Middle East and North Africa studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: Instructor consent, junior standing and honors standing. May be repeated for up to 9 hours of degree credit. This course is cross-listed with MEST 340V.

MEST 399V. MEST: Honors Thesis. 1-3 Hour.
Middle East Studies Honors research, readings and thesis. Prerequisite: Junior standing.

MEST 4003. Middle East Studies Colloquium. 3 Hours.
An interdepartmental colloquium with an annual change in subject required of all students in the Middle East studies program. Prerequisite: Sophomore standing. May be repeated for up to 6 hours of degree credit.

MEST 4003H. Honors Middle East Studies Colloquium. 3 Hours.
Honors colloquium. May be repeated for up to 3 hours of degree credit. This course is equivalent to MEST 4003.
MEST 4103. Special Topics in Middle East Studies. 3 Hours.
Courses in lecture or seminar format to be offered in a variety of disciplines relating to the history, culture, politics, geography, languages, literature, arts, and religions of the Middle East, North Africa, and/or Islamic world. May be repeated for up to 12 hours of degree credit.

MEST 4103H. Honors Special Topics in Middle East Studies. 3 Hours.
Courses in lecture or seminar format to be offered in a variety of disciplines relating to the history, culture, politics, geography, languages, literature, arts, and religions of the Middle East, North Africa, and/or Islamic world. May be repeated for up to 12 hours of degree credit.

MEST 420V. Internship. 3-6 Hour.
Internship experience with a group, firm, agency, or non-profit organization related to the Middle East and/or North Africa (MENA). Local, regional, and international internships (paid and unpaid) may take place with various NGOs, related corporations, and US Agencies and Departments. Prerequisite: Junior or senior standing. May be repeated for up to 6 hours of degree credit.

MEST 420VH. Honors Internship. 3-6 Hour.
Internship experience with a group, firm, agency, or non-profit organization related to the Middle East and/or North Africa (MENA). Local, regional, and international internships (paid and unpaid) may take place with various NGOs, related corporations, and US Agencies and Departments. Prerequisite: Junior or senior standing and honors standing. May be repeated for up to 6 hours of degree credit.

This course is cross-listed with MEST 420V.

MEST 4303. Country Profile: Culture, Landscape, Geography, Language (Irregular). 3 Hours.
Introduction of a Middle East/North Africa country intended for students preparing for fieldwork, study abroad, or summer internships. Explores a country’s geography, society, economy, culture, foods, arts, architecture, and basic conversational language. Content varies by semester but includes countries such as Iran, Turkey, Pakistan, Afghanistan and Israel. Prerequisite: MEST 2013. May be repeated for up to 9 hours of degree credit.

MEST 4303H. Honors Country Profile: Culture, Landscape, Geography, Language (Irregular). 3 Hours.
Introduction of a Middle East/North Africa country intended for students preparing for fieldwork, study abroad, or summer internships. Explores a country’s geography, society, economy, culture, foods, arts, architecture, and basic conversational language. Content varies by semester but includes countries such as Iran, Turkey, Pakistan, Afghanistan and Israel. Prerequisite: MEST 2013. May be repeated for up to 9 hours of degree credit.

This course is equivalent to MEST 4303.

MEST 4503. Hebrew Literature and Language II (Irregular). 3 Hours.
Continuation of Hebrew Literature & Language I. Builds upon biblical Hebrew vocabulary. Familiarizes students with Hebrew’s verbal system and contexts in which the Bible’s later books (e.g., Ruth, Jonah, and Chronicles) were created. Introduces biblical and Qumran Aramaic and texts from the Dead Sea Scrolls. Prerequisite: MEST 3303.

MEST 4503H. Honors Hebrew Literature and Language II (Irregular). 3 Hours.
Continuation of Hebrew Literature & Language I. Builds upon biblical Hebrew vocabulary. Familiarizes students with Hebrew’s verbal system and contexts in which the Bible’s later books (e.g., Ruth, Jonah, and Chronicles) were created. Introduces biblical and Qumran Aramaic and texts from the Dead Sea Scrolls. Prerequisite: MEST 3303. 

This course is equivalent to MEST 4503.

Music (MUSC) Courses

MUSC 3923H. Honors Colloquium in Music. 3 Hours.
Covers a special topic or issue offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in Music). May be repeated for up to 9 hours of degree credit.

MUSC 490VH. Honors Essay. 1-6 Hour.
An honors research paper in Music History or literature, Ethnomusicology, Music Theory, or Music Education. Open to seniors in honors.

Music Education (MUED) Courses

MUED 1371. Teaching the Beginning Percussionist. 1 Hour.
A study of the pedagogy and techniques needed to instruct middle school and junior high percussionists. Emphasis on elementary snare drum and marimba performance. Study of junior high band and orchestra methods, solos and ensemble music. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor’s consent.

MUED 2012. Introduction to Music Education. 2 Hours.
A course designed to provide early experiences for the prospective music teacher. Students will become familiar with professional trends, music classroom organizational and management issues, and principles of effective education. Emphases will include basic psychological and philosophical orientation, as well as observations in public school classrooms. Required of all prospective Music Education majors.

MUED 2532. Class Instruction in Woodwind Instruments. 2 Hours.
Familiarizes students with elementary and intermediate skills, techniques and pedagogy needed to teach woodwind instruments—flute, clarinet, saxophone, oboe, and bassoon—in a class setting. Corequisite: Lab component. Prerequisite: MUED major and sophomore standing.

MUED 2542. Class Instruction in Brass Instruments. 2 Hours.
Familiarizes students with elementary and intermediate skills, techniques and pedagogy needed to teach brass instruments—trumpet, French horn, trombone, euphonium, and tuba—in a class setting. Corequisite: Lab component. Prerequisite: MUED major and sophomore standing.

MUED 2552. Class Instruction in Orchestral String Instruments. 2 Hours.
Familiarizes students with elementary and intermediate skills, techniques and pedagogy needed to teach orchestral stringed instruments in a class setting. Includes a lab that specifically focuses on peer teaching of concepts and skills related to teaching stringed instruments. Prerequisite: Bachelor of Music Major with an emphasis in PIAN, VOCE, STRG, or WWBP and sophomore standing.

MUED 3021. Supervised Practicum in Teaching Musical Skills. 1 Hour.
Provides for supervised teaching opportunities with public school students in instrumental, choral, and elementary classes. Prerequisite: All Emphases: MUED 2012.

MUED 3833. Music Education in the Elementary School. 3 Hours.
Courses in lecture or seminar format to be offered in a variety of disciplines relating to the history, culture, politics, geography, languages, literature, arts, and religions of the Middle East, North Africa, and/or Islamic world. May be repeated for up to 12 hours of degree credit.
MUED 3911. Classroom Instruments in Music Education. 1 Hour.
The study of instruments utilized in the general music classroom, including
but not limited to the Orff Instrumentarium, pitched and unpitched hand-held
percussion, frame and various ethnic drums, guitar, and recorder. Elementary and
secondary general music classroom preparation with an emphasis on orchestration,
composition, and improvisation with instruments commonly utilized in required
music classes in public schools. Open to music education majors or with instructor's consent. Pre- or Corequisite: MUED 3833. Prerequisite: MUED 2012.

MUED 4031. Seminar for Professional Entry into Music Education. 1 Hour.
A seminar offered during student teaching semester to prepare the student for the role of a professional educator. Content includes professional ethics and conduct,
classroom management, evaluation and grading, and application for employment.

MUED 4112. Pedagogy in Music Education. 2 Hours.
A course presenting broad music teaching concepts and specific teaching behaviors.
Students will experience the pedagogical teaching situation through the construct
of effective communication practice. Emphases will be on providing a laboratory
environment representative of public school classrooms. Required of all Music
Education majors. Prerequisite: MUED 3833.

MUED 4273. Methods for Teaching String Instruments. 3 Hours.
Methods and materials for students preparing to teach orchestral instruments and
ensembles in the public schools. Prerequisite: MUAC 1371, MUED 2012,
MUED 2532, MUED 2542, MUED 2552, and MUED 3021.

MUED 4283. Teaching Vocal Music. 3 Hours.
Methods and materials used in teaching high school music. Prerequisite:
MUED 2012.

MUED 4293. Instrumental Methods. 3 Hours.
Problems of teaching instrumental music in the public schools. Prerequisite:
MUED 1371, MUED 2012, MUED 2532, MUED 2542, MUED 2552, and
MUED 3021.

MUED 451V. Student Teaching: Elementary Music. 4-8 Hour.
A minimum of five weeks and a maximum of ten weeks will be spent in an off-
campus school, where the student will teach under supervision in the elementary
classroom and will participate in other activities involving the school and community.
Enrollment requirement is for a total of 12 hours and 15 weeks involvement in
MUED 452V and MUED 451V. Successful completion of a criminal background
check is required prior to beginning student teaching. Corequisite: MUED 452V.
Prerequisite: Bachelor of Music degree in Music Education.

MUED 452V. Student Teaching: Secondary Music. 4-8 Hour.
A minimum of five weeks and a maximum of ten weeks will be spent in an off-
campus school, where the student will teach under supervision in the elementary
classroom and will participate in other activities involving the school and community.
Enrollment requirement is for a total of 12 hours and 15 weeks involvement in
MUED 452V and MUED 451V. Successful completion of a criminal background
check is required before beginning student teaching. Corequisite: MUED 451V.
Prerequisite: Bachelor of Music degree in Music Education.

MUED 477V. Special Topics in Music Education. 1-4 Hour.
Subject matter not covered in other sources. With permission, may be repeated for credit if topics are different. May be repeated for degree credit.

MUED 5513. Seminar: Resources in Music Education. 3 Hours.
Study of the analytical and writing skills necessary for academic research in music
education. Each student identifies one problem specific to music education, finds
and reviews related literature and sources, develops a comprehensive bibliography,
and writes a paper which synthesizes the research. Open to graduate students and
undergraduates in honors in music education.

MUED 5653. Seminar: Issues in Music Education. 3 Hours.
A seminar exploring the relationships between the profession of teaching music and
selected views about learning theories, teaching methods, philosophy, psychology,
and other selected topics relevant to contemporary music education.

MUED 5733. Music Education in the Elementary School. 3 Hours.
Concepts of elementary music education; methods, materials, curriculum design,
and supervision in elementary school music.

MUED 5811. Curriculum Design in Music. 1 Hour.
Goals and objectives in music education. Student will develop a curriculum for an
actual or hypothetical music education program.

An in-service training workshop for elementary music teachers.

MUED 5862. Marching Band Techniques. 2 Hours.
Includes the place of the marching band in the school program, types of formations
used, and selecting, arranging or writing the musical score.

MUED 5973. Tests and Measurement in Music. 3 Hours.
This course will address the psychometric concepts of tests and measurement of
music achievement, aptitude, attitude, and self-assessment. The course will focus on
the teaching and assessment of musical skills, musical responses, and will critically
examine existing aptitude tests (Seashore, Watkins Farnum, Gordon, etc.). Basic
statistical concepts and data analysis used in common testing scenarios will be
introduced. Prerequisite: Graduate standing in music.

MUED 5983. Psychology of Music Behavior. 3 Hours.
This course is an introduction to the psychology of music, and will adopt an
interdisciplinary view toward the field, covering such topics as philosophical and
sociological questions about the nature and function of music, the physiology of
the ear, the physical and perceptual properties of sounds (acoustics), performance
anxiety, preference and taste research, social and pedagogical attributes of
performance, and behavioral musical responses. Prerequisite: Graduate standing.

MUED 600V. Master's Thesis. 1-6 Hour.
Preparation of a master's thesis as partial fulfillment of the requirement for the
master's degree. May be repeated for degree credit.

MUED 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study of problems in music
education. May be repeated for up to 6 hours of degree credit.

Music Ensemble (MUEN) Courses

MUEN 1341. Collegium Musicum I. 1 Hour.
Performance of early music; various combinations of instruments and/or voices. Two
hours rehearsal weekly. May be repeated for up to 2 hours of degree credit.

MUEN 1401. Opera Theatre I. 1 Hour.
Study of opera through performances of scenes, chamber and major operatic
production. Admission with director's approval. May be repeated for up to 2 hours of
degree credit.

MUEN 1411. Men's Chorus I. 1 Hour.
Performance-based choral ensemble designed to improve individual and collective
vocal skills, develop sight-reading skills, improve the individual's grasp of the
essential elements of music, and expose students to repertory of the greater men's
chorus canon. Admission is open to any male student on campus. May be repeated

Large ensemble performs at football games. Emphasis on high performance standards and a variety of performing styles. Rehearsal 8 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1451. Schola Cantorum I. 1 Hour.
Large, select chorale ensemble with focus on the study and performance of a range of choral literature. Emphasis on high artistic standards through style and interpretation. Enrollment limited to more experienced singers; by audition only. Prerequisite: Director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 1461. Wind Symphony I. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission by audition. Prerequisite: Director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 1471. Jazz Performance Laboratory I. 1 Hour.
Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. May be repeated for up to 2 hours of degree credit.

MUEN 1481. Campus Band I. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. Corequisite: Lab component. May be repeated for up to 2 hours of degree credit.

MUEN 1491. Concert Band I. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. May be repeated for up to 2 hours of degree credit.

MUEN 1501. Chamber Music I. 1 Hour.
Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1511. Symphonic Band I. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public are required. Admission is by audition or special approval. Prerequisite: Director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 1521. Woodwind Quintet I. 1 Hour.
Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. May be repeated for up to 2 hours of degree credit.

MUEN 1541. Accompanying I. 1 Hour.
Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Prerequisite: MUAP 110V. May be repeated for up to 2 hours of degree credit.

MUEN 1551. Percussion Ensemble I. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1561. Musical Theater Orchestra I. 1 Hour.
Instrumental ensemble with focus on the preparation and performance of musical theater pit orchestra music, in conjunction with UA Theater's mainstage musical. Admission by audition or director's approval. May be repeated for up to 2 hours of degree credit.

MUEN 1581. Chamber Choir I. 1 Hour.
Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit. May be repeated for up to 2 hours of degree credit.

MUEN 1591. Women's Chorus I. 1 Hour.
Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertoire of the greater treble chorus canon. Admission by audition or director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 1691. Wind Ensemble I. 1 Hour.
Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. May be repeated for up to 2 hours of degree credit.

MUEN 1711. Flute Ensemble I. 1 Hour.
Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1721. Clarinet Ensemble I. 1 Hour.
Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1731. Saxophone Ensemble I. 1 Hour.
Study and performance of ensemble music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1741. Trumpet Ensemble I. 1 Hour.
Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1761. New Music Ensemble I. 1 Hour.
Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. May be repeated for up to 2 hours of degree credit.

MUEN 1771. Trombone Ensemble I. 1 Hour.
Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.

MUEN 1781. Tuba Ensemble. 1 Hour.
Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets, quintets, and low brass choir. Rehearsal 2 hours per week. May be repeated for up to 2 hours of degree credit.
MUEN 2341. Collegium Musicum II. 1 Hour.  
Continuation of Collegium Musicum I. Performance of early music various combinations of instruments and/or voices. Two hours of rehearsals weekly. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2401. Opera Theatre II. 1 Hour.  
Continuation of Opera Theatre I. Study of opera through performances of scenes, chamber and major operatic productions. Admission with director's approval. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2411. Men's Chorus II. 1 Hour.  
Continuation of Men's Chorus I. Performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertoire of the greater men's chorus canon. Admission is open to any male student on campus. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2421. Inspirational Chorale II. 1 Hour.  
Continuation of Inspirational Chorale I. Performance of African American literature with particular emphasis on Negro spirituals, traditional/contemporary gospel music, and sacred world music. Rehearsal 3 hours per week. Admission with director's approval. Prerequisite: Sophomore standing, audition and approval of director. May be repeated for up to 2 hours of degree credit.

MUEN 2431. Symphony Orchestra II. 1 Hour.  
Continuation of Symphony Orchestra I. Large, select orchestral ensemble setting with a focus on the study and performance of a range of symphonic literature. Emphasis on high artistic standards through style and interpretation. Enrollment limited to more experienced players; by audition only. Prerequisite: Sophomore standing and director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 2441. Marching Band II. 1 Hour.  
Continuation of Marching Band I. Large ensemble performs at football games. Emphasis on high performance standards and a variety of performing styles. Rehearsal 8 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2451. Schola Cantorum II. 1 Hour.  
Continuation of Schola Cantorum I. Large, select choral ensemble with focus on the study and performance of a range of choral literature. Emphasis on high artistic standards through style and interpretation. Enrollment limited to more experienced singers; by audition only. Prerequisite: Sophomore standing and director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 2461. Wind Symphony II. 1 Hour.  
Continuation of Wind Symphony I. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public are required. Admission by audition. Prerequisite: Sophomore standing and director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 2471. Jazz Performance Laboratory II. 1 Hour.  
Continuation of Jazz Performance Laboratory I. Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2481. Campus Band II. 1 Hour.  
Continuation of Campus Band I. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission by audition or special approval. Corequisite: Lab component. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2491. Concert Band II. 1 Hour.  
Continuation of Concert Band I. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission by audition or special approval. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2501. Chamber Music II. 1 Hour.  
Continuation of Chamber Music I. Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2511. Symphonic Band II. 1 Hour.  
Continuation of Symphonic Band I. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public are required. Admission by audition or special approval. Prerequisite: Sophomore standing; director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 2521. Woodwind Quintet II. 1 Hour.  
Continuation of Woodwind Quintet I. Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2541. Accompanying II. 1 Hour.  
Continuation of Accompanying I. Piano accompanying of vocal and instrumental solists. Rehearsal 2 hours per week. Prerequisite: Sophomore standing and MUAP 210V. May be repeated for up to 2 hours of degree credit.

MUEN 2551. Percussion Ensemble II. 1 Hour.  
Continuation of Percussion Ensemble I. Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2561. Musical Theater Orchestra II. 1 Hour.  
Instrumental ensemble with focus on the preparation and performance of musical theater pit orchestra music, in conjunction with UA Theater's mainstage musicals. Admission by audition or director's approval. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2581. Chamber Choir II. 1 Hour.  
Continuation of Chamber Choir I. Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2591. Women's Chorus II. 1 Hour.  
Continuation of Women's Chorus I. Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertoire of the greater treble chorus canon. Admission by audition or director's consent. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.
MUEN 2691. Wind Ensemble II. 1 Hour.
Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2711. Flute Ensemble II. 1 Hour.
Continuation of Flute Ensemble I. Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2721. Clarinet Ensemble II. 1 Hour.
Continuation of Clarinet Ensemble I. Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2731. Saxophone Ensemble II. 1 Hour.
Continuation of Saxophone Ensemble I. Study and performance of music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2751. Trumpet Ensemble II. 1 Hour.
Continuation of Trumpet Ensemble I. Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 2761. New Music Ensemble II. 1 Hour.
Continuation of New Music Ensemble I. Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. Prerequisite: Sophomore standing. May be repeated for up to 2 hours of degree credit.

MUEN 4621. Inspirational Chorale V. 1 Hour.
Continuation of Inspirational Chorale IV. Performance of African American literature with particular emphasis on Negro spirituals, traditional/contemporary gospel music, and sacred world music. Rehearsal 3 hours per week. Admission with director's approval. Prerequisite: Two semesters of MUEN 4421. May be repeated for up to 2 hours of degree credit.

MUEN 4631. Symphony Orchestra V. 1 Hour.
Continuation of Symphony Orchestra IV. Large, select orchestral ensemble setting with a focus on the study and performance of a range of symphonic literature. Emphasis on high artistic standards through style and interpretation. Enrollment limited to more experienced players; by audition only. Prerequisite: Two semesters of MUEN 4431. May be repeated for up to 2 hours of degree credit.

MUEN 4641. Collegium Musicum V. 1 Hour.
Continuation of Collegium Musicum IV. Performance of early music various combinations of instruments and/or voices. Two hours rehearsal weekly. Prerequisite: Two semesters of MUEN 4341. May be repeated for up to 2 hours of degree credit.

MUEN 4651. Schola Cantorum V. 1 Hour.
Continuation of Schola Cantorum IV. Large, select choral ensemble with focus on the study and performance of a range of choral literature. Emphasis on high artistic standards through style and interpretation. Enrollment limited to more experienced singers; by audition only. Prerequisite: Two semesters of MUEN 4451. May be repeated for up to 2 hours of degree credit.

MUEN 4661. Wind Symphony V. 1 Hour.
Continuation of Wind Symphony IV. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission by audition. Corequisite: Lab component. Prerequisite: Two semesters of MUEN 4461. May be repeated for up to 2 hours of degree credit.
MUEN 4671. Jazz Performance Laboratory V. 1 Hour.
Continuation of Jazz Performance Laboratory IV. Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. Prerequisite: Two semesters of MUEN 4471. May be repeated for up to 2 hours of degree credit.

MUEN 4681. Campus Band V. 1 Hour.
Continuation of Wind Symphony IV. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission by audition. Corequisite: Lab component. Prerequisite: Two semesters of MUEN 4461. May be repeated for up to 2 hours of degree credit.

MUEN 4691. Wind Ensemble IV. 1 Hour.
Continuation of Wind Ensemble III. Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4711. Flute Ensemble IV. 1 Hour.
Continuation of Flute Ensemble III. Study and performance of music for multiple flutes, including trios, quartets, quintets, and the flute choir. Rehearsal 2 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4721. Clarinet Ensemble IV. 1 Hour.
Continuation of Clarinet Ensemble III. Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4731. Saxophone Ensemble IV. 1 Hour.
Continuation of Saxophone Ensemble III. Study and performance of music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4751. Trumpet Ensemble IV. 1 Hour.
Continuation of Trumpet Ensemble III. Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4761. New Music Ensemble IV. 1 Hour.
Continuation of New Music Ensemble III. Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4771. Trombone Ensemble IV. 1 Hour.
Continuation of Trombone Ensemble III. Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4781. Tuba Ensemble IV. 1 Hour.
Continuation of Tuba Ensemble III. Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets quintets, and low brass choir. Rehearsal 2 hours per week. Prerequisite: Senior standing. May be repeated for up to 2 hours of degree credit.

MUEN 4801. Chamber Music V. 1 Hour.
Continuation of Chamber Music IV. Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. Prerequisite: Two semesters of MUEN 4501. May be repeated for up to 2 hours of degree credit.

MUEN 4811. Symphonic Band V. 1 Hour.
Continuation of Symphonic Band IV. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public are required. Admission is by audition or special approval. Corequisite: Lab component. Prerequisite: Two semesters of MUEN 4511 and director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 4821. Woodwind Quintet V. 1 Hour.
Continuation of Woodwind Quintet IV. Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. Prerequisite: Two semesters of MUEN 4521. May be repeated for up to 2 hours of degree credit.

MUEN 4831. Concert Band V. 1 Hour.
Continuation of Concert Band IV. Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. Corequisite: Lab component. Prerequisite: Two semesters of MUEN 4491. May be repeated for up to 2 hours of degree credit.

MUEN 4841. Accompanying V. 1 Hour.
Continuation of Accompanying IV. Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4541. May be repeated for up to 2 hours of degree credit.

MUEN 4851. Percussion Ensemble V. 1 Hour.
Continuation of Percussion Ensemble IV. Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4551. May be repeated for up to 2 hours of degree credit.

MUEN 4861. Wind Ensemble V. 1 Hour.
Continuation of Wind Ensemble IV. Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. Prerequisite: Two semesters of MUEN 4691. May be repeated for up to 2 hours of degree credit.

MUEN 4871. Chamber Choir V. 1 Hour.
Continuation of Chamber Choir IV. Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit. Prerequisite: Two semesters of MUEN 4581. May be repeated for up to 2 hours of degree credit.

MUEN 4891. Women's Chorus V. 1 Hour.
Continuation of Women's Chorus IV. Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater treble chorus canon. Admission by audition or director's consent. Prerequisite: Two semesters of MUEN 4591. May be repeated for up to 2 hours of degree credit.

MUEN 4911. Flute Ensemble V. 1 Hour.
Continuation of Flute Ensemble IV. Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4711. May be repeated for up to 2 hours of degree credit.
MUEN 4921. Clarinet Ensemble V. 1 Hour.
Continuation of Clarinet Ensemble IV. Study and performance of music for multiple clarinetists, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4721. May be repeated for up to 2 hours of degree credit.

MUEN 4931. Saxophone Ensemble V. 1 Hour.
Continuation of Saxophone Ensemble IV. Study and performance of music for multiple saxophonists, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. Prerequisite: Two semesters of MUEN 4731. May be repeated for up to 2 hours of degree credit.

MUEN 4941. Marching Band V. 1 Hour.
Continuation of Marching Band IV. Large ensemble performs at football games. Emphasis on high performance standards and a variety of performing styles. Rehearsal 8 hours per week. Prerequisite: Two semesters of MUEN 4441. May be repeated for up to 2 hours of degree credit.

MUEN 4951. Trumpet Ensemble V. 1 Hour.
Continuation of Trumpet Ensemble IV. Study and performance of music for multiple trumpeters, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4751. May be repeated for up to 2 hours of degree credit.

MUEN 4961. New Music Ensemble V. 1 Hour.
Continuation of New Music Ensemble IV. Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent. Prerequisite: Two semesters of MUEN 4761. May be repeated for up to 2 hours of degree credit.

MUEN 4971. Trombone Ensemble V. 1 Hour.
Continuation of Trombone Ensemble IV. Study and performance of music for multiple trombonists, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4771. May be repeated for up to 2 hours of degree credit.

MUEN 4981. Tuba Ensemble V. 1 Hour.
Continuation of Tuba Ensemble IV. Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets, quintets, and low brass choir. Rehearsal 2 hours per week. Prerequisite: Two semesters of MUEN 4781. May be repeated for up to 2 hours of degree credit.

MUEN 5401. Opera Theatre. 1 Hour.
Study of opera through performances of scenes, chamber and major operatic production. Admission with director's approval. May be repeated for degree credit.

MUEN 5411. Men's Chorus. 1 Hour.
Performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater men's chorus canon. Admission is open to any male student on campus. May be repeated for degree credit.

MUEN 5421. Inspirational Chorale. 1 Hour.
Performance of African-American literature with particular emphasis on Negro spirituals, traditional/contemporary gospel music and sacred world music. Rehearsal 3 hours per week. Admission with director's approval. May be repeated for up to 2 hours of degree credit.

MUEN 5431. Symphony Orchestra. 1 Hour.
Rehearsal 3 hours per week with extra rehearsals at director's discretion. Admission with director's approval. May be repeated for degree credit.

MUEN 5441. Marching Band. 1 Hour.
Rehearsal 8 hours per week. Admission with director's approval. May be repeated for degree credit.

MUEN 5451. Schola Cantorum. 1 Hour.
Vocal ensemble limited to the more experienced singers. Rehearsal 5 hours per week. Admission with director's approval. May be repeated for degree credit.

MUEN 5461. Wind Symphony. 1 Hour.
Rehearsal 3 to 5 hours per week. Admission by audition and approval of the conductor. May be repeated for degree credit.

MUEN 5471. Jazz Performance Laboratory. 1 Hour.
Training in the various styles of jazz and popular music. Rehearsal 3 hours per week. Admission by audition. May be repeated for degree credit.

MUEN 5481. Campus Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. May be repeated for degree credit.

MUEN 5491. Concert Band. 1 Hour.
Large ensemble setting with emphasis on performing wind band literature and enhancing the musicianship of members. Focus on performance standards through style and interpretation. Concerts of artistic merit which serve the campus community and general public may be required. Admission is by audition or special approval. May be repeated for up to 2 hours of degree credit.

MUEN 5501. Chamber Music. 1 Hour.
Performance of small ensemble music for any combination of instruments and/or voice. Rehearsal 3 hours per week. May be repeated for degree credit.

MUEN 5511. Symphonic Band. 1 Hour.
Rehearsal 3 hours per week. Admission by audition and approval of the conductor. May be repeated for degree credit.

MUEN 5521. Woodwind Quintet. 1 Hour.
Study and performance of music for woodwind quintet. Weekly coaching will emphasize intonation, blend, stylistic awareness, and ensemble precision. Repertoire ranges from the 18th to the 20th centuries. 3 hours of rehearsals weekly. May be repeated for degree credit.

MUEN 5541. Accompanying. 1 Hour.
Piano accompanying of vocal and instrumental soloists. Rehearsal 2 hours per week. Prerequisite: MUAP 110V. May be repeated for degree credit.

MUEN 5551. Percussion Ensemble. 1 Hour.
Study and performance of ensemble music for multiple percussion instruments. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5561. Musical Theater Orchestra. 1 Hour.
Instrumental ensemble with focus on the preparation and performance of musical theater pit orchestra music, in conjunction with UA Theater's mainstage musical. Admission by audition or director's approval. Prerequisite: Graduate standing. May be repeated for up to 2 hours of degree credit.

MUEN 5591. Women's Chorus. 1 Hour.
Select performance-based choral ensemble designed to improve individual and collective vocal skills, develop sight-reading skills, improve the individual's grasp of the essential elements of music, and expose students to repertory of the greater treble chorus canon. Admission by audition or director's consent. May be repeated for up to 2 hours of degree credit.

MUEN 5691. Wind Ensemble. 1 Hour.
Large ensemble setting performing orchestral wind and symphonic band literature with emphasis on high performance standards through style and interpretation. Concerts of high artistic merit which serve the campus community and general public are required. Admission is by audition. May be repeated for up to 2 hours of degree credit.
MUEN 5711. Flute Ensemble. 1 Hour.
Study and performance of music for multiple flutes, including trios, quartets, quintets, and flute choir. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5721. Clarinet Ensemble. 1 Hour.
Study and performance of music for multiple clarinets, including trios, quartets, quintets, and clarinet choir. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5731. Saxophone Ensemble. 1 Hour.
Study and performance of music for multiple saxophones, including trios, quartets, quintets, and saxophone choir. Rehearsal 3 hours per week. May be repeated for degree credit.

MUEN 5751. Trumpet Ensemble. 1 Hour.
Study and performance of music for multiple trumpets, including trios, quartets, quintets, and trumpet choir. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5761. New Music Ensemble. 1 Hour.
Small, select ensemble with emphasis on music written in the last hundred years, especially by important living composers. Focus on audience engagement through high performance standards, unconventional settings, and programs unique to the region. Off-campus appearances and outreach activities are required. Admission by consent.

MUEN 5771. Trombone Ensemble. 1 Hour.
Study and performance of music for multiple trombones, including trios, quartets, quintets, and trombone choir. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5781. Tuba Ensemble. 1 Hour.
Study and performance of music for multiple combinations of tuba and euphonium, including trios, quartets, quintets, and low brass choir. Rehearsal 2 hours per week. May be repeated for degree credit.

MUEN 5881. Chamber Choir. 1 Hour.
Continuation of Chamber Choir V for graduate students. Study and performance of vocal chamber music. Rehearsal 2 hours per week for 1 hour of credit.

Music History (MUHS)
Courses

MUHS 3503. Jazz History. 3 Hours.
This course includes overviews of major jazz styles, significant musicians, related historical events, and critical approaches in the field of jazz studies. Students will build skills in active listening, transcription, and academic reading and writing while expanding their familiarity with musical techniques and the cultural history of jazz. Prerequisite: MLIT 1013 or MLIT 1013H.

MUHS 3703. History of Music to 1750. 3 Hours.
Survey of history of music in western culture from ancient Greece to 1750. Lecture 3 hours, listening/quiz laboratory 1 hour per week. Corequisite: Lab component. Prerequisite: MLIT 1013 or MLIT 1013H and MUTH 2603; Music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music or Music minors or with instructor's consent.

MUHS 3713. History of Music from 1750 to Present. 3 Hours.
Survey of the history of music in western culture from 1750 to present. Lecture 3 hours, listening/quiz laboratory 1 hour per week. Corequisite: Lab component. Prerequisite: MLIT 1013 or MLIT 1013H and MUTH 2603 and MUHS 3703; Music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or a degree of Bachelor of Music or Honors Bachelor of Music or Music minors or with instructor's consent.

MUHS 396VH. Honors Independent Studies. 1-2 Hour.
Independent projects in music history and literature. One hour credit per semester. Open to undergraduates in honors. May be repeated for up to 2 hours of degree credit.

MUHS 4253. Special Topics in Music History. 3 Hours.
Specialized topics not extensively covered in MUHS 3703 or MUHS 3713. Satisfactory completion of the term paper in this class will fulfill the Fulbright College writing requirement. Prerequisite: MUHS 3703 and MUHS 3713. May be repeated for degree credit.

MUHS 4623. Music History Review. 3 Hours.
Review of the central data and concepts of music history, with emphasis on individual periods as needed by students enrolled. Credit in this course may not count toward the Master of Music or Master of Education degree.

MUHS 4703. Survey of String Literature. 3 Hours.
A survey of solo and chamber music literature involving stringed instruments. Prerequisite: MUAP 110V and MUTH 3613.

MUHS 4733. Survey of Symphonic Literature. 3 Hours.
A survey of the symphonic literature from its beginning to the present.

MUHS 4763. Survey of Vocal Literature I. 3 Hours.
A survey of concert literature for the solo voice.

MUHS 4773. Survey of Vocal Literature II. 3 Hours.
A survey of concert literature for the solo voice. Prerequisite: MUHS 4763.

MUHS 4793. Band Literature. 3 Hours.
A study of literature written for performance by concert band, symphonic band, and wind ensemble, representative of the following five periods in Music History: Renaissance (1420-1600), Baroque (1600-1750), Classical (1750-1820), Romantic (1820-1900), and Contemporary (1900-present).

MUHS 4803. Survey of Keyboard Literature I. 3 Hours.
A survey of the piano works of outstanding composers. Prerequisite: MUAP 110V.

MUHS 4813. Survey of Keyboard Literature II. 3 Hours.
A survey of the piano works of outstanding composers. Prerequisite: MUHS 4803.

MUHS 489V. Seminar in Music History. 1-4 Hour.
Open to undergraduates in honors. May be repeated for up to 4 hours of degree credit. With permission, may be repeated for degree credit.

MUHS 549V. Senior Thesis. 1-6 Hour.
Senior Thesis.

MUHS 5563. Collaborative Piano Literature I, Woodwind and Brass Repertoire. 3 Hours.
Survey of collaborative literature for piano and wind or brass instruments. Focus on music for the collaborative duo (instrument and piano) including sonatas and concerti.

MUHS 5573. Collaborative Piano Literature II, String Repertoire. 3 Hours.
Survey of collaborative literature for piano and string instruments. Focus on the repertoire of sonatas, concerti and concert works for the piano and instrument (violin, viola, cello, and double bass).

MUHS 5722. Directed Studies in Music Literature I. 2 Hours.
Research in music literature in the performance field of the individual student.

MUHS 5732. Directed Studies in Music Literature II. 2 Hours.
Research in music literature in the performance field of the individual student. Prerequisite: MUHS 5722.

MUHS 5753. Seminar in Medieval & Early Renaissance. 3 Hours.
Intensive studies in music of Western Europe from early Christian times through the 15th century.

MUHS 5773. Seminar in the 18th Century. 3 Hours.
Intensive studies of late Baroque and Classical music.
MUHS 5783. Seminar in Music of the 19th Century. 3 Hours.  
Intensive studies in music of the 19th century.

MUHS 5793. Seminar in Music of the 20th Century. 3 Hours.  
Intensive studies in 20th century music.

MUHS 5903. Seminar in Musicology. 3 Hours.  
Focuses on specialized topics and repertoires within the history of Western music 
and introduces students to musicological approaches to these subjects. May be 
repeated for degree credit.

MUHS 5943. Seminar in Opera. 3 Hours.  
Intensive studies in operatic literature.

MUHS 5952. Choral History and Literature I. 2 Hours.  
Detailed study of choral history and literature from Gregorian chant to J.S. Bach.

MUHS 5962. Choral History and Literature II. 2 Hours.  
Detailed study of choral history and literature from J.S. Bach to the present.

MUHS 5973. Seminar in Bibliography and Methods of Research. 3 Hours.  
A survey of the methods and materials of musical research, including bibliography, 
methods of analysis, and style in the presentation of research results. Open to 
graduate students and to juniors in Honors.

MUHS 600V. Master's Thesis. 1-6 Hour.  
Master's Thesis. May be repeated for degree credit.

Music Literature (MLIT) Courses

MLIT 1003. Experiencing Music (ACTS Equivalency = MUSC 1003). 3 Hours.  
Examines how music reflects and impacts culture while familiarizing students with 
various musical styles, forms and ideas. Develops listening skills and introduces 
basic music vocabulary and fundamentals.

MLIT 1003H. Honors Experiencing Music. 3 Hours.  
Examines how music reflects and impacts culture while familiarizing students with 
various musical styles, forms and ideas. Develops listening skills and introduces 
basic music vocabulary and fundamentals.

This course is equivalent to MLIT 1003.

MLIT 1013. Music and Society. 3 Hours.  
Introduction to academic study of Western art music, jazz, popular music, and world 
music. Students will gain experience in guided listening and in reading, writing, 
and critical thinking about musical cultures and their roles in society. Required for music majors. Prerequisite: Music major or music minor or instructor consent.

MLIT 1013H. Honors Music and Society. 3 Hours.  
Introduction to academic study of Western art music, jazz, popular music, and world 
music. Students will gain experience in guided listening and in reading, writing, 
and critical thinking about musical cultures and their roles in society. Required for music majors. Prerequisite: Music major or music minor, honors standing or instructor consent.

This course is equivalent to MLIT 1013.

MLIT 1333. Popular Music. 3 Hours.  
Covers the history of popular music during the 20th and 21st centuries within its 
social and cultural contexts. Examines the origins, evolution, and stylistic features of 
prominent popular genres, such as country, rock, blues, hip hop, and soul.

Music Pedagogy (MUPD) Courses

MUPD 3801. Conducting I. 1 Hour.  
A study of the elementary techniques of conducting instrumental and choral groups. 
Prerequisite: MUTH 2603.

MUPD 3811. Conducting II: Instrumental Music. 1 Hour.  
Continuation of study of the technique of conducting instrumental music groups. 
Prerequisite: MUPD 3801.

MUPD 3861. Conducting II: Vocal Music. 1 Hour.  
Continuation of study of conducting with emphasis on techniques of choral 
conducting. Prerequisite: MUPD 3801.

MUPD 3871. Reed-Making. 1 Hour.  
The making of reeds for oboe, bassoon, or clarinet, including the processing of cane 
from tubes. May be repeated for up to 2 hours of degree credit.

MUPD 3883. Jazz Pedagogy. 3 Hours.  
This course will provide future teachers with a sequenced method and resource 
materials to teach jazz songs, style, and improvisation by ear and from sheet music 
in instrumental and vocal ensembles. The course will also address ensemble 
rehearsal techniques and teaching individual students. The teaching content 
includes a variety of songs from the jazz tradition appropriate for students in 
middle school, high school, and college, along with tools for assessment of student 
progress.

MUPD 477V. Special Topics in Pedagogy. 1-6 Hour.  
Subject matter not covered in other sources. With permission, may be repeated for 
credit if topics are different. May be repeated for degree credit.

MUPD 481V. Conducting. 1-4 Hour.  
Private lessons of 1/2 hour, and one hour conducting laboratory each week. 
Development of skills in conducting symphony, opera, oratorio, ballet and band 
repertoire. May be repeated for degree credit.

MUPD 4863. Piano Pedagogy. 3 Hours.  
Analytical study and discussion of the various approaches to piano pedagogy and 
it application in individual/class instruction. Involves demonstration of principles 
through actual teaching of beginning, intermediate and upper level students.

MUPD 499V. Special Workshop in Music. 1-2 Hour.  
Presented by visiting master artist-teachers in various fields of music performance, 
teaching and composition. For this level it is expected that the prospective students 
are professionals in the given field seeking additional knowledge and insights from 
acknowledged professionals. May be repeated for up to 2 hours of degree credit.

MUPD 5202. Voice Pedagogy I. 2 Hours.  
Graduate-level study of the techniques and materials of teaching voice.

MUPD 5582V. Conducting. 1-4 Hour.  
Private lessons of 1/2 hour and 1 hour conducting laboratory each week. 
Development of skills in conducting symphony, choral, opera, oratorio, ballet, and 
band repertoire. May be repeated for up to 18 hours of degree credit.

MUPD 584V. Opera Workshop Techniques. 1-2 Hour.  
A basic course in every phase of opera production, including staging, set design, 
music coaching, voice casting, and translation.

MUPD 586V. Woodwind Techniques. 1-2 Hour.  
A continuation of the undergraduate courses in techniques and materials for 
elementary and secondary school music teaching. Prerequisite: One year of similar 
class instruction in the field on the undergraduate level.

MUPD 587V. Brass Techniques. 1-2 Hour.  
A continuation of the undergraduate class brass instrument course. Emphasis is 
placed on teaching methods, techniques, concepts, and materials. Prerequisite: One 
year of similar class instruction in the field on the undergraduate level.

MUPD 599V. Special Workshop in Music. 1-6 Hour.  
Presented by visiting master artist-teacher in various fields of music performance, 
teaching and composition. Prerequisite: Graduate standing. May be repeated for up 
to 6 hours of degree credit.
Music Theory (MUTH)

Courses

**MUTH 1003. Basic Musicianship. 3 Hours.**
Introductory-level studies in music theory and aural perception for students not prepared for MUTH 1603 or MUTH 1621. Meets 4 days per week.

**MUTH 1603. Music Theory I. 3 Hours.**
A study of diatonic harmonic practice. Includes part-writing and analysis. Prerequisite: MUTH 1003 or permission of instructor.

**MUTH 1621. Aural Perception I. 1 Hour.**
Development of aural perception through ear training, sight singing, and keyboard harmony. Meets 2 hours per week.

**MUTH 1631. Aural Perception II. 1 Hour.**
Continued development of aural perception through ear training, sight singing, and keyboard harmony. Meets 2 hours per week. Prerequisite: MUTH 1621.

**MUTH 2603. Music Theory II. 3 Hours.**
A continuation of MUTH 1603. Also includes chromatic harmony. Prerequisite: MUTH 1603.

**MUTH 2621. Aural Perception III. 1 Hour.**
A continuation of MUTH 1631. Two hours per week, one hour credit. Prerequisite: MUTH 1631.

**MUTH 2631. Aural Perception IV. 1 Hour.**
A continuation of MUTH 2621. Two hours per week, one hour credit. Prerequisite: MUTH 2621.

**MUTH 264V. Composition I. 1-4 Hour.**
Continuation of Composition I. Private lessons of one-half hour, and one hour of composition laboratory session per credit hour each week. Continued development of skills in creative musical expression. Specifically for composition-theory majors. Others admitted by consent. Prerequisite: Two semesters of MUTH 164V with grades of "B" and recommendation of instructor. May be repeated for up to 8 hours of degree credit.

**MUTH 263VH. Honors Composition I. 1-4 Hour.**
Continuation of Composition I for honors students. Private lessons of one-half hour, and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for honors composition-theory majors. Prerequisite: Two semesters of MUTH 264V with grades of "B", recommendation of instructor and honors standing. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUTH 264V.

**MUTH 364VH. Honors Composition III. 1-4 Hour.**
Continuation of Composition II for honors students. Private lessons of one-half hour, and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for honors composition-theory majors. Prerequisite: Two semesters of MUTH 264V with grades of "B", recommendation of instructor and honors standing. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUTH 364V.

**MUTH 3623. Music Perception. 3 Hours.**
A study of the perception and cognition of music. Prerequisite: MUTH 2603.

**MUTH 364V. Composition III. 1-4 Hour.**
Continuation of Composition II. Private lessons of one-half hour, and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for composition-theory majors. Others admitted by consent. Prerequisite: Two semesters of MUTH 264V with grades of B and recommendation of instructor. May be repeated for up to 8 hours of degree credit.

**MUTH 364VH. Honors Composition III. 1-4 Hour.**
Continuation of Composition II for honors students. Private lessons of one-half hour, and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for honors composition-theory majors. Prerequisite: Two semesters of MUTH 264V with grades of "B", recommendation of instructor and honors standing. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUTH 264V.

**MUTH 3723. Jazz Analysis. 3 Hours.**
This course is an introduction to jazz analysis. Course content will include lead sheet symbols, jazz progressions, lead sheet analysis, improvisation, phrasing and meter, and aural skills. Prerequisite: MUTH 2603.

**MUTH 3733. Functional Jazz Piano. 3 Hours.**
This course is intended for both jazz pianists and non-pianists and provides methods for common jazz piano voicings. Through practical applications and drills, the students will be familiar with a variety of common voicings techniques, including (but not limited to): 1) "shell" voicing, 2) two-note critical tone voicings (both with roots and rootless), 3) three-note left-hand voicings, and 4) four-part "drop 2" voicings. Also, this course will provide basic techniques for improvisation. Prerequisite: MUTH 1621 and MUTH 1603.

**MUTH 3742. Jazz Arranging. 2 Hours.**
This course introduces students to techniques in arranging for small and large jazz ensembles. Students will analyze representative examples of various jazz styles, learn technical features of common jazz instruments, experiment with common approaches to arranging, and write their own arrangements of jazz standards for small ensemble and big band. Prerequisite: MUTH 2603.

**MUTH 3923. Music and Mind. 3 Hours.**
Examines music from the perspective of cognitive science. Readings and discussions investigate the psychological processes that underlie musical behaviors such as listening and performing while also learning how to adopt empirical methods to study music and make sense of empirical data related to music. Prerequisite: Instructor consent.

**MUTH 3923H. Honors Music and Mind. 3 Hours.**
Examines music from the perspective of cognitive science. Readings and discussions investigate the psychological processes that underlie musical behaviors such as listening and performing while also learning how to adopt empirical methods to study music and make sense of empirical data related to music. This course is equivalent to MUTH 3923.

**MUTH 4322. Score Reading. 2 Hours.**
A conductor's approach to the technique of score reading and analysis of orchestra, band, and choral scores for the purpose of preparing composition for rehearsal and performance.

**MUTH 4612. Orchestration. 2 Hours.**
A continuation of study of the capabilities of the various orchestral and band instruments and their use in arrangement for ensembles, band, and orchestra. Scoring for orchestra. Prerequisite: MUTH 3613.

**MUTH 462V. Music Theory Review. 1-3 Hour.**
A continuation and intensification of undergraduate music theory. (May not count for credit toward the Master of Music degree.).

**MUTH 464V. Composition IV. 1-4 Hour.**
Continuation of Composition III. Private lessons of one-half hour and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for composition-theory majors. Others admitted by consent. Prerequisite: Two semesters of MUTH 364V with grades of "B" and recommendation of instructor. May be repeated for up to 8 hours of degree credit.
MUTH 464VH. Honors Composition IV. 1-4 Hour.
Continuation of Composition III. Private lessons of one-half hour and one hour of composition laboratory session per credit hour each week. Continued development of advanced skills in creative musical expression. Specifically for composition-theory majors. Others admitted by consent. Prerequisite: Two semesters of MUTH 364V with grades of B and recommendation of instructor. May be repeated for up to 8 hours of degree credit. This course is equivalent to MUTH 464V.

MUTH 4703. Writing Music Analysis. 3 Hours.
Analysis of music with an emphasis on analytical writing skills and the use of library source materials. Prerequisite: MUTH 3603.

MUTH 477V. Special Topics in Music Theory. 1-4 Hour.
Subject matter not covered in other courses. Prerequisite: Instructor consent. May be repeated for up to 4 hours of degree credit.

MUTH 477VH. Honors Special Topics in Music Theory. 1-4 Hour.
Subject matter not covered in other courses. May be repeated for up to 4 hours of degree credit. This course is equivalent to MUTH 477V.

MUTH 4923H. Honors Colloquium in Music Theory. 3 Hours.
Covering a special topic or issue, offered as part of the honors program.

MUTH 498V. Senior Thesis. 1-18 Hour.
Senior Thesis.

MUTH 5343. Analytical Techniques. 3 Hours.
An intensive study of selected works from music literature. Schenkerian analysis, dynamic analysis, and set theory analytical techniques will be studied and employed in addition to traditional harmonic and formal analysis. Prerequisite: MUTH 3613 or equivalent and graduate standing.

MUTH 5623. Pedagogy of Theory. 3 Hours.
Detailed study of methods of teaching undergraduates courses in music theory and aural perception. Prerequisite: Graduate standing.

MUTH 5631. Music Theory Teaching Practicum. 1 Hour.
Supervised teaching of an undergraduate course in music theory or aural perception, including lesson plan and examination preparation and in-class observation.

MUTH 5643. Analysis of 20th Century Music. 3 Hours.
Study of 20th century music and analytic techniques including pitch class set theory and serial techniques. Prerequisite: Graduate standing.

MUTH 5662. Instrumental Arranging. 2 Hours.
A practical course in arranging for the various small ensembles including keyboard. Review of instrumental ranges and capabilities. Study of current trends in instrumental ranges and arranging.

MUTH 5672. Advanced Orchestration. 2 Hours.
A study of advanced principles of orchestral writing through individual projects in scoring and analysis. Prerequisite: MUTH 4612 or equivalent.

MUTH 568V. Composition. 1-4 Hour.
Private lessons of one-half hour, and one hour of composition laboratory session each week. Development of skills in creative musical expression specifically for composition-theory majors - others admitted by consent. Prerequisite: Graduate standing. May be repeated for degree credit.

MUTH 599V. Independent Study in Music Theory. 1-6 Hour.
Provides students with an opportunity to pursue special study of topics in music theory. May be repeated for up to 12 hours of degree credit.

MUTH 600V. Master's Thesis. 1-6 Hour.
Master’s Thesis. May be repeated for degree credit.

Nursing (NURS) Courses

NURS 2012. Nursing Informatics. 2 Hours.
This course focuses on how information technology is used in the health care system. The course describes how nursing informatics is currently being used by healthcare professionals and speculates about future applications. Prerequisite: For pre-nursing and nursing majors only. Must have sophomore standing or above and a GPA of 3.0 or above.

NURS 2022. Introduction to Professional Nursing Concepts. 2 Hours.
The course presents an overview of theories, principles and concepts essential to professional nursing practice. It includes ethical and legal implications relevant to health care systems. Focus is on the nursing process as the organizing framework for the delivery of care. It also explores the role of the professional nurse. This is a pre-nursing course. Prerequisite: For pre-nursing and nursing majors only. Must have sophomore standing or above and a GPA of 3.0 or above.

NURS 2032. Therapeutic and Interprofessional Communication. 2 Hours.
Focuses on intrapersonal and interpersonal strategies necessary for effective nurse-client interactions. Introduces a variety of communication techniques skills including group process and dynamics. This is a pre-nursing course. Prerequisite: For pre-nursing and nursing majors only. Must have sophomore standing or above and a GPA of 3.0 and above.

NURS 217V. Independent Study in Nursing. 1-2 Hour.
A selected learning experience in nursing to enhance knowledge about and/or practice in the profession. Objectives and experiences are designed on an individual basis with a faculty adviser. May be repeated for up to 12 hours of degree credit.

NURS 217VH. Honors Independent Study in Nursing. 1-2 Hour.
A selected learning experience in nursing to exchange knowledge about and/or practice in the profession. Objectives and experiences are designed on an individual basis with a faculty adviser. Prerequisite: Honors candidacy. This course is equivalent to NURS 217V.

NURS 3171. Independent Study Nursing. 1 Hour.
A structured learning experience in nursing to improve knowledge of the science in nursing. Objectives and experiences are designed on an individual basis with a faculty adviser. May be taken with any 3500 level nursing course or above. May be repeated for up to 7 hours of degree credit.

NURS 3313. Pharmacology in Nursing. 3 Hours.
The use of therapeutic drugs in health care is the focus of the course. Nursing assessment, safety measures and client education related to drug therapy are emphasized. This is a Level I course. Prerequisite: Admission into the BSN professional program.

NURS 3314. Pathophysiology. 4 Hours.
The course focuses on underlying concepts common to pathophysiologic processes across the life span. Factors that contribute to altered physiological functioning and the body's adaptive and compensatory mechanisms are studied. Emphasizes concepts essential for understanding the rationale for preventive and therapeutic nursing interventions in health and illness. This is a Level I course. Prerequisite: Admission into BSN professional program.

NURS 3314H. Honors Pathophysiology. 4 Hours.
The course focuses on underlying concepts common to pathophysiologic processes across the life span. Factors that contribute to altered physiological functioning and the body's adaptive and compensatory mechanisms are studied. Emphasizes understanding the rationale for preventive and therapeutic nursing interventions in health and illness. This is a Level I course. Prerequisite: Admission into BSN professional program. This course is equivalent to NURS 3314.
NURS 3321L. Health Assessment. 1 Hour.
The course focuses on assessment of client’s health status, environment, nursing care needs, and referral needs. The course presents concepts and skills necessary to perform a holistic health assessment of the adult client. This is a Level I course. Prerequisite: Admission to the BSN professional program.

NURS 3402. Nursing Concepts: Older Adult. 2 Hours.
This course focuses on gerontologic theories, concepts, and principles as they relate to nursing care of older adults. Students explore socio-cultural context of gerontologic nursing, professional standards of practice, common health concerns, and future considerations. This is a Level I course. Prerequisite: Admission into the BSN Professional Program of Studies.

Introduction to the nursing process and the scope of basic human needs. The student learns to use nursing diagnoses and care plans in case studies. This is a Level I course. Corequisite: NURS 3424. Prerequisite: Admission to BSN professional program.

NURS 3424. Professional Role Implementation I: Caregiver. 4 Hours.
Students apply basic nursing concepts and skills in laboratory and clinical settings. Emphasis is on the role of nurse as caregiver and use of the nursing process in the delivery of care. This is a Level I course. Pre- or Corequisite: NURS 3422, NURS 3321L, and NURS 3313. Prerequisite: Admission to the BSN program.

Focuses on the adult population experiencing acute problems in the health-illness continuum. Utilizing the nursing process, nursing, and medical treatments of selected conditions that will be emphasized in the acute care setting. This is a Level I course. Corequisite: NURS 3644. Prerequisite: NURS 3313, NURS 3314, NURS 3321L, NURS 3402, and NURS 3422.

NURS 3644. Professional Role Implementation II: Caregiver. 4 Hours.
Emphasizes the role of caregiver in acute care settings. Course expands on assessment and includes advanced clinical skills. Emphasizes the use of clinical judgment to promote optimal health for adults experiencing illness and/or undergoing surgery. This is a Level I course. Pre- or Corequisite: NURS 3634. Prerequisite: NURS 3313, NURS 3314, NURS 3321L, NURS 3402, NURS 3422, and NURS 3424.

NURS 3644H. Honors Professional Role Implementation II: Caregiver. 4 Hours.
Emphasizes the role of caregiver in acute care settings. Course expands on assessment and includes advanced clinical skills. Emphasizes the use of clinical judgment to promote optimal health for adults experiencing illness and/or undergoing surgery. This is a Level I course. Pre- or Corequisite: NURS 3634. Prerequisite: NURS 3313, NURS 3314, NURS 3321L, NURS 3402, NURS 3422, and NURS 3424. This course is equivalent to NURS 3644.

NURS 3742. Nursing Concepts: Mental Health and Illness. 2 Hours.
Prepares for the mental health nurse role in health care settings. The course examines the varieties of mental health and mental illness, mental health professionals, and their roles in the health care setting. The course also covers the role and responsibilities of the mental health nurse. Corequisite: NURS 3752. Prerequisite: NURS 3313, NURS 3314, NURS 3321L, NURS 3402, and NURS 3422.

NURS 3752. Professional Role Implementation III: Caregiver. 2 Hours.
Students work with clients who have mental health problems, observe group process in therapy sessions, and develop interpersonal communication skills. Students apply research-based knowledge in assisting assigned clients to meet mental and other health care needs. The caregiver role is emphasized. This is a Level I course. Pre- or Corequisite: NURS 3742. Prerequisite: NURS 3313, NURS 3314, NURS 3321L, NURS 3402, NURS 3422, and NURS 3424.

NURS 3842. Research in Nursing. 2 Hours.
Introduction to the research process through a comparative analysis of selected studies exemplifying various theoretical, methodological and analytical approaches. Students acquire the basic competencies to critically read, evaluate and interpret research findings for use in professional practice. This is a Level I course.

NURS 3901H. Honors Nursing Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work “one-on-one” exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy.

NURS 4003. Transition to Professional Nursing Practice. 3 Hours.
The course introduces the RN student to the standards and concepts of professional nursing based on the Essentials of Baccalaureate for Professionals Nursing Education. Prerequisite: RNBN program.

NURS 4013. Informatics for the Professional Nurse. 3 Hours.
This course focuses on how information technology is used in the health care system. The course describes how nursing informatics is currently being used by healthcare professionals, and speculates about future applications. Prerequisite: RNBN program admission.

NURS 4023. Health Promotion Across the Lifespan. 3 Hours.
This course introduces theories and concepts of teaching and learning, health and wellness, and health behavior in the context of health promotion in nursing. The complex relationships that exist among culture, family, community, and health are explored. Students apply evidence-based strategies to assess, implement, and evaluate health promotion interventions for individuals, families, communities, and populations. Prerequisite: Admission to RN-BSN Program.

NURS 4063. Population and Community Health Nursing. 3 Hours.
This course introduces general principles of population and community health nursing to provide a theoretical base for the care of families, aggregates, communities, and populations. Students apply the concepts of disease prevention and assessment to plan, implement, and evaluate interventions to address diverse health care issues across the lifespan. Prerequisite: Admission to RN-BSN Program.

NURS 4092. RN-BSN Professional Role Implementation VIII: Role Synthesis. 2 Hours.
Role Synthesis provides the RN to BSN student with an opportunity to synthesize and apply knowledge of concepts developed throughout the nursing program. Evidence based practice will guide development of a quality improvement project in an area of student’s interest. The course provides an opportunity to collaborate with a mentor and reflect professional goals. Requires a total of 75 clinical hours. Prerequisite: Admission to RN/BSN Program.

NURS 4112. Nursing Concepts: Teaching and Health Promotion. 2 Hours.
The course focuses on teaching/learning and the professional nurse’s role in health promotion and disease prevention. A variety of health education and health promotion strategies are presented and evaluated. This is a Level II course. Prerequisite: Admission to the nursing program, and completion of Level I courses.

NURS 4154. Nursing Concepts: Children and Family. 4 Hours.
This course provides theory and research-based knowledge regarding holistic nursing care of children and families. Principles of health promotion and health education for expanding families are integral to this course. This is a Level II course. Corequisite: NURS 4164. Prerequisite: NURS 4112.

NURS 4164. Professional Role Implementation IV: Teacher. 4 Hours.
Clinical and laboratory experience for application of research-based knowledge and skills in the nursing care of children and families. Emphasis is on teaching role of the nurse. This is a Level II course. Pre- or Corequisite: NURS 4154. Prerequisite: Completion of Level I courses.
NURS 4203. Leadership in Nursing. 3 Hours.
This course introduces theories and principles of management and leadership and the professional nurse's role within the health care system. Social issues, economic policy, and regulatory requirements are used to explore healthcare delivery systems and access, quality improvement, and patient safety. This course includes strategies for monitoring delivery of care, outcomes, and evaluating program effectiveness. Prerequisite: Admission into the RN-BSN program.

NURS 4242. Leadership in Nursing. 2 Hours.
Introduces principles of leadership and the professional nurse's roles in the health care system. Considers the perspectives of management, organization, and change theory. Includes strategies for monitoring delivery of care, outcomes, and evaluating program effectiveness. This is a Level II course.

NURS 4252. Professional Role Implementation V: Manager. 2 Hours.
Students will apply the theoretical principles learned in NURS 4242 and NURS 4262 to the delivery of care to adults with chronic conditions across transitions of care settings. The manager will be emphasized. This is a Level II course. Prerequisite: Completion of Level I courses. Pre- or Corequisite: NURS 4242 and NURS 4262.

NURS 4252H. Honors Professional Role Implementation V: Manager. 2 Hours.
Students will apply the theoretical principles learned in NURS 4242 and NURS 4262 to the delivery of care to adults with chronic conditions across transitions of care settings. The manager will be emphasized. This is a Level II course. Prerequisite: Completion of Level I courses. Pre- or Corequisite: NURS 4242 and NURS 4262. This course is equivalent to NURS 4252.

NURS 4262. Nursing Concepts: Adult Health and Illness II. 2 Hours.
Focuses on the adult population experiencing chronic problems in the health-illness continuum. Utilizing the nursing process, nursing and medical treatment of selected conditions will be emphasized across transitional care settings. This is a Level II course. Prerequisite: Level I courses.

NURS 4313. Pathophysiology in Nursing. 3 Hours.
The course focuses on the study of the underlying concepts of physiological functioning and the body's adaptive and compensatory mechanisms within a systems framework. Learners examine aspects of disease processes including etiology, pathogenesis, and clinical manifestations, as it applies to current nursing practice with diverse clients across the lifespan. Pre- or Corequisite: Admission to the RN to BSN online program or instructor or department consent.

NURS 4323. Health Assessment and Clinical Reasoning for Professional Nurses (Sp). 3 Hours.
This 3-credit theory course builds on the Registered Nurse's clinical experience and knowledge of health assessment. Emphasis is placed on expanding physical assessment skills, interpreting abnormal findings, and applying the principles of evidence-based practice to the health assessment process. The role of documentation of health assessment in third party reimbursement is also explored. Prerequisite: Admission to the RN-BSN program.

NURS 4442. Nursing Concepts: Critical Care. 2 Hours.
Focuses on the adult population experiencing multiple or critical illnesses or conditions necessitating admission to a critical care unit. The course emphasizes both nursing and medical treatment of selected conditions. This is a Level II course. Corequisite: NURS 4452. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, and NURS 4262.

NURS 4452. Professional Role Implementation VI: Role Synthesis. 2 Hours.
Clinical learning is focused on further developing and refining the knowledge, skills, and attitudes necessary to manage the care of an acutely ill or complex patient and/or family within the context of an inter-professional team. This is a Level II course. Prerequisite or Corequisite: NURS 4442. Prerequisite: Completion of Level I and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, and NURS 4262.

NURS 4503. Introduction to Health Care Policy. 3 Hours.
This course provides an overview of health care policy orienting students to the political and social processes impacting the current health care environment. The course provides a basic framework for understanding the role of nursing in advocacy, leadership, economics and ethics associated with influencing health care policy. Recognizing the financing of health care and the impact on quality through policy changes will be discussed. Prerequisite: Admission to the RN to BSN online program or instructor or department consent.

NURS 4603. Nursing Concepts: Community. 3 Hours.
The course focuses on theories and concepts in community health nursing. Health resources are explored in a variety of settings. This is a Level II course. Corequisite: NURS 4613. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, and NURS 4262.

NURS 4613. Professional Role Implementation VII: Role Synthesis. 3 Hours.
Application of community health concepts and the nursing process to promote community health and to restore health in a variety of settings. This is a Level II course. Pre- or Corequisite: NURS 4603. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, NURS 4262.

NURS 4613H. Honors Professional Role Implementation VII: Role Synthesis. 3 Hours.
Application of community health concepts and the nursing process to promote community health and to restore health in a variety of settings. This is a Level II course. Pre- or Corequisite: NURS 4603. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, NURS 4262. This course is equivalent to NURS 4613.

NURS 4701. Professional Nursing Synthesis. 1 Hour.
The course emphasizes reflection, integration, and synthesis of concepts from previous courses. Course enrollment occurs in the last semester of the program. Prerequisite: Admission into the RN-BSN program.

NURS 4712. Seminar in Nursing. 2 Hours.
Focuses on integrating the nursing caregiver, teacher and manager roles. Prepares students to analyze practice issues, trends and future demands. Explores the roles of baccalaureate prepared professional nurses and facilitates students to incorporate those roles as they enter professional practice. Must be taken in the final semester of the Professional Program of Study. This is a Level II course. Corequisite: NURS 4722. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, and NURS 4262.

NURS 4722. Professional Role Implementation VIII: Role Synthesis. 2 Hours.
Clinical immersion experience that approximates the role of a beginning BSN nurse generalist. Corequisite: NURS 4712. Prerequisite: Completion of Level I courses and NURS 4112, NURS 4154, NURS 4164, NURS 4242, NURS 4252, NURS 4262.

NURS 481V. Special Topics in Nursing. 1-6 Hour.
This course is the study of a special topic(s) in nursing. Content varies. May be repeated for up to 6 hours of degree credit.

NURS 481VH. Honors Special Topics in Nursing. 1-6 Hour.
This course is the study of a special topic(s) in nursing. Content varies. May be repeated for up to 6 hours of degree credit. This course is equivalent to NURS 481V.

NURS 4843. Research in Nursing. 3 Hours.
This course introduces the research process through a comparative analysis of selected studies exemplifying various theoretical, methodological, and analytical approaches. Students acquire the basic competencies to critically read, evaluate and interpret nursing research studies for use in professional nursing practice. Pre- or Corequisite: Admission to the RN to BSN online program or instructor or department consent.
NURS 491V. Independent Study in Nursing. 1-6 Hour.
A selected learning experience in nursing to enhance knowledge and/or practice of the profession. Objectives and experiences are designed on an individual basis with a faculty adviser. May be taken with any 3500-level nursing course or above.

NURS 498VH. Nursing Honors Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work “one-on-one to complete the honors thesis/project. Prerequisite: Honors candidacy and NURS 3901H. May be repeated for up to 3 hours of degree credit.

NURS 5003. Theoretical and Scientific Foundations for Nursing Practice. 3 Hours.
The course utilizes the critical reasoning process to examine the element of nursing knowledge. Emphasis is placed on concept analysis and the evaluation of nursing theories. Identification of the links between theory and empirical indicators is examined. The clinical relevance of mid-range and practice theories is explored. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5033. Scientific Foundations and Role Development in Advanced Practice Nursing. 3 Hours.
Examines development of the advanced practice nursing role and evolution of the Doctor of Nursing Practice (DNP). Concepts include scientific foundations of practice, role development, interdisciplinary collaborative strategies, advanced scope of practice, patient advocacy, and legal/ethical principles in the advanced practice role. Pre- or Corequisite: NURS 5003. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5043. Concepts of Health Promotion Within Diverse Populations. 3 Hours.
Provides a theoretical base for health promotion, risk reduction and disease prevention at the individual, family and community levels. A cross-disciplinary approach to achieve or preserve health is identified. Focuses on holistic plans and interventions that address the behavioral and social factors that contribute to morbidity and mortality in diverse populations. Provides opportunity to develop, implement, and evaluate health promotion interventions for selected clients. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5053. Evidence-Based Practice and Innovation in Nursing. 3 Hours.
Examines models and strategies for leadership in evidence-based practice and innovation, outcomes management, and translational scholarship. The emphasis of this course is on problem identification, information retrieval, critical appraisal, and synthesis of a body of evidence. It provides the student with the foundation for the DNP evidence-based practice project. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5063. Health Care Policy. 3 Hours.
Provides knowledge and understanding needed to participate in policy development analysis and implementation. Provides overview of the political process, health care policy, advocacy, leadership roles, legislative and regulatory issues, health care financing, and evaluating outcomes. Access, cost, and quality of health care are major foci in this course. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5073. Curriculum Design and Development in Nursing Education. 3 Hours.
This course provides the essential elements that define and operationalize the process of curriculum design and development. Students will examine curriculum theories, models, and concepts from the perspective of nursing education. They will analyze factors that influence program and curriculum development. Historical and philosophical foundations of nursing practice and educational principles are examined. The application and synthesis of curriculum theory and their application to nursing is emphasized. The role of the educator in the dynamic relationship between the practice setting, research, and curriculum is examined. Students will participate in the design of curriculum which reflects professional nursing practice, standards, theory, and research. Prerequisite: Admission to the Graduate Program or departmental consent. Completion of all general and research core classes or approval of the MSN Education Program Coordinator.

NURS 5083. Methods of Assessment and Evaluation in Nursing Education. 3 Hours.
This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore theories, models, and evidence for best practice in assessing learning - including constructing exam items and creating tools for assessing writing assignments. Students discuss grading and other concepts related to assessment and evaluation as it relates to nursing education. Pre- or Corequisite: Completion of NURS 5073 or NURS 5093. Prerequisite: Admission to the Masters of Science in Nursing or the Doctor of Nursing Practice Program.

NURS 5093. Instructional Design and Delivery in Nursing Education. 3 Hours.
This course is one of four offered in the nursing education concentration in preparation for the role of educator in academic and clinical settings. Students explore teaching and learning theories and other evidence to guide practice in the advanced role of the educator. Students gain competencies in the knowledge and skills necessary for delivering evidence-based teaching and learning strategies in a variety of learning environments. Prerequisite: Admission to the Graduate Program or departmental consent.

NURS 5101. Advanced Health Assessment and Diagnostic Reasoning. 1 Hour.
Applies health assessment, physical examination techniques, clinical decision making, and diagnostic reasoning to formulate a culturally-sensitive, individualized plan of care, which includes health promotion and disease prevention. Corequisite: NURS 5112.

NURS 5112. Advanced Health Assessment and Diagnostic Reasoning Clinical Practicum. 2 Hours.
Focus is on the application of clinical decision making, diagnostic reasoning, and advanced physical examination techniques to develop differential diagnoses, problem list, and a plan of care for individual clients. Corequisite: NURS 5101.

NURS 5123. Pharmacotherapeutics. 3 Hours.
Provides advanced concepts and application of pharmacology for broad categories of agents used in disease management. Establishes the relationship between pharmacologic agents and physiologic/pathologic responses. It assists students with the development of knowledge and skills to prescribe and manage a client’s health in a safe, high quality, and cost-effective manner. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5143. Advanced Pathophysiology. 3 Hours.
Provides a comprehensive understanding of normal physiologic and pathologic mechanisms of disease that serves as a foundation for clinical assessment, decision making, and management of individuals. Includes mechanisms of disease, genetic susceptibility, and immune responses in selected disorders. This course includes concepts of pathophysiology across the lifespan. Prerequisite: Admission to the graduate program or by permission of the instructor.
NURS 5212. Acute and Critical Illness in Adult and Geriatric Populations. 2 Hours.
Focusses on utilization of advanced theories, concepts, knowledge and skill in the care of diverse adult and geriatric populations with complex acute health problems. Corequisite: NURS 5225. Prerequisite: All core courses.

NURS 5225. Clinical Practicum: Acute and Critical Illness in Adults and Geriatric Populations. 5 Hours.
Clinical practicum for NURS 5212. Application of advanced theories, concepts, knowledge and skill in the care of diverse adult and geriatric populations with complex acute health problems. Corequisite: NURS 5212. Prerequisite: All core courses.

NURS 5232. Chronic Illness in Adult and Geriatric Populations. 2 Hours.
Focusses on utilization of advanced theories, concepts, knowledge and skill in the care of diverse adult and geriatric populations with complex chronic health problems. Corequisite: NURS 5245. Prerequisite: All core courses.

NURS 5245. Clinical Practicum: Chronic Illness in Adult and Geriatric Populations. 5 Hours.
Clinical practicum for NURS 5232. Application of advanced theories, concepts, knowledge and skill in the care of adults and geriatric populations experiencing chronic health problems. Corequisite: NURS 5232. Prerequisite: All core courses.

NURS 5272. Clinical Practicum: Interpretive Diagnostic Reasoning. 2 Hours.
Application of principles of pathologic mechanisms of disease, pharmacotherapeutics, and pharmacokinetics to refine and synthesize skills for history taking, physical examination, clinical assessment, diagnostic reasoning, and decision making for adult and geriatric individuals. Pre- or Corequisite: NURS 5102, NURS 5111, NURS 5143 and NURS 5123.

NURS 5303. Foundations of Nursing Education. 3 Hours.
Considers the principles, philosophies, theories, and strategies of teaching, learning, and evaluation needed in nursing education.

NURS 5313. Curriculum and Evaluation in Nursing Education. 3 Hours.
Considers knowledge and skills needed for curriculum and program development and evaluation for a variety of nursing education settings.

NURS 5323. Teaching in Nursing Practicum. 3 Hours.
Supervised experience in the nurse educator role in both classroom and clinical settings.

NURS 5332. Common Problems in Acute Care in Adult and Gerontology Populations Clinical Practicum. 2 Hours.
Focusses on the management of adult-gerontology patients with common acute illnesses. Emphasizes the application of principles of pathologic mechanisms of disease, history taking, physical examination, and clinical decision making. Corequisite: NURS 5434. Prerequisite: (Completion of core courses: NURS 5003, 5033, 5043, 5053, 5143, 5063, 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112).

NURS 5343. Specialty Development I. 3 Hours.
This course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing in preparation for the nurse educator role.

NURS 5353. Specialty Development II. 3 Hours.
Building on the Independent Study: Specialty Development I, this course will include two foci. There will be readings focused on current topics in a specialty area. A focused field experience will allow student to integrate knowledge and skills in a specialty area of nursing in preparation for the nurse educator role. Prerequisite: NURS 5343.

NURS 5403. Scholarly Writing. 3 Hours.
This course will focus on the fundamentals of academic writing at the graduate level with the goal of honing students' critical reading and writing skills. Attention will be given to mechanics, usage, and style, as well as to handling and citing sources. The emphasis throughout is on creative thinking and precise, scholarly writing. Prerequisite: Completion of a baccalaureate degree and acceptance into the graduate program.

NURS 5413. Executive Leadership in Nursing. 3 Hours.
This course focuses on the health care structures and processes, human capital management, health and public policy, communication principles and styles, negotiations, leadership effectiveness, strategic visioning, ethics and advocacy, and innovation. Learning will enable the professional nurse executive to lead complex health care environments applying an advanced skill set in each of the focus areas. Prerequisite: NURS 5401, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403.

NURS 5423. Health Systems Operations. 3 Hours.
This course focuses on the complex practice environment. Enables the professional nurse leader to demonstrate knowledge of care management and delivery, professional practice environment and models, and quality monitoring and improvement. Professional practice and health care delivery models and settings, role delineation, laws and regulations, accreditation, and professional practice standards will be emphasized. Prerequisite: NURS 5401, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403.

NURS 5434. Common Problems in Acute Care in Adult and Gerontology Populations. 4 Hours.
Examine principles of pathologic mechanisms of disease, refine skills for history taking, physical examination, and clinical decision making for adult and geriatric individuals with common acute illnesses. Corequisite: NURS 5443. Prerequisite: (Completion of core courses: NURS 5003, 5033, 5043, 5053, 5143, 5063, 5523), and (completion of specialty clinical courses: NURS 5101 and NURS 5112).

NURS 5443. Chronic Health Problems in Adult and Gerontology Populations. 3 Hours.
Explores evidence-based models for the management of selected chronic conditions, focusing on assessment and treatment of individuals and families. Utilizes advanced theories, concepts, knowledge, and skill in the care of diverse adult and geriatric populations with complex chronic health problems. Corequisite: NURS 5454. Prerequisite: Completion of NURS 5434, and NURS 5332.

NURS 5454. Chronic Health Problems in Adult and Gerontology Populations Clinical Practicum. 4 Hours.
Focuses on the management of adult-gerontology populations with complex, chronic health problems. Emphasis is on the application of theoretical concepts, assessment skills, clinical decision making, and evidence-based standards to formulate diagnoses, clinical impressions, treatment, and evaluation plans in the acute or out-patient setting. Pre- or Corequisite: NURS 6123. Corequisite: NURS 5443. Prerequisite: (Completion of core courses: NURS 5003, 5033, 5043, 5053, 5143, 5063, 5523), and (completion of specialty clinical courses NURS 5101, NURS 5112, NURS 5434, and NURS 5332).

NURS 5463. Acute and Critical Illness in Adult and Gerontology Populations. 3 Hours.
Provides an in-depth knowledge of management of acutely and critically ill adults. Emphasis is on the use of evidence-based knowledge to formulate diagnoses, treatment, evaluation plans, and referral for adults who have complex acute or critical health problems, or are at high risk for developing complications. Corequisite: NURS 5475. Prerequisite: NURS 5101, NURS 5112, NURS 5434, NURS 5332, NURS 5443, and NURS 5454.
NURS 5475. Adult-Geriatric (Acute/Critical) Clinical II (Sp). 5 Hours. 
Experiences allow the student to apply safe, scientifically sound, cost effective, legal and ethical management strategies to the care of adults with complex acute and critical illness. Emphasis is on the development of advanced clinical skills in acute and critical care settings. Corequisite: NURS 5463. Prerequisite: NURS 5443 and NURS 5454.

NURS 5483. Common Problems in Primary Care. 3 Hours. 
Examines principles of pathological mechanisms of disease, refines knowledge for thorough history taking, physical examination, and clinical decision-making for men, women, and families with common illnesses treated in primary care. Corequisite: NURS 5495. Prerequisite: NURS 5101, NURS 5112, NURS 5543, and NURS 5683.

NURS 5495. Common Problems in Primary Care Clinical Practicum. 5 Hours. 
Clinical component to 5483 Common Problems Primary Care. Refines skills for thorough history taking, physical examination, and clinical decision-making for men, women, and families with common illnesses treated in primary care. Pre-or Corequisite: NURS 5483. Prerequisite: NURS 5101, NURS 5112, NURS 5543, and NURS 5683.

NURS 5523. Healthcare Informatics. 3 Hours.
Explores standards and principles for selecting, using, and evaluating information systems. Discusses the application of computer programs relevant to nursing administration, education, research, and practice. Assists the student in managing individual and aggregate information, and assessing the efficacy of patient care technology appropriate to a specialized area of nursing practice. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 5543. Primary Care of Children. 3 Hours.
Focuses on evidence-based models for the management of children from diverse cultures with common conditions in primary care. Includes anticipatory guidance, health promotion, and disease prevention. Emphasis on application of theoretical concepts, assessment skills, clinical decision-making, and evidence-based standards to formulate differential diagnoses, clinical impressions, treatment, and evaluation plans in primary care. Corequisite: NURS 5683. Prerequisite: NURS 5101 and NURS 5112.

NURS 5553. Specialty Development I: Nurse Executive Leader. 3 Hours.
This course will focus on microsystem level operations within the healthcare environment and issues faced by nurse administrators. Learning will enable the professional nurse to participate in operations surrounding the delivery of care in various healthcare organizations. This course will facilitate the application of learned theories and organizational principles. Prerequisite: NURS 5401, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403.

NURS 5563. Specialty Development II: Nurse Executive Leader. 3 Hours.
Students will complete a scholarly project or thesis synthesizing knowledge and skills from previous courses in program of study. Applied learning will focus on the development of a systems approach to nurse executive leadership and inquiry. Focus is on public and private health care delivery systems, alliances with internal and external environments, and strategic decision making and implementation in the rapidly evolving global arena of nursing leadership and practice. This course prepares professional nurses to apply leadership and evidence-based practice principles in the evaluation of quality processes encountered across health care industries. 135 contact hours. Corequisite: NURS 579V and NURS 600V. Prerequisite: NURS 5401, NURS 5523, NURS 5043, NURS 5053, NURS 5063, MBAD 5241, HRWD 5233, NURS 6233, ESRM 6403, NURS 5343, NURS 5553, and NURS 5423.

NURS 5683. Primary Care of Children Clinical Practicum. 3 Hours. 
NURS 5683 is the clinical component to NURS 5543 and focuses on the management of women and children in the clinical setting with emphasis on holistic assessment and treatment of these populations and their families. Students will engage in the assessment, diagnosis and treatment of conditions common to primary practice in women's health and pediatric clinics. This course will consist of 135 contact hours, 80 in the pediatric setting and 55 in the women's health setting. Corequisite: NURS 5543. Prerequisite: NURS 5101 and NURS 5112.

NURS 579V. Independent Study. 1-3 Hour. 
Independent study designed by student with faculty advisor. May be completed as alternative to thesis.

NURS 5873. Complex Problems in Primary Care. 3 Hours. 
Focuses on application of health promotion and chronic disease management in complex adult patients. Students will utilize evidence-based approaches to health promotion, assessment, differential diagnosis and disease management. Emphasizes clinical decision making, chronic care models, coordination of care, poly-drug therapy and information systems. Corequisite: NURS 5884. Prerequisite: NURS 5101, NURS 5112, NURS 5543, NURS 5683, NURS 5483, and NURS 5495.

NURS 5884. Complex Problems in Primary Care Clinical Practicum. 4 Hours. 
Clinical component to NURS 5873 Complex Problems in Primary Care. Offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the management of care of adults experiencing complex health problems. Corequisite: NURS 5873. Prerequisite: NURS 5101, NURS 5112, NURS 5683, NURS 5495, and NURS 5483.

NURS 598V. Nursing Special Topics. 1-6 Hour. 
Special Topics course to fulfill national accrediting body for Family Nurse Practitioner. Prerequisite: NURSDP major. May be repeated for up to 6 hours of degree credit.

NURS 599V. Seminar. 1-3 Hour. 
Selected topics in nursing explored in discussion format.

NURS 600V. Master's Thesis. 1-3 Hour. 
Student research to fulfill degree requirement for the MSN. Prerequisite: NURS 5053. May be repeated for degree credit.

NURS 6123. Evaluation Methods and Translational Research for Evidence-based Practice. 3 Hours. 
The translation of evidence into practice, including theoretical and practical challenges, is analyzed through the use of case studies and proposals. Uses methods of inquiry for systematic appraisal of nursing practice or healthcare programs to identify practice outcomes and create an environment to support and sustain changes. Pre- or Corequisite: ESRM 6403. Prerequisite: NURS 5053.

NURS 6224. DNP Clinical Practicum I. 4 Hours. 
Provides an opportunity to synthesize advanced knowledge and role behaviors within a specialty concentration. Designed to apply nursing theory, translational research, epidemiologic principles, ethical/legal principles, outcome evaluations, healthcare systems thinking, and economics into a specialized clinical practice role and setting. Depending upon specialty and experience, may require travel to campus. Prerequisite: Completion of NURS 5443, NURS 5454, NURS 5463, and NURS 5475; or by permission of the instructor.

NURS 6233. Healthcare Economics and Finance. 3 Hours. 
Provides economic, financial, and business knowledge and skills required for a leadership role in financial planning and decision making within healthcare delivery systems. Prerequisite: Admission to the graduate program or by permission of the instructor.

NURS 6244. DNP Clinical Practicum II. 4 Hours. 
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Prerequisite: NURS 6224.
NUTR 1213. Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness.
This course is equivalent to NUTR 1213.

NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours. Corequisite: NUTR 2112.

NUTR 2113. Principles of Foods. 3 Hours.
Physical and chemical characteristics of foods, organized by food science and nutrition, protein foods, phytochemicals, complex and refined carbohydrates, and fats. Emphasis on food preparation and storage methods and effect on foods. Investigation and practice of food preparation basics, cooking and baking techniques, knife skills, food safety, and sensory evaluation of food. Corequisite: NUTR 2111L. Prerequisite: NUTR 1213, HOSP 2611 and (CHEM 1073, or CHEM 1103, or CHEM 1213), and one of the following programs, minors or concentrations: (HNADBS, FNAHBS, HESCBS, GFNU-M, or CATEBS-FCSE).

NUTR 2203. Sports Nutrition. 3 Hours.
The integration of concepts from nutrition and exercise physiology into an applied multidisciplinary study of how food, beverages and dietary supplements influence physical performance. Prerequisite: NUTR 1213.

NUTR 3003. Nutrition Assessment. 3 Hours.
Principles of nutritional assessment and methodology including anthropometric, biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused Physical Assessment, the interpretation of indices for all age groups in health and disease for both individuals and groups, and the application of nutrition assessment data in the nutrition care process. Prerequisite: NUTR 3203 and junior standing.

NUTR 3101L. Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L.

NUTR 3103. Culinary Nutrition. 3 Hours.
This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite: NUTR 2113 and NUTR 2111L.

NUTR 3203. Human Nutrition. 3 Hours.
Fundamental human nutrition; nutritive value of foods and general functions of nutrients based on concepts derived from inorganic and organic chemistry. Examples relating nutrition to disease used as illustrations to deepen understanding of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. Prerequisite: NUTR 1213.

NUTR 3213. Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Prerequisite: NUTR 1213, and HNAD or FNAH majors only.

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations, with consideration of age, special needs, diet type, cultural and ethical parameters. Students will design flavorful and appealing menus that meet current nutrition recommendations, guidelines and budgetary constraints. They will learn recipe standardization, quantity production, and overall quality control. Prerequisite: NUTR 1213 and HNAD or FNAH majors only.

**Nutrition (NUTR) Courses**

**NUTR 1201. Introduction to the Dietetic Profession. 1 Hour.**
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HESCBS or HNHIBS majors only or by department consent.

**NUTR 1213. Fundamentals of Nutrition. 3 Hours.**
The functions of food, body processes, optimum diets in relation to health and physical fitness.

**NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.**
The functions of food, body processes, optimum diets in relation to health and physical fitness.

**NURS 6263. Organization Management and Systems Leadership. 3 Hours.**
Facilitates understanding of how to lead, advocate, and manage innovative responses to organizational needs and challenges. Emphasizes development and evaluation of care delivery models that meet the needs of targeted patient populations by enhancing accountability for effective and efficient healthcare, quality improvement, and patient safety. Prerequisite: Admission to the graduate program or by permission of the instructor.

**NURS 628V. DNP Clinical Practicum III. 1-8 Hour.**
Allows for the continuation of specialty role development and an advanced approach to care delivery, systems thinking, and leadership. Allows for the total number of practice hours required for certification and/or degree. Pre- or Corequisite: NURS 6244. May be repeated for up to 8 hours of degree credit.

**NURS 6343. Analytic Methods and Epidemiology for Health Care. 3 Hours.**
This course will examine the role of epidemiology and statistics in advanced nursing practice. The student will learn how the concepts of epidemiology are used to measure and describe the health of individuals and populations and apply statistical concepts and analytical methods to data encountered in practice. Major topics to be covered include sources of data, study designs, analytical strategies and interpretation of data related to disease causality, risk, and prevalence. Prerequisite: ESRM 5393.

**NURS 7113. Capstone Seminar I. 3 Hours.**
Designed to unify and organize the student's field of inquiry for the final Capstone Project. Emphasis is on the application of evidence-based intervention suitable to their area of focus that involves appropriate methodology and application with the goal for change in practice or outcome analysis. Prerequisite: Completion of NURS 6224 and/or permission of the instructor.

**NURS 7122. DNP Project Implementation I. 2 Hours.**
Provides necessary support and elements for students to begin execution of the Capstone Project in collaboration with the sponsoring site.

**NURS 7132. DNP Project Implementation II. 2 Hours.**
Focuses on data exploration and analysis for the organization and refinement of all aspects of Capstone Project, emphasizing implementation and evaluation of the evidence-based intervention. Allows student to finalize the scholarly written and oral report for dissemination of results. Corequisite: NURS 7142. Prerequisite: NURS 7113 and NURS 7122.

**NURS 7142. DNP Project Implementation II. 2 Hours.**
Provides an avenue for students to showcase the Final Capstone Project. Allows students the opportunity to synthesize and demonstrate the ability to employ effective communication and collaboration skills, leadership roles, influence healthcare quality and safety, evaluate practice, and successfully negotiate change in healthcare delivery for individuals, families, populations, or systems. Prerequisite: NURS 7122.
NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest.
Prerequisite: NUTR 4213.

NUTR 4101L. Research Methods in Nutrition Lab. 1 Hour.
Application of experimental methods for investigations in nutrition research.
Pre- or corequisite: STAT 2303 and Human Nutrition and Dietetics or Food, Nutrition and Health majors with senior standing only.
Corequisite: NUTR 4103. Prerequisite: NUTR 2113 and NUTR 2111L.

NUTR 4103. Research Methods in Nutrition. 3 Hours.
This course will cover applications of experimental methods for investigations in nutrition research and cookery.
Pre- or Corequisite: STAT 2303. Prerequisite: NUTR 2113, NUTR 2111L and Human Nutrition and Dietetics or Food, Nutrition and Health majors with senior standing only.

NUTR 4213. Advanced Nutrition. 3 Hours.
Normal nutrition with emphasis on utilization of nutrients. Lecture and reports on current literature 3 hours per week. Prerequisite: CHEM 3813 and NUTR 3203.

NUTR 4223. Life Cycle Nutrition. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Attention is given to preconception, pregnancy, childhood and older adults. Prerequisite: NUTR 1213 and COREQ: BIOL 2213 and BIOL 2211L.

NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week. Prerequisite: NUTR 1213.

NUTR 4263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Pre- or Corequisite: NUTR 3213 and NUTR 4213. Prerequisite: BIOL 2213, BIOL 2211L and CHEM 3813.

NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week.
Prerequisite: NUTR 4263.

NUTR 4303. Culinary Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and Human Nutrition and Dietetics, Food Nutrition and Health, or Hospitality Management majors only.

NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product.
Prerequisite: NUTR 3103 and NUTR 3101L.

NUTR 521V. Readings in Nutrition. 1-6 Hour.
Seminar and individual study. Prerequisite: Instructor consent.

NUTR 5223. Nutrition During the Life Cycle. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Nutritive needs during pregnancy and childhood are emphasized with some attention to nourishing aging and elderly adults. Factors that affect food choices and eating behavior are also considered. Lecture 3 hours per week. On campus and web-based delivery is offered.
Prerequisite: Graduate standing and consent of instructor.

NUTR 5263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: Graduate standing and consent of instructor.

NUTR 5273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 5263.

Operations Management (OMGT) Courses
OMGT 4313. Law and Ethics. 3 Hours.
Analysis of the fundamental legal principles applicable in protecting the rights and interests of individuals and organizations; court systems and litigation processes; constitutional law and legislation, formation and discharge of contracts; agency relationships; torts; labor laws; patents; trademarks; copyrights; unfair competition; ethics; professional relations. Not for graduate credit.

OMGT 4323. Industrial Cost Analysis. 3 Hours.
Use of accounting information for planning and control from a management viewpoint: principles of cost accounting and other aspects of production costs; budgeting, depreciation, taxes, distribution of profits, securities, sources of corporate capital, and interpretation of financial statements. Not for graduate credit.

OMGT 4333. Applied Statistics. 3 Hours.
Fundamentals of probability and distribution theory with applications in managerial decision making. Descriptive methods, probability distributions, sampling distributions and hypothesis testing are included. Not for graduate credit.

OMGT 4853. Introduction to Decision Support Tools in Operations Management. 3 Hours.
This course covers decision support tools used in operations management including spreadsheet applications, introduction to database concepts, and presentation methods. The primary decision support tools covered are Microsoft Office products, specifically Excel, but also Word and PowerPoint. It is not a typical course on Microsoft Office products. This course covers how the Excel functions and capabilities are applied in operations management and in the other OMGT courses. The course introduces Excel Topics used in the OMGT curriculum, while reinforcing other Excel topics with review questions. Most of the course covers the Excel skills and techniques needed in the OMGT core courses, but covers some of the Excel concepts used in the elective courses. Pre- or Corequisite: OMGT 4333 or equivalent or departmental consent. Prerequisite: Program administered proficiency exam or departmental consent.

OMGT 5003. Introduction to Operations Management (Sp, Su, Fa). 3 Hours.
Provides an overview of the functional activities necessary for the creation/delivery of goods and services. Topics covered include: productivity; strategy in a global business environment; project management; quality management; location and layout strategies; human resources management; supply chain and inventory management; material requirements planning; JIT; maintenance and reliability; and other subjects relevant to the field. Required course. Pre- or Corequisite: OMGT 4853. Prerequisite: OMGT 4333.

OMGT 5013. Supply Chain Management for Operations Managers. 3 Hours.
Focuses on the development and application of decision models in supply chains with emphasis on supply chain performance, cost, and metrics; demand forecasting; aggregate planning; inventory management; supply chain design and distribution; transportation modeling and analysis; supply chain coordination; the role of information technology; and sourcing decisions. Spreadsheet tools and techniques will be used to analyze supply chain performance. Prerequisite: OMGT 4323, OMGT 4853 and admitted to OPMGMS, EMTGMS, EGRMGE or OPMGMC Graduate Certificate Program, or departmental consent.
OMGT 5113. Human Resource Management. 3 Hours.
A review of Human Resources Management functions as they apply in today's business setting with specific emphasis on regulatory compliance, total rewards systems, recruitment, training, and employment practices. The course is designed both for HRM professionals and for line managers/professionals who need to understand the roles and responsibilities of HR as a business partner. Prerequisite: OMGT 4313, OMGT 5003 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5123. Finance for Operations Managers. 3 Hours.
Examines the scope and environment of finance for operations managers. Topics include financial markets, interest rates, financial statements, cash flows, and performance evaluation. Valuation of financial assets, using time value of money; the meaning and measurement of risk/return; capital-budgeting, cost of capital, capital structure, dividend policy, and working capital management are also covered. Required course (may substitute OMGT 5463). Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4323, OMGT 4853 and admitted to OPMGMS, EMGTMS, ENGRME, or OMPMGC Graduate Certificate Program, or departmental consent.

OMGT 5133. Operations Management in the Service Sector. 3 Hours.
Review of the role of the operations management in the service sector, e.g., health care systems, banking, municipal services, utilities, and postal service and others. Emphasizes the principles and methodologies applicable to the solution of problems within the service industries. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5143. Strategic Issues in Human Resource Management. 3 Hours.
Explores the concept of Strategic Human Resource Management with emphasis on effective partnering by various HR functions with all levels of management to support the large-scale, long-range goals of achieving success in the organization's chosen markets. Internal and external impacts on and of HR in all areas will be examined. Students will analyze case studies to build on basic concepts acquired in OMGT 5113. Prerequisite: OMGT 5003, OMGT 4313, OMGT 5113 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5223. Safety and Health Standards Research. 3 Hours.
For graduate students who seek Certified Professional or Certified Industrial Hygienist status, or both. Includes review and development of computer databases for standards, interpretations, court decisions, and field memoranda. Test equipment and procedures for determining indoor industrial aid containment PEL concentrations and industrial environment noise levels are examined. Pre- or Corequisite: OMGT 5003. Prerequisite: INEG 4223 or OMGT 5403 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5253. Leadership Principles and Practices. 3 Hours.
The course is designed to expose students to multiple approaches to leadership in a wide variety of settings. Leadership styles, the knowledge areas and competencies expected of today's leaders, the challenges leaders face, the historical and philosophical foundations of leadership, the relationships among leadership theory, leadership practice, and the moral-ethical aspects of leadership are among the topics covered in the course. A number of respected regional, national, and international leaders share "lessons learned" in their leadership journeys. Plus, a number of highly regarded leadership books and case studies on leadership are read and discussed. Students may not receive credit for INEG 4253 and INEG 5253/OMGT 5253. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. This course is cross-listed with INEG 5253.

OMGT 5303. Health Care Policies and Issues. 3 Hours.
Explores health care management strategies and policy development with emphasis on health insurance, Medicare, Medicaid and managed care, as well as employee health benefits. The roles of government and business in policy formulation are addressed, as are the problems of financing health care, legal and ethical considerations, current healthcare issues, and quality measures. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5373. Quality Management. 3 Hours.
Introduces students to quality management concepts and their use in enhancing organizational performance and profitability. History of the quality movement, its broad application in key economic sectors, and philosophical perspectives of major quality leaders will be discussed. Focus is on continuous process improvement, using data and information to guide organizational decision-making. The Six Sigma approach and associated statistical tools, supporting process improvement, are also covered. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4333 and OMGT 4853, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5403. Industrial Safety and Health Administration. 3 Hours.
Based on Federal Regulations for Occupational Safety and Health, the course examines current regulations, as well as their commonsense application. Covers various standards, such as those for material handling, personal protective equipment, toxic substances, and machine guarding. Uses case studies and real world scenarios to present topics and demonstrate their application. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5423. Operations Management & Global Competition. 3 Hours.
Studies of principles and cases in business/industrial administration in global competition. Survey of markets, technologies, multi-national corporations, cultures, and customs. Discussion of ethics, professionalism, difference valuing, human relations skills, and other topics relevant to global practice. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.
OMGT 5433. Cost Estimation Models. 3 Hours.
An examination of the methodologies for estimating and forecasting manufacturing costs. Types of cost recovery systems, work progress functions, product improvement curves, determination of hourly rates, parametric estimating systems, and the development of software for computer-assisted estimating systems. Pre- or Corequisite: OMGT 5003. Prerequisite: INEG 2513 or OMGT 4853, OMGT 4323 and OMGT 4333, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. This course is cross-listed with INEG 5433.

OMGT 5443. Decision Models. 3 Hours.
Focus on quantitative decision models for technical and managerial problems for private and public organizations. Topics include shareholder value, stakeholder value, Value-Focused Thinking, axioms of decision analysis, decision making challenges, decision traps, cognitive biases, decision processes, decision framing, influence diagrams, value hierarchy structuring, designing creative alternatives, single objective models, multiobjective additive value model, swing weights, sensitivity analysis, portfolio decision models with binary linear programming, probability elicitation, Bayes Theorem, decision trees, Monte Carlo simulation, expected value, dominance (deterministic and stochastic), tornado diagrams, value of information, risk preference, utility models, expected utility, and communicating analysis insights. Prerequisite: (OMGT 5003, OMGT 4333, and OMGT 4853) or INEG 2313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. This course is cross-listed with INEG 5443.

OMGT 5463. Economic Decision Making. 3 Hours.
Principles of economic analysis with emphasis upon discounted cash flow criteria for decision-making. Comparison of criteria such as rate of return, annual cost, and present worth for the evaluation of investment alternatives. Required course (may be substituted by OMGT 5123). Prerequisite: OMGT 5003, OMGT 4323 and OMGT 4853, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5473. Lean Six Sigma. 3 Hours.
This course covers the application of lean principles to manufacturing, service and government processes in order to improve productivity, increase value and eliminate waste as well as the use of the Six Sigma problem solving methodology to reduce variation and improve quality. Students will gain experience with the tools and analysis methods used in both approaches. The topics covered include: methods for creating Lean processes, proven lean problem-solving methodologies, managing a lean transformation, implementing a Six Sigma initiative, and executing the five phases of the Six Sigma DMAIC process, and communicating results to stakeholders and decision-makers. Prerequisite: (OMGT 5003 or departmental consent), and admitted to the (Master of Science in Operations Management Program, or theProject Management Graduate Certificate Program, or be a non-degree seeking graduate student with departmental consent).

OMGT 5493. Advanced Lean Six Sigma. 3 Hours.
With an emphasis on application, this course builds upon the Lean Six Sigma and Quality Management courses and covers analysis techniques for Lean Six Sigma problem solving in the Analyze, Improve, and Control phases of the DMAIC process. The topics covered include descriptive versus inferential statistics, sampling, Hypothesis Testing with Normal and Non-Normal Data, regression analysis, design of experiments, and control charts. Prerequisite: OMGT 5473 and OMGT 5373.

OMGT 5503. Maintenance Management. 3 Hours.
Principles and practices of maintenance department organization, prevention procedures, and typical equipment problems. Includes related topics such as plant protection, preventative and plant maintenance. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5613. Lean Production and Inventory Control. 3 Hours.
Defines analytical methods used to support inventory replenishment for the production of goods and services. Operational problems of production systems are examined, including objective/subjective forecasting methods, aggregate planning of work force and production under seasonal demand; and inventory models of EOQ for known and unknown demand. Supply chain management and lean manufacturing concepts are also discussed. Prerequisite: OMGT 4333 and OMGT 5003, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5623. Strategic Management. 3 Hours.
Examines strategic management, which is defined as the art and science of formulating, implementing, and evaluating cross-functional decisions that enable an organization to achieve its long-term objectives. Principles of strategic management will be covered in conjunction with case studies to provide opportunity for analysis and experience in applying these principles in an operations management environment. Required course. Prerequisite: OMGT 5003 and OMGT 4313, and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5633. Linkages among Technology, Economics and Societal Values. 3 Hours.
Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society's current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society's goal of achieving sustainable prosperity and well being in the foreseeable future. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. This course is cross-listed with BENG 5633.

OMGT 5653. Introduction to Data Analytics for Operations Managers. 3 Hours.
Introduces data science and data analytics. Provides basic skill instruction in the statistical data analysis programming language R. Provides experience building and interpreting descriptive and predictive data analytics models. Provides operations managers with the skill and tools to use and understand advanced data analytics methods. Provides practice communicating those results to senior stakeholders and decision makers. Prerequisite: OMGT 5003 or EMGT 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.
OMGT 5673. Principles of Operations Research. 3 Hours.
Surveys the mathematical models used to design and analyze operational systems. Includes linear programming models, waiting line models, computer simulation models, and management science. Students will be introduced to applications of operations research and solution methods, using spreadsheet software. Pre- or Corequisite: OMGT 5003 and OMGT 4853. Prerequisite: OMGT 4333 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5733. Human Behavior Analysis. 3 Hours.
Examination of the principal drivers of individual and group behavior in organizations with coverage of practical applications of concepts in organizational behavior for operations managers. In addition to group behavior and organizational processes, the course explores people management challenges that result from external pressures on stakeholders (e.g. competitive, economic, social, political, and regulatory impacts). Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4313 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 577V. Special Problems. 1-3 Hours.
Application of previous course work knowledge to problems encountered in military base and civilian operations. Problems are proposed by students according to individual interests and needs. Used for courses in specific concentration, certificate or focus areas with parenthetical titles. Maybe used for courses in development. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent. May be repeated for up to 3 hours of degree credit.

OMGT 5783. Project Management for Operations Managers. 3 Hours.
An introduction to the Critical Path Method and Program Evaluation and Review Technique. Covers project planning and control methods; activity sequencing; time-cost trade-offs; allocation of manpower and equipment resources; scheduling activities and computer systems for PERT/CPM with emphasis on MS project. Case studies include topical issues combining methodologies and project management soft skills, such as conflict management, negotiation, presentations to stakeholders, and team building. Required course. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5793. Risk Management. 3 Hours.
Students will learn to apply tools to identify, assess, communicate and manage risk. Course work includes methods to identify risks, develop risk models, assess risk, and evaluate risk management options. Case studies are used to understand risk management challenges in systems development in complex organizations. Prequisite: OMGT 5003 or EMG 5033, must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5823. Information Technology for Operations Managers. 3 Hours.
Information Technology for the management and control of information systems and processes used in operations management. Topics covered include e-Business and e-Commerce Systems, Management Information Systems (MIS), Data Resource Management, Networking, Decision Support, Information Security, Enterprise and Global IT, and IT Strategies and Solutions for Operations Managers. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5833. Decision Support Application Development for Operations Management. 3 Hours.
Students will utilize Microsoft Excel and will write programming code in Visual Basic for Applications to develop custom solutions to challenging operations management problems. Emphasis will be placed on computing productivity in a spreadsheet-based setting to develop practical, useful decision support applications and computer programs to support operations management. Assumes basic knowledge of programming. Pre- or Corequisite: OMGT 5003. Prerequisite: OMGT 4853 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5873. Organizing for Change. 3 Hours.
Provides an overview of fundamental management functions, organizational decision-making authority, structures and controls to support managing change. Topics include leadership, strategy and ethical perspectives on change management. Pre- or Corequisite: OMGT 5003. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5903. Operations Management of Unmanned Aircraft Systems. 3 Hours.
Course focuses on the fundamentals of UAS operations and the applications of UAS systems in research, government and business applications. Modules covers government compliance, licensing/certification requirements, University Policy and current events in the UAS field. Prepares students to participate in research or UAS operational roles. Discusses policy and process issues in society and considerations for ethical UAS use. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5983. Advanced Project Management. 3 Hours.
This course builds upon the project management for operations managers’ course and offers students an opportunity to apply advanced project management tools to manage troubled projects. Topics include determining the project status using the schedule baseline, cost estimations, and earned value management techniques. Students will learn how to perform a project assessment/audit and will create a troubled project recovery plan. The course includes presentations of case study assignments to gain experience in communicating the status and recovery of failed and troubled projects. Prerequisite: OMGT 5783 and must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 5993. Homeland Security for Operations Managers. 3 Hours.
Introduces concepts of Homeland Security in industry and government settings. Covers basic legal and compliance programs and risk management processes. Explains the continuity between critical infrastructure, government and private sector roles. Focuses on system design and understanding of the National Incident Management System protecting the homeland. Introduces cybersecurity and intelligence analysis concepts. Prerequisite: Must be admitted to the Master of Science in Operations Management Program, Project Management Graduate Certificate Program, be a Non-Degree Seeking Graduate Student, or have departmental consent.

OMGT 600V. Master’s Thesis. 1-6 Hour.
Master’s thesis option for OMGT students.
Philosophy (PHIL)

Courses

PHIL 1003. Critical Reasoning: Discovery, Deduction, and Intellectual Self-Defense. 3 Hours.
This is a practical, "hands-on" course in sound reasoning, critical thinking, and the careful evaluation of evidence and argument. The course will utilize a range of real-world sources (television, Internet, magazines, etc.) and will be informed in content and method by the psychology of human judgment.

PHIL 1503. Special Topics in Philosophy and Culture. 3 Hours.
Exploration of introductory-level special topics of an issue or issues in contemporary culture not otherwise covered in the philosophy curriculum.

PHIL 2003. Introduction to Philosophy (ACTS Equivalency = PHIL 1103). 3 Hours.
An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings.

PHIL 2003C. Introduction to Philosophy. 3 Hours.
An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. Corequisite: Drill component.
This course is equivalent to PHIL 2003.

PHIL 2003H. Honors Introduction to Philosophy. 3 Hours.
An examination of such basic philosophical topics as the existence of God, the nature of the human mind, the relationship between appearance and reality, the forms and limits of human knowledge, freedom of the will, and standards of right and wrong. Includes both historical and contemporary readings. This course is equivalent to PHIL 2003.

PHIL 2103. Introduction to Ethics (ACTS Equivalency = PHIL 1003). 3 Hours.
Basic concepts of moral philosophy, including historical and contemporary literature concerned with such issues as ethical relativism vs. objectivism, duty, happiness, freedom of the will and responsibility, facts and values, individual liberty and society. Application of theories to substantive questions.

PHIL 2103C. Introduction to Ethics (ACTS Equivalency = PHIL 1003). 3 Hours.
Basic concepts of moral philosophy, including historical and contemporary literature concerned with such issues as ethical relativism vs. objectivism, duty, happiness, freedom of the will and responsibility, facts and values, individual liberty and society. Application of theories to substantive questions. Corequisite: Drill component.

PHIL 2203. Logic (ACTS Equivalency = PHIL 1003). 3 Hours.
Traditional and modern methods of deductive and inductive inference. Degree credit may not be earned for both PHIL1203 and PHIL 2203.

PHIL 2303. Human Nature and the Meaning of Life. 3 Hours.
Examination of important views on human nature, the meaning of human existence, the value and significance of different human activities and projects, and on what philosophy, religion, art, and literature have to teach us on these topics. Reading may be drawn from a variety of philosophical, literary, and religious writings.

PHIL 2503. Philosophical Explorations. 3 Hours.
Explores topics in philosophy that are not currently covered in lower-level philosophy courses.

PHIL 3103. Ethics and the Professions. 3 Hours.
After a survey of the standard theories of moral obligation, justice, and rights, the course focuses on specific moral problems that arise within engineering, business, and the professions.

PHIL 3113. Environmental Ethics. 3 Hours.
The course addresses ethical questions about nature and the natural environment. Topics of discussion include anthropocentric and biocentric ethics, population control, obligations to future generations, animal rights, moral considerability, Leopold's land ethic, deep ecology, and ecofeminism. This course is cross-listed with ENSC 3933.

PHIL 3123. Bioethics. 3 Hours.
This course examines ethical dilemmas that arise in biological research, medical research, medical practice, and healthcare policy. Topics may include such things as abortion, assisted reproduction, cloning & genetic engineering, assisted suicide & voluntary euthanasia, organ donation, research ethics, patient autonomy, and healthcare policy.

PHIL 3203. Philosophy and the Christian Faith. 3 Hours.
This course will deal with philosophical issues that arise in Christian theology. Topics to be discussed may include the doctrines of the Incarnation, the Trinity, Atonement, and Hell, as well as the nature of God and the relationship between faith and reason.

PHIL 3443. Animal Minds. 3 Hours.
This course explores questions about thinking, consciousness, emotion, and communication in non-human animals; about the differences between human and non-human animals; and about implications for our treatment of animals.

PHIL 390V. Readings. 1-6 Hour.
Readings on topics of research interested or those not typically offered in regular classes, by arrangement with Professor.

PHIL 3923H. Honors Colloquium. 3 Hours.
Treats a special topic of issue offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in philosophy). May be repeated for degree credit.
This course is cross-listed with PHIL 3933.

PHIL 3933. Special Studies. 3 Hours.
A course (not independent study) which covers a topic or a philosopher not usually presented in depth in regular courses. May be repeated for degree credit.
This course is cross-listed with PHIL 3923H.

PHIL 3943. Philosophy and Physics. 3 Hours.
Examination of the metaphysical and epistemological implications of specific physical theories with an emphasis on twentieth-century physics. Topics covered may include the nature of space and time (particularly as described in relativity theory), the nature of the quantum mechanical world, and the temporal asymmetries found in thermodynamics and other areas of physics.

PHIL 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

PHIL 4003. Ancient Greek Philosophy. 3 Hours.
Pre-Socratics, Socrates, Plato, and Aristotle. Prerequisite: 3 hours of philosophy.

PHIL 4013. Platonism and Origin of Christian Theology. 3 Hours.
The study of Plato, Middle Platonism, and Neoplatonism, including Philo, Plotinus, and Proclus, and the influence of Platonism on the Greek church fathers of the 2nd-5th centuries, principally Origen and Gregory of Nyssa and also Pseudo-Dionysius. Prerequisite: 3 hours of philosophy.

PHIL 4023. Medieval Philosophy. 3 Hours.
Includes Augustine, Bonaventure, Aquinas, Scotus, and Ockham.

PHIL 4033. Modern Philosophy-17th and 18th Centuries. 3 Hours.
British and Continental philosophy, including Bacon, Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant.
PHIL 4043. Nineteenth Century Continental Philosophy. 3 Hours.
Study of major Continental European philosophers of the 19th century including Hegel, Marx, Kierkegaard, Schopenhauer, Nietzsche. Emphasis on the nature of persons, the question of freedom, and the importance of self-expression, as well as views on knowledge, reality, and the nature of philosophy. Prerequisite: 3 hours of Philosophy.

PHIL 4063. Twentieth Century Continental Philosophy. 3 Hours.
Study of major figures (e.g. Husserl, Heidegger, Sartre, Foucault, Derrida) and trends (phenomenology, existentialism, hermeneutics, critical theory, deconstruction) in 20th century French and German thought. Topics include human beings and their place in the world, the role of history and culture, and the possibility of critical reflection.

PHIL 4073. History of Analytic Philosophy. 3 Hours.
From Frege to recent figures, including Russell, Moore, Wittgenstein, Schlick, Carnap, Ayer, Ryle, Strawson, Quine, including a representative sample of works on the logical analysis of language, logical positivism, and ordinary language analysis. Prerequisite: 3 hours of philosophy.

PHIL 4093. Special Topics in Philosophy. 3 Hours.
This course will cover subject matter not covered in regularly offered courses. Course cannot be repeated when the topic is the same as one in which the student is previously enrolled. May be repeated for up to 6 hours of degree credit.

PHIL 4103. Modern Jewish Thought. 3 Hours.
A survey of the main trends in Jewish thought from the seventeenth through the nineteenth century. This course is cross-listed with JWST 4003.

PHIL 4113. Social and Political Philosophy. 3 Hours.
Selected philosophical theories of society, the state, social justice, and their connections with individuals.

PHIL 4123. Classical Ethical Theory. 3 Hours.
Study of classical texts in the history of philosophical ethics from Plato to Nietzsche. Philosophers covered may include Plato, Aristotle, Butler, Hume, Kant, and Mill. Prerequisite: 3 hours of philosophy.

PHIL 4133. Contemporary Ethical Theory. 3 Hours.
A study of contemporary texts in philosophical ethics from G.E. Moore to the present. Philosophers covered may include Moore, Stevenson, Hare, Foot, and Rawls. Prerequisite: 3 hours of philosophy.

PHIL 4143. Philosophy of Law. 3 Hours.
A philosophical consideration of the nature of law, theory of adjudication, concepts of legal responsibility, liberty and the limits of law, and selected moral-legal issues (abortion, affirmative action, punishment, etc.).

PHIL 4183. Kant’s Critique of Pure Reason. 3 Hours.
In his Critique of Pure Reason, one of the most important works in the history of philosophy, Kant describes how the mind works and claims to solve the major problems of metaphysics. The course is aimed at coming to a basic understanding of Kant's thought and at thinking critically about his claims.

PHIL 4203. Theory of Knowledge. 3 Hours.
An examination of skepticism, the nature and structures of knowledge and epistemic justification, human rationality, and the justification of religious belief. Prerequisite: 3 hours of philosophy.

PHIL 4213. Philosophy of Science. 3 Hours.
Examination of issues related to scientific explanation, empirical foundations of science, observation and objectivity, nature of laws and theories, realism and instrumentalism, induction and confirmation, models, causation, and simplicity, beginning with historical survey set in the context of the history of science but emphasizing works from the 1930s to the current period, often including issues in recent physics.

PHIL 4233. Philosophy of Language. 3 Hours.
A survey of mainstream philosophical theories of meaning, reference, truth, and logical form. Attention given to the views of such figures as Frege, Russell, Tarski, Seane, Dumett, and the advocates of possible world's semantics.

PHIL 4253. Symbolic Logic I. 3 Hours.
Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Prerequisite: PHIL 2203 or MATH 2603.

This course is cross-listed with MATH 4253.

PHIL 4303. Philosophy of Religion. 3 Hours.
Types of religious belief and critical examination of their possible validity, including traditional arguments and contemporary questions of meaning.

PHIL 4313. Contemporary Jewish Thought. 3 Hours.
A survey of trends in Jewish thought in the twentieth and twenty-first centuries, focusing on the ways in which Jewish thinkers have responded to the events affecting Jews and the conditions of Jewish life from approximately 1900 to the present. This course is cross-listed with JWST 4013.

PHIL 4403. Philosophy of Art. 3 Hours.
Varieties of truth and value in the arts and aesthetic experience, focusing on the creative process in the art and in other human activities.

PHIL 4423. Philosophy of Mind. 3 Hours.
An examination of such topics as the relationship between mind and body, the mentality of machines, knowledge of other minds, the nature of psychological explanation, the relationships between psychology and the other sciences, mental representation, the nature of the self, and free will and determinism.

PHIL 4603. Metaphysics. 3 Hours.
Theory and critical analysis of such basic metaphysical problems as mind and body, universals and particulars, space and time, determinism and free will, self-identity and individualism, with emphasis on contemporary perspectives. Prerequisite: 3 hours of philosophy.

PHIL 4983. Capstone Course for Philosophy Majors. 3 Hours.
An undergraduate seminar to be taken in the student's final spring semester. The content will vary with the instructor. The objective is for the student to sharpen his or her philosophical skills by, e.g., writing short papers, giving class presentations, and writing a substantial final essay. Prerequisite: 21 hours of philosophy.

PHIL 5003. Ancient Greek Philosophy. 3 Hours.
(Formerly PHIL 4003.) Pre-Socratics, Socrates, Plato, and Aristotle. Graduate degree credit will not be given for both PHIL 4003 and PHIL 5003. Prerequisite: Three hours of philosophy coursework.

PHIL 5013. Platonism and Origin of Christian Theology. 3 Hours.
(Formerly PHIL 4013.) The study of Plato, Middle Platonism, and Neoplatonism, including Philo, Plotinus, and Proclus, and the influence of Platonism on the Greek church fathers of the 2nd-5th centuries, principally Origen and Gregory of Nyssa and also Pseudo-Dionysius. Graduate degree credit will not be given for both PHIL 4013 and PHIL 5013. Prerequisite: Three hours of philosophy coursework.

PHIL 5023. Medieval Philosophy. 3 Hours.
(Formerly PHIL 4023.) Includes Augustine, Bonaventure, Aquinas, Scotus, and Ockham. Graduate degree credit will not be given for both PHIL 4023 and PHIL 5023.

PHIL 5033. Modern Philosophy-17th and 18th Centuries. 3 Hours.
(Formerly PHIL 4033.) British and Continental philosophy, including Bacon, Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. Graduate degree credit will not be given for both PHIL 4033 and PHIL 5033.
PHIL 5043. Nineteenth Century Continental Philosophy. 3 Hours.
(Formerly PHIL 4043.) Study of major Continental European philosophers of the 19th century including Hegel, Marx, Kierkegaard, Schopenhauer, Nietzsche. Emphasis on the nature of persons, the question of freedom, and the importance of self-expression, as well as views on knowledge, reality, and the nature of philosophy. Graduate degree credit will not be given for both PHIL 4043 and PHIL 5043. Prerequisite: 3 hours of Philosophy.

PHIL 5063. Twentieth Century Continental Philosophy. 3 Hours.
(Formerly PHIL 4063.) Study of major figures (e.g. Husserl, Heidegger, Sartre, Foucault, Derrida) and trends (phenomenology, existentialism, hermeneutics, critical theory, deconstruction) in 20th century French and German thought. Topics include human beings and their place in the world, the role of history and culture, and the possibility of critical reflection. Graduate degree credit will not be given for both PHIL 4063 and PHIL 5063.

PHIL 5073. History of Analytic Philosophy. 3 Hours.
(Formerly PHIL 4073.) From Frege to recent figures, including Russell, Moore, Wittgenstein, Schlick, Carnap, Ayer, Ryle, Strawson, Quine, including a representative sample of works on the logical analysis of language, logical positivism, and ordinary language analysis. Graduate degree credit will not be given for both PHIL 4073 and PHIL 5073. Prerequisite: 3 hours of philosophy.

PHIL 5093. Special Topics in Philosophy. 3 Hours.
(Formerly PHIL 4093.) This course will cover subject matter not covered in regularly offered courses. Graduate degree credit will not be given for both PHIL 4093 and PHIL 5093. Course cannot be repeated when topic is the same as one for which the student has been previously enrolled. May be repeated for up to 6 hours of degree credit.

PHIL 5103. Modern Jewish Thought. 3 Hours.
(Formerly PHIL 4103.) A survey of the main trends in Jewish thought from the seventeenth through the nineteenth century. Graduate degree credit will not be given for both PHIL 4103 and PHIL 5103.

PHIL 5113. Social and Political Philosophy. 3 Hours.
(Formerly PHIL 4113.) Selected philosophical theories of society, the state, social justice, and their connections with individuals. Graduate degree credit will not be given for both PHIL 4113 and PHIL 5113.

PHIL 5123. Classical Ethical Theory. 3 Hours.
(Formerly PHIL 4123.) Study of classical texts in the history of philosophical ethics from Plato to Nietzsche. Philosophers covered may include Plato, Aristotle, Butler, Hume, Kant, and Mill. Graduate degree credit will not be given for both PHIL 4123 and PHIL 5123. Prerequisite: 3 hours of philosophy.

PHIL 5133. Contemporary Ethical Theory. 3 Hours.
(Formerly PHIL 4133.) A study of contemporary texts in philosophical ethics from G.E. Moore to the present. Philosophers covered may include Moore, Stevenson, Hare, Foot, and Rawls. Graduate degree credit will not be given for both PHIL 4133 and PHIL 5133. Prerequisite: 3 hours of philosophy.

PHIL 5143. Philosophy of Law. 3 Hours.
(Formerly PHIL 4143.) A philosophical consideration of the nature of law, theory of adjudication, concepts of legal responsibility, liberty and the limits of law, and selected moral-legal issues (abortion, affirmative action, punishment, etc.). Graduate degree credit will not be given for both PHIL 4143 and PHIL 5143.

PHIL 5183. Kant's Critique of Pure Reason. 3 Hours.
(Formerly PHIL 4183.) In his Critique of Pure Reason, one of the most important works in the history of philosophy, Kant describes how the mind works and claims to solve the major problems of metaphysics. The course is aimed at coming to a basic understanding of Kant's thought and at thinking critically about his claims. Graduate degree credit will not be given for both PHIL 4183 and PHIL 5183.

PHIL 5203. Theory of Knowledge. 3 Hours.
(Formerly PHIL 4203.) An examination of skepticism, the nature and structures of knowledge and epistemic justification, human rationality, and the justification of religious belief. Graduate degree credit will not be given for both PHIL 4203 and PHIL 5203. Prerequisite: 3 hours of philosophy.

PHIL 5213. Philosophy of Science. 3 Hours.
(Formerly PHIL 4213.) Examination of issues related to scientific explanation, empirical foundations of science, observation and objectivity, nature of laws and theories, realism and instrumentalism, induction and confirmation, models, causation, and simplicity, beginning with historical survey set in the context of the history of science but emphasizing works from the 1930s to the current period, often including issues in recent physics. Graduate degree credit will not be given for both PHIL 4213 and PHIL 5213.

PHIL 5233. Philosophy of Language. 3 Hours.
(Formerly PHIL 4233.) A survey of mainstream philosophical theories of meaning, reference, truth, and logical form. Attention given to the views of such figures as Frege, Russell, Tarski, Searle, Dumett, and the advocates of possible world's semantics. Graduate degree credit will not be given for both PHIL 4233 and PHIL 5233.

PHIL 5253. Symbolic Logic I. 3 Hours.
(Formerly PHIL 4253.) Rigorous analyses of the concepts of proof, consistency, equivalence, validity, implication, and truth. Full coverage of truth-functional logic and quantification theory (predicate calculus). Discussion of the nature and limits of mechanical procedures (algorithms) for proving theorems in logic and mathematics. Informal accounts of the basic facts about infinite sets. Graduate degree credit will not be given for both PHIL 4253 and PHIL 5253. Prerequisite: PHIL 2203 or MATH 2603.

PHIL 5303. Philosophy of Religion. 3 Hours.
(Formerly PHIL 4303.) Types of religious belief and critical examination of their possible validity, including traditional arguments and contemporary questions of meaning. Graduate degree credit will not be given for both PHIL 4303 and PHIL 5303.

PHIL 5313. Contemporary Jewish Thought. 3 Hours.
(Formerly PHIL 4313.) A survey of trends in Jewish thought in the twentieth and twenty-first centuries, focusing on the ways in which Jewish thinkers have responded to the events affecting Jews and the conditions of Jewish life from approximately 1900 to the present. Graduate degree credit will not be given for both PHIL 4313 and PHIL 5313.

PHIL 5403. Philosophy of Art. 3 Hours.
(Formerly PHIL 4403.) Varieties of truth and value in the arts and aesthetic experience, focusing on the creative process in the art and in other human activities. Graduate degree credit will not be given for both PHIL 4403 and PHIL 5403.

PHIL 5423. Philosophy of Mind. 3 Hours.
(Formerly PHIL 4423.) An examination of such topics such as the relationship between mind and body, the mentality of machines, knowledge of other minds, the nature of psychological explanation, the relationships between psychology and the other sciences, mental representation, the nature of the self, and free will and determinism. Graduate degree credit will not be given for both PHIL 4423 and PHIL 5423.

PHIL 5503. Metaphysics. 3 Hours.
(Formerly PHIL 4603.) Theory and critical analysis of such basic metaphysical problems as mind and body, universals and particulars, space and time, determinism and free will, self-identity and individualism, with emphasis on contemporary perspectives. Graduate degree credit will not be given for both PHIL 4603 and PHIL 5503. Prerequisite: 3 hours of philosophy.

PHIL 5623. Seminar: Spinoza. 3 Hours.
Seminar: Spinoza.
PHIL 5883. Seminar: Wittgenstein. 3 Hours.
Seminar: Wittgenstein.

PHIL 5933. Seminar: Philosophical Theology. 3 Hours.
Seminar: Philosophical Theology.

PHIL 5983. Philosophical Seminar. 3 Hours.
Various topics and issues in historical and contemporary philosophy. May be repeated for up to 3 hours of degree credit.

PHIL 600V. Master’s Thesis. 1-6 Hours.
Master’s Thesis. May be repeated for degree credit.

PHIL 690V. Graduate Readings. 1-6 Hours.
Supervised individual readings in historical and contemporary philosophy.

PHIL 700V. Doctoral Dissertation. 1-18 Hours.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Physical Education (PHED) Courses

PHED 1003. The Physical Education Profession: An Overview. 3 Hours.
An introduction to the teaching of physical education. May be repeated for degree credit.

PHED 2023. Sport Skills. 3 Hours.
This course is designed to prepare the student to teach sport skills, primarily those taught in grades 5-8. Prerequisite: PHED 1003.

PHED 2373. Elementary Physical Education. 3 Hours.
Program planning and techniques of teaching physical education activities to children; for early childhood, elementary and physical education teachers, supervisors, and principals. Prerequisite: PHED 1003.

PHED 3003. Outdoor Education. 3 Hours.
This course is designed to provide opportunities for the student to acquire the skills, teaching and leadership techniques associated with outdoor and adventure activities. Pre- or Corequisite: PHED 3033, PHED 3043, PHED 4743, or PHED 4703. Prerequisite: PHED 1003, junior standing, a cumulative grade point average of 2.5, and passed all three parts of the Praxis Core test.

PHED 3033. Educational Rhythms and Gymnastics. 3 Hours.
This course is designed to provide opportunities for the student to perform and teach a variety of rhythmic and gymnastic activities. Pre- or Corequisite: PHED 3003, PHED 3043, PHED 4743, or PHED 4703. Prerequisite: PHED 1003, junior standing, a cumulative grade point average of 2.5, and passed all three parts of Praxis Core exam.

PHED 3043. Teaching Fitness. 3 Hours.
Instructional strategies for teaching public school students about fitness concepts. Pre- or Corequisite: PHED 3003, PHED 3033, PHED 4743, or PHED 4703. Prerequisite: PHED 1003, junior standing, a cumulative GPA of 2.5, and passed all three parts of Praxis Core.

PHED 3163. Exercise Physiology: Theory and Application. 3 Hours.
Examination of the changes during childhood and adolescence of physiological responses to exercise. The exploration includes the study of the maturation of the body’s functional capacities as it relates to exercise. Designed for Physical Education Teacher Education majors. Prerequisite: BIOL 2443 and BIOL 2441L and K-12 or P-12 physical education major.
This course is equivalent to KINS 3163.

PHED 3163H. Honors Exercise Physiology: Theory and Application. 3 Hours.
Examination of the changes during childhood and adolescence of physiological responses to exercise. The exploration includes the study of the maturation of the body’s functional capacities as it relates to exercise. Designed for Physical Education Teacher Education majors. Prerequisite: BIOL 2443 and BIOL 2441L and P-12 or K-12 physical education major. Honors standing. This course is equivalent to KINS 3163.

PHED 3203. Principles and Problems of Coaching. 3 Hours.
A focus on the various aspects of coaching the athletes in contemporary society through an examination of research findings related to factors affecting performance. Attention to be given to principles, problems and understanding essential to the management of athletic contests.

PHED 3223. Motor Development. 3 Hours.
An overview of contemporary motor development and movement theory, developmental hierarchies, and physiological aspects of development throughout the lifespan.

PHED 3413. Administration in Physical Education. 3 Hours.
An examination of the administrative duties of the physical education teacher. This course is equivalent to KINS 3413.

PHED 3573. The School Health Program. 3 Hours.
Studies school health services, the health environment, and health education, as well as the teacher’s potential role in each. Prerequisite: CHLP 1103.

PHED 3623. Sport Sociology. 3 Hours.
An investigation of the impact of physical education and sport on society.

PHED 3903. Physical Education for Special Populations. 3 Hours.
Provides fundamental concepts and skills essential to physical education programming for students with disabilities. Deals with definitions, disabling conditions, developmental and remedial activities, games, and sports. Prerequisite: Junior standing.

PHED 3903H. Honors Physical Education for Special Populations. 3 Hours.
Provides fundamental concepts and skills essential to physical education programming for students with disabilities. Deals with definitions, disabling conditions, developmental and remedial activities, games, and sports. Prerequisite: Junior standing.

PHED 4001. Coaching Practicum. 1 Hour.
Designed for students who want to add the Coaching Endorsement to the state teaching license. Student serves as a coaching assistant with a local school, University or recreational sports team. Students who serves as a coaching assistant with a local school must successfully complete a criminal background check prior to beginning coaching practicum. Prerequisite: PHED 3203 and proof of current First Aid/CPR/AED certification submitted to instructor of record.

PHED 4023. Class Management. 3 Hours.
This course is designed to provide opportunities for the student to acquire an understanding that emphasizes class management; and includes professional ethics, and school policies related to students, faculty, and programs. Corequisite: PHED 407V, PHED 4733. Prerequisite: (1) Senior status in KINSBS P-12, (2) have a grade of “C” or better in all KINS/PHED Teacher Education classes; PHED 1003, PHED 2023, PHED 3033, PHED 3043, PHED 3203, PHED 3373, PHED 3703, PHED 3743, PHED 3903, PHED 4321, KINS 3003, KINS 3373 and KINS 3413 (3) must have a cumulative grade point average of 2.7; Praxis Core (all parts) passed; completed or registered for Praxis II content knowledge for Health and Physical Education exam and scores presented to the university internship supervisor. May be repeated for degree credit.
PHED 407V. Physical Education Teaching Internship. 1-9 Hour.
This internship involves supervised teaching experience in a P-12 setting. Students will be placed under the guidance of a mentor teacher at specific school sites within NW Arkansas. Internship will be done at both the elementary and secondary levels. Successful completion of a criminal background check is required before beginning internship. Corequisite: PHED 4023, PHED 4733. Prerequisite: Senior status in KIN/PHED P-12 or KIN/PHED PEWL, a grade of "C" or better in all KIN/PHED Teacher Education classes: PHED 1003, PHED 2023, PHED 3033, PHED 3043, PHED 3203, PHED 3373, PHED 3703, PHED 3743, PHED 3903, PHED 4321, KINS 3003, KINS 3373 and KINS 3413; a cumulative grade point average of 2.7 or greater; Praxis Core (all parts) passed; completed or registered for Praxis II content knowledge for Health and Physical Education exam and scores presented to the university internship supervisor. In addition, current Certification in CPR/AED/First Aid should be provided to internship instructor of record.

PHED 432V. Teaching Practicum. 1-2 Hour.
K-12 Kinesiology majors serve as a teaching assistant with a local school physical education teacher. This course should be taken the semester before PHED 407V Internship. Prerequisite: KINS P-12 or K-12 majors, 2.7 cumulative GPA and passing scores on all three parts of Praxis Core submitted to instructor of record.

PHED 4703. Assessment in Physical Education. 3 Hours.
An examination of the assessment duties required of a physical education teacher. The use of authentic assessment and various grading strategies will be investigated. Pre- or Corequisite: PHED 3003, PHED 3033, PHED 3043, or PHED 4743. Prerequisite: PHED 1003, a cumulative grade point average of 2.7 or higher, and pass all three parts of Praxis Core test.

PHED 4733. Senior Seminar. 3 Hours.
This capstone class will cover special topics for the Kinesiology P-12 students in preparation for entry into the profession. Resumes, cover letters, teaching philosophy, references, and interview preparation will be included. Students will also review contemporary issues relevant to the physical education teacher. Corequisite: PHED 4023, PHED 4733. Prerequisite: Senior status in KINBS P-12, a grade of "C" or better in all KINS/PHED Teacher Education classes: PHED 1003, PHED 2023, PHED 3033, PHED 3043, PHED 3203, PHED 3373, PHED 3703, PHED 3743, PHED 3903, PHED 4321, KINS 3003, KINS 3373 and KINS 3413; a cumulative grade point average of 2.7 or greater; Praxis Core (all parts) passed; completed or registered for Praxis II content knowledge for Health and Physical Education exam and scores presented to the university internship supervisor.

PHED 4743. Secondary Physical Education. 3 Hours.
Strategies and curriculum for physical education, grades 7-12. Pre- or Corequisite: PHED 3003, PHED 3033, PHED 3043, or PHED 4703. Prerequisite: PHED 1003, a cumulative grade point average of 2.7 and pass all three parts of Praxis Core test.

PHED 480V. Workshop. 3-6 Hour.
Physical education workshop. Prerequisite: Instructor consent.

PHED 5233. Research on Teaching in Physical Education. 3 Hours.
A review of contemporary research literature informing effective teaching practices in physical education settings. Students gain experience in critically reviewing literature in physical education as well as related behavioral science, education, and humanities disciplines; emphasis is placed in incorporating research finding into personal teaching strategies.

PHED 5243. Sport Skill Assessment and Instructional Strategies. 3 Hours.
The focus of this course is practical assessment techniques and instructional strategies in the area of sport and physical education activities.

PHED 5253. The Physical Education Curriculum. 3 Hours.
Principles, problems, procedures, and the influence of educational philosophy on programs in physical education and their application in the construction of a course of study for a specific situation.

PHED 5273. Professional Issues in Physical Education and Sport. 3 Hours.
A review of contemporary research literature informing effective teaching practices in physical education settings. Students gain experience in critically reviewing literature and discussing current issues.

PHED 5313. Risk Management in Physical Education & Athletics. 3 Hours.
This course is designed to provide opportunities for the student to acquire an understanding of how to reduce the risk of injuries and eliminate hazards that may contribute to injuries associated with physical education and athletics.

PHED 5553. Scientific Principles of Movement and Performance. 3 Hours.
This course focuses on theoretical information about sport biomechanics and movement principles, with practical applications to the physical education of coaching profession.

PHED 5643. Motor Learning. 3 Hours.
Concepts of motor learning and control are presented. Attention is given to an analysis of the literature in movement control, motor behavior, and motor learning.

PHED 5753. Sport Psychology. 3 Hours.
Investigation of historical and contemporary research in sport psychology.

PHED 5803. Measurement Concepts for K-12 Physical Education Teachers. 3 Hours.
This course focuses on techniques that physical education teachers can use to monitor student progress in a K-12 environment.

PHED 6363. Supervision in Physical Education. 3 Hours.
The focus of this course is instructional supervision as a set of complex processes in which the supervisor works within accepted guidelines and functions to effectively supervise a teacher's pedagogical development. The Physical Education Instructional Supervision (PEIS) Model will be used to help facilitate this process.

PHED 6723. Project Implementation and Data Analysis. 3 Hours.
This course is designed to expose students to the rigors of research and will be the culminating experience of their degree program. The students will spend the majority of time developing a research topic. The research topic will be expanded into a complete research study in which the student will seek approval from the University of Arkansas IRB committee to conduct the study and then collect data. The data will be analyzed and presented at the conclusion of the class.

Physical Education Activity (PEAC) Courses
PEAC 1131. Beginning Swimming. 1 Hour.
Includes: essentials of water safety; basic strokes and techniques of swimming; and beginning diving.

PEAC 1221. Beginning Jogging. 1 Hour.
Instruction and participation in jogging.

PEAC 1231. Beginning Bowling. 1 Hour.
Instruction and participation in bowling.

PEAC 1241. Beginning Volleyball. 1 Hour.
Instruction and participation in volleyball.

PEAC 1251. Beginning Racquetball. 1 Hour.
Instruction and participation in racquetball.

PEAC 1351. Beginning Golf. 1 Hour.
Instruction and participation in golf.

PEAC 1391. Fitness Walking. 1 Hour.
Instruction and participation in vigorous walking for cardiovascular development and improvement.

PEAC 1431. Beginning Tennis. 1 Hour.
Instruction and participation in tennis.
PEAC 1471. Beginning Badminton. 1 Hour.
Instruction and participation in badminton.

PEAC 1621. Fitness Concepts. 1 Hour.
Acquaints students with a basic knowledge, understanding, and value of physical activity as related to optimal wellness.

PEAC 1661. Weight Training. 1 Hour.
Instruction and participation in weight training. May be repeated for degree credit.

PEAC 1801. Aerobic Dance I. 1 Hour.
The fundamentals of aerobic dance as a physical fitness program.

PEAC 1831. Beginning Scuba Diving. 1 Hour.
Instruction and participation in scuba diving. Completion of the course will NOT result in SCUBA diving certification. No open water dives are included in the course. Corequisite: Drill component.

PEAC 1901. Special Topics. 1 Hour.
Instruction and participation in specialized activity. May be repeated for up to 4 hours of degree credit.

**Physics (PHYS) Courses**

**PHYS 100V. Projects. 1-2 Hour.**
Independent study in experimental or theoretical physics for lower division undergraduate students. May be repeated for up to 2 hours of degree credit.

**PHYS 1021L. Physics and Human Affairs Laboratory. 1 Hour.**
Laboratory 2 hours per week. Pre- or Corequisite: PHYS 1023.

**PHYS 1021M. Honors Physics and Human Affairs Laboratory. 1 Hour.**
Laboratory 2 hours per week. Pre- or Corequisite: PHYS 1023H.
This course is equivalent to PHYS 1021L.

**PHYS 1023. Physics and Human Affairs. 3 Hours.**
The great ideas of physics, together with their philosophical and social impact. Scientific topics include cosmology, relativity, quantum mechanics. Philosophical and social topics include methods and values of science, problems related to energy sources, and implications of modern weapons. Non-mathematical. Designed for non-science majors. Along with PHYS 1021L, can be used to satisfy a 4-year physical science requirement for a B.A. degree. Students who have received credit in PHYS 2013 and PHYS 2033, or PHYS 2054 and PHYS 2074 cannot also receive degree credit in this course. Corequisite: PHYS 1021L.

**PHYS 1023H. Honors Physics and Human Affairs. 3 Hours.**
The great ideas of physics, together with their philosophical and social impact. Scientific topics include cosmology, relativity, quantum mechanics. Philosophical and social topics include methods and values of science, problems related to energy sources, and implications of modern weapons. Non-mathematical. Designed for non-science majors. Along with PHYS 1021L, can be used to satisfy a 4-year physical science requirement for a B.A. degree. Students who have received credit in PHYS 2013 and PHYS 2033, or PHYS 2054 and PHYS 2074 cannot also receive degree credit in this course. Corequisite: PHYS 1021L.
This course is equivalent to PHYS 1023.

**PHYS 1034. Physics for Elementary Education Majors. 4 Hours.**
For elementary education majors. Physical science concepts based on state frameworks are explored in a mixed lecture/lab environment. The inquiry-based lab activities can be transferable for school classroom use. Topics covered include: scientific inquiry, motion and forces, conservation of energy, heat, light, electricity and simple circuits, and magnetism. Prerequisite: Elementary education major. Corequisite: Lab component.

**PHYS 1044. Physics for Architects I. 4 Hours.**
The relation between the principles of physics and the practice of building and operating structures. Topics include: The behavior of structures under various loads, the statics and dynamics of fluids, thermal storage, thermal expansion, the greenhouse effect, heat transfer, refrigeration, the energy problem, efficiency in the operation of buildings. One underlying theme is that the self-sufficiency of a building is an important part of architecture. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Major in architecture or interior design or agricultural education communication & technology.

**PHYS 1054. Physics for Architects II. 4 Hours.**
Acoustics, electricity and magnetism, light, and environmental physics. Topics include resonance, acoustical isolation, interference, reverberation time, electrical circuitry with emphasis on power and efficiency, electrical storage, light sources, reflection, refraction, absorption, transmission, color, astronomy (to give perspective to the use of sunlight in architecture), heat, noise, and radioactivity pollution. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: PHYS 1044.

**PHYS 2011L. College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab). 1 Hour.**
Laboratory 2 hours per week. Corequisite: PHYS 2013.

**PHYS 2013. College Physics I (ACTS Equivalency = PHYS 2014 Lecture). 3 Hours.**
A non-calculus survey of the principles of physics including mechanics, heat and sound. Lecture 3 hours per week and drill 1 hour per week. Corequisite: Drill component and PHYS 2011L. Prerequisite: (MATH 1203 and MATH 1213) or (MATH 1284C or MATH 2554) or a score of at least 28 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT, or 620 on the math component of the new SAT.

**PHYS 2031L. College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab). 1 Hour.**
Laboratory 2 hours per week. Corequisite: PHYS 2033.

**PHYS 2033. College Physics II (ACTS Equivalency = PHYS 2024 Lecture). 3 Hours.**
Continuation of PHYS 2013. Topics include electricity and magnetism, light, relativity, quantum mechanics, atomic and nuclear structure. Lecture 3 hours, drill 1 hour per week. Corequisite: Drill component and PHYS 2031L. Prerequisite: PHYS 2013.

**PHYS 2054. University Physics I (ACTS Equivalency = PHYS 2034). 4 Hours.**
Introduction to the principles of mechanics, wave motion, temperature and heat, with calculus. Lecture three hours per week and practicum two hours a week (included in lab component). Pre- or Corequisite: MATH 2554. Corequisite: Lab component.

**PHYS 2054H. Honors University Physics I. 4 Hours.**
Introduction to the principles of mechanics, wave motion, temperature and heat, with calculus. Lecture three hours per week and practicum two hours a week (included in lab component). Pre- or Corequisite: MATH 2554. Corequisite: Lab component. This course is equivalent to PHYS 2054.

**PHYS 2074. University Physics II (ACTS Equivalency = PHYS 2044 Lecture). 4 Hours.**
Continuation of PHYS 2054. Topics covered include electricity, magnetism, light and geometric optics. Lecture three hours per week and practicum two hours per week. Pre- or Corequisite: MATH 2564. Corequisite: Lab component. Prerequisite: PHYS 2054.
PHYS 2074H. Honors University Physics II. 4 Hours.
Continuation of PHYS 2054H. Topics covered include electricity, magnetism, light and geometric optics. Lecture three hours per week and practicum two hours per week. Pre- or Corequisite: MATH 2564. Corequisite: Lab component. Prerequisite: PHYS 2054 or PHYS 2054H. This course is equivalent to PHYS 2074.

PHYS 2094. University Physics III. 4 Hours.
A continuation of PHYS 2054 and PHYS 2074. Topics include waves, physical optics, thermodynamics, kinetic theory, and an introduction to quantum mechanics. Lecture three hours per week and practicum two hours per week (included in lab component). Pre- or Corequisite: MATH 2574. Corequisite: Lab component. Prerequisite: PHYS 2074.

PHYS 306V. Projects (Irregular). 1-3 Hour.
Individual experimental or theoretical research problems for advanced undergraduates. May be repeated for up to 3 hours of degree credit.

PHYS 3113. Analytical Mechanics. 3 Hours.
Newton's laws of motion applied to particles, systems of particles, and rigid bodies. Introduction to Hamilton's and Lagrange's equations. Pre- or Corequisite: MATH 2584.

PHYS 3213. Electronics in Experimental Physics. 3 Hours.
DC & AC electronics, semiconductor amplifiers, operational and digital logic circuits with lab applications in experimental physics. Corequisite: Lab component. Prerequisite: PHYS 2094 or instructor consent.

PHYS 3273. UAteach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Corequisite: Drill component. Prerequisite: ARSC 1201 and ARSC 1221. This course is cross-listed with CHEM 3273, BIOL 3273.

PHYS 3273H. Honors UAteach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221, junior standing and honors. This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

PHYS 3453. Electromagnetic Theory I. 3 Hours.
Basics of Electromagnetic Theory, focusing on statics and introducing Maxwell's equations. Topics covered are: vector calculus and the solution of partial differential equations by separation of variables, electrostatics, dielectric media, electric currents, magnetic fields, magnetic properties of matter, electromagnetic induction, force and energy in electrodynamics, and Maxwell's equations.

PHYS 3463. Electromagnetic Theory II. 3 Hours.
Basics of Electromagnetic Theory, focusing on dynamical aspects. Topics to be covered include: Time-varying electric and magnetic fields including propagation of electromagnetic plane waves in vacuum and in matter, reflection, refraction, and guided wave propagation, radiation from point charges and dipoles, and relativity and the relativistic formulation of electrodynamics.

PHYS 3544. Optics. 4 Hours.
Elements of geometrical, physical, and quantum optics. Lecture 3 hours, laboratory 2 hours. Corequisite: Lab component. Prerequisite: PHYS 2074 and MATH 2564.

PHYS 3603. Introduction to Modern Physics. 3 Hours.
An introduction to the basic ideas of 20th century physics, with an emphasis on those that form the foundations of modern technology: quantum theory and its application to atomic, nuclear, optical and condensed matter physics. No credit is given toward a B.S. degree in physics. Prerequisite: PHYS 2033 and MATH 2043 or MATH 2554.

PHYS 360VL. Modern Physics Laboratory. 1-3 Hour.
Experiments illustrating the development and concepts of modern physics. No credit given toward a B.S. major in physics. Prerequisite: PHYS 3603.

PHYS 3613. Modern Physics. 3 Hours.
Introduction to special relativity, statistical physics, quantum physics, and a survey of molecules, solids, and statistical physics. Prerequisite: PHYS 2074.

PHYS 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. No more than 3 hours may be offered toward fulfillment of the requirements for the B.S. or B.A. degree in Physics. Prerequisite: Honors candidacy (not restricted to candidacy in physics). May be repeated for degree credit.

PHYS 399VH. Honors. 1-6 Hour.
Independent study for physics students enrolled in the honors program. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

PHYS 400V. Laboratory and Classroom Practices in Physics. 1-3 Hour.
The pedagogy of curricular materials. Laboratory and demonstration techniques illustrating fundamental concepts acquired through participation in the classroom as an apprentice teacher. Prerequisite: PHYS 3113 or PHYS 3414.

PHYS 4073. Introduction to Quantum Mechanics. 3 Hours.
A survey of quantum mechanics from the wave mechanical point of view including the application of quantum mechanics to the simple harmonic oscillator, angular momentum, and the hydrogen atom. Required course for B.S. Physics majors. Prerequisite: PHYS 3613, MATH 2574, and MATH 2584.

PHYS 4083. Advanced Quantum Mechanics. 3 Hours.
Advanced topics in introductory quantum mechanics including identical particles, approximation methods—time-independent perturbations theory, variational principle, time-dependent perturbations theory, and scattering. Prerequisite: PHYS 4073, MATH 2574, and MATH 2584.

PHYS 4103. Physics in Perspective. 3 Hours.
Human implications of physics, including life's place in the universe, the methods of science, human sense perceptions, energy utilization, social impacts of technology, and the effect of physics on modern world views. No credit given toward a B.S. major in Physics. Prerequisite: PHYS 3603 or PHYS 3613.

PHYS 4113. Physics in Perspective (Odd years, Sp). 3 Hours.
Human implications of physics, including life's place in the universe, the methods of science, human sense perceptions, energy utilization, social impacts of technology, and the effect of physics on modern world views. Credit allowed for only one of PHYS 4113 or PHYS 4103. Prerequisite: PHYS 3613.

PHYS 4203. Physics of Devices. 3 Hours.
Principles of physics applied in a selection of technologically important devices in areas including computing, communications, medical imaging, lasers, and energy utilization. Students will utilize technical journals. No credit given toward a B.S. major in Physics. Prerequisite: PHYS 3603 or PHYS 3613.

PHYS 4213. Physics of Devices. 3 Hours.
Principles of physics applied in a selection of technologically important devices in areas including computing, communications, medical imaging, lasers, and energy utilization. Students will utilize technical journals. Credit allowed for only one of PHYS 4203 or PHYS 4213. Prerequisite: PHYS 3613.

PHYS 4333. Thermal Physics. 3 Hours.
Equilibrium thermodynamics, statistical physics, and kinetic energy. Prerequisite: PHYS 3613.
PHYS 4613. Introduction to Biophysics and Biophysical Techniques. 3 Hours.
Origins of biophysics, biological polymers and polymer physics, properties of DNA and proteins, techniques to study DNA and proteins, biological membrane and ion channels, biological energy, experimental techniques to study single DNA and proteins. Two experiments are included: (1) DNA Gel electrophoresis; (2) Measurement of double-stranded DNA melting point. Prerequisite: PHYS 3613 and PHYS 4333, or consent. This course is cross-listed with PHYS 5613.

PHYS 462VL. Modern Physics Laboratory. 1-3 Hour.
Advanced experiments, projects, and techniques in atomic, nuclear, and solid state physics. Prerequisite: PHYS 3613.

PHYS 4653. Subatomic Physics. 3 Hours.
Nuclear structure and nuclear reactions. Nature and properties of elementary particles and resonances, their interactions and decays. Phenomenological theory and discussion of experimental evidence. Prerequisite: PHYS 3613. This course is cross-listed with PHYS 5653.

PHYS 4713. Solid State Physics. 3 Hours.
Crystal structure, diffraction and symmetry. Lattice vibrations, elasticity and optical properties. Electronic structure, band theory, transport and magnetism. Course emphasizes applications and current topics in semiconductors, optics and magnetism. Pre- or Corequisite: PHYS 3414 and PHYS 4073.

PHYS 4734. Introduction to Laser Physics. 4 Hours.
A combined lecture/laboratory course covering the theory of laser operation, laser resonators, propagation of laser beams, specific lasers such as gas, solid state, semiconductor and chemical lasers, and laser applications. Prerequisite: PHYS 3414 and PHYS 3544.

PHYS 4773. Introduction to Optical Properties of Materials. 3 Hours.
A course covering crystal symmetry optical transmission and absorption, light scattering (Raman and Brillouin) optical constants, carrier mobility, and polarization effects in semi-conductors, quantum wells, insulators, and other optically important materials. Prerequisite: PHYS 3414 and PHYS 3544.

PHYS 4793L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1125 or CHEM 1133. This course is cross-listed with MEEG 4323L, CHEM 4153L.

PHYS 4793M. Honors Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1125 or CHEM 1133. This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

PHYS 4803. Mathematical Physics. 3 Hours.
Development of mathematics used in advanced physics, including tensors, matrices, group theory, special functions and operators. Prerequisite: MATH 2584.

PHYS 489V. Senior Thesis. 1-6 Hour.
Senior Thesis.
PHYS 5323. Advanced Electromagnetic Theory II. 3 Hours.
Maxwell equations, conservation laws, wave propagation, waveguides, radiating systems, scattering, special relativity, and radiation by moving charges.

PHYS 5363. Scientific Computation and Numerical Methods. 3 Hours.
An introduction to numerical methods used in solving various problems in engineering and the sciences. May not earn credit for this course and MATH 4353 or MATH 4363.
This course is cross-listed with MATH 5363.

PHYS 5413. Quantum Mechanics I (Fa). 3 Hours.
Non-relativistic quantum mechanics; the Schrodinger equation; the Heisenberg matrix representation; operator formalism; transformation theory; spinors and Pauli theory; the Dirac equation; applications to atoms and molecules; collision theory; and semiclassical theory of radiation. Prerequisite: PHYS 4073.

PHYS 5423. Quantum Mechanics II. 3 Hours.
Continuation of PHYS 5413 Prerequisite: PHYS 5413.

PHYS 5513. Atomic and Molecular Physics. 3 Hours.
Survey of atomic and molecular physics with emphasis on the electronic structure and spectroscopy of 1 and 2 electron atoms and diatomic molecules. Includes fine and hyperfine structure, Zeeman and Stark mixing of states, collision phenomena, radiative lifetimes, and experimental techniques. Prerequisite: PHYS 5413.

PHYS 5523. Theory of Relativity. 3 Hours.
Conceptual and mathematical structure of the special and general theories of relativity with selected applications. Critical analysis of Newtonian mechanics; relativistic mechanics and electrodynamics; tensor analysis; continuous media; and gravitational theory.

PHYS 5613. Introduction to Biophysics and Biophysical Techniques. 3 Hours.
Origins of biophysics, biological polymers and polymer physics, properties of DNA and proteins, techniques to study DNA and proteins, biological membrane and ion channels, biological energy, experimental techniques to study single DNA and proteins. Two experiments are included: (1) DNA Gel electrophoresis; (2) Measurement of double-stranded DNA melting point.
This course is cross-listed with PHYS 4613.

PHYS 5653. Subatomic Physics. 3 Hours.
This course is cross-listed with PHYS 4653.

PHYS 5713. Condensed Matter Physics I. 3 Hours.
The course covers the Drude theory and the Sommerfeld theory of metals, crystal lattices, reciprocal lattices, X-ray diffraction, Bloch’s theory of electrons in periodic potential, formation of band gap, lattice vibration, and cohesive energy in solids. Prerequisite: PHYS 5413.

PHYS 5723. Physics at the Nanoscale. 3 Hours.
This is a cross-disciplinary course that is focused on teaching nanoscience and engineering by studying surface science, the building and analysis of quantum-confined structures, and related nano manufacturing processes. Students will achieve an integrated knowledge of the concepts of surface science, quantum mechanics, nano processing and manipulation, and techniques of materials research.
This course is cross-listed with MEPH 5723.

PHYS 5734. Laser Physics (Sp). 4 Hours.
A combined lecture/laboratory course covering the theory of laser operation, laser resonators, propagation of laser beams, specific lasers such as gas, solid state, semiconductor and chemical lasers, and laser applications. Prerequisite: PHYS 3414 and PHYS 3544.

PHYS 5753. Applied Nonlinear Optics. 3 Hours.
Topics include: practical optical processes, such as electro-optic effects, acousto-optic effects, narrow-band optical filters, second harmonic generation, parametric amplification and oscillation, and other types of nonlinear optical spectroscopy techniques which are finding current practical applications in industry. Prerequisite: PHYS 3414 and PHYS 3544.

PHYS 5753. Experimental Methods for Nanoscience. 3 Hours.
Fundamentals of the selected techniques suitable for characterization on the nanoscale. Focus on diverse methods such as x-ray and neutron spectroscopy, scanning probe microscopies, optical methods, electron diffraction methods and more.

PHYS 5773. Introduction to Optical Properties of Materials. 3 Hours.
This course covers crystal symmetry optical transmission and absorption, light scattering (Raman and Brillouin) optical constants, carrier mobility, and polarization effects in semi-conductors, quantum wells, insulators, and other optically important materials.

PHYS 5783. Physics of 2D Materials. 3 Hours.
Introduction to the structures of all known layered materials, followed by mechanical, electronic, spin, optical, and topological properties of two-dimensional materials. Discussion of theoretical concepts and examination of experimental manifestations of those concepts are interwoven throughout the semester. Knowledge of solid state physics is required. Corequisite: PHYS 5413.

PHYS 588V. Selected Topics in Physics. 1-3 Hour.
Selected topics in experimental or theoretical physics at the advanced level. May be repeated for up to 3 hours of degree credit.

PHYS 590V. Master of Arts Research (Sp, Su, Fa). 1-6 Hour.

PHYS 600V. Master of Science Thesis. 1-6 Hour.
Master of Science Thesis. May be repeated for degree credit.

PHYS 6413. Quantum Mechanics III. 3 Hours.
Relativistic quantum mechanics, second quantization, with applications to quantizing electromagnetic fields and to many-body theory. Introduction to Feynman diagrams. Prerequisite: PHYS 5423.

PHYS 6513. Advanced Topics in Complexity (Irregular). 3 Hours.
The goal of the course is to give students tools to investigate the behavior of complex systems and to analyze the relationship of non-linear dynamics and chaos theory to complex biological and non-biological systems. A special emphasis will be given to understanding the way neurons work as biological computing elements.

PHYS 6613. Quantum Optics. 3 Hours.
Properties of light and its interaction with atoms, particular attention given to the laser and recent experiments. Classical theory of resonance; Optical Bloch Eqs.; 2 level atoms in steady fields; pulse propagation; semiclassical theory of the laser, coherent states and coherent functions; gas, solid, and dye lasers; photon echoes and superradiance; quantum electrodynamics and spontaneous emission. Prerequisite: PHYS 5413 or equivalent.

PHYS 6713. Condensed Matter Physics II. 3 Hours.
The course covers surface physics, physics of homogeneous and inhomogeneous semiconductors, dielectric and ferroelectric physics, defects in crystals, spin interaction and magnetic properties, superconductivity, and band structure calculation. Prerequisite: PHYS 5713 and PHYS 5413.

PHYS 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.
Plant Pathology (PLPA)

Courses

PLPA 3004. Principles of Plant Pathology. 4 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Corequisite: Lab component. This course is cross-listed with BIOL 3004.

PLPA 400V. Research. 1-6 Hour.
Original investigations of assigned problems in plant pathology. Prerequisite: PLPA 3004.

PLPA 4223. Plant Disease Control. 3 Hours.
Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3004. This course is cross-listed with BIOL 4133.

PLPA 4304. Applied Plant Disease Management. 4 Hours.
A plant pathology course emphasizing practical understanding of the concepts and principles of agronomic and horticultural crop disease management, including disease diagnosis, monitoring, and using models to forecast disease events. Prerequisite: PLPA 3004 or instructor consent.

PLPA 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. This course is cross-listed with BIOL 4333.

PLPA 462V. Internship. 1-6 Hour.
Supervised practical work experience in pest management to develop and demonstrate professional competence. A maximum of 6 hours credit per semester or summer session is permitted. Faculty approval of projects proposal prior to enrollment, and written or oral reports are required. May be repeated for up to 9 hours of degree credit.

PLPA 5001. Seminar. 1 Hour.
Review of scientific literature and oral reports on current research in plant pathology. Prerequisite: Graduate standing. May be repeated for up to 4 hours of degree credit.

PLPA 502V. Special Problems Research. 1-6 Hour.
Original investigations of assigned problems in plant pathology. Prerequisite: Graduate standing.

PLPA 504V. Special Topics. 1-18 Hour.
Lecture topics of current interest not covered in other courses in plant pathology or other related areas. Prerequisite: Graduate standing. May be repeated for up to 18 hours of degree credit.

PLPA 5223. Plant Disease Control. 3 Hours.
(Formerly PLPA 4223.) Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Graduate degree credit will not be given for both PLPA 4223 and PLPA 5223.

PLPA 5303. Advanced Plant Pathology: Host-Pathogen Interactions. 3 Hours.
Presentation of important contemporary concepts relative to disease resistance and the physiology, biochemistry, and molecular biology of plant-pathogen interactions. Lecture 3 hours per week. Prerequisite: PLPA 3004 or equivalent and graduate standing.

PLPA 5313. Advanced Plant Pathology: Ecology and Epidemiology. 3 Hours.
Presentation of important contemporary concepts relative to the ecology and epidemiology of foliar and soil-borne plant pathogens. Lecture 3 hours per week. Prerequisite: PLPA 3004 and graduate standing.

PLPA 5324. Applied Plant Disease Management. 4 Hours.
(Formerly PLPA 4304.) A plant pathology course emphasizing practical understanding of the concepts and principles of agronomic and horticultural crop disease management, including disease diagnosis, monitoring, and using models to forecast disease events. Graduate degree credit will not be given for both PLPA 4304 and PLPA 5324.

PLPA 5333. Biotechnology in Agriculture. 3 Hours.
(Formerly PLPA 4333.) Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. Graduate degree credit will not be given for both PLPA 4333 and PLPA 5333.

PLPA 5404. Diseases of Economic Crops. 4 Hours.
Diagnosis and management of important diseases of cotton, fruits, rice, trees, soybeans, wheat, and vegetables will be covered in a lecture, laboratory, and field format. Lecture 2 hours, laboratory 4 hours per week. Four 1-day field trips will be involved. Corequisite: Lab component. Prerequisite: PLPA 3004 or BIOL 4424 or graduate standing.

PLPA 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

PLPA 6203. Plant Virology. 3 Hours.
Lecture emphasizing discussion of recent advances in plant virology. Laboratory concerned with techniques and equipment used in plant virus studies, including transmission of viruses, characterization utilizing ultracentrifugation, spectrophotometry, electrophoresis, electron microscopy, and serology. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 5813 or CHEM 5843 or CHEM 6873 or consent of instructor.

PLPA 6303. Plant Nematology. 3 Hours.
Nematodes and their relationship to plant diseases, with consideration of identification, morphology, biology, distribution, association with disease complexes and control. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Graduate standing.

PLPA 6503. Plant Bacteriology. 3 Hours.
Current concepts and techniques in plant bacteriology, including taxonomic, ecological and molecular aspects of plant pathogenic bacteria and their interactions with hosts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 and BIOL 2011L. May be repeated for up to 3 hours of degree credit.

Plant Sciences (PTSC)

Courses

PTSC 6101. Colloquium in Plant Sciences. 1 Hour.
Advanced discussion of topics in plant science on a participatory basis. Topics in plant pathology, horticulture and forestry will be treated. Prerequisite: Graduate standing. May be repeated for up to 2 hours of degree credit.
Political Science (PLSC)

Courses

PLSC 1003. Perspectives in Political Science. 3 Hours.
This course takes a topical approach to introducing first-year Political Science students to the academic skills essential to success in college and the methods of the political science discipline. The course emphasizes the transition to the UA and university-level work by addressing topics such as the advising process and civic engagement. Prerequisite: Honors standing.

PLSC 1003H. Honors Perspectives in Political Science. 3 Hours.
This course takes a topical approach to introducing first-year students to the academic skills essential to success in college and the methods of the political science discipline. The course emphasizes the transition to the UA and university-level work by addressing topics such as the advising process and civic engagement. Prerequisite: Honors standing.

Survey of the history, basic ideas, structure, and political processes of the national government of the United States, including the fundamental relationships of the federal system. Required of all political science majors.

PLSC 2003H. Honors American National Government. 3 Hours.
Survey of the history, basic ideas, structure, and political processes of the national government of the United States, including the fundamental relationships of the federal system. This course is equivalent to PLSC 2003.

PLSC 2013. Introduction to Comparative Politics. 3 Hours.
An introductory survey of comparative political systems.

PLSC 2203. State and Local Government (ACTS Equivalency = PLSC 2103). 3 Hours.
Organization and functions of state and local governments in the United States, intergovernmental relations, administration, adjudication, and the organization and function of political parties on state and local levels.

PLSC 2813. Introduction to International Relations. 3 Hours.
Introduction to the international system, theories of international behavior, political economy, conflict and peacemaking, the third world, international law and organizations, and the nature of the post-cold war world.

PLSC 300V. Internship in Public Affairs. 1-3 Hour.
Work experience in a public agency arranged by the student under the guidance of a faculty member. Paper required. May be repeated for up to 6 hours of degree credit.

PLSC 3103. Public Administration. 3 Hours.
Trends and organization of public administration, dynamics of management; fiscal and personnel management; administrative powers and responsibility. Prerequisite: PLSC 2003.

PLSC 3153. Public Policy. 3 Hours.
A study of public policy formulation, implementation, and evaluation at various levels of government. Prerequisite: PLSC 2003.

PLSC 3183. Public Personnel Management. 3 Hours.
Development of the merit system in government, career systems, human resource planning and development, labor relations, diversity issues, and the legal dimension of public personnel systems. Prerequisite: PLSC 2003.

PLSC 3203. Introduction to Legal Studies. 3 Hours.
An examination of the legal profession, legal writing, and the substantive areas of law in the U.S. Prerequisite: PLSC 2003.

PLSC 3213. The South and the Law: Race, Gender, and Citizenship. 3 Hours.
Examines the experience of racial and ethnic minorities, as well as women, in the post-Civil War South. Explores legal ramifications and tracks cultural and political legacies of landmark cases and/or legislative acts.

PLSC 3223. Arkansas Politics and the Nation. 3 Hours.
An examination of Arkansas Politics including the political process, public policies, social problems, political behavior, governmental structure, and contemporary issues with an emphasis on the historical, regional, and national context. Prerequisite: PLSC 2003.

PLSC 3233. The American Congress. 3 Hours.
Thorough examination of the constitutional role of the legislative branch under the Constitution; the internal procedures and personalities of the Senate and House; the central place of Congress in shaping domestic and foreign policy. Prerequisite: PLSC 2003.

PLSC 3243. The Judicial Process. 3 Hours.
The structure and operation of the state and national court systems. Emphasis is upon the role of the judiciary in the American political system and the political aspects and consequences of judicial decision-making. Prerequisite: PLSC 2003.

PLSC 3253. Urban Politics. 3 Hours.
Analysis of comparative urban systems, including political process, public policy, social problems, governmental structure, and voter behavior. Prerequisite: PLSC 2003.

PLSC 3263. Latino Politics. 3 Hours.
Analyzes the social, economic, and political issues impacting the Latino (or Hispanic) community in the United States. Attention is paid to how the community itself responds to and influences these factors.

PLSC 3283. Civil Rights Policy and Politics. 3 Hours.
This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations. This course is cross-listed with AAST 3283.

PLSC 3293. African American Politics. 3 Hours.
This is a survey course designed to provide students with a comprehensive overview of African American political participation in the United States. In addition to analyzing important events in African American Politics, the course attempts to explain evolving patterns of political participation in Black America. This course is cross-listed with AAST 3293.

PLSC 3303. American Political Development. 3 Hours.
Examines the evolution of the American State and corresponding governmental and political institutions. Topics include models of political change and evolution, American political culture(s), governing institutional structures at the national level, the evolution of federalism, political linkage structures, and public policy. Prerequisite: PLSC 2003.

PLSC 3503. Governments and Politics of East Asia. 3 Hours.
PLSC 3523. Politics of the Middle East. 3 Hours.  
Survey of the unity and diversity in the political development of the Middle East, as evident in historical legacies, state formation, civil society, social class, and political identity.

PLSC 3553. Western European Politics. 3 Hours.  
Comparative analysis of Western European parliamentary systems with special attention to political traditions, constitutional arrangements, socio-economic structure, and the political and legislative processes in countries such as Britain, France, and Germany. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC 3573. Governments and Politics of Latin America. 3 Hours.  
Comparative survey of Latin America political forces and institutions with special attention to patterns and problems of political change and development in that area. Prerequisite: PLSC 2013.

PLSC 3593. Politics of Mexico. 3 Hours.  
A comparative survey of contemporary Mexican politics emphasizing Mexico’s historical-institutional trajectory in relation to the US, North American relations, and the experiences of Mexicans in Greater (Gran) Mexico. Prerequisite: PLSC 2013.

PLSC 3603. Scope and Methods of Political Science. 3 Hours.  
The basic principles and assumptions of political inquiry (methodology) and research techniques for gathering and analyzing data about political phenomena. Prerequisite: PLSC 2003.

PLSC 3683. International Conflict and National Security Policy. 3 Hours.  
This course examines international conflict and national security policy. The first part of the course analyzes the causes and consequences of international conflict and mechanisms for conflict resolution. The second part examines the formulation and implementation of national security in comparative perspective and U.S. national security policy. Prerequisite: PLSC 2003.

PLSC 3803. International Organization. 3 Hours.  
The theory and practice of international organizations past and present, with emphasis on the United States and a critical examination of current trends. Prerequisite: Junior standing.

PLSC 3813. International Law. 3 Hours.  
Analysis of the traditional principles of public international law including the law of war, the law of sea and air, and the legal nature of statehood; and analysis of selected principles of private international law relevant to such topics as the multinational corporation, international arbitration, commerce with Communist states, and the expropriation of foreign property. Prerequisite: Junior standing.

PLSC 3823. Theories of International Relations. 3 Hours.  
Analysis of major intellectual traditions in the field of international relations, including realism, liberalism, and social constructivism. Emphasis will be placed on how they help us to understand war, revolution, global capitalism, nationalism, peace, and other significant international phenomena. Prerequisite: PLSC 2003 and PLSC 2013.

PLSC 3853. American Foreign Policy. 3 Hours.  
The structure and process for making and implementing the foreign policy of the United States, and an evaluation of current policies in the contemporary international milieu. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC 390V. Special Topics. 1-3 Hours.  
Special topics in political science. May be repeated for degree credit.

PLSC 3913. American Political Thought Before 1900. 3 Hours.  
Major ideas, issues, and arguments in American Political Thought from the colonial period to approximately 1900. May be repeated for degree credit.

PLSC 3923H. Honors Colloquium. 3 Hours.  
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy in political science. May be repeated for degree credit.

PLSC 3933. Contemporary American Political Thought. 3 Hours.  
Twentieth century American political thought, including who should participate, expanding concepts of freedom, political economy, equality, feminism, rights, conservatism and liberalism.

PLSC 394V. Readings in Political Science. 1-3 Hour.  
For advanced students who wish to study some field of political science beyond the course offering available in that field. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

PLSC 3983. Politics in Literature. 3 Hours.  
Analysis of political theories and issues through extensive reading and discussion of selected works of literature. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC 399VH. Honors Course. 1-3 Hour.  
Honors course. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

PLSC 400V. Special Topics. 1-3 Hour.  
Topics in political science not usually covered in other courses. May be repeated for degree credit.

PLSC 4103. Introduction to Urban Planning. 3 Hours.  
Reviews the many forms, functions, and purposes of American cities. Covers basic planning theories, surveys the various sub-fields of planning, discusses trends in the planning field, and utilizes computer simulations. Prerequisite: PLSC 3253. This course is cross-listed with PADM 5833.

PLSC 4193. Administrative Law. 3 Hours.  
Legal aspects of the administrative process and the effect of legal principles and processes upon administrative decision-making. Emphasis is given to the limitation of administrative discretion and the judicial review of administrative decision. Prerequisite: PLSC 3103 or PLSC 4253.

PLSC 4203. American Political Parties. 3 Hours.  
The nature, function, and history of political parties in the United States with emphasis on party membership, organization, campaign techniques, finance and electoral alliances. Prerequisite: PLSC 2003.

PLSC 4213. Campaigns and Elections. 3 Hours.  
This course examines the American electoral process. It is an empirical course that provides opportunities for original analysis of survey data and election returns. Emphasis is placed on the most recent federal election. Prerequisite: PLSC 2003.

PLSC 4223. The American Chief Executive. 3 Hours.  
Offices and roles of the President and state governors of the United States focusing on the evolution of the offices in terms of responsibilities and political leadership. Prerequisite: PLSC 2003.

PLSC 4253. The U.S. Constitution I. 3 Hours.  
United States Supreme Court decisions involving the functions and powers of Congress, the Supreme Court, and the President and federalism. Prerequisite: PLSC 2003.

PLSC 4263. The U.S. Constitution II. 3 Hours.  
United States Supreme Court decisions interpreting the political, economic, and civil rights of individuals and groups. Prerequisite: PLSC 2003.

PLSC 4273. Political Psychology. 3 Hours.  
Examines role of the individual in the polity including basic psychological constructs of relevance to political action, the formulation and maintenance of stable political orientations, the patterns linking the individual to the polity, and major modes of inquiry. Prerequisite: PLSC 2003.

PLSC 4283. Federalism and Intergovernmental Relations. 3 Hours.  
Analysis of changes in intergovernmental relations in the American federal system. Discussions will focus on political, economic/fiscal and administrative aspects of policy changes of the pre-and post-Reagan eras.
PLSC 4303. History of Political Parties in the U.S. 1789-1896. 3 Hours.
Origin and development of the American party system from the implementation of the Constitution to the election of McKinley. This course is cross-listed with HIST 4503.

PLSC 4313. History of Political Parties in the United States Since 1896. 3 Hours.
Response of the party system to America’s emergence as an industrial nation and world power from the election of 1896 to present. This course is cross-listed with HIST 4513.

PLSC 4323. Racial Identity, Politics, and Public Policy. 3 Hours.
Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 3293 or AAST 1003 or Junior standing. This course is cross-listed with AAST 4232.

PLSC 4333. Southern Politics. 3 Hours.
Evaluates the significance of the southern region within the national political scene, as well as discuss the unique political history and workings of the region. Explores the various groups within the region that continue to fight for political influence and power.

PLSC 4343. Money and Politics. 3 Hours.
Familiarizes students with the world of money and politics in the United States. Examines the function of money in elections, the legal aspects, and the consequences of the regulatory environment. Provides a means to gain analytic computer skills and a strong foundation for further study of political science.

PLSC 4373. Political Communication. 3 Hours.
Study of the nature and function of the communication process as it operates in the political environment. This course is cross-listed with COMM 4373.

PLSC 4513. Creating Democracies. 3 Hours.
Analyses of the creation of democracies in Europe, South America, Asia, Africa, the Middle East, East Europe, and the former Soviet Union. Prerequisite: PLSC 2013.

PLSC 4533. China’s Foreign Trade and International Order: History, Policy, and Theory. 3 Hours.
This interdisciplinary course explores China’s foreign trade and international order by introducing students to the historical context and economic theory necessary for understanding China’s role in the international trading system from the ancient past to the contemporary era. This course is cross-listed with HIST 4533, ECON 4533.

PLSC 4563. Government and Politics of Russia. 3 Hours.
Study of Russian and Soviet politics after 1917 and of the democratization of Russia and the other successor states. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC 4573. Gender and Politics. 3 Hours.
Examines the significance of gender in politics. Includes discussion of the women’s movement and feminism theory, but emphasizes the content and process of public policy as it relates to women and men. Focus is on the U.S. but final third is devoted to comparative topics. Prerequisite: PLSC 2003 or PLSC 2013.

PLSC 4583. Political Economy of East Asia. 3 Hours.
Development strategies and policies of major economies in East Asia. Topics include theories for East Asia’s economic growth, dynamics and process of East Asian political and economic developments, strengths and limits of the East Asian development model, Asian values and their implications for Asian-style democracy, and dynamics of regional cooperation.

PLSC 4593. Islam and Politics. 3 Hours.
Compares contemporary Islamist political movements. Seeks to explain causes, debates, agendas, and strategies of Islamists in the political realm. Addresses sovereignty, the rule of law, visions of the good state and society, and relations between nationalism, religion and political development. Focus on Middle East with comparative reference to other cases.

PLSC 4613. Social Network Analysis. 3 Hours.
Introduces the fundamentals of Social Network Analysis (SNA), and its applications for research in various social science fields. Prerequisite: SOCI 2013. This course is cross-listed with SOCI 4183.

PLSC 4793H. Honors Latino/Hispanic Political Thought. 3 Hours.
A survey course designed to examine the development of Latino/Hispanic political thought from Iberian and Latin American political culture and philosophy to contemporary US political ideology/thought.

PLSC 4803. Foreign Policy Analysis. 3 Hours.
Comparative analysis of foreign policy, with attention paid to explanations at a variety of levels, such as the individual, group, organizational, societal, systemic.

PLSC 4823. Foreign Policy of East Asia. 3 Hours.
This course provides an introduction to the international relations of two major East Asian states, China and Japan. Key topics include: China and Japan’s interaction with the world political and economic systems; domestic sources of international behavior and major dimensions of foreign policy in the 1980s and 1990s.

PLSC 4833. International Political Economy. 3 Hours.
This course provides an analysis of the interaction between politics and markets in the world economy. Its central objective is to illustrate how political and state actions have shaped and been shaped by the development of the global economy.

PLSC 4843. The Middle East in World Affairs. 3 Hours.
An analysis of geo-political and socio-economic characteristics of Middle Eastern societies and their impact on world economic and political order. Special attention to such issues as the Arab-Israeli conflict, the promotion of lasting peace in the region, impact of oil on world politics, the involvement of superpowers, rehabilitation of Palestinian refugees and the role of the United Nations.

PLSC 4853. International Norms and Corporate Social Responsibility. 3 Hours.
This course focuses on the interplay between international social expectations and business strategy. How norms prevail and why norms emerge will be observed from a business vantage point. Pre- or corequisite: PLSC 2003 or PLSC 2013.

PLSC 4863. Political Psychology and International Relations. 3 Hours.
Examines psychological approaches to international relations and examines how these perspectives advance the study of world politics.

PLSC 4873. Inter-American Politics. 3 Hours.
An analysis of the political themes, regional organization, and hemispheric relations that constitute the inter-American system, with special emphasis on conflict and cooperation in the hemispheric policies of the American republics. Prerequisite: Junior standing.

PLSC 4883. Politics of International Law. 3 Hours.
This course examines the interaction between law and politics in the international system, focusing on international law.

PLSC 4893. International Negotiation and Mediation. 3 Hours.
This course examines international negotiations and mediation. International negotiation refers to the processes and methods by which state and non-state actors reach agreements through persuasion and similar non-violent means. This course analyzes the processes, methods, and mechanisms, and challenges of international negotiations and the growing use of mediation.
PLSC 4933. African American Political Ideology. 3 Hours.
A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. This course is cross-listed with AAST 4933.

PLSC 498V. Senior Thesis. 1-6 Hour.
Senior Thesis.

PLSC 499VH. Honors Essay. 1-3 Hour.
Not part of the 30 hours requirement for the major. May be repeated for up to 6 hours of degree credit.

PLSC 5103. Human Behavior in Complex Organizations. 3 Hours.
Review of the fundamental literature and a systematic analysis of various theories and research focusing on organization and behavior in public administration, including the discussion of organizational development, human motivation, leadership, rationality, efficiency and conflict management in public organizations. Prerequisite: Graduate standing.

PLSC 5113. Seminar in Human Resource Management. 3 Hours.
Intensive study of public personnel policies and practices, including legal foundations, classification and compensation plans, recruitment and selection procedures, training, employment policies and morale, employee relations and organization. Prerequisite: Graduate standing.

PLSC 5123. Public Budgeting and Finance. 3 Hours.
Focuses on the budgeting process and governmental fiscal policy formulation, adoption, and execution. Prerequisite: Graduate standing.

PLSC 5133. Nonprofit Management. 3 Hours.
This course provides an overview of the principal management functions in public and nonprofit organizations. Topics include financial management, HR development, program development. The relationships among volunteer boards of trustees, fund raising, public relations, and program personnel are analyzed, and the complex environments with service sector agencies are explored.

PLSC 5143. Administrative Law. 3 Hours.
A seminar which examines the constitutional and statutory basis and authority of public organizations. Special attention focuses on the nature of the rule-making and adjudicatory powers of public agencies and on executive, legislative, and judicial restraints on such activities. Also considered are the role, scope, and place of public regulatory activities. Prerequisite: Graduate standing.

PLSC 5153. Environmental Politics and Policy. 3 Hours.
Surveys recent patterns of environmentalism in the U.S. and explores the nature of policy making with regard to environmental and economic development issues. Several debates are presented, such as conservation vs. preservation, multiple use vs. sustainability, intergovernmental policy implementation, incentives, and free market environmentalism.

PLSC 5163. Public Policy. 3 Hours.
Seminar examining the study of public policy making in complex organizations. Attention given to different theories and frameworks explaining public policy making. Prerequisite: Graduate standing.

PLSC 5173. Community Development. 3 Hours.
Community development encompasses the political, social, and economic issues that shape contemporary communities. The seminar examines substantive issues in community development, related theories, and techniques. A major focus of the course will be on low-income and minority neighborhoods and efforts to create more inclusive communities in the U.S. and abroad.

PLSC 5193. Seminar in Public Administration. 3 Hours.
Introduction to and synthesis of public administration theory, functions, history, public accountability and management concerns, economic impact of administrative decisions, current problems, and issues in the public sector. Prerequisite: Graduate standing.

PLSC 5203. Seminar in American Political Institutions. 3 Hours.
Research seminar dealing with selected aspects of the major governmental institutions in the United States. Prerequisite: Graduate standing.

PLSC 5213. Seminar in American Political Behavior. 3 Hours.
Reading seminar surveying major works on representative processes in American national politics, including political opinion, political leadership, political participation, voting behavior, political parties, and interest groups. Prerequisite: Graduate standing.

PLSC 5233. The American Chief Executive. 3 Hours.
Study of the origin, background, and evolution of the Office of the President of the United States, with a review of the president's powers in the areas of politics, administration, and legislation.

PLSC 5243. Seminar in State Politics and Policy. 3 Hours.
Research seminar dealing with selected aspects of state political institutions and politics such as policy diffusion, institutional professionalism, and representation. Prerequisite: Graduate standing.

PLSC 5253. Politics of Race and Ethnicity. 3 Hours.
Reviews identity, political action and concepts of political activity by minority groups, focusing on contemporary political behavior, the incorporation of minority groups into the U.S. political system.

PLSC 5343. Money and Politics. 3 Hours.
Familiarizes students with the world of money and politics in the United States. Examines the function of money in elections, the legal aspects, and the consequences of the regulatory environment. Provides a means to gain analytic computer skills and a strong foundation for further study of political science.

PLSC 5383. Seminar in Political Communication. 3 Hours.
Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. This course is cross-listed with COMM 5383.

PLSC 5503. Comparative Political Analysis. 3 Hours.
A selection of topics to provide the theoretical, conceptual and methodological and foundation for the analysis of contemporary political systems. Prerequisite: Graduate standing.

PLSC 5513. Seminar in Politics of the Middle East. 3 Hours.
Explores the major lines of inquiry on the politics of the state and society in the context of endogenous and exogenous forces that have influenced conceptions of power, legitimacy, and identity. Prerequisite: Graduate standing.

PLSC 5523. Topics in Politics of the Middle East. 3 Hours.
In-depth analysis of specific political phenomena in the contemporary Middle East. Inquiry will vary but may focus on gender, political economy, politics of inclusion and exclusion (democratization and authoritarianism), or the politics of oil. Prerequisite: Graduate standing.

PLSC 5703. Research Design in Political Science and Public Policy. 3 Hours.
This course is designed to introduce graduate students to fundamental research issues in the realm of applied social science while developing the ability to apply basic skills for conducting research.

PLSC 5803. Seminar in International Politics. 3 Hours.
Research seminar providing intensive coverage of selected topics in theories of international relations, the comparative study of foreign policy making, and international organizations. Prerequisite: Graduate standing.

PLSC 5833. Seminar in Contemporary Problems. 3 Hours.
Seminar with concentrated reading in selected and specialized areas of contemporary international relations. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.
Poultry Science (POSC)

Courses

POSC 1002. Introduction to Careers in Poultry Science. 2 Hours.
To introduce the student to the career opportunities in the poultry science industry. Corequisite: Lab component.

POSC 1012. Avian Biology (Sp). 2 Hours.
Students will be introduced to biological sciences associated with poultry. Topics will include avian origin, anatomy, physiology and behavior. Course will serve as foundation for poultry production courses. Lecture 2 hours.

POSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented.
This course is cross-listed with ANSC 1062.

POSC 1123. The Animals in our Lives. 3 Hours.
Address the controversies and focus on animal welfare, environmental issues and sustainability.
This course is cross-listed with ANSC 1123.

POSC 2343. Poultry Production. 3 Hours.
To develop a basic foundation about the practices utilized to produce broilers and turkeys. Course will highlight hatchery function and management; embryo development and hatching; chick/poultry transportation, preparation and maintenance of facilities for rearing birds, bird environment, nutrition, and health. Also to be covered are the different roles associated with live production in an integrated company. Corequisite: Lab component.

POSC 2353. Poultry Breeder Management. 3 Hours.
Students will be introduced to the management practices used in production of young and adult chickens, turkeys, and other poultry with special emphasis on broiler, breeder, and market egg production. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Pre- or Corequisite: POSC 1012.

POSC 3013. Exotic Companion Birds. 3 Hours.
Topics include basic care, health, breeding, bird evolution, anatomy, and nutritional management of commonly kept exotic companion birds, including parrots, cockatoos, macaws, finches, canaries, and pigeons. Discussion will include housing and care for individual pet birds and large scale breeding and production. Lecture/discussion 3 hours per week. Prerequisite: BIOL 1543.

PLSC 5843. International Legal Order. 3 Hours.
Analysis of distinctive characteristics of contemporary international law. Topics include role of legal order in controlling the use of force in international relations and the impact of social and political environment on growth of international law and relations among international political systems. Prerequisite: Graduate standing.

PLSC 590V. Directed Readings in Political Science. 1-3 Hour.
Directed readings in Political Science. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

PLSC 5913. Research Methods in Political Science. 3 Hours.
Methods relevant to research in the various fields of political science. Required of all graduate students in political science. Prerequisite: Graduate standing.

PLSC 592V. Internship in Political Science. 1-6 Hour.
Internship in a local, state, regional, or federal agency. Paper required on a significant aspect of internship experience. Prerequisite: Graduate standing.

PLSC 593V. Special Topics. 1-3 Hour.
Topics in political science not usually covered in other courses. Prerequisite: Graduate Standing. May be repeated for up to 3 hours of degree credit.

PLSC 5943. Advanced Research Methods in Political Science. 3 Hours.
Provides a firm theoretical foundation in, and an ability to apply, various multivariate statistical methods that are most commonly used for empirical analysis of politics and policy. Prerequisite: PLSC 5913 or equivalent.

PLSC 595V. Research Problems in Political Science. 1-3 Hour.
Research problems in Political Science. Prerequisite: Graduate Standing. May be repeated for up to 6 hours of degree credit.

PLSC 5983. Mixed Methods Research Design. 3 Hours.
An advanced overview of a particular type of multi-point research design. Mixed methods research combines quantitative and qualitative research strategies in a single research project.

PLSC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

POSC 2343. Poultry Production. 3 Hours.
To develop a basic foundation about the practices utilized to produce broilers and turkeys. Course will highlight hatchery function and management; embryo development and hatching; chick/poultry transportation, preparation and maintenance of facilities for rearing birds, bird environment, nutrition, and health. Also to be covered are the different roles associated with live production in an integrated company. Corequisite: Lab component.

POSC 2353. Poultry Breeder Management. 3 Hours.
Students will be introduced to the management practices used in production of young and adult chickens, turkeys, and other poultry with special emphasis on broiler, breeder, and market egg production. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Pre- or Corequisite: POSC 1012.

POSC 3013. Exotic Companion Birds. 3 Hours.
Topics include basic care, health, breeding, bird evolution, anatomy, and nutritional management of commonly kept exotic companion birds, including parrots, cockatoos, macaws, finches, canaries, and pigeons. Discussion will include housing and care for individual pet birds and large scale breeding and production. Lecture/discussion 3 hours per week. Prerequisite: BIOL 1543.

POSC 3032. Animal Physiology I. 2 Hours.
Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and functions of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1073. This course is cross-listed with ANSC 3032.

POSC 3042. Animal Physiology II. 2 Hours.
Fundamental aspects of renal, respiratory, digestive, and endocrine physiology will be covered. The normal structure and function of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1073. This course is cross-listed with ANSC 3042.

POSC 3123. Principles of Genetics. 3 Hours.
Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher.
This course is cross-listed with ANSC 3123.

POSC 3223. Poultry Diseases. 3 Hours.
Common diseases affecting poultry reared under commercial conditions will be covered including diagnosis, therapy and prevention. Immunity, sanitation practices, and chemotherapy will also be covered. Lecture 3 hours per week with some demonstrations, slides and videotapes. Prerequisite: BIOL 2013 and BIOL 2011L and junior standing.

POSC 3381. Poultry Judging and Selection. 1 Hour.
Practice in production judging and flock selection. Laboratory 3 hours per week. May be repeated for up to 4 hours of degree credit.

POSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543.
This course is cross-listed with POSC 3513H.

POSC 3513H. Honors Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543.
This course is cross-listed with POSC 3513.
POSC 3554. Avian Anatomy. 4 Hours.
Detailed coverage of the external and internal anatomy of poultry, including formation and development of the egg and embryo. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1543.

POSC 400V. Special Problems. 1-9 Hour.
Special problems in the poultry sciences for advanced students. May be repeated for up to 9 hours of degree credit.

POSC 401V. Internship in Poultry Science. 1-6 Hour.
Supervised work experience with private or government organizations to introduce students to professional areas of work in poultry science. Prerequisite: Junior standing. May be repeated for up to 8 hours of degree credit.

POSC 4033. Statistical Process Control in the Food Industry. 3 Hours.
Analysis of processing data related to compliance with regulatory limits, quality & safety limits and internal & external customer specifications. Emphasizes statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Prerequisite: Instructor consent.

POSC 410V. Special Topics in Poultry Science. 1-4 Hour.
Topics not covered in other courses or for a more intensive study of specific topics in poultry science. May be repeated for degree credit.

POSC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. This course is cross-listed with AGEC 4123, ANSC 4123.

POSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343.

POSC 4213. Integrated Poultry Management Systems. 3 Hours.
Major managerial systems in the integrated commercial poultry industry. Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Prerequisite: POSC 2353 or ANSC 3110 and AGEC 2303.

POSC 4233. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products. Prerequisite: POSC 4314.

POSC 4314. Egg and Meat Technology. 4 Hours.
Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional and microbiological characteristics of value added poultry products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1073 and CHEM 1071L) and BIOL 1543 and BIOL 1541L.

POSC 4333. Poultry Breeding. 3 Hours.
Application of new developments in poultry breeding for efficient egg and meat production. Not intended for students interested in a career in veterinary sciences. Lecture 3 hours per week. Prerequisite: MATH 1203 or higher and junior standing.

POSC 4343. Poultry Nutrition. 3 Hours.
Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603 and junior standing.

POSC 4801. Seminar: Research Topics. 1 Hour.
Required by all poultry science majors. Prerequisite: Junior or Senior standing and COMM 1313.

POSC 4811. Seminar: Professionalism. 1 Hour.
Addressing issues associated with preparation for finding and retaining your first job in the poultry industry. Lecture 1 hour per week. Prerequisite: Junior or Senior standing.

POSC 4821. Seminar: Problem Solving. 1 Hour.
Real world problem solving of poultry production systems. Lecture 1 hour per week. Prerequisite: Junior or senior standing.

POSC 4831. Seminar: Processing Regulations. 1 Hour.
Processing plant procedures and regulations with an emphasis on problem solving. Lecture 1 hour per week. Prerequisite: Junior or senior standing.

POSC 4893. Brain and Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory and autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042), or PSYC 2003, or BIOL 2213, or BIOL 2443, or BIOL 2533.

This course is cross-listed with ANSC 4923.

POSC 500V. Special Problems. 1-6 Hour.
Work in special problems of poultry industry. Prerequisite: Graduate standing.

POSC 510V. Special Topics in Poultry Sciences. 1-4 Hour.
Topics not covered in other courses or for a more intensive study of specific topics in poultry science. Prerequisite: Graduate standing. May be repeated for degree credit.

POSC 5113. Food Toxicology and Contaminants. 3 Hours.
During this course, the student will learn basic concepts of food toxicology, study the different physiological processes involved in food borne intoxications, and learn about potential health problems associated with exposure to these compounds. Prerequisite: Graduate study.

POSC 5123. Advanced Animal Genetics. 3 Hours.
Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: POSC 3123 or ANSC 3123.

This course is cross-listed with ANSC 5123.

POSC 5143. Biochemical Nutrition. 3 Hours.
Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813.

This course is cross-listed with ANSC 5143.

POSC 5152. Protein and Amino Acid Nutrition. 2 Hours.
Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813.

This course is cross-listed with ANSC 5152.
POSC 5163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343.

POSC 5233. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products.

POSC 5313. Domestic Animal Bacteriology. 3 Hours.
A study of bacteria pathogenic for domestic animals. Lecture 3 hours per week.

POSC 5343. Advanced Immunology. 3 Hours.
Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. This course is cross-listed with BIOL 5343.

POSC 5352L. Immunology in the Laboratory. 2 Hours.
Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343 or BIOL 4713. This course is cross-listed with BIOL 5352L.

POSC 5742. Advanced Poultry Diseases. 2 Hours.
An in-depth coverage of the most important diseases of poultry with a focus on understanding mechanisms of pathogenesis, diagnostic techniques and principles of prevention. Lecture/discussion 2 hours per week. Prerequisite: POSC 3223.

POSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.
Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. This course is cross-listed with ANSC 5743L.

POSC 5783. Molecular Analysis of Foodborne Pathogens. 3 Hours.
Course topics will include molecular detection and identification of foodborne pathogens, the molecular response of foodborne pathogens to their environments, functional genomic approaches, and analysis of complex microbial communities. Lecture/discussion 3 hours per week.

POSC 5901. Graduate Seminar. 1 Hour.
Critical review of the current scientific literature pertaining to the field of poultry science. Oral reports. Recitation 1 hour per week. Prerequisite: Senior standing.

POSC 5923. Cardiovascular Physiology of Domestic Animals. 2 Hours.
Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. This course is cross-listed with ANSC 5932.

POSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.
Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3052 or POSC 3042. This course is cross-listed with ANSC 5942.

POSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.
Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. This course is cross-listed with ANSC 5952.

POSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.
Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. This course is cross-listed with ANSC 5962.

POSC 5972. Renal Physiology of Domestic Animals. 2 Hours.
Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: ANSC 3032 or POSC 3032 and ANSC 3042 or POSC 3042. This course is cross-listed with ANSC 5972.

POSC 600V. Thesis. 1-6 Hour.
Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

POSC 6123. Advanced Food Animal Wellbeing. 3 Hours.
Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. This course is cross-listed with ANSC 6123.

POSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.
The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: (ANSC 3143 or POSC 4343) and CHEM 3813. This course is cross-listed with ANSC 6343.

POSC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Graduate standing. May be repeated for degree credit.
Psychology (PSYC)

Courses

An introduction to the field of Psychology, including the investigation of the biological bases of behavior; learning and cognitive processes; developmental and social psychology; and personality, psychopathology, and the treatment of psychological disorders. Students will be expected to complete a research requirement. May be repeated for up to 12 hours of degree credit.

PSYC 2003H. Honors General Psychology. 3 Hours.
An introduction to the field of Psychology, including the investigation of the biological bases of behavior; learning and cognitive processes; developmental and social psychology; and personality, psychopathology, and the treatment of psychological disorders. Students will be expected to complete a research requirement. This course is equivalent to PSYC 2003.

PSYC 2013. Introduction to Statistics for Psychologists. 3 Hours.
Introduction to the descriptive and inferential statistics commonly used by psychologists. A grade of C or better in PSYC 2013 is required as a prerequisite for PSYC 3073. Corequisite: Drill component. Prerequisite: PSYC 2003 and MATH 2043 or MATH 2053 or MATH 2554, with a grade of C or better, and a Psychology major.

PSYC 206V. Directed Readings. 1-4 Hour.
For undergraduate majors in psychology. Prerequisite: Six hours of psychology; Instructor's permission. May be repeated for up to 6 hours of degree credit.

PSYC 207V. Laboratory Experience. 1-4 Hour.
Laboratory experience in psychology obtained by working as part of a faculty member's research team. Prerequisite: PSYC 2003 and Instructor's permission. May be repeated for up to 6 hours of degree credit.

PSYC 3013. Social Psychology. 3 Hours.
Theories and representative research in social psychology, emphasizing the influence of the social world on human behavior. Introduction to the problems, theories, and experiments of social psychology. Prerequisite: PSYC 2003.

PSYC 3023. Abnormal Psychology. 3 Hours.
Theories and representative research about the causes and treatment of the major forms of abnormal behavior. Prerequisite: PSYC 2003.

PSYC 3073. Research Methods. 3 Hours.
Training in execution and interpretation of experiments using the classical experimental designs. Limited enrollment. Prerequisite: PSYC 2013 and (MATH 2043, or MATH 2053, or MATH 2554) with a grade of "C" or better and a Psychology major.

PSYC 3093. Developmental Psychology (ACTS Equivalency = PSYC 2103). 3 Hours.
Theories and representative research in the psychological factors influencing development, including both hereditary and environmental influences, from conception through adolescence. Prerequisite: PSYC 2003.

PSYC 3103. Cognitive Psychology. 3 Hours.
Introduction to theories and research in cognition including memory, language, and problem-solving. Prerequisite: PSYC 2003.

PSYC 3923H. Honors Colloquium. 3 Hours.
Treats a special topic or issue, offered as part of the honors program. May be repeated when the content is changed. Prerequisite: honors candidacy (not restricted to candidacy in psychology). May be repeated for degree credit.

PSYC 399VH. Honors Course. 1-6 Hour.
Honors course. Prerequisite: Junior standing and instructor's permission. May be repeated for up to 12 hours of degree credit.

PSYC 4033. Educational Psychology. 3 Hours.
Psychological theories and concepts applied to the educational process. Investigates the learner and instructional variables in a wide range of educational settings. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4053. Psychological Tests. 3 Hours.
Nature and theory of individual and group tests of intelligence, personality, interests, and attitudes. Prerequisite: Nine hours of psychology, including a C or better in PSYC 2013.

PSYC 4063. Psychology of Personality. 3 Hours.
Theories and representative research concerning the development and nature of the normal personality. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4073. Psychology of Learning. 3 Hours.
Theories and representative research on basic principles of learning and memory in both animals and humans. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4083. Advanced Research. 3 Hours.
A lecture/laboratory course covering research in a specialized area of psychology. Provides experience with design, conduct, analysis, and presentation of research projects related to class topics. Successful completion of the class, including a formal paper in APA style, with a grade of C or better will fulfill the senior writing requirement. Prerequisite: Eighteen hours of psychology including a grade of at least a C in PSYC 3073 and senior standing.

PSYC 409V. Psychology Seminar (Irregular). 1-3 Hour.
Provides intensive coverage of specialized psychological topics. Prerequisite: Six hours of psychology, not including PSYC 2013. May be repeated for up to 18 hours of degree credit.

PSYC 4123. Perception. 3 Hours.
Theories and representative research in the areas of sensation and perception. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4143. History and Systems of Psychology. 3 Hours.
Examination of the concepts, methods, and systems which have contributed to the development of modern psychology. Prerequisite: Fifteen hours of psychology and senior standing.

PSYC 4183. Behavioral Neuroscience. 3 Hours.
Examination of the biological basis of behavior. Surveys the anatomy, physiology, and pharmacology of the mammalian brain and examines brain mechanisms underlying a wide range of behaviors and cognitive processes. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4193. Comparative Psychology. 3 Hours.
Analysis of animal behavior from an evolutionary perspective, with emphasis on the role of the environment and interactions with other animals in shaping the evolution of behavior within a species, and the evolution of differences in behavior between species. Prerequisite: Six hours of psychology, not including PSYC 2013.

PSYC 4283. Advanced Seminar. 3 Hours.
A seminar/discussion class covering research in specialized areas of psychology. Students will read original sources and present their ideas and conclusions several formats. Successful completion of the class, including a formal paper in APA style, with a grade of C or better will fulfill the senior writing requirement. Prerequisite: Eighteen hours of psychology including a grade of at least a C in PSYC 3073; senior standing. May be repeated for up to 6 hours of degree credit.

PSYC 5013. Advanced Developmental Psychology. 3 Hours.
Critical examination of the research relevant to the psychological factors influencing the growth processes of the individual from birth to maturity.
PSYC 5023. Neuropsychological Assessment. 3 Hours.
Introduction to the principles, techniques, and tools of assessment in clinical neuropsychology. Includes training in the interpretation, integration, and reporting of results. Prerequisite: PSYC 5043 and enrollment in the Psychology graduate program.

PSYC 5033. Psychopathology Theory & Assessment. 3 Hours.
Psychological and somatic factors contributing to pathological behavior. Interrelations of these factors will be analyzed in terms of how they lead to differential abnormal states. Includes guidelines for using structured interviews in the diagnosis and clinical assessment of major psychological disorders. Prerequisite: PSYC 3023 and enrollment in the Graduate Program in Psychology, or instructor consent.

PSYC 5043. Assessment of Intellectual and Cognitive Abilities. 3 Hours.
Training in the theory, administration and interpretation of individual tests of intelligence and mental ability. Prerequisite: PSYC 4053 and enrollment in the Psychology Graduate Program.

PSYC 5063. Advanced Social Psychology. 3 Hours.
Theory, methodology, and contemporary research in the major areas of social psychology. Topics include attitude theory and measurement, group processes, social and cultural factors.

PSYC 5073. Introduction to Clinical Practice: Core Skills and Ethical Guidelines. 3 Hours.
An introduction to clinical practice focusing on a) interview methods and techniques and b) ethical principles and guidelines. Includes an introduction to clinic policies and procedures. Prerequisite: Enrollment in the Psychology graduate program.

PSYC 5080. Observational Practicum. 0 Hours.
Observation of senior therapists in the provision of psychodiagnostic and psychotherapeutic techniques. Pre- or Corequisite: Psychology Ph.D students only. May be repeated for up to 0 hours of degree credit.

PSYC 5113. Theories of Learning. 3 Hours.
Major concepts in each of the important theories of learning.

PSYC 5123. Cognitive Psychology. 3 Hours.
Contemporary theories and research on human information processing including topics such as memory, language, thinking, and problem solving.

PSYC 5133. Inferential Statistics for Psychology. 3 Hours.
Inferential statistics, including representative parametric tests of significance. Special emphasis on analysis of variance, covariance, and component variance estimators as applied to psychological research. Prerequisite: PSYC 2033.

PSYC 5143. Advanced Descriptive Statistics for Psychology. 3 Hours.
Special correlation techniques followed by a survey of representative nonparametric tests of significance. Major emphasis on advanced analysis of variance theory and designs. Prerequisite: PSYC 5133.

PSYC 5153. Advanced History and Systems of Psychology. 3 Hours.
Advanced examination of the concepts, methods, and systems which have contributed to the development of modern psychology.

PSYC 5163. Personality: Theory & Assessment. 3 Hours.
An introduction to empirically based theories of personality and personality disorders with an emphasis on standardized instruments in the assessment of normative and pathological personality. Includes training in the interpretation, integration, and reporting of results. Pre- or Corequisite: PSYC 5043. Prerequisite: Enrollment in the Psychology graduate program or instructor consent.

PSYC 523V. Research Practicum. 1-3 Hour.
Presentation, evaluation, and discussion of on-going research proposals. Required of all experimental graduate students in the first 2 years of their program.

PSYC 5313. Introduction to Clinical Science: Research Design and Ethical Guidelines. 3 Hours.
Provides a) guidelines for designing and conducting empirical research in clinical psychology, b) ethical principles that regulate clinical research, and c) supervised opportunities to develop a clinical research proposal. Prerequisite: Enrollment in the Psychology graduate program.

PSYC 5463. Descriptive Linguistics. 3 Hours.
This course aims to approach a scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages.

This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

PSYC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

PSYC 602V. Seminar: Teaching Psychology. 1-3 Hour.
Survey of the literature on teaching of psychology in college. Includes: planning the course, method, examining and advising students. Prerequisite: Teaching assistant.

PSYC 607V. Clinical Practicum III. 1-3 Hour.
Provides supervised experience in the application of the more complex and lesser known psychodiagnostic techniques and training and experience in psychotherapeutic techniques with the more severe functional disorders, with special topics in these domains emphasized across sections. Prerequisite: PSYC 5073; Enrollment in the Psychology graduate program. May be repeated for degree credit.

PSYC 609V. Clinical Graduate Seminar. 1-3 Hour.
Provides intensive coverage of specialized clinical topics. Open to all graduate students. May be repeated for up to 9 hours of degree credit.

PSYC 611V. Individual Research. 1-18 Hour.
Individual research. May be repeated for up to 18 hours of degree credit.

PSYC 6133. Advanced Behavioral Neuroscience. 3 Hours.
Examination of the biological basis of behavior, with emphasis on underlying neural mechanisms.

PSYC 6163. Psychotherapy. 3 Hours.
A conceptual overview of psychotherapy, with emphasis on a) common mechanisms, and b) cognitive, affective, and interpersonal approaches. Prerequisite: PSYC 5033.

PSYC 6213. Psychotherapy Outcomes. 3 Hours.
Provides a critical evaluation of theory and research on empirically supported programs and interventions for major psychological disorders. Prerequisite: Enrollment in the Psychology graduate program.

PSYC 6323. Seminar in Developmental Psychology. 3 Hours.
Discussion of selected topics in the area of human development. Emphasis will be on a review of current theory and empirical research. Topics selected for discussion could range from early development (child psychology), to later development (psychology of adulthood and aging-gerontology), to current attempts to integrate the field (life-span developmental psychology).

PSYC 6343. Seminar in Quantitative Methods. 3 Hours.
Discussion of selected mathematical approaches to theorizing and research in psychology. Emphasis will be on generalization of a given approach across several content areas of psychology. Hence, while each area must be treated in reasonable depth, current thinking and research spanning more than one content area will be stressed.

PSYC 6353. Seminar in Learning/Memory/Cognition. 3 Hours.
Discussion of selected topics in learning, memory, or cognition. Emphasis on current theory and empirical research. Topics selected for discussion may be in the areas of learning, memory, problem solving, or language.
PSYC 6373. Seminar in Personality and Social Psychology. 3 Hours.
Discussion of selected topics in social psychology and personality. Current
theoretical positions and recent research findings are emphasized. Topics selected
for discussion will be in areas of intrapersonal processes, interpersonal processes,
group processes or any of various areas of personality.

PSYC 6413. Seminar in Physiological Psychology. 3 Hours.
Discussion of selected topics in physiological psychology. Emphasis will be on a
review of current theory and empirical research. Each offering of the seminar will
examine the biological basis of a specific aspect of behavior, utilizing both animal
and human data.

PSYC 698V. Field Work. 1-3 Hour.
Provides academic credit for field work in multidisciplinary setting, involving
supervised experiences in assessment and psychotherapy. May be repeated for
degree credit.

PSYC 699V. Clinical Psychology Internship. 1-3 Hour.
Supervised experience in a multidisciplinary setting of assessment and
psychotherapy. May be repeated for degree credit.

PSYC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Public Administration (PADM)

Courses

PADM 5803. Quantitative Methods Analysis. 3 Hours.
Data analysis techniques, including descriptive and inferential statistics and
packaged computer programs. Prerequisite: Graduate standing.

PADM 5813. Methods in Public Management Information (Sp). 3 Hours.
Nature and use of public information systems. Includes: basic understanding
of hardware, applications, network, and communication technologies, data and
information; their use for data analysis and management, and decision support;
discussion of technologies’ societal impact, and security and ethical considerations.
Prerequisite: Graduate standing.

PADM 5823. Grant Writing for the Social Sciences. 3 Hours.
This course will teach students the fundamentals of obtaining grants from local, state
and federal agencies.

PADM 5833. Urban Planning. 3 Hours.
Reviews the many forms, functions, and purposes of American cities. Covers basic
planning theories, surveys the various sub-fields of planning, discusses trends in the
planning field, and utilizes computer simulations.
This course is cross-listed with PLSC 4103.

PADM 584V. Special Topics in Public Administration. 1-3 Hour.
Topic varies. Prerequisite: PLSC 5193. May be repeated for up to 6 hours of degree
credit.

PADM 5853. Performance Measurement in the Public and Nonprofit Sectors. 3 Hours.
Provides a hands-on approach for measuring organizational performance and using
performance information of decision making. Addresses components and key issues of
performance measurement, such as steps in the measurement process, methods
of data gathering, and analysis. Prerequisite: PLSC 5193.

PADM 5863. Issues in Public and Nonprofit Management. 3 Hours.
Explores current developments and themes in the theory and practice of public
and nonprofit management. Covers a range of contemporary issues in the field,
such as managing collaborative networks, e-government, and managing for results.
Emerging trends are intensively discussed at the juncture of theory and practice.

PADM 587V. Professional Development. 1-6 Hour.
Encompasses internships, professional projects if individual is employed full-time
and not eligible for an internship, conference and workshop participation, and other
activities conducive to the students development as a public service professional.

PADM 588V. Directed Readings. 1-3 Hour.
Directed readings. Prerequisite: Graduate standing.

PADM 589V. Independent Research. 1-3 Hour.
Independent Research. Prerequisite: Graduate standing.

PADM 5903. Risk and Public Policy. 3 Hours.
Examines how concepts of risk serve to justify and shape public policies and risk
management practices.

PADM 5913. Policy Analysis: Theory and Practice. 3 Hours.
Provides a firm theoretical foundation in, and an ability to apply, the general
instruments necessary for professional practice of policy analysis.

Public Health (PBHL)

Courses

PBHL 1103. Personal Health and Safety. 3 Hours.
Health and safety problems with emphasis on the promotion of individual health and
safety.

PBHL 1103H. Honors Personal Health and Safety. 3 Hours.
Health and safety problems with emphasis on the promotion of individual health and
safety. Prerequisite: Honors standing.
This course is equivalent to PBHL 1103.

PBHL 1203. Prevention of Drug Abuse. 3 Hours.
Provides an overview of drugs of use and abuse in society. Also assists the student
in evaluating drug abuse prevention approaches for public, private, or community
settings.

PBHL 1303. Introduction to Human Sexuality. 3 Hours.
An examination of human sexuality with a critical analysis of male and female
attitudes and values affecting self-understanding and gender identity.

PBHL 1303H. Honors Introduction to Human Sexuality. 3 Hours.
An examination of human sexuality with a critical analysis of male and female
attitudes and values affecting self-understanding and gender identity.
This course is equivalent to PBHL 1303.

PBHL 2101. Special Topics. 1 Hour.
Examination and application of health promotion concepts based on individualized
health hazard appraisal. (Not to replace content courses leading to teacher
certification in health education). May be repeated for up to 5 hours of degree credit.

PBHL 2663. Terminology for the Health Professions. 3 Hours.
Emphasis is on word roots and combined forms of words describing various facets of
health and disease. Descriptive definitions with application of practical significance
included for the health professional.

PBHL 310V. Seminar in Public Health. 1-3 Hour.
Syntesis and critical analysis of current literature in the area of community health
promotion. Prerequisite: PBHL majors only. May be repeated for up to 12 hours of
degree credit.
PBHL 3202. Health Care and Public Health Policy. 2 Hours.
This course provides an introduction to health care services, inclusive of the characteristics and structure of the U.S. health care delivery system and comparison to other health systems. Aspects of public health policy, laws, ethics, and economics will be examined. Upon completion of the course, students are expected to demonstrate an understanding of the key elements of the health care industry as it pertains to medical care and public health, including an understanding of the roles of health care providers, public and private payers, the role of government, and challenges facing health care systems. Pre- or Corequisite: PBHL 1103 and PBHL 2613.

PBHL 3202H. Honors Health Care and Public Health Policy. 2 Hours.
This course provides an introduction to health care services, inclusive of the characteristics and structure of the U.S. health care delivery system and comparison to other health systems. Aspects of public health policy, laws, ethics, and economics will be examined. Upon completion of the course, students are expected to demonstrate an understanding of the key elements of the health care industry as it pertains to medical care and public health, including an understanding of the roles of health care providers, public and private payers, the role of government, and challenges facing health care systems. Pre- or Corequisite: PBHL 1103 and PBHL 2613 and honors standing.

This course is equivalent to PBHL 3202.

PBHL 333V. Research in Public Health. 1-3 Hour.
This course is intended for undergraduate students who wish to gain research experience under the direction of a faculty mentor. Students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The directed research course places more emphasis on the students' role as a researcher in an academic setting. Prerequisite: Instructor consent. May be repeated for up to 9 hours of degree credit.

PBHL 333VH. Honors Research in Public Health. 1-3 Hour.
This course is intended for undergraduate students who wish to gain research experience under the direction of a faculty mentor. Students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The directed research course places more emphasis on the students' role as a researcher in an academic setting. Prerequisite: Instructor consent. May be repeated for up to 9 hours of degree credit.

PBHL 3443. Introduction to Public Health. 3 Hours.
This course is intended for undergraduate students and will focus on the foundations of public health as a profession and its future outlook. Public health concepts and practice. Topics include philosophy, purpose, history, organization, functions, tools, activities and results at national, state, and community levels.

PBHL 3633. First Responder-First Aid. 3 Hours.
Prepares persons to administer cardiopulmonary resuscitation and emergency aid to victims of serious bleeding, poisoning, shock, fracture, and other forms of injury until emergency medical services personnel arrive at the scene.

PBHL 3643. Public Health Program Planning and Evaluation. 3 Hours.
Emphasis on community analysis; defining and verifying community health problems; establishing program goals; defining and assessing health behaviors; formulating educational goals, objectives, methods, and activities; promoting programs; and designing program evaluation.

PBHL 3663. Principles and Practice of Mental Health Promotion. 3 Hours.
Understanding and practicing the principles of sound mental health are key elements in achieving high level wellness. This course encourages students’ exploration of the mental dimensions of holistic health and presents strategies to achieve a more healthful balance in life.

PBHL 3683. Health Care Consumerism. 3 Hours.
Study of products and services provided by the health care delivery system; an analysis of those components lacking scientific credibility, yet promoted for the maintenance or restoration of health status.

PBHL 3683H. Honors Health Care Consumerism. 3 Hours.
Study of products and services provided by the health care delivery system; an analysis of those components lacking scientific credibility, yet promoted for the maintenance or restoration of health status. This course is equivalent to PBHL 3683.

PBHL 3901H. Honors Public Health Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy.

PBHL 4043. Internship in Public Health. 3 Hours.
Designed to provide the student with an extended work experience in a selected community/public health program. The student works under college supervision with a professional in the health care delivery field. Pre- or Corequisite: PBHL 3643 and PBHL 4603. Prerequisite: Senior standing and successful completion of PBHL 1103 and PBHL 2663. May be repeated for up to 6 hours of degree credit.

PBHL 410V. Global Health: Issues, Concepts and Perspectives. 3-6 Hour.
Emphasis placed on needs assessment, development, implementation, evaluation, and sustainability of public health initiatives designed to improve the health and well-being of community members at all levels of the health continuum; topics of focus will include determinants of health, mental health, environmental health, nutrition, maternal and child health, sexual health, injuries and chronic and infectious diseases. Prerequisite: Approval from Study Abroad to participate in the Community Development Service Learning Program.

This course is equivalent to PBHL 410V.

PBHL 4401. Certified Health Education Specialist: Responsibilities and Competencies. 1 Hour.
This course is an overview of the competencies necessary for being a Certified Health Education Specialist (CHES), and also of the concepts and skills required for carrying out effective health education programs in a variety of different settings, including School, Community, Health Care and Worksite settings. Through a combination of self study, seminar discussions, and research projects, a thorough understanding of the competencies and core concepts in the fields of public health and health promotion will be attained. While the emphasis of the course is placed on studying for the CHES examination, the course will also provide a format to further your preparation as a professional health educator. Prerequisite: PBHL major.

PBHL 4553. Environmental Health. 3 Hours.
This course explores current environmental problems and issues related to public health. Topics include health risk assessment, management, and communication; sources of pollution, environmental and health effects of war, food safety and other environmental health topics. Also discussed are the roles of the environment in human health and disease, the basic principles of environmental health practice, and major environmental health legislation and policy. Format for course will include lecture web based seminars, and small group seminars.
PBHL 4603. Health Behavior: Theories and Application. 3 Hours.
Understanding the reasons for health behavior is vital for the health education professional. It is necessary to assist in the development of services and programs that are likely to move an individual from an unhealthy behavior to one that is more appropriate for a healthy lifestyle. This course surveys the major health behavior theories used in health education and applications of the theories will be used in the class. Prerequisite: PBHL 2613.

PBHL 4613. Principles of Epidemiology. 3 Hours.
Distribution and patterns of disease or physiological conditions within populations; an examination of the nature of epidemiological research.

PBHL 4623. Human Diseases. 3 Hours.
An examination of the variety, behavior, distribution, and management of both infectious and noninfectious diseases in human populations. Prerequisite: BIOL 1603 (or BIOL 1543 and BIOL 1541L).

PBHL 4643. Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Students will also develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Senior standing or consent.

PBHL 4643H. Honors Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Students will also develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Senior standing or consent.

This course is equivalent to PBHL 4643.

PBHL 498VH. Honors Public Health Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy and PBHL 3901H. May be repeated for up to 3 hours of degree credit.

PBHL 5023. Teaching in Community Health Promotion. 3 Hours.
Examination and practical exposure to the principles and practices of undergraduate teaching in public health. Includes course planning, teaching techniques, assessment strategies, and supervised practice. Prerequisite: Admission to the M.S. or Ph.D. program in Community Health Promotion. May be repeated for up to 3 hours of degree credit.

PBHL 5213. Evaluation of Public Health Programs. 3 Hours.
This seminar style course is designed to provide students with exposure to different types of program evaluation, including needs assessment, formative evaluation, process evaluation, and outcome and impact evaluation. The course covers theoretical frameworks supporting evaluation, ethics in evaluation, methods for data collection, reporting evaluation findings, and strengths and limitations of conducting program evaluation. Prerequisite: PBHL 5563 and HHPR 5353.

PBHL 5533. Health Counseling. 3 Hours.
A review of the role and function of the health counselor including a focus on problem solving approaches for coping with daily problems of living, decision making, and life style planning.

PBHL 5533. Theories of Social and Behavioral Determinants of Health. 3 Hours.
This course will provide a basic foundation in the social and behavioral sciences relevant to public health. Students will learn the role of social and behavioral determinants in the health of individuals and of populations. Then, students will learn models and theories of health behavior, both generally and specifically. Generally, the student will learn how to identify, analyze, and use theoretical constructs and principles with particular attention to the use of theory in professional public health practice. Specifically, the student will learn the constructs and principles of several theories commonly used in public health behavior research and intervention design. The course will cover the four major individual that focus on intrapersonal factors (i.e., Health Belief Model, Transtheoretical Model, Theory of Reasoned Action/Planned Behavior, and Social Cognitive Theory) as well as several social, organizational, and community theories that are beyond the individual level.

PBHL 5543. Contemporary Issues in Human Sexuality. 3 Hours.
Indepth analysis of the social, biological, and behavioral factors associated with the development of one's sexuality.

PBHL 5563. Public Health: Practices and Planning. 3 Hours.
Acquaints the student with the structure, functions, and current problems in public health and with the role of education in public health. Prevention and control practices and planning will be emphasized. Prerequisite: PBHL 5573.

PBHL 5573. Principles of Health Education. 3 Hours.
Current trends, basic issues, controversial issues, and fundamental principles of health education.

PBHL 5613. Epidemiology. 3 Hours.
This course will present principles and practices related to the prevention and control of health-related conditions in the human population. Emphasis will be placed on understanding the concepts of epidemiology, including aspects of disease distribution, epidemiologic methods, risk of disease and injury, descriptive and analytic epidemiologic methods and study designs, and application of epidemiologic data to the prevention and control of disease. Format will include lecture and small group seminars.

PBHL 5633. Health Services Administration. 3 Hours.
Emphasis is on an examination of administrative factors related to health services. Administrative and professional authority, boards, consumers, delivery of services, federal role, and cost containment will also be addressed.

PBHL 5643. Multicultural Health. 3 Hours.
Through lecture, discussion, simulations, and case studies, students will develop an appreciation for the cultural traditions and practices of different groups. The importance and implications of these traditions on health outcomes and health status will be examined. Particular attention will be paid to the role of the public health educator in mediating the impact of health disparities, including advocacy. Students will develop skills of cultural competence that are essential for public health practitioners today. Prerequisite: Graduate standing or consent.

PBHL 574V. Internship. 1-6 Hour.
Internship in health behavior and health promotion. May be repeated for up to 6 hours of degree credit.

PBHL 589V. Independent Research. 1-6 Hour.
Development, implementation, and completion of graduate research project. Prerequisite: M.S. degree in Community Health Promotion and HHPR 5353 and ESRM 5393.

PBHL 600V. Master's Thesis. 1-6 Hour.
Thesis in health behavior and health promotion. May be repeated for degree credit.
PBHL 6013. Advanced Directed Research. 3 Hours.
This course is intended for doctoral students who wish to pursue research under the direction of a faculty member. In this course, doctoral students will work independently and collaborate with faculty member(s) and fellow students to conduct research in a specified area of interest. The purpose of the course is for the student to develop knowledge in her/his own domain, strengthen her/his research skills, and work collaboratively on research projects. The course will aim for students to present research findings at conferences and/or publish research findings in peer reviewed journals. The directed research course places more emphasis on the students’ role as a researcher in an academic setting. Prerequisite: Admission to the Ph.D. program in Community Health Promotion. May be repeated for up to 9 hours of degree credit.

PBHL 605V. Independent Study. 1-6 Hour.
Provides students with an opportunity to pursue special study of education problems. May be repeated for up to 6 hours of degree credit.

PBHL 6333. Health Behavior Research. 3 Hours.
A review of human behavior and its relationship to health and wellbeing. Focuses on contemporary health behavior research and instrumentation.

PBHL 6553. Environmental Health. 3 Hours.
An analysis and evaluation of the various environmental factors that influence our health. Causes of problem factors are identified and solutions proposed for improving environmental conditions.

PBHL 6733. Health and the Aging Process. 3 Hours.
An overview of the health-related issues facing elderly populations with in-depth study of the biological and behavioral changes associated with aging.

PBHL 6803. Health Communication Theory, Research and Practice. 3 Hours.
This course is designed to acquaint you with the role of communication in health education and with basic principles and practices in interpersonal, group, and mass communication. Health communication theory will be discussed in the first part of the semester, followed by important research in the area of health communication, and finally putting to practice the material will be the terminal experience for the course.

PBHL 6833. Principles of Epidemiology II. 3 Hours.
Provides students with knowledge and skills necessary to design, conduct, and interpret observational epidemiological concepts, sources of data, prospective cohort studies, retrospective cohort studies, case-control studies, cross-sectional studies, methods of sampling, estimating sample size, questionnaire design, and effects of measurement error. Corequisite: ESRM 5393 or ESRM 6403.

PBHL 699V. Seminar. 1-6 Hour.
Discussion of selected topics and review of current literature in community health promotion. Prerequisite: Advanced graduate standing. May be repeated for up to 12 hours of degree credit.

Public Policy (PUBP) Courses

PUBP 6001. Pro-Seminar. 1 Hour.
An introduction to the field of public policy and to the program. The seminar will address topics such as the meaning of public policy, policy research, the dissertation process, and particular issues of public policy concern. Prerequisite: Admission to program.

PUBP 6013. Theories of Public Policy. 3 Hours.
This seminar introduces doctoral students to the major concepts, frameworks, and theories of public policy. Emphasis is on the usefulness and limitations of these frameworks and theories in empirical research. Prerequisite: Graduate standing.

PUBP 6023. Law and Public Policy. 3 Hours.
This course focuses on the legal aspects of public policy, with emphasis on the regulatory process and its legal constraints. Also considered are the process of administrative decision making, judicial review, legislative oversight, and public access to government information.

PUBP 6033. Community Development Policy and Practice. 3 Hours.
This course examines multiple community development definitions, the community capitals framework as well as theories, conceptual frameworks and processes and how these are linked, both historically and currently, to broad-based US public policy and specifically, housing and workforce development policies.

PUBP 604V. Special Topics in Public Policy. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. May be repeated for up to 6 hours of degree credit.

PUBP 6103. Policy Planning, Implementation, and Evaluation. 3 Hours.
This interdisciplinary seminar will explore the relationship between policy, public administration, and organizations in the community. Stakeholder groups will be considered as part of the newer approaches to practice-driven scholarship. The class will examine innovative approaches to decision making, strategic management and policy leadership in complex interorganizational and interagency settings.

PUBP 6113. Agenda Setting and Policy Formulation. 3 Hours.
Introduces agenda and policy formation focusing on the classic theoretical and empirical literature. The course is designed to introduce graduate students to a variety of theories typologies, concepts, and ideas relating to the study of public policy.

PUBP 612V. Research Problems in Policy. 1-6 Hour.
Research problems. May be repeated for up to 6 hours of degree credit.

PUBP 6134. Capstone Seminar in Public Policy. 4 Hours.
This course is intended to integrate various policy interests in a specific community based project. Prerequisite: Instructor permission required.

PBHL 6553. Environmental Health. 3 Hours.
An analysis and evaluation of the various environmental factors that influence our health. Causes of problem factors are identified and solutions proposed for improving environmental conditions.

PBHL 6733. Health and the Aging Process. 3 Hours.
An overview of the health-related issues facing elderly populations with in-depth study of the biological and behavioral changes associated with aging.

PBHL 6803. Health Communication Theory, Research and Practice. 3 Hours.
This course is designed to acquaint you with the role of communication in health education and with basic principles and practices in interpersonal, group, and mass communication. Health communication theory will be discussed in the first part of the semester, followed by important research in the area of health communication, and finally putting to practice the material will be the terminal experience for the course.

PBHL 6833. Principles of Epidemiology II. 3 Hours.
Provides students with knowledge and skills necessary to design, conduct, and interpret observational epidemiological concepts, sources of data, prospective cohort studies, retrospective cohort studies, case-control studies, cross-sectional studies, methods of sampling, estimating sample size, questionnaire design, and effects of measurement error. Corequisite: ESRM 5393 or ESRM 6403.

PBHL 699V. Seminar. 1-6 Hour.
Discussion of selected topics and review of current literature in community health promotion. Prerequisite: Advanced graduate standing. May be repeated for up to 12 hours of degree credit.

Public Policy (PUBP) Courses

PUBP 6001. Pro-Seminar. 1 Hour.
An introduction to the field of public policy and to the program. The seminar will address topics such as the meaning of public policy, policy research, the dissertation process, and particular issues of public policy concern. Prerequisite: Admission to program.

PUBP 6013. Theories of Public Policy. 3 Hours.
This seminar introduces doctoral students to the major concepts, frameworks, and theories of public policy. Emphasis is on the usefulness and limitations of these frameworks and theories in empirical research. Prerequisite: Graduate standing.

PUBP 6023. Law and Public Policy. 3 Hours.
This course focuses on the legal aspects of public policy, with emphasis on the regulatory process and its legal constraints. Also considered are the process of administrative decision making, judicial review, legislative oversight, and public access to government information.

Recreation and Sport Management (RESM) Courses

RESM 1003. Professional Foundations of Recreation and Sport Management. 3 Hours.
An analysis of the historical and philosophical development of recreation, sport and leisure. Theories of play, recreation, sport and leisure are studied. Economic, political, technical, and social forces are examined as these influence recreation, sport, parks, and leisure services is examined in context with diverse service delivery systems. Prerequisite: RESM major or RESM minor or instructor consent.

RESM 1023. Recreation and Natural Resources. 3 Hours.
An examination of the use and management of natural resources for outdoor recreation with consideration of multiple use, environmental ethics, risk management, and other current considerations. Several field visits will be required as part of the class, including a weekend outing. Prerequisite: RESM major or RESM minor or by instructor consent.

RESM 2011. Recreation and Sport Practicum. 1 Hour.
Students are assigned to assist in leisure-oriented programs for exposure to organizational structure, services, and programming of cooperating recreational and sport agencies. Students may take 1-3 hours per semester; each credit hour is a 45-hour experience. Students must complete 3 different experiences before internship. Prerequisite: RESM 1003 with a grade of C or better. May be repeated for up to 3 hours of degree credit.
RESM 2063. Commercial Recreation and Sport. 3 Hours.
Examination of the commercial recreation and sport industries. The operational requirement of a wide range of recreation businesses will be studied. Case study and field investigation methods will be emphasized. Prerequisite: RESM 1003 with a grade of C or better.

RESM 2093. Inclusive and Special Recreation and Sport. 3 Hours.
An introduction to the basic concepts of inclusive and special recreation and sport services integrated with knowledge and skill sets required to provide accessible recreation and leisure programming for people with disabilities. Prerequisite: RESM 1003 with a grade of C or better.

RESM 2813. Recreation and Sport Leadership. 3 Hours.
Development of knowledge related to leadership theory, group dynamics, and face to face leadership techniques. Students gain an understanding of leadership theories as they are applied in a field setting. Pre- or Corequisite: COMM 1313. Prerequisite: RESM 1003 with a grade of C or better.

RESM 2853. Leisure and Society. 3 Hours.
This course is an examination of leisure and its effect on society. Course content includes identification and exploration of motivating factors related to various traditional and contemporary leisure expressions as it occurs across diverse populations.

RESM 2853H. Honors Leisure and Society. 3 Hours.
This course is an examination of leisure and its effect on society. Course content includes identification and exploration of motivating factors related to various traditional and contemporary leisure expressions as it occurs across diverse populations.
This course is equivalent to RESM 2853.

RESM 3023. Sport Management Fundamentals. 3 Hours.
This course is designed to present an overview of the fundamentals of sport management in professional and intercollegiate sport, as well as issues facing sport organizations and how management techniques can be applied to solve sport business problems. A description of career opportunities in sport will be presented with special interest in helping the student design a course of study that best meets his/her goals. Prerequisite: RESM 1003 with a grade of C or better.

RESM 3833. Program Planning in Recreation and Sport. 3 Hours.
Development of the fundamentals of program planning using modern techniques of identifying and analyzing program activity areas and community needs. Includes program development and application with a variety of population groups and representative leisure service areas. Prerequisite: RESM 1003 with a grade of C or better.

RESM 3843. Recreation and Sport Facilities. 3 Hours.
Planning concepts, design principles, and maintenance techniques are emphasized. Also, technical design concepts and firsthand experiences in maintenance of facilities are included. Prerequisite: RESM 1003 with a grade of C or better.

RESM 3873. Sport and Recreation Risk Management. 3 Hours.
In-depth look at risk management and related legal issues affecting recreation and sport administration. Pre- or Corequisite: RESM major or RESM minor or by instructor consent. Prerequisite: Junior standing, and RESM 1003 with a grade of C or better.

RESM 3883. Marketing and Promotion in Recreation and Sport Management. 3 Hours.
This course provides an overview of the principles and practices of promotions and marketing in the recreation and sport industry. Topics include sport marketing planning, market segmentation and identification of the target market, marketing mix, and sponsorship. Credits: three hours. Prerequisite: RESM 1003 with a grade of C, and ECON 2143 or ECON 2013 and ECON 2023.

RESM 3901H. Honors Recreation and Sport Management Thesis Tutorial. 1 Hour.
Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and RESM 1003 with a grade of C or better.

RESM 4003. Management in Recreation and Sport. 3 Hours.
Management techniques for recreation and sport programs and facilities. Prerequisite: RESM 1003 with a grade of C or better.

RESM 4013. Contemporary Issues in Leisure and Sport. 3 Hours.
Discussion of selected topics and review of current literature in the recreation and sport field. Analysis of current trends and professional issues are emphasized. Certification at the instructor level or higher in at least 2 areas of expertise must be completed before a grade is assigned in this course. Prerequisite: Senior standing and RESM 1003 with a grade of C or better.

RESM 4023. Outdoor Adventure Leadership. 3 Hours.
This course considers the values and scope of outdoor recreation programs, leadership and skill development with practical experience in a wilderness environment. The course will include a canoe trip through the wilderness, and skill training in such areas as orienteering and rock climbing; and leadership development in interpersonal and processing skills. The graduate portion of the class is geared toward leading and trip planning for taking college age and older students into remote areas.

RESM 405V. Independent Study in Recreation and Sport. 1-3 Hour.
Provides student an opportunity to pursue special study of research problems. May be repeated for degree credit.

RESM 4083. Research in Recreation and Sport. 3 Hours.
An introduction to the applied methods and techniques of research and evaluation in recreation and sport services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process. Prerequisite: Senior standing and RESM 1003 with a grade of C or better.

RESM 4083H. Honors Research in Recreation and Sport. 3 Hours.
An introduction to the applied methods and techniques of research and evaluation in recreation and sport services. General consideration given to research applications such as needs assessment, program evaluation, and marketing studies. Emphasis placed on the logic underlying the research process. Prerequisite: Honors candidacy and RESM 1003 with a grade of C or better.
This course is equivalent to RESM 4083.

RESM 4273. The Intramural Sports Program. 3 Hours.
Historical development, aim and objectives, organization, administration, units of competition, program of activities, schedule making, scoring plans, rules and regulations, awards, and special administrative problems.

RESM 404V. Internship. 1-12 Hour.
This experiential based course requires 40 hours per week of work in an approved agency for a full semester. It is recommended that students register for the summer session after completion of their course work. Prerequisite: RESM 3873 and two hours of RESM 2011 with grades of C or better.

RESM 4411. Pre-Internship Preparation. 1 Hour.
Enables student preparation for internship experiences and eventual employment. Course will assist students in preparation of resumes; provide opportunities for interview practice; the development of job search and application skills, as well as other requisites for entering the professional workforce. Prerequisite: Senior standing and RESM 1003 with a grade of C or better.

RESM 480V. Workshop. 1-3 Hour.
Workshop. May be repeated for up to 3 hours of degree credit.
RESM 498VH. Honors Recreation and Sport Management Thesis/Project. 1-3 Hour.
Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work “one-on-one” to complete the honors thesis/project. Prerequisite: Honors candidacy and RESM 3901H. May be repeated for up to 3 hours of degree credit.

RESM 5293. Athletics and Higher Education. 3 Hours.
This course features an examination of the historical development of athletics within American institutions of higher learning with an emphasis upon concepts and ideals that underlie the developments and the major problems affecting contemporary intercollegiate athletics. The purpose of this course is to teach the learner about the development of intercollegiate athletics from the mid-19th century to today. A second purpose of this course is to examine the major issues facing sport administrators within intercollegiate athletics today.

RESM 5333. Sports Media and Public Relations. 3 Hours.
The course will explore the relationship between media organizations and sport organizations, with an emphasis on the business of media rights, as well as public relations theories such as two-way symmetrical communication and agenda setting. Finally, the course will examine practical communication tactics employed by public relations practitioners such as image repair and crisis communications, and the issues presented by forms of new media.

RESM 5463. Sports Facilities Management. 3 Hours.
Considers basic elements and procedures in the planning, design, construction, operation, and maintenance of sport facilities; management considerations in conducting various types of events.

RESM 560V. Workshop. 1-3 Hour.
Workshop. May be repeated for up to 3 hours of degree credit.

RESM 574V. Internship. 1-3 Hour.
This experiential-based course requires 135 hours per semester of work in a recreation or sport setting.

RESM 5813. Social Issues in Sport. 3 Hours.
Using sociological theories and scholarship to examine social and cultural influences on sport and physical activity. Course is based on a social justice framework and a cultural studies perspective.

RESM 5833. Recreation and Sport for Special Populations. 3 Hours.
Skills, knowledge, and concepts within recreation and sport which are appropriate to planning and implementing recreation and sport programs and services for the handicapped.

RESM 5843. Tourism. 3 Hours.
Explores major concepts of tourism to discover what makes tourism work, how tourism is organized, and its social and economic effects.

RESM 5853. Capstone in Recreation and Sport Management. 3 Hours.
Capstone course where students utilize program courses to solve administrative issues which may arise in an organization. Attention is given to how departmental organization, administrative practices and policies, strategic planning, personnel management, finances, and legal areas are integrated to create solutions to broad-based contemporary issues.

RESM 5873. Leadership in Recreation and Sport Management Services. 3 Hours.
Considers research, theory, and practical applications of leadership principles utilized in the provision of recreation and sport management services. Focus is on motivation, attitude, communication, group dynamics, and problem solving.

RESM 5883. Recreation and Sport Services Promotion. 3 Hours.
Examines specific strategies for promoting recreation and sport programs in the local community.

RESM 5893. Public and Private Finance in Recreation and Sport Management. 3 Hours.
Develops an understanding of both public and private finance management for students in public and private management positions. Provides an understanding of the budgeting processes and techniques used in obtaining and controlling funds, including private sector finance problems in areas of credit, pricing, indexing, and debt management.

RESM 600V. Master’s Thesis. 1-18 Hour.
Master’s Thesis. May be repeated for degree credit.

RESM 605V. Independent Study. 1-3 Hour.
Independent study. May be repeated for up to 3 hours of degree credit.

RESM 612V. Directed Reading in Recreation and Sport. 1-3 Hour.
Critical analysis of literature in the area of recreation and sport.

RESM 6133. Issues in RESM. 3 Hours.
A review of the significant social, demographic, behavioral, developmental, and technological issues that influence health, kinesiology, and recreation and sport management programs. Pre- or Corequisite: Doctoral level students only.

RESM 6533. Legal and Political Aspects. 3 Hours.
An overview of major legislation affecting recreation and sport management professions; how to operate within these laws; and methods for influencing new legislation. Also discusses political aspects of professions both outside and inside government agencies.

RESM 674V. Internship. 1-3 Hour.
Students will learn diverse teaching techniques and implement them in an ongoing undergraduate recreation and sport management class serving as the teaching laboratory. The “what,” “when” and “how” relative to integrating various teaching techniques with specific content areas in the class will be explored by both the student and the instructor.

Rehabilitation Education (RHAB) Courses

RHAB 534V. Supervised Rehabilitation Counseling. 1-3 Hour.
Gives the student practice in counseling under supervision with rehabilitation clients in selected settings and agencies.

RHAB 5363. Employer Relations and Placement Practicum. 3 Hours.
Students address the placement needs of rehabilitation agencies and their clients by implementing the RehabMark approach to employer development. Prerequisite: RHAB 5493.

RHAB 5373. Multicultural/Gender Issues in Rehabilitation. 3 Hours.
This course examines multicultural and gender issues of importance to rehabilitation practice and research, including study of women and men with disabilities within different minority cultures. The course uses a power analysis and a minority model of disability as a basis for understanding the relationship between disability, gender, race and ethnicity.

RHAB 5383. Theories and Foundations of Addiction. 3 Hours.
This course will introduce students to the field of addictions by defining clinical models of addiction, to include alcohol and other drugs, gambling, food, sex, criminal behavior and other types of addiction. This course will also introduce students to (a) key concepts of pharmacology, assessment, and diagnosis, (b) methods of prevention, intervention, treatment and care, (c) the impact of addiction on the family system, (d) ethics principles, and (e) the 12 core functions of practice for rehabilitation and clinical mental health professionals.

RHAB 5463. Independent Living and Community Adjustment. 3 Hours.
Study of the problems and practices involved in developing and maintaining independent living rehabilitation programs for people who are disabled physically, developmentally, and mentally.
RhAB 5493. Vocational Evaluation and Adjustment. 3 Hours.
An in-depth examination of theories and techniques related to evaluation of vocational potential and work adjustment of people with disabilities.

RhAB 5513. Professional and Legal Issues in Addiction Counseling. 3 Hours.
This course introduces students to key ethical principles and values within the field of addictions treatment and counseling. The history of the implementation of ethical principles and standards as well as specific professional codes of ethics relevant to the field of addiction (i.e., APA, CRCC, NAADAC) are thoroughly covered.

RhAB 5523. Clinical Assessment and Treatment in Addictions. 3 Hours.
This course introduces students to the process of screening, evaluation/assessment, and treatment processes within the field of addiction. This course will also address special issues related to assessment and treatment such as co-occurring disorders, cultural and gender factors, and pharmacological treatment options.

RhAB 5543. Family Constructs and Addictions Counseling. 3 Hours.
This course analyzes the impact of addictions on the family system and introduces students to the theory of marriage and family approaches used in addictions counseling. Special topics covered in the course include but are not limited to counseling women, employment issues, multicultural issues, ethics, and trauma.

RhAB 574V. Internship. 1-9 Hour.
Internship.

RhAB 599V. Seminar. 1-18 Hour.
Seminar. May be repeated for up to 18 hours of degree credit.

RhAB 605V. Independent Study. 1-18 Hour.
Independent study.

RhAB 6243. Advanced Rehabilitation Research. 3 Hours.
An advanced doctoral level course to facilitate the application of scientific values, research skills, and behavior to the generation of rehabilitation knowledge and problem solving.

RhAB 625V. Teaching Internship in Rehabilitation. 1-18 Hour.
Graduate teaching experience in the rehabilitation counseling curriculum. Under the supervision of a faculty member, will participate in the development of syllabi, course materials and examinations. Will team teach graduate rehabilitation courses with the faculty member. May be repeated for up to 18 hours of degree credit.

RhAB 6263. Clinical Supervision of Practicum Students. 3 Hours.
The study and practice of supervising master's rehabilitation counseling students in a clinical practicum setting. Prerequisite: Doctoral standing.

RhAB 675V. Internship. 1-18 Hour.
Advanced supervised practice in a rehabilitation setting.

RhAB 699V. Seminar. 1-18 Hour.
Discussion of pertinent topics and issues in the rehabilitation field. Prerequisite: Advanced graduate standing. May be repeated for up to 18 hours of degree credit.

RhAB 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. Prerequisite: Candidacy. May be repeated for degree credit.

Rural Sociology (RSOC)

Courses

RSOC 500V. Special Problems. 1-6 Hour.
Gives experience in executing research and in analyzing a sociological problem of agriculture. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

RSOC 5603. Community and Natural Resources. 3 Hours.
Introduction to the breadth of considerations involved in community resource management, including theoretical frameworks, methodological investigations and applied practices to enhance the ability of community development professionals to work with their communities to plan, develop and monitor the conservation and development of natural resources with multiple functions.

RSOC 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

RSOC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Russian (RUSS)

Courses

RUSS 1003. Elementary Russian I. 3 Hours.
Elementary Russian I.

RUSS 1013. Elementary Russian II. 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

RUSS 2003. Intermediate Russian I. 3 Hours.
Intermediate courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability.

RUSS 2013. Intermediate Russian II. 3 Hours.
Continued development of basic, speaking comprehension and writing skills and intensive development of reading skills.

RUSS 3003. Advanced Russian I. 3 Hours.
Through reading and discussing contemporary political and historical events students advance their speaking, listening, and writing skills. The course builds on and advances the language skills acquired in the 2013 Intermediate course. Prerequisite: RUSS 2013, or equivalent language skills that will be equal to four semesters of language instruction.

RUSS 3013. Introduction to Literature. 3 Hours.
Development of reading skills and introduction to literary analysis. Prerequisite: RUSS 2013 or equivalent.

RUSS 3023. Listening Comprehension. 3 Hours.
Provides intensive practice in listening to recordings taken from such sources as television broadcasts, lectures, and readings of literature. This is supplemented by conversation and by comprehension tests. Prerequisite: RUSS 2003.

RUSS 4123. Survey of Russian Literature from Its Beginning to the 1917 Revolution. 3 Hours.
The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English. This course is cross-listed with WLIT 4123.

RUSS 4133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
The instructor will discuss the historical and cultural backgrounds while focusing on major writers and will deal with literature as an outlet for social criticism. There will be textual analysis. It will be taught in English with readings in English. This course is cross-listed with WLIT 4133.

RUSS 475V. Special Investigations. 1-6 Hour.
Special investigations. May be repeated for degree credit.
STEM Education for Early Childhood (STEM)

Courses

STEM 2103. Knowing and Learning in Science and Mathematics. 3 Hours.
This course draws on scholarship in educational psychology to provide a firm foundation for the teaching of science and mathematics by exploring what it means to know and understand in these disciplines, and how that influences instructional methods and assessment. Prerequisite: ARSC 1201 or instructor consent.

STEM 2203. Classroom Interactions. 3 Hours.
This course examines the interplay between teachers, students, and content, and how such interactions enable students to develop deep conceptual understanding of science and mathematics in secondary schools. Students learn a variety of instructional strategies to engage students of diverse backgrounds, acknowledging that quality instruction should reach all learners. Prerequisite: ARSC 1201 and ARSC 1221 (Step 1 and Step 2 courses of the UTeach sequence) or instructor consent.

STEM 3303. Project Based Instruction for Secondary Mathematics and Science. 3 Hours.
This teacher preparation course focuses on the integration of mathematics and science concepts in project-based lessons to model ways used by scientists, mathematicians, and engineers in addressing real world problems. Each student team will design and teach a project-based unit and evaluate its effectiveness in a secondary classroom. Prerequisite: STEM 2203 or instructor consent.

STEM 4033. Introduction to STEM Education. 3 Hours.
This course provides an introduction to the foundations of STEM education disciplines and the strategies used to deliver integrative STEM education in the elementary and secondary school setting. The nature of STEM education disciplines, STEM pedagogy, teaching strategies, integrative STEM learning, STEM careers, and problem-centered instruction are addressed.

STEM 4104. Astronomy for Educators (Sp, Fa). 4 Hours.
Astronomy for Educators splits evenly between the basics of astronomy and practical methods for teaching astronomy effectively to all grade levels. The class is appropriate and effective for elementary, middle school, and secondary educators. Pedagogy focuses on the use of low-cost models that help all students grasp astronomy fundamentals such as phases of the Moon and how our solar system works. Lab activities include building and working with scientific models, evening lab activities give students the opportunity to use telescopes and binoculars to observe the Moon, planets, constellations and more. No prior experience or astronomy knowledge is assumed for this course.

STEM 4333. Perspectives on Science and Mathematics. 3 Hours.
Perspectives on Science and Mathematics explores knowledge generation in the sciences along with consideration of mathematics by referencing the philosophy, history and methods of these disciplines. The course is designed to prepare future teachers with the background, rationales and strategies necessary to enhance student knowledge and interest in these areas.

STEM 4409. Supervised Clinical Teaching in Science and Mathematics Education. 9 Hours.
Supervised Clinical Teaching is the apprenticeship experience for UTeach students preparing for careers as mathematics and science teachers. Student interns will teach at the secondary level with mentoring provided by university supervisors and experienced classroom educators. The required seminar will address experiences, questions and problems encountered in the field. Prerequisite: ARSC 1201, ARSC 1221, STEM 2013, STEM 2203 and STEM 3303.

STEM 5023. Creativity and Innovation in STEM. 3 Hours.
This introductory course in technology and engineering education (TEED) focuses on the development and introduction of TEED activities to support science and mathematics instruction in the elementary classroom. Through hands-on, problem-based learning challenges, students will develop and understanding of the engineering design process and the integration of STEM often used to solve real-world problems. Prerequisite: STEM 4033.

STEM 5203. Problem-Based Mathematics. 3 Hours.
This graduate level course focuses on sharing, modeling and practicing strategies to support the meaningful integration of science, technology, engineering and mathematics (STEM) with the emphasis on mathematics in the K-4 classroom. A strong foundation for integrating the STEM disciplines through a problems-based approach within the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to appropriate and effective classroom practice. Prerequisite: CIED 3123.

STEM 5213. Teaching Problem-Based Science in the Elementary Grades. 3 Hours.
This graduate level course focuses on sharing, modeling and practicing strategies to support the meaningful integration of science, technology, engineering and mathematics (STEM) with the emphasis on science in the K-4 classroom. A strong foundation for integrating the STEM disciplines through a problems-based approach within the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to appropriate and effective classroom practice. Prerequisite: CIED 3143 and admission to the M.A.T. program or enrollment in the M. Ed. program.

Secondary Education (SEED)

Courses

SEED 3282. Teaching Experiences in Education. 2 Hours.
The field experience is an essential component of the Bachelor of Arts in Teaching degree. The field experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in an area school for the length of the fall semester. During this assignment, the TC will both observe and participate in teaching. Prerequisite: Admission to B.A.T.

SEED 4022. Classroom Management Concepts. 2 Hours.
A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to B.A.T. program.

SEED 4063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.
This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to B.A.T. program.

SEED 4103. Methods of Teaching Secondary Social Studies I. 3 Hours.
Study of the methods and materials in social studies. Includes philosophical, cognitive, and psychological dimensions of teaching. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the B.A.T. program.

SEED 4113. Teaching History, Government and Economics. 3 Hours.
Study of the methods and materials in teaching history, government and economics. Includes philosophical, cognitive, and psychological dimensions of teaching, planning of instruction, microteaching, and the development of instructional materials are included.
SEED 4203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.
This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching include the major tenets of instruction. Prerequisite: Admission to the B.A.T. program leading to licensure.

SEED 4213. Issues and Trends in Literacy. 3 Hours.
This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching include the major tenets of instruction. Prerequisite: Admission to the B.A.T. program leading to licensure.

SEED 4443. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the methods and materials in teaching foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program.

SEED 4523. Instructional Practices in Teaching Foreign Language. 3 Hours.
A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to the B.A.T. Program leading to licensure.

SEED 5003. Introduction to Teaching Secondary Science. 3 Hours.
Study of the methods and materials for teaching science. Includes philosophical, cognitive, and psychological dimensions of teaching science. The planning of instruction, microteaching, safety and liability issues, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 6 hours of degree credit.

SEED 5013. Teaching Secondary Science: Theory to Practice. 3 Hours.
This course is a continuation of SEED 5003. Introduction to Teaching Secondary Science, and is taken concurrently with CIED 528V, Secondary Cohort Teaching Internship. Students will receive instruction in advanced methodologies for teaching science and will reflect on their experiences in their internships. Corequisite: CIED 528V. Prerequisite: SEED 5003.

SEED 5022. Secondary Science Seminar. 2 Hours.
This course is a continuation of SEED 5013, Advanced Teaching of Secondary Science, and is taken concurrently with CIED 528V, Secondary Cohort Teaching Internship, in the spring semester of the Secondary Education M.A.T. program. Students will receive instruction in advanced methodologies for teaching science and will reflect on their experiences in their teaching internships. Corequisite: CIED 528V. Prerequisite: SEED 5013.

SEED 5033. Methods of Teaching Secondary Social Studies I. 3 Hours.
Study of the methods and materials in social studies. Includes philosophical, cognitive, and psychological dimensions of teaching. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program.

SEED 5113. Teaching History, Government and Economics. 3 Hours.
Study of the methods and materials in teaching history, government and economics. Includes philosophical, cognitive, and psychological dimensions of teaching, planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 4 hours of degree credit.

SEED 5122. Teaching Geography, World Cultures, and Religions. 2 Hours.
Study of the methods and materials in teaching geography, world cultures, and comparative religion. Includes philosophical, cognitive, and psychological dimensions of teaching, planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 4 hours of degree credit.

SEED 5222. Seminar: Language, Literacy and Culture. 2 Hours.
This course is designed to examine advanced practices related to teaching English language arts and literacy, broadly defined. Topics, issues, methods, and materials encompassing the philosophical, cognitive, cultural, and social dimensions of teaching English language arts constitute the crux of the course.

SEED 528V. Secondary Field Experience. 1-6 Hour.
Student teaching in grades 7-12 to be specific to the fall semester experience of the Secondary Education Master of Arts in Teaching program. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. May be repeated for up to 9 hours of degree credit.

SEED 5303. Teaching Secondary Mathematics. 3 Hours.
Study of the methods and materials in teaching middle, junior high, and high school mathematics. Philosophical, cognitive, and psychological dimensions of teaching secondary topics including, but not limited to algebra, geometry, and statistics. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program in Mathematics.

SEED 5313. Theories of Learning Mathematics. 3 Hours.
Examination of research results related to student learning and achievement in secondary mathematics in the areas of rational numbers, algebraic reasoning, geometric proof, and data and probability. Prerequisite: SEED 5303.

SEED 5322. Integrating Technology and Mathematics. 2 Hours.
Study of methods for integrating technology into secondary mathematics classrooms including but not limited to the use of graphing calculators, geometric software, and spreadsheet. Prerequisite: SEED 5303 and SEED 5313.

SEED 5403. Methods of Teaching Foreign Language K-12. 3 Hours.
Study of the theories and methods of teaching foreign language. Includes philosophical, cognitive, and psychological dimensions of teaching, the standards for teaching foreign language, how to plan instruction, microteaching, and the development of instructional materials. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 6 hours of degree credit.

SEED 5413. Instructional Practices in Teaching Foreign Language. 3 Hours.
The theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign/second languages in K-12 schools. Prerequisite: Admission to the M.A.T. program.

SEED 5422. Special Issues in Teaching Foreign Language. 2 Hours.
Instructional strategies that address the needs of diverse language learners, special needs students, heritage speakers, and the use of technology to enhance language learning. Prerequisite: Admission to the M.A.T. program. May be repeated for up to 4 hours of degree credit.

SEED 5503. Teaching Secondary Mathematics and Science. 3 Hours.
Study of the methods and materials for teaching secondary mathematics and science. Includes the philosophical, cognitive, and psychological dimensions of teaching mathematics and science. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the M.A.T. program.

SEED 6133. Advanced Methods of Social Studies Instruction. 3 Hours.
Advanced exploration and experimentation with research supported methods of teaching social studies. Intended for practicing teachers or those with teaching experience in any of the social sciences.

Social Work (SCWK)

Courses

SCWK 2133. Introduction to Social Work. 3 Hours.
Introduction to social work as a profession and to social welfare institutions from the perspective of the generalist, entry level social worker. Emphasis on empowerment function of social work.
SCWK 3013. Child Advocacy I: Perspectives on Child Maltreatment and Child Advocacy. 3 Hours.
Introductory course in child advocacy studies training. Covers the history, comparative perspectives, legal framework, responses to child maltreatment, skills necessary to do the work, other pertinent issues pertaining to child maltreatment and child advocacy.

SCWK 3163. On Death and Dying. 3 Hours.
Reviews the theory and humanistic importance of the concepts of death and dying in society. An experimental option and interdisciplinary faculty presenters will be part of the format.
This course is cross-listed with HUMN 3163.

SCWK 3193. Human Diversity and Social Work. 3 Hours.
An introduction to information basic concepts related to human diversity and social work. Provides content on differences and similarities in the experiences, needs, and beliefs of people distinguished by race, ethnicity, culture, class, gender, sexual orientation, religion, physical or mental ability, age or national origin. The Live Section of this course is for Social Work Majors and Minors only. The Online Section (901) is open to Non-Social Work Majors. Prerequisite: Social Work major or minor for live sections only. Online sections (901) open to students in other departments.

SCWK 3233. Contemporary Issues in Juvenile Justice. 3 Hours.
This course is designed as a discussion of contemporary issues in juvenile justice. The focus is on the child and family system, including various theories related to underlying causes for involvement in the juvenile courts. This course will also describe the current workings of the juvenile court system and implications for the future.

Study of the needs of deprived children with some attention to methods and standards of care. Cultural competence and family-centered practice are emphasized.

SCWK 399VH. Honors Course. 1-18 Hour.
Honors course. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

SCWK 4013. Child Advocacy II: Professional and System Responses to Child Maltreatment. 3 Hours.
Continuation of Child Advocacy Studies I. Focuses on the responses of professionals to allegations of child maltreatment. Covers competency-based skills training including forensic interviewing and documentation. Prerequisite: SCWK 3013.

SCWK 4023. Child Advocacy III: Responding to the Survivor of Child Abuse. 3 Hours.
Continuation of Child Advocacy Studies II. Provides training to recognize the effects of child maltreatment and to develop intervention strategies for children and their families. Outside experiential activities for this course involve court room observations. Prerequisite: SCWK 3013 and SCWK 4013.

SCWK 405V. Special Topics in Social Work. 1-6 Hour.
Comprehensive study of various topics of importance in contemporary social welfare and social work practice. Prerequisite: Junior standing. May be repeated for degree credit.

SCWK 4073. Social Work Research and Technology I. 3 Hours.
An overview of forms and sources of social work research including existing social data, techniques for collecting original social data, and techniques of organization, interpretation, and presentation of data. Students will also become proficient in the use of current technology for social work research and practice. Pre- or Corequisite: One of the following: STAT 2303, SOCI 3303 and SOCI 3301L, PSYC 2013, or ESRM 2403. Prerequisite: SCWK 4093 and SCWK 4153.

SCWK 4093. Human Behavior and the Social Environment I. 3 Hours.
Provides a conceptual framework for knowledge of human behavior and the social environment with a focus on individuals. Social systems, life-course, assets, and resiliency-based approaches are presented. Special attention is given to the impact of discrimination and oppression on the ability to reach or maintain optimal health and well-being. Prerequisite: COMM 1313, PSYC 2003, SOCI 2013, SCWK 2133, and SCWK 3193 and (BIOL 1543 and BIOL 1541L, or ANTH 1013 and ANTH 1011L).

SCWK 4103. Human Behavior and the Social Environment II. 3 Hours.
This course applies the basic framework for creating and organizing knowledge of human behavior and the social environment acquired in HBSE I to the understanding of family, group, organizational, community, and global systems. Attention is given to discrimination, oppression, the impact of technology, and poverty at each system level. Prerequisite: SCWK 4093 and SCWK 4153.

SCWK 4143. Addiction and the Family. 3 Hours.
Introduction to the biophysical basis of chemical and behavior compulsions with special focus on family impacts. Childhood development within addictive families is also examined. Social work intervention with substance abusing families is highlighted.

SCWK 4153. Social Welfare Policy. 3 Hours.
Describes and analyzes the policies and services rendered by local, state, regional, national, and international agencies as well as the policy implications for social work practice. Students prepare to advocate social policy changes designed to improve social conditions, promote social and economic justice, and to empower at-risk populations. Prerequisite: COMM 1313, PLSC 2003, SCWK 2133, and SCWK 3193.

SCWK 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.
Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States. Prerequisite: Junior standing or instructor consent.
This course is cross-listed with AAST 4163.

SCWK 4173. Social Work with African American Families. 3 Hours.
An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent.
This course is cross-listed with AAST 4173.

SCWK 4183. Social Work with Elders. 3 Hours.
Survey of theories of gerontology, service programs and unmet needs of the aging citizen.

SCWK 4233. Seminar: Children and Family Services. 3 Hours.
An examination of selected current issues in the field of children and family services through discussion, individual study, and interaction with professionals in the field.

SCWK 4253. Spirituality and Social Work Practice. 3 Hours.
This course prepares students to respond competently and ethically to diverse spiritual and religious perspectives. Utilizing social work ethics and values as a guide, students will develop a comparative, critically reflective approach to practice. Prerequisite: SCWK 3193 or instructor consent.

SCWK 4333. Social Work Practice I. 3 Hours.
This is the first in the sequence of practice courses introducing students to the generalist approach to micro social work. This course focuses on developing a solid foundation for practice with individuals, including learning basic communication and helping skills, values, principles, and the connection of theory to practice. Pre- or Corequisite: SCWK 4103. Prerequisite: SCWK 4093 and SCWK 4153.
SCWK 4343. Social Work Practice II. 3 Hours.
This is the second course in the social work practice sequence, emphasizing theories, models, and techniques related to generalist practice with families and groups. The course elaborates on system theory as it impacts groups and families, and use of experiential teaching methods. Prerequisite: SCWK 4103 and SCWK 4333.

SCWK 4412. Field Seminar I. 2 Hours.
An integrative seminar to assist students in comparing their practice experiences, integrating knowledge acquired in the classroom, and expanding knowledge beyond the scope of the practicum setting. Corequisite: SCWK 4434 and social work majors only.

SCWK 4422. Field Seminar II. 2 Hours.
An integrative seminar to assist students in comparing their practice experiences, integrating knowledge acquired in the classroom, and expanding knowledge beyond the scope of the practicum setting. Corequisite: SCWK 4434 and social work majors only.

SCWK 4443. Social Work Internship I. 4 Hours.
Arranged in connection with social service agencies. Credit is based on completion of all course objectives, including a minimum of 225 hours of field work under the supervision of a licensed social worker. Corequisite: SCWK 4412. Prerequisite: Social work major, SCWK 4073, SCWK 4103, and SCWK 4333.

SCWK 4444. Social Work Internship II. 4 Hours.
Arranged in connection with social service agencies. Credit is based on completion of all course objectives, including a minimum of 225 hours of field work under the supervision of a licensed social worker. Corequisite: SCWK 4422. Prerequisite: SCWK majors only, SCWK 4343, SCWK 4733 and SCWK 4434.

SCWK 4733. Social Work Practice III. 3 Hours.
Students acquire and practice the skills, knowledge, and values necessary for culturally competent generalist social work practice with organizations and communities. Special attention is given to the implications of discrimination and oppression for attaining social and economic justice. Pre- or Corequisite: SCWK 4103 and SCWK 4333. Prerequisite: SCWK 4333.

SCWK 496V. Independent Study. 1-6 Hour.
Independent Study designed to meet the particular needs of individual students. May be repeated for up to 6 hours of degree credit.

SCWK 5003. Foundations of Culturally Competent Social Work Practice. 3 Hours.
The purpose of this course is the acquisition and demonstration of beginning graduate-level social work values and ethics, knowledge, and skills necessary for cultural competence in work with individuals, families, groups, organizations, communities, and global contexts. A multi-systems life-course conceptual framework is used. Prerequisite: Admission to the two-year or part-time MSW program.

SCWK 5013. Bridge Course: Evidenced Based Social Work. 3 Hours.
This course prepares MSW students to transition from the foundation course to the advanced concentration courses. Students will become familiar with the mission and conceptual framework underlying the advanced concentration and develop beginning knowledge of traditional and alternative approaches to client system assessment. Prerequisite: Admission into the advanced standing MSW program or completion of foundation courses.

SCWK 5073. Social Work Research and Technology II. 3 Hours.
This course is intended to build the advanced research skills necessary to develop a research proposal and complete a thesis or capstone project. Students will plan the project, collect and analyze data and write a research report of their findings. Projects will focus on systematic evaluation of service delivery and personal professional practice. Corequisite: SCWK 6000L. Prerequisite: Completion of year one for two-year students or summer semester for advanced standing students.

SCWK 5143. Global Social and Economic Justice and Oppression. 3 Hours.
The role and responsibilities of the social work profession are examined in an international comparative context. Particular emphasis is given to social workers' responsibilities to advance global social and economic justice and reduce human oppression through community, social, economic, and organizational development strategies. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5153. Children, Youth, and Family. 3 Hours.
This course focuses on the development, revision, and impact of policy and practice in children, youth, and family services. Current issues in policy and practice will be examined. Students will interact with community agencies and utilize class assignments to advocate improvements in current policy and practice. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5163. Social Work Management, Administration and Supervision. 3 Hours.
This course develops advanced skills in management, administration, and supervision in social work organizations. Emphasis is placed on developing leadership skills in ethics, budgeting, finance, resource development, information management, evaluation, staff hiring, supervision and development, and the use of technology in organizational leadership, development, and maintenance. Prerequisite: Graduate standing and SCWK 5003 or SCWK 5013.

SCWK 5173. Advanced Practice with Families and Couples. 3 Hours.
The purpose of this course is to provide advanced understanding of the knowledge, skills and values needed to assess and intervene effectively with traditional and non-traditional families and couples. The course will examine social systems and life-course strengths approaches to understand how families and couples function. Students will design interventions. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5183. Advanced Practice with Individuals. 3 Hours.
This course develops advanced skills in social work practice on a micro level. Students learn to analyze and compare practice models. They gain skills in selecting a practice model and integrating multiple models based on client needs. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5193. Advanced Practice and Policy in Aging. 3 Hours.
This course focuses on social work practice with, and policies for, older persons. Current, past, and future practices and policies for older persons across systems and the life course are explored. Emphasis is placed on the influences of personal, social, economic, and cultural diversity on the well-being of older persons. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5213. Advanced Practice in Behavioral and Mental Health. 3 Hours.
This advanced course prepares students to identify mental disorders, plan intervention strategies with clients from a strengths perspective, and understand mental health programs through which services are delivered. Differential diagnosis and the impact of socioeconomic status, gender, race, and sexual orientation on diagnosis and treatment decisions are addressed. Prerequisite: SCWK 5003 or SCWK 5013.

SCWK 5253. Spirituality and Social Work Practice. 3 Hours.
This course prepares students to respond competently and ethically to diverse spiritual and religious perspectives. Utilizing social work ethics and values as a guide, students will develop a comparative, critically reflective approach to practice. Prerequisite: SCWK 4103 or SCWK 5003 or SCWK 5013.

SCWK 5253. Spirituality and Social Work Practice. 3 Hours.
This course prepares students to respond competently and ethically to diverse spiritual and religious perspectives. Utilizing social work ethics and values as a guide, students will develop a comparative, critically reflective approach to practice. Prerequisite: SCWK 4103 or SCWK 5003 or SCWK 5013.

SCWK 5343. Advanced Practice with Groups. 3 Hours.
This course provides advanced knowledge, skills, and values needed to assess and intervene effectively with populations seen in the social work practice of group therapy. This course examines group dynamics, life-course and strengths perspectives, and client-centered assessment of needs and their application in agency settings. Prerequisite: SCWK 5003 or SCWK 5013.
SCWK 5412. Foundation Field Seminar. 2 Hours.
A required course for MSW students without an accredited undergraduate degree in social work. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to learn peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 5434.

SCWK 5434. Foundation Field Internship. 4 Hours.
This course is required of all graduate students entering the MSW program without an accredited undergraduate degree in social work. Minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5412. Prerequisite: SCWK 5003, SCWK 4333, SCWK 4073, SCWK 4093, and SCWK 4153.

SCWK 5442. Field Seminar III. 2 Hours.
This seminar is required of all graduate students entering the MSW program with advanced standing. Students integrate classroom content with experiences in the field, learn peer supervision and consultation, and learn from the experience of other students in the field. Corequisite: SCWK 5444. Prerequisite: Admission to graduate program with advanced standing.

SCWK 5444. Field Internship III. 4 Hours.
This course is required of all graduate students entering the MSW program with advanced standing. A minimum of 240 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 5442. Prerequisite: Admission to graduate program with advanced standing.

SCWK 596V. Independent Study. 1-6 Hour.
Independent study designed to meet the particular needs of individual graduate students. May be repeated for up to 6 hours of degree credit.

SCWK 6000L. Thesis Laboratory. 0 Hours.
This laboratory is required for completion of the thesis, which is developed through components of the graduate Research & Technology sequence. Other courses in the graduate curriculum provide support for the conceptualization and development of the thesis.

SCWK 6003. Advanced Social Work Practice Using the MSLC Perspective. 3 Hours.
Advanced Social Work Practice Using the Multi-Systems Life Course (MSLC) perspective teaches advanced practice behaviors with individuals, families, groups, organizations, and communities. This course focuses on integrating the arenas of advanced theory, research, policy practice, direct practice, required competencies and advanced practice behaviors using the MSLC perspective. Prerequisite: Admission into the advanced standing MSW program or completion of foundation courses.

SCWK 6233. Advanced Social Work Practice With Children And Youth Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with children and youth from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003.

SCWK 6243. Advanced Social Work Practice With Adults Using the MSLC Perspective. 3 Hours.
This course focuses on the development, revision, and impact of practice with adults from a Multi-Systems Life Course (MSLC) perspective. Historical trends as well as current practices will be examined with a focus on learning and improving social work practice skills. Prerequisite: SCWK 6003.

SCWK 6442. Advanced Field Seminar I. 2 Hours.
The first of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to practice peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6444. Prerequisite: SCWK 5412 or SCWK 5442.

SCWK 6444. Advanced Field Internship I. 4 Hours.
This is the first of two advanced field internships required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience, supervised by a licensed MSW, is required. Corequisite: SCWK 6442. Prerequisite: SCWK 5434 or SCWK 5444.

SCWK 6452. Advanced Field Seminar II. 2 Hours.
This is the second of two advanced field seminars required of all students in the MSW program. The purpose of the seminar is to allow students to integrate classroom content with experiences in the field, to demonstrate peer supervision and consultation, and to learn from the experiences of other students in the field. Corequisite: SCWK 6454. Prerequisite: SCWK 6442.

SCWK 6454. Advanced Field Internship II. 4 Hours.
This is the second of two advanced Field Internship courses required of all graduate students in the MSW program. A minimum of 330 clock hours of agency-based professional social work practicum experience supervised by a licensed MSW is required. Corequisite: SCWK 6452. Prerequisite: SCWK 6442.

Sociology (SOCI)

Courses

SOCI 2013. General Sociology (ACTS Equivalency = SOCI 1013). 3 Hours.
Applies a sociological perspective and develops critical thinking. Focuses on culture, identity, race, ethnicity, gender, class inequality, crime, deviance, globalization, social change, and social institutions. Overview of sociological theories and methods for systematic understanding of society.

SOCI 2013H. Honors General Sociology. 3 Hours.
Develops critical thinking, writing, and research skills by applying a sociological perspective. Focuses on culture, identity, race, ethnicity, gender, class inequality, collective behavior, crime, deviance, globalization, social change, and social institutions. Overview of sociological theories and methods for systematic understanding of society.

This course is equivalent to SOCI 2013.

Sociological analysis of major social problems, with emphasis placed on social justice, poverty and economic inequality, racial and ethnic relations, gender, crime, education, and other contemporary issues. Develops critical thinking.

SOCI 3001L. Social Science Data Analytics Lab. 1 Hour.
Provides opportunities to implement social science data analytics skills through completing a series of data modules. The course prepares students to interpret data meaningfully within a variety of future employment fields. Students gain familiarity working with a number of marketable datasets, such as those generated by big data.Prerequisite: SOCI 2013.

SOCI 3023. Criminology. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013 and junior standing. This course is cross-listed with CMJS 3023.

SOCI 3023H. Honors Criminology. 3 Hours.
Advanced survey of theories of crime causation. Examines broad sociological paradigms, as well as both individual and aggregate-level explanations of crime causation. Applies criminological theories to contemporary issues associated with crime and criminal justice. Prerequisite: SOCI 2013, honors and junior standing. This course is cross-listed with CMJS 3023, SOCI 3023.
SOCI 3053. Serial Crime. 3 Hours.
Exploration of the historical development of criminal profiling related to serial homicide, serial sex crimes, serial stalking, and serial arson. Examination of behavioral and criminological theories, focusing on different profiling techniques and their strengths and challenges. Case studies and published research on serial crime will be used whenever possible. Prerequisite: SOCI 2013. This course is cross-listed with CMJS 3053.

SOCI 3063. Victimology. 3 Hours.
Introduction to the scientific study of victimization. Examines conceptual boundaries of victimology research, covers theories, statistics and trends relevant to victimology; reviews the victim blaming and defending perspectives; explores practical applications of victimology, and evaluates the social, legal, and criminological issues that stem from concern over victims. Prerequisite: SOCI 2013. This course is cross-listed with CMJS 3063.

SOCI 3103. Religion and Society. 3 Hours.
Theories and research on: religious symbols and rituals, becoming and staying religious, the formation and maintenance of religious organizations, religion and social inequality, religion and social change, and globalization.

SOCI 3153. Urban Sociology. 3 Hours.
Examines growth of cities, urban inequalities, politics, social movements, built environment, ecology, sustainability, cultural identity, global cities, and immigration. Implications considered for policy and planning. Prerequisite: SOCI 2013.

SOCI 3173. Latinos, Migration, and the U.S. South. 3 Hours.
Examines social, economic, and population changes in the U.S. South, including shift of Latinos' settlement patterns, actions taken by policy makers to adapt to new demographic context, and mechanisms immigrants use to facilitate their induction into the southern community. Prerequisite: SOCI 2013.

SOCI 3193. Race, Class, and Gender in America. 3 Hours.
A critical examination of the layers of the U.S. society that shape and construct social inequalities. Overview of sociological theories and research on race, class, and gender function separately and in tandem to organize systems of inequality. Prerequisite: SOCI 2013 and junior standing.

SOCI 3193H. Honors Race, Class, and Gender in America. 3 Hours.
A critical examination of the layers of the U.S. society that shape and construct social inequalities. Overview of sociological theories and research on race, class, and gender function separately and in tandem to organize systems of inequality. Prerequisite: Honors candidacy, SOCI 2013 or SOCI 2013H and junior standing. This course is equivalent to SOCI 3193.

SOCI 3203. Corrections. 3 Hours.
Overview of correctional systems and punishment. Focuses on theories of correctional philosophies, practices, and procedures, along with the historical development and modern practices of corrections, sentencing, facilities, and issues facing correctional populations. Also examines principles and practices of treatment and rehabilitation in correctional settings. Prerequisite: CMJS 2003. This course is cross-listed with CMJS 3203.

SOCI 3223. Social Psychology. 3 Hours.
A sociological approach to the study of the interaction between society and the self with an emphasis upon reference groups such as the family, friends, work, lifestyle, and deviance. Prerequisite: SOCI 2013 and junior standing.

SOCI 3263. Families and Social Change. 3 Hours.
A sociological analysis of the diversity and inequality that exists among families, and the ways in which families have and continue to change over time. Topics discussed include sex, gender, and sexuality, race, ethnicity, and immigration, class and economic transformations. Prerequisite: SOCI 2013.

SOCI 3273. Sociology of China. 3 Hours.
Examines many aspects of Chinese people, their cultures, and practices, and also looks at Chinese Americans in the U.S. both historically and currently. Prerequisite: SOCI 2013.

SOCI 3301L. Social Data and Analysis Laboratory. 1 Hour.
The lab is an extension of the lecture in SOCI 3303. Using a variety of computer packages, the lab provides practical experience in managing and analyzing social data. Corequisite: SOCI 3303.

SOCI 3301M. Honors Social Data and Analysis Laboratory. 1 Hour.
The lab is an extension of the lecture in SOCI 3303. Using a variety of computer packages, the lab provides practical experience in managing and analyzing social data. Corequisite: SOCI 3303H. Prerequisite: Honors candidacy.

SOCI 3303. Social Data and Analysis. 3 Hours.
Introduction to descriptive and inferential statistics, with special emphasis on common techniques in social research. Course focuses on the practical usage of data and application to real-world issues. Corequisite: SOCI 3301L. Prerequisite: SOCI 2013 and junior standing.

SOCI 3303H. Honors Social Data and Analysis. 3 Hours.
Introduction to descriptive and inferential statistics, with special emphasis on common techniques in social research. Course focuses on the practical usage of data and application to real-world issues. Corequisite: SOCI 3301L. Prerequisite: Honors candidacy, SOCI 2013 and junior standing. This course is equivalent to SOCI 3303.

SOCI 3313. Social Research. 3 Hours.
Study and experience in implementing a methodological "toolbox," including theorizing, designing, measuring, sampling, collecting, interpreting, and reporting empirical results for real-world social research applications. Prerequisite: SOCI 2013 and junior standing.

SOCI 3313H. Honors Social Research. 3 Hours.
Study and experience in implementing a methodological "toolbox," including theorizing, designing, measuring, sampling, collecting, interpreting, and reporting empirical results for real-world social research applications. Prerequisite: Honors candidacy, SOCI 2013 and junior standing. This course is equivalent to SOCI 3313.

SOCI 3413. Special Topics. 3 Hours.
Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: SOCI 2013. May be repeated for up to 6 hours of degree credit.

SOCI 3413H. Honors Special Topics. 3 Hours.
Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: Honors candidacy and SOCI 2013 or SOCI 2013H. May be repeated for up to 6 hours of degree credit. This course is equivalent to SOCI 3413.

SOCI 3423. Social Theory. 3 Hours.
Examines the philosophical underpinnings of sociology; introduces notable classical and contemporary social theorists; develops an appreciation for the ways classical works continue to form the basis for contemporary social thought. Prerequisite: SOCI 2013 and junior standing.

SOCI 3423H. Honors Social Theory. 3 Hours.
Examines the philosophical underpinnings of sociology; introduces notable classical and contemporary social theorists; develops an appreciation for the ways classical works continue to form the basis for contemporary social thought. Prerequisite: Honors standing, junior standing and SOCI 2013. This course is equivalent to SOCI 3423.
SOCI 3513. Criminal Evidence. 3 Hours.
Examination of how evidence is collected, processed, and presented in court, with an emphasis on the competing interests of crime control and individual liberties. Prerequisite: CMJS 2003. This course is cross-listed with CMJS 3513.

SOCI 3723. Deviant Behavior. 3 Hours.
Sociological overview of disconcerting conduct: its definition, theoretical understandings and research. Specific topics may include: interpersonal violence, self-destructive disorders, controversial lifestyles, substance abuse, as well as the relationship between inequality and disturbing acts. Prerequisite: SOCI 2013. This course is cross-listed with CMJS 3723.

SOCI 399VH. Honors Course. 1-6 Hour.
Honors. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

SOCI 4003. Internship in Sociology. 3 Hours.
(Formerly SOCI 4006) Supervised experience in municipal, county, or state agencies, or any other agency which is approved by the instructor. Prerequisite: SOCI 2013. May be repeated for up to 6 hours of degree credit.

SOCI 4013. Special Topics in Sociology. 3 Hours.
Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: SOCI 2013. May be repeated for up to 6 hours of degree credit.

SOCI 4013H. Honors Special Topics in Sociology. 3 Hours.
Offerings vary; check for particular course topics offered. Designed to cover specialized topics in greater depth than regular survey courses provide. Prerequisite: Honors candidacy and SOCI 2013 or SOCI 2013H. May be repeated for up to 6 hours of degree credit. This course is equivalent to SOCI 4013.

SOCI 403V. Individual Study in Sociology. 1-3 Hour.
In-depth individual or group study with a faculty member on advanced sociological readings and/or participation in supervised research as an experience-based course. Faculty permission required in advance of enrollment. May be repeated for up to 6 hours of degree credit.

SOCI 4043. Seminar in Sociology. Prerequisite: Senior standing.

SOCI 4063. Organizations in Society. 3 Hours.
Review of literature on work and organizations, with focus on race, class, gender inequalities, and interactions between society and organizations; discussion of topics related to white collar crime and deviant behavior inside modern corporations. Prerequisite: SOCI 2013.

SOCI 4113. Terrorism and Social Control. 3 Hours.
Examines the evolution of modern terrorism, efforts to counter its growth, temporal and spatial patterns of precursor conduct, and the investigation, indictment, prosecution, and punishment of terrorists in federal courts. Focuses primarily upon American terrorist groups (ideologies, motives, group characteristics, and tactics). Prerequisite: CMJS 2003.

SOCI 4113. Seminar in Social Inequality. 3 Hours.
In-depth individual or group study with a faculty member on advanced sociological readings and/or participation in supervised research as an experience-based course. Faculty permission required in advance of enrollment. May be repeated for up to 6 hours of degree credit.

SOCI 4153. Race and Society. 3 Hours.
Sociological study of race within the U.S., with an emphasis on understanding how race operates within contemporary social institutions. Critical engagement and discussion of topics relating to race will be encouraged. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023.

SOCI 4183. Social Network Analysis. 3 Hours.
Introduces the fundamentals of Social Network Analysis (SNA), and its applications for research in various social science fields. Prerequisite: SOCI 2013. This course is cross-listed with PLSC 4613.

SOCI 4253. Social Impact of Data Analytics. 3 Hours.
Teaches students to assess social science data by raising awareness regarding the social impacts of data analytics. Particular attention is paid to the ethical issues involved in the potential benefits and risks across each of the four phases of the data cycle: data collection, consolidation, analytics, and use. Prerequisite: SOCI 2013.

SOCI 4603. Environmental Sociology. 3 Hours.
The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. Prerequisite: Junior or above standing. This course is cross-listed with HDFS 4603, SUST 4603.

SOCI 5001. Proseminar. 1 Hour.
An informal forum for graduate students and faculty to present and discuss ongoing research interests as well as the current state of the discipline. Prerequisite: Graduate standing.

SOCI 500V. Advanced Problems in Sociology. 1-3 Hour.
Individual research on problems or problem areas. Prerequisite: Graduate standing.

SOCI 5013. Advanced Social Research. 3 Hours.
An examination of experimental and quasi-experimental designs used in the analysis of sociological data with focus upon appropriate units of analysis and design selection, sampling, interview techniques, and questionnaire construction. Prerequisite: Graduate standing or instructor consent.

SOCI 503V. Special Topics. 1-6 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. Prerequisite: Graduate Standing. May be repeated for up to 6 hours of degree credit.

SOCI 5043. Public Policy, Children and Families. 3 Hours.
The study of the impact of public policy on children and families, and the ways in which policies are created, modified, and changed. Includes the history of public policy concerning children and families. Prerequisite: Graduate standing.

SOCI 5083. Applied Qualitative Research. 3 Hours.
An introduction to research strategies including intensive interviewing, participant observational fieldwork, content analysis, historical analysis, and comparative research. Emphasis on the practical aspects of designing and executive research involving multiple methods of data gathering and analysis. Prerequisite: Graduate standing.

SOCI 5113. Seminar in Social Inequality. 3 Hours.
Major theories of stratification; types of stratification systems, comparisons of modern and traditional systems; emergent trends. Prerequisite: Graduate standing.

SOCI 5133. The Community. 3 Hours.
A sociological analysis of the theory, methods and materials used in the study of the community. Prerequisite: Graduate standing.

SOCI 5153. Sociological Perspective on Social Psychology. 3 Hours.
Principles, concepts and methods used in analyzing effects of social structures and processes on the self and interaction. Topics include exchange theory, role analysis, symbolic interactionism, social construction of reality, socialization, interpersonal competence, organizational and leadership development, social dislocation, and stress. Prerequisite: Graduate standing.
SOCI 5233. Theories of Deviance. 3 Hours.
A survey of major theories-classical, developmental, ecological, functionalist, conflict, subcultural, control, and phenomenological-explaining morally condemned differences in society. Particular emphasis is on practical implications of each perspective for policy and social control. Prerequisite: Graduate standing.

SOCI 5253. Classical Social Theory. 3 Hours.
A survey of social theory up to the late 20th century. An introduction to the classical sociological themes that continue to inform research, analysis, and policy formation. Major issues will include the relationship between the individual and the community, and the sources of stability, conflict, and change. Prerequisite: Graduate standing.

SOCI 5263. Contemporary Social Theory. 3 Hours.
Analysis of contemporary social theories & major theoretical debates. Emphasis is on critical evaluation & application of theoretical perspectives to current social issues affecting families and communities. Prerequisite: Graduate standing.

SOCI 5311L. Applied Data Analysis Laboratory. 1 Hour.
Provides instruction for data transformations required for the advanced statistical procedures used in the Statistical Package for the Social Sciences (SPSS). Also provides instruction in the use of advanced statistical procedures covered in SOCI 5313. Prerequisite: Graduate standing.

SOCI 5313. Applied Data Analysis. 3 Hours.
Covers basic concepts and applications of the general linear model to a variety of sociological research issues and problems. Also provides an introduction to binary dependent and multivariate categorical data analysis for sociological research. Prerequisite: Graduate standing. Familiarity with statistical computer programs is assumed.

SOCI 5413. Seminar in Criminological Theory. 3 Hours.
An examination of the causation of crime, focusing primarily on sociological theories. Prerequisite: Graduate standing.

SOCI 5423. Research in Criminology. 3 Hours.
Examination of empirical research in criminology, focusing on methodological problems, strategies, and findings. Prerequisite: Graduate standing.

SOCI 5433. Victimization. 3 Hours.
Study of the causes, correlates, and consequences of victimization, focusing on theories of victimization and the role of victims in the criminal justice system. Prerequisite: Graduate standing.

SOCI 5443. Seminar in Terrorism. 3 Hours.
Examination of the causes and consequences of terrorism. Prerequisite: Graduate standing.

SOCI 5453. Social Control. 3 Hours.
Study of sociological theories and research on formal social control, primarily institutional responses to criminal behavior. Prerequisite: Graduate standing.

SOCI 5463. White Collar Crime. 3 Hours.
Study of the nature of white collar, professional, and corporate crime. Prerequisite: Graduate standing.

SOCI 5473. Crime and Community. 3 Hours.
Examination of how neighborhood structural characteristics and social organization affect crime, as well as how the presence of crime and disorder in a community can affect neighborhood social organization. Prerequisite: Graduate standing.

SOCI 5503. Research Internship. 3 Hours.
Supervised research experience. Prerequisite: Graduate standing.

SOCI 600V. Master's Thesis. 1-6 Hour.
Master’s Thesis. May be repeated for degree credit.

Southern Studies (SOST)

Courses

SOST 2003. Introduction to Southern Studies. 3 Hours.
A three credit hour interdisciplinary course that explores the history, politics, literature, and culture of the U.S. South from the colonial era to the present. Students who minor in Southern Studies will be required to take Introduction to Southern Studies.

SOST 399V. Special Topics in Southern Studies. 1-3 Hour.
Topics that explore the American South which are not usually presented in depth in regular courses. May be repeated for up to 6 hours of degree credit.

Space and Planetary Sciences (SPAC)

Courses

SPAC 300V. Space & Planetary Sciences Research. 1-3 Hour.
This course covers research in space and planetary sciences performed by undergraduate students in the University. Prerequisite: Junior Standing and Instructor Consent. May be repeated for up to 6 hours of degree credit.

SPAC 3923H. Honors Colloquium. 3 Hours.
Covers special topics in the space and planetary sciences. Not restricted to any particular major. Prerequisite: Honors candidacy or permission of the instructor. May be repeated for up to 6 hours of degree credit.

SPAC 5033. Stars and Planetary Systems. 3 Hours.
Stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems.

SPAC 5111L. Space and Planetary Lab. 1 Hour.
Laboratory course in space and planetary sciences consisting of experiments in the five major areas of space and planetary sciences: planetary astronomy, planetary geology, planetary atmospheres, origin and evolution of life and orbital mechanics and astronautics. Intended for students enrolled in the graduate programs in space and planetary sciences.

SPAC 5123. Internship. 3 Hours.
Internship for graduate students in the space and planetary sciences graduate degree programs and concentrations in the graduate programs in physics, biology, geosciences and mechanical engineering. Students conduct a phase of their research, normally for one month, at a national or industrial laboratory in North America or overseas.

SPAC 5161. Seminar. 1 Hour.
Seminars organized by the Arkansas-Oklahoma Center for Space and Planetary Sciences covering topics on the cutting edge of research in the field for graduate students conducting research with a faculty member in the space and planetary sciences as part of their graduate degree programs or concentrations in the graduate programs in physics, biology, geology, geography and mechanical engineering.

SPAC 5211. SPAC Proseminar. 1 Hour.
Introductory course consisting of discourses and case studies in ethics, communications and public policy in the administration of space and planetary sciences. Prerequisite: Admission to program or instructor consent.

SPAC 5313. Planetary Atmospheres. 3 Hours.
Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, and comparative planetology of atmospheres.
SPAC 5413. Planetary Geology. 3 Hours.
Exploration of the solar system, geology and stratigraphy, meteorite impacts, planetary surfaces, planetary craters, basaltic volcanism, planetary interiors, chemical composition of the planets, origin and evolution of the Moon and planets.

SPAC 5553. Biochemical Evolution. 3 Hours.
Abiotic synthesis of biomolecules on Earth, the origin of cells; genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, and eukaryotic, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data, and evolution. Prerequisite: CHEM 5813.

SPAC 5553. Astrobiology. 3 Hours.
Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent.
This course is cross-listed with BIOL 5553.

SPAC 5613. Astronautics. 3 Hours.
Study of spacecraft design and operations. Prerequisite: Admission to program or instructor consent.

SPAC 600V. Master's Thesis. 1-10 Hour.
Master's thesis. May be repeated for degree credit.

SPAC 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral dissertation. May be repeated for degree credit.

Spanish (SPAN)

Courses

SPAN 1003. Elementary Spanish I (ACTS Equivalency = SPAN 1013). 3 Hours.
A first introduction of Spanish for true beginners--pronunciation, aural comprehension, speaking and reading in Spanish--with an objective towards active mastery of basic grammatical structures.

SPAN 1013. Elementary Spanish II (ACTS Equivalency SPAN 1023). 3 Hours.
Elementary courses stress pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery basic grammar and limited reading ability.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills.

Continued development of basic speaking comprehension and writing skills and intensive development of reading skills.

SPAN 2013H. Honors Intermediate Spanish II. 3 Hours.
Continued development of basic speaking comprehension and writing skills and intensive development of reading skills.
This course is equivalent to SPAN 2013.

SPAN 2123. Spanish for Heritage Speakers I. 3 Hours.
Designed for students from a Spanish-speaking background with limited to no formal study of the language. Literacy development in Spanish with emphasis on building vocabulary, plus reading and writing skills. Prerequisite: Students who have taken one year or less of Spanish. Placement by exam or by Spanish Advisor.

SPAN 3003. Advanced Spanish (Sp, Fa). 3 Hours.
Further intensive practice to strengthen written and oral expression. Includes a review of the essentials of Spanish grammar. Prerequisite: SPAN 2013 or equivalent.

SPAN 3033. Conversation and Composition (Sp, Fa). 3 Hours.
Three hours per week of guided conversation (oral) and composition (written) practice for the post-intermediate student. Prerequisite: SPAN 3003.

SPAN 3063. Spanish Reading for Advanced Research. 3 Hours.
This course is designed for graduate students working toward reading proficiency for academic research in the target language. Students acquire skills for effective and efficient reading, including recognition of major syntactical structures and the proper use of reference tools. While this course has no prerequisites, 1-2 years of prior instruction in the language is recommended as a minimum. Successful completion fulfills graduate student reading proficiency requirement in many departments. No credit by advanced placement for lower level Spanish courses is awarded, and this course cannot be counted for credit towards an undergraduate minor or major in Spanish or a world language requirement.

SPAN 3103. Cultural Readings (Sp, Fa). 3 Hours.
A course designed to build vocabulary and to strengthen reading skills and oral expression through extensive practice with culturally authentic materials. Prerequisite: SPAN 2013 or equivalent.

SPAN 3113. Introduction to Literature. 3 Hours.
Further development of reading skills and introduction to literary commentary and analysis. Prerequisite: (SPAN 3003 and SPAN 3103) or equivalent.

SPAN 3113H. Honors Introduction to Literature. 3 Hours.
Further development of reading skills and introduction to literary commentary and analysis. Prerequisite: Honors standing. SPAN 3003 and SPAN 3103.

SPAN 3123. Spanish for Heritage Speakers II. 3 Hours.
Designed for students from a Spanish-speaking background with some formal training in Spanish and/or the ability to read and write in the language. Continue developing language skills, plus introduction to the U.S. Latino literature and culture. Prerequisite: Students who have taken two years of Spanish in High School, SPAN 2123 or placement exam.

SPAN 3883. Translation and Interpretation I: Spa/Eng - Eng/Spa. 3 Hours.
Designed for learners who want to improve their proficiency in both Spanish and English while introducing translation and interpretation theory with hands-on practice. Prerequisite: SPAN 3003 and SPAN 3103, or instructor consent.

SPAN 399VH. Honors Spanish Course. 1-6 Hour.
Honors Spanish course. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

SPAN 4003. Advanced Grammar (Fa). 3 Hours.
For majors and advanced students covering the problematic areas of Spanish syntax and usage. Prerequisite: SPAN 3003 and SPAN 3103.

SPAN 4103. Monuments of Spanish Literature I. 3 Hours.
Monuments of the major works of Spanish literature from El Cid through the 17th century. Prerequisite: SPAN 3113.

SPAN 4113. Monuments of Spanish Literature II. 3 Hours.
Monuments of Spanish literature from the 18th century to the present. Prerequisite: SPAN 3113.

SPAN 4123. Spanish for Heritage Speakers III. 3 Hours.
Continued development and expansion of Spanish writing skills. Special emphasis given to active grammar, textual production, and critical thinking for writing in academic and professional settings. Students' work involves research, reading, composing, delivering presentations, writing and proofreading different types of essays. Prerequisite: Students who have taken three or more years of Spanish in high school, AP Spanish, SPAN 3123 or placement exam.

SPAN 4133. Survey of Spanish-American Literature I (Irregular). 3 Hours.
Survey of Spanish-American literature from the Colonial period to mid-19th Century, including pre-Hispanic Indigenous Literatures. Prerequisite: SPAN 3113.
SPAN 4193. Survey of Spanish-American Literature II (Irregular). 3 Hours.  
Survey of Spanish-American literature from Modernism to the present, including U.S. 
Latino literature. Prerequisite: SPAN 3113.

SPAN 4213. Spanish Civilization. 3 Hours.  
A wide-ranging exploration of Spanish history and culture from the Middle Ages to 
the present. Prerequisite: SPAN 3113.

SPAN 4223. Latin American Civilization (Irregular). 3 Hours.  
Latin American civilization. Prerequisite: SPAN 3113.

SPAN 4243. Literature and Culture in the Hispanic United States (Irregular). 3 Hours.  
An exploration of the history and culture, art and politics of the major Hispanic 
groups in the United States. Focus on contemporary attitudes and issues. 
Prerequisite: SPAN 3113.

SPAN 4253. Latin American Cinema and Society. 3 Hours.  
This course examines key issues in Latin American culture and history through films, 
documentaries, and literary and cultural texts. Topics included are: Human Rights, 
Ethnicity, Gender, Revisions of the past. Prerequisite: SPAN 3113.

SPAN 4333. Business Spanish I. 3 Hours.  
Enhances ability to interact in Spanish-language business environments by providing 
a solid foundation in vocabulary and structure in functional business areas such as 
company structure, banking and accounting, capital investment, goods and services, 
marketing, finance, and import-export. Students commit to 15 hours during the 
semester to work on business-related projects with the Spanish-speaking community 
of Northwest Arkansas. Prerequisite: SPAN 3003 and SPAN 3103.

SPAN 4553. Latin America Today. 3 Hours.  
An exploration of recent and contemporary issues in Latin American culture and 
society, including social classes, ethnicity, urbanization, family, education, 
and religion, as well as popular culture and artistic movements. Prerequisite: 
SPAN 3113.

SPAN 4563. Latino Youth Biliteracy Service Learning Project. 3 Hours.  
The Latino Youth Biliteracy Project is a service learning course for students in 
Spanish and Latin American and Latino Studies. Readings on Latino education 
policies and challenges, bilingualism, and the immigrant experience. Students commit from 15 to 30 hours of mentoring Latino youth at local schools during the 
semester (in addition to class meeting times) and complete a research project on 
Latino education. Prerequisite: SPAN 3113 or SPAN 3123 or graduate standing.

SPAN 4583. Advanced Spanish for Health Professions. 3 Hours.  
Advanced Spanish for Health Professions is an upper level service learning course for 
students in Spanish and Latin American and Latino Studies. Development of 
Spanish language for healthcare providers. Readings on the state of Latino health care in Arkansas and in the United States. Students will work 30 hours during the 
semester on health related projects with the Spanish speaking community of NWA. 
Prerequisite: SPAN 3003 and SPAN 3103 or SPAN 3123.

SPAN 4623. Advanced Proficiency in Spanish. 3 Hours.  
Work in translation and composition, oral proficiency, and phonetics and 
pronunciation for students who still seek further practice in skills development to 
extend their fluency and proficiency in the second language. Suitable for non-native 
speaking students considering becoming teachers of Spanish. Prerequisite: SPAN 4003 or instructor consent.

SPAN 470V. Special Topics. 1-3 Hour.  
May be offered in a topic not specifically covered by courses otherwise listed. May 
be repeated for up to 6 hours of degree credit.

SPAN 475V. Special Investigations. 1-6 Hour.  
Special investigations. May be repeated for degree credit.

SPAN 4883. Indigenous Literatures of Mesoamerica, the Andes and the 
Amazon. 3 Hours.  
A study of native oral narratives, literary texts and other writing forms in the Americas, from ancient times to the present, including the Andean Khipus, 
Mesoamerican Codices, and Amazonian mythic narratives. Prerequisite: 
SPAN 3113.

SPAN 5203. Medieval Spanish Literature. 3 Hours.  
From the 'Jarchas' to the Celestina.

SPAN 5233. Golden Age Novel. 3 Hours.  
Major works of Spanish prose fiction from the 16th and 17th centuries, with close 
reading of major works.

SPAN 5243. Golden Age Poetry and Drama. 3 Hours.  
History and development of those genres in the 16th and 17th centuries, with close 
reading of major works.

SPAN 5253. Colonial Literature and Culture. 3 Hours.  
An introductory course to the history, culture and literature of colonial Spanish 
America from 1492 until 1810. The course will cover representative colonial and 
indigenous texts and their contexts including Renaissance, Baroque, and travel 
literature of the Eighteenth Century. The course will be taught in Spanish.

SPAN 5273. Survey of 19th Century Spanish Literature. 3 Hours.  
A graduate-level survey of Spanish literature from Neoclassicism to the Generation 
of 1898.

SPAN 5283. Survey of Contemporary Spanish Literature. 3 Hours.  
A graduate-level survey of Spanish literature from the Transition to the present.

SPAN 5343. Survey of 20th Century Spanish Literature. 3 Hours.  
A graduate-level survey of Spanish literature from the Generation of 1898 to the 
Transition. Prerequisite: Graduate standing.

SPAN 5393. 19th Century Spanish American Literature. 3 Hours.  
Study of representative literary works from Independence (1810) to 1900's. The 
course covers Neoclassicism, Romanticism, Realism/Naturalism, and Modernism 
and the role of literature in the nation-building process. The course will be taught in Spanish.

SPAN 5403. Spanish American Theatre. 3 Hours.  
Historical examination of the theatre in Spanish America, with close analysis 
particularly of representative works and movements in the 20th century.

SPAN 5433. Cervantes: Don Quijote. 3 Hours.  
A close reading of Spain's greatest literary masterpiece.

SPAN 5453. Cinema and Literature. 3 Hours.  
This course examines several Latin American and Spanish texts and their film 
adaptations as well as the main film making trends in the Hispanic world.

SPAN 5463. 20th Century Spanish American Literature. 3 Hours.  
Critical survey of major movements and outstanding and representative works in 
20th century prose and poetry, from the Mexican Revolution and the avant-garde to 
the contemporary boom and post-boom.

SPAN 5703. Special Topics. 3 Hours.  
May be offered in a subject not specifically covered by the courses otherwise listed. 
May be repeated for up to 6 hours of degree credit.

SPAN 575V. Special Investigations. 1-6 Hour.  
Special investigations. May be repeated for degree credit.

SPAN 5773. Indigenismo Literature. 3 Hours.  
A study of 'indigenismo', an intellectual and literary tradition in Latin America 
examining the history of exploitation and marginalization of indigenous peoples. 
Readings include texts by Mariategui, Icaza, Andrade, Asturias, Arguedas, 
Castellanos, and also 'indigenista' works in music and the plastic arts.
SPAN 5883. Indigenous Literatures. 3 Hours.
A study of native oral narratives, literary texts and other writing forms in the Americas, from ancient times to the present, including the Andean Khipus, Mesoamerican Codices, and Amazonian mythic narratives.

SPAN 5943. U.S. Latino/a Literatures and Cultures. 3 Hours.
Explores the construction and negotiation of Latino/a identities through the study of literary and filmic texts. Theoretical concepts (e.g. latinidad, latinization, intra-latino, cultural remittances) will also be studied. Topics of discussion may include: transnationalism, bilingualism, and interactions between different Latino groups. Taught in Spanish. Prerequisite: Graduate standing.

**Special Education (SPED) Courses**

SPED 3843. Introduction to Learning and Behavior Analysis. 3 Hours.
This course provides information on: (a) the philosophical assumptions and principles of behavior analysis; (b) systems, processes, and concepts of the experimental and applied behavior analysis; and (c) the ethical and legal issues in its use.

SPED 3863. Applications of Behavior Change Procedures. 3 Hours.
Course content includes (a) information on behavior change procedures; (b) activities designed to acquire skill in developing and evaluating behavioral change programs; and (c) information and activities designed to acquire skills in providing and monitoring persons and systems providing support. Legal and ethical standards will be reviewed and applied to the course content. Prerequisite: SPED 3843.

SPED 3893. Field Experience in Applied Behavior Analysis. 3 Hours.
Supervised field experience in program, schools, and other settings using the methodology of applied behavior analysis. Prerequisite: SPED 3843. May be repeated for up to 9 hours of degree credit.

SPED 4173. Introduction to Dyslexia: Literacy Development and Structure of Language. 3 Hours.
This course focuses on the assessment of students with disabilities, literacy development, skills & intervention. Students will utilize foundational concepts of oral and written language including the structure of language to assess student's difficulties and plan appropriate instruction. Techniques discussed include informal observation, miscue analysis, multisensory teaching, and portfolio assessment. Prerequisite: Admission to SPED program.

SPED 4413. ABA and Classroom Management for Teachers. 3 Hours.
Students in this course will develop an understanding of the basic principles of Applied Behavior Analysis (ABA) and learn how to implement these principles across a Positive Behavior Support Model. Intervention plans include development of individual supports, classroom management supports, and whole school behavior supports.

SPED 4423. Technology for the Inclusive Classroom. 3 Hours.
A study of the use of instructional and assistive/augmentative technology for students with learning differences and special learning needs.

SPED 4433. Curriculum Development and Instructional Planning (Fa). 3 Hours.
Study of the research base for the design and adaptation of curriculum and instructional strategies for students with disabilities in general and special classrooms.

SPED 4443. Career Development and Transition Planning for Students with Disabilities. 3 Hours.
A study of career development theory and the research-based strategies for evaluating, planning, and implementing transition programs for students with disabilities.

SPED 4453. Assessment of Students with Disabilities. 3 Hours.
A study of the methods and techniques of the assessment of children in all areas of exceptionality with emphasis on diagnosis, classification, and tracking progress.

SPED 4463. Teaching Students with Significant Disabilities. 3 Hours.
A study of methods and materials for teaching students (K-12) with severe disabilities, including severe mental retardation, serious emotional disturbance, other health impairments, multiple disabilities, and severe physical disabilities.

SPED 4473. Teaching Students with Disabilities in Math and Science. 3 Hours.
A study of content, methods, and materials for teaching mathematics and science to students with diverse learning needs and how to adapt curriculum to meet diverse needs.

SPED 4483. Teaching Literacy Skills to Students with Disabilities. 3 Hours.
This course will offer a detailed study of how to systematically and explicitly teach essential reading skills to students with disabilities or those at-risk for learning difficulties.

SPED 4493. Introduction to Students with Autism Spectrum Disorder. 3 Hours.
The purpose of this course is to develop an understanding of autism spectrum disorders, understand the unique characteristics as they apply to the context of the classroom, be able to design an appropriate classroom setting, and use evidence based teaching practices for students with autism spectrum disorders.

SPED 4538. Special Education Internship - Kindergarten through 6th Grade. 8 Hours.
Provides the opportunity to focus demonstrating and refining teaching skills through a teaching internship in special education grades K-6 while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4543. Corequisite: SPED 4543.

SPED 4543. Special Education Seminar - Kindergarten through 6th Grade (Fa). 3 Hours.
Provides the opportunity to focus on issues encountered in the teaching internship in special education grades kindergarten through sixth grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4538. Corequisite: SPED 4538.

SPED 4553. Special Education Research - Kindergarten through 6th Grade. 3 Hours.
Designing, conducting and applying research to improve classroom instruction in special education (K-6).

SPED 4568. Special Education Teaching Internship - 7th through 12th Grade. 8 Hours.
Provides the opportunity to focus demonstrating and refining teaching skills through a teaching internship in special education grades 7-12 while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4573. Corequisite: SPED 4573.

SPED 4573. Special Education Seminar - 7th through 12th Grade (Sp). 3 Hours.
Provides the opportunity to focus on issues encountered in the teaching internship in special education grades seventh through twelfth grades while simultaneously developing a professional portfolio. Must be taken concurrently with SPED 4568. Corequisite: SPED 4568.

SPED 4583. Special Education Research - 7th through 12th Grade. 3 Hours.
Designing, conducting and applying research to improve classroom instruction in special education (7-12).

SPED 5143. Teaching Communication Skills to Persons with Autism. 3 Hours.
This course focuses on classroom and teaching strategies for the development of communication skills with students who have autism spectrum disorders. Students will learn the characteristics of typical language development, atypical language development in autism, functional communication training and behavior analytic approaches to teaching communication. Prerequisite: Admission to the Graduate School.
SPED 5173. Introduction to Dyslexia: Literacy Development & Structure of Language. 3 Hours.
This course focuses on the assessment of students with disabilities, literacy development, skills and intervention. Students will utilize foundational concepts of oral and written language including the structure of language to assess students' difficulties and plan appropriate instruction. Techniques discussed include informal observation, miscue analysis, multisensory teaching, and portfolio assessment. Prerequisite: Admission to graduate school.

SPED 532V. Practicum in Special Education. 1-6 Hour.
Supervised field experiences in special education programs, schools, institutions, and other facilities for exceptional children.

SPED 5343. ABA and Classroom Management for Teachers. 3 Hours.
Students in this course will develop an understanding of the basic principles of Applied Behavior Analysis (ABA) and learn how to implement these principles across a Positive Behavior Support Model. Intervention plans include development of individual supports, classroom management supports, and whole school behavior supports.

SPED 5543. Dyslexia Teaching Practicum. 3 Hours.
Provides the opportunity to demonstrate and refine teaching skills with dyslexic students and others with literacy learning disabilities through case studies and structured multi-sensory teaching of reading and writing skills with grades k-12 while simultaneously developing a professional portfolio. A minimum of 82 hours of field experiences with dyslexic students is required.

SPED 5633. Curriculum Development and Instructional Planning. 3 Hours.
Study of the research base for the design and adaptation of curriculum and instructional strategies for students with disabilities in general and special classrooms.

SPED 5643. Individual Diagnostic Testing. 3 Hours.
A study of various individual diagnostic tests used to identify students with disabilities and develop individual educational programs. Prerequisite: Admission to Graduate School.

SPED 5653. Individual Intelligence Testing. 3 Hours.
A study of various individual intelligence tests, including the Wechsler series, and their use in schools to identify students with disabilities. Prerequisite: Admission to Graduate School.

SPED 5663. Teaching Science and Math to Students with Disabilities. 3 Hours.
A study of content, methods, and materials for teaching science and math courses to students with diverse learning needs and how to adapt curriculum to meet diverse needs. Prerequisite: Admission to graduate school.

SPED 5673. Teaching Students with Disabilities in the Content Areas. 3 Hours.
A study of content, methods, and materials for teaching content courses to students with diverse learning needs (K-12).

SPED 5683. Teaching Literacy Skills to Students with Disabilities. 3 Hours.
This course will offer a detailed study of how to systematically and explicitly teach essential reading skills to students with disabilities or those at-risk for learning difficulties.

SPED 5713. Career Development and Transition for People with Disabilities. 3 Hours.
This is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of the transition process for students with disabilities including transition plan development, work based learning opportunities, developing skills in self-advocacy and self-determination using evidence based practices, family engagement, collaborative program planning and evaluation.

SPED 5733. Inclusive Practices for Diverse Populations. 3 Hours.
An advanced study of the characteristics of persons with exceptional learning needs and the provision of appropriate instruction in the general education classroom including the use of current technologies including instructional media, social networking, and other educational technologies. Prerequisite: Graduate standing.

SPED 5743. Teaching Persons With Physical and Health Disabilities. 3 Hours.
This course is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of the characteristics, needs, and methods for teaching of persons with physical and health disabilities while emphasizing advance learning in the specialty studies and the social and behavioral studies in the substantive areas. Prerequisite: Graduate standing.

SPED 5753. Nature and Needs of Persons with Serious Emotional Disorders. 3 Hours.
A survey of the educational, psychological, and social characteristics of individuals with serious emotional disorders. Four major categories of behaviors (personality disorders, pervasive developmental disorders, and learning/behavior disorders) are reviewed in relationship to identification, assessment, and program intervention within the public school setting. Prerequisite: CIED 3023.

SPED 5763. Teaching Individuals with Severe Disabilities. 3 Hours.
Methods and materials for teaching students with severe disabilities, including severe mental retardation, serious emotional disturbance, and severe physical disabilities.

SPED 5773. Methods for Young Children with Disabilities. 3 Hours.
This course is one of the substantive core courses required of all students being recommended for the P-4 Instructional Specialist license. The Scholar-Practitioner Model at this level provides an introduction to the education of young children with special learning needs and a foundation for the developing professional.

SPED 5783. Professional and Family Partnerships. 3 Hours.
This course is an advanced course at the master's level in the specialty studies. The Scholar Practitioner model at this level will pursue an in-depth study of family-school partnerships from early childhood through the transition to adulthood while emphasizing advance learning in the specialty studies and the social and behavioral studies in the substantive areas. Prerequisite: Admission to graduate school.

SPED 5873. Assessment and Programming for Students with Disabilities. 3 Hours.
Methods and techniques of assessment of children in all areas of exceptionality with emphasis on diagnosis and classification.

SPED 5883. Research in Inclusive Education. 3 Hours.
Review of research in inclusive education including all areas of exceptionality and English language learners with emphasis on research-based practices.

SPED 5893. Organization, Administration and Supervision of Special Education. 3 Hours.
Procedures, responsibilities and problems of organization, administration, and supervision of special education programs.

SPED 599V. Special Topics. 1-6 Hour.
Discussion and readings on selected topics in special education. Special focus on recent and emerging topics in special education. Prerequisite: Admission to Graduate School and Special Education graduate program. May be repeated for up to 6 hours of degree credit.

SPED 605V. Independent Study. 1-6 Hour.
Advanced studies on potential research topics for graduate students in special education. Prerequisite: Admission to the Graduate School and instructor consent. May be repeated for up to 6 hours of degree credit.

SPED 6403. Emerging Issues in Special Education. 3 Hours.
A study in the complex issues with which professionals in the field of special education must be familiar and prepared to address.
SPED 641V. Special Topics in Special Education. 1-3 Hour.
Discussion and advanced studies on select topics in special education. Specific focus will include evidence-based and emerging practices in special education.

SPED 6423. Philosophical and Sociological Bases of Special Education. 3 Hours.
A study of the basic philosophical and sociological bases for current practices in special education.

SPED 6433. Legal Aspects of Special Education. 3 Hours.
A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings. This course is cross-listed with EDLE 6433.

SPED 6453. Human Performance Improvement. 3 Hours.
This course is an introduction to Human Performance Technology, a rapidly growing field that applies the principles, methods, and empirical generalizations of Behavior Analysis to improving human performance in organizations. Working from a theoretical basis, students will learn how to diagnose performance discrepancies in organizational settings, design and evaluate appropriate behavior-based solutions.

SPED 6803. Teaching Students with Autism Spectrum Disorders. 3 Hours.
This course provides students with an understanding of individuals who have been diagnosed with autism spectrum disorders. The course provides a life-span perspective by focusing on preschoolers, school-aged children, and adults. Students will study the characteristics of these individuals and general educational strategies for their education.

SPED 6813. Characteristics and Assessment of Persons with ASD. 3 Hours.
This course provides an in-depth study of the characteristics and assessment of persons with autism spectrum disorders. It includes formal and informal assessment measures used to assist in the identification of students with ASD, as well as provide information for program development for this group of students.

SPED 6823. Instructional Methods for Students with Autism Spectrum Disorders. 3 Hours.
This course is designed to assist professional educators in planning and implementing instructional and support services for students with autism spectrum disorders. Students will learn how to participate in collaborative family, school, and community partnerships.

SPED 6833. Practicum in Autism Spectrum Disorders. 3 Hours.
Supervised field experiences in programs, schools, and other settings for children with autism spectrum disorders.

SPED 6843. Basic Principles of ABA. 3 Hours.
Course provides information on: (a) the philosophical assumptions and principles of behavior analysis; (b) basic principles, processes, and concepts of applied behavior analysis; and (c) ethical and legal issues involved in its use.

SPED 6853. Behavioral Assessment in ABA. 3 Hours.
Course content includes information on effective methods and the development of skills: (a) assessing, organizing, and interpreting behavior; (b) conducting task analysis and selecting intervention goals and strategies; (c) displaying data; and (d) making evidence-based decisions. Legal and ethical standards will be reviewed and applied to behavioral change procedures used.

SPED 6863. Behavior Change Procedures and Supports. 3 Hours.
Course content includes (a) information on behavior change procedures; (b) activities designed to acquire skill in developing and evaluating behavioral change programs; and (c) information and activities designed to acquire skills in providing and monitoring persons and systems providing support. Legal and ethical standards will be reviewed and applied to the course content.

SPED 6873. Measurement and Experimental Design. 3 Hours.
Course content includes information on and the development of skills in: (a) the measurement of the multiple dimensions of behaviors; (b) the use of methods of measuring behavior; (c) the experimental evaluation of interventions; and (d) the multiple methods of displaying and interpreting behavioral data. Legal and ethical standards will be reviewed and applied to the course content.

SPED 6883. ABA Ethical, Professional, and Legal Standards. 3 Hours.
Course content includes information on the ethical, professional and legal standards in special education and, specifically, the area of applied behavior analysis.

SPED 6893. Practicum in Applied Behavioral Analysis (Sp, Fa). 3 Hours.
This course is a supervised practicum that provides students with experience in applying the knowledge, skills, and dispositions by teaching individuals using Applied Behavior Analysis. Instructor approval needed for enrolling in the course. May be repeated for up to 18 hours of degree credit.

Statistics (STAT)
Courses

STAT 2023. Biostatistics. 3 Hours.
An introductory course in biostatistics emphasizing methods for collecting, graphing, and understanding data. Special emphasis is placed upon available methods for both exploratory and confirmatory data analysis. Particular attention is given to statistical methods for data sets with discrete variables. Pre- or Corequisite: MATH 2554. Corequisite: Lab component.

A problem-oriented course with applications from many fields. Emphasis on understanding the nature of statistical orderliness implied by probability laws. Statistical analysis is treated as a means of decision making in the face of uncertainty. Prerequisite: MATH 1203 or MATH 1204 each with a grade of C or better, or MATH 1313 with a grade of C or better, or a score of at least 80% on the University of Arkansas Mastery of Algebra Exam, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT.

STAT 3013. Introduction to Probability. 3 Hours.
A calculus-based introduction to probability. Discrete probability spaces and counting techniques, discrete and continuous probability distributions, random variables, random samples, law of large numbers, central limit theorem. Prerequisite: MATH 2564. This course is cross-listed with MATH 3013.

STAT 3113. Introduction to Mathematical Statistics. 3 Hours.
A calculus-based introduction to mathematical statistics, revolving around estimation, hypothesis testing, and Bayesian inference. Emphasis is given to the unifying mathematical and decision-theoretical principles that provide a justification to different estimation and testing procedures. Prerequisite: STAT 3013 or departmental consent.

STAT 4001L. Statistics Methods Laboratory. 1 Hour.
Introduction to the statistical software SAS, including its use for common statistical analyses. A practical complement to the statistical methodology covered in STAT 4003.

STAT 4003. Statistical Methods. 3 Hours.
Describing Data, Basic Probability, Random variables, Uniform, Normal and Binomial Distributions, Sampling Distributions, Confidence Intervals, Hypothesis testing, Correlation and Regression, Contingency table, Comparing two populations, ANOVA. Prerequisite: MATH 2554 or MATH 2554C.

STAT 4033. Nonparametric Statistical Methods. 3 Hours.
Chi square tests, Kolmogorov-Smirnov goodness-of-fit tests, the Mann-Whitney and Wilcoxon 2-sampling tests, and various nonparametric measures of association. Prerequisite: STAT 2303 or STAT 2023 or departmental consent.
STAT 4043. Sampling Techniques. 3 Hours.
Consider optimum techniques of simple random, stratified random, cluster, systematic and multistage sampling from finite populations subject to cost precision constraints. Wide range of applications. Prerequisite: STAT 4003.

STAT 405V. Internship in Professional Practice. 1-3 Hour.
Professional work experience involving significant use of mathematics or statistics in business, industry or government. Prerequisite: Departmental consent. May be repeated for up to 3 hours of degree credit.

STAT 4101L. Introduction to R. 1 Hour.
A hands-on introduction to R software, a free and open-source computing environment used for data manipulation and analysis across a broad spectrum of subject areas. Intended for new users. Content begins with simple data manipulation, then complex data structures and common statistical procedures are covered.

STAT 4333. Analysis of Categorical Responses. 3 Hours.
Statistical tools to analyze univariate and multivariate categorical responses. Emphasis is given to Generalized Linear Models, including logistic regression and loglinear models. Prerequisite: STAT 4003 or departmental consent.

STAT 4373. Experimental Design. 3 Hours.
Topics in the design and analysis of planned experiments, including randomized block, Latin square, split plot, and BIB designs, use of fractional factorial replication, and repeated measures. Prerequisite: STAT 4003.

STAT 5103. Introduction to Probability Theory. 3 Hours.
Fundamentals of probability, distribution theory, and random variables; expected value, moments, and generating functions; classic parametric families of distributions; central limit theorems, inequalities, and laws of large numbers. Prerequisite: MATH 2574 and graduate standing in mathematics or statistics, or departmental consent.

STAT 5113. Statistical Inference. 3 Hours.
Statistical theory of estimation and testing hypothesis. Prerequisite: STAT 5103 and graduate standing in mathematics or statistics, or departmental consent.

STAT 5313. Regression Analysis. 3 Hours.
Review of matrix algebra, parameter estimation in linear models, regression diagnostics, collinearity, variable selection, nonparametric regression, Bayesian regression. Prerequisite: STAT 4003 or departmental consent.

STAT 5333. Analysis of Categorical Responses. 3 Hours.
Statistical tools to analyze univariate and multivariate categorical responses. Emphasis is given to Generalized Linear Models, including logistic regression and loglinear models. Prerequisite: STAT 4003 or departmental consent.

STAT 5343. Stochastic Processes. 3 Hours.
Markov chains, branching processes, birth-death processes, queuing theory with application. Prerequisite: STAT 5103, and graduate standing in mathematics or statistics, or departmental consent.

STAT 5353. Methods of Multivariate Analysis. 3 Hours.
Statistical tools to analyze multivariate datasets. Topics include the multivariate linear model, principal component analysis, factor analysis, linear discriminant analysis, clustering, classification and regression trees, support vector machines, nonlinear dimensionality reduction. Prerequisite: STAT 5313, and graduate standing in mathematics or statistics, or departmental consent.

STAT 5383. Time Series Analysis. 3 Hours.
Identification, estimation and forecasting of time series. Spectral analysis including the fast Fourier transform computational aspects are emphasized. Prerequisite: STAT 5103, and graduate standing in mathematics or statistics, or departmental consent.

STAT 5413. Spatial Statistics. 3 Hours.
Applied spatial statistics, covering univariate spatial modeling (kriging), multivariate spatial modeling (cokriging), methods of estimation and inference, and spatial sampling designs. Special relevance to remote sensing. Prerequisite: STAT 5313, and graduate standing in mathematics or statistics, or departmental consent.

STAT 5443. Computational Statistics. 3 Hours.
In-depth introduction to computer-based algorithms used for inference and forecasting. Course content may vary by semester. Possible algorithms covered could include: resampling methods (bootstrap), Markov chain Monte Carlo, variable selection in high-dimensional regression (LASSO and LARS), artificial neural networks, ensemble methods (boosting, bagging, random forests), and kernel methods. Prerequisite: STAT 5113 or departmental consent.

STAT 550V. Statistical Consulting. 1-3 Hour.
Designed to give students a statistical consulting practicum. Students meet with clients, analyze data and prepare reports for the clients. May be repeated for up to 6 hours of degree credit.

STAT 610V. Research in Statistics. 1-4 Hour.
Research in statistics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent.

STAT 639V. Topics in Statistics. 1-3 Hour.
Current state of the art on methodology in one of the topics: multivariate analysis, time series analysis, sequential analysis, factor analysis, or biostatistics. Prerequisite: Graduate standing in mathematics or statistics, or departmental consent. May be repeated for degree credit.

Statistics and Analytics (STAN)

Courses

STAN 5013. Special Topics in Statistics and Analytics. 3 Hours.
Designed to cover specialized topics not usually presented in depth in regular courses. May be repeated for up to 6 hours of degree credit.

STAN 5023. Research Problems in Statistics and Analytics. 3 Hours.
Designed to allow focused study into student's research area. May be repeated for up to 6 hours of degree credit.

STAN 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

Supply Chain Management (SCMT)

Courses

SCMT 2103. Introduction to Supply Chain Management. 3 Hours.
An introduction to supply chain management. All functional areas of supply chain management are explored to provide students an end-to-end view of supply chain management processes. Pre- or Corequisite: ISYS 2103.Prerequisite: WCOB 1033 and ECON 2023 each with a grade of C or better.

SCMT 2103H. Honors Introduction to Supply Chain Management. 3 Hours.
An introduction to supply chain management. All functional areas of supply chain management are explored to provide students an end-to-end view of supply chain management processes. Pre- or Corequisite: ISYS 2103.Prerequisite: WCOB 1033 and ECON 2023 each with a grade of C or better.

This course is equivalent to SCMT 2103.

SCMT 3443. Transportation and Distribution Management. 3 Hours.
Examines modes of freight transportation and institutional factors that influence transportation decisions; regulation, public policy, other governmental variables reviewed in detail. Additionally, distribution aspects of the logistics function within the firm such as warehousing, cross-docking, and distribution center management are explored. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.
SCMT 3613. Supply Management. 3 Hours.
Management of tactical and strategic sourcing relationships including supply aspects of the logistics function within the firm such as purchasing, procurement, forecasting, inventory control, quality, sustainability and negotiation. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

SCMT 3623. Advanced Inventory Management and Forecasting. 3 Hours.
The intent of this course is to rigorously examine two key elements of logistics: inventory control and forecasting. Coverage of the former topic specifically focuses on inventory control methods for stochastic demand and lead times. Besides a review of the associated theoretical bases, the implementation of such policies in Excel is a central component of the course. Forecasting topics covered in this course include a review of a variety of forecasting techniques and forecast error measurement. Moreover, the linkage between forecasting and inventory control is discussed. As with inventory control, students will learn how to implement various forecasting techniques in Excel. Prerequisite: SCMT 3613.

SCMT 3633. Behavioral Supply Chain Management. 3 Hours.
Effective supply chain management requires an understanding of people who make supply chain decisions. This course will expose students to behavioral issues in supply chain and logistics. Readings will be assigned weekly, with a focus on practical implications. There will be an emphasis on experiential learning and teams of students will work on course projects in the area of the retail supply chain, broadly defined. Prerequisite: SCMT 3613.

SCMT 3643. International Transportation and Logistics. 3 Hours.
Logistics activities in international business with special emphasis on international sourcing and distribution channels, international transportation, import and export procedures, international sale and payment terms, and documentation. Special emphasis is placed on current events and their effect on the management of operations of U.S.-based organizations. Prerequisite: ECON 2013 and ECON 2023, or ECON 2143.

SCMT 3653. Retail Supply Chain Analysis. 3 Hours.
This course examines the various function components of retail supply chain management and focuses on analysis and metrics required to effectively manage a retail supply chain. The purpose of this course is to introduce students to the various aspects of retail supply chain management. In this course, the students will learn to speak of the “language” of retailing and acquire the skills to effectively analyze the performance of retail supply chains. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143.

SCMT 4003H. Honors Supply Chain Management Colloquium. 3 Hours.
Explores events, concepts and/or new developments in the field of Supply Chain Management. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

SCMT 4103. Special Topics in Supply Chain Management. 3 Hours.
Special topics in supply chain management not available in other courses. Topics are selected by the supply chain faculty for each semester each course is offered. Prerequisite: Junior standing.

SCMT 4123. Sustainable Logistics and Supply Chain Management. 3 Hours.
Explores key sustainability concepts across supply chain functions of supply management, operations, and distribution. Course topics include values-based leadership, globalizing sustainability, marketing sustainability, voluntary product standards and governance, stakeholder engagement, reverse logistics, humanitarian logistics, and transportation. Overall, we will consider the feasibility and role of firms in producing sustainability in global supply chains.

SCMT 4633. Logistics Provider and Carrier Management. 3 Hours.
Reviews special management techniques and analytical framework available for solving problems associated with companies whose core competencies include distribution and transportation modes of truck, rail, air, water, pipeline and intermodal. Prerequisite: SCMT 3443.

SCMT 4653. Supply Chain Strategy. 3 Hours.
Design and management of supply chain systems for firms of varying size and different supply and market conditions. This capstone course relies heavily on computer assisted cases and lectures from visiting executives. Prerequisite: SCMT 3443 and SCMT 3613 and SCMT 3623.

SCMT 466V. Independent Study in Supply Chain Management. 1-3 Hour.
Permits students to explore selected topics in supply chain management, logistics and transportation.

SCMT 4853. Cross-Sector Collaboration for Sustainability. 3 Hours.
This course explores how organizations in the three sectors of society work together in value creation by addressing social and environmental problems manifest in global supply chains. Focusing on business and nonprofit organizations, we investigate the forces that bring about and influence these collaborations from practical and theoretical perspectives. Prerequisite: Junior Standing.

SCMT 5123. Sustainable Logistics and Supply Chain Management. 3 Hours.
Explores key sustainability concepts across supply chain functions of supply management, operations, and distribution. Course topics include values-based leadership, globalizing sustainability, marketing sustainability, voluntary product standards and governance, stakeholder engagement, reverse logistics, humanitarian logistics, and transportation. Overall, we will consider the feasibility and role of firms in producing sustainability in global supply chains.

SCMT 5133. Quantitative Methods and Decision Making. 3 Hours.
Utilization of information, quantitative techniques, and computer application in decision making and problem solving for managers. This course is cross-listed with ISYS 5403.

SCMT 560V. Special Topics in Logistics. 1-6 Hour.
Explores current events, concepts, and new developments in the field of logistics and transportation. Topics are selected by the Marketing and Transportation faculty for each semester the course is offered. May be repeated for up to 6 hours of degree credit.

SCMT 5623. Supply Chain Innovation and Technology. 3 Hours.
This course explores innovation as a strategy to improve existing and/or invent new supply chain processes which ultimately create and/or maintain competitive advantage. Open, reverse, disruptive, incremental and breakthrough innovation concepts are explored. Design thinking is utilized to facilitate critical customer centric thinking about supply chains resulting in innovative solutions by inventing new or improving on existing processes, intellectual property, technologies, and systems. Leadership assessment techniques will be utilized to create diverse and inclusive cross-functional teams focused on current industry projects.

SCMT 5633. Introduction to Supply Chain Management. 3 Hours.
Supply chain management is the integration of key business processes from end user through suppliers. The focus of this course is on the core processes that must be linked throughout the supply chain with an emphasis on logistics processes. Foundational topics in logistics and supply chain management will be covered.

SCMT 5643. Transportation Strategies in the Supply Chain. 3 Hours.
This course focuses on the setting of objectives and the design of optimal transportation strategy and alternative means of implementing transportation strategies within different types of organizations.

SCMT 5653. Global Logistics and Supply Management. 3 Hours.
This course examines the planning and management of logistics, but emphasizes supplier selection and development, logistics options, strategic alliances, and performance measurement. Emphasis is placed on the integration of purchasing, materials management, and multi-firm logistics planning. International logistics is also addressed within each of these topics. Prerequisite: SCMT 5633.
SCMT 5633. Retail and CPG Supply Chain Management. 3 Hours.
This course examines the planning and management of supply chain activities including supplier selection and development, demand management, quick response, vendor managed inventory, logistics options, strategic alliances, and performance measurement. Emphasis is placed on the integration of purchasing, materials management, and multi-firm logistics planning.

SCMT 5673. Modeling Retail & Consumer Products Logistics. 3 Hours.
This is a more quantitative approach to measuring logistics performance, modeling tradeoffs and making decisions. Topics include forecasting, inventory management, network optimization, and transportation routing. Prerequisite: SCMT 5633.

SCMT 5683. Supply Chain Management in Global Business. 3 Hours.
Logistics management is that part of supply chain management that plans, implements, and controls the efficient, effective forward and reverse flow and storage of goods, services, and related information between the point of origin and the point of consumption in order to meet customers' requirements. To achieve its objectives, logistics management requires the integration of business processes within and across organizations in a supply chain. Using hands on projects and class discussions based on case studies and current press articles, this course will expose students to the practical considerations that arise in real-world applications by means of projects.

SCMT 5693. Predictive Supply Chain Analytics. 3 Hours.
This course will introduce students to the variety and sources of data available from different technology-enabled sources, and through cases, expose them to innovative ways in which firms are using this data to improve supply chain management processes. The course will survey standard and advanced analytical techniques used to transform this data into actionable business intelligence and students will gain hands-on experience with these techniques. They will gain an understanding of the practical considerations that arise in real-world applications by means of projects.

SCMT 636V. Special Topics in Supply Chain Management. 1-6 Hour.
Independent reading and investigation in supply chain management. Prerequisite: Doctoral standing.

SCMT 6413. Fundamentals of Logistics and Supply Chain Management. 3 Hours.
Introduces students to the key substantive areas of logistics and supply chain management. Offers a combination of lectures covering topics such as inventory control and forecasting and seminars discussing associated academic literature. Prerequisite: Admission to doctoral program. May be repeated for up to 6 hours of degree credit.

SCMT 6423. Seminar in Structural Equation Modeling. 3 Hours.
The seminar focuses on data analysis using structural equation modeling methodologies. The course will concentrate on four basic methodologies: exploratory factor analysis, confirmatory factor analysis, path analysis, structural equations modeling with latent variables and their applications in empirical research. Prerequisite: Graduate Standing and MKTG 6433 or ISYS 5623 or ISYS 5723 or PSYC 6343 or equivalent. May be repeated for up to 6 hours of degree credit.

SCMT 6433. Supply Chain Management Research. 3 Hours.
Introduces students to major streams of SCM research and discusses the interest and merit of the research question(s), the appropriateness of the theoretical framework and/or hypothesis development, the adequacy of the research design, including data collection, measurement, and analysis (methodology), the accuracy of the discussion of the results. Prerequisite: Admission to doctoral program. May be repeated for up to 6 hours of degree credit.

SCMT 6443. Theory in Supply Chain Management. 3 Hours.
Provides an overview of theories from fields such as strategic management and marketing and explores applications of these theories to supply chain management research. Emphasis is placed on the development of theoretically grounded testable hypotheses in the context of a broad range of SCM research areas. Prerequisite: Admission to doctoral program.

SCMT 6453. Behavioral Supply Chain Management. 3 Hours.
Focuses on human behavior in supply chain management. Topics may include but will not be restricted to behavior in inventory and ordering processes, in retail store execution, in global supply chain management, in the face of adversity and catastrophic supply chain risk, and in supply chain relationships. Prerequisite: Admission to doctoral program. May be repeated for up to 6 hours of degree credit.

SCMT 6463. Research in Retail Supply Chain Management. 3 Hours.
Focuses on retail-related supply chain management research. Seminar topics may include but will not be restricted to retail sales and order forecasting, inventory management, and store execution issues. Prerequisite: Admission to doctoral program. May be repeated for up to 6 hours of degree credit.

SCMT 6473. Emerging Topics in Supply Chain Management. 3 Hours.
Covers various emerging topics, such as information technology applications in the supply chain, humanitarian logistics, supply chain security, and individual-level decision-making in the supply chain. Prerequisite: Admission to doctoral program. May be repeated for up to 6 hours of degree credit.

SCMT 700V. Doctoral Dissertation. 1-18 Hour.
Dissertation studies in supply chain management. Prerequisite: Candidacy. May be repeated for degree credit.

Sustainability (SUST) Courses

SUST 1103. Foundations of Sustainability. 3 Hours.
Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students’ own disciplines.

SUST 1103H. Honors Foundations of Sustainability. 3 Hours.
Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students’ own disciplines. Corequisite: Drill component. This course is equivalent to SUST 1103.

SUST 2103. Applications of Sustainability. 3 Hours.
Applications of Sustainability is an interdisciplinary course introducing data gathering, data analysis or interpretation, and synthesis of data applied to problems in sustainability. Students engage in hands-on, inquiry-based investigation of sustainability issues across four thematic areas; social systems, natural systems, built systems (Architecture & Engineering), and managed systems (Agriculture & Business). Prerequisite: SUST 1103 or instructor consent.

SUST 2103H. Honors Applications of Sustainability. 3 Hours.
Applications of Sustainability is an interdisciplinary course introducing data gathering, data analysis or interpretation, and synthesis of data applied to problems in sustainability. Students engage in hands-on, inquiry-based investigation of sustainability issues across four thematic areas; social systems, natural systems, built systems (Architecture & Engineering), and managed systems (Agriculture & Business). Corequisite: Drill component. Prerequisite: SUST 1103 or instructor consent. This course is equivalent to SUST 2103.
SUST 390V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: SUST 1103 and SUST 2103 or instructor permission. May be repeated for up to 6 hours of degree credit.

SUST 4103. Capstone Experience in Sustainability. 3 Hours.  
A capstone experience focused on service learning, research learning, or internship in sustainability. Student engagement in community service, research, or relevant work on sustainability through a summer internship or equivalent experience provides opportunities for students to apply sustainability theories and principles learned from prior course work toward advancing sustainability across society. Prerequisite: SUST 1103 and SUST 2103.

SUST 4603. Environmental Sociology. 3 Hours.  
The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding of the complexity of the relationship between societal organization and environmental change. Prerequisite: Junior or senior standing. This course is cross-listed with HDFS 4603, SOCI 4603.

SUST 4693. Environmental Justice. 3 Hours.  
This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. This course is cross-listed with GEOS 4693, GEOS 4693H.

SUST 5103. Analysis and Design of Resilient Systems. 3 Hours.  
Introduces students to complex systems theory, change theory, systems analysis and modeling, and design theory for resilient systems. This course draws theory and heuristics from multiple disciplines, including but not limited to engineering, architecture, ecology, risk assessment, management, social sciences, political sciences, the arts and the humanities.

SUST 5203. Decision Making, Analysis and Synthesis in Sustainability. 3 Hours.  
Provides an applied framework for analyzing decision dynamics, supporting and promoting more sustainable decisions, and measuring the sustainability of systems. The course applies theories of change, institutional decision theory, social and institutional constructs of sustainability, indicator and metric development across social, ecological, and economic domains, and communication strategies.

SUST 5303. Sustainable Global Food, Energy and Water Systems. 3 Hours.  
Provides a detailed review of the existing global food production/distribution and water systems, with an emphasis on scarcity, equity, management and challenges from changing global systems. This course explores the inputs and efficiencies of existing agricultural production systems, and examines equity and value in these systems.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

SUST 590V. Special Problems in Sustainability. 1-6 Hour.  
Special Problems is intended to fulfill a need in the sustainability curriculum to offer one-time pilot course work in any semester prior to the formal curriculum approval process, offer seminars on unusual but timely topics in sustainability on a one-time basis, or independent study for students seeking additional expertise in sustainability research and scholarship. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.
TEED 459. Industrial Internship. 1-12 Hour.
In an actual industrial setting, the student will study managerial functions, organizational practices, product design, production fabrication, routing, quality control, work schedules, industrial relations, and related activities of American industrial society. May be repeated for up to 15 hours of degree credit.

Theatre (THTR)

Courses

THTR 1003. Basic Course in the Arts: Theatre Appreciation (ACTS Equivalency = DRAM 1003). 3 Hours.
Introduction to theatre arts; playwriting, directing, acting, and design. For the general student. May not be presented towards satisfaction of the B.A. in fine arts requirement by theatre majors.

THTR 1003H. Honors Basic Course in the Arts: Theatre Appreciation. 3 Hours.
Introduction to theatre arts; playwriting, directing, acting, and design. For the general student. May not be presented towards satisfaction of the B.A. in fine arts requirement by theatre majors.
This course is equivalent to THTR 1003.

THTR 1013. Musical Theatre Appreciation. 3 Hours.
An introduction to musical theatre literature, history, process and artists. Includes guided listening, and reading, viewing, and critically thinking about this quintessentially American art form and its role in society.

THTR 1223. Introduction to Theatre. 3 Hours.
Examination of the various elements that make up the theatre art form. Provides hands-on experience in the artistic and technical aspects of theatre. Playwriting, directing, acting and design principles are discussed. Covers dramatic history, literature, theory, and the role of the theatre in society. Course culminates in collaborative group projects. Prerequisite: Theatre major or minor.
This course is equivalent to THTR 1003.

THTR 1311L. Stage Technology I Laboratory: Costume and Makeup. 1 Hour.
Practical application of costume technology and makeup skills. Students will participate in projects involving the construction and preparation of costumes and makeup designs associated with departmental productions. Production running crew positions will also be assigned. Corequisite: THTR 1313.

THTR 1313. Stage Technology I: Costumes and Makeup. 3 Hours.
Fundamentals of basic costume construction with an emphasis on techniques, materials, planning and process. Training in the basic principles of theatrical makeup application. Prerequisite: Theatre major or instructor consent. Corequisite: THTR 1311L.

THTR 1321L. Stage Technology II Laboratory: Scenery and Lighting. 1 Hour.
Practical application of principles of scenery and lighting technology. Students will participate in projects involving the construction and preparation of scenery, stage properties, and lighting associated with departmental productions. Production running crew positions will also be assigned. Corequisite: THTR 1323.

THTR 1323. Stage Technology II: Scenery and Lighting. 3 Hours.
Fundamentals of scenery and lighting technology with emphasis on theatre tools, equipment, and basic drafting. Training in basic principles and skills of stage carpentry, lighting technology and rigging. Pre- or Corequisite: Theatre or Drama major or instructor consent. Corequisite: THTR 1321L.

THTR 1423. Script Analysis. 3 Hours.
Investigation of the dramatic forms and structures of play texts - from the classical era to the present - with special emphasis on how actors, directors, and designers encounter and realize texts in the production process. Prerequisite: THTR 1223.

THTR 1423H. Honors Script Analysis. 3 Hours.
Investigation of the dramatic forms and structures of play texts from the classical era to the present, with special emphasis on how actors, directors, and designers encounter and realize texts in the production process. Prerequisite: THTR 1223 and honors candidacy.

THTR 1683. Acting I. 3 Hours.
An analytical approach to the actor's art with emphasis on the techniques of characterization.

THTR 1883. Acting I for Theatre Majors. 3 Hours.
An introductory acting studio course for theatre majors, exploring the physical, vocal, and imaginative processes required for performance of dramatic texts, and building a vocabulary and technique for acting through exercises and scene-work that will build a foundation for theatre classes within the major. Pre- or Corequisite: Theatre major or minor. Prerequisite: THTR 1223.

THTR 2313. Fundamentals of Theatrical Design. 3 Hours.
Principles and practices of theatre design including the elements of design and the fundamental principles of art and its application to the areas of set, costume, lighting and sound design. This course studies the designer's role in the production process, design requirements, and aesthetics. Emphasis on the basic principles of two-dimensional art and graphic forms through the use of various media.

THTR 2483. Stage Movement for the Actor. 3 Hours.
Instruction incorporates physical warm-up strategies and exercises designed to improve relaxation; develop flexibility, alignment, strength, kinesthetic awareness, and appreciation of mind/body unity; and to connect stage movement to imagination, character development, and text. Techniques covered include Alexander training, Michael Chekhov work, dance, theater games and gentle yoga practice. Prerequisite: THTR 1223 and (THTR 1683 or THTR 1883).

THTR 2513. Drafting for the Theatre. 3 Hours.
Covers basic technical drawing and graphic skills necessary to communicate design ideas to fellow artisans. Both production and design-oriented drafting will be explored using both hand drafting and computer techniques. Prerequisite: THTR 1323 and THTR 1321L or instructor consent.

THTR 2683. Acting II. 3 Hours.
An acting studio course deepening the exploration of techniques introduced in Acting I, including expanded work on characterization and script analysis through exercises, scene-work and monologue performance. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H and (THTR 1683 or THTR 1883).

THTR 3001. Production Practicum. 1 Hour.
Credit for participation in technical assignments related to mainstage or faculty-directed productions: one (1) credit hour per production. Assignments shall be determined by the faculty. Credit will be awarded only after completion of assignments and only with faculty approval. May be repeated for up to 2 hours of degree credit.

THTR 3011. Performance Practicum. 1 Hour.
Credit for performance in faculty directed productions; one credit hour per production. Assignments shall be determined by the faculty. Credit will be awarded only after satisfactory completion of assignment and with faculty approval. May be repeated for up to 2 hours of degree credit.

THTR 3213. Costume Design. 3 Hours.
Study of the art and practice of stage costume design. Emphasis on the expression of character through costume. Development of rendering and research skills. Prerequisite: THTR 2313.

THTR 3243. Costume Technology. 3 Hours.
Advanced methods of costume construction techniques and the exploration of theatrical pattern drafting will be practiced through projects. Prerequisite: THTR 1313 and THTR 1311L.
THTR 3433. Stage Speech. 3 Hours.
An introduction to the basic skills of speech, voice production and communication for performance and broadcasting. Special focus on General American speech and the characteristics of speech regionalisms. The course will explore breath control, resonance, articulation, pitch, volume, voice quality and stress management. Prerequisite: THTR 1223 and either THTR 1683 or THTR 1883.

THTR 3653. Directing I. 3 Hours.
Basic principles and techniques of play direction, including play analysis, audition and rehearsal organization, staging and collaborating with actors. Pre- or Corequisite: Theatre major and junior or senior standing, or instructor consent. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H, and THTR 1313, THTR 1311L THTR 1323, THTR 1321L and THTR 2683.

THTR 3663. Acting III. 3 Hours.
An advanced acting studio building on techniques introduced in Acting I and II. Intensive work on script analysis, emotional preparation, awakening the imagination, characterization, partner work and playing action. Prerequisite: THTR 1683 or THTR 1883 and THTR 2683.

THTR 3663. Stage Management. 3 Hours.
Principles of stage management in the context of academic and professional theatre production. Issues of theatre management and producing are addressed as they relate to play production activities. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H and THTR 1313, THTR 1311L, THTR 1323 and THTR 1321L.

THTR 3733. Lighting Design. 3 Hours.
The study of the practical application and technology of stage lighting including history, electricity, conventional and moving lighting instruments, dimming systems, consoles and control systems and related paperwork. Ten lab hours to coincide with departmental productions is required. Prerequisite: THTR 1323, THTR 1321L, and THTR 2313.

THTR 3903. Theatrical Makeup. 3 Hours.
The techniques and skills of theatrical makeup and design involved in the creation and execution of character makeup for the stage. Prerequisite: THTR 1313 and THTR 1311L. May be repeated for up to 6 hours of degree credit.

THTR 3923H. Honors Colloquium (Irregular ). 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in THTR). May be repeated for degree credit.

THTR 399VH. Honors Thesis. 1-6 Hour.
The Honor student will complete a thesis. Prerequisite: Junior standing. May be repeated for up to 12 hours of degree credit.

THTR 4063. Playwriting. 3 Hours.
A beginning workshop in the fundamentals of playwriting which culminates in the completion of an original play. Exercises in dialogue, character development, conflict and structure will be an essential part of the course. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H.

THTR 4123. Rendering for the Theatre. 3 Hours.
Provides the fundamentals of visual communication for theatre in a variety of media and techniques. Investigation of traditional drawing and painting methods and materials used by theatrical designers. Application of computer technology and software training in creating documents necessary to the theatrical process. Prerequisite: THTR 2313.

THTR 4153. Musical Theatre Performance. 3 Hours.
Principles and techniques of performing a singing role for the theatre. Examines the relationship between score and text. May be repeated for up to 6 hours of degree credit.

THTR 4233. History of the Theatre I. 3 Hours.
A survey of dramatic literature, theatre practices and cultural contexts for dramatic presentation from classical Greece through the Restoration. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H.

THTR 4333. History of the Theatre II. 3 Hours.
A survey of dramatic literature, theatre practices and cultural contexts for dramatic presentation from the 18th century to the mid-20th century. Emphasis is given to Western theatre practices. Prerequisite: THTR 1223 or THTR 1003 or THTR 1003H.

THTR 4463. African American Theatre History -- 1950 to Present. 3 Hours.
A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course the student should be familiar with the major works of African-American theatre and have a deeper understanding of American History.

THTR 4653. Scene Design. 3 Hours.
Theory and practice in the art of scenic design, including historical and contemporary styles and procedures. Prerequisite: THTR 1323, THTR 1321L, THTR 2313 and THTR 2513.

THTR 4683. Acting IV - Shakespeare Performance. 3 Hours.
An acting studio course exploring the performance of Shakespearean texts, with focus on scansion, verse and prose, poetry, characterization and voice and articulation. Prerequisite: THTR 1683 or THTR 1883, and THTR 2683, THTR 3663 and THTR 3433.

THTR 4833. Scene Painting. 3 Hours.
A studio class in painting techniques for the theatre. Exercises in color, textures, styles, and execution. Prerequisite: THTR 1323, THTR 1321L, and THTR 2313. May be repeated for up to 6 hours of degree credit.

THTR 490V. Independent Study. 1-3 Hour.
Individually designed and conducted programs of reading and reporting under the guidance of a faculty member. Prerequisite: Instructor consent. May be repeated for up to 3 hours of degree credit.

THTR 491V. Special Topics. 1-3 Hour.
Classes not listed in the regular curriculum, offered on demand on the basis of student needs and changes within the profession. May be repeated for degree credit.

THTR 492V. Internship. 1-12 Hour.
A practical, experiential approach to performance and production using the internship program to provide training and experience more advanced than that provided during the normal school year. Students will outline a contract of specific requirements based upon individual's needs, goals, and skills. Prerequisite: Instructor consent. May be repeated for up to 12 hours of degree credit.

THTR 4953. Theatre Study in Britain. 3 Hours.
Study of the components of stage production through attending and critiquing a wide variety of classical, modern, and avant-garde theatre productions in England; includes tours of London and historical British sites and seminars with British theatre artists.

THTR 5123. Theatrical Design Rendering Techniques. 3 Hours.
Investigation of drawing and painting methods and materials useful to theatrical designers. Integration of graphic communication with overall production conceptualization will be explored through examination of various theatre styles and periods. May be repeated for up to 6 hours of degree credit.

THTR 5143. History of Decor for the Stage. 3 Hours.
An overview of architectural decoration and its application to theatrical design from the Predynastic Period (4400-3200 B.C.) through the Art Deco period with references to contemporary decor. Prerequisite: Graduate standing.
THTR 5163. Scene Design Studio. 3 Hours.
Individual and advanced projects in designing scenery for various theatrical genres as well as non-theatrical applications with emphasis on the design process involving playscript analysis, text analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 3653 or instructor consent. May be repeated for up to 6 hours of degree credit.

THTR 5193. Scene Technology Studio. 3 Hours.
Individual and advanced projects in scenic techniques with emphasis on scene painting, drafting, rendering, properties design, or scenic crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. May be repeated for up to 9 hours of degree credit.

THTR 5213. Costume Design. 3 Hours.
Advanced study of the art and practice of stage costume design. Emphasis on the expression of character through costume. Development of rendering and research skills. Portfolio development.

THTR 5243. Costume Technology I. 3 Hours.
Advanced methods of costume construction techniques and the practice of theatrical pattern drafting will be explored through project work.

THTR 5263. Costume Design Studio. 3 Hours.
Individual and advanced projects in designing costumes for various theatrical genres with emphasis on the design process involving text interpretation, character analysis, and research. Collaboration skills and advanced rendering techniques will be explored. Contributes to on-going portfolio development. Prerequisite: THTR 3213 or THTR 5213 or instructor consent.

THTR 5293. Costume Technology Studio. 3 Hours.
Individual and advanced projects in costume construction and techniques with emphasis on flat pattern, draping, corsetry, tailoring or costume crafts as determined by student need. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. May be repeated for up to 9 hours of degree credit.

THTR 5353. Stage Lighting Technology. 3 Hours.
The thorough examination of the technology of equipment that supports the art of stage lighting design: theory, operating principles and specification of lamps, fixtures, control systems and special effect hardware will be explored. Prerequisite: Graduate standing.

THTR 5363. Theatre Planning. 3 Hours.
A study of significant theatre buildings, modern and historical, and their relationship to contemporary theatre planning. Practical application of theory through design problems and evaluation. Graduate level research project/paper required.

THTR 5383. Lighting Technology Studio. 3 Hours.
Individual and advanced projects in lighting technology with emphasis on light sources, lighting control, equipment design and specification and the mechanics of lighting. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. May be repeated for up to 9 hours of degree credit.

THTR 5393. Lighting Design Studio. 3 Hours.
Individual projects in lighting design with emphasis on the design process involving script interpretation, design aesthetics and research. Lighting design applications to a variety of venues will be studied. Contributes to on-going portfolio development. Prerequisite: Graduate standing or instructor consent. May be repeated for up to 6 hours of degree credit.

THTR 542V. Graduate Acting Studio. 1-3 Hour.
Provides actors with intensive opportunities to explore specific aspects of their craft. Sample topics include characterization, Chekhov, Pinter, Brecht, improvisation and mask work. Topics vary each semester. Prerequisite: Graduate standing in Drama. May be repeated for up to 18 hours of degree credit.

THTR 5432. Graduate Voice and Speech I. 2 Hours.
Teaches how to build clear vocal production using proper breath support, grounded in the Alexander technique. Emphasis on the connection between breath and thought, learning to undo inadequate vocal habits, and vocal hygiene. Prerequisite: Graduate standing in Drama. May be repeated for up to 4 hours of degree credit.

THTR 5443. Graduate Acting: Period Styles. 3 Hours.
Styles of acting in relation to French and English Dramatic Literature (16th-19th Centuries). This course also examines the historical and cultural influences that shaped each genre. A period dance component is included. Prerequisite: Graduate standing in Drama.

THTR 545V. Musical Theatre Performance. 1-3 Hour.
Theory and techniques of performing a singing role for the theatre. Integrates acting and vocal techniques and examines the relationship between score and text. Prerequisite: Graduate standing in Drama.

THTR 5463. Audition Techniques. 3 Hours.
A thorough study and practical application of audition skills and techniques. This course will equip the student with prepared audition pieces and experience in cold reading, on-camera work, and improvisation. The course also explores the practical needs of the actor; from how to get an audition to how to prepare a resume. Prerequisite: Graduate standing in Drama.

THTR 5473. Graduate Acting: Shakespeare. 3 Hours.
Analysis of Shakespeare for performance. Work will include the plays of Shakespeare and his contemporaries, including cultural and theatrical contexts required for understanding the scripts. Prerequisite: Graduate standing in Drama.

THTR 548V. Meisner Technique I. 1-3 Hour.
Acting theory and exercises of Sanford Meisner, including repetition work, connecting with partner, three moment game, activities, and emotional preparation.

THTR 549V. Meisner Technique II. 1-3 Hour.
Continuation of Meisner Technique I. Incorporation of theory and advanced exercises of the Meisner Technique into the playing of text. Prerequisite: THTR 548V.

THTR 5501. Research Techniques in Drama. 1 Hour.
Basic techniques of research and study in the fields of Drama and Theatre with consideration of the necessary interplay of intellectual and intuitive skills in mature artistry. Practice in the logical, semantic, and evidential work of scholarship and in the various research methodologies.

THTR 5533. Graduate Playwriting: Special Projects. 3 Hours.
Advanced study and practice in the area of playwriting. The area of concentration will be determined by the student's specific writing project(s). Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

THTR 5543. Creating a One-Person Show. 3 Hours.
Actors learn to use compelling personal experiences and interests in the creation of a unique one-person show. Includes exploration in characterization, staging and playwriting. Culminates in the public presentation of a short one-person show. Prerequisite: Graduate standing in Drama.

THTR 5552. Graduate Voice and Speech II. 2 Hours.
A continuation of Graduate Voice and Speech I, exploring more closely the connection between breath support and volume, pitch, range, resonance and articulation. Prerequisite: THTR 5432.

THTR 5562. Graduate Voice and Speech III. 2 Hours.
Continuation of Graduate Voice and Speech II, focusing on the classification of vowels and consonants according to the International Phonetic Alphabet (IPA). Prerequisite: THTR 5552.
THTR 5572. Graduate Voice and Speech IV. 2 Hours.
Continuation of Graduate Voice and Speech III. Extension of the application of the IPA to the analysis of different accents of individuals for whom English is a second language. Approximately eight dialects of English will be examined. Prerequisite: THTR 5562.

THTR 5593. Acting and Directing Absurdist Theatre. 3 Hours.
This course focuses on a particular dramatic style that developed following World War II: Absurdist. In scene presentation projects, students will grapple with the unusual challenges acting and directing these plays, as well as explore the cultural contexts, philosophies and theatrical traditions that led to their invention. Prerequisite: Graduate standing in Drama.

THTR 5613. Graduate Directing Principles. 3 Hours.
Theory and technique of directing realistic drama: script analysis; spatial considerations of composition and picturization; development in production of the Aristotelian concepts of plot, character, thought, diction, music (sound), and spectacle. Prerequisite: Graduate standing.

THTR 562V. Seminar in Dramatic Art. 1-9 Hour.
Research, discussion and projects focusing on a variety of topics including theatre management, advanced acting methods, and specialized periods in dramatic literature. Prerequisite: Senior or graduate standing. May be repeated for up to 9 hours of degree credit.

THTR 5663. Directing Modern Drama. 3 Hours.
Studio course exploring the challenges of directing post-19th Century dramatic literature. Individual projects in collaboration with actors. Sample dramatic literature includes styles such as Realism, Expressionism, Absurdist, post-Modernism and Epic Theatre. Topics vary each semester. Prerequisite: Graduate standing in Drama. May be repeated for up to 12 hours of degree credit.

THTR 5673. Adapting and Directing Non-Theatrical Texts. 3 Hours.
Offers directors practice in the adaptation and staging of non-theatrical prose, poetry and current events. Individual projects in collaboration with actors. Prerequisite: Graduate standing in Drama.

THTR 5683. Directing Studio. 3 Hours.
Hands-on exploration into the direction of historical and contemporary texts and styles, including Greek, Roman, Shakespeare, Realism, American and international scripts and the adaptation of non-theatrical material. Topics vary each semester. Includes discussion and investigation of the theatrical arts and collaborative and production processes. Prerequisite: MFA Directing student or instructor consent. May be repeated for up to 6 hours of degree credit.

THTR 5691. Scene Study for Directing Studio. 1 Hour.
Participation as an actor in scenes presented for the graduate Directing Studio course. Varying historical and contemporary texts and styles each semester. Class meets one hour each week, plus outside rehearsals, depending on casting. Prerequisite: Instructor consent. May be repeated for up to 4 hours of degree credit.

THTR 5713. Directing Classics. 3 Hours.
Explores the challenges of directing classic texts. Individual projects in collaboration with actors on a wide variety of pre-20th Century dramatic literature. Topics vary each semester. Prerequisite: Graduate standing in Drama. May be repeated for up to 12 hours of degree credit.

THTR 5723. History of the Theatre I. 3 Hours.
A comprehensive study of the theatre in different cultures and ages, as an institution, as an art, and as a vision of life.

THTR 5733. History of the Theatre II. 3 Hours.
A continuation of THTR 5723.

THTR 5763. Dramatic Criticism. 3 Hours.
Analysis of critical theories from Aristotle to the present; interrelationships of theatre disciplines as well as the influence of the church, state, and press on dramatic criticism. Prerequisite: Senior or graduate standing.

THTR 5783. Viewpoints. 3 Hours.
Exploration and application of the Viewpoints movement technique. Prerequisite: Graduate standing in Drama.

THTR 581V. Theatre Production III. 1-3 Hour.
Participation in the process of production for the University Theatre mainstage at a supervisory level. Areas of involvement may include scenery, lighting, sound, makeup, marketing, etc. May be repeated for up to 6 hours of degree credit.

THTR 590V. Independent Study. 1-18 Hour.
Individually designed and conducted programs of reading and reporting under guidance of a faculty member. May be repeated for up to 18 hours of degree credit.

THTR 591V. Special Topics. 1-3 Hour.
Classes not listed in the regular curriculum, offered on demand on the basis of student needs and changes within the profession. Prerequisite: Graduate standing in Drama or Instructor consent required. May be repeated for degree credit.

THTR 592V. Internship. 1-6 Hour.
Supervised practice in the various arts and crafts of the theatre (e.g. full design responsibility for a production; box office management; actor apprenticeship in a professional company).

THTR 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. Prerequisite: Graduate standing. May be repeated for degree credit.

U A Clinton School (UACS)
Courses

UACS 501V. Special Topics in Public Service. 1-3 Hour.
Designed to cover specialized topics not usually presented in depth in regular courses. May be repeated for up to 6 hours of degree credit.

UACS 502V. Advanced Problems in Public Service. 1-3 Hour.
Provides an opportunity for individual study.

UACS 5101. Ethical and Legal Dimensions of Public Service. 1 Hour.
This course will provide an overview of the primary ethical principles and legal concepts that guide difficult decisions in the public realm. Traditional academic study of ethical and legal theory will be combined with practical approaches to problem solving. Students will explore issues of economic, political, and social justice through case studies of current issues. Students will construct cases that are relevant to their own fields and present them to the class, identifying ethical and legal constraints on decision-making and implementation.

UACS 5303. Communication Processes and Conflict Transformation. 3 Hours.
The course is designed to increase the student's personal communication effectiveness as a leader and public servant, and to enable students to understand the application of communication processes in the public arena.

UACS 5313. Dynamics of Social Change. 3 Hours.
The course deals with the elements of social change in a democratic society, and how these intersect with and are affected by economic and political forces. A critical examination of the various justifications for promoting or discouraging social change will be undertaken, and the inherent strengths and weaknesses of these various approaches will be analyzed. Real-world cases will be used, and a culminating exercise will be a strategic assessment of the Lower Mississippi Delta.

UACS 5323. Leadership in Public Service. 3 Hours.
This course is designed to increase students' knowledge of leadership concepts and best practices, provide opportunities and experiences that improve leadership skills and techniques, and enhance capabilities in organizational management. Students will assess their leadership strengths and weaknesses, as well as develop an action plan to match their career goals. They will improve knowledge and skills in building diverse teams, in initiating/managing change, in addressing uncertainty, and in leading non-governmental organizations. At the end of the course, students should be able to design leadership strategies to successfully address a spectrum of issues in public service and in promoting the community good.
UACS 5333. Analysis for Decision Making in Public Service. 3 Hours.
This course is intended to provide students with analytical tools that enhance their skills in diagnosing problems and formulating solutions within organizations and communities. Instruction will focus on evaluating community assets as a balance to assessing community need. Underlying values of social justice and collaborative problem-solving provide a benchmark for these activities. Students, working in teams, will be challenged to apply their skills to cases related to affordable housing and homelessness.

University (UNIV) Courses
UNIV 1001. University Perspectives. 1 Hour.
A first-year “student success” course, this class will be taught with both an online component and classroom activities. The course is designed to teach/encourage critical thinking and civic engagement. Additionally, this class will explore strategies for dealing with stress and time management to promote solutions for maintaining a physically and mentally healthy body, and to develop communication and leadership skills to benefit students in their education and their careers. This course is cross-listed with UNIV 1001H.

UNIV 1001H. Honors University Perspectives. 1 Hour.
A first-year “student success” course, this class will be taught with both an online component and classroom activities. The course is designed to teach/encourage critical thinking and civic engagement. Additionally, this class will explore strategies for dealing with stress and time management to promote solutions for maintaining a physically and mentally healthy body, and to develop communication and leadership skills to benefit students in their education and their careers. This course is cross-listed with UNIV 1001.

UNIV 1011. Writing with Integrity for the Academic World. 1 Hour.
An exploration of the principles and skills of writing with academic integrity in a collegiate setting. Aimed at preparing students to recognize the intellectual property of others and distinguish it from their own in the research and writing process with attention to the reading, research and writing processes, ethical decision making, and the nature and significance of intellectual property.

UNIV 1021. College Learning II. 1 Hour.
UNIV 1021 complements EDUC 1012 by focusing on additional topics leading to student success, such as setting goals and implementing action plans, assessing interests and skills, investigating career possibilities, and developing financial literacy.

UNIV 1031. Math Study Skills. 1 Hour.
Eight-week course designed for students experiencing difficulty in studying and learning the cognitive and behavioral dimensions of learning mathematics and includes topics such as memory and mathematics, translating mathematics, and math anxiety. Also recommended for math education majors.

UNIV 110V. Independent Study. 1-3 Hour.
Allows students to explore selected topics on an individual basis.

UNIV 1401. Career Exploration. 1 Hour.
This course allows students to graduate from the nationally recognized Professional Development Institute offered by the Career Development Center in an 8-week session as opposed to the traditional non-course option. Coursework will consist of 7 competencies including Self-Awareness, Career Exploration, Experience, Job Search Strategies, Resume/Cover Letter Writing, Interview Skills, and Professional Networking.

UNIV 210V. Peer Mentoring Experience. 1-2 Hour.
The UNIV 210V Peer Mentoring Experience is an independent study course open to students selected as a mentor through the required selection process. Student-mentors enrolled in this course will serve for the semester as a mentor for one or more UNIV 1001 University Perspectives course(s); meet with University Perspectives students who may need additional guidance; engage in required leadership development and training opportunities; read related research on leadership, development, peer mentoring, and first-year experience programs; and provide feedback on their experience as a mentor. Prerequisite: UNIV 1001 and instructor consent. May be repeated for up to 4 hours of degree credit.

UNIV 3401. Career Planning and Professional Development for Juniors and Seniors. 1 Hour.
This course examines the career planning process of self-assessment, exploring career opportunities in the world of work and learning assertive job search strategies that result in the development of a “Life after College” career plan.

University Connections Program (UCPG) Courses
UCPG 0005. University Connections Intensive English. 5 Hours.
This class is part of the Intensive English Program designed for students who are in their first semester of the University Connections three-semester program. Not for degree credit. Prerequisite: Language assessment required.

Walton College of Business (WCOB) Courses
WCOB 1023. Business Foundations. 3 Hours.
Surveys the areas of business and presents business processes that are common to most enterprises through a hands-on, interactive business experience. Also develops the double-entry accounting framework that captures and reports information about business process performance. Topics include: analysis and recording of transactions, accounting cycle, and preparation of financial statements. Prerequisite: (WCOB 1120 or ISYS 1123 with a grade of C or better) and COMM 1313 with a grade of C or better (and WCOB 1111H each with a grade of C or better, for Walton College majors only).

WCOB 1023H. Honors Business Foundations. 3 Hours.
Surveys the areas of business and presents business processes that are common to most enterprises through a hands-on, interactive business experience. Also develops the double-entry accounting framework that captures and reports information about business process performance. Topics include: analysis and recording of transactions, accounting cycle, and preparation of financial statements. Prerequisite: COMM 1313 with grade of C or better and WCOB 1120; and (WCOB 1111 with a grade of C or better for Walton College majors). This course is equivalent to WCOB 1023.

WCOB 1033. Data Analysis and Interpretation. 3 Hours.
This is an introductory level course covering topics involving estimation of population characteristics, research design and hypothesis testing, as well as measuring and predicting relationships. The course should enable the students to develop an understanding regarding the application and interpretation of basic data analysis techniques with an emphasis on statistical applications. Prerequisite: (MATH 2053 or MATH 2554, each with a grade of C or better) and (ISYS 1120 or (ISYS 1123 with a grade of C or better)).
WCOB 1033H. Honors Data Analysis and Interpretation. 3 Hours.
This is an introductory level course covering topics involving estimation of population characteristics, research design and hypothesis testing, as well as measuring and predicting relationships. The course should enable the students to develop an understanding regarding the application and interpretation of basic data analysis techniques with an emphasis on statistical applications. Prerequisite: (MATH 2053 or MATH 2554, each with a grade of C or better) and (ISYS 1120 or (ISYS 1123 with a grade of C or better)).
This course is equivalent to WCOB 1033.

WCOB 1111. Freshman Business Connection. 1 Hour.
Development of personal development skills, including time management; stress management and academic planning, necessary for success; introduction to business career options and opportunities.

WCOB 1111H. Honors Freshman Business Connection. 1 Hour.
Development of personal development skills, including time management; stress management and academic planning, necessary for success; introduction to business career options and opportunities. Prerequisite: Honors standing.
This course is equivalent to WCOB 1111.

WCOB 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

WCOB 2013. Markets and Consumers. 3 Hours.
Key decisions required to understand the existence of markets and how buyers within those markets may be accessed profitably. Key concepts include an overview of competitive markets, buyer behavior, developing new markets and products, promotion and distribution channels, pricing and profitability concepts, the sales and collections process, and strategic planning. WCOB 1012 was a previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023 and BLAW 2013 or equivalent, each with a grade of "C" or better.

WCOB 2013H. Honors Markets and Consumers. 3 Hours.
Key decisions required to understand the existence of markets and how buyers within those markets may be accessed profitably. Key concepts include an overview of competitive markets, buyer behavior, developing new markets and products, promotion and distribution channels, pricing and profitability concepts, the sales and collections process, and strategic planning. WCOB 1012 was a previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023 and BLAW 2013 or equivalent, each with a grade of "C" or better.
This course is equivalent to WCOB 2013.

WCOB 2023. Production and Delivery of Goods and Services. 3 Hours.
This course is designed to provide students with a broad understanding of the production and delivery of goods/services. The course focuses on concepts and methodologies for managing the flow of material and information throughout the production and delivery of goods/services. WCOB 1012 was the previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and BLAW 2013 or equivalent, each with a grade of C or better.

WCOB 2033. Acquiring and Managing Human Capital. 3 Hours.
Study of the process of acquiring and managing human resources, focusing on the organizational behavior, legal, economic, and technical issues concerned with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics.
WCOB 1012 was the previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and BLAW 2013 or equivalent, each with a grade of C or better.

WCOB 2033H. Honors Acquiring and Managing Human Capital. 3 Hours.
Study of the process of acquiring and managing human resources, focusing on the organizational behavior, legal, economic, and technical issues concerned with business decisions about acquiring, motivating, and retaining employees; emphasis given to the development, implementation, and assessment of policies and practices consistent with legal, social, human, and environmental dynamics.
WCOB 1012 was the previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and BLAW 2013 or equivalent, each with a grade of C or better.

WCOB 2043. Acquiring and Managing Financial Resources. 3 Hours.
Key decisions within business processes related to the acquisition and management of capital resources, including decisions regarding what to acquire, how to finance the acquisition, and issues related to the accounting for those capital resources. The identification of key decisions leads to decision models and the identification of information needs. WCOB 1012 was the previous prerequisite for this course, and is equivalent to BLAW 2013. Prerequisite: WCOB 1023, WCOB 1033, ECON 2023, and BLAW 2013 or equivalent, each with a grade of C or better.

WCOB 2063. Workplace Competencies. 3 Hours.
This online course identifies the skills necessary to be successful as a professional in the workforce. Employers expect new college graduates to possess certain competencies. This course identifies and creates opportunities for the development of the skills most often valued in the workplace, including working in a team structure; goal setting; decision making and problem solving; planning, organizing and prioritizing work; power, persuasion and oral communication; obtaining and processing relevant data; technical skills evaluation; written communications skills; workplace image and attitude; corporate values and workplace ethics; and influencing others at a new job.

WCOB 210V. Special Topics in Business. 3-6 Hour.
Special topics of an interdisciplinary nature. May be repeated for up to 6 hours of degree credit.

WCOB 230V. Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in Walton College. Topics vary by location of study abroad opportunities. Prerequisite: Departmental consent. May be repeated for up to 12 hours of degree credit.

WCOB 230VH. Honors Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in Walton College. Topics vary by location of study abroad opportunities. Prerequisite: Honors standing and departmental consent. May be repeated for up to 12 hours of degree credit.
This course is equivalent to WCOB 230V.

WCOB 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

WCOB 3003H. Honors College Colloquium. 3 Hours.
An inter-disciplinary course exploring events, concepts, and/or new developments in the field of business administration. Prerequisite: Junior or senior standing. May be repeated for up to 6 hours of degree credit.

WCOB 3016. Business Strategy and Planning. 6 Hours.
Integrative study of the managerial decisions; introduces students to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and experiential approaches to designing business plans for key decisions, implementing these decisions, and monitoring their effects. Prerequisite: A business student must complete the pre-business requirements before enrolling for this course.
WCOB 2013, WCOB 2023, WCOB 2033, and WCOB 2043 must each be completed with a grade of "C" or better. This course is restricted to Walton College students.
WCOB 3016H. Honors Business Strategy and Planning. 6 Hours.
Integrative study of the managerial decisions; introduces students to an understanding of strategic competitiveness and the way in which business strategy is formulated and implemented; uses a combination of theoretical and experiential approaches to designing business plans for key decisions, implementing these decisions, and monitoring their effects. Prerequisite: a business student must complete the pre-business requirements before enrolling for this course.
WCOB 2013, WCOB 2023, WCOB 2033, and WCOB 2043 must each be completed with a grade of "C" or better. This course is restricted to Walton College students. This course is equivalent to WCOB 3016.

WCOB 3023. Sustainability in Business. 3 Hours.
The course focuses on theoretical and practical bases for pursuing sustainability in business and society. Students learn four definitions of sustainability, measured on four axes expressed by: 1987 UN Brundtland Report (intergenerational equity), Triple-play (people, planet, profits), resource sustainability, and economic justice (fair global system of rules, fairly enforced). Prerequisite: Junior standing.

WCOB 3033. The African American Experience in Business. 3 Hours.
This course is designed to provide the student with a comprehensive and critical analysis of the history of the African American experience as a member of the business sector of the United States economics. The course will review information that includes and demonstrates activities prior to slavery, during, and after slavery. This course is cross-listed with AAST 3033.

WCOB 3043. From Books to Boardrooms. 3 Hours.
Examines career choices and skills necessary to be successful as a professional in the workforce. Self-assessment and career exploration strategies are examined using career development theories. Incorporates career path management principles to include exploring occupations, networking, enhancing business communications, job searching, workplace skills, and college to work transition. Business majors may not use course towards upper level business credit, but may be used toward non-business elective credit. Prerequisite: Junior standing.

WCOB 3053. Diversity in the Workforce. 3 Hours.
This course is designed to engage students in discussions and to increase their awareness and knowledge about barriers and contributions of underrepresented groups. This course will cover race, class, gender, sexuality, ethnicity, nationality, and physical differences that impacts underrepresented groups and how this information can influence that work environment. The course involves weekly discussion, critical evaluation, and reflection of the subjects that are covered in the assignments. Prerequisite: Junior Standing.

WCOB 310V. Cooperative Education. 1-3 Hour.
Co-op allows students to earn one or two hours of credit per semester for work related to their major. Accumulated credit may not exceed six hours. Eligibility requires: 1) junior standing in the college, 2) completion of the pre-business core and 3) the prescribed GPA. See catalog for details. Prerequisite: Junior standing and completion of pre-business core. May be repeated for up to 6 hours of degree credit.

WCOB 320V. International Internship. 1-3 Hour.
The International Internship allows students to work overseas with a pre-approved employer. Students must have a faculty supervisor who will work with their employer to monitor their work experience and progress. Students are responsible for finding a faculty supervisor, and the Global Engagement Office will work with both the student and faculty member to facilitate the employer relationship and expectations. Students will receive one to three hours of credit per semester based on hours worked and length of time abroad. Students may receive up to three hours of credit. Prerequisite: Junior Standing, 3.0 cumulative GPA, and Department Consent. May be repeated for up to 3 hours of degree credit.

WCOB 330V. Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Departmental consent, Junior standing and completion of pre-business course requirements, each with a grade of C or better, a pre-business cumulative GPA of 2.5 or better and an overall GPA of 2.5 or better. May be repeated for up to 12 hours of degree credit.

WCOB 330VH. Honors Walton College Study Abroad. 3-6 Hour.
Open to undergraduate students studying abroad in officially sanctioned programs in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Honors standing, departmental consent, Junior standing and completion of pre-business course requirements, each with a grade of C or better, a pre-business cumulative GPA of 2.5 or better and an overall GPA of 2.5 or better. May be repeated for up to 12 hours of degree credit.

WCOB 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

WCOB 410V. Special Topics in Business. 1-6 Hour.
Special business topics of an interdisciplinary nature. Prerequisite: Junior standing. May be repeated for up to 6 hours of degree credit.

WCOB 410VH. Honors Special Topics in Business. 1-6 Hour.
Special business topics of an interdisciplinary nature. May be repeated for up to 6 hours of degree credit. This course is equivalent to WCOB 410V.

WCOB 455V. Service Learning Practicum. 1-3 Hour.
Through participation in this practicum, students learn while providing services that benefit the community. The goal is for students to learn, practice, and teach the principles of free enterprise. The students assess community needs and design service projects that enable them to apply course content knowledge while developing organizational, communication, time-management, and leadership skills. May be repeated for up to 6 hours of degree credit.

WCOB 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research.

WCOB 4993H. Honors Thesis. 3 Hours.
Provides Honors Students with an opportunity to explore a business topic in depth through an independent research project. Prerequisite: Good standing in the Walton College Honors Program.

WCOB 5023. Sustainability in Business. 3 Hours.
The course focuses on theoretical and practical bases for pursuing sustainability in business and society.

WCOB 510V. Special Topics in Business. 1-3 Hour.
Special business topics of an interdisciplinary nature. May be repeated for up to 6 hours of degree credit.

WCOB 5843. Cross-Sector Collaboration for Sustainability. 3 Hours.
This course explores how organizations in the three sectors of society work together in value creation by addressing social and environmental problems. Focusing on business and nonprofit organizations, we investigate the forces that bring about and influence these collaborations from practical and theoretical perspectives, and managerial responses to collaboration challenges. Prerequisite: Graduate Status.
This course is equivalent to WLLC 4023.

Tools in language and culture courses. Prerequisite: Senior standing.

This course provides senior level undergraduate and graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include instructional systems design, development of strong pedagogical strategies for teaching with film, analysis of research focused on subtitling, learning strategies, mental effort, and language and culture development, as well as some videotaping and editing. Prerequisite: Senior standing.

This course is equivalent to WLLC 4033.

**World Languages, Literatures and Cultures (WLLC)**

**Courses**

**WLLC 2413. Migrant Experiences in Multicultural Europe. 3 Hours.**
Introduction to the great diversity of Europe. Through three five-week units, students will participate in discussions regarding the identity of the inhabitants of France, Germany, and Italy. The course is team taught by faculty in French, German, and Italian. Does not count toward the foreign language requirement.

**WLLC 3173. Introduction to Linguistics. 3 Hours.**
Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: Junior standing.

This course is cross-listed with ANTH 3173, COMM 3173, ENGL 3173.

**WLLC 3923H. Honors Colloquium. 3 Hours.**
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in foreign languages). May be repeated for degree credit.

**WLLC 398V. Special Studies. 1-6 Hour.**
A course (not independent study) which covers a topic or author not usually presented in depth in regular courses. May be repeated for degree credit.

**WLLC 4013. Native American Languages and Cultures. 3 Hours.**
Focuses on one of the major Native American groups from the southeast and midwest including the Quapaws, the Choctaws, the Caddos, and the Osages. Introduces the selected Native American group’s language, culture, history and literature. Content varies each semester. May be repeated for up to 6 hours of degree credit.

**WLLC 4023. Languages, Cultures, and Teaching with Technology. 3 Hours.**
This course provides senior level undergraduate and graduate students with innovative ways to teach and communicate through the use of modern technologies as applied to second languages. Topics of discussion include instructional systems design, Web 2.0 technologies, presentation technologies, online facilitation, and pedagogical strategies for using technological tools in language and culture courses. Prerequisite: Senior standing.

This course is equivalent to WLLC 4023.

**WLLC 4033. Languages, Cultures and Teaching with Video. 3 Hours.**
This course provides senior level undergraduates and graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include instructional systems design, development of strong pedagogical strategies for teaching with film, analysis of research focused on subtitling, learning strategies, mental effort, and language and culture development, as well as some videotaping and editing. Prerequisite: Senior standing.

**WLLC 4033H. Honors Language, Culture and Video Development. 3 Hours.**
This course provides senior level undergraduates and graduate students with the knowledge and skills needed to teach and communicate through the use of video as applied to second languages. Topics of discussion include instructional systems design, videotaping, editing and development for internet and DVD delivery, and effective utilization of video in teaching and communication. Prerequisite: Senior standing.

This course is equivalent to WLLC 4033.

**WLLC 4043. The Early French in North America. 3 Hours.**
This course focuses on French exploration in North America from 1508 until 1698. Activities for both French and non-French speaking students provide a rich environment to discuss first encounters, cultural differences, and colonization struggles throughout New France by indigenous peoples, missionaries, military and colonists alike. This course strongly familiarizes students with historic events leading up to beginnings of Colonial French Arkansas and Lower Mississippi Valley. Prerequisite: FREN 2013 or equivalent.

**WLLC 4043H. Honors New France Archival Studies. 3 Hours.**
Focuses on historic French record in New France between 1534-1673. Examination of French transcriptions, vocabulary and grammatical structures support students’ ability to read and comprehend original French historic record in authentic form and familiarize students with historic events leading up to beginnings of Colonial French Arkansas and Lower Mississippi Valley. Prerequisite: FREN 2013 or equivalent.

This course is equivalent to WLLC 4043.

**WLLC 4053. The Early French in North America. 3 Hours.**
This course focuses on French exploration in North America from 1508 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources.

This course is cross-listed with WLLC 4053H, HIST 4593.

**WLLC 4053H. Honors The Early French in North America. 3 Hours.**
This course focuses on French exploration in North America from 1508 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. Prerequisite: FREN 2013 or equivalent.

This course is cross-listed with WLLC 4053, HIST 4593.

**WLLC 4053H. Honors The Colonial French in the Mississippi Valley. 3 Hours.**
This course focuses on the French Colonial Mississippi Valley from 1699 until 1763. Activities for both French and non-French speaking students provide a rich environment to discuss encounters, subsistence strategies, and warfare faced by native peoples, missionaries, explorers, and colonists alike. Students will examine primary handwritten, transcribed, or translated sources. Prerequisite: FREN 2013 or equivalent.

This course is cross-listed with WLLC 4053H, HIST 4593.

**WLLC 4073. African Sociolinguistics. 3 Hours.**
Explores how language use intersects, constructs, and reflects social life in Africa. Covers key topics in sociolinguistics as they apply to current sociolinguistic issues on the African continent today.

This course is cross-listed with AAST 4073, ANTH 4073.

**WLLC 423V. Culture and Civilization: Field Studies. 1-18 Hour.**
May be taken by students participating in overseas work study programs approved by the department. May be repeated for degree credit.
WLLC 423VH. Honors Culture and Civilization: Field Studies. 1-18 Hour.
May be taken by students participating in overseas work study programs approved
by the department. May be repeated for degree credit.
This course is equivalent to WLLC 423V.

WLLC 5023. Languages, Cultures, and Teaching with Technology. 3 Hours.
This course provides graduate students with innovative ways to teach and
communicate through the use of modern technologies as applied to second
languages. Topics of discussion include instructional systems design, Web 2.0
technologies, presentation technologies, online facilitation, and pedagogical
strategies for using technological tools in language and culture courses.Prerequisite:
Graduate standing.

WLLC 5033. Languages, Cultures and Teaching with Video. 3 Hours.
This course provides graduate students with the knowledge and skills needed to
 teach and communicate through the use of video as applied to second languages.
Topics of discussion include instructional systems design, development of strong
pedagogical strategies for teaching with film, analysis of research focused on
subtitling, learning strategies, mental effort, and language and culture development,
as well as some videotaping and editing.

WLLC 504V. Translation Workshop. 1-6 Hour.
Problems of translation and the role of the translator as both scholar and creative
writer; involves primarily the discussion in workshop of the translations of poetry,
drama, and fiction done by the students, some emphasis upon comparative studies
of existing translations of well-known works. Primary material will vary. Prerequisite:
Reading knowledge of a foreign language.
This course is cross-listed with ENGL 5043.

WLLC 5063. Teaching Foreign Languages on the College Level. 3 Hours.
Focus on basic methodological concepts and their practical application to college
foreign language instruction.

WLLC 5463. Descriptive Linguistics. 3 Hours.
A scientific study of language with primary emphasis on modern linguistic theory
and analysis. Topics include phonology, morphology, syntax, semantics, language
acquisition, and historical development of world languages.
This course is cross-listed with ANTH 5473, ENGL 5463.

WLLC 575V. Special Investigations. 1-6 Hour.
Special investigations in world languages, literatures and cultures. May be repeated
for up to 6 hours of degree credit.

WLLC 6553. Applied Linguistics Seminar. 3 Hours.
Research and discussion in areas of applied linguistics ranging from discourse
analysis, literacy, language pedagogy, and language planning to translation theory.
Subject matter changes depending on student interest and faculty expertise.
Prerequisite: WLLC 5463 or equivalent introduction to linguistics.

World Literature (WLIT)
Courses
WLIT 1113. World Literature I (ACTS Equivalency = ENGL 2113). 3 Hours.
An introduction to literature from the beginning of civilization to about 1650.

WLIT 1113H. Honors World Literature I. 3 Hours.
Introduction to the study of both western and non-western literature. Prerequisite:
Participation in Fulbright College Scholars Program or English ACT score of 28 or
above.
This course is equivalent to WLIT 1113.

WLIT 1123. World Literature II (ACTS Equivalency = ENGL 2123). 3 Hours.
An introduction to literature from 1650 to the present.

WLIT 1123H. Honors World Literature II. 3 Hours.
A continuation of the study of literary masterpieces of the world. Prerequisite:
Participation in the Fulbright College Scholars Program or English ACT score of 28
or above.
This course is equivalent to WLIT 1123.

WLIT 3523. The Quran as Literature. 3 Hours.
The Quran as literary text, its style and form, historical context, translation issues,
communities of interpretation, and comparative perspectives. Course’s integrated
approach includes translations of literature originally in Arabic. All readings in
English; students with reading abilities in Arabic encouraged to read original text.

WLIT 3623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence
upon literature in English; types of literary forms.
This course is cross-listed with ENGL 3623.

WLIT 3713. Literature of Spain. 3 Hours.
Examines the multiple cultural traditions of Spain between 711 and 1615 C.E.
Course’s integrated approach includes translation of literature originally in Arabic
(50%+ of course content), Hebrew, Spanish, and French. All readings in English;
students with reading abilities in original languages encouraged to read original text.

WLIT 3723. Classical Arabic Literature. 3 Hours.
Arabic literature from the 1) pre-Islamic era; 2) dawn of Islam, 610-661 C.E.; 3)
Umayyad era, 661-750; Abbasid era, peaking in the ninth and tenth centuries. May
include selected post-classical but pre-modern works. No Arabic required; students
with Arabic encouraged to engage original text.

WLIT 3723H. Honors Classical Arabic Literature. 3 Hours.
Arabic literature from the 1) pre-Islamic era; 2) dawn of Islam, 610-661 C.E.; 3)
Umayyad era, 661-750; Abbasid era, peaking in the ninth and tenth centuries. May
include selected post-classical but pre-modern works. No Arabic required; students
with Arabic encouraged to engage original text.
This course is equivalent to WLIT 3723.

WLIT 3793. Special Studies. 3 Hours.
Covers a topic not usually presented in depth in regular courses. Not an independent
study. May be repeated for up to 6 hours of degree credit.

WLIT 4123. Survey of Russian Literature from Its Beginning to the 1917
Revolution. 3 Hours.
The instructor will discuss the historical and cultural backgrounds while focusing on
major writers and will deal with literature as an outlet for social criticism. There will
be textual analysis. It will be taught in English.
This course is cross-listed with RUSS 4123.

WLIT 4133. Survey of Russian Literature Since the 1917 Revolution. 3 Hours.
The instructor will discuss the historical and cultural backgrounds while focusing on
major writers and will deal with literature as an outlet for social criticism. There will
be textual analysis. It will be taught in English with readings in English.
This course is cross-listed with RUSS 4133.

WLIT 4993. African Literature. 3 Hours.
A study of modern African fiction, drama, poetry, and film from various parts of Africa
in their cultural context. Works are in English or English translation.

WLIT 5193. Introduction to Comparative Literature. 3 Hours.
Literary theory, genres, movements, and influences.

WLIT 5223. The Quran as Literature. 3 Hours.
The Quran as literary text: its style and form, historical context, translation, issues,
communities of interpretation, and comparative perspectives. Course’s integrated
approach includes translations of literature originally in Arabic. All readings in
English; students with reading abilities in Arabic encouraged to read original text.
WLIT 5623. The Bible as Literature. 3 Hours.
The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms.
This course is cross-listed with ENGL 5623.

WLIT 575V. Special Investigations on World Literatures and Cultures. 1-6 Hour.
Independent study of a special topic in world literatures and cultures. Prerequisite: Graduate standing. May be repeated for up to 6 hours of degree credit.

WLIT 600V. Master's Thesis. 1-6 Hour.
Master's Thesis. May be repeated for degree credit.

WLIT 603V. Special Studies in Comparative Literature. 1-6 Hour.
Special studies in comparative literature. May be repeated for up to 6 hours of degree credit.

WLIT 6703. Psychoanalysis and Culture. 3 Hours.
Readings of key texts in Psychoanalytic thought and cultural criticism including Freud, Lacan, Kristeva, Certeau, Zizek, and others. Selections of Psychoanalytic approaches to literature, film and gender and trauma studies.

WLIT 6713. Literature of Spain, 711-1615 C.E.. 3 Hours.
Examines the multiple cultural traditions of Spain between 711-1615 C.E. and train to produce scholarship pertinent to the field. Integrated approach includes English translations of literature originally in Arabic (50%+ of content), Hebrew, Spanish, French. Students with reading abilities in original languages encouraged to read original text.

WLIT 6803. Postcolonial Theory and Subaltern Studies. 3 Hours.
Seminar examining the geopolitical (imperial, colonial and national) implications of knowledge and culture. Selected readings of early postcolonial texts by Cesaire, Fanon, and Fernandez Retamar, as well as more recent texts by Said, Spivak, Bhabha, Mignolo, Beverly and Chakrabarty among others. May be repeated for up to 6 hours of degree credit.

WLIT 690V. Seminar. 1-6 Hour.
Seminar. May be repeated for up to 6 hours of degree credit.

WLIT 700V. Doctoral Dissertation. 1-18 Hour.
Doctoral Dissertation. May be repeated for degree credit.

Glossary

Academic Dismissal. An academic status (http://catalog.uark.edu/undergraduatetcatalog/academicregulations/academicprobationsuspensionanddismissal) resulting from unsatisfactory grades in which students are not permitted to enroll at the university until approved through an appeal process.

Academic Probation. An academic status (p. 71) resulting from unsatisfactory grades.

Academic Suspension. An academic status (p. 71) for unsatisfactory grades in which students are not permitted to register for courses for a specified time period.

Act 1052/467. Section 21 of Arkansas Act 467 of 1989 specifies that all first-time entering freshmen who are enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or developmental courses in English composition, reading, and mathematics on the basis of their scores on specified tests. Find out more in the Registration (p. 57) section of the catalog.

Activity Course. Course devoted to participation in, knowledge of, or performance of some form of physical activity.

Add. See Drop/Add below.

Additional Major. Students fulfilling all requirements for the B.S., B.S.W., B.F.A. and B.M. degrees, including all core requirements and at least one major in these degree programs, may also claim an additional major in a humanistic discipline, social science, or interdisciplinary program associated with a B.A. degree. Upon completion of all major requirements of the additional discipline, the additional major will be made part of the student’s transcript; however, a B.A. degree is not awarded. This is also an option in German for any non-arts and science student.

Advance Registration. A period of time scheduled during a regular (fall or spring) semester that allows currently enrolled students to register for the next regular semester. In addition, advance registration for the summer sessions is scheduled during the spring semester.

Applied Instruction. A course that integrates both the teaching and hands-on application of knowledge or information; attends to the practical and utilitarian function of the subject (distinguished from theoretical). Examples may include: livestock judging team, music and art courses, cooperative education, and experiential learning.

Apprenticeship/Externship. Experiential learning opportunity to give students practical exposure and training in a career field. This is generally off-campus, supervised, and designed to prepare students for the transition from school to career.

Area Studies. Interdisciplinary study of geographical or cultural areas. Topics include the history, geography, politics, culture, language, and literature of the area. Generally, an area study is offered as a minor or a second major.

Audit. To take a course without credit.

Adviser. A faculty or staff member assigned to a student to advise that student on academic matters that include degree requirements and selection of courses.

Certification Requirements. The set of course, hour, and other academic requirements that must be completed to receive certification.

Class Schedule. List of courses and sections for a specific semester, including names of instructors; day, hour, and place of class meetings; and detailed registration procedures. The class schedule is available online.

Clinical Rotation/Instruction. Course that takes place in a clinical setting, including practice labs, hospitals, and other agencies; students practical exposure and training in a career field. This is generally off-campus, supervised, and designed to prepare students for the transition from school to career.

College or School. One of ten major divisions within the university that offers specialized curricula.

Combined Major. A combination of subsets of two primary discipline specific requirements, each of which is typically 15 to 24 hours and less than the number required for a major, which together constitute the major in a program of study leading to one bachelor’s degree with a combined major in two disciplines.

Concentration. A subset of requirements within the discipline-specific requirements of a program of study (graduate field of study or undergraduate major) leading to a graduate or bachelor’s degree.

Consent. A prerequisite that requires the student to obtain approval from the instructor or the department before he or she will be allowed to register for the course.
Core. A core of required coursework may be specified for students at the university level, the college or school level, the department level, and the program or area level. A core is what is required for all students at that level or in that program. Core and major requirements are usually stated either in terms of specific required courses or of lists of courses from which any course chosen will meet the requirement. The "list" may actually be a defined set such as lower-level courses or upper-level courses; courses in the department, in the program, or in the college; or courses identified by one or more course, program, or department codes. Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements. See University Core below.

Corequisite. A course that must be taken at the same time as the course described.

Correspondence. See Self-Paced (Correspondence) below.

Course. A unit of academic instruction.

Course Deficiencies. Lacking required units of study in high school. Find out more in the Placement and Proficiency portion (p. 47) of the Enrollment Services section of the catalog.

Course Load. The number of semester credit hours a student may schedule in a given term.

Cumulative Grade-Point Average. An average computed by dividing the total number of grade points earned by the total number of credit hours attempted in all courses for which grades (rather than marks) are given.

Curriculum. A program of courses comprising the formal requirements for a degree in a particular field of study.

Degree Program. A program of study defined by sets of academic requirements that lead to a degree which the university is authorized to offer. Undergraduate degree requirements are typically stated in terms of numbers of credit hours and specific courses at the university, college or school, and discipline levels. Graduate degree requirements are typically stated in terms of number of credit hours and specific courses at the discipline level.

Department. Division of faculty or instruction within a college, such as Department of Accounting within the Sam M. Walton College of Business.

Dependent Major. See Second Major below.

Dissertation/Thesis Research. Research conducted and submitted in support of candidate for a degree or professional qualification; a formal treatise presenting the results of study submitted in partial fulfillment of the requirements of an advanced degree; process requires intensive interaction between student and professor.

Double Degree Program. A program of study that includes one set of university requirements and two sets of college or school and primary discipline-specific requirements and leads to two different bachelor's degrees with two different majors.

Double Major. The two complete sets of primary discipline-specific requirements, typically consisting of a minimum of 30 hours each, constituting the two majors within a program of study leading to one bachelor's degree with two complete majors.

Drill. Supplemental instruction or practice using repetition or discussion.

Drop/Add. Dropping or adding of select courses while still remaining enrolled in the university. This can only be done during specified times as published in the academic calendar (http://registrar.uark.edu/academic-dates/academic-semester-calendar). See also Withdrawal below.

Eight-Semester Degree Completion Program. Most majors offered by the University of Arkansas can be completed in eight semesters, and the university provides plans that show students which classes to take each semester in order to finish in eight semesters. A few undergraduate majors either require a summer internship or fieldwork or are five-year professional programs, and may therefore not qualify for the eight-semester degree completion program.

Elective. Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements.

Equivalent. A course allowed in place of a similar course in the same academic discipline. May require approval by an academic dean.

Externship. See Apprenticeship/Externship above.

Fees. Charges, additional to tuition, that cover specific university services, programs, facilities, activities and/or events. Find out more in the undergraduate Fee and Cost Estimates (p. 60) section or the graduate Fee and Cost Estimates (http://catalog.uark.edu/graduatecatalog/feeandgeneralinformation) section.

Field of Study. The primary discipline-specific (or multidisciplinary or interdisciplinary) set of requirements in a graduate program of study. The field of study typically consists of a minimum of 30 hours at the master's degree level, of 30 hours beyond the master's degree at the educational specialist level, and of 96 hours for the doctor of education degree. Field of study hour requirements vary more widely for the doctor of philosophy degree, but 60 hours is typical.

Field Studies. Hands-on study undertaken outside the laboratory or place of learning, usually in a natural environment or among the general public. Examples may include archeological and geological field studies.

Focused Studies. A set of courses that a student may elect to take as part of the major requirements and which provides focus in a particular area related to the major. Completing a focused study is not required for the major, but serves as a guide for students who want to further specialize their studies. Focused studies do not need Arkansas Department of Higher Education approval and do not appear on the transcript.

Grade Points. Points per semester hour assigned to a grade (not a mark), indicating numerical value of the grade. The grade-point average indicates overall performance and is computed by dividing the total number of grade points earned by the number of semester hours attempted.

Grade Sanction(s). A penalty for academic dishonesty. Grade sanctions may consist of either a grade of zero or a failing grade on part or all of a submitted assignment or examination or the lowering of a course grade, or a failing grade of XF to denote failure by academic dishonesty.
Hazing. Any activity that is required of an individual that may cause mental or physical stress and/or embarrassment when in the process of joining or belonging to any organization.

Independent Study. Project collaboratively designed by the instructor and student to pursue an area of study not covered by the established curriculum; typically completed without class attendance but through formal supervision by an instructor.

Internship. A formal program that provides practical experience in an occupation or profession; applied, monitored, and supervised, field-based learning experience for which the student may or may not be paid; may include field work/experience, supervised courses, student teaching, and cooperative education; provides opportunities for students to gain experience in a career field.

Intersession. A two-week mini-session that is held at the beginning of the regular fall, spring, and summer terms. Coursework during an intersession is very concentrated and intensive. Intersession classes are not available to new freshmen.

Laboratory. Course meeting in a defined physical setting for the hands-on application of methods and principles of a discipline; credit-bearing section which requires a registration separate from the lecture component of the course.

Lecture. A class session in which an instructor speaks on a specific topic.

Lecture/laboratory. Lecture course which integrates a lab component as part of the same course registration.

Major. The primary set of discipline-specific (or multidisciplinary or interdisciplinary) requirements in an undergraduate program of study. The major typically consists of a minimum of 30 hours and identifies by name a specific degree area.

Minor. The lesser set of discipline-specific (or multidisciplinary or interdisciplinary) requirements in an undergraduate program of study. The minor typically consists of a minimum of 15 hours or more in a designated discipline.

Noncredit Course. A course for which no credit is given. (Some credit courses will not count toward degrees.)

Overload. A course load of more semester hours than a student is normally permitted to schedule in a given period.

Practicum. Involves supervised activities emphasizing practical application of theory, especially one in which a student gains exposure to a field of study; generally required as part of the program curriculum.

Pre-Professional Requirements. The set of course, hour, and other academic requirements that must be completed before entry into a school, a program of study, or an advanced level of a program of study, either at the U of A or at another institution.

Prerequisite. A course or requirement that must be completed before the term when the described course is taken.

Private Study. Involves individual instruction with regular meetings; one-to-one demonstration, performance critique, music, fine arts or performing arts are examples.

Readings. A course where the instructor assigns readings and facilitates discussion at regular class meetings.

Registration. Enrollment at the beginning or prior to the beginning of a semester, including selection of classes and payment of fees and tuition.

Research. Research conducted that is independent of that done for a dissertation or thesis.

Sanction(s). The penalty for noncompliance to a policy. Usually a response that will redirect the individual or group’s inappropriate behavior, encourage responsible judgment and ethical reasoning, protect the community’s property and rights, and affirm the integrity of the institution’s conduct standards.

Section. A division of a course for instruction. A course may be taught in one or more sections or classes at different times, depending on enrollment in the course.

Second Major. (Also referred to as a Dependent Major.) A second complete set of primary discipline-specific requirements in a discipline in which only a second or dependent major may be earned. A second major must be earned in a degree program in which the first major is one authorized to be given independently. Typically a minimum of 30 hours is earned in each major area or discipline.

Self-Paced (Correspondence). Course in which instruction is web-based and students are physically separated from the instructor. Interaction between instructor and student is not regular or substantive, and is primarily initiated by the student. These courses are self-paced and are not distance education. Students are not required to be admitted to the University of Arkansas to take a self-paced course.

Semester Credit Hour. Unit of measure of college work. One semester credit hour is normally equivalent to one hour of class work or from two to six hours of laboratory work per week for a semester.

Seminar. Involves a small group of students engaged in advanced study and original research under a member of the faculty and meeting regularly to exchange information and hold discussions; highly focused and topical course; may include student presentations and discussions of reports based on literature, practices, problems, or research.

Special Problems. Individualized investigation of topics or case studies in a specific field under the supervision of an instructor for the purpose of enhancing or illuminating the regular curriculum.

Special Topics. An organized course devoted to a particular issue in a specific field; course content is not necessarily included in the regular curriculum for the major.

State Minimum Core. See University Core below.

Student Number. A number given to each student as a permanent identification number for use at the university.

Studio Course. Involves the application of design and theory in a defined physical setting; students explore and experiment under the guidance of an instructor.

Summer Sessions. Periods of time during the summer when course work is offered. (Go to the Academic Calendar (p. 9) for specific times and dates.)

Syllabus. An outline or summary of the main points of a course of study, lecture, or text.

Telecommunications. Course that utilizes technology in conveying teaching material. This only includes courses that use technology as...
the primary delivery method of course content, not courses that simply use technology to support another delivery method. These are distant education courses that generally:

Uses one or more of the following technologies to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor, synchronously or asynchronously. The technologies used may include:

- The Internet;
- One-way and two-way transmissions through open broadcast, closed circuit, cable, microwave, broadband lines, fiber optics, satellite, or wireless communications devices;
- Audio-conferencing, etc.; or
- Videocassettes, DVDs, and CD-Roms, if the videocassettes, DVDs, or CD-Roms are used in conjunction with any of the technologies listed in the first three options

**Thesis Research.** See *Dissertation/Thesis Research* above.

**Track.** A subdivision of a concentration or certificate, which a student must select and fulfill to complete the requirements of the concentration or certificate.

**Transcript.** A complete record of the student's enrollment and academic history at the University of Arkansas, including all undergraduate, graduate, and law courses.

**Tuition.** The charge for university enrollment and registration, calculated per credit hour each semester. Tuition rates may vary depending on a student's resident status, undergraduate or graduate standing, and college affiliation. Tuition does not include cost of room and board. Additional charges will apply depending on student status. See the entry for Fees above.

**UAConnect** (https://uaconnect.uark.edu). The online database that maintains student, faculty and staff records and class schedules.

**Undeclared Major.** Designation indicating students who have not selected a major.

**Undergraduate Study.** Work taken toward earning an associate or a baccalaureate degree.

**University Core.** The state of Arkansas specifies a number of core courses that students must successfully pass to obtain a degree. These are also sometimes referred to as the State Minimum Core. Find out more in the Requirements for Graduation (p. 78) and University Core (p. 84) portions of the Academic Regulations section.

**Withdrawal.** Official withdrawal (http://registrar.uark.edu/registration/withdrawal.php) from all courses during a semester at the university.
