Undergraduate Catalog of Studies, 2020-2021

University of Arkansas, Fayetteville
# Table of Contents

Catalog Home ................................. 10
General Information .......................... 11
Contact Information .......................... 12
Academic Calendar ........................... 14
Board of Trustees ............................ 16
Administrative Officers ....................... 17
University Profile ............................ 18
Academic Resources and Facilities ........ 19
  Center for Learning and Student Success .... 19
  Center for Multicultural and Diversity Education ... 19
Information Technology Services .......... 19
Reasonable Accommodations ............... 19
Student Support Services .................. 20
Talent Search Programs .................... 20
Testing Services ............................. 20
University Libraries ....................... 20
Upward Bound Programs ................... 21
Online Education ............................ 21
Student Affairs ............................. 21
Centers and Research Units .......... 28
  Arkansas Center for Space and Planetary Sciences ... 28
  Arkansas High Performance Computing Center ........ 29
  Arkansas Humanities Center ............. 29
  Arkansas Security Research and Education Institute .. 29
  Arkansas Water Resources Center .......... 29
  Bessie Boehm Moore Center for Economic Education ... 29
  Blockchain Center of Excellence ........ 30
  Center for Advanced Spatial Technologies .... 30
  Center for Advanced Surface Engineering .... 30
  Center for Business and Economic Research .... 30
  Center for Communication Research ....... 31
  Center for Children and Youth ........... 31
  Center for Ethics in Journalism .......... 31
  Center for Excellence in Logistics and Distribution ... 31
  Center for Executive Education ........... 32
  Center for Grid-Connected Advanced Power Electronic Systems ... 32
  Center for Information Security and Reliability .... 32
  Center for Interdisciplinary Study of Science and Arts ... 32
  Center for Mathematics and Science Education .... 32
Center for Power Optimization and Electro-Thermal Systems ................. 33
Center for Protein Structure and Function ........................................ 33
Center for Retailing Excellence .................................................. 33
Center for Social Research .................. 33
Center for Statistical Research and Consulting ........... 33
Center for the Utilization of Rehabilitation Resources for Education, Networking, Training and Services ................. 34
Center of Excellence for Poultry Science ...................................... 34
Chemical Hazards Research Center .................. 34
Community and Family Institute ............ 34
Community Design Center ................... 34
Cybersecurity Center on Secure, Evolvable Energy Delivery Systems .......... 35
David and Barbara Pryor Center for Arkansas Oral and Visual History .......... 35
Diane D. Blair Center of Southern Politics and Society ...................... 35
Exercise Science Research Center ............ 35
Garrison Financial Institute .................. 35
Garvan Woodland Gardens .................... 35
High Density Electronics Center .......... 36
IDEALS Institute .............................. 36
Information Technology Research Institute .......... 36
Institute for Advanced Data Analytics ....... 36
Institute for Nanoscience and Engineering ........ 37
Institute of Food Science and Engineering .... 37
International Center for the Study of Early Asian and Middle Eastern Musics ................. 37
King Fahd Center for Middle East Studies ............ 37
Mack-Blackwell Transportation Center .......... 38
Maritime Transportation Research and Education Centers .......... 38
Membrane Research Center .................. 38
National Agricultural Law Center ............. 38
National Center for Reliable Electric Power Transmission ................. 39
Office for Studies on Aging .................. 39
Office of Education Policy ................... 39
Resiliency Center ............................ 39
Small Business and Technology Development Center .................. 39
Supply Chain Management Research Center .......... 39
Terrorism Research Center ................... 40
Tesseract Center for Immersive Environments and Game Design .......... 40
Tyson Center for Faith and Spirituality in the Workplace ........ 40
Glossary ........................................................................ 40

Catalog Home

This catalog of studies is a comprehensive reference for your years of study – a list of degrees, degree programs and courses offered at the University of Arkansas. In addition, it gives you valuable information such as suggested and required degree plans and information about costs, scholarships and financial assistance, and campus resources. Read it with pleasure and with care.

Take every opportunity to consult your academic adviser to ensure that you are taking advantage of courses and university resources that will help you reach your educational and career goals and graduate on time. Remember, the University of Arkansas is committed to your success. The faculty and staff are here to support you as you work to achieve your goals. Ask for help and advice whenever you need it.

The University of Arkansas is committed to the policy of providing educational opportunities to all qualified students regardless of their economic or social status and will not discriminate on the basis of race, color, sex, creed, sexual orientation, disability, veteran’s status, age, marital or parental status, or national origin.

This is Volume 114; Publication Date: June 2020
Vision
The University of Arkansas represents the best of public higher education, advancing Arkansas while building a better world.

Mission
The University of Arkansas is determined to build a better world by providing transformational opportunities and skills, promoting an inclusive and diverse culture, nurturing creativity, and solving problems through research and discovery, all in service to Arkansans.

Since 1871, our fundamental purpose as a land-grant institution and state flagship remains unchanged — to serve the state of Arkansas as a partner, resource and catalyst by:

- Providing access to a comprehensive and internationally competitive public education, and fostering student success across a wide spectrum of disciplines.
- Utilizing research, discovery and creative activity to improve the quality of life, develop solutions to the challenges we face and drive the state’s economy.
- Contributing service and expertise through outreach, engagement and collaboration.

Quick Facts
- **Location:** Fayetteville, Arkansas
- **Founded:** 1871
- **Enrollment:** 27,778 (Fall 2018)
- **Average ACT:** 26
- **Average high school GPA:** 3.72

Got to the university’s Quick Facts page (https://www.uark.edu/about/quick-facts.php) for more information.

History
Founded in 1871 as a land-grant college and state university, the University of Arkansas established its campus on a hilltop overlooking the Ozark Mountains. There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for the first classes in January 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century.

More than 147 years later, the university’s enrollment has passed 27,000, and its students represent all 75 counties of Arkansas, all 50 states and 120 countries. The university is the state’s foremost partner and resource for education and economic development. It serves as the primary provider of graduate-level instruction in Arkansas. And its public service activities reach every county in Arkansas, throughout the nation, and around the world. Read a fuller history of the university (https://www.uark.edu/about/history.php).

The University of Arkansas has 10 colleges and schools offering more than 200 academic programs including bachelor’s degrees in 75 areas of study. The university maintains a low student-to-faculty ratio of 19:1 that promotes personal attention and mentoring opportunities. Individual classes may range from a large general-lecture class of more than 400 to a focused special-topics class of 4 or 5 students. U of A students are given the tools and encouragement needed to excel. Over the last 15 years, Arkansas students have become Rhodes, Gates Cambridge, Madison, Marshall, Goldwater, Fulbright, Boren, Gilman and Truman scholars. More than 120 students have received National Science Foundation Graduate Research Fellowships.

Students pursue a broad spectrum of academic programs leading to baccalaureate, master’s, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

Students may also pursue a wide range of graduate degrees, including the Master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy.

As you make your way around campus, you’re sure to notice something unique about many of the sidewalks. Historic Senior Walk showcases the names of more than 175,000 University of Arkansas graduates, grouped by year of graduation starting with the Class of 1876. A long tradition in both time and mileage, it’s concrete proof of the university’s commitment to students.

You won’t be able to discover everything the university has to offer in a day, but here are a few attractions that you don’t want to miss.

- **The Arkansas Union** — A primary gathering place for more than 40 years, the Arkansas Union serves as a place for students to attend educational and cultural events, access campus resources, eat, study and just meet friends between classes. The facility offers a food court, fitness center, technology center, bank, post office, Razorback shop, art gallery, theatre and much more.
- **Jim and Joyce Faulkner Performing Arts Center** — The university’s old Field House, in which such legendary performers as Chuck Berry, Louis Armstrong and Peter, Paul and Mary have performed, was renovated recently into a 600-seat acoustically tuned performance hall. More than 200 musical concerts, operas and theatrical performances occur in the course of each year.
- **Chi Omega Greek Theatre** — The Chi Omega Greek Theatre, based on the designs of ancient Greece, is a popular place for concerts, pep rallies or just catching some rays between classes. Chi Omega, founded at the U of A in 1895 and now the oldest women’s fraternity in the nation, donated the Greek Theatre in 1930.
- **Fulbright Peace Fountain and Statue** — These two impressive landmarks commemorate the legacy of the late U.S. Senator J. William Fulbright, a graduate and former president of the University of Arkansas. Fulbright famously helped create the Fulbright Scholarship Program, the largest international exchange program of its kind. Internationally renowned architect E. Fay Jones, a U of A graduate and former dean of the School of Architecture, designed the Peace Statue.
- **Old Main** — This architectural centerpiece of campus opened for classes in 1875, making it the oldest building at the University of Arkansas. Visit the restored classrooms, take a closer look at the inner workings of the tower clock on the fourth floor and enjoy the shade of the trees on the Old Main Lawn.
- **The Inn at Carnall Hall** — Built in 1905, the first women’s residence hall on campus is now a historic inn. The Inn at Carnall Hall is also home to the award-winning Ella’s Restaurant and Lambeth Lounge, the perfect spot for a little R&R on campus.
- **The Fine Arts Center** — Designed by renowned architect Edward Durell Stone, the Fine Arts Center at the University of Arkansas was
the first complex to integrate the fine arts — theatre, music and art — in one building with the intention that students from each discipline would be inspired by each other. The center houses the University of Arkansas Theatre, the Fine Arts Gallery and the Stella Boyle Smith Concert Hall.

• **Silas Hunt Memorial Sculpture** — Near Old Main, you'll find this tribute to the first black student to integrate a major Southern public university since Reconstruction. A veteran of World War II, Hunt was admitted without litigation into the University of Arkansas School of Law in 1948.

• **Pi Beta Phi Centennial Gate** — A new landmark, the gate serves as a formal entrance to the university’s historic core. The striking entranceway was a gift, commemorating the first 100 years of Pi Beta Phi on campus.

• **Il Porcellino** — This wild boar statue with fountain is a replica of the original Il Porcellino, in Florence, Italy. The Italian title of the statue means “piglet” and comes from the local Florentine nickname for the statue. One of many Razorback tributes on campus!

• **Razorback Stadium/Hall of Champions Museum** — Donald W. Reynolds Razorback Stadium is one of the finest collegiate football facilities in the nation and home to the Jerry Jones/Jim Lindsey Hall of Champions Museum, located in the Frank Broyles Athletic Center. Bud Walton Arena houses two more athletic museums.

• **Walmart On Campus** — The nation’s first Walmart on Campus is also the smallest Walmart in the country. It’s located in the Garland Center, which also includes the U of A Bookstore as well as boutiques, salons and dining options.

The campus features many other landmarks and noteworthy facilities including the Clinton House, the small brick home on campus in which future President Bill Clinton and future Secretary of State Hillary Rodham Clinton lived while both served on the U of A’s law school faculty.

Fayetteville is routinely considered among the country’s finest college towns, and the area is regularly ranked as one of the best places in the United States to live, raise a family, work, play and retire. A thriving city of 77,000, Fayetteville is located in the hilly northwest corner of the state and has been named one of the top 5 cities in America the last two years by *U.S. News & World Report*.

Quickly gaining recognition as a nationwide center for arts and culture, the region is home to Crystal Bridges Museum of American Art. This world-class museum features a permanent collection of art spanning five centuries, from the Colonial era to the current day. The collection includes several works considered masterpieces. Crystal Bridges also offers miles of wilderness trails and a unique dining experience. If that’s not enough, admission is free. Another major cultural amenity, the Walton Arts Center, is located just two blocks from campus, where Broadway touring shows appear regularly.

Dickson Street, one of the state’s most popular entertainment districts, is also just a short walk from campus. A part of Fayetteville’s downtown historic district, Dickson Street offers a variety of restaurants, boutiques, galleries, and clubs unique to the area. Fayetteville’s historic square, College Avenue and the area around the Northwest Arkansas Mall are also great places for shopping and dining. The Fayetteville Farmers’ Market, an area tradition since 1974, was recently named one of “America’s Favorite Farmers’ Markets.”

Nearby Rogers offers the region’s newest open-air shopping experience with many of the nation’s most popular shops and eateries. And Eureka Springs, a Victorian mountain village known as the “Little Switzerland of the Ozarks,” offers more than 100 specialty shops and 70 restaurants about 45 minutes from campus.

Arkansas is a natural wonder of forests, mountains and lakes framed by picturesque rivers and streams. Some of the nation’s best outdoor amenities and most spectacular hiking trails are within a short drive of campus. Devil’s Den State Park is a short distance south of Fayetteville. Beaver Lake is 30 minutes to the northeast. Hawksbill Crag and the Buffalo National River, America’s first National River and one of the few remaining undammed rivers in the lower 48 states, are an hour’s drive to the east. The Razorback Greenway, a 36-mile bicycle route, runs from campus north to Bella Vista. Even closer to campus, Fayetteville’s Botanical Garden of the Ozarks offers another outdoor option.

Northwest Arkansas is one of the most economically stable regions in the nation and serves as the base of operations for Walmart, Tyson Foods Inc. and J.B. Hunt Transport Services. Because of their presence, many other corporations have established primary or secondary headquarters in the region. Their close proximity to the U of A campus, along with their executives’ and employees’ active involvement in university life, offers students and faculty exceptional opportunities for research partnerships, internships, and post-graduation employment.

The Northwest Arkansas Regional Airport has direct flights to most major metropolitan areas, including Atlanta, Chicago, Cincinnati, Charlotte, Dallas, Denver, Houston, Los Angeles, Minneapolis, San Francisco, New York, Newark and Orlando; and, Fayetteville is within a day’s drive of several larger metropolitan areas, including Dallas, Kansas City, Little Rock, Memphis, St. Louis and Tulsa.

### Board of Trustees

The trustees of the University of Arkansas System are appointed by the governor of Arkansas to 10-year overlapping terms. The board sets policy for the University of Arkansas as well as other universities, colleges and institutes within the system.

#### John Goodson, chair

John Goodson of Texarkana is a law partner at Keil & Goodson, P.A. He earned his bachelor’s degree in 1987 and law degree in 1989 from the University of Arkansas. His term expires in 2021.
Stephen Broughton, vice chair
Dr. Stephen Broughton of Pine Bluff is a staff psychiatrist for the Southeast Arkansas Behavioral Health System. Broughton earned his bachelor’s degree from the University of Arkansas at Pine Bluff and completed his medical education at the University of Arkansas for Medical Sciences. His term expires in 2022.

Kelly Eichler, secretary
Kelly Eichler of Little Rock is the public policy director for Gov. Asa Hutchinson. She previously served as a deputy prosecutor for Pulaski County and on the Arkansas Board of Corrections. She earned a bachelor’s degree from the University of Arkansas and a law degree from the University of Arkansas at Little Rock Bowen School of Law. Her term expires in 2026.

Morris Harriman, assistant secretary
Morris Harriman of Little Rock has served as Governor Mike Beebe’s chief of staff since Beebe took office in 2007. Prior to that, Harriman served 16 years in the Arkansas Senate. He earned both his bachelor and law degrees from the University of Arkansas. His term expires in 2024.

C.C. ’Cliff’ Gibson III
C.C. ’Cliff’ Gibson III of Monticello is the founder of Gibson and Keith Law Firm and serves as county attorney for Drew County, Ark. The former president of the Monticello Economic Development Commission, Gibson attended the University of Arkansas at Monticello and earned his Juris Doctor at the UALR Bowen School of Law. His term expires in 2023.

Sheffield Nelson
Sheffield Nelson of Little Rock is a retired president and chief executive office of Arkla Gas. He has served on the board of the Arkansas Department of Higher Education and the Arkansas Game and Fish Commission. Nelson earned his undergraduate degree from Arkansas State Teachers College, now the University of Central Arkansas, and his law degree from the University of Arkansas. His term expires in 2025.

Tommy Boyer
Tommy Boyer, of Fayetteville, graduated from the University of Arkansas, Fayetteville in 1964, where he was also an All-American basketball player. He retired from the Eastman Kodak Company in 1989, and founded Micro Images in Amarillo, Texas. Within two years, Micro Images had become the largest Kodak document imaging systems broker and reseller in the United States. Boyer was inducted into the Arkansas Business Hall of Fame in 2013 and the Arkansas Sports Hall of Fame in 2000. His term expires in 2027.

Steve Cox
Steve Cox of Jonesboro graduated from the University of Arkansas in 1982 after having earned All Southwest Conference and All America honors during his football career as a punter and kicker, later playing in the NFL for the Cleveland Browns and Washington Redskins. He rose through the ranks of banking before becoming a managing partner at Rainwater and Cox LLC, which oversees ownership and management of an array of commercial, hotel and agricultural properties. His term expires in 2028.

Ed Fryar
Edward Fryar Jr. of Rogers is a graduate and former professor of the University of Arkansas. He earned degrees in economics and agricultural economics and was a professor of agricultural economics for more than 13 years. He co-founded Ozark Mountain Poultry in Rogers in 2000, which grew from 15 employees to more than 1,800 before selling it in 2018. He was inducted into the Arkansas Agriculture Hall of Fame in 2019. His term expires in 2029.

Ted Dickey
Ted Dickey is a general partner at CapRocq Core real estate fund and an adviser to Innovate Arkansas, a technology entrepreneurship initiative. Dickey previously spent six years in corporate finance at Stephens Inc. He earned his bachelor’s degree and was elected Phi Beta Kappa the University of Arkansas before earning his Juris Doctor at the U of A School of Law. He served on the U of A Technology Park Board and was appointed to the Arkansas Ethics Commission. His term expires in 2030.

Administrative Officers

System Administration
President, University of Arkansas System — Donald Bobbitt, B.S., Ph.D.

Chancellor and Vice Chancellors
Chancellor, University of Arkansas — Joseph E. Steinmetz, B.S., M.A., Ph.D.
Provost and Vice Chancellor for Academic Affairs, interim — Charles F. Robinson II, B.A., M.A., Ph.D.
Vice Chancellor for Diversity and Inclusion — Yvette Murphy-Erby, B.A., M.S.W., Ph.D.
Vice Chancellor for Economic Development — Stacy L. Leeds, B.A., M.B.A., LL.M., J.D.
Vice Chancellor for Finance and Administration, interim — Ann Bordelon, B.S.B.A.
Vice Chancellor for Government and Community Relations — Randy Massanelli, B.S.B.A.
Vice Chancellor for Intercollegiate Athletics — Hunter R. Yurachek, B.S., M.A.
Vice Chancellor for Research and Innovation — Dan Sui, B.S., M.S., Ph.D.
Vice Chancellor for Student Affairs — Charles F. Robinson II, B.A., M.A., Ph.D.
Vice Chancellor for University Advancement — Mark Power, B.A.

Deans and Vice Provosts
Dean of Honors College — Lynda Coon, B.A., M.A., Ph.D.
Dean of Dale Bumpers College of Agricultural, Food and Life Sciences — Deacue Fields III, B.S., M.S., Ph.D.
The University of Arkansas was founded in 1871 and will celebrate its 150th anniversary during the calendar year of 2021. The university opened its doors to students on January 22, 1872. Under the Morrill Land-Grant College Act of 1862, federal land sales provided funds for the new university, which was charged with teaching “agricultural and the mechanic arts,” “scientific and classical studies,” and “military tactics” to Arkansas scholars.

Statewide elections, held to establish bonds to help finance the university, eventually determined the school’s location. Washington County and the city of Fayetteville submitted the highest bid, a total of $130,000, to which was added a $50,000 state appropriation for the benefit of the institution and $135,000 from the sale of federal lands. With $12,000 of this money, the university purchased a 160-acre farm, the homestead of William and Martha McIlroy, and established its campus on a hilltop overlooking the Ozark Mountains.

There were few facilities and little money that first academic year, but the eight students and three faculty members who gathered for classes in 1872 showed the same dedication to learning and commitment to excellence that has carried the University of Arkansas into the 21st century. Over the past 150 years, the university has developed into a mature institution with 10 schools and colleges, more than 1,100 full-time faculty members, and more than 26,000 students. Its graduates number more than 200,000 and their names are engraved in the sidewalks of campus, a lasting tribute unique in America.

The University of Arkansas serves as the major provider of graduate-level instruction in Arkansas. The research and scholarly endeavors of its faculty make it an economic and cultural engine for the state. And its public service activities reach every county in Arkansas, throughout the nation, and around the world. Find out more about the university’s history (http://www.uark.edu/about/history.php) or browse our timeline (http://uark.edu/about/time-line.php).

Today at the University of Arkansas Campus

Students pursue a broad spectrum of academic programs leading to baccalaureate, master’s, doctoral, and professional degrees, not only in traditional disciplines within arts, humanities, social sciences, and natural sciences, but also in the core professional areas of agricultural, food and life sciences; architecture; business; education; engineering; nursing; human environmental sciences; and law.

The University of Arkansas houses more than 200 academic programs and offers bachelor’s degrees in more than 75 areas of study. Students may also pursue a wide range of graduate degrees, including the Master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy.

The Carnegie Foundation categorizes the University of Arkansas as a research institution with “highest research activity,” placing the university among only 3 percent of colleges and universities nationwide and in a class by itself within the state of Arkansas. U.S. News and World Report consistently ranks the university among the top tier of institutions of higher education. Faculty members perform cutting-edge research for which they annually win prestigious grants and awards, and the university encourages undergraduates to participate in the research process. Such opportunities enhance the learning process by providing hands-on experience in lab and research techniques, by developing students’ abilities to implement, experiment, discover and teach, and by fostering a mentoring relationship early in students’ academic careers.

Research programs involving both faculty and students serve as vital sources of information on the economic and social needs of Arkansas. In
many fields, research performed at the University of Arkansas reaches beyond the state to provide insight and guidance on issues of national and international concern. The university provides extensive technical and professional services to varied groups and individuals throughout the state, helping to further Arkansas’ economic growth. The university operates nationally respected self-paced (correspondence) courses; it assists other institutions in developing educational programs; it offers graduate programs, both cooperatively and singly, throughout the state; and it makes specialized campus resources such as computing services and library holdings available to other institutions in the state.

Classes at the university maintain a low average ratio of students to instructor, although individual classes may range from a large general-lecture class of 200 to a focused special-topics class of 4 or 5 students. University of Arkansas students are given the tools and encouragement needed to excel. Over the last 15 years, more than 200 undergraduate Arkansas students have become Rhodes, Gates Millennium, Madison, Marshall, Goldwater, Fulbright, Boren, Gilman and Truman scholars. More than 100 graduate students have received National Science Foundation Graduate Research Fellowships. Find out more about the university’s numbers (http://www.uark.edu/about/by-the-numbers.php).

Academic Resources and Facilities

The University of Arkansas provides a variety of resources for students to enhance their ability to attend college, improve their studies in class, and aid their academic research as they advance through their curricula.

The programs and services listed at left provide advice, tools and inspiration for high school students; individual tutoring for students on campus and infrastructure such as libraries and technology support that offer University of Arkansas students ongoing support throughout their college careers.

Center for Learning and Student Success

The Center for Learning and Student Success is designed to provide assistance to all University of Arkansas students in meeting their academic goals. The center’s goal is for every University of Arkansas student who needs or wants academic assistance to participate in the programs and services of the center without hesitation or barrier.

Over 10,000 students took advantage of the center’s programs last year including:

- Tutoring in a variety of subjects (math, the sciences, world languages, business, economics, and other courses taught throughout the university);
- Writing Support;
- Supplemental Instruction in the sciences, economics, accounting, and data analysis;
- Academic Coaching;
- Self-help resources dealing with study skills, time management, test taking, anxiety reduction, and effective learning strategies;
- Study areas and access to state-of-the-art computers.

The center partners with University Housing, Mullins Library, Mechanical Engineering, Sam M. Walton College of Business and the Multicultural Center to provide unique tutoring and other assistance to students in a variety of locations and formats. For all services or to make an appointment for tutoring, see class.uark.edu (http://class.uark.edu/).

The center’s primary location is in Gregson Hall. The majority of CLASS-Plus SI, tutoring and writing support is available from 9 a.m. to 9 p.m. Mondays through Thursdays, and from 9 a.m. to 3 p.m. Fridays. Tutoring is also available on Sunday afternoons in the Multicultural Center (Arkansas Union) and Mullins Library.

Contact CLASS-Plus by phone at 479-575-2885 or visit class.uark.edu (http://class.uark.edu).

Center for Multicultural and Diversity Education

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

Information Technology Services

Information Technology Services, or IT Services as most people refer to it, provides technology solutions that support and enable teaching, learning, research and discovery for students, faculty and staff at the University of Arkansas.

Supported services include student information systems, learning management systems, cloud storage, email and collaboration tools, research computing resources, software, internet access and the campus network. Learn more about everything IT Services provides at its.uark.edu (https://its.uark.edu/).

New members of the university community can get started with technology using the Get Started with Tech guide (https://its.uark.edu/get-started/).

Tech support is available 7 days a week at the IT Help Desk in the Arkansas Union, by phone at 479-575-2905 or online at help.uark.edu (https://help.uark.edu/).

Reasonable Accommodation for Students with Disabilities

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center’s staff work in partnership with the individual student to communicate and facilitate any accommodation needs to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center’s staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104; e-mail: ada@uark.edu; Web: Center for
Educational Access (http://cea.uark.edu/) (online request for services available).

Student Support Services

The department of Student Support Services is designed to provide a powerful combination of programs and services to students who are first-generation, and/or modest-income, and/or individuals with disabilities. The services provided by Student Support Services place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (http://sss.uark.edu/).

Talent Search Programs

College Project Talent Search, Educational Talent Search, and University Access Talent Search

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education. Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campus-based events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County, Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college. They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university’s Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas. Call 479-575-3553 for more information.

Testing Services

Testing Services is charged with the responsibility of administering standardized academic tests at the University of Arkansas. The office administers such national tests as:

- the ACT Assessment
- the Law School Admission Test (LSAT)
- the Graduate Management Admission Test (GMAT)
- the Graduate Record Examination (GRE)
- the CLEP exams in addition to others throughout the year.

National testing companies determine testing dates and deadlines. Testing Services also offers a number of institutional tests such as the Test of English as a Foreign Language (TOEFL) and the Spoken Language Proficiency Test (SLPT). These tests are scheduled at various times as demand dictates. Test fees vary depending on the test.

To obtain a registration bulletin or information about exam dates and deadlines, please stop by the Testing Center at 97 N. Razorback Road (https://campusmap.uark.edu/?pnl_disp=Y&bldg_code=TEST&parklot=Y-Student-Faculty%2FStaff-Parking_Meters-ADA_Parking-Remote), Fayetteville, or call 479-575-3948.

Find out more at the Testing Services website (http://test.uark.edu/).

University Libraries

The library system of the University of Arkansas, Fayetteville, includes the David W. Mullins Library, the main research facility on campus, and four branch libraries:

- The Robert A. and Vivian Young Law Library (http://law.uark.edu/library/)
- The Fine Arts Library (http://libinfo.uark.edu/FAL/)
- The Chemistry and Biochemistry Library (http://libinfo.uark.edu/chemistry/)
- The Physics Library (http://libinfo.uark.edu/physics/)

The spacious Helen Robson Walton Reading Room is Mullins Library’s most popular quiet study area, but group study space and graduate student study space is also available. More than 200 databases and thousands of electronic journals are accessible from anywhere with a University ID. Librarians onsite assist in locating and using library resources, or students may send questions by email, phone, or 24/7 chat.

Subject librarians (http://libinfo.uark.edu/info/specialists.asp) are also available for one-on-one research consultations tailored to individual research questions, whether onsite, over the phone, or even remotely by video software. Librarians conduct orientation sessions on research methods and software throughout the semester and the Quality Writing Center (http://qwc.uark.edu/) has a satellite location inside Mullins Library.

With 2.1 million volumes and more than 56,000 journal titles, students will find research material for every subject. Other resources in the collections include several thousand maps, manuscripts, and more than 33,000 audio and visual materials, including music scores, recordings, and movies, available through the Performing Arts and Media (http://libraries.uark.edu/AV/default.asp) Department on the lower-level of Mullins Library.

A full-service computer commons (GACL) is located on the lobby level of Mullins, complete with printing stations and state-of-the-art scanners. Laptops and iPads are available to check-out to take advantage of wireless access anywhere in the library. Visit the University Libraries website (http://libinfo.uark.edu/) to learn more about services and collections, or access My Library (https://library.uark.edu/patroninfo~S1/) to check accounts, renew books, request holds, or save catalog searches.

Items not owned by the University Libraries may be obtained through Interlibrary Loan (http://libinfo.uark.edu/ill/default.asp). Requested items in electronic format will be sent directly to desktops, usually within 24 hours; physical items are held for pickup at the main service desk on the Lobby Level. The University Libraries have had official status as a
Online Education

Donald P. Judges
Vice Provost for Distance Education
Global Campus
800-952-1165
globalcampus@uark.edu

U of A ONLINE (https://online.uark.edu/)

Academic colleges and schools at the University of Arkansas provide flexible learning options through distance education and online learning options for undergraduate and graduate students. Traditional online courses, self-paced online (correspondence) courses, and online degree programs remove the barriers of time and distance. Support units provide the web-based resources and services necessary for distance and online students to reach their educational and professional goals.

Global Campus

The Global Campus (http://globalcampus.uark.edu/) serves as a portal for online, distance and professional education programs and courses provided by the University of Arkansas. Experienced staff members collaborate with the university’s academic colleges and other academic units to develop and facilitate quality courses and programs that help students reach educational and professional goals.

State Authorization and Distance Education Beyond Arkansas

The University of Arkansas, Fayetteville delivers online education programs and courses throughout the United States and internationally. All programs have been approved by the Arkansas Department of Higher Education. Many states have prescribed an “authorization” process for out-of-state institutions delivering online programs to its state residents to ensure quality post-secondary education, to preserve the integrity of an academic degree and to instill greater consumer protection for its student citizens.

Authorization (sometimes referred to as “registration,” “licensure,” “approval,” etc.) indicates that certain minimum standards have been met by the institution under the laws and regulations of that state. Authorization does not constitute an endorsement of any institution, course or degree program. Credits earned at an institution may not transfer to all other institutions.

The University of Arkansas, Fayetteville, through the Global Campus, has taken steps to protect its students and operations through nationwide compliance and has been granted authorizations, exemptions and waivers from many states. In other states, the University of Arkansas, Fayetteville can operate without such authorization because the state’s laws do not pertain to a public institution, to an accredited institution or to the University of Arkansas activities in that state. More specific information about state authorization can be found at the University of Arkansas Online Web page (http://online.uark.edu/about/state-authorization.html). The Global Campus supports the university’s development and delivery of online and distance education.

Student Affairs

The Division of Student Affairs supports students in pursuing knowledge, earning a degree, finding meaningful careers, exploring diversity, and connecting with the global community. We provide students housing, dining, health care resources, and create innovative programs that

United States government depository since 1907, and the Government Documents Department has been a depository for Arkansas state publications since 1993. The University Libraries’ map collection and GIS (http://libinfo.uark.edu/GIS/default.asp) (geographic information systems) program, including a public GISe workstation equipped with ArcGIS Desktop Suite, are also available.

In Special Collections, students can read rare books from around the world; consult the largest book collection related to Arkansas; handle historic letters, diaries, magazines, and old photographs in the archives; and watch old black and white films made in or about the state. A number of digital collections and exhibits (http://libinfo.uark.edu/eresources/digitalcollections.asp) are available through the Special Collections website (http://libinfo.uark.edu/SpecialCollections/). Special Collections also holds the University Archives, the Arkansas Collection, and the Arkansas Architectural Archives.

To stay up-to-date on the Libraries’ programs, resources, and events, follow @UARKLibraries on Facebook, Twitter, Instagram, and Pinterest. For information concerning collections and services, please inquire at 479-575-4104 or refer@uark.edu. For any other questions, please contact the Dean’s Office at 479-575-6702.

Upward Bound Programs

Upward Bound and Upward Bound Math and Science

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential first-generation college students prepare for higher education. These programs bring high school students in grades 9 – 12 to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

Veterans Upward Bound

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable, or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces called to active duty for a period of more than 30 days, or a member of a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university’s Uptown Campus West, 1001 E. Sain St., Fayetteville.
educate and inspire. We enhance the University of Arkansas experience and help students succeed, one student at a time.

The Office of the Vice Chancellor for Student Affairs provides leadership for the division and serves as a liaison to other administrative offices, faculty, and student governing groups. The office is a central source of information concerning university policies and procedures affecting student life and co-curricular programs and services.

The Office of the Dean of Students under the Vice Chancellor for Student Affairs emphasizes student advocacy while broadening the development of services and programs that address a range of student and campus needs. Departments in the Division of Student Affairs are dedicated to developing exceptional programs and services that enhance the University of Arkansas experience and enrich the quality of student life on campus. Staff members are available and willing to assist with any issue or question that a student, staff, or faculty member may have regarding student and campus life at the University of Arkansas. The office is available for the clarification of university policies and procedures, confidential consultation, personal and family crisis assistance for students, and referral to all campus and community services. The office also seeks to assist students and faculty members in cases of emergency or extenuating circumstances. Student Affairs staff members are firmly committed to addressing the challenges and individual needs of the University of Arkansas family.

Arkansas Union

The Arkansas Union is the community center of campus; serving students, faculty, staff, alumni, and guests. Through its facilities, programs, and services, the Arkansas Union is the place to build relationships, enrich academics, and experience campus life to the fullest. But more importantly, the Arkansas Union plays a pivotal role in putting University of Arkansas students first. It is home to essential student needs, such as food service, computer technology, student accounts, banking, and the Campus Card Office. The Arkansas Union provides social and educational programming space, as well as lounge and study areas. Additionally, recreational opportunities are available in the Arkansas Union, through the satellite fitness center, cinema, and Student Technology Center. Located inside the Arkansas Union are:

Retail Outlets

- ATMs (various banks)
- Hill Coffee Company
- Ozark Catering Company
- Club Red Convenience Store
- Where the Wild Greens AR
- Passport Office
- PMC – Drop-Off Copy Center
- Razorback Shop
- U.S. Post Office
- Union Hair Care

Union Food Court

- Chick-fil-A
- Rustic Italian
- True Burger
- Paper Lantrn
- Flying Burrito Co.

Facilities

- Anne Kittrell Art Gallery
- Computer Lab and Help Desk
- Verizon Ballroom
- International Connections Lounge
- Student Technology Center
- Meeting rooms
- Conference rooms
- Union Living Room
- Union Information Center

- Campus Card Office
- Career Development Center
- Center for Community Engagement
- Center for Educational Access
- Multicultural Center
- New Student and Family Programs
- Student Activities
- Treasurer’s Office and Student Accounts
- University Productions

Campus Life

Center for Community Engagement

The purpose of the Center for Community Engagement is to promote civic engagement and leadership by connecting University of Arkansas students, faculty, and staff with nonprofit organizations in the Northwest Arkansas area and beyond.

In order to serve this purpose, the center maintains uark.givepulse.com (http://volunteer.uark.edu/), which enables the University of Arkansas community to search for agencies and volunteer opportunities. It allows users to log volunteer hours, or “impacts,” and earn opportunities for community recognition, such as the Presidential Volunteer Service Award and Chancellor’s Community Service Award. Northwest Arkansas agencies and University of Arkansas registered student organizations also utilize the site to post service opportunities and recruit volunteers. Over 350 organizations and subgroups are registered on the site, such as Habitat for Humanity, Uark Cardinal Nights, and Potter’s House Thrift.

Volunteer Action Center

The Center for Community Engagement also houses the Volunteer Action Center, a student-led volunteer coordination board with 45 members who are dedicated to active service in the community. Each year the Volunteer Action Center provides meaningful service opportunities through events and ongoing projects that engage the university and Northwest Arkansas communities. The Volunteer Action Center sponsors programs and events including the Jane B. Gearhart Full Circle Food Pantry, Make a Difference Day, Dream B.I.G. (Believing in Girls) Mentoring Program, VAC Literacy Program, and Razorback Food Recovery. The Jane B. Gearhart Full
Circle Campus Food Pantry is a nationally recognized program; the pantry serves students, staff and their families. Requests and more information can be found at fullcircle.uark.edu (http://service.uark.edu/foodprograms/jane-b-gearhart-full-circle-food-pantry/).

Get involved in the following ways:

- Drop by the Center for Community Engagement, Arkansas Union, Room A643, and chat with the office’s great staff and students.
- Look for service opportunities on uark.givepulse.com (http://volunteer.uark.edu/) and log your hours. Just ten hours makes you a VAC member.
- Participate in events hosted by Volunteer Action Center and the Center for Community Engagement throughout the year.
- Become a Volunteer Action Center board member or weekly program volunteer. Applications are accepted each semester.

Greek Life

The Charles and Cappy Whiteside Greek Life Leadership Center facilitates the educational process and provides resources related to programs that strengthen the growth and development of students affiliated with fraternities and sororities on campus. The overall mission is to strengthen the academic, cultural, moral, and social development of students in Greek organizations; provide training in strengths-based leadership and other personal and social skills; promote involvement in extracurricular activities and community service projects; and promote Greek Life as a productive and viable lifestyle on campus. The Greek Life Leadership Center coordinates programs such as Recruitment, Greek Getaway, Greek Life Facilitators, and Greek Summit in collaboration with the Interfraternity Council, the National Pan-Hellenic Council, the Panhellenic Council, and the United Greek Council.

The Interfraternity Council (IFC), National Pan-Hellenic Council (NPHC), Panhellenic Council (PC) and United Greek Council (UGC) govern 16 national sororities and 19 fraternities. The officers and representatives of each council work with the staff of the Greek Life Leadership Center to provide positive programs and strengths-based leadership opportunities to the members of the Greek organizations. The Charles and Cappy Whiteside Greek Life Leadership Center is in Walton Hall 101; phone 479-575-5001 or fax 479-575-3531; Web: uagreeks.uark.edu.

New Student & Family Programs

The Office of New Student & Family Programs connects students and their families to the University of Arkansas campus and community by providing diverse, innovative programs and resources that support a successful collegiate experience. The department supports and collaborates on the following major initiatives:

- Parent & Family Programs: Family Weekend, Spring Family Reunion, Regional Razorback Family Networks, and the Parent & Family Association
- Leadership & Late Night Programs: UARK Cardinal Nights, Emerging Leaders, Student Leader of the Month, and Diversity Leadership Institute
- Transition Initiatives: New Student Welcome, Alpha Lambda Delta First Year Honor Society, A-Week, and First-Yer Leadership Summit

By providing transitional support for incoming students, their parents, and family members, our programs effectively promote the students’ academic growth and support the mission of the university.

New Student & Family Programs is located in the Arkansas Union, Room A688; phone 479-575-5002; Web: nsfp.uark.edu (http://nsfp.uark.edu/).

Office of Student Activities

With a students-first philosophy, the Office of Student Activities provides an environment for involvement, empowerment, and collaboration through student organizations, programmatic experiences, and shared governance. The office maximizes the UA experience by advocating for all students, promoting intercultural understanding, and developing citizens who are prepared to positively impact their communities.

The Office of Student Activities, located in the Arkansas Union A665, is the central location for student organizations and activities for the university. The office can be reached at 479-575-5255 or visit the office’s website at osa.uark.edu (http://osa.uark.edu/). The Office of Student Activities is responsible for the oversight and administration of the following areas:

Student Organizations

All student organizations must register annually with the Office of Student Activities. The Office of Student Activities provides student organizations with assistance and services to help them succeed. The office also assists student organizations in event planning, provides information on facility reservations and fundraising, trademark forms, mailboxes, and locker space, and offers educational workshops for students and advisers. A limited number of offices are also awarded annually in the Arkansas Union to organizations. In partnership with SOOIE, the Student Organization Outreach and Involvement Experience, fall and spring involvement fairs are offered to help registered student organizations connect with interested students.

Types of registered student organizations (RSOs):

- **Governing** – An organization whose primary purpose is to serve as a governing body for a large or specific constituency of students.
- **Honorary/Service** – An organization that requires a minimum grade point average as a prerequisite to membership and/or is affiliated with a national service or honorary organization.
- **International/Cultural** – An organization whose primary purpose is to provide a forum in which participants create awareness for a specific culture through educational, social, and recreational activities.
- **Professional** – An organization whose primary purpose is to provide a forum for participants to discuss and develop professional careers and/or is affiliated with a national or regional association.
- **Religious** – An organization whose primary purpose is to provide information and activities associated with one or more religions.
- **Special Interest** – An organization whose primary purpose is to provide an organized format for the practice and/or pursuit of a special or common interest.
- **Greek organizations** are also RSOs, but register through the Greek Life Office. These are organizations with Greek letters that are members of the National Interfraternity Council, the Panhellenic Council, National Pan-Hellenic Council, or the United Greek Council.

Student Government
As a result of a student-led process that saw the passage of both legislation and a student referendum, student governance at the University of Arkansas is now organized under the Associated Students Supreme Constitution into two, co-equal governing bodies: the Associated Student Government and the Graduate and Professional Student Congress. Both bodies are a part of the practice of shared governance at the university.

The Associated Student Government and is an undergraduate student-led organization that enables its members to have an active voice in the decisions and policy that directly affect undergraduate students at the university. Students involved in Associated Student Government have the opportunity to positively impact the quality of student life, work with and allocate student fees, provide a voice for student concerns as well as oversee programs and policies for undergraduate students. Through the executive, legislative, and judicial branches of student government students have the opportunity to work for and among their peers to make a difference on all levels of the university. Involvement levels and time commitments vary upon duties. Visit the ASG website at asg.uark.edu (http://asg.uark.edu/) or the ASG office (Arkansas Union A669) to find out more.

As its name indicates, the Graduate and Professional Student Congress serves students who have earned a baccalaureate degree and are completing coursework for graduate certificates or degrees as well as professional practice doctoral programs. The congress works to advocate for the collective welfare of its constituents, manage and distribute student fee monies, represent the common interests of its constituents, and to speak with one voice the opinions of its members. Through its executive and legislative branches, the congress seeks to improve the lives, careers, and research of all graduate-professional students at the university. Involvement levels and time commitments vary upon duties. Visit the Graduate and Professional Student Congress website at gpsc.uark.edu (https://gpsc.uark.edu/) or the its office (Arkansas Union A647) to find out more.

University Programs

University Programs is a volunteer student organization responsible for planning and coordinating more than 100 events annually for the campus community. University Programs provides students with cultural and educational experiences, entertainment, and fun. Eight committees, all made up of students, select, schedule and produce events such as concerts, movies, lectures, fine arts performances, gallery exhibitions, and day/night programs. Being a part of University Programs gives the student committee members leadership training and real opportunities to gain practical planning experience. Supported by a student activity fee, University Programs events are free to students.

For further information, visit the University Programs website at up.uark.edu (http://up.uark.edu/).

University Career Development Center

The University Career Development Center (CDC) educates and empowers students to fulfill their career goals. All U of A students are welcome to take advantage of the center’s valuable resources:

Career Advising: Career Counselors in the CDC are available to assist students who may need help selecting a college major, seeking career information, researching or exploring careers, preparing for their job search, or considering graduate school.

Career and Strength-Awareness Assessments: The STRONG Interest Assessment, FOCUS 2 and TypeFocus are career assessments that can help students make career decisions based on their interests and values. StrengthsQuest is an assessment which helps individuals discover their talents and strengths. After discovering their talents, the Career Center assists students in learning how to use their talents to achieve academic, career, and personal success.

Career Fairs: In partnership with academic areas on campus, the CDC hosts a number of career fairs each year to provide opportunities for students to connect with employers and to learn more about companies and organizations. These connections could lead to valuable internships or full-time employment.

Job Search Preparation: The CDC offers resume critiques, interview skills training, mock interviews, networking opportunities, career presentations and several professional development events throughout the academic year to prepare students for internships, co-ops or full-time jobs.

Cooperative Education Opportunities: Cooperative Education is a program that enables students to gain professional work experience in paid, degree-related positions. Co-op students earn credit, a competitive wage and valuable “real world” work experience.

Handshake: Handshake is the ultimate job and internship search tool for current UA students and recent graduates. Apply for 4000+ jobs or internships, view career fairs and events, schedule career advising appointments, and research companies all through Handshake.

Online Resources: Through the CDC’s website, students have access to a multitude of resources including Optimal Resume which contains hundreds of resume templates, cover letter examples, and interview questions for students to practice and enhance their interviewing skills. Students can also view 1000+ CandidCareer short videos featuring various careers and advice from professionals in the field or view our “What Can I Do With This Major?” pages featuring common careers and helpful job search sites for each UA major. These are just a few of the many resources which can be found at career.uark.edu.

Career Track Razorbacks (formerly Professional Development Institute): This nationally recognized program creates opportunities for UA students to develop professional career-building skills. Participation in this program can help students gain the valuable skills which give them the competitive advantage in their job or graduate school search.

For more information, check out career.uark.edu (http://career.uark.edu/).

The University Career Development Center is conveniently located in Arkansas Union Room 607. or call 479-575-2805.

Student Health and Wellness Center

Pat Walker Health Center supports students along their academic journey by providing access to professional and quality medical care, mental health care, wellness, health promotion and education.

As a department of the Division of Student Affairs, the health center strives to enrich academic and personal development by creating an inclusive environment that promotes positive behavior and healthy lifestyle changes.

Students are strongly encouraged to maintain health insurance coverage. A university-sponsored student health insurance policy is available to all students, student spouses and dependent children. Enrollment and
cost information can be found at health.uark.edu (https://health.uark.edu/billing-insurance/insurance.php).

While the health center offers a variety of free programs and services, there are some charges associated for medical office visits and procedures, as well as individual counseling/psychiatry sessions. Medical services can be billed to insurance. For more information about health center billing and charges, go to the Insurance Billing page (http://health.uark.edu/billing-insurance/).

Medical Care
Pat Walker Health Center offers high-quality and affordable medical care through its signature clinics and programs. All medical services are performed by board-certified physicians and advanced practice registered nurses. Appointments can be scheduled online via the Patient Portal at myhealth.uark.edu, or by calling 479-575-4451.

- **Primary Care Clinic** offers illness and injury diagnosis and treatment, laboratory services, minor surgery, nurse triage, nutrition consultations, orthopedic consultations and X-ray.

- **Allergy, Immunization and Travel Clinic** offers allergy desensitization, immunizations, international travel consultations and tuberculosis screenings.

- **Women’s Clinic** provides comprehensive gynecological services with sensitivity to the unique needs of female clients.

Mental Health
Counseling and Psychological Services (CAPS) helps students navigate the pressures of college life and beyond with various evidence-based mental health services and programs. CAPS is staffed with licensed psychologists, counselors and social workers who work to help address common mental health issues and concerns that impact student success, such as anxiety, depression and stress.

CAPS offers services such as individual counseling, group counseling, psychiatry, emergency services, and case management. Although some services, such as ongoing individual counseling and psychiatry have minimal charges, most CAPS services and resources are offered at no charge beyond the student health fee. To learn more about CAPS services and programs, go to http://health.uark.edu/mental-health/.

24-hour emergency mental health services are available for all students.

To access CAPS services or 24-hour emergency services, call 479-575-5276.

Wellness and Health Promotion
Pat Walker Health Center’s Department of Wellness and Health Promotion inspires, motivates and supports student wellness and holistic health through a variety of academic courses, outreach presentations and events, peer education, training and wellness coaching.

The health center cultivates a campus culture of wellness through programming and services related to positive psychology and resilience, substance abuse prevention, sexual assault risk reduction, personal empowerment and lifestyle behavior change.

Employing a comprehensive holistic approach, Wellness and Health Promotion helps students maximize their personal and academic potential across eight essential dimensions of health and well-being – physical, intellectual, emotional, social, spiritual, occupational, environmental and financial.

Learn more about free Wellness services at health.uark.edu/wellness-health (http://health.uark.edu/wellness-health/).

Accreditation
Pat Walker Health Center is accredited by Accreditation Association for Ambulatory Health Care.

CAPS is accredited by the International Association of Counseling Services.

The health center is located at 525 N. Garland Ave. If you have questions about specific services, call 479-575-4451; TTY 479-575-4124. Visit us online at health.uark.edu (http://health.uark.edu/).

**Housing and Dining**

**University Housing**
University Housing is committed to providing a safe, comfortable, convenient and reasonably priced living and learning environment that promotes student success.

**Success on Campus**
National research shows that academic success in the first year and beyond is directly linked to residing in an on-campus residence environment. The University of Arkansas recognizes the benefits that students receive from living on campus their first year.

**Freshman Residency Requirement**
All single students who are admitted to the university with a freshman classification and under 21 years of age are required to live on campus in a residence hall, or in their parent or legal guardian’s permanent home.

Students who are admitted to the University of Arkansas as transfer students from another post-secondary institution, and who have completed at least 24 credit hours at that institution are not required to live on campus.

Requests for a newly admitted freshmen to live somewhere other than with parents or a legal guardian in their permanent home will not be approved under most circumstances.

Students planning to live with their parents or legal guardian in their permanent home should complete the Living with Parent Notification form prior to attending an orientation session.

Students requesting an exemption from the University of Arkansas Freshmen Residency Requirement (https://housing.uark.edu/live-here/for-incoming-students.php) should send all required paperwork to University Housing at least three weeks prior to attending an orientation session. This ensures the student receives approval or denial prior to attending orientation.

Failure to do so could cause long delays in the orientation process. Students who need a Living with Parent Notification Form or who wish to apply for an exemption to the university’s requirement for single freshmen to live on campus may refer to the information on the Housing website (https://housing.uark.edu/live-here/for-incoming-students.php), call University Housing at 479-575-3951 or email housing@uark.edu.
Residence Hall Leadership

Residence halls are managed by a full-time coordinator for residence education, or CRE, who has completed a master’s degree program in higher education, counseling or a related degree. This individual is selected for his or her academic credentials and interest in helping others as well as his or her ability to work well with college students.

In addition, every area or floor is staffed by a resident assistant, or RA, who is an upper-class student with the knowledge to answer students’ questions and help students find their own answers.

Counselors-in-residence (doctoral graduate assistants) provide short-term counseling for students (https://housing.uark.edu/services/mental-health.php) living in the residence halls in response to personal, social, academic, and developmental needs.

Living Learning Communities

University Housing offers several innovative Living Learning Communities (https://housing.uark.edu/programs/living-learning-communities/), or LLCs, for students. These communities enhance student’s academic success.

In an LLC, students get to live with peers who have similar interests, majors, or career plans. Living Learning Communities do not cost extra. LLC members have the opportunity to participate in fun experiences that connect learning in and out of the classroom.

Some of the initiatives include faculty-led events, major specific academic learning teams, more general thematic learning communities and other programs that assist students in their academic endeavors.

Living Facility Options

Living options include traditional halls, suites and apartments with designations of single-gender or co-ed. Rooms are available for visually or hearing-impaired students as well as those who are physically challenged (https://housing.uark.edu/live-here/housing-contracts.php#disability-accommodation).

Residence hall entry/exit doors are secured and/or monitored 24 hours a day. Some entries are unlocked to accommodate offices housed in our facilities and classes that are held in our classrooms. Most, but not all, of these areas have interior doors that secure the living floors.

Residents are provided access via an electronic access system. Students should be careful not to allow non-residents to follow them into their residence hall. Residents are provided access via a fob issued when they check-in. Students are responsible for escorting all visitors and guests at all times.

Campus Dining

Each of the three separate dining facilities (https://housing.uark.edu/live-here/dining-rates.php) on campus is managed by Campus Dining Services and provides a natural setting for socializing with friends and enjoying a wide variety of high quality, nutritious meals. All students living in a residence hall, except those residing in summer school housing, are required to have a meal plan. There are several meal plans available to meet the needs of both on-campus and off-campus students.

Learn more about Campus Dining Services online at campus dining services (http://dineoncampus.com/razorbacks/).

Inclusion and Leadership Center for Multicultural and Diversity Education

The Center for Multicultural and Diversity Education provides academic, cultural and social programs intended to promote inclusiveness, foster achievement and assist in the development and advancement of a diverse student body.

The center is located on the fourth floor of the Arkansas Union in Room 404, and can be contacted at 479-575-8405 or by visiting multicultural.uark.edu (http://multicultural.uark.edu).

Student Support Services

The department of Student Support Services is designed to provide a powerful combination of programs and services to students who are first-generation, and/or modest-income, and/or individuals with disabilities. The services provided by Student Support Services place an emphasis on individual assessment, counseling, advising, and skill building. Some of these services include: academic/financial/personal counseling, financial scholarships, social etiquette instruction, career and graduate school preparation, academic/cultural enrichment, assistance with tutoring, and mentorship. The overarching goal of the University of Arkansas Student Support Services program is to empower students, assist them in achieving academic excellence, and seeing them through to graduation.

Student Support Services is a department in the Division of Student Affairs. The office is located on the Garden Level of Gregson Hall. For more details, call Student Support Services at 479-575-3546 or visit the Student Support Services website (http://sss.uark.edu/).

Talent Search

Talent Search is an early intervention/educational opportunity program. Serving students in grades 6-12, the program promotes skills and disseminates information necessary for successfully entering college and completing a baccalaureate degree. Emphasizing personal/career development, financial literacy, technological/academic skills, and ACT readiness through a developmental curriculum of college preparatory workshops, students are prepared for the rigors of higher education.

Campus visits, academic monitoring/advising, and guidance in the completion of college and financial aid applications are key components for participants and their families. Summer enrichment and campus-based events are also hosted as funding permits.

Talent Search is a federal TRIO program funded by the U.S. Department of Education. The University of Arkansas has three Talent Search grant projects which serve distinct target areas in Benton, Carroll, Crawford, Sebastian and Washington counties in Arkansas, and McDonald County, Missouri. At least two-thirds of students served by the programs must be low-income and in the first generation of their family to attend college. They exhibit academic potential and attend one of the 37 target schools served. For additional information and a full listing of target schools, visit the Talent Search website (http://talentsearch.uark.edu/).

The Talent Search Programs office is located at the university’s Uptown Campus East, 1083 E. Sain Street, UPTE 128, Fayetteville, Arkansas. Call 479-575-3553 for more information.

Upward Bound

Upward Bound and Upward Bound Math and Science

Upward Bound (http://ub.uark.edu/) and Upward Bound Math and Science are early intervention programs that help low-income and potential
first-generation college students prepare for higher education. These programs bring high school students in grades 9 – 12 to the University of Arkansas campus on weekends and during the summer to receive instruction in mathematics, laboratory sciences, composition, literature, and foreign languages. The programs also provide academic and social support through tutoring, counseling, mentoring, cultural enrichment, financial literacy, field trips, college planning, and financial aid assistance. For students just completing their senior year of high school, Upward Bound provides a summer residential bridge program that enables participants to earn up to six hours of college credit. Funding is provided through grants from the U.S. Department of Education.

Veterans Upward Bound

Veterans Upward Bound (http://vub.uark.edu/) is designed to identify and serve the unique needs of veterans who are low-income and potential first-generation college students, who have the academic potential and desire to enter and succeed in a program of higher education. Eligible veterans must have completed a minimum of 180 days of active duty in the military and hold any discharge other than dishonorable or discharged because of a service connected disability, a member or a reserve component of the U.S. Armed Forces called to active duty for a period of more than 30 days, or a member of a reserve component of the U.S. Armed Forces who served on active duty in support of a contingency operation on or after September 11, 2001. Services include Accuplacer testing, tutoring, guidance counseling, assistance in filing financial aid and VA benefit forms, academic/career advisement, test preparation for entrance exams, and courses in English, Spanish, math, science, and computer technology. Courses are offered days and evenings each semester. Funding is provided through a grant from the U.S. Department of Education. Call 479-575-2442 for more information.

The Upward Bound and Veterans Upward Bound offices are located at the university's Uptown Campus West, 1001 E. Sain St., Fayetteville.

Student Life

Reasonable Accommodations for Students with Disabilities

The Center for Educational Access, 209 Arkansas Union, is the central campus resource for students who require reasonable accommodations in order to access the programs, services and activities offered through the University of Arkansas. The center's staff work in partnership with the individual student to communicate and facilitate any accommodation needs to faculty and staff. Accommodation determination is based in part on medical or psychological documentation provided to the Center for Educational Access by the student. Students must meet with one of the center's staff for an access plan meeting to discuss their needs and provide such documentation before any accommodations can be granted.

To register for services or for more information, contact the Center for Educational Access, University of Arkansas, 209 ARKU, Fayetteville, AR 72701, phone 479-575-3104 ; e-mail: ada@uark.edu; Web: Center for Educational Access (http://cea.uark.edu/) (online request for services available).

Off-Campus Student Services

Off-Campus Student Services (OCSS)

Off-Campus Student Services (formerly Off Campus Connections) provides friendly and helpful resources, services and programs for off-campus undergraduates. Off-campus students are defined as undergraduates not living in a residence hall, fraternity, or sorority house.

For information, visit the Off-Campus Student Services website (http://occ.uark.edu/), make an appointment with a staff member in Arkansas Union Room 632, email ilieoff@uark.edu, or call 479-575-7351.

OCSS emphasizes two major priorities:

• Freshman Commuter Programs
• Off-Campus Living Education and Services

The University of Arkansas has more than 16,000 undergraduates living off-campus. Some off-campus students live near the university while others commute from hours away. Some students take advantage of online classes or majors and seldom visit campus. It is important that students living off-campus feel as welcome at the university as students living on-campus. Ongoing communication with off-campus students is important, so they know how to be an active part of the campus community as their schedule and other commitments allow. Additional challenges are faced by off-campus students and they need support from those who understand the differences they face.

Freshman Commuters are first-time, full-time, degree-seeking students who live at home with a parent or guardian during their first year of college. Off-Campus Student Services reaches out to more than 500 freshman commuters each summer and fall to share campus and academic resources, to provide opportunities to meet other cohort members, and to share mentorship and connection opportunities.

Finding a place to live is a basic need for many students after their freshman year. To help meet the needs of those students looking for housing near campus, OCSS provides the official, searchable off-campus housing website: offcampushousing.uark.edu (https://offcampushousing.uark.edu/). The website is free for student use, and properties on the site have an interest in student tenants. Off-Campus Living Fairs and educational resources are also offered on the site to prepare those who are planning to live on their own for the first time in our local community. Students can search for a roommate or someone to sublease when they plan to study abroad.

Off-Campus Meal Plans have proven important to student success. Meal plans of various prices have been designed to meet off-campus students' needs for eating while on campus for class, work, or other activities. Meal plans are available for purchase through a link provided on the Off-Campus Student Services website (http://occ.uark.edu/). Around 4,000 meal plans are purchased each year by off-campus students. Having a meal plan encourages students to eat regular meals so they can better focus on academics. Meal plans are charged to a student’s account, so costs may be covered with scholarships, financial aid awards, or paid out with tuition payments.

A friendly and comfortable Commuter Lounge — with a refrigerator, microwave, television, study tables and office spaces — is located on the Sixth Floor West of the Arkansas Union. Timely tips and information about jobs, deadlines, campus, and community life are shared through a weekly electronic newsletter published and emailed to off-campus undergraduates throughout the fall and spring semesters.

Off-Campus Student Services’ desire is for each student living off-campus to feel an important part of the University of Arkansas, earn at least one degree, and have their name forever inscribed on the historic Senior Walk.
Office of Student Standards and Conduct

It is the vision of the Office of Student Standards and Conduct to foster a campus community that values citizenship, personal and civic responsibility, peer accountability, and care/concern for the university and surrounding communities.

The mission of the Office of Student Standards and Conduct (OSSC) is to create a safe and inclusive community by upholding the Code of Student Life, which promotes responsibility, accountability, and student learning through:

- Educational opportunities and outreach.
- The adjudication of Code of Student Life violations.
- Providing a consistent, fair, equitable, educational, student conduct process.
- The development of ethics and adherence to personal values.
- Education on the norms and values of the University of Arkansas.

Students who are interested in involvement with the All-University Conduct Board should contact the Director of OSSC at judicial@uark.edu. The All-University Conduct Board comprises faculty, staff, and students and is responsible for the adjudication of cases of alleged student misconduct as outlined in the Code of Student Life. This board is an advanced leadership opportunity for students who would like to gain valuable experience working with faculty and staff on an impartial peer review board.

For more information regarding the Code of Student Life, please see the Student Handbook at handbook.uark.edu (http://handbook.uark.edu/). The Office of Student Standards and Conduct is located in Pomeroy B 110, phone 479-575-5170; Web: ethics.uark.edu (http://ethics.uark.edu/).

Veteran Resource and Information Center

The University of Arkansas Veteran Resource and Information Center contributes to the academic and professional success of current and prospective student veterans and their dependents by providing innovative resources and support; assisting with military educational benefits; and by serving as a central “Rally Point” for a seamless collaboration among various departments within the University of Arkansas, the U.S. Department of Veterans Affairs, and the diverse network of community partners supporting veterans.

Veterans and dependents of service members may be eligible to receive monthly educational assistance from the Veterans Administration while enrolled at the University of Arkansas. For more information, including eligibility for veterans educational benefits and scholarship opportunities, contact the Veterans Resource and Information Center at vric@uark.edu or 479-575-8742. Students may also visit the center at the Garland Center Shops, suites 115 and 116 or online at veteranscenter.uark.edu (http://veteranscenter.uark.edu/).

Student Media

The Office of Student Media administers and advises the official student media outlets of the university. These outlets are: the student newspaper, The Arkansas Traveler; the University of Arkansas yearbook, the Razorback; the student magazine, The Hill; the student television station, UATV; the student radio station, KXUA; and the student advertising agency, Main Hill Media. All provide a forum for student expression, entertainment, news and information of interest to the campus community. Other than a small professional support staff, these groups are entirely staffed by student employees and volunteers, including editors and station managers. For more information, contact Student Media at 479-575-3406.

Centers and Research Units

Research programs are the means by which the university contributes to the generation of knowledge as well as to the preservation and dissemination of it. With nationally recognized programs in many areas and funding from government, industry, and other private sources, the research effort of the university is strong and diversified and provides special learning opportunities for students as discoveries are made.

In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by the university divisions described below.

Graduate students are likely to be involved in research conducted by these research units, but the university encourages undergraduates as well to pursue research in their areas of academic interest. Students who wish to engage in research of any kind should seek the guidance of their advisers and professors to identify research teams and projects. In addition to the extensive work performed by faculty through individual and team efforts in academic departments, special programs of research are conducted by faculty members and staff in many associated university research centers. The university invites students to learn more about these centers and the research opportunities they offer by visiting the websites or by contacting the individuals listed below.

Arkansas Center for Space and Planetary Sciences

Larry Roe, director

Mechanical Engineering Building, 204D
479-575-3750
csaps@uark.edu

Arkansas Center for Space and Planetary Sciences website (http://spacecenter.uark.edu/

The Arkansas Center for Space and Planetary Sciences is a research institute of the University of Arkansas, created by faculty from six departments, including Biological Sciences, Chemical Engineering, Chemistry and Biochemistry, Electrical Engineering, Geosciences, Mechanical Engineering, and Physics. Those departments, representing the Fulbright College of Arts and Sciences and the College of Engineering, work closely with the Graduate School and the Honors College.

The center operates world-class research facilities and cutting-edge research projects. It houses the only university-based, large-scale planetary simulation chamber in the country along with major facilities for the analysis of extraterrestrial samples. Major research interests include the analysis of returned samples from space, the nature of Mars, and instrumentation for use in space. The center also operates a number of programs of interest to the university community, grade school teachers and students, and the public.

The space center administers master’s and doctoral degree programs in space and planetary science. These provide a unique integrative interdisciplinary education and research training based on a suite of core courses spread across the departments and specialist courses appropriate to the student’s specific interests. Professional development in communications, ethics and space policy is also included. Such training
gives graduates a competitive edge in today’s space and planetary job market.

Additionally, the Departments of Biological Sciences, Geosciences and Physics offer space and planetary science as an option in their own graduate programs. Admission procedures are outlined on the space center Web site along with detailed information about the programs, the research areas, and current research projects.

Arkansas High Performance Computing Center
Rick McMullen, director
479-575-6794

Arkansas High Performance Computing Center website (http://hpc.uark.edu)

The Arkansas High Performance Computing Center is a campuswide provider of supercomputing resources for teaching and research by students and faculty. For nearly a decade, the university has strongly supported high-performance computing as a tool for enabling scientific discovery and making researchers more productive. With support from the university, the National Science Foundation and the state of Arkansas, the center has fielded two Top500 supercomputers and currently offers 4,985 cores, 13.4TB of memory, about 73 TFLOPS CPU peak performance, 93TB of long-term storage, 374TB of scratch storage, and 96TB of backup storage making it among the largest and most capable academic systems in the world. Staff members of the Arkansas High Performance Computing Center support a broad range of research programs in computational condensed matter physics, computational chemistry, nanotechnology and materials science, bioinformatics, astrophysics, and geospatial image analysis. The center also provides education and training in computational science, parallel programming and high-performance computer operations to provide both tools and skills needed in computationally intensive research.

Arkansas Humanities Center

Trish Starks
Director
419 Old Main
479-575-7592
tstarks@uark.edu (%E2%80%8Atstarks@uark.edu)

Arkansas Humanities Center Website (https://fulbright.uark.edu/programs/humanities-program/)

The Arkansas Humanities Center in the J. William Fulbright College of Arts and Sciences promotes humanistic scholarship and inquiry, innovative and interdisciplinary teaching, and humanities scholarship to the wider community.

The mission of the Arkansas Humanities Center is threefold: to support and advance cross-disciplinary research and inquiry in the humanities; sponsor special programs that engage the university and wider public in conversation on issues that bring the humanities to bear on salient topics of our times, and to foster a strong role for the humanities in an increasingly global society.

Arkansas Security Research and Education Institute

Jia Di, director
523 J.B. Hunt Transport Services Center for Academic Excellence
479-575-5728

Co-directors: Chase Rainwater, Steve Ricke and Dale Thompson

The University of Arkansas is well-positioned to become a leader in the state and nation in contributing to the research for security solutions and the training of students to become future security workforce. The Arkansas Security Research and Education Institute covers four research thrusts of security: cyber, transportation, critical infrastructure, and food and water. Working closely with local industry, the institute initiates and facilitates multidisciplinary collaborations among departments and colleges, leveraging the research strengths in existing on-campus centers such as the Center for Information Security and Reliability, the Mack-Blackwell National Rural Transportation Center, the Center for Excellence in Logistics and Distribution, the National Center for Reliable Electric Power Transmission, and Center for Food Safety among others.

Arkansas Water Resources Center

Brian E. Haggard, director
479-575-4403
awrc@uark.edu

Arkansas Water Resources Center website (https://arkansas-water-center.uark.edu/)

The Arkansas Water Resources Center, a unit of the Division of Agriculture, was established by Public Law in 1964. The Center utilizes scientific personnel and facilities of all campuses of the University of Arkansas System (and other Arkansas colleges and universities) in maintaining a water resources research program. The center supports specific research projects throughout Arkansas, which often provide training research opportunities for undergraduate and graduate students, and it disseminates information on water resources via publications and conferences. The center works closely with federal, state, municipal, educational, and other public groups concerned with water resources in development of its research, training, and dissemination programs.

Bessie Boehm Moore Center for Economic Education

Rita Littrell, director
RCED 217
479-575-2855

Bessie Boehm Moore Center for Economic Education website (http://bmcee.uark.edu)

The Bessie Boehm Moore Center for Economic Education, established in 1978 and located in the Walton College of Business, promotes an understanding of the American economy among the people of Arkansas. Its major efforts are directed to elementary and secondary school children. The center’s faculty and staff hold workshops and seminars for public school teachers, conduct research in economic education, develop instructional materials, maintain a lending library, and sponsor adult economic educational programs for business, labor, industry, and the general community. In recent years, center personnel have been involved in educating teachers in transitional or developing economies about
Blockchain Center of Excellence

Paul Cronan and Rajiv Sabherwal, co-directors
Enterprise Systems, Walton College 204
479-575-4500
Email: cronan@uark.edu and rsabherwal@walton.uark.edu

Blockchain Center of Excellence Website (https://blockchain.uark.edu/)

The blockchain Center of Excellence develops educational materials for practitioners and educators involved in the use of blockchain technologies. Blockchain technology offers a secure, verifiable way to maintain an encrypted accounting ledger of business transactions across multinational borders. This could significantly affect the way that businesses account for business transactions and track products in multinational supply chains. Other promising applications of blockchain and cognitive analytics include financial services, interbank and intrabank fund transfers, insurance, and health care.

The development of blockchains will provide support and enhancement for the Sam M. Walton College of Business and world-class projects and research centers such as the McMillon Innovation Studio, the Brewer Family Entrepreneurship Hub, the Sustainability Consortium, the Center for Retailing Excellence and the J.B. Hunt Innovation Center of Excellence.

Center for Advanced Spatial Technologies

Jackson Cothren, director
J.B. Hunt Center for Academic Excellence, Room 304
479-575-6159
info@cast.uark.edu

Center for Advanced Spatial Technologies website (http://cast.uark.edu/)

The Center for Advanced Spatial Technologies (CAST) focuses on application of geomatics in research, teaching, and service. These technologies include geomatics, GIS, GPS, remote sensing, photogrammetry, geospatial software and systems design, interoperability, and large (multi-terabyte) geospatial databases.

Established in 1991, CAST is a unit of the Fulbright College of Arts and Sciences. CAST has a campus-wide focus, working with the departments of anthropology; architecture; crop, soil, and environmental science; biology; bioengineering; civil and industrial engineering; geosciences; entomology; and landscape architecture. Other related partners include the Environmental Dynamics Program, the Arkansas Water Resources Center, Mullins Library, and the Arkansas Archeological Survey.

CAST has been selected as a Center of Excellence by many corporations, including the Intergraph Corporation, Trimble Navigation Inc., the Oracle Corporation, Definiens Imaging, Sun Microsystems, Spatial Acquis, and PCI Geomatics. These and other corporate sponsors have provided more than $22 million of in-kind support of the research teaching facilities of the center. The center has extensive hardware and software capabilities, including more than 100 high-performance workstations, multiple Linux, Windows XP and Solaris servers (combined seven terabyte of on-line disk), large-format plotters, mapping and survey-grade GPS, MSS instruments, spectroradiometers, terrestrial laser scanners, and an extensive inventory of software.

University of Arkansas undergraduate and graduate students have a wide range of geomatics courses available to them that utilize CAST faculties and laboratories. These courses, taken along with related courses in cartography, remote sensing, image interpretation, photogrammetry, surveying, and spatial statistics, provide the student with a range of career options. In addition to classroom instruction, CAST facilities are used by students in both undergraduate and graduate research projects. The internship program in Applied Spatial Information Technologies offers students an opportunity to gain hands-on experience in geospatial technologies.

CAST staff are engaged in research projects in a wide range of areas. A few recent research projects focused on areas such as the creation of a seamless, on-line spatial data warehouse; K-12 GIS education; soil survey by remote sensing; land-use/land-cover identification; remote sensing for historic resources; natural resources wetlands analyses; multi-sensor remote sensing for historic resources; and predicting red oak borer populations.

Center for Advanced Surface Engineering

Min Zou
Director
Nanotech Building 212
479-575-6671

Research Leadership

- Mechanical Thrust — Min Zou and Gregory Salamo
- Cellulosic Thrust — Jin-Woo Kim
- Cyberinfrastructure Team — Jackson Cothren and Paul Millett

The mission of the Center for Advanced Surface Engineering is to accelerate the discovery, design, development, and technology transfer of the next generation of material surfaces, enabling new applications and innovative products to address national research priorities and industry needs. The vision of the center is to become a leading research and education center for engineering durable, nanostructured multifunctional, tunable, and bioactive surfaces.

These surfaces have the potential to impact a broad range of industries, ranging from manufacturing, aerospace and defense, agriculture, oil and gas, to healthcare. The Center for Advanced Surface brings together a multidisciplinary team of about 40 researchers with expertise in physics, chemistry, biology, engineering, and computational science from 10 Arkansas universities to conduct the interdisciplinary research.

Center for Business and Economic Research

Mervin Jebaraj, director
WJWH 545
479-575-4151
cber@walton.uark.edu

Center for Business and Economic Research website (http://cber.uark.edu/)
The Center for Business and Economic Research at the Sam M. Walton College of Business provides excellence in applied economic and business research to federal, state, and local government, as well as to businesses currently operating or those that desire to operate in the state of Arkansas. The Center further works to improve the economic opportunities of all Arkansans by conducting policy research in the public interest.

The Center was originally established as the Bureau of Business and Economic Research in 1943 to explore and report on economic, business, and social conditions in Arkansas. In addition to supporting research within the College, the Center supports economic development by providing economic and demographic data and analysis to business, government, and individuals. Over the years, the Center has grown to become a well-known point for communications and exchange of ideas, research, publications and data for universities, businesses, government, and individuals. In addition, the Center serves as a focal point in providing assistance to faculty and students in experimentation with their ideas and techniques in both theoretical and applied research.

Center for Communication Research
Robert H. Wicks, director
KIMP 417
479-575-3046
rwicks@uark.edu

Center for Communication and Media Research Website (http://fulbright.uark.edu/departments/communication/center-for-communication-and-media-research/)

The Center for Communication Research advances knowledge and supports scholarly and applied inquiry into the study of interpersonal, group, organizational, and media communication. The center sponsors outreach programs designed to help under-served populations, educational institutions, media companies, businesses, and non-profit organizations.

Multidisciplinary in nature, the center facilitates scholarship among allied disciplines such as journalism, law, business, political science, psychology, sociology, and computer science. Research topics include communication and advertising, dispute resolution, education, environmental concerns, family, health, information technology, legal concerns, life stages, media audiences, organizational concerns, politics, and religion.

Center for Children and Youth
Chris Goering, director
PEAH 305
479-575-4209
cgoering@uark.edu

Center for Children and Youth website (http://cied.uark.edu/center-for-children-and-youth.php)

The Center for Children and Youth is designed to address issues of intellectual growth, social development, literacy, the arts, and techniques for addressing generational or regional poverty issues. This will be accomplished through teacher professional development, pre-service education, research, as well as curriculum development and dissemination. The center was established by a generous gift of the Windgate Family Foundation in 2006 to the College of Education and Health Professions.

In 2010, the Center for Children and Youth hosted a national conference in Springdale, Ark., focused on the confluence of literacy and the arts. The conference featured speakers from the Kennedy Center for Performing Arts, Temple University, the National Council of Teachers of English, and local experts on arts integration approaches to teaching. Later in 2010, Dr. Chris Goering in the Curriculum and Instruction Department was appointed as the center’s first director.

Center for Ethics in Journalism
Raymond McCaffrey
Director
479-575-2626
Email: mmccaff@uark.edu

Center for Ethics in Journalism website (https://journalismethics.uark.edu/)

The Center for Ethics in Journalism is an outreach program of the School of Journalism and Strategic Media at the University of Arkansas’ Fulbright College of Arts and Sciences. The center fosters the study and practice of the journalistic principles of accuracy, fairness and service to the public in editorial/news; in broadcast, radio and television; and in advertising and public relations.

The University of Arkansas Center for Ethics in Journalism will play an integral role in shaping the future of journalism by educating students and professionals on the tenets of ethics, preparing them to employ those principles as a matter of course and teaching them to reach ethical decisions as routine and not exception.

Center for Excellence in Engineering Logistics and Distribution
Manuel D. Rossetti, director
BELL 4164
479-575-6756

Center for Excellence in Logistics and Distribution website (http://celdi.org/)

The Center for Excellence in Logistics and Distribution (CELDi) is a multi-university, multidisciplinary, National Science Foundation sponsored Industry/University Cooperative Research Center located in the Department of Industrial Engineering. CELDi emerged in 2001 from The Logistics Institute (1994) to provide integrated solutions to logistics problems, through research related to modeling, analysis, and intelligent-systems technologies. Research endeavors are driven and sponsored by representatives from a broad range of member organizations, including manufacturing, maintenance, distribution, transportation, information technology, and consulting. Partner universities include the University of Missouri, Clemson University, Virginia Tech and University of California Berkeley. This partnership among academic institutions and industry represents the effective integration of private and public sectors to enhance a U.S. competitive edge in the global market place.

CELDi helps industry partners excel by leveraging their supply chain to achieve a distinguishable, sustainable difference. Member companies realize a measurable return on their investment by creating competitive value chains in terms of cost and service quality. Through basic research,
collaborative applied research with industry, technology transfer, and education, CELDi is a catalyst for developing the engineering logistics methodology necessary for logistics value chain optimization.

Center for Executive Education
Blythe Eggleston, associate director for executive education
WJWH 549
479-575-5871
execed@walton.uark.edu

Center for Executive Education website (http://execed.uark.edu/)
The Center for Executive Education in the Sam M. Walton College of Business provides executive and middle management training opportunities designed to enhance quality in leadership, management decision making, and human resource skills and abilities for corporate and public clients. Programs are custom designed for individual clients. The center serves local, national, and multinational businesses. The center operates on a fee-for-service basis, and its activities are supported from fee-based revenues.

Center for Grid-Connected Advanced Power Electronic Systems
Alan Mantooth
Executive Director
1475 W. Cato Springs Road
479-575-4985
grapes@uark.edu

The mission of this Center for Grid-Connected Advanced Power Electronic Systems is to accelerate the adoption and insertion of power electronics into the electric grid in order to improve system stability, flexibility, robustness, and economy. The members of the center expect to accomplish that mission by focusing on the following main objectives:

1. Develop new technologies for advanced power electronic systems in the areas supporting grid connected distributed energy resources, power steering and routing devices, and intelligent load-side devices.
2. Develop the software and tools for controlling embedded- and grid-connected power electronics to benefit the grid as well as controlled loads.
3. Educate engineers who understand the power electronic technologies important to the member companies.

Center for Information Security and Reliability
Brajendra Panda, director
JBHT 504
479-575-2067
bpanda@uark.edu

Center for Information Security and Reliability website (http://isr.csce.uark.edu/)
The center was established to promote education and research in the field of computer security and information assurance at University of Arkansas. The activities of this center includes, but not limited to the following: fostering multidisciplinary research, securing large-scale funding from federal, state, and other funding agencies, providing education and training to future work-force, increasing awareness in the field of information security and reliability by offering appropriate seminars and workshops.

Center for Interdisciplinary Study of Science and the Arts
Elizabeth Hellmuth Margulis, co-director
ehm@uark.edu, 479-575-5763
Padma Viswanathan, co-director
pviswana@uark.edu

The Center for Interdisciplinary Study of Science and the Arts seeks to advance cohesion in campuswide research and teaching that integrates science and the arts. The center will facilitate collaboration, provide an outlet for the dissemination of interdisciplinary work at the University of Arkansas, incubate ideas that introduce students to interdisciplinary modes of thinking, lend a unique identity to arts programs at the university, help attract top students whose interests often bridge science and the arts, and build on an existing strength on campus.

Center for Mathematics and Science Education
Lynne Hehr, director
346 N. West Avenue, No. 102
479-575-3875

Center for Mathematics and Science Education website (http://cmase.uark.edu)
The Center for Mathematics and Science Education – a University of Arkansas K-16 education outreach facility within the College of Education and Health Professions – works in conjunction with the Arkansas Department of Higher Education as part of a network of twelve mathematics and science centers on university and college campuses around Arkansas. The main objectives of the center are to:

1. Provide science, mathematics and technology professional development for K-16 pre-service and in-service teachers;
2. Assist in statewide K-16 education initiatives;
3. Coordinate regionally beneficial grant-funded programs among universities and colleges for K-16 education;
4. Provide science, mathematics and technology educational materials, resources, and information to the K-16 community; and
5. Link common K-16 education allies throughout the state.

University Day, Science/Engineering Fairs, Springfest, and various K-16 teacher and student programs are conducted through the center. Day-to-day educational outreach information is sent to local, regional, and statewide constituencies through the center’s website and various email listservs. The Center for Mathematics and Science Education is a host site for the federally sponsored Eisenhower National Clearinghouse and the Southwest Educational Development Laboratory Consortium. The center also serves as the Arkansas National Aeronautics and Space Administration Educator Resource Center, responsible for warehousing and disseminating NASA materials and providing regular updates on NASA programs and materials to the state.
Center for Power Optimization and Electro-Thermal Systems
The Center for Power Optimization and Electro-Thermal Systems is an engineering research center run by the University of Arkansas, the University of Illinois at Urbana Champaign, Stanford University and Howard University. These four universities include a multidisciplinary team that will create new paradigms for power flow in complex systems.

The center's long-term goal is to increase the power density of current mobile electrified systems by 10-100 times over current state-of-the-art systems. While ambitious, this would have a profound impact on a mobile electrified infrastructure of the United States and beyond. On-highway vehicles could save between 100-300 million liters of fuel per year and could nearly double the range of all-electric vehicles. Off-highway vehicles could save on the order of 100 billion liters of fuel since their electrification is starting from a less mature point than current on-highway vehicles. Similarly, aircraft could see 10-30 billion liters of fuel saved as well as prevention of up to 10 million tons of carbon dioxide from going into the high altitude atmosphere.

These economic and environmental impacts are just the beginning of the art of the possible with the achievement of the center's vision. This center is a multi-disciplinary center involving several fields of study including mechanical engineering, electrical engineering and physics. The center functions under the assumption that a single discipline could not achieve the goals set by this team and must integrate multiple disciplines and domains to achieve such success.

Center for Protein Structure and Function
Frank Millett and Roger Koeppe, co-directors
CHEM 119
479-575-4601

Center for Protein Structure and Function Website (http://fulbright.uark.edu/departments/chemistry/research/center-for-protein-and-structure/)

The Center for Protein Structure and Function is an interdisciplinary unit for research and teaching within the departments of chemistry/ biochemistry and biological sciences in the Fulbright College of Arts and Sciences. The center raises funds from federal, state, and private sources and sponsors faculty- and student-initiated basic research on the folded structures of protein molecules, their dynamic properties, and their diverse functions in biological systems. The center has been awarded funding from the National Science Foundation, the Arkansas Science and Technology Authority, and the National Institutes of Health.

Center for Retailing Excellence
Jessica Salmon
Director
jsalmon@walton.uark.edu

Center for Retailing Excellence Website (https://cre.uark.edu/)

The Center for Retailing Excellence is shaping the future of commerce by inspiring and developing students and business leaders to be catalysts of innovation. The center integrates innovative experiences into a students' learning journey by partnering with commerce companies to accelerate real-world application and create the next generation of innovators.

Center for Social Research
Casey Harris, co-director
Patricia Herzog, co-director

Center for Social Research Website (https://fulbright.uark.edu/departments/sociology/research-centers/center-for-social-research.php)

Since 1982 the Center for Social Research has provided research services to government agencies, communities and businesses. Located in the Department of Sociology, the center can conduct survey and public opinion research, impact assessment, evaluation and policy assessment. The center's staff can provide assistance with research methodology and design, sampling, data collection and analysis.

The center's professional staff has vast experience in virtually every aspect of social research. In addition, the center's resources include computer-assisted telephone interviewing facilities; extensive archival data holdings, including online access to the archival holdings of the Inter-University Consortium for Political and Social Research at the University of Michigan; and, in-house statistical analysis.

Center for Statistical Research and Consulting
Joon Jin Song, director
SCEN 309B
479-575-6319
csrc@uark.edu

The Center for Statistical Research and Consulting is a service and research unit of the University of Arkansas, administratively housed in Department of Mathematical Sciences, providing faculty and graduate students in the university with an environment for collaboration in research and instruction emphasizing statistical and quantitative approaches. It offers statistical consulting and statistical software support to faculty, staff, graduate and undergraduate students conducting research at the university. The center will extend this statistical support to the state of Arkansas, directly providing some consulting services but primarily acting as a conduit for industry, government, and non-profit organizations to engage campus faculty and graduate students in consulting opportunities. The community support activities from the center will stimulate and enhance campus research and instructional efforts as well as provide important services to organizations throughout the region.

The mission of the Center for Statistical Research and Consulting is to participate in research to provide high quality statistical input to high quality research projects, train statisticians to interact effectively with investigators from other disciplines, and encourage collaborative research between statisticians and investigators from other disciplines.

The center is a fee-for-service unit. The initial consulting meeting with a client is provided at no cost. All subsequent and follow-up visits will require financial support.
Center for Utilization of Rehabilitation Resources for Education, Networking, Training and Services

Robin Freeman, director
121 Cedar St.
Hot Springs, AR 71901
501-623-7700

CURRENTS website (http://www.uacurrents.org/)

Established in 1974, this center provides human resource and organization development services for a broad audience in the rehabilitation and disability communities. Projects managed by CURRENTS vary in scope from state and local to regional and national levels. The center is housed on the campus of the Arkansas School for Mathematics, Sciences and the Arts, Hot Springs, Arkansas.

Center of Excellence for Poultry Science

Michael Kidd, director
POSC 114
479-575-3699

Center of Excellence for Poultry Science website (https://poultry-science.uark.edu/poultry-science-research.php)

With designation by the University of Arkansas Board of Trustees to make poultry science a center of excellence in the state’s university system, the department of poultry science became a reality in 1992.

The Center of Excellence for Poultry Science is comprised of full-time poultry science faculty members, full-time USDA/ARS Poultry Research Group faculty members, graduate assistants, adjunct faculty, and poultry science departmental staff. The center receives multidisciplinary contributions from several university departments including animal science; biological and agricultural engineering; biological sciences; crop, soil, and environmental sciences; entomology; food science; industrial engineering; the School of Human and Environmental Sciences; and the UALR College of Pharmacy.

The Department of Poultry Science and the research group are housed in the John W. Tyson Building, which is a 112,000-square-foot, state-of-the-art laboratory and office complex that was completed the fall of 1995 on the U of A campus. In addition to the John W. Tyson Building on the main campus, the Center of Excellence for Poultry Science comprises the following facilities:

- Four full-sized broiler houses equipped with computerized environmental control and data collection systems capable of commercial-type production research; and
- A broiler breeder research facility that includes two full-size broiler breeder houses, a pullet-rearing facility, and quality assurance building with offices, classroom, and egg holding capacity.

Chemical Hazards Research Center

Jerry Havens, director
BELL 3157
479-575-3857
jhavens@uark.edu

Chemical Hazards Research Center website (http://www.cheg.uark.edu/4444.php/)

The Chemical Hazards Research Center determines the consequences of atmospheric release of potentially hazardous materials with a present emphasis on liquefied natural gas in transportation and storage operations. Computational models are used in conjunction with the wind tunnel at the center, which is presently the largest low-speed wind tunnel suited for such studies.

Community and Family Institute

Kevin Fitzpatrick, director
MAIN 211
479-575-3777
kfitzpa@uark.edu

Community and Family Institute Website (https://fulbright.uark.edu/departments/sociology/research-centers/community-family-institute/)

The Community and Family Institute is a joint effort of the University of Arkansas and the Harvey and Bernice Jones Center for Families in Springdale, Arkansas. The institute is a multidisciplinary research center in the Fulbright College of Arts and Sciences that conducts basic and applied research, as well as policy-related studies on the critical issues facing families and communities in the region and the nation. The institute raises funds from federal, state, and private sources and sponsors applied research by faculty and students on the family and the community.

Community Design Center

Stephen Luoni, director
1 East Center Street, Suite 220
Fayetteville, AR 72701
sluoni@uark.edu

U of A Community Design Center Website (http://uacdc.uark.edu/)

The mission of the University of Arkansas Community Design Center is to advance creative development in Arkansas through education, research, and design solutions that enhance the physical environment. As an outreach center of the Fay Jones School of Architecture and Design, the Community Design Center is developing a repertoire of new design methodologies applicable to community development issues in Arkansas, with currency at the national level. The center’s design solutions introduce a multiple bottom line, integrating social and environmental measures into economic development. Integrative design solutions add long-term value and offer collateral benefits related to sustained economic capacity, enhanced ecologies, and improved public health. The design
center also offers hands-on civic design experience to students who work under the direction of design professionals. The University of Arkansas Community Design Center was founded in 1995 and has provided design and planning services to more than 30 communities across Arkansas. The design center’s planning has helped Arkansas communities and organizations to secure nearly $62 million in grant funding to enact suggested improvements.

Cybersecurity Center on Secure, Evolvable Energy Delivery Systems

Alan Mantooth
Director
Bell Engineering 3175
479-575-7962
mantooth@uark.edu

Shannon Davis
Managing Director
CSRC 232
479-575-6877
sgdavis@uark.edu

The Cybersecurity Center on Secure, Evolvable Energy Delivery Systems researches and develops innovative cybersecurity technologies, tools and methodologies to advance the energy sector’s ability to survive cyber attacks and incidents while sustaining critical functions. The center verifies and validates efficacy of the developed solutions and methodologies for transition to practice and commercialization in the energy sector. These solutions and methodologies will enhance the resilience of energy delivery infrastructure, which includes the electricity sub-sector and the oil and natural gas sub-sector.

The specific technical areas of research and development will focus on five areas:

• Secure grid control and operations.
• Secure emerging power grid components and services.
• Secure energy delivery system operation technology infrastructure.
• Cybersecurity management and visualization.
• Cybersecurity testing and validation.

David and Barbara Pryor Center for Arkansas Oral and Visual History

Bill Schwab, executive director
East Square Plaza
1 East Center Street, Suite 216
479-575-6829

Pryor Center Website (http://pryorcenter.uark.edu/)

The mission of the Pryor Center for Arkansas Oral and Visual History is to document Arkansas’ rich history by collecting the “living memories” of those who have been witness to various aspects of the state’s past. Using traditional oral history methodology, the center interviews individuals, transcribes those interviews, and maintains those collections for future generations. The center is responsible for preserving these memories and making them available to scholars and researchers interested in the culture and heritage of Arkansas. The center is located in East Square Plaza on the east side of the Fayetteville Square; to contact the center, call 479-575-6829, or visit the website.

Diane D. Blair Center of Southern Politics and Society

Angie Maxwell, director
MAIN 506-A
479-575-3356

Blair Center website (https://blaircenter.uark.edu/)

The Blair Center, located in the Department of Political Science, is dedicated to fostering political scholarship, public service, civic consciousness, and the study of Southern politics, history and culture. The center supports graduate students studying topics relevant to the South and hosts conferences and periodic speakers discussing issues relevant to Southern politics and society.

Exercise Science Research Center

HPER 321
479-575-6762
exercisescience@uark.edu
exercise@uark.edu

exercisescience.uark.edu (http://exercisescience.uark.edu)

The Exercise Science Research Center is a student-centered facility with a unique dual purpose that includes research and educational components. Faculty from the kinesiology and exercise science programs coordinate research efforts of the center, which initiates and conducts research focused on health, exercise and physical performance. The center also provides education outreach programs for targeted groups with an emphasis on collaborative and cooperative programs with agencies in Arkansas and the region. The center also provides educational experiences for undergraduate and graduate students in the exercise science and kinesiology programs.

Garrison Financial Institute

Wayne Lee, executive director
RCED 205
479-575-4505

Garrison Financial Institute website (http://gfi.uark.edu)

The Garrison Financial Institute is an institute organized within the Sam M. Walton College of Business to advance financial education and knowledge through practice. Its mission is to enhance student learning through experience, foster research that extends and perfects best practices, and contribute to the economic development of the State of Arkansas and the welfare of its citizens. The center was founded in 2005.

Garvan Woodland Gardens

Bob Byers, garden director
550 Arkridge Road, PO Box 22240
Hot Springs National Park, AR 71913
1-800-366-4664
gardeninfo@garvangardens.org

Garvan Woodland Gardens website (http://www.garvangardens.org/)
Garvan Woodland Gardens is the botanical garden of the University of Arkansas, established in 1993 by an endowment from Mrs. Verna C. Garvan. Her vision is the foundation of the Garden’s mission to serve the public and provide teaching and research opportunities for the Department of Landscape Architecture and the Fay Jones School of Architecture and Design.

As early as 1985, the Department of Landscape Architecture was utilizing portions of the 210 acres on Lake Hamilton, in Hot Springs, AR, as a resource to teach local ecology and design principles. Teaching opportunities continue in these areas and currently feature urban forestry, wetland ecology, construction methods and materials, design implementation, and horticulture. Numerous designed features offer case studies for landscape architecture and architecture students as well as professionals, including the Asiatic Garden by David Slawson, a nationally recognized Japanese garden designer, and the Verna C. Garvan Pavilion, by internationally recognized architects Fay Jones and Maurice Jennings.

Research opportunities lie in wetland ecology and constructed wetland design, sustainable design, and therapeutic gardens. Ongoing public programs feature workshops on gardening techniques, bonsai collections, and perennials.

An annual symposium focuses on timely issues affecting the quality of life of people in Arkansas and the nation. Past topics include historic landscape preservation practice in Arkansas and sustainable golf course design.

Garvan Woodland Gardens is a member of the American Association of Botanical Gardens and Arboreta.

High Density Electronics Center
Simon Ang, director
HiDEC/ENRC 700
479-575-4627

HiDEC website (http://www.hidec.uark.edu/)

The High Density Electronics Center (HiDEC) was established in 1991 as an interdisciplinary research program in advanced electronic packaging technologies, particularly the rapidly developing technology of multichip modules (MCMs), which allow electronic systems to be small, fast, and cheap.

With generous support from the Defense Advanced Research Projects Agency (DARPA), a large clean room was constructed, and an MCM fabrication facility, unique among universities, was installed. Current research programs focus on 3-D electronic packaging, high density laminate substrates, co-fired ceramic substrates for wireless applications, high temperature superconducting (HTSC) tunable filters, micro electromechanical systems (MEMS), and integrated passives development. The program is located in the Department of Electrical Engineering but involves faculty from six departments and more than 25 graduate students. Continuing funding comes from DARPA and several industrial sponsors. Significant national recognition has resulted from work performed at HiDEC.

HiDEC also houses the Center of Excellence for Nano-, Micro-, and Neuro-Electronics, Sensors and Systems (CENNESS).

Inclusion, Diversity, Equity, Leadership, and Strategy Institute
Yvette Murphy-Erby
Vice Provost for Diversity and Inclusion
Administration Building 415A
479-575-3338

Office of Diversity and Inclusion website (https://diversity.uark.edu/)

The mission of the IDEALS Institute is twofold:

• To undertake cutting-edge research on issues of diversity and inclusion and be a research-hub of expertise, leadership, and support for equity, inclusion, and other dimension of diversity.
• To develop and deliver a comprehensive array of educational and training components (courses, workshops, online seminars, etc.) about diversity and inclusion that will provide knowledge, skills, and tools for stakeholders to create and sustain change in their organizations.

Such change will foster a more creative, inclusive, respectful, and productive workforce and workplace and contribute to the type of climate and culture that will yield enriched learning experiences that foster academic and workforce success for all.

Information Technology Research Institute
Eric Bradford, managing director
JPHT 409
479-575-4261

Information Technology Research Institute website (http://itri.uark.edu/)

The Information Technology Research Institute is an interdisciplinary unit for research within the Sam M. Walton College of Business. The mission of the institute is to advance the state of research and practice in the development and use of information technology for enhancing the performance of individuals and organizations; provide a forum for multidisciplinary work on issues related to information technology; promote student interest in the study of information technology; and facilitate the exchange of information between the academic and business communities. The Information Technology Research Institute was established by a grant from the Walton Family Charitable Support Foundation.

Institute for Advanced Data Analytics
David Douglas, co-director
479-575-6114

Wanpracha Chaolvilithwongse, co-director
479-575-5857

Mark Arnold, co-director
479-575-3351

Stored data doubles every two to three years and without extracting actionable value from the data, it serves as only an expense. Data analytics are the key to extracting value from the data. The application of analytics is the key basis for competition driving innovation and
productivity growth. In response to the demand for this data ecosystem, a number of units on campus are conducting research related to data analytics and big data. The Institute for Advanced Data Analytics takes statistics and analytics to the next level, serving as the catalyst for big data research, innovation, and practice by partnering with organizations seeking solutions to their data problems. The institute's vision is to initiate and facilitate multidisciplinary collaborations among departments, colleges, and industry partners to help solve the emerging data and analytics research problems and implementation opportunities. Faculty and students at the institute work on these problems and opportunities.

Institute for Nanoscience and Engineering
Gregory Salamo, director
NANO 104
479-575-4187

Institute for Nanoscience and Engineering website (http://nano.uark.edu/)

The Institute for Nanoscience and Engineering is based in the Nanoscale Material Science and Engineering Building, opened in 2011 with the state-of-the-art equipment and clean rooms necessary for building materials one atom at a time. The institute provides an interdisciplinary team of researchers in the fields of physics, engineering, chemistry and biology whose mission, in part, is to develop businesses in Arkansas based on nanoscience and engineering.

Institute of Food Science and Engineering
Jean-Francois Meullenet, director
Food Science Building
2650 N. Young Ave., Fayetteville, AR 72704
479-575-4040

Institute of Food Science and Engineering website (http://www.uark.edu/depts/ifse/)

The Institute of Food Science and Engineering and its three technology centers grew from the commitment of the University of Arkansas Division of Agriculture to finding creative ways to bring its expertise and resources to bear on specific problems and issues that affect productivity and growth in the food processing industry, with the mission of strengthening that critical component of the agricultural sector and the entire economy.

The institute assists industry by fostering cooperative, multidisciplinary efforts that provide research to solve problems, technology transfer to put new information to work, and education in skills needed by specific industries. Alliances between the institute and private industry devise solutions to identified problems. This demand-driven approach assures a direct, positive impact on the value-added processing of food products.

The Center for Food Processing and Engineering’s primary objective is to facilitate research leading to value-added products and improving the efficiency and effectiveness of the processing of agricultural products. Activities of the Center for Food Safety and Quality seek to maintain or improve the safety of foods through production, harvest, processing, distribution, and storage. The main thrust of the Center for Human Nutrition is to develop new value-added functional foods with elevated levels of health-promoting compounds and ways to motivate people to include generous amounts of these foods in their daily diets. These efforts will assure food safety and improve the sensory and nutritional quality of food to meet the nutritional requirements and food preferences of a changing society.

The offices of the Institute of Food Science and Engineering are located in the Food Science Building at the Arkansas Agricultural Research and Extension Center.

International Center for the Study of Early Asian and Middle Eastern Musics
Rembrandt Wolpert, director
MUSC 201
479-575-4701
ceam@cavern.uark.edu

International Center for the Study of Early Asian and Middle Eastern Musics website (http://www.uark.edu/ua/eam/)

The International Center for the Study of Early Asian and Middle Eastern Musics, established in 2000, is a research center located in the Department of Music in the Fulbright College of Arts and Sciences.

The center coordinates the international Tang Music Project and is linked with the Ancient Asian Music Preservation Project of the Library of Congress, a partnership that includes internships at the Library as well as an acquisitions program. The center also functions as the base for graduate training in historical ethnomusicology and related fields, specifically tailored toward early documented repertoires of ritual- and art-music and present day performance practices in historically significant musical traditions of Asia and the Middle East. The recovery of early Asian musics and the design of music-centered algorithms and their implementation in computer programs are central aspects of the center’s research and teaching activities. The center works closely with both the Department of Music and the King Fahd Center for Middle East and Islamic Studies in sponsoring lectures, seminars, concerts, and workshops, and it collaborates in developing international ties to other institutions and in promoting student and performing-artist exchanges. For more information, contact Elizabeth Markham or Rembrandt Wolpert at 479-575-4702.

King Fahd Center for Middle East Studies
Todd Shields, interim director
MAIN 202
479-575-2175

King Fahd Center for Middle East Studies website (http://mest.uark.edu/)

The King Fahd Center for Middle East Studies is an academic and research unit in the Fulbright College of Arts and Sciences. It is an interdisciplinary and interdepartmental area studies center that offers diverse cultural, intellectual, and educational opportunities for the University of Arkansas community. Its functions include the promotion of research and teaching in interdisciplinary Middle East studies and global Islamic studies.

Through the King Fahd Middle East Studies Program, the center offers an undergraduate major in Middle East studies and supports graduate studies in Middle East-related departments and programs. Students of superior ability who are majoring in Middle East studies may apply for MEST scholarships to help fund their studies. The center also supports
summarizes the policies, strategies, and initiatives implemented to enhance the nation's economic growth, infrastructure improvements, which can increase competitive advantages without negatively affecting social and environmental outcomes. The center's vision is to be recognized as the nation's premier source for expertise on maritime and multimodal transportation research and education.

**Membrane Research Center**

Ranil Wickramasinghe  
Director  
Bell Engineering 3151  
swickram@uark.edu

The mission of the University of Arkansas Membrane Research Center is to promote educational and training opportunities in membrane science and technology especially for graduate students. Graduate students in the master's and doctoral programs will form the backbone of all research teams at the Membrane Research Center, and graduate students will conduct their thesis research through center projects.

A feature of the center's research projects is that every project will have at least one of the center's industrial sponsors as a project mentor.

The University of Arkansas Membrane Research Center will:

- Conduct fundamental and applied research in the field of membranes via innovative materials and processes to facilitate the use of membrane technology for current and emerging industrial applications.
- Help sustain U.S. technological leadership in membrane materials and membrane-based separation processes and accelerate commercialization by Center sponsors of novel, sustainable and innovative technologies.
- Provide undergraduate, graduate and postdoctoral researchers with a superior educational and research experience that will enable them to become productive and effective professionals in the membrane community.

An underlying emphasis in all of these efforts is the understanding that new membrane technologies will lead to enhanced sustainability in our technological operations.

**National Agricultural Law Center**

Harrison Pittman, director  
479-575-7640  
nataglaw@uark.edu

The National Agricultural Law Center serves as the nation's leading source of agricultural and food law research and information and is a unit of the University of Arkansas System Division of Agriculture. Created in 1987, the center fulfills its mission by conducting and sponsoring objective and authoritative agricultural and food law research and by providing bibliographic and other resources on agricultural and food law.

The center works closely with a diverse range of public and private sector stakeholders throughout Arkansas and the nation. The center is the only institution of its kind in the United States and has received national recognition. Publications and research assistance are available in print and through the website.
National Center for Reliable Electric Power Transmission

Alan Mantooth, executive director
2055 South Innovation Way
479-575-4838

National Center for Reliable Electric Power Transmission website (http://ncrept.uark.edu/)

The National Center for Reliable Electric Power Transmission in the College of Engineering is located in a new building at the Arkansas Research and Technology Park. The center seeks to research and develop prototypes of advanced power electronics systems for applications in the power grid, including both protection and storage devices.

The center also serves as a test facility for advanced power electronic circuit and package designs for distribution-level voltages and high currents. The center is a unique educational resource for students interested in working in the power utility and power electronics sectors.

Office for Studies on Aging

Michelle Gray and Barbara Shadden, co-directors
HPER 321X
479-575-5262
aging@uark.edu

Office for Studies on Aging website (http://coehp.uark.edu/osa/)

The Office for Studies on Aging in the College of Education and Health Professions was established in August 1999 to coordinate the resources of the university in addressing the needs of the aging population in Arkansas and beyond. The office was developed to be the center for research and study of the physical, social, and psychological aspects of the aging process drawing on a host of disciplines across campus. The office conducts research, provides services, and acts as an interface between the university and the variety of service modalities for the aging population. Initial efforts of the office are directed toward a variety of issues facing older Americans to provide meaningful solutions so that the process of aging is a positive experience, both emotionally and physically.

Office of Education Policy

Gary Ritter, director
201 Graduate Education Building
479-575-3773

www.officeforeducationpolicy.org (http://www.officeforeducationpolicy.org)

The Office of Education Policy serves as a resource to state lawmakers, educators, administrators, and other leaders, providing them with current national, state, and regional research in education to support them in thoughtful decision-making concerning K-12 education in the state of Arkansas. The Office of Education Policy strives to look at pressing issues through the lens of academic research, bridging the gap between research and practice.

Resiliency Center

Marty Matlock
Executive Director for the Resiliency Center
Vol Walker Hall, suite 120

mmatlock@uark.edu

The mission of the University of Arkansas Resiliency Center, established in 2018, is to inspire current generations to better understand the interconnectedness of economic, social, and environmental systems; to integrate this understanding into knowledge and technological innovation through interdisciplinary research; and to transform the systems upon which our prosperity depends, to make our region, state, and world more resilient and sustainable.

The goal of the center will be to expand understanding of the resilient elements of food, water and urban systems that support economic and social prosperity for Arkansas and the world. The center will focus on the challenge of food and water systems to support human prosperity across local to global scales, and community design to support human health and community resilience. The Resiliency Center will leverage existing global research leadership within the University of Arkansas by strategic partnerships with business and industry supply chains to create more responsive and implementable solutions to complex challenges at the interface of food, water, and logistics.

The center will serve as a focal point for investigating new ways to quantify complex local-to-global processes that govern food, water and urban systems. The Resiliency Center will achieve this goal by coordinating interdisciplinary education, research, and outreach in food, water, and urban systems, with a focus on solving local problems that have global applications.

Small Business and Technology Development Center

Larry Brian, director
RCED 210
479-575-5148

Small Business and Technology Development Center website (http://sbtdc.uark.edu/)

The Walton College Arkansas Small Business and Technology Development Center is part of a national network of more than 1,000 small business development centers that provide small business training seminars, as well as free market research and consulting services from three full-time business consultants to startup and existing small businesses. The Arkansas system also provides the services of a free innovation and technology consultant for the state. The Walton College center operates as a regional office of the Arkansas Small Business and Technology Development Center half funded by the United States Small Business Administration and the Walton College located in the Donald W. Reynolds Center for Enterprise Development.

The Arkansas system serves all of Arkansas through the University of Arkansas at Little Rock’s lead center and six regional offices located on college campuses throughout the state of Arkansas. Any for-profit small business intending to locate or currently located within the Walton College center’s service area may receive free assistance. This center serves the following counties: Benton, Boone, Carroll, Madison, Marion, Newton, Searcy, and Washington.

Supply Chain Management Research Center

John Kent, director
WJWH 544
Terrorism Research Center

David Fredrick, director

479-575-6107
ejkent@walton.uark.edu

Supply Chain Management Research Center website (http://scmr.uark.edu/)

The Supply Chain Management Research Center at the Sam M. Walton College of Business sponsors and promotes supply chain, logistics, and transportation research and education. Center faculty view the supply chain as the channel that integrates business processes from suppliers through end users, providing value-added products, services, and information. Supply chain management incorporates both inter- and intra-company logistics, transportation, and management systems.

The center undertakes research and training in all aspects of the supply chain. It has sponsored research on vendor-managed inventory, trained salespersons and developed systems for material requirements planning, and simulated supply chains for logistics executives. The center has a broad range of interests and capabilities and has close ties to and cooperative programs within the Walton College, such as the Center for Retail Excellence, the Information Technology Research Center and other centers at the university, such as the Logistics Institute in the College of Engineering. The Supply Chain Management Research Center is unique in that its capabilities span the technical and managerial arenas of supply chain management.

The center’s Board of Directors includes representatives of firms such as ABF Freight Systems, American Freightways, Colgate-Palmolive, Federal Express, J.B. Hunt Transport, Pillsbury, Sunbeam, Tyson Foods, Unilever HPC, and Wal-Mart. The Board of Directors, along with notable supply chain professionals from business and academia, meet annually to discuss the state of the art in supply chain management and to provide advice and direction for the center.

For additional information about the Supply Chain Management Research Center at the Sam M. Walton College of Business contact the center at 479-575-7334.

Terrorism Research Center

Jeffrey A. Gruenewald, director

MAIN 211
479-575-3205
Email: jgruenew@uark.edu

Terrorism Research Center Website (https://terrorismresearch.uark.edu/)

The Terrorism Research Center in the Fulbright College of Arts and Sciences houses the American Terrorism Study, a comprehensive database on American terrorism. The American Terrorism Study provides a record of federal terrorism cases resulting from indictment under an FBI “terrorism enterprise” investigation from 1980 to the present. The Terrorism Research Center is engaged in several projects examining the spatial and temporal dimensions of terrorism, precursor and preparatory terrorist crimes, and prosecutorial and defense strategies used in terrorism trials. The center’s research has been funded by the Department of Homeland Security through the National Consortium for the Study of Terrorism and Responses to Terrorism and the Department of Justice through the National Institute of Justice.

Tesseract Center for Immersive Environments and Game Design

David Fredrick, director

479-575-6107
jgruenew@uark.edu

Tesseract Center website (http://tesseract.uark.edu/)

The core mission of the Tesseract Center is to create immersive, real-time visualization environments and serious games for instruction and research. The center will be fundamentally interdisciplinary, with collaborative projects and affiliated faculty from colleges across the University of Arkansas campus. The center provides the infrastructure to develop and support new academic endeavors including new academic and outreach programs, as well as an engine for innovation, entrepreneurship, and economic development through the creation of intellectual property and the fostering of connections with industry and corporations.

Tyson Center for Faith and Spirituality in the Workplace

WJWH 518
479-575-3721
jan002@uark.edu

Tyson Center for Faith and Spirituality in the Workplace website (http://tfsw.uark.edu/)

The Tyson Center for Faith and Spirituality in the Workplace in the Sam M. Walton College of Business was established in 2009 with a grant from Tyson Foods Inc. and the Tyson Family Foundation. The Tyson Center works toward an increased understanding of faith-friendly organizational practices — those that are respectful and appreciative of the importance of employees’ faith-based, spiritual, and/or religious identities (including non-religious, agnostic, and atheist identities). The center accomplishes its mission through coursework, immersive experiences, research support, and corporate outreach.

Glossary

Academic Dismissal. An academic status (http://catalog.uark.edu/undergraduatecatalog/academicregulations/academicprobationsuspensionanddismissal/) resulting from unsatisfactory grades in which students are not permitted to enroll at the university until approved through an appeal process.

Academic Probation. An academic status (p. 81) resulting from unsatisfactory grades.

Academic Suspension. An academic status (p. 81) for unsatisfactory grades in which students are not permitted to register for courses for a specified time period.

Act 1052/467. Section 21 of Arkansas Act 467 of 1989 specifies that all first-time entering freshmen who are enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or developmental courses in English composition, reading, and mathematics on the basis of their scores on specified tests. Find out more in the Registration (p. 67) section of the catalog.

Activity Course. Course devoted to participation in, knowledge of, or performance of some form of physical activity.

Add. See Drop/Add below.

Advance Registration. A period of time scheduled during a regular (fall or spring) semester that allows currently enrolled students to register.
for the next regular semester. In addition, advance registration for the summer sessions is scheduled during the spring semester.

**Applied Instruction.** A course that integrates both the teaching and hands-on application of knowledge or information; attends to the practical and utilitarian function of the subject (distinguished from theoretical). Examples may include: livestock judging team, music and art courses, cooperative education, and experiential learning.

**Apprenticeship/Externship.** Experiential learning opportunity to give students practical exposure and training in a career field. This is generally off-campus, supervised, and designed to prepare students for the transition from school to career.

**Area Studies.** Interdisciplinary study of geographical or cultural areas. Topics include the history, geography, politics, culture, language, and literature of the area. Generally, an area study is a minor or a second major. Examples of area studies include African and African American studies, Latin American and Latino studies, and Middle East studies.

**Audit.** To take a course without credit.

**Adviser.** A faculty or staff member assigned to a student to advise that student on academic matters that include degree requirements and selection of courses.

**Certification/Licensure Requirements.** The set of course, hour, and other academic requirements that must be completed to receive certification/licensure such as certification to teach in the public schools.

**Class Schedule.** List of courses and sections for a specific semester, including names of instructors; day, hour, and place of class meetings; and detailed registration procedures. The class schedule is available online.

**Clinical Rotation/Instruction.** Course that takes place in a clinical setting, including practice labs, hospitals, and other agencies; students apply methods and principles of a clinical discipline.

**College or School.** One of ten major divisions within the university that offers specialized curricula.

**Combined Major.** A combination of subsets of two primary discipline specific requirements (each of which is typically 15 to 24 hours and less than the number required for a major) which together constitute the major in a program of study leading to one bachelor’s degree with a combined major in two disciplines. For example, a Bachelor of Arts degree with a combined major in English and journalism.

**Concentration.** A subset of requirements within the discipline-specific (field of study or major) requirements in a program of study leading to a graduate or bachelor’s degree. Examples are the Doctor of Philosophy degree with physics as the field of study and a concentration in neuroscience or a Bachelor of Music degree with a major in music and a concentration in jazz studies. Concentrations will print on the transcript.

**Consent.** A prerequisite that requires the student to obtain approval from the instructor or the department before he or she will be allowed to register for the course.

**Core.** Core is a set of required coursework specified for students at the college/school, department, or program/area level. Core is what is required for all students at that level or in that program. Hours will vary depending upon the major. Core and major requirements are usually stated in terms of specific courses or lists of courses from which any course chosen will meet the requirement. The “list” may actually be a defined set such as lower-level courses or upper-level courses; courses in the department, in the program, or in the college; or courses identified by one or more course, program, or department codes.

Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements.

**Corequisite.** A course that must be taken at the same time as the course described.

**Correspondence.** See Self-Paced (Correspondence) below.

**Course.** A unit of academic instruction.

**Course Deficiencies.** Lacking required units of study in high school. Find out more in the Placement and Proficiency portion (p. 58) of the Enrollment Services section of the catalog.

**Course Load.** The number of semester credit hours a student may schedule in a given term.

**Credit Hour.** See Academic Policy 1200.40 (https://provost.uark.edu/policies/120040.php) for university’s credit hour definition.

**Cumulative Grade-Point Average.** An average computed by dividing the total number of grade points earned by the total number of credit hours attempted in all courses for which grades (rather than marks) are given.

**Curriculum.** A program of courses comprising the formal requirements for a degree in a particular field of study.

**Degree Program.** The program of study defined by sets of academic requirements that lead to a degree that the university is authorized to offer. Undergraduate degree requirements are typically stated in terms of numbers of credit hours and specific courses at university, college/school, and discipline levels. Graduate degree requirements are typically stated in terms of numbers of credit hours and specific courses at discipline levels. Examples are a Bachelor of Science degree program, which typically has a minimum of 120 hours; a Master of Arts degree program, which typically has a minimum of 30 hours; and a Doctor of Philosophy degree program, which typically has a minimum of 60 hours although hours vary.

**Department.** Division of faculty or instruction within a college, such as Department of Accounting within the Sam M. Walton College of Business.

**Dependent Major.** See Second Major below.

**Dissertation/Thesis Research.** Research conducted and submitted in support of candidacy for a degree or professional qualification; a formal treatise presenting the results of study submitted in partial fulfillment of the requirements of an advanced degree; process requires intensive interaction between student and professor.

**Double Degree Program.** A program of study that includes one set of university requirements and two sets of college or school and primary discipline-specific requirements and leads to two different bachelor’s degrees with two different majors. Such a program could, for example, lead to a Bachelor of Science degree with a major in chemistry and a Bachelor of Science in Chemical Engineering degree. Such programs are comparatively rare, and hours required to complete them vary, depending upon overlap in requirements.
Double Major. The two complete sets of primary discipline-specific requirements (typically consisting of a minimum of 30 hours each) constituting the two majors within a program of study leading to one bachelor’s degree with two complete majors. For example, a Bachelor of Arts degree with a double major in Spanish and French.

Drill. Supplemental instruction or practice using repetition or discussion.

Drop/Add. Dropping or adding of select courses while still remaining enrolled in the university. This can only be done during specified times as published in the academic calendar (http://registrar.uark.edu/academic-dates/academic-semester-calendar/). See also Withdrawal below.

Eight-Semester Degree Completion Program. Most majors offered by the University of Arkansas can be completed in eight semesters, and the university provides plans that show students which classes to take each semester in order to finish in eight semesters. A few undergraduate majors either require a summer internship or fieldwork or are five-year professional programs, and may therefore not qualify for the eight-semester degree completion program.

Elective. Elective courses may involve a greater or lesser degree of student choice. A general elective course could be one that is needed to complete the number of hours required for the degree when no other requirements remain to be met. A free elective course may be one that is not needed to complete either course requirements or hour requirements.

Equivalent. A course allowed in place of a similar course in the same academic discipline. May require approval by an academic dean.

Externship. See Apprenticeship/Externship above.

Fees. Charges, additional to tuition, that cover specific university services, programs, facilities, activities and/or events. Find out more in the undergraduate Fee and Cost Estimates (p. 70) section or the graduate Fee and Cost Estimates (p. 1637) section.

Field of Study. The primary discipline-specific (or multidisciplinary or interdisciplinary) set of requirements in a graduate program of study. The field of study typically consists of a minimum of 30 hours at the master’s degree level, of 30 hours beyond the master’s degree at the educational specialist level, and of 66 hours for the doctor of education degree. Field of study hour requirements vary more widely for the doctor of philosophy degree, but 60 hours is typical. For example, a Master of Arts degree in history, a Master of Arts in Teaching degree in teacher education, an Education Specialist degree in curriculum and instruction, a Doctor of Education degree in higher education, a Doctor of Philosophy degree in business administration.

Field Studies. Hands-on study undertaken outside the laboratory or place of learning, usually in a natural environment or among the general public. Examples may include archeological and geological field studies.

Focused Studies. A set of courses that a student may elect to take as part of the major requirements that provides focus in a particular area related to the major. Completing a focused study is not required for the major, but serves as a guide for students who want to further specialize their studies. Focused studies do not need ADHE approval and do not appear on the transcript.

Grade Points. Points per semester hour assigned to a grade (not a mark), indicating numerical value of the grade. The grade-point average indicates overall performance and is computed by dividing the total number of grade points earned by the number of semester hours attempted.

Grade Sanction(s). A penalty for academic dishonesty. Grade sanctions may consist of either a grade of zero or a failing grade on part or all of a submitted assignment or examination or the lowering of a course grade, or a failing grade of XF to denote failure by academic dishonesty.

Hazing. Any activity that is required of an individual that may cause mental or physical stress and/or embarrassment when in the process of joining or belonging to any organization.

Independent Study. Project collaboratively designed by the instructor and student to pursue an area of study not covered by the established curriculum; typically completed without class attendance but through formal supervision by an instructor.

Internship. A formal program that provides practical experience in an occupation or profession; applied, monitored, and supervised, field-based learning experience for which the student may or may not be paid; may include field work/experience, supervised courses, student teaching, and cooperative education; provides opportunities for students to gain experience in a career field.

Intersession. A two-week mini-session that is held at the beginning of the regular fall, spring, and summer terms. Coursework during an intersession is very concentrated and intensive. Intersession classes are not available to new freshmen.

Laboratory. Course meeting in a defined physical setting for the hands-on application of methods and principles of a discipline; credit-bearing section which requires a registration separate from the lecture component of the course.

Lecture. A class session in which an instructor speaks on a specific topic.

Lecture/laboratory. Lecture course which integrates a lab component as part of the same course registration.

Major. The primary discipline-specific (or multidisciplinary or interdisciplinary) set of requirements in an undergraduate program of study. The major typically consists of a minimum of 30 hours and identifies by name a specific degree area. For example, a Bachelor of Arts degree with a major in English or a Bachelor of Science in Business Administration degree with a major in accounting.

Minor. The lesser set of discipline-specific (or multidisciplinary or interdisciplinary) requirements in an undergraduate program of study. The minor typically consists of a minimum of 15 hours or more in a designated discipline.

Noncredit Course. A course for which no credit is given. (Some credit courses will not count toward degrees.)

Overload. A course load of more semester hours than a student is normally permitted to schedule in a given period.

Practicum. Involves supervised activities emphasizing practical application of theory, especially one in which a student gains exposure to a field of study; generally required as part of the program curriculum.

Pre-Professional Requirements. The set of course, hour, and other academic requirements that must be completed before entry into a school, a program of study, or an advanced level of a program of study, either at the U of A or at another institution.
Prerequisite. A course or requirement that must be completed before the 
term when the described course is taken.

Private Study. Involves individual instruction with regular meetings; one-
to-one demonstration, performance critique, music, fine arts or performing 
arts are examples.

Readings. A course where the instructor assigns readings and facilitates 
discussion at regular class meetings.

Registration. Enrollment at the beginning or prior to the beginning of a 
semester, including selection of classes and payment of fees and tuition.

Research. Research conducted that is independent of that done for a 
dissertation or thesis.

Sanction(s). The penalty for noncompliance to a policy. Usually a 
response that will redirect the individual or group’s inappropriate behavior, 
encourage responsible judgment and ethical reasoning, protect the 
community’s property and rights, and affirm the integrity of the institution’s 
conduct standards.

Section. A division of a course for instruction. A course may be taught 
in one or more sections or classes or at different times, depending on 
enrollment in the course.

Second/Dependent Major. A second complete set of primary 
discipline-specific requirements in a discipline in which only a second 
or dependent major may be earned. A second major must be earned in 
a degree program in which the first major is one authorized to be given 
independently. Typically, a minimum of 30 hours is earned in each major 
area or discipline. Examples of second major areas are African and 
African American studies, Middle East studies, and Latin American and 
Latino Studies. An example of a degree with a second major is a Bachelor 
of Arts degree with a major in political science and a second major in 
Middle East studies. The second major is always listed second on the 
transcript.

Self-Paced (Correspondence). Course in which instruction is web-based 
and students are physically separated from the instructor. Interaction 
between instructor and student is not regular or substantive, and is 
primarily initiated by the student. These courses are self-paced and are 
not distance education. Students are not required to be admitted to the 
University of Arkansas to take a self-paced course.

Semester Credit Hour. Unit of measure of college work. One semester 
credit hour is normally equivalent to one hour of class work or from two to 
six hours of laboratory work per week for a semester.

Seminar. Involves a small group of students engaged in advanced study 
and original research under a member of the faculty and meeting regularly 
to exchange information and hold discussions; highly focused and topical 
course; may include student presentations and discussions of reports 
based on literature, practices, problems, or research.

Special Problems. Individualized investigation of topics or case studies 
in a specific field under the supervision of an instructor for the purpose of 
enhancing or illuminating the regular curriculum.

Special Topics. An organized course devoted to a particular issue in a 
specific field; course content is not necessarily included in the regular 
curriculum for the major.

State Minimum Core. See University Core below.

Student Number. A number given to each student as a permanent 
identification number for use at the university.

Studio Course. Involves the application of design and theory in a defined 
physical setting; students explore and experiment under the guidance of 
an instructor.

Summer Sessions. Periods of time during the summer when course work 
is offered. (Go to the Academic Calendar (p. 14) for specific times and 
dates.)

Syllabus. An outline or summary of the main points of a course of study, 
lecture, or text.

Telecommunications. Course that utilizes technology in conveying 
teaching material. This only includes courses that use technology as 
the primary delivery method of course content, not courses that simply 
use technology to support another delivery method. These are distant 
education courses that generally: Uses one or more of the following 
technologies to deliver instruction to students who are separated from 
the instructor and to support regular and substantive interaction between 
the students and the instructor, synchronously or asynchronously. The 
technologies used may include:

• The Internet;
• One-way and two-way transmissions through open broadcast, closed 
circuit, cable, microwave, broadband lines, fiber optics, satellite, or 
wireless communications devices;
• Audio-conferencing, etc.; or
• Videocassettes, DVDs, and CD-Roms, if the videocassettes, DVDs, or 
CD-Roms are used in conjunction with any of the technologies listed 
in the first three options

Track. A subdivision of a concentration that a student must select and 
fulfill to complete the requirements of the concentration. Examples are the 
portfolio and thesis tracks within the specialist concentration in the Master 
of Arts in English degree. Tracks will print on the transcript.

Transcript. A complete record of the student’s enrollment and academic 
history at the University of Arkansas, including all undergraduate, 
graduate, and law courses.

Tuition. The charge for university enrollment and registration, calculated 
per credit hour each semester. Tuition rates may vary depending on 
a student’s resident status, undergraduate or graduate standing, and 
college affiliation. Tuition does not include cost of room and board. 
Additional charges will apply depending on student status. See the entry 
for Fees above.

UAConnect (https://uaconnect.uark.edu/). The online database that 
maintains student, faculty and staff records and class schedules.

Undeclared Major. Designation indicating students who have not 
selected a major.

Undergraduate Study. Work taken toward earning an associate or a 
baccalaureate degree.

University Core. The state of Arkansas specifies a number of core 
courses that students must successfully pass to obtain a degree. These 
are also sometimes referred to as the State Minimum Core. Find out 
more in the Requirements for Graduation (p. 100) and University Core
Withdrawal. Official withdrawal (http://registrar.uark.edu/registration/withdrawal.php) from all courses during a semester at the university.

1 In establishing the official count of degrees awarded by the U of A, the Arkansas Department of Higher Education will count only one degree (major) for each student who completes a degree with double or combined majors. U of A staff may note in which major the degree is counted. Two degrees are counted only if the student completes two separate degree programs, a Master of Arts and a Master of Science, for instance.
Undergraduate Catalog

This catalog of studies is a comprehensive reference for your years of study – a list of degrees and courses offered at the University of Arkansas. In addition, it gives you valuable information such as suggested and required degree plans and information about costs, scholarships and financial assistance, and campus resources. Read it with pleasure and with care.

Take every opportunity to consult your academic adviser to ensure that you are taking advantage of courses and university resources that will help you reach your educational and career goals and graduate on time. If you are not sure where to find your academic adviser, contact the dean’s office of your college; the phone numbers are listed under Contact Information (p. 45). If you exploring majors and undecided yet, contact the advising office in the Fulbright College of Arts and Sciences at 479-575-3307.

Remember, the University of Arkansas is committed to your success. The faculty and staff are here to support you as you work to achieve your goals. Ask for help and advice whenever you need it.

The University of Arkansas is committed to the policy of providing educational opportunities to all qualified students regardless of their economic or social status and will not discriminate on the basis of race, color, sex, creed, sexual orientation, disability, veteran’s status, age, marital or parental status, or national origin.

For More Information

See the University of Arkansas Directory (http://directory.uark.edu/) for a more comprehensive directory of offices and personnel.

Undergraduate Programs of Study

The academic units of the University of Arkansas include the following colleges, schools and military departments:
• The Dale Bumpers College of Agricultural, Food and Life Sciences (p. 130), which includes the School of Human Environmental Sciences (p. 204)
• The Fay Jones School of Architecture and Design (p. 231)
• The Fulbright College of Arts and Sciences (p. 271), which includes the School of Art (p. 302), the School of Journalism and Strategic Media (p. 446), and the School of Social Work (p. 552)
• The Sam M. Walton College of Business (p. 589)
• The College of Education and Health Professions (p. 675), which includes the Eleanor Mann School of Nursing (p. 713)
• The College of Engineering (p. 781)
• Graduate School (p. 1227), which includes the Graduate School of Business (p. 1573)
• School of Law (p. 835)
• Honors College (p. 107)
• Global Campus (http://globalcampus.uark.edu/)
• Departments of Army ROTC (p. 868) and Air Force ROTC (p. 867)

The Global Campus serves as a portal for online, distance and professional education programs and courses provided by the University of Arkansas. Experienced staff members collaborate with the university’s academic colleges and schools and other academic units to develop and facilitate quality, cutting-edge courses and programs.

The School of Law and the Graduate School offer professional and graduate degrees. See the Graduate Catalog and the Law School Catalog for more information.

Accreditations

The University of Arkansas, Fayetteville, is accredited by the Higher Learning Commission.

Some colleges and programs are also accredited by other agencies, associations, or professional organizations, including those listed below.

Dale Bumpers College of Agricultural, Food and Life Sciences

The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.) degree programs are accredited by the Council for Professional Development of the American Association of Family and Consumer Sciences. The degree program in dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. The Jean Tyson Child Development Study Center is accredited by the National Association for the Education of Young Children (NAEYC). The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) in food science is accredited by the Institute of Food Technologists. Teacher education programs in agriculture and family and consumer sciences are coordinated with educational programs in the College of Education and Health Professions and are accredited by the National Council for Accreditation of Teacher Education (NCATE).

Fay Jones School of Architecture and Design

The Bachelor of Architecture (B.Arch.) program is accredited by the National Architectural Accreditation Board, and the Bachelor of Landscape Architecture (B.L.A.) program is accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects. The Bachelor of Interior Design (B.I.D.) degree is accredited by the Council for Interior Design Accreditation (CIDA).

Fulbright College of Arts and Sciences

The Bachelor of Science (B.S.) degree program in chemistry is accredited by the American Chemical Society. The American Council on Education in Journalism and Mass Communications has accredited the Bachelor of Arts (B.A.) degree program in journalism. The Bachelor of Arts (B.A.), Bachelor of Music (B.M.), and Master of Music (M.M.) degree programs in the Department of Music are accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in clinical psychology is accredited by the American Psychological Association. The Bachelor of Social Work (B.S.W.) and the Master of Social Work (M.S.W.) degree programs are accredited by the Council of Social Work Education.

Sam M. Walton College of Business

The Sam M. Walton College of Business offers degree programs for undergraduate students and for graduate students at both the master’s and doctoral levels and has been a member of and accredited by AACSB International, the Association to Advance Collegiate Schools of Business, since 1931. The accounting program was separately accredited in 1986 at both the bachelor’s and master’s levels. The master’s in business administration program was approved in 1963. Accreditation by AACSB and membership in that organization signifies the college’s commitment to AACSB goals of promoting and achieving the highest standards of business education.

College of Education and Health Professions

The teacher education programs in the College of Education and Health Professions are accredited by the National Council for Accreditation of Teacher Education. The M.A.T. program in childhood education is in compliance with the standards of the National Association for the Education of Young Children. The various M.A.T. licensure programs in secondary education are in compliance with the standards of the specialty organizations including National Council of Teachers of English, National Council of Teachers of Mathematics, National Science Teachers Association, and National Council for the Social Studies. The Master of Science degree program in speech pathology-audiology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, but is currently on probationary status. See Graduate Catalog (p. 1294) for more information. The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the National League for Nursing Accrediting Commission (61 Broadway Street, New York, NY 10006, 212-363-5555, Ext. 153) and is approved by the Arkansas State Board of Nursing. The Bachelor of Science in Education (B.S.E.) degree program in health science, kinesiology, recreation, and dance is accredited by the Council on Accreditation of the National Recreation and Park Association. The Master of Science degree in rehabilitation counseling is accredited by the Council on Rehabilitation Education.

College of Engineering

The College of Engineering offers the following programs accredited by the Engineering Accreditation Commission of ABET (visit http://www.abet.org for more information): Bachelor of Science in Biological Engineering (B.S.B.E.), Bachelor of Science in Chemical Engineering (B.S.Ch.E.), Bachelor of Science in Civil Engineering (B.S.C.E.), Bachelor of Science in Computer Engineering (B.S.Comp.E.), Bachelor of Science in Electrical Engineering (B.S.E.E.), Bachelor of Science in Industrial Engineering (B.S.I.E.), Bachelor of Science in Mechanical Engineering (B.S.M.E.), Master of Science in Environmental Engineering (M.S.En.E.), and Master of Science in Biomedical Engineering (M.S.B.M.E.)
The College of Engineering offers a Bachelor of Science in Computer Science (B.S.) that is accredited by the Computing Accreditation Commission of ABET (visit http://www.abet.org for more information).

**School of Law**
The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.

**Certificate Programs**
- Brewing Science (p. 191)
- Child Advocacy Studies Training (p. 552)
- Geospatial Technologies (p. 416)
- Poultry Science (p. 202)

Following is a list of major programs of undergraduate study – grouped by college and school – offered at the University of Arkansas, followed by a list of minors and certificates offered by each college and school.

**Majors**

**Dale Bumpers College of Agricultural, Food and Life Sciences**
- Agricultural Business (p. 138)
- Agricultural Education, Communication and Technology (p. 147)
- Animal Science (p. 158)
- Crop Science (p. 170)
- Environmental, Soil, and Water Science (p. 180)
- Food Science (p. 185)
- Horticulture, Landscape and Turf Sciences (p. 193)
- Poultry Science (p. 199)

**School of Human Environmental Sciences**
- Apparel Merchandising and Product Development (p. 212)
- Birth Through Kindergarten (p. 215)
- Food, Nutrition and Health (p. 218)
- Hospitality Management (p. 221)
- Human Development and Family Sciences (p. 223)
- Human Nutrition and Dietetics (p. 227)

**Fay Jones School of Architecture and Design**
- Architecture (p. 244)
- Architectural Studies (p. 237)
- Interior Design (p. 252)
- Landscape Architecture (p. 262)
- Landscape Architectural Studies (p. 256)

**Fulbright College of Arts and Sciences**
- Advertising and Public Relations (p. 285)
- Anthropology (p. 296)
- Art (Studio Art) (p. 302)
- Art History (p. 302)
- Biology (p. 323)
- Chemistry (p. 334)
- Classical Studies (p. 348)
- Communication (p. 351)
- Criminology (p. 357)
- Data Science (p. 109)
- Earth Science (p. 380)

**School of Law**
The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.

**Certificate Programs**
- Brewing Science (p. 191)
- Child Advocacy Studies Training (p. 552)
- Geospatial Technologies (p. 416)
- Poultry Science (p. 202)

Following is a list of major programs of undergraduate study – grouped by college and school – offered at the University of Arkansas, followed by a list of minors and certificates offered by each college and school.

**Majors**

**Dale Bumpers College of Agricultural, Food and Life Sciences**
- Agricultural Business (p. 138)
- Agricultural Education, Communication and Technology (p. 147)
- Animal Science (p. 158)
- Crop Science (p. 170)
- Environmental, Soil, and Water Science (p. 180)
- Food Science (p. 185)
- Horticulture, Landscape and Turf Sciences (p. 193)
- Poultry Science (p. 199)

**School of Human Environmental Sciences**
- Apparel Merchandising and Product Development (p. 212)
- Birth Through Kindergarten (p. 215)
- Food, Nutrition and Health (p. 218)
- Hospitality Management (p. 221)
- Human Development and Family Sciences (p. 223)
- Human Nutrition and Dietetics (p. 227)

**Fay Jones School of Architecture and Design**
- Architecture (p. 244)
- Architectural Studies (p. 237)
- Interior Design (p. 252)
- Landscape Architecture (p. 262)
- Landscape Architectural Studies (p. 256)

**Fulbright College of Arts and Sciences**
- Advertising and Public Relations (p. 285)
- Anthropology (p. 296)
- Art (Studio Art) (p. 302)
- Art History (p. 302)
- Biology (p. 323)
- Chemistry (p. 334)
- Classical Studies (p. 348)
- Communication (p. 351)
- Criminology (p. 357)
- Data Science (p. 109)
- Earth Science (p. 380)

**Economics (p. 386) (Bachelor of Arts)**
- English (p. 392)
- French (p. 572)
- Geography (p. 405)
- Geology (p. 412)
- German (p. 572)
- Graphic Design (p. 302)
- History (p. 424)
- Interdisciplinary Studies (p. 437)
- International and Global Studies (p. 438)
- Journalism (p. 446)
- Mathematics (p. 463)
- Music (p. 478)
- Philosophy (p. 514)
- Physics (p. 517)
- Political Science (p. 537)
- Psychology (p. 547)
- Social Work (p. 552)
- Sociology (p. 559)
- Spanish (p. 572)
- Theatre (p. 565)

**Second (or dependent) Majors**

A second (or dependent) major may be earned in a degree program when a student already is pursuing a first major that is authorized to be given independently.

- African and African American Studies (p. 292)
- Asian Studies (p. 322)
- Latin American and Latino Studies (p. 461)
- Middle East Studies (p. 476)

**Sam M. Walton College of Business**
- Accounting (p. 608)
- Business, General (p. 656)
- Business, International (p. 597)
- Data Science (p. 109)
- Economics (p. 632)
- Finance (p. 638)
- Information Systems (p. 650)
- Management (p. 656)
- Marketing (p. 662)
- Retail (p. 662)
- Supply Chain Management (p. 668)

**College of Education and Health Professions**
- Career and Technical Education (p. 681)
- Childhood Education (p. 689)
- Communication Sciences and Disorders (p. 702)
- Educational Studies (p. 710)
- Elementary Education (p. 727)
- English Education (p. 733)
- Exercise Science (p. 738)
- French Education (p. 740)
- German Education (p. 745)
- Human Resource and Workforce Development Education (p. 750)
- Nursing (p. 713)
- Public Health (p. 753)
- Recreation and Sport Management (p. 757)
- Social Studies Education (p. 764)
Spanish Education (p. 769)
Special Education (p. 774)
Teaching K-12 Physical Education and Health (p. 777)

College of Engineering

Biological Engineering (p. 787)
Biomedical Engineering (p. 793)
Chemical Engineering (p. 829)
Civil Engineering (p. 797)
Computer Engineering (p. 802)
Computer Science (p. 802)
Data Science (p. 109)
Electrical Engineering (p. 809)
Industrial Engineering (p. 816)
Mechanical Engineering (p. 822)

Undeclared Major

Degree-seeking students who are undecided about their choice of a major field of study should enroll in the college or school that best reflects their current academic interest. Advisors in each academic unit can provide guidance to students who are undecided about their choice of a major field of study. Each college has its own rules concerning the point at which a student must declare a major.

Dale Bumpers College of Agriculture and Food Life Sciences (AFLS) – Undergraduate students are expected to officially declare a major prior to earning 30 college credit hours. Advisors in each academic unit can provide guidance regarding majors and career opportunities to students with undeclared status and transfer students who have not declared a major. An administrative advising hold, to be released after meeting with an academic advisor, will be placed on undeclared students’ records each term until a major has been declared to encourage thoughtful consideration and selection of majors.

Fayette Jones School of Architecture and Design (ARCH) – Undergraduate students must elect one of the three academic departments upon acceptance into the School. Undeclared status is not an option.

Fulbright College of Arts and Sciences (ARSC) – Undergraduate students are expected to officially declare a major prior to earning 30 college credit hours. The Fulbright College Advising Center will provide enhanced advising services specific to exploratory students regarding major and career decisions. An administrative advising hold, to be released after meeting with an academic advisor, will be placed on undeclared students’ records each term until a major has been declared to encourage thoughtful consideration and selection of majors.

College of Education and Health Professions (COEHP) – Undergraduate students are admitted into pre-majors in selected fields, including Communication Disorders (PCDIS), Nursing (PNURS), Elementary Education (PELED), and Human Resource Development (PHRWD). Students must apply to the majors associated with their pre-major in certain semesters, and should work with their advisors to determine the most appropriate time to make this application. Students are admitted directly to programs in Recreation and Sport Management, Educational Studies, Kinesiology, and Public Health. Students may also be admitted to the College as an undeclared student and should work with an academic advisor to declare a major or pre-major prior to earning 30 credit hours.

College of Engineering (ENGR) – All undergraduate engineering students are classified as pre-engineering students until they have successfully completed the two semester freshman engineering sequence and achieved a C or better in MATH 2554, Calculus 1.

Walton College of Business (WCOB) – Students pursuing a degree in Walton College are classified as pre-business until all core-business requirements are fulfilled.

Minors

Each college and school of the University of Arkansas can determine whether to offer minors within their respective departments and whether to allow a student to pursue a minor in another college or school. Most, but not all, minors are offered in fields in which a major is also offered. Students should check with academic advisers in their college or school to determine the eligibility and requirements of a minor. They are listed below.

Interdisciplinary

Nanotechnology (p. 128) (administered by the Provost’s Office)
Sustainability (p. 269) (administered by the Fay Jones School of Architecture and Design)
Urban and Regional Planning (p. 130) (administered by the departments of Landscape Architecture and Political Science)

Dale Bumpers College of Agricultural, Food and Life Sciences

Agricultural Business (p. 138)
Agricultural Communications (p. 147)
Agricultural Education (p. 147)
Agricultural Leadership (p. 156)
Agricultural Systems Technology Management (p. 147)
Animal Science (p. 158)
Child Services (p. 217)
Crop Biotechnology (p. 170)
Crop Science (p. 170)
Entomology (p. 178)
Equine Science (p. 158)
Event Management (p. 221)
Food Science (p. 185)
Horticulture (p. 193)
Hospitality Management (p. 221)
Human Development and Family Sciences (p. 223)
Human Nutrition (p. 218)
International Economic Development (p. 145)
Landscape Horticulture (p. 193)
Natural Resources Management (p. 182)
Pest Management (p. 199)
Plant Pathology (p. 178)
Poultry Science (p. 199)
Soil Science (p. 183)
Turf Management (p. 193)
Minors offered by any other UA college or school

Fay Jones School of Architecture and Design

History of Architecture and Design (p. 244)
Interior Design (p. 255) (available only to students in the School of Architecture and Design)
Planting Design (p. 256) (for Horticulture majors)
Sustainability (p. 269) (for all university majors)
Minors offered by any other UA college or school

**Fulbright College of Arts and Sciences**
- African and African American Studies (p. 292)
- Anthropology (p. 296)
- Arabic (p. 572)
- Art History (p. 302)

- Sociology (p. 559)
- Southern Studies (p. 564)
- Spanish (p. 572)
- Statistics (p. 463)
- Substance Abuse Disorders (p. 556)
- Theatre (p. 565)

**Sam M. Walton College of Business**
- Accounting (p. 608)
- Banking/Financial Management/Investment (p. 638) (available only to students in the Sam M. Walton College of Business)
- Behavioral Economics (p. 632)
- Blockchain Enterprise Systems (p. 612)
- Business Analytics (p. 650)
- Business Economics (p. 632)
- Business minor (p. 674) for non-business students
- Enterprise Resource Planning (p. 671)
- Finance (p. 638)

Financial Economics (p. 671) (available only to students in the Sam M. Walton College of Business)
- Information Systems (p. 650)
- Insurance/Real Estate (p. 638) (available only to students in the Sam M. Walton College of Business)
- International Business (p. 597)
- Management (p. 656)
- Marketing (p. 662)
- Nonprofit Studies (p. 671) (available only to students in the Sam M. Walton College of Business)
- Retail (p. 662)
- Supply Chain Management (p. 668)

Minors offered by the J. William Fulbright College of Arts and Sciences

**College of Education and Health Professions**
- UAteach (p. 780)

**College of Engineering**
- Computer Science (p. 805)
- Data Analytics (p. 809)

**Certificate Programs**

**Dale Bumpers College of Agricultural, Food and Life Sciences**
- Poultry Science (p. 202)

**Fulbright College of Arts and Sciences**
- Child Advocacy Studies Training (p. 552)
- Geospatial Technologies (p. 416)

- Bachelor of Arts/Juris Doctor (p. 835) (3/3 Program)
- Bachelor of Arts/Master of Arts (p. 1407) in Journalism (five-year program)
- Bachelor of Science/Juris Doctor (p. 835) (3/3 Program)
- Bachelor of Science/Medical Doctor (p. 274)
- Bachelor of Science/Doctor of DS (p. 274)
- Bachelor of Science in Education/Master of Arts in Teaching
- Juris Doctor/Master of Arts (p. 835) in Political Science
- Juris Doctor/Master of Business Administration (p. 835)
- Juris Doctor/Master of Public Administration (p. 835)
- Juris Doctor/Master of Public Service (in conjunction with the Clinton School of Public Service)
- Juris Doctor/Master of Social Work (p. 835)
- Master of Laws/Master of Science (p. 838) in Agricultural Economics
  - Honors Studies
  - Reserve Officers' Training Corps
  - Cooperative Education
  - Study Abroad
  - Graduate, Law, Pre-Law and other Pre-Professional Programs

**Honors Studies**

Interested students should write to the Director of Honors Program in the appropriate college.
The honors program in the Dale Bumpers College of Agricultural, Food and Life Sciences provides students with opportunities for intellectual enrichment beyond the traditional undergraduate experience. This is accomplished through honors courses, completion of an undergraduate capstone honors project or thesis, and other significant activities including interactions with students in honors programs in other colleges. The results of the student’s original research or creative project may be published in Discovery, the undergraduate research journal of the Bumpers College, or Inquiry, the university-wide journal of undergraduate research and creative activity. In support of these efforts, participants in the Honors Program are eligible to receive an honors stipend in support of their research projects. The transcript and diploma of each honors graduate will designate the student as an honors graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia and have the title of their honors thesis and their mentors’ names listed in the graduation program. Students must maintain a cumulative grade-point average of 3.50 and subscribe to the Statement of Ethical Standards to remain in the program. For additional information, see the Bumpers College (p. 130) section of this catalog.

The Fay Jones School of Architecture and Design provides opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education by participating in the School’s honors programs. For additional information, please see the Fay Jones School of Architecture and Design (p. 231) section of this catalog.

To create an intellectual environment that will challenge the best of students, the Fulbright College of Arts and Sciences provides a comprehensive program of honor studies. From the first year to the senior year, an honors student is provided the opportunity to study with other superior students in small distinctive classes taught by highly motivated and skilled faculty members. There are also opportunities for independent study so that students learn to work on their own and to develop their abilities and interests in ways that are not normally possible in regular college course work. Students participating in a program of honors studies also receive special academic counseling to satisfy their future career objectives. Students are offered every opportunity to achieve a high level of intellectual maturity and accomplishment. For additional information, see the Fulbright College (p. 271) section of this catalog.

The honors program in the Sam M. Walton College of Business is offered to high-achieving students interested in obtaining an outstanding business education at the University of Arkansas. Students who participate in the program will take honors courses in the University Core and pre-business curriculum as well as honors colloquia in the Walton College offered exclusively to honors students. The subject matter of these colloquia varies from year to year and focuses on current business issues. Honors students complete a thesis in the senior year. Students in the honors program are entitled to register on the first day of registration week, have exclusive access to an honors computer lab and study area, and will be given priority consideration in such programs as the Arkansas Cooperative Education Program. For further information, see the Walton College (p. 589) section of this catalog.

The honors program in the College of Education and Health Professions enables undergraduate students who have demonstrated potential for outstanding scholarship achievement an opportunity to broaden and deepen their liberal and professional education. Honors students participate in honors seminars, leadership skills development and a required undergraduate thesis/project. Students are provided opportunities to enhance their learning experience through critical thinking, leadership skills development and independent study. For additional information, see the College of Education and Health Professions (p. 675) section of this catalog.

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research-related careers that require considerable critical and original independent thinking. Students must formally apply for admission to the Engineering Honors Program. Once accepted into the program, honors students take a minimum of 12 hours of honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To graduate with honors, a student must hold a cumulative GPA of 3.50 or better for all course work, computed at graduation. For more information, see the College of Engineering (p. 781) chapter of this catalog.

Campuswide Academic Honor Societies

For other academic honor societies, see the various school and college sections of this catalog.

Golden Key is an academic honor society open to selected juniors and seniors who have a minimum grade-point average of 3.50.

Order of Omega honor society is exclusive to members of the Greek community on the university campus. Selection of members is based upon leadership in the inter-Greek activities, academic honors, and contributions to the University community. A 2.50 GPA is necessary for membership consideration.

Phi Eta Sigma is an academic honor society for freshman students. Membership is selected in the spring each year, and the only requirement is a minimum GPA of 3.50 or better for the first semester of the freshman year.

Phi Kappa Phi is a national honor society whose primary objective is the recognition and encouragement of superior scholarship in all academic disciplines. Junior and senior undergraduate students who have a minimum GPA of 3.85 are eligible for membership. Also eligible are graduate students, registered for one year, who have a minimum GPA of 3.85.

Tau Alpha Upsilon is an honor society that honors outstanding students who live in the University of Arkansas Residence Hall system.

Who’s Who, a general honor society, honors students who have excelled in scholarship, leadership and campus activities throughout their college careers. Membership requirements are a minimum cumulative GPA of 2.00, completion of 85 credit hours, and at least two full semesters attendance at the University of Arkansas, Fayetteville, prior to application.

Campuswide Leadership Honor Societies

Blue Key is a service-oriented honor fraternity that recognizes outstanding scholarship, leadership and involvement in campus activities. Applicants must be classified as juniors and meet a minimum GPA of 2.75 for membership consideration.

Cardinal Key is a junior service-oriented honor society whose membership selection is based on scholarship, leadership, and community and campus activities. A 3.00 GPA requirement must be met.
in order to be considered for membership at the end of the sophomore year.

**Cardinal XXX** is a service-oriented honor society whose membership consists of a select group of sophomores. Membership selection is based on scholarship, leadership, and community and campus service. A 3.00 GPA is required for consideration, and selection is made at the end of the freshman year.

**Gamma Beta Phi** is a service-oriented honor society established to recognize and encourage excellence in education. Membership in the organization is open to students who are in the top 20 percent of their class.

**Mortar Board** is a senior honor society that considers outstanding scholarship, leadership, and service to the campus and community when selecting members. Applicants must have a 3.00 GPA in order to be eligible for consideration.

**Reserve Officers' Training Corps**
A true job training program, ROTC is offered at the University of Arkansas through both the U.S. Air Force and the U.S. Army. Each department provides a unique, career-oriented set of courses relevant to future leadership positions within its particular branch. In addition to studying Aerospace Education or Military Science, students interact with one another in a practical setting as they examine and apply the dynamics of leadership, management, ethics, communication, and teamwork. Participants are given the background and comprehensive building blocks to become commissioned officers in the U.S. military, if qualified. Physical activities and summer orientation programs are enhanced with continually updated curricula. Classes are taught by military personnel, ensuring realistic perspectives on the military professions.

In the finest traditions of the University of Arkansas and the ROTC programs, students are challenged to grow, develop and assume responsibilities throughout their academic years. Underlying that teaching is a foundation of service, integrity and excellence – expected and demanded of all officer candidates. Scholarships and details of the two programs are found in the ROTC chapter of this catalog. Army ROTC is located in the Army ROTC building, 479-575-4251 or toll free 1-866-891-5538, armyrotc.uark.edu (http://armyrotc.uark.edu/). Air Force ROTC is located in 319 Memorial Hall, 479-575-3651, afromc.uark.edu (http://afromc.uark.edu/).

**Cooperative Education Program**
Cooperative Education is a unique program offered by the Office of Career Services that allows students to alternate between going to school and working in their chosen vocation. In addition, the program allows employers the opportunity to train and evaluate future employees before offering them positions.

Employment assignments are diversified to provide students with a variety of experiences related to their major field and with work of increasing difficulty and responsibility. Although the primary objective is to supplement theoretical knowledge with practical experience, students earn full-time pay while on work assignments. This benefit produces welcome income while the students are still pursuing a degree.

Positions are available to students in many disciplines, primarily engineering, architecture, landscape architecture, business, agriculture, natural science and mathematics. Co-op students must be in good academic standing, must be at least 18 years of age, must be making normal progress toward a degree, and must meet the specific requirements of their college. (For example: the College of Engineering and Dale Bumpers College of Agricultural, Food and Life Sciences require completion of the freshman year; Fulbright College of Arts and Sciences requires 45 credit hours and a 2.5 grade-point average; the Walton College of Business requires completion of pre-business program requirements; and the Fay Jones School of Architecture requires completion of the junior year.) In addition, employers may establish their own academic criteria for selecting students.

For further information, contact the Career Development Center, 607 Arkansas Union, 479-575-2805.

**Study Abroad**
The university encourages the expansion of students’ educational experiences through study abroad. Student exchange programs have been established with Kansei University and Shimane University (Japan), Hankuk University (Korea), Al-Akhawayn University (Morocco), University of Graz (Austria), University of Essex (England), University of Maine (France), and Carlos III University of Madrid (Spain). Other study abroad programs include summer/semester/year-long programs in Austria, England, Scotland, Ireland, France, Germany, Italy, Mexico, and Spain. A limited number of scholarships and travel grants are available each year for these programs.

For more information about study, work, and travel abroad, contact the Office of Study Abroad, 722 W. Maple, 479-575-7582. Students in the Dale Bumpers College of Agricultural, Food and Life Sciences may contact Dr. Andrew Proctor, Director of International Agricultural Programs, Bumpers College Dean’s Office, E-108 AFLS Building, 479-575-2252, aproctor@uark.edu. Students in the Walton College of Business may contact the Undergraduate Programs Office at 479-575-4622. Students in the College of Engineering may contact the Assistant Dean for International Programs at 479-575-7236.

**Graduate and Professional Study**
The University of Arkansas is the major center for comprehensive graduate-level instruction in the state, offering students the opportunity to continue their studies or to specialize in a particular field through the Graduate School. The university offers a wide range of graduate degrees, including the master’s, the Educational Specialist, the Doctor of Education, and the Doctor of Philosophy. Non-degree graduate certificates are also offered. Information about graduate programs may be found in the Graduate School Catalog or at grad.uark.edu (http://grad.uark.edu/).

The School of Law on the Fayetteville campus offers a juris doctor degree program for qualified students with a bachelor’s degree, and it offers the nation’s only master’s program in agricultural law for students with a law degree. Further information concerning professional study may be obtained by contacting the School of Law dean’s office for a copy of the current catalog: University of Arkansas School of Law, Leflar Law Center, 107 Waterman Hall, Fayetteville, AR 72701, 479-575-3102 or at law.uark.edu (http://law.uark.edu/).

**Pre-Law**
The University of Arkansas School of Law does not prescribe a specific pre-law curriculum and does not require any single “pre-law major.” Prospective students are encouraged to select baccalaureate majors best suited to individual interests and abilities, and writing courses are often very valuable.
A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Dale Bumpers College of Agricultural, Food and Life Sciences or the Fulbright College of Arts and Sciences who are admitted to the special six-year program. All applicants for admission are required to take the Law School Admission Test.

Other Pre-Professional Programs
Fulbright College offers pre-professional programs and advisers in law, medicine, dentistry, optometry, medical technology, chiropractic, physical therapy, pharmacy, dental hygiene, occupational therapy, social work, and theology. The Dale Bumpers College of Agricultural, Food and Life Sciences coordinates the pre-veterinary medicine program.

The Academic Common Market
The Academic Common Market is an interstate agreement among Southern states for sharing uncommon academic programs. Participating states are able to make arrangements for their residents who qualify for admission to enroll as in-state students for fee purposes.

The Common Market concept recognizes that it is impractical for every state to attempt development of programs in every field of knowledge. Each Southern state has programs which are not offered in some of the other states and which can accommodate additional students. Through the sharing of such programs, the market assists in eliminating unnecessary duplication and in increasing access to programs which meet the educational needs of the citizens of the South.

To enroll as an Academic Common Market student, you must:

1. Be accepted for admission into a program to which your state has obtained access for its residents through the Academic Common Market. Applications for admission should be made directly to the institution offering the program.
2. Obtain certification of residency from the Common Market coordinator for certification information.

The opportunities presently available at the University of Arkansas, Fayetteville, at in-state rates to residents of Southern states through the Academic Common Market are listed in the column to the right.

### Professional Licensure Disclosure Policy
In compliance with federal regulation 34 CFR 668.43 (a) (5) (v) and 34 CFR 668.43 (c), the University will disclose to a student whether the student’s declared degree or certificate program leads to the ability to obtain a professional license in the state of the student’s self-reported location. Disclosure will occur prior to the student making a financial commitment to the institution. To facilitate this timeline, notification will be made following the student’s initial enrollment in courses in a term to which the student has been admitted or readmitted to the university.

Once enrolled in a program, if the institution makes a later determination that the program does not meet educational requirements for licensure or certification in the state where the student is located, the University of Arkansas will provide notice directly to the student within 14 calendar days of making that determination.

General disclosures on professional licensure status in each state will be maintained on the University of Arkansas website.

For the purpose of this policy, the following definitions apply:

- **Location** means the state in which the student reports they will be physically located while completing the student’s program of study, also known as the reported “local” or “campus” address. Location will be designated in the first term of enrollment in coursework and will be updated upon receipt and processing of any formal notification by the student to the university of a change in location.

- **Financial commitment to the institution** means the payment of or agreement to pay registration related tuition, fees, and charges.

### Enrollment Services Mission
Enrollment Services seeks to enroll a diverse group of capable students, who will engage and excel at the University of Arkansas, and to assist these students in achieving their academic and career goals.

The mission of the Enrollment Services Division of the University of Arkansas is to enroll and graduate students who will engage fully in academic and service programs, develop intellectually and personally, and contribute to the campus, the state, and the global community. Encouraging academic engagement from a diverse group of communities will create a dynamic educational environment that will promote a broad learning experience for the entire campus community. To carry out this mission, the Enrollment Services Division is comprised of nine professional and service-oriented offices: Admissions, Center for Learning and Student Success, Financial Aid, Graduation and Retention, Nationally Competitive Awards, Orientation, Registrar, Scholarships, and UACConnect. Through collaborative efforts, Enrollment Services strives to:

- Promote the University of Arkansas and the pursuit of higher education;
- Foster initiatives that support diversity as a key goal of the University of Arkansas community;
- Attract, admit, and prepare new and returning students for enrollment on campus while working with academic affairs to ensure planned and sustainable growth in accordance with institutional priorities;
• Accurately and efficiently reduce financial obstacles through federal, state, institutional scholarship and aid programs;
• Commit to preparing traditional and non-traditional students, including returning adult learners, for academic achievement and success in life;
• Assist future, current, and former students as they navigate administrative requirements to achieve their academic goals;
• Ensure accuracy for registration and academic records;
• Commit to retaining students who enroll at the University of Arkansas and assisting them through academic transitions on their path to graduation;
• Prepare students to be nationally competitive;
• Craft and maintain policy that facilitates effective administration to support Division goals, including coherence of policy across all divisions;
• Develop innovations in the use of technology and information systems aimed at supporting a research engine for best practices in enrollment services and data-based decision making;
• Increase state and global knowledge by achieving a net increase in Arkansas residents holding bachelor’s, master’s, and doctoral degrees;
• Support the university’s pursuit to become a nationally recognized research institution that puts students first.

Academic Bankruptcy
Students returning to the University of Arkansas after an absence of five or more years may be eligible to declare academic bankruptcy if they meet the following criteria:

1. Must have been enrolled previously at the University of Arkansas, Fayetteville, as an undergraduate student and be returning as an undergraduate student.
2. Must not have been enrolled at the university during the previous five years.
3. Students who have attended another institution since their last attendance at the university must meet requirements for transfer students (2.00 GPA on all coursework attempted more than five years after last enrollment at the University of Arkansas, Fayetteville) to be eligible for readmission.
4. Must submit an application for readmission and official transcripts of all college work attempted since last attendance at the University of Arkansas by the application deadlines and submit a Declaration of Academic Bankruptcy form (http://registrar.uark.edu/1621.php) to the
Office of the Registrar. The following are the conditions of academic bankruptcy:

a. Students will forfeit all credit hours previously awarded by the University of Arkansas, Fayetteville. This includes course work completed at the university (regardless of grades earned), courses accepted in transfer, credit by examination, and any self-paced (correspondence) course work awarded.

b. A new calculation of GPA and credit hours will begin when the student returns to the University of Arkansas.

c. The transcript will reflect the student’s complete record (including all previous college work) with an added notation of “Academic Bankruptcy Declared.”

d. Courses taken at another institution within five years of the last University of Arkansas enrollment will not be accepted for transfer. Coursework completed more than five years after last attending the University of Arkansas may be accepted in transfer, subject to university transfer credit policies. For purposes of this policy, University of Arkansas self-paced (correspondence) coursework will be treated in the same manner as transfer coursework.

e. For the university to provide appropriate advising and (as required by Arkansas Act 1052) appropriate assessment, a student may be required to submit ACT, SAT, or ACT COMPASS test scores prior to registration for classes if, as a result of academic bankruptcy, that student is returning to the university as a freshman with fewer than 24 transfer hours.

Admission

Undergraduate Admission

Any person who intends to register for a course at the University of Arkansas must first be admitted to the university. Students returning to the university after an absence of a fall or spring semester must also complete an application.

The University of Arkansas offers a variety of services to students with physical or learning disabilities through the Center for Educational Access. Students with any type of physical or learning disability are strongly encouraged to contact the CEA in Room 209 of the Arkansas Union or call 479-575-3104 (TDD/Voice) to learn more about specific services and the overall accessibility of the university.

The university reserves the right to modify admission requirements. Application forms and the most current information about admission requirements are available from the Office of Admissions. Please send all application materials and supporting documents to the following address:

Office of Admissions
232 Silas H. Hunt Hall
1 University of Arkansas
Fayetteville, AR 72701
479-575-5346 or 1-800-377-8632
admissions.arkansas.edu (http://admissions.uark.edu)
uoaf@uark.edu

When to Apply

Students interested in applying to the University of Arkansas for the fall semester are encouraged to apply by the November 1 priority deadline. By applying early, students take advantage of scholarship, housing, and orientation privileges; however, regular fall applications will be accepted until August 1 prior to the start of term. Applicants for freshman scholarships are encouraged to apply for admissions by November 1 and complete the separate scholarship application by the priority scholarship deadline, November 15. Applicants for entering transfer scholarships should submit completed applications to the Office of Admissions and the Office of Academic Scholarships no later than April 1, for the fall semester, and October 1, for the spring semester.

Deadlines for Admission Consideration

Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:

- Fall – August 1
- Spring – December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

International students should refer to “International Students” in this section for application deadlines, procedures, and requirements.

Graduate School

Applications for admission to the University of Arkansas Graduate School and an official copy of transcripts of the applicant’s academic record at each college and university attended since high school graduation, and official test score on the Graduate Record Examination (GRE) or other national standard test, must be submitted to the graduate school admissions office and approved in advance of registration. The transcripts will become a part of the student’s permanent file at the University. Applications may be obtained by writing to the Graduate and International Admissions Office, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, AR 72701; by calling 479-575-6246; by e-mailing gradinfo@uark.edu; or by applying at apply.uark.edu (http://apply.uark.edu).

Additional information and procedures for making application to the Graduate School are included in the Graduate School Catalog (p. 1630).

Admission to Graduate Standing

To be admitted to graduate standing, a student must have 1) earned a baccalaureate degree from a regionally accredited U.S. institution or from an institution with substantially equivalent requirements for a baccalaureate degree and must have a GPA of 3.0 or better on the last 60.0 credit hours of attempted coursework prior to receiving the baccalaureate degree and 2) present satisfactory scores on the Graduate Record Examination (GRE) or other national standard test.

Admission to graduate standing does not admit a student to a specific program of study leading to a graduate degree. Therefore, in addition to satisfying the general requirements of the Graduate School, the applicant must also comply with the specific requirements and have the approval of the department in which graduate study is desired.

For more details, go to the Graduate School Catalog (p. 1630).

How to Apply

1. Submit a completed application for undergraduate admission and the non-refundable application fee to the Office of Admissions. You may apply for admission online at apply.uark.edu (http://apply.uark.edu).

2. Request that all required transcripts be sent to the Office of Admissions. Only official transcripts will be accepted. Transcripts are not considered official unless submitted in a sealed, stamped
2. Hours and completion of English Composition I and II with a grade of “C” or above will not be required to submit the TOEFL or IELTS for admission consideration.

Applicants who meet the academic and financial requirements but who do not meet the English proficiency requirement of the University of Arkansas will be offered conditional admission to attend an intensive English program through the Spring International Language Center. Students will be eligible to enroll in University of Arkansas academic courses upon successful completion of the highest level of the intensive English program with a 3.00 grade average and recommendation of the director of Spring International.

An entering freshman who has completed secondary school at either U.S. or foreign institutions must have a) the equivalent of a final cumulative GPA of at least 3.0 (or its equivalent) and b) competency equivalent to that developed by taking four years of English and three years each of mathematics, natural sciences, and social studies, and an additional three units of electives chosen from English, speech, foreign languages, mathematics, natural sciences, or social studies in U.S. high schools.

A student transferring with fewer than 24 semester hours of post-secondary coursework at either U.S. or foreign institutions must a) have a cumulative GPA of at least a 2.50 (or its equivalent) on all post-secondary coursework attempted, and b) meet the requirements specified for entering freshmen. A student transferring from either a U.S. or foreign post-secondary institution with at least 24 semester hours must have the equivalent of a cumulative GPA of at least 2.50 on all post-secondary coursework attempted.

A non-refundable application fee of $50 is required for all international applicants. All applications and supporting documents must be submitted by May 31 for the fall semester; October 31 for the spring semester; and March 1 for the summer sessions.

Any international student returning to the university after an absence of a full semester (fall or spring) or more must submit an application for admission. For these students, the application deadlines are August 15 for the fall term and January 1 for the spring term. It should be noted that a student previously enrolled at the University of Arkansas who takes a full term of courses elsewhere and then seeks readmission to the university returns as a transfer student and must meet university admission requirements for international transfer students. Submit a photocopy of the I-20 issued by the transferring institution, and submit a new financial statement. An application fee is not required for returning students.

For specific admission requirements and application materials pertaining to students on F-1, J-1, or any non-immigrant visas, applicants should write directly to the International Admission Office, 340 N. Campus Drive, 213 Gearhart Hall, 1 University of Arkansas, Fayetteville, Arkansas 72701, or call 1-479-575-6246 or e-mail iao@uark.edu.

Please see the section Placement and Proficiency Tests (p. 58) for university policy regarding English language use by non-native speakers.

New Freshmen

Applications are reviewed on an individual basis with consideration given to the applicant’s overall grade-point average (GPA) and standardized test scores. New freshmen and those transfer students with fewer than 24 transferable credit hours should have completed or be in the process of completing the following college preparatory curriculum in high school:
16 Units Total
- English – 4 units
- Mathematics – 4 units (Units must be equivalent to or higher level than Algebra I)
- Social Studies – 3 units
- Natural Sciences – 3 units
  - 1 unit general sciences and 2 units lab sciences (Choose two courses from biology, chemistry, and physics laboratory. Two years of principles of technology will meet one unit of natural sciences [physics]. Two years of applied biology/chemistry will meet one unit of natural sciences [biology].)
- Others – 2 units
  - Oral Communication – 1/2 unit
  - Physical Education – 1/2 unit
  - Health and Safety – 1/2 unit
  - Fine Art – 1/2 unit

Arkansas residents who have taken these course requirements and who have an overall high school GPA of 3.00 or better and an ACT score of 20 or an equivalent 930 SAT or 1020 Redesigned SAT score or better meet the minimum admission requirements. Out-of-state applicants must meet minimum admission requirements and may be required to meet higher standards, depending on demand. Students not meeting minimum admission requirements are still encouraged to apply and will be reviewed for possible admission by the Admissions and Appellate Board.

Accelerated Admission
Superior high school students who have completed a rigorous college preparatory curriculum may seek admission to the freshman class at the end of their junior year of high school. Applicants for accelerated admission must complete certain required subjects during three years of high school study, submit letters of recommendation, and submit an ACT or SAT score equivalent to at least the 90th percentile of the university’s previous entering class. Additional information and application materials may be obtained at the Office of Admissions, by calling 1-800-377-8632, or visiting admissions.uark.edu (http://admissions.uark.edu).

Non-Degree Seeking Students
Applicants who are not interested in working toward a degree while taking classes may, under certain conditions, be approved to do so upon submitting an application for admission. Degree-seeking students attending part-time or as an “undeclared major” should not confuse their status with this special, non-degree seeking category. Students who are admitted provisionally and placed in a non-degree seeking status until they earn a minimum 2.0 GPA on 12 credit hours should also not confuse their status with this special category. The Office of Admissions reserves the right to determine the proper category of admission and to determine what credentials may be required.

Classification as a special student permits enrollment in credit classes (or as an auditor) on a space-available basis; however, special students are not eligible for financial aid, and the university incurs no particular obligation to provide academic advisement.

Admission as a special, non-degree seeking student is not intended to serve as a means of access to regular, degree-seeking status nor is it intended for a person who has earned unsatisfactory grades in previous high school or college course work. Students who have been denied regular undergraduate admission are not eligible for this status. All special students are subject to the same regulations concerning scholastic probation, suspension, and dismissal as other undergraduate students. Students who have previously been assessed developmental course requirements or high school course deficiencies will retain that status as a special non-degree student.

Non-degree seeking students must meet course prerequisites and should be prepared to verify to the department by official documentation that university course prerequisites have been met, if appropriate. Students planning to enroll in any upper-division education courses should verify admission to the Teacher Education Program prior to registration. A non-degree seeking student may not enroll for more than nine hours of courses in a term without approval of the student’s academic dean. No more than 24 semester hours earned while in a non-degree seeking status will apply to a degree at the university.

Unless otherwise specified, students with non-degree seeking status who wish to be admitted into a degree program at the University of Arkansas must apply for admission as such prior to the beginning of the term for which the change of status is requested. All requirements for admission to regular status must then be met, except for students in the provisional non-degree-seeking status.

When to Apply
Non-degree seeking students must meet the same application deadlines as other students. See the Deadlines for Admission Consideration (p. 55) on the previous page for deadlines.

How to Apply
The following students may be considered for non-degree seeking status:

1. Visiting students who attend other colleges or universities and wish to enroll at the university to earn credits that they plan to transfer back to their home institution. It is the student’s responsibility to verify with his or her college that courses taken here will be acceptable as transfer credit.

   **Application procedure:** Submit a completed application, a non-refundable application fee, and a letter of good standing verifying eligibility to return to the home institution.

2. Students who want to take courses of special interest for personal or professional development but who are not interested in working toward a degree. Applicants in this category are normally expected to have been out of high school for five or more years.

   **Application procedure:** Submit a completed application and non-refundable application fee. Students who have been out of high school less than five years should submit a transcript and test scores verifying that admission requirements have been met. The application fee is not required for residents of Arkansas who are 60 years and older and wish to participate in the senior tuition waiver program (https://admissions.uark.edu/apply/seniorcitizens.php). (http://admissions.uark.edu/apply/seniorcitizens.php)

3. Students who already have a college degree and who want to take credited classes but not earn credit toward another degree at this time. Credits earned under this classification will not count toward a graduate degree.

   **Application procedure:** Submit a completed application and non-refundable application fee. Students who wish to enroll for successive terms should submit a transcript showing their degree.

4. Dually enrolled high school students. Dually enrolled high school students must have at least a 20 ACT score and a 3.00 high school GPA to enroll. Dually enrolled high school students are ineligible to enroll in remedial courses.
Application procedure: Submit a completed application, a non-refundable application fee, ACT or SAT scores, and a high school transcript. Admissions applications should be submitted at least one month in advance of the term.

Dually enrolled high school seniors who plan to enroll in the fall as regular freshmen must submit a separate application for regular admission for the fall.

Placement and Proficiency Tests
ACT, SAT, ACT COMPASS, and College Board Accuplacer scores are used to determine placement in university courses. Students whose scores indicate the need for additional preparation may be placed in courses designed to prepare them for college-level work. (See Arkansas Requirements for Developmental Course Placement (p. 67).) Credit earned in such courses does not count toward degrees in all colleges. (See Courses That Do Not Count Toward Degrees (p. 67).)

Freshman Composition Placement
- Students who score below 19 on the English section of the ACT, below 450 on the Reading section of the SAT (Pre-March 2016), below 490 on the Evidence-Based Reading and Writing section of the redesigned SAT (Post-March 2016), below 80 on the Writing Skills section of the Compass (the test was discontinued in 2016 but scores are valid for five years), below 83 on the Sentence Skills section of the Accuplacer Classic, or below 255 on the Writing section of the Accuplacer Next-Generation must enroll in ENGL 1013 and ENGL 0002.
- Students with ACT English scores of 19-27, SAT Evidence-Based Reading and Writing scores of 490-620, ACT Compass Writing Skills scores of 80 or higher, or College Board Accuplacer Sentence Skills scores of 83 or higher should enroll in ENGL 1013 and ENGL 1023.
- Students with ACT English scores of 28-29 or SAT Evidence-Based Reading and Writing scores of 630-680 may enroll in ENGL 1013 and ENGL 1023 or in ENGL 1013H and ENGL 1023H.
- Students with ACT English scores of 30 or greater or SAT Evidence-Based Reading and Writing scores of 690 or greater may enroll in ENGL 1013H and ENGL 1023H or elect exemption. Some degree programs require credit in composition, and students should confer with their advisors before exempting.

The Math Placement Test
All students have the opportunity to take the online mathematics placement assessment. To take the assessment, or for more information regarding it and its requirements, visit the University of Arkansas Mathematical Sciences website (http://math.uark.edu/).

Arkansas State Requirements for Developmental Course Placement
Arkansas law specifies that all first-time entering freshmen enrolled in a bachelor’s degree program will be placed in either college-level credit courses in English and mathematics or remedial courses in English composition, reading, and mathematics on the basis of their scores on specified tests.

- Students who score below 19 on the Reading section of the ACT, below 470 on the Reading section of the SAT (Pre-March 2016), below 470 on the Evidence-Based Reading and Writing section of the redesigned SAT (Post-March 2016), below 82 on the Reading section of the Compass (scores are valid for five years), below 78 on the Reading section of the Accuplacer Classic, or below 252 on the Reading section of the Accuplacer Next-Generation must enroll in PLSC 2003, HIST 2003, or HIST 2013 (AP or IB credit or concurrent/transfer credit for one of these courses will also satisfy the remediation requirement). Students are exempt from reading remediation if they have a 3.0 or higher final high school GPA (based on the Arkansas standard of weighted credit for AP, IB, and concurrent enrollment only). All students, however, will be required to complete coursework as indicated by their degree plan.
- Students who score below 19 on the mathematics section of the ACT, below 460 on the Math section of the SAT (Pre-March 2016), below 510 on the Math section of the redesigned SAT (Post-March 2016), below 41 on the Algebra section of the Compass, below 42 on the College Math section of the Accuplacer Classic, below 255 on the Qualitative Reasoning, Algebra, and Statistics (QAS) of the Accuplacer Next-Generation, below 235 on the Advanced Algebra and Functions (AAF) of the Accuplacer Next-Generation, or below 30 on the ALEKS must enroll in MATH 1203 and MATH 0002L or MATH 1313 and MATH 0131L. All new first-year freshman students are encouraged to take the ALEKS online mathematics placement assessment. To take the assessment, or for more information regarding it and its requirements, visit the University of Arkansas Mathematical Sciences website (http://math.uark.edu/).

Students may place out of these prescribed remedial courses with appropriate scores on the relevant subject placement tests offered through the appropriate university department:
- Students may place out of ENGL 0002 by earning a score of 255 or higher on the Accuplacer Next-Generation Writing test or by demonstrating college-level writing skills on a required essay administered during the first week of class. Students in ENGL 1013 who exhibit writing challenges in their first essay may be asked to enroll concurrently in ENGL 0002.
- Students who earn a 46 or higher on the Math Placement Test (https://fulbright.uark.edu/departments/math/undergraduate/placement/aleks-ppl.php) offered through ALEKS may enroll in MATH 1203.

Students will be required to register for these courses during their first term at the university and, if necessary, in subsequent terms until passing grades have been earned in all required courses. Students who need further information or clarification are encouraged to discuss their course placement with their academic advisor or dean.

Courses That Do Not Count Toward a Degree
The following courses do not count toward degree credit in any college or school: ENGL 0002, ENGL 0013, MATH 0001L, MATH 0002L and MATH 0131L.

The following courses do not count toward any degree in the College of Engineering: MATH 1203, MATH 1213, MATH 1284C, and ENGL 2003.

Speech Communication Exemption Examination
Students who have had speech in high school and/or experience in public speaking may elect to take this test for exemption from or credit in COMM 1313. Both the written and oral (a five-minute impromptu speech) examinations must be passed to receive exemption or credit.
World Language Placement Examinations
Students with previous world language experience in French, German, or Spanish are encouraged to take language placement examinations offered during summer orientation. Those test scores will be used by academic advisors to determine an appropriate world language placement level. Students who omit one or more course in the basic language sequence will receive credit for omitted courses when they have validated their high placement by passing with a “C” or better the course into which they were placed. Conversation courses (3033, 4033) and self-paced (correspondence) courses may not be used to validate such prior knowledge.

General Chemistry Placement Examinations
These tests will be offered throughout the year. Students who performed at above average levels in high school chemistry may find it to their advantage to enroll directly in the second semester of general chemistry. This examination is designed to provide guidance in making this course selection. Students who place into the second semester of general chemistry and earn a grade of “C” or better in the course will also receive credit for the first semester of the course.

English Language Use by Non-Native Speakers
Non-native speakers of English admitted to undergraduate study at the University of Arkansas are required to present an acceptable writing score on one of the following tests: Internet based TOEFL (iBT), IELTS PTE Academic, or ELPT. Depending on exam scores, a student may be required to take one or more English Language and Culture (ELAC) course prior to the beginning of classes in their first term of study. Non-native speakers in the following categories are exempt from this requirement:

1. Undergraduate students who transfer at least 24 hours of credit from U.S. institutions, including courses that meet the freshman composition requirement;
2. Undergraduate students who have completed grades 10 through 12 in and graduated from a U.S. high school and have obtained an ACT English section score of 19 or above or a SAT verbal score of 500 or above;
3. Undergraduate students with a TOEFL iBT writing score of 28 or IELTS writing score of 6.5 or PTE Academic writing score of 77 or ELPT writing score of 81.

Diagnostic and placement testing is designed to test students’ ability to use English effectively in an academic setting, and its purpose is to promote the success of non-native speakers in completing their chosen course of study at the University of Arkansas. Test results provide the basis for placement into English Language and Culture (ELAC) support courses or course sequences. Courses are offered by the Graduate School and International Education for those students whose language skills are diagnosed as insufficient for college-level work at the level to which they have been admitted (undergraduate or graduate study). Credit in ELAC courses may count toward University of Arkansas degrees. Non-native speakers assessed as having language competence sufficient for their level of study will not be required to enroll in ELAC courses.

The ELPT is administered by Testing Services during New Student Orientation, and there is a $15.00 charge.

Undergraduate and graduate students assessed ELAC courses are required to complete these courses during their first semester of enrollment at the university.

Readmission
Any former student who wishes to return to the University of Arkansas after missing a fall or spring semester should complete an application for admission. Students enrolled in University of Arkansas self-paced (correspondence) courses during their absence must be readmitted. A non-refundable application fee is required for former students.

When to Apply
An early readmission will enable a student to register during priority registration. The student should submit an application and all appropriate credentials at least one month prior to the time of registration. Registration dates and procedures are found on the Schedule of Classes (http://registrar.uark.edu/465.php).

Deadlines for Admission Consideration
Applications and required transcripts must be received in the Office of Admissions by the following deadlines to be accepted for the respective enrollment periods:

- Fall – August 1
- Spring – December 20

Students who are unable to submit their applications by the deadline may be denied admission and considered for admission for the following term.

Requirements
1. Students must be academically eligible to return to the university and are re-admitted with the same academic status as held during their last attendance. Course work taken at another institution will not affect a student’s probationary status or university GPA. Students may change degree programs on re-admission to the University of Arkansas regardless of academic status, except for students entering the College of Engineering. Students who have not satisfied their initial provisions of admission (but are still eligible to return) will be required to satisfy those conditions upon their return.
2. Students who have attended another institution while away from the University of Arkansas will be considered returning transfer students and must have either a 2.00 GPA on all college work attempted and/or a 2.00 GPA on all course work attempted since last attending the University of Arkansas. Official transcripts of all course work attempted since last attendance at the university must be submitted. (See Admission of Transfer Students.)
3. Students who previously attended or currently attend the university as special, non-degree seeking students and wish to return as degree-seeking candidates must apply for admission as freshmen or transfer students, furnishing all appropriate admission credentials, including any required test scores. All requirements for admission to regular status must be met. (See appropriate section of this catalog for requirements.)
4. Former students who are submitting petitions to either the Academic Standards Committee or the Admission and Appellate Board to request readmission must have on file all required documents by the application deadlines. (See the Academic Standards Committee Calendar (http://registrar.uark.edu/508.php) for deadlines for submitting petitions.)
School of Law

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Fulbright College of Arts and Sciences or in the Dale Bumpers College of Agricultural, Food and Life Sciences who are admitted to the special six-year program. All applicants for admission are required to take the LSAT. (See the Fulbright College Pre-Law Program (p. 274) or the Dale Bumpers College of Agricultural, Food and Life Sciences (p. 138).)

For complete details concerning admission to the University of Arkansas School of Law, see the Admission page (p. 55) or write to Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701; or by calling 479-575-3102. Applications can be submitted online at apply.uark.edu/ (http://apply.uark.edu/).

Transfer Students

Transfer Admission Requirements

Applicants who have attended other colleges or universities after high school graduation are considered transfer students. Applicants must submit official transcripts of all previous college courses attempted, whether or not credit was earned and regardless of whether the applicant wishes to transfer any credit to the University of Arkansas. Transcripts from each institution attended should be sent directly to the Office of the Registrar. All transfer students must meet the following requirements:

1. Have a cumulative GPA of at least 2.00 on all course work attempted;
2. Be eligible to return to the last institution attended. Grade-point average is calculated on all coursework attempted.

Students who have completed fewer than 24 transferable semester hours must, in addition to the above requirements, meet all requirements for freshman admission (see Admission of Entering Freshmen (p. 56)). Test scores and transcripts are also evaluated to determine whether State of Arkansas requirements for developmental course placement have been met. (See Registration (p. 67).) For policies regarding transfer of credit from other institutions, see Academic Regulations (p. 104).

Financial Aid and Scholarships

Financial Aid

The University of Arkansas annually awards nearly $180 million of financial aid and scholarships to students. Financial aid is divided into categories of grants, work, loans, and scholarships. Unless otherwise specified, a student needs to complete only two forms to apply for federal aid: the Free Application for Federal Student Aid (FAFSA), which analyzes the ability of the student’s family to pay for college, and the university’s application for admission. These forms collect information used by the Office of Financial Aid in determining awards. In some cases, copies of the parents’ and/or student’s tax return transcripts and verification documents are needed.

The Financial Aid Office (http://faidaid.uark.edu/) is part of Enrollment Services and is housed in Silas Hunt Hall, Room 114.

Scholarships

The University of Arkansas Academic Scholarship Office awards scholarships totaling more than $12 million for students each year. This total does not include funds that support external scholarships held by U of A students such as Governor’s Scholarships, Arkansas Academic Challenge Scholarships, or non-resident tuition waivers. Scholarships funded by the university fall into three broad categories: distinguished fellowships, academic scholarships, and special interest/skills scholarships. The scholarship information contained in this section applies to students entering for the 2017-18 academic year. Current high school students interested in matriculating for the 2018-19 academic year are encouraged to consult the Office of Academic Scholarships for the most up-to-date information.

The Academic Scholarship Office (http://scholarships.uark.edu/) is part of Enrollment Services and is housed in Silas Hunt Hall, Room 114.

College and Departmental Scholarships

The following college and departmental scholarships are available to both entering and currently enrolled students at the University of Arkansas. Complete addresses and phone numbers of the colleges, schools, or departments listed below may be found in the respective college or school sections of this catalog.

Fay Jones School of Architecture and Design

The Fay Jones School of Architecture and Design offers a limited number of scholarships at various amounts to entering freshman in any of the degree programs offered by the School. Several scholarships are renewable annually to the recipient who maintains all the requirements of the scholarship.

Many upper level scholarships are available to continuing students. Applications are available in the fall, and recipients are selected in the spring for the following academic year. Find out more information about the Fay Jones School's scholarship applications (http://fajones.uark.edu/admissions/).

Fulbright College of Arts and Sciences

The Fulbright College of Arts and Sciences offers many outstanding scholarship opportunities. For comprehensive information about these awards, call 479-575-5219 or visit the Fulbright College's scholarships page (http://fulbright.uark.edu/deans-office/offices-and-services/scholarships-and-fellowships/).

Three college-wide scholarships merit special attention: Through the Sturgis Fellowship Program, Fulbright College offers premier scholarships worth $70,000 over four years to exceptionally talented students with the intellectual potential to become future leaders in society. In addition, all honors students are eligible to apply for research and study abroad funding through the Sturgis Grants Program. For information or an application, contact the Director of Honors Studies at 479-575-2509.

The King Fahd Center for Middle East and Islamic Studies offers substantial four-year and two-year renewable scholarships to superior students majoring in Middle East Studies. The program also offers competitive funding for language study in Morocco, Tunisia, and Egypt. Funding for summer study abroad and research projects is considered on a case-by-case basis. Scholarship applications and information about the program can be obtained by contacting mest@uark.edu or calling 479-575-4157.

In honor of the Fulbright commitment to international education, the college offers the J.W. and Elizabeth W. Fulbright Endowed Scholarship, which supports a year of study abroad. To qualify, students must display an interest in one of the following fields: literature, history (including theatre, art, and music history), jurisprudence, philosophy, archaeology,
comparative languages, and those aspects of the social sciences that employ philosophical or historical approaches. For more information about these opportunities, call 479-575-5219 or visit the Fulbright College’s scholarships page (http://fulbright.uark.edu/deans-office/offices-and-services/scholarships-and-fellowships/).

Dale Bumpers College of Agricultural, Food and Life Sciences
Scholarships for students seeking rewarding careers involving food, family, or the environment are made possible by generous gifts from many firms and individuals. The criteria for these scholarships include academics, financial need, interests, organizational involvement, and leadership. Bumpers College scholarships include the Division of Agriculture Land Grant Scholars Endowment Program which offers renewable scholarships to high achieving students; The Dale Bumpers Distinguished Scholars Program which provides an annual scholarship to an outstanding transfer student, an outstanding Ph.D. graduate student, and an outstanding M.S. graduate student; and International Study Abroad scholarships for students expanding their experiences around the world.

Information and application procedures for the more than 200 Bumpers College and departmental scholarships are available at the Bumpers College scholarship page (http://bumperscollege.uark.edu/academics/scholarships-and-financial-aid/) or by contacting the Associate Director of Scholarship at 479-575-2252, or via email to dbcafs@uark.edu.

Sam M. Walton College of Business
The Boyer Fellowship is offered to Walton College students who have achieved at an outstanding level both in and out of the classroom. High grades and standardized test scores are required along with a strong academic curriculum and exceptional academic performance. Applicants for the Boyer Fellowship also must demonstrate financial need, be an Arkansas resident, and graduate from an Arkansas high school.

Other scholarships are available through the departments of accounting, information systems, economics, finance, management, marketing, and supply chain management, as well as through the Walton College’s general scholarship program. Scholarships are primarily awarded on the basis of academic achievement and/or financial need.

For further information on Walton College scholarships, contact the Undergraduate Programs Office at 479-575-4622.

College of Education and Health Professions
Thanks to the generosity of our donors, the College of Education and Health Professions offers several scholarship opportunities. These gifts allow us to support the university’s mission of recruiting and retaining high-achieving students who enrich and diversify the academic environment. Scholarships are available for both graduate and undergraduate students. Please visit the College’s scholarship webpage (https://coehp.uark.edu/for-students/scholarships/) for more information.

College of Engineering
The College of Engineering awards numerous scholarships and fellowships beginning with the sophomore year to continuing students, transfer students, and graduate students. Most scholarships are based primarily on academic performance. However, some scholarships are also awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments.

College scholarships are available to any engineering student while departmental scholarships are intended for students enrolled in a particular discipline of engineering. Students must be admitted to the University of Arkansas and accepted into the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows students to be considered for all college level scholarships and departmental scholarships.

For more information concerning scholarship and diversity opportunities, please see the college’s scholarship website (http://engineering.uark.edu/academics/scholarships-and-financial-aid.php).

Music and Band
The Department of Music offers scholarships (both music scholarships and band scholarships) for talented students who sing or play instruments. All scholarships are based on musical ability, academic achievement, and potential contribution to music department ensembles. Scholarships are renewable for up to five years (ten semesters), as long as the student meets the conditions specified on the scholarship letter or contract.

Music and band scholarships are available to music majors and to students majoring in other areas who participate in certain ensembles. All scholarships require an audition. To set up an audition, contact the music department at 479-575-4701 or the band office at 479-575-4100.

Financial Aid
The University of Arkansas annually awards nearly $180 million of financial aid and scholarships to students. Financial aid is divided into categories of grants, work, loans, and scholarships. Students need to complete the Free Application for Federal Student Aid (FAFSA), which analyzes the ability of the student’s family to pay for college, as well as the various scholarship applications offered through the Academic Scholarship Office, the university’s colleges and departments, and the Arkansas Alumni Association. These forms collect information used by the Office of Financial Aid and the university’s scholarship committees in determining awards. In some cases, copies of the parents’ and/or student’s tax return transcripts and other verification documents are needed.

Determining Financial Need
To determine financial need, a student must complete the FAFSA. Students release their information to the University of Arkansas by completing the college release section with the University of Arkansas Title IV Code of 001108.

There is a priority date of March 1 for the submission of the FAFSA for the approaching school year for new students. Federally funded financial aid will be awarded on the basis of need as reflected by the FAFSA.

The Student Aid Report from the FAFSA (consisting of several pages) will be sent directly to the student by the Central Processing Service. A student needs to be enrolled or accepted for enrollment before a financial aid award may be generated. To continue receiving financial aid, the student needs to make satisfactory progress toward a degree, as defined by the University of Arkansas, and complete the FAFSA each year. (See Satisfactory Academic Progress below.)
Application Procedure
1. Apply for admission to the university, if not currently enrolled or admitted.
2. Complete the Free Application for Federal Student Aid (FAFSA) and submit it to the federal processor by mail or online. You may submit the FAFSA at the Federal Student Aid website (http://www.fafsa.ed.gov/).

To receive priority consideration for financial aid, all forms and applications need to be submitted by March 1. Students are encouraged to apply even if they miss this priority date. Funds will be available after the priority date.

A student has a couple of choices concerning processing his or her FAFSA. These include mailing the form to the Federal Student Aid Programs or submitting it electronically on the Federal Student Aid website (http://www.FAFSA.ed.gov/). The processing time for electronic applications is three days, and processing time for mailed applications is four to six weeks.

Satisfactory Academic Progress (SAP)
Federal regulation requires that a student must be making satisfactory academic progress regardless of whether he or she has previously received Title IV aid. All students enrolled at the University of Arkansas who receive financial aid through the Title IV Assistance Programs must meet satisfactory academic progress requirements as defined below to be eligible for further aid. Satisfactory academic progress is deemed to have been made by any undergraduate student who meets both the quantitative and qualitative requirements indicated below.

Quantitative Requirements
There are two quantitative requirements that the student must meet in order to remain eligible to apply for federal financial assistance. First, the student must pass, at a minimum, 67% of the credits attempted while attending the university. For the purpose of the 67% rule, grades of 'W' and 'I' are not considered passing grades and the completion percentage is truncated after the first decimal place and rounded to the nearest whole number. In addition, the student will remain eligible to apply for aid as long as the number of credits required for the student’s published degree plan.

A transfer student may have earned credits at another school that will count toward his or her degree at the University of Arkansas. Class credits transferred to the University of Arkansas and classes taken for remediation at the University of Arkansas are used in both the 67% and 150% calculation.

The determination of each student's meeting the quantitative requirements for satisfactory academic progress will be made annually following the conclusion of the spring semester. If a student fails to pass at least 67% of the credits attempted or has attempted more than the 150% of the number of credits required for graduation, then the student must appeal for reinstatement of financial aid eligibility.

Qualitative Requirements
A student is deemed to have met the qualitative requirements for satisfactory academic progress for financial aid purposes provided the student's cumulative GPA is 2.0 or greater. By default, students who do not have any university credit will pass the qualitative requirement. The determination of each student's meeting the qualitative requirement for satisfactory academic progress will be made annually following the conclusion of the spring semester.

Additional Information About SAP Calculations
Dual majors and degrees are calculated at 150% of the total unit requirements of the primary plan. Changing of major will mean future SAP calculations will use the new primary plan or degree but all previous completed and attempted hours will still be used in SAP calculations. All transfer hours will be added into calculations as completed and attempted. Once an undergraduate degree is earned, students are only eligible for direct loans whether the degree is indicated by graduation or not. For second degrees, the calculation will monitor progress from the date of the previous degree (excluding technical certificates and associate degrees).

Graduate and Law Students
Satisfactory academic progress for graduate and law students is determined as described above with one exception. In order to meet the quantitative requirement that students pass at least 67% of credits attempted, graduate and law students must pass each course with a grade of C or better while attending the university at the graduate level.

Satisfactory Academic Policy Appeals
When a student loses federal aid eligibility because they failed to make satisfactory progress, they may appeal that result because of their injury or illness, the death of a relative, or other special circumstances. Their appeal must explain why they failed to make satisfactory progress and what has changed in their situation that will allow them to make satisfactory progress at the next evaluation. The only way to regain aid eligibility without a successful SAP appeal is by meeting the SAP criteria above.

Students who fail to meet the above requirements will be notified that their financial aid has been denied. Each student denied aid will automatically be given an option to appeal. The Committee will review each appeal on an individual basis to determine whether there are circumstances beyond the student's control that prevented him or her from maintaining satisfactory progress. The decision of the Committee is final in appeal matters.

Scholarships
The Academic Scholarship Office is a part of Enrollment Services and is housed in Silas Hunt Hall, Room 114.

The Academic Scholarship Office awards over 4,000 scholarships totaling more than $12 million for students each year. This total does not include funds that support external scholarships held by UA students such as Governor’s Scholarships, Arkansas Academic Challenge Scholarships, or non-resident tuition waivers. Scholarships funded by the university fall into three broad categories: prestigious fellowships, academic scholarships, and special interest/skills scholarships. The scholarship information contained here applies to students entering for the 2016-17 academic year. Current high school students interested in matriculating for the 2017-18 academic year are encouraged to consult the Academic Scholarships Office website at Academic Scholarship Office website (http://scholarships.uark.edu) for the most up-to-date information.
Scholarships for New Students

Prestigious Fellowships

The University of Arkansas offers approximately 90 prestigious fellowships per year. The fellowships are given in one of four different programs: Honors College Fellowships, established in 2002; Bodenhamer Fellowships, established in 1998; Sturgis Fellowships, established in 1985; and Boyer Fellowships, established in 2000. The prestigious fellowships are among the most competitive in the nation and are awarded to the top 2 percent of students. U of A Fellowships are awarded competitively. Students who wish to apply should visit the Honors College website (http://honorscollege.uark.edu/).

Boyer Fellowship  $18,500 per year  32 ACT/ 1430 SAT and 3.80 GPA or higher  Requires application for admission along with the Honors College Fellowship application (honorscollege.uark.edu). Final Deadline: February 1

Cumulative 3.50 GPA, good standing in the honors program and 30 hours earned by the end of the second semester of each academic year. Renewable for 4 years or 8 semesters total.

Chancellor's Scholarship  Up to $8,000 per year toward direct cost of education, including tuition, fees and double-occupancy room and board in UA residence hall or Greek housing.

Applications are competitive and typically come from the top 5 percent of the applicant pool. National Merit Semifinalists and National Achievement Semifinalists are also considered. Competitively awarded.

Chancellor's Community Scholarship  $5,000 per year  Top applicants in the applicant pool who also have a demonstrable commitment to community service.

Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15

Honors College Academy Scholarship  $4,000 per year  Top applicants from the applicant pool with a minimum 27 ACT and 3.50 GPA. Competitively awarded.

Apply for admission. Complete Entering Freshman Scholarship Application (http://scholarships.uark.edu) Priority Deadline: November 15

Academic Scholarships

A number of academic scholarships also are awarded to entering freshmen. Selection criteria include national test scores (ACT or SAT), grade-point average, National Merit or National Achievement recognition, quality and quantity of courses taken, application materials, and other pertinent factors. For online information, go to scholarships.uark.edu (http://scholarships.uark.edu/). Transfer student scholarships are awarded to students transferring from two-year colleges in Arkansas in conjunction with the Arkansas Association of Two Year Colleges' (AATYC) Academic All-Star program. Nominations are submitted to the AATYC and recognized at their annual conference. Additional transfer student scholarships are also available. See scholarships.uark.edu (http://scholarships.uark.edu/).

**Application:**

- [scholarships.uark.edu](http://scholarships.uark.edu)

**Priority Deadline:**

- November 15
### UA Scholarships – General Information

The following regulations govern the general university freshman scholarships described below:

1. **November 15** is the priority scholarship deadline for entering freshmen. Applicants must apply to the university by November 1 to be considered for these scholarships.

2. An “entering freshman” is defined as a student who has not enrolled in another post-secondary institution in a fall or spring semester following graduation from high school.

3. Eligibility for renewal of the Chancellor’s Scholarship and general university scholarships is determined at the end of the second semester each award year. Students may “catch up” in summer terms by taking classes at their own expense on the Fayetteville campus.

4. These scholarships are generally awarded per academic year to cover the fall and spring terms, up to an eight-semester maximum for most students, or a ten-semester maximum for students in the Bachelor of Architecture, Bachelor of Landscape Architecture and the Master of Arts in Teaching programs, each of which is a five-year program. Renewal criteria are evaluated every two semesters.

### Special Scholarships and Conditions

#### ACT 1185

Arkansas income taxpayers who earn a minimum of $5,500 in wages and, with their dependents, reside in a bordering state in a county or parish contiguous to an Arkansas county in which a public institution of higher education is located may enroll at the University of Arkansas and receive the non-resident tuition award under the provisions of ACT 1185 of 1995, Section 34. The availability of funds may vary each year, and the students must provide certain documentation. Please contact the Academic Scholarship Office at 479-575-4464 for more information.

#### Arkansas Alumni Association Scholarships

Thanks to the generosity of our donors, the Arkansas Alumni Association awards over one million dollars annually through a pool of scholarships. Each alumni scholarship has specific criteria based on the donors’ wishes; including, but not limited to, academic achievement, service to the school and community, leadership ability, first-generation college-going and specific major and career choices. Some take into consideration financial need and unique personal backgrounds. All current and prospective students are encouraged to apply each year. Most Association-level scholarships are designated for incoming freshmen and are merit-based. Additional Alumni Association, Alumni Chapters and Alumni Societies scholarships are also available. For more information, visit the Arkansas Alumni Association’s website (https://www.arkansasalumni.org/scholarships/).

#### Air Force and Army ROTC

The Air Force and Army Reserve Officers’ Training Corps programs offer a number of scholarship opportunities for entering freshmen and on-campus students. See the Reserve Officers’ Training Corps section of this catalog for detailed information.

#### Military Benefits

The University of Arkansas is approved by the Arkansas Department of Higher Education and the U.S. Department of Veterans Affairs to participate in military educational benefit programs for veterans, current military members, reservists, national guard, and dependents of veterans who are working toward a degree. For more information regarding programs and eligibility please contact the university’s Veterans Resources and Information Center (VRIC) at 479-575-8742 or http://veteranscenter.uark.edu. (http://veteranscenter.uark.edu)

#### Military Student Scholarships

The University of Arkansas provides three different scholarships to current and former military service members and the dependents of service members. The military service member scholarship provides 35 one-year scholarships in the amount of $4,000 to support current and former service members. The military dependents scholarship provides 10 one-year scholarships in the amount of $1,500 to support dependents of service members. The military book scholarship provides 10 one-semester scholarships (each fall and spring semester) in the amount of $500 to support service members and dependents with book expenses. Students should contact the Academic Scholarship Office at 479-575-4464 or http://scholarships.uark.edu for further information.

#### Registration

Undergraduate students, including students not declaring a major, must enroll in one of six academic units: the Fulbright College of Arts and Sciences; the Dale Bumpers College of Agricultural, Food and Life Sciences, the Sam M. Walton College of Business, the College of Education and Health Professions, the College of Engineering, or the Fay Jones School of Architecture and Design. Information regarding
registration periods and procedures is found on the Registrar’s website (http://registrar.uark.edu/).

Registration Periods
Students must register during one of the formal registration periods. Currently enrolled students are expected to register during the priority registration held each semester for the following semester. New freshmen are expected to register during orientation. New freshmen not already registered during orientation should register during the open registration period that immediately precedes the beginning of classes each semester. New transfer students should contact their academic college for advising and registration information. There is a late registration period of five days at the beginning of fall and spring semesters, a one-day late registration period at the beginning of intersessions and a one- or two-day late registration period at the beginning of the summer sessions, but students may find that many classes are filled.

Student Addresses
It is the responsibility of all students to maintain and correct their addresses with the university and to report any change of address promptly either in writing to the Office of the Registrar or on the Student Information System (http://isis.uark.edu/). Failure to do so may result in undelivered official correspondence and announcements. Emergency contact information is also required.

Important academic announcements are frequently sent to the students through university-assigned email accounts. Students must check this account frequently to avoid missing critical notices.

Identification Cards
Identification cards are made at orientation and at the ID Card Office during the year. Several privileges on campus require an ID card, and it can be used as a debit card for purchases at various locations throughout the campus. Part-time students are also eligible for a card.

Academic Advising
Academic advising is an active, ongoing exchange between the advisers and students, grounded in teaching and learning. Advising is based on students gaining accurate and appropriate information and direction to help make their educational experience relevant, coherent, and meaningful. It is a process that assists students in connecting with the University of Arkansas, making thoughtful decisions related to their academic experiences, and maximizing their educational and career opportunities. Quality academic advising is essential to achieving the university’s vision. (Academic Advising Council Mission Statement, 2010)

While procedures may vary among schools and colleges, all successful academic advising should include the following:

- A mutual respect between adviser and student with the student possessing final responsibility for successful completion of a degree.
- Respect for students’ ethnic and racial heritage, age, gender, culture, national origin, sexual orientation, and religion, as well as their physical, learning, and psychological abilities.
- A developmental and educational process that occurs over time.
- Consideration of individual students’ interests, abilities, and needs.
- A collaborative effort to connect students to campus resources and services.
- Reasonable availability and accessibility to advisers.
- Interpretation of University of Arkansas, college, and departmental rules and courses.
- A student’s understanding of the purpose and nature of the university core courses.
- Recommendation of appropriate courses.
- A student’s understanding of and progress toward academic requirements.
- General information regarding career options and opportunities, with appropriate referrals as necessary.
- An understanding of and adherence to laws and regulations that relate to academic advising.
- Adherence to the highest principles of ethical behavior.

The University of Arkansas is committed to developing each student to his or her fullest potential. To this end, programs in each college have been established to improve the academic achievement and persistence of students on academic warning and of other students in need of academic assistance. Such assistance is provided through a variety of instructional and informational services.

Courses That Do Not Count toward a Degree
The following courses do not count toward degree credit in any college or school: ENGL 0002 Basic Writing, ENGL 0013 Reading Strategies for College Students, MATH 0001L College Algebra Laboratory I, MATH 0002L College Algebra Laboratory II and MATH 0131L Quantitative Reasoning Laboratory.

The following courses do not count toward any degree in the College of Engineering: MATH 1203 College Algebra (ACTS Equivalency = MATH 1103), MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203), MATH 1284C Precalculus Mathematics (ACTS Equivalency = MATH 1305), and ENGL 2003 Advanced Composition.

Adding and Dropping Courses
A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students may add courses during the first five class days of a fall or spring semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 – Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/fayetteville/avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 – Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/avcf/5180.php).

A student may drop a full-semester course during the first 10 class days of a fall or spring semester without having the drop shown on the official academic record. After the first 10 class days, and before the drop deadline of the semester, a student may drop a course, but a mark of “W,” indicating the drop, will be recorded. A student may not drop a full-semester course after the Friday of the thirteenth week of classes in a fall or spring semester. Drop-add deadlines for partial semesters, intersessions, and summer sessions are listed on the semester calendars located on the Office of the Registrar’s website (http://registrar.uark.edu/).
Audit Registration

Students wishing to audit a class should contact the instructor teaching that class and request permission to audit. If the instructor approves the audit, the academic department will register the student in that class as an audit. Auditing of a class is allowed on a space-available basis, and a student must pay fees for that class. The instructor shall notify the student of the requirements for receiving the mark of “AU” for the course being audited. The instructor and the student’s dean may drop a student from a course being audited if the student is not satisfying the requirements specified by the instructor. The student is to be notified if this action is taken. The only grade or mark that may be awarded is “AU.”

Enrollment Status and Course Load

The enrollment status of undergraduate students is based on the number of hours enrolled in a term. The university recognizes full-time status as carrying a minimum of 12 semester hours in a regular (fall and spring) and summer term. Students should be aware that the minimum number of hours is insufficient for completion of a four-year degree program in eight academic semesters (four years). Since most university degree programs require a minimum of 120 semester hours, or 30 hours per year, a student should earn 15 hours per semester to complete most degree programs in four years (eight semesters). The university offers degree-completion plans; see the Office of the Registrar’s website (http://registrar.uark.edu/425.php) or the Academic Regulations (p. 86) section of this catalog.

The chart below shows the enrollment status for each term, based on hours enrolled.

Number of Hours Allowed per Semester

The number of hours in which a student is allowed to register includes self-paced (correspondence) courses taken through Global Campus.

1. Undergraduate students who wish to enroll in more than 18 hours in a regular term must be approved by their academic dean’s office. Enrollment in an intersession is limited to a maximum of one lecture or lab course, with the exception of co-requisite courses, for a maximum of four hours.

2. Undergraduate students who wish to enroll in more than 21 hours in a regular term must get a recommendation from their academic dean’s office and be approved by the Academic Standards Committee. (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php)

3. Undergraduate students who wish to take more than 7 hours in one five-week summer session or more than 14 hours total in the summer term must get a recommendation from their academic dean’s office and be approved by the Academic Standards Committee. (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php)

4. For students with severe injury or illness of a temporary or permanent nature, less than 12 hours may be certified on a semester-by-semester basis as full-time with the approval of the student’s dean and the concurrence of a physician or licensed examiner.

Online Credit

Online Credit Hours for On-Campus Undergraduate Students

Note: To accommodate the move to more online class sections caused by COVID-19, the restriction that limits the number of online courses that on-campus program undergraduate students can enroll in has been removed in UAConnect for summer and fall 2020. This means that UAConnect won’t enforce the 8-hour limit for freshmen or the 12-hour limit for all other undergraduates that is currently part of this policy. This just affects the ability for students to enroll in online classes for summer and fall 2020 and does not change the 35 percent limit of online classes for on-campus degree programs.

Any student pursuing an on-campus (face-to-face) undergraduate degree from the University of Arkansas may take up to 35 percent of the total credit hours required to complete the degree, of regular online (semester/summer) and self-paced online (correspondence) courses for degree credit.

- A freshman (first 30 hours) may take no more than two courses (8 hours) online.
- No student can enroll in more than 12 hours of online courses in any given semester.
- For students that have transferred academic credits from other institutions, the percentage of total credit hours obtained at the University of Arkansas through regular (semester/summer) online and self-paced online (correspondence) courses for degree credit cannot exceed 35 percent of the total remaining hours needed to complete the degree after transfer credits are accounted for.
- Exemption from this policy may apply for students in their last semester. All exemption requests must be signed by the department chair and Dean’s office that oversee the degree program the student is pursuing.
- All online courses must include the course limits in the class notes presented to students when they register on UAConnect. For instance, the class notes for each class section should include:

  Students pursuing an on-campus (face-to-face) undergraduate degree at the University of Arkansas have the following credit-hour restrictions for online and self-paced courses:

  - Only 35 percent of the total credit hours required to complete the degree can be obtained through online and self-paced course
• A freshman (fewer than 30 credit hours earned) may take no more than two online and self-paced courses (8 credit hours)
• No student can enroll in more than 12 online and self-paced hours in any given semester
• For students that have transferred academic credits from other institutions, the percentage of total credit hours obtained at the University of Arkansas through regular (semester/summer) online and self-paced online (correspondence) courses for degree credit cannot exceed 35 percent of the total remaining hours needed to complete the degree after transfer credits are accounted for.
• Other restrictions may apply due to federal financial aid policies.

* For students on financial aid, no more than 6 of these 12 credit hours can come from self-paced online (correspondence) courses. Other financial aid regulations and policies may be applicable on a case by case basis.
‡ International students enrolled full-time are limited to 3 credit hours of online courses per academic term due to federal policies.

Pass Fail

Registration for Grades of Pass-Fail for Undergraduates

Undergraduate students in some programs may register to take certain courses on a pass-fail basis. In such cases, a mark of “P” (passed) or a grade of “F” (failed) will be recorded. The grade will remain either “P” or “F” and may not be changed at a later date.

Students in the Fulbright College of Arts and Sciences, the Fay Jones School of Architecture, and the Dale Bumpers College of Agricultural, Food and Life Sciences are eligible to enroll for certain courses on a pass-fail basis under the following conditions:

1. Students should contact the instructor teaching that class and request permission to enroll for a pass-fail grade. Instructors may deny this request when it is not consistent with course goals or methods (e.g., if there is significant group work or other types of collaboration by students). If the instructor approves, students should then seek approval from their adviser. (Students in Agricultural, Food and Life Sciences must also have the approval of their academic dean.)
2. That the student has attained sophomore rank or higher.
3. That the student is not on academic probation and has achieved a cumulative grade-point average of at least 2.00.
4. That such enrollment is limited to one course per semester.
5. That the total enrollment on a pass-fail basis be limited to no more than 18 hours in any student’s degree program.
6. That the courses involved are general electives and are not required as part of the student’s program, including major, minor, concentration, etc., or State Minimum Core requirements. Courses being used to fulfill any specific program requirement or to complete a State Minimum Core requirement are excluded from the pass/fail grading option and must be taken as a regularly graded course.
7. Registration for pass-fail credit must be completed prior to the final date for changing registration by adding a course.

Instructors can submit only a “P” or “F” grade on the final grade roster for a student approved for the pass-fail option. In order to receive a “P” the student must earn a grade of “C-minus” or above in the course. The “P” mark will not be counted in grade point average but will increment hours earned; the “F” grade will be counted in the grade point average.

Students in the College of Education and Health Professions may enroll in courses on a pass-fail basis under the same conditions but only in courses offered by the Fulbright College of Arts and Sciences or the College of Education and Health Professions. Walton College of Business and College of Engineering students may not take courses on a pass-fail basis.

Student Classification

Definitions of undergraduate student classification are as follows:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Course Hours Passed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>Less than 30 hours</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 or more hours but less than 60</td>
</tr>
<tr>
<td>Junior</td>
<td>60 or more hours but less than 90</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more hours</td>
</tr>
</tbody>
</table>

Withdrawal from the University

Withdrawal from the University of Arkansas means withdrawing from all classes that have not been completed up to that time. A student who leaves the university voluntarily before the end of the fall or spring semester must withdraw from all classes on the student registration system or notify the Office of the Registrar in writing. Withdrawal may occur anytime during the semester through the last day of classes. Withdrawal deadlines for summer sessions are listed on the semester calendars located on the Office of the Registrar’s website (http://registrar.uark.edu/). Students who do not withdraw officially from a class they fail to complete will receive an “F” in that class. Students withholds on their registration should contact the Office of the Registrar for assistance in processing their official withdrawal from the university.

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 – Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/policies/fayetteville/avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 – Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/policies/fayetteville/avcf/5180.php).

Fee and Cost Estimates

Educational expenses will vary according to a student’s course of study, personal needs, and place of residence. Student progress or general course of action in pursuit of higher education at the University of Arkansas is determined during the application and acceptance process. At the conclusion of the application and acceptance process, the progress or general course of action for each student will be assigned a category, called a career.
The career categories at the University of Arkansas — in order of magnitude by the cost of tuition per credit hour — are Agricultural & Food Law, Law, Graduate, and Undergraduate. Students concurrently enrolled in multiple careers will be assigned one primary career for all tuition billing purposes, called a billing career, based on the order of magnitude listed above. The Office of the Registrar is responsible for assigning the appropriate billing career. Students pursing an Undergraduate career will also be classified by undergraduate program. The undergraduate programs of College of Education and Health Professions' plan of Nursing and the Fay Jones School of Architecture and Design's undergraduate program of Architecture have specific tuition rates, while all other undergraduate programs are the Undergraduate tuition rate. Similar to career, although a student may be concurrently enrolled in multiple undergraduate programs, the Office of the Registrar will assign each student only one primary undergraduate program for tuition billing purposes based on the order of magnitude by the cost of tuition per credit hour. All fees, charges, and costs quoted in this catalog are subject to change without notice. A survey tool for tuition and fee estimation is available at the Treasurer's website (http://treasurer.uark.edu/Tuition.asp?pagestate=Estimate).

Financial obligations to the University of Arkansas must be satisfied by the established deadlines. Payment may be made at the University Cashier's Office in the Arkansas Union, Room 214, by cash, personal check, money order or certified check. E-check (electronic check) and credit/debit payments are made online on UAConnect (http://uaconnect.uark.edu). If you pay with a debit or credit card, there is a convenience fee charged of 1.8 percent.

Acceptance of payment for fees does not imply academic acceptance to the university.

Estimated Expenses

Estimated Necessary Expenses for an Academic Year

Estimates of necessary expenses listed below are for the 2019-20 academic year for a typical undergraduate student taking 30 credit hours per academic year at the University of Arkansas:

</tbody>
</table>

* The standard undergraduate in-state tuition rate is $252.28 per credit hour. Students enrolled in College of Business courses are charged $335.53 per credit hour in-state tuition. Students in the School of Architecture and Design are charged $277.43 per credit hour in-state tuition. Students enrolled in College of Engineering courses are charged $295.17 per credit hour in-state tuition. Nursing students are charged $298.22 per credit hour in-state tuition.

** University fees per year include the following student-initiated and student-approved fees:

- Student Activity fee calculated at $2.71/credit hour — $81.30
- Student Health fee, calculated at $7.25/credit hour — $217.50
- Media fee, calculated at $0.90/credit hour — $27.00
- Transit fee, calculated at $3.09/credit hour — $92.70
- Network Infrastructure and Data Systems fee at $10.78/credit hour — $323.40
- Facilities Fee, calculated at $18.85/credit hour — $565.50
- College of Arts and Sciences Fee at $14.06/credit hour — $421.80
- Library Fee, calculated at $2.91/credit hour — $87.30

*** Weighted average expenses for living in a residence hall, double occupancy, with an unlimited meal plan. Actual room and board fees vary.

**** Budget amounts were adjusted for rounding to accommodate UAConnect budgetary rules.

When paying tuition, room and board, and associated fees, anticipated financial aid for a current semester may be deducted when it is listed as anticipated aid on the student's account. Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

The latest information regarding costs and other aspects of university life may be obtained by calling or writing the Office of Admissions, 200 Hunt Hall, University of Arkansas, Fayetteville, AR 72701. In Arkansas call 1-800-377-8632; from outside of Arkansas call 479-575-5346.

Fee Adjustments

A currently enrolled student who has registered during the advance registration period should make any necessary or desired schedule adjustments such as adding or dropping courses or changing course sections during the schedule-adjustment period of the same semester. Students who drop classes will have their fees adjusted according to Fayetteville Policies and Procedures 330.0 – Tuition and Fee Adjustment Policy for Dropping Classes (https://vcfa.uark.edu/polices/fayetteville/avcf/3300.php). Drops and withdrawals are two different functions. In a drop process, the student remains enrolled. The result of the withdrawal process is that the student is no longer enrolled for the term. Fee adjustment deadlines for an official withdrawal are noted in Fayetteville Policies and Procedures 518.0 – Tuition and Fee Adjustment Policy for Official Withdrawal (https://vcfa.uark.edu/polices/fayetteville/avcf/5180.php).

Student Invoices

Students who pre-register for a semester will be invoiced approximately six weeks prior to the first day of classes. The Treasurer's Office will send out an email notification when the student invoices are available on UAConnect. Students should log into UAConnect (http://uaconnect.uark.edu), navigate to the Treasurer's Office tile, and click the 'Student Invoice' link.

Late Fees

Students are required to pay all charges by the posted payment deadline. Students who fail to pay all charges or who fail to execute an installment payment plan by the deadline may be assessed a late payment fee equal to the outstanding balance, not to exceed $75.00.
Any student with an outstanding balance, to include registration-related fees and/or housing charges, by the last payment deadline will be assessed an additional late payment fee equal to the outstanding balance, not to exceed $75.00.

The late fee will not be waived because an invoice was not received.

**Disbursement of Refunds**

Disbursement of refunds due to overpayments by scholarships, loans, and/or grants will begin approximately five days prior to the start of classes.

The University of Arkansas has partnered with BankMobile to deliver financial aid and other school refunds to the University of Arkansas students. For more information visit the BankMobile refund page (http://bankmobiledisbursements.com/refundchoicessso/).

**Addresses**

Students may create a check address, which will be used specifically for overpayment checks. This address may be created in addition to the local and permanent addresses. If a check address is not created, the default address will be the permanent address. The student may change their address in the Student Center section of UAConnect (https://uaconnect.uark.edu/).

**Military Service**

**Students Called into Active Military Service**

When a student or student’s spouse is activated for full-time military service and is required to cease attending the University of Arkansas without completing and receiving a grade in one or more courses, they shall receive compensation for the resulting monetary loss as provided by Fayetteville Policy 504.2. The student must cease attendance because 1) the student is activated or deployed by the military or 2) the student’s spouse is activated or deployed by the military and the student or student’s spouse has dependent children residing in the household.

To be eligible for the compensation, the student must provide, prior to activation or deployment for military service, an original or official copy of the military activation or deployment orders to the university’s Veterans Resource and Information Center. A student whose spouse is a service member shall provide proof of registration with the Defense Enrollment Eligibility Reporting System (DEERS) of the Department of the Defense that establishes that dependent children reside in the household of the student and the service member.

Upon leaving the University of Arkansas because of active duty or deployment, the student may choose one of three compensatory options. The student may officially withdraw and receive full adjustment and refund of tuition and non-consumable fees for the term involved; the student can remain enrolled and arrange for a mark of “Incomplete” for each class and finish the courses 12 months after deactivation; or the student may receive free tuition and fees for one semester after deactivation. For more detailed information, read Fayetteville Policy 504.2 (http://vcfa.uark.edu/policies/fayetteville/avcf/5042.php).

**Other General Fees**

**Fee Information**

See the following sections below

- General Fees
- Program and Service Fees
Student Health Fee
Covers wellness and health promotion educational programs and healthy student behavior programs to maintain health and safety. Covers individual consultations with a certified wellness coach, consultation with a registered dietician and consultation with an orthopedic specialist from the community. Student Health Fee also covers sexual assault counseling, prevention and advocacy services. The Student Health Fee also covers several mental health services, such as 24-hour mental health emergency care, the cost for two intake assessments with a mental health clinician per semester, most group counseling sessions, case management/referral services, psychiatric nurse consultations, refill requests and outreach/advocacy.

Transit Fee
Helps fund the Razorback Bus Transit System, which services the campus and neighboring community year round.

Library Fee
Provides additional support for library materials acquisition

* Assessed each academic semester for which the student is enrolled: fall, spring, and summer

** Per Credit Hour

Program/Service Specific Fees
Some individual services at the university assess fees related to their respective service, such as the cost of administering national tests, late payments or choosing to park on campus.

### Teaching Equipment and Laboratory Enhancement Fees

These fees provide and maintain state-of-the-art classroom equipment and instructional laboratory equipment. These fees vary, based upon the student’s college of enrollment.

During the regular fall, spring and summer academic semesters, these fees are assessed on a per credit hour basis (see chart below).

Resident Status

Student Residence Status for Tuition and Fee Purposes
Board Policy 520.8 (January 18, 1985, revised)

Determination of Residence Status

1. Purpose
The purpose of these regulations is to enable the administrative officers of the University of Arkansas to classify students for the purpose of paying student fees, as either "in-state" or "out-of-state," so as to accord fairness and equity to the students of the university and to the public that provides support for the educational services provided by the university.

2. Initial Classifications

- Walton College of Business: $23.50
- College of Education and Health Professions: $17.04
- College of Engineering: $35.87

Other General Fees
Checks tendered to the university are deposited immediately. The university does not accept postdated checks. Checks returned for "insufficient funds" (NSF checks) are generally presented for payment only once. Each check returned by a bank for any reason will be assessed a returned check fee. The university may, at its discretion, verify available bank funds for any checks written for payment of indebtedness before accepting a check.

The University of Arkansas reserves the right to withhold transcripts or priority registration privileges, to refuse registration, and to withhold diplomas for students or former students who have not fulfilled their financial obligations to the university. These services may also be denied students or former students who fail to comply with the rules governing the audit of student organization accounts or to return property entrusted to them.

Requests for exceptions to university’s fees, charges, and refund policies must be made in writing. Instructions for submitting requests for exceptions to the various fees, charges, and refund policies of the university may be obtained as follows:

- For residence life and dining services fees, charges, and refund policies contact University Housing Assistant Director for Business, housing@uark.edu (%20housing@uark.edu) or (479) 575-3951.
- For parking services fees, charges, and refund policies contact: Parking and Transit, Administrative Services Building, 155 Razorback Road, (479) 575-3507.
- For other fees, charges, and refunds, contact the Treasurer’s Office, 214 Arkansas Union, Attention: Treasurer, (479) 575-5651.

Students receiving financial aid are strongly encouraged to have sufficient personal funds available to purchase books and to meet necessary expenses for at least one month at the start of school as some aid funds may not be available for disbursement.

Students are allowed to have automobiles at the university, although parking is quite limited. There is a parking permit and registration fee for each vehicle, varying in cost depending upon the parking option selected.

a. A student shall be admitted to the university in an “in-state” or “out-of-state” status for university fee purposes, as established under these regulations. Except as otherwise provided under these regulations, a student classified as “in-state” for university fee purposes at the time of admission must have established a bona fide domicile in Arkansas and must have resided continuously in this state for at least six consecutive months prior to the beginning of the term or semester for which fees are paid.

b. A bona fide domicile is a home of apparent true, fixed, and permanent nature, a place of actual residing for all purposes of living that may be distinguished from a temporary sojourn in this state as a student. The person claiming domicile in Arkansas must provide evidence of permanent connection with the State of Arkansas and demonstrate the expectation of remaining in this state beyond graduation. For purposes of implementing these policies, the administration is directed to articulate standards that will be applied in making the determination of residence.

c. Except as otherwise provided under these regulations, the domicile of an adult (18 years of age or older) or emancipated minor student shall be determined on the basis of his or her own domicile.

d. Except as otherwise provided under these regulations, the domicile and residence of an unemancipated minor student (less than 18 years of age) or an unmarried dependent who has not attained the age of 23 is legally that of the parents or surviving parent; or such other person legally standing in the place of a parent to the student and with whom the student in fact makes his or her home and who has been making substantial contributions to the support of the student for at least six consecutive months prior to the term or semester for which the fees are paid.

e. A student who cannot satisfy the criteria for Arkansas domicile and residence will be classified as an “out-of-state” student and will pay fees and tuition accordingly. The student on a temporary visa will be classified as a foreign student and will pay non-resident tuition and fees. A student who has been granted a permanent visa and has been domiciled in Arkansas for six consecutive months following receipt of the permanent visa shall be classified as an Arkansas resident for fee purposes.

f. The responsibility for registering under a proper classification for student fee purposes is placed upon the student. It is the duty of each student at each time of registration to call any question about residency classification status to the attention of the campus classification review officer in a timely fashion in order that the question may be settled (see 4. Procedures).

g. The six-month period required in paragraph A of these regulations may be waived for persons, their spouse, and their unmarried children who have not yet attained the age of 23 (dependents are the spouse and unmarried children who are legal dependents as defined by the IRS) and who move to Arkansas with attendance at the university only by a product of the primary purpose of establishing domicile in this state.

h. An unmarried student who has not reached the age of 23 years having one parent residing in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) may be considered an “in-state” student for fee purposes, even if that student resided outside the state with the other parent before coming to Arkansas to attend the university.
i. Marriage is recognized as emancipation for both females and males.

j. The spouse of a person continuously domiciled in Arkansas (for at least six consecutive months immediately prior to the beginning of the term or semester in which the fees are to be paid) upon request shall be classified as “in-state” for fee purposes.

3. Reclassifications

a. The initial classification of a student will not prejudice a different classification for following terms or semesters. However, a student’s prior domicile is assumed to continue until he or she clearly establishes a new domicile in Arkansas (see #4 below).

b. A student previously classified as “out-of-state” may be reclassified as “in-state” for fee purposes if he or she has established a bona fide domicile in Arkansas and has resided continuously in this state in that bona fide domiciliary status for at least six consecutive months prior to his or her reclassification by the university. In order for an adult or an emancipated minor to establish a bona fide domicile in Arkansas for fee purposes, he or she must have left the parental home, must have established in this state a home of a permanent character as manifested objectively by good faith acts, and must have the expectation of remaining in this state beyond graduation. The single fact of presence in Arkansas for at least six months of attendance as a student enrolled in the University of Arkansas, or any other educational institution, neither constitutes nor necessarily precludes reclassification as one domiciled in Arkansas but will be a factor to be considered.

4. Procedures

a. A student shall have the burden of establishing any claim that he or she is entitled to be treated as “in-state” for fee purposes. Persuasive evidence to that effect must be presented in writing and verified under oath by the student. Mere claims of local domicile and duration of stay are of little weight. A student who knowingly gives erroneous information in an attempt to evade the payment of “out-of-state” fees may be subject to dismissal from the university.

b. All disputed classifications for student fee purposes, whether at initial enrollment or subsequent enrollments, and all disputed reclassifications will be decided initially on each campus by a classification review officer designated by each chancellor.

c. The chancellor of each campus will designate a campus classification appeal officer to receive petitions from decisions made by the campus classification review officer. Each campus classification appeal officer may, in his or her discretion, make investigations, receive evidence, and conduct informal hearings. After considering the case, the campus classification appeal officer will render a decision and notify the affected student of the decision in writing. Any decision of the campus classification appeal officer may be appealed to the vice president for academic affairs of the University of Arkansas System, who shall recommend final disposition to the president of the university.

d. Written notice of the appeals procedure will be provided to each student raising a question about his or her status with the campus residency classification review officer.

e. Determination of domicile will be based on a review of all pertinent facts, evidence, and circumstances that collectively show, in an objective and clear manner, the actual domicile of the student.

NOTE: In implementing these policies, it is presumed that dependent students who are classified as non-residents based upon parental/guardian domicile outside of Arkansas do not acquire Arkansas residency under Board of Trustees Policy 520.8 unless and until their parent(s)/guardian(s) have established a domicile in Arkansas, or the student has left the parental home and established a domicile in Arkansas evidenced by proof that he or she has established a home of a permanent character as manifested objectively by good faith acts, resided in Arkansas in bona fide domiciliary status for at least six consecutive months prior to his or her reclassification as an Arkansas resident, and demonstrates the expectation of remaining in this state beyond graduation.

Reclassification Deadlines

Students who have established a bona fide domicile in Arkansas following initial classification as a non-resident must request reclassification if they want their status recognized for fee purposes. Applications and appropriate documentation must be received by the Office of the Registrar no later than the fifth class day (second class day of a summer session) of the term for which in-state fee assessment is requested. Applications received after the deadline will be considered for the next term. All fees are to be paid by published due dates. Students who receive a favorable decision after payment will be provided a refund of out-of-state fees paid. Please direct questions about residence classification review procedures to the Office of the Registrar, 146 Silas H. Hunt Hall.

Resident Status of Native Americans

(Board Policy 520.1, “Waiver of Non-Resident Tuition for Native Americans.”)

Native American people in other states belonging to tribes that formerly lived in Arkansas before relocation, and whose names are on the rolls in tribal headquarters, shall be classified as in-state students of Arkansas for tuition and fee purposes, on all campuses of the University of Arkansas. Tribes so identified include the Caddo, Cherokee, Chickasaw, Choctaw, Creek, Delaware, Kickapoo, Osage, Peoria, Quapaw, Shawnee, and Tunica.

Resident Status of Members of the Armed Forces and Their Dependents

(Board Policy 520.7, “Fees for Members of Armed Forces and Dependents.”)

For the purpose of tuition and fees applicable for all programs of study, including distance learning programs, effective July 1, 2017, all campuses of the University of Arkansas System shall classify a student as in-state or resident, if the student meets any of the following criteria regardless of his or her residence:

1. A veteran who was honorably discharged or released from a period of not less than ninety (90) days of active duty in the United States Armed Forces within three (3) years before the date of enrollment in a program of study;

2. A dependent5 or spouse of a veteran under Paragraph 1.

3. A member of the armed forces.

4. A spouse of a member of the armed forces.

5. A Reserve Officers’ Training Corps cadet who has an executed armed forces service contract.

6. A dependent of a member of the active duty armed forces, when the member of the armed forces:

   a. is stationed in the State of Arkansas pursuant to permanent change of station (PCS) military orders;

   b. is continuously domiciled in Arkansas for at least six consecutive months before entering active military service and who maintains...
Arkansas as the permanent home of record while on active military duty, or
c. demonstrates a change of bona fide domicile from another state
to Arkansas at least 12 consecutive months prior to separation,
discharge, or retirement from active military duty. This provision is
forfeited if the military person does not return to Arkansas within
36 months after separation, discharge, or retirement from active
duty.

7. A veteran using educational assistance under either Chapter 30
(Montgomery G.I. Bill–Active Duty Program) or Chapter 33 (Post-9/11
G.I. Bill), of Title 38 of the United States Code, who lives in the State
of Arkansas while attending a school located in the State of Arkansas
(regardless of his/her formal state of residence) and enrolls in the
school within three years of discharge or release from a period of
active duty service of 90 days or more.

§3319) who lives in the State of Arkansas while attending a school
located in the State of Arkansas (regardless of his/her formal state of
residence) and enrolls in the school within three years of the
transferor’s discharge or release from a period of active duty service
of 90 days or more.

9. Anyone described in paragraphs 7 and 8 while he or she remains
continuously enrolled (other than during regularly scheduled breaks
between courses, semesters, or terms) at the same school. The
person so described must have enrolled in the school prior to the
expiration of the three year period following discharge or release
as described in paragraphs 7 and 8 and must be using educational
benefits under either chapter 30 or chapter 33, of title 38 of the United
States Code.

10. Anyone using benefits under the Marine Gunnery Sergeant John
David Fry Scholarship (38 U.S.C. §§3311(b)(9)) who lives in the State
of Arkansas while attending a school located in the State of Arkansas
(regardless of his/her formal state of residence).

3319) who lives in Arkansas while attending a school located in
Arkansas (regardless of his/her formal state of residence) and the
transferor is a member of the uniformed service who is serving on
active duty.

12. A member of the armed forces or ‘covered individual’ as identified in
Section 702 of the Veterans Access, Choice and Accountability Act of
2014.

This system-wide policy and procedure has been amended as necessary
for compliance with the requirements of 38 U.S.C. 3679, as amended, and

1 For the purpose of this policy, dependents are unmarried children
who are legal dependents of the military person as defined by the IRS.

Resident Status of Students from Texarkana,
Texas, and Bowie County, Texas
(Board Policy 520.10)

In accordance with the reciprocity agreement described in H.C.R. 32,
signed by the governor of Arkansas on February 12, 1965, Board Policy
520.10 states, “Residents of Texarkana, Texas, and Bowie County,
Texas, will be classified as in-state students for university fee purposes at
the University of Arkansas.”

Room and Board

Campus Housing
(Rates are subject to change)

Single freshmen under 21 years of age are required to live in University
of Arkansas residence halls, fraternity or sorority houses, or with their
parents, unless permission to live off-campus has been obtained through
University Housing. Permission to reside off-campus is granted on a
semester basis and must be obtained prior to enrolling or prior to the
semester in which off-campus residency is desired.

Specific questions concerning on-campus housing may be directed to
University Housing at 479-575-3951, by email at housing@uark.edu or by
visiting the University Housing website (http://housing.uark.edu/).

Summer rates for a room in a university residence hall during summer
sessions are available through the Housing office. Charges start on the
requested move-in day and run through the date of check-out.

Dining

Specific questions concerning on-campus meal plans may be directed to
University Housing 479-575-3951 or visit the Dining on Campus website
(http://www.dineoncampus.com/razorbacks/).

Fraternities and Sororities

Specific questions concerning sorority and fraternity living may be directed
to the Office of Greek Affairs 479-575-5001.

Off-Campus Housing

Students eligible to live off-campus may contact local real estate offices
for rental information or check the Off-Campus Housing website (http://
offcampushousing.uark.edu/).

Senior Citizens

Waiver of Tuition and Fees for Senior Citizens

Arkansas residents who are 60 years of age or older and show proper
proof of age may choose to have tuition and fees waived for on-campus
courses under the senior citizen waiver of fees. Admission and enrollment
under these conditions is open only on a “space available” basis in
existing classes, and students choosing to use this waiver may not
register until just prior to the beginning of the term.

Tuition Fees

Students classified as “in-state” for fee payment purposes are assessed
tuition. Students classified as “out-of-state” for fee payment purposes are
assessed additional non-resident tuition.

Official policies of the University of Arkansas Board of Trustees provide
the basis for classifying students as either “in-state” or “out-of-state” for
purposes of paying student fees. Board policies relating to residency
status for fee payment purposes are included at the end of this chapter
of the catalog. Out-of-state students who question their residency
classification are encouraged to contact the Registrar’s Office, 146 Silas
H. Hunt Hall, for more information about residency classification review
procedures.

The Arkansan Non-Resident Tuition Scholarship Award Fee will be
assessed for undergraduate non-residents (including transfer students)
and international students who are receiving the Non-Resident Tuition
Award. The fee will be 10, 20, 30 or 50 percent of the difference between
the in-state and out-of-state tuition per semester as long as students are receiving the award. To view eligibility requirements, please view the Academic Scholarship Office website (http://scholarships.uark.edu/nrta/).

**Academic Year**
Undergraduate students are assessed tuition of $252.28 per credit hour. Students with out-of-state residency status are assessed tuition of $801.87 per credit hour.

Undergraduate students enrolled in developmental instruction courses are charged tuition of $134.55 per credit hour in-state and $672.54 per credit hour for out-of-state students.

Undergraduate students enrolled in the Walton College of Business courses are charged tuition of $335.53 per credit hour in-state and $1,093.75 per credit hour for out-of-state students.

Undergraduate students enrolled in the Fay Jones School of Architecture and Design are charged tuition of $277.43 per credit hour in-state and $881.90 per credit hour for out-of-state students.

Undergraduate nursing students are assessed tuition of $298.22 per credit hour. Students with out-of-state residency status are assessed tuition of $947.89 per credit hour.

Undergraduate students enrolled in College of Engineering courses are charged tuition of $295.17 per credit hour in-state and $938.19 per credit hour for out-of-state students.

Undergraduate students enrolled in Global Campus self-paced online correspondence courses are charged tuition of $135.00 per credit hour.

**Academic Regulations**

**Academic Integrity**
As a core part of its mission, the University of Arkansas provides students with the opportunity to further their educational goals through programs of study and research in an environment that promotes freedom of inquiry and academic responsibility. Accomplishing this mission is only possible when intellectual honesty and individual integrity prevail. Each University of Arkansas student is required to be familiar with and abide by the university’s Academic Integrity Policy (http://honesty.uark.edu/policy/) at honesty.uark.edu (http://honesty.uark.edu/). Students with questions about how these policies apply to a particular course or assignment should immediately contact their instructor.

**Attendance Policy for Students**

**Attendance and Engagement:** Education at the university level requires students’ active involvement in the learning process. Therefore, students have the responsibility to attend classes and to actively engage in all learning assignments or opportunities provided in their classes. Students should treat class attendance as mandatory. Instructors have the responsibility to provide a written policy on student attendance that is tied to course objectives and included in a course syllabus.

**Excusable Absences:** There may be times, however, when illness, family crises, or university sponsored activities require a student to be absent from class. In these situations, the student is responsible for making timely arrangements with the instructor to make up work missed. The make-up work should be completed in a timeframe that has been arranged with the instructor. Such arrangements should be made in writing and prior to the absence, when possible.

Examples of absences that should be considered excusable include those resulting from: 1) student illness, 2) serious illness or death of a member of the student’s immediate family or other family crisis, 3) University sponsored activities for which the student’s attendance is required by virtue of scholarship or leadership/participation responsibilities, 4) religious observances (see Religious Observances policy tab), 5) jury duty or subpoena for a court appearance, and 6) military duty. The instructor has the right to require that the student provide appropriate documentation for any absence for which the student wishes to be excused.

**Religious Observances**
When students seek to be excused from class for religious reasons, they are expected to provide their instructors with a schedule of religious holidays that they intend to observe, in writing, before the completion of the first week of classes. The Semester Calendar (http://registrar.uark.edu/academic-dates/academic-semester-calendar/) on the Office of the Registrar’s website will inform students of the university calendar of events, including class meeting and final examination dates, so that before they enroll they can take into account their calendar of religious observances. Scheduling should be done with recognition of religious observances where possible. However, faculty members are expected to allow students to make up work scheduled for dates during which they observe the holidays of their religion.

**Final Examination Policy**
Each faculty member is required to give final examinations at times specified in the final examination schedule. (Comprehensive examinations are not the only ones which qualify as “final exams.” Generally, exams should not be given during the last class period.) Whenever circumstances make necessary a deviation from the announced schedule, clearance for such deviation must be obtained from the appropriate dean and the Provost and Vice Chancellor for Academic Affairs.

During finals week, students are required to sit for no more than two final exams in a single calendar day period. Students with three or more finals in a single calendar day period have the right to an alternative exam date(s) for each exam exceeding two. They must submit a formal request for an alternative date in writing, along with an official copy of their class schedule for verification purposes, to the professors of those classes involved to see if one will voluntarily move the exam. If voluntary accommodation is not achieved, instructors of classes with lower enrollments for the final exam will have to accommodate individual students affected before classes with higher enrollments. This process is the same when there is a final exam scheduling conflict (two or more final exams scheduled on the same date and at the same time).

Requests must be submitted on or before the last day to drop a full semester class or classes with a mark of ‘W.’ Professors will provide the student with an alternative exam date and time no later than one week after the last day to drop a full semester class or classes with a mark of ‘W.’ All rescheduled final exams are to take place during the university designated final exam dates and times. If a student has an objection to the alternative exam date/time, she or he may appeal to the instructor’s department chair.

It is the policy of the university to minimize student participation in extracurricular activities during the final examination period. No meetings, social activities, athletic events, or other extracurricular activities that require student participation will be scheduled on Dead Day or during the
Grades And Marks

Final grades for courses are “A,” “B,” “C,” “D,” and “F” (except for courses taken in the Fay Jones School of Architecture).

No credit is earned for courses in which a grade of “F” is recorded. A final grade of “F” shall be assigned to a student who is failing on the basis of work completed and who has not completed all requirements. The instructor may change an “F” so assigned to a passing grade if warranted by satisfactory completion of all requirements. Students who fail to present an acceptable reason for not having completed all course requirements including the final examination will receive the grade they would have received had they failed such requirements. In the case of an “XF” grade given for reasons of academic dishonesty, upon graduation or completion of the period of suspension, the student may request that the “X” be removed from the transcript by submitting a written request to the Provost/Vice Chancellor for Academic Affairs.

A mark of “I” may be assigned when a legitimate circumstance has prevented the student from completing all course requirements and the work completed at the time of assigning the “I” is of passing quality. It is the discretion of the instructor that determines what qualifies as a legitimate circumstance. It is recommended that the instructor, prior to the assignment of an “I” mark, document the legitimate circumstance and conditions for completing course requirements. An “I” so assigned may be changed to a grade provided all course requirements have been completed within 12 months after the end of the term in which the “I” was assigned. If the instructor does not report the grade within the 12-month period, the “I” shall be changed to an “F.” When a mark of “I” is changed to a final grade, the grade points and academic standing are appropriately adjusted on the student’s official academic records.

A mark of “AU” (Audit) is given to a student who officially registers in a course for audit purposes (see Registration for Audit (p. 69)).

A mark of “CR” (Credit) is given for a course (for example, practice teaching, certain seminars, certain honors colloquia, and courses where credit is earned by examination) for which the university allows credit toward a degree, but for which no grade points are earned.

A mark of “R” (Registered) is given to a student who is registered in a course for no credit or grade points. This is typically used at the undergraduate level for Study Abroad or other situations where a placeholder mark is needed.

A mark of “S” (Satisfactory) is assigned in courses such as special problems and research when a final grade is inappropriate. The mark “S” is not assigned to courses or work for which credit is given (and thus no grade points are earned for such work). If credit is awarded upon the completion of such work, a grade or mark may be assigned at that time, and, if a grade is assigned, grade points will be earned.

A mark of “W” (Withdrawal) will be given for courses from which students withdraw after the first 10 days of the semester and before the drop deadline of the semester.

A mark of “P” (Passing) is given to a student who officially registers in a course for Pass/Fail credit according to university policy (see Pass Fail policy). “P” grade counts as credit hours but does not affect the grade-point average.

A mark of “PD” (Passing with a D) is given to a student only when allowed as an option by university policy during extenuating circumstances, such as the COVID-19 crisis in spring and summer 2020. A “PD” grade counts as credit hours but does not affect the grade-point average.

A mark of “NC” (No Credit) is given to a student in situations where registration in the course allows for this grade. A “NC” grade does not count as credit hours nor does it affect the grade-point average.

“F,” “AU,” “CR,” “R,” “S,” and “W” marks will not be counted in the grade-point average. Grades of plus and minus are assigned grade-point values in the Fay Jones School of Architecture and Design (p. 231). The grade-point average is computed by dividing the total number of grade points by the total number of credit hours attempted in courses for which grades (rather than marks) are given. Students who utilized grade renewal or grade forgiveness in retaking courses (prior to Fall Semester 1986 and after fall 1996) have only the last grade used in computing grade-point averages.

Undergraduate Grade Exclusion Policy

Under the Grade Exclusion Policy, undergraduate students may improve their University of Arkansas (UA) undergraduate cumulative grade-point average (GPA) by requesting that the university exclude up to 9 credit hours in courses taken at the UA in which a grade of “D” or “F” was received. The excluded courses will no longer be used to compute the UA GPA. Students must file a petition with the Office of the Registrar to use grade exclusion indicating which course(s) they choose to grade exclude. The petition must be completed and approved prior to graduation. Undergraduate students who return to the UA for an additional degree(s) may use grade exclusion only for courses taken
after their most recent undergraduate UA degree was awarded. Other stipulations are:

1. Undergraduate students may select up to 9 hours of any combination of UA courses with posted grades of “D” or “F” to be excluded from their cumulative grade point average calculation.
2. Excluded courses cannot be used to satisfy degree requirements. Credit hours earned for a “D” grade in an excluded course will no longer count towards the student’s degree.
3. Grade exclusions must be posted before the undergraduate degree has been conferred.
4. The course and grade that is being excluded will remain on the student’s transcript with a notation indicating that the UA Grade Exclusion Policy has been applied.
5. Grade exclusion cannot be removed or applied to another course once it has been posted.
6. Grade exclusion for courses in which academic misconduct has been committed is allowable only in accordance with the university’s academic integrity policy.
7. Grade exclusion may result in a recalculation of a student’s academic standing, but it does not retroactively result in a refund of tuition or fees, nor does it change a student’s semester academic honors for previous semesters.
8. Excluded courses and hours will continue to be counted in calculations of satisfactory progress for financial aid eligibility.
9. Students considering grade exclusion should be aware that many graduate schools, professional schools, employers or other institutions, in considering admission or employment, may use the GPA and include all courses attempted. This means that if the cumulative GPA has been raised because of grade exclusion, then the recalculated GPA will be lower.
10. The Grade Exclusion Policy begins with the Fall 2020 semester, but may apply to courses taken before this term as long as the student has not earned an undergraduate degree from the UA or as long as the courses subject to exclusion were taken after the last UA undergraduate degree was awarded.
11. Grade forgiveness hours will be combined with grade exclusion hours when considering the credit hour limit under this policy. Therefore, any hours previously approved for grade forgiveness prior to fall 2020 will count toward the maximum 9-hour credit limit for grade exclusion.

Thus, a student who has used 3 hours of grade forgiveness may use up to 6 hours of grade exclusion.

### Academic Bankruptcy

Students returning to the University of Arkansas after an absence of five or more years may be eligible to declare academic bankruptcy if they meet the following criteria:

1. Must have been enrolled previously at the University of Arkansas, Fayetteville, as an undergraduate student and be returning as an undergraduate student.
2. Must not have been enrolled at the University during the previous five years.
3. Students who have attended another institution since their last attendance at the university must meet requirements for transfer students (2.00 GPA on all coursework attempted more than five years after last enrollment at the University of Arkansas, Fayetteville) to be eligible for readmission.
4. Must submit an application for readmission and official transcripts of all college work attempted since last attendance at the University of Arkansas by the application deadlines and submit a Declaration of Academic Bankruptcy form (http://registrar.uark.edu/1621.php) to the Office of the Registrar. The following are the conditions of academic bankruptcy:
   a. Students will forfeit all credit hours previously awarded by the University of Arkansas, Fayetteville. This includes course work completed at the university (regardless of grades earned), courses accepted in transfer, credit by examination, and any self-paced (correspondence) course work awarded.
   b. A new calculation of GPA and credit hours will begin when the student returns to the University of Arkansas.
   c. The transcript will reflect the student’s complete record (including all previous college work) with an added notation of “Academic Bankruptcy Declared.”
   d. Courses taken at another institution within five years of the last University of Arkansas enrollment will not be accepted for transfer.
   e. For the university to provide appropriate advising and (as required by Arkansas Act 1052) appropriate assessment, a student may be required to submit ACT, SAT, or ACT COMPASS test scores prior to registration for classes if, as a result of academic bankruptcy, that student is returning to the university as a freshman with fewer than 24 transfer hours.

### Academic Probation, Suspension and Dismissal

A student’s academic status at the university is determined at the end of each regular term of enrollment (fall, spring, or summer) on the basis of the student’s cumulative and/or term grade-point average (GPA) and number of hours attempted. The student’s academic status governs his or her re-enrollment status and determines any conditions associated with re-enrollment or denial of enrollment for a subsequent term. Normally, students are notified of their status individually by the university shortly after the end of each term. However, this policy statement is the formal notification to all students of the conditions that determine academic status and the consequences for each term, regardless of individual notification.
Good Status: Upon initial admission and during a student’s first term of enrollment, except for students conditionally admitted on academic probation, the student is in good status. A student remains in, or returns to, good academic status at the end of any regular term (spring, summer, fall) when the cumulative GPA is at or above the required minimum of 2.0.

Academic Probation: When a student’s cumulative grade-point average at the end of any fall, spring, or summer term is less than a 2.00 with more than three cumulative hours attempted, the student will be placed on academic probation.

First-Year Freshmen: First-year freshmen who have less than a 2.00 cumulative grade-point average at the end of their first semester of enrollment are considered at risk. During the first six weeks of their second semester, these at risk students must, at a minimum, consult with an academic adviser to develop a plan to get off of probation before being eligible to register for their third semester courses.

Removal from Academic Probation: When a student’s cumulative GPA at the end of any fall, spring, or summer term is a 2.00 or above, he or she will be removed from academic probation.

Continuing on Academic Probation: The semester grade point average a student on academic probation must earn to continue on academic probation and avoid academic suspension depends on the cumulative grade hours attempted as outlined in the academic probation chart below.

### Academic Probation Chart

<table>
<thead>
<tr>
<th>Cumulative Hours Attempted (excludes grades of W)</th>
<th>Placed on Probation If Cumulative GPA Is:</th>
<th>Continued on Probation If Semester GPA Is:</th>
<th>Removed From Probation If Cumulative GPA Is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>4-30 hours attempted</td>
<td>Less than 2.0</td>
<td>Greater than or equal to 1.8</td>
<td>Greater than or equal to 2.0</td>
</tr>
<tr>
<td>Greater than 30 hours attempted</td>
<td>Less than 2.0</td>
<td>Greater than or equal to 2.0</td>
<td>Greater than or equal to 2.0</td>
</tr>
</tbody>
</table>

Academic Suspension: A student on academic probation who does not earn the minimum required term GPA will be academically suspended. No student may be academically suspended who has not spent the prior term of enrollment on academic probation. A student on academic suspension will be on academic leave from the university for one major semester (spring or fall) and all contiguous summer and intersessions from the close of the term which resulted in the academic suspension. Thus, a student academically suspended at the end of the spring semester would not be eligible to enroll until the next spring semester; a student academically suspended at the end of the summer semester would not be eligible to enroll until the following spring term; and a student academically suspended at the end of a fall semester would not be eligible to enroll until the next fall semester. The first enrollment when returning from academic suspension may not be in an intersession.

Students who sit out for one major semester after the term of the academic suspension may apply for readmission to the university.

A student who does not earn credit from another institution may be readmitted on academic probation following academic suspension. A student who earns credit from another institution (s) during or subsequent to the academic suspension must apply to the university for admission as a transfer student and, if readmitted, will be on academic probation following academic suspension. A student readmitted on academic probation after academic suspension must make a semester grade-point average of at least 2.00 for each semester, (fall, spring, or summer) until he or she is removed from probation. Failure to do so will result in academic dismissal.

Academic Dismissal: A student who returns to the university after an academic suspension is continued on academic probation following suspension and must make a semester grade-point average of at least 2.00 for each fall, spring, or summer term until he or she is removed from academic probation. Failure to do so will result in academic dismissal.

Returning after Academic Dismissal: Students who sit out for at least one full academic year and submit at least 12 hours of general education core classes or upper–level classes with at least a 3.0 grade-point average in this coursework will be eligible for automatic readmission from their first academic dismissal. This can be done by taking self-paced courses through the Global Campus (http://globalcampus.uark.edu) at the University of Arkansas or by courses taken at another regionally accredited institution of higher education. Students meeting these requirements must complete a petition to the Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php) and submit official transcripts for all work attempted since being academically dismissed. The petition is to be submitted to the Office of the Registrar (http://registrar.uark.edu/) before applying (http://admissions.uark.edu/) for readmission.

Students who do not meet these conditions, and students who have been academically dismissed more than once, must petition to the Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php) to be considered for readmission. It is strongly recommended that students meet with an academic adviser to develop a plan for returning from academic dismissal. Students approved for readmission from academic dismissal must reapply (http://admission.uark.edu/) for admission.

A student who reenters the university by favorable action of the Academic Standards Committee after an academic dismissal is continued on academic probation after academic dismissal and must make a semester grade-point average of at least 2.00 for each semester until the cumulative GPA reaches 2.00 and he or she is removed from academic probation. Failure to do so will result in academic dismissal.

Individual colleges or programs have the discretion to set academic admission and continuation standards for specific programs that are higher than university standards.

1 Students who are not in good academic standing at the University of Arkansas may be enrolled in no more than six hours of self-paced Global Campus courses at any one time.

**Waiver of Academic Policies**

The Academic Standards Committee (http://registrar.uark.edu/student-records/academic-standards-committee-petition.php), composed of faculty and students, serves as a referral body for matters of academic probation, suspension, dismissal, and other rules and regulations related to academic progress and graduation. Petitions for waiver of academic rules and information on the petitioning process may be obtained on the Office of the Registrar’s website (http://registrar.uark.edu/418.php). Students should note petitioning deadlines.
Advanced-Standing Programs
Advanced-Standing Programs
Credit by Examination

There are two ways undergraduate students enrolled at the University of Arkansas, Fayetteville, may establish undergraduate credit by examination in courses offered by the university: either through the University of Arkansas Credit by Examination Program (see the next section), or through approved national testing programs, such as the College Level Examination Program (CLEP), the Advanced Placement Program (AP), or the International Baccalaureate Program (IB).

Credit established by examination must be evaluated in terms of the specific program the student wishes to pursue. The decision regarding the appropriate application of such credit to a degree program will be made in each college or school. Credit established by examination will be applied to a degree program in the same manner as credit established in any other way. If credit is earned by examination, the mark of CR will be entered in the student’s record. Grades are not assigned.

In certain instances, however, instead of actually receiving credit in semester hours, a student may receive advanced standing and be authorized to enroll for advanced courses in the subject matter area.

Credit by examination may not be used to satisfy minimum residency requirements as established by each college or school. Credit by examination is recorded only for students currently enrolled at the University of Arkansas, Fayetteville.

University of Arkansas Program

The following conditions apply to the departmental programs for credit by examination:

1. The student must apply for such examination using forms available in the academic dean or department office. Permission to take the examination must be obtained from the faculty of the department offering the course. The faculty of each department is responsible for designating the courses in that department that may be challenged by examination.
2. The appropriate department or college offering the course will designate and administer the examination.
3. A passing grade on the examination must be “B” or above. A second trial for credit by examination in that course will not be permitted.
4. A $25 credit by examination fee will be assessed per course.

National Testing Programs

When credit by a national examination is granted, the student’s academic record will list the score used as a basis for credit as well as the type of examination used to establish credit, such as CLEP subject examination or general examination, AP examination or IB examination.

Credit is awarded on the basis of official score reports, which must be sent by the national testing service directly to the Office of the Registrar, 141 Uptown East, University of Arkansas, Fayetteville, AR 72701. Minimum score requirements as established by the University of Arkansas, Fayetteville, must be met to receive credit.

College Level Examination Program (CLEP)

The University of Arkansas is a CLEP testing center and is authorized to administer CLEP examinations both on a national basis and on an institutional basis. However, CLEP examinations may be taken at scheduled times at any national test center, and the results sent to the University of Arkansas. The test center code number and score recipient code number for the University of Arkansas is 6866. For information or to make application, write to the Office of Testing Services, 1435 W. Walton Street, 1 University of Arkansas, Fayetteville, AR 72701, or telephone 479-575-3948.

Approval has been granted by the appropriate governing body, upon recommendation of the academic department, to award credit in the following courses by the use of CLEP examinations. Minimum scores for the paper-based version and the new computer-based version were established by the departments of the subject areas concerned.

Please note that minimum scores for credit for computer-based CLEP exams may differ from paper-based CLEP examinations.

## Advanced Placement Program (AP)

The Advanced Placement (AP) Program of the College Entrance Examination Board gives students the opportunity to pursue college-level studies while still in high school and, with an appropriate score on an AP exam, to receive advanced placement and/or credit upon entering the University. The AP examinations are offered annually by high schools that participate in this program. The appropriate UA governing body, upon recommendation of the academic department, has authorized credit and/or placement for students who present qualifying scores in the AP courses listed below.

**Note:** While changes surrounding the administration of AP exams occurred during the COVID-19 pandemic, the University of Arkansas has not changed its policies regarding course credit for these exams. All AP exams, whether taken online or onsite, are accepted.

### Symbols for placement and credit:

- **P** = placement;
- **Pq** = qualified placement (student may be placed in an advanced course, with credit awarded for prerequisite courses upon satisfactory completion, subject to departmental review);
- **C** = credit;
- **Cq** = qualified credit (placement and credit subject to departmental review);
- **E** = Exempt.

exams, whether taken online or onsite, are accepted. The University of Arkansas has
changed its policies regarding course credit for these exams. All IB courses taken
during the COVID-19 pandemic, the University of Arkansas has not
established by the departments of the subject areas concerned.

Approval has been granted by appropriate academic departments
to award credit in the following courses. The minimum scores were
established by the departments of the subject areas concerned.

* Students must pass a departmental test to receive credit

** To receive credit for courses preceding the course for which AP credit
has been granted, students must enroll in and complete with a grade
of “C” or higher, that course which follows in sequence the course for
which AP credit was granted.

*** At most, 3 hours credit allowed for AP Statistics.

**International Baccalaureate**

The International Baccalaureate (IB) program is a comprehensive and
rigorous two-year high school curriculum offered in the United States
and in 72 countries around the world. The IB program provides students
with a balanced education, facilitates geographic and cultural mobility,
and promotes international understanding through a shared academic
experience. The IB program gives students the opportunity to pursue
college-level studies while in upper secondary school and to receive credit
for final examinations upon entering the University.

The IB examinations are offered annually, usually in May, by high schools
participating in this program. Students seeking credit for examinations
must request that a final, official IB transcript of certificate or diploma
results be sent by mail to the Office of the Registrar, 146 Silas H. Hunt
Hall, University of Arkansas, Fayetteville AR 72701. These materials may
be requested from International Baccalaureate North America,
200 Madison Avenue, Suite 2007, New York, NY 10016, telephone:
212-696-4464.

Approval has been granted by appropriate academic departments
to award credit in the following courses. The minimum scores were
established by the departments of the subject areas concerned.

*Note: While changes surrounding the administration of IB exams occurred
during the COVID-19 pandemic, the University of Arkansas has not
changed its policies regarding course credit for these exams. All IB
exams, whether taken online or onsite, are accepted.*

Eight-Semester Degree Completion Policy

The University of Arkansas is committed to helping all of its students identify and achieve their educational goals. The many University of Arkansas programs of study and activities provide opportunities to students to follow varied career and learning paths and enjoy educational experiences of different kinds. Plans for degree completion are available in the Catalog of Studies and from colleges, schools, and departments. Academic advising services in each college and school assist students in making plans for their own degree completion and in carrying them out consistent with students' abilities, circumstances, and preferences.

The Eight-Semester Degree Completion Program (DCP), makes it possible for qualified degree-seeking freshmen to express their intention — and assume the associated obligations — to complete identified bachelor's degree programs of study in four academic years. The list of majors and degrees designed to be completed in eight semesters and for which the DCP is available is maintained by each college and school. It may be accessed from the DCP Web site and is published in the Catalog of Studies. Colleges, schools and individual departments can provide this list as well. Before registering for their first semester of study, all freshmen entering the university must accept participation, decline participation, or acknowledge ineligibility for participation in the DCP by signing the Participation Document. New freshmen will be notified regarding how to view the Participation Document on-line and learn more about registering for a Degree Completion Program. A student's participation or nonparticipation in the DCP will not affect scholarship eligibility.

Students who are admissible to the DCP and who choose to participate have the responsibility for meeting all requirements specified by the university and their degree completion plan and the responsibility for complying with the DCP policy. The university is responsible for providing academic support and for ensuring that students can complete university, program and course requirements within eight consecutive semesters. The university will also provide students with timely notifications to the student’s official university e-mail address regarding advising, registration, and other requirement completion information.

A student may choose at any time to discontinue participation in the DCP without penalty. Students are encouraged to discuss such choices with an authorized academic adviser for the program of study. Participation and subsequent withdrawal from the DCP will not jeopardize the student’s opportunity to complete the degree program, to do so in a timely manner, or to complete another degree program or major by fulfilling program requirements.

In some circumstances it may be in a student’s best interest to decline participation or withdraw from the DCP. Examples include students who are not prepared to choose a major before enrolling for the first semester and students who feel that a full semester class load of 15 or 16 hours will be too heavy given other responsibilities. Other students may plan to study abroad for a semester in an institution where the required courses are not offered or to participate in a semester-long internship program not included in the program plan. A decision or need to work or participate in certain time-intensive curricular and extra-curricular activities such as band and intercollegiate athletics may make it impossible to schedule all requirements in some programs. A student may be required to withdraw from the DCP as a result of illness or other personal circumstances that make it impossible to do his or her best work, continue as a full-time student, or complete requirements in the time available. There are also a number of acts and events that may or will cause the DCP agreement to be voided; these are identified below in the section “Student acts and other events that will or may void the degree completion plan agreement.”

Requirements for Admission to the Eight-Semester Degree Completion Program (DCP):

1. Participants must begin their program of study in the fall semester as first-time, full-time freshmen and must be committed to be full-time students able to enroll in and successfully complete at least 31-36 hours each academic year.
2. Participants must have chosen a major included in the DCP, must meet all admission requirements for the chosen program of study including applicable program grade point average and other grade requirements, and must have been admitted to programs requiring formal program admission.
3. Participants must be qualified to begin enrollment in the fall semester without being required to take remedial courses in math, English, or reading or other course prerequisites to entry-level courses in the chosen program of study.

Requirements for Continuance and Completion of the Eight-Semester Degree Completion Program:

1. Students must follow exactly the degree completion plan for the chosen major and must meet all the specified requirements in their degree plan each semester unless an alternative is approved by an authorized academic adviser for their program or unless they have already met the requirement.
2. Students must be continuously enrolled in and successfully complete at least 31-36 semester credit hours of appropriate course work each academic year as outlined in their degree completion plan.
3. Students must make satisfactory academic progress as defined by the university and degree program and must maintain the grade point average required by the university and the program of study.
4. Students must monitor their own progress in meeting the requirements identified in their degree completion plan, consistent with the program plan.
5. Students must register for classes at the first/earliest assigned time during their designated registration period each semester for the following term. For courses required for graduation, students must accept any available course or class section that does not conflict with other required courses. Students should understand that special scheduling accommodations cannot be guaranteed for work or other activities including athletics and band.

Students must seek assistance from an authorized academic adviser for their chosen program of study if they are unable to identify or register for any course(s) required for that semester in their degree program. For situations in which an authorized academic adviser for the program cannot identify a required course for the student to take, the adviser must notify the department chair and dean for the student's program of study that it has not been possible for the student to complete registration for a required course for the next semester of enrollment. Notification must be made in writing immediately following the unsuccessful attempt to register. Consistent with the terms of the degree completion program, the chairperson or dean will identify an alternate course, in writing, to fulfill graduation requirements or will provide an override to allow the student to enroll in the required course(s).

Students must complete registration no later than the last official day of class for the fall or spring term preceding the next term of
6. Students must have prior written approval by an authorized academic adviser before enrolling in any course at another institution (such as concurrent enrollment, enrollment during a summer term, or study abroad) if the student wishes to transfer the course and have the course included in the coursework submitted for the degree completion plan.

7. Students must confer with an authorized academic adviser for their program before withdrawing from a required course as such a withdrawal will void the DCP agreement.

8. Students must at all times maintain an accurate local address, and telephone number in official university records. Students may make changes to such information in the Student Information System Self Service component as needed and should make them immediately following any change. Students may also make changes by written notice to the Registrar.

9. Students must respond in a timely way to any official notice or message from an authorized academic adviser and to any official notice regarding registration, degree progress, financial obligations or aid, or any other university requirement.

10. Students must make timely application for all necessary financial assistance, consistent with deadlines.

11. Students must meet all university degree requirements (including formal application for graduation consistent with deadlines and requirements as established by the Registrar for the semester in which the student is scheduled for graduation).

Student Acts and Other Events That Will or May Void the Degree Completion Plan Agreement:

1. Withdrawing from (“dropping”) a required course
2. Receiving a failing grade in a required course or receiving a grade below that required by the program
3. Changing one’s major or degree program
4. Withdrawing from the University of Arkansas
5. Failure to meet any degree requirement(s) as specified and in the time specified
6. Unauthorized non-payment or delayed payment of any tuition or fees
7. Incurring a disciplinary action affecting the student’s enrollment
8. Failing to comply with any other requirement of the Eight-Semester Degree Completion Policy.

Appeal Process
A student may appeal the voiding of the DCP to the dean of the college or school in which the student is enrolled. The appeal process requires that the student submit a statement of the basis for the appeal to the dean in writing within 30 days following notification of the voiding of the program, with a copy to an authorized academic adviser for the program. The dean will notify the student and the adviser of the outcome of the appeal within 60 days after receiving the statement.

The university provides semester-by-semester plans to help students complete their degrees in a timely manner. Immediately following are links to plans that qualify for the university’s Eight-Semester Degree Completion Policy. Below them are plans that do not qualify for the eight-semester policy but which also provide a road map to finishing most degrees in four years. Following those are plans for professional programs that usually take five years.

- Theatre B.A. with Design and Technology Concentration (http://catalog.uark.edu/plangrids/theatre_ba_designandtechnology/)
- Theatre B.A. with Performance Concentration (http://catalog.uark.edu/plangrids/theatre_ba_performance/)

Five-Year Plans

The following plans do not qualify for the Eight-Semester Degree Completion Policy, in part because they are intended to be five-year professional programs. However, these plans offer students a road map to complete their degree in five years.

- Architecture B.Arch. (p. )
- Landscape Architecture B.L.A. (p. )

University Course Requirements

The University of Arkansas requires every undergraduate degree program to include common coursework across the university’s undergraduate majors. This coursework satisfies the Arkansas state minimum core (p. 96) for a college degree and the university’s general education coursework (p. 90).

The courses that satisfy the state minimum core also fulfill many of the university’s general education requirements, although some majors specify courses beyond the state minimum that meet the general education requirements.

General Education Requirements

The University of Arkansas’ general education program provides a rigorous liberal education developed and fostered across a student’s entire educational experience. The curriculum prepares students for the challenges and opportunities of the 21st century by strengthening critical and ethical thinking skills, improving communication, and enhancing understanding of human and cultural diversity.

Furthermore, the general education program is designed to help students complement their major program of study with an understanding of artistic, humanistic, and scientific contexts for use throughout their lifetime as engaged global citizens.

Eleven learning outcomes reflect the six learning goals of the general education program. For each learning outcome, a series of learning indicators detail specific knowledge, skills, and attitudes to be developed in students.

Goals

Each undergraduate major leading to a degree requires coursework that together meet the state minimum requirements (p. 96) and the university’s general education requirements.

The general education requirements are divided into six thematic goals for students:

GOAL 1: Strengthen written, oral, and multimodal communication abilities.
The two learning outcomes associated with this goal are for students to be able to write clear, correct, and effective prose as well as to be able to communicate with a variety of audiences in writing and speaking.

GOAL 2: Build core skills of quantitative literacy.

The learning outcome under this goal is for students to have the ability and habit of mind to seek quantitative information and be able to apply it, using critical reasoning and analysis to solve algebraic problems and interpret results.

GOAL 3: Develop a working knowledge of how scholars and artists think and act in fundamental areas of study.

The four learning outcomes under this goal are for students to articulate and apply the following:

- Concepts from the fine arts or performing arts
- Aesthetic, humane, and ethical sensibilities of the humanities
- Principles of human interactions of individuals, groups, and institutions
- Through experiment and observation, the basic principles that govern natural phenomena

GOAL 4: Expand diversity awareness, intercultural competency, and global learning.

The two learning outcomes for this goal are for students to learn to interact appropriately within intercultural contexts and develop familiarity with concepts of diversity in the United States.

GOAL 5: Demonstrate critical thinking and ethical reasoning.

The learning outcome for this goal is for students to demonstrate essential principles of critical thinking and ethical reasoning and apply them to the evaluation and construction of rational and moral arguments.

GOAL 6: Gain the ability to synthesize, integrate, and apply knowledge developed throughout the undergraduate years.

The learning outcome for this goal is for students to be able to reflect upon and explain how they use the skills and abilities embodied in Goals 1 through 5 in completing an integrative project during their junior or senior year.

Goal 1

Strengthen written, oral, and multimodal communication abilities.

The two learning outcomes associated with this goal are for students to be able to write clear, correct, and effective prose as well as to be able to communicate with a variety of audiences in writing and speaking.

Learning Outcome 1.1

Upon reaching this goal, students will be able to write clear, correct, and effective prose, crafted to achieve a range of purposes and address a variety of audiences, incorporating and citing sources gathered from primary (observational) or secondary (bibliographic) research.

Learning Indicators for Learning Outcome 1.1: To successfully achieve this outcome, students will complete these five indicators:

- Focus primarily on how to generate written texts, receiving explicit instruction in how to analyze audiences and rhetorical situations, how to follow the examples of model texts, and how to revise.
- Complete at least four substantial writing assignments and produce at least 5000 words of prose.
- Incorporate specific feedback into their writing, in order to help them revise and edit for clarity, force, and correctness.
- Critically analyze the effectiveness of written prose.
- Incorporate and cite sources gathered from primary (observational) or secondary (bibliographic) research in their writing.

Courses: The following courses meet the general education requirements for Learning Outcome 1.1:

<table>
<thead>
<tr>
<th>Course</th>
<th>Additional Outcomes</th>
<th>State Minimum Core</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 1013 or ENGL 1013H</td>
<td>No</td>
<td>English</td>
</tr>
<tr>
<td>ENGL 1023 or ENGL 1023H</td>
<td>No</td>
<td>English</td>
</tr>
</tbody>
</table>

Learning Outcome 1.2

Upon reaching this goal, students will be able to communicate with a variety of audiences not only in writing but also by speaking and using a range of electronic and digital modes.

Learning Indicators for Learning Outcome 1.2: To successfully achieve this outcome, students will complete these five indicators:

- Engage primarily in learning how to generate written, spoken, or multi-media presentations, receiving explicit instruction in how to analyze audiences and rhetorical situations, how to follow the example of model presentations, and how to revise.
- Complete at least 12 pages of prose collected in at least three assignments or at least three oral or multi-media presentations that last a total of at least 20 minutes or some combination of written, oral, or multi-media presentations that constitute a commensurate amount of student work.
- Integrate effective content to be presented in a written, oral, or multi-media presentation that is appropriate to a specific context, audience, and purpose.
- Incorporate specific feedback into written, oral, or multi-media presentations, revising and editing them for clarity, force, and correctness.
- Incorporate and cite sources gathered from primary (observational) or secondary (bibliographic) research in written, oral, or multi-media presentations.

Courses: Any of the following courses will meet the general education requirements for Learning Outcome 1.2. Some majors may specify which course or courses to take:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>
Goal 2
Build core skills of quantitative literacy.

The learning outcome under this goal is for students to have the ability and habit of mind to seek quantitative information and be able to apply it, using critical reasoning and analysis to solve algebraic problems and interpret results.

Learning Outcome 2.1
Upon reaching this goal, students will have the ability and habit of mind to search out quantitative information, critique it, reflect upon it, and apply it in their public, personal, and professional lives; formulate decisions and problem solving based on critical reasoning and analysis; synthesize quantitative information from a variety of sources to solve problems and interpret results; perform and solve basic function operations, and solve algebraic problems using appropriate vocabulary.

Learning indicators for Learning Outcome 2.1: To successfully achieve this outcome, students will complete these five indicators:

- Employ college-level algebraic concepts and tools
- Apply these tools to other subject areas and real-life problems
- Formulate and solve quantitative problems in mathematical terms, using appropriate tools and methods
- Use mathematical computation involving integers, rational numbers, algebraic expressions, decimals, ratios, percentages, roots, and powers
- Express quantitative and logical ideas with precision, using the language and notation of mathematics

Courses: Any of the follow courses will meet the general education requirements for Learning Outcome 2.1. Some majors may specify which course to take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Additional Outcomes</th>
<th>State Minimum Core</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1203</td>
<td>No</td>

</tr>
</tbody>
</table>

Goal 3
Develop a working knowledge of how scholars and artists think and act in fundamental areas of study.

The four learning outcomes under this goal are for students to articulate and apply the following:

- Concepts from the fine arts or performing arts
- Aesthetic, humane, and ethical sensibilities of the humanities
- Principles of human interactions of individuals, groups, and institutions
- Through experiment and observation, the basic principles that govern natural phenomena

Learning Outcome 3.1
Upon reaching this goal, students will be able to articulate and apply concepts from one of the fine or performing arts.

Learning Indicators for Learning Outcome 3.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Synthesize the development over time of the fundamental concepts, principles, theories, and methods, creative practices and techniques of the visual and/or performing arts.
- Develop an understanding of how historical, social, cultural, and personal forces shape artistic communication and how the arts in turn share the diverse cultures of past and present societies.
- Respond critically to a variety of works in the arts, connecting the individual work in the creative discipline being introduced to other aspects of human thought and endeavor.
- Through written, oral, and/or graphic techniques of communication, analyze and interprets works of fine and performing arts using appropriate critical language, and identifying the visual, sensory, environmental, and psychological characteristics that they observe.
- Understand and use materials and resources available for participation in the arts in various roles.

Courses: The following courses are available to satisfy Learning Outcome 3.1. Some majors may specify which course to take:

<table>
<thead>
<tr>
<th>Course</th>
<th>Additional Outcomes</th>
<th>State Minimum Core</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Learning Outcome 3.2
Upon reaching this goal, students will be able to articulate a minimum of three vital concepts of aesthetic, humane, and ethical sensibilities embodied in the humanities.

Learning Indicators for Learning Outcome 3.2: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify fundamental concepts, structures, themes, and principles of the discipline being introduced
- Analyze texts and other created artifacts using theories and methods of the discipline
- Produce a reasonable short essay about the material introduced in the course
• Interpret texts and other created artifacts within multiple historical, intellectual, and cultural contexts
• Draw connections among cultural achievements of various groups of people of different ethnicities, religious backgrounds, racial origins, and sexual identities

Courses: The following courses are available to satisfy Learning Outcome 3.2. Some majors may specify which course to take:

<table>

Learning Outcome 3.3
Upon reaching this goal, students will be able to articulate and use the basic principles of human interactions — of individuals, groups, and institutions — in a variety of contexts.

Learning Indicators for Learning Outcome 3.3: To successfully achieve this outcome, students will complete at least three of these five indicators:

• Articulate the key concepts, principles, and overarching themes to a social science discipline.
• Apply social scientific reasoning and techniques.
• Analyze theories, data, and methods of a social science discipline to explain individual, group, and institutional interactions.
• Apply critical thinking and use scientific reasoning to evaluate claims about the social world.
• Integrate and use evidence-based theories to explain various types of human interaction through written and oral communication.

Courses: The following courses are available to satisfy Learning Outcome 3.3. Some majors may specify which courses to take:

Learning Outcome 3.4
Upon reaching this goal, students will be able to articulate and use, through experiment and observation, the basic principles that govern natural phenomena.

Learning Indicators for Outcome 3.4: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify the fundamental concept(s) unifying a scientific discipline
- Apply the principles of scientific theory and technique
- Evaluate the credibility and use of scientific information
- Make evidence-based arguments to support conclusions
- Integrate and organize information, concepts, and applications relevant in more than one scientific discipline

Courses: The following courses with corequisite laboratories are available to satisfy Learning Outcome 3.4. Some majors may specify which courses to take:

Goal 4
Expand diversity awareness, intercultural competency, and global learning.

The two learning outcomes for this goal are for students to learn to interact appropriately within intercultural contexts and develop familiarity with concepts of diversity in the United States.

Learning Outcome 4.1
Upon reaching this goal, students will have developed knowledge and abilities to interact appropriately within intercultural contexts and engaging with complex global systems and issues.

Learning Indicators for Learning Outcome 4.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Examine and interpret an intercultural experience from both one’s own and another’s worldview.
- Articulate the essential tenets of a cultural worldview other than one’s own through an analysis of its components, including but not limited to history, values, communication styles, politics, economy, and beliefs and practices.
- Identify and participate in cultural differences in verbal and nonverbal communication.
- Identify and analyze significant global challenges and opportunities in the human and natural world.
- Identify and analyze the historical and/or contemporary interrelationships among multiple global cultures.

Courses: The following courses are available to satisfy Learning Outcome 4.1. Some majors may specify which course to take:

Learning Outcome 4.2
Upon reaching this goal, students will have developed familiarity with concepts of diversity in the United States.

Learning Indicators for Learning Outcome 4.2: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify and describe examples of historical and present day issues related to diversity and inclusion in the United States.
- Explain the historical and/or contemporary construction of difference through analysis of power structures, privilege, and explicit or implicit prejudice, and their roles in fostering discrimination and inequalities in the United States, whether cultural, legal, political, or social.
- Describe the advantages of inclusion by identifying and analyzing notions of inclusivity and pathways for cultivating inclusion at all levels of society, whether cultural, legal, political, or social.
- Analyze the historical and/or contemporary development of group agency and assess its role in addressing discrimination and inequalities in the United States.
- Demonstrate problem-solving and change management skills for achieving social equity.

Courses: The following courses are available to satisfy Learning Outcome 4.2. Some majors may specify which course to take:

Goal 5
Demonstrate critical thinking and ethical reasoning.

Learning Outcome 5.1
Upon reaching this goal, students will be able to demonstrate essential principles of critical thinking and ethical reasoning and apply them to the evaluation and construction of rational and moral arguments.
Learning Indicators for Learning Outcome 5.1: To successfully achieve this outcome, students will complete at least three of these five indicators:

- Identify and describe key concepts and principles related to critical thinking.
- Explain and contrast competing ethical theories, each of which articulates at least one principle for ethical decision-making.
- Use recognized principles of critical thinking or ethical reasoning to analyze, evaluate, and respond to rational and moral argumentation presented orally and/or in writing.
- Describe key fallacies and identify them in context.
- Demonstrate the use of recognized principles of critical thinking or ethical reasoning to construct complex rational and moral arguments orally and/or in writing.

Courses: The following courses are available to satisfy Learning Outcome 5.1. Some majors may specify which course to take:

Goal 6
Gain the ability to synthesize, integrate, and apply knowledge developed throughout the undergraduate years.

Learning Outcome 6.1
Upon reaching this goal, students will be able to reflect upon and explain how they use the skills and abilities embodied in Goals 1 through 5 in completing an integrative project in their major during their junior or senior year.

Learning Indicators for Learning Outcome 6.1: To successfully achieve this outcome, students will:

1. Produce a significant written paper, as defined by his or her major, or an equivalent project incorporating performance and/or multi-modal text and/or images.

2. Explain in an additional document of at least 1,250 words the degree to which the completed assignment involves at least three of the following sets of skills and abilities:

   - Written, oral, and/or multimodal communication abilities
   - Quantitative literacy
   - Characteristics of inquiry and action in the major and in one of the Learning Outcomes under Goal 3 besides the disciplinary area of the major
   - Diversity awareness and/or intercultural competency
   - Critical thinking and/or ethical reasoning

Courses: The following courses are available to satisfy Learning Outcome 6.1. Each major program may specify which course or courses to take:

State Minimum Core
The University of Arkansas has adopted the “state minimum requirements” of 35 semester-credit-hours of courses that are required of all baccalaureate degree candidates. This is in compliance with Arkansas Act 98 of 1989 and the subsequent action of the Arkansas State Board of Higher Education. Since 1991, all state institutions of higher education in Arkansas have had a 35-hour minimum core requirement with specified hours in each of seven academic areas in the table below. The university
has identified those courses that meet the minimum requirement, and they are listed in the chart below.

Some colleges and programs have specified which courses to use, so students should consult the requirements of their major when choosing courses from the options below. Completion of these courses will also satisfy many of the university’s general education learning outcomes (p. 90).

### Areas

</tr>
</tbody>
</table>

1. Some students majoring in math, engineering, science and business may be required to take a higher math as part of the State Minimum Core.
2. Some students majoring in math, engineering, science, education and health-related professions may be required to take higher or specific science courses as part of the State Minimum Core.
3. Numbered at the 2000 level. See Department of World Languages, Literatures and Cultures (p. 572) in the Fulbright College of Arts and Sciences chapter.
4. If not selected to meet another category.

### Rationale for U of A State Minimum Requirements

In order to prepare its students for lives of the highest individual quality and the greatest potential contribution to the making of a better world, the University of Arkansas has developed a comprehensive program of general education. Although the basic skills, knowledge, methodologies, and judgments derived from experience in the core area set forth here may provide the basis for a major or professional concentration, the aims of these core requirements are not career specific. Rather, the following areas are designed to develop the tools for critical thinking and effective communication, an understanding of our richly diverse human heritage, the flexibility to adapt successfully to a rapidly changing world, a capacity for lifelong learning, and an enthusiasm for creativity.

### English/Communication (6 hours)

Courses offered in this area are designed to develop the ability to organize ideas and to communicate them in grammatically correct written English with clarity, precision, and syntactical maturity.

- Students who score below 19 on the English section of the ACT, below 450 on the Reading section of the SAT (Pre-March 2016), below 490 on the Evidence-Based Reading and Writing section of the redesigned SAT (Post-March 2016), below 80 on the Writing Skills section of the Compass (the test was discontinued in 2016 but scores are valid for five years), below 83 on the Sentence Skills section of the Accuplacer Classic, or below 255 on the Writing section of the Accuplacer Next-Generation must enroll in ENGL 1013 and ENGL 1002.
- Students with ACT English scores of 19-27, SAT Evidence-Based Reading and Writing scores of 490-620, ACT Compass Writing Skills scores of 80 or higher, or College Board Accuplacer Sentence Skills scores of 83 or higher should enroll in ENGL 1023.
- Students with ACT English scores of 28-29 or SAT Evidence-Based Reading and Writing scores of 630-680, ACT Compass Writing Skills scores of 80 or higher, or College Board Accuplacer Sentence Skills scores of 83 or higher should enroll in ENGL 1013 and ENGL 1023.
- Students with ACT English scores of 28-29 or SAT Evidence-Based Reading and Writing scores of 630-680 who score below 83 on the Sentence Skills section of the Accuplacer Classic, or below 255 on the Writing section of the Accuplacer Next-Generation must enroll in ENGL 1013 and ENGL 1002.
- Students with ACT English scores of 19-27, SAT Evidence-Based Reading and Writing scores of 490-620, ACT Compass Writing Skills scores of 80 or higher, or College Board Accuplacer Sentence Skills scores of 83 or higher should enroll in ENGL 1013 and ENGL 1023.
- Students with ACT English scores of 30 or greater or SAT Evidence-Based Reading and Writing scores of 690 or greater may enroll in ENGL 1013H and ENGL 1023H.
- Students with ACT English scores of 28-29 or SAT Evidence-Based Reading and Writing scores of 630-680 may enroll in ENGL 1013 and ENGL 1023 or in ENGL 1013H and ENGL 1023H.

### Fine Arts/Humanities (6 hours)

Courses presented in this area are drawn from the study of human thought, emotion, values, culture, and aesthetics. They are designed to develop the capacity for reflection, an appreciation of our own diverse culture and a tolerance of those foreign to us, and a heightened aesthetic and ethical sensibility. The courses are not performance-based, but offer students a basis for the gradual acquisition of broad cultural literacy.
Mathematics (3 hours)
Courses offered in this area are designed to develop the student’s ability to understand the diverse mathematical concepts that shape our increasingly technical culture. Core mathematics courses presuppose the ability to apply mathematical techniques at the level of high school algebra and geometry. The specific course(s) selected will depend upon each student’s curriculum, but no course below college algebra may be used to fulfill core requirements.

Science (8 hours)
A primary goal of these courses is to develop an appreciation of the basic principles that govern natural phenomena and the role of experiment and observation in revealing these principles. Students should acquire an understanding of the relationship between hypothesis, experiment, and theory, and develop the skills common to scientific inquiry, including the ability to frame hypotheses and defend conclusions based on the analysis of data. These courses are designed to prepare a student for informed citizenship by illustrating the importance of science and technology to the present and future quality of life and the ethical questions raised by scientific and technological advances.

Social Science (9 hours)
The purpose of the social science core is to introduce students to the breadth of inquiry in the social sciences — such as the study of ideas, the behavior of individuals, groups, institutions, and their interactions. The core should expose students to the history of and the challenges encountered in our complex, culturally diverse world.

American History or Government (3 hours)
Under Arkansas law, no undergraduate degree may be granted to any student who has not passed a college course in American history or civil government. Courses offered by the University of Arkansas, any one of which will meet this requirement, are HIST 2003, HIST 2013, and PLSC 2003.

Graduation Rates
In accordance with the Student Right-to-Know and Campus Security Act of 1990, the following table is a summary of the institution’s six-year graduation rates, those degree-seeking freshmen who enrolled in 2012 and graduated by 2018:

<table>
<thead>
<tr>
<th>Year</th>
<th>Total Graduate:</th>
<th>Total Graduate:</th>
<th>Total Graduate:</th>
<th>Percent of Total</th>
<th>Percent of Total</th>
<th>Percent of Total</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Total Men</td>
<td>Total Women</td>
<td>Overall</td>
<td>Men</td>
<td>Women</td>
<td>Overall</td>
</tr>
<tr>
<td>All Degree-Seeking Freshmen</td>
<td>1,249</td>
<td>1,594</td>
<td>2,843</td>
<td>62%</td>
<td>70%</td>
<td>66%</td>
</tr>
</tbody>
</table>

The graduation rate for all first-time, full-time, degree-seeking new freshmen.
The Student-Athlete Graduation Success Rate was developed by the NCAA to supplement the Federal Graduation Rate. It includes the Federal Graduation Rate Cohort, and also includes students who first enroll in the spring term and also students who transfer in. It discounts student-athletes who leave the institution with eligibility remaining, but would have been academically eligible to compete had they remained. It is more a reflection of the success of students who remain at the institution for all years.

| 79% | 90% | 85% |

The Student-Athlete Graduation Rate report is filed annually in conjunction with the Federal Graduation Rate Report.

**Honors and Scholars**

**Dean’s and Chancellor’s List**

After the end of each semester, all colleges and schools in the university publish an honor roll of the names of the undergraduate students who achieve a 3.75 to 4.00 grade-point average. This honor roll is the Dean’s List.

In addition, a Chancellor’s List is published each semester that recognizes those undergraduate students who achieve a 4.00 grade-point average.

Selection for the Dean’s List and Chancellor’s List will be evaluated as follows:

- Students must complete a minimum of 12 semester hours normally required to graduate and these hours must be graded with the standard letter grading basis
- Students will be allowed P grades during the semester only in course hours that exceed the 12-hour letter grade requirement, i.e., a student in 15 hours may have up to 3 hours of P grades

Students who earn any PD or NC grades during the semester will not be eligible for the Dean’s or Chancellor’s List.

**First-Ranked Senior Scholars**

A first-ranked senior scholar must have a cumulative grade-point average of 4.00 on all course work completed at the time selection is made, must have applied for graduation for a semester to be a member of the appropriate class and must have completed all courses required for the baccalaureate degree at the University of Arkansas, Fayetteville, or in a program of study approved by the Director of Honors or other designee in the college in which the student is enrolled. In determining the cumulative grade-point average for the purposes of such awards, grade forgiveness is not accepted. Due to the disruption caused by COVID-19, P grades will be allowed during the spring and summer 2020 terms. Students earning PD or NC grades during these terms will not be eligible for first-ranked senior scholar status.

**Senior Scholar**

Selected graduating seniors who are among those with the highest grade-point average and who have completed at least half of their degree work
at the University of Arkansas are recognized by each undergraduate college as a Senior Scholar.

**Graduation Honors**

For detailed, discipline-specific information, see the honors section for each college or school major. Students must be members of the Honors College to earn the distinction of graduating *cum laude*, *magna cum laude* or *summa cum laude*. The honors program in the college or school of major sets specific requirements for graduating with honors including a minimum of 12 honors credit hours and the completion of an undergraduate thesis. A combination of honors credit hours, thesis quality, and GPA requirements lead to Latin designation of *cum laude*, *magna cum laude* or *summa cum laude*.

**Requirements for Graduation**

**University Core Requirements**

In addition to the requirements listed below, undergraduate students must successfully complete 35 hours of courses in the University Core, also known as the "State Minimum Core." See more on the University Core page (http://catalog.uark.edu/undergraduatecatalog/academicregulations/universitycore/).

**Enrollment Requirement**

To ensure the opportunity to engage with faculty and peers in their area of study at the University of Arkansas, students must fulfill the U of A Enrollment Requirement:

1. Earn a minimum of 30 semester hours at the University of Arkansas, Fayetteville campus. This includes UA faculty-led study abroad classes, online/on-campus classes, and courses offered through the Global Campus; and all other courses paid toward Fayetteville campus tuition and fees;
2. These 30 semester hours are to be upper-division semester hours required for the completion of a degree program;
3. Additional hours in residence can be required for completing a minor;
4. Hours earned in another school or college at the University of Arkansas, Fayetteville, may be used to satisfy this requirement — with appeal of appropriate faculty curriculum committee;
5. Appeals to the standards identified in this policy should be made to the Academic Standards Committee.

**Minimum Credits**

All students awarded a baccalaureate degree must have a minimum of 120 credit hours. Individual programs may require additional hours. Courses not marked in the course description as eligible to be repeated for degree credit may be included in this total only once.

**Minimum Grade-Point Average**

No student will be allowed to graduate if the student has earned below a 2.00 GPA in credit earned at this institution. No student will be allowed to graduate if that student’s academic standing is other than good standing.

**Online Credit Hours for On-Campus Undergraduate Students**

*Note: To accommodate the move to more online class sections caused by COVID-19, the restriction that limits the number of online courses that on-campus program undergraduate students can enroll in has been removed in UAConnect for summer and fall 2020. This means that UAConnect won’t enforce the 8-hour limit for freshmen or the 12-hour limit for all other undergraduates that is currently part of this policy. This just affects the ability for students to enroll in online classes for summer and fall 2020 and does not change the 35 percent limit of online classes for on-campus degree programs.*

Any student pursuing an on-campus (face-to-face) undergraduate degree from the University of Arkansas may take up to 35 percent, of the total credit hours required to complete the degree, of regular online (semester/summer) and self-paced online (correspondence) courses for degree credit.

- A freshman (first 30 hours) may take no more than two courses (8 hours) online.
- No student can enroll in more than 12 hours of online courses in any given semester †
- For students that have transferred academic credits from other institutions, the percentage of total credit hours obtained at the University of Arkansas through regular (semester/summer) online and self-paced online (correspondence) courses for degree credit cannot exceed 35 percent of the total remaining hours needed to complete the degree after transfer credits are accounted for.
- Exemption from this policy may apply for students in their last semester. All exemption requests must be signed by the department chair and Dean’s office that oversee the degree program the student is pursuing.
- All online courses must include the course limits in the class notes presented to students when they register on UAConnect. For instance, the class notes for each class section should include:

  * Students pursuing an on-campus (face-to-face) undergraduate degree at the University of Arkansas have the following credit-hour restrictions for online and self-paced courses:
    - Only 35 percent of the total credit hours required to complete the degree can be obtained through online and self-paced course
    - A freshman (fewer than 30 credit hours earned) may take no more than two online and self-paced courses (8 credit hours)
    - No student can enroll in more than 12 online and self-paced hours in any given semester
    - For students that have transferred academic credits from other institutions, the percentage of total credit hours obtained at the University of Arkansas through regular (semester/summer) online and self-paced online (correspondence) courses for degree credit cannot exceed 35 percent of the total remaining hours needed to
complete the degree after transfer credits are accounted for.

• 'Other restrictions may apply due to federal financial aid policies.'

* For students on financial aid, no more than 6 of these 12 credit hours can come from self-paced online (correspondence) courses. Other financial aid regulations and policies may be applicable on a case by case basis.

‡ International students enrolled full-time are limited to 3 credit hours of online courses per academic term due to federal policies.

Freshman Course Requirement

University Perspectives is an innovative required one-hour freshman course designed to enhance student success. A ‘flipped’ class, it will have an online component in addition to in-class interaction. The course will emphasize the transition to the university and university-level work by addressing topics such as critical thinking and civic engagement. Other units intended to enhance overall student success include — but are not limited to — note-taking, time management, and academic integrity. All freshmen must complete UNIV 1001 by the end of the first academic year.

Application for Graduation

Students who plan to graduate must file an official application to do so. Applications should be filed for the term in which degree requirements will be completed. A graduation fee will be required at the time of application.

To ensure that students will be certified for graduation in a timely manner, the following graduation application deadlines have been established:

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>October 1</td>
<td>for students graduating in Fall</td>
</tr>
<tr>
<td>March 1</td>
<td>for students graduating in Spring</td>
</tr>
<tr>
<td>July 1</td>
<td>for students graduating in Summer</td>
</tr>
</tbody>
</table>

Students must apply by the established deadline for that term. Any student missing the deadline may apply to graduate in a subsequent term.

A student who fails to complete the degree during the intended semester must contact the Office of the Registrar to renew the application for the term in which the degree requirements will be completed.

Other Graduation Requirements

Individual colleges and schools may have special graduation requirements, in addition to degree program requirements. Consult the college or school section in this catalog for statements of additional requirements.

Degree Program Requirements

A student’s degree program requirements are normally those specified in the catalog for the student’s first year of enrollment. However, students may choose to meet the program requirements specified in a catalog for a later year and, under some circumstances, students may be required to meet degree program requirements incorporated into the curriculum at a level beyond that at which the student is enrolled.

Students who transfer from institutions with articulation agreements with the university may also be allowed to meet the university program requirements in effect during their first year of enrollment in those institutions, subject to the time limits described below and the availability of course work. Students who transfer to a different degree program may be required to meet the program requirements specified in the catalog for the year of entry into that program. Students who are not enrolled for a period of two years or longer may be required to reenter under program requirements in the current catalog. Students who wish to be granted a degree on the basis of requirements specified in a catalog more than seven years old may be required to petition the college or school to be allowed to do so.

Students are expected to keep themselves informed regarding program requirements and changes.

Additional Bachelor’s Degree

A student seeking two or more undergraduate degrees from the University of Arkansas must meet the graduation requirements for each degree, including all university, college or school, and departmental requirements as stated in the catalog. When two or more undergraduate degrees are being completed concurrently, or while being continuously enrolled at the University of Arkansas, course work for the first degree may be used to satisfy requirements for the second degree. Students must apply to graduate individually for each degree. A student earning two or more bachelor’s degrees in a single academic year will have their name appear only once on Senior Walk.

A student who previously completed a bachelor’s degree from the University of Arkansas, or from any other institution, must complete at least 30 hours of additional, not necessarily subsequent, course work in residence from the University of Arkansas. More than 30 hours of course work may be required to satisfy all university, college or school, and departmental requirements.

Student Grievances and Appeals

Informal Resolution

Undergraduate students who wish to seek further review of an academic or non-academic decision or action by the University or a University employee (in an official capacity) that the student contends was in violation of written campus policies, or constitutes unfair or unequal application of such policies, should first seek to resolve such concerns through informal discussions. In particular, grievances regarding academic matters should generally begin with informal discussions with the student’s instructor or with the faculty member supervising a course.

If such informal discussions do not reach a satisfactory resolution, then the student may pursue a grievance following the steps in this policy.

Applicability of Policy

This policy applies to undergraduate students enrolled in traditional courses as well as online courses. This policy does not apply to matters which are covered by other campus policies or appeal procedures, including, but not limited to, the following:

• grade appeals (see description of process below);
• allegations of discrimination or harassment (including sexual harassment) under the university’s non-discrimination policy;
• allegations of failure to provide reasonable accommodations for a disability;
• financial aid;
• enforcement of campus parking regulations;
• violations of the Code of Student Life or the university’s Academic Dishonesty Policy; or
• violations of the university’s Research Misconduct Policy.

In particular, matters involving allegations of unlawful harassment (including sexual harassment), discrimination and/or retaliation should be reported to the university’s Office of Equal Opportunity and Compliance, and matters involving alleged failure to provide reasonable accommodations for a disability should be pursued through the grievance process described on the university’s Center for Educational Access website. Additional information about each of the above policies is available on the university’s website and through the Office of the Dean of Students.

Furthermore, this grievance process is intended to address alleged violations of university policy with respect to individual students, rather than disagreements with existing policies. Questions regarding the applicability of this grievance policy to a particular issue will be determined by the dean of students, in consultation with the provost and other university officials, as necessary.

**Formal Grievance Process**

If efforts to resolve a grievance informally are not successful, no later than 60 calendar days following the decision or action that the student seeks to have reviewed, the student shall put the grievance in writing, clearly and succinctly stating the facts relating to the grievance and which policies the student contends have been violated or misapplied. For an academically related grievance, the written grievance shall be submitted to the academic unit chair, head or his or her designee; if the concern relates to the chair, then the written grievance may be submitted to the Dean who may appoint an alternate official to consider the grievance. For a non-academic matter, the grievance should be considered by an administrator with authority over the relevant area. The administrator considering the grievance will review the material provided by the student, and may, at the administrator’s discretion, gather any additional information that will be helpful to a decision, whether in writing or through meeting with the student or other persons involved. The administrator reviewing the grievance shall make a decision, in writing, within 10 working days after receiving the student’s grievance (excluding the day of receipt), or as soon as possible thereafter. The decision will explain the basis for the decision, remedial steps required, if any, and the procedure for requesting an appeal.

**Appeals**

If the student believes the grievance decision is in error, then that person may, within 10 working days after the date of the written decision, appeal the decision to the relevant dean (for an academic matter) or to the relevant vice chancellor or a designee (for non-academic matters). The administrator considering the appeal will review the material provided by the student, the grievance decision, any other material which has been assembled regarding the matter, and any applicable university policies and may, at his or her discretion, gather any additional information that will be helpful to a decision, whether in writing or through meeting or consulting with any individuals deemed necessary in the administrator’s discretion. The administrator reviewing the appeal shall make a decision, in writing, within 10 working days of receiving the student’s grievance, or as soon as possible thereafter. The appeal decision shall be final.

**External Complaint Resolution**

If a grievance cannot be resolved internally within the university, a student may file a complaint with the appropriate authority in his/her state of residence. Arkansas residents must file complaints in writing with the Arkansas Department of Higher Education (ADHE), 423 Main Street, Suite 400, Little Rock, AR 72201, within 20 days of completing the institution’s grievance process. As required by ADHE, the grievant must provide a statement from the institution verifying that the institution’s appeal process has been followed. ADHE inquiries are limited to courses/degree programs certified by the Arkansas Higher Education Coordinating Board (AHECB) under Ark. Code § 668.43(b) and to matters related to the criteria for certification. For other states, the State Higher Education Executive Officers Association website, provides a list of appropriate state officials and/or entities for each state. Students may also contact the Higher Learning Commission of the North Central Association of Colleges and Schools (http://www.ncahlc.org/), which is the university’s regional accrediting body, at 230 South LaSalle Street, Suite 7-500, Chicago, IL 60604, or at inquiry@hlcommission.org or 1-800-621-7440. This information is provided pursuant to 34 CFR § 668.43(b).

**Grade Appeal Structure for Undergraduate Students**

If a student questions the fairness or accuracy of a grade, there is recourse through a student grade appeal structure. Disagreements shall be heard that allege the instructor’s policy was not applied consistently to all students, differed substantially from the announced policy, or that a policy was not announced. All grievances concerning course grades must be filed within one calendar year of the end of the term in which the grade that is being appealed was assigned. The procedures are:

The student should first discuss the matter with the instructor involved, doing so as soon as possible after receiving the grade. The instructor should be willing to listen, to provide explanation, and to be receptive to changing the grade if the student provides convincing argument for doing so. The student’s questions may be answered satisfactorily during this discussion.

If the student chooses to pursue the grievance and submits an appeal, the student shall take the appeal in written form to the appropriate department or unit chairperson of the program in which the course was instructed. The appeal should present the basis of the appeal and merits of the grievance with evidence the student may have to support the appeal. If that person determines the case has no merit, that person will inform the student and the instructor. If that person believes the complaint may have merit, that person will discuss it with the instructor. In the case that the department or unit chairperson is the instructor, the student should submit an appeal in written form to the appropriate dean of the college in which the course was instructed.

If the matter remains unresolved, it will be referred to an ad hoc committee composed of programmatic or departmental faculty. This committee would be appointed by the department or unit chairperson and should have at least three faculty representing the program or department in which the course was instructed. In the case where there are fewer than three faculty within the program or department to serve on the committee, faculty members from a closely related discipline will be appointed to serve. In the case where the department or unit chairperson is the instructor of the grievance, the ad hoc committee would be appointed by the appropriate dean of the college in which the course was instructed. The instructor whose grade is being challenged shall not serve on this ad hoc committee. The committee will examine available written information on the dispute, will be available to meet with the student and with the instructor, and will meet with others as it sees fit.
If the ad hoc faculty committee majority determines, through its inquiries and deliberations, that the grade should not be changed, the committee should communicate this conclusion to the student, the faculty member, and the chairperson. If the ad hoc faculty committee majority determines that the grade should be changed, the committee will request that the instructor make the change and provide the instructor with a written explanation. Should the instructor decline, he or she must provide an explanation for refusing in writing to the ad hoc faculty committee.

If the ad hoc faculty committee, after considering the instructor’s written explanation, concludes it would be unjust to allow the original grade to stand, it may then recommend to the department chairperson, or dean in the case where the department chairperson is the faculty whose grade is being challenged that the grade be changed. That individual (department chair or dean) will provide the instructor with a copy of the recommendation and will ask the instructor to implement it. If the instructor continues to decline, the chairperson or dean is then obligated to change the grade, notifying the instructor and the student of this action. Only the chairperson or dean has the authority to effect a grade change over the objection of the instructor who assigned the original grade, and only after the foregoing procedures have been followed.

**Reporting Sexual Misconduct**

For allegations of sexual misconduct, including, but not limited to, sexual harassment or acts of sexual assault, domestic violence, dating violence, stalking and other forms of sex/gender discrimination, the University has designated a Title IX Coordinator with overall responsibility for oversight of the University’s compliance with its obligations under Title IX. All complaints or any concerns about sexual conduct should be submitted to the university’s Title IX Coordinator, the Department of Education’s Assistant Secretary for Civil Right, or both:

**Liz Means**
Title IX Coordinator
405 Administration Building

**Student Privacy**

**Annual Notice of Student Rights Under the Family Educational Rights and Privacy Act (FERPA)**

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are as follows:

1. The right to inspect and review the student’s education records, with some exceptions under the Act, within 45 days of the day the university receives a request for access. Students should submit to the Office of the Registrar written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. Students should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. A sample form, which may be used in making this request, is contained in the appendix to UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/policies/ua-system-policies/).

If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing and is also contained in UA Systemwide Policies and Procedures 515.1 (http://www.uasys.edu/policies/ua-system-policies/).

3. The right to withhold consent of disclosure of directory information, defined as the following information: the student's name; date of birth; address; telephone number; email address; major field of study; classification by year; number of hours in which enrolled and number completed; participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance including withdrawal dates; degrees, scholarships, honors, and awards received, including type and date granted; and photograph.

This information will be subject to public disclosure unless the student restricts such information through the appropriate settings in UAConnect, the student information system, or informs the Office of the Registrar in writing that he or she does not want this information designated as directory information.

4. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

One exception, which permits disclosure without consent, is disclosure to school officials with legitimate educational interests. A school official is a person employed by the university in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an educational record to fulfill his or her professional responsibility. Upon request, the university also discloses education records without consent to officials for another school in which a student seeks or intends to enroll.

Postsecondary institutions may also disclose personally identifiable information from education records, without consent, to appropriate parties, including parents of an eligible student, in connection with a health or safety emergency. Under this provision, colleges and universities may notify parents when there is a health or safety emergency involving their son or daughter, even if the parents do not claim the student as a dependent.
There are several other exceptions to FERPA’s prohibition against non-consensual disclosure of personally identifiable information from education records, some of which are briefly mentioned below. Under certain conditions (specified in the FERPA regulations), a school may non-consensually disclose personally identifiable information from education records:

- to authorized representatives of the Comptroller General of the United States, the Attorney General of the United States, the U.S. Secretary of Education, and State and local educational authorities for audit or evaluation of Federal or State supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs;
- to the National Student Clearinghouse for enrollment and degree reporting;
- to organizations conducting studies for or on behalf of the school making the disclosure for the purposes of administering predictive tests, administering student aid programs, or improving instruction;
- to officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer;
- to comply with a judicial order or a lawfully issued subpoena;
- to the victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense concerning the final results of a disciplinary hearing with respect to the alleged crime; and
- to any third party the final results of a disciplinary proceeding related to a crime of violence or non-forcible sex offense if the student who is the alleged perpetrator is found to have violated the school’s rules or policies. The disclosure of the final results only includes: the name of the alleged perpetrator, the violation committed, and any sanction imposed against the alleged perpetrator. The disclosure must not include the name of any other student, including a victim or witness, without the written consent of that other student.

5. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the university to comply with the requirements of FERPA. The name and address of the office that administers FERPA is as follows:

   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington DC 20202-4605

6. UA System Policy and Procedure 515.1 (http://www.uasys.edu/policies/ua-system-policies/) serves as a supplement to the campus FERPA policy.

7. FERPA applies to students at the University of Arkansas at the point of their enrollment into courses.

**Photographic and Video Images**

The university is proud to publish and display photographic and video images of U of A students, their activities and accomplishments. Any student who does not wish to be represented in such photographic and video images by the university should choose to withhold photos on the FERPA option on the university’s student information system.

**Transfer of Credit**

The following policies control the granting of credit for course work taken at other institutions:

1. Transfer credits are subject to a two-stage evaluation process. First, the eligibility of the hours for transfer is evaluated by the Office of the Registrar based upon decisions of appropriate faculty, the Arkansas Course Transfer System (http://acts.adhe.edu/studenttransfer.aspx), and the Transfer Course Equivalency Guide (https://courseequivalency.uark.edu/). Credits found to be eligible for general transfer may not count toward the minimum requirements for every degree at the University of Arkansas. The second step in the evaluation, performed by the academic dean’s office or department responsible for the program of study, determines which hours evaluated will satisfy degree program requirements.

2. Grades earned at other institutions are not calculated in the student’s grade-point average earned at the university.

3. General transfer credit is awarded for courses in which a grade of “C” or higher has been earned. Course work must be applicable to a baccalaureate degree; credit is not granted for course work that is remedial or technical in nature.

4. Students can petition to have up to six hours of “D” grades transfer for degree credit to the University of Arkansas. Students must have a 2.00 GPA on a 4.00 scale to be considered, and courses must meet core or elective requirements in the student’s degree program. Courses outside the degree program and courses in the major cannot be considered for transfer. The Admissions and Appellate Committee makes all decisions regarding “D” transfers. Petitions can be obtained from the Office of the Registrar.

5. In the case of course work taken at institutions not fully accredited by a regional accrediting agency, transfer credit may be denied altogether or may be granted provisionally subject to successful completion of specified courses at the university. Normally, credit is provisionally granted only if the institution is a candidate for regional accreditation.

6. The State Minimum Core (SMC): Act 98 of 1989 requires each institution of higher learning in Arkansas to identify a minimum core of general education courses that shall be fully transferable between state-supported institutions. Under guidelines from the State Board of Higher Education, the SMC consists of 35 hours distributed among the following education areas: English, U.S. history or government, mathematics, science, fine arts and humanities, and social sciences. Students transferring credit with grades of “C” or better from the approved SMC of another state-supported institution in Arkansas may expect to have all these hours applied toward their degree at the University of Arkansas.

7. Transfer credit policy under Arkansas Act 182 from 2009 requires a four-year public institution of higher education in Arkansas to accept all credits earned from students earning an Associate of Arts, Associate of Science or Associate of Arts in Teaching degree from a state-supported public institution in Arkansas.

Major stipulations of Act 182 are outlined below:

- The transfer degree contains the curriculum that is approved by the Arkansas Higher Education Coordinating Board.
- The four-year public institution of higher education is to admit a transfer student to junior status in a baccalaureate degree program at the four-year public institution of higher education.
• A four-year public institution of higher education receiving a transfer student shall not require additional lower division coursework if the additional course is considered a general education lower division course.
• The receiving four-year public institution of higher education may only require the additional lower division course if the additional lower division course is:
  • A prerequisite for courses in the transfer student’s baccalaureate degree program;
  • A discipline-specific course that is required by the transfer student’s baccalaureate degree program and the student has not completed a course at the two-year public institution of higher education that is comparable to the discipline-specific course at the four-year public institution of higher education in the Arkansas Course Transfer System;
  • A requirement of an independent licensing or accrediting body
• Act 182 does not remove the requirement that a transfer student must meet total baccalaureate degree program credit hour and course requirements in order to be eligible for a baccalaureate degree.
• The receiving four-year public institution of higher education shall determine whether to accept a grade of “D” for academic course credit for a student transferring from a two-year public institution of higher.

Students should be prepared to submit course descriptions and syllabi of transfer work if there is any question concerning acceptance of credit toward a degree program. The university reserves the right to revise credit for advanced standing after the student has been in residence.

Please refer to the appropriate college or school section of this catalog for additional information concerning acceptance into specific degree programs.

Military Transfer Credit
The University of Arkansas accepts transfer credit based upon completed military training as evaluated by the American Council of Education (ACE) guidelines and recommendations. The evaluation must be presented to the university on an official transcript from ACE, or a Joint Services Transcript (JST). Equivalencies for military credit as recommended by ACE are evaluated by departmental faculty and may not be exactly the same as ACE. University of Arkansas equivalencies for ACE credit are displayed on the website of the Office of the Registrar in the Transfer Credit section (http://registrar.uark.edu/transfer-and-test-credit/). Students may elect to receive 6 hours of general military science credit for basic training as evaluated by presentation of the military DD214 with honorable discharge. Officer training would qualify the student for 6 additional hours of general military science credit. The same training may not be presented for both general military science credit and ACE credit.

More information on transfer credit can be found online by going to the Office of the Registrar website (http://registrar.uark.edu/410.php).

Arkansas Course Transfer System (ACTS)
The Arkansas Course Transfer System (ACTS) is a postsecondary education resource service coordinated by the Arkansas Department of Higher Education (ADHE) that provides comparable course information to facilitate student transfer within Arkansas public colleges and universities. The ACTS database contains faculty-generated comparable course information for a number of courses offered at public institutions in Arkansas. Comparable courses within ACTS are guaranteed to transfer for full credit to any Arkansas public institution. Course transferability is not guaranteed for courses listed in ACTS as “No Comparable Course.” Find out more at the Arkansas Course Transfer System website (http://acts.adhe.edu/studenttransfer.aspx). Questions regarding ACTS may be directed to an academic adviser or the Office of the Registrar.

The chart below provides the University of Arkansas course equivalents for each of the ACTS courses offered on the campus. The ACTS course numbers are also identified in the course title of the equivalent U of A course. For instance, the course title for the university’s ANTH 1023 Introduction to Cultural Anthropology is listed as:

ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013).

Both this chart and the information in the course description are designed to assist students with identifying U of A courses that are guaranteed to transfer between Arkansas public institutions.

HELPFUL HINTS FOR STUDENTS
The Office of the Registrar website provides more information on transfer credit.
Last, there are also two interdisciplinary minors that are administered in courses offered through the University of Arkansas Global Campus. Be eligible for admission to the Honors College. Students may also enroll in courses offered through the University of Arkansas Global Campus. Last, there are also two interdisciplinary minors that are administered.
outside these colleges and schools but which use the resources of more than one of them.

Honors College
Mission and Objectives
The Honors College at the University of Arkansas brings together high-achieving students and the university’s top faculty members in a learning environment characterized by discovery, creativity, and service. Founded in 2002 with a large portion of the $300 million gift from the Walton Family Charitable Support Foundation, the Honors College has a substantial endowment for undergraduate research, service learning and international education.

The Honors College builds a diverse, transformative community of students and faculty preparing graduates who excel professionally, flourish personally and lead globally. To achieve this mission, the Honors College collaborates with honors programs across campus to provide a flexible, interdisciplinary honors curriculum that fosters creative and critical thinking and inspires action. The Honors College encompasses the honors programs from each undergraduate college or school.

Facilities and Resources
The Honors College is housed in a 21,000-square-foot addition to Gearhart Hall, a historic Collegiate Gothic structure located in the heart of campus. Honors students enjoy a spacious lounge, study areas and rooms for group discussions. A 216-seat auditorium below provides space for lectures, film screenings and other events.

Hotz Honors Hall, situated in the heart of the northwest housing area, provides housing for 400 first-year honors students in spaces designed to foster community. Hotz offers a large room for relaxation on the main floor, a computer lounge, music room, conference rooms and a small theater. Each floor is equipped with study areas, alcoves for TV viewing and video gaming, and spa-style bathrooms. The Honors College offers special programming for Hotz residents and upper-level honors students in nearby dorms.

Degrees Offered
Honors programs are offered in all disciplines, tailored to students’ academic interests, with interdisciplinary collaborations encouraged. The college or school of major confers honors degrees. Only Honors College students can earn the distinction of graduating cum laude, magna cum laude or summa cum laude.

Other Programs
Honors College Grants
Each year the Honors College awards more than $1 million in study abroad and undergraduate research grants, which are available to honors students who submit competitive proposals and meet all other requirements. Honors College faculty and staff work closely with the Office of Study Abroad and International Exchange to help honors students find programs that best meet their academic and professional goals. Honors College grants support domestic and international research, internships, community engagement, study abroad and travel to an archive or conference. Deadlines and application instructions are available on the Honors College website at honorscollege.uark.edu.

Nationally Competitive Awards
The Honors College coordinates with the Office of Nationally Competitive Awards to provide assistance to all students who are applying for national and international graduate fellowships and scholarships (i.e. Marshall, Rhodes, Schwarzman, Truman, Udall, Gates Cambridge, Rotary, Fulbright, and National Science Foundation). For more information, refer to the Enrollment Services section of this catalog.

College Admission Requirements
To apply for honors, students should visit the Honors College website at honorscollege.uark.edu (http://honorscollege.uark.edu/) and click on Apply. There they can review admission requirements and the honors program requirements in their college. Honors-eligible new freshmen should fill out the Honors College Application, available online. To register for honors classes in their first semester, they should apply before attending freshman orientation.

New transfer students and current students should contact the honors program director or assistant director in their college to determine eligibility and, for some programs, which form of honors (four-year or departmental) would best meet their needs. Then they should fill out the Honors College Application form. The list of honors program directors and both honors application forms are available online at honorscollege.uark.edu (http://honorscollege.uark.edu/).

The chart below contains basic requirements for each of the honors programs. For detailed information, see the individual honors program sections for each college or school in this catalog. Note that honors admission is based on the highest composite ACT or SAT score, not on superscores. In calculating GPA, extra weight is given only for Advanced Placement and International Baccalaureate courses.

Fellowships and Scholarships
The Honors College administers the most prestigious new freshman awards at the University of Arkansas. The Bodenhamer, Sturgis and Honors College Fellowships provide from $72,000 in support over a four-year period, are highly competitive and require an in-depth application process and interview. For more details, visit the Honors College website at honorscollege.uark.edu and click on Future Students.

The Academic Scholarship Office awards scholarships to a variety of students. Students do not have to be in the Honors College to receive these scholarships. For additional information, visit the Academic
Scholarship Office website at scholarships.uark.edu and see the chapter on Financial Aid and Scholarships in this catalog.

Student Organizations
All honors students are eligible to apply for the Honors College Ambassadors program. This group supports the honors community by participating in campus recruiting events and meeting with prospective students. The Honors College Student Advisory Council offers a select group of student leaders an opportunity to make a real impact on the Honors College Student Advisory Council offers a select group of student leaders an opportunity to make a real impact on the Honors College.

College Academic Regulations
The college or school of major sets specific requirements for graduating with honors including a minimum of 12 honors credit hours and the completion of an undergraduate thesis. A combination of honors credit hours, thesis quality, and GPA requirements lead to Latin designation of cum laude, magna cum laude or summa cum laude. Registration for honors courses is restricted to honors students or other students who meet the honors criteria and who have been approved by the honors program offering the course. For more information, see the honors sections for the college or school major.

Courses
HNRC 102VH. Honors College Introduction to Research. 1-6 Hour.
The Honors College Introduction to Research functions as part of a bridge program between secondary education and the university. The main purpose is to introduce students to the full range of research activities available at an R-1 institution and to do so under the guidance of both STEM and non-STEM honors faculty members. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing or membership in the Honors College Path Program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HNRC 300VH. Honors College Forum. 1-3 Hour.
The Honors College Forum centers on contemporary issues sparking intense national and international media scrutiny. Faculty experts partner with honors students in a seminar-style, discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. (Typically offered: Fall and Spring) May be repeated for degree credit.

HNRC 301VH. Honors College Retro Readings. 1-3 Hour.
Honors College Retro Readings centers on classic authors read through a contemporary lens. Faculty experts partner with honors students from all undergraduate colleges in a seminar-style discussion format. Topics vary by semester. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. (Typically offered: Fall and Spring) May be repeated for degree credit.

HNRC 3801H. Honors College Catapult. 1 Hour.
This course is designed to place ambitious, high-achieving students on a trajectory toward nationally competitive awards and/or graduate and professional programs of study. Students in the course will prepare their academic resume, construct a personal statement, and answer essay prompts as each component may relate to nationally competitive awards and graduate or professional school admission. Additional topics include studying for advanced tests such as the Graduate Record Exam (GRE), building a graduate or professional school timeline, and preparing for interviews. Learning outcomes will be achieved through active engagement in writing and compilation exercises, research, and discussion. Prerequisite: Honors standing. (Typically offered: Spring)

HNRC 3901H. Med School. 1 Hour.
Introduces students to the process of applying to medical school while dispelling several common myths about the practice of medicine. Seminar participants also explore pressing issues facing doctors these days, including the opioid crisis, the increasing elderly population, and the rise of corporate healthcare. (Typically offered: Spring)

HNRC 4013H. Honors College Signature Seminar. 3 Hours.
The Honors College Signature Seminar Series features leading scholars who will offer courses bridging multiple colleges and having broad appeal. These signature seminars will develop from the current research of the faculty who offer them, thereby inviting honors students into their scholarly world at a very high level. The goal of the signature seminar series is to spark undergraduate research projects and to stimulate career trajectories, including nationally competitive fellowships and/or admittance to graduate and professional programs. Topics vary by semester. Eligible students must be in good standing in the Honors College. Pre- or Corequisite: Honors standing. Prerequisite: Departmental consent. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

HNRC 402VH. Honors College Research. 1-6 Hour.
The Honors College Research hours are intended for undergraduates who have already begun their research on campus and will travel domestically for a significant period of time to enhance and extend this research. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre- or Corequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HNRC 403VH. Honors College International Research. 1-6 Hour.
The Honors College International Research hours are intended for undergraduates who have already begun their research on campus and will travel abroad for a significant period of time to enhance and extend this research. An on-campus faculty mentor and a research mentor on-site are required. Prerequisite: Departmental consent. Pre or corequisite: Honors standing. (Typically offered: Irregular)

Interdisciplinary Studies
Mission and Objectives
The University of Arkansas provides several options for students to pursue education more broadly than one field of undergraduate study might allow, including interdisciplinary and multidisciplinary programs. These programs allow broader instruction and research opportunities, especially in emerging fields that haven’t reached the academic breadth to constitute a full academic department or in cases in which collaboration between one or more departments allows faculty from each existing department to contribute to the interdisciplinary or multidisciplinary major. In the Catalog of Studies (http://catalog.uark.edu/catalogofstudies/), requirements for each interdisciplinary program are listed in the chapter of the college or school that oversees the program.

Three interdisciplinary minors — Microelectronics-Photonics (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/interdisciplinarystudies/microelectronicsphotonsmepht), Nanotechnology
Data scientists make sense of huge sets of data to help businesses, governments, nonprofits and other organizations make smarter decisions. The university’s interdisciplinary Bachelor of Science in Data Science will prepare students for a successful career in data science with a strategic skill set, including the ability to:

- Use and apply state-of-the-art technologies for data representation, retrieval, manipulation, storage, governance, understanding, analysis, privacy, and security.
- Develop descriptive, predictive and prescriptive models to abstract complex systems and organizational problems, and to use computational methods to draw data-supported conclusions.
- Use foundational knowledge and apply critical thinking skills to identify and solve problems, make decisions, and visualize data, all with an awareness of societal and ethical impacts.
- Adapt analytics concepts to interpret and communicate findings and implications to senior decision-makers.
- Work effectively in an interdisciplinary team and transfer findings between knowledge domains and to others with no domain experience.
- Communicate using technical and non-technical language in writing and verbally.

Three colleges at the university — the College of Engineering, the Fulbright College of Arts and Sciences, and the Sam M. Walton College of Business — contribute expertise to the overall major while providing deeper insight into the concentrations they offer, including:

- Accounting Analytics
- Bioinformatics
- Biomedical and Healthcare Informatics
- Business Data Analytics
- Computational Analytics
- Data Science Statistics
- Geospatial Data Analytics
- Operations Analytics
- Social Data Analytics
- Supply Chain Analytics

### Requirements for B.S. in Data Science with Accounting Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Accounting Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

### Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 96). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

Requirements for B.S. in Data Science with Business Data Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Business Data Analytics Concentration. Below is a recommended eight-semester plan to achieve those requirements in a timely fashion.

Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 96). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student’s chosen concentration) of
required and elective concentration courses to meet the requirements for
a concentration.

Additional opportunities are available to enhance the educational
experience of students in these areas. Students should consult their
academic adviser for recommendations.

Total Units in Sequence: 120

### Requirements for B.S. in Data Science with Computational Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Computational Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

#### Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 96). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

Total Units in Sequence: 120

Requirements for B.S. in Data Science with Operations Analytics Concentration
Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Operations Analytics Concentration. Below those is a recommended eight-semester plan to achieve those requirements in a timely fashion.

Requirements for B.S. in Data Science
Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 96). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student's chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

State Minimum Core and General Education (36 hours)

| ENGL 1013 | Composition I (ACTS Equivalency = ENGL 1013) | 3 |
| ENGL 1033 | Technical Composition II (ACTS Equivalency = ENGL 1023) | 3 |

or ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) 4
Science state minimum electives (two courses with labs) 8
Fine Arts state minimum core 3
Humanities state minimum core
PHIL 3103 Ethics and the Professions 3
U.S. History and Government state minimum core
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113) 3
or HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) 3
or PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003) 3
Social Science state minimum core electives 6
ECON 2143 Basic Economics: Theory and Practice (represents 3 of the 9 required credit hours for Social Science elective) 3

Data Science Required Core (47 hours)
DASC 1001 Introduction to Data Science (First-Year Program - Introduction to Data Science) 1
DASC 1104 Programming Languages for Data Science (Programming Languages for Data Science (R, Python)) 4
DASC 1204 Introduction to Object Oriented Programming for Data Science (Introduction to Object Oriented Programming for Data Science (JAVA)) 4
DASC 2594 Multivariable Math for Data Scientists (Multivariable Math for Data Scientists) 4
DASC 1222 Role of Data Science in Today's World (Role of Data Science in Today's World) 2
DASC 2103 Data Structures & Algorithms (Data Structures & Algorithms) 3
DASC 2113 Principles and Techniques of Data Science (Principles & Techniques of Data Science) 3
DASC 2203 Data Management and Data Base (Data Management & Data Base) 3
DASC 2213 Data Visualization and Communication (Data Visualization & Communication (Tableau)) 3
DASC 3103 Cloud Computing and Big Data (Cloud Computing & Big Data) 3
DASC 3203 Optimization Methods in Data Science (Optimization Methods in Data Science) 3
DASC 3213 Statistical Learning (Statistical Learning) 3
DASC 4892 Data Science Practicum I (Data Science Practicum I) 2
DASC 4113 Machine Learning (Machine Learning) 3
DASC 4123 Social Problems in Data Science and Analytics (Social Problems (Issues) in DASC & Analytics) 3
DASC 4993 Data Science Practicum II (Data Science Practicum II) 3

Data Science Required Additional Courses
MATH 2564 Calculus II (ACTS Equivalency = MATH 2505) 4
MGMT 2053 Business Foundations 3
Choose from one of these two-course sequences 6

INEG 2313 Applied Probability and Statistics for Engineers I 3 & INEG 2333 Applied Probability and Statistics for Engineers II (ACTS Equivalency = MATH 2405) 3
Or
STAT 3013 Introduction to Probability 3 & STAT 3003 and Statistical Methods (Statistical Methods) 3

Data Science Concentration Courses 20-21
General Electives 3-4
Total Hours 120

Required Operations Analytics Concentration Courses
INEG 2413 Engineering Economic Analysis 3
INEG 3613 Introduction to Operations Research 3
INEG 3623 Simulation 3
INEG 4553 Production Planning and Control 3
Elective Operations Analytics Concentration Courses 9
Select 6 hours from the following:
INEG 4453 Productivity Improvement 3
INEG 4543 Facility Logistics 3
INEG 4633 Transportation Logistics 3
INEG 4683 Decision Support in Industrial Engineering 3
Any Supply Chain Management (SCMT) course at the 2000 level or higher from the Supply Chain Analytics Concentration
Select 3 hours from the following:
INEG 4123 Global Engineering and Innovation 3
INEG 4433 Systems Engineering and Management 3
INEG 4443 Project Management 3
Total Hours 21

* SOCI 2013 General Sociology is a required course for the Social Data Analytics Concentration. The course may also be used to meet three hours toward the University Core Social Science requirements. As such, students may complete three hours of general education electives in lieu of an additional University Core Social Science requirement for a total of 7 hours of general education electives.

Requirements for B.S. in Data Science with Supply Chain Analytics Concentration

Below are the general requirements for a Bachelor of Science degree with a major in Data Science, followed by specific requirements for the Supply Chain Analytics Concentration. Below is a recommended eight-semester plan to achieve those requirements in a timely fashion.

Requirements for B.S. in Data Science

Each student in Data Science is required to complete 120 hours of coursework including the state minimum core (p. 96). To be eligible for graduation, all students must complete at least 60 hours of Data Science (DTSC) Core required classes at the University of Arkansas. Each student in Data Science is also required to complete an additional 20-21 hours (depending on the student’s chosen concentration) of required and elective concentration courses to meet the requirements for a concentration.

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

State Minimum Core and General Education (36 hours)

Courses

DASC 1001. Introduction to Data Science. 1 Hour.
Introduction to Data Science is a course providing an overview of Data Science and the role it plays in today’s world. This course will introduce students to computer programming and provide them with the basic skills necessary to efficiently collect, process, and analyze data. Students will gain hands-on experience using Python and various packages in Python. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)

DASC 1104. Programming Languages for Data Science. 4 Hours.
Programming Languages for Data Science provides an introduction to basic concepts, tools, and languages for computer programming using Python and Java. It covers object-oriented programming elements and techniques in Python, such as primitive types and expressions, basic I/O, basic programming structures, abstract data type, object class and instance, methods, Java File I/O, object inheritance, collections and composite objects, advanced input/output: streams and files, and exception handling. Students will gain hands-on experience using de novo programming in Python and Java, finding and utilizing packages, and working in both interactive (Jupyter and RStudio) and non-interactive (Unix) environments. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)

DASC 1204. Introduction to Object Oriented Programming for Data Science. 4 Hours.
Introduction to Object Oriented Programming for Data Science introduces object-oriented programming in Java. It covers object-oriented programming elements and techniques in Java, such as primitive types and expressions, basic I/O, basic programming structures, abstract data type, object class and instance, methods, Java File I/O, object inheritance, collections and composite objects, advanced input/output: streams and files, and exception handling. Students will gain hands-on programming experience using Java. Corequisite: Lab component. Prerequisite: DASC 1104. (Typically offered: Fall, Spring and Summer)

DASC 1222. Role of Data Science in Today’s World. 2 Hours.
Role of Data Science in Today’s World is a survey course providing an overview of the Data Science Curriculum and an introduction to the essential elements of data science: data collection and management; summarizing and visualizing data; basic ideas of statistical inference; predictive analytics and machine learning. Students will gain hands-on experience using Python and Jupyter notebooks. Prerequisite: DASC 1104. (Typically offered: Fall, Spring and Summer)

DASC 188V. Special Topics in Data Science. 1-6 Hour.
Special Topics in Data Science is a course for data science topics not covered in other courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

DASC 2030. Optimization Methods in Data Science. 3 Hours.
Optimization Methods in Data Science is an advanced mathematical course providing the foundations and concepts of optimization that are essential elements of machine learning algorithms in data science, ranging from mathematical optimization to convex optimization to constrained and constrained optimization to nonlinear optimization to stochastic optimization. Students will gain hands-on experience using Python and various optimization packages in Python. Corequisite: Lab component. Prerequisite: DASC 2113 and DASC 2594. (Typically offered: Spring)

DASC 2103. Data Structures & Algorithms. 3 Hours.
Data Structures & Algorithms focuses on fundamental data structures and associated algorithms for computing and data analytics. Topics include the study of data structures such as linked lists, stacks, queues, hash tables, trees, and graphs, recursion, their applications to algorithms such as searching, sorting, tree and graph traversals, divide-and-conquer, greedy algorithms, and dynamic programming, and the theory of NP-completeness. Students will gain hands-on experience using Python or Java. Corequisite: Lab component. Prerequisite: DASC 1204. (Typically offered: Fall)

DASC 2113. Principles and Techniques of Data Science. 3 Hours.
Principles and Techniques in Data Science is an intermediate semester-long data science course that follows an overview of data science in today's world. This class bridges between introduction to data science and upper division data science courses as well as methods courses in other concentrations. This class equips students with essential basic elements of data science, ranging from database systems, data acquisition, storage and query, data cleansing, data wrangling, basic data summarization and visualization, and data estimation and modeling. Students will gain hands-on experience using Python and various packages in Python. Corequisite: Lab component. Prerequisite: MATH 2564. (Typically offered: Fall)

DASC 2203. Data Management and Data Base. 3 Hours.
Data Management and Data Base focuses on the investigation and application of data science database concepts including DBMS fundamentals, database technology and administration, data modeling, SQL, data warehousing, and current topics in modern database management. Corequisite: Lab component. Prerequisite: DASC 1204. (Typically offered: Spring)

DASC 2213. Data Visualization and Communication. 3 Hours.
Data Visualization and Communication is a seminar providing an essential element of data science: the ability to effectively communicate data analytics findings using visual, written, and oral forms. Students will gain hands-on experience using data visualization software and preparing multiple formats of written reports (technical, social media, policy) that build a data literacy and communication toolkit for interdisciplinary work. In essence, this is a course emphasizing finding and telling stories from data, including the fundamental principles of data analysis and visual presentation conjoined with traditional written formats. Corequisite: Lab component. Prerequisite: DASC 1104 and DASC 1222. (Typically offered: Spring)

DASC 2594. Multivariable Math for Data Scientists. 4 Hours.
Multivariable Mathematics for Data Scientists provides an in-depth look at the multivariate calculus and linear algebra necessary for a successful understanding of modeling for data science. Students will gain an understanding of the mathematical and geometric concepts used in optimization and scientific computation using mathematical and computational techniques. At the end of the course, students will be equipped with the calculus and linear algebra skills and knowledge to be successful in courses in optimization and advanced data science methods. Prerequisite: MATH 2564 and DASC 1104. (Typically offered: Fall)

DASC 3103. Cloud Computing and Big Data. 3 Hours.
Cloud Computing and Big Data covers: introduction to distributed data computing and management, MapReduce, Hadoop, cloud computing, NoSQL and NewSQL systems, Big data analytics and scalable machine learning, real-time streaming data analysis. Students will gain hands-on experience using Amazon AWS, MongoDB, Hive, and Spark. Corequisite: Lab component. Prerequisite: DASC 2594 and DASC 2203. (Typically offered: Fall)

Total Units in Sequence: 120
DASC 3213. Statistical Learning. 3 Hours.
Statistical Learning is a course providing an in-depth look at the theory and practice of applied linear modeling for data science: including model building, selection, regularization, classification and prediction. Students will gain hands-on experience using statistical software to learn from data using applied linear models. Corequisite: Lab component. Prerequisite: DASC 1104 and (MATH 3013 and STAT 3003) or (INEG 2313 and INEG 2333). (Typically offered: Spring)

DASC 4113. Machine Learning. 3 Hours.
Machine learning covers: logistic regression, ensemble methods, support vector machines, kernel methods, neural networks, Bayesian inference, reinforcement learning, learning theory, and their applications in text, image, and web data processing. Students will gain hands-on experience of developing machine learning algorithms using Python and scikit-learn. Corequisite: Lab component. Prerequisite: DASC 2103 and DASC 3203. (Typically offered: Fall)

DASC 4123. Social Problems in Data Science and Analytics. 3 Hours.
This course explores the ways data analytics and data science are impacted by or intersect with issues of social justice, poverty and economic inequality, racial and ethnic relations, gender, crime, education, health and healthcare, and other contemporary social problems. Corequisite: Lab component. Prerequisite: DASC 1222. (Typically offered: Fall)

DASC 4533. Information Retrieval. 3 Hours.
Information Retrieval is a course providing expertise in processing unstructured data as a key component of data science. It covers text processing, file structures, ranking algorithms, query processing, and web search. Students will gain hands-on experience developing their own search engine from scratch, using Python, C, C++, or Java on a Linux server and making their search engine web accessible. Note: Prior user-level knowledge of Linux for file and directory management and remote login is required for this course. Corequisite: Lab component. Prerequisite: DASC 2103. (Typically offered: Fall and Spring)

DASC 4892. Data Science Practicum I. 2 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the first semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component, DASC 3213, DASC 4113 and DASC 4123. Prerequisite: DASC 2113, DASC 2213 and DASC 3203. (Typically offered: Fall)

DASC 4893. Data Science Practicum II. 3 Hours.
Application of data science, analytics, business intelligence, data mining, machine learning, and data visualization to existing problems. Data Science techniques using current and relevant software and problem-solving methods are applied to current problems for presentation to management. This is the second semester of the required full-year multi-college interdisciplinary practicum using real-world data to solve real-world problems. Corequisite: Lab component. Prerequisite: DASC 4892 with a grade of C or better. (Typically offered: Spring)

Nanotechnology Minor Faculty Coordinators and Curriculum Committee
- Gregory Salamo, Distinguished Professor, Physics
- Min Zou, Associate Professor, Mechanical Engineering
- Jin-Woo Kim, Professor, Biological and Agricultural Engineering
- David Zaharoff, Assistant Professor, Biomedical Engineering
- Donald Keith Roper, Associate Professor, Chemical Engineering
- Gregory J. Thoma, Professor, Chemical Engineering
- Jingyi Chen, Assistant Professor, Chemistry and Biochemistry
- Fisher Yu, Assistant Professor, Electrical Engineering
- Steve Tung, Associate Professor, Mechanical Engineering
- Po-Hao Adam Huang, Associate Professor, Mechanical Engineering

The Nanotechnology minor is an interdisciplinary program that provides students with foundational knowledge and skills related to the emerging field of nanotechnology, including hands-on experience in several major areas of nanotechnology, such as synthesis of nanomaterials, nanoscale imaging, nanostructure assembly and manipulation, device and system integration, and performance evaluation. The Nanotechnology minor draws faculty expertise and coursework from the College of Engineering and the Fulbright College of Arts and Sciences and utilizes state-of-the-art equipment and facilities at the Institute for Nanoscience and Engineering. The Nanotechnology minor is intended to prepare participating students for a career in which nanotechnology is playing an increasingly important role, and increase students’ research competitiveness for graduate studies. The Nanotechnology minor is designed to be accessible to students majoring in engineering, physics, or chemistry and biochemistry. It is open to all students who have the necessary prerequisites to enroll in the courses that constitute the minor.

Requirements for the Nanotechnology Minor

Students wishing to participate in the Nanotechnology minor must declare participation formally. The students are required to meet with the faculty coordinator of an individual department who will help the student to develop a list of courses suitable for the minor and a schedule for taking those courses. Examples of model programs for each participating department are given below.

Students need to take a total of 15 credit hours, which includes 6 credit hours of required courses and 9 credit hours of elective courses and must earn a grade of ‘C’ or better for all courses used to fulfill the requirements of the Nanotechnology minor.

Required Courses (6 hours)

- PHYS 4773 Introduction to Optical Properties of Materials

*or from other appropriate courses not on this list if approved first by the Nanotechnology Minor Curriculum Committee and by the course instructor.*

Below are model programs for students from different participating departments. Students also have the flexibility to design their own programs according to the stated requirements above.

### Model program for a student majoring in Biological Engineering

**Required Courses (6 hours)**

- BENG 4753L Nanotechnology Laboratory
- BENG 450V Special Problems
  - or BENG 451VH Honors Thesis

**Elective Courses (9 hours)**

- BENG 3113 Measurement and Control for Biological Systems
  - or BENG 3113H Honors Measurement and Control for Biological Systems
- BENG 4743 Food and Bio-Product Systems Engineering
- BENG 4123 Biosensors & Bioinstrumentation

### Model program for a student majoring in Biomedical Engineering

**Required Courses (6 hours)**

- BMEG 4103L Nanotechnology Laboratory
  - or BMEG 4103M Honors Nanotechnology Laboratory
- BMEG 450VH Honors Thesis
  - or BMEG 460VH Honors Individual Study

**Elective Courses (9 hours)**

- BMEG 3634 Biomaterials
- BMEG 3824 Biomolecular Engineering
- BMEG 4243 Advanced Biomaterials and Biocompatibility

### Model program for a student majoring in Chemical Engineering

**Required Courses (6 hours)**

- PHYS 4793L Nanotechnology Laboratory
  - or PHYS 4793M Honors Nanotechnology Laboratory
- CHEG 488V Special Problems

**Elective Courses (9 hours)**

- CHEG 3713 Chemical Engineering Materials Technology
- CHEG 5023 Nano Bio Photonics (will be co-listed 4000-level course in the future)
- CHEG 4043 Colloids and Surfaces

### Model program for a student majoring in Chemistry

**Required Courses (6 hours)**

- CHEM 4153L Nanotechnology Laboratory
- CHEM 400V Chemistry Research

**Elective Courses (9 hours)**

- CHEM 4123 Advanced Inorganic Chemistry I
- CHEM 4213 Instrumental Analysis
- CHEM 4283 Energy Conversion and Storage

### Model program for a student majoring in Electrical Engineering

**Required Courses (6 hours)**

- PHYS 4793L Nanotechnology Laboratory
- ELEG 488V Special Problems
  - or ELEG 488VH Honors Special Problems

**Elective Courses (9 hours)**

- PHYS 4213 Physics of Devices
- ELEG 4203 Semiconductor Devices
- ELEG 4303 Introduction to Nanomaterials and Devices

Dale Bumpers College of Agricultural, Food and Life Sciences

**Mission and Vision**

The vision of the Dale Bumpers College of Agricultural, Food and Life Sciences is to lead Arkansas and the world by delivering pre-eminent programs in agricultural, food and life sciences that produce leaders through education, research and outreach.

The mission of the Dale Bumpers College of Agricultural, Food and Life Sciences is to improve the quality of life for Arkansans by preparing students for successful careers, conducting impactful research, and sharing knowledge to promote viable food and agricultural systems, sustainable environments, healthy families and vibrant communities.

**History and Organization**

As the state’s land-grant university, the University of Arkansas has the responsibility for leadership in teaching, research, and service in the agricultural and human environmental sciences. This responsibility is shared with the Division of Agriculture.

The Bumpers College is an integral component of the University of Arkansas and addresses the teaching responsibility of the land-grant university. Its roots lie in the First Morrill Act of 1862, which created the land-grant system by providing a grant of land to each state for the establishment of a college “where the leading objective shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanical arts in such manner as the legislatures of the state may prescribe to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life.” Agricultural sciences have been taught at the University of Arkansas.
almost from the beginning of the institution in 1872. The university conferred the first degrees in agriculture in 1904.

Early instruction and outreach efforts focused on improving rural life for men, women, and children. Farm wives were interested in beautifying the home, food preparation and safety, and gardening. Foods and nutrition, bacteriology, chemistry, and other related subjects held a common scientific interest for both agriculture and home economics, so it naturally evolved that studies in home economics should develop within the realm of agricultural education. Domestic science classes were offered as early as 1909, and a department of home economics was established in 1913. The department was elevated to school status in 1994, and its name was changed to the School of Human Environmental Sciences.

The passage of the Hatch Act in 1887 and subsequent legislation made possible the Agricultural Experiment Station, the research component of the Division of Agriculture. Most faculty who teach in the Bumpers College also hold appointments in the Experiment Station and are able to incorporate active research into their teaching.

The dissemination of university research in agriculture and human environmental sciences is carried out by personnel in the Cooperative Extension Service, created by the Smith-Lever Act of 1914. Many Extension specialists also hold adjunct faculty status and bring their expertise to the teaching program.

It is this blending of teaching, research, and service functions that create a unique learning environment in the college. As students learn to relate basic areas of science to human needs, they study in laboratory-based classes and are taught in research facilities supported by the Division of Agriculture. Similarly, students are encouraged to intern with professionals in industry and governmental agencies, including the Cooperative Extension Service.

In recognition of the land-grant mission of the university and its commitment to serve the entire state, the Dale Bumpers College of Agricultural, Food and Life Sciences has worked cooperatively with numerous community colleges to facilitate the “seamless” transfer of students to the Bumpers College. Coordinated advising, recruiting, and curricula development are working goals of the Bumpers College and students interested in transferring while enrolled at a community college should contact the Bumpers College dean’s office at 479-575-2252 or aafsdean@uark.edu (%20afsdean@uark.edu).

Facilities and Resources

The Dale Bumpers College of Agricultural, Food and Life Sciences is composed of nine academic departments and the School of Human Environmental Sciences. The college offers both undergraduate and graduate level degrees.

The Agricultural, Food and Life Sciences Building houses the Dean’s Office, the Department of Agricultural Education, Communications and Technology, and the Department of Animal Science and serves as the headquarters for the college academic functions. There are six other buildings on campus operated by the college including the Agriculture Building, Human Environmental Sciences Building, Rosen Center, Plant Science Building, Agricultural Annex, and the Center of Excellence for Poultry Science. Additionally, the Don Tyson Center for Agricultural Sciences, the Food Science Building, Altheimer Laboratory, Abernathy Agriscience and Technology Center, Pauline Whitaker Animal Science Arena, and the Dorothy E. King Equine Science facilities are located at the Research and Extension Center north of the main campus. These serve as additional teaching laboratories or classroom facilities. Also, the Jean Tyson Child Development Study Center is managed by the college to provide instructional training for the child development program.

Several classrooms are equipped with “class capture” technology to allow students to view lectures online and to aid distance education courses. Students can receive academic assistance through resources provided by the dean’s office. Students can also seek assistance through the Class+, a campus-wide resource.

College Scholarships

In addition to the scholarships awarded by the university, there are a number of scholarships available to students in agricultural and human environmental sciences made possible by generous gifts from many firms and individuals. To be considered for a college scholarship, students must first be admitted to the university. Most scholarships require students to be enrolled full-time, at least 12 credit hours per semester. A college scholarship application, which serves as an application to all available scholarships offered by the college and/or individual departments, must be submitted each year. For additional information, please see the Bumpers College Scholarship website (https://bumperscollege.uark.edu/ future-students/scholarships.php). A listing of various outside scholarships is available for review on the college’s web site. There are also miscellaneous outside scholarships for which applications are available in some departmental offices. For more information on scholarships, contact the dean’s office.

Student Organizations

Agricultural Business Club is for students interested in agricultural business and economics.

Agricultural Communicators of Tomorrow (ACT) is designed for students with an interest in agricultural communications.

Agricultural Mechanization Club is a student organization for those with an interest in agricultural systems technology management.

American Association of Family and Consumer Sciences (AAFCS) offers student membership to all human environmental sciences majors. Monthly meetings highlight various phases of human environmental sciences and provide social contact with other majors. In addition, members become involved in local service projects and may attend statewide workshops and leadership training sessions.

Association for American Textile Chemists and Colorists (AATCC) is an organization open to all students interested in the fashion industry.

Collegiate FFA is for any student who has been active in 4-H or FFA or has a current interest in service to these youth-oriented organizations. This club is especially designed for students interested in teaching agricultural education or working for the Cooperative Extension Service.

Collegiate Farm Bureau helps prepare tomorrow’s agricultural leaders. Through Collegiate Farm Bureau, members get the opportunity to take part in shaping agricultural issues and in setting the current Farm Bureau legislative agenda at the county, state, and national level.

Crop, Soil, and Environmental Science Club is a student organization for those interested in crops and soils through both an agricultural and environmental perspective.

Food Science Club is an organization for those students interested in food science.
Friends of the Infant Development Center is a student organization comprised of parents of children who are currently attending the Infant Development Center, and other friends of the IDC.

Horticulture Club is a student organization for those interested in horticulture including floriculture, ornamentals, turf, small fruits and vegetables.

Isely-Baerg Entomology Club is open to those who wish to stimulate interest in the field of entomology, perform outreach programs for the public and to promote and encourage professional exchange of ideas in the field of entomology.

Minorities in Agriculture, Natural Resources Related Sciences (MANRRS): The purpose of this organization is to promote and implement initiatives which foster inclusion and advancement of members of ethnic/cultural groups under-represented in the agricultural and natural sciences and related fields in all phases of career preparation and participation.

Block and Bridle Club is for students who are interested in any phase of animal science. Students with interests in horses, cattle, sheep, dogs, cats, or swine will find this club a good place to become involved.

Plant Pathology Graduate Student Association (PPGSA) is an organization open to graduate students interested in plant pathology or related fields.

Poultry Science Club is open to all students interested in any phase of the poultry industry or related fields.

Poultry Science Graduate Student Association is open to all graduate students interested in any phase of the poultry industry or related fields.

Pre-Vet Club is for students interested in veterinary medicine and is especially designed for those students in the pre-veterinary medicine curriculum.

Professional Convention Managers Association is for students interested in the profession of hospitality, restaurant management and related fields.

Student Dietetic Association (SDA) is open to any student interested in the field of dietetics. Activities are designed to inform members of the field of dietetics and to spread information to the public. Membership provides an excellent opportunity to interact with dietetics professionals and a change to work with the community.

Turf Club is a student organization open to all students interested in turfgrass management.

There are also numerous general organizations on the university campus, and students of the Dale Bumpers College of Agricultural, Food and Life Sciences participate in most of them. These include fraternities, sororities, honor and scholarship organizations, religious and music groups, sports organizations, and others.

Alpha Tau Alpha is a national honorary professional fraternity for those preparing to become teachers of agricultural education. Its mission is to develop a true professional spirit in the teaching of agriculture, to help train teachers of agriculture who shall be leaders in their communities, and to foster a fraternal spirit among students in teacher training in agricultural education.

Alpha Zeta is the professional honor fraternity for students of agriculture. To be invited to become a member, a student must rank in the upper two-fifths of the class and be recognized for leadership and character.

Eta Sigma Delta is the professional honor society for those students studying within the Hospitality Management major in the School of Human Environmental Sciences.

Gamma Sigma Delta is the honor fraternity for graduating seniors, graduate students, faculty, and alumni of the Dale Bumpers College of Agricultural, Food and Life Sciences. Seniors must rank in the upper 25 percent of their class to be eligible for membership, but not more than 15 percent of the class may be elected for membership. The highest-ranking sophomore and the highest-ranking senior are recognized annually by the society.

Academic Advising

Bumpers College advising mission is to enhance the educational experience and maximize opportunities for students. Therefore, we are committed to a strong, effective academic advising program. Advising plays a significant role in the total process of educating students for lifelong learning. The adviser assists students with the development and implementation of their educational plans.

Research demonstrates that the more contact students have with faculty, the more likely they are to persist and complete their educational goals in a timely manner. The Bumpers College adviser serves as a facilitator to assist students in maximizing their education potential. The advising relationship is a partnership between the student and the Bumpers College adviser that is dependent on effective communication and regular contact.

Selection of a Major

A student who elects to major in some area of study in the college should plan the program with a Bumpers College adviser. While undecided students are welcome, early selection of a major will permit better planning and proper sequencing of courses. The student and Bumpers College adviser work closely to ensure that curriculum requirements are met in a timely fashion. A student uncertain about a major will be advised as an undeclared major through the Bumpers College student services office (AFLS E202).

Degrees Offered

All entering students (including freshmen, international and transfer students) admitted to the University of Arkansas, Fayetteville, are eligible to pursue a degree program in the Dale Bumpers College of Agricultural, Food and Life Sciences. Undergraduate degrees offered are as follows:

- The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.)
- The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.)

Graduate Studies

The Graduate School of the university, in cooperation with the Dale Bumpers College of Agricultural, Food and Life Sciences, offers the Master of Science degree in each of its nine departments and in the School of Human Environmental Sciences. Six doctoral degrees are offered. More detailed information regarding individual programs may be obtained by contacting the administrative office of each department, or by consulting the Graduate School Catalog.
Accreditations
The Bachelor of Science in Human Environmental Sciences (B.S.H.E.S.) degree programs are accredited by the Council for Professional Development of the American Association of Family and Consumer Sciences. The degree program in nutrition is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. The Jean Tyson Child Development Study Center is accredited by the National Association for the Education of Young Children (NAEYC). The Bachelor of Science in Agricultural, Food and Life Sciences (B.S.A.) in food science is accredited by the Institute of Food Technologists. Teacher education programs in agriculture and family and consumer sciences are coordinated with educational programs in the College of Education and Health Professions and are accredited by the National Council for Accreditation of Teacher Education (NCATE).

College Academic Requirements
All students must satisfy the following university graduation requirements
1. Complete a minimum of 120 semester hours.
2. Fulfill State Minimum Core of 35 hours. Go to the State Minimum Core page (p. 96) for a list of courses that meet the requirements. Check requirements for each major as some majors require specific core courses as prerequisites to upper level courses.
3. Earn a grade-point average of 2.00 (“C” average) on all work attempted at the University of Arkansas.
4. All students must meet the university enrollment requirements found on the Academic Regulations (p. 100) page.

Specific Degree Requirements
1. To fulfill the residency requirements of the degree of Bachelor of Science in Agricultural, Food and Life Sciences, students must complete a minimum of 36 hours of courses at the 3000-level or above. In addition, a minimum of 9 hours of broadening electives (Bumpers College courses taken outside the departmental code) must be completed.
2. To fulfill the residency requirements of the degree of Bachelor of Science in Human Environmental Sciences, students must complete a minimum of 30 hours within the School of Human Environmental Sciences at the University of Arkansas.
3. In addition to university requirements students must meet other defined degree requirements specific to each major and concentration. Bumpers College courses outside of the major may be included in degree requirements.
4. General electives will vary by major. Electives may be selected to meet the requirements for a minor; however, all elective credits are subject to approval of the academic adviser.

Rules Applying to Course Work Used for Degree Credit
1. No credit will be given for duplicate coursework.
2. A maximum of six hours of internship and six hours of special problems may be counted for degree credit.
3. A total of six semester hours of elective credits in university band, chorus, judging teams, drama, debate, physical education, etc., may be counted toward a degree.
4. Any self-paced online (correspondence) course taken must be approved in advance in the dean’s office if the credits earned in the course are to be applied toward a degree. This rule applies regardless of the school from which the course is taken. Responsibility to secure approval is the student’s.
5. All transfer course work to be applied toward the degree must be an approved course listed in the transfer equivalency guide maintained by the Registrar’s office. For courses not listed in the guide, petitions can be submitted to the Dean’s office by the student and his or her academic adviser.
6. All study abroad courses must be approved in advance in the student’s academic department and by the Study Abroad Office if the credits earned in the courses are to be applied toward a degree.
7. Former students of the college who are readmitted after an absence of one year may be expected to meet the curriculum requirements in effect at the time of their readmission. Students should consult their academic adviser for degree planning before registering for classes.

Study Abroad
An educational experience outside the U.S. has become an integral component for today’s student in higher education. The ability to compete and perform in the global arena requires an understanding of world cultures, economic systems, religions, trends, governments and politics. Students in the Bumpers College are encouraged to engage in study abroad that will lead to life-long partnerships, cultural awareness and understanding of the global dimensions of their majors. The college years provide the best opportunity for students to gain this understanding and experience through faculty-led study tours; summer, semester or year-long study abroad; and international internships or research experiences which closely relate to their career goals.

The mission of the International Programs Office is to provide structured international experiences that enhance the marketability of students for career and academic opportunities through faculty driven, sustainable initiatives. The office serves to support faculty, students, international partners, and university leadership to increase opportunities for students to engage in faculty-led programs, internships, exchange programs, and study abroad activities that include research. The International Programs Office works closely with the UA Study Abroad Office and seeks opportunities for students to engage in international career preparation and workforce ready development. In 2017-2018, the International Programs Office provided $41,000 to support students and faculty, and 70 Bumpers College students studied abroad. For more information, visit our website at bumpersinternational.uark.edu (http://bumpersinternational.uark.edu).

Graduate opportunities are available for study in agricultural economics, agribusiness and related subjects via the UA’s TransAtlantic Master of Science program at Ghent University, Belgium. Second language capability is helpful, but not required.

Bumpers College students interested in a study abroad program or internships with full-time status usually can maintain their scholarships while abroad. Limited funding is available for travel grants through Bumpers and Honors colleges.

College Admission Requirements
All students seeking admission to the Dale Bumpers College of Agricultural, Food and Life Sciences must meet the general requirements for admission to the university. Students transferring from other colleges at the University of Arkansas or from other institutions are expected to meet the same entrance standard.

Specific Degree Requirements
1. To fulfill the residency requirements of the degree of Bachelor of Science in Agricultural, Food and Life Sciences, students must complete a minimum of 36 hours of courses at the 3000-level or above. In addition, a minimum of 9 hours of broadening electives (Bumpers College courses taken outside the departmental code) must be completed.
2. To fulfill the residency requirements of the degree of Bachelor of Science in Human Environmental Sciences, students must complete a minimum of 30 hours within the School of Human Environmental Sciences at the University of Arkansas.
3. In addition to university requirements students must meet other defined degree requirements specific to each major and concentration. Bumpers College courses outside of the major may be included in degree requirements.
4. General electives will vary by major. Electives may be selected to meet the requirements for a minor; however, all elective credits are subject to approval of the academic adviser.

Rules Applying to Course Work Used for Degree Credit
1. No credit will be given for duplicate coursework.
2. A maximum of six hours of internship and six hours of special problems may be counted for degree credit.
3. A total of six semester hours of elective credits in university band, chorus, judging teams, drama, debate, physical education, etc., may be counted toward a degree.
4. Any self-paced online (correspondence) course taken must be approved in advance in the dean’s office if the credits earned in the course are to be applied toward a degree. This rule applies regardless of the school from which the course is taken. Responsibility to secure approval is the student’s.
5. All transfer course work to be applied toward the degree must be an approved course listed in the transfer equivalency guide maintained by the Registrar’s office. For courses not listed in the guide, petitions can be submitted to the Dean’s office by the student and his or her academic adviser.
6. All study abroad courses must be approved in advance in the student’s academic department and by the Study Abroad Office if the credits earned in the courses are to be applied toward a degree.
7. Former students of the college who are readmitted after an absence of one year may be expected to meet the curriculum requirements in effect at the time of their readmission. Students should consult their academic adviser for degree planning before registering for classes.
8. Students interested in earning an additional bachelor’s degree should refer to the university requirements (p. 100).

Honors and Scholars

After the end of each semester, all colleges and schools in the university publish an honor roll of the names of the undergraduate students who achieve a 3.75 to 4.00 grade-point average. Students are eligible for the honor roll if they are carrying at least 12 semester hours normally required for graduation by their college for their respective year. This honor roll is the Dean’s List.

In addition, a Chancellor’s List is published each semester to recognize those undergraduate students who achieve a 4.00 grade-point average. Students must also be carrying at least 12 semester hours normally required for graduation to be eligible for the chancellor’s list.

Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree while completing the Honors Program in the Bumpers College will be recognized at graduation by the honors designations of _cum laude_, _magna cum laude_, or _summa cum laude_. To earn such designation, students must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas.
2. Must have at least a 3.5 GPA on University of Arkansas course work, computed at graduation.
3. Must successfully complete the Bumpers College Honors Program, which includes a minimum of 9 hours of honors course work, 6 hours of honors thesis, and a completed honors capstone research or creative project culminating in a written thesis documenting the project.
4. For _cum laude_, the student must achieve a cumulative U of A GPA of 3.5 to 3.74.
5. For _magna cum laude_, the student must achieve a cumulative U of A GPA of 3.75 to 3.89.
6. For _summa cum laude_, the student must achieve a cumulative U of A GPA of 3.9 to 4.00.

These criteria may be evaluated and changed periodically by the College of Agricultural, Food and Life Sciences.

Requirements to Graduate with Distinction

Students who have not completed the Bumpers College Honors Program, but have demonstrated excellent academic performance in baccalaureate degree programs in the Bumpers College will be recognized at graduation by the designation of “with distinction,” “with high distinction,” and “with highest distinction.” To earn this designation, students must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas.
2. Must have at least a 3.5 GPA on University of Arkansas course work, computed at graduation.
3. For “with distinction,” the student must achieve a cumulative U of A GPA of 3.5 to 3.74.
4. For “with high distinction,” the student must achieve a cumulative U of A GPA of 3.75 to 3.89.
5. For “with highest distinction,” the student must achieve a cumulative U of A GPA of 3.9 to 4.00.

These criteria may be evaluated and changed periodically by the College of Agricultural, Food and Life Sciences.

Grading System

The Dale Bumpers College of Agricultural, Food and Life Sciences assigns numerical values to the different grades. These values are used for courses when grade-point averages are calculated.

The grading system assigns values as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
</tbody>
</table>

Majors, Concentrations, and Minors

Agricultural, Food and Life Sciences

B.S.A. Degree

Majors and Concentrations

• Agricultural Business (p. 138) (AGBS)
• Agricultural Business Management and Marketing (ABMM)
• Agricultural Economics (AGEC)
• Pre-Law (PRLW)
• Agricultural Education, Communication and Technology (p. 147) (AECT)
  • Agricultural Communications (ACOM)
  • Agricultural Education (AGED)
  • Agricultural Leadership (AGLE)
  • Agricultural Systems Technology Management (ASTM)
• Animal Science (p. 158) (ANSC)
  • Animal Enterprise (ANET)
  • Equine Systems (EQSC)
  • Pre-Professional Science (PPRF)
• Crop Science (p. 170) (CPSC)
• Environmental, Soil, and Water Science (p. 180) (ESWS)
• Food Science (p. 185) (FDSC)
  • Food Science (FDSC)
  • Food Technology (FDTN)
  • Food and Culinary Sciences (FDCU)
• Horticulture, Landscape and Turf Sciences (p. 193) (HLTS)
• Poultry Science (p. 199) (POSC)

Minors Offered
• Agricultural Business (AGBS-M)
• Agricultural Communications (ACOM-M)
• Agricultural Education (AGED-M)
• Agricultural Leadership (AGLE-M)
• Agricultural Systems Technology Management (ASTM-M)
• Animal Science (ANSC-M)
• Brewing Science (BREW-M)
• Crop Biotechnology (CPBT-M)
• Crop Science (CPSC-M)
• Entomology (ENTO-M)
• Equine Science (EQSC-M)
• Food Science (FDCS-M)
• Horticulture (HORT-M)
• International Economic Development (INDV-M)
• Landscape Horticulture (LHRT-M)
• Natural Resources Management (NRMT-M)
• Pest Management (PMGT-M)
• Plant Pathology (PLPA-M)
• Poultry Science (POSC-M)
• Soil Science (SOIL-M)
• Turf Management (TURF-M)

Minors in Other Colleges
Students in the Dale Bumpers College of Agricultural, Food and Life Sciences may pursue an academic minor in any other college at the University of Arkansas. These minors usually consist of 15 to 20 hours of coursework. For requirements regarding minors, check the catalog under the department offering the minor. Students must notify the Bumpers College Dean’s Office (AFLS E202) of their intention to pursue a minor.

Special (Non-Degree Seeking) Students
While most students enrolled in the Dale Bumpers College of Agricultural, Food and Life Sciences work toward a degree, students who desire additional education of a specific nature but who do not wish to fulfill all requirements for a degree may enroll as special students. It is recommended that students declare a minor by the end of their sophomore year.

Other Programs
Pre-veterinary Medicine
Because Arkansas does not have a college of veterinary medicine, the Arkansas General Assembly has authorized funds for education in veterinary medicine at out-of-state institutions. The State Board of Higher Education is the designated agent for the State of Arkansas, and the Student Loan Authority is authorized to administer the program. Terms and conditions prescribed by the Student Loan Authority are as follows: the grant will cover only out-of-state tuition, and the student will pay his or her own fees and expenses. Additional information regarding this program can be found at: www.adhe.edu (http://www.adhe.edu)

Contracts have been negotiated with the Board of Control for Southern Regional Education for education in veterinary medicine at Louisiana State University and at Tuskegee University. Arrangements have also been made with the University of Missouri and Oklahoma State University. Under the provisions of the legislation, only citizens of Arkansas are eligible. They must enroll in and complete the pre-veterinary medicine curriculum to satisfy the admission requirements of these colleges of veterinary medicine.

Arkansas Act 881, passed in 2011, established a loan repayment program for Arkansas residents who attend Mississippi State University College of Veterinary Medicine. The loan repayment program will assist Arkansas residents with the repayment of federally funded student loans incurred while attending veterinary school at Mississippi State University. Beginning in April 2012, participants in the program will be required to practice in the state of Arkansas for up to five consecutive years with a minimum of 30 percent of their practice devoted to food or mixed animal medicine in rural areas of Arkansas. This may include corporate or private veterinary practice.

The pre-veterinary medicine program at the University of Arkansas is administered in the departments of Animal Science and Poultry Science of the Dale Bumpers College of Agricultural, Food and Life Sciences. There are faculty in these departments who help counsel and advise students regarding their pre-veterinary medicine program. There are also faculty veterinarians who provide some insight into the practice of veterinary
medicine and are knowledgeable about many of the considerations encountered in establishing a practice upon graduation. Some of these veterinarians have been in private practice; others have been involved in full-time agricultural research since graduation from veterinary medicine and graduate school. Because there is a wide cross-section of experience among these faculty, students find their counsel valuable in planning a future in veterinary medicine.

While it is possible to complete requirements for admission to some colleges of veterinary medicine in two years, most students take three years or more to complete the requirements, and most complete a B.S. degree before being admitted. Students who carefully plan their work may complete a B.S. degree by transferring hours earned in the first two years at an accredited college of veterinary medicine back to the University of Arkansas, provided they complete certain degree requirements at the university prior to entering a school or college of veterinary medicine. These students must complete a minimum of 94 hours of a 120-hour program of prescribed courses. This will require three years and one or two 6-week summer terms for most students. Therefore, students should inform their advisers early in their program that they wish to be in a pre-vet degree program.

The Bumpers College of Agricultural, Food and Life Sciences is ready to assist students in fulfilling their pre-veterinary medicine requirements whether they desire to complete them in a two-year span or over three or four years. The supporting departments at the university, including chemistry, English, and biological sciences, all offer quality courses that give a student an excellent background for the pursuit of a degree in veterinary medicine.

To earn the professional degree, a student must complete the pre-veterinary medicine requirements and the four-year prescribed curriculum in one of the colleges of veterinary medicine.

**Required Examinations:** All required examinations are given on campus and administered by testing services (97 N. Razorback Road, phone: 479-575-3948, email: testing@uark.edu). Exams must be taken by late summer of the year prior to entering vet school. Students interested in taking examinations should contact testing services to schedule an examination date. All contract schools accept the Graduate Records Exam (GRE), which is given frequently.

**Applications:** Students applying to Louisiana State University, Oklahoma State University, Tuskegee University, Mississippi State University and University of Missouri must fill out a Veterinary Medical College Application Service (VMCAS) form, available at their online site (www.aavmc.org). Students must complete the application and have it submitted by September 15th of the year prior to beginning studies. Since requirements for the various veterinary schools periodically change, it is important that students check with their advisers about specific school requirements as they progress through the pre-veterinary requirements.

All students should contact the Coordinator of Veterinary Medicine, Dale Bumpers College of Agricultural, Food, and Life Sciences, AFLS B114, University of Arkansas, Fayetteville, AR 72701, phone 479-575-4351 in the spring prior to making fall application for admission to a veterinary school to verify that they can complete the requirements for the school they wish to attend. Pre-professional requirements and specific requirements for admission to colleges of veterinary medicine at Louisiana State University, Oklahoma State University, University of Missouri, Mississippi State University and Tuskegee University are listed with information on the Web at www.aavmc.org.

## Bumpers College Honors Program

The mission of Bumpers College Honors Program is to provide students with opportunities to participate in academic, research and creative activities beyond the traditional undergraduate experience. This is accomplished through honors courses, completion of an undergraduate honors thesis, and other significant activities. Students must maintain a GPA of 3.50 and subscribe to the Statement of Ethical Standards to remain in the program.

### Statement of Ethical Standards:

“As a member of the Bumpers College Honors Program, I pledge to uphold the ethical standards of honesty and trustworthiness in all academic and research/creative activities. I recognize that it is a privilege to be a member of the University of Arkansas Honors College and will dedicate my efforts to ensure that the highest levels of ethical standards are maintained.”

### Student Eligibility Requirements

There are several avenues by which qualified candidates can become eligible to participate in the Bumpers College Honors Program. Students will receive an invitation to participate in the Honors Program if they are incoming freshmen with an ACT of at least 28 or a high school GPA of at least 3.50. Transfer students will be invited if they transfer no more than 62 hours with a college GPA of at least 3.50. Currently enrolled freshman and sophomore students who have completed less than 62 hours with a college GPA of 3.50 or greater may apply for admission to the Honors Program through the Honors College website (http://honorscollege.uark.edu/). Students wishing to join the Honors Program after completing 62 hours of college credit may petition for admission by submitting a plan of study to the Bumpers College Honors Program Director documenting how they propose to incorporate the Honors Program requirements into their remaining degree requirements.

To be eligible for continued participation in the Honors Program, students must maintain a cumulative 3.5 GPA and actively work toward earning an Honors degree designation. Students will be considered academically ineligible when:

- A student’s cumulative GPA is below 3.5 for two consecutive terms or
- A student’s cumulative GPA is below 3.0 for one term.

Students are required to prepare a proposal for study and identify an honors mentor who mutually agrees to the topic proposed by the end of 80 hours of course credit completion.

### Honors Orientation

All entering freshman honors students are required to complete AFLS 1023H. This course will cover the requirements of UNIV 1001 and provides an overview of the Bumpers College Honors Program, program requirements, research and creative project requirements, and to introduce all honors students to potential undergraduate student mentors as a part of the Honors Mentor/Mentee program.

### Honors Curriculum

Graduation with Honors Distinction from the College requires that each student must complete 15 credit hours in the Honors Program. Each student must complete at least 9 credit hours of Honors courses, three of which must include AFLS 3413H. In addition, each student must complete at least 3 credit hours of thesis hours with a faculty mentor on the student’s honors committee and thesis culminating their program. In
addition to honors courses taken within Bumpers College, students are also encouraged to take Honors courses in other colleges as well.

Students are encouraged to complete 6 credit hours of Honors courses during their freshman year. This will qualify students for research and international program funding from the Honors College.

Honors Project

All honor students are required to develop and complete an honors thesis or creative project appropriate for their degree and interests to graduate from the Honors Program. Traditional research projects, such as laboratory and field studies and surveys are encouraged and welcomed in addition to novel methods of research that may be accomplished at sites other than on campus or on research stations. Creative projects are also allowed with the approval of the student’s Honors Committee and a final written document is required. The thesis or creative project should consist of at least one semester of proposal preparation, one semester of data collection or creative design, and one semester of thesis preparation. Honors students are encouraged to develop proposals for funding of their projects, as well as to conduct and present their results.

The student’s Honors Mentor and Honors Committee prior to graduation from the Honors Program will approve the honors thesis or creative project. Upon approval and graduation, an original copy of the honors document will be submitted to the University Library. Publication of the thesis in an appropriate venue is encouraged. Creative and research thesis project guidelines are available on the Bumpers College Honors Program website (http://bumpershonors.uark.edu/).

To support their research or creative projects, participants in the Honors Program are eligible to apply for undergraduate research grants from the Arkansas Student Undergraduate Research Fellowships (SURF) program awarded by the state, the University Honors College, and from the Bumpers College. The results of the student’s original research or creative project can be published in Discovery, the undergraduate research journal of the Bumpers College or Inquiry: The University Journal of Undergraduate Research and Creative Activity. Honors students can also apply to the Honors College for Study Abroad and conference grants and to the Bumpers College Study Abroad program. Students who have fulfilled the requirements of the Bumpers College Honors Program will be recognized as graduating with Honors Program Distinction. The transcript and diploma will designate the student as an honors program graduate of the college. At the college commencement ceremony, each honors graduate will wear special regalia, have the title of his or her honors thesis and mentor’s name listed in the graduation program, and be recognized separately as part of the Bumpers College Honors Program graduates.

Honors Graduation

Honors students enrolled in the Honors Program will be expected to perform at very high levels of achievement, earning credentials beyond the classroom experiences. Therefore, they will be eligible for several privileges during commencement not accorded to other students in the College.

Bumpers College honors students will graduate as a body and as members of the Honors Program at the College Commencement each spring. Separate regalia consisting of appropriate honors hood, stole, braid, tassel, and/or mortarboard will distinguish all students in the Honors Program. Students graduating from the Honors Program will be further distinguished from students receiving traditional College and University recognition of scholastic achievement (distinction, high distinction, or highest distinction) by graduating cum Laude with Honors Distinction, Magna cum Laude with Honors Distinction, or Summa cum Laude with Honors Distinction if cumulative grade point averages of 3.5 to 3.74, 3.75 to 3.89, or above 3.9 are maintained, respectively.

Incentives for student participation in the Honors Program include:

• Transcripts of honors students will specify that they are graduates of the College Honors Program.
• Honors students may request project support by applying for a grant from Bumpers College Undergraduate Research and Creative Project Grant Program.
• Honors students have the benefit of working one-on-one with faculty members on research or creative projects.
• Honors students will be eligible to apply for competitive scholarships supporting undergraduate honors studies or research (i.e., SURF grants).
• Honors students will receive all other rights and privileges as outlined in the Honors College benefits.

Courses

AFLS 1023H. Bumpers College Honors Program Perspectives. 3 Hours.
This course is intended to meet the requirements of UNIV 1001 and provide Bumpers College Honors students with an overview of the Honors Program as well as provide insight into research and creative project development and expectations.
Pre- or Corequisite: Honors standing. (Typically offered: Fall)

AFLS 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 3413H. Honors Proposal Development and Research Methods. 3 Hours.
This course will include creative process, ethics, proposal writing, literature review, qualitative and quantitative/experimental design, scientific theory and methods, data collection, and analysis. At the end if this course, students will have developed a proposal for their Honors thesis. The course also offers an opportunity for students to present their proposals orally as preparation for their proposal meeting.
Pre-requisite: Sophomore, junior or senior standing. (Typically offered: Fall and Spring)

AFLS 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 3993. Professional Growth and Critical Career Skills. 3 Hours.
The MERIT Profile will be utilized to identify students behavioral and character profiles so they may ’know themselves’ based upon strengths and tendencies. Throughout the term, students will be engaged in topics to help them identify their core values and strengths and develop their weaknesses. Course topics will include: adjusting to mistakes, cast off the negatives, verifying your values, scheduling priorities, building character, framing decisions/choices, personal improvement plans, and more. Upon course completion students should be able to utilize personal leadership approaches, strategic thinking and behavior, critical thinking and problem identification techniques and verbal and written communication to effectively convey their suitability specific feasible careers.
Pre-requisite: Junior standing. (Typically offered: Fall)

AFLS 400VH. Honors Thesis. 1-6 Hour.
(Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AFLS 401V. Special Topics in AFLS. 1-6 Hour.
Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
AFLS 401VH. Honors Special Problems. 1-6 Hour.
Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to AFLS 401V.

AFLS 403V. Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AFLS 403VH. Honors Special Problems. 1-6 Hour.
Individual study or research for advanced undergraduates. Corequisite: Instructor consent and honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AFLS 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

Agricultural Economics and Agribusiness (AEAB)
John D Anderson
Department Head
217 Agriculture Building
479-575-2256

Department of Agricultural Economics and Agribusiness Website (http://agribus.uark.edu/)
The Department of Agricultural Economics and Agribusiness offers a major with three concentrations that lead to a Bachelor of Science in Agriculture degree. The department also offers a minor in Agricultural Business and a minor in International Economic Development. The minor in Agricultural Business can be completed 100% online.
The agricultural business major provides education suited to career opportunities in farm management, agricultural business management, and agricultural marketing in both the domestic and international areas.

Managers of farms and agricultural businesses are continually required to make organizational and operational decisions. The basic skills and knowledge needed for making sound decisions are provided by the agricultural business curriculum. Students may elect to specialize in areas compatible with their personal objectives, depending on the extent of accounting and business orientation desired.

Students educated in agricultural business are in demand for positions in agricultural industries, farm operation, marketing agencies, agricultural service organizations, state and federal agencies, and numerous other positions. For those who go on to graduate school, teaching and research positions are available with land-grant colleges as well as with other institutions. Three concentrations are available to meet career objectives:

1. Agricultural Business Management and Marketing (ABMM)
2. Pre-Law, for students preparing to attend law school (PRLW)
3. Agricultural Economics, which emphasizes quantitative and analytical skills to prepare students for graduate school (AGEC).

Requirements for B.S.A. in Agricultural Business with Agricultural Economics Concentration
Requirements for a Major in Agricultural Business

#### Total Hours 21

### 3/3 Program – Agriculture

Exceptional students in the pre-law concentration in the Dale Bumpers College of Agricultural, Food and Life Sciences may enroll in the School of Law in their fourth year provided that all requirements have been met. Students must have:

- Completed all university, college, and major course requirements for the pre-law concentration;
- Completed 12 hours in the specialization list for pre-law;
- Earned a cumulative GPA of at least 3.50 without grade renewal; and
- Received an LSAT score of at least 159.

A student admitted to this program may substitute School of Law course work for the remaining total hours required for the bachelor’s degree in agricultural business.

It is a requirement of the School of Law’s accrediting standards that no student be admitted to the School of Law until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in the 3/3 programs satisfy this requirement.

### Agricultural Business B.S.A. with Pre-Law Concentration

#### Eight-Semester Degree Program

Students wishing to follow the degree plan in Agricultural Economics and Agribusiness should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. The Agricultural Economics and Agribusiness major has three
concentrations: Agricultural Business Management and Marketing, Pre-Law, and Agricultural Economics.

Faculty

Ahrendsen, Bruce L., Ph.D., M.S. (North Carolina State University), B.S. (Iowa State University), Professor, 1990.
Anderson, John D., Ph.D. (Oklahoma State University), M.S. (Arkansas State University), B.S. (College of the Ozarks), Professor, 2020.
Cochran, Mark J., Ph.D., M.S. (Michigan State University), B.S. (New Mexico State University), Professor, 1982.
Dixon, Bruce Lawrence, Ph.D., M.S. (University of California-Davis), B.A. (University of California-Santa Barbara), Professor, 1984.
Durand-Morat, Alvaro, Ph.D., M.S. (University of Arkansas), B.S.E. (National University of Entre Rios), Assistant Professor, 2016.
Fang, Di, Ph.D., W.P. (Arizona State University), B.A. (Nankai University), Assistant Professor, 2015.
Huang, Quixiong, Ph.D. (University of California-Davis), B.S. (Remin University of China), Professor, 2013.
Kemper, Nathan, Ph.D., M.S. (University of Arkansas), B.S. (Missouri State University), Clinical Professor, 2014.
Kovacs, Kent F., Ph.D. (University of California-Davis), B.A. (Vassar College), Associate Professor, 2012.
Luckstead, Jeff A., Ph.D. (Washington State University), M.S., B.S. (University of Idaho), Associate Professor, 2013.
McKenzie, Andrew Malcolm, Ph.D. (North Carolina State University), M.Sc. (Stirling University), B.Admin. (University of Dundee), Professor, 1998.
Miller, Wayne P., Ph.D. (University of Wisconsin), M.S. (University of Illinois), B.S. (Purdue University), Extension Professor, 1992.
Nalley, Lawton Lanier, Ph.D. (Kansas State University), M.S. (Mississippi State University), B.S. (The Ohio State University), Professor, 2008.
Nayga, Rodolfo, Ph.D. (Texas A&M University), M.S. (University of Delaware), B.S. (Foreign Institution), Distinguished Professor, 2009.
Popp, Jennie Sheerin, Ph.D., M.S. (Colorado State University), B.S. (University of Scranton), Professor, 2014.
Popp, Michael P., Ph.D. (Colorado State University), M.B.A. (University of Colorado-Boulder), B.Comm. (University of Manitoba), Professor, 1998.
Rainey, Daniel V., Ph.D., M.S. (Purdue University), B.S.A. (University of Arkansas), Associate Professor, 2000.
Rainey, Ronald L., Ph.D., M.S., B.S.A. (University of Arkansas), Professor, 1993.
Rumley, Elizabeth Rebecca, LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Research Assistant Professor, 2008.
Rumley, Rusty W., J.D. (University of Oklahoma), Research Assistant Professor, 2009.
Thomsen, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, 1998.
Watkins, Kenton Bradley, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, 2002.

Courses

AGEC 1103. Principles of Agricultural Microeconomics. 3 Hours. Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGEC 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall, Spring and Summer)

AGEC 1103H. Honors Principles of Agricultural Microeconomics. 3 Hours. This course is cross-listed with ECON 2023.

AGEC 2103. Principles of Agricultural Macroeconomics. 3 Hours. Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or ECON 2103H or ECON 2103 or ECON 2103H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)

AGEC 2103H. Honors Principles of Agricultural Macroeconomics. 3 Hours. Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or ECON 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. Pre-requisite: Honors standing. (Typically offered: Fall and Spring)

This course is cross-listed with ECON 2013, AGEC 2103.
AGEC 2141L. Agribusiness Financial Records Lab. 1 Hour.
A computer lab section for the AGEC 2142 Agribusiness Financial Records class is required to teach students accounting software and spreadsheet applications related to financial record keeping. Corequisite: AGEC 2142. Prerequisite: ASTM 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall and Spring)

AGEC 2142. Agribusiness Financial Records. 2 Hours.
Principles of small agricultural business management accounting practices are taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Corequisite: AGEC 2141L. Prerequisite: ASTM 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall and Spring)

AGEC 2303. Introduction to Agribusiness. 3 Hours.
Introduction to agribusiness issues as they relate to the food processing, wholesale and retail sectors of the agricultural industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall, Spring and Summer)

AGEC 2403. Quantitative Tools for Agribusiness. 3 Hours.
Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisite: (AGEC 1103 or ECON 2023 or ECON 2143) and MATH 2043 (or higher MATH course from the University Core excluding MATH 2183). (Typically offered: Fall)

AGEC 3303. Food and Agricultural Marketing. 3 Hours.
Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food system; and current agricultural marketing topics. Prerequisite: AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall, Spring and Summer)

AGEC 3313. Agribusiness Sales. 3 Hours.
Principles of professional sales and sales management techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Corequisite: Drill. Prerequisite: AGEC 1103 or AGEC 2103 or ECON 2023 or ECON 2143 or equivalent. (Typically offered: Spring)

AGEC 3373. Futures and Options Markets. 3 Hours.
Theory and mechanics of commodity futures and options markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for producers and users of agricultural commodity marketing plan. Speculative and hedging simulation exercises. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall)

AGEC 3403. Farm Business Management. 3 Hours.
Application of economic principles for the profitable organization and operation of the farm business. Focuses upon agricultural production management decision-making tools: budgeting techniques (enterprise, partial, cash flow), balance sheet, income statement, cash flow, investment analysis and risk management. Recommended: AGEC 1103 (or ECON 2023), AGEC 2142, and ASTM 2903. (Typically offered: Fall and Spring)

AGEC 3413. Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)
This course is cross-listed with ENSC 3413.

AGEC 3413H. Honors Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Corequisite: Drill component. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)
This course is cross-listed with AGEC 3413, ENSC 3413.

AGEC 3503. Agricultural Law I. 3 Hours.
Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of major areas of agricultural law; acquisition and disposal of farmland; farm tenancies; rights and limitations in the use and ownership of farmland; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context. (Typically offered: Fall)

AGEC 3523. Environmental and Natural Resources Law. 3 Hours.
Principles of environmental and natural resources law relevant to agriculture, food and the environmental sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other developing legal and regulatory issues relating to agriculture and natural resources. (Typically offered: Spring Even Years)

AGEC 400V. Special Problems. 1-6 Hour.
Special studies and readings conducted under the direct supervision of staff members to satisfy the requirements of individual students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGEC 401V. Internship in Agribusiness. 1-6 Hour.
A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisite: junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

AGEC 402V. Special Topics. 1-3 Hour.
Studies of selected topics in agricultural economics not available in other courses. (Typically offered: Irregular) May be repeated for degree credit.

AGEC 4041. Agribusiness Capstone. 1 Hour.
The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and agribusiness. This course is designed for students to demonstrate mastery of a number of subjects within the agribusiness discipline. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, and applying problem solving and critical thinking skills. Prerequisite: Senior standing, (Typically offered: Fall and Spring)

AGEC 4113. Agricultural Prices and Forecasting. 3 Hours.
Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2403 or STAT 2303 or WCOB 1033) and (MATH 2043 or higher (MATH 2043C, MATH 2053, MATH 2053C, or MATH 2213, excluding MATH 2183)). (Typically offered: Spring)
AGEC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with ANSC 4123, POSC 4123.

AGEC 4143. Agricultural Finance. 3 Hours.
Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Prerequisite: AGEC 1103 or (ECON 2023 and (AGEC 2103 or ECON 2143) and (AGEC 2142 or ACCT 2103)). (Typically offered: Fall)

AGEC 4163. Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

AGEC 4163H. Honors Agricultural and Rural Development. 3 Hours.
Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023) and honors standing. (Typically offered: Fall)
This course is equivalent to AGEC 4163.

AGEC 4243. Agribusiness Strategy. 3 Hours.
Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: MATH 2043 and (AGEC 1103 or ECON 2023 or ECON 2143) and (AGEC 3403 or (AGEC 2142 and AGEC 2141L) or ACCT 2103). (Typically offered: Spring)

AGEC 4303. Agribusiness Marketing Management. 3 Hours.
Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze and predict marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Spring)

AGEC 4313. Agricultural Business Management. 3 Hours.
The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Senior standing recommended. Prerequisite: (AGEC 2142 and AGEC 2141L) or (ACCT 2103) and AGEC 2303. (Typically offered: Fall)

AGEC 4323. AgriBusiness Entrepreneurship. 3 Hours.
Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 4383. Basis Trading: Case Study. 3 Hours.
This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Prerequisite: AGEC 4373. (Typically offered: Fall)

AGEC 4403. Advanced Farm Business Management. 3 Hours.
Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403 and (MATH 2903 or equivalent) and (AGEC 2142 and AGEC 2141L) or ACCT 2103). (Typically offered: Fall)

AGEC 4603. Food Economics and Health. 3 Hours.
This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: AGEC 1103 or ECON 2023 and (AGEC 2403 or WCOB 1033 or STAT 2303 or MATH 2043 or MATH 3083 or MATH 3013) (Typically offered: Spring)

AGEC 4613. Political Economy of Agriculture and Food. 3 Hours.
Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms of competitiveness, structure, operation, and performance of farming and food systems. Prerequisite: AGEC 1103 or ECON 2023 and (AGEC 2103 or ECON 2143) and (PSYC 2003 or PSOC 2003 or HDFS 2303). (Typically offered: Fall)

AGEC 4623. International Agricultural Trade and Commercial Policy. 3 Hours.
Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Prerequisite: AGEC 1103 or ECON 2023 and (AGEC 2103 or ECON 2143). (Typically offered: Spring)

Agricultural Education, Communications and Technology (AECT)
George W. Wardlow
Head of the Department
205 Agriculture Building
479-575-2035

Agricultural Education, Communications and Technology Website (http://aeed.uark.edu/)
The department of agricultural education, communications and technology offers a degree program with four concentrations that lead to a Bachelor of Science in Agriculture. Students may choose one of four areas of
concentration, or, with adviser’s approval, select courses from more than one concentration area.

• The Agricultural Education concentration is designed for students who wish to receive initial teacher licensure to teach agricultural science in public schools.

• The Agricultural Communications concentration is designed to produce graduates with both technical knowledge of the food and fiber industry and the communication skills needed to convey the story of agriculture to consumers, policy makers, and the public. Interpersonal and group communication, public relations, graphic design, electronic communication, communications campaign planning, and writing for the media are emphasized in this program.

• The Agricultural Leadership concentration incorporates interdisciplinary coursework that focuses on leadership and ethics in food and fiber systems, with courses offered from multiple disciplines. Interdisciplinary courses benefit students by offering different insights to problem solving, fostering collaboration with students from other majors, and reinforcing the importance of teamwork.

Students with this major are in constant demand due to the rapidly changing educational needs of the agricultural and natural resources industries. Graduates with this degree have a broad knowledge of agricultural disciplines. They are prepared as agricultural technology problem solvers in the application, management and/or marketing of agricultural technology.

• The Agricultural Systems Technology Management concentration is for students who are planning a professional career related to technical operations and management in the agricultural industry. Graduates assume positions of leadership and responsibility in such areas as agricultural services and sales, agricultural management, agricultural production systems, product service, product testing, and service management. The program focuses on preparing students as service providers in the application, management and/or marketing of agricultural technology.

The department also offers programs for four minors: Agricultural Education, Agricultural Communications, Agricultural Systems Technology Management, and Agricultural Leadership.

Requirements for a Major in Agricultural Education, Communication and Technology (AECT)

The state minimum core (p. 96) and discipline specific general education (p. 90) requirements:

Year Total: 15 12

Total Units in Sequence: 120

Requirements for a Major in Agricultural Education, Communication and Technology (AECT)
The state minimum core (p. 96) and discipline specific general education (p. 90) requirements:

(Course work that meets state minimum core requirements is in bold.)

University Perspectives 1
UNIV 1001 University Perspectives

Communications 6
Select English Core Courses

U.S. History or Government 3
Select U.S. History or Government Core Courses

Mathematics 3
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher excluding MATH 1313)

Science 11
BIOL 1543 & BIOL 1541L Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)

CHEM 1073 & CHEM 1071L Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture)

Science or Math Elective (3 hours)

Fine Arts/Humanities 6
Choose from 3 hours Fine Arts and 3 hours Humanities from State Minimum Core

Social Science 9
AGEC 1103 Principles of Agricultural Microeconomics
or AGEC 21 Principles of Agricultural Macroeconomics
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

Choose 3 hours Social Science from State Minimum Core

AECTBS Requirements 30
ASTM 1613 Fundamentals of Agricultural Systems Technology
ASTM 2903 Agricultural and Human Environmental Sciences Applications of Microcomputers
AGED 3133 Instructional and Presentation Strategies
ACOM 3143 Communicating Agriculture to the Public
or ACOM 3143H Honors Communicating Agriculture to the Public
AGLE 3153 Leadership Development in Agriculture

or AGLE 3153H Honors Leadership Development in Agriculture
AGED 4003 Issues in Agriculture

Choose 3 hours from the following:**
AGED 475V Internship in Agricultural Education (3 hours)
or ACOM 475V Internship in Ag Communications
or AGLE 475V Internship in Ag Leadership
or ASTM 475V Internship in Ag Systems

Choose 9 hours from the following:
ANSC 1033 Introductory Animal Sciences
ENSC 1003 Environmental Science
ento 1023 Insects, Science and Society
HORT 2003 Principles of Horticulture
POSC 2343 Poultry Production
FDSC 2603 Science in the Kitchen
PLPA 3003 Principles of Plant Pathology

21-24 hours from concentration requirements (AGED, ACOM, ASTM, AGLE) 21-24

Electives 27-30

Total Hours 120

**Internship choice should coincide with concentration declared

Additional Requirements for the Agricultural Education Concentration
Complete an evaluation for internship. Students must also meet the following criteria to be cleared for the internship:

1. Successful completion of core competency exams by meeting or exceeding the UA Teacher Preparation Program cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013 (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/jwilliamfulbrightcollegeofartsandsciences/artarts/), ENGL 1023 (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/jwilliamfulbrightcollegeofartsandsciences/artarts/), and MATH 1203 (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/jwilliamfulbrightcollegeofartsandsciences/artarts/).

Option 1 — ACT
- Reading: 20
- Writing: 7
- Math: 20

Option 2 — SAT
- Reading: 544
- Writing: 5
- Math: 533

Option 3 — GRE
- Reading: 151
- Writing: 4
- Math: 162

Option 4 — Praxis Core

- Reading: 20
- Writing: 7
- Math: 20
2. Obtain a “C” or better in the following pre-education core courses: AGED 1123, CIED 3023/CIED 4023, and CIED 3033.

3. Obtain a “C” or better in concentration education courses: AGED 3111, AGED 3133, ACOM 3143, AGED 4211, AGED 4231, and AGED 4843L.

4. Complete and submit the online application to teacher education through the university-wide Office of Teacher Education and pay the Teacher Education Application Fee (http://catalog.uark.edu/undergraduatecatalog/feeandcosts/othergeneralfees/). Apply to the Office of Teacher Education (https://teacher-education.uark.edu/) by Jan. 15 prior to the fall semester of the junior year. For more information, contact the Teacher Education Office in GRAD 336. No other qualifications are required; however, eligibility is determined by the Office of Teacher Education in Peabody Hall (PEAH) 109.

5. Obtain departmental clearance for GPA requirements, course work requirements, an interview, and/or other requirements. Obtain clearance through an Arkansas Department of Education background check. Note: Other background check will be required prior to graduation in order to be eligible for licensure.

6. Student is aware that he/she is responsible for meeting enrollment requirements for any scholarships received and is responsible for enrolling in the proper number of hours to meet graduation requirements.

Other Certification Requirements
A. NTE Principles of Learning and Teaching (7-12)
   - Test Code 0524 — Minimum Score: 164
B. Subject Matter Test Agriculture
   - Test Code 0700 — Minimum Score: 150
C. Criminal Background Check

AGED Concentration Requirements (21 plus 3 practicum hours)

AGED 1123 Foundations of Agricultural Education 3
AGED 3111 Student Management 1
AGED 3162 Curriculum Development and Assessment Techniques in AGED 2
AGED 3161L Curriculum Development and Assessment Techniques in Career and Technical Education Laboratory 1
AGED 4113 Undergraduate Researchers Improving Student Experience 3
AGED 4211 Teachers as Professionals 1
AGED 4231 Program Development 1
AGED 475V Internship in Agricultural Education (3 hours - Criminal background check is required prior to student internship) 3
CIED 3023 or CIED 4023 Survey of Exceptionalities 3
AGED 4843L Methods in Agricultural Laboratories 3

Total Hours 24

Agricultural Education, Communication & Technology B.S.A. with Agricultural Education Concentration

Eight-Semester Degree Program

Students wishing to follow the degree plan should see the Eight Semester Degree Policy (p. 86) for university requirements of the program. (*See degree audit in UAConnect for complete course list.)

Total Hours: 21
Minor in Agricultural Communications (ACOM-M)
The Agricultural Communications Minor will consist of 18 hours to include the following:

ACOM 2143  Introduction to Agricultural Communications and Leadership  3
ACOM 3143  Communicating Agriculture to the Public  3
or ACOM 3143H Honors Communicating Agriculture to the Public  3
JOUR 1033  Media Writing  3
Select 9 hours from the following:  9
ACOM 3243  Ag Reporting and Feature Writing
ACOM 3943  Professional Development in Agricultural Communications and Leadership
ACOM 4143  Electronic Communications in Agriculture
ACOM 4243  Graphic Design in AFLS
ACOM 4343  Communication Campaigns in Agriculture
ACOM 4543  Ag Publications
Total Hours  18

A student planning to minor in Agricultural Education must notify the program adviser.

Minor in Agricultural Leadership (AGLE-M)
The Agricultural Leadership Minor will consist of 18 semester hours to include:

AGLE 2143  Introduction to Agricultural Communications and Leadership  3
AGLE 3153  Leadership Development in Agriculture  3
or AGLE 3153H Honors Leadership Development in Agriculture  3
AGLE 4153  Survey of Leadership Theory in Agriculture  3
Select 9 hours from the following:  9
AGEC 3313  Agribusiness Sales
AGLE 4163  Leadership Analysis Through Film
AGED 3133  Instructional and Presentation Strategies
AGLE 3943  Professional Development in Agricultural Communications and Leadership
AGED 4443  Principles of Technological Change
EXED 4183  Management of Volunteer Programs

A student planning to minor in Agricultural Leadership should contact the program adviser for consultation and more detailed information.

Minor in Agricultural Systems Technology Management (ASTM-M)
The Agricultural Systems Technology Management Minor will consist of 18 hours to include the following:

ASTM 1613  Fundamentals of Agricultural Systems Technology  3
ASTM 2903  Agricultural and Human Environmental Sciences Applications of Microcomputers  3
Select 12 hours from the following:  12
ASTM 1611L  Fundamentals of Agricultural Systems Technology Laboratory
ASTM 2123  Metals and Welding
ASTM 3153  Surveying in Agriculture and Forestry
ASTM 3102  Small Power Units/Turf Equipment & ASTM 3101L and Small Power Units/Turf Equipment Laboratory
ASTM 3173  Electricity in Agriculture
ASTM 4203  Mechanized Systems Management
ASTM 4973  Irrigation
ENSC 3603  GIS for Environmental Science

A student planning to minor in Agricultural Systems Technology Management must notify the program adviser for consultation and more detailed information.

Faculty
Cox, Casandra Kay, M.S., B.S. (University of Arkansas), Instructor, 2003.
Estes, Hanna, M.S., B.S. (University of Arkansas), Instructor, 2014.
Graham, Donna Lucas, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, 1985.
Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), Professor, 1993.
Miller, Jefferson Davis, Ph.D., M.A. (Oklahoma State University), B.A. (Northeastern State University), Professor, 2001.
Rice, Lanny, M.S. (University of Arkansas), Instructor, 2012.
Rucker, Kathryn Jill, Ph.D., M.B.A., B.S. (Oklahoma State University), Associate Professor, 2013.
Shoulders, Kate, Ph.D. (University of Florida), M.S., M.A. (Murray State University), Associate Professor, 2012.

Wardlow, George W., Ph.D. (The Ohio State University), M.Ed., B.S. (University of Missouri-Columbia), Professor, 1992.

Whitehead, Isabel M., M.S. (University of Arkansas), B.S. (Sul Ross State University), Instructor, 2018.

Agricultural Education Courses

AGED 1031. Introduction to Early Field Experience. 1 Hour.
A thirty hour field experience designed to give prospective agricultural education teachers an opportunity to observe and participate in a variety of school settings. Corequisite: AGED 1123. (Typically offered: Fall)

AGED 1123. Foundations of Agricultural Education. 3 Hours.
A preparatory course evaluating the historical foundations of agricultural education with an introduction to the psychological, sociological and philosophical foundations of education. This course will encourage reflective practice through understanding of educational trends, classroom environment creation and utilization, and effective program planning. (Typically offered: Fall)

AGED 1133. Lifelong Agricultural Advocacy. 3 Hours.
This course will supply students with the necessary information and skills to evaluate and seek out opportunities and methods for advocating for agricultural industries. This course will equip students with the knowledge and skills to become active agricultural leaders serving at the intersection of policy, consumer engagement, and best agricultural practice. (Typically offered: Fall)

AGED 3111. Student Management. 1 Hour.
To guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success. Prerequisite: Instructor Consent. (Typically offered: Spring)

AGED 3133. Instructional and Presentation Strategies. 3 Hours.
Methods and techniques in teaching agriculture at the secondary level. Lecture/lab 4 hours per week. Corequisite: Lab component. (Typically offered: Fall)

AGED 3161L. Curriculum Development and Assessment Techniques in Career and Technical Education Laboratory. 1 Hour.
To supply students with opportunities to apply skills in creating curricula, lesson plans, and assessment strategies for courses in career and technical education. Materials created as a result of this course will apply principles learned in AGED 3162, and will align with anticipated courses to be taught by the student during his/her teaching internship. Pre- or Corequisite: AGED 3162. (Typically offered: Fall)

AGED 3162. Curriculum Development and Assessment Techniques in AGED. 2 Hours.
To supply students with the necessary information and skills to select and apply appropriate teaching techniques, curricula, resources, and assessment strategies when designing a course in career and technical education. (Typically offered: Spring)

AGED 3173. Research Methods in the Social Sciences. 3 Hours.
This course offers undergraduate students the basics and explanation for appropriate research procedures, data collection, analysis, and reporting. Course objectives to include identifying appropriate components of research works, evaluation of research in social science and creation of research projects. The purpose of the course is to prepare undergraduate students to be better producers and consumers of research in the social sciences. (Typically offered: Summer)

AGED 3173H. Honors Research Methods in the Social Sciences. 3 Hours.
This course offers undergraduate students the basics and explanation for appropriate research procedures, data collection, analysis, and reporting. Course objectives to include identifying appropriate components of research works, evaluation of research in social science and creation of research projects. The purpose of the course is to prepare undergraduate students to be better producers and consumers of research in the social sciences. (Typically offered: Summer)

AGED 4003. Issues in Agriculture. 3 Hours.
Lecture and discussion on local, regional, national and international issues related to agricultural policy, ethics, environment, society, and science. Designed for students with at least six hours of upper division agricultural science courses. Prerequisite: Junior standing. (Typically offered: Fall)

AGED 400V. Special Problems in Agricultural and Extension Education. 1-6 Hour.
Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 401V. Special Topics. 1-3 Hour.
Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

AGED 4113. Undergraduate Researchers Improving Student Experience. 3 Hours.
To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. (Typically offered: Spring)

AGED 4211. Teachers as Professionals. 1 Hour.
To expose students to the roles and responsibilities of professional teachers. Students will understand the characteristics common to professionals and apply these to the teaching setting. Real-world examples of ‘grey-area’ situations will allow students to evaluate issues holistically and determine appropriate solutions following the ethical and professional guidelines of the teaching discipline. Additionally, students will prepare resumes and engage in mock interviews to enhance their professional dispositions as they consider employment opportunities. Prerequisite: Instructor consent. (Typically offered: Fall)

AGED 4231. Program Development. 1 Hour.
Principles and concepts of leadership, program organization, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133 and instructor consent. (Typically offered: Spring)

AGED 4443. Principles of Technological Change. 3 Hours.
This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

AGED 4632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.
This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. (Typically offered: Spring)
AGED 475V. Internship in Agricultural Education. 1-6 Hour.
Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. Successful completion of a criminal background check required before a student can begin internship. Prerequisite: Admission into Clinical Practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 4843L. Methods in Agricultural Laboratories. 3 Hours.
Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, and materials. Laboratory 6 hours per week. (Typically offered: Spring)

**Agricultural Systems Technology Management Courses**

ASTM 1611L. Fundamentals of Agricultural Systems Technology Laboratory. 1 Hour.
Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in ASTM 1613, optional for others enrolled in ASTM 1613. Corequisite: ASTM 1613. (Typically offered: Fall)

ASTM 1613. Fundamentals of Agricultural Systems Technology. 3 Hours.
Introduction to basic physical concepts important in agricultural technical systems: applied mechanics, power and machinery management, structures and electrification, and soil and water conservation. Lecture 3 hours per week. (Typically offered: Fall)

ASTM 2123. Metals and Welding. 3 Hours.
An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring)

ASTM 2903. Agricultural and Human Environmental Sciences Applications of Microcomputers. 3 Hours.
Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural, food and life sciences. Emphasis placed on learning to use selected, appropriate Microsoft (Windows, Word, Excel, PowerPoint and Access), email/Internet, and collaboration software packages. (Typically offered: Fall, Spring and Summer)

ASTM 3042. Agricultural Construction Technology. 2 Hours.
Principles of building design and construction. Includes site selection calculating structural loads and computerized packages for building design. Safety practices, selection of building materials and determining costs are also included. Lecture is one hour and lab is two hours per week. Prerequisite: MATH 1203 or higher, and junior standing. (Typically offered: Irregular)

ASTM 3101L. Small Power Units/Turf Equipment Laboratory. 1 Hour.
Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscaping industries. Corequisite: ASTM 3102. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

ASTM 3102. Small Power Units/Turf Equipment. 2 Hours.
Principles of operation, adjustment, repair, maintenance, and trouble shooting of small air-cooled engines and power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: ASTM 3101L. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

ASTM 3153. Surveying in Agriculture and Forestry. 3 Hours.
Techniques and procedures normally used in determining areas and characterizing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, distance measuring equipment; topographic mapping and public land surveys. (Typically offered: Fall)

ASTM 3173. Electricity in Agriculture. 3 Hours.
Principles of electricity; wiring of home, farmstead and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Spring)

ASTM 400V. Special Problems. 1-6 Hour.
Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ASTM 402V. Special Topics in Agricultural Mechanization. 1-4 Hour.
Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. (Typically offered: Irregular) May be repeated for degree credit.

ASTM 4203. Mechanized Systems Management. 3 Hours.
Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: MATH 1203 or higher. (Typically offered: Fall Even Years)

ASTM 475V. Internship in Ag Systems. 1-6 Hour.
A supervised practical work experience in Ag Systems Technology Management which is designed to give the student an insight into the role of ag systems employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

This course is cross-listed with ACOM 475V, AGLE 475V, EXED 475V.

ASTM 4973. Irrigation. 3 Hours.
Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

**Extension Education Courses**

EXED 4183. Management of Volunteer Programs. 3 Hours.
Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Prerequisite: Junior standing. (Typically offered: Irregular)

EXED 475V. Internship in Extension. 1-6 Hour.
A supervised practical work experience in Cooperative Extension which is designed to give the student an insight into the role of Extension employees and an opportunity to gain professional competence in this area. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

This course is cross-listed with ACOM 475V, AGLE 475V, ASTM 475V.

**Animal Science (ANSC)**

Michael L. Looper
Head of the Department
B114 Agricultural, Food, and Life Sciences Building
479-575-4351
http://animal-science.uark.edu/

The animal science major offers three areas of concentration designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility. Students gain valuable experience pertaining to the production of beef and dairy cattle, swine,
horses, sheep, and companion animals. In addition, extensive study is offered in the specialized areas of animal health, breeding and genetics, meat science, nutrition, and physiology.

Students majoring in animal science are prepared for a variety of careers. Pre-veterinary, pre-medical, and pre-professional course requirements may be fulfilled while meeting degree requirements. Specific career opportunities include positions and services related to the production, merchandising, processing and distribution of meat, milk, and related products. Additional opportunities include field persons, farm and herd managers, and other agribusiness-related positions. With additional academic training, animal science majors may become extension livestock specialists, nutritionists, geneticists, and physiologists.

The General Animal Science Concentration is a science-based degree program designed for students desiring a broader general background in animal science and offers students the greatest degree of flexibility in adapting their degree program to a wide variety of career paths. It offers a larger list of elective classes and opportunity to minor in other disciplines.

The Pre-Professional/Science Concentration is designed primarily for students who intend to compete for admission to professional schools, advanced post-graduate degree programs, or other career paths that require a strong background and understanding of basic and applied sciences.

The Equine Concentration is designed for students who desire a sound science-based background in Animal Science, but desire a more intense study of equine management and equine science.

Students should consult an animal science adviser for specific course selections in the elective areas. With appropriate advising, students have an opportunity to complete at least one minor within the 120-hour degree program.

Requirements for B.S.A. in Animal Science with Animal Enterprise Concentration

Requirements for a Major in Animal Science

State minimum core (p. 96) and discipline specific general education requirements:

</tbody>
</table>
Communication Intensive Electives (6 hrs) (See student degree audit for approved course list) COMM 1313 is required for most Schools of Veterinary Medicine; Recommend AGED 3143, AGED 4003, or COMM 1313 to fulfill Learning Outcome 1.2. Recommend AGED 4003 or COMM 1313 to fulfill Learning Outcome 5.1.

History or Government 3
Select U.S. History or Government Core Courses; Learning Outcome 4.2

Mathematics 3
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (Learning Outcome 2.1)

Biological Sciences 8
BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) (Learning Outcome 3.4)
BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)

Chemical and Physical Sciences 8
CHEM 1073 Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)
or CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1123 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1123 Lab)

Select 4 hours from the following:
CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
CHEM 3603 Organic Chemistry I
& CHEM 3601L Organic Chemistry I Laboratory
PHYS 1034 Physics for Elementary Education Majors
PHYS 1044 Physics for Architects I
PHYS 2013 College Physics I (ACTS Equivalency = PHYS 2013 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2013 Lab)

Fine Arts and Humanities 6
Fine Arts: choose one from the following courses to fulfill Learning Outcome 3.1.
ARHS 1003 Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003)
COMM 1003 Basic Course in the Arts: Film Lecture
DANC 1003 Dance Appreciation
MLIT 1003 Experiencing Music (ACTS Equivalency = MUSC 1003)
MLIT 1013 Music and Society
THTR 1003 Basic Course in the Arts: Theatre Appreciation (ACTS Equivalency = DRAM 1003)
THTR 1013 Musical Theatre Appreciation

Humanities: choose one from the following courses to fulfill Learning Outcome 3.2
AST 2023 The African American Experience
CLST 1003 Introduction to Classical Studies: Greece
CLST 1013 Introduction to Classical Studies: Rome
COMM 1233 Media, Community and Citizenship
ENGL 1213 Introduction to Literature
GNST 2003 Introduction to Gender Studies
HUMN 1124H Honors Equilibrium of Cultures 500-1600
MUSY 2003 Music in World Cultures
PHIL 2003 Introduction to Philosophy (ACTS Equivalency = PHIL 1103)
PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)
WLIT 1113 World Literature: Beginnings to 1650 CE (ACTS Equivalency = ENGL 2113)
WLIT 1123 World Literature: 1650 CE to Present (ACTS Equivalency = ENGL 2123)

Social Sciences 9
Select 9 hours Social Sciences courses from the following to fulfill Learning Outcome 3.3
AGEC 1103 Principles of Agricultural Microeconomics
AGEC 2103 Principles of Agricultural Macroeconomics
ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 1023)
COMM 1023 Communication in a Diverse World
ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)
ECON 2143 Basic Economics: Theory and Practice
HDFS 1403 Life Span Development
HDFS 2413 Family Relations
HDFS 2603 Rural Families and Communities
HUMN 2114H Honors Birth of Modern Culture 1600-1900
PLSC 2013 Introduction to Comparative Politics
PLSC 2203 State and Local Government (ACTS Equivalency = PLSC 2103)
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
RESM 2853 Leisure and Society
SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013)
SOCI 2033 Social Problems (ACTS Equivalency = SOCI 2033)

Animal Science Core Requirements (31 hours)
ANSC 1033 Introductory Animal Sciences
ANSC 1781 Career Preparation and Development
### Requirements for Pre-Professional Science Concentration

**Pre-Professional Requirements (20-21 hours)**

<table>
<thead>
<tr>

Total Hours: 20

Courses

ANSC 1001L. Introductory to Animal Sciences Laboratory. 1 Hour.
Study of facilities used in production, processing, and management in animal agriculture. Identification, selection evaluation and testing of livestock, meat, and milk. Laboratory 3 hours per week. (Typically offered: Fall and Spring)

ANSC 1033. Introductory Animal Sciences. 3 Hours.
Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. (Typically offered: Fall and Spring)

ANSC 1033H. Honors Introductory Animal Sciences. 3 Hours.
Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, nutrition, reproduction, and animal health. The importance of livestock, equine, and companion animals and their allied industries will also be discussed. Prerequisite: Honors standing. (Typically offered: Fall and Spring)

ANSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)

ANSC 1781. Career Preparation and Development. 1 Hour.
Course will cover concepts necessary for preparing for a career in the animal sciences and allied industries. Concepts of goal setting, effective written and verbal communications, interpersonal skills, professional behaviors, presentation skills, portfolio and resume development will be presented. (Typically offered: Fall and Spring)

ANSC 2003. Introduction to Equine Industry. 3 Hours.
Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership. (Typically offered: Fall and Spring)

ANSC 2111L. Introduction To Animal Evaluation and Handling Lab. 1 Hour.
Laboratory component stressing fundamental concepts of animal structure, composition, and behavior, and animal handling as they relate to animal production, safety, well-being, and handler safety. One 3-hour lab weekly. Corequisite: ANSC 2113. Pre- or Corequisite: ANSC 1033. (Typically offered: Spring)

ANSC 2113. INTRODUCTION TO ANIMAL EVALUATION and HANDLING. 3 Hours.
Fundamental concepts of the interrelationship of animal growth, structure, function, and animal handling as they relate to animal production, safety, well-being, and handler safety. Corequisite: ANSC 2111L. Pre- or Corequisite: ANSC 1033. (Typically offered: Fall and Spring)
ANSC 2252L. Introduction to Livestock and Meat Evaluation. 2 Hours.
Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine. (Typically offered: Spring)

ANSC 2303L. Introduction to Horsemanship. 3 Hours.
A study of modern horsemanship training techniques involving the psychology and ethology (reason for the behavior) of equine social behavior and how it pertains to learning patterns; application of fundamental behavioral concepts in training of horses, and modification of desirable and undesirable behavioral patterns. Prerequisite: Instructor consent. (Typically offered: Fall and Spring)

ANSC 2333. Introduction to Animal Health. 3 Hours.
This course will cover the fundamental principles of animal health and disease prevention. Course discussion will include sanitation, disinfection, immunization, nutrition, housing and husbandry, causes of diseases, parasitism, clinical signs of disease, prevention and treatment options for diseases. Prerequisite: BIOL 1543. (Typically offered: Fall)

ANSC 3003. Applied Animal Parasitology. 3 Hours.
The economically important parasites of domestic animals with emphasis on their host relationships and management considerations. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring)

ANSC 3013. Parasitisms of Domesticated Non-Herbivores. 3 Hours.
Course will provide applied instruction and appreciation for the parasitisms of our domesticated swine, chickens, turkeys, dogs and cats. (Typically offered: Fall; Spring)

ANSC 3033. Animal Physiology. 3 Hours.
Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Fall)

ANSC 3033H. Honors Animal Physiology. 3 Hours.
Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Fall)

ANSC 3072. Equine Selection and Evaluation. 2 Hours.
Students will learn criteria for evaluation and selection of breeding and show animals and will gain expertise in the evaluation of breed types and show ring characteristics. Includes field trips to various breed operations. Students in this class will be well prepared to participate in equine judging team activities. Prerequisite: Instructor consent. (Typically offered: Spring)

ANSC 3123. Principles of Genetics. 3 Hours.
Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)

ANSC 3133. Animal Breeding and Genetics. 3 Hours.
Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

ANSC 3141L. Animal Nutrition Laboratory. 1 Hour.
Animal Nutrition Laboratory (FA) Practical and quantitative approach to animal nutrition; use of various methods of feedstuff evaluation including ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: ANSC 3143. Prerequisite: MATH 1203. (Typically offered: Fall)

ANSC 3143. Principles of Animal Nutrition. 3 Hours.
Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 3 hours per week. Prerequisite: ANSC 1033. (Typically offered: Spring)

ANSC 3152. Applied Animal Nutrition. 2 Hours.
Practical approach to animal nutrition; physical and chemical composition of feedstuffs, feed processing and preparation, nutrient interactions, and application of nutritional principles to feeding domestic animals. Lecture 2 hours per week. Corequisite: ANSC 3141L. Prerequisite: ANSC 3143 and MATH 1203. (Typically offered: Fall)

ANSC 3213. Behavior of Domestic Animals. 3 Hours.
Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals. (Typically offered: Fall)

ANSC 3282. Livestock Judging and Selection. 2 Hours.
Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisite: ANSC 1033 or ANSC 2252L. (Typically offered: Fall)

ANSC 3291. Livestock Junior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation. (Typically offered: Spring)

ANSC 3333. Diseases of Livestock. 3 Hours.
Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Prerequisite: BIOL 1543. (Typically offered: Spring)

ANSC 3433. Fundamentals of Reproductive Physiology. 3 Hours.
Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Pre- or Corequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L) and ANSC 2252L and BIOL 2013 and BIOL 2011L. Prerequisite: BIOL 1543. (Typically offered: Fall)

ANSC 3491L. Artificial Insemination in Cattle. 1 Hour.
Experience with artificial insemination technique in cattle including estrus detection, semen storage and handling, insemination equipment maintenance and technique. Laboratory 4 hours per week. The course is offered the second 8 weeks of the spring semester. Prerequisite: ANSC 3433 or instructor consent. (Typically offered: Spring)

ANSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring)

ANSC 3513H. Honors Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543 and honors standing. (Typically offered: Spring)

ANSC 3613. Meat Science. 3 Hours.
The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603. (Typically offered: Fall)
ANSC 3723. Horse and Livestock Merchandising. 3 Hours.
Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock. (Typically offered: Fall)

ANSC 3753. Equine Assisted Activities and Therapies. 3 Hours.
Animal Science 3753 introduces students to the field of equine assisted activities and therapies. A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior. Students will gain experience in the practical application of an equine assisted therapy program. (Typically offered: Fall)

ANSC 400V. Special Problems. 1-6 Hour.
Special problems in the animal sciences for advanced undergraduate students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 401V. Internship in Animal Sciences. 1-6 Hour.
Supervised work experience with private or government organizations Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 4072. Advanced Equine Selection and Evaluation. 2 Hours.
Advanced evaluation and selection of breeding and show animals, evaluation of breed types and show characteristics. Field trips to breeding operations. Competitive Judging team members come from this course and participation in competitive events will be required. Prior equine evaluation is not necessary, but instructor consent is required. Some Saturday activities. Prerequisite: ANSC 3072 or instructor consent. (Typically offered: Fall)

ANSC 410V. Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 410VH. Honors Special Topics in Animal Sciences. 1-4 Hour.
Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation-from local to state to federal, depending on the issue- will be studied and discussed. (Typically offered: Spring Odd Years)

This course is cross-listed with AGEC 4123, POSC 4123.

ANSC 4142. Advanced Animal Handling Techniques. 2 Hours.
This course is designed to familiarize students with handling techniques of a variety of animals, including cattle, sheep, horses, pigs, dogs, and others. Students will learn and practice handling, restraint, and common husbandry procedures with a variety of domestic species. The course will provide valuable preparation for careers in livestock management, vet medicine, animal-based research, and other fields in animal science. Prerequisite: Junior standing or consent. (Typically offered: Fall and Spring)

ANSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)

This course is cross-listed with POSC 4163.

ANSC 4173. Thoroughbred Horse Industry. 3 Hours.
This course is designed to give you an overview of the Thoroughbred breed and industry. Students will gain an understanding of the Thoroughbred industry, its history, and modern practices. Students will also gain an understanding of career potential in the Thoroughbred industry. Prerequisite: Instructor consent and Junior or Senior standing. (Typically offered: Spring Odd Years)

ANSC 4181. Kentucky Thoroughbred Tour. 1 Hour.
An overview of the Thoroughbred industry in central Kentucky through visiting major racetracks, world-class Thoroughbred breeding facilities, major equine veterinary practices, world class equine sales facilities, equine rehabilitation and retirement facilities, equine nutritional research facilities, and visit with horse trainers, veterinarians and farm managers. Successful completion of all course requirements and the tours will enable students to obtain 1 credit in animal science, network in the equine industry and critically assess potential careers. Prerequisite: Instructor consent. (Typically offered: Summer Odd Years)

ANSC 4252. Cow-Calf Management. 2 Hours.
Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall)

ANSC 4262. Swine Production. 2 Hours.
Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Fall Even Years)

ANSC 4272. Sheep Production. 2 Hours.
Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Prerequisite: Must be a student in Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Spring Odd Years)

ANSC 4282. Horse Production. 2 Hours.
Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 1 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Junior standing or higher. (Typically offered: Spring)

ANSC 4291. Livestock Senior Judging Team Activity. 1 Hour.
Training for membership on judging teams, through participation. (Typically offered: Fall)

ANSC 4303. Comparative Veterinary Anatomy. 3 Hours.
Study of structures and principles of anatomy of major domestic species. The dog, horse, and cow will be used as models for anatomical structures and the application of anatomical knowledge in animal science; focus on veterinary applications. 3 hours of lecture each week. Spring semesters. Corequisite: Lab component. Prerequisite: ANSC 1033 or BIOL 1543, junior standing or instructor consent. (Typically offered: Spring)

ANSC 4452. Milk Production. 2 Hours.
Principles of breeding, feeding, and management of dairy cattle will be studied. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Spring)

ANSC 4482. Companion Animal Management. 2 Hours.
The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Fall)
ANSC 4552. Forage-Ruminant Relations. 2 Hours.
Chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake, digestion, behavior, and nutrient cycling at the plant-animal interface. CSES 1203 recommended. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)

ANSC 4652. Stocker-Feedlot Cattle Management. 2 Hours.
Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Prerequisite: Must be a student in the Bumpers College of Agricultural, Food and Life Sciences, ANSC 1033 and Junior standing or higher. (Typically offered: Spring)

ANSC 4923. Brain & Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: ANSC 3033 or POSC 3033 or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with POSC 4923.

ANSC 4993. Animal Science Capstone. 3 Hours.
The purpose of this course is to provide students with an opportunity to apply and integrate knowledge from previous coursework in general education and animal science. This course is a multiple experience/exercise capstone course and is designed for students to demonstrate mastery of a particular subject within Animal Science. Students will provide evidence of integrated knowledge through a variety of means including oral presentations, creation of a 1250-word reflective essay, writing a research abstract and applying problem solving and critical thinking skills. Prerequisite: Senior standing. (Typically offered: Fall and Spring)

Brewing Science (BREW)
Renee Threlfall
Program Director
B-3 Food Science Building
479-575-4677
Email: threlfall@uark.edu
Brewing Science Program Website (https://brewing.uark.edu)
The Department of Food Science offers an undergraduate Certificate of Proficiency in Brewing Science.
This program is designed to provide students with a theoretical and practical introduction to brewing and fermentation. This certificate requires 15 credit hours of work, selected from the list below. Students must take two courses in brewing, one lecture and one lab, take three credit hours of an internship, research, or special problems course, and then two additional courses in FDSC, BIOL, CHEM, BENG, or CHEG. To broaden the student's exposure to the skills needed in brewing and fermentation, for currently enrolled undergraduate students, at least one of these additional courses must be in a different department from the department of the student's major, and that course must also be outside of those already required for the student's major(s). If the student already holds a degree, the course must be a new one outside of the previous degree program.

Required courses
FDSC 2723 Introduction to Brewing Science 3
BIOL 2723L Microbial Fermentation Laboratory 3

Required internship, special problems, or honors research project 3
Internship
Students could participate in an approved three credit hour internship with a brewing industry partner. A three credit hour internship should involve approximately 120-130 hours of work with the partner. The internship need not be completed in a single semester, although that is acceptable. At the end of the final semester of the internship, students would have to present a written and oral report of the work performed and lessons learned.

Special problems or research hours
Students could complete three credit hours working on a practical research problem under the supervision of a faculty member in FDSC, BISC, CHEM, BENG, or CHEG. The topic of this work should be approved for relevance to the certificate before the work begins and reviewed if it changes substantially during the course of the work. Work that involves industry partners is particularly encouraged. At the end of the final semester of the work, students would have to present a written and oral report of the work performed and lessons learned. Credit hours and work done for an honors degree can satisfy this requirement, but if honors work is used, it must include at least one credit hour in three different semesters.

Total Hours 15

Crop Science (CPSC)
Robert Bacon
Professor and Head
115 Plant Science Building
479-575-2347

Opportunities for employment and post-graduate study are numerous for graduates of the Department of Crop, Soil, and Environmental Sciences. Crop Science graduates become involved in crop production or find employment in public agencies providing support services for agriculture (e.g., Extension Service, State Plant Board, Natural Resources Conservation Service), or as consultants serving production agriculture, in the agrichemical and seed industries, and in agricultural research programs.
The crop science major includes courses in crop management, production agriculture, plant breeding and genetics, crop and forage production, pest management (weeds, insects, and plant diseases), and soil fertility.

**Requirements for a Major in Crop Science (CPSC)**

State minimum core (p. 96) and discipline specific general education requirements (p. 90).

(Course work that meets state minimum core requirements is in bold.)

### Select 6 hours from Social Sciences from University Core (3 hours must be outside AGEC/ECON discipline)

Students minoring in Agricultural Business should choose AGEC 2103*.

### CPSC Requirements 9-12
Select one group (C-G) for CPSC Requirements (9-12 hours). Courses selected within major cannot be taken for duplicate credit. Students who wish to declare a minor must contact the Bumpers College Dean’s Office.

**Group C - Pest Management (9 hours)**
- CSES 4133 Ecology and Morphology of Weedy and Invasive Plants
  or CSES 4143 Principles of Weed Control
- PLPA 4223 Plant Disease Control
- ENTO 4123 Insect Pest Management

**Group D - Agricultural Business (12 hours)**
- AGEC 2303 Introduction to Agribusiness
- AGEC 3403 Farm Business Management

Select 3 hours from the following:
- Core elective hours from approved list in AGBS-Minor

Select 3 hours from the following:
- Controlled elective hours from approved list in AGBS-minor (3 hours)

**Group E - Crop Biotechnology (10 hours)**
- PLPA 4333 Biotechnology in Agriculture
- CSES 400V Special Problems

Choose 6 hours from the following:
- BIOL 4303 Plant Physiology
- CHEM 3813 Elements of Biochemistry
- CSES 4103 Plant Breeding

**Group F - Soil Science (9-10 hours)**
- CSES 3214 Soil Resources and Nutrient Cycles
- CSES 3263 Soil and Water Conservation
- CSES 355V Soil Profile Description (1 hour, may take twice for credit)
- CSES 4253 Soil Classification and Genesis
- ENSC 4263 Environmental Soil Science
- ENSC 4401 Professional Certification Preparation
- CSES 4553 Wetland Soils

**Group G - Natural Resources Management (9 hours)**
- ENSC 1003 Environmental Science
  & ENSC 1001L Environmental Science Laboratory

Select at least 5 hours from the following:
- ENSC 3003 Introduction to Water Science
- AGEC 3413 Principles of Environmental Economics
  or ENSC 34 Principles of Environmental Economics
- ENSC 3413 Principles of Environmental Economics
- AGEC 3503 Agricultural Law I
- AGEC 3523 Environmental and Natural Resources Law
- BIOL 3861L General Ecology Laboratory
- BIOL 3863 General Ecology
- CSES 4133 Ecology and Morphology of Weedy and Invasive Plants
- CSES 4553 Wetland Soils
- CSES 462V Internship (3 hours)
- ENSC 3003 Introduction to Water Science
- ENSC 3103 Plants and Environmental Restoration
- ENSC 3223 Ecosystems Assessment
- ENSC 3603 GIS for Environmental Science
- ENSC 4021L Water Quality Laboratory
- ENSC 4023 Water Quality
- ENSC 4034 Analysis of Environmental Contaminants
- ENSC 4263 Environmental Soil Science
- ENSC 4401 Professional Certification Preparation
- GEOS 3043 Sustaining Earth
- GEOS 3543 Geospatial Applications and Information Science

**GENERAL ELECTIVES 10-18**
- UNIV 1001 University Perspectives (***)

**Total Hours 120**

*Students minoring in Agricultural Business should choose AGEC 2103 in the Social Sciences block and will need to select another course in the list of AGBS-M Controlled Electives (as part of the General Electives for the CPSC major) to fulfill the requirements for the minor.

**One 3-hr study abroad course, either Experiential Learning in Indian Agriculture (Jan) or Sustainability in the Eurozone Agro-Food Chain (May), which are both taken under AFLS 401V/AFLS 401VH, or CSES 462V International Research Internship (SU) may be used in fulfilling the General Agronomy requirement.

***If students declare a minor, then no more than 9 credit hours of courses selected within major (including courses within the CPSC Requirements Groups C-G) can be taken for duplicate credit in applying toward a minor associated with CPSC Requirements Groups C-G.

**** UNIV 1001 required for new freshmen only.

**Crop Science B.S.A. Nine-Semester Degree Program**

Because the Crop Science program requires an internship, it doesn’t qualify for the Eight-Semester Program. See more about the Eight-Semester Degree Policy (p. 86) for university requirements of the program.

### Minor in Crop Science (CPSC-M)

A student planning to minor in Crop Science must notify the program adviser for consultation and more detailed information. The Crop Science Minor consists of 18 semester hours of 2000-level courses or above, including the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Fall</th>
<th>Spring</th>
<th>Summer</th>

**Minor in Crop Biotechnology (CPBT-M)**

A student planning to minor in Crop Biotechnology must notify the program adviser for consultation and more detailed information. The Crop Biotechnology Minor consists of 16 hours of courses and to include the following:

<table>
<thead>
<tr>
<th>Core Courses</th>
</tr>
</thead>
</table>
| PLPA 4333 Biotechnology in Agriculture | 3  
| Genetics |  
| CSES 400V Special Problems (two 2-hour courses taken in two different semesters) | 4  

Select one of the following:

- BIOL 2323 General Genetics
- ANSC/POSC Principles of Genetics

**Controlled Electives**

Select two of the following:

- BIOL 4303 Plant Physiology
- CHEM 3813 Elements of Biochemistry
- CSES 4103 Plant Breeding

**Total Hours** 16

**Faculty**

- Bacon, Robert Keith, Ph.D. (Purdue University), M.S., B.S.A. (University of Arkansas), Professor, 1984.
- Barber, Thomas, Ph.D., M.S., B.S. (University of Arkansas), Professor, 2007.
- Bourland, Fred, Ph.D. (Texas A&M University), M.S., B.S.A. (University of Arkansas), Professor, 1988.
- Brye, Kristofer R., Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin--Stevens Point), University Professor, 2001.
- Burgos, Nilda Roma, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, 1998.
- Butts, Thomas R., Ph.D. (University of Nebraska-Lincoln), Assistant Professor, 2019.
- Counce, Paul Allen, Ph.D. (University of Georgia), M.S. (Purdue University), B.S. (University of Tennessee-Martin), Professor, 1983.
- Daniels, Michael B., Ph.D., M.S. (University of Arkansas), B.S. (Pennsylvania State University), Professor, 1996.
- Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (Iowa State University), Associate Professor, 2003.
- Gbur, Edward E., Ph.D., M.S. (The Ohio State University), B.S. (Saint Francis University), Professor, 1987.
- Hardke, Jarrod T., Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Professor, 2013.
- Kelley, Jason, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Professor, 2003.
- Lee, Jung Ae, Ph.D., M.S. (University of Georgia), M.A., B.A., (Ewha Womans University), Assistant Professor, 2016.
- Mason, Richard Esten, Ph.D., B.A. (Texas A&M University), Associate Professor, 2010.
- Mauromoustakos, Andy, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, 1989.
- Miller, David M., Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, 1988.
- Mozaffari, Morteza, Ph.D. (University of Delaware), M.S., B.S. (University of Massachusetts), Assistant Professor, 2002.
- Mozzoni, Leandro, Ph.D. (University of Arkansas), M.S. B.S. (Rosario National University), Associate Professor, 2017.
- Norsworthy, Jason Keith, Ph.D., M.S. (University of Arkansas), B.S. (Louisiana Tech University), Distinguished Professor, 2006.
- Pereira, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, 2011.
- Purcell, Larry C., Ph.D. (University of Florida), M.S., B.S. (University of Georgia), Distinguished Professor, 1993.
- Roberts, Trenton L., Ph.D. (University of Arkansas), M.S. (University of Arizona), B.S. (Oklahoma State University), Associate Professor, 2010.
- Robertson, Bill, Ph.D., M.S. (Texas A&M University), B.S. (West Texas State University), Professor, 2014.
- Ross, Jeremy, Ph.D., M.S., B.S. (University of Arkansas), Professor, 1996.
- Savin, Mary Cathleen, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, 2002.
- Scott, Robert C., Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, 2002.
- Sha, Xueyan, Ph.D. (Louisiana State University), Professor, 2012.
- Shakiba, Ehsan, Ph.D., M.S. (University of Arkansas), B.S. (Azad University, Iran), Assistant Professor, 2015.
- Sharpley, Andrew N., Ph.D. (Massey University, New Zealand), B.S. (University College of North Wales), Distinguished Professor, 2006.
- Skinner, Jerral V., Ph.D. (University of Arkansas), Lecturer, 1990.
- Slaton, Nathan A., Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, 2001.
- Srivastava, Vibha, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, 2001.
- Wilson, Charles E., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas State University), Professor, 2011.
- Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Associate Professor, 2012.

**Courses**

**CSES 1203. Introduction to Plant Sciences. 3 Hours.**

An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

**CSES 2013. Pest Management. 3 Hours.**

Introduction to basic principles of pest management as they relate to vertebrate animals, insects, plant disease and weeds. Selected pests are studied with emphasis on current management approaches and alternative pest control. (Typically offered: Spring)

**CSES 2101L. Crop Science Laboratory. 1 Hour.**

A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

**CSES 2103. Crop Science. 3 Hours.**

Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. (Typically offered: Spring)

**CSES 2201L. Soil Science Laboratory. 1 Hour.**

Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)
CSES 2203. Soil Science. 3 Hours. 
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher (to include MATH 1213, MATH 1284C, MATH 1514, MATH 2213, MATH 2043, MATH 2053, MATH 2445, MATH 2514, MATH 2554, MATH 2564, or MATH 2574) and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)

CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours. 
A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours. 
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Prereq. or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

CSES 3312. Cotton Production. 2 Hours. 
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)

CSES 3322. Soybean Production. 2 Hours. 
An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

CSES 3332. Rice Production. 2 Hours. 
A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Odd Years)

CSES 3342. Cereal Grain Production. 2 Hours. 
An overview of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)

CSES 355V. Soil Profile Description. 1-2 Hour. 
Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

CSES 3603. Metrics for Sustainable Agricultural Systems. 3 Hours. 
Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. (Typically offered: Fall)

CSES 400V. Special Problems. 1-6 Hour. 
Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 4013. Advanced Crop Science. 3 Hours. 
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)

CSES 402V. Special Topics. 1-3 Hour. 
Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours. 
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours. 
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours. 
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 4224. Soil Fertility. 4 Hours. 
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Prerequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)

CSES 4253. Soil Classification and Genesis. 3 Hours. 
Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 4303. Bioenergy Feedstock Production. 3 Hours. 
Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. Courses in introductory chemistry or soil science are preferred. (Typically offered: Spring)

CSES 4453. Wetland Soils. 3 Hours. 
This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 462V. Internship. 1-6 Hour. 
Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
Crop, Soil and Environmental Sciences (CSES)

Robert K. Bacon
Head of the Department
115 Plant Science Building
479-575-2354

cropsoilandenvironmentalsciences.csse@uark.edu

course.descriptions.
department.descriptions.

Courses in the Department of Crop, Soil and Environmental Sciences provide fundamental and applied studies in two majors:

- Crop Science (p. 170)
- Environmental, Soil and Water Science (p. 180)

Areas studied within the Crop Science major include crop science, production agriculture, plant breeding and genetics, crop and forage production, pest management (weeds, insects, and plant diseases), and soil fertility. The Environmental, Soil and Water Science major includes courses in areas such as environmental science, water quality, soil science, soil and water conservation, and the sustainable productivity of natural resources.

Many graduates from both majors also choose to continue their education in graduate programs in a wide variety of disciplines both related and complementary to the B.S.A. degrees.

Butts, Thomas R., Ph.D. (University of Nebraska), M.S., B.S.A., (University of Wisconsin), Assistant Professor, Department of Crop, Soil, and Environmental Sciences, 2018.

Courses

CSES 1203. Introduction to Plant Sciences. 3 Hours.
An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

CSES 2101L. Crop Science Laboratory. 1 Hour.
A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

Crop, Soil and Environmental Sciences (CSES)
CSES 2103. Crop Science. 3 Hours.
Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. (Typically offered: Fall Odd Years)

CSES 2201L. Soil Science Laboratory. 1 Hour.
Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)

CSES 2203. Soil Science. 3 Hours.
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher (to include MATH 1213, MATH 1284C, MATH 1514, MATH 2213, MATH 2043, MATH 2053, MATH 2445, MATH 2514, MATH 2554, MATH 2564, or MATH 2574) and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)

CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours.
A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

CSES 3312. Cotton Production. 2 Hours.
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)

CSES 3322. Soybean Production. 2 Hours.
An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

CSES 3332. Rice Production. 2 Hours.
A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Odd Years)

CSES 3342. Cereal Grain Production. 2 Hours.
An overview of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)

CSES 355V. Soil Profile Description. 1-2 Hour.
Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

CSES 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.
Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. (Typically offered: Fall)

CSES 400V. Special Problems. 1-6 Hour.
Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 4013. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)

CSES 402V. Special Topics. 1-3 Hour.
Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours.
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 4224. Soil Fertility. 4 Hours.
Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Pre- or Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)

CSES 4253. Soil Classification and Genesis. 3 Hours.
Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)
CSES 4303. Bioenergy Feedstock Production. 3 Hours.
Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. Courses in introductory chemistry or soil science are preferred. (Typically offered: Spring)

CSES 4553. Wetland Soils. 3 Hours.
This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 462V. Internship. 1-6 Hour.
Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Plant Pathology Website (https://plant-pathology.uark.edu/)

The Department of Entomology and Plant Pathology offers two undergraduates minors:

• Entomology (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/dalebumperscollegeofagriculturalfoodandlifesciences/entomologyento/)
• Plant Pathology (http://catalog.uark.edu/undergraduatecatalog/collegesandschools/dalebumperscollegeofagriculturalfoodandlifesciences/plantpathology/plpa/)

Full degree programs are offered only at the graduate level.

Entomology is the branch of science concerned with the study of insects and related organisms. It involves studies of their biology, structure, identification, economic significance, and population management. The major emphasis of the curriculum is understanding insect biology and applying that knowledge in an integrated approach to insect-pest management.

Plant pathology is the study of interrelationships of plants with the abiotic and biotic agents that affect plant health and productivity. The goal of the discipline is to minimize the impact of plant diseases on agricultural production and human health. Scientific training within the department focuses on the nature, cause, and management of plant diseases.

Undergraduate students interested in graduate work in entomology or plant pathology should pursue one of the minors here or the Pest Management minor. See Pest Management (p. 199) for degree requirements.

Minor in Entomology (ENTO-M)
The Entomology minor will consist of a minimum of 15 semester hours to include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENTO 3013</td>
<td>Introduction to Entomology</td>
<td>3</td>
</tr>
<tr>
<td>ENTO 4024</td>
<td>Insect Diversity and Taxonomy</td>
<td>4</td>
</tr>
<tr>
<td>Select three of the following:</td>
<td></td>
<td>8-9</td>

Minor in Plant Pathology (PLPA-M)
A student planning to minor in plant pathology should notify the Department of Entomology and Plant Pathology and consult an adviser. A minor in Plant Pathology consists of 19 hours to include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLPA 3003</td>
<td>Principles of Plant Pathology &amp; PLPA 3001L and Principles of Plant Pathology Laboratory</td>

Graduate Faculty
Bateman, Nick, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, 2016.
Bluhm, Burt H., Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, 2008.
Cartwright, Richard D., Ph.D. (University of California at Davis), M.S., B.S. (University of Arkansas), Extension Professor, 1993.
Correll, Jim, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, 1989.
Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Professor, 2008.
Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, 2016.
Faske, Travis, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, 2015.
Goggin, Fiona, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, 2001.
Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, 2015.
Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, 1999.
Lottin, Kelly M., Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, 2002.
Lorenz, Gus M., Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, 1997.
Rojas, Alejandro, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, 2018.
Rojas, Clemencia, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, 2015.
Rupe, John C., Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), University Professor, 1984.
Spradley, J. Ples, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, 1984.
Spurlock, Terry, Ph.D. (University of Arkansas), Extension Associate Professor, 2015.
Steinkraus, Donald C., Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, 1989.
Studebaker, Glenn, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, 1993.
Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, 2001.
Thrash, Ben, Assistant Professor, 2018.
Tzanetakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, 2008.
Wamishe, Yeshi Andenow, Ph.D. (University of Arkansas), B.S. (Addis Ababa University, Ethiopia), Associate Professor, 2011.

Entomology Courses

ENTO 1023. Insects, Science and Society. 3 Hours.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1023. (Typically offered: Spring)

ENTO 1023. Insects, Science and Society. 3 Hours.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1023. (Typically offered: Spring)

ENTO 1021L. Insects in Science, the Arts, and Human History Laboratory. 1 Hour.
To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. The lab will be a hands-on approach to reinforcing entomological concepts addressed in lecture. Corequisite: ENTO 1023. (Typically offered: Spring)

ENTO 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 4013.

ENTO 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4024.

ENTO 4043. Apiculture. 3 Hours.
Review of social behavior of insects and its exemplification in Honeybees. Previous knowledge of basic entomology is helpful but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Odd Years)

ENTO 4053. Insect Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4053.

ENTO 410V. Special Topics. 1-3 Hour.
Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

ENTO 4123. Insect Pest Management. 3 Hours.
Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013. (Typically offered: Spring Odd Years)

ENTO 4133. Advanced Applied Entomology. 3 Hours.
Biology and ecology of major arthropod pests as model applied management systems. Activities include independent study, literature review and group discussions. Knowledge of general entomology and pest management is required. Self-learning modules are available. Lecture 2 hours/week and direct self-study laboratory 2 hours/week. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Spring Even Years)

Plant Pathology Courses

PLPA 3001L. Principles of Plant Pathology Laboratory. 1 Hour.
Lab course in examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Pre- or Corequisite: PLPA 3003 or BIOL 3003. (Typically offered: Fall)
This course is cross-listed with BIOL 3001L.

PLPA 3003. Principles of Plant Pathology. 3 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. (Typically offered: Fall)
This course is cross-listed with BIOL 3003.

PLPA 400V. Research. 1-6 Hour.
Original investigations of assigned problems in plant pathology. Prerequisite: PLPA 3004. (Typically offered: Fall, Spring and Summer)
PLPA 4123. Bacterial Lifestyles. 3 Hours.
The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years) This course is cross-listed with BIOL 4123.

PLPA 4223. Plant Disease Control. 3 Hours.
Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3003. (Typically offered: Fall) This course is cross-listed with BIOL 4133.

PLPA 4304. Applied Plant Disease Management. 4 Hours.
A plant pathology course emphasizing practical understanding of the concepts and principles of agronomic and horticultural crop disease management, including disease diagnosis, monitoring, and using models to forecast disease events. Prerequisite: PLPA 3003 or instructor consent. (Typically offered: Irregular)

PLPA 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall) This course is cross-listed with BIOL 4333.

PLPA 462V. Internship. 1-6 Hour.
Supervised practical work experience in pest management to develop and demonstrate professional competence. A maximum of 6 hours credit per semester or summer session is permitted. Faculty approval of projects proposal prior to enrollment, and written or oral reports are required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

Environmental, Soil, and Water Science (ESWS)

Mary C. Savin
ESWS Coordinator
115 Plant Science Building
479-575-5740

Opportunities for employment and post-graduate study are numerous for graduates of the Department of Crop, Soil, and Environmental Sciences. Environmental, Soil, and Water Science graduates find jobs with environmental consulting companies, environmental education organizations, state agencies (e.g., Extension Service, Department of Environmental Quality, Health Department), federal agencies (e.g., Environmental Protection Agency, Natural Resources Conservation Service), municipalities and local environmental services (e.g., waste management and recycling, water and wastewater treatment facilities, parks and tourism departments), a wide variety of private businesses, and environmental research.

The Environmental, Soil, and Water Science major includes courses in areas such as environmental science, water quality, soil science, soil and water conservation, and the sustainable productivity of natural resources.

Requirements for a Major in Environmental, Soil, and Water Science (ESWS)
State minimum core (p. 96) and discipline specific general education (p. 90) requirements:

(Course work that meets state minimum core requirements is in bold.)

Minor in Soil Science (SOIL-M)

A student planning to minor in Soil Science must notify the program adviser for consultation and more detailed information.

The Soil Science minor will consist of a total of 18 hours comprising the following required and elective courses. No more than 9 hours can be counted towards a Soil Science minor with an Environmental Soil and Water Science major. Those students interested in obtaining certification in the area of soil science will need at least 15 soil science hours, preferably covering each of the sub-disciplines (i.e., fertility, genesis, morphology, and classification, chemistry, physics, soil biology and ecology, and land use and management).

Total Hours 18

Crop, Soil and Environmental Sciences Courses

CSES 1203. Introduction to Plant Sciences. 3 Hours.
An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

CSES 2102. Crop Science. 3 Hours.
A study of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal crop species. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring)

CSES 3322. Soybean Production. 2 Hours.
An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

CSES 3332. Cotton Production. 2 Hours.
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)

CSES 3334. Cereal Grain Production. 2 Hours.
An overview of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)

CSES 355V. Soil Profile Description. 1-2 Hour.
Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

CSES 2101L. Crop Science Laboratory. 1 Hour.
A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

CSES 2201L. Soil Science Laboratory. 1 Hour.
Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)

CSES 2203. Soil Science. 3 Hours.
Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher (to include MATH 1213, MATH 1284C, MATH 1514, MATH 2213, MATH 2043, MATH 2053, MATH 2445, MATH 2514, MATH 2554, MATH 2564, or MATH 2574) and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)

CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours.
A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on written communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.
Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

CSES 3312. Cotton Production. 2 Hours.
Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)
CSES 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.
Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity.
Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. (Typically offered: Fall)

CSES 400V. Special Problems. 1-6 Hour.
Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 4013. Advanced Crop Science. 3 Hours.
Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)

CSES 402V. Special Topics. 1-3 Hour.
Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours.
Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.
Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours.
Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 4224. Soil Fertility. 4 Hours.
Study of the soil’s chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Pr- or Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)

CSES 4253. Soil Classification and Genesis. 3 Hours.
Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 4303. Bioenergy Feedstock Production. 3 Hours.
Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. Courses in introductory chemistry or soil science are preferred. (Typically offered: Spring)

CSES 4553. Wetland Soils. 3 Hours.
This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 462V. Internship. 1-6 Hour.
Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Environmental Science Courses
ENSC 1001L. Environmental Science Laboratory. 1 Hour.
Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003. (Typically offered: Fall and Spring)

ENSC 1001M. Honors Environmental Science Laboratory. 1 Hour.
Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003. (Typically offered: Fall and Spring)
This course is equivalent to ENSC 1001L.

ENSC 1003. Environmental Science. 3 Hours.
Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. Corequisite: ENSC 1001L. (Typically offered: Fall and Spring)

ENSC 1003H. Honors Environmental Science. 3 Hours.
Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. If taking course for University core Natural Science credit, ENSC 1001L is a co-requisite. Corequisite: ENSC 1001L. (Typically offered: Fall and Spring)
This course is equivalent to ENSC 1003.

ENSC 3003. Introduction to Water Science. 3 Hours.
Properties, occurrence, and description of the types, functions, quality and quantity, potential contaminants, uses, and guiding policies and regulations of the various water resources in the environment. Prerequisite: (ENSC 1003 OR CHEM 1053 (or higher) OR GEOS 1113 (or higher) OR BIOL 1543). (Typically offered: Spring)

ENSC 3103. Plants and Environmental Restoration. 3 Hours.
Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613. (Typically offered: Fall Even Years)
ENSC 3103H. Honors Plants and Environmental Restoration. 3 Hours.
Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613 and honors standing. (Typically offered: Fall)
This course is equivalent to ENSC 3103.

ENSC 3221L. Ecosystems Assessment Laboratory. 1 Hour.
The purpose of this laboratory is to complement concepts learned in lecture by carrying out experiments that familiarize students with methods used in soil and aquatic ecology. Students will collect samples, analyze and interpret data obtained from soil and water samples. Lab will meet once per week for 3 hours. Corequisite: ENSC 3223. (Typically offered: Fall Even Years)

ENSC 3223. Ecosystems Assessment. 3 Hours.
Application of basic ecological principles to gain an appreciation for ecosystem assessment and management. Lecture 3 hours per week. Prerequisite: BIOL 1543. (Typically offered: Fall Even Years)

ENSC 3253. Soil and Water Conservation. 3 Hours.
Effect of land use on water quality. Major sources of agricultural nonpoint pollutants. Best management practices used to minimize water quality impacts. Prerequisite: CSES 2203. (Typically offered: Fall)

ENSC 3413. Principles of Environmental Economics. 3 Hours.
An introductory, issues-oriented course in the economics of the environment. What is involved in society making decisions about environmental quality will be studied. Environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)
This course is cross-listed with AGEC 3413.

ENSC 3603. GIS for Environmental Science. 3 Hours.
Provide instruction on the uses of GIS techniques in solving practical environmental and agricultural land use problems. Areas include: 1) an introduction to spatial variability in soils with an emphasis on the application of GIS techniques to map and understand spatial parameters important to different land uses, and 2) development of individual experience in the use of GIS in solving environmental and agricultural problems using an oral and written term project. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

ENSC 3933. Environmental Ethics. 3 Hours.
The course addresses ethical questions about nature and the natural environment. Topics of discussion include anthropocentric and biocentric ethics, population control, obligations to future generations, animal rights, moral considerability, Leopold’s land ethic, deep ecology, and ecofeminism. Lecture/discussions 3 hours per week. Prerequisite: ENSC 1003 or PHIL 2003 or PHIL 2103. (Typically offered: Spring)
This course is cross-listed with PHIL 3113.

ENSC 400V. Special Problems. 1-3 Hour.
Work on special problems in environmental science or related fields. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

ENSC 400VH. Honors Special Problems. 1-3 Hour.
Work on special problems in environmental science or related fields. Prerequisite: Honors Standing. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.
This course is equivalent to ENSC 400V.

ENSC 4021L. Water Quality Laboratory. 1 Hour.
Field and laboratory experience in physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Laboratory experiments in water sampling, measurement of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc., and instrumentation. Prerequisite or Corequisite: ENSC 4023 (Typically offered: Fall)

ENSC 4023. Water Quality. 3 Hours.
Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Prerequisite: CHEM 1123 and CHEM 1121L and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

ENSC 4034. Analysis of Environmental Contaminants. 4 Hours.
Methods of analysis for inorganic and organic contaminants, radionuclides and microorganisms in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Lecture 4 hours per week. Pre- or Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. (Typically offered: Spring Even Years)

ENSC 4263. Environmental Soil Science. 3 Hours.
Study of the behavior of pesticides, toxic organic compounds, metals, nutrients, and pathogenic microorganisms in the soil/plant/water continuum. Lecture 3 hours per week. Pre- or Corequisite: PHYS 2013 and PHYS 2011L. Prerequisite: CSES 3214. (Typically offered: Spring Even Years)

ENSC 4401. Professional Certification Preparation. 1 Hour.
This class is meant to reinforce concepts and skills already learned in other soil and environmental science and related courses and to provide the opportunity to prepare to take a national certification examination. If so chosen, students may pursue certification as soil or environmental science professionals. Prerequisite: Senior standing. (Typically offered: Spring)

Food Science (FDSC)

Jeyam Subbiah
Department Head
N-201 Food Science Building
479-575-4605
jsubbiah@uark.edu

Department of Food Science Website (http://food-science.uark.edu/)

Food science is an interdisciplinary field involving microbiology, engineering, biochemistry, nutrition, and sensory science to better understand food processes and improve food products for the general public. As the stewards of the field, food scientists study the physical, microbial, and chemical makeup of food. They apply their findings to develop the safe, nutritious, and sustainable foods and innovative packaging that line supermarket shelves daily.

Food science prepares students for many interesting, rewarding and challenging professional career opportunities in industry, business, governmental and educational organizations associated with food and food-related products. Due to the diversity and abundance of opportunities available, students graduating with a B.S.A. in food science readily obtain employment or continue studies for graduate school. Additionally, requirements for several pre-professional programs can be fulfilled while meeting requirements for the food science degree.

Students may choose one of three areas of concentration for their degree program: Food Science (FDSC), Food Technology (FDTN) or Food and Culinary Sciences (FDCU). The FDSC concentration at the University of Arkansas is one of only 38 programs in the United States and the only one in Arkansas that is approved by the Institute of Food Technologists. It provides students with a strong background in basic and applied sciences and food chemistry, microbiology, engineering and quality control.

The food we consume daily is the result of extensive food research, a systematic investigation into a variety of foods’ properties and compositions. After the initial stages of research and development, food
products are mass produced using the principles of food technology. The FDTN concentration provides students interested in food industry careers with a multidisciplinary education consisting of core food science requirements in combination with a minor chosen by the student to complement the student's career goals.

Culinary sciences blend the artistic abilities of culinary arts with the scientific expertise of food science to shape the future of research and development in the food industry. The FDCU concentration provides students interested in product development careers with an interdisciplinary background in food science and culinary arts. This concentration is a partnership program with Northwest Arkansas Community College (NWACC). Students complete their culinary arts coursework at Brightwater: A Center for the Study of Food (an academic division of NWACC located in Bentonville, AR) and are eligible to receive a Certificate of Proficiency in Culinary Arts from NWACC with no additional coursework. Culinary coursework will be transferred to the UA; it can be taken prior to admission to the UA or taken while in residence at the UA. Food and Culinary Sciences concentration will provide students with the course work necessary to be eligible to become a Certified Culinary Scientist through the Research Chef’s Association.

Students in each concentration are required to complete a relevant internship. There are also ample opportunities for students to gain research and international experiences and to select a minor.

Requirements for B.S.A. in Food Science with Food Science Concentration

Major Requirements

State minimum core (p. 96) and discipline-specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)

Communication (12 hours) 12
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
Select two courses from approved list of communication intensive courses

U.S. History and Government (3 hours) 3
Select 3 hours US History from University Core

Mathematics and Statistics (6 hours) 6
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103)
STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

Physical and Biological Sciences (23-27 hours) 23-27
BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)
& BIOL 1541L and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
& BIOL 2011L and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)

CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
& CHEM 1101L and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture)
& CHEM 1121L and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

CHEM 3813 Elements of Biochemistry
CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture)
& CHEM 2611L and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
or CHEM 36lOrganic Chemistry I
& CHEM 36lOrganic Chemistry I Laboratory
& CHEM 36lOrganic Chemistry II
& CHEM 36lOrganic Chemistry II Laboratory

Fine Arts and Humanities (6 hours) 6
Select 3 hours Fine Arts from State Minimum Core
Select 3 hours Humanities from State Minimum Core

Social Sciences (9 hours) 9
Select 9 hours Social Sciences from State Minimum Core

University Requirement (1 hr) 1
UNIV 1001 University Perspectives

Food Science Degree Requirements (32 hours) 32
FDSC 1011 Exploring Topics in Food Science
FDSC 1103 Introduction to Food Science
FDSC 2523 Sanitation and Safety in Food Processing Operations
FDSC 3103 Principles of Food Processing
FDSC 3202 Introduction to Food Law
FDSC 4113 Food Analysis
& FDSC 4111L and Food Analysis Lab
FDSC 4122 Food Microbiology
& FDSC 4121L and Food Microbiology Lab
FDSC 4304 Food Chemistry
FDSC 431V Internship in Food Science
FDSC 4413 Sensory Evaluation of Food
FDSC 4713 Product Innovation for the Food Scientist

21 hours from concentration requirements (FDSC, FDCU, FDTN) 21

General Electives 3-7

Total Hours 120

Additional Requirements for Food Science Concentration (21 hours)

FDSC 4754 Engineering Principles of Food Processing 4
MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203) 3
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) 4
NUTR 1213 Fundamentals of Nutrition 3
PHYS 2103 College Physics I (ACTS Equivalency = PHYS 2405 Lecture) 4
& PHYS 2111L and College Physics I Laboratory (ACTS Equivalency = PHYS 2405 Lab)

General Elective 3

Total Hours 21
Food Science B.S.A., Food Science Concentration
Nine-Semester Degree Program
Because the Food Science Concentration requires an internship one summer, students cannot enroll in an Eight-Semester Program. See the Eight-Semester Degree Policy (p. 86) for requirements of the eight-semester programs.

Total Units in Sequence: 120
Requirements for B.S.A. in Food Science with Food Technology Concentration

Major Requirements

State minimum core (p. 96) and discipline-specific general education requirements:
(Course work that meets state minimum core requirements is in bold.)

Communication (12 hours) 12
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
Select two courses from approved list of communication intensive courses

U.S. History and Government (3 hours) 3
Select 3 hours US History from University Core

Mathematics and Statistics (6 hours) 6
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103)
STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

Physical and Biological Sciences (23-27 hours) 23-27
BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)
& BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
& BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
& University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture)
& University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)
CHEM 3813 Elements of Biochemistry

CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture)
& Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
or CHEM 36 Organic Chemistry I
& CHEM 36L and Organic Chemistry I Laboratory
& CHEM 36 Organic Chemistry II
& CHEM 36L and Organic Chemistry II Laboratory

Fine Arts and Humanities (6 hours) 6
Select 3 hours Fine Arts from State Minimum Core
Select 3 hours Humanities from State Minimum Core

Social Sciences (9 hours) 9
Select 9 hours Social Sciences from State Minimum Core

University Requirement (1 hr) 1
UNIV 1001 University Perspectives

Food Science Degree Requirements (32 hours) 32
FDSC 1011 Exploring Topics in Food Science
FDSC 1103 Introduction to Food Science

FDSC 2523 Sanitation and Safety in Food Processing Operations
FDSC 3103 Principles of Food Processing
FDSC 3202 Introduction to Food Law
FDSC 4113 Food Analysis
& FDSC 4111L and Food Analysis Lab
FDSC 4122 Food Microbiology
& FDSC 4121L and Food Microbiology Lab
FDSC 4304 Food Chemistry
FDSC 431V Internship in Food Science
FDSC 4413 Sensory Evaluation of Food
FDSC 4713 Product Innovation for the Food Scientist

21 hours from concentration requirements (FDSC, FDCU, FDTN) 21
General Electives 3-7
Total Hours 120

Additional Requirements for Food Technology Concentration (21 hours)

MATH 2043 Survey of Calculus (ACTS Equivalency = MATH 2203) 3
Completion of a minor to provide multidisciplinary educational background 1 15
General Elective 3
Total Hours 21

1 Students must declare chosen minor with the Bumpers College Dean's Office. Visit the list of Bumpers College minors (p. 134).

Food Science B.S.A., Food Technology Concentration

Nine-Semester Degree Program

Because the Food Technology Concentration requires an internship one summer, students cannot enroll in an Eight-Semester Program. See the Eight-Semester Degree Policy (p. 86) for requirements of the eight-semester programs. Students in the Food Technology Concentration must also minor in agribusiness, general business or nutrition. Where not specified, select courses from the state minimum core (p. 96) list.

Total Units in Sequence: 120

1 Indicates NorthWest Arkansas Community College course codes.

Minor in Food Science (FDSC-M)
The Food Science Minor consists of 18 semester hours to include:

The following courses are required for a minor in Food Science:

FDSC 3103 Principles of Food Processing 3
FDSC 4122 Food Microbiology 3
& FDSC 4121L Food Microbiology Lab  
FDSC 4304 Food Chemistry 4

and a minimum of 8 hours selected from the following courses (at least 5 hours must be 3000-4000 level coursework):

FDSC 1103 Introduction to Food Science  
FDSC 2401 Uncorked: Vines to Wines  
FDSC 2401H Honors Uncorked: Vines to Wines  
FDSC 2603 Science in the Kitchen  
FDSC 2701 Food for Health  
FDSC 3202 Introduction to Food Law  
FDSC 4113 Food Analysis & FDSC 4111L Food Analysis Lab  
FDSC 4413 Sensory Evaluation of Food  
FDSC 4754 Engineering Principles of Food Processing  
NUTR 4213 Advanced Nutrition

A student planning to minor in food science must consult a Department of Food Science adviser.

Requirements for Certificate of Proficiency in Brewing Science

This program is designed to provide students with a theoretical and practical introduction to brewing and fermentation. This certificate requires 15 credit hours of work, selected from the list below. Students must take two courses in brewing, one lecture and one lab, complete three credit hours of an internship, research, or special problems course, and then take two additional courses in FDSC, BIOL, CHEM, BENG, or CHEG. To broaden the student's exposure to the skills needed in brewing and fermentation, for currently enrolled undergraduate students, at least one of these additional courses must be in a different department from the department of the student's major, and that course must also be outside of those already required for the student's major(s). If the student already holds a degree, the course must be a new one outside of the previous degree program.

Required courses

FDSC 2723 Introduction to Brewing Science 3
BIOL 2723L Microbial Fermentation Laboratory 3

Required internship, special problems, or honors research project 3

Internship
Students could participate in an approved three credit hour internship with a brewing industry partner. A three credit hour internship should involve approximately 120-130 hours of work with the partner. The internship need not be completed in a single semester, although that is acceptable. At the end of the final semester of the internship, students would have to present a written and oral report of the work performed and lessons learned.

Special problems or research hours

Students could complete three credit hours working on a practical research problem under the supervision of a faculty member in FDSC, BISC, CHEM, BENG, or CHEG. The topic of this work should be approved for relevance to the certificate before the work begins and reviewed if it changes substantially during the course of the work. Work that involves industry partners is particularly encouraged. At the end of the final semester of the work, students would have to present a written and oral report of the work performed and lessons learned. Credit hours and work done for an honors degree can satisfy this requirement, but if honors work is used, it must include at least one credit hour in three different semesters.

**Faculty**

Atungulu, Griffiths Odhiambo, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, 2013.

Baum, Jamie I., Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, 2011.

Crandall, Philip G., Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, 1989.

Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, 2012.

Hettiarachchy, Navam S., Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, 1992.

Howard, Luke R., Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, 2002.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women’s University, South Korea), Associate Professor, 2008.

Meulienet, Jean-François, Ph.D. (University of Georgia), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Professor, 1996.

Morawicki, Ruben O., Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, 2006.

Ricke, Steven C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Illinois), Professor, 2005.

Seo, Han-Seok, Dr. rer. Medic. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University, South Korea), B.S. (Korea University, Seoul, South Korea), Associate Professor, 2012.

Siebenmorgen, Terrence J., Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, 1984.

Subbiah, Jeyamkondan, Ph.D. (Oklahoma State University), M.S. (University of Manitoba, Canada), B.E. (Tamil Nadu Agricultural University, India), Professor, 2019.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, 1999.

**Courses**

**FDSC 1011. Exploring Topics in Food Science. 1 Hour.**

Introduces the depth and scope of Food Science as a profession. This course emphasizes the importance of science in processing and preservation of food and discusses current topics and issues. Practical information on food processing, composition, additives, labeling, environmental issues, regulations, safety, sensory analysis, and health benefits will be provided. Curriculum offerings in Food Science will be related to job responsibilities as a Food Scientist. Lecture/discussions, 2 hours per week for 8 weeks. (Typically offered: Fall)

**FDSC 1103. Introduction to Food Science. 3 Hours.**

This course is designed to provide students with a general application and understanding of current issues associated with food products and food ingredients. Discussions will focus on controversial subjects involving food products, food additives, food safety and preservation techniques based on scientific principles and popular belief. Lecture/discussions/demonstrations, 3 hours per week. (Typically offered: Spring)

**FDSC 2111. Math Elements for Food Science and Technology. 1 Hour.**

Basic data interpretation and analysis, problem interpretation and equation formulation, manipulation of algebraic functions representing applications in food science and technology, predictive models and curve fittings to determine model constants applied in food science and processing. Pre- or Corequisite: MATH 2043 or MATH 2554. (Typically offered: Spring)

**FDSC 2401. Uncorked: Vines to Wines. 1 Hour.**

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. (Typically offered: Fall)

**FDSC 2401H. Honors Uncorked: Vines to Wines. 1 Hour.**

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. Prerequisite: Honors standing. (Typically offered: Fall)

This course is equivalent to FDSC 2401.
FDSC 2523. Sanitation and Safety in Food Processing Operations. 3 Hours. Topics covered will provide an understanding of the control of microbial, chemical, and physical food hazards as well as emerging food safety issues. Course will include a discussion of sanitation, cleaners and sanitizers, sanitary equipment and facility designs, and microbial growth and control in food processing operations. Lecture/discussion. (Typically offered: Spring)

FDSC 2603. Science in the Kitchen. 3 Hours. In recent years science has found its way into the kitchen and cooking into laboratories and food processing plants. This course is designed to integrate science and cooking to help students appreciate the chemical and physical properties of foods and understand how the processes used when handling, preparing, and storing foods affect these properties. (Typically offered: Fall)

FDSC 2701. Food for Health. 1 Hour. The course is designed for students interested in how foods affect one's health. This course provides students with a background of functional food that will enable them to understand, discuss, and evaluate functionality of food in relation to health. This class is designed to appeal to students studying food science, nutrition, biology, chemistry, nursing, and health and human performance. (Typically offered: Spring)

FDSC 2723. Introduction to Brewing Science. 3 Hours. An introduction to the biology and chemistry of fermentation, with an emphasis on beer brewing. Styles, flavors, and quality characteristics of beer will be discussed. The history, legal aspects, and economic impacts of homebrewing as well as craft and industrial brewing will be covered. Coursework is expected to integrate lectures and guest presenters with supplemental reading assignments. This course will not include beer tasting, therefore there are no age restrictions for enrollment. Prerequisite: (CHEM 1123 or CHEM 1073) and BIOL 1543. (Typically offered: Fall)

FDSC 3103. Principles of Food Processing. 3 Hours. The course is designed as an overview of the unit; food processing operations common to all types of food processing plants. Examples will be drawn from international food processing operations processing fruits and vegetables, poultry and meats, and oil seeds and cereal grains. Emphasis on oral communication and critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and (MATH 2043 or MATH 2554). (Typically offered: Fall)

FDSC 3202. Introduction to Food Law. 2 Hours. Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food safety, labeling, and the FDA. Discussion relates to practical use of food law. Lecture 2 hours per week. (Typically offered: Spring)

FDSC 400V. Special Problems. 1-4 Hour. Investigation of assigned problems in food science. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

FDSC 4111L. Food Analysis Lab. 1 Hour. Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Corequisite: FDSC 4113. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 4113. Food Analysis. 3 Hours. Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Corequisite: FDSC 4111L. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 4121L. Food Microbiology Lab. 1 Hour. A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Pre- or Corequisite: FDSC 4122. (Typically offered: Fall)

FDSC 4122. Food Microbiology. 2 Hours. The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with BIOL 4122.

FDSC 4304. Food Chemistry. 4 Hours. Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

FDSC 431V. Internship in Food Science. 1-4 Hour. The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: Junior standing and consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

FDSC 4413. Sensory Evaluation of Food. 3 Hours. Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: STAT 2303 or WCOB 1033 or STAT 2823 or PSYC 203. (Typically offered: Fall)

FDSC 4713. Product Innovation for the Food Scientist. 3 Hours. This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Corequisite: Lab component. Pre-or Corequisite: FDSC 4113 and FDSC 4111L. Prerequisite: Senior standing, FDSC 4304, DSIC 3103, and FDSC 4413. (Typically offered: Spring)

FDSC 472V. Special Topics in Food Science. 1-4 Hour. Discussion focused on selected topics of particular fields of raw product physiology, food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

FDSC 4754. Engineering Principles of Food Processing. 4 Hours. Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L. (Typically offered: Spring Even Years)

Horticulture (HORT)

Wayne A. Mackay
Head of the Department
316 Plant Sciences Building
479-575-2603

Department of Horticulture Website (http://hort.uark.edu/)

The Department of Horticulture offers a broad, science-based degree with comprehensive and technical training: Horticulture, Landscape and Turf Sciences (HLTS).
Horticulture, landscape, and turf management involves selection, production, management, marketing, use, and research of ornamental crops (shrubs, trees, flowers, and turf), edible crops (herbs, vegetables, and fruits) and turf grasses for the economic, nutritional, aesthetic and recreational well-being of society. The major provides education and training in basic and applied sciences, arts and humanities, communication, and business and economics to provide an understanding of the underlying principles in plant growth and development and use of new technologies, and the operation of a horticultural enterprise.

In consultation with an academic adviser and mentor, students may individually focus their academic programs through required and elective courses to focus training in specialized areas such as production, greenhouse and floriculture sciences, turfgrass management, golf course management, nursery production and management, edible crop production, pest management, sales and support services, education and training, and horticultural consulting. An internship in the industry is required to gain practical, hands-on experience.

Job opportunities for horticulturists include horticulture crop production and management, horticulture merchandising and business, consulting, inspection, research, teaching, Extension, communications, allied industries serving horticultural producers, journalism, and developing private business. Students who specialize in landscape and aspects of ornamental horticulture will be prepared for careers in the landscape service industry, landscape nurseries, landscape design firms, private and public gardens, and public agencies such as parks and recreation. Job opportunities for students studying turfgrass management include golf course superintendent, sports field manager, turfgrass science companies, seed or sod production, commercial landscape turfgrass management, research, sales, teaching, or private consulting. Advanced study may be required for some careers.

**Requirements for a Major in Horticulture, Landscape and Turf Sciences (HLTS)**

The HLTS major will consist of 120 hours to include the following courses that meet the state minimum core (p. 96) and discipline specific general education (p. 90) requirements:

(Course work that meets state minimum core requirements is in **bold**.)

**Communications**

</table>
Plants, People and You is a course designed to introduce students to the world of horticulture, with an emphasis on how plants can be used for food, fun, health, economic value or environmental contribution. (Typically offered: Fall)

### Faculty

- **Cato, Aaron J.**, Ph.D. (University of Arkansas), M.S. (Kansas State University), B.S. (Arkansas State University), Assistant Professor, 2019.
- **Clark, John R.**, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, 1983.
- **Garcia, M. Elena**, Ph.D., M.S. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Professor, 2005.
- **Karcher, Douglas Edward**, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, 2000.
- **Lee, Jacquelyn A.**, Ph.D. (University of Arkansas), B.S. (Arkansas State University), Assistant Professor, 2019.
- **McWhirt, Amanda L.**, Ph.D. (North Carolina State University), B.S. (Virginia Polytechnic Institute and State University), Assistant Professor, 2016.
- **Mackay, Wayne A.**, Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, 2014.
- **McDonald, Garry Vernon**, Ph.D., M.S., B.S.A. (Texas A&M University), Clinical Assistant Professor, 2016.
- **Richardson, Mike**, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, 2016.
- **Robbins, James A.**, Ph.D. (University of California-Davis), M.S. (University of Georgia), B.S. (University of Wisconsin), Professor, 1998.
- **Rom, Curt R.**, Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, 1989.
- **Shi, Ainong**, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, 2013.
- **Worthington, Margaret L.**, Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, 2016.

### Courses

**HORT 1103. Plants, People and You. 3 Hours.**

Plants, People and You is a course designed to introduce students to the world of horticulture, with an emphasis on how plants can be used for food, fun, health, economic value or environmental contribution. (Typically offered: Fall)
Horticulture (HORT)

HORT 3403. Turfgrass Management. 3 Hours.
Cultural and management practices of commercial and residential lawns. Principles and practices of mowing, fertilizing, irrigating, and control of weed, disease, and insects. Identification of turfgrass; equipment selection. Corequisite: Lab component. Prerequisite: HORT 2303. (Typically offered: Spring Even Years)

HORT 3503. Sustainable and Organic Horticulture. 3 Hours.
This course will provide a base of knowledge of the principles and practices of sustainable, organic, and alternative horticulture management systems. The class will review and evaluate topics including soil biological processes (compost, humus and fertility), pest management, alternative farming systems, and organic agriculture. After this foundation information is studied, the class will study applications of sustainable agriculture principles to production systems such as greenhouse vegetable production, ornamental production, fruit production, and landscape and turf management. (Typically offered: Fall Even Years)

HORT 400V. Special Problems. 1-6 Hour.
Original investigations on assigned problems in horticulture. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HORT 401V. Special Topics in Horticulture, Turf or Landscape. 1-6 Hour.
Topics related to horticulture, turfgrass or landscape science or management not covered in other courses or a more intensive study of a specific topic. (Typically offered: Irregular) May be repeated for degree credit.

HORT 402V. Horticulture Judging and Competition Activity. 1-6 Hour.
Training for and participation on horticultural identification, judging and competitive teams. Prerequisite: HORT 2003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HORT 4033. Professional Landscape Installation and Construction. 3 Hours.
Principles and practices involved in landscape installation and construction. Topics covered include sequencing construction activities, protecting existing trees, landscape soils, selecting plants, planting and transplanting plant materials, wood construction, cement and masonry construction, and low-voltage lighting. Lecture 3 hours per week. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003. (Typically offered: Fall Even Years)

HORT 4043. Professional Landscape Management. 3 Hours.
Principles and practices of landscape management and maintenance. Topics include low maintenance and seasonal color design, pruning and hazard tree management, water and fertilizer management, pesticide use, and other maintenance activities. Basic elements of marketing, specifications and contracts, estimating, personnel management, and equipment selection and acquisition relevant for landscape services will be introduced. Preparatory training in agribusiness or business is suggested. Prerequisite: HORT 2003 and HORT 3103. (Typically offered: Fall Odd Years)

HORT 4103. Fruit Production Science and Technology. 3 Hours.
The management technologies and cultural practices of fruit crops including (but not limited to) blueberries, blackberries, raspberries, strawberries, grapes, peaches, and apples will be presented. The underlying scientific principles of crop genetics, nutrition, and physiology will be presented as a basis for making management decisions in fruit crop productions. Corequisite: Lab component. Prerequisite: HORT 2003. (Typically offered: Spring Odd Years)

HORT 4153. Sustainable Techniques in Urban Horticulture. 3 Hours.
Sustainable Techniques in Urban Horticulture is a practicum based course where the student will learn basic techniques in sustainable production of horticultural crops in an urban or small-scale environment. Crops may include vegetables, cut flowers, or small fruits. This course is intended for students who do not have an agricultural production background or for those students wanting to learn more about the production of high-value horticultural crops under sustainable production systems. (Typically offered: Summer)

HORT 4403. Plant Propagation. 3 Hours.
Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003. (Typically offered: Spring)

HORT 4403H. Honors Plant Propagation. 3 Hours.
Principles of plant propagation using seeds, cuttings, grafting, budding, layering, and tissue culture. The physiological basis of propagation is described. Knowledge of plant growth and physiology is needed. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: HORT 2003 and honors standing. (Typically offered: Spring)

This course is equivalent to HORT 4403.

HORT 4413. Horticulture Physiology. 3 Hours.
This course provides students with a background into the physiological processes of plants with an emphasis on horticultural crops and how the processes relate to horticultural crop production practices. Among the topics covered are photosynthesis, respiration, water relations and morphogenesis. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Spring)

HORT 4503. Sustainable Nursery Production. 3 Hours.
This course addresses issues and practices involved in production of quality woody nursery crops (e.g. trees and shrubs produced in open filed and containerized systems). (Typically offered: Spring Even Years)

HORT 4603. Practical Landscape Planning. 3 Hours.
Ornamental planting design and landscape planning concepts. Preparing planting plans, materials sheets, and cost estimates for residential properties. Prerequisite: HORT 3103. (Typically offered: Spring Even Years)

HORT 462V. Horticulture, Landscape, Turf Sciences Internship Experience. 1-6 Hour.
A supervised practical work experience in a horticulture, landscape design, or turf business or research program to gain professional competence and insight into employment opportunities. Prerequisite: COMM 1313 and HORT 2101. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HORT 4701L. Greenhouse Management and Controlled Environment Horticulture Laboratory. 1 Hour.
Laboratory involving hands-on experiments designed to demonstrate principles discussed in the lecture section. Includes field trips. Corequisite: HORT 4703. (Typically offered: Fall Odd Years)

HORT 4703. Greenhouse Management and Controlled Environment Horticulture. 3 Hours.
Operation and management of greenhouses and other controlled environments used in horticultural production. Emphasis on system design and construction, control of light intensity and photoperiod, heating and cooling systems, substrates, mineral nutrition, water quality and irrigation systems. Prerequisite: HORT 2003 and CHEM 1073. (Typically offered: Fall)
**Minor in Pest Management (PMGT-M)**

Students interested in this area of study must declare their intention to the program coordinator. A minor in Pest Management consists of 19 hours to include two courses from each pest discipline: Entomology (ENTO), Plant Pathology (PLPA), and Weed Science (CSES):

<table>

**Total Hours**: 19

---

**Poultry Science (POSC)**

David J. Caldwell

Director, Center of Excellence for Poultry Science

Head, Department of Poultry Science

0114 Poultry Science Center

479-575-4952

Department of Poultry Science Website (https://poultry-science.uark.edu/)

The Department of Poultry Science offers a major in poultry science leading to a Bachelor of Science in Agriculture. The department also offers coursework for a minor and a certificate of excellence program.

A major in poultry science is designed to provide the scientific and technical education to prepare students for positions of leadership and responsibility in the expanding fields of production, processing, marketing, and distribution of meat, eggs, and related poultry products. The curriculum also prepares students for career opportunities in specialized areas of nutrition, breeding, genetics, physiology, management, food science, immunology, and disease.

Elective hours allow students to select a minor and thus personalize their degree.

Elective hours can also be used to emphasize areas of business, production, processing or science. Pre-veterinary medicine, pre-medical, or pre-pharmacy requirements may be fulfilled while meeting degree requirements.

Curricula are designed to permit the student to obtain the necessary foundation to pursue graduate study for the master's and doctoral degrees. Advanced degrees are offered but not limited to the areas of nutrition, genetics, physiology, product technology, and poultry health.

---

**Pest Management (PMGT)**

Nilda Burgos

Program Coordinator

ALTH 222

479-575-2445

All faculty in the Department of Plant Pathology, Entomology, and the discipline of Weed Science in the Department of Crop, Soil, and Environmental Sciences are faculty in the discipline of Pest Management.

Total Units in Sequence: 120

1. If CHEM 1103/CHEM 1101L taken previous fall.
2. If CHEM 1103/CHEM 1101L and CHEM 1123/CHEM 1121L taken previously.
3. If CHEM 3603/CHEM 3601L taken previously.

**Minor in Poultry Science (POSC-M)**

A student planning to minor in poultry science should declare the minor with their major dean’s office and consult a departmental adviser to discuss requirements. The minor consists of 16 hours to include the following:

- CHEM 3603 Organic Chemistry I & CHEM 3601L Organic Chemistry I Laboratory
- BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) & BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
- POSC 3433 Poultry Breeding or POSC 3123 Principles of Genetics or BIOL 2323 General Genetics
- POSC Controlled Elective
- POSC 4811 Seminar: Professionalism or POSC 4831 Seminar: Processing Regulations
- Select 2-4 hours from the following:
  - CHEM 3613 Organic Chemistry II & CHEM 3611L Organic Chemistry II Laboratory
  - General Elective (2 hours)
- POSC 3223 Poultry Diseases
- POSC Controlled Elective
- General Elective
- Discipline-Related Elective
- Year Total: 15 | 16

Minor in Poultry Science (POSC-M)

A student planning to minor in poultry science should declare the minor with their major dean’s office and consult a departmental adviser to discuss requirements. The minor consists of 16 hours to include the following:

- CHEM 3603 Organic Chemistry I & CHEM 3601L Organic Chemistry I Laboratory
- BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) & BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
- POSC 3433 Poultry Breeding or POSC 3123 Principles of Genetics or BIOL 2323 General Genetics
- POSC Controlled Elective
- POSC 4811 Seminar: Professionalism or POSC 4831 Seminar: Processing Regulations
- Select 2-4 hours from the following:
  - CHEM 3613 Organic Chemistry II & CHEM 3611L Organic Chemistry II Laboratory
  - General Elective (2 hours)
- POSC 3223 Poultry Diseases
- POSC Controlled Elective
- General Elective
- Discipline-Related Elective
- Year Total: 15 | 16

Minor in Poultry Science (POSC-M)

A student planning to minor in poultry science should declare the minor with their major dean’s office and consult a departmental adviser to discuss requirements. The minor consists of 16 hours to include the following:

- CHEM 3603 Organic Chemistry I & CHEM 3601L Organic Chemistry I Laboratory
- BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) & BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)

- POSC Controlled Elective
- General Elective
- Discipline-Related Elective
- Year Total: 15 | 16

1. If CHEM 1103/CHEM 1101L taken previous fall.
2. If CHEM 1103/CHEM 1101L and CHEM 1123/CHEM 1121L taken previously.
3. If CHEM 3603/CHEM 3601L taken previously.
Core Requirements (10 hours)
POSC 1003  Introduction to Poultry Science  3
POSC 2343  Poultry Production  3
Choose 4 hours from the following:
POSC 3554  Avian Anatomy  3
POSC 4314  Egg and Meat Technology  3
POSC 3513  Current Approaches in Agricultural Laboratory Research  3
POSC 4213  Integrated Poultry Management Systems  3
POSC 3543  Poultry Nutrition  3
POSC 4801  Seminar: Research Topics  1
or POSC 4821  Seminar: Problem Solving  1

Controlled POSC Electives (6 hours)
Choose a minimum of 6 hours from the following:
POSC 2353  Poultry Breeder Management  3
POSC 3033  Animal Physiology  3
POSC 3223  Poultry Diseases  3
POSC 3554  Avian Anatomy  3
POSC 3123  Principles of Genetics  3
POSC 4333  Poultry Breeding  3
POSC 4314  Egg and Meat Technology  3
POSC 4343  Poultry Nutrition  3
POSC 3013  Exotic Companion Birds  3
POSC 3513  Current Approaches in Agricultural Laboratory Research  3
POSC 4213  Integrated Poultry Management Systems  3
POSC 2333  Value Added Muscle Foods  3
POSC 4923  Brain and Behavior  3

Total Hours  16

Requirements for Undergraduate Certificate of Excellence in Poultry Science
Students entering the Certificate of Excellence Program must 1) meet the admission requirements for the University of Arkansas and 2) have completed 90 hours of coursework with a 2.0 or higher from a regionally accredited institution of higher education.

Students who have completed a Bachelor of Science degree may also consider this program. Typical careers include production/processing/ allied positions in the poultry industry, graduate studies are also an option.

Curriculum Outline:
POSC 3033  Animal Physiology  3
POSC 3223  Poultry Diseases  3
POSC 3554  Avian Anatomy  4
POSC 4213  Integrated Poultry Management Systems  3
POSC 4314  Egg and Meat Technology  4
POSC 4343  Poultry Nutrition  3
POSC 4801  Seminar: Research Topics  1
or POSC 4821  Seminar: Problem Solving  1

POSC 4811  Seminar: Professionalism  1
or POSC 4831  Seminar: Processing Regulations  1
POSC 401V  Internship in Poultry Science  3
POSC 410V  Special Topics in Poultry Science  3

Faculty
Faculty List

Alrubaye, Adnan A., Ph.D., M.Ed. (University of Arkansas-Fayetteville), M.Sc. (University of Baghdad), Research Assistant professor, Department of Poultry Science, 2019.

Bottje, Walter G., Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, 1985.

Caldwell, David J., Ph.D., M.S., and B.S. (Texas A&M University), Professor and Head, Department of Poultry Science, Director, Center of Excellence for Poultry Science, 2019.

Coon, Craig N., Ph.D., M.S., B.S. (Texas A&M University), Professor, 1997.

Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, 2000.

Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, 2013.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, 1994.

Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A&M University), Professor, 2000.

Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, 2000.

Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, 2010.

Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, 2006.

Kuenzel, Wayne J., Ph.D. (University of Georgia), B.S. (Bucknell University), Professor, 2000.

Kwon, Young Min, Ph.D. (University of Arkansas), Professor, 2010.

Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, 1993.

Oriowski, Sara K., Ph.D., M.S. (University of Arkansas), B.S. (Cornell University), Extension Assistant Professor, 2019.

Rath, Narayan C., Ph.D. (University of Delhi-India), B.S. (Utkal University-India), Research Assistant professor, Department of Poultry Science, 2019.

Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, 2016.

Sun, Xiaolun, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, 2016.

Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, 2002.

Olive, Annie, Ph.D. (University of Arkansas), B.S. (Cornell University), Extension Assistant Professor, 1994.

Valencia, Daniel, Ph.D. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, 2013.

Donoghue, Annie, Ph.D. (University of Arkansas), Professor, 1997.

Coon, Craig N., Ph.D., M.S., B.S. (Texas A&M University), Professor, 1997.

Donoghue, Annie, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, 2000.

Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, 2013.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, 1994.

Hanning, Casey Owens, Ph.D., M.S., B.S. (Texas A&M University), Professor, 2000.

Hargis, Billy M., Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, 2000.

Kidd, Michael T., Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, 2010.

Kong, Byungwhi, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, 2006.

Kuenzel, Wayne J., Ph.D. (University of Georgia), B.S. (Bucknell University), Professor, 2000.

Kwon, Young Min, Ph.D. (University of Arkansas), Professor, 2010.

Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, 1993.

Oriowski, Sara K., Ph.D., M.S. (University of Arkansas), B.S. (Cornell University), Extension Assistant Professor, 2019.

Rath, Narayan C., Ph.D. (University of Delhi-India), B.S. (Utkal University-India), Research Professor, 1992.

Rochell, Samuel J., Ph.D. (University of Illinois at Urbana-Campaign), M.S., B.S. (Auburn University), Assistant Professor, 2016.

Sun, Xiaolun, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, 2016.

Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, 2002.

Wideman, Robert F., Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, 1993.

Courses
POSC 1003. Introduction to Poultry Science. 3 Hours.
To introduce the student to the career opportunities in the poultry science industry. Students will be introduced to biological sciences associated with poultry. Corequisite: Lab component. (Typically offered: Fall)
POSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.
Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)
This course is cross-listed with ANSC 1062.

POSC 1123. The Animals in Our Lives. 3 Hours.
Address the controversies and focus on animal welfare, environmental issues and sustainability. (Typically offered: Summer)

POSC 2343. Poultry Production. 3 Hours.
To develop a basic foundation about the practices utilized to produce broilers and turkeys. Course will highlight hatchery function and management; embryo development and hatching; chick/poultry transportation, preparation and maintenance of facilities for rearing birds, bird environment, nutrition, and health. Also to be covered are the different roles associated with live production in an integrated company. Corequisite: Lab component. (Typically offered: Fall)

POSC 2353. Poultry Breeder Management. 3 Hours.
Students will be introduced to the management practices used in production of young and adult chickens, turkeys, and other poultry with special emphasis on broiler, breeder, and market egg production. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Spring)

POSC 3013. Exotic Companion Birds. 3 Hours.
Topics include basic care, health, breeding, bird evolution, anatomy, and nutritional management of commonly kept exotic companion birds, including parrots, cockatoos, macaws, finches, canaries, and pigeons. Discussion will include housing and care for individual pet birds and large scale breeding and production. Lecture/ discussion 3 hours per week. Prerequisite: BIOL 1543. (Typically offered: Fall Odd Years)

POSC 3033. Animal Physiology. 3 Hours.
Fundamental aspects of central nervous, musculoskeletal, reproductive, digestive, immune, cardiovascular, respiratory and renal systems will be covered. The normal structure and function of these systems will be emphasized. Lecture 3 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1073. (Typically offered: Fall)
This course is cross-listed with ANSC 3033.

POSC 3123. Principles of Genetics. 3 Hours.
Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)
This course is cross-listed with ANSC 3123.

POSC 3223. Poultry Diseases. 3 Hours.
Common diseases affecting poultry reared under commercial conditions will be covered including diagnosis, therapy and prevention. Immunity, sanitation practices, and chemophylaxis will also be covered. Lecture 3 hours per week with some demonstrations, slides and videotapes. Prerequisite: BIOL 2013 and BIOL 2011L and junior standing. (Typically offered: Spring)

POSC 3381. Poultry Judging and Selection. 1 Hour.
Practice in production judging and flock selection. Laboratory 3 hours per week. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

POSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring)
This course is cross-listed with ANSC 3513.

POSC 3513H. Honors Current Approaches in Agricultural Laboratory Research. 3 Hours.
A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring)
This course is cross-listed with POSC 3513, ANSC 3513.

POSC 3554. Avian Anatomy. 4 Hours.
Detailed coverage of the external and internal anatomy of poultry, including formation and development of the egg and embryo. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1543. (Typically offered: Fall)

POSC 400V. Special Problems. 1-9 Hour.
Special problems in the poultry sciences for advanced students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

POSC 401V. Internship in Poultry Science. 1-6 Hour.
Supervised work experience with private or government organizations to introduce students to professional areas of work in poultry science. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

POSC 4033. Statistical Process Control in the Food Industry. 3 Hours.
Analysis of processing data related to compliance with regulatory limits, quality & safety limits and internal & external customer specifications. Emphasizes statistical process control chart development, including understanding data and chart selection, calculating statistical limits, and interpreting process performance. Prerequisite: Instructor consent. (Typically offered: Irregular)

POSC 410V. Special Topics in Poultry Science. 1-4 Hour.
Topics not covered in other courses or for a more intensive study of specific topics in poultry science. (Typically offered: Irregular) May be repeated for degree credit.

POSC 4123. Legal Issues in Animal Agriculture. 3 Hours.
An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring)
This course is cross-listed with AGEC 4123, ANSC 4123.

POSC 4163. Companion Animal Nutrition. 3 Hours.
This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)
This course is cross-listed with ANSC 4163.

POSC 4123. Integrated Poultry Management Systems. 3 Hours.
Major managerial systems in the integrated commercial poultry industry. Development of an understanding of the basic decision making processes of poultry companies and the factors influencing those decisions. Prerequisite: POSC 2353 and AGEC 1103 and AGEC 2303. (Typically offered: Spring)

POSC 4323. Value Added Muscle Foods. 3 Hours.
An intense study of muscle structure and how it relates to the development of further processed meat products. Muscle ultrastructure, protein functionality, product development, and quality analysis will be covered. In class hands on activities will also be included to allow students to obtain experience of producing processed meat products. Prerequisite: POSC 4314. (Typically offered: Spring Odd Years)
POSC 4314. Egg and Meat Technology. 4 Hours.
Study of the science and practice of processing poultry meat and egg products; examination of the physical, chemical, functional and microbiological characteristics of value added poultry products; factors affecting consumer acceptance and marketing of poultry products and the efficiency of production. Corequisite: Lab component. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1073 and CHEM 1071L) and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

POSC 4333. Poultry Breeding. 3 Hours.
Application of new developments in poultry breeding for efficient egg and meat production. Not intended for students interested in a career in veterinary sciences. Lecture 3 hours per week. Prerequisite: MATH 1203 or higher and junior standing. (Typically offered: Fall Odd Years)

POSC 4343. Poultry Nutrition. 3 Hours.
Principles of nutrition as applied to the formulation of practical chicken and turkey rations. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603 and junior standing. (Typically offered: Spring)

POSC 4801. Seminar: Research Topics. 1 Hour.
Required by all poultry science majors. Prerequisite: Junior or Senior standing and COMM 1313. (Typically offered: Spring Odd Years)

POSC 4811. Seminar: Professionalism. 1 Hour.
Addressing issues associated with preparation for finding and retaining your first job in the poultry industry. Lecture 1 hour per week. Prerequisite: Junior or Senior standing. (Typically offered: Fall Odd Years)

POSC 4821. Seminar: Problem Solving. 1 Hour.
Real world problem solving of poultry production systems. Lecture 1 hour per week. Prerequisite: Junior or Senior standing. (Typically offered: Spring Even Years)

POSC 4831. Seminar: Processing Regulations. 1 Hour.
Processing plant procedures and regulations with an emphasis on problem solving. Lecture 1 hour per week. Prerequisite: Junior or Senior standing. (Typically offered: Fall Even Years)

POSC 4923. Brain and Behavior. 3 Hours.
Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory and autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3033 or POSC 3033) or PSYC 2003, or BIOL 2213, or BIOL 2443, or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with ANSC 4923.

School of Human Environmental Sciences (HESC)

Donna L. Graham
Interim Director
118 Human Environmental Sciences Building
479-575-4305

The School of Human Environmental Sciences at the University of Arkansas prepares students for a wide variety of professional careers in education, industry, business, government, and community services. The school is concerned with improving the quality of life for individuals and families as they exist and function in society. Human environmental sciences draws knowledge from research, from the physical, biological, and social sciences, and from arts and humanities. It relates this knowledge to an understanding of individuals' and families' needs and goals for food, clothing, shelter, management of resources, and human development and relationships. The School of Human Environmental Sciences has made a substantial contribution to the development of individuals and families through undergraduate and graduate preparation of human environmental scientists and through research in human nutrition, foods, human development, family sciences, apparel and textiles.

Six majors are offered in the School of Human Environmental Sciences:
- Apparel Merchandising and Product Development (p. 212)
- Birth through Kindergarten (p. 215)
- Food, Nutrition and Health (p. 218)
- Hospitality Management (p. 221)
- Human Development and Family Sciences (p. 223)
- Human Nutrition and Dietetics (p. 227)

Faculty

Apple, Laurie Marie McAlister, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Associate Professor, 2000.

Bailey, Mechelle, M.S. (University of Tennessee), B.S. (University of Arkansas), Clinical Instructor, 2012.

Balasubramanian, Mahendran, Ph.D. (Oklahoma State University), M.S. (Auburn University), B.Tech. (Anna University), Assistant Professor, 2017.

Becnel, Jennifer N., Ph.D. (Arizona State University), M.A. (University of California-San Francisco). B.A. (San Diego State University), Assistant Professor, 2014.

Blalock, Lydia, Ph.D., M.S. B.G.S (Louisiana State University), Instructor, 2016.

Buckley, Nancy, M.S., B.S. (University of Arkansas), Instructor, 2014.

Cheramie, Lance M., Ph.D., M.S. (University of Arkansas), B.S. (Nicholls State University), Instructor, 2002.

Cho, Eunjoo, Ph.D. (Iowa State University), M.S., B.S. (Hanyang University, Seoul), Associate Professor, 2013.

Duncan, James M., Ph.D. (Florida State University), M.S. (University of Arkansas), Instructor, 2017.

Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, 2014.

Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, 2014.

Hamm, Cora, M.S. (New York University), Instructor, 2016.

Herold, Laura K., Ph.D., M.A. (University of Alberta, Canada), B.A. (University of Western Ontario, Canada), Instructor, 2004.

Hubert, Stephanie K., M.S. (University of Michigan), B.A. (Oberlin College), Teaching Assistant Professor, 2015.

Hubert, Timothy Scott, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, 2001.

Ma, Weiyi, Ph.D. M.A. (University of Delaware), B.A. (China West Normal University), Assistant Professor, 2017.

Martinez, Dylan, Ph.D., M.S., B.S. (University of Arkansas), Instructor, 2019.

McNally, Shelley Ann, Ph.D. (University of Toledo), M.S., B.S. (Ohio University), Professional Practice Assistant Professor, 2016.

Mosley, Jacquelyn Dee, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern Iowa), Associate Professor, 2010.
Moxley, Shari Coleman, Ph.D. (University of North Carolina), Instructor, 2013.

O’Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, 2016.

Powell, Rob, M.S., B.S. (Louisiana State University), Instructor, 2020.

Robertson, Lona, Ed.D. (Indiana University, Bloomington), M.S., B.S. (Florida State University), Professor, 2006.

Siahmakoun, Lobat, M.S. (University of Arkansas), B.S. (Missouri Southern State University), Instructor, 2015.

Smith, Kathy, Ed.D., M.S. (University of Arkansas), B.S. (The Ohio State University), Clinical Associate Professor, 1999.

Southward, Cheryl Leigh, Ph.D., M.S., B.S. (University of Tennessee), Associate Professor, 2008.

Stallings, Melinda, M.A. (University of Houston–Clear Lake), B.S. (Louisiana State University), Instructor, 2019.

Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, 2015.

Wang, Yao-Chin, Ph.D. (Oklahoma State University), M.B.A., B.Ec. (National Chung Cheng University), Assistant Professor, 2017.

Way, Kelly Ann, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, 2006.

Williams, Amanda, Ph.D., M.S., B.S. (Oklahoma State University), Assistant Professor, 2017.

Apparel Merchandising and Product Development Courses

AMPD 1013. Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)

AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 1013.

AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)

AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 2013.

AMPD 2033. Computer Based Methods for Apparel. 3 Hours.
This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)

AMPD 2053. Introduction to Textile Science. 3 Hours.
Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)

AMPD 2063. Quality Assessment of Apparel. 3 Hours.
Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 3003. Apparel Production. 3 Hours.
A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.
Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or MATH 1204 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3043. Fashion Brand Management. 3 Hours.
This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4083, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)
AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.
Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4033L. Computer Aided Textile Design. 3 Hours.
This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Prerequisite: AMPD 2033, AMPD 2053 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4053. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4063. Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003 and honors candidacy. (Typically offered: Fall and Spring)

AMPD 4063. Advanced Apparel Production. 3 Hours.
This course is equivalent to AMPD 4063.

AMPD 4083. Apparel Merchandising and Product Development Internship. 3 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 3003, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours.
Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: ECON 2143 and AMPD 3033 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

AMPD 4901. AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of ‘C’ or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

AMPD 4901H. Honors AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 491V. AMPD Study Tour. 2-6 Hour.
An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 491VH. Honors AMPD Study Tour. 2-6 Hour.
A study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

Hospitality Courses

HOSP 1301. Hospitality Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume and portfolio development in preparation for HOSP 4693 Hospitality Management Internship. Lecture 1 hour per week. Prerequisite: HOSP 1603, HOSP majors only, and sophomore standing. (Typically offered: Fall and Spring)
HOSP 1603. Introduction to Hospitality Management. 3 Hours.
Study of the hospitality industry from a global perspective. Emphasizes an introduction to the different sectors of the hospitality industry: food service, lodging, travel & tourism, and marketing of the sectors. Exposes students to experienced practitioners who provide real life case studies and perspectives on management in the hospitality environment. Provides career development perspectives and instruction as well as management roles and techniques. (Typically offered: Fall and Spring)

HOSP 2603. Purchasing and Cost Control. 3 Hours.
Food purchasing with emphasis on specifications. Relationship of food purchasing to available equipment. Receiving, storage, distribution, and inventory control. Meal quality control and costing. Food and nonfood materials, management of the purchasing process, and communication. Specification writing, menu analysis, and costing. Prerequisite: Must be a HESC, HNAD, FNAH or HOSP major or a EVMG-M student. (Typically offered: Fall and Spring)

HOSP 2611. Foodservice Sanitation. 1 Hour.
Principles and theory of food safety and sanitation in the hospitality and foodservice industries, focused on prevention of food borne illnesses and ensuring public health and consumer safety. Prerequisite: HNAD, FNAH, or HOSP major. NUTR-M students or CATEBS-FCSE students. (Typically offered: Fall and Spring)

HOSP 2633. Lodging Property Management. 3 Hours.
Examines the organization, duties and administration of the hotel. Includes: the rooms division, convention/meeting spaces, and general business operations. Pre- or Corequisite: HOSP 1603. (Typically offered: Fall and Spring)

HOSP 2643. Intro to Casino Management. 3 Hours.
This course provides an overview of casino operations including the economics of the casino and its interface with hotels and other organizations and the practices and problems associated with the casino management such as staffing, security, controls, taxation and entertainment. Prerequisite: HOSP 1603 and (Hospitality Management Bachelor of Science (HOSPBS) or Hospitality Management Minor (HOSP-M) or Event Management Minor (EVMG-M) students). (Typically offered: Fall, Spring and Summer)

HOSP 2653. Introduction to Hospitality Finance. 3 Hours.
Accounting principles, procedures and transactions used for the compilation of financial reports in hospitality industries. Prerequisite: HOSP 1603. (Typically offered: Fall and Spring)

HOSP 3602L. Culture and Cuisines of the World Practicum. 2 Hours.
Development of service management skills for the hospitality industry through preparation and service of food, staffing, professionalism, recipe standardization, menu planning, cost control, sanitation, safety, and overall quality assurance. Instruction for planning food flow from receiving to service of meals, including choosing proper equipment for the flow plan and service items. Student must have a current Food Managers Certificate which is achieved upon successful completion of HOSP 2611. Laboratory 7 hrs per week. Pre- or Corequisite: HOSP 3603. Prerequisite: NUTR 1213, HOSP 2603, HOSP 2611, Junior standing. Hospitality Management Bachelor of Science in Human Environmental Science (HOSPBS) majors only, and instructor consent required. (Typically offered: Fall and Spring)

HOSP 3603. Cultures and Cuisines of the World. 3 Hours.
Explores foods and food ways of various cultural/ethnic groups. Considers origin and migration of foods and customs throughout the world. Studies food's relationship to cultural groups, geographical location, social practices and economic well-being. Analyzes impact of multiple cultures on foods, food preparation, and food ways in the U.S. Students must have a current Food Managers Certification, which is achieved upon successful completion of HOSP 2611. Pre- or corequisite: HOSP 3602L. Prerequisite: HOSP 1603, HOSP 2603, HOSP 2611, junior standing, HOSP majors only and instructor consent required. (Typically offered: Fall and Spring)

HOSP 3623. Introduction to Meetings and Events Management. 3 Hours.
Focuses on the planning and management of meetings and events in the hospitality industry. Includes developing event goals and objectives, site planning and management, event set up, risk management, food and beverage planning and management, budgeting, working with event services vendors, and marketing and promotion of events and meetings. Prerequisite: HOSP 1603, HOSP 2603, or Event Management Minor (EVMG-M) students. (Typically offered: Fall)

HOSP 3653. Hospitality, Dietetic Management and Human Resources. 3 Hours.
Function and methods of management as related to the hospitality, nutrition and dietetic industries. Topics include: recruitment, placement, talent management, training and development, and compensation. Prerequisite: HOSP 1603 or NUTR 1201, and junior standing. (Typically offered: Fall and Summer)

HOSP 3673. Event Safety and Venue Management. 3 Hours.
This course will provide students with the information, skills, and tools necessary to help provide a safe environment, reduce liability, and guide individual and group behavior at events. Students will learn how to develop a risk management and safety plan for an event and/or venue, how to identify and plan to avoid potential problems, and how to implement safety and crowd management plans to ensure a safe event. The primary focus of the course will be on live event and venue safety planning. Prerequisite: HOSP 1603, HOSP 2603, and HOSP 3623 or Event Management Minor (EVMG-M) students. (Typically offered: Fall)

HOSP 4613. Festival Management and Analysis. 3 Hours.
This course provides students both knowledge and practical experiences of festival management and analysis. Lectures based on the selected textbook will systematically offer students the understanding of multiple aspects of a festival, such as alignment with the target attendees, connect to community and place, festival media platforms, and monitoring and evaluating festivals. Prerequisite: HOSP 1603, HOSP 2603, HOSP 3623, and EVMG-M students. (Typically offered: Fall)

HOSP 4643. Special Events Management. 3 Hours.
Hands-on study of special events. Planning activities include conception, planning, implementation, execution of the hospitality program's annual fundraising event and evaluation. The interaction between staff, customers, guests, vendors, and others necessary to implement a successful special event. Topics including marketing, public relations and volunteer coordination are implemented. Additional focus on catering through, hotels, restaurants, and private companies. Prerequisite: HOSP 1603, HOSP 2603, HOSP 3623 and HOSP majors only. (Typically offered: Spring)

HOSP 4653. Global Travel and Tourism Management. 3 Hours.
Course recounts the history of travel, explores the future, and discusses the components of tourism from a global perspective. An overview of tourism planning at the global level will be presented. A variety of planning theories, procedures and tourism guidelines to meet the diverse needs of travelers, destination communities, hospitality organizations, public, non-governmental organizations, and the private sector will be introduced in this class. Prerequisite: HOSP 1603 and HOSP 3623, or Event Management Minor (EVMG-M) students. (Typically offered: Spring)

HOSP 4663. Hospitality Management Capstone. 3 Hours.
Integration of previous classroom, laboratory, and practical experiences through development of a comprehensive project. Additional focus on application of critical thinking, demonstration of leadership principles, interaction with industry professionals and development of an awareness of societal and ethical issues and their application to the hospitality industries. Prerequisite: HOSP 3603, HOSP 3602L, HOSP 3653 and Junior standing. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

HOSP 4673. Destination Marketing & Operations. 3 Hours.
This course is designed to provide students with a basic understanding of the tasks and processes involved in running a successful destination management organization (DMO). The course places heavy emphasis on destination marketing. Prerequisite: HOSP 1603 and junior standing. (Typically offered: Fall)
HOSP 4693. Hospitality Management Internship. 3 Hours.
Supervised experience in an instructor approved work/learning situation relating to
the hospitality industry in multiple aspects of a hospitality organization. Emphasis
on application of knowledge and skills to actual job roles and responsibilities related
to a future career in the hospitality industry. Requires employment in a hospitality
setting for a minimum of 250 clock hours that must be completed in the semester
of enrollment. Prerequisite: HOSP 1301, HOSP 2611, HOSP 2633, HOSP 2653,
HOSP 3623, HOSP 3653. Junior standing, restricted to HOSP students, 500 hours
of documented work-related hospitality industry experience and instructor consent.
(Typically offered: Fall, Spring and Summer) May be repeated up to 6 hours of
degree credit.

Human Development and Family Sciences Courses

HDFS 1403. Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the
individual from conception until death. Emphasis is on individual development in a
family context. Lecture 3 hours per week. (Typically offered: Fall and Spring)

HDFS 1403H. Honors Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the
individual from conception until death. Emphasis is on individual development in a
family context. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically
offered: Fall and Spring)

HDFS 1423. Observation and Foundations for Teaching Young Children. 3
Hours.
Designed to acquaint students with the historical importance of early childhood
education, the recognized standards for practice, the variety of program models,
and career opportunities available. Emphasis will be placed on theories, evidence-
based practice, ethics, diversity, and professional preparation for this knowledge-
based, skill-driven field. Students will also obtain knowledge of state and federal
laws pertaining to the care and education of young children. (Typically offered: Fall)

HDFS 2401L. Infant and Toddler Development Laboratory. 1 Hour.
Introduction to infant and toddler development. Focus on observation and applied
experience with children 0-3 documenting cognitive, emotional, language, physical,
and social development, and demonstrating developmentally appropriate practice.
Corequisite: HDFS 2403. Prerequisite: HDFS majors or BRKD majors or HDFS
minors or CATEBS-FCS majors or instructor consent. (Typically offered: Fall and
Spring)

HDFS 2403. Infant and Toddler Development. 3 Hours.
Infant and toddler development from conception through toddlerhood with emphasis
on physical, emotional, social, language, and cognitive domains. Theoretical and
research-based information will be applied to developmentally appropriate practice.
Historical and future perspectives will be explored as will the expanding opportunities
for professional work with infants and toddlers. Observations in care centers will be
assigned. Corequisite: HDFS 2401L. Prerequisite: HDFS majors or BRKD majors or
HDFS minors or CATEBS-FCS majors or by instructor consent. (Typically offered: Fall and
Spring)

HDFS 2413. Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural
and psychological factors which affect relations among family members. Lecture 3
hours per week. (Typically offered: Fall and Spring)

HDFS 2413H. Honors Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural
and psychological factors which affect relations among family members. Lecture 3
hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 2413.

HDFS 2433. Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional
development of the child, studied in the biocultural context. Begins with prenatal
development and continues through adolescence, with special emphasis on early
and middle childhood. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered:
Fall and Spring)

HDFS 2433H. Honors Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional
development of the child, studied in the biocultural context. Begins with prenatal
development and continues through adolescence, with special emphasis on early
and middle childhood. Prerequisite: Honors standing and HDFS 1403 or
PSYC 2003. (Typically offered: Fall and Spring)
This course is equivalent to HDFS 2433.

HDFS 2463. Administration and Leadership in the Helping Professions. 3
Hours.
Planning, developing, operating, and evaluating programs in the helping professions,
including child care and family-related agencies. Emphasis will be on administrators’
roles as leaders in organizations. Topics include facilities, budget, staff development,
and policy manuals. Prerequisite: Human Environmental Science (HESCBS)
majors, Human Development & Family Science (HDFSBS) majors, Birth through
Kindergarten (BRKDBS) majors, Human Development & Family Science (HDFS-M)
minors, or departmental consent. (Typically offered: Fall)

HDFS 2471L. Child Guidance Laboratory. 1 Hour.
Introduction to the guidance system. Focus on discipline techniques that are
positive and age/stage appropriate for children ages 3-8. Corequisite: HDFS 2473.
Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

HDFS 2473. Child Guidance. 3 Hours.
Introduction to the guidance system. Focus on discipline techniques that are positive
and age/stage appropriate for children ages 3-8. Lecture 3 hours per week plus 1
hour demonstration. Corequisite: HDFS 2471L. Prerequisite: HDFS 2433. (Typically
offered: Fall and Spring)

HDFS 2483. Family Financial Management. 3 Hours.
Economic considerations of the family in a rapidly changing society. Family finance
and consumer problems are emphasized. (Typically offered: Fall and Spring)

HDFS 2493. Introduction to Cultural Competence. 3 Hours.
Basic introduction to definitions of intercultural competence, diversity, cultural values
and beliefs, attitudes and verbal and non-verbal behavior, are examined to identify
basic differences among individuals from diverse cultural backgrounds and across
populations. (Typically offered: Fall, Spring and Summer)

HDFS 2603. Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society,
families and communities; interdependence of rural and urban population in
ecological areas; institutions; social change and adjustment. (Typically offered: Fall
and Spring)

HDFS 2603H. Honors Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society,
families and communities; interdependence of rural and urban population in
ecological areas; institutions; social change and adjustment. Prerequisite: Honors
standing. (Typically offered: Spring)
This course is equivalent to HDFS 2603.
HDFS 3333. Language and Literacy Pedagogy for Birth through Kindergarten Educators. 3 Hours.
This course combines theory on emergent language and literacy development with research-based pedagogy for birth through kindergarten classrooms. Topics include: language and literacy development and exceptionalities, English Language Learners, environmental influences, best practice pedagogy, identifying language and literacy delays, and intervention strategies. This course includes a service learning component. Prerequisite: HDFS 2433, HDFS 2403 and HDFS 2401L. (Typically offered: Fall)

HDFS 3423. Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered: Spring Odd Years)

HDFS 3423H. Honors Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003 and honors standing. (Typically offered: Spring Odd Years)
This course is equivalent to HDFS 3423.

HDFS 3443. Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. (Typically offered: Fall)

HDFS 3443H. Honors Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to HDFS 3443.

HDFS 3453. Parenting and Family Dynamics. 3 Hours.
Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childbearing techniques, family influences on cognitive and social development, and changes in family relationships during the life cycle. Prerequisite: (HDFS majors or HDFS minors or BRKD majors or CATEBS-FCSE majors) and (HDFS 1403 or PSYC 2003) and COMM 1313. (Typically offered: Fall and Spring)

HDFS 3463. The Hospitalized Child: Child Life Programming. 3 Hours.
Introduces child life programming in health care settings. Topics include: roles and expectations of a Child Life Specialist, importance of play, coping techniques, family advocacy, administration and professionalism. Lecture 3 hours per week. Prerequisite: HDFS 2433. (Typically offered: Spring)

HDFS 4313. Building Family and Community Relationships. 3 Hours.
This course will help students interested in early childhood to value the role parents play in schools and the role schools play in a community. Various models of parent involvement will be explored. Students will plan a school-community collaborative which values diverse cultures. Prerequisite: HDFS majors or HDFS minors, or instructor consent. (Typically offered: Spring)

HDFS 4332. Curriculum and Assessment: Birth to Three Years. 2 Hours.
The course will introduce students to curriculum planning and assessment in programs serving children from birth to three years of age. Emphasis will be on responsive relationships and curriculum focused on routines and activities. Corequisite: HDFS 4332L. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4332L. Curriculum and Assessment: Birth to Three Years Laboratory. 2 Hours.
Laboratory. Corequisite: HDFS 4332. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4342. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Students will plan curriculum and assessment for children three years of age through kindergarten. Emphasis will be on professionalism, philosophy and a code of ethics. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4342L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)

HDFS 4342L. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Laboratory. Corequisite: HDFS 4342. (Typically offered: Fall)

HDFS 4353. Play as Development in Childhood. 3 Hours.
This course will examine the contribution of play to cognitive, social, and emotional development of children. It will provide an overview of play theories and practices in indoor and outdoor settings, with an emphasis on nature-based learning and diversity and inclusion. Prerequisite: HDFS 2433. (Typically offered: Fall, Spring and Summer)

HDFS 4363. Play as Development in Adulthood. 3 Hours.
This course will examine play as it pertains to development throughout life with a particular focus on adulthood. The modes of adult play will be examined, along with the benefits of play across adulthood. Emphasis will be on play, not as opposition to work, but as a part of a full life. Prerequisite: HDFS 1403. (Typically offered: Fall, Spring and Summer)

HDFS 4373. Field Experience in Birth through Kindergarten Programs. 3 Hours.
This course provides the student with interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 4332, HDFS 4332L, HDFS 4342, and HDFS 4342L. (Typically offered: Spring)

HDFS 4383. Field Experience in Birth through Kindergarten Program II. 3 Hours.
This course provides students with advanced interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 4332 and HDFS 4332L and HDFS 4342 and HDFS 4342L. (Typically offered: Spring)

HDFS 4413. Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: HDFS 2433 or PSYC 3093. (Typically offered: Spring Even Years)
HDFS 4413H. Honors Infancy: Brain, Learning and Social Cognition. 3 Hours. Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: Honors standing and HDFS 2433 or PSYC 3093. (Typically offered: Spring Even Years) This course is equivalent to HDFS 4413.

HDFS 4423. Adult Development. 3 Hours. Examine individual development beginning with the transition adulthood through middle age; approximate age ranges are 18-60 years. Content focuses on physical, cognitive, psychological, and social changes that occur throughout this period of the life span. The impact of love, work, and family on men's and women's movement through the transitions that comprise adulthood are emphasized. Prerequisite: HDFS 1403 or PSYC 2003 and junior standing. (Typically offered: Fall)

HDFS 4443. Gerontology. 3 Hours. Physiological and psychological development of the aging individual, extended family relations, service networks for the elderly, and retirement activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HDFS 1403 (or HDFS 2413 or PSYC 2003 or SCWK 2133) and junior standing. (Typically offered: Spring)

HDFS 4451. Pre-Internship in Human Development and Family Sciences. 1 Hour. This course prepares students for their internship experience (HDFS 4483) in Human Development and Family Sciences. Topics covered include professional and ethical behavior when working with people, families and communities. The course will also cover professional and career development topics. By the end of the course, students are expected to have secured an internship position suitable for HDFS 4483. Students should enroll in this course no earlier than the semester before they anticipate enrolling in HDFS 4483. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

HDFS 4473. Multicultural Families. 3 Hours. The course provides students with opportunities to gain awareness of their own cultures and families, reflect on families from a diverse array of cultures, and develop critical thinking skills needed to effectively engage with people and families from cultures different than their own. Prerequisite: HDFS 2413. (Typically offered: Fall)

HDFS 4483. Internship in Human Development and Family Studies. 3 Hours. The internship experience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 120 hours in the setting. This course must be taken no sooner than the semester following completion of the student's junior year. May be taken for an additional 3 hours of elective credit if the second experience is distinctly different from the first internship. Prerequisite: HDFS 4451 and senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

HDFS 4493. Public Policy Advocacy for Children and Families. 3 Hours. Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: HDFS 2603 or SOCI 2013, Honors and Junior standing. (Typically offered: Fall)

HDFS 4493H. Honors Public Policy Advocacy for Children and Families. 3 Hours. Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: HDFS 2603 or SOCI 2013, Honors and Junior standing. (Typically offered: Fall) This course is equivalent to HDFS 4493.

HDFS 4603. Environmental Sociology. 3 Hours. The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. (Typically offered: Irregular) This course is cross-listed with SOCI 4603, SUST 4603.

HDFS 4763. Research in HDFS: Methodological Approaches. 3 Hours. This course introduces the methodology of HDFS and other social sciences in the social world. It covers research design, sampling, measurement, and other topics that underlie the social science conclusions presented to you in other classes. The class begins with an introduction to the goals of social science research, then focuses on the understanding of the 3 validities with which social scientists, and consumer of social science, must concern themselves: Internal, Measurement, and External. Each of these three validities is used as the focus of a course section. The class concludes with a fourth section that integrates these topics and other social science methods. It is recommended that HDFS students complete Rural Families and Communities (HDFS 2603) prior to enrolling in this course. Prerequisite: HDFS major or BRKD major and Junior Standing. (Typically offered: Fall)

HDFS 4773. Research in HDFS: Statistical Approaches. 3 Hours. This course is an introduction to analytical approaches to research in human development and family sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphasis in this course will be on conducting and evaluating data analyses relevant to human environmental sciences majors. Students will become critical consumers of data and develop basic skills to analyze and interpret their own data. Prerequisite: HDFS major or BRKD major and HDFS 4763. (Typically offered: Spring)

Human Environmental Sciences Courses
HESC 255V. Special Topics. 1-6 Hour. Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular) May be repeated for degree credit.

HESC 400V. Special Problems. 1-6 Hour. Special problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HESC 455V. Special Topics. 1-6 Hour. Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HESC 455VH. Honors Special Topics. 1-6 Hour. Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Nutrition Courses
NUTR 1201. Introduction to the Dietetic Profession. 1 Hour. Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career ladder and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNHI; HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

NUTR 1213. Fundamentals of Nutrition. 3 Hours. The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)
NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical
fitness. (Typically offered: Fall and Spring)
This course is equivalent to NUTR 1213.

NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours.
Corequisite: NUTR 2113. (Typically offered: Fall and Spring)

NUTR 2113. Principles of Foods. 3 Hours.
Physical and chemical characteristics of foods, organized by food science and
nutrition, protein foods, phytochemicals, complex and refined carbohydrates,
and fats. Emphasis on food preparation and storage methods and effect on
foods. Investigation and practice of food preparation basics, cooking and baking
techniques, knife skills, food safety, and sensory evaluation of food. Corequisite:
NUTR 2111L. Prerequisite: NUTR 1213, HOSP 2611 and (CHEM 1073, or
CHEM 1103, or CHEM 1203), and one of the following programs, minors or
concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FCSE).
(Typically offered: Fall and Spring)

NUTR 2203. Sports Nutrition. 3 Hours.
The integration of concepts from nutrition and exercise physiology into an applied
multidisciplinary study of how food, beverages and dietary supplements influence
physical performance. Prerequisite: NUTR 1213. (Typically offered: Fall and Spring)

NUTR 3003. Nutrition Assessment. 3 Hours.
Principles of nutritional assessment and methodology including anthropometric,
biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused
Physical Assessment, the interpretation of indices for all age groups in health and
disease for both individuals and groups, and the application of nutrition assessment
data in the nutrition care process. Prerequisite: NUTR 3203, junior standing and
HNAD/FNAH majors only. (Typically offered: Spring)

NUTR 3101L. Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary
application. It addresses the fundamental culinary skills and knowledge required to
prepare meals that impact the nutritional and sensory appeal of food. Corequisite:
NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3103. Culinary Nutrition. 3 Hours.
This course is grounded in a food first approach to health and wellness with an
emphasis on disease prevention. Students will study the physical and chemical
characteristics of foods that increase nutritional value and will include exploration
of the culinary nutrition modification process and application of these concepts
to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite:
NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3203. Human Nutrition. 3 Hours.
Fundamental human nutrition; nutritive value of foods and general functions
of nutrients based on concepts derived from inorganic and organic chemistry.
Examples relating nutrition to disease used as illustrations to deepen understanding
of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and
CHEM 2611L or CHEM 3603 and CHEM 3610L. Prerequisite: NUTR 1213.
(Typically offered: Spring)

NUTR 3213. Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory
and techniques, development of educational materials, interpersonal communication
skills, group dynamics, public speaking, and interviewing techniques. Includes
discussion of counseling theory and methods, and how education and counseling
are intertwined for nutrition professionals. Includes development of skills in nutrition
counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or
Senior standing. (Typically offered: Fall)

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations,
with consideration of age, special needs, diet type, cultural and ethical parameters.
Students will design flavorful and appealing menus that meet current nutrition
recommendations, guidelines and budgetary constraints. They will learn recipe
standardization, quantity production, and overall quality control. Prerequisite:
NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics
Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science
(FNAHBS) majors only. (Typically offered: Spring)

NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest.
Prerequisite: Senior standing and HNHI; HNAD or FNAH majors only. (Typically
offered: Spring) May be repeated for up to 2 hours of degree credit.

NUTR 4101L. Research Methods in Nutrition Lab. 1 Hour.
Application of experimental methods for investigations in nutrition research. Pre-
or corequisite: STAT 2303 and HNHI; HNAD or FNAH majors with senior standing only.
Corequisite: NUTR 4103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically
offered: Spring)

NUTR 4103. Research Methods in Nutrition. 3 Hours.
This course will cover applications of experimental methods for investigations in
nutrition research and cookery. Corequisite: NUTR 4101L. Pre- or Corequisite:
STAT 2303. Prerequisite: NUTR 2113, NUTR 2111L and (Human Nutrition and
Hospitality Innovation Bachelor of Science in Human Environmental Science
(HNHIBS), or Human Nutrition and Dietetics Bachelor of Science in Human
Environmental Science (HNAHB), or Food, Nutrition and Health Bachelor of
Science in Human Environmental Science (FNAHBS) majors), and senior standing
only. (Typically offered: Spring)

NUTR 4213. Advanced Nutrition. 3 Hours.
Normal nutrition with emphasis on utilization of nutrients. Lecture and reports on
current literature 3 hours per week. Prerequisite: CHEM 3813 and NUTR 3203.
(Typically offered: Fall)

NUTR 4223. Life Cycle Nutrition. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions
of biologic processes that vary during stages of the life cycle. Attention is given to
preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors
and NUTR 3203) or (FNAH majors and NUTR 3203) or (HNHIBS, or HNAD majors
and junior standing). (Typically offered: Fall)

NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered
at the local, state, federal, and international levels. Lecture 3 hours per week.
Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor
of Science in Human Environmental Science (FNAHBS) or Human Nutrition and
Dietetic Bachelor of Science in Human Environmental Science (HNAHB) majors
only. (Typically offered: Spring)

NUTR 4263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care
Process, and the pathophysiology and current standards of practice for diseases
and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213. Prerequisite:
BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3003. (Typically offered: Fall)

NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process,
and the pathophysiology and current standards of practice for diseases and
disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered: Spring)
NUTR 4303. Cultural Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or Hospitality Management (HOSPBS) majors). (Typically offered: Spring)

NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product. Prerequisite: NUTR 3103 and NUTR 3101L. (Typically offered: Spring)

Apparel Merchandising and Product Development (AMPD)
M.E. Betsy Garrison
Interim Assistant Director
118 Home Economics Building
479-575-4305

The Apparel Merchandising and Product Development (AMPD) program opens the door to careers in the fashion industry. Buyer, product development specialist, fashion coordinator, sales consultant, visual display artist, and quality assurance technician are only a few of the possibilities. Classes in business, retailing, apparel production, science, social science, and the liberal arts give students a basic knowledge about the textile and apparel industries. By selecting from a variety of minors, students can tailor this program to meet their goals. Program strengths include guest speakers who provide insight into today’s careers, tours of major fashion centers, and internships, which provide valuable career experience.

Requirements for a Major in Apparel Merchandising and Product Development
State minimum core (p. 96) and discipline specific general education requirements:

(Course work that meets state minimum core requirements is in bold.)

University Requirements 1
UNIV 1001 University Perspectives

Communication 12
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)
COMM, ENGL, JOUR or World Language
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)

U.S. History and Government 3
Choose from U.S. History and Government Core Courses

Mathematics and Statistics 6
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher level MATH or STAT class)
Any MATH above MATH 1203 or any STAT class

NUTR 3103 and NUTR 3101L. (Typically offered: Spring)

Any MATH above MATH 1203 or any STAT class

Suggested Electives:

Computers 6

ASTM 2903 Agricultural and Human Environmental Sciences Applications of Microcomputers and Business Application Knowledge - Computer Competency (or equivalent course)

ACOM 4243 Graphic Design in AFLS

General Electives 2, 3 13-17

Choose 8 hours Lecture/Lab from Science Core Courses
Fine Arts and Humanities 6
Choose 3 hours Fine Arts and 3 hours Humanities Core Courses
Social Sciences 9
ECON 2143 Basic Economics: Theory and Practice 1
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013) or SOCI 201 General Sociology (ACTS Equivalency = SOCI 1013)
World Culture Requirement 3
Choose 3 hours from the following:

HDFS 2493 Introduction to Cultural Competence
HIST 3533 World War II
HIST 3553 Russia Since 1861
HIST 3593 The 1960s: A World Transformed
HIST 4193 Great Britain, 1901-2001
LALS 4003 Latin American Studies Colloquium
LALS 2013 Latin American Studies
MEST 2003 Introduction to Islam
MEST 2013 Introduction to Middle East Studies
World Language 1013 or higher
AMPD 4011  History of Apparel Through Film to 1900
AMPD 4103  Evolution of Fashion and Society Through Television Media
AMPD 4111  History of Apparel Through Film from 1900 to Present
MKTG 3433  Introduction to Marketing (Required for Business Minor – additional pre-requisite courses required)

Any 3000-4000 level MKTG

Total Hours 120

1 Students may substitute AGEC 1103 and AGEC 2103 or ECON 2013 and ECON 2023 for ECON 2143.
2 Elective hours will vary based on exemptions and study tour credits.
3 A minimum of 40 hours must be completed at the 3000-4000 level, no more than 35% online hours taken at the U of A can be counted toward degree program.

Apparel Merchandise and Product Development B.S.H.E.S.
Ten-Semester Degree Program

Because the Apparel Merchandise and Product Development program requires a summer tour and an internship, it doesn't qualify for the Eight-Semester Degree Program. Go to the Eight-Semester Degree Policy (p. 86) for university requirements of the program. The program plan below, though, gives a path for completing required courses in a four-year period.

Year Total: 16 17 3
Courses

AMPD 1013. Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)

AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.
Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 1013.

AMPD 1023. Introduction to Apparel Production. 3 Hours.
Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)

AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.
Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 2013.

AMPD 2033. Computer Based Methods for Apparel. 3 Hours.
This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and ASTM 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)

AMPD 2053. Introduction to Textile Science. 3 Hours.
Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)

AMPD 2063. Quality Assessment of Apparel. 3 Hours.
Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 3003. Apparel Production. 3 Hours.
A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.
Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or MATH 1204 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3043. Fashion Brand Management. 3 Hours.
This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.
A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4083, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)
AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.
Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4033L. Computer Aided Textile Design. 3 Hours.
This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Prerequisite: AMPD 2033, AMPD 2053 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4053. Historic and Contemporary Apparel. 3 Hours.
This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4063. Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.
An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003 and honors candidacy. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 4063.

AMPD 4083. Apparel Merchandising and Product Development Internship. 3 Hours.
A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 3003, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours.
Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: ECON 2143 and AMPD 3033 and senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.
This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour.
This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

AMPD 4901. AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of ‘C’ or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

AMPD 4901H. Honors AMPD Pre-Study Tour. 1 Hour.
A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 491V. AMPD Study Tour. 2-6 Hour.
An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 491VH. Honors AMPD Study Tour. 2-6 Hour.
An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

Birth through Kindergarten (BRKD)
Kelly Way
Interim Assistant Director
16G Home Economics Building
479-575-4985

Laura Herold
Program Coordinator
16A Home Economics Building
479-575-5162
The major in Birth through Kindergarten prepares educators to teach infants, toddlers, preschoolers and kindergartners including those children with disabilities. The program offers students a chance to work in settings that serve young children, including public schools, early-intervention programs, child care and education centers, and residential placement centers. Successful completion of this degree, as specified in the requirements for a major in Birth through Kindergarten, leads to Arkansas’ Integrated Birth through Kindergarten/Special Education teacher license.

Passing scores on the Praxis Core (Reading, Writing, and Math) or equivalent ACT, SAT or GRE scores are a requirement for formal admission into the Birth through Kindergarten major. Passing scores on the relevant Praxis Content exams (Interdisciplinary Early Childhood Education 5023, Education of Young Children 5024 and Principles of Learning and Teaching: Early Childhood 5621) are requirements for teacher licensure. Other specific application procedures and degree requirements are available from Birth through Kindergarten faculty advisers.

### Other Requirements for the B.S.H.E.S. Degree in Birth through Kindergarten major:

Both candidacy and retention eligibility for the Arkansas Birth through Kindergarten Integrated Licensure Program require that students meet a set of criteria listed in the catalog. These include the submission of a transcript showing a cumulative grade point average of at least 3.0, with grades of C or better in all BRKD courses. Students should consult their academic adviser as they near completion of the above requirements to discuss the application process for the Integrated Birth through Kindergarten/Special Education teacher license in Arkansas. Additional requirements for application to teacher licensure with the State of Arkansas Department of Education include: Praxis Core (Reading, Writing, and Mathematics) or qualifying ACT, SAT or GRE scores, Praxis Content: Interdisciplinary Early Childhood Education 5023 & Education of Young Children 5024 and Principles of Learning and Teaching: Early Childhood 5621.

1. Please visit the Bumpers College Majors and Minors page (http://bumperscollege.uark.edu/academics/majors-and-minors/) for a list of communication/intensive courses.
2. Go to the University Core Requirements (http://catalog.uark.edu/undergraduatemajors/academicregulations/universitycore/).
3. Child Maltreatment Certification must be completed.
Birth through Kindergarten B.S.H.E.S. Eight-Semester Degree Program
Students wishing to follow the degree plan should go to the Eight-Semester Degree Policy (p. 86) for university requirements of the program.

Program Description: The School of Human Environmental Sciences offers a major program in Food, Nutrition and Health leading to a B.S.H.E.S. degree. The school also offers a minor in Human Nutrition. Interest and aptitude for the biological and physical sciences as well as public health fields that support nutrition science are central to successfully completing the major program.

Requirements for B.S.H.E.S. in Food, Nutrition and Health

Total Hours 19

Courses

**NUTR 1201. Introduction to the Dietetic Profession. 1 Hour.**
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNHI; HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

**NUTR 1213. Fundamentals of Nutrition. 3 Hours.**
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)
NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)
This course is equivalent to NUTR 1213.

NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Laboratory exercises and practice applicable of Principles of Foods. Lab 3 hours.
Corequisite: NUTR 2111. (Typically offered: Fall and Spring)

NUTR 2113. Principles of Foods. 3 Hours.
Physical and chemical characteristics of foods, organized by food science and nutrition, protein foods, phytochemicals, complex and refined carbohydrates, and fats. Emphasis on food preparation and storage methods and effect on foods. Investigation and practice of food preparation basics, cooking and baking techniques, knife skills, food safety, and sensory evaluation of food. Corequisite: NUTR 2111L.
Prerequisite: NUTR 1213, HOSP 2611 and (CHEM 1073, or CHEM 1103, or CHEM 1203), and one of the following programs, minors or concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FNSE).
(Typically offered: Fall and Spring)

NUTR 2203. Sports Nutrition. 3 Hours.
The integration of concepts from nutrition and exercise physiology into an applied multidisciplinary study of how food, beverages and dietary supplements influence physical performance. Prerequisite: NUTR 1213. (Typically offered: Fall and Spring)

NUTR 3003. Nutrition Assessment. 3 Hours.
Principles of nutritional assessment and methodology including anthropometric, biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused Physical Assessment, the interpretation of indices for all age groups in health and disease for both individuals and groups, and the application of nutrition assessment data in the nutrition care process. Corequisite: NUTR 3203, junior standing and HNAD/FNAH majors only. (Typically offered: Spring)

NUTR 3101L. Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary application. It addresses the fundamental culinary skills and knowledge required to prepare meals that impact the nutritional and sensory appeal of food. Corequisite: NUTR 3103.
Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3103. Culinary Nutrition. 3 Hours.
This course is grounded in a food first approach to health and wellness with an emphasis on disease prevention. Students will study the physical and chemical characteristics of foods that increase nutritional value and will include exploration of the culinary nutrition modification process and application of these concepts to planning nutritionally balanced meals. Corequisite: NUTR 3101L.
Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3203. Human Nutrition. 3 Hours.
Fundamental human nutrition; nutritive value of foods and general functions of nutrients based on concepts derived from inorganic and organic chemistry. Examples relating nutrition to disease used as illustrations to deepen understanding of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L.
Prerequisite: NUTR 1213. (Typically offered: Spring)

NUTR 3213. Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory and techniques, development of educational materials, interpersonal communication skills, group dynamics, public speaking, and interviewing techniques. Includes discussion of counseling theory and methods, and how education and counseling are intertwined for nutrition professionals. Includes development of skills in nutrition counseling. Corequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or Senior standing. (Typically offered: Fall)

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations, with consideration of age, special needs, diet type, cultural and ethical parameters. Students will design flavorful and appealing menus that meet current nutrition recommendations, guidelines and budgetary constraints. They will learn recipe standardization, quantity production, and overall quality control. Prerequisite: NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science (FNAHBS) majors only. (Typically offered: Spring)

NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest. Prerequisite: Senior standing and HNHI; HNAD or FNAH majors only. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

NUTR 4101L. Research Methods in Nutrition Lab. 1 Hour.
Application of experimental methods for investigations in nutrition research. Pre- or corequisite: STAT 2303 and HNHI; HNAD or FNAH majors with senior standing only.
Corequisite: NUTR 4103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Spring)

NUTR 4103. Research Methods in Nutrition. 3 Hours.
This course will cover applications of experimental methods for investigations in nutrition research and cookery. Corequisite: NUTR 4101L. Pre- or Corequisite: STAT 2303.
Prerequisite: NUTR 2113, NUTR 2111L and (Human Nutrition and Hospitality Innovation Bachelor of Science in Human Environmental Science (HNNHBS), or Human Nutrition and Dietetics Bachelor of Science in Human Environmental Science (HNAHBS), or Food, Nutrition and Health Bachelor of Science in Human Environmental Scence (FNAHBS) majors), and senior standing only. (Typically offered: Spring)

NUTR 4213. Advanced Nutrition. 3 Hours.
Normal nutrition with emphasis on utilization of nutrients. Lecture and reports on current literature 3 hours per week. Prerequisite: CHEM 3813 and NUTR 3203.
(Typically offered: Fall)

NUTR 4223. Life Cycle Nutrition. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions of biologic processes that vary during stages of the life cycle. Attention is given to preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors and NUTR 3203) or (FNAH majors and junior standing). (Typically offered: Fall)

NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered at the local, state, federal, and international levels. Lecture 3 hours per week. Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor of Science in Human Environmental Science (FNAHBS) or Human Nutrition and Dietetic Bachelor of Science in Human Environmental Science (HNAHBS) majors only. (Typically offered: Spring)

NUTR 4263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213.
Prerequisite: BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3003. (Typically offered: Fall)

NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process, and the pathophysiology and current standards of practice for diseases and disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered: Spring)
### NUTR 4303. Cultural Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more culturally diverse. This course covers cuisine and culture of various regions for the purpose of promoting respect and understanding for cultural diversity. Students will learn the history of foods, ingredients, flavor profiles, religious based food practices, etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or Hospitality Management (HOSPBS) majors). (Typically offered: Spring)

### NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional properties and apply that information to develop recipes for improved nutritional quality and disease management. They will gather data to modify and refine the product and create an educational tool to promote their product. Prerequisite: NUTR 3103 and NUTR 3101L. (Typically offered: Spring)

---

### Hospitality Management (HOSP)
Kelly A. Way  
Assistant Director  
16G Home Economics Building  
479-575-4985

**Program Description:** The School of Human Environmental Sciences offers a major in Hospitality Management, leading to a B.S.H.E.S. The program also offers two minors: Event Management and Hospitality Management.

### Requirements for B.S.H.E.S. in Hospitality Management
All Hospitality Management students must earn a grade of 'C' or higher in all hospitality core required courses. State minimum core and discipline specific general education requirements:

(Course work that meets state minimum core (p. 96) requirements is in bold.)

#### University Requirements
- **UNIV 1001** University Perspectives  
- **Communications**
  - **ENGL 1013** Composition I (ACTS Equivalency = ENGL 1013) (unless exempt)
  - **ENGL 1023** Composition II (ACTS Equivalency = ENGL 1023) (unless exempt)
  - **COMM 1313** Public Speaking (ACTS Equivalency = SPCH 1003)
  - **ACOM 3143** Communicating Agriculture to the Public (Or COMM, ENGL or World Language Course)

#### U.S. History and Government
- **Choose from U.S. History and Government Core courses**

#### Mathematics and Computers
- **MATH 1203** College Algebra (ACTS Equivalency = MATH 1103)
- **MATH 2053** Finite Mathematics

#### Sciences
- **Choose from state minimum core science courses**

#### Fine Arts and Humanities
- **Choose from Fine Arts, Humanities core courses -- Choose 3 hours from each**

#### Social Sciences

#### HOSP Requirements
- **NUTR 1213** Fundamentals of Nutrition  
- **HOSP 1301** Hospitality Pre-Internship  
- **HOSP 1603** Introduction to Hospitality Management  
- **HOSP 2601** Purchasing and Cost Control  
- **HOSP 2611** Foodservice Sanitation  
- **HOSP 2633** Lodging Property Management  
- **HOSP 2653** Introduction to Hospitality Finance  
- **HOSP 3602L** Culture and Cuisines of the World Practicum  
- **HOSP 3603** Cultures and Cuisines of the World  
- **HOSP 3623** Introduction to Meetings and Events Management  
- **HOSP 3653** Hospitality, Dietetic Management and Human Resources  
- **HOSP 4643** Special Events Management  
- **HOSP 4653** Global Travel and Tourism Management  
- **HOSP 4663** Hospitality Management Capstone  
- **HOSP 4693** Hospitality Management Internship  

#### Additional Requirements
- **ASTM 2903** Agricultural and Human Environmental Sciences Applications of Microcomputers  
- **BLAW 2013** The Legal Environment of Business (ACTS Equivalency = BLAW 2003)

#### Additional Professional and Business courses
- From the departmental codes ACCT, AGEC, ECON, FDSC, FINN, ISYS, MGMT, MKTG, SCMT, OMGT, WCOB and HOSP. Recommended that students take HOSP related courses: HOSP 3673 & HOSP 4613

#### General Electives

**Total Hours**

### Minor in Event Management

The Event Management minor provides students with expertise for careers in event planning and management. Curriculum covers skills and knowledge including negotiation, event planning, programming, promotion, budget and legal issues. This minor degree is open to all students at the University of Arkansas.

**Requirements for a minor in Event Management:** The Event Management minor requires 15 hours of coursework. To earn a minor in Event Management, a student must earn a ‘C’ or better in the five courses required for the minor.

Human Development and Family Sciences (HDFS)

Kelly Way
Interim Assistant Director
16G Home Economics Building
479-575-4985

Students majoring in human development and family sciences prepare for one of the fastest growing employment opportunities in the country. The human services area includes jobs that serve people from conception through the last stages of life. Students develop skills for working with individuals and families in governmental, private, and nonprofit organizations. In addition to the major in Human Development and Family Sciences, the program offers a major in Birth through Kindergarten (p. 215).

Requirements for a Major in Human Development and Family Sciences (HDFS)

**Total Units in Sequence:** 120

## Minor in Human Development and Family Sciences (HDFS-M)

### Required Courses (9 hours)

- HDGS 1403 Life Span Development 3
- HDGS 2413 Family Relations 3
- HDGS 2433 Child Development 3

Choose 9 hours from the following (6 hours must be upper division credit):

- HDGS 2403 Infant and Toddler Development
- HDGS 2401L Infant and Toddler Development Laboratory
- HDGS 2473 Child Guidance
- HDGS 2471L Child Guidance Laboratory
- HDGS 2483 Family Financial Management
- HDGS 2603 Rural Families and Communities
- HDGS 3423 Adolescent Development
- HDGS 3443 Families in Crisis
- HDGS 3453 Parenting and Family Dynamics
- HDGS 3463 The Hospitalized Child: Child Life Programming
- HDGS 4313 Building Family and Community Relationships
- HDGS 4353 Play as Development in Childhood
- HDGS 4363 Play as Development in Adulthood
- HDGS 4413 Infancy: Brain, Learning and Social Cognition
- HDGS 4423 Adult Development
- HDGS 4473 Multicultural Families
- HDGS 4493 Public Policy Advocacy for Children and Families

**Total Hours** 18

### Human Development and Family Sciences Courses

**HDGS 1403. Life Span Development. 3 Hours.**

A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. (Typically offered: Fall and Spring)
HDFS 1403H. Honors Life Span Development. 3 Hours.
A broad overview of the physical, psychological, and social development of the individual from conception until death. Emphasis is on individual development in a family context. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)

HDFS 1423. Observation and Foundations for Teaching Young Children. 3 Hours.
Designed to acquaint students with the historical importance of early childhood education, the recognized standards for practice, the variety of program models, and career opportunities available. Emphasis will be placed on theories, evidence-based practice, ethics, diversity, and professional preparation for this knowledge-based, skill-driven field. Students will also obtain knowledge of state and federal laws pertaining to the care and education of young children. (Typically offered: Fall)

HDFS 2401L. Infant and Toddler Development Laboratory. 1 Hour.
Introduction to infant and toddler development. Focus on observation and applied experience with children 0-3 documenting cognitive, emotional, language, physical, and social development, and demonstrating developmentally appropriate practice. Corequisite: HDFS 2403. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or instructor consent. (Typically offered: Fall and Spring)

HDFS 2403. Infant and Toddler Development. 3 Hours.
Infant and toddler development from conception through toddlerhood with emphasis on physical, emotional, social, language, and cognitive domains. Theoretical and research-based information will be applied to developmentally appropriate practice. Historical and future perspectives will be explored as will the expanding opportunities for professional work with infants and toddlers. Observations in care centers will be assigned. Corequisite: HDFS 2401L. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or by instructor consent. (Typically offered: Fall and Spring)

HDFS 2413L. Infant and Toddler Development Laboratory. 1 Hour.
Introduction to infant and toddler development. Focus on observation and applied experience with children 0-3 documenting cognitive, emotional, language, physical, and social development, and demonstrating developmentally appropriate practice. Corequisite: HDFS 2403. Prerequisite: HDFS majors or BRKD majors or HDFS minors or CATEBS-FCSE majors or instructor consent. (Typically offered: Fall and Spring)

HDFS 2413H. Honors Family Relations. 3 Hours.
Courtship, marriage, and parenthood in the United States, with attention to cultural and psychological factors which affect relations among family members. Lecture 3 hours per week. (Typically offered: Fall and Spring)

HDFS 2433. Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered: Fall and Spring)

HDFS 2433H. Honors Child Development. 3 Hours.
Theory, research, and application in physical, cognitive, social, and emotional development of the child, studied in the biocultural context. Begins with prenatal development and continues through adolescence, with special emphasis on early and middle childhood. Prerequisite: Honors standing and HDFS 1403 or PSYC 2003. (Typically offered: Fall and Spring)

HDFS 2463. Administration and Leadership in the Helping Professions. 3 Hours.
Planning, developing, operating, and evaluating programs in the helping professions, including child care and family-related agencies. Emphasis will be placed on administrators’ roles as leaders in organizations. Topics include facilities, budget, staff development, and policy manuals. Prerequisite: Human Environmental Science (HESCBS) majors, Human Development & Family Science (HDFSBS) majors, Birth through Kindergarten (BRKDBS) majors, Human Development & Family Science (HDFSM) minors, or departmental consent. (Typically offered: Fall)

HDFS 2471L. Child Guidance Laboratory. 1 Hour.
Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Corequisite: HDFS 2473. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

HDFS 2473L. Child Guidance. 3 Hours.
Introduction to the guidance system. Focus on discipline techniques that are positive and age/stage appropriate for children ages 3-8. Lecture 3 hours per week plus 1 hour demonstration. Corequisite: HDFS 2471L. Prerequisite: HDFS 2433. (Typically offered: Fall and Spring)

HDFS 2483. Family Financial Management. 3 Hours.
Economic considerations of the family in a rapidly changing society. Family finance and consumer problems are emphasized. (Typically offered: Fall and Spring)

HDFS 2493. Introduction to Cultural Competence. 3 Hours.
Basic introduction to definitions of intercultural competence, diversity, cultural values and beliefs, attitudes and verbal and non-verbal behavior, are examined to identify basic differences among individuals from diverse cultural backgrounds and across populations. (Typically offered: Fall, Spring and Summer)

HDFS 2603H. Honors Family Financial Management. 3 Hours.
Economic considerations of the family in a rapidly changing society. Family finance and consumer problems are emphasized. (Typically offered: Fall and Spring)

HDFS 2603H. Honors Rural Families and Communities. 3 Hours.
Meaning of sociology and sociological concepts with reference to rural society, families and communities; interdependence of rural and urban population in ecological areas; institutions; social change and adjustment. (Typically offered: Fall and Spring)

HDFS 3333. Language and Literacy Pedagogy for Birth through Kindergarten Educators. 3 Hours.
This course combines theory on emergent language and literacy development with research-based pedagogy for birth through kindergarten classrooms. Topics include: language and literacy development and exceptionalities, English Language Learners, environmental influences, best practice pedagogy, identifying language and literacy delays, and intervention strategies. This course includes a service learning component. Prerequisite: HDFS 2433, HDFS 2403 and HDFS 2401L. (Typically offered: Fall)

HDFS 3423. Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003. (Typically offered: Spring Odd Years)

HDFS 3423H. Honors Adolescent Development. 3 Hours.
Physiological and psychological development of the older child and youth, from pre-adolescence to adulthood. Theories of adolescent development. Cross-cultural studies. Peer group influences. Some attention to pathological behaviors. Prerequisite: HDFS 1403 or PSYC 2003 and honors standing. (Typically offered: Spring Odd Years)

This course is equivalent to HDFS 3423.
HDFS 3443. Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. (Typically offered: Fall)

HDFS 3443H. Honors Families in Crisis. 3 Hours.
An interdisciplinary perspective on internal and external crises faced by contemporary families, including substance abuse, natural disasters and other crisis events. Students will explore the family processes during such experiences and develop strategies for stress management, coping, and recovery. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to HDFS 3443.

HDFS 3453. Parenting and Family Dynamics. 3 Hours.
Focus is on influence of parenting and family dynamics on individual development, especially factors in family life which contribute to normal psychological development. Topics include family values, the psychology of sex and pregnancy, the transition to parenthood, childbearing techniques, family influences on cognitive and social development, and changes in family relationships during the life cycle. Prerequisite: (HDFS majors or HDFS minors or BRKD majors or CATEBS-FSCE majors) and (HDFS 1403 or PSYC 2003) and COMM 1313. (Typically offered: Fall and Spring)

HDFS 3463. The Hospitalized Child: Child Life Programming. 3 Hours.
Introduces child life programming in health care settings. Topics include: roles and expectations of a Child Life Specialist, importance of play, coping techniques, family advocacy, administration and professionalism. Lecture 3 hours per week. Prerequisite: HDFS 2433. (Typically offered: Spring)

HDFS 4313. Building Family and Community Relationships. 3 Hours.
This course will help students interested in early childhood to value the role parents play in schools and the role schools play in a community. Various models of parent involvement will be explored. Students will plan a school-community collaborative which values diverse cultures. Prerequisite: HDFS majors or HDFS minors, or instructor consent. (Typically offered: Spring)

HDFS 4332. Curriculum and Assessment: Birth to Three Years. 2 Hours.
The course will introduce students to curriculum planning and assessment in programs serving children from birth to three years of age. Emphasis will be on responsive relationships and curriculum focused on routines and activities. Corequisite: HDFS 4332L. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4332L. Curriculum and Assessment: Birth to Three Years Laboratory. 2 Hours.
Laboratory. Corequisite: HDFS 4332. Prerequisite: HDFS 2403 and HDFS 2401L. (Typically offered: Spring)

HDFS 4342. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Students will plan curriculum and assessment for children three years of age through kindergarten. Emphasis will be on professionalism, philosophy and a code of ethics. Students will interact with young children and facilitate learning and assessment experiences in a program for young children. Corequisite: HDFS 4342L. Prerequisite: HDFS 2473 and HDFS 2471L. (Typically offered: Fall)

HDFS 4342L. Curriculum and Assessment: Three Years through Kindergarten. 2 Hours.
Laboratory. Corequisite: HDFS 4342. (Typically offered: Fall)

HDFS 4353. Play as Development in Childhood. 3 Hours.
This course will examine the contribution of play to cognitive, social, and emotional development of children. It will provide an overview of play theories and practices in indoor and outdoor settings, with an emphasis on nature-based learning and diversity and inclusion. Prerequisite: HDFS 2433. (Typically offered: Fall and Summer)

HDFS 4363. Play as Development in Adulthood. 3 Hours.
This course will examine play as it pertains to development throughout life with a particular focus on adulthood. The modes of adult play will be examined, along with the benefits of play across adulthood. Emphasis will be on play, not as opposition to work, but as a part of a full life. Prerequisite: HDFS 1403. (Typically offered: Fall, Spring and Summer)

HDFS 4373. Field Experience in Birth through Kindergarten Programs. 3 Hours.
This course provides the student with interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 4332, HDFS 4332L, HDFS 4342, and HDFS 4342L. (Typically offered: Spring)

HDFS 4383. Field Experience in Birth through Kindergarten Program II. 3 Hours.
This course provides students with advanced interactive and observational experiences with young children in community-based early childhood programs. Prerequisite: HDFS 4332 and HDFS 4332L and HDFS 4342 and HDFS 4342L. (Typically offered: Spring)

HDFS 4413. Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: HDFS 2433 or PSYC 3093. (Typically offered: Spring Even Years)

HDFS 4413H. Honors Infancy: Brain, Learning and Social Cognition. 3 Hours.
Investigation into how brain mechanisms interact with experience to provide the basis for learning and social cognition. Topics include face perception, motor cognition, imitation, joint attention and shared experience, empathy and altruism, theory of mind, social and moral cognition, language, memory, number, geometry and navigation, object representation, and executive function. Prerequisite: Honors standing and HDFS 2433 or PSYC 3093. (Typically offered: Spring Even Years)
This course is equivalent to HDFS 4413.

HDFS 4423. Adult Development. 3 Hours.
Examine individual development beginning with the transition adulthood through middle age; approximate age ranges are 18-60 years. Content focuses on physical, cognitive, psychological, and social changes that occur throughout this period of the life span. The impact of love, work, and family on men's and women's movement through the transitions that comprise adulthood are emphasized. Prerequisite: HDFS 1403 or PSYC 2003 and junior standing. (Typically offered: Fall)

HDFS 4443. Gerontology. 3 Hours.
Physiological and psychological development of the aging individual, extended family relations, service networks for the elderly, and retirement activities. Some attention to housing and care needs of persons in advanced years. Lecture 3 hours per week. Seminar. Prerequisite: HDFS 1403 or (HDFS 2413 or PSYC 2003 or SCWK 2133) and junior standing. (Typically offered: Spring)
HDFS 4451. Pre-Internship in Human Development and Family Sciences. 1 Hour.
This course prepares students for their internship experience (HDFS 4483) in Human Development and Family Sciences. Topics covered include professional and ethical behavior when working with people, families and communities. The course will also cover professional and career development topics. By the end of the course, students are expected to have secured an internship position suitable for HDFS 4483. Students should enroll in this course no earlier than the semester before they anticipate enrolling in HDFS 4483. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

HDFS 4473. Multicultural Families. 3 Hours.
The course provides students with opportunities to gain awareness of their own cultures and families, reflect on families from a diverse array of cultures, and develop critical thinking skills needed to effectively engage with people and families from cultures different than their own. Prerequisite: HDFS 2413. (Typically offered: Fall)

HDFS 4483. Internship in Human Development and Family Studies. 3 Hours.
The internship experience provides practical experience for students in settings that are designed to serve the needs of individuals and/or families across the life span. Students must work a minimum of 120 hours in the setting. This course must be taken no sooner than the summer following completion of the student’s junior year. May be taken for an additional 3 hours of elective credit if the second experience is distinctly different from the first internship. Prerequisite: HDFS 4451 and senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

HDFS 4493. Public Policy Advocacy for Children and Families. 3 Hours.
Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: HDFS 2603 or SOCI 2013, Honors and Junior standing. (Typically offered: Fall) HDFS 4493H. Honors Public Policy Advocacy for Children and Families. 3 Hours.
Public policy advocacy as related to children and family issues. Strategies for advocacy will be emphasized. Lecture three hours per week. Prerequisite: HDFS 2603 or SOCI 2013, Honors and Junior standing. (Typically offered: Fall) This course is equivalent to HDFS 4493.

HDFS 4603. Environmental Sociology. 3 Hours.
The course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding the complexity of the relationship between societal organization and environmental change. (Typically offered: Irregular) This course is cross-listed with SOCI 4603, SUST 4603.

HDFS 4763. Research in HDFS: Methodological Approaches. 3 Hours.
This class introduces the methodology of HDFS and other social sciences in the social world. It covers research design, sampling, measurement, and other topics that underlie the social science conclusions presented to you in other classes. The class begins with an introduction to the goals of social science research, then focuses on the understanding of the 3 validities with which social scientists, and consumer of social science, must concern themselves: Internal, Measurement, and External. Each of these three validities is used as the focus of a course section. The class concludes with a fourth section that integrates these topics and other social science methods. It is recommended that HDFS students complete Rural Families and Communities (HDFS 2603) prior to enrolling in this course. Prerequisite: HDFS major or BRKD major and Junior Standing. (Typically offered: Fall)

HDFS 4773. Research in HDFS: Statistical Approaches. 3 Hours.
This course is an introduction to analytical approaches to research in human development and family sciences and will examine the principles and practices underlying the development of knowledge in the field. Emphases in this course will be on conducting and evaluating data analyses relevant to human environmental sciences majors. Students will become critical consumers of data and develop basic skills to analyze and interpret their own data. Prerequisite: HDFS major or BRKD major and HDFS 4763. (Typically offered: Spring)

Human Environmental Sciences Courses
HESC 255V. Special Topics. 1-6 Hour.
Topics not covered in other courses or a more intensive study of specific topics in the specializations of human environmental sciences. (Typically offered: Irregular) May be repeated for degree credit.

HESC 400V. Special Problems. 1-6 Hour.
Special problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HESC 455V. Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

HESC 455VH. Honors Special Topics. 1-6 Hour.
Topics not covered in other courses, a focused study of specific topics in the students' areas of concentration. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Human Nutrition and Dietetics (HNAD)
Kelly A. Way
Assistant Director
16G Home Economics Building
479-575-4985

Program Description: Nutrition and Dietetics is for the student who intends to become a Registered Dietitian (RD), a credential that is required for one to counsel individuals related to any type of diet. Courses required are those necessary as prerequisites to application for a post-baccalaureate dietetic internship. Upon successful completion of the post-baccalaureate dietetic internship, the graduate is eligible to take the Registration Exam, the board examination for the RD credential. Graduates of this program who choose not to apply for a post-baccalaureate dietetic internship are eligible upon completion of the Bachelor’s degree to take the board examination to become a Dietetic Technician, Registered (DTR).

Requirements for B.S.H.E.S. in Human Nutrition and Dietetics
State minimum core (p. 96) and discipline specific general education (p. 90) requirements:
(Course work that meets state minimum core requirements is in bold.)

University Requirements 1
UNIV 1001 University Perspectives

Communications 12
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013) (unless exempt)
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023) (unless exempt)
Select one of the following:

- ENGL 3053 Technical and Professional Writing (ACTS Equivalency = ENGL 2023)
- or ACOM 31 Communicating Agriculture to the Public

U.S. History and Government 3
Choose from U.S. History and Government Core Course

Mathematics 6
- MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)
- STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)

Sciences 23-27
Select 4-8 hours:
- CHEM 1073 Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture)
  and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)
  
  Or
  
  CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
  & CHEM 1101L University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
  
  & CHEM 1123 and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
  
  & CHEM 1121L University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture)
  
  and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

Take Additional Science Courses Below:
- BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
  and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)
- BIOL 2213 Human Physiology (ACTS Equivalency = BIOL 2414 Lecture)
  and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)
- BIOL 2443 Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture)
  and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)
- CHEM 2613 Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture)
  and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)
- CHEM 3813 Elements of Biochemistry

Fine Arts and Humanities 6
- Fine Arts and Humanities Core Courses (select 3 hours from each)

Social Sciences 9
- PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
- HDFS 2413 Family Relations
  or HDFS 1403 Life Span Development

Select 3 hours from Social Science state minimum core list

NUTR Requirements: 47
- NUTR 1201 Introduction to the Dietetic Profession
- NUTR 1213 Fundamentals of Nutrition
- NUTR 2113 Principles of Foods
  & NUTR 2111L and Principles of Foods Laboratory
- HOSP 2603 Purchasing and Cost Control
- HOSP 2611 Foodservice Sanitation
- NUTR 3203 Human Nutrition
- NUTR 3003 Nutrition Assessment
- NUTR 3213 Nutrition Education and Counseling
- NUTR 3603 Quantity Foods
- HOSP 3653 Hospitality, Dietetic Management and Human Resources
- NUTR 4001 Nutrition Seminar
- NUTR 4103 Research Methods in Nutrition
  & NUTR 4101L and Research Methods in Nutrition Lab
- NUTR 4213 Advanced Nutrition
- NUTR 4223 Life Cycle Nutrition
- NUTR 4243 Community Nutrition
- NUTR 4263 Medical Nutrition Therapy I
- NUTR 4273 Medical Nutrition Therapy II

General Electives 9-13

Total Hours 120

---

Human Nutrition and Dietetics B.S.H.E.S. Eight-Semester Degree Program

Students wishing to follow the degree plan in Human Nutrition and Dietetics should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program.

#### Total Hours

19

### Courses

#### NUTR 1213. Fundamentals of Nutrition. 3 Hours.
Introduction to profession of dietetics and nutrition including history, scope and future of professionals with emphasis on academic preparation, internships, acquisition of professional credentials, career laddering and career opportunities. Guest speakers will supplement lectures and assignments. Prerequisite: HNHI; HNAD or FNAH majors only or by department consent. (Typically offered: Fall and Spring)

#### NUTR 1213H. Honors Fundamentals of Nutrition. 3 Hours.
The functions of food, body processes, optimum diets in relation to health and physical fitness. (Typically offered: Fall and Spring)

#### NUTR 2111L. Principles of Foods Laboratory. 1 Hour.
Lab 3 hours. Corequisite: NUTR 2113. (Typically offered: Fall and Spring)
NUTR 2113. Principles of Foods. 3 Hours.
Physical and chemical characteristics of foods, organized by food science and
nutrition, protein foods, phytochemicals, complex and refined carbohydrates,
and fats. Emphasis on food preparation and storage methods and effect on
foods. Investigation and practice of food preparation basics, cooking and baking
techniques, knife skills, food safety, and sensory evaluation of food. Corequisite:
NUTR 2111L. Prerequisite: NUTR 1213, HOSP 2611 and (CHEM 1073, or
CHEM 1103, or CHEM 1203), and one of the following programs, minors or
concentrations: (HNADBS, FNAHBS, HESCBS, NUTR-M, or CATEBS-FCSE).
(Typically offered: Fall and Spring)

NUTR 2203. Sports Nutrition. 3 Hours.
The integration of concepts from nutrition and exercise physiology into an applied
multidisciplinary study of how food, beverages and dietary supplements influence
physical performance. Prerequisite: NUTR 1213. (Typically offered: Fall and Spring)

NUTR 3003. Nutrition Assessment. 3 Hours.
Principles of nutritional assessment and methodology including anthropometric,
biochemical, clinical, and dietary evaluation. Emphasis placed on Nutrition Focused
Physical Assessment, the interpretation of indices for all age groups in health and
disease for both individuals and groups, and the application of nutrition assessment
data in the nutrition care process. Prerequisite: NUTR 3203, junior standing and
HNAD/FNAH majors only. (Typically offered: Spring)

NUTR 3101L. Culinary Nutrition Lab. 1 Hour.
Students will explore ways to apply evidence based nutrition research to culinary
application. It addresses the fundamental culinary skills and knowledge required to
prepare meals that impact the nutritional and sensory appeal of food. Corequisite:
NUTR 3103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3103. Culinary Nutrition. 3 Hours.
This course is grounded in a food first approach to health and wellness with an
emphasis on disease prevention. Students will study the physical and chemical
characteristics of foods that increase nutritional value and will include exploration
of the culinary nutrition modification process and application of these concepts
to planning nutritionally balanced meals. Corequisite: NUTR 3101L. Prerequisite:
NUTR 2113 and NUTR 2111L. (Typically offered: Fall)

NUTR 3203. Human Nutrition. 3 Hours.
Fundamental human nutrition; nutritive value of foods and general functions
of nutrients based on concepts derived from inorganic and organic chemistry.
Examples relating nutrition to disease used as illustrations to deepen understanding
of normal nutrition. Lecture 3 hours per week. Corequisite: CHEM 2613 and
CHEM 2611L or CHEM 3603 and CHEM 3601L. Prerequisite: NUTR 1213.
(Typically offered: Spring)

NUTR 3213. Nutrition Education and Counseling. 3 Hours.
Introduction to development of communication skills related to educational theory
and techniques, development of educational materials, interpersonal communication
skills, group dynamics, public speaking, and interviewing techniques. Includes
discussion of counseling theory and methods, and how education and counseling are
intertwined for nutrition professionals. Includes development of skills in nutrition
counseling. Prerequisite: NUTR 1213, HNAD or FNAH majors only, and Junior or
Senior standing. (Typically offered: Fall)

NUTR 3603. Quantity Foods. 3 Hours.
This course focuses on menu planning for a variety of food service organizations,
with consideration of age, special needs, diet type, cultural and ethical parameters.
Students will design flavorful and appealing menus that meet current nutrition
recommendations, guidelines and budgetary constraints. They will learn recipe
standardization, quantity production, and overall quality control. Prerequisite:
NUTR 1213, HOSP 2603, junior standing and Human Nutrition and Dietetics
Bachelor of Science (HNADBS) or Food, Nutrition and Health Bachelor of Science
(FNAHBS) majors only. (Typically offered: Spring)

NUTR 4001. Nutrition Seminar. 1 Hour.
Presentation and discussion of selected nutrition topics of current interest.
Prerequisite: Senior standing and HNH; HNAD or FNAH majors only. (Typically
offered: Spring) May be repeated for up to 2 hours of degree credit.

NUTR 4101L. Research Methods in Nutrition Lab. 1 Hour.
Application of experimental methods for investigations in nutrition research. Pre- or
corequisite: STAT 2303 and HNH; HNAD or FNAH majors with senior standing only.
Corequisite: NUTR 4103. Prerequisite: NUTR 2113 and NUTR 2111L. (Typically
offered: Spring)

NUTR 4103. Research Methods in Nutrition. 3 Hours.
This course will cover applications of experimental methods for investigations in
nutrition research and cookery. Corequisite: NUTR 4101L. Pre- or Corequisite:
STAT 2303. Prerequisite: NUTR 2113, NUTR 2111L and (Human Nutrition and
Hospitality Innovation Bachelor of Science in Human Environmental Science
(HNHIBS), or Human Nutrition and Dietetics Bachelor of Science in Human
Environmental Science (HNADBS), or Food, Nutrition and Health Bachelor of
Science in Human Environmental Science (FNAHBS) majors), and senior standing
only. (Typically offered: Spring)

NUTR 4213. Advanced Nutrition. 3 Hours.
Normal nutrition with emphasis on utilization of nutrients. Lecture and reports on
current literature 3 hours per week. Prerequisite: CHEM 3813 and NUTR 3203.
(Typically offered: Fall)

NUTR 4223. Life Cycle Nutrition. 3 Hours.
Study of normal nutrition emphasizing quantitative needs for nutrients as functions
of biologic processes that vary during stages of the life cycle. Attention is given to
preconception, pregnancy, childhood and older adults. Prerequisite: (HNAD majors
and NUTR 3203) or (FNAH majors and junior standing). (Typically offered: Fall)

NUTR 4243. Community Nutrition. 3 Hours.
Identifying, assessing, and developing solutions for nutritional problems encountered
at the local, state, federal, and international levels. Lecture 3 hours per week.
Prerequisite: NUTR 1213, junior standing, and Food, Nutrition and Health Bachelor
of Science in Human Environmental Science (FNAHBS) or Human Nutrition and
Dietetic Bachelor of Science in Human Environmental Science (HNADBS) majors
only. (Typically offered: Spring)

NUTR 4263. Medical Nutrition Therapy I. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care
Process, and the pathophysiology and current standards of practice for diseases
and disorders. Pre- or corequisite: NUTR 3213 and NUTR 4213. Prerequisite:
BIOL 2213, BIOL 2211L, CHEM 3813 and NUTR 3003. (Typically offered: Fall)

NUTR 4273. Medical Nutrition Therapy II. 3 Hours.
Principles of medical nutrition therapy with emphasis on the Nutrition Care Process,
and the pathophysiology and current standards of practice for diseases and
disorders. Lecture 3 hours per week. Prerequisite: NUTR 4263. (Typically offered:
Spring)

NUTR 4303. Cultural Perspectives on Foods. 3 Hours.
Cultural competence is growing in importance as our population becomes more
culturally diverse. This course covers cuisine and culture of various regions for the
purpose of promoting respect and understanding for cultural diversity. Students will
learn the history of foods, ingredients, flavor profiles, religious based food practices,
etiquette, and customs. Corequisite: Junior or senior standing, and (Human Nutrition
and Dietetics majors (HNADBS) or Food, Nutrition and Health majors (FNAHBS) or
Hospitality Management (HOSPBS) majors). (Typically offered: Spring)

NUTR 4403. Recipe Modification. 3 Hours.
Students will use existing research to identify foods with preventative and functional
properties and apply that information to develop recipes for improved nutritional
quality and disease management. They will gather data to modify and refine the
product and create an educational tool to promote their product. Prerequisite:
NUTR 3103 and NUTR 3101L. (Typically offered: Spring)
Fay Jones School of Architecture and Design

Mission and Objectives

The Fay Jones School of Architecture and Design, founded in 1946 by John G. Williams at the University of Arkansas, houses professional design programs of architecture, landscape architecture and interior design together with liberal studies programs. The architecture and landscape architecture departments offer five-year accredited professional degree programs and four-year pre-professional degrees; the interior design department offers a four-year accredited professional degree, all of which combine studio design education with innovative teaching in history and theory; building and intelligent technologies and urban design and resiliency. A broad range of course offerings equips graduates with the knowledge and critical agility required to meet the challenges of designing for a changing world. Design instruction occurs in studio sequences that provide educational experiences appropriate for students who wish to pursue both traditional and non-traditional forms of professional practice. Fundamental principles and techniques design and design thinking are stressed and all curriculums empower students by developing skill, knowledge, and a deep sense of responsibility to their environment and to the cultures they will serve. The school’s curriculum surveys issues and opportunities in built and natural settings, as well as addressing complex social, physical, and cultural relationships that constitute the human-made environment. In summary, the school prepares its students with critical frameworks for professional skills, and applied learning experiences that equip them to assume leadership roles in the profession and in their communities.

Facilities and Resources

The three academic units of the Fay Jones School — architecture, interior design and landscape architecture — together with its administrative offices are located in Vol Walker Hall and its state of the art addition, the Steven L. Anderson Design Center. Harmoniously combining traditional and contemporary architecture, our award-winning facilities not only offer students in the Fay Jones School extraordinary opportunities for collaboration among its three design disciplines, but also model best practices for new and historic preservation construction, all adhering to high standards of sustainable design. Similarly, the university’s location in Northwest Arkansas, affords opportunity to study the impact of urbanization in a traditionally agricultural setting. At the same time, we value making connections with the entire state and our nation, pursuing learning experiences for our students that foster civic engagement and responsibility. So too, the school is aware of the increasing global nature of design practice and offers field trips, guest lectures, learning opportunities in applied design and research, and, especially, a variety of study abroad programs in the University of Arkansas Rome Center as well as our Latin America Program and diverse options across Europe.

Design Studio

The design studio sequence is the core of each discipline within the school. Studio projects are complemented by topical lectures that inform the design process. These learning experiences develop and nurture the intellectual and creative skills of students and allow them to approach problem solving in a disciplined, logical, and analytical manner. The amount and complexity of material covered, the fast pace of assignments, and the presentation of work for critical discussion among faculty and other students combine to produce a challenging learning atmosphere.

Library Resources

The C. Murray Smart Multimedia Center, located in Vol Walker Hall contains a vast online digital image database relating to architecture, architectural history, interior design, landscape architecture and urban design. This resource, along with a large array of archival collections of slides, photographs and video programs, is available to faculty and students of the school.

Digital Drawing and Fabrication Resources

Fabrication Laboratories Website (https://fayfabricationlabs.uark.edu)

Located in the lower levels of Vol Walker Hall and an annex location in Fayetteville, the Fabrication Laboratories are an open environment for all Fay Jones School of Architecture and Design students & faculty. Material experimentation, prototyping, and representing scale models is an essential part of the design culture at the Fay Jones School. The Fabrication Labs support this hands-on learning and research through offering the use of a variety of equipment in four facilities; Wood Lab, 3D Print Lab, Laser and CNC Lab, and the Build Lab.

The materials laboratory is a learning resource providing access to timeless, innovative, emerging, and sustainable materials and technologies that enables students to grow creatively and to become socially and environmentally responsible professionals. The tangible collection offers students the opportunity to engage a material’s composition, physical structure, function, and environmental impact while exploring diverse design applications and assemblies. Searching materials is available through an online database organized by composition, manufacturing process, form, and application.
Garvan Woodland Gardens
Garvan Woodland Gardens Website (http://www.garvangardens.org/)
Located on Lake Hamilton in Hot Springs, Arkansas, Garvan Woodland Gardens is an integral unit of the school. The land and endowment were the result of a bequest to the department of landscape architecture in 1985. This 210-acre woodland habitat features a variety of garden settings and unique architectural structures designed and developed by world-renowned specialists in botanical gardens, landscape architecture and architecture.

Garvan Woodland Gardens’ mission is to preserve and enhance a unique part of the Ouachita environment; provide people with a place of learning, research, cultural enrichment, and serenity; develop and sustain gardens, landscapes, and structures of exceptional aesthetics, design, and construction; and partner with and serve communities of which the Gardens is a part.

An internship program offers opportunities for summer study and employments.

University of Arkansas Community Design Center
Community Design Center Website (http://uacdc.uark.edu/)
Since 1995 the University of Arkansas Community Design Center (UACDC) has provided award-winning, innovative planning to communities and organizations throughout Arkansas. A nationally recognized leader in urban design, sustainable development, and education UACDC design solutions advance triple-bottom line thinking: simultaneously solving for economic, ecological, and social criteria. The center’s work is multi-disciplinary as it addresses new challenges in affordable housing, context sensitive highway design, low impact development, transit-oriented development, big box urbanism, watershed urbanism, and agricultural urbanism. In the tradition of a teaching office, students collaborate with the center’s professional design staff and allied consultants while authoring their own proposals. The goal is to prepare designers for leadership in “wicked problem solving” that leads to intelligent development of the built environment.

Degrees Offered
The Fay Jones School of Architecture and Design offers five-year professional programs in architecture and landscape architecture and a four-year professional program in interior design. Each program culminates in a professional degree, the Bachelor of Architecture (B.Arch.), Bachelor of Landscape Architecture (B.L.A.) or Bachelor of Interior Design (B.I.D).

The Bachelor of Science in Architectural Studies and the Bachelor of Science in Landscape Architectural Studies serve students who are interested in the design disciplines, but not professional practice. The four-year programs are well suited for students who seek careers in allied design disciplines, including historic preservation, environmental law, and history of architecture, as well as for students looking forward to graduate education in architecture, landscape architecture and the allied disciplines.

Minors
Students in architecture, landscape architecture and interior design may pursue academic minors in approved degree programs of other colleges on campus, providing they meet the specific requirements for that minor, as well as any of the school’s minors in History of Architecture and Design, Planting Design, Planning and Sustainability. An Interior Design minor is available only to students in the Fay Jones School of Architecture and Design.

Accreditations
All three professional degree programs in the Fay Jones School are nationally accredited.

The architecture program was founded in 1946 and has been accredited by the National Architectural Accrediting Board (NAAB) since 1958. The landscape architecture program was established in 1975 and has been accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects (ASLA) since 1983. The Interior Design program was established in 1974 and has been accredited by the Council for Interior Design Accreditation (CIDA) since 1993. The school holds memberships in the Association of Collegiate Schools of Architecture (ACSA) and the Council of Educators in Landscape Architecture (CELA) and the Interior Design Educators Council (IDEC), organizations that comprise North American schools of architecture, landscape architecture and interior design.

Off-Campus Study Requirement
Each student in the professional program in architecture, landscape architecture and interior design is required to complete an approved off-campus study experience focusing upon complex urban relationships, and fostering cultural diversity. Approved programs in the Fay Jones School vary. They range from a semester in Rome to five- to ten-week programs in Europe or Latin America.

A special international programs fee supports the school’s international programs. These fees are assessed to all students participating in the professional (five-year) degrees in architecture, landscape architecture and interior design designated in the “Fees and Cost Estimates” section of this catalog. The international program and any travel fees offsets the costs of maintaining off-campus programs that are not a part of the school’s university-funded budget, as well as enhancing student-centered activities. Students are assessed the international fee each semester up until the semester they study abroad. At that time, they will be assessed for any remaining semesters plus any additional program costs not covered by the international study fees. The fee is assessed for each study abroad program and is not regulated by the catalog year of the students’ first enrollment in the Fay Jones School of Architecture and Design. All travel fees are non-refundable under any circumstances including withdrawal from the respective professional programs. For further information, see notes on related program fees under “Fees and Cost Estimates” for the university.

School Academic Regulations
Plus/Minus Grading System
The Fay Jones School of Architecture and Design utilizes a plus/minus grading system that assigns numerical values to 12 different grades. These values are used for architecture, interior design and landscape architecture courses when grade-point averages are calculated. The 12-step grading system with assigned values is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.67</td>
</tr>
<tr>
<td>B+</td>
<td>3.33</td>
</tr>
</tbody>
</table>
School Scholarships

More than 90 awards and scholarships, including both merit and need-based scholarships, are available to students in the Fay Jones School of Architecture and Design. Most are awarded annually on the basis of recommendations made by the scholarship committee of the school. Only work accomplished since entering the school will be considered in determining merit awards based on grade-point averages.

Applications for scholarships are available for prospective and currently enrolled students at scholarships.uark.edu.

Student Organizations

American Institute of Architecture Students

The American Institute of Architecture Students (AIAS) is a national organization whose purpose is “to organize architecture students and combine their efforts to advance the science and art of architecture, to promote excellence in architectural education, training and practice, and to foster an appreciation of architecture and related disciplines among all persons.” All students in the school’s architecture program are eligible for membership.

American Society of Landscape Architects, Student Chapter

The purpose of the student chapter of the American Society of Landscape Architects is to bring together the landscape architecture students to combine their interests and efforts, to extend their knowledge of the profession of landscape architecture, and to help advance the profession while preparing for a professional career. All students in the school’s landscape architecture program are eligible for membership.

American Society of Interior Designers Student Chapter

The American Society of Interior Design Student Chapter (ASID) is dedicated to representing the entire profession and encouraging the highest possible standards for the practice of interior design. Their purpose is to encourage interaction with professionals in interior design and allied professions and to develop leadership qualities. All students in the school’s interior design program are eligible for membership.

National Organization of Minority Architects

The National Organization of Minority Architects (NOMA) mission is to champion diversity within the design professions by promoting the excellence, community engagement, and professional development of its members.

Tau Sigma Delta Honor Society

The Alpha Eta Chapter of Tau Sigma Delta is the only national collegiate honor society recognized in the fields of architecture, landscape architecture, interior design and allied arts. All students in the school are eligible for membership.

Elections to membership are made by the existing membership, subject to approval by the faculty, from the top 20 percent of each class of fourth-year and fifth-year students maintaining a minimum 3.00 cumulative grade-point average. In addition, leadership, character, and promise of professional merit are considered in making selections.

Sigma Lambda Alpha

Sigma Lambda Alpha, founded and chartered by the Council of Educators in Landscape Architecture (CELA), is an international honor society that encourages, recognizes and rewards academic excellence in preparation for the profession of landscape architecture. Any landscape architecture junior or senior with an average of 3.2 or higher is eligible for membership.

Ownership of Work

All original work submitted for credit, including design studio projects, becomes the property of the Fay Jones School of Architecture and Design. Students are required to maintain portfolios documenting all academic and design studio work. Digital copies (compact discs) of all work completed in a studio must be submitted to the studio year coordinator in order to receive a grade for the studio.

School Computer Policy

archlabs.uark.edu (http://archlabs.uark.edu/)

All students enrolled in the school are required to purchase, for their first year, a personal computer matching or exceeding specifications issued by school. The specifications are the same for all departments. All students will need their computers in the fall semester of the first year.

Recommendations for educationally priced computers are available on the UA Computer Store website (http://uofastore.com/computer/tech-guide/). Looking under the Fay Jones School.

A substantial amount of software may be required depending on specific course requirements, most of which is free for students to download at school’s Technical Support page (http://fayjones.uark.edu/people/current-students/technical-support.php).

Other software is available educational discount prices through the UA Computer Store (https://shop.uofastore.com/c-297-software.aspx).

School Admission Requirements

Each program within the Fay Jones School of Architecture and Design has its own requirements for admission to their general and professional programs. The page below provides admission requirements for:

- The Department of Architecture
- The Department Interior Design
- The Department of Landscape Architecture

Department of Architecture Admissions

The department of architecture maintains two distinct tracks of study for entering freshmen to accommodate all students interested in pursuing a degree in architecture. The two tracks of study are designed to foster learning and to build strong foundations for entering students with different skill levels and high school backgrounds. Students accepted to the University of Arkansas with the intention to participate in the B.Arch. or B.S. programs in the department of architecture will be classified as fall/spring studio students or summer/summer studio students and assigned to either the fall/spring studio track or summer/summer studio track based upon department admissions policies described below.

Fall/Spring Studio

Students must meet all of the following requirements:

- 25 ACT or better
- 3.5 GPA in high school
- College preparatory curriculum to include physics and an upper level math (Pre-Calculus or higher)

Space in the studio is limited to 120 students with priority given to first year students who are admitted to the University of Arkansas and indicate architecture or architectural studies as their intended degree program by Nov. 15.

Students are reviewed at the end of the fall semester and may continue in the program if they meet the following criteria:

- “C” or better in ARCH 1015, Architectural Design I
- “C” or better in PHYS 1044, Physics for Architects I or an approved equivalent
- “C” or better in ARCH 1212, Design Thinking I: Foundations in Technology
- Present a 2.0 GPA

Students who do not meet those criteria will receive a letter and be advised accordingly.

Summer/Summer Studio

Summer studio students meet the University of Arkansas minimum requirements for admission but do not meet the above noted department criteria for the fall/spring studio. These students can enroll in ARCH 1015, Architectural Design I in the summer if they meet the following criteria:

- “C” or better in PHYS 1044, Physics for Architects I or an approved equivalent
- Present a 2.0 GPA

Students who do not meet these criteria will be delayed until they satisfy the admissions criteria for the Department of Architecture. Students will be reviewed at the end of the first summer session and will not be allowed to continue in the program if they do not meet the following criteria:

- “C” or better in ARCH 1015, Architectural Design I
- “C” or better in ARCH 1212, Design Thinking I: Foundations in Technology
- Maintain a 2.0 GPA

Architecture Department Transfer Students

Transfer students who are admitted to the Fay Jones School of Architecture start the design studio sequence in the summer and must meet the following requirements:

- Completion of an approved general physics course and an approved mathematics course.
- To enter Design I in the summer, students must successfully pass Physics for Architects I (or another approved upper level physics course) with a minimum of C or better, complete an approved math course and present a 2.0 GPA overall.
- Students admitted to the university with a completed two-year associate of arts or associate of science degree from an Arkansas state-supported two-year or four-year college or university, as stated in ACT 182, will have general education (core) requirements waived. All students must complete any lower division discipline specific courses required for the major, as well as all courses required to comply with the conditions of accreditation.

Lack of knowledge or misinterpretation of policies and/or regulations on the part of individual students will not be considered a valid reason for failure to fulfill requirements.

Transferring from Accredited Schools of Architecture: Students transferring from an accredited professional program in architecture must have their architecture courses reviewed for acceptance and for determination of studio placement by submitting materials for review. Please contact the school’s advising center for a specific list of required materials.

NOTE: All students must complete or receive transfer credit for either PHYS 1044 Physics for Architects I or PHYS 2013 and PHYS 2011L College Physics I, MATH 1213 Plane Trigonometry, MATH 2033 Mathematical Thought, MATH 2043 Survey of Calculus or MATH 2053 Finite Mathematics and all other first year university core curriculum courses prior to entry into ARCH 2016 Architectural Design III and its co-requisites in architectural structures and history.

Ultimate responsibility for completion of entrance requirements rests with each student. For questions concerning admissions, please contact the school’s advising center for additional information.

Admission to the Professional Program

The department of architecture offers students the opportunity to prepare for architectural practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

Students are admitted to the first year of the architecture curriculum based on the above described by the university and the school. Every semester, students’ grades in all architecture courses, especially the design studio, are evaluated to assess their progress and performance.
Upon completion of the third year of the five-year architecture curriculum, including completion of the 35 semester-credit hour university’s state minimum (general education) core required, students will be evaluated for admission to the professional program. Admission to the Professional Degree Program in the Department of Architecture requires a minimum 2.00 grade-point average in the University Core and each of the sub-disciplines of Architecture: History/Theory, Technology and Design.

Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final two years of design studio at the school. In addition to completing the design studio sequence, students are encouraged to take maximum advantage of the opportunities that professional and free electives provide for pre-professional development, cultivation of specialization in and related to the profession, and/or preparation for graduate education.

**Interior Design Program Admissions**

Students are admitted to the first year of the interior design curriculum based on criteria established by the university and by the program. They are evaluated each semester by grades in lecture courses and by grades for performance and progress in the design studio sequence.

**Admission to the Professional Program for Interior Design**

The interior design program offers prospective students the opportunity to prepare for professional practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

At the completion of the first year of the interior design curriculum, students will be evaluated for admission into the professional program on the basis of academic performance in the university core and the required interior design and architecture curriculum. Admission is based on available desks and requires a majority vote of a departmental admissions committee. Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final three years of design studio at the school. Students with less than a cumulative 2.5 GPA in IDES and ARCH courses will not be admitted to the professional program. Students who are not admitted are encouraged to consider alternative programs in the school and the university.

Students are encouraged to maximize opportunities that professional and free electives provide for pre-professional development, specialization in areas related to the profession, and/or preparation for graduate education.

**Department of Landscape Architecture Admissions**

All students (including freshmen, international, and transfer students) admitted to the University of Arkansas are eligible for participation in the landscape architecture program in the school. Space in the studio is limited with priority given to first year students who are admitted and indicate landscape architecture or landscape architectural studies on their admissions application by November 15th. Students who require developmental work because of low ACT or SAT scores or university-administered math placement examinations or who require courses to remove deficiencies may not register for courses carrying LARC departmental designations. Upon completion of required developmental work and maintaining a grade-point average of 2.00 or more on at least 12 credit hours, students may enroll in landscape architecture (LARC) courses.

Admission to the Professional Program in Landscape Architecture

The department of landscape architecture offers a professional education grounded in liberal arts studies, which prepares students for landscape architecture practice in the private, public, and not-for-profit sectors. Successful completion of the program requires commitment to personal growth and excellence.

Students are admitted to the first year of the landscape architecture program based upon the established criteria by the University of Arkansas. Academic and professional performance is evaluated by grades in the course work, design studios, and construction labs. After two years in the program, students submit a portfolio of work at the end of the spring semester for application to continue in the professional program. Applicants who have a grade-point average below a 2.5 will not be allowed to continue in the program. Contact the department head for specific portfolio submission requirements and schedule of deadlines. All candidates will be notified of their acceptance or rejection in writing, normally by the first of August.

Students will be evaluated on general academic performance and in the landscape architecture curriculum as well as professional conduct. All department faculty serve on the admissions committee. Any appeal to the committee’s decision may be made by submitting a letter to the department head one week before the first week of the subsequent fall semester. The appeal will be presented to the entire faculty for consideration and will require the candidate to present their case in person.

Students who fail to gain admission to the Bachelor of Landscape Architecture degree program will be referred to the department head and the school’s academic adviser for appeal procedures and alternative degree programs in the school and the university.

**Honors**

The Honors Program of the Fay Jones School of Architecture and Design is proud to be one of the six individual honors programs partnered with the University of Arkansas Honors College. The Fay Jones School Honors Program is rooted in the best traditions of design education: responsibility and service to the societies and cultures to which we are inextricably connected, and the nurturing of the individual curiosity and capabilities of our students. Honors requirements are the same in all departments (Architecture, Interior Design and Landscape Architecture) and can be found below.

The Fay Jones School of Architecture and Design Honors Program provides opportunities for students of superior academic and creative ability to enhance and enrich their professional and liberal education. Students in the Architecture Honors Program are eligible to graduate *cum laude*, *magna cum laude*, and *summa cum laude*. All other students who attain a cumulative GPA of 3.5 or higher will be eligible to graduate with distinction, a classification separate from the *cum laude* awards. The school’s Honors Program requires 18 credits of honors coursework.

**Admission to the Fay Jones School Honors Program**

The Honors College will automatically enroll freshmen who are accepted as honors students before summer orientation in the Fay Jones School Honors Program. At summer orientation, these honors students will fill out the Fay Jones School Honors Program enrollment form.
Freshmen who were not admitted by the Honors College before orientation but who come to orientation with the qualifying 28 composite ACT score and 3.5 high school GPA will also fill out the Fay Jones School Honors Program Enrollment form at orientation. Students who do not present both 28 composite ACT and 3.5 high school GPA, but who subsequently earn and maintain a 3.5 GPA in their coursework at the U. of A., will be invited to enroll in the Fay Jones Honors Program as soon as they attain a 3.5 GPA, provided it is still possible for them to complete all of the Honors program requirements at the time of their enrollment.

From the second semester of the third year onward, the Fay Jones School Honors Scholars are required to maintain a minimum cumulative GPA of 3.33 to remain in the program.

Transfer students may be invited to join the Fay Jones School Honors Program if they maintain a cumulative GPA of 3.5 or higher in courses completed at the University of Arkansas by the end of the first semester of their third year of study, and a 3.33 GPA thereafter.

Every semester, the school’s advising center will apprise the Fay Jones School Honors Program Committee of students who have achieved this level of excellence and are eligible to join the Fay Jones School Honors Program. Invitations are extended to students by the end of the semester in which the candidacy is advanced.

Confirmation of Intent to Complete the Fay Jones School Honors Program

At the end of the first semester of the third year, students will sign a form, confirming their intention to complete the remaining requirements for their honors degree. Students found not to have successfully completed the honors core course(s) needed to satisfy their Honors degree requirements (i.e., sufficient credits in University Core and/or Professional Core Honors courses) will be dismissed from the honors program at this time.

Dismissal from the Fay Jones School Honors Program

The Fay Jones School Honors Program students who fail to maintain a 3.5 or 3.33 cumulative GPA, depending on their year level, will receive a one-semester probation period prior to dismissal from the program.

Honors Independent Study Policy

Honors students may take as many regular or honors independent study credits as they deem desirable, but only one three-credit honors independent study course may be substituted for an Honors Professional Elective course. Furthermore, the substitution will be permitted only if all of the following conditions are satisfied:

- That the honors independent study course not be taken concurrently with capstone credit studio.
- That the honors independent study course not be taught by the student’s capstone director.
- That honors independent study course be substituted for no more than three credits of a student’s required professional electives credits.

It is recommended that students considering this option seek special advising from their faculty mentor. As it is helpful for students to know what is expected of them, the work of the honors independent study (research paper, models, prototypes, etc.) should be determined, and agreed upon, by the professor and student before the student registers for the credits. The school’s advising center will register a student for an Honors Special Projects course only upon request of a syllabus or prospectus for the independent study from the student.

Honors Capstone

All honors students will pursue a capstone project during the final year of their undergraduate program. Honors students will invest three credit hours in the development of a capstone project that will articulate research topics identified in the FJAD 3153H Honors Methods of Design Inquiry course taken spring semester in a students’ third year. Guidelines for topic selection and preparation of the honors capstone project are available from the Honors Committee.

All Fay Jones Honors students are held to the highest standard with regard to academic achievement and academic integrity. Students violating the Academic Integrity policy that receive a sanction of # 1.0 at the University of Arkansas will be permanently removed from the Fay Jones Honors Program without the ability to reapply. The student may appeal the decision to the University’s Academic Integrity Board; if the sanction is overturned and removed, the student will be reinstated into the Fay Jones Honors Program.

The honors capstone is a student-directed project supervised by a capstone director with expertise in the capstone topic. The capstone director, who must be a faculty member in the Fay Jones School, chairs a capstone committee to be comprised of two other members, typically, a departmental faculty member and a non-departmental faculty member who brings additional fields of knowledge to the project. In rare cases when the capstone director, in consultation with the School’s Honors Committee and the student, determines that a non-departmental faculty member with expertise appropriate to the capstone in question cannot be identified on campus, an extra-disciplinary member from within the Fay Jones School (e.g., faculty in architectural history, technology, or other allied field) may fill the position of the non-departmental member. Any such exceptions to the standard membership of a capstone committee should be infrequent. The point of including non-departmental participation is to help ensure that a student’s research is understandable and valid to an informed community outside of the disciplines of architecture, interior design or landscape architecture. Additional faculty, both departmental or non-departmental, as well as non-academic experts, may participate in any honors capstone as non-committee members, if the capstone director welcomes their involvement. Students will complete and present a written prospectus for the Honors Capstone no later than the Friday before summer break in their third year of study. The prospectus will be a product of the FJAD 3153H Honors Methods of Design Inquiry course. Students shall meet a schedule of interim requirements established by the capstone committee in consultation with the School’s Honors Committee.

Requirements for Fay Jones School of Architecture and Design Honors Program Scholars

Completion of 18 hours of honors designated courses, to include a minimum of:

- Honors elective (any Honors course at the university) 3
- Honors Professional Core (any Honors professional core in the Fay Jones School) 3
- Honors Professional Electives or upper-level (3000+) university honors courses 6
- FJAD 3153H Honors Methods of Design Inquiry 3
Architectural Studies (ARCH)

Department Office
120 Vol Walker Hall
479-575-4705

Bachelor of Science in Architectural Studies

The Bachelor of Science in Architectural Studies incorporates course work from the school with liberal studies for students with interests that fall outside the parameters of the accredited professional degree program. The architectural studies program provides opportunities for students who wish to prepare for graduate study in an accredited architecture program or in an allied discipline, such as architectural history, historic preservation, urban planning, or construction management, as well as serving students who seek opportunities in related fields that may not require the five-year accredited degree.

Architectural Studies degree candidates may pursue an academic minor. The minor must be in a field other than the major area, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours.

Although foreign study is not required of candidates for the four-year degree, students in the architectural studies curriculum are encouraged to participate in the school's off-campus study programs in Europe and Latin/Central America.

To take maximum advantage of the opportunities the four-year degree offers for pre-professional development (cultivation of specialization in and related to the field, and/or preparation for graduate study) each candidate for the Architectural Studies degree will work with a faculty adviser to develop a program of study emphasizing a student's special interests.

Requirements for a Bachelor of Science Degree in Architectural Studies:

1. Completion of the following 31-hour architectural studies program:

<table>
<thead>

Fine Arts/Humanities

One course must be elected from the fine arts core; one course from the humanities core.

Social Science

At least three hours should be taken in anthropology, economics, psychology, or sociology; and with not more than two courses taken from any one department to fulfill this requirement. (See the state minimum core.)

Total Hours: 35

3. Completion of 45 hours of electives as follows:

Professional Concentration Electives

Concentration tracks can include: M.Arch. preparation; historic preservation; environmental technologies and sustainability; urban and regional planning; a recognized minor in an allied discipline; and other similar programs of study, subject to approval; including at least nine hours of upper-level courses in FJSOA.

Upper Division Electives outside of FJSOA

Nine hours to include at least one course in IDES and one course in LARC

Total Hours: 42

4. Free Electives

5. A minimum of 120 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in course work completed in the Fay Jones School of Architecture.

6. Presentation of at least 40 semester hours in courses numbered 3000 or above or courses in the Fay Jones School of Architecture (or allied discipline) numbered 2000 with specific course prerequisites.
7. UNIV 1001 University Perspectives does not count toward degree credit.

Architectural Studies B.S.
Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program. During the first year, students who have been admitted to the fall-spring design studio and students who have been to the summer-summer design studio follow different schedules, both of which are listed below, with the fall-spring studio first and then the summer-summer studio. The second, third and fourth years are identical for both scenarios.

### Fall-Spring Design Studio

<table>
<thead>
<tr>
<th>First Year</th>
<th>Fall</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCH 1015 Fundamental Design Skills</td>
<td>5</td>
<td></td>
</tr>
<tr>
<td>ARCH 1212 Design Thinking I: Foundations in Technology</td>
<td>2</td>

<tr>
<td>PHYS 1044 Physics for Architects I</td>
<td>4</td>
<td></td>
</tr>
<tr>
<td>UNIV 1001 University Perspectives</td>
<td>0</td>
<td></td>
</tr>
</tbody>
</table>

Students are reviewed at the end of the fall semester and may continue the program if they meet the following criteria: 'C' or better in ARCH 1015, Architectural Design I; 'C' or better in PHYS 1044, Physics for Architects I or an approved equivalent; 'C' or better in ARCH 1212, Design Thinking I: Foundations in Technology; Maintain a 2.0 GPA. Students who do not meet these criteria will receive a letter and be advised accordingly.

<table>
<thead>
<tr>
<th>Second Year</th>
<th>Fall</th>
<th>Spring</th>
</tr>
</thead>
<tbody>
<tr>

Academic Policies

1. Any student receiving a grade of “D (+/-)" in a pre-professional program studio course is subject to a comprehensive review of his/her semester’s work by the Design Review Committee. The committee can require the student to retake the studio, prior to advancing to the next studio in sequence, in order to demonstrate competence by achieving a grade of “C” (2.00) or better. A student receiving an “F” in any required design studio must repeat that studio before progressing.

2. Each student’s progress through the Design Studio sequence is monitored and governed by the faculty and subject to a design review process.

3. Any student receiving an “I” in a design studio must complete all work necessary to receive a grade in that studio prior to the first day of the next studio in the student’s prescribed sequence. Students carrying a grade of “I” will not be permitted to enroll in subsequent studios.

4. Prior to graduation, a student must present a 2.00 cumulative grade-point average in all work at this institution.

Faculty

Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, 2012.
Luoni, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, 2003.
MacKeith, Peter, M.Arch. (Yale University), B.A. (University of Virginia), Professor, 2014.
Messadi, Tahar, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, 2003.
Rotolo, Chuck, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, 2005.
Rudzinski, Russell D., M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, 2000.
Sexton, Kim, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, 1999.
Shannon, Graham F., M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, 1979.
Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn University), Associate Professor, 1998.
Turner, Alison, M.A. (Savannah State University), B.A. (Kentucky State University), Assistant Professor, 2008.
Vitale, Davide, M.Arch. (Harvard University), Diploma in Architecture (University of Rome), Professor, 1985.

Courses

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 1003.

ARCH 1013. Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

ARCH 1013H. Honors Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. Prerequisite: Honors candidacy. (Typically offered: Summer)
This course is equivalent to ARCH 1013.

ARCH 1015. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

ARCH 1025. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Spring and Summer)

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)
ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)

ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2016. Architectural Design III. 6 Hours.
Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite: ARCH 1025 and ARCH 1222. (Typically offered: Fall)

ARCH 2026. Architectural Design IV. 6 Hours.
An elaboration of space-making, addressing three-dimensional aspects of form-making, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Spring)

ARCH 2113. Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2113H. Honors Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2113.

ARCH 2123. Architectural Structures II. 3 Hours.
Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

ARCH 2123H. Honors Architectural Structures II. 3 Hours.
Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2123.

ARCH 2132. Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2132H. Honors Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)
This course is equivalent to ARCH 2132.

ARCH 2233. History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

ARCH 2233H. Honors History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 2233.

ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)

ARCH 2243H. Honors History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2243.

ARCH 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy’s masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 3016. Architectural Design V. 6 Hours.
Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)
ARCH 3026. Architectural Design VI. 6 Hours.
Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 303V. Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit.

ARCH 303VH. Honors Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit.

This course is equivalent to ARCH 303V.

ARCH 3143. Building Materials and Assemblies. 3 Hours.
Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

ARCH 3253. Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 3253H. Honors Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 2016 and ARCH 3143. (Typically offered: Spring)

This course is equivalent to ARCH 3253.

ARCH 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 3743. Furniture Design. 3 Hours.
Design concepts and techniques to acquaint the student with the design of furniture; analysis of function, development of design and construction of small pieces of furniture. (Typically offered: Irregular)

ARCH 4016. Comprehensive Studio. 6 Hours.
Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

ARCH 4023. Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

This course is equivalent to ARCH 4023.

ARCH 4026. Comprehensive Studio. 6 Hours.
Continuation of Architectural Design VII. Corequisite: ARCH 4152. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Spring)

ARCH 4116. Architectural Design - Rome. 6 Hours.
Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

ARCH 4126. Architectural Design Latin America. 6 Hours.
Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016 or ARCH 4026. (Typically offered: Summer)

ARCH 4152. Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

ARCH 4152H. Honors Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

This course is equivalent to ARCH 4152.

ARCH 4433. History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IDES 2883. (Typically offered: Fall)

ARCH 4433H. Honors History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 4433.

ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

ARCH 4523H. Honors Architectural Theory. 3 Hours.
Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

This course is equivalent to ARCH 4523.

ARCH 4553. Modern Architecture in Mexico. 3 Hours.
Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester. (Typically offered: Summer)

ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARCH 4653. Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students’ experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 4673. Modern and Contemporary Rome. 3 Hours.
Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

ARCH 4723. Architectural Research Methods. 3 Hours.
Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon architectural inquiry and discourse at a sophisticated level, for instance, in the form of a year-long thesis or independent project. Practical issues of method, such as research skills, literature review, and argument analysis are examined. The classic range of tools for interpreting architecture are surveyed from single-cause explanations (e.g., formalism) to more recent multi-causal theories (e.g., Semiotics, Deconstruction, Post-colonial theory, etc.) for architectural design. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Fall)

ARCH 4843. Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Fall)

ARCH 4843H. Honors Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Fall)

ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Fall)

ARCH 4853H. Honors Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Fall)

ARCH 4863. Saint Peter’s and the Vatican. 3 Hours.
Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Fall)

ARCH 4863H. Honors St. Peter’s and the Vatican. 3 Hours.
Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)

This course is equivalent to ARCH 4863.

ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

ARCH 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943.

ARCH 4943H. Honors Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.

ARCH 5016. Option Studio I. 6 Hours.
Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4026, or ARCH 4116, or ARCH 4126. (Typically offered: Fall) May be repeated for degree credit.

ARCH 5016H. Honors Thesis Project I. 6 Hours.
Degree project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 5016.

ARCH 5026. Option Studio II. 6 Hours.
Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

ARCH 5026H. Honors Thesis Project II. 6 Hours.
Degree project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Spring)

This course is equivalent to ARCH 5026.
ARCH 5314. Architectural Professional Practice. 4 Hours.
Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect’s office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4026 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

ARCH 5493. History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer’s understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

ARCH 5493H. Honors History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer’s understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)
This course is equivalent to ARCH 5493.

ARCH 5943. Preservation Design Technology. 3 Hours.
This course prepares students to work with historic structures by providing an introduction to the history and principles of historic and traditional construction systems, including: concepts and techniques for building conservation, historic materials and technologies, identification of treatments, recordation and research, material properties and behavior, and building forensics. Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Irregular)

ARCH 5953. Preservation Practice Field Trip. 3 Hours.
Intensive field study of a domestic or foreign site of significant or precedent-setting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Architecture (ARCH)

Department Office
115 Vol Walker Hall
479-575-4705

The Bachelor of Architecture prepares students for registration and licensure to practice architecture. Architects are licensed professionals trained in the art and science of the design and construction of buildings and structures that primarily provide shelter. Additionally, architects may be involved with designing the total built environment—from how a building integrates with its surrounding landscape to architectural or construction details that involve the interior of the building to designing and creating furniture to be used in a specific space. An architect will create the overall aesthetic and look of buildings and structures, but the design of a building involves far more than its appearance. Buildings also must be functional, safe and economical and must suit the specific needs of the people who use them. Most importantly, they must be built with the public’s health, safety and welfare in mind.

The Department of Architecture also offers a minor in History of Architecture and Design with different courses available for students in the Fay Jones School of Architecture and Design and for those students from outside the school.

Architecture – National Architectural Accrediting Board

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Arkansas Fay Jones School of Architecture and Design’s department of architecture offers the following NAAB-accredited degree program:

- B.Arch. (159 undergraduate credits)

The last accreditation visit for the B.Arch. programs was conducted in February 2014; the date of the next visit will be announced in spring 2022.

The National Architectural Accrediting Board (NAAB) only accredits professional programs offering the Bachelor of Architecture, which requires a minimum of five years of study, and the Master of Architecture degrees. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects. The curricular requirements for awarding these degrees must include three components — general studies, professional studies, and electives. Together these three components comprise a liberal education in architecture and ensure that graduates will be technically competent, critical thinkers who are capable of defining multiple career paths within a changing societal context.

No four-year degrees are accredited by NAAB, but the Bachelor of Science in Architectural Studies degree is excellent for those who want a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment in fields related to architecture.

Bachelor of Architecture Degree

Course List

1. Completion of the following 94-hour professional program:

   **Architectural Design**
   - ARCH 1015 Fundamental Design Skills 5
   - ARCH 1025 Fundamental Design Methodology 5
   - ARCH 2016 Architectural Design III 6
   - ARCH 2026 Architectural Design IV 6
   - ARCH 3016 Architectural Design V 6
   - ARCH 3026 Architectural Design VI 6
   - ARCH 4016 Comprehensive Studio 6
   - ARCH 4026 Comprehensive Studio 6
   - ARCH 5016 Option Studio I 6
   - ARCH 5026 Option Studio II 6

   **Architectural Technology**
   - ARCH 1212 Design Thinking I: Foundations in Technology 2
   - ARCH 2113 Architectural Structures I 3
   - ARCH 2123 Architectural Structures II 3
   - ARCH 2132 Environmental Technology I 2
   - ARCH 3143 Building Materials and Assemblies 3
2. Completion of the 35-hour general state minimum core (p. 96) requirements. In addition, specific requirements are listed below:

Mathematics
Select one of the following: 3
- MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203)
- MATH 2033 Mathematical Thought
- MATH 2043 Survey of Calculus (ACTS Equivalency = MATH 2203)
- MATH 2053 Finite Mathematics

Laboratory Science
Required
Select one of the following: 4
- PHYS 1044 Physics for Architects I
  - PHYS 2013 College Physics I (ACTS Equivalency = PHYS & PHYS 2011L2014 Lecture)
  - and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)
- PHYS 1054 Physics for Architects II
  - PHYS 2033 College Physics II (ACTS Equivalency = PHYS & PHYS 2031L2024 Lecture)
  - and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)

Strongly Recommended
Select one of the following: 4

Professional Electives
Chosen from upper-level courses (courses numbered 3000 or above) taught on the Fayetteville campus in the Fay Jones School of Architecture and Design and allied disciplines. Students participating in the Rome program may present Architecture of the City (ARCH 4653) for professional elective credit. All other elective courses will be used to fulfill free elective requirements.

Free Electives

Total Hours 28

4. A minimum of 157 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in all professional course work attempted is required.

5. Participation for at least one semester in an approved international educational experience. (See Off-Campus Study Requirement (p. 231).)

NOTE: No more than three hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the curriculum. ARCH 1003 is not counted toward degree credit for architecture majors. University Perspectives (UNIV 1001) does not count towards degree credit.

By following the preceding curriculum, students will meet the state minimum core requirements. They must also meet all other university requirements for graduation. See the university Academic Regulations (p. 79).

Sample curriculum for the Bachelor of Architecture degree can be obtained from the school’s advising center.

Professional Licensure Degree Requirement
The National Architectural Accrediting Board (NAAB) only accredits professional programs offering the Bachelor of Architecture, which requires a minimum of five years of study, and the Master of Architecture degrees. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects. The curricular requirements for awarding these degrees must include three components — general studies, professional studies, and electives. Together these three components comprise a liberal education in architecture and ensure that graduates will be technically competent, critical thinkers who are capable of defining multiple career paths within a changing societal context.

While no four-year degrees are accredited by NAAB, the Bachelor of Science in Architectural Studies degree is excellent for those who want a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment in fields related to architecture.

Architecture B.Arch.
Ten-Semester Degree Program
The professional program for a Bachelor of Architecture Degree requires 10 semesters of coursework and is not eligible for the Eight-Semester Degree Completion Program. It also requires admission to the professional program after the third year of classes. However, the following 10-semester sample plan shows how a first-year student could obtain a Bachelor of Architecture Degree in five years if the student is admitted to the Fall-Spring Architectural Design Studio and subsequently is admitted to the professional program. Students not accepted into the fall studio will begin ARCH 1015 in the first summer session (granted all fall requirements are met) followed by ARCH 1025 in the second summer session.

Students should be aware that PHYS 1044, PHYS 1054 (or an approved alternate laboratory science in the state minimum core) and one of the listed MATH courses must be completed before students can begin second-year courses in Architecture. Transfer students and students who change majors and seek exceptions to the sample curriculum will be reviewed on an individual basis.

Students in the professional program are required to participate in an approved study abroad experience. Students can choose from either a
fall or spring semester of 4th year in Rome, Italy or a summer program (summer prior to 4th or 5th year) in a designated Latin or Central American country. Students can elect to participate in both but only one program can serve as a substitution for one fourth-year studio semester. Should a student participate in both study aboard programs, the additional program would go to professional elective hours.

Total Units in Sequence: 159

**Note 1:** Students are reviewed at the end of the fall semester and may continue the program if they meet the following criteria: “C” or better in ARCH 1015, Architectural Design I; “C” or better in PHYS 1044, Physics for Architects I or an approved equivalent; “C” or better in ARCH 1212, Design Thinking I: Foundations in Technology; Maintain a 2.0 GPA. Students who do not meet these criteria will receive a letter and be advised accordingly.

**Note 2:** All university core courses must be completed by the end of the third year. Admission to ARCH 4016 is contingent upon admission to the professional program.
Note: If the student participates in the Rome program in the spring semester, the course plan for fourth year is reversed. Students may also choose to participate in the 10-week Latin American study abroad program in the summer before their 3rd or 4th year. If a student chooses to do both programs, only one studio will count towards the required studio sequence. The additional hours may count towards professional programs.

**Academic Policies**

In addition to the requirements of the university, the following academic policies are applicable to all students in the Department of Architecture.

1. Any student receiving a grade of "D (+/-)" in a pre-professional program studio course is subject to a comprehensive review of his/her semester's work by the Design Review Committee. The committee can require the student to retake the studio, prior to advancing to the next studio in sequence, in order to demonstrate competence by achieving a grade of "C" (2.00) or better. A student receiving an "F" in any required design studio must repeat that studio before progressing.

2. Each student's progress through the Design Studio sequence is monitored and governed by the faculty and subject to a design review process.

3. Admission to the Professional Degree Program in the Department of Architecture requires a minimum 2.00 grade-point average in the University Core and each of the sub-disciplines of Architectural History/Theory, Technology, and Design.

4. Enrollment in any 4th year design studio, including comprehensive design studio (ARCH 4016 or ARCH 4026), the Rome Center Design Studio (ARCH 4116), and the Latin American summer studio (ARCH 4126) is contingent upon admission to the professional program in architecture as described above.

5. Successful completion of the upper level studios of the professional degree program (ARCH 4016, ARCH 4026, ARCH 4116, ARCH 4126, ARCH 5016, and ARCH 5026) requires demonstration of competence as evidenced by achieving a grade of "C" (2.00) or better in those courses. Failure to achieve this minimum standard will require retaking the studio.

6. Any student receiving an "I" in a design studio must complete all work necessary to receive a grade in that studio prior to the first day of the next studio in the student's prescribed sequence. Students carrying a grade of "I" will not be permitted to enroll in subsequent studios.

7. Prior to graduation, a student must present a 2.00 cumulative grade-point average in all work at this institution.

**Design Review (Grade Appeal) Procedure**

**The Design Review Process**

Design Review is a process initiated by a faculty member, the Department Head or a student in order that (1) a faculty member may review a student's design work within a studio course, or (2) a student may appeal grades and/or seek resolution of conflicts with studio faculty in which it is believed that questions of fairness and equity have been raised by the application of the published grading policy of the faculty member. Faculty reviews are predicated upon, but are not limited to, the review of student work that has received a "D" grade or lower.

The Department Head will appoint a Design Review (Appeals) Committee at the beginning of each academic year. The Committee shall be composed of three (3) members of the permanent faculty. Additional or alternate members of the Committee may be appointed at the discretion of the Department Head or the Associate Dean.

Grade appeals initiated by students will occur during the week prior to the start of classes in the subsequent semester. Grade appeals may be filed through petition to the Office of the Associate Dean as soon as the student receives his or her final grade, but no later than the first day of the subsequent semester, (Monday of the week prior to the start of classes). In instances when the appeal concerns a change of an incomplete grade, petition for review should be made as soon as possible after the award of the final grade, and the review will be scheduled at the discretion of the Associate Dean.

**Protocol for the Design Review (Appeal) Process**

1. Students are encouraged to meet with the faculty member(s) who has awarded the contested grade prior to filing a grade appeal. The student may request that his/her faculty advisor, a member of the professional advising staff, or the Associate Dean facilitate this meeting.

2. When a Design Review (Appeal) has been scheduled, the student shall exhibit, at the place and time specified by the Associate Dean's office, ALL work assigned and attempted for the studio in the semester under review. Faculty are required to provide the Design Committee with the course syllabus, grading policy, semester assignments, mid-term course assessment, and a written evaluation (a one-page rationale) of the full semester’s work at least 48-hours in advance of the Design Review.

3. The Design Review (Appeal) will consist of separate and independent meetings of the Design Review (Appeal) Committee with the student and the faculty member(s). Following these meetings, the Committee will convene to evaluate the merits of the review (appeal). The Committee is expected to serve as both objective reviewers of the work and as advisers to the student.

4. The Design Review (Appeal) committee will keep minutes of its deliberations. All recommendations from the Committee shall have written explanations and/or justifications, which will be provided to the student, the faculty member, and the Associate Dean, and made part of the student’s academic file. The Associate Dean will be responsible for communicating the results of a Review (Appeal) to the student.

**The outcome of the Design Review**

1. A recommendation to the faculty member regarding the grade appeal of the student. Action upon that recommendation is undertaken solely at the discretion of the faculty member. No faculty member is compelled to change a grade in response to the recommendation of the Design Review Committee.

2. A requirement for the student to repeat the design studio course and any co-requisite.

3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.

4. An academic advising plan to guide the student toward successful completion of his/her degree requirements or the pursuit of an alternate career path.

All efforts shall be made to achieve clarity and reconciliation, so that the student is able to move forward positively in his/her academic career.
Requirements for a Minor in History of Architecture and Design
Pre-requisites for the Minor in History of Architecture and Design (HARD-M):

For Fay Jones School students:

Total Hours 18

---

1 A Fay Jones School student can present only 9 hours of courses required for the major field of study for credit for the minor. 3000- plus courses that are not required for the major can be presented for “advanced” credit in the minor.

2 Only 3 hours of credit earned in Study Abroad courses can be presented for credit toward the History of Architecture and Design minor.

3 A menu of variable topics courses that will qualify for credit toward the History of Architecture and Design Minor is published every semester.

Faculty

- **Baker, Emily**, M.Arch. (Cranbrook Academy of Art), B.Arch. (University of Arkansas), Assistant Professor, 2017.
- **Blackwell, Marlon**, M.Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, 1992.
- **Boelkins, Jonathan**, M.Arch. (Washington University in St. Louis), B.Arch. (University of Arkansas), Instructor, 2017.
- **Colangelo, Jessica L.**, M.Arch. (Princeton University), B.Arch. (Rice University), Assistant Professor, 2018.
- **Del Gesso, Emilio**, B.A. (University of Rome), Assistant Professor, 1997.
- **Fitzpatrick, Lynn**, M.Arch. (Rice University), B.S. (Cornell University), Assistant Professor, 1999.
- **Herman, Greg**, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, 1991.
- **Holland, Brian**, M.Arch., B.Arch., (University of Pennsylvania), B.Arch., (California State Polytechnic University, Pomona), Assistant Professor, 2018.
- **Jacobus, Frank R.**, M.Arch. (University of Texas at Austin), Associate Professor, 2012.
- **Luoni, Stephen D.**, M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, 2003.
- **MacKeith, Peter**, M.Arch. (Yale University), B.A. (University of Virginia), Professor, 2014.
- **Messadi, Tahar**, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantinte, Algeria), Associate Professor, 2003.
- **Rotolo, Chuck**, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, 2005.
- **Rudzinski, Russell D.**, M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, 2000.
- **Sexton, Kim**, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghampton), Associate Professor, 1999.
- **Shannon, Graham F.**, M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, 1979.
- **Turner, Alison**, M.A. (Parsons School of Design), B.A. (Kentucky State University), Associate Professor, 1998.
- **Vitale, Davide**, M.Arch. (Harvard University), Diploma in Architecture (University of Rome), Professor, 1985.

Courses

**ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.**
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

**ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.**
A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 1003.
ARCH 1013. Diversity and Design. 3 Hours.
Exploring the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

ARCH 1013H. Honors Diversity and Design. 3 Hours.
Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. Prerequisite: Honors candidacy. (Typically offered: Summer)

This course is equivalent to ARCH 1013.

ARCH 1015. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

ARCH 1025. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Fall and Summer)

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.
This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)

ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.
Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)

ARCH 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2026. Architectural Design IV. 6 Hours.
An elaboration of space-making, addressing three-dimensional aspects of form-making, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Fall)

ARCH 2113. Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2113H. Honors Architectural Structures I. 3 Hours.
Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

This course is equivalent to ARCH 2113.

ARCH 2123. Architectural Structures II. 3 Hours.
Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

ARCH 2123H. Honors Architectural Structures II. 3 Hours.
Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)

This course is equivalent to ARCH 2123.

ARCH 2123. Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2123H. Honors Environmental Technology I. 2 Hours.
Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

This course is equivalent to ARCH 2123.

ARCH 2233. History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

ARCH 2233H. Honors History of Architecture I. 3 Hours.
Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 2233.

ARCH 2243. History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)
ARCH 2243H. Honors History of Architecture II. 3 Hours.
Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Aligns design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)
This course is equivalent to ARCH 2243.

ARCH 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2993. Art and Culture in Italy. 3 Hours.
The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 3016. Architectural Design V. 6 Hours.
Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)

ARCH 3026. Architectural Design VI. 6 Hours.
Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 303V. Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit.

ARCH 303VH. Honors Special Projects. 1-6 Hour.
Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit. This course is equivalent to ARCH 303V.

ARCH 3143. Building Materials and Assemblies. 3 Hours.
Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

ARCH 3253. Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 3253H. Honors Environmental Technology II. 3 Hours.
Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 2016 and ARCH 3143. (Typically offered: Spring)
This course is equivalent to ARCH 3253.

ARCH 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 3743. Furniture Design. 3 Hours.
Design concepts and techniques to acquaint the student with the design of furniture; analysis of function, development of design and construction of small pieces of furniture. (Typically offered: Irregular)

ARCH 4016. Comprehensive Studio. 6 Hours.
Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

ARCH 4023. Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.
Advanced seminars in subjects to special interest to students and faculty. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit. This course is equivalent to ARCH 4023.

ARCH 4026. Comprehensive Studio. 6 Hours.
Continuation of Architectural Design VII. Corequisite: ARCH 4152. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Spring)

ARCH 4116. Architectural Design - Rome. 6 Hours.
Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

ARCH 4126. Architectural Design Latin America. 6 Hours.
Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016 or ARCH 4026. (Typically offered: Summer)

ARCH 4152. Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

ARCH 4152H. Honors Building Systems Integration. 2 Hours.
Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring) This course is equivalent to ARCH 4152.

ARCH 4143. History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IDES 2883. (Typically offered: Fall)

ARCH 4433H. Honors History of Architecture III. 3 Hours.
Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)
This course is equivalent to ARCH 4433.
ARCH 4523. Architectural Theory. 3 Hours.
Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

ARCH 4523H. Honors Architectural Theory. 3 Hours.
Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

This course is equivalent to ARCH 4523.

ARCH 4553. Modern Architecture in Mexico. 3 Hours.
Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester. (Typically offered: Summer)

ARCH 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 4653. Architecture of the City. 3 Hours.
Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 4673. Modern and Contemporary Rome. 3 Hours.
Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

ARCH 4723. Architectural Research Methods. 3 Hours.
Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon architectural inquiry and discourse at a sophisticated level, for instance, in the form of a year-long thesis or independent project. Practical issues of method, such as research skills, literature review, and argument analysis are examined. The classic range of tools for interpreting architecture are surveyed from single-cause explanations (e.g., formalism) to more recent multi-causal theories (e.g., Semiotics, Deconstruction, Post-colonial theory, etc.) for architectural design. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Fall)

ARCH 4843. Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Fall)

This course is equivalent to ARHS 4743.

ARCH 4843H. Honors Medieval Architecture. 3 Hours.
This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4743.

ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4753.

ARCH 4853H. Honors Renaissance and Baroque Architecture. 3 Hours.
Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4753.

ARCH 4863. Saint Peter's and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)

ARCH 4863H. Honors St. Peter's and the Vatican. 3 Hours.
Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)

This course is equivalent to ARCH 4863.

ARCH 4933. Introduction to Historic Preservation. 3 Hours.
Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

ARCH 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943.

ARCH 4943H. Honors Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.
ARCH 5016. Option Studio I. 6 Hours.
Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4026, or ARCH 4116, or ARCH 4126. (Typically offered: Fall) May be repeated for degree credit.

ARCH 5016H. Honors Thesis Project I. 6 Hours.
Degree project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Fall) This course is equivalent to ARCH 5016.

ARCH 5026. Option Studio II. 6 Hours.
Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

ARCH 5026H. Honors Thesis Project II. 6 Hours.
Degree project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Spring) This course is equivalent to ARCH 5026.

ARCH 5314. Architectural Professional Practice. 4 Hours.
Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4026 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

ARCH 5493. History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Fall)

ARCH 5493H. Honors History of Urban Form. 3 Hours.
The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular) This course is equivalent to ARCH 5493.

ARCH 5943. Preservation Design Technology. 3 Hours.
This course prepares students to work with historic structures by providing an introduction to the history and principles of historic and traditional construction systems, including: concepts and techniques for building conservation, historic materials and technologies, identification of treatments, recordation and research, material properties and behavior, and building forensics. Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Irregular)

ARCH 5953. Preservation Practice Field Trip. 3 Hours.
Intensive field study of a domestic or foreign site of significant or precedent-setting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

The Interior Design faculty is composed of well-qualified educators and practitioners who foster an attitude of inquiry and learning based on their individual skills and interests. A professional advisory board supports the program and serves as external critics/jurors. Intellectual development of students is stimulated and leadership qualities enhanced throughout the four-year curriculum. The Interior Design Organization (IDO) and American Society of Interior Designers Student Chapter (ASID) allow for interaction of students with professionals in interior design and allied professions. Both faculty and students participate in professional design association activities.

The studio sequence increases in complexity throughout the curriculum. The rigor of the program requires a significant commitment of time and energy. Students can expect to spend much time independent of studio classes to complete projects.

To promote a broader perspective of design, students are required to participate in a study abroad experience. In addition, both overnight and day field trips are required for studio courses.

Council for Interior Design Accreditation

The Bachelor of Interior Design (B.I.D.) degree is accredited by the Council for Interior Design Accreditation (CIDA). CIDA, an independent, nonprofit accrediting organization, is the sole agency authorized to accredit professional degree programs in interior design. To ensure conformance with educational standards, programs must seek re-accreditation every six years. The program is the oldest accredited interior design program in the state of Arkansas.

The University of Arkansas Fay Jones School of Architecture and Design's department of Interior Design offers the following CIDA-accredited degree program:

- B.I.D. (121 undergraduate credits)

The last accreditation visit for the Interior Design program was conducted in March 2018; the next site visit is spring 2024.

Requirements for B.I.D. in Interior Design

Interior Design Program Admissions

Students are admitted to the first year of the interior design curriculum based on criteria established by the university and by the program. They are evaluated each semester by grades in lecture courses and by grades for performance and progress in the design studio sequence.

Admission to the Professional Program for Interior Design

The interior design program offers prospective students the opportunity to prepare for professional practice or related endeavors. With this opportunity comes a responsibility for demonstrating a commitment to personal growth and success in the professional program.

At the completion of the first year of the interior design curriculum, students will be evaluated for admission into the professional program on the basis of academic performance in the university core and the required interior design and architecture curriculum. Admission is based on available desks and requires a majority vote of a departmental admissions committee. Students admitted to the professional program will continue in the established studio curriculum sequence and are to complete the final three years of design studio at the school. Students with less than a cumulative 2.5 GPA in IDES and ARCH courses will not be admitted to

Interior Design (IDES)

Carl Matthews, Department Head
Vol Walker Hall, room 111
479-575-7599
the professional program. Students who are not admitted are encouraged to consider alternative programs in the school and the university.

Students are encouraged to maximize opportunities that professional and free electives provide for pre-professional development, specialization in areas related to the profession, and/or preparation for graduate education.

**Internship Requirement:** In addition to the requirements listed in the nine-semester degree program, a supervised 200-hour internship experience is required for graduation. The one-credit hour summer internship generally occurs in the summer before the fourth year. Students have been placed in interior design firms, architectural offices, Main Street programs, governmental agencies, hospitality and casino design firms, and a wide range of other allied industries. Geographically, students have completed internships in Los Angeles, San Francisco, Seattle, New York, Las Vegas, Washington, D.C., Denver, Dallas, Chicago, Kansas City, and other major cities in the United States, as well as international locations such as London and Edinburgh.

**Interior Design B.I.D. Nine-Semester Degree Plan**

The Bachelor of Interior Design can be completed in nine semesters that includes a summer internship. The one-credit hour summer internship occurs in the summer before fourth year. The study abroad requirement typically occurs in the summer before third year. University Perspectives (UNIV 1001) does not count towards degree credit. Please see the Fay Jones School of Architecture Advising Center for specific core course requirements and elective options. Go to the state minimum core (p. 96) and the general education (p. 90) requirements for more details.

Professional Elective 3
Year Total: 14 15

Total Units in Sequence: 120

Requirements for Interior Design
As part of the 35-hour State Minimum Core, the department recommends the following:

Social Sciences:
Select 3 hours from the following Economic courses:

- ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
- ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)
- ECON 2143 Basic Economics: Theory and Practice

Select 6 hours from the following:

- ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2003)
- HDFS 1403 Life Span Development
- SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013)
- GEOS 1123 Human Geography (ACTS Equivalency = GEOG 1113)
- PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

Professional Core Requirements (63 hours)

- ARCH 1212 Design Thinking I: Foundations in Technology 2
- ARCH 1222 Design Thinking II: Foundations in History 2
- IDES 1035 Fundamental Design Skills 5
- IDES 1045 Fundamental Design Methodology 5
- IDES 2804 Interior Design Studio III 4
- IDES 2814 Interior Design Studio IV 4
- IDES 3805 Interior Design Studio V 5
- IDES 3815 Interior Design Studio VI 5
- IDES 4805 Interior Design Studio VII 5
- IDES 4815 Interior Design Studio VIII 5
- IDES 2723 Digital Media in Design 3
- IDES 2823 Interior Design Materials and Assemblies 3
- IDES 2883 History of Interior Design 3
- IDES 3833 Building Systems for Interior Design 3
- IDES 3843 Lighting Systems 3
- ARCH 4433 History of Architecture III 3
- IDES 4813 Human Factors for Design 3

Study Abroad Requirement 3

Internship 1

- IDES 4811 Internship for Interior Design

Professional Practice 3

- IDES 4823 Professional Practice for Interior Design

Art Elective 3

Choose 3 hours from the following:

- ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA 2003)
- ARHS 2923 Art History Survey II (ACTS Equivalency = ARTA 2103)

Business Courses 6

Choose 6 hours from the following courses:

- FINN 3003 Personal Financial Management
- FINN 3933 Real Estate Principles
- FINN 4413 Real Estate Appraisal
- FINN 4433 Real Estate Finance and Investment
- MKTG 3433 Introduction to Marketing
- MKTG 3553 Consumer Behavior

Professional Electives 6

Total Hours 120

Academic Policies – Department of Interior Design
The following academic policies, beyond the requirements of the university, are applicable to all students in the Interior Design Program.

1. Successful completion of all IDES coursework requires demonstration of competence as evidenced by achieving a grade of ’C’ or better in those courses. Failure to achieve this minimum standard will require retaking the studio or lecture course.

2. Each student’s progress through the design studio sequence is monitored and governed by the faculty and subject to a Design Review process.

3. Any student receiving an ‘I’ in a design studio must complete all work necessary to receive a grade prior to the first day of the next studio in the student’s prescribed sequence to be eligible to enroll in that studio.

4. Prior to graduation, a student must present a 2.00 cumulative grade point average at this institution in all work attempted including the university state minimum core, electives and in each interior design course.

Design Review Procedure – Department of Interior Design
Design Review is a process initiated by a faculty member, department head, or by a student. The committee composed of interior design faculty may review a student’s design work within a studio course as well as other professional courses. The review process may be used by students to appeal grades and to seek resolution of conflicts with faculty when there are questions of fairness and equity in grading. Grade appeals initiated by students will occur during the week prior to the start of class in the subsequent semester. Petitions for this review must be made through the advising center prior to the scheduled meeting of the Design Review Committee. Grade appeals may be filed as soon as the student receives his or her final grade. In all cases, the student shall exhibit, at the place and time specified by the Design Review Committee, ALL work assigned and time specified by the Design Review Committee. ALL work assigned and attempted for the course in the semester under review. Faculty are required to provide appropriate documentation including, but not limited to, the course syllabus, grading policy, and semester assignments. In the case of an appeal, the appeal will be presented to the entire Interior Design faculty for consideration and may require the students to present their case in person.

The outcome of the Design Review process may include:
1. A recommendation to the faculty member regarding the grade appeal of the student.
2. A requirement for the student to repeat the design studio course or lecture course.
3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) to progress in the program.

**Minor in Interior Design**

All students in the Fay Jones School of Architecture seeking an Interior Design minor are required to complete 17 hours in the following courses or their equivalents:

<table>

**Faculty**

Furlong, Kimberley J., M.Arch. (U. Texas at Austin), B.F.A. (Pratt Institute), Associate Professor, 2013.

Matthews, Carl W., M.S. (Pratt Institute), Professor, 2012.

Webb, Jennifer D., Ph.D. (Oklahoma State University), M.S., B.S. (University of Tennessee), Associate Professor, 1999.

**Courses**

IDES 1003. Basic Course in the Arts: Interior Design Lecture. 3 Hours.
A general introduction to the field and the profession of interior design, as well as increasing the student’s appreciation of the relationship between the enclosing architecture of the space and the interior environment. (Typically offered: Fall and Summer)

IDES 1003H. Honors Basic Course in the Arts: Interior Design Lecture. 3 Hours.
A general introduction to the field and the profession of interior design, as well as increasing the student’s appreciation of the relationship between the enclosing architecture of the space and the interior environment. (Typically offered: Fall and Summer)
This course is equivalent to IDES 1003.

IDES 1035. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Summer)

IDES 1045. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: IDES 1035. (Typically offered: Spring and Summer)

IDES 2723. Digital Media in Design. 3 Hours.
Develops conceptual and practical knowledge of digital techniques on architectural and interior design production. The aim is to provide a foundation in digital modeling, drawings, renderings, and an introduction to digital fabrication. Prerequisite: Interior Design majors only. (Typically offered: Fall)

IDES 2804. Interior Design Studio III. 4 Hours.
An introduction to interior space articulation and the creation of small scale spaces. Components of various presentation methods and formats. Overnight travel requires additional fees. Prerequisite: IDES 1045. (Typically offered: Fall)

IDES 2814. Interior Design Studio IV. 4 Hours.
Studio activities with emphasis on conceptualization, design theory and applications, ideation, programming and computer application. Overnight travel required. Prerequisite: IDES 2804. (Typically offered: Spring)

IDES 2823. Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in interior spaces. (Typically offered: Fall)

IDES 2823H. Honors Interior Design Materials and Assemblies. 3 Hours.
A study of materials, resources and assemblies used in designing interior spaces. (Typically offered: Fall)
This course is equivalent to IDES 2823.

IDES 2883. History of Interior Design. 3 Hours.
Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized. (Typically offered: Spring)

IDES 2883H. Honors History of Interior Design. 3 Hours.
Study of historic interiors and furniture from antiquity through the present day. Identification of interior styles and furniture of these eras is emphasized. (Typically offered: Spring)
This course is equivalent to IDES 2883.

IDES 3805. Interior Design Studio V. 5 Hours.
Emphasis on residential and/or commercial building systems. Continued development of presentation skills including hand and computer-based techniques. Prerequisite: IDES 2814. (Typically offered: Fall)

IDES 3815. Interior Design Studio VI. 5 Hours.
Advanced studio problems involving larger-scale interior spaces and contract documents for public use. Overnight field trip requires additional fees. Prerequisite: IDES 3805. (Typically offered: Spring)

IDES 3833. Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IDES 2814 and IDES 2823. (Typically offered: Fall)

IDES 3833H. Honors Building Systems for Interior Design. 3 Hours.
A survey course of building systems that addresses the design implications of heating/air conditioning/ventilation, plumbing, power, data/voice and telecommunications, fire protection, security, and acoustical systems on building interiors. Performance characteristics and sustainable technologies will be addressed. Prerequisite: IDES 2814 and IDES 2823. (Typically offered: Fall)
This course is equivalent to IDES 3833.

IDES 3843. Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems. (Typically offered: Fall)

IDES 3843H. Honors Lighting Systems. 3 Hours.
Exploration of interior design applications of lighting systems. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to IDES 3843.

IDES 465V. Special Topics. 1-6 Hour.
A focused study of specialized topics in interior design. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
IDES 4805. Interior Design Studio VII. 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge and critical thinking skills with emphasis on research, programming and process. Prerequisite: IDES 3815 and IDES 4823. (Typically offered: Fall) May be repeated for degree credit.

IDES 4811. Internship for Interior Design. 1 Hour.
Supervised work experience and observation of operations/management procedures in approved design, government or service business. Prerequisite: IDES 3815. (Typically offered: Summer)

IDES 4813. Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to the design disciplines. Types of interior spaces, environmental effects on behavior, ergonomics, and design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HDFS 1403 or GEOS 1123. (Typically offered: Spring)

IDES 4813H. Honors Human Factors for Design. 3 Hours.
Emphasis is given to human behavior as applied to interior design. Types of interior spaces, environmental effects on behavior, ergonomics, interior design needs of special groups, and human factors programs are studied. Lecture 3 hours per week. Prerequisite: Completion of any two of the following: ANTH 1023, SOCI 2013, PSYC 2003, HDFS 1403 or GEOS 1123. (Typically offered: Fall)
This course is equivalent to IDES 4813.

IDES 4815. Interior Design Studio VIII. 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge, and critical thinking skills developed in previous design studios, including ideation, programming, construction, and human factors. Prerequisite: IDES 4805. (Typically offered: Spring) May be repeated for degree credit.

IDES 4815H. Honors Interior Design Studio VIII. 5 Hours.
Comprehensive design studio synthesizing design skills, knowledge, and critical thinking skills developed in previous design studios, including ideation, programming, construction, and human factors. Prerequisite: IDES 4805. (Typically offered: Spring)
This course is equivalent to IDES 4815.

IDES 4823. Professional Practice for Interior Design. 3 Hours.
General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IDES 3805. (Typically offered: Fall)

IDES 4823H. Honors Professional Practice for Interior Design. 3 Hours.
General procedures for operating and maintaining an interior design business. Business documentation, communication, professional responsibilities and ethics. Corequisite: IDES 3805. (Typically offered: Fall)
This course is equivalent to IDES 4823.

IDES 485V. Design Tours. 1-3 Hour.
Domestic and international study tours of a variety of design locations that contribute to the body of knowledge. Prerequisite: IDES 2814. (Typically offered: Irregular)

IDES 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)
This course is cross-listed with LARC 4943, ARCH 4943.
LARC 3123  Advanced Design Visualization, Inquiry and Communications
LARC 3724  Ecological Design and Construction: Water and Drainage
LARC 3734  Sustainable Design and Construction: Material and Methods of Assembly
LARC 3933  Cultural Landscape Studies
LARC 4123  Urban Form Studies
LARC 4753  Incremental Sprawl Repair
LARC 5053  Historic Landscape Preservation
LARC 5493  Environmental Land Use Planning
ARCH 1013  Diversity and Design
GEOS 4073  Urban Geography

Interdisciplinary Core  

Total Hours 120

1. A minimum of 120 hours with a 2.00 cumulative grade-point average at this institution both in all work attempted and in course work completed in the Department of Landscape Architecture and the School of Architecture.
2. Although not a requirement in the four-year degree, students are encouraged to participate in the department's summer study abroad program. The course work will count towards professional elective requirements.

Landscape Architectural Studies B.S. Eight-Semester Degree Program
Students wishing to follow the eight-semester degree plan while pursuing a Bachelor of Science in Landscape Architectural Studies should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program.

Minors for Landscape Architectural Studies Students

Landscape Architectural Studies candidates may pursue an academic minor. The minor must be in a field other than the major area, and the students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours, which are dictated by the department of the minor. Students in Landscape Architectural Studies may choose from any recognized minor offered by the University; however, they are encouraged to consider the following fields:

Public Policy, Planning, History, Geography, and Horticulture, and further encouraged to consider cross-disciplinary study in African-American Studies, Anthropology, Art History, Business Administration, Classical Studies, Communication, Computer Sciences, Economics, English, European Studies, Gender Studies, Latin-American Studies, Philosophy, Political Science, Psychology, Sociology and Sustainability.

Although foreign study is not required for candidates in Landscape Architectural Studies, students in the curriculum are encouraged to participate in the School of Architecture's off-campus study abroad programs in Europe, Rome and Latin or Central America.

To take maximum advantage of the opportunities of the four-year degree program, each student in the Landscape Architectural Studies program shall work with the department faculty advisers to develop a program of study emphasizing special interests, to cultivate a specialization related to the field, and to guide preparation for graduate study, if desired.

Minor in Planting Design (for Horticulture majors)

17 Hours Total Required

Required Courses

LARC 2113 Design Visualization, Inquiry and Communications 3
LARC 2714 Ecological Design and Construction: Terrain 4
LARC 3914 Sustainable Design and Construction: Remediation and Plants on Structure 4

Electives

Select two of the following: 6

LARC 1003 Basic Course in the Arts: The American Landscape
LARC 3123 Advanced Design Visualization, Inquiry and Communications
LARC 303V Special Projects
LARC 3413 History of Landscape Architecture I
LARC 3724 Ecological Design and Construction: Water and Drainage
LARC 4413 History of Landscape Architecture II
HORT 4043 Professional Landscape Management
HORT 4603 Practical Landscape Planning

Total Hours 17

Requirements for Urban and Regional Planning Minor

A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three tiers: core courses, tier-one electives and tier-two electives. The minor’s required and elective courses include:

Required Core Courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLSC 4103</td>
<td>Introduction to Urban Planning</td>
<td>3</td>
</tr>
<tr>
<td>LARC 5493</td>
<td>Environmental Land Use Planning</td>
<td>3</td>
</tr>
</tbody>
</table>

Tier-One Electives 6-12

Select 6-12 hours from the following:

- LARC-approved design studio focused on planning (may only count once)
- LARC Advocacy Module focused on planning
- ANTH 5113 Anthropology of the City
- PLSC 4173 Community Development
- PLSC 390V Special Topics
- HDFS 4603 Environmental Sociology
- GEOS 4073 Urban Geography
- PLSC 3253 Urban Politics
- LARC 4753 Incremental Sprawl Repair
- LARC 402V Special Studies
- SOCI 3153 Urban Sociology

Tier-Two Electives (up to six hours of electives may come from the following options)

- LARC 4033 Landscape Architecture Theory
- GEOS 3043 Sustaining Earth
- GEOS 4393 American Public Lands & Policy
- GEOS 4693 Environmental Justice
- LARC 5053 Historic Landscape Preservation
- ANTH 4443 Cultural Resource Management I
- ANTH 4603 Landscape Archaeology
- ENSC 3223 Ecosystems Assessment
- ENSC 3221L Ecosystems Assessment Laboratory
- ENSC 3933 Environmental Ethics
- ENSC 3413 Principles of Environmental Economics
- PLSC 4283 Federalism and Intergovernmental Relations
- ARCH 5493 History of Urban Form
- SCMT 3443 DELIVER: Transportation and Distribution Management

Total Hours 18

Academic Policies

Grade Appeals – Department of Landscape Architecture

Students in the Department of Landscape Architecture may appeal grades in the design studios as well as other professional courses in which it is believed that there are questions of fairness or equity in the application of the published grading policy of the faculty member. Appeals must be made in writing to the department head one week before the first week of the subsequent semester. The appeal will be presented to the entire Landscape Architecture faculty for consideration and may require the students to present their case in person. Outcomes of grade appeals may result in one of the following:
1. A recommendation to the faculty member regarding the grade appeal of the student.

2. A requirement for the student to repeat the design studio course and any co-requisite.

3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.

Faculty

Biehle, Scott, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Clinical Assistant Professor, 2012.

Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, 2011.

Díaz Montemayor, Gabriel, M.L.A. (Auburn University), B.Arch. (Universidad Autónoma de Chihuahua), Assistant Professor, 2019.

McCown, Ken, M.Arch. (University of Illinois at Urbana Champaign), Professor, 2019.

Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, 2008.

Courses

LARC 1003. Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring)

LARC 1003H. Honors Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring)

LARC 1315. Fundamental Design Skills. 5 Hours.
Fundamental design skills: development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Summer)

LARC 1325. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: LARC 1315. (Typically offered: Spring and Summer)

LARC 2113. Design Visualization, Inquiry and Communications. 3 Hours.
Investigation and application of foundational, current and innovative techniques and technologies used in landscape architecture. Field work and other modes of inquiry and seeing are used to study sites. Processes and workflow are learned. Students learn inquiry through technologies, site context investigation, and how to communicate to stakeholders. (Typically offered: Fall)

LARC 2335. Landscape Architecture Design III: Engaging Site, Engaging Place. 5 Hours.
Fundamentals of site inventory, analysis, and assessment. Through measurement, observation, and documentation, students engage with the design of local and regional sites, synthesizing place-based inventorial understanding and experiential response. Students gain an appreciation for both quantifiable and qualitative measurement and observation as creative tools for design development. Corequisite: LARC 2351. Prerequisite: LARC 1325. (Typically offered: Fall)

LARC 2345. Landscape Architecture IV: Collaborating with Site. 5 Hours.
Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335. (Typically offered: Spring)

LARC 2345H. Honors Landscape Architecture IV: Collaborating with Site. 5 Hours.
Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335 and Honors candidacy. (Typically offered: Spring)

This course is equivalent to LARC 2345.

LARC 2351. Advocacy and Theory Module: Engaging Site, Engaging Place. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2335. (Typically offered: Fall)

LARC 2361. Advocacy and Theory Module: Collaborating with Site. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2345. (Typically offered: Spring)

LARC 2371. Advocacy and Theory Module: International Urban Place. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3355. (Typically offered: Summer)

LARC 2714. Ecological Design and Construction: Terrain. 4 Hours.
Introduces students to fundamental principles of reading and understanding geomorphology, site systems, and site design. Design tools include grading techniques, earthwork computations, and site-related documentation of natural and built structures. Site-related principles of sustainability are introduced as a framework for solving contemporary site issues. (Typically offered: Fall)
LARC 2914. Sustainable Design and Construction: Plant Communities. 4 Hours.
Introduces plants as components of healthy ecosystems, to innovative and sustainable plants and planting strategies as design frameworks, and to planting as powerful design tool. Soils as building block of healthy designs, foundation identification of woody plants and plant taxonomy, and fundamental concepts of time--ephemerality, phenology, and phenomenology. (Typically offered: Spring)

LARC 303V. Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. (Typically offered: Irregular) May be repeated for degree credit.

LARC 303VH. Honors Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. Prerequisite: Honors candidacy. (Typically offered: Irregular) This course is equivalent to LARC 303V.

LARC 3123. Advanced Design Visualization, Inquiry and Communications. 3 Hours.
Students learn the applications of current communication techniques and technologies in landscape architecture to discover implications through inquiry. Field work and other modes of investigation and seeing are used around urbanization and large scale landscapes in design inquiry. Students learn how to communicate the implications of design to broad stakeholders. (Typically offered: Spring)

LARC 3355. Landscape Architecture Design V: International Urban Place. 5 Hours.
Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution with a detailed design component. Studio and lecture. Corequisite: LARC 2371. Prerequisite: LARC 2345. (Typically offered: Summer)

LARC 3365. Landscape Architecture Design VI: Engaging Communities; Understanding Culture. 5 Hours.
Students engage in design projects working for and/or with a particular population, including forming partnerships with a variety of stakeholders. The studio emphasizes empathy and understanding of competing value systems. Students apply a new cultural understanding to design projects. Corequisite: LARC 3381. Prerequisite: LARC 3355. (Typically offered: Fall)

LARC 3375. Landscape Architecture Design VII: Collaborating with Communities. 5 Hours.
Investigation and application of an issues-based, service-learning, community design project, focusing on resiliency and forming partnerships with a variety of stakeholders. Students engage in design as a means for influencing and negotiating on behalf of a community partner. Corequisite: LARC 3391. (Typically offered: Spring)

LARC 3381. Advocacy and Theory Module: Engaging Communities; Understanding Culture. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3365. (Typically offered: Fall)

LARC 3391. Advocacy and Theory Module: Collaborating with Communities. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3375. (Typically offered: Spring)

LARC 3413. History of Landscape Architecture I. 3 Hours.
Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteenth century. (Typically offered: Fall)

LARC 3413H. Honors History of Landscape Architecture I. 3 Hours.
Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteenth century. Prerequisite: Honors candidacy. (Typically offered: Fall) This course is equivalent to LARC 3413.

LARC 3724. Ecological Design and Construction: Water and Drainage. 4 Hours.
Introduces water-related issues as encountered and addressed by landscape architects. Students will understand, apply, and design infrastructure such as retention/detention ponds, bioswales, and constructed wetlands. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 2714. (Typically offered: Fall)

LARC 3724H. Honors Landscape Construction II. 4 Hours.
Introduction to landscape architectural materials and methods of construction and assembly. Emphasis on material properties and how those properties affect the materials use in the landscape and interactions with other materials. Introduction to dimensioning and layout systems and parking requirements with increased complexity of construction documents. Lecture and laboratory. Prerequisite: Honors candidacy. (Typically offered: Fall) This course is equivalent to LARC 3724.

LARC 3734. Sustainable Design and Construction: Material and Methods of Assembly. 4 Hours.
Introduces students to issues in material selection including properties, construction techniques, practical considerations in material use and subsequent implications and effects on the built environment. Material use and human experience are also explored. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 3724. (Typically offered: Spring)

LARC 3734H. Honors Landscape Architecture Construction III. 4 Hours.
(Structures) Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drawing production. Lecture and laboratory. Prerequisite: LARC 3724 and Honors candidacy. (Typically offered: Spring) This course is equivalent to LARC 3734.

LARC 3914. Sustainable Design and Construction: Remediation and Plants on Structure. 4 Hours.
Introduces particular strategies and techniques of plant use in the built environment. Potential topics include green infrastructure, site, soil, and water remediation techniques, and structural considerations of planting on structure. (Typically offered: Fall)

LARC 3914H. Honors Planting Design I. 4 Hours.
Introduction to small scale projects involving use of plant materials in relation to other landscape elements, formulation of a vocabulary of plant materials and preparation of integrated planting plans and applicable specifications. Includes laboratory. Prerequisite: HORT 3103 and Honors candidacy. (Typically offered: Fall) This course is equivalent to LARC 3914.

LARC 3933. Cultural Landscape Studies. 3 Hours.
The examination of landscape forms, and their historic and evolutionary development. Includes study of cultural, political, and site context influences. Prerequisite: LARC 3413. (Typically offered: Irregular)
LARC 402V. Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.

LARC 402VH. Honors Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.

This course is equivalent to LARC 402V.

LARC 4033. Landscape Architecture Theory. 3 Hours.
Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Summer)

LARC 4033H. Honors Landscape Architecture Theory. 3 Hours.
Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Fall)

This course is equivalent to LARC 4033.

LARC 4123. Urban Form Studies. 3 Hours.
The examination of urban, village, and suburban form and its influencing forces. Includes study of cultural forces, technological developments, and physical shape, scale, and materials that define urban areas. Required field trip component of study abroad. Prerequisite: LARC 3413. (Typically offered: Summer)

LARC 4311. Advocacy and Theory Module: Capstone. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4385. (Typically offered: Fall)

LARC 4321. Advocacy and Theory Module: Comprehensive. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4395. (Typically offered: Spring)

LARC 4385. Landscape Architecture Design VIII: Capstone. 5 Hours.
Topic based, service learning studio that blends faculty research interests with student initiative and the potential for collaboration. This studio builds on the broad foundation of previous coursework while developing a design specialization through which students can advocate for both the profession and the communities they serve. Corequisite: LARC 4311. (Typically offered: Fall)

LARC 4395. Landscape Architecture Design IX: Comprehensive. 5 Hours.
Summative studio that requires the student to demonstrate landscape architectural design competency through a multiscalar approach that utilizes various resolutions to address critical, multidimensional problems. Corequisite: LARC 4321. (Typically offered: Spring)

LARC 4413. History of Landscape Architecture II. 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities. (Typically offered: Spring)

LARC 4413H. Honors History of Landscape Architecture II. 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities. Prerequisite: Honors candidacy. (Typically offered: Spring)

This course is equivalent to LARC 4413.

LARC 4523H. Landscape Architecture Honors Thesis. 3 Hours.
Development and production of an honors thesis proposal and thesis. Required for all landscape architecture honors students. Prerequisite: Honors standing. (Typically offered: Irregular)

LARC 4714. Landscape Architecture Construction IV. 4 Hours.
(Systems) Introduction to systems of landscape architectural construction including stormwater management, lighting, irrigation, water features, and erosion control. Emphasis on an advanced grading and landform manipulation skills, and stormwater system design and calculations. Significant integration of computer generated drawings. Lecture and laboratory. Prerequisite: LARC 2714. (Typically offered: Fall)

LARC 4753. Incremental Sprawl Repair. 3 Hours.
Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval. (Typically offered: Irregular)

This course is equivalent to LARC 4753.

LARC 4811. Landscape Architecture Interns. 1 Hour.
Supervised work experience and observation of operations and management procedures in approved design, government, or non-profit organization. Exposure to a wide range of job tasks and project types. Students apply what they learn to their studies. Summative outcomes include reflection. Prerequisite: LARC 3375. (Typically offered: Summer)

LARC 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with IDES 4943, ARCH 4943.

LARC 4943H. Honors Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.
LARC 5053. Historic Landscape Preservation. 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413. (Typically offered: Irregular)

LARC 5053H. Honors Historic Landscape Preservation. 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413 and Honors candidacy. (Typically offered: Irregular)

This course is equivalent to LARC 5053.

LARC 5493. Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. (Typically offered: Spring)

LARC 5493H. Honors Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. (Typically offered: Spring)

This course is equivalent to LARC 5493.

LARC 5613. Landscape Architectural Professional Practice. 3 Hours.
Review of professional and disciplinary responsibilities and related aspects (including health, safety, and welfare issues) of private, public and non-profit landscape architectural practice. (Typically offered: Fall)

Landscape Architecture (LARC)

Ken McCown
Department Head
Vol Walker Hall
479-575-4907

Department of Landscape Architecture Website (http://architecture.ark.edu/academics/landscape-architecture/)

The Department of Landscape Architecture offers two degrees, the Bachelor of Landscape Architecture and the Bachelor of Landscape Studies. The department also participates in the administration of the planning and planting design minors on campus. With sustainability administered through the Fay Jones School, these degrees and minors offer a robust package to develop the tools and acumen necessary to have an impact on making sustainable and resilient places for people and the planet.

The Department of Landscape Architecture focuses on design and advocacy. The faculty in our department believe in the power of design and want to help our students and stakeholders become effective advocates to make positive and lasting change as collaborators and leaders.

The Bachelor of Landscape Architecture prepares students to practice landscape architecture as licensed professionals. Landscape Architecture is the sustainability profession, with practitioners providing meaningful solutions to such pressing topics as, climate change and resilience, clean water and air, health wellness and aging, and habitat and loss of it due to cataclysmic events such as wildfire.

The practice of landscape architecture ranges across the geographic spectrum from urban to suburban, rural and ecosystems. Landscape architects appropriately use systems thinking in the planning and design of systems, and design thinking at many scales, including of course to make spaces and places people inhabit outside. Planning and analysis projects for systems include habitat and conservation, watersheds, and infrastructure such as food and agriculture, energy, and transportation.

Design thinking enables landscape architects to create parks, plazas, greenways, community gardens, green alleyways, green roofs and walls, and innovative and natural stormwater treatment in urban sites and places.

Sustainable and resilient landscapes for residential areas are also a part of practice, ranging from high-density urban housing to rural landscapes.

Cultural landscapes and historic, designed sites are also in the domain of landscape architectural practice. These represent an important body of work for practitioners. From the broad list above, opportunities are legion to use planning, design and design thinking to make better places for all.

The Bachelor of Science in Landscape Architectural Studies serves students who are interested in the design disciplines, but not professional practice. This four-year program suits students who seek careers in allied planning and design disciplines, including urban and regional planning, historic preservation, environmental law, and architectural history. This degree is an excellent foundation for other students looking forward to graduate education in professions such as architecture, landscape architecture, geography, and urban and regional planning.

Landscape Architecture – Landscape Architectural Accreditation Board

The Landscape Architecture Accreditation Board (LAAB) is the sole agency authorized to accredit U.S. professional degree programs in Landscape Architecture. LAAB recognizes the Bachelor of Landscape Architecture, Bachelor of Science in Landscape Architecture, and Masters of Landscape Architecture. It accredits each program every six years, evaluating degree of conformance with established education standards.

The University of Arkansas Fay Jones School of Architecture and Design's department of landscape architecture offers the following LAAB-accredited degree program:

- B.L.A. (142 undergraduate credits)

The next accreditation visit for the B.L.A. program is 2022.

Bachelor of Landscape Architecture Degree

Requirements for completion of Bachelor of Landscape Architecture include the state minimum core (p. 96).

As part of the state minimum core, the department recommends the following:

Laboratory Science

Select two of the following natural sciences for a total of eight hours:

<table>
<thead>
<tr>

<td>(ACTS Equivalency = BIOL 1014 Lab)</td>
</tr>
</tbody>
</table>
BIOL 1613 & BIOL 1611L Plant Biology (ACTS Equivalency = BIOL 1034 Lecture) and Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab)

GEOS 1113 & GEOS 1111L1114 Lecture) Physical Geology (ACTS Equivalency = GEOL 1114 Lab) and Physical Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)

Completion of the following Professional Core:

Design and Advocacy Components
LARC 1315 Fundamental Design Skills 5
LARC 1325 Fundamental Design Methodology 5
LARC 2335 Landscape Architecture Design III: Engaging Site, Engaging Place 5
LARC 2351 Advocacy and Theory Module: Engaging Site, Engaging Place 1
LARC 2345 Landscape Architecture IV: Collaborating with Site 5
LARC 2361 Advocacy and Theory Module: Collaborating with Site 1
LARC 3355 Landscape Architecture Design V: International Urban Place 5
LARC 2371 Advocacy and Theory Module: International Urban Place 1
LARC 3365 Landscape Architecture Design VI: Engaging Communities; Understanding Culture 5
LARC 3381 Advocacy and Theory Module: Engaging Communities; Understanding Culture 1
LARC 3375 Landscape Architecture Design VII: Collaborating with Communities 5
LARC 3391 Advocacy and Theory Module: Collaborating with Communities 1
LARC 4385 Landscape Architecture Design VIII: Capstone 5
LARC 4311 Advocacy and Theory Module: Capstone 1
LARC 4395 Landscape Architecture Design IX: Comprehensive 5
LARC 4321 Advocacy and Theory Module: Comprehensive 1

Communications Components
LARC 2113 Design Visualization, Inquiry and Communications 3
LARC 3123 Advanced Design Visualization, Inquiry and Communications 3

Honors students may also substitute up to 6 hours of the following:
LARC 303VH Honors Special Projects

Construction Components
LARC 2714 Ecological Design and Construction: Terrain 4
LARC 2914 Sustainable Design and Construction: Plant Communities 4
LARC 3724 Ecological Design and Construction: Water and Drainage 4
LARC 3734 Sustainable Design and Construction: Material and Methods of Assembly 4
LARC 3914 Sustainable Design and Construction: Remediation and Plants on Structure 4

History and Theory Components
ARCH 1212 Design Thinking I: Foundations in Technology 2
ARCH 1222 Design Thinking II: Foundations in History 2
LARC 3413 History of Landscape Architecture I 3
LARC 4033 Landscape Architecture Theory 3
LARC 4413 History of Landscape Architecture II 3
LARC 4123 Urban Form Studies 3

Practice Components
LARC 4811 Landscape Architecture Interns 1
LARC 5613 Landscape Architectural Professional Practice 3

Free Electives 3

Students are encouraged to take courses outside the Department to broaden their education.

Total Hours 145

1. Candidates seeking graduation shall achieve a minimum of 145 hours and a minimum of a 'C-' in each course within the professional curriculum. The remaining balance of hours shall have a minimum of 2.00 cumulative grade point average. Students must maintain a minimum 2.0 cumulative grade-point average to continue in the studio sequence. Any student receiving a 'D+/-' or below in the professional core shall repeat the course. Any student with a second 'D+/-' or below shall be considered for non-continuance in the program as determined by the department head and faculty. To continue in the professional program, the student must submit a portfolio after their second year for faculty review. Please see section ‘Admission to the Professional Program in Landscape Architecture.’

2. Students in landscape architecture are required to complete the department's summer study abroad program, after their second year.

NOTE: No more than four hours of physical education and/or R.O.T.C. may be counted toward a degree. Courses not acceptable toward degree credit include those of a remedial or orientation nature and whose content are considered to be measurably duplicated elsewhere in the school’s curriculum. University Perspectives (UNIV 1001) does not count towards degree credit.

By following the preceding curriculum, students will meet the state-mandated University Core requirements. They must also meet all other University Requirements (p. 100) for graduation. The department strongly recommends that transfer students present eight hours of laboratory science courses selected from botany, biology, geology, and physical science as part of the state minimum core.

Students admitted to the university with a completed two-year associate of arts or associate of science degree from an Arkansas state-supported two-year or four-year college or university will receive credit for general education (core) requirements in accordance with ACT 182. All students also must complete any lower division discipline specific courses required for the major as well as all courses required to comply with the conditions of accreditation.

Grade Appeals – Department of Landscape Architecture

Students in the Department of Landscape Architecture may appeal grades in the design studios as well as other professional courses in which it is believed that there are questions of fairness or equity in the application of the published grading policy of the faculty member. Appeals must be
made in writing to the department head one week before the first week of the subsequent semester. The appeal will be presented to the entire Landscape Architecture faculty for consideration and may require the students to present their case in person. Outcomes of grade appeals may result in one of the following:

1. A recommendation to the faculty member regarding the grade appeal of the student.

2. A requirement for the student to repeat the design studio course and any co-requisite.

3. A recommendation for enrollment in the subsequent studio course, while advising the student of the need to achieve and maintain a cumulative 2.00 (in the studio sequence) for admission to the professional program.

**Professional Licensure Degree Requirement**

The School’s Bachelor of Landscape Architecture program is accredited by LAAB, which requires that specific criteria be met in a professional program. This five-year professional program gives its graduates the required prerequisite degree to qualify to take the licensing exam and prepares them for practice.

All fifty states require licensure for landscape architects. The primary purpose of this licensure is to “protect the health, safety, and welfare of the public.” Most states require that candidates possess an accredited degree in landscape architecture and complete a period of professional experience, working with a licensed landscape architect. Once these requirements are complete, candidates must pass a national, uniform exam, sometimes with additional sections unique to that state.

**Landscape Architecture B.L.A. Ten-Semester Degree Program**

The professional program for a Bachelor of Landscape Architecture Degree must be completed in 10 semesters of coursework and is not eligible for the Eight-Semester Degree Completion Program. However, the following 10-semester sample plan shows how a first-year student could obtain a Bachelor of Landscape Architecture degree in five years if the student is admitted to the Landscape Architecture Design Studio and subsequently is admitted to the professional program.

Total Units in Sequence: 145

Minor in Planting Design (for Horticulture majors)
17 Hours Total Required

LARC 2113 Design Visualization, Inquiry and Communications 3
LARC 2714 Ecological Design and Construction: Terrain 4
LARC 3914 Sustainable Design and Construction: Remediation and Plants on Structure 4

Electives
Select two of the following: 6
- LARC 1003 Basic Course in the Arts: The American Landscape
- LARC 3123 Advanced Design Visualization, Inquiry and Communications
- LARC 303V Special Projects
- LARC 3413 History of Landscape Architecture I
- LARC 3724 Ecological Design and Construction: Water and Drainage
- LARC 4413 History of Landscape Architecture II
- HORT 4043 Professional Landscape Management
- HORT 4603 Practical Landscape Planning

Total Hours 17

Requirements for Urban and Regional Planning Minor
A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three tiers: core courses, tier-one electives and tier-two electives. The minor’s required and elective courses include:

Required Core Courses:
- PLSC 4103 Introduction to Urban Planning 3
- LARC 5493 Environmental Land Use Planning 3

Tier-One Electives 6-12
Select 6-12 hours from the following:
- LARC-approved design studio focused on planning (may only count once)
- LARC Advocacy Module focused on planning
- ANTH 5113 Anthropology of the City
- PLSC 4173 Community Development
- PLSC 390V Special Topics
- HDFS 4603 Environmental Sociology
- GEOS 4073 Urban Geography
- PLSC 4253 Urban Politics
- LARC 4753 Incremental Sprawl Repair
- LARC 402V Special Studies
- SOCI 3153 Urban Sociology

Tier-Two Electives (up to six hours of electives may come from the following options) 0-6
- LARC 4033 Landscape Architecture Theory
- GEOS 3043 Sustaining Earth
- GEOS 4393 American Public Lands & Policy
- GEOS 4693 Environmental Justice
- LARC 5053 Historic Landscape Preservation
- ANTH 4443 Cultural Resource Management I
- ANTH 4603 Landscape Archaeology

Minor in Planting Design (for Horticulture majors)
Professional Licensure Degree Requirement
The School's Bachelor of Landscape Architecture program is accredited by LAAB, which requires that specific criteria be met in a professional program. This five-year professional program gives its graduates the required prerequisite degree to qualify to take the licensing exam and prepares them for practice.

All fifty states require licensure for landscape architects. The primary purpose of this licensure is to "protect the health, safety, and welfare of the public." Most states require that candidates possess an accredited degree in landscape architecture and complete a period of professional experience, working with a licensed landscape architect. Once these requirements are complete, candidates must pass a national, uniform exam, sometimes with additional sections unique to that state.

Faculty
Biehle, Scott, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Clinical Assistant Professor, 2012.
Billig, Noah Scott, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, 2011.
Diaz Montemayor, Gabriel, M.L.A. (Auburn University), B.Arch. (Universidad Autónoma de Chihuahua), Assistant Professor, 2019.
McCown, Ken, M.Arch. (University of Illinois at Urbana Champaign), Professor, 2019.
Smith, Carl Alan, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, 2008.

Courses
LARC 1003. Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring)

LARC 1003H. Honors Basic Course in the Arts: The American Landscape. 3 Hours.
Mankind's changing attitudes toward urban and rural outdoor spaces and their aesthetic and cultural values. The origins of the environmental/conservation movement and the development of an American land ethic. Appreciation of the relationship of the natural and historic landscape to the arts and the aesthetic importance of open space. (Typically offered: Fall and Spring)

LARC 1315. Fundamental Design Skills. 5 Hours.
Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Summer)

LARC 1325. Fundamental Design Methodology. 5 Hours.
Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: LARC 1315. (Typically offered: Spring and Summer)

LARC 2113. Design Visualization, Inquiry and Communications. 3 Hours.
Investigation and application of foundational, current and innovative techniques and technologies used in landscape architecture. Field work and other modes of inquiry and seeing are used to study sites. Processes and workflow are learned. Students learn inquiry through technologies, site context investigation, and how to communicate to stakeholders. (Typically offered: Fall)

LARC 2335. Landscape Architecture Design III: Engaging Site, Engaging Place. 5 Hours.
Fundamentals of site inventory, analysis, and assessment. Through measurement, observation, and documentation, students engage with the design of local and regional sites, synthesizing place-based inventorial understanding and experiential response. Students gain an appreciation for both quantifiable and qualitative measurement and observation as creative tools for design development. Corequisite: LARC 2351. Prerequisite: LARC 1325. (Typically offered: Fall)

LARC 2345. Landscape Architecture IV: Collaborating with Site. 5 Hours.
Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335. (Typically offered: Spring)

LARC 2345H. Honors Landscape Architecture IV: Collaborating with Site. 5 Hours.
Students consider an increased complexity of landscape issues and multi-purpose design strategies within a local or regional context, while simultaneously responding to external programmatic requirements. Instructor-guided design projects reinforce the value of site exploration and enumeration. The design process is enriched through programmatic and service requirements, stakeholder collaboration, and reflection on design implication. Corequisite: LARC 2351. Prerequisite: LARC 2335 and Honors candidacy. (Typically offered: Spring)
This course is equivalent to LARC 2345.

LARC 2351. Advocacy and Theory Module: Engaging Site, Engaging Place. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2335. (Typically offered: Fall)

LARC 2361. Advocacy and Theory Module: Collaborating with Site. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 2345. (Typically offered: Spring)
LARC 2714. Ecological Design and Construction: Terrain. 4 Hours.
Introduces students to fundamental principles of reading and understanding geomorphology, site systems, and site design. Design tools include grading techniques, earthwork computations, and site-related documentation of natural and built structures. Site-related principles of sustainability are introduced as a framework for solving contemporary site issues. (Typically offered: Fall)

LARC 2914. Sustainable Design and Construction: Plant Communities. 4 Hours.
Introduces plants as components of healthy ecosystems, to innovative and sustainable plants and planting strategies as design frameworks, and to planting as powerful design tool. Soils as building block of healthy designs, foundation identification of woody plants and plant taxonomy, and fundamental concepts of time–ephemerality, phenology, and phenomenology. (Typically offered: Spring)

LARC 303V. Special Projects. 1-6 Hours.
Design implementation, study, practicum, and preparation of working drawings. (Typically offered: Irregular) May be repeated for degree credit.

LARC 303VH. Honors Special Projects. 1-6 Hour.
Design implementation, study, practicum, and preparation of working drawings. Prerequisite: Honors candidacy. (Typically offered: Irregular) This course is equivalent to LARC 303V.

LARC 3123. Advanced Design Visualization, Inquiry and Communications. 3 Hours.
Students learn the applications of current communication techniques and technologies in landscape architecture to discover implications through inquiry. Field work and other modes of investigation and seeing are used around urbanization and large scale landscapes in design inquiry. Students learn how to communicate the implications of design to broad stakeholders. (Typically offered: Spring)

LARC 3355. Landscape Architecture Design V: International Urban Place. 5 Hours.
Investigation of social behavior as applied to program and design that serves human needs. Projects reflect increased scope, scale, and resolution with a detailed design component. Studio and lecture. Corequisite: LARC 2731. Prerequisite: LARC 2345. (Typically offered: Summer)

LARC 3356. Landscape Architecture Design VI: Engaging Communities; Understanding Culture. 5 Hours.
Students engage in design projects working for and/or with a particular population, including forming partnerships with a variety of stakeholders. The studio emphasizes empathy and understanding of competing value systems. Students apply a new cultural understanding to design projects. Corequisite: LARC 3381. Prerequisite: LARC 3355. (Typically offered: Fall)

LARC 3375. Landscape Architecture Design VII: Collaborating with Communities. 5 Hours.
Investigation and application of an issues-based, service-learning, community design project, focusing on resiliency and forming partnerships with a variety of stakeholders. Students engage in design as a means for influencing and negotiating on behalf of a community partner. Corequisite: LARC 3391. (Typically offered: Spring)

LARC 3381. Advocacy and Theory Module: Engaging Communities; Understanding Culture. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3365. (Typically offered: Fall)

LARC 3391. Advocacy and Theory Module: Collaborating with Communities. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 3365. (Typically offered: Spring)

LARC 3413. History of Landscape Architecture I. 3 Hours.
Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteenth century. (Typically offered: Fall)

LARC 3413H. Honors History of Landscape Architecture I. 3 Hours.
Analysis of the interaction between landscapes and human cultural development as reflected in the meaning, organization, and impact of design and planning at garden and community scales from the Neolithic period through the eighteenth century. Prerequisite: Honors candidacy. (Typically offered: Fall) This course is equivalent to LARC 3413.

LARC 3724. Ecological Design and Construction: Water and Drainage. 4 Hours.
Introduces water-related issues as encountered and addressed by landscape architects. Students will understand, apply, and design infrastructure such as retention/detention ponds, bioswales, and constructed wetlands. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 2714. (Typically offered: Fall)

LARC 3724H. Honors Landscape Construction II. 4 Hours.
Introduction to landscape architectural materials and methods of construction and assembly. Emphasis on material properties and how those properties affect the materials use in the landscape and interactions with other materials. Introduction to dimensioning and layout systems and parking requirements with increased complexity of construction documents. Lecture and laboratory. Prerequisite: Honors candidacy. (Typically offered: Fall) This course is equivalent to LARC 3724.

LARC 3734. Sustainable Design and Construction: Material and Methods of Assembly. 4 Hours.
Introduces students to issues in material selection including properties, construction techniques, practical considerations in material use and subsequent implications and effects on the built environment. Material use and human experience are also explored. Technical documentation methods as a means of conveying design intent are included. Prerequisite: LARC 3724. (Typically offered: Spring)

LARC 3734H. Honors Landscape Architecture Construction III. 4 Hours.
(Structures) Introduction into the design and fabrication methods of structures in the landscape. Emphasis on statics in calculating sizes and selection of materials for free-standing and retaining walls, and wooden structures. Advanced technical drawing component and computer integration of drawing production. Lecture and laboratory. Prerequisite: LARC 3724 and Honors candidacy. (Typically offered: Spring) This course is equivalent to LARC 3734.
LARC 3914. Sustainable Design and Construction: Remediation and Plants on Structure. 4 Hours.
Introduces particular strategies and techniques of plant use in the built environment. Potential topics include green infrastructure, site, soil, and water remediation techniques, and structural considerations of planting on structure. (Typically offered: Fall)

LARC 3914H. Honors Planting Design I. 4 Hours.
Introduction to small scale projects involving use of plant materials in relation to other landscape elements, formulation of a vocabulary of plant materials and preparation of integrated planting plans and applicable specifications. Includes laboratory. Prerequisite: HORT 3103 and Honors candidacy. (Typically offered: Fall)
This course is equivalent to LARC 3914.

LARC 3933. Cultural Landscape Studies. 3 Hours.
The examination of landscape forms, and their historic and evolutionary development. Includes study of cultural, political, and site context influences. Prerequisite: LARC 3413. (Typically offered: Irregular)

LARC 402V. Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.

LARC 402VH. Honors Special Studies. 1-6 Hour.
Individual or group study and practicum involving landscape design, planning and management, history and environmental analysis. (Typically offered: Irregular) May be repeated for degree credit.
This course is equivalent to LARC 402V.

LARC 4033. Landscape Architecture Theory. 3 Hours.
Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Summer)

LARC 4033H. Honors Landscape Architecture Theory. 3 Hours.
Examination of historic and current theories in landscape architecture and planning to develop critical judgement. Seminar format includes readings and case studies in issues such as social and environmental justice. Prerequisite: LARC 3413 and LARC 4413 or instructor consent. (Typically offered: Fall)
This course is equivalent to LARC 4033.

LARC 4123. Urban Form Studies. 3 Hours.
The examination of urban, village, and suburban form and its influencing forces. Includes study of cultural forces, technological developments, and physical shape, scale, and materials that define urban areas. Required field trip component of study abroad. Prerequisite: LARC 3413. (Typically offered: Summer)

LARC 4311. Advocacy and Theory Module: Capstone. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4385. (Typically offered: Fall)

LARC 4321. Advocacy and Theory Module: Comprehensive. 1 Hour.
Students explore theories and history and their implementation to increase understanding of concurrent design studio topics. Students develop advocacy capacities through communication, collaboration and skills through workshops, readings, stakeholder engagement and discussions. Students form rationales for design and personal disposition, while gaining knowledge to advocate for the profession and discipline. Corequisite: LARC 4395. (Typically offered: Spring)

LARC 4385. Landscape Architecture Design VIII: Capstone. 5 Hours.
Topic based, service learning studio that blends faculty research interests with student initiative and the potential for collaboration. This studio builds on the broad foundation of previous coursework while developing a design specialization through which students can advocate for both the profession and the communities they serve. Corequisite: LARC 4311. (Typically offered: Fall)

LARC 4395. Landscape Architecture Design IX: Comprehensive. 5 Hours.
Summative studio that requires the student to demonstrate landscape architectural design competency through a multiscalar approach that utilizes various resolutions to address critical, multidimensional problems. Corequisite: LARC 4321. (Typically offered: Spring)

LARC 4413. History of Landscape Architecture II. 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities. (Typically offered: Spring)

LARC 4413H. Honors History of Landscape Architecture II. 3 Hours.
Critical study and analysis of landscape architecture from nineteenth century to the present, with an emphasis on the philosophies, design and planning theories, and social conditions that have influenced the form of gardens, parks, and cities. Prerequisite: Honors candidacy. (Typically offered: Spring)
This course is equivalent to LARC 4413.

LARC 4523H. Landscape Architecture Honors Thesis. 3 Hours.
Development and production of an honors thesis proposal and thesis. Required for all landscape architecture honors students. Prerequisite: Honors standing. (Typically offered: Irregular)

LARC 4714. Landscape Architecture Construction IV. 4 Hours.
(Systems) Introduction to systems of landscape architectural construction including stormwater management, lighting, irrigation, water features, and erosion control. Emphasis on an advanced grading and landform manipulation skills, and stormwater system design and calculations. Significant integration of computer generated drawings. Lecture and laboratory. Prerequisite: LARC 2714. (Typically offered: Fall)

LARC 4753. Incremental Sprawl Repair. 3 Hours.
Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval. (Typically offered: Irregular)

LARC 4753H. Honors Incremental Sprawl Repair. 3 Hours.
Exploration of the causes, manifestation and results of suburban sprawl on the built environment. Design and planning strategies linked to landscape, urbanism, policy, transportation, resource-conservation, ecology, and social structures are proposed. Emphasis is placed on combining traditional and cutting edge methods for repairing sprawled cities and regions. Prerequisite: 4th or 5th year student or instructor approval. (Typically offered: Irregular)
This course is equivalent to LARC 4753.

LARC 4811. Landscape Architecture Interns. 1 Hour.
Supervised work experience and observation of operations and management procedures in approved design, government, or non-profit organization. Exposure to a wide range of job tasks and project types. Students apply what they learn to their studies. Summative outcomes include reflection. Prerequisite: LARC 3375. (Typically offered: Summer)
LARC 4943. Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)
This course is cross-listed with IDES 4943, ARCH 4943.

LARC 4943H. Honors Perspectives on Historic Preservation. 3 Hours.
Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)
This course is cross-listed with LARC 4943, IDES 4943, ARHC 4943.

LARC 5053. Historic Landscape Preservation. 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413. (Typically offered: Irregular)

LARC 5053H. Honors Historic Landscape Preservation. 3 Hours.
Survey of historic preservation as a profession and the emerging cultural landscape preservation movement. Introduction to preservation principles as described by the Secretary of the Interiors Standards and Guidelines. Analysis of case studies will reinforce basic philosophies and introduce preservation approaches. Prerequisite: LARC 3413 and LARC 4413 and Honors candidacy. (Typically offered: Irregular)
This course is equivalent to LARC 5053.

LARC 5493. Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. (Typically offered: Spring)

LARC 5493H. Honors Environmental Land Use Planning. 3 Hours.
Investigation of the relationship between development, stewardship and land use on the city and regional scales. Natural resource systems, public policies, regional economics, and social contexts are investigated as informers of environmental planning and design decisions. Prerequisite: Junior standing or instructor approval. (Typically offered: Spring)
This course is equivalent to LARC 5493.

LARC 5613. Landscape Architectural Professional Practice. 3 Hours.
Review of professional and disciplinary responsibilities and related aspects (including health, safety, and welfare issues) of private, public and non-profit landscape architectural practice. (Typically offered: Fall)

Urban and Regional Planning (PLAN)
Noah Billig
Director of Planning Minor
Department of Landscape Architecture
Fay Jones School of Architecture and Design
Vol Walker Hall, room 304
nsbillig@uark.edu

The Landscape Architecture and Political Science departments collaboratively offer an interdisciplinary minor in Urban and Regional Planning for students interested in critical and complex urban and sustainability issues. The minor incorporates discussion of policy, design, and advocacy as shapers of, among others, resilience and justice, infrastructure and mobility, or community engagement.

Requirements for Urban and Regional Planning Minor
A student who is interested in the Urban and Regional Planning minor should notify either the Departments of Landscape Architecture or Political Science and consult with their academic advisor. The minor consists of 18 hours of required and elective courses and subdivided into three tiers: core courses, tier-one electives and tier-two electives. The minor’s required and elective courses include:

Required Core Courses:
- PLSC 4103 Introduction to Urban Planning 3
- LARC 5493 Environmental Land Use Planning 3

Tier-One Electives 6-12
Select 6-12 hours from the following:
- LARC-approved design studio focused on planning (may only count once)
- LARC Advocacy Module focused on planning
- ANTH 5113 Anthropology of the City
- PLSC 4173 Community Development
- PLSC 390V Special Topics
- HDFS 4603 Environmental Sociology
- GEOS 4073 Urban Geography
- PLSC 3253 Urban Politics
- LARC 4753 Incremental Sprawl Repair
- LARC 402V Special Studies
- SOCI 3153 Urban Sociology

Tier-Two Electives (up to six hours of electives may come from the following options) 0-6
- LARC 4033 Landscape Architecture Theory
- GEOS 3043 Sustaining Earth
- GEOS 4393 American Public Lands & Policy
- GEOS 4693 Environmental Justice
- LARC 5053 Historic Landscape Preservation
- ANTH 4443 Cultural Resource Management I
- ANTH 4603 Landscape Archaeology
- ENSC 3223 Ecosystems Assessment
- ENSC 3221L Ecosystems Assessment Laboratory
- ENSC 3933 Environmental Ethics
- ENSC 3413 Principles of Environmental Economics
- PLSC 4283 Federalism and Intergovernmental Relations
- ARCH 5493 History of Urban Form
- SCMT 3443 DELIVER: Transportation and Distribution Management

Total Hours 18

Sustainability (SUST)
David G. Hyatt
Coordinator of Academic Sustainability
The program in sustainability offers an interdisciplinary minor in sustainability available to students from all majors at the university. The minor is accessible to all undergraduate students, regardless of degree program. The purpose of the minor in Sustainability is to provide foundational knowledge and skills related to the emerging discipline of sustainability, organized around four thematic areas reflecting strength in scholarship of University of Arkansas academic colleges: Sustainability of Social Systems, Sustainability of Natural Systems, Sustainability of Built Systems, and Sustainability of Managed Systems. Students who complete the minor in Sustainability will be expected to:

- Articulate commonly accepted definitions of sustainability and discuss various nuances among those definitions;
- Have an understanding of the interdisciplinary nature of sustainability issues, particularly as they pertain to the thematic areas of knowledge addressed by the minor (sustainability of natural systems, sustainability of managed systems, sustainability of built systems, and sustainability of human social systems);
- Be conversant regarding acquisition and analysis of data pertinent to sustainability issues;
- Communicate orally and in writing organized thoughts defining sustainability issues;
- Identify appropriate potential strategies to address sustainability issues using data and provide results of rudimentary analyses of data using novel metrics or statistics;
- Make recommendations, based on data analysis and interpretation, to advance sustainability of individuals or institutions.

The program also offers a graduate certificate in sustainability (p. 1571) through the Graduate School.

**Required Courses for a Minor in Sustainability**

Students must earn a grade of ‘C’ or better for all courses used to fulfill requirements of the minor in Sustainability.

</tbody>
</table>

Elective courses are categorized as Tier 1 and Tier 2. Tier 1 courses are those with dominant sustainability content or fundamental principles related to understanding sustainability. Tier 1 courses must comprise at least 6 hours of the 9 elective hours. Tier 2 courses are those with subordinate sustainability content or associated principles related to understanding sustainability, but with content useful in preparing students with prerequisite knowledge for Tier 1 courses. Only 3 hours of Tier 2 courses will be accepted in fulfillment of the elective hours in the Minor in Sustainability.

Complete lists of Tier 1 and Tier 2 courses by thematic areas are presented below.

**Total Hours 18**

**List of Available Elective Courses:** Students choose 9 hours from menus provided on the Sustainability website (http://sustainability.uark.edu/academics/minor/minor-courses.php); at least six hours must be chosen from Tier 1 courses (with prerequisites, if applicable).

**Capstone Experience**

All students participating in the minor in Sustainability must complete a capstone experience focused on service learning, research learning, or internship in sustainability. Student engagement in community service, research, or relevant work on sustainability through a summer internship provides opportunities for students to apply sustainability theories and principles learned from prior coursework toward advancing sustainability across society.

Students may formally petition the University of Arkansas Sustainability Curriculum Steering Committee to substitute sustainability-oriented senior design projects, Honors College research projects, other service learning courses, or equivalent internship experiences for SUST 4103 to satisfy the capstone element of minor in Sustainability. Details of the procedure to substitute alternative experiences for SUST 4103 can be found in the Foundations of Sustainability Program Handbook.

To qualify for SUST 4103 or other sustainability capstone experience, students must have successfully completed SUST 1103, SUST 2103, and 6 hours of elective course work toward the minor in Sustainability.

**Courses**

**SUST 1103. Foundations of Sustainability. 3 Hours.**

Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students’ own disciplines. (Typically offered: Spring)

**SUST 1103H. Honors Foundations of Sustainability. 3 Hours.**

Foundations of Sustainability is an interdisciplinary course to introduce concepts and theories of sustainability at global, regional, and local levels. Emphasis is on four thematic areas of sustainability; social, natural, built and managed systems. The aim is to increase environmental literacy for engagement of sustainability into students’ own disciplines. Corequisite: Drill component. (Typically offered: Spring)

This course is equivalent to SUST 1103.
and opposing the landmark 1954 ruling of Brown v. Board of Education, controversial and complex. Along with signing the Southern Manifesto 1939-41 – all prior to serving as a U.S. Senator for many years.

J. William Fulbright was a University of Arkansas student who graduated Fulbright College of Arts and Sciences. He went on to study at Oxford and the London School of Economics, received his Ph.D. in 1941, and taught at the University of Arkansas from 1941 to 1961. He also served as the University of Arkansas's 5th president from 1961 to 1965.

This course is equivalent to GEOS 4693.

This course is cross-listed with HDFS 4603, SOCI 4603.

This course provides a social perspective on environmental issues. It examines the linkage between society, ecological systems, and the physical environment. It provides conceptual framework(s) for analyzing environmental issues, considers the role of humans in environmental issues, and enhances understanding of the complexity of the relationship between societal organization and environmental change. Prerequisite: Junior or senior standing. (Typically offered: Fall)

This course is cross-listed with HDFS 4603, SOCI 4603.

This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)

This course is equivalent to GEOS 4693.

The Fulbright College of Arts and Sciences enriches lives by promoting discovery, diversity, and inclusion, facilitating transformational experiences, and fostering peace through education.

Facilities and Resources
Academic Advising Services
The Fulbright College of Arts and Sciences provides an adviser for each student enrolled in the college. Freshman- and sophomore-level students, including departmental honors students, are advised in the Fulbright College Advising Center in Old Main 518. All four-year honors undeclared major students and all freshman-level four-year honors declared major students receive advising from the Fulbright Honors Program office in Old Main 517. Advisers in the Fulbright College Advising Center will assist students in program planning and will help them to become aware of and familiar with the academic offerings of the university. Students should consult their advisers on a regular basis, not limited to registration matters but including all areas of their academic careers. Personnel in the Fulbright College Advising Center or the Dean’s office will direct students to the appropriate advising office.

Students should discuss with their advisers opportunities for individual variations as well as regular course requirements. Programs and facilities of particular interest to individuals may include the Honors Program, programs for advanced placement and credit by examination, study abroad and the services of the University Career Development Center.
The Career Development Center administers and interprets tests that measure individual ability, interest, and achievement, and thus may aid also in counseling students about the field of study in which they are most likely to be effective and successful.

For questions regarding advising, contact the Fulbright College Advising Center at 575-3307 or visit online at http://fcac.uark.edu.

Degrees Offered

The J. William Fulbright College of Arts and Sciences offers four-year curricula leading to the degrees of Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B.M.), and Bachelor of Social Work (B.S.W.). Each candidate for the B.A. and B.S. degrees selects a major field for specialized study. In addition to usual departmental majors there are interdepartmental majors and special programs for students preparing for professional degrees in law, medicine, dentistry, and teaching.

College Scholarships

Foremost among scholarships available in the J. William Fulbright College of Arts and Sciences is the Sturgis Fellowship. This scholarship enables Fulbright College to offer outstanding graduates of secondary and preparatory schools undergraduate fellowships valued at $50,000 for four collegiate years.

Students studying in the humanities or classics may qualify for the J. William and Elizabeth W. Fulbright Scholarship for study abroad. This award is for students who are at least juniors and is intended to support a year of study abroad.

The King Fahd Center for Middle East Studies offers two-year undergraduate scholarships for superior students interested in pursuing the study of the Middle East or Islam.

In addition, students may compete for a number of privately endowed scholarships, which are awarded on a competitive basis to those who qualify. Application for these general Fulbright College scholarships and awards is made through the Office of the Dean, 525 Old Main. Students may obtain more detailed information about the above-named scholarships and other Fulbright College scholarships at http://fulbright.uark.edu/scholarships/index.php (http://fulbright.uark.edu/scholarships/).

Other scholarships are available from the departments of Fulbright College. Information may be sought from the departmental chair of the student’s major.

Student Organizations

There are many general-interest societies and organizations to which students may belong, and nearly every department of the university maintains an honor society through which high scholarship is rewarded. Students in Fulbright College may aspire to membership in the following organizations:

- Alpha Chi Sigma (chemistry)
- Alpha Epsilon Delta (pre-medical, medical technology, pre-dental)
- Alpha Kappa Delta (sociology)
- Alpha Phi Sigma (criminal justice)
- Alpha Psi Omega (drama)
- American Association of Petroleum Geologists (geoscience)
- American Chemical Society (chemistry)
- American Society for Photogrammetry and Remote Sensing (geoscience)
- Delta Phi Alpha (German)
- Eta Sigma Phi (Greek and Latin)
- Gamma Theta Upsilon (geography)
- Kappa Kappa Psi (band, men)
- Kappa Tau Alpha (journalism)
- Lambda Alpha (anthropology)
- Lambda Pi Eta (communication)
- Lambda Tau (writers)
- Omicron Delta Epsilon (economics)
- Phi Alpha (social work)
- Phi Alpha Theta (history)
- Phi Beta Delta (international scholarship)
- Phi Beta Kappa (arts and sciences)
- Phi Kappa Phi
- Phi Mu Alpha (music, men)
- Pi Kappa Delta (forensics)
- Pi Mu Epsilon (mathematics)
- Pi Sigma Alpha (political science)
- Psi Chi (psychology)
- Sigma Alpha Iota (music, women)
- Sigma Delta Pi (Spanish)
- Sigma Gamma Epsilon (geology)
- Sigma Pi Sigma (physics)
- Tau Beta Sigma (band, women)

College Academic Regulations

Courses of study in the Fulbright College of Arts and Sciences are designed to give students the comprehensive view of society that the modern world requires. Students who enroll in Fulbright College, or who elect some of its courses, have an opportunity to gain a broad cultural education, which is a part of intelligent living and, at the same time, to prepare for professions or to acquire technical training in the sciences. The college has two major teaching functions: to provide basic general education in the arts and sciences necessary to all persons for effective participation in the complex world in which we live; and, second, to furnish the student an opportunity to specialize in the field of the student’s choice.

To implement the first of these aims and to furnish a broad base for the accomplishment of the second, the faculty of Fulbright College has adopted the requirements listed below for each degree.

Specific course requirements may be fulfilled in one of four ways:

1. Establishing credit in approved courses:
   a. By enrolling in and completing the required work in the course,
   b. By examination (credit will be entered as CR on a student's record as explained in Advanced-Standing Programs (p. 83)),
   c. By advanced achievement, i.e., by satisfactory completion of a more advanced course of a sequence. For example, students who earn a grade of “C” or better in a third-semester foreign language course may be granted credit for the second semester course upon recommendation of the Department of World Languages, Literatures, and Cultures, and approval by the Dean of the college. (This does not apply to work taken as a self-paced online [correspondence] course or in transfer.)
2. Gaining exemption by examination. Announced exemption examinations are routinely offered in several courses. Students may consult any department or the dean’s office concerning exemption examinations.

3. Advanced placement by examination. A student who is granted advanced placement may elect to substitute a more advanced course for the listed required course.

4. Transfer credit. Students presenting transfer credit in lieu of stated requirements may be asked to present official course descriptions, etc. Transfer work with grades of “D” or “F” will not be accepted.

Degree Completion Program Policy

Graduation Requirements

In addition to the specific course requirements for the degree plan and major, be aware that there are general graduation requirements that every student in Fulbright College must complete.

1. Minimum Total Semester Hour Requirement

   B.A., B.S. and B.S.W. Degrees: 120 hours
   B.M.: 120 hours
   B.F.A.: 120 - 123 hours

2. Residency Requirement

   a. University Residency (Enrollment) Requirement
      Students must earn a minimum of 30 semester hours at the University of Arkansas, Fayetteville campus – this includes UA faculty-led study abroad classes, online/on-campus classes, and Global Campus courses; and all other courses paid towards Fayetteville campus tuition and fees. These 30 semester hours are to be upper-division semester hours required for the completion of a degree program. Additional hours in residence can be required for completing a minor. Hours earned in another school or college at UA, Fayetteville, may be used to satisfy this requirement with approval of appropriate faculty curriculum committee.
   b. College Residency Requirement and 24 Hour Rule
      A student graduating from Fulbright College must have completed at least 30 hours of credit in courses offered by Fulbright College, at least 24 of which must be 3000 and 4000 level courses from departments in Fulbright College.
   c. Major/Minor Residency Requirement (50 Percent Rule)
      A student graduating with a major or a minor from Fulbright College must have completed a minimum of 50 percent of degree credit work within the Fulbright College major or within the Fulbright College minor at the University of Arkansas through courses completed at the University of Arkansas, Fayetteville campus as defined in the University Residency Requirement. This percentage completion requirement may be higher for some majors and minors. Students should review individual departmental requirements to verify if a higher percentage is required by their specific major or minor department.

3. 40-Hour Rule

   Students must present for degree credit at least 40 hours of work in courses numbered 3000 and above. Included in these 40 hours can be courses numbered 2000 if each has a specific course designated as a prerequisite. It is highly recommended that students complete all 40 hours in courses numbered 3000 and higher. These courses may be taken from other colleges or universities as long as the college residency requirement and the 24-hour rule are satisfied.

4. Grade-Point Average

   Students graduating from Fulbright College must have a minimum cumulative GPA of 2.00.

5. Writing Requirement

   Students graduating from Fulbright College must write a research/analytical paper for at least one upper-division course in his or her major. Each department has determined its own procedures for certifying completion of this requirement. Questions should be referred to the departmental chairperson. A student may choose to write a senior thesis in a major area of study. The thesis may be accorded up to six hours of credit. Defense of the thesis before a committee is required. Satisfactory completion of an honors project or a senior thesis may be submitted to meet the college writing requirement.

6. Students must complete the stated requirements for a Fulbright College major in addition to all university requirements for graduation, including the University Core requirements.

Questions concerning fulfilling the requirements should be referred to the student’s adviser or to the dean’s office, which will maintain current lists of approved courses, experimental offerings approved to fulfill requirements for a specified period of time, examination schedules, and other options available to the student.

Graduation with Distinction

Students who have not completed a Fulbright college or departmental honors degree program but have otherwise demonstrated academic excellence in baccalaureate degree programs in the J. William Fulbright College of Arts and Sciences will be recognized at graduation by the designation of “with high distinction” or “with highest distinction.” To earn this designation, the student must meet the following criteria upon degree completion:

1. The student must have completed at least one-half of his or her degree work at the University of Arkansas.
2. For “with high distinction,” the student must achieve a cumulative U of A GPA of 3.8 to 3.899.
3. For “with highest distinction,” the student must achieve a cumulative U of A GPA of 3.9 or higher.

The criteria may be evaluated and changed periodically by the Fulbright College of Arts and Sciences.

Combined Academic and Medical or Dental Degree

Fulbright College offers a Bachelor of Science degree in medical science or medical science (dentistry). A student may substitute the first year of regular medical or dental work taken in any standard, approved medical or dental school for 33 hours of the 120 hours required for the Bachelor of Science degree provided that the following requirements are met:

1. Completion of all university/state core requirements for a B.S. degree, as appropriate, prior to student’s entrance in medical or dental school.
2. Completion of a minimum of 12 hours of courses numbered above 3000 taken in Fulbright College.
3. Completion of at least 30 hours immediately prior to student’s entrance in medical or dental school in residence in Fulbright College.
Students interested in this degree should consult with their adviser or with the Fulbright College dean’s office early in their program. Formal application for the degree should be made to the Registrar.

This program is for highly qualified students with outstanding academic records who may be eligible for early admission to medical school or dental school programs. The year of a medical or dental study substitutes for the major in the B.S. degree program.

Graduate Studies
The Graduate School, in cooperation with the faculty of Fulbright College of Arts and Sciences, offers work leading to the graduate certificate or to the degrees of Master of Arts, Master of Science, Master of Fine Arts, Master of Public Administration, Master of Social Work, and Doctor of Philosophy.

Students interested in any of these advanced degrees should consult the Graduate School Catalog or the Dean of the Graduate School.

Accreditations
The American Council on Education in Journalism and Mass Communications has accredited the Bachelor of Arts (B.A.) degree program in journalism. The Bachelor of Arts (B.A.), Bachelor of Music (B.M.), and Master of Music (M.M.) degree programs in the Department of Music are accredited by the National Association of Schools of Music. The Doctor of Philosophy (Ph.D.) degree program in clinical psychology is accredited by the American Psychological Association. The Bachelor of Social Work (B.S.W.) degree and the Master of Social Work (M.S.W.) degree are accredited by the Council on Social Work Education.

E-mail: fulbright@uark.edu

After majors and minors are listed, other programs of study, such as pre-professional programs are listed.

Majors and Minors

Majors
- Advertising and Public Relations (p. 285)
- Anthropology (p. 296)
- Art (Studio Art) (p. 302)
- Art History (p. 302)
- Biology (p. 323)
- Chemistry (p. 334)
- Classical Studies (p. 348)
- Communication (p. 351)
- Criminology (p. 357)
- Data Science (p. 109)
- Earth Science (p. 380)
- Economics (p. 386) (Bachelor of Arts)
- English (p. 392)
- French (p. 572)
- Geography (p. 405)
- Geology (p. 412)
- German (p. 572)
- Graphic Design (p. 422)
- History (p. 424)
- Interdisciplinary Studies (p. 437)
- International and Global Studies (p. 438)
- Journalism (p. 446)
- Mathematics (p. 463)
- Music (p. 478)
- Philosophy (p. 514)
- Physics (p. 517)
- Political Science (p. 537)
- Psychology (p. 547)
- Social Work (p. 552)
- Sociology (p. 559)
- Spanish (p. 572)
- Theatre (p. 565)

Second (or dependent) Majors
A second (or dependent) major is one that a student may pursue as a major if the student is already pursuing a first major that is authorized to be given independently.
- African and African American Studies (p. 292)
- Asian Studies (p. 322)
- Latin American and Latino Studies (p. 461)
- Middle East Studies (p. 476)

Minors
Academic minors in approved degree programs are options available to students in the Fulbright College of Arts and Sciences. The minor must be in a field other than the major, and students must notify the department of their intention to minor. An academic minor ordinarily consists of 15-18 hours. Specific requirements for the minor are given in the section entitled Departments, Majors, and Minors. Minors may be chosen from the following fields:
• African and African American Studies
• Anthropology
• Arabic
• Art History
• Asian Studies
• Biology
• Business
• Chemistry
• Child Advocacy Studies Training
• Chinese (Business Orientation)
• Classical Studies
• Communication
• Criminal Justice
• East Asian History and Politics
• Economics
• English
• French
• Gender Studies
• Geography
• Geology
• German
• Global Studies
• Historic Preservation
• History
• Indigenous Studies
• Italian
• Japanese (Business Orientation)
• Jewish Studies
• Journalism
• Latin American and Latino Studies
• Legal Studies
• Mathematics
• Medical Humanities
• Medieval and Renaissance Studies
• Middle East Studies
• Music
• Philosophy
• Physics
• Political Science
• Psychology
• Religious Studies
• Social Work
• Sociology
• Southern Studies
• Spanish
• Statistics
• Theatre

Fulbright College also recognizes all official minors offered by sister colleges at the University of Arkansas. Students wishing to have such minors made a part of their transcript must notify the Fulbright College dean’s office (MAIN 525) no later than when degree application is made.

Other Programs

Undergraduate Preparation for Professional Programs

The Fulbright College of Arts and Sciences offers comprehensive support for students pursuing a wide array of professional and graduate programs. Because undergraduate preparation for these programs requires diligent planning, students should contact the Advising Center or appropriate faculty advisor as soon as possible. The Fulbright College Advising Center is in Old Main 518 and can be reached at 479-575-3307 or fcac@uark.edu. Supported programs include (but are not limited to) the following:

• Dentistry
• Law
• Medicine
• Optometry
• Pharmacy

Pre-Dental Program: All dental schools require a minimum of three years of college work, and most schools give preference to applicants who have completed a baccalaureate degree. The minimum requirements for admission to most dental schools can be met at the University of Arkansas by completing the following courses:

<table>
<thead>

CLEP and AP credit is not accepted. Dental schools have a variety of additional course requirements and pre-dental students should check each school’s website.
Mathematics is not a general requirement, but students are expected to have a background equivalent to college algebra and trigonometry.

Students who complete a minimum of 90 hours of work may qualify for the combined degree program provided that they complete the requirements for graduation in Fulbright College of Arts and Sciences.

All dental schools require the Dental Admissions Test. It is suggested that applicants take the DAT one year prior to the time they plan to enter dental school. A student planning a career in dentistry should contact Dr. J.C. Rose, Department of Anthropology, 479-575-2508.

**Pre-Law Program:** While there is no prescribed pre-law curriculum, Fulbright College offers a minor in legal studies administered through the department of political science. Students considering a career in law may consult the School of Law Catalog or the Fulbright College Advising Center for information concerning certain categories of courses that may be helpful to the study and practice of law. Students uncertain about a major degree program should contact the Fulbright College Advising Center.

A baccalaureate degree is required for admission to the University of Arkansas School of Law, except for those students in the Fulbright College of Arts and Sciences who are admitted to the special six-year program referred to in the paragraph immediately following. All applicants for admission are required to take the Law School Admission Test. (See page 281.)

The University of Arkansas School of Law at Fayetteville and the Fulbright College of Arts and Sciences jointly administer a six-year program whereby highly qualified students may earn both the bachelor’s degree and the Juris Doctor degree. Any student enrolled in the J. William Fulbright College of Arts and Sciences during a spring semester shall be permitted to matriculate in the School of Law in the following fall semester if the admission complies with Section 1 of Part A of the law school’s admission policies and if the student meets the following conditions:

1. At least 30 consecutive hours of course work in Fulbright College,
2. At least 94 hours credited toward a bachelor’s degree by Fulbright College,
3. Completion of Fulbright College’s requirements for a major in connection with the bachelor’s degree,
4. A cumulative grade-point average in all college or University course work of at least 3.50, without grade renewal,
5. An LSAT score of at least 159.

A student may substitute law school course work for the remaining total hours required for the bachelor’s degree from Fulbright College. Formal application for the degree should be made to the Registrar. Information about the program may be obtained in the dean’s office or the Fulbright College Advising Center.

**Pre-Medical Program:** Medical schools in general require a minimum of 90 semester hours of college credit exclusive of military science and physical education, and most recommend that the student complete a baccalaureate degree. All medical schools have specific course requirements, and the student should determine those requirements for the school or schools of his or her choice. The minimum requirements for many medical schools can be met by completion of the following courses:

<table>

</tbody>
</table>

Most medical schools will not accept CLEP credit, and in some cases, AP credit for the required courses above is not accepted. Most medical schools will not accept on-line or web-based classes to fulfill requirements.

Additional courses are recommended. Special opportunities and experiences are available to pre-medical students through the Liebolt Premedical Program (http://premed.uark.edu).

Pre-medical students are encouraged to complete the requirements for the B.A. or B.S. degree. As part of these requirements the student must choose a major, but the choice of a major has no direct bearing upon admission to medical school and should reflect the particular interests of the student. If a student is admitted to a medical school prior to completion of the baccalaureate degree requirements, he/she may wish
to take advantage of the combined degree program in medical science. If that program is elected, the student should complete all of the basic university and college requirements for graduation during residence on the UA campus.

Most medical schools require the Medical College Admissions Test (MCAT), which is administered at several testing sites in Arkansas on specific dates from January to September each year. The MCAT normally should be taken in the spring preceding application to medical school. Admission to medical school is highly competitive, and a good grade-point average is demanded. A grade-point average of 3.30 is the minimum likely to receive favorable consideration. A grade of “D” in any course required by the medical school is not considered satisfactory. Advising is available through Dr. Neil Allison, Department of Chemistry and Biochemistry, 479-575-5179, and Dr. Jeanne McLachlin, Department of Biological Sciences, 479-575-5348. Dr. Allison serves as chair of the University of Arkansas Pre-medical Advisory Committee. For information, visit the University of Arkansas pre-medical website at [http://premed.uark.edu](http://premed.uark.edu).

**Pre-Pharmacy Program:** Entrance requirements for pharmacy schools vary; therefore, students should research the schools of their choice to determine specific prerequisite course work. The University of Arkansas for Medical Sciences College of Pharmacy requires 69 hours of pre-professional courses to include: 4 hours of calculus, 9 hours of English/Communication, 16 hours of chemistry, 12 hours of biology, 4 hours of physics, 3 hours of economics, 6 hours of critical thinking/problem solving, and 15 hours of humanities.

Students are advised to begin taking humanities electives during the second semester of their freshman year. Since pharmacy schools have many more applicants than they can accept, the student is urged to earn a grade point average much higher than the minimum of 2.00.

Grades are a major consideration when admission committees evaluate a student’s qualifications for acceptance. The University of Arkansas College of Pharmacy and other pharmacy schools also require applicants to take the Pharmacy College Admission Test (PCAT). This may be taken in November or February. The pre-pharmacy adviser for the University of Arkansas is Lorraine Brewer, Department of Chemistry and Biochemistry, 479-575-3103.

**Honors Program**

Kirstin Erickson  
Director of Honors Studies  
517 Old Main  
479-575-2509  
Fulbright Honors Website ([https://fulbright.uark.edu/honors-program/](https://fulbright.uark.edu/honors-program/))

To create an intellectual environment that challenges the best of students, the Fulbright College of Arts and Sciences provides a comprehensive program of honors studies. This includes the College Honors Program, a four-year interdisciplinary honors program for students of superior academic ability or artistic talent, and the Departmental Honors Program, an honors program emphasizing directed independent study within a department or discipline of the college.

For admission into the Fulbright College Honors Program, an incoming student must have at least a 3.75 high school grade point average and a minimum ACT composite score of 28 or 1310 SAT. A current Fulbright College student must have completed two regular semesters with minimum full-time enrollment of 12 hours per semester on the Fayetteville campus of the University of Arkansas and have earned a cumulative GPA 3.50 or higher. Transfer students who arrive at the University of Arkansas with a 3.50 GPA from their previous institution are welcome to apply for admission to the Fulbright Honors Program after having completed one regular semester with minimum full-time enrollment of 12 hours on the Fayetteville campus of the University of Arkansas campus while retaining a cumulative 3.50 GPA.

A student who successfully completes a program of honors studies within Fulbright College is eligible to receive a baccalaureate degree with the distinction College Scholar *cum laude*, or Departmental Scholar *cum laude* in the major field of study. Higher distinctions of *magna cum laude* or *summa cum laude* may be awarded to outstanding honors students by recommendation of the Fulbright College Honors Council.

To earn the distinction Fulbright College Scholar *cum laude* at graduation, a student must successfully complete the honors core curriculum, maintain a minimum grade-point average of 3.5, and satisfy requirements for departmental honors in the major field of study, including preparation and oral defense of an honors thesis. The Honors Council may award the higher distinctions of *magna cum laude* or *summa cum laude* based upon a student’s total academic performance, including the academic transcript, the quality of the scholarly activity pursued within the major field of study, and the breadth of college study as a whole.

To earn the distinction of Departmental Scholar *cum laude* at graduation, a student must successfully complete requirements prescribed by the major department, including an honors thesis and oral examination, maintain a minimum grade-point average of 3.5, and take 12 hours (which may include six hours of thesis) in honors studies. If a student demonstrates superior academic performance or an exceptionally high level of scholarly activity, the Honors Council may award the distinction of *magna cum laude*. In exceptional instances where truly outstanding work within the major field is coupled with the superior understanding of its relationship to the college work as a whole, the distinction *summa cum laude* may be awarded. The minimum number of honors hours required for each level of distinction must be completed in residence.

**Fulbright Honors Academic Integrity Policy**

All Fulbright Honors students are held to the highest standard with regard to academic achievement and academic integrity. Any student violating the Academic Integrity Policy who receives a sanction of 1.0 or more (two 0.5 sanctions or a one-time sanction of 1.0 or more) at the University of Arkansas will be permanently removed from the Fulbright Honors Program. The student may petition for grade forgiveness and to have the X sanction removed from their transcript. If both are achieved, the student may apply for re-admission into the Fulbright Honors Program. Any student suspended or expelled due to dishonesty will be permanently removed from Honors and will be denied the opportunity to reapply.

For more information about honors studies within Fulbright College, visit the college’s honors website ([https://fulbright.uark.edu/honors-program/](https://fulbright.uark.edu/honors-program/)).

**Degrees with Honors**

The Fulbright College of Arts and Sciences is dedicated to providing students a liberal education in the arts, humanities, and sciences. Such an education should be soundly based, innovative, and enriched by a creative faculty. This is especially true for students with superior academic ability or artistic talent. To achieve these aims, the college faculty has developed and participates in the College Honors Program and the Departmental Honors Program.
Requirements for the College Honors Program: Credit or exemption for state minimum core in English composition, including ENGL 1013 and ENGL 1023, and in American history or American government, completion of the requirements for honors in a department or study area of the college, including preparation and oral defense of an honors thesis, a cumulative grade-point average of 3.5 or above, and completion of the honors core curriculum. Students who do not have at least a 3.5 GPA will not be allowed to graduate with honors.

Requirements for the Departmental Honors Program: Specific academic requirements including course work, participation in departmental honors colloquia or seminars, and independent study projects are established by the faculty of the individual departments or study areas and are approved by the Honors Council. However, all departmental honors students must have a 3.5 cumulative grade-point average, complete and defend an honors thesis, and take 12 hours (which may include six hours of thesis) in Honors Studies. Information concerning these requirements is given within each department’s catalog listings.

The minimum academic requirements of the honors core curriculum for the B.A./B.S.W., B.S., B.M., and B.F.A. degree programs can be found in the degree requirements for each program listed below.

Honors Core Curriculum
Bachelor of Arts or Bachelor of Social Work Degree

Requirements for graduating with honors: Specific academic requirements including course work, participation in departmental honors colloquia or seminars, and independent study projects are established by the faculty of the individual departments or study areas and are approved by the Honors Council. However, all honors students must have a 3.5 cumulative grade-point average, complete and defend an honors thesis, and take 12 hours (which may include six hours of thesis) in Honors Studies. Information concerning these requirements is given within each department’s catalog listings.

The following outlines the minimum academic requirements of the honors core curriculum for the B.A. and B.S.W. degree programs. The university/state minimum core is fulfilled by completing the college honors core.

Honors Core Curriculum
Humanities and Social Sciences Option 1

Core – 27 hours; 15 hours must be at honors level

**Philosophy**

Select one additional Humanities course from the following:

- HUMN 2114H
- HUMN 1124H
- HUMN 1114H

Core – 27 hours; 15 hours must be at honors level

Total Hours 27

**Humanities and Social Sciences Option 2**

Select two of the following:

- ANTH 1023H Honors Introduction to Cultural Anthropology
- COMM 1023H Honors Communication in a Diverse World
- ECON 2013H Honors Principles of Macroeconomics
- ECON 2023H Honors Principles of Microeconomics

Social Sciences

Select two of the following:

- ANTH 1023H Honors Introduction to Cultural Anthropology
- COMM 1023H Honors Communication in a Diverse World
- ECON 2013H Honors Principles of Macroeconomics
- ECON 2023H Honors Principles of Microeconomics
- GEOG 2003H Honors World Regional Geography
- GEOS 2003H Honors World Regional Geography (ACTS Equivalency = GEOG 2003)

**Fine Arts**

Select one of the following:

- ARCH 1003H Honors Basic Course in the Arts: Architecture Lecture
- ARHS 1003H Honors Basic Course in the Arts: Art Lecture
- DANC 1003 Dance Appreciation
- ENGL 2023 Creative Writing I (ACTS Equivalency = ENGL 2023)
- THTR 1003H Honors Basic Course in the Arts: Theatre Appreciation
- THTR 1013 Musical Theatre Appreciation
Biological Sciences

At least 4 hours must be chosen from biological and 4 hours from Natural Sciences (12 hours)

Core – 15-17 hours; 8 hours must be at honors level

Natural Science and Mathematics

Total Hours 27

Students pursuing either option must also complete the following:

English

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 1013H</td>
<td>Honors Composition I</td>
</tr>
<tr>
<td>or ENGL 1013</td>
<td>Composition I (ACTS Equivalency = ENGL 1013)</td>
</tr>

<td>American National Government (ACTS Equivalency = PLSC 2003)</td>
</tr>
</tbody>
</table>

Honors Colloquia – 9 hours from at least two of the three approved areas (humanities, natural sciences/mathematics, social sciences). No more than 3 hours of required colloquia may be earned either abroad or in an intersession.

World Language

0-12

See your adviser. Students must demonstrate proficiency in a single modern or classical language other than English (2013 Intermediate II of a world language). Usually this is accomplished by completing a sequence of world language courses (1003, 1013, 2003, 2013). See Fulbright College Admission Requirements. Students meeting the normal admission standard (two years of high school language) may expect to satisfy this requirement with fewer courses, depending upon placement. In cases of unusually thorough preparation, or in the case of international students, exemption may be sought from the department of world languages.

Natural Science and Mathematics 15-17

Core – 15-17 hours; 8 hours must be at honors level

Natural Sciences (12 hours)

At least 4 hours must be chosen from biological and 4 hours from physical

Biological Sciences

</tbody>
</table>

Honors Colloquia – 9 hours from at least two of the three approved areas (humanities, natural sciences/mathematics, social sciences). No more than 3 hours of required colloquia may be earned either abroad or in an intersession.

### Natural Sciences and Mathematics

**Core – 20-21 hours; 16 hours must be at honors level**

Complete sixteen honors hours from at least two of the five different areas below. At least one class from Area 5 is required, although not necessarily at the Honors level.

#### Natural Sciences

<table>
<thead>
<tr>
<th>Area</th>
<th>16</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR 2003H</td>
<td>Honors Survey of the Universe</td>
</tr>
<tr>
<td>&amp; ASTR 201M</td>
<td>Honors Survey of the Universe Laboratory</td>
</tr>
<tr>
<td>PHYS 2054H</td>
<td>Honors University Physics I (PHYS 2054H(M))</td>
</tr>
<tr>
<td>PHYS 2074H</td>
<td>Honors University Physics II (PHYS 2074H(M))</td>
</tr>
</tbody>
</table>

#### Area 2

| ANTH 1013H | Honors Introduction to Biological Anthropology |
| & ANTH 1011M | Honors Introduction to Biological Anthropology Laboratory |
| BIOL 1543 | Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) |
| & BIOL 1541M | and Honors Principles of Biology Laboratory |
| BIOL 1584 | Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture) |
| BIOL 1603 | Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture) |
| & BIOL 1601L | and Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab) |
| BIOL 1613 | Plant Biology (ACTS Equivalency = BIOL 1034 Lecture) |
| & BIOL 1611L | and Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab) |
| BIOL 2013 | General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) |
| & BIOL 2011M | and Honors General Microbiology Laboratory |

#### Area 3

| CHEM 1103 | University Chemistry I (ACTS Equivalency = CHEM 1114 Lecture) |
| & CHEM 1101L | CHEM 1114 Lecture) |
| & CHEM 1123H | Honors University Chemistry II |
| & CHEM 1121M | Honors University Chemistry II Laboratory |
| CHEM 1203 | Chemistry for Majors I |
| & CHEM 1201L | Chemistry for Majors I Laboratory |
| CHEM 1223 | Chemistry for Majors II |
| & CHEM 1221L | Chemistry for Majors II Laboratory |
| CHEM 3603H | Honors Organic Chemistry I |
| & CHEM 3602A | Honors Organic Chemistry I Laboratory |
| CHEM 3703 | Organic Chemistry I Lecture for Chemistry Majors |
| & CHEM 3702L | Organic Chemistry I Lab for Chemistry Majors |
| CHEM 3613H | Honors Organic Chemistry II |
| & CHEM 3612 & CHEM 3612L | Honors Organic Chemistry II Laboratory |
| CHEM 3713 | Organic Chemistry II Lecture for Chemistry Majors |
| & CHEM 3712L | Organic Chemistry II Lab for Chemistry Majors |

### Area 4

| GEOS 1113H | Honors Physical Geology |
| & GEOS 1111M | Honors Physical Geology Laboratory |
| GEOS 1133 | Earth Science (ACTS Equivalency = GEOL 1124) |
| & GEOS 1131L | Lecture |
| & GEOL 1124 | Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab) |

### Mathematics

| MATH 2445 | Calculus I with Review (ACTS Equivalency = MATH 2405) |
| MATH 2554H | Honors Calculus I |
| or MATH 2554Calculus I (ACTS Equivalency = MATH 2405) |
| MATH 2564H | Honors Calculus II |
| or MATH 2564Calculus II (ACTS Equivalency = MATH 2505) |
| MATH 2574H | Honors Calculus III |
| or MATH 2574Calculus III (ACTS Equivalency = MATH 2603) |

### World Language: (depending upon placement)

See your adviser. Students must demonstrate proficiency in a single modern or classical language other than English (2003 Intermediate I of a world language). Usually this is accomplished by completing a sequence of courses (1003, 1013, and 2003). See Fulbright College Admission Requirements. Students meeting the normal admission standard (two years of high school language) may expect to satisfy this requirement with fewer courses, depending upon placement. In cases of unusually thorough preparation, or in the case of international students, exemption may be sought from the department of world languages.

Total Hours 38-48

1. This science course is applied as honors credit for Fulbright College Honors.

### Bachelor of Music Degree

Requirements for graduating with honors: Specific academic requirements including course work, participation in departmental honors colloquia or seminars, and independent study projects are established by the faculty of the individual departments or study areas and are approved by the Honors Council.

All honors students must have a 3.5 cumulative grade-point average, complete and defend an honors thesis, and take 12 hours (which may include six hours of thesis) in Honors Studies. Information concerning these requirements is given within each department’s catalog listings.

The following outlines the minimum academic requirements of the honors core curriculum for the B.F.A. degree program. The university/state minimum core is fulfilled by completing the college honors core.

### Honors Core Curriculum

#### Humanities Option 1

<table>

School of Journalism and Strategic Media Website (https://fulbright.uark.edu/departments/journalism/)

The B.A. in Advertising and Public Relations provides students with knowledge of the history, theory, practice, and ethics of the advertising, public relations and journalism fields, and educates students in advertising, public relations and journalistic skills. Advertising and public relations majors learn the theories and skills of how to create persuasive messages in mass, digital and social media, how to ensure those messages reach the right audience, and how to communicate persuasive messages in a socially responsible way.

Requirements for B.A. in Advertising and Public Relations

University and College Requirements: In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met. Bolded courses from the course list below may be applied to portions of the state minimum core (p. 96) requirements.

State Minimum Core 35
Select one of the following: 3

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 2033</td>
<td>Mathematical Thought</td>
</tr>
<tr>
<td>MATH 2043</td>
<td>Survey of Calculus (ACTS Equivalency = MATH 2203)</td>
</tr>
<tr>
<td>MATH 2053</td>
<td>Finite Mathematics</td>
</tr>
<tr>
<td>MATH 2183</td>
<td>Mathematical Reasoning in a Quantitative World</td>
</tr>
<tr>
<td>STAT 2303</td>
<td>Principles of Statistics (ACTS Equivalency = MATH 2103)</td>
</tr>
</tbody>
</table>

or a higher level math.

World language up to the Intermediate I level (2000-level) 9
Select one of the following: 3

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>WLIT 1113</td>
<td>World Literature: Beginnings to 1650 CE (ACTS Equivalency = ENGL 2113)</td>
</tr>
<tr>
<td>WLIT 1123</td>
<td>World Literature: 1650CE to Present (ACTS Equivalency = ENGL 2123)</td>
</tr>
</tbody>
</table>

An advanced literature course

A language literature course

Select one of the following: 3

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL 2003</td>
<td>Introduction to Philosophy (ACTS Equivalency = PHIL 1103)</td>
</tr>
<tr>
<td>PHIL 2103</td>
<td>Introduction to Ethics (ACTS Equivalency = PHIL 1003)</td>
</tr>
</tbody>
</table>
Any philosophy (PHIL) course at the 3000-level or higher (recommended: PHIL 3103 Ethics and the Professions)

A second PLSC course (the following are recommended options): 3

PLSC 2813 Introduction to International Relations and Global Studies
PLSC 3233 The American Congress
PLSC 4233 The American Chief Executive

ECON 2143 Basic Economics: Theory and Practice 3

COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003) 3

Any HIST course 3000-level or higher 3

Cultural/Diversity Requirement 3

Choose a course in cultural/diversity studies from the following options:

ANTH 4533 Middle East Cultures
COMM 4343 Intercultural Communication
HIST 3233 African American History to 1877
HIST 3243 African American History Since 1877
HIST 3263 History of the American Indian
JOUR 3263 African Americans in Film
JOUR 4923 History of the Black Press
SCWK 3193 Human Diversity and Social Work
SOCI 3193 Race, Class, Gender, and Sexuality

Other cultural/diversity courses as approved by the School of Journalism and Strategic Media.

Journalism and Strategic Media Core 16

All majors and minors must complete the Grammar, Spelling and Punctuation (GSP) requirement as a prerequisite or corequisite to JOUR 1033 Media Writing by completing one of these two options: 1) Pass JOUR 1003 Journalistic Writing Skills with a grade of C or better; or 2) Pass JOUR 1100 Grammar Spelling Punctuation Requirement with a Satisfactory (S) grade by scoring a 75% or better on the GSP test that is administered through the class. Once you officially declare a Journalism major or minor, you will obtain access to the GSP Blackboard course for Option 2. Students who do not complete both the GSP requirement and JOUR 1033 with a C or better cannot enroll in any courses for which JOUR 1033 is a prerequisite. The GSP test is only administered a certain number of times each semester. Students must request a GSP test time a minimum of two weeks before they plan to take the test. There is no guarantee that GSP testing slots will be open when desired, so students must schedule well in advance.

A minimum grade of ‘C’ is required in all journalism courses that serve as prerequisites for advanced journalism and advertising/public relations courses. In certain courses a minimum grade of ‘B’ is required.

JOUR 1023 Media and Society
JOUR 1033 Media Writing
JOUR 3633 Media Law
JOUR 4333 Ethics in Journalism
JOUR 4981 Journalism Writing Requirement

Journalism Digital Requirement: JOUR 2053 Multimedia Journalism, JOUR 2063 Media Graphics and Technology, or JOUR 405V Specialized Journalism Seminar with the subtopic ‘Videography/Editing’ or ‘Digital Content Strategy.’

Advertising/Public Relations Courses

Students must have a cumulative GPA of 2.5 or higher to enroll in ADPR 3723 and ADPR 3743.

Students are required to earn a grade of “B” or higher in both ADPR 3723 and ADPR 3743 and maintain a cumulative GPA of 2.5 or higher to qualify to take all other 3000-level or higher Advertising/Public Relations courses. Students may retake ADPR 3723 and ADPR 3743 only once to earn a grade of “B” or higher.

ADPR 3723 Advertising Principles 3
ADPR 3743 Public Relations Principles 3
ADPR 4143 Public Relations Writing 3
ADPR 4423 Creative Strategy and Execution 3
ADPR 4453 Media Planning & Strategy 3 or ADPR 4473 Account Planning 3

Six credit hours in JOUR or ADPR courses. It is recommended that one course choice be an internship.

MKTG 3433 Introduction to Marketing 3
MKTG 3553 Consumer Behavior 3
MKTG 3633 Marketing Research 3

Electives

Non-JOUR/ADPR General Electives 3

Total Hours 120

Writing Requirement: Successful completion of JOUR 4981 with a grade of ‘C’ or better satisfies the Fulbright College Writing Requirement for journalism majors.

Advertising and Public Relations B.A. Eight-Semester Plan

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program as well as Fulbright College requirements.

State minimum core (p. 96) requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives. Students should consult with their academic adviser.

First Year

<table>
<thead>

If not completed during sophomore year, then take:
ADPR 3743 Public Relations Principles (must earn a B or better)

If ADPR 3743 is already completed, then choose one ADPR course from below or complete another remaining degree requirement.

ADPR 4143 Public Relations Writing
or ADPR 4423 Creative Strategy and Execution
or ADPR 4453 Media Planning & Strategy
or ADPR 4473 Account Planning

Students need only to complete either ADPR 4453 or ADPR 4473 towards the nine credit hours of the 4000-level ADPR course sequence—not both. If both are completed, then one will count as a JOUR/ADPR elective.

Cultural/diversity requirement or HIST elective

If a HIST course was already completed that satisfies both requirements, then select non-JOUR/ADPR general electives.

Total Units in Sequence: 120

**Requirements for Honors in Journalism and Strategic Media**

The Journalism and Strategic Media Honors Program gives undergraduates a chance to pursue journalistic research in the context of other academic disciplines. Honors candidates carry out independent study and research under the guidance of the journalism faculty and participate in honors classes in journalism and at least one other discipline. Outstanding student achievement will be recognized by the award of distinction “Journalism Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in cases of exceptional achievement and are based on the candidate’s total honors studies program. To be considered for such distinctions, students must earn a minimum cumulative 3.50 grade-point average in journalism.

Journalism School and College Honors students must complete a minimum of 13 hours in honors credits and a thesis. These requirements are specified as follows:

Journalism School and College Honors students must:

1. Enter the program no later than the first semester of their junior year, and register for JOUR 498VH Honors Journalism Writing Requirement beginning with the first semester of the junior year,
2. Take at least 1 credit of JOUR 498VH every fall and spring semester of the junior and senior year,
3. Complete at least one journalism honors colloquium,
4. Complete the journalism honors core research course JOUR 4943H (offered every spring semester only),
5. Complete an approved honors colloquium in a second discipline,
6. Complete and orally defend an honors thesis based on honors courses of study, and
7. Earn an overall cumulative 3.50 grade-point average and a cumulative 3.50 grade-point average in journalism courses.

In addition, journalism majors pursuing college honors must also satisfy all requirements for the Fulbright College Honors Program and the Honors Core Curriculum for a Bachelor of Arts found elsewhere in this catalog.

More specific information on the requirements for honors in Journalism is available from the School of Journalism and Strategic Media Honors adviser.

**Journalism (B.A.) Teacher Licensure Requirements:** Students interested in obtaining teacher licensure may not obtain licensure in journalism alone. Licensure in another discipline must be obtained, and journalism may be added as an additional area of licensure. Please refer to the Secondary Education Requirements for Fulbright College Students (p. 274) or contact your departmental adviser or an adviser in the College of Education and Health Professions.

**Faculty**

**Bostick, David A., Ed.D. (Baker University), M.A. (Fort Hays State University), Teaching Assistant Professor, 2019.**

**Bouchillon, Brandon C., Ph.D. (Texas Tech University), Assistant Professor, 2019.**

**Brown, Lucy M., Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Clinical Assistant Professor, 2013.**
Advertising/Public Relations Courses

ADPR 3723. Advertising Principles. 3 Hours.
Introductory course to the broad field of advertising. Includes a study of the role of advertising in modern society with emphasis being given to the extent and manner of use of advertising in mass media and digital media. Prerequisite: Minimum of 30 credit hours completed, 2.5 cumulative GPA, and completion of JOUR 1033 with a grade of C or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 3743. Public Relations Principles. 3 Hours.
Study of theory, methods, and ethics of public relations in modern society, business, and communications. Influencing opinion through accepted performance and 2-way communication. Prerequisite: Minimum of 30 credit hours completed, 2.5 cumulative GPA, and completion of JOUR 1033 with a grade of C or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4143. Public Relations Writing. 3 Hours.
Instructional and writing practice to develop the professional-level writing skills required of public relations practitioners. Emphasizes different approaches required for different audiences and media. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4423. Creative Strategy and Execution. 3 Hours.
The creation of advertising copy and layout for the mass media with emphasis on strategy, the written message, and the physical appearance for the advertisement. Includes laboratory component. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4453. Media Planning & Strategy. 3 Hours.
Includes the study of media characteristics, market research, media strategies, media analysis, media-market measurements and the development of media plans. Emphasis is placed on the analysis of major mass media and digital strategies, tactics, and planning. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

ADPR 4463. Campaigns. 3 Hours.
Applying advertising principles and techniques to preparation of a complete campaign; determining agency responsibilities, marketing objectives and research, media mix, and creative strategy. Emphasis also given to campaign presentation delivery, utilizing audio and visual techniques. Prerequisite: ADPR 3723 and ADPR 3743, each with a grade of B or better, ADPR major, and 2.5 overall GPA. (Typically offered: Fall and Spring)

ADPR 4473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Minimum of 60 credit hours completed, 2.5 cumulative GPA, ADPR major, and completion of ADPR 3723 and ADPR 3743, each with a grade of B or better; no in-progress credit hours accepted. (Typically offered: Fall and Spring)

This course is cross-listed with AAST 4473.

ADPR 4483. Issues in Advertising and Public Relations. 3 Hours.
Seminar course involving the critical examination of the major cultural, social, political, economic, ethical and persuasion theories and/or issues relevant to advertising and public relations affecting individuals, organizations and societies. Prerequisite: Junior standing. (Typically offered: Fall)

Journalism Courses

JOUR 1003. Journalistic Writing Skills. 3 Hours.
Provides a functional approach to improving language and writing skills specific to journalistic writing. Covers introductory journalistic writing and correct grammar usage, the logic governing syntax and punctuation use, analysis of grammar and syntax, sentence structure, word selection to convey proper meaning, memory aids, and other language topics relevant to journalistic writing. (Typically offered: Fall and Spring)

JOUR 1023. Media and Society. 3 Hours.
A survey of mass media (newspaper, radio, TV, magazine, advertising, public relations, photography, etc.) which stresses their importance in today’s society and introduces the student to the various areas in journalism. Recommended for students considering journalism as a major. Prerequisite: Journalism major, Journalism minor, or department consent. (Typically offered: Fall and Spring)
JOUR 1033. Media Writing. 3 Hours.
Introduces students to the skills of observation, critical thinking and concise writing required in all aspects of journalism and strategic media, as well as to the technology needed in upper-level courses. A prerequisite to JOUR 2003, JOUR 2013, JOUR 2031L, JOUR 2032, JOUR 2053, JOUR 2063, ADPR 3723 and ADPR 3743. Corequisite: Lab component. Pre- or Corequisite: Complete and pass the GSP or Grammar, Spelling and Punctuation test with a 75% or higher, or complete JOUR 1003 with a grade of C or better. Prerequisite: Journalism major, Journalism minor, or department consent. (Typically offered: Fall, Spring and Summer)

JOUR 2003. Storytelling for Today’s Media. 3 Hours.
Introduction to developing content strategies that tell accurate, concise stories across multiple media platforms. Emphasizes clear, effective storytelling in media content production for print, broadcast and digital platforms, including social media, podcasting and video blogging. Integrates lessons on corporate social responsibility, personal branding and media entrepreneurship. Prerequisite: Journalism major, minor, or department consent. (Typically offered: Fall and Spring)

JOUR 2013. News Reporting I. 3 Hours.
Intensive training in the methods of gathering and writing news. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: JOUR 1023 and JOUR 1033, each with a grade of C or better, and completion of the GSP requirement. (Typically offered: Fall and Spring)

JOUR 2031L. Broadcast News Reporting I Laboratory. 1 Hour.
Provides experience in basic broadcast news reporting techniques. Laboratory 3 hours per week. Corequisite: JOUR 2032. Prerequisite: JOUR 1033 with a grade of C or better, and completion of the GSP requirement. (Typically offered: Fall and Spring)

JOUR 2032. Broadcast News Reporting I. 2 Hours.
Intensive training in the methods of gathering and writing broadcast news. Lecture 2 hours per week. Corequisite: JOUR 2031L. Prerequisite: Sophomore standing, JOUR 1033 with a grade of C or better, and completion of the GSP requirement. (Typically offered: Fall and Spring)

JOUR 2053. Multimedia Journalism. 3 Hours.
Provides students with the skills of visual literacy, photo editing, audio processing, video editing and web publishing. Good writing will be emphasized. The course examines basic aesthetic principles in visual composition and techniques applicable to audio, video and web production. Prerequisite: JOUR 1023 and JOUR 1033, each with a grade of C or better, and completion of the GSP requirement. (Typically offered: Fall and Spring)

JOUR 2063. Media Graphics and Technology. 3 Hours.
Introduction to computer skills required in journalism; focuses on training in the major creative software used for generating media graphics and visual communication. Emphasizes content creation and web publishing, including infographics and promotional materials. Prerequisite: Journalism major, minor or department consent. (Typically offered: Fall and Summer)

JOUR 2331L. Photojournalism I Laboratory. 1 Hour.
Photojournalism 1 Lab involves the transfer of images from a digital camera to a computer, and involves the use of image editing and enhancing software as well as layout and design software. Corequisite: JOUR 2332. (Typically offered: Fall)

JOUR 2332. Photo Journalism I. 2 Hours.
Beginning course in the fundamentals of photography, including digital photography, composition, file transfer and management, image enhancement, and layout and design. Corequisite: JOUR 2331L. (Typically offered: Fall)

JOUR 2453. Introduction to Sports Television Production I. 3 Hours.
Introduction to the specialized field of sports television production. Focuses on multi-camera, single-camera and studio production. Studio lab and field work outside of regularly scheduled class time required. (Typically offered: Fall)

JOUR 3013. Editing. 3 Hours.
Theories and practices in newspaper editing, copyreading, headline writing, page layout and the gathering and publication of written and pictorial information. Prerequisite: JOUR 1023 and JOUR 2013, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 3023. News Reporting II. 3 Hours.
Continuation of JOUR 2013. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 3071L. Broadcast News Reporting II Laboratory. 1 Hour.
Continuation of JOUR 2031L. Including advanced skills in broadcast news techniques. Corequisite: JOUR 3072. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 3072. Broadcast News Reporting II. 2 Hours.
Continuation of JOUR 2032. Including advanced methods of gathering and writing broadcast news. Corequisite: JOUR 3071L. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 3083. Photojournalism II. 3 Hours.
Study of news and feature photography. Includes planning and shooting photographs for newspapers and magazines, and instills in the student photojournalistic techniques, and ethical considerations of photographing for publication. Includes producing multimedia presentations and working with audio as well as still images. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: JOUR 2332 and JOUR 2331L, each with a grade of C or better. (Typically offered: Spring)

JOUR 3123. Feature Writing. 3 Hours.
Study of non-fiction newspaper and magazine feature articles with emphasis on locating subjects, and on writing techniques and practice in article writing. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 3163. Sports Journalism. 3 Hours.
Emphasis on techniques and principles of coverage of sports and sports-related subjects on and off the field, and on the relationship between sports and the mass media. (Typically offered: Fall)

JOUR 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular) This course is cross-listed with AAST 3263, ENGL 3263, COMM 3263.

JOUR 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring) This course is cross-listed with AAST 3273, COMM 3273.

JOUR 3453. Sports Television Production II. 3 Hours.
Advanced production techniques in the specialized field of sports television production. Focuses on multi-camera, single-camera and studio production. Studio lab and field work outside of regularly scheduled class time required. Prerequisite: JOUR 2453 with a grade of C or better, or instructor consent. (Typically offered: Irregular)

JOUR 3633. Media Law. 3 Hours.
Constitutional guarantees, statutory laws and court cases applicable to mass communications. Prerequisite: Junior standing. (Typically offered: Fall and Spring)
JOUR 3733. Covering the Courts. 3 Hours.
Explores the mechanics of covering trials and other aspects of legal affairs reporting. Prerequisite: JOUR 3633 with a grade of C or better. (Typically offered: Spring)

JOUR 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as a part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in journalism). (Typically offered: Fall and Spring) May be repeated for degree credit.

JOUR 401V. Advanced Journalistic Practices. 1-4 Hour.
Study of advanced journalistic practices and methods, individual or group projects. Prerequisite: Junior standing and 10 hours of journalism and a 2.5 cumulative grade average. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

JOUR 402V. Internship in Journalism. 1-3 Hour.
Credit for practical experience gained through a journalistic internship. Report required on significant aspect of internship experience. Prerequisite: JOUR major and junior standing and 10 hours JOUR and 2.50 cumulative grade point average. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

JOUR 4033. Advanced Radio News Reporting. 3 Hours.
Intensive training in the production of in-depth, public radio style news stories. Prerequisite: JOUR 2032 and JOUR 2031L, each with a grade of C or better. (Typically offered: Spring)

JOUR 4043. Government and the Media. 3 Hours.
Focuses on the links between mass media and government and the increasingly significant role of media in politics and government. Examines the power, responsibility, and performance of the press and public officials/government agencies in their relationship with each other. Prerequisite: Junior standing. (Typically offered: Fall)

JOUR 405V. Specialized Journalism Seminar. 1-3 Hour.
Primary purpose of course is to enlarge the journalistic skills of students interested in advanced forms of mass communication. Students undertake projects related to particular aspects or problems of journalism. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

JOUR 4063. Computer-Assisted Publishing. 3 Hours.
In-depth, hands-on exploration of computer hardware and software in the design and production of media messages. Examination of developing media technologies and the computer's influence on design and conceptualization. (Typically offered: Irregular)

JOUR 4073. Social Media and Journalism. 3 Hours.
Social Media and Journalism teaches conceptual knowledge and skills to develop news judgment and use changing technological tools to disseminate news quickly and to different audiences. The value of interacting with sources and the audience is stressed as are ethical, legal and accuracy issues. Prerequisite: JOUR 2013 or JOUR 2032 with a grade of C or better. (Typically offered: Fall)

JOUR 4083. Data Journalism. 3 Hours.
An introduction to basic data reporting skills, including how to use data to guide and inform reporting as well as tell stories to better serve the public. Ethical issues and best practices in data reporting are also examined. Prerequisite: Any STAT course or instructor permission. (Typically offered: Fall)

JOUR 4093. Business Journalism. 3 Hours.
Examines how the U.S. economy works and how to find news in business, market and government data sources. Focuses on the role of corporations, financial markets, and regulators, and benefiting students interested in sports, entertainment, political and investigative journalism. (Typically offered: Spring)

JOUR 4333. Ethics in Journalism. 3 Hours.
Critical examination of specific ethical problems confronting professionals in all areas of mass communications. Reading and writing assignments are aimed at familiarizing students with the nature of the mass media and their social responsibilities. Prerequisite: Junior standing. (Typically offered: Fall and Spring)

JOUR 443V. Event Promotion and Execution. 1-3 Hour.
Pacticum for students to plan, design, promote and execute several Journalism Days events, to include the Roy Reed Lecture, a scholarship reception, a job fair, Senior Salute and a fundraiser. Prerequisite: Junior standing. (Typically offered: Spring)

JOUR 4503. Magazine Writing. 3 Hours.
This intensive writing and reporting course is for students with proven feature-writing skills and an interest in the human-interest stories found in such leading magazines as The New Yorker, Esquire, Harper's, the Atlantic, and others. Students will compose magazine-length nonfiction stories on timely subjects under deadline. Stories are submitted for contests and publication, when possible. Prerequisite: JOUR 2013 with a grade of C or better. (Typically offered: Spring)

JOUR 4553. Magazine Editing and Production I. 3 Hours.
Instruction with lab work in editing and producing various types of magazines. Course includes magazine design, selecting and editing stories and photographs, laying out the story and photo pages, and other mechanical processes. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Spring)

JOUR 4863. Television News Reporting I. 3 Hours.
Continuation of JOUR 3072 and JOUR 3071L. Includes the specialized knowledge and skills needed in field reporting, anchoring, writing, and producing news for commercial television. Lab component arranged. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 4873. Television News Reporting II. 3 Hours.
Continuation of JOUR 4863. Laboratory component arranged. Prerequisite: JOUR 4863 with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 4883. Advanced Television News Production. 3 Hours.
Continuation of JOUR 4873. Students prepare and present television newscasts for air. Laboratory component arranged. Corequisite: Lab component. Prerequisite: JOUR 4873 with a grade of C or better. (Typically offered: Irregular)

JOUR 4893. Television News Producing. 3 Hours.
Intensive training in methods of producing a live television news broadcast, including news gathering, writing broadcast copy and production strategies. Lab 6 hours. Corequisite: Lab component. Prerequisite: JOUR 3072 and JOUR 3071L, each with a grade of C or better. (Typically offered: Fall and Spring)

JOUR 4903. Community Journalism. 3 Hours.
This three-hour course will blend student reporting and editing skills with instruction on how regional newspapers select and present news to a local audience. This course will instruct students in deciding news stories for regional readers, how those stories can best be written and displayed. The semester goal is to publish a paper. Prerequisite: Junior standing. (Typically offered: Spring)

JOUR 4923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with AAST 4923.

JOUR 4933H. Honors Research Methods in Journalism. 3 Hours.
Emphasis on the major types of qualitative and quantitative research, electronic data base searching, and traditional library research. Prerequisite: Journalism honors major. (Typically offered: Spring)
JOUR 4981. Journalism Writing Requirement. 1 Hour.
Directed study in conceptualizing, researching, and writing a major paper to meet the college writing requirement. Students must make a C in order to satisfy the college writing requirement. Prerequisite: 90 hours. (Typically offered: Fall and Spring)

JOUR 498VH. Honors Journalism Writing Requirement. 1-6 Hour.
Honors journalism writing requirement. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is equivalent to JOUR 4981.

African and African American Studies (AAST)

Dr. Valandra
Director
230 Memorial Hall
479-575-3001

African and African American Studies Website (https://fulbright.uark.edu/area-studies/african-and-african-american-studies/)

The African and African American Studies program promotes an interdisciplinary approach to the study of the history, culture, and identity of Africans and African Americans. Students may pursue African and African American Studies as a second major alongside a primary major in Fulbright College. Students in any college may declare a minor. Advice on suitable primary majors to be taken with an African and African American Studies second major may be obtained from the program director of African and African American Studies.

Requirements for a Second Major in African and African American Studies:
A total of 21 hours in African and African American Studies courses in addition to the requirements for the departmental major including the following:

The Honors Program in African and African American Studies gives junior and senior students of high ability the opportunity to enroll in enriched courses and conduct independent research culminating in an honors thesis. In addition to satisfying the general Fulbright College requirements for graduation and the basic eligibility requirements for honors as established by the Honors Council, candidates for honors in African and African American Studies must complete 12 hours of honors credit in partial satisfaction of requirements for the co-major. One to six of these may be thesis hours (AAST 399VH). The remaining six hours must be relevant honors colloquia or graduate courses (with permission) in one of the departments contributing to this interdisciplinary area of study. The 12 hours of honors credit will satisfy elective requirements in co-major requirement three above. The thesis committee shall include at least two faculty members affiliated with African and African American Studies. Successful completion of these requirements will be recognized by the award of the distinction “African and African American Studies Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Faculty

Banton, Caree A., Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, Department of History, 2013.

Cleveland, Todd, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Associate Professor, Department of History, 2015.

D’Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, Department of Anthropology, 1999.

Gigantino, Jim, Ph.D. (University of Georgia), B.A. (University of Richmond), Professor, Department of History, 2010.

Robinson, Charles F., Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, Department of History, 1999.

Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S. (University of Nebraska at Omaha), Associate Professor, School of Social Work, 2013.

White, Calvin, Ph.D. (University of Mississippi), M.A., B.A. (University of Central Arkansas), Associate Professor, Department of History, 2007.

Courses

AAST 1003. Introduction to African and African American Studies. 3 Hours.
This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact’s manifestations in the United States of America. (Typically offered: Fall and Spring)

AAST 2023. African American Experience. 3 Hours.
Supports critical reflective thinking, which will provide students with foundational tools to address the issues of diversity within visual culture and their relationship to societal, curricular, and pedagogical practices. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with ARED 2003.

AAST 2023. African American Experience. 3 Hours.
Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and sociopolitical context to understand and appreciate African American impacts on the United States. (Typically offered: Fall, Spring and Summer)

Additional Special Topics and Independent Study courses may be used to satisfy this requirement if the courses have been approved by the AAST Director. Check the program website for a list of these approved courses.

Total Hours

Interested students or those wanting further information should consult with the African and African American Studies Director for selection of appropriate classes and for information on other courses that can apply to the major and/or minor.

Requirements for a Minor in African and African American Studies:
A total of 15 hours in African and African American Studies courses in addition to the requirements for the departmental major including the following:

AAST 1003 Introduction to African and African American Studies or AAST 2023 The African American Experience

Select one of the following

AAST 3233/HIST 3233 or
AAST 3243/HIST 3243 or
AAST 3253/HIST 3253 or
AAST 3293/PLSC 3293 or
AAST 3853/ENGL 3853 or
AAST 4153/SOCI 4153

The remaining nine hours shall be selected from the courses listed in Requirement 3 of the Requirements for a Second Major in African American Studies. A maximum of six of the nine hours may be submitted from courses taken in any one department.

Total Hours

Interested students or those wanting further information should consult with the African and African American Studies Director for selection of appropriate classes and for information on other courses that can apply to the major and/or minor.

Requirements for Honors in African and African American Studies:
The Honors Program in African and African American Studies gives junior and senior students of high ability the opportunity to enroll in enriched courses and conduct independent research culminating in an honors thesis. In addition to satisfying the general Fulbright College requirements for graduation and the basic eligibility requirements for honors as established by the Honors Council, candidates for honors in African and African American Studies must complete 12 hours of honors credit in partial satisfaction of requirements for the co-major. One to six of these may be thesis hours (AAST 399VH). The remaining six hours must be relevant honors colloquia or graduate courses (with permission) in one of the departments contributing to this interdisciplinary area of study. The 12 hours of honors credit will satisfy elective requirements in co-major requirement three above. The thesis committee shall include at least two faculty members affiliated with African and African American Studies. Successful completion of these requirements will be recognized by the award of the distinction “African and African American Studies Scholar Cum Laude” at graduation. Higher degree distinctions are recommended only in exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Courses

AAST 1003. Introduction to African and African American Studies. 3 Hours.
This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact's manifestations in the United States of America. (Typically offered: Fall and Spring)

AAST 2023. African American Experience. 3 Hours.
Supports critical reflective thinking, which will provide students with foundational tools to address the issues of diversity within visual culture and their relationship to societal, curricular, and pedagogical practices. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with ARED 2003.

AAST 2023. African American Experience. 3 Hours.
Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and sociopolitical context to understand and appreciate African American impacts on the United States. (Typically offered: Fall, Spring and Summer)
AAST 3023. African Americans in Sport. 3 Hours.
Historical, sociological, and political issues and debate surrounding African Americans in sport. Contemporary issues facing African American athletes and sports figures. (Typically offered: Fall, Spring and Summer)

AAST 3033. The African American Experience in Business. 3 Hours.
This course is designed to provide the student with a comprehensive and critical analysis of the history of the African American experience as a member of the business sector of the United States economics. The course will review information that includes and demonstrates activities prior to slavery, during, and after slavery. (Typically offered: Irregular)
This course is cross-listed with WCOB 3033.

AAST 3123. African American Students in Higher Education. 3 Hours.
Examines the impact of college environments on African American students. Focuses on the following topics regarding African American students: retention, student demographics, student characteristics, current trends, issues and problems, student success, sub-populations, student values, and implications for higher education. (Typically offered: Irregular)

AAST 3133. History of Sports in Africa. 3 Hours.
This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. (Typically offered: Irregular)
This course is cross-listed with HIST 3133.

AAST 3193. The Making of the Modern Caribbean. 3 Hours.
History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region. (Typically offered: Fall)
This course is cross-listed with HIST 3193.

AAST 3233. African American History to 1877. 3 Hours.
History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3233.

AAST 3243. African American History Since 1877. 3 Hours.
The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. (Typically offered: Fall and Spring)
This course is cross-listed with HIST 3243.

AAST 3253. The History of Sub-Saharan Africa. 3 Hours.
Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor. (Typically offered: Fall)

AAST 3263. African Americans in Film. 3 Hours.
A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular)
This course is cross-listed with ENGL 3263, JOUR 3263, COMM 3263.

AAST 3273. African Americans in Documentary Film. 3 Hours.
Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)
This course is cross-listed with JOUR 3273, COMM 3273.

AAST 3293. African American Politics. 3 Hours.
This is a survey course designed to provide students with a comprehensive overview of African American political participation in the United States. In addition to analyzing important events in African American Politics, the course attempts to explain evolving patterns of political participation in Black America. (Typically offered: Irregular)
This course is cross-listed with PLSC 3293.

AAST 3393. Civil Rights Policy and Politics. 3 Hours.
This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations. (Typically offered: Spring)
This course is cross-listed with PLSC 3393.

AAST 3553. Topics in African-American Literature and Culture. 3 Hours.
The study of works of African-American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with ENGL 3553.

AAST 3923H. Honors Colloquium. 3 Hours.
Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in AAST). (Typically offered: Irregular) May be repeated for degree credit.

AAST 3937. South Africa: The Long, Ongoing Walk to Freedom. 3 Hours.
Examines the country's complex history and also the ways that this past is both remembered and memorialized. Closely examines the initial motivations for the colonization of South Africa, the experiences of Africans under colonial and, subsequently, apartheid rule and the ongoing legacies of these periods in contemporary South Africa. (Typically offered: Irregular)

AAST 3983. Black Movements and Messiahs. 3 Hours.
Focuses on black movements and leaders across global African history since the Age of Revolutions to the present including political, economic, social, cultural, religious and artistic movements throughout Africa and the diaspora. (Typically offered: Irregular)

AAST 399VH. Honors African & African American Studies Thesis. 1-6 Hour.
Independent thesis research and writing under the direction of an AAST faculty member. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AAST 4003. African & African American Studies Study Abroad. 3 Hours.
Examination of selected topics in conjunction with student participation in the bi-annual African & African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

AAST 4083. African Popular Culture. 3 Hours.
This class explores popular cultural expression across Africa. Topics range from hip hop and film, to second-hand clothing fashions and the media. We will consider how popular culture, while often inspired by global trends, is rooted in local circumstances and often reflects attempts to grapple with important issues. (Typically offered: Irregular)
AAST 4093. The History of African Americans and Social Justice. 3 Hours.
Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. (Typically offered: Irregular)
This course is cross-listed with HIST 4093.

AAST 4123. Africa and the Trans-Atlantic Slave Trade. 3 Hours.
Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. (Typically offered: Irregular)
This course is cross-listed with HIST 4123.

AAST 4153. Race and Society. 3 Hours.
Introduction to the sociological study of race and ethnicity within the United States, with emphasis on understanding how race and ethnicity operate within contemporary social institutions. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023. (Typically offered: Fall)
This course is cross-listed with SOCI 4153.

AAST 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.
Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall)

AAST 4173. Social Work with African American Families. 3 Hours.
An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall and Spring)
This course is cross-listed with SCWK 4173.

AAST 4263. Modern Africa. 3 Hours.
Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence. Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. (Typically offered: Irregular)
This course is cross-listed with HIST 4263.

AAST 4273. Comparative Slavery. 3 Hours.
Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. (Typically offered: Irregular)
This course is cross-listed with HIST 4273.

AAST 4323. Racial Identity, Politics, and Public Policy. 3 Hours.
Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 3293 or AAST 1063 or Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with PLSC 4323.

AAST 4383. The American Civil Rights Movement. 3 Hours.
Introduction to the history and development of the civil rights movement in the United States. (Typically offered: Irregular)
This course is cross-listed with HIST 4383.

AAST 4463. African American Theatre History - 1950 to Present. 3 Hours.
A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course, the student should be familiar with the major works of African-American theatre and have a deeper understanding of American history. (Typically offered: Spring)

AAST 4473. Account Planning. 3 Hours.
An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Corequisite: Lab component. Prerequisite: Minimum 90 hours completed, no in-progress hours or coursework accepted, 2.5 overall GPA, JOUR 1033 with a grade of C or better, and ADPR 3723 and ADPR 3743, with a grade of B or better. (Typically offered: Fall and Spring)
This course is cross-listed with ADPR 4473.

AAST 4483. African American Biographies. 3 Hours.
Introduction to the history and intellectual development of famous and not-so-famous African Americans. (Typically offered: Irregular)
This course is cross-listed with HIST 4483.

AAST 4563. The Old South, 1607-1865. 3 Hours.
Survey of the political, social, and economic development of the antebellum South. (Typically offered: Fall Odd Years)
This course is cross-listed with HIST 4563.

AAST 4583. Cultures of Africa. 3 Hours.
An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with ANTH 4583.

AAST 4813. Africans and Slavery in Colonial Latin America. 3 Hours.
Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. (Typically offered: Irregular)
This course is cross-listed with HIST 4813.

AAST 4823. Black Freedom in the Age of Emancipation. 3 Hours.
Comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. Focuses on the histories, meanings, and legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)

AAST 4833. Black Freedom in the Age of Emancipation. 3 Hours.
A comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)

AAST 4853. Studies in African American Literature and Culture. 3 Hours.
The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research project will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is cross-listed with ENGL 4853.

AAST 489V. African & African American Independent Study. 1-6 Hour.
An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular)

AAST 4923. History of the Black Press. 3 Hours.
Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with JOUR 4923.
The department of anthropology offers the Bachelor of Science degree program in anthropology. The Bachelor of Science degree program is geared toward students planing to continue their education in a health or professional school. A B.S. degree in anthropology is also useful for students planning to continue their education toward health or medical related careers.

**Program Requirements:** A minimum of 120 hours is required, including 35 hours of state minimum core (p. 96) and 57 hours specified as designated below.

### Required Anthropology Core Courses:

- **ANTH 1013** Introduction to Biological Anthropology and Introduction to Biological Anthropology Laboratory 4
- **ANTH 1011L** Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 1013) 3
- **ANTH 1033** Introduction to Archaeology 3
- **ANTH 4013** History of Anthropological Thought 3
- **ANTH Electives:** 18 hours selected from courses numbered 3000 or higher 18
- **Science:** A minimum of 20 hours of electives from BIOL, CHEM, GEOL, and/or PHYS 20
- **Mathematics:**
  - Minimum of 6 hours of math beyond College Algebra (MATH 1203) selected from among the following courses:
    - **MATH 1213** Plane Trigonometry (ACTS Equivalency = MATH 1203) 6
    - **MATH 1284C** Calculus Mathematics (ACTS Equivalency = MATH 1305) 4
    - **MATH 2554** Calculus I (ACTS Equivalency = MATH 2405) 3
    - **MATH 2564** Calculus II (ACTS Equivalency = MATH 2505) 4
    - **or STAT 2303** Principles of Statistics (ACTS Equivalency = MATH 2103) 3

The following courses that are strongly recommended for those students pursuing a health or medical-related career:

- **ANTH 3423 & ANTH 3421L** Human Osteology and Human Osteology Laboratory 4
- **BIOL 1603 & BIOL 1601L** Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture) and Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab) 4
- **BIOL 2013 & BIOL 2011L** General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab) 4
- **BIOL 2213 & BIOL 2211L** Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab) 4
- **BIOL 2323 & BIOL 2321L** General Genetics and General Genetics Laboratory 4
- **BIOL 2443 & BIOL 2441L** Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab) 4
- **BIOL 3023** Evolutionary Biology 3
- **BIOL 3404** Comparative Vertebrate Morphology 4
- **BIOL 4234** Comparative Physiology 4

### Anthropology (ANTH)

**JoAnn D’Alisera**

Acting Chair of the Department
330 Old Main
479-575-2508
anth@uark.edu (%20anth@uark.edu)

Department of Anthropology Website (http://fulbright.uark.edu/departments/anthropology/)

Courses in anthropology provide an introduction to world peoples, their ways of living, and world views. Anthropology helps students to better understand human similarities and differences.

The Department of Anthropology offers both a Bachelor of Science and a Bachelor of Arts degree in anthropology.

The Bachelor of Science degree program is geared toward students with specializations in anthropological sciences. It is recommended for students planning to continue their education in basic or applied anthropological sciences in graduate or professional school. A B.S. degree in anthropology is also useful for students planning to continue their education toward health or medical related careers.

The Bachelor of Arts degree program allows students to take additional coursework in any of four areas of focused study: archeology, biological anthropology, cartography/remote sensing/GIS, or cultural anthropology.

For the combined major in Anthropology and African and African American Studies, see the African and African American Studies (p. 292) listing.

For requirements for the M.A. and Ph.D. degrees in anthropology, see the Graduate School Catalog (p. 1251).

### Requirements for a B.S. Degree with a Major in Anthropology

The department of anthropology offers the Bachelor of Science degree in anthropology. The Bachelor of Science degree program is geared toward students with focused studies in anthropological sciences. It is recommended for students planning to continue their education in basic or applied anthropological sciences in graduate or professional school. A B.S. degree in anthropology is also useful for students planning to continue their education toward health or medical related careers.

**Program Requirements:** A minimum of 120 hours is required, including 35 hours of state minimum core (p. 96) and 57 hours specified as designated below.

### Required Anthropology Core Courses:

- **ANTH 1013** Introduction to Biological Anthropology and Introduction to Biological Anthropology Laboratory 4
- **ANTH 1011L** Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 1013) 3
- **ANTH 1033** Introduction to Archaeology 3
- **ANTH 4013** History of Anthropological Thought 3
- **ANTH Electives:** 18 hours selected from courses numbered 3000 or higher 18
- **Science:** A minimum of 20 hours of electives from BIOL, CHEM, GEOL, and/or PHYS 20
- **Mathematics:**
  - Minimum of 6 hours of math beyond College Algebra (MATH 1203) selected from among the following courses:
    - **MATH 1213** Plane Trigonometry (ACTS Equivalency = MATH 1203) 6
    - **MATH 1284C** Calculus Mathematics (ACTS Equivalency = MATH 1305) 4
    - **MATH 2554** Calculus I (ACTS Equivalency = MATH 2405) 3
    - **MATH 2564** Calculus II (ACTS Equivalency = MATH 2505) 4
    - **or STAT 2303** Principles of Statistics (ACTS Equivalency = MATH 2103) 3

The following courses that are strongly recommended for those students pursuing a health or medical-related career:

- **ANTH 3423 & ANTH 3421L** Human Osteology and Human Osteology Laboratory 4
- **BIOL 1603 & BIOL 1601L** Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture) and Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab) 4
- **BIOL 2013 & BIOL 2011L** General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab) 4
- **BIOL 2213 & BIOL 2211L** Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab) 4
- **BIOL 2323 & BIOL 2321L** General Genetics and General Genetics Laboratory 4
- **BIOL 2443 & BIOL 2441L** Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab) 4
- **BIOL 3023** Evolutionary Biology 3
- **BIOL 3404** Comparative Vertebrate Morphology 4
- **BIOL 4234** Comparative Physiology 4
Writing Requirement: The Fulbright College research/analytical paper requirement for anthropology majors is fulfilled by completing an intensive writing requirement (15 pages) with a grade of ‘B’ or higher in a successfully completed 4000-level ANTH course and with instructor approval.

**Anthropology B.S. Eight-Semester Degree Program**

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Total Units in Sequence: 120

¹ Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 271).
² Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 271).
Requirements for a Bachelor of Arts Degree with a Major in Anthropology

Required courses include 35 hours of state minimum core (p. 96) and a total of 120 hours including the following.

34 Semester Hours including:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 1013</td>
<td>Introduction to Biological Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 1011L</td>
<td>Introduction to Biological Anthropology Laboratory</td>
<td>1</td>
</tr>
<tr>
<td>ANTH 1023</td>
<td>Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 1033</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4013</td>
<td>History of Anthropological Thought</td>
<td>3</td>
</tr>
</tbody>
</table>

These 34 hours must also include:

- One course in each ANTH subfield (Cultural, Archaeology, Biological) beyond the core (9 hours).
- 3 hours from each of two different geographical areas in ANTH for a total of 6 hours.
- 6 elective credit hours in anthropology. These may be satisfied in concert with an optional focused study as described below.

Focused Studies

**Focused Study in Archeology:**

To complete the focused study, a student is required to fulfill the following course requirements:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 3023</td>
<td>Approaches to Archeology</td>
<td>3</td>
</tr>
</tbody>
</table>

Two of the following method and theory courses or equivalent classes offered under ANTH 3903 and ANTH 4903, approved as having an archeological method and theory focus.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 4093</td>
<td>The Archeology of Death</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4353</td>
<td>Laboratory Methods in Archeology</td>
<td></td>
</tr>
<tr>
<td>ANTH 4443</td>
<td>Cultural Resource Management I</td>
<td></td>
</tr>
<tr>
<td>ANTH 4603</td>
<td>Landscape Archaeology</td>
<td></td>
</tr>
<tr>
<td>ANTH 4633</td>
<td>Archeological Prospecting and Remote Sensing</td>
<td></td>
</tr>
<tr>
<td>ANTH 4813</td>
<td>Ethnographic Approaches to the Past</td>
<td>6</td>
</tr>
</tbody>
</table>

Archeological Field Session

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 4256</td>
<td>Archeological Field Session</td>
<td></td>
</tr>
</tbody>
</table>

**Focused Study in Biological Anthropology:**

To complete the focused study, a student is required to fulfill the following course requirements:

Four of the following courses in biological anthropology, including any 3000-4000 special topics or seminar courses offered that are deemed appropriate for training in any of the subdisciplines of biological anthropology (12-13 credits).

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 3423</td>
<td>Human Osteology</td>
<td>4</td>
</tr>

</tr>
<tr>
<td>ANTH 4523</td>
<td>Dental Science</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4613</td>
<td>Primate Adaptation and Evolution</td>
<td>3</td>
</tr>
</tbody>
</table>

**Focused Study in Cartography/Remote Sensing/GIS:**

This focused study gives students an opportunity to develop expertise in (1) cartography, map design and computer-assisted map production, (2) remote sensing and image interpretation, including photographic systems, sensor systems, and digital image processing, and (3) geographic information systems, including data sources, analytical techniques, and hardware/software systems.

To complete the focused study, a student is required to fulfill the following course requirements.

**Required Courses:**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOS 3023</td>
<td>Introduction to Cartography</td>
<td>3</td>
</tr>
<tr>
<td>GEOS 3213</td>
<td>Principles of Remote Sensing</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 3543</td>
<td>Geospatial Applications and Information Science</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses - Select three of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOS 4523</td>
<td>Cartographic Design and Production</td>
<td></td>
</tr>
<tr>
<td>GEOS 5423</td>
<td>Remote Sensing of Natural Resources</td>
<td></td>
</tr>
<tr>
<td>ANTH 4553</td>
<td>Introduction to Raster GIS</td>
<td></td>
</tr>
<tr>
<td>ANTH 4563</td>
<td>Vector GIS</td>
<td></td>
</tr>
<tr>
<td>ANTH 4593</td>
<td>Introduction to Global Positioning Systems and Global Navigation Satellite Systems</td>
<td></td>
</tr>
<tr>
<td>STAT 3003</td>
<td>Statistical Methods</td>
<td></td>
</tr>
<tr>
<td>CVEG 2053</td>
<td>Surveying Systems (or other approved surveying course)</td>
<td></td>
</tr>
</tbody>
</table>

**Focused Study in Cultural Anthropology:**

To complete the focused study, a student is required to fulfill the following course requirements:

Students must take a world language through the 2013 level 12

Two of the following method and theory courses or equivalent classes offered under ANTH 3903 and ANTH 4903 approved as having a cultural anthropology method and theory focus.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 3123</td>
<td>The Anthropology of Religion</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 3163</td>
<td>Male and Female: A Cultural and Biological Overview</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 3533</td>
<td>Medical Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4033</td>
<td>Popular Culture</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4143</td>
<td>Ecological Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4363</td>
<td>Museums, Material Culture, and Popular Imagination</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 4813</td>
<td>Ethnographic Approaches to the Past</td>
<td></td>
</tr>
</tbody>
</table>

**Writing Requirement:** The Fullbright College research/analytical paper requirement for anthropology majors is fulfilled by completing an intensive writing requirement (15 pages) with a grade of 'B' or higher in a successfully completed 4000-level ANTH course and with instructor approval.

**Anthropology B.A.**

**Eight-Semester Degree Program**

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit.
granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

</tbody>
</table>

Year Total: 15 12

Total Units in Sequence: 120

1 Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 271).
2 Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 271).

Minor in Anthropology

Requirements for a Minor in Anthropology: 15 hours including ANTH 1023. At least 9 hours must be in courses numbered 3000 or above. Students who minor in anthropology should consult with an anthropology adviser to select appropriate courses. A student must notify the department of his or her intent to minor.

Requirements for Departmental Honors in Anthropology: The Departmental Honors Program in Anthropology provides an opportunity for outstanding undergraduate majors to conduct independent research under the supervision of a faculty member. The research project culminates in an honors thesis, which is primary for the award “Anthropology Scholar Cum Laude.” Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate’s entire program of honors studies.

Honors candidates must meet the college requirements for an honors degree. They must complete and defend an honors thesis and take 12 hours, which may include 6 hours of thesis, in Honors Studies. The candidate is expected to maintain a minimum 3.5 cumulative grade-point average in anthropology and other course work.

Please refer to the Secondary Education Requirements (http://catalog.uark.edu/undergraduateregiment/collegesandschools/jwilliamfulbrightcollegeofartsandsciences/fieldsofstudystext) for Fulbright College Students.

Students wishing to pursue licensure through the UAteach undergraduate curriculum should consult with a UAteach adviser, uteach@uark.edu.

Faculty

Beaupre, Andrew, Ph.D. (William and Mary), Research Assistant Professor, 2019.
D’Alisera, JoAnn, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, 1999.
Delezene, Lucas, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Instructor, 2011.

Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, 2001.

Griffith, Lauren Miller, Ph.D., M.A. (Indiana University), B.A. (Texas A&M University), Visiting Assistant Professor, 2013.

Horton, Elizabeth T., Ph.D. (Washington University, St. Louis), Research Assistant Professor, 2019.

Kathryn, Kozioł, Ph.D. (University of Arkansas), Teaching Assistant Professor, 2019.

Kay, Marvin, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Missouri-Columbia), Professor, 1980.

Kowalski, Jessica Anne, Ph.D. (University of Alabama), Research Assistant Professor, 2019.

Kwamme, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, 1999.

Lee, Christine, Ph.D. (Arizona State University), Assistant Professor, 2012.

Marion, Jonathan S., Ph.D., M.A. (University of California-San Diego), B.A. (University of Redlands), Associate Professor, 2012.

Natarajan, Venkatesan Ram, Ph.D., M.A. (New York University), B.A. (Johns Hopkins University), Assistant Professor, 2015.

Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, 2002.

Paul, Kathleen, Ph.D., M.A. (Arizona State University), B.A. (New York University), Assistant Professor, 2019.

Rose, Jerry, Ph.D., M.A. (University of Massachusetts), B.A. (University of Colorado), University Professor, 1976.

Sabo, George, Ph.D., M.A., B.S. (Michigan State University), Professor, 1980.

Stoner, Wesley, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Assistant Professor, 2014.

Swedburg, Ted R., Ph.D., M.A. (University of Texas at Austin), B.A. (University of Beirut), Professor, 1996.

Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Assistant Professor, 2013.

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghamton), Distinguished Professor, 1995.

Villaseñor, Amelia, Ph.D. (George Washington University), B.A. (Arizona State University), Assistant Professor, 2016.

Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Assistant Professor, 2016.

ANTH 1011L. Introduction to Biological Anthropology Laboratory. 1 Hour. Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall)

ANTH 1011M. Honors Introduction to Biological Anthropology Laboratory. 1 Hour. Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall) This course is equivalent to ANTH 1011L.

ANTH 1013. Introduction to Biological Anthropology. 3 Hours. An introduction to the field of biological anthropology using evolution and human variation as unifying concepts. Areas include human genetics, race, speciation, primate and human evolution, and human variation and adaptation. Corequisite: ANTH 1011L. (Typically offered: Spring and Summer)
ANTH 3421L. Human Osteology Laboratory. 1 Hour.
Laboratory exercises illustrating concepts of human osteology. Corequisite: ANTH 3423. (Typically offered: Spring)

ANTH 3423. Human Osteology. 3 Hours.

ANTH 3433. Human Evolution. 3 Hours.
A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction. (Typically offered: Fall)

ANTH 3473. North American Prehistory. 3 Hours.
Survey of the prehistoric prehistory of the North American Continent north of Mexico. (Typically offered: Irregular)

ANTH 3533. Medical Anthropology. 3 Hours.
Survey of the interrelationship of human biology, culture and environment as reflected in disease experience from an evolutionary and cross cultural perspective. Special emphasis on stress. (Typically offered: Irregular)

ANTH 3543. Geospatial Applications and Information Science. 3 Hours.
An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring) This course is cross-listed with GEOS 3543.

ANTH 3553. Religion in Latin America. 3 Hours.
Examines contemporary implications of Latin America's unique religious heritage. An exploration of multiple Latin American religious traditions, with sustained focus on key theoretical concerns: conversion, vernacular vs. orthodox expressions, the blending of indigenous and European cosmologies, devotion and ritual, and the articulation of ethnic, gendered, and religious identities. (Typically offered: Irregular)

ANTH 3563. Culture and Medicine. 3 Hours.
Study of health and medicine within cultural contexts, including attention to cross-cultural healers and healing systems. Special emphasis on biomedicine as a cultural system. (Typically offered: Irregular)

ANTH 3573. Ballroom Culture and Performance in the West. 3 Hours.
This course focuses on competitive ballroom dancing in the West, highlighting issues of spectacle, sport, art, festival, ritual, dress, performance, identity, and gender construction. (Typically offered: Irregular)

ANTH 3583. Body and Identity. 3 Hours.
This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. (Typically offered: Irregular) This course is cross-listed with GNST 3583.

ANTH 3903. Topics in Anthropology. 3 Hours.
Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in anthropology). (Typically offered: Irregular) May be repeated for degree credit.

ANTH 399VH. Honors Thesis. 1-6 Hour.
Honors thesis. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4013. History of Anthropological Thought. 3 Hours.
Detailed consideration of anthropological theory through study of its historical development. The research paper in this course fulfills the Fulbright College research paper requirement for anthropology majors. Prerequisite: ANTH 1023. (Typically offered: Fall)

ANTH 4033. Popular Culture. 3 Hours.
Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle. (Typically offered: Irregular)

ANTH 4093. The Archeology of Death. 3 Hours.
Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. (Typically offered: Irregular)

ANTH 4133. Settlement Archaeology. 3 Hours.
Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Prerequisite: ANTH 3023. (Typically offered: Irregular)

ANTH 4143. Ecological Anthropology. 3 Hours.
Anthropological perspectives on the study of relationships among human populations and their ecosystems. (Typically offered: Irregular)

ANTH 4243. Archeology of the Midsouth. 3 Hours.
Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Prerequisite: Junior standing. (Typically offered: Irregular)

ANTH 4256. Archeological Field Session. 6 Hours.
Practical field and laboratory experiences in archeological research. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4263. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.
An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as conceptual construct as well as material reality. (Typically offered: Irregular)

ANTH 4273. Photography for Fieldwork. 3 Hours.
This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. (Typically offered: Irregular)

ANTH 4283. Survey in Ethnographic Film. 3 Hours.
Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. (Typically offered: Irregular)

ANTH 4353. Laboratory Methods in Archeology. 3 Hours.
Theory and practice of describing, analyzing, and reporting upon archeological materials. (Typically offered: Irregular)

ANTH 4363. Museums, Material Culture, and Popular Imagination. 3 Hours.
Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. (Typically offered: Fall)

ANTH 4433. Cultural Resource Management I. 3 Hours.
Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal and scientific management problems. (Typically offered: Spring) May be repeated for degree credit.
ANTH 448V. Individual Study of Anthropology. 1-6 Hour.
Reading course for advanced students with special interests in anthropology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 4513. African Religions: Gods, Witches, Ancestors. 3 Hours.
An exploration of African religions from a variety of anthropological perspectives, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. (Typically offered: Irregular)

ANTH 4523. Dental Science. 3 Hours.
Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. (Typically offered: Fall)

ANTH 4533. Middle East Cultures. 3 Hours.
Study of the peoples and cultures of the Middle East; ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

ANTH 4553. Introduction to Raster GIS. 3 Hours.
Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. (Typically offered: Fall) This course is cross-listed with GEOS 4553.

ANTH 4563. Vector GIS. 3 Hours.
Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Prerequisite: GEOS 3023 or GEOS 3543. (Typically offered: Spring) This course is cross-listed with GEOS 4563.

ANTH 4583. Cultures of Africa. 3 Hours.
An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall) This course is cross-listed with AAST 4583.

ANTH 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.
Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Prerequisite: GEOS 3543 or ANTH 3543. (Typically offered: Spring) This course is cross-listed with GEOS 4593.

ANTH 4603. Landscape Archaeology. 3 Hours.
This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. (Typically offered: Fall)

ANTH 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order of Primates. This course considers the comparative anatomy; behavioral ecology and paleontology of our nearest living relatives. Prerequisite: ANTH 1013 (or BIOL 1543 and BIOL 1541L). (Typically offered: Spring) This course is cross-listed with BIOL 4613.

ANTH 4633. Archeological Prospecting and Remote Sensing. 3 Hours.
Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. (Typically offered: Irregular)

ANTH 4653. GIS Analysis and Modeling. 3 Hours.
Unlike conventional GIS courses that focus on studying ‘where’, this course will teach students to address beyond ‘where’ using various GIS analysis and modeling techniques to explore ‘why’ and ‘how’. The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring) This course is cross-listed with GEOS 4653.

ANTH 4703. Mammalian Evolution and Osteology. 3 Hours.
This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L or BIOL 1543 and BIOL 1541L or instructor consent. (Typically offered: Irregular)

ANTH 4803. Historical Archeology. 3 Hours.
Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. (Typically offered: Irregular)

ANTH 4813. Ethnographic Approaches to the Past. 3 Hours.
Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. (Typically offered: Irregular)

ANTH 482V. Applied Visual Research. 1-6 Hour.
This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Pre- or Corequisite: ANTH 4273 or ANTH 4283. (Typically offered: Irregular) This course is cross-listed with GEOS 4863.

ANTH 4863. Quantitative Anthropology. 3 Hours.
Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. (Typically offered: Irregular)

ANTH 4903. Seminar in Anthropology. 3 Hours.
Research, discussion, and projects focusing on a variety of topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 4913. Topics of the Middle East. 3 Hours.
Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

Art (ARTS)
Gerry Snyder
Director of the School of Art
116 Fine Arts Center
479-575-5202

School of Art Website (https://fulbright.uark.edu/departments/art/)
The School of Art offers two undergraduate programs leading to degrees:
• Bachelor of Arts
• Bachelor of Fine Arts
Separate requirements for each program and its concentrations are listed under the tabs. Requirements for honors are listed separately for the program. The School of Art also offers a minor in art history.

Under direction of accomplished faculty, the School of Art offers professional art degrees in many media areas, including art education, art history, ceramics, drawing, painting, photography, printmaking, sculpture, and visual design. Students enjoy a close proximity to the Crystal Bridges Museum of American Art, with which the School of Art has a strong relationship. The school also works closely with other local arts organizations and maintains an active presence in the communities of Northwest Arkansas. The school’s Fine Arts Gallery (http://art.uark.edu/fineartsgallery/), in the impressive Fine Arts Center designed by architect Edward Durell Stone, shows both student and professional works on a near-constant basis.

**Bachelor of Arts Degree**

Transfer students should confer with the School of Art advisers prior to entrance for information concerning entrance requirements and transfer credits. Transfer credit will be allowed from other accredited and recognized art departments and schools if the credit earned is compatible with program and course requirements within the University of Arkansas School of Art and reflects a grade of “C” or higher. In addition, a student must spend a minimum of 2 semesters in residence. Credit for advanced studio classes in the school is contingent upon presentation of a portfolio of works created in a college-level class equivalent to the class the student is seeking credit for in the School of Art. Professors in the relevant studio area will evaluate portfolios and determine transfer credits.

**University and College Requirements for a Bachelor of Arts in Art History:** In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy) and the state minimum core (p. 96), the following course requirements must be met.

**State minimum core**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>

</tr>
<tr>
<td>ARHS 4993 Special Topics in Modern Art</td>
<td>3</td>
</tr>
</tbody>
</table>

or by successful completion (a grade of at least a “C”) in a thesis in art history.

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program as well as Fulbright College requirements.

State minimum core (p. 96) requirements may vary by individual, based on placement and previous credit granted. Once all core
Art (ARTS)

requirements are met, students may substitute with general electives. Students should consult with their academic adviser.

Total Units in Sequence: 120

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 271).
2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 271).
3. Students completing the Bachelor of Fine Arts may substitute ARHS 2913 or ARHS 2923 to satisfy the content covered in the Fine Arts University/State Core Requirement.

Requirements for B.F.A. in Art Education with Concentration in K-12 Teaching

University and College Requirements for the Bachelor of Fine Arts in Art Education

In addition to the state minimum core (p. 96) and the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met.

UNIV 1001 University Perspectives 1
State Minimum Core. Courses listed below are required for the major and also count toward the state minimum core.
PHIL 2003 Introduction to Philosophy (ACTS Equivalency = PHIL 1103) 35
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)
Art Education Core Requirements 39
World language up to the Intermediate I level (2000-level) 39

COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)
PHIL 4403 Philosophy of Art
ARTS 1919C Studio Foundation I
ARTS 1929C Studio Foundation II
ARED 1003 Introduction to Art Education
ARED 2003 Diversity, Pedagogy, & Visual Culture
ARED 3003 Curriculum Design & Teaching Practices in Art Education
ARED 4003 Community Art
ARED 4773 Professional Development in Art Education

The following course requirements must be fulfilled in addition to the preceding requirements:

A minimum of 12 credit hours in art history courses (ARHS) 12
ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA 2103) 1
ARHS 2923 Art History Survey II (ACTS Equivalency = ARTA 2103) 1
ARHS 4933 Contemporary Art
Any ARHS course 3000-level or higher 12
A minimum of 12 credit hours 3000-level or higher in a selected studio art focus 12
A minimum of 12 credit hours 3000-level or higher in additional studio art courses exclusive of the selected studio art focus 12
Art Education Concentration Requirements (select between Community Practice or K-12 Teaching) 9
Total Hours 120

1. ARHS 2913 and/or ARHS 2923 may also satisfy the Fine Arts University/state minimum core requirement.

Requirements for Concentration in K-12 Teaching

Admission

Students who wish to apply for admission to the K-12 Teaching Concentration internship program in art education must complete the following Stages.

Stage I: Complete an evaluation for internship. Students must also meet the following criteria to be cleared for the internship:

1. Obtain a “C” or better in the following pre-education core courses: ARED 1003, CIED 3023, and CIED 3033.
2. Obtain a “C” or better in ARED 2003, ARED 3003, and ARED 4003.
3. Obtain clearance through the Office of Teacher Education upon completion of the pre-education core courses. (Clearance includes passing scores on accepted basic skills assessments and cleared background checks.) For admission requirements and application go to the Teacher Education website (https://teacher-education.uark.edu/). Please contact the Director of Field Placement and Licensure, Graduate Education Building, Room 339, College of Education and Health Professions for more information.
4. Prior to enrollment in ARED 476V Student Teaching and ARED 4773 Professional Development, complete other degree requirements with a cumulative GPA of 2.50 or higher and a 3.0 in all School of Art coursework.
5. Obtain departmental clearance for internship based on successful completion of portfolio review, GPA and coursework requirements, an interview with Art Education faculty, and/or other specified recommendations by your program.
Stage II: Internship

1. Complete the one-semester internship at one elementary and one secondary placement at approved locations.
2. Complete Praxis II requirements. See your adviser for details.

Students should always consult the Coordinator of Teacher Education for any licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

Usually licensure in another state is facilitated by qualifying for a license in Arkansas. An application in another state must be made on the application form of that state, which can be obtained by request from the State Teacher Licensure office in the capital city. An official transcript should accompany the application. In many instances the applications are referred to the Coordinator of Teacher Education to verify program completion in teacher education.

Course Requirements

In addition to the requirements listed above for the Bachelor of Arts in Art Education with a Concentration in K-12 Teaching, the following coursework is required for internship eligibility and degree completion.

<table>
<thead>

or by successful completion (a grade of at least a 'C') in a thesis in art history.

Art B.F.A. in Art Education with a Concentration in K-12 Teaching

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program. State minimum core (p. 96) requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

**Total Units in Sequence:** 132

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 271).
2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 271).
3. Students completing the Bachelor of Fine Arts may substitute ARHS 2913 or ARHS 2923 to satisfy the content covered in the Fine Arts University/State Core Requirement.

### B.F.A. in Graphic Design

The Bachelor of Fine Arts degree in Graphic Design — often also referred to as visual design, visual communication design or visual communication — will prepare students to be proficient makers and thoughtful problem seekers and solvers in a four-year professional degree program. Students will work seamlessly across a range of media, working to identify appropriate solutions for audience and context. Students will be exposed to a rigorous curriculum covering research, theory, critical thinking, professional practices, conceptual idea-making, all while asking them to formally experiment and refine. The Graphic Design degree focuses on: typography, interactivity, branding and design research, each identified as strongly connected to the design industry, while incorporating the university research initiatives of the School of Art at the University of Arkansas.

### Requirements for Admission to the Fine Arts Degree in Graphic Design

For admission to the B.F.A. in Graphic Design, a student must be a declared Art major in the School of Art and successfully complete the art foundation course sequence of ARTS 1919C Studio Foundation I and ARTS 1929C Studio Foundation II. Students also must be enrolled in, or have completed, GDES 2313 Design Tools and Concepts and GDES 3313 Typographic Systems I. Students must have a 3.0 grade point average and submit an application and a portfolio for review.

### Requirements for the Bachelor of Fine Arts Degree in Graphic Design

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements (see under College Academic Regulations and Degree Completion Policy), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the university/state minimum core requirements.

- **ARTS 1919C** Studio Foundation I 9
- **ARTS 1929C** Studio Foundation II 9
- **GDES 2313** Design Tools and Concepts 3
- **GDES 3313** Typographic Systems 1 3
- **GDES 3323** Typographic Systems 2 3
- **GDES 3383** User Experience 3
- **GDES 4343** Identity Systems 3
- **GDES 4303** Professional Development and Seminar 3
- **GDES 4313** Interactive Language 3
- **GDES 4323** Technology in Context 3
- **GDES 4353** Human Centered Design 3
- **GDES 4363** Design for Complexity 3
- **GDES 4373** Advanced Typography 3
- **GDES 4383** Degree Project 3
- **ARHS 2913** Art History Survey I (ACTS Equivalency = ARTA 2003)

A minimum of 12 hours in Art Electives

At least 15 hours in Art Electives including:

- **ARHS 2913** Art History Survey I (ACTS Equivalency = ARTA 2003)
ARHS 2923  Art History Survey II (ACTS Equivalency = ARTA 2103)
ARHS 4823  History of Graphic Design
ARHS 4933  Contemporary Art
3 additional hours in any upper-level ARHS

Elective outside School of Art based on faculty approval 3
PHIL 2003  Introduction to Philosophy (ACTS Equivalency = PHIL 1103) ((satisfies University Core humanities requirement))

Writing Requirement: Students majoring in art will satisfy the Fulbright College writing requirement by successful completion (a grade of at least a 'C') in the final paper in one of the following:

ARHS 3923H  Honors Colloquium 3
ARHS 4563  Pre-Columbian Art 3
ARHS 4573  Artists of New Spain 3
ARHS 4743  Medieval Architecture 3
ARHS 4753  Renaissance and Baroque Architecture 3
ARHS 4763  Seminar in Critical Theory 3
ARHS 4833  Ancient Art 3
ARHS 4843  Medieval Art 3
ARHS 4853  Italian Renaissance Art 3
ARHS 4863  Northern Renaissance Art 3
ARHS 4873  Baroque Art 3
ARHS 4883  18th and 19th Century European Art 3
ARHS 4893  20th Century European Art 3
ARHS 4913  American Art to 1860 3
ARHS 4923  American Art 1860-1960 3
ARHS 4933  Contemporary Art 3
ARHS 4963  Individual Research in Art History 3
ARHS 4973  Seminar in Art History 3
ARHS 4983  Special Topics in Art History 3
ARHS 4993  Special Topics in Modern Art 3

or by successful completion (a grade of at least a 'C') in a thesis in art history.

Year Total: 15 15

Total Units in Sequence: 120

Internship credit considered in lieu of required studios upon approval of professors, based on content and merit of internship.

Bachelor of Arts Degree

Transfer students should confer with the departmental advisers prior to entrance for information concerning entrance requirements and transfer credits. Transfer credit will be allowed from other accredited and
recognized art departments and schools if the credit earned is compatible with program and course requirements within the University of Arkansas School of Art and reflects a grade of "C" or higher. In addition, a student must spend a minimum of 2 semesters in residence. Credit for advanced studio classes in the school is contingent upon presentation of a portfolio of works created in a college-level class equivalent to the class the student is seeking credit for in the School of Art. Professors in the relevant studio area will evaluate portfolios and determine transfer credits.

Requirements for a Major in Studio Art

In addition to the University Core requirements (http://catalog.uark.edu/undergraduatecatalog/academicregulations/universitycore/) and the Fulbright College of Arts and Sciences Graduation Requirements (p. 271), the following course requirements must be met.

A minimum of 51 semester hours to include:

<table>

</tr>
</tbody>
</table>

Students may take ARHS 4973 Seminar in Art History to fulfill their ARHS requirement, but designation as Group 1 or 2 will depend on the specific seminar taken.

In addition, students must complete a minimum of 21 hours of studio art courses, with at least one course from each media category. Within these 21 hours, students must complete at least 6 hours of studio art courses at the 4000-level.

<table>
<thead>
<tr>
<th>Media Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>• 2D (drawing, printmaking, painting)</td>
</tr>
<tr>
<td>• 3D (sculpture, ceramics)</td>
</tr>
</tbody>
</table>

Studio Art majors must complete a basic fine arts course that satisfies the University Core requirement from outside the School of Art.

Writing Requirement: Students majoring in art will satisfy the Fulbright College writing requirement by successful completion (a grade of at least a 'C') in the final paper in one of the following:

ARHS 3923H Honors Colloquium 3
ARHS 4563 Pre-Columbian Art 3
ARHS 4573 Artists of New Spain 3
ARHS 4743 Medieval Architecture 3
ARHS 4753 Renaissance and Baroque Architecture 3
ARHS 4763 Seminar in Critical Theory 3
ARHS 4833 Ancient Art 3
ARHS 4843 Medieval Art 3
ARHS 4853 Italian Renaissance Art 3
ARHS 4863 Northern Renaissance Art 3
ARHS 4873 Baroque Art 3
ARHS 4883 18th and 19th Century European Art 3
ARHS 4893 20th Century European Art 3
ARHS 4913 American Art to 1860 3
ARHS 4923 American Art 1860-1960 3
ARHS 4933 Contemporary Art 3
ARHS 4963 Individual Research in Art History 3
ARHS 4973 Seminar in Art History 3
ARHS 4983 Special Topics in Art History 3
ARHS 4993 Special Topics in Modern Art 3

or by successful completion (a grade of at least a 'C') in a thesis in art history.

Studio Art B.A.
Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Total Units in Sequence: 120

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations (p. 271).
2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations (p. 271).

**Upper Level ARHS Group 1**
Select one of the following: 3
- ARHS 4563 Pre-Columbian Art
- ARHS 4573 Artists of New Spain
- ARHS 4743 Medieval Architecture
- ARHS 4753 Renaissance and Baroque Architecture
- ARHS 4833 Ancient Art (ARHS 2913)
- ARHS 4843 Medieval Art (ARHS 2913)
- ARHS 4853 Italian Renaissance Art (ARHS 2923)
- ARHS 4863 Northern Renaissance Art (ARHS 2923)
- ARHS 4873 Baroque Art (ARHS 2923)
- ARHS 4983 Special Topics in Art History (ARHS 2913 or ARHS 2923)

**Upper Level ARHS Group 2**
Select one of the following: 3
- ARHS 4763 Seminar in Critical Theory
- ARHS 4813 The History of Photography
- ARHS 4823 History of Graphic Design (ARHS 2923)
- ARHS 4883 18th and 19th Century European Art (ARHS 2923)
- ARHS 4893 20th Century European Art (ARHS 2923)
- ARHS 4913 American Art to 1860 (ARHS 2923)
- ARHS 4923 American Art 1860-1960 (ARHS 2923)
- ARHS 4933 Contemporary Art (ARHS 2923 and ARHS 4923)
- ARHS 4993 Special Topics in Modern Art (ARHS 2923)

Students may take ARHS 4973 Seminar in Art History to fulfill an ARHS requirement, but designation as Group 1 or 2 will depend on the topic of the specific seminar taken.

**University and College Requirements for a Bachelor of Fine Arts in Studio Art**

In addition to the Fulbright College of Arts and Sciences Graduation Requirements (see under Degree Completion Program Policy), the following course requirements must be met. State minimum core requirements may vary by individual, based on placement and previous credit granted. Once all state minimum core requirements are met, students may substitute with general electives in consultation with their academic advisor.

**State Minimum Core**
- ARTS 1919C Studio Foundation I 9
- ARTS 1929C Studio Foundation II 9
- Focused Study Studio Electives 18
- Studio Art Electives 24
- ARTS 4923 Professional Development 3
- Fifteen credit hours in Art History to include: 15

**ARHS 2923**
- Art History Survey II (ACTS Equivalency = ARTA 2103)
- ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA 2003)
ARHS 4933 Contemporary Art
Six credit hours from any ARHS courses
General Electives 7
Total Hours 120

1 Focused Study Studio Electives include: Ceramics, Drawing, Painting, Photography, Printmaking, and Sculpture.

2 In addition to the Focused Study Studio Electives, students must select a minimum of one course from each of the following areas: Ceramics, Drawing, Painting, Photography, Printmaking, and Sculpture. Up to six credit hours may be taken outside of the School of Art with approval.

B.F.A. in Studio Art Eight-Semester Degree Program
Students selecting to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for University requirements of the program as well as the Fulbright College requirements.

University/state minimum core requirements may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute with general electives in consultation with their academic advisor.

Total Units in Sequence: 120

1 Completion of both ARHS 2913 (http://catalog.uark.edu/search/?P=ARHS%202913) and ARHS 2923 (http://catalog.uark.edu/search/?P=ARHS%202923) satisfies the Fine Arts University/state minimum core requirement.

Minor in Art History
Requirements for a Minor in Art History: A minimum of 18 semester hours to include:

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARHS 2913 Art History Survey I (ACTS Equivalency = ARTA 2003)</td>
</tr>
</tbody>
</table>
A student must notify the department of his or her intent to minor. The minor is especially suitable for students majoring in anthropology, English, foreign languages, history, philosophy, and music.

Requirements for Departmental Honors in Art: As part of the Honors Studies Program of the Fulbright College of Arts and Sciences, the School of Art provides the opportunity for academically superior junior- and senior-level students to acquire broader and deeper knowledge and skills in the visual arts and related disciplines. This is accomplished through independent research projects in studio art and/or art history under the direction of the art faculty. Outstanding achievement is recognized by awarding the distinction “Art Scholar Cum Laude.” Students may apply for honors studies beginning in the second semester of their sophomore year and normally will not be accepted into the program after completion of the second semester of their junior year. The school requires each applicant to have a minimum cumulative grade-point average of 3.5 in all college course work, a minimum grade-point average of 3.5 in all course work taken in the School of Art, completed ARHS 2913 and ARHS 2923, completed at least 20 semester hours of work in art school courses, and at least 30 semester hours of general education requirements. Included in those hours, a student must complete and defend an honors thesis and take 12 hours, which may include 6 hours of thesis, in honors studies. Higher degree distinctions take into consideration the student’s entire academic career and are recommended for only those students whose honors projects and programs of study demonstrate a truly exceptional degree of creativity and scholarship.

Faculty

Andree, David, M.F.A. (State University of New York), B.F.A. (Minneapolis College of Art and Design), Assistant Professor, 2015.
Byrd, Stefani, M.F.A. (University of California, San Diego), Visiting Assistant Professor, 2019.
Callander, Adrienne, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, 2017.
Cassiano Alvez, Renata, M.F.A. (University of Massachusetts-Dartmouth), Instructor, 2019.
DeLue, Rachael Z., Ph.D. (John Hopkins University), Visiting Assistant Professor, 2019.
DeWitt, Dylan, M.F.A. (Yale University), Assistant Professor, 2014.
Doyle, Allen P., Ph.D. (Princeton University), Visiting Assistant Professor, 2019.
Drolen, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, 2015.
Grant, Alphonso W., Ph.D. (Pennsylvania State University), Assistant Professor, 2017.

Hanson, Alexander J., M.F.A. (University of Iowa), Instructor, 2015.
Hapgood, Thomas Layley, M.F.A., B.A. (University of Arizona), Associate Professor, 2005.
Hogan, Adam S., M.A. M.F.A (Washington University in St. Louis), Assistant Professor, 2014.
Hulen, Jeannie, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Professor, 2002.
King, Sam, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, 2011.
Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Associate Professor, 2014.
LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, 1998.
Layiwola, Adepeju, Ph.D. (University of Ibadan, Nigeria), Visiting Professor, 2019.
Lee, Oh Mee, M.A. (University of Oregon), Visiting Assistant Professor, 2019.
Levenson, Abra, Ph.D., M.A.(Princeton), B.A. (University of California, Berkeley), Assistant Professor, 2018.
McConnell, Mathew S., M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, 2011.
McMahon, Bree, M.A., B.A. (North Carolina State University), Assistant Professor, 2018.
Meares, Ian, M.F.A (Penn State), M.F.A (University of California at Irvine), Instructor, 2017.
Mitchell, Marc E., M.F.A. (Boston University), Associate Professor, 2014.
Morrissey, Sean P., M.F.A. (University of Nebraska-Lincoln), B.F.A. (Bowling Green State University), Assistant Professor, 2014.
Murff, Zora J., M.F.A. (University of Nebraska), Assistant Professor, 2018.
Place, Alison L., M.F.A (Miami University), Assistant Professor, 2017.
Posnak, Adam, M.F.A (Louisiana State University and A&M College), Instructor, 2010.
Pulido Rull, Ana, Ph.D., M.A. (Harvard University), B.A. (National Autonomous University of Mexico), Associate Professor, 2012.
Ramirez, Kasey, M.F.A. (Indiana University, Bloomington), B.F.A. (Rhode Island School of Design), Assistant Professor, 2015.
Schulte, Christopher M., Ph.D. (Pennsylvania State University), Associate Professor, 2019.
Sichel, Jennifer A., Ph.D. (University of Chicago), Visiting Assistant Professor, 2019.
Springer, Bethany Lynn, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, 2006.
Sytsma, Janine A., Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, 2016.
Taoka, Loring, M.F.A (University of North Texas), Instructor, 2012.
Trammell, Breanne M., M.F.A. (Rhode Island School of Design), Assistant Professor, 2019.

Yoon, InJeong, Ph.D. (University of Arizona), Assistant Professor, 2017.
Young, Chase R., M.F.A. (University of Arkansas), Instructor, 2019.
Young, Rana N., M.F.A. (University of Nebraska), Visiting Assistant Professor, 2019.

Art Education Courses
ARED 1003. Introduction to Art Education. 3 Hours.
Covers foundational theories in art education, educational psychology, and philosophy. An 18-hour early field experience includes observation and participation in art classes in public schools and community settings. (Typically offered: Fall and Spring)
ARED 2003. Diversity, Pedagogy, & Visual Culture. 3 Hours.
Supports critical reflective thinking, which will provide students with foundational tools to address the issues of diversity within visual culture and their relationship to societal, curricular, and pedagogical practices. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with AAST 2003.
ARED 3003. Curriculum Design & Teaching Practices in Art Education. 3 Hours.
Covers contemporary art education theories and their implication to curriculum design. Students will discuss sociocultural learning theories in relation to the art-making process. (Typically offered: Fall and Spring)
ARED 3013. Inclusive Art Pedagogy. 3 Hours.
This course provides future art educators with the current issues and practices necessary for teaching disabled students in an inclusive art class through inverse inclusion (rotating roles as teacher, assistant, student, and observer). It will involve readings, observations, reflections, discussion, and extensive experience applying curriculum and contemporary pedagogy to inclusive art education practice in a community-based setting. (Typically offered: Fall and Spring)
ARED 3013H. Honors Inclusive Art Pedagogy. 3 Hours.
Provides future art educators with the current issues and practices necessary for teaching art to students with disabilities through inverse inclusion and rotating roles as teacher, assistant, student, and observer. Focuses on contemporary pedagogy to art classroom inclusion practice in a community-based setting with service learning. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to ARED 3013.
ARED 3613. Public School Art I. 3 Hours.
Selection, preparation and use of instructional materials in elementary and secondary schools. For students seeking teaching certification in art. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323 and ARTS 3013. (Typically offered: Irregular)
ARED 3643. Teaching Art in Elementary Schools. 3 Hours.
Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613. (Typically offered: Fall)
ARED 3643H. Honors Teaching Art in Elementary Schools. 3 Hours.
Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613. (Typically offered: Fall)
This course is equivalent to ARED 3643.
ARED 3653. Teaching Art in Secondary Schools. 3 Hours.
Methods and materials used in teaching secondary school art. Prerequisite: ARED 3613. (Typically offered: Spring)
ARED 3653H. Honors Teaching Art in Secondary Schools. 3 Hours.
Methods and materials used in teaching secondary school art. Prerequisite: ARED 3613. (Typically offered: Spring)
This course is equivalent to ARED 3653.
ARED 4003. Community Art. 3 Hours.
Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003. (Typically offered: Spring)
ARED 4003H. Honors Community Art. 3 Hours.
Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003 and honors standing. (Typically offered: Spring)
This course is equivalent to ARED 4003.
ARED 4633. Individual Research in Art Education. 3 Hours.
Independent study in specific areas of art education. Prerequisite: 6 hours of art education. (Typically offered: Fall and Spring)
ARED 476V. Student Teaching in Art. 6-12 Hour.
A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Successful completion of a criminal background check required before student can begin student teaching. Prerequisite: ARTBFA major. (Typically offered: Fall and Spring)
ARED 4773. Professional Development in Art Education. 3 Hours.
Students will reflect on their art education experiences and the roles of art educators in various educational settings. This capstone course prepares students for their professional careers in K-12 schools and community settings through journaling, discussions, and teaching portfolio review. (Typically offered: Fall and Spring)
ARED 486V. Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
ARED 486VH. Honors Internship in Art Education. 1-3 Hour.
Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ARED 486V.
ARED 490VH. Honors Thesis in Art Education. 1-6 Hour.
Special problems in Art Education. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.
ARED 4953. Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
ARED 4953H. Honors Special Topics in Art Education. 3 Hours.
Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to ARED 4953.
Art History Courses

ARHS 1003. Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003). 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, and slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Fall, Spring and Summer)

ARHS 1003H. Honors Basic Course in the Arts: Art Lecture. 3 Hours.
A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Irregular)

This course is equivalent to ARHS 1003.

ARHS 2913. Art History Survey I (ACTS Equivalency = ARTA 2003). 3 Hours.
Survey of art works from Stone Age through Medieval. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

ARHS 2923. Art History Survey II (ACTS Equivalency = ARTA 2103). 3 Hours.
Survey of art works from Renaissance to the present. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

ARHS 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in art). (Typically offered: Irregular)

ARHS 4013. Case Studies in Art History. 3 Hours.
Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4013H. Honors Case Studies in Art History. 3 Hours.
Provides in-depth studies of selected artists, themes, or specific groups of art works. Only offered during intersession. Prerequisite: 6 hours of ARHS courses and honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is equivalent to ARHS 4013.

ARHS 4413. Greek Art and Archaeology. 3 Hours.
Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Odd Years)

This course is cross-listed with CLST 4413, ARHS 4413.

ARHS 4423. Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Even Years)

This course is cross-listed with CLST 4423.

ARHS 4423H. Honors Roman Art and Archaeology. 3 Hours.
Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Even Years)

This course is cross-listed with CLST 4423, ARHS 4423.

ARHS 451V. Internship in Art History. 1-3 Hour.
Credit for practical experience gained through an internship in art history. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: 9 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 4563. Pre-Columbian Art. 3 Hours.
An introduction to pre-Columbian art from Mexico (3000 BC-1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 4563H. Honors Pre-Columbian Art. 3 Hours.
An introduction to pre-Columbian art from Mexico (3000 BC-1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

This course is equivalent to ARHS 4563.

ARHS 4573. Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

ARHS 4573H. Honors Artists of New Spain. 3 Hours.
An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

This course is equivalent to ARHS 4573.

ARHS 4613. African Art and Society. 3 Hours.
Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923. (Typically offered: Irregular)
ARHS 4613H. Honors African Art and Society. 3 Hours.
Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonization, and globalization) on the artistic practice. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4613.

ARHS 4623. African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the 'contact zones.' It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4623H. Honors African American Art History. 3 Hours.
Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the 'contact zones.' It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4623.

ARHS 4633. Contemporary African Art. 3 Hours.
Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4633H. Honors Contemporary African Art. 3 Hours.
Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4633.

ARHS 4733H. Honors Saint Peter's and the Vatican. 3 Hours.
Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923 and honors standing. (Typically offered: Irregular)

ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.
Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

This course is equivalent to ARHS 4763.

ARHS 4773. History of New Media Art. 3 Hours.
Examines the history of ‘new media’ art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

ARHS 4773H. Honors History of New Media Art. 3 Hours.
Examines the history of ‘new media’ art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923, honors standing and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

This course is equivalent to ARHS 4773.

ARHS 4783. Special Topics in Contemporary Art. 3 Hours.
Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4783H. Honors Special Topics in Contemporary Art. 3 Hours.
Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is equivalent to ARHS 4783.

ARHS 4793. Making the Museum: History, Theory and Practice. 3 Hours.
Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. Prerequisite: Any 3 credit hour, 3000 level or higher art history course. (Typically offered: Irregular)

ARHS 4813. The History of Photography. 3 Hours.
Survey of photography from 1685 to present. (Typically offered: Irregular)

ARHS 4823. History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923. (Typically offered: Spring)

ARHS 4823H. Honors History of Graphic Design. 3 Hours.
Survey of graphic design history from 1850 to the present. Prerequisite: Honors standing and ARHS 2923. (Typically offered: Spring)

This course is equivalent to ARHS 4823.

ARHS 4833. Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 4833H. Honors Ancient Art. 3 Hours.
Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)

This course is equivalent to ARHS 4833.

ARHS 4843. Medieval Art. 3 Hours.
Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)
ARHS 4843H. Honors Medieval Art. 3 Hours.
Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)
This course is equivalent to ARHS 4843.

ARHS 4853. Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4853H. Honors Italian Renaissance Art. 3 Hours.
Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4853.

ARHS 4863. Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4863H. Honors Northern Renaissance Art. 3 Hours.
Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4863.

ARHS 4873. Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4873H. Honors Baroque Art. 3 Hours.
Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4873.

ARHS 4883. 18th and 19th Century European Art. 3 Hours.
Study of eighteenth- and nineteenth-century art and architecture in Europe. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4883H. Honors 18th and 19th Century European Art. 3 Hours.
Study of eighteenth and nineteenth century art and architecture in Europe. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4883.

ARHS 4893. 20th Century European Art. 3 Hours.
Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 490VH. Honors Thesis in Art History. 1-6 Hour.
Special problems in art history. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ARHS 4913. American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4913H. Honors American Art to 1860. 3 Hours.
The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4913.

ARHS 4923. American Art 1860-1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4923H. Honors American Art 1860 - 1960. 3 Hours.
The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4923.

ARHS 4933. Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923. (Typically offered: Fall)

ARHS 4933H. Honors Contemporary Art. 3 Hours.
Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923 and ARHS 4923. (Typically offered: Fall)
This course is equivalent to ARHS 4933.

ARHS 4953. Art Museum Studies. 3 Hours.
A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 4963. Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor. (Typically offered: Fall and Spring)

ARHS 4963H. Honors Individual Research in Art History. 3 Hours.
Independent study in specific areas of art history and criticism. Prerequisite: 12 hours of Art History and permission of instructor. (Typically offered: Fall and Spring)
This course is equivalent to ARHS 4963.

ARHS 4973. Seminar in Art History. 3 Hours.
Special studies of periods and styles of art. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 4983. Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4983H. Honors Special Topics in Art History. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is equivalent to ARHS 4983.

ARHS 4993. Special Topics in Modern Art. 3 Hours.
Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

Art Courses

ARTS 1013. Introduction to Drawing from Observation. 3 Hours.
Problems dealing with materials and techniques of drawing, including basic concepts of line, perspective, and value. (Typically offered: Summer)

ARTS 1313. Two-Dimensional Design. 3 Hours.
Studio problems in the use of line, shape, texture, value, and color and their relationships. (Typically offered: Fall and Spring)

ARTS 1323. Three-Dimensional Design. 3 Hours.
Studio problems with the elements of three-dimensional design: structure, space, form, surface, and their relationship. (Typically offered: Fall and Spring)

ARTS 1803. Photography for Non-Majors. 3 Hours.
Addresses photography's currency within visual culture by investigating its relationship to both society and art, considering its evolution as an art form. Using a variety of tools and techniques, projects will emphasize composition, digital manipulation, and the role of intention in creating art. (Typically offered: Fall and Spring)
ARTS 1919C. Studio Foundation I. 9 Hours.
Intensive, studio-format coursework in a variety of two-dimensional, three-dimensional, and time-based media provides an introduction to fundamentals of art and design with emphasis on components of the creative process: research and critical thinking; investigation of materials; and instruction in software and fabrication techniques. 9 credit hours. Corequisite: Drill component. (Typically offered: Fall and Spring)

ARTS 1929C. Studio Foundation II. 9 Hours.
Continuation of Studio Foundation I. Intensive intermediate studio projects in a variety of two-dimensional, three-dimensional, and time-based mediums; instruction in software and fabrication techniques; and the introduction of professional practices, including the assemblage and maintenance of a foundational portfolio; required attendance at weekly seminar. Corequisite: Drill component. Prerequisite: ARTS 1919C (Typically offered: Fall and Spring)

ARTS 3003. Intermediate Drawing. 3 Hours.
Continued training in fundamental drawing skills. Builds upon observational drawing skills with analytic approaches, including the spatial logic of translating three dimensions to two, constructing global value relationships, and making meaningful compositions by linking formal decisions to conceptual intent. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 1013 and instructor consent. (Typically offered: Fall and Spring)

ARTS 3013. Figure Drawing I. 3 Hours.
Investigation of the human form through drawing, with special emphasis on gestural modes of working. Careful analysis of human anatomy, including internal and externally visible structures, position and movement of joints, as well as anatomical proportions and their variations among different individuals. Prerequisite: ARTS 3003. (Typically offered: Spring)

ARTS 3023. Drawing: Advanced Form and Content. 3 Hours.
This course will provide a technical and conceptual basis for independent exploration in the medium of drawing. A variety of approaches and starting points will be explored, including abstract/non-representational drawing, conceptual drawing, process-based drawing, and interpretive representational drawing. Experimental methods and media will be encouraged. Prerequisite: ARTS 3003 and junior or senior standing. (Typically offered: Irregular)

ARTS 3033. Drawing With Color. 3 Hours.
Color issues pertaining to drawing. Projects will challenge students to accurately perceive and recreate color relationships by building optical mixtures of colored marks to create a continuous world of color from a limited set of starting colors. Prerequisite: ARTS 3003. (Typically offered: Irregular)

ARTS 3043. Illustration: Communicating With Drawing. 3 Hours.
How to create images that carry specific, unambiguous meanings - to speak with pictures. Projects will explore various modes of visual communication and relationships to texts, including narrative, editorial and sequential illustrations. Prerequisite: ARTS 3003 or instructor consent. (Typically offered: Irregular)

ARTS 3053. Drawing in the Expanded Field. 3 Hours.
A philosophical examination of the discipline of drawing through experimental works. Initial projects will question the essential aspects of drawing-ness, pushing beyond the typical materials and processes to make drawings with unusual properties. In the second half of the course, students will take on a sustained individual exploration. Prerequisite: ARTS 3003 or instructor consent. (Typically offered: Irregular)

ARTS 3103. Painting I. 3 Hours.
An introduction to oil painting, focusing on painting from direct observation. Topics to be covered include: materials, palette, understanding perceptual color and color theory, and development of the painting through use of layers, value, mark-making, composition, light, and space. Prerequisite: ARTS 1313 and ARTS 3013; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3123. Painting: Water Media. 3 Hours.
Introduction to materials and techniques of watercolor and acrylic painting. Form, composition, and content to be studied through observation and imagination. Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 3103 or ARTS 3003. (Typically offered: Irregular)

ARTS 3133. Figure Painting. 3 Hours.
Introduction to representational and interpretive figure painting and to contemporary issues in figurative painting. The model as well as other visual sources will be used as a basis for observation, interpretation and invention. Prerequisite: ARTS 3013, ARTS 3103. (Typically offered: Irregular)

ARTS 3153. Painting Perception Into Abstraction. 3 Hours.
Investigation of the abstraction of visual phenomena. Various starting points and approaches will be studied. Emphasis on the analysis of form, the creation of pictorial structure, and the conceptual basis of perceptual abstraction. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3163. Abstract Painting. 3 Hours.
An introduction to the material, formal, and conceptual aspects of abstract painting. Projects will explore a variety of starting points for the invention of form in painting. Examines the construction of meaning in modern and contemporary abstract painting through studio work, discussion, writing assignments and lectures. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3203. Beginning Sculpture: Fundamentals of Modeling, Mold Making & Casting. 3 Hours.
An introduction to fundamental additive and subtractive sculpture techniques and methods of seeing and working that give expression to material form. Beginning techniques in modeling, carving, mold making, and basic casting are demonstrated. Lectures, readings, and critiques will develop student awareness of traditional building techniques which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

ARTS 3213. Beginning Sculpture: Construction Methods I. 3 Hours.
A focus on material sensitivity through thoughtful and skillful additive approaches. Woodworking and metalworking are introduced as methods to examine structural and spatial possibilities. Through examining and questioning the interplay of form, material, technique, and content, students will develop their knowledge of traditional fabrication processes, which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

ARTS 3223. Beginning Sculpture: Critical Issues I. 3 Hours.
An experimental lab focused on critical issues in contemporary sculpture. Students will be challenged to dissect their process of making, to question the nature of sculpture and art-making in the 21st century, and the context in which art is created, shown, and distributed. Prerequisite: ARTS 1323 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall, Spring and Summer)

ARTS 3403. Printmaking: Introduction. 3 Hours.
Introduction to the technical, formal, conceptual, and historical aspects of printmaking through methods of relief, intaglio (etching), monoprint, serigraphic (screenprinting), and lithographic printing techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025. (Typically offered: Fall and Spring)
ARTS 3413. Printmaking: Etching. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of intaglio printmaking through traditional and current methods of metal plate etching, aquatint, color inking and printing, collagraph, photo processes, and other techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Spring)

ARTS 3423. Printmaking: Lithography. 3 Hours.
Introduction to lithographic printmaking processes including wet and dry media on stone and plate, photo processes, and various inking methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Spring)

ARTS 3433. Printmaking: Relief. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of relief printmaking through traditional and current methods of woodcut, wood engraving, linoleum, CNC routing, digital technologies, moku hanga, and other methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Fall and Summer)

ARTS 3453. Printmaking: Monoprint & Monotype. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of monotype and monoprint printmaking through a variety of traditional and current methods to create singular works on paper. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Fall and Summer)

ARTS 3463. Printmaking: Digital Inquiries. 3 Hours.
Exploration of the technical, formal, and conceptual aspects of both traditional printmaking techniques and contemporary digital media and their application to contemporary art and visual culture. Prerequisite: ARTS 3403 or ARTS 3443. (Typically offered: Irregular)

ARTS 3473. Printmaking: Book & Letterpress. 3 Hours.
Exploration in the technical, formal, conceptual, and historical aspects of book arts through traditional and current Eastern and Western methods of various book forms, book construction, binding, design, content, letterpress printing, and conceptual considerations. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Irregular)

ARTS 3503. Ceramics: Handbuilding I. 3 Hours.
This introductory course investigates the techniques, materials, and themes common to hand-built ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, low temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1233; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

ARTS 3523. Ceramics: Wheelthrowing I. 3 Hours.
This introductory course investigates the techniques, materials, and themes common in wheel-thrown ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, high temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1233; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

ARTS 3533. Ceramics: Wheelthrowing II. 3 Hours.
This concept-driven intermediate-level course focuses on expanding the students’ skills and knowledge of wheel-thrown and hand-built forms. Additional emphasis will be placed on clay and glaze testing, and understanding the processes of firing in electric, gas, salt/soda, and wood-firing kilns. Prerequisite: ARTS 3523. (Typically offered: Irregular)

ARTS 3543. Ceramics: Slip-Casting. 3 Hours.
This concept-driven intermediate-level course focuses on the techniques and approaches common to ceramic slip-casting. Plaster mold-making, model development and preparation, slip mixing, and slip-casting are emphasized. Students will utilize low and high temperature gas and electric firings. Prerequisite: ARTS 3503. (Typically offered: Spring)

ARTS 3723. Experiments in Moving Image I. 3 Hours.
An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3733. Experiments in Sound. 3 Hours.
An introduction to experimental sound art, providing a theoretical and practical foundation for creating sound for installation, performance or composition, set within a context of historical and contemporary sound art and electroacoustic composing. Students will complete assignments creating new, original sound works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

ARTS 3803. Photo I: Darkroom. 3 Hours.
Photography I: Darkroom is an introduction to the basics of camera operation and exposure, analog black and white film and print processing, and photographic technique and theory. An emphasis on how to communicate through photographs is pursued in assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 1313; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3813. Photo I: Digital. 3 Hours.
Photo I: Digital starts with and expands upon the basics of digital SLR photography, editing in Adobe Lightroom, basic digital file management, and printing. This includes an introduction to the applications of composition, light, and color in photography. The course also delves into image interpretation and photographic seeing. There will be emphasis placed on communicating ideas effectively through photography as well as the ability to speak about photography analytically, formally, and conceptually. Prerequisite: ARTS 1313; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3903. Arts Entrepreneurship. 3 Hours.
Explores vehicles for socially conscious, arts-based, entrepreneurial action to gain an understanding of the innovative role that the creative process plays. With a bias toward action and collaboration, students will explore creative content, viability, and social, environmental, and cultural accountability. (Typically offered: Fall)

ARTS 3913. Social Justice and the Arts. 3 Hours.
Takes a critical look at historic and contemporary models of collaborative and interdisciplinary practices in the visual arts. Examines art as a catalyst for community impact, develops strategies for addressing the needs and goals of a specific partner, and implements support for those strategies. Service learning course. Prerequisite: ARTS 3903 or permission of the instructor. (Typically offered: Spring)

ARTS 3933. Color Studies. 3 Hours.
Investigation of color qualities and relationships through research and studio problems. Prerequisite: ARTS 1313 and ARTS 1323 and ARTS 3013; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

ARTS 4003. Drawing Projects. 3 Hours.
Individual studio projects in Drawing. Each student will propose a project to pursue over the course of the semester. Prerequisite: Senior standing as a Studio Art BA or BFA concentrating in drawing. (Typically offered: Spring)
ARTS 4203. Figure Drawing II. 3 Hours.
Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Prerequisite: ARTS 3013. (Typically offered: Irregular)

ARTS 404V. Special Problems in Drawing. 1-6 Hour.
Individual projects in drawing arranged with the instructor. Prerequisite: ARTS 3003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARTS 4133. Landscape Painting. 3 Hours.
Exploration of perceptual and conceptual approaches to painting the landscape. Both traditional and experimental techniques of oil painting will be studied. Includes outdoor on-site painting. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 4153. Topics in Advanced Painting. 3 Hours.
Topics in advanced and experimental painting. Prerequisite: 6 hours of painting. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ARTS 417V. Special Problems in Painting. 1-6 Hour.
Individual technique and subject matter projects to be arranged with the instructor. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4183. Contemporary Issues in Painting. 3 Hours.
Examination of concepts and themes relevant to the contemporary practice of painting, accompanied by the production of an individually determined body of work. Emphasis on studio work supplemented by research, critique, reading and writing. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 4133, or ARTS 4153. Prerequisite: ARTS 3103. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

ARTS 4193. Advanced Painting. 3 Hours.
Intensive course for those art majors concentrating in painting. Extended, individually determined projects will emphasize production of a well researched, conceptually grounded and cohesive body of work. Supplemented by reading, writing and discussion of contemporary issues in painting. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 4133, or ARTS 4153. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4203. Intermediate Sculpture: Modeling, Moldmaking, & Casting II. 3 Hours.
Merging historical methodology and advanced technology from lost-wax metal casting to digital fabrication, a continuation of additive and subtractive techniques in modeling, carving, moldmaking, and casting. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3203. (Typically offered: Fall and Summer)

ARTS 4213. Intermediate Sculpture: Mixed Media & Spatial Context. 3 Hours.
An exploration in assemblage, installation, environmental art, light, and kinetics as they apply to contemporary sculptural language. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Pre- or Corequisite: ARTS 3213. (Typically offered: Fall)

ARTS 4223. Advanced Sculpture: Critical Issues II. 3 Hours.
A directed analysis of form and its relationship to content based on the development of work in students' medium of choice. Students will acquire the technical skills needed to meet personal vision through guidance of the instructor. Research evidenced in work, discussions, and critiques is emphasized. Prerequisite: 6 hours of intermediate level sculpture courses. Choose from ARTS 4203, ARTS 4213, and ARTS 4243. (Typically offered: Spring)

ARTS 423V. Special Problems in Sculpture. 1-6 Hour.
Individual projects in sculpture with emphasis on materials exploration. Prerequisite: ARTS 4223. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4243. Intermediate Sculpture: Construction Methods II. 3 Hours.
A deeper investigation into construction techniques to further examine structural and spatial possibilities and question the relationship between traditional and contemporary sculptural materials. Through a more profound and critical analysis of form, material, process, content, and context, construction methodology will be established as a foundation for individual practice. Prerequisite: ARTS 3213. (Typically offered: Spring)

ARTS 4413. Printmaking: Intermediate. 3 Hours.
Continued study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Two 3000-level printmaking courses required. Prerequisite: ARTS 3403 and ARTS 3443. (Typically offered: Fall and Spring)

ARTS 4483. Printmaking: Advanced. 3 Hours.
Continued advanced study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 4413. (Typically offered: Fall and Spring)

ARTS 449V. Special Problems in Prints. 1-6 Hour.
Advanced individual study of one or more printmaking processes with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4503. Intermediate Ceramics. 3 Hours.
Focuses on discovering and developing a personal approach to the creation of ceramic objects. Students will explore and test clay bodies, surface treatments, and firing methods while simultaneously exploring ideas, formats, contexts, and interpretations to their work. Any or all ceramic processes may be used. Pre- or corequisite: ARTS 3503 or ARTS 3523 or ARTS 3543. (Typically offered: Fall)

ARTS 4513. Technical Ceramics. 3 Hours.
Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Prerequisite: ARTS 4503. (Typically offered: Irregular)

ARTS 4573. Advanced Ceramics. 3 Hours.
This course focuses on the generation and development of ideas and objects to form a cohesive body of work. Students will lead their own explorations, technically and conceptually, while working toward a professional-level standard of output. Any or all ceramic processes may be used. Prerequisite: ARTS 3503 and ARTS 3523 and ARTS 3543 and ARTS 4503. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 458V. Special Problems in Ceramics. 1-3 Hour.
Individual projects in ceramic techniques. Prerequisite: ARTS 3503 or ARTS 3523. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 459V. Individual Instruction. 1-6 Hour.
Special projects on an arranged basis for advanced students in any area of art in which the catalog sequence of courses has been completed. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4743. Experiments in Moving Image II. 3 Hours.
Further exploration of experimental video art, pushing the theoretical and practical foundation students build in ‘Experiments in Moving Image I’. Expands on creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Prerequisite: ARTS 1919C, ARTS 1929C and ARTS 3723. (Typically offered: Fall and Spring)
ARTS 4783. Critical Issues in Experimental Media Art. 3 Hours.
This course serves as a special topics course for Experimental Media Art. Students will explore a variety of contemporary critical issues and methodologies, all while building a deeper theoretical and practical understanding of creating for the twenty-first century. Prerequisite: (ARTS 1919C or ARTS 1929C) and (ARTS 3723 or ARTS 3733). (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARTS 4813. Alternative Photographic Methods. 3 Hours.
Alternative Photographic Methods focuses on the study and practice of alternative and historic photographic processes with a special interest in how materiality influences the content of a photograph. A heavy influence is placed on experimentation as the course explores the hybridization of analog chemical processes with digital technology and contemporary content. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 4823. Advanced Digital: The Constructed Image. 3 Hours.
Advanced Digital: The Constructed Image explores processes and concepts related to creating photographs that are staged, manipulated, or constructed in some manner both through digital processing and fabricating images for the camera. Emphasis will be placed on a questioning of photographic truth and how to communicate effectively through a series of photographs. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 4833. Large Format Photography. 3 Hours.
Large Format Photography introduces students to the 4x5 view camera and the technical processes of larger film formats. Advanced darkroom work and digital process are combined to explore professional printmaking. Projects allow students to explore concepts in depth and relate the large format camera to contemporary photographic practice. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 484V. Special Problems in Photography. 1-6 Hour.
Individual instruction for advanced undergraduates and graduate students. Special projects in photography designed by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4853. Documentary Photography. 3 Hours.
This course introduces students to a variety of methods used in the area of documentary photography in order to build the conceptual and technical skills necessary to create extended projects that focus on documenting and visually exploring subjects in an in-depth manner. Discussion of Photography’s tricky relationship with objectivity is explored throughout the semester. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 4863. Studio Light. 3 Hours.
Explores the technical, creative, and professional possibilities within making photographs using controlled light in both the studio setting and on location. Emphasizes how the studio setting has been used by photographers throughout history as well as its vital role in contemporary photography. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 4883. The Photobook. 3 Hours.
This course is based on the both the historic and contemporary relevance of the photobook as an art object. Students will learn about all aspects of producing a photobook from generating content, designing a structure, case-binding methods, fine art inkjet printing, and book construction. Special attention will be paid to sequencing photographs to convey conceptual thought and critique of those ideas. Prerequisite: ARTS 3803 and ARTS 3813. (Typically offered: Irregular)

ARTS 4893. Advanced Projects in Photography. 3 Hours.
Emphasizes diverse aspects of recognizing and fostering individualized creative processes, critical thinking, and problem-solving skills in order to create a sustainable and professional studio practice. Prerequisite: ARTS 3803 and ARTS 3813 and Junior or Senior level standing. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

ARTS 490VH. Honors Thesis in Studio Art. 1-6 Hour.
Special problems in studio art. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

ARTS 491V. Internships in Art. 1-3 Hour.
Credit for practical experience gained through internships in studio art, gallery practices and/or art education. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: Junior standing and art major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARTS 4923. Professional Development. 3 Hours.
The creation and presentation of a portfolio of work in the student’s area of concentration, accompanied by creation of relevant materials for successful professional practice. Art Education students may choose ARED 476V. Student Teaching. (12 credit hours) as a substitution. Prerequisite: Art majors only. Requires junior, senior or graduate standing. (Typically offered: Fall and Spring)

ARTS 493V. Fine Arts Gallery Internship. 1-3 Hour.
Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARTS 495V. Special Topics. 1-6 Hour.
May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Arts and Sciences (ARSC)

Yvette Murphy-Erby
Chair of Studies
Old Main 526D
479-575-4443

Students may enroll in college and off-campus programs (ARSC) under special circumstances and with the approval of the Associate Dean of Fulbright College.

Courses

ARSC 1201. Inquiry Approaches to Teaching: UAteach Step I. 1 Hour.
For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. (Typically offered: Fall and Spring)

ARSC 1221. Inquiry-Based Lesson Design: UAteach Step II. 1 Hour.
For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. Prerequisite: ARSC 1201. (Typically offered: Fall and Spring)

ARSC 1600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARSC 2600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)
ARSC 3013. Fulbright College Career Connections. 3 Hours.
This course teaches students how to capitalize on their strengths, skills, experience, professional connections, and academic discipline. Key components of this course are guest lectures from on-campus and off-campus professionals, interactive group activities to practice professional skills, and the creation of an online portfolio. Prerequisite: Sophomore standing. (Typically offered: Fall and Spring)

ARSC 310V. Fulbright College Elective Internship. 1-3 Hour.
Available to students completing an internship that aligns with their career goals and/or their area of study. Credit-only course that may be repeated for up to 6 hours of elective degree credit. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARSC 3600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARSC 4600. Undergraduate Research Assistant. 0 Hours.
Undergraduate research. (Typically offered: Fall, Spring and Summer)

Asian Studies (AIST)

Ka Zeng
Chair of Studies
428 Old Main
479-575-3356

Asian Studies Website (https://fulbright.uark.edu/area-studies/asian-studies/)

Students may pursue Asian studies as a second major alongside a primary major in Fulbright College. The program also offers a minor in Asian Studies.

The Asian Studies Program draws on the strength of faculty both in the Fulbright College of Arts and Sciences and in other colleges on campus to provide resources and training in Asian languages, cultures, history, politics and economics. The program strives to provide students with a well-rounded education essential for careers in which knowledge of Asia is vital, promote interdisciplinary research on the Pacific region, and serve as a source of knowledge and expertise for the community.

Requirements for the Asian Studies Second Major:

Language Competence: Students must complete CHIN 2013 (or equivalent) or JAPN 2013 (or equivalent). Subject to the approval of the Director of Studies, students with language competence in one language (Chinese or Japanese) may receive some elective credit for competence level courses in the other language. Proficiency in other Asian languages may also satisfy this requirement.

In addition to the above language requirement, students must complete 21 hours in Asia-related courses, subject to the following conditions:

Colloquium (3-6 hours): Students must complete at least three hours in the interdisciplinary colloquium, AIST 4003/AIST 4003H. The AIST Colloquium may be repeated, provided the topic is different.

Electives (15-18 hours): In addition to the above requirements and the requirements for the departmental major, students must complete 15-18 hours of Asia-related courses (AIST-approved electives listed below) subject to the following conditions of distribution:

1. Students must complete 6 hours of history courses;
2. Students must complete 6 hours of social science courses;
3. Courses must be selected from at least three different departments;
4. A maximum of nine hours may be submitted from any one department;
5. In addition, the following may be applied toward the major:
   a. Up to 6 hours of upper-level language courses (such as CHIN 3003, CHIN 3033, CHIN 3103, or JAPN 3033);
   b. Up to 6 hours of credits in an approved study-abroad program;
   c. Up to 6 hours of CHIN 3983 or JAPN 3983/JAPN 3983H (Special Studies)
   d. Other Asia-related courses with approval of the director of Asian Studies

Requirements for a Minor in Asian Studies:

Students may earn a minor in Asian Studies by taking courses in art, anthropology, economics, geography, history, languages, sociology, political science, and literature of Asia. Students must fulfill the language requirement described below and complete 15 hours in Asia-related courses in order to earn the minor.

Language Requirement: Students must complete CHIN 2013 (or equivalent) or JAPN 2013 (or equivalent). At the discretion of the chair of studies, proficiency in other Asian languages may also satisfy this requirement.

Beyond the language requirement, students must complete 15 credit hours of approved courses, including at least three hours in the Asian Studies Colloquium (AIST 4003). The following courses may be taken in fulfillment of the elective requirements:

Students may also apply three hours of credit in an approved study-abroad program in an Asian country and three hours of upper-level Chinese or Japanese toward the minor.
Other courses that include Asia-specific content may be taken for credit toward the secondary major or minor with the approval of the Chair of Asian Studies.

**Minor in East Asian History and Politics**

The East Asian history and political science minor is designed to enhance students’ understanding of the historical and political development of East Asia, in particular China and Japan. Students must complete 15 hours in courses related to East Asian history and political science in order to earn the minor. The interdisciplinary nature of this degree will allow students to use a variety of courses on East Asia to develop their own B.A. degree and thus prepare for a career related to the region.

**Students must complete 15 hours from the following:**

**AIST 3273. Sociology of China. 3 Hours.**

This class offers a sociological account of China, including both its social ethos and the experience of Chinese Americans in the United States. (Typically offered: Fall) This course is cross-listed with SOCI 3273. 

**AIST 3503. Government and Politics of East Asia. 3 Hours.**

Comparative analysis of structures, processes, and problems of the political systems of the Democratic Republic of Vietnam, Japan, and the Peoples Republic of China. Prerequisite: PLSC 2013. (Typically offered: Fall and Spring) This course is cross-listed with PLSC 3503.

**AIST 3533. Modern Japan. 3 Hours.**

This course exposes students to the rapid transformations in Japan from the mid-nineteenth century through to their rise into an important player in global politics. Students will be familiarized with the narrative history of the Japanese home islands as well as the place of Japan in the context of world events and global currents. (Typically offered: Fall) This course is cross-listed with HIST 3633.

**AIST 390V. Special Topics in Asian Studies. 1-3 Hour.**

Special topics in Asian Studies. May be repeated for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

**AIST 4003. Asian Studies Colloquium. 3 Hours.**

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

**AIST 4003H. Honors Asian Studies Colloquium. 3 Hours.**

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit. This course is equivalent to AIST 4003.

**AIST 4323. Culture and Society in China. 3 Hours.**

Examines contemporary Chinese society and culture through the lens of language and with an emphasis on globalization. (Typically offered: Fall and Spring) This course is cross-listed with CHIN 4313.

**AIST 4403. Islam in Asia. 3 Hours.**

This course will introduce students to the history and varieties of Muslim life in East Asia and Southeast Asia during the past 1,200 years. Through a comparative historical approach, it will examine themes of gender, imperialism and nationalism, religious education, pilgrimage, Islamic modernism, and religious extremism. (Typically offered: Fall) This course is cross-listed with HIST 4403.

**AIST 4823. Foreign Policy of East Asia. 3 Hours.**

This course provides an introduction to China's foreign policy at the undergraduate level. Key topics covered include the historical, domestic, and international contexts of Chinese foreign policy, China's relations with key partner countries, security strategies, foreign economic relations, and evolving role in global governance. (Typically offered: Fall) This course is cross-listed with PLSC 4823.

Department of Biological Sciences Website (http://fulbright.uark.edu/departments/biology/)

The Department of Biological Sciences offers a supportive training environment across the full spectrum of biology, bridging the disciplines of cell and molecular biology, physiology, development, genetics, molecular systematics, microbiology, neurobiology, ecology, and evolutionary biology. Through course selection both within and outside the department,
our students are prepared to enter research and professional training programs (health, secondary education, law, etc.) or enter careers in government and a broad range of businesses that rely on a technology-literate workforce with analytical and problem-solving skills.

For information on advanced degrees in biology, see the Graduate School Catalog (p. 1264).

**Requirements for a B.S. Degree with a Major in Biology**

A minimum of 120 hours is required, including 40 hours in the major as specified below.

1. **Biology Core (13 hours):**
   - BIOL 1584 Biology for Majors
   - BIOL 2323 General Genetics
   - BIOL 3023 Evolutionary Biology
   - BIOL 3863 General Ecology
   and a minimum of 1 hour of Core Laboratory selected from:
   - BIOL 2531L Cell Biology Laboratory
   - BIOL 2321L General Genetics Laboratory
   - BIOL 3861L General Ecology Laboratory

2. An additional 23 hours of electives in biology and/or biology related electives including:
   - At least 2 elective courses numbered 2000 or higher which are lab courses. This includes Core Labs taken in addition to the basic Core requirement. Courses whose catalog description explicitly excludes them from counting toward the major may not be used to meet this requirement. (Laboratory courses also include BIOL 480V, BIOL 480VH, BIOL 499V, and BIOL 499VH.)
   - At least 18 hours in BIOL courses numbered 3000 or higher, of which at least 12 hours must be from courses numbered 4000 or higher.
   - A course meeting the Fulbright College writing requirement. (The means of meeting the writing requirement are listed following the description of Requirements for Departmental Honors in Biology.)
   - No more than 4 hours of elective courses at the 1000 level are permitted. BIOL 1543/BIOE 1541L Principles of Biology/Principles of Biology Laboratory may not be applied to the elective requirement.

**Note:** Biology related electives that are not taught by the Department of Biological Sciences must be approved using the "Exception Request for Major or Minor Requirements" form.

1 A student who, after completing BIOL 1543/BIOE 1541L Principles of Biology/Lab with a grade of B or better in both courses, wishes to substitute BIOL 1543/BIOE 1541L for the required BIOL 1584 may petition the Department of Biological Sciences to do so. These petitions will be considered on a case by case basis for approval.

**Requirement in Philosophy, must include one of the following:**

PHIL 2103 or PHIL 2203 or PHIL 3113 or PHIL 4213.

**Writing Requirement:** The college writing requirement for majors in biology may be met by one of the following:

1. Completion of an honors thesis,
2. Completion of a senior thesis (BIOL 498V) supervised by a faculty member in biological sciences,
3. Completion of a required term paper with a grade of B or above in a BIOL course numbered 3000 or above on a topic approved by the instructor, or
4. Completion of a paper, supervised by a Biological Sciences faculty member, in Special Topics (BIOL 480V)
Note: A student exercising Option 3 or 4 may not use the paper written for that option for credit in BIOL 498V.

**Biology B.S.**

**Eight-Semester Degree Program**

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area. Students must complete at least 120 hours, and this must be considered when scheduling upper-level hours in the senior year.

**Requirements for a B.A. Degree with a Major in Biology:**

A minimum of 120 hours is required, including:

1. **BIO 1584 Biology for Majors.** Majors may substitute another 1000-level BIO course (BIO 1603/BIO 1601L Principles of Zoology or BIO 1613/BIO 1611L Plant Biology) for BIO 1584; a maximum of four 1000-level credits may be applied toward the major. A student who, after completing BIO 1543/BIO 1541L Principles of Biology/Lab with a grade of B or better in both courses, wishes to substitute a 1000-level BIOL course (or STAT 2823 Biostatistics or STAT 3003/3001L Statistical Methods) for BIO 1584 may petition the Department of Biological Sciences to do so. These petitions will be considered on a case by case basis for approval.

2. **An additional 26 hours of biological sciences, including:**
   - **Biological Core (13 hours):**
     - BIO 2533 Cell Biology
     - BIO 2323 General Genetics
     - BIO 3023 Evolutionary Biology
     - BIO 3863 General Ecology
     - and a minimum of one hour of Core Laboratory selected from:
       - BIO 2531L Cell Biology Laboratory
       - BIO 2321L General Genetics Laboratory
       - BIO 3861L General Ecology Laboratory
   - **Biological Electives (13 hours):** must include at least 9 hours in BIO courses numbered 3000 or higher and at least one course numbered 2000 or higher with a laboratory. (Laboratory courses also include BIO 480V, BIO 480VH, BIO 499V, and BIO 499VH.)
   - **Requirements in cognate science and mathematics include:**
     - **A.**
       - CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
       - and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

**Total Units in Sequence:** 120

1. Meets 40-hour advanced credit hour requirement. See 3 on Graduation Requirements Checklist or see the Catalog of Studies.

2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See 2b on Graduation Requirements Checklist or see the Catalog of Studies.

4. **Requirement in Philosophy**
   - Select one of the following:
     - PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)
     - PHIL 2203 Logic (ACTS Equivalency = PHIL 1003)
     - PHIL 3113 Environmental Ethics
     - PHIL 4213 Philosophy of Science

5. Students must complete a minimum of 20 credit hours at the 3000-level or higher from requirements 2, 3, and 4 listed above or from a combination of requirements 2, 3, and 4 above and from additional 3000-level or higher BIOL upper-level electives.

**Writing Requirement:** The college writing requirement for majors in biology may be met by one of the following:

1. Completion of an honors thesis.
2. Completion of a senior thesis (Biol 498V) supervised by a faculty member in biological sciences.
3. Completion of a required term paper with a grade of B or above in a BIO course numbered 3000 or above on a topic approved by the instructor, or
4. Completion of a paper, supervised by a Biological Sciences faculty member, in Special Topics (BIO 480V)

</table>
Students must complete at least 19 credit hours of BIOL courses that

Requirements for a Minor in Biology:

Students must notify their academic dean’s office of their intent to minor in biology.

Requirements for Departmental Honors in Biology: The biological sciences honors program is designed to provide students an opportunity to investigate questions in biology through an expanded reading program and research experience. Biological science majors may apply to enter the program between the second semester of the sophomore year and the end of the junior year. Application is made through both Honors Studies (MAIN 517) and the Department of Biological Sciences (SCEN 601). Applicants must have a 3.5 grade-point average. Students should consult with their adviser to identify and contact a potential faculty research mentor. The student’s research activities will then be directed by the departmental faculty member who agrees to sponsor the student.

Students may enroll for up to four hours of credit in BIOL 499VH during the junior year and up to eight hours of credit in BIOL 499VH during the senior year. A maximum of six of these credits may be applied toward a major. Participants must complete and defend an honors thesis and take 12 hours in Honors Studies, which may include six hours of thesis. The honors thesis is based on an original research project and is presented orally before a committee composed of two faculty from the biological sciences, a person from outside the biological sciences, and a representative from the Honors Council. This committee makes a recommendation concerning the award of the honors distinction to the Honors Council. Students who successfully complete the departmental honors program usually graduate as “Departmental Scholar Cum Laude.” Higher degree distinctions are recommended only in exceptional cases and are based upon the candidate’s entire involvement in the honors program. Completion of an honors thesis fulfills the writing requirement in biological sciences, which precludes credit for BIOL 498V (Senior Thesis) for the same body of work.

Biology (B.A. or B.S.) Life/Earth Science Teacher Licensure Requirements: Please refer to the Secondary Education Requirements (p. 274) for Fulbright College Students.

Students wishing to pursue licensure through the UAteach undergraduate curriculum should consult with a UAteach adviser, uteach@uark.edu.

Rhoads, Douglas Duane, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, 1990.
Shadwick, John D.L., M.S. (University of Arkansas), B.S. (University of Central Arkansas), Instructor, 2011.
Siepleski, Adam M., Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Associate Professor, 2015.
Spiegel, Frederick W., Ph.D. (University of North Carolina at Chapel Hill), B.A. (Drew University), Distinguished Professor, 1982.
Stephenson, Steven Lee, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, 2003.
Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, 2010.
Walker, James M., Ph.D. (University of Colorado-Boulder), M.S. (Louisiana Polytechnic Institute), Professor, 1965.
Walker, Kate Ireton, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, 2014.
Westerman, Erica L., Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, 2016.
Willson, John David, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, 2012.

Courses
Integrated lecture and laboratory focusing on the overriding principles of Biology. Designed to convey biological reasoning to non-science majors. May not count as prerequisite for advanced courses in BIOL. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)

BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab). 1 Hour.
Experimental and observational techniques used in biology with emphasis on the acquisition and interpretation of results that illustrate major biological principles. Corequisite: BIOL 1543. (Typically offered: Fall, Spring and Summer)

BIOL 1541M. Honors Principles of Biology Laboratory. 1 Hour.
This course is designed for the well prepared student in the Honors program. It focuses on teaching students experimental and observational techniques used in the science of biology. It emphasizes the acquisition and interpretation of results that illustrate the major principles of biology. Corequisite: BIOL 1543H or BIOL 1543. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1541L.

BIOL 1543. Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture). 3 Hours.
Principles that unify biology with emphasis on scientific study that demonstrates how all organisms are the product of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541L. (Typically offered: Fall, Spring and Summer)

BIOL 1543H. Honors Principles of Biology. 3 Hours.
This course is designed for the well prepared student in Honors program. It focuses on the principles that unify the science of biology. Students will be exposed to how scientific principles have been used to demonstrate that all organisms are the products of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541M or BIOL 1541L. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1543.
BIO 1584. Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture). 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre- or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

BIO 1584H. Honors Biology for Majors. 4 Hours.
Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

This course is equivalent to BIOL 1584.

BIO 1601L. Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab). 1 Hour.
Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. (Typically offered: Fall and Summer)

Introduction to zoological principles relating to cells, organ systems, development, genetics, ecology, and animal phyila. Corequisite: BIOL 1601L. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Summer)

BIO 1611L. Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab). 1 Hour.
Plant biology lab. Pre- or Corequisite: BIOL 1613. (Typically offered: Spring and Summer)

BIO 1613. Plant Biology (ACTS Equivalency = BIOL 1034 Lecture). 3 Hours.
Consideration of basic flowering plant structure, growth, development, physiology, genetics, ecology, and a brief survey of other plant groups. Lecture 3 hours per week. BIOL 1611L is recommended as a corequisite and both are required for partial fulfillment of the Fulbright College natural sciences requirement. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring and Summer)

BIO 1693. Biology Bridges. 3 Hours.
Prepares students for advanced biology courses including genetics, cell biology, ecology, and evolutionary biology, among others. Synthesizes sub-disciplines within biology using the underlying concepts of evolutionary theory found in scientific literature. Prerequisite: BIOL 1543 or BIOL 1584. (Typically offered: Spring)

BIO 2011L. General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab). 1 Hour.
Techniques for handling microorganisms. Does not count toward BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)

BIO 2011M. Honors General Microbiology Laboratory. 1 Hour.
Techniques for handling microorganisms. Does not count towards BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)

This course is equivalent to BIOL 2011L.

Basic concepts of microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Does not count towards BS in Biology. Corequisite: BIOL 2011L. Prerequisite: (BIOL 1543 and BIOL 1541L) or (BIOL 1584) and (CHEM 1073 and CHEM 1071L or CHEM 1103 or CHEM 1123 and CHEM 1121L or CHEM 1203 and CHEM 1201L). (Typically offered: Fall, Spring and Summer)

BIO 2013L. Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab). 1 Hour.
Exercises include experiments on osmosis, reflexes, senses, muscle, cardiovascular system, ventilation, metabolism, renal function, etc. Data collection, analysis, and report writing. Does not satisfy the Fulbright College writing requirement. Does not count toward BS in Biology. Corequisite: BIOL 2213. (Typically offered: Fall and Spring)

BIO 2113. Human Physiology (ACTS Equivalency = BIOL 2414 Lecture). 3 Hours.
Fundamental concepts of physiology with emphasis in the human. Does not count toward BS in Biology. Corequisite: BIOL 2211L. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1103) or (CHEM 1123 and CHEM 1121L) and MATH 1203. (Typically offered: Fall and Spring)

BIO 2213L. General Genetics Laboratory. 1 Hour.
Analysis of genetic problems and experiments with emphasis on 'hands-on' experience with a variety of organisms. May require time outside laboratory period. Laboratory 3 hours per week. Pre- or Corequisite: BIOL 2323. (Typically offered: Fall and Spring)

BIO 2233. General Genetics. 3 Hours.
Surveys of Mendelian, molecular, and population mechanisms of inheritance and gene expression in prokaryotes and eukaryotes. Lecture 3 hours per week. Pre requisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and (CHEM 1103 or CHEM 1203) and (MATH 1203 or higher or STAT 2823 or STAT 2303 or equivalent). (Typically offered: Fall and Spring)

BIO 2441L. Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab). 1 Hour.
Laboratory 3 hours exercises in mammalian anatomy. Cannot be taken without prior credit in BIOL 2443 or concurrent enrollment in BIOL 2443. Does not count toward BS in Biology. Corequisite: BIOL 2443. (Typically offered: Fall, Spring and Summer)

BIO 2443. Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture). 3 Hours.
Description of human body as a series of organ systems and their interrelationships. Does not count towards BS in Biology. Corequisite: BIOL 2441L. Prerequisite: Four hours of biological sciences. (Typically offered: Fall, Spring and Summer)

BIO 2531L. Cell Biology Laboratory. 1 Hour.
Introduction to methods and techniques used in Cell Biology research. Laboratory experiences to highlight topics covered in BIO 2533. Pre- or Corequisite: BIOL 2533. (Typically offered: Fall and Spring)

BIO 2533. Cell Biology. 3 Hours.
Introduction to cell structure, cell processes, biological polymers, energetics, and diversity. An introduction to biochemistry and cell chemistry. Recommended: (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or equivalent. Prerequisite: BIOL 1584, or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

BIO 2723L. Microbial Fermentation Laboratory. 3 Hours.
An inquiry-based introductory lab course that explores the biology and chemistry of brewing, with a focus on brewing microbiology. Laboratory 6 hours per week. Students must be 21 years of age or older on the first day of class. Prerequisite: BIOL 1543 or BIOL 1584. Pre- or Corequisite: FDSC 2723. (Typically offered: Fall)

BIO 3001L. Principles of Plant Pathology Lab. 1 Hour.
Lab course in examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Pre- or Corequisite: PLPA 3003 or BIOL 3003. (Typically offered: Fall)

This course is cross-listed with PLPA 3001L.
BIOL 3003. Principles of Plant Pathology. 3 Hours.
Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. (Typically offered: Fall)
This course is cross-listed with PLPA 3003.

BIOL 3011L. Introduction to Insect Identification Lab. 1 Hour.
Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to BIOL 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pr- or corequisite: BIOL 3013. (Typically offered: Fall)
This course is cross-listed with ENTO 3011L.

BIOL 3013. Introduction to Entomology. 3 Hours.
Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab BIOL 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with ENTO 3013.

BIOL 3023. Evolutionary Biology. 3 Hours.
An introduction to the mechanisms and patterns of evolutionary change. Seeks to develop logical, scientific skills and to apply them in understanding how life has changed during the history of the earth. Corequisite: Drill component. Prerequisite: BIOL 1584 or BIOL 1543, BIOL 1541L and BIOL 2323. (Typically offered: Fall and Spring)

BIOL 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.
Reviews the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Spring)

BIOL 3123. Prokaryote Biology. 3 Hours.
An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 3123H. Honors Prokaryote Biology. 3 Hours.
An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)
This course is equivalent to BIOL 3123.

BIOL 3273. UTeach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221. (Typically offered: Spring)
This course is cross-listed with PHYS 3273, CHEM 3273.

BIOL 3273H. Honors UTeach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Corequisite: Lab component. Prerequisite: ARSC 1201 and ARSC 1221, junior standing and honors. (Typically offered: Spring)
This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

BIOL 3404. Comparative Vertebrate Morphology. 4 Hours.
Anatomy of selected vertebrate animals with emphasis upon homologous structures in various animal groups. The recommended anatomy course for Biology BS majors. Lecture 2 or 3 hours, laboratory 4 or 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

BIOL 3861L. General Ecology Laboratory. 1 Hour.
General ecology lab. Pr- or Corequisite: BIOL 3863. (Typically offered: Fall)

BIOL 3863. General Ecology. 3 Hours.
Ecological principles and concepts; environmental factors and interactions that determine distribution and abundance of organisms. Prerequisite: 7 hours of biological science. (Typically offered: Fall and Spring)

BIOL 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in biological sciences). (Typically offered: Irregular) May be repeated for degree credit.

BIOL 4003L. Laboratory in Prokaryote Biology. 3 Hours.
Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 4013. Insect Behavior and Chemical Ecology. 3 Hours.
Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)
This course is cross-listed with ENTO 4013.

BIOL 4024. Insect Diversity and Taxonomy. 4 Hours.
Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 4024.

BIOL 4053. Insect Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with ENTO 4053.

BIOL 4104. Taxonomy of Flowering Plants. 4 Hours.
Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 4114. Dendrology. 4 Hours.
Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 4122. Food Microbiology. 2 Hours.
The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)
This course is cross-listed with FDSC 4122.

BIOL 4133. Plant Disease Control. 3 Hours.
Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3003. (Typically offered: Fall)
This course is cross-listed with PLPA 4223.

BIOL 4153. Biology of Global Change. 3 Hours.
Covers impact of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4252. Prerequisite: BIOL 1543 and BIOL 1541L or BIOL 1584 and BIOL 1584H. (Typically offered: Spring)
BIOL 4163. Dynamic Models in Biology. 3 Hours.
Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554. (Typically offered: Irregular)
This course is cross-listed with MATH 4163.

BIOL 4174. Conservation Genetics. 4 Hours.
Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component and drill. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2823 (or equivalent), and Junior standing. (Typically offered: Spring)

BIOL 4213. Biological Regulation and Subcellular Communication. 3 Hours.
Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Irregular)

BIOL 4223. Bacterial Lifestyles. 3 Hours.
Introduces students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied to identify unique strategies that bacteria employ to thrive in their respective environments or develop special adaptations to harsh environments. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 3123. (Typically offered: Spring Odd Years)
This course is cross-listed with PLPA 4123.

BIOL 4233. Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

BIOL 4233H. Honors Genomics and Bioinformatics. 3 Hours.
Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)
This course is equivalent to BIOL 4233.

BIOL 4234. Comparative Physiology. 4 Hours.
Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 4241L. Ichthyology Laboratory. 1 Hour.
Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243. Corequisite: BIOL 4243. (Typically offered: Spring Odd Years)

BIOL 4241M. Honors Ichthyology Laboratory. 1 Hour.
Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243H. Prerequisite: Honors standing. Corequisite: BIOL 4243H. (Typically offered: Spring Odd Years)
This course is equivalent to BIOL 4241L.

BIOL 4243. Ichthyology. 3 Hours.
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)

BIOL 4243H. Honors Ichthyology. 3 Hours.
Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology and honors standing. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)
This course is equivalent to BIOL 4243.

BIOL 4242. Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)

BIOL 4252H. Honors Biology of Global Change Seminar. 2 Hours.
Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)
This course is equivalent to BIOL 4252.

BIOL 4253. Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)

BIOL 4263H. Honors Cell Physiology. 3 Hours.
In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)
This course is equivalent to BIOL 4263.

BIOL 4273. Endocrinology. 3 Hours.
In endocrinology we study hormonal integration of living processes as all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. Prerequisite: BIOL 2533 or equivalent. (Typically offered: Spring)

BIOL 4303. Plant Physiology. 3 Hours.
An introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: BIOL 2533 or CHEM 3813 or CHEM 5843. (Typically offered: Fall)

BIOL 4313. Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

BIOL 4313H. Honors Molecular Cell Biology. 3 Hours.
In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)
This course is equivalent to BIOL 4313.

BIOL 4323. Comparative Neurobiology. 3 Hours.
Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: BIOL 2323 and BIOL 2533 or equivalents. (Typically offered: Irregular)

BIOL 4333. Biotechnology in Agriculture. 3 Hours.
Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall)
This course is cross-listed with PLPA 4333.
Biol 4353. Ecological Genetics/Genomics. 3 Hours.
Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: Biol 2323 and Biol 2321L and Math 2554 and Stat 2823 or equivalents. (Typically offered: Fall Odd Years)

Biol 4404. Comparative Botany. 4 Hours.
A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylegony. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: Biol 2323 and Biol 2533. (Typically offered: Spring)

Biol 4424. Mycology. 4 Hours.
Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: Biol 2323 and Biol 2533. (Typically offered: Irregular)

Biol 4433. Principles of Evolution. 3 Hours.
Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended Biol 3023 and Biol 2321L and Biol 3861L. Prerequisite: Biol 2323 and Biol 3863. (Typically offered: Fall Even Years)

Biol 4463. Physiological Ecology. 3 Hours.
Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: Biol 3863 and Biol 4234 and its lab component. (Typically offered: Spring Odd Years)

Biol 4511L. Population Ecology Laboratory. 1 Hour.
Population Ecology Lab. Pre- or Corequisite: Biol 4513. (Typically offered: Fall Even Years)

Biol 4513. Population Ecology. 3 Hours.
Study of theoretical and applied aspects of population processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Prerequisite: Biol 3863. (Typically offered: Fall Even Years)

Biol 4523. Plant Ecology. 3 Hours.
To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: Biol 3863. (Typically offered: Spring Even Years)

Biol 4543. Developmental Biology. 3 Hours.
An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Prerequisite: Biol 2533 and Biol 2323. (Typically offered: Irregular)

Biol 4554. Developmental Biology with Laboratory. 4 Hours.
An analysis of the concepts of mechanisms of development emphasizing the experimental approach. Lecture 3 hours, laboratory 3 hours per week. Students may not receive degree credit for both Biol 4543 and Biol 4554. Corequisite: Lab component. Prerequisite: Biol 2323 and Biol 2533 or graduate standing. (Typically offered: Fall)

Biol 4563. Cancer Biology. 3 Hours.
An introduction to the fundamentals of cancer biology. Prerequisite: Biol 2533. (Typically offered: Fall)

Biol 4613. Primate Adaptation and Evolution. 3 Hours.
Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: Biol 3023 or Anth 1013. (Typically offered: Spring)

This course is cross-listed with Anth 4613.

Biol 4634. Wetlands Ecology and Management. 4 Hours.
To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland wildlife, wetland wildlife adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: Biol 3863. (Typically offered: Irregular)

Biol 4663. Forest Ecology. 3 Hours.
Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Prerequisite: Biol 3863. (Typically offered: Irregular)

Biol 4703. Mechanisms of Pathogenesis. 3 Hours.
A survey of the events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body’s own defenses contribute to pathology. Prerequisite: Biol 2533. (Typically offered: Fall)

Biol 4711L. Basic Immunology Laboratory. 1 Hour.
Basic immunology laboratory. Corequisite: Biol 4713. (Typically offered: Spring)

Biol 4713. Basic Immunology. 3 Hours.
(Formerly MBIO 4714) A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, and other interesting problems in modern immunology. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: Biol 2323 and Biol 2533. (Typically offered: Spring)

Biol 4713H. Honors Basic Immunology. 3 Hours.
A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, and other interesting problems in modern Immunology. Prerequisite: Biol 2323 and Biol 2533. (Typically offered: Spring)

This course is equivalent to Biol 4713.

Biol 4724. Protistology. 4 Hours.
The biology of eukaryotes other than animals, land plants, and fungi with emphasis on morphology and modern approaches to phylogenetic systematics. Three hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab component. Prerequisite: Biol 2533 and Biol 2323. (Typically offered: Irregular)

Biol 4734. Wildlife Management Techniques. 4 Hours.
To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: Biol 3863. (Typically offered: Irregular)

Biol 4744. Fish Biology. 4 Hours.
Morphology, classification, life history, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological science. (Typically offered: Spring Odd Years)

Biol 4753. General Virology. 3 Hours.
An introduction to viral life-cycles, structure, and host cell interactions. Emphasis placed on molecular and biochemical aspects of virology. Two hour lecture and one hour discussion. Prerequisite: Biol 2533 and Biol 2323. (Typically offered: Spring)
BIOL 4793. Introduction to Neurobiology. 3 Hours.
Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 480V. Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 480VH. Honors Special Topics in Biological Sciences. 1-6 Hour.
Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.
This course is equivalent to BIOL 480V.

BIOL 4833. Animal Behavior. 3 Hours.
Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Fall Odd Years)

BIOL 4844. Community and Ecosystem Ecology. 4 Hours.
Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

BIOL 4863. Analysis of Animal Populations. 3 Hours.
Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4873. Microbial Molecular Genetics and Informatics. 3 Hours.
Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533. (Typically offered: Fall)
Students with satisfactory performance on the chemistry proficiency exam and who completed CHEM 1123 on the Fayetteville campus with grade of "C" or better can request credit for CHEM 1103.

Requirements for a B.S. degree with a Major in Chemistry

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements, the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A Minimum of 40 Semester Hours in Chemistry including:

- 8 hours of one of the two following sequences: 8
  - CHEM 1203 Chemistry for Majors I & CHEM 1201L Chemistry for Majors I Laboratory
  - CHEM 1223 Chemistry for Majors II & CHEM 1221L Chemistry for Majors II Laboratory
  
  - CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) & CHEM 1101L University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)
  - CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) & CHEM 1121L University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

- CHEM 2263 Analytical Chemistry Lecture & CHEM 2261L Analytical Chemistry Laboratory
- CHEM 3504 Physical Chemistry I
- CHEM 3512L Physical Chemistry Laboratory
- CHEM 3514 Physical Chemistry II
- CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors & CHEM 3702L Organic Chemistry I Lab for Chemistry Majors
- CHEM 3713 Organic Chemistry II Lecture for Chemistry Majors & CHEM 3712L Organic Chemistry II Lab for Chemistry Majors
- CHEM 4123 Advanced Inorganic Chemistry I
- CHEM 4213 Instrumental Analysis & CHEM 4211L Instrumental Analysis Laboratory
- CHEM 4723 Experimental Methods in Organic Chemistry
- And at least one additional Advanced Lecture course is required.

A minimum of 18 hours of science outside of chemistry are required, including math through:

- MATH 2574 Calculus III (ACTS Equivalency = MATH 2603) (Mathematics through MATH 2574)

  - PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture) (Physics through PHYS 2074)

These mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program. Some work in the biological sciences is recommended.

This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 (or CHEM 4813H/ CHEM 4843H or CHEM 5813/CHEM 5843) is included. Sample schedules may be obtained from the department of chemistry and biochemistry. Prospective students should consult a departmental adviser.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Chemistry B.S.
Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area. Students must complete at least 124 hours and this must be considered when scheduling upper-level hours in the senior year.

This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 (or CHEM 4813H/ CHEM 4843H or CHEM 5813/CHEM 5843) is included.

### Total Units in Sequence:

120

1 Meets 40-hour advanced credit hour requirement. See College Academic Regulations on page 131 of this chapter
2 Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations on page 131 of this chapter.

### Requirements for a B.S. degree with a Major in Chemistry, Biophysical Concentration

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements (see College Academic Regulations and Degree Completion Policy), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A Minimum of 43 Semester Hours in Chemistry including:

One of the following sequences:

- CHEM 1203 Chemistry for Majors I
  & CHEM 1201L Chemistry for Majors I Laboratory

- CHEM 1223 Chemistry for Majors II
  & CHEM 1221L Chemistry for Majors II Laboratory

- CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)
  & CHEM 1101L University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

- CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture)
  & CHEM 1121L University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

- CHEM 2263 Analytical Chemistry Lecture
  & CHEM 2261L Analytical Chemistry Laboratory

- CHEM 3504 Physical Chemistry I

- Select one of the following sequences:
  - BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)
  - BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) 1
  - General Elective

- University/State Core Social Science requirement

- CHEM 3514 Physical Chemistry II & CHEM 3512L Physical Chemistry Laboratory 1,2

- Advanced Level Elective Course 1

- Select one of the following sequences:
  - BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)
  - BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
  - General Elective

- General Elective

- Year Total: 14 16

- CHEM 3603 Organic Chemistry I & CHEM 3601L Organic Chemistry I Laboratory

- CHEM 3613 Organic Chemistry II & CHEM 3611L Organic Chemistry II Laboratory

- CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors
  & CHEM 3702L Organic Chemistry I Lab for Chemistry Majors

- CHEM 3713 Organic Chemistry II Lecture for Chemistry Majors
  & CHEM 3712L Organic Chemistry II Lab for Chemistry Majors

- CHEM 3514 Physical Chemistry II & CHEM 3512L Physical Chemistry Laboratory

- CHEM 4213 Instrumental Analysis & CHEM 4211L Instrumental Analysis Laboratory

- and either:
CHEM 4853  Biochemical Techniques
Or completion of a senior thesis based on independent research wherein at least one credit hour is earned in:
CHEM 400V  Chemistry Research
during each of 3 different semesters.
Select six hours from one of the following sequences: 6
CHEM 5813 and CHEM 5843
CHEM 4813H and CHEM 4843H
CHEM 3813 and CHEM 4723
MATH 2554  Calculus I (ACTS Equivalency = MATH 2405) 4
MATH 2564  Calculus II (ACTS Equivalency = MATH 2505) 4
PHYS 2054  University Physics I (ACTS Equivalency = PHYS 2034) (With Lab Component) 4
PHYS 2074  University Physics II (ACTS Equivalency = PHYS 2044 Lecture) (With Lab Component) 4
11 Hours from the Biological Sciences to include: 11
BIOL 1543 & BIOL 1541L  Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
BIOL 2533  Cell Biology & BIOL 2531L  Cell Biology Laboratory
And one additional lecture course numbered above 3000.
The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.
Total Hours 70-72
The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Chemistry B.S. with Biophysical Option Eight-Semester Degree Program
Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Total Units in Sequence: 120

1 Meets 40-hour advanced credit hour requirement. See College Academic Regulations.
2 Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations.

Requirements for a B.S. degree with a Major in Chemistry, Biochemistry Concentration: In addition to the University Core (http://catalog.uark.edu/undergraduatecatalog/academicregulations/universitycore/) requirements and the Fulbright College of Arts and Sciences Graduation Requirements (p. 271) (see College Academic Regulations and Degree Completion Policy (p. 86)), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A Minimum of 38 Semester Hours in Chemistry including:

One of the following sequences of courses: 8

CHEM 1203 Chemistry for Majors I
& CHEM 1201L Land Chemistry for Majors I Laboratory

CHEM 1223 Chemistry for Majors II
& CHEM 1221L Land Chemistry for Majors II Laboratory

or

CHEM 1103 University Chemistry I (ACTS Equivalency = & CHEM 1101L CHEM 1414 Lecture)
and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)

and

CHEM 1123 University Chemistry II (ACTS Equivalency = & CHEM 1121L CHEM 1424 Lecture)
and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)

CHEM 2263 Analytical Chemistry Lecture
& CHEM 2261L Analytical Chemistry Laboratory
Select from the following: 4 - 10

CHEM 3504 Physical Chemistry I

CHEM 3514 Physical Chemistry II
& CHEM 3512L and Physical Chemistry Laboratory

or

CHEM 3453 Elements of Physical Chemistry
& CHEM 3451L Elements of Physical Chemistry Laboratory

CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors
& CHEM 3702L Organic Chemistry I Lab for Chemistry Majors

CHEM 3713 Organic Chemistry II Lecture for Chemistry Majors
& CHEM 3712L Organic Chemistry II Lab for Chemistry Majors

Either

CHEM 4853 Biochemical Techniques

Or completion of a senior thesis based on independent research wherein at least 1 credit hour is earned in CHEM 400V (chemistry research) and/or CHEM 400VH (honors chemistry research) during each of 3 different semesters.

One of the following sequences: 6

CHEM 4813H and CHEM 4843H

CHEM 3813 and CHEM 4723

CHEM 4213 Instrumental Analysis
& CHEM 4211L and Instrumental Analysis Laboratory
or CHEM 4213 Advanced Inorganic Chemistry I

Additional Required Courses to Include:

MATH 2554 Calculus I (ACTS Equivalency = MATH 2405) 4
MATH 2564 Calculus II (ACTS Equivalency = MATH 2505) 4

Select one of the following physics sequences: 8

PHYS 2013 College Physics I (ACTS Equivalency = PHYS & PHYS 2011L 2014 Lecture)
and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)

and

PHYS 2033 College Physics II (ACTS Equivalency = PHYS & PHYS 2031L 2024 Lecture)
and College Physics II Laboratory (ACTS Equivalency = PHYS 2024 Lab)

or

PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034) (With Lab Component)

and

PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture) (With Lab Component)

15 Hours of Biological Sciences to include:

BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture)
& BIOL 1541L and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)

BIOL 2533 Cell Biology
& BIOL 2531L and Cell Biology Laboratory

BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture)
& BIOL 2011L and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)

BIOL 4233 Genomics and Bioinformatics
or BIOL 2323 General Genetics

The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Total Hours 69-76

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Chemistry B.S. with Biochemistry Option
Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement
hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

This program meets the minimum requirements for certification by the American Chemical Society if CHEM 3813 (or CHEM 4813H/CHEM 4843H) is included.

Total Units in Sequence: 120

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations on page 131 of this chapter.
2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations on page 131 of this chapter.
3. PHYS 2054 Calculus Based University Physics (pre- or co-requisite MATH 2554) and PHYS 2074 (pre- or co-requisite MATH 2564), is a better choice for students interested in graduate school.

Requirements for a B.A. degree with a Major in Chemistry with Chemistry Concentration

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements, the following course requirements must be met. Bolded courses from the list below may be applied to portions of the university/state minimum core requirements.

Completion of a World Language Course at the 2003 Intermediate I level.

Select one of the following:

| CHEM 1203 Chemistry for Majors I            | 8    |       |
| & CHEM 1201L and Chemistry for Majors I Laboratory |      |       |
| & CHEM 1223 and Chemistry for Majors II    |      |       |
| & CHEM 1221L and Chemistry for Majors II Laboratory |      |       |
| CHEM 1103 University Chemistry I (ACTS Equivalency = & CHEM 1101LCHM 1414 Lecture) |      |       |
| & CHEM 1123 and University Chemistry I Laboratory (ACTS & CHEM 1121LEquivalency = CHEM 1414 Lab) |      |       |
| and University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) |      |       |
| CHEM 2263 Analytical Chemistry Lecture     | 4    |       |
| & CHEM 2261L and Analytical Chemistry Laboratory |      |       |
| Select one of the following:               | 8    |       |
| CHEM 3703 Organic Chemistry I Lecture for Chemistry Majors & CHEM 3702L and Organic Chemistry I Lab for Chemistry Majors & CHEM 3713 and Organic Chemistry II Lecture for Chemistry & CHEM 3712L Majors |      |       |
| and Organic Chemistry II Lab for Chemistry Majors |      |       |
| CHEM 3603 Organic Chemistry I & CHEM 3601L and Organic Chemistry I Laboratory & CHEM 3613 and Organic Chemistry II & CHEM 3611L and Organic Chemistry II Laboratory |      |       |
| Select one of the following:               | 4-10 |       |
| CHEM 3453 Elements of Physical Chemistry & CHEM 3451L Elements of Physical Chemistry Laboratory 1 |      |       |
| CHEM 3504 Physical Chemistry I & CHEM 3514 and Physical Chemistry II & CHEM 3512L Physical Chemistry Laboratory 2 | 6    |       |
| Two Additional Lecture Courses Numbered Above 3000. | 30-36 |       |

These physics and mathematics prerequisite requirements are substantial, and these courses and their prerequisites should be scheduled early in the student’s program. Sample schedules may be obtained from the department of chemistry and biochemistry. Prospective students should consult a departmental adviser.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Chemistry B.A.

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Total Units in Sequence: 120

1  Meets 40-hour advanced credit hour requirement. See College Academic Regulations.
2  Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations.
3  Depends on placement; MATH 2043 Survey of Calculus is another option for this degree. Student may also choose to take MATH 1284C Precalculus in Fall Semester 1 and MATH 2554 Calculus in Spring Semester 1. Another option is to complete MATH 1203 in Fall Semester 1 and MATH 2043 Survey of Calculus in Spring Semester 1.

Requirements for a B.A. degree with a Major in Chemistry with Biochemistry Concentration

In addition to the University Core requirements and the Fulbright College of Arts and Sciences Graduation Requirements (see College Academic Regulations and Degree Completion Policy), the following course requirements must be met. Bolded courses from the list below may be applied to portions of the University Core requirements.

A minimum of 32 semester hours in chemistry including:
Select one of the following: 8

PHYS 2054 / PHYS 2074

Four courses from the Biological Sciences (at least 3 hours of which must be upper-level courses)

Completion of a World Language Course at the 2003 Intermediate I Level.

Total Hours 56-63

The mathematics and physics courses are prerequisites for some advanced courses and should be scheduled early in the student’s program.

Writing Requirement: Chemistry majors will satisfy the Fulbright College writing requirement by satisfactory completion of the formal research/analytical reports required in Physical Chemistry Laboratory, CHEM 3451L or CHEM 3512L.

Chemistry B.A. with Biochemistry Option

Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 86) in the Academic Regulations chapter for university requirements of the program. The following eight-semester plan refers to additional B.A. Core requirement hours may vary by individual, based on placement and previous credit granted. Once all core requirements are met, students may substitute a three-hour (or more) general elective in place of a core area.

Total Units in Sequence: 120

1. Meets 40-hour advanced credit hour requirement. See College Academic Regulations on page 131 of this chapter
2. Meets 24-hour rule (24 hours of 3000-4000 level courses in Fulbright College), in addition to meeting the 40-hour rule. See College Academic Regulations on page 131 of this chapter.
3. Depending on placement: MATH 2043 Survey of Calculus is another option. Student may also choose to take MATH 1284C PreCalc in Fall Semester Year 1 and MATH 2554 Calculus in Spring Semester Year 1. Another option is to complete MATH 1203 in Fall Semester 1 and MATH 2043 Survey of Calculus in Spring Semester Year 1.

Requirements for a Minor in Chemistry

CHEM 2263 Analytical Chemistry Lecture & CHEM 2261L Analytical Chemistry Laboratory

CHEM 3603 Organic Chemistry I & CHEM 3601L Organic Chemistry I Laboratory

CHEM 3613 Organic Chemistry II & CHEM 3611L Organic Chemistry II Laboratory

CHEM 3453 Elements of Physical Chemistry

A course at the 3000-4000 level.

Total Hours 18

A student must notify the department of his or her intent to minor.

Requirements for Departmental Honors in Chemistry: Students with good academic backgrounds and strong interests in research are encouraged to participate in the department of chemistry and biochemistry honors program. Entrance into the program is normally during the sophomore year or the first semester of the junior year, and a minimum cumulative GPA of 3.5 is required. Entrance is initiated by consulting the faculty academic adviser, who will help arrange conferences with potential faculty research project advisers. When there is agreement between the student and the adviser on a research project or area, an Honors Advisory Committee is set up to supervise the honors candidate’s program. The heart of the program is the research project, but students are encouraged to broaden their experience beyond required courses within chemistry, the natural sciences, the social sciences, and the humanities. Participation in Honors Colloquia, honors sections of regular courses, and chemistry departmental and divisional seminars is especially recommended. All honors candidates enroll in the spring semester Honors
Seminar (CHEM 4011H), and senior honors students must make at least one seminar presentation. All honors candidates will be required to complete and defend an honors thesis and take 12 hours (which may include 6 hours of thesis) in Honors Studies. The thesis is required in the spring semester of the senior year, followed by an oral presentation. On the basis of these written and oral reports and their evaluation of all aspects of the student’s honor program, the candidate’s Honors Advisory Committee will recommend whether or not the distinction “Chemistry or Biochemistry Scholar Cum Laude” should be awarded. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the whole of the candidate’s program of honors studies.

Chemistry (B.A. or B.S.) Physical/Earth Science Teacher Licensure Requirements: Students wanting to pursue licensure through the MAT program should please refer to the Secondary Education Requirements for Fulbright College Students. Students wishing to pursue licensure through the UAteach undergraduate curriculum should consult with a UAteach adviser, uteach@uark.edu.

Students wanting to teach science in middle school should consult with a middle level adviser in the College of Education and Health Professions.

Faculty
Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, 2006.
Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, 1980.
Beyzavi, M. Hassan, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, 2017.
Chen, Jingyi, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Professor, 2010.
Chevrier, Vincent Francois, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versailles, France), Research Associate Professor, 2005.
Coridan, Robert, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, 2015.
Fan, Chenguang, Ph.D. (Iowa State University), B.S. (Nanjing University), Assistant Professor, 2016.
Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, 1992.
Greathouse, Denise A., Ph.D. (University of Arkansas), Research Associate Professor, 1997.
Hayes, David, M.S. (Murray State University), B.S. (University of Arkansas), Instructor, 2007.
He, Maggie, Ph.D. (ETH Zürich), M.S. (University of Pennsylvania), B.S. (City College of New York), Assistant Professor, 2019.
Hershberger, Margaret, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, 2015.
Heyes, Colin David, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, 2008.
Kihyoun, Stefan M., Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Associate Professor, 2014.
Koepp, Roger E., Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, 1979.
Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, 2002.
Margaret, Hershberger, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, 2015.
Mazzanti, Christopher L., Ph.D., M.S. (University of Arkansas), B.S. (University of Arkansas at Monticello), Instructor, 2012.

McIntosh, Matt, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, 1996.
Millett, Francis, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, 1972.
Moradi, Mahmoud, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Assistant Professor, 2015.
Norman, Mya A., Ph.D. (University of Colorado-Boulder), M.S., B.S. (University of Arkansas), Instructor, 2006.
Puckett, Latisha, Ph.D., B.S. (University of Arkansas), Instructor, 2015.
Sakon, Joshua, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, 1997.
Shi, Wei, Ph.D. (University of Alberta), M.S. (East China University of Science and Technology), B.S. (Shanghai Jiao Tong University), Assistant Professor, 2012.
Stenken, Julie A., Ph.D. (University of Kansas), B.S. (University of Akron), Professor, 2007.
Stites, Wesley, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, 1991.
Striegler, Susanne, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, 2012.
Thallapuranam, Suresh, Ph.D. (Osmania University), Professor, 2003.
Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, 2004.
Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), Associate Professor, 2012.
Wilkins, Charles L., Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, 1998.
Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Associate Professor, 2008.

Courses
CHEM 1051L. Chemistry in the Modern World Laboratory (ACTS Equivalency = CHEM 1004 Lab). 1 Hour.
Basic laboratory exercises involving measurements of mass and volume, acids and bases, hardness of water, energy content in fuel, sugar content in drinks, and radioactivity. Meets 2 hours per week. Corequisite: CHEM 1053. (Typically offered: Fall and Spring)

The impact of chemical developments upon contemporary society. Chemical problems of ecological, environmental, nutritional, economic, and sociological concern. Designed for non-science majors. Lecture 3 hours per week. Corequisite: CHEM 1051L. (Typically offered: Fall and Spring)

CHEM 1071L. Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab). 1 Hour.
Laboratory exercises in principles and practices of Fundamental Chemistry. Corequisite: CHEM 1073. (Typically offered: Fall)

CHEM 1073. Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture). 3 Hours.
One-semester introductory-level general chemistry course introducing select fundamental concepts and related problem-solving for atomic and molecular structures, nomenclature, dimensional analysis, chemical reactions, chemical bonding, intermolecular forces, states of matter, solutions, acid-base reactions, redox reactions, kinetics, thermochemistry, and chemical equilibrium. Corequisite: CHEM 1071L and related course component drill section for CHEM 1073. (Typically offered: Fall and Summer)
CHEM 101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab). 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Meets 3 hours per week for 1 hour credit. Pre- or Corequisite: CHEM 1103. (Typically offered: Fall, Spring and Summer)

CHEM 1103. University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture). 3 Hours.
An introductory course for science, engineering or agriculture majors. Atomic structure, electron configurations and periodic properties, nomenclature and bonding in compounds, Lewis structure and resonance forms, molecular geometries and polarity, stoichiometry, solution chemistry and aqueous reactions, thermochemistry, gas laws and kinetic molecular theory. Corequisite: Drill component. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall, Spring and Summer)

CHEM 1121L. University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab). 1 Hour.
Quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory 3 hours per week. Upon completion of CHEM 1121L on the UAF campus with a grade of ‘C’ or better, credit for CHEM 1101L can be requested. Corequisite: CHEM 1123 and related course component drill section for CHEM 1123. (Typically offered: Fall, Spring and Summer)

CHEM 1121M. Honors University Chemistry II Laboratory. 1 Hour.
Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Designed for students in the honors programs. Laboratory 3 hours per week. Corequisite: CHEM 1123H and related course component drill for CHEM 1123H. (Typically offered: Fall and Spring)
This course is equivalent to CHEM 1121L.

CHEM 1123. University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.
Introductory course for science, engineering or agriculture majors. Liquids, solids, intermolecular forces, phase diagrams, solution chemistry, solubility, colligative properties, chemical kinetics, chemical equilibria, acid-base equilibria, aqueous ionic equilibria, titrations, buffers, solubility equilibria, thermodynamics, electrochemistry, and nuclear chemistry. Lecture 3 hours per week. Corequisite: CHEM 1121L and related course component drill section for CHEM 1123. Prerequisite: CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall and Spring)

CHEM 1123H. Honors University Chemistry II. 3 Hours.
Presents the topics of periodicity, bonding, stoichiometry, thermodynamics, kinetics, and chemical equilibrium in detail. Lecture 3 hours per week. Students with satisfactory performance on the proficiency exam and who complete CHEM 1123H on the UAF campus with a grade of ‘C’ or better can request credit for CHEM 1103. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1121M and related course component drill section for CHEM 1123H. Prerequisite: Honors candidacy and CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam). (Typically offered: Fall, Spring and Summer)
This course is equivalent to CHEM 1123.

CHEM 1201L. Chemistry for Majors I Laboratory. 1 Hour.
Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1201L and CHEM 1101L. Corequisite: CHEM 1203 and related course component drill for CHEM 1203. (Typically offered: Fall)

CHEM 1203. Chemistry for Majors I 3 Hours.
The first half of a two-semester course designed especially for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1203 and CHEM 1103. Corequisite: CHEM 1201L and related course component drill section for CHEM 1203. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall)

CHEM 1221L. Chemistry for Majors II Laboratory. 1 Hour.
Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1221L and CHEM 1121L. Corequisite: CHEM 1223 and related course component drill for CHEM 1223. (Typically offered: Spring)
This course is equivalent to CHEM 1121L.

CHEM 1223. Chemistry for Majors II 3 Hours.
The second half of a two-semester course designed specifically for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1223 and CHEM 1123. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1221L and related course component drill section for CHEM 1223. Prerequisite: CHEM 1203 and CHEM 1201L (or CHEM 1103 and CHEM 1101L). (Typically offered: Spring)
This course is equivalent to CHEM 1123.

CHEM 2261L. Analytical Chemistry Laboratory. 1 Hour.
Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)

CHEM 2263. Analytical Chemistry Lecture. 3 Hours.
Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)

CHEM 2611L. Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.
A focus on properties of organic compounds as well as reactions of organic compounds with an emphasis on functional groups along with some classifications of certain types of compounds. Laboratory 3 hours per week. Corequisite: CHEM 2613 and related course component drill for CHEM 2613. (Typically offered: Fall, Spring and Summer)
MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074. (Typically offered: Fall)

statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite:
chemistry, atomic and molecular structure, bonding, spectroscopy and elementary
majors and chemistry minors with topics covering wave-particle duality, quantum
First semester of a 2-semester course in physical chemistry designed for chemistry
(Typically offered: Fall)

CHEM 3203. Forensic Chemistry. 3 Hours.
Survey of chemistry used in criminal investigations. Topics may include detection
and identification of drugs, alcohol, toxins, explosives and gun powder residue.
Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection
of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting.
Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or
CHEM 3713. (Typically offered: Irregular)

CHEM 3203H. Honors Forensic Chemistry. 3 Hours.
Survey of chemistry used in criminal investigations. Topics may include detection
and identification of drugs, alcohol, toxins, explosives and gun powder residue.
Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection
of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting.
As a requirement of honors designation additional honors-level work is required
of students enrolled in this section. Prerequisite: CHEM 2613, or CHEM 3613
(recommended), or CHEM 3613H, or CHEM 3713. (Typically offered: Irregular)
This course is equivalent to CHEM 3203.

CHEM 3273. UAteach Research Methods. 3 Hours.
A project-based course for prospective science and mathematics teachers utilizing
scientific research methods and inquiry to solve research problems. Corequisite: Drill
component. Prerequisite: ARSC 1201 and ARSC 1221. (Typically offered: Spring)
This course is cross-listed with PHYS 3273, BIOL 3273.

CHEM 3451L. Elements of Physical Chemistry Laboratory. 1 Hour.
Experimental measurements of the physical properties, chemical systems, error
analysis and report writing. Experiments cover topics in thermochemistry, heat
capacity, chemical kinetics, spectroscopy, and phase/chemical equilibria using a
variety of physical chemistry techniques. Laboratory 4 hours per week. Corequisite:
Chemistry majors and chemistry minors must enroll in CHEM 3453 concurrently.
Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Fall)

CHEM 3453. Elements of Physical Chemistry. 3 Hours.
One semester accelerated course in physical chemistry primarily for students
majoring/minoring in chemistry with biochemistry option, or pre-professional and
agriculture students. Topics include thermodynamics, phase & chemical equilibrium,
chemical kinetics, quantum chemistry and spectroscopy. Presented at the same
level as the 2-semester course with some recourse to calculus, although covering
fewer topics in quantum chemistry. Lecture 3 hours per week. Students cannot
earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors
and chemistry minors must enroll in CHEM 3451L concurrently. Prerequisite:
CHEM 2263 and PHYS 2033 (or PHYS 2074), and MATH 2554 (or MATH 2043).
(Typically offered: Fall)

CHEM 3504. Physical Chemistry I. 4 Hours.
First semester of a 2-semester course in physical chemistry designed for chemistry
majors and chemistry minors with topics covering wave-particle duality, quantum
chemistry, atomic and molecular structure, bonding, spectroscopy and elementary
statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite:
MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074. (Typically offered: Fall)

CHEM 3512L. Physical Chemistry Laboratory. 2 Hours.
Experimental studies of molecular structure, thermochemistry, and chemical
kinetics, and the determination of other physicochemical properties of matter.
Laboratory 8 hours per week. Students cannot earn credit for both CHEM 3451L
and CHEM 3512L. Corequisite: Chemistry majors and chemistry minors must
take CHEM 3514 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or
PHYS 2074). (Typically offered: Spring)

CHEM 3514. Physical Chemistry II. 4 Hours.
Second semester of a 2-semester course in physical chemistry aimed for B.S.
chemistry majors/minors with topics covering the laws of thermodynamics, phase &
chemical equilibria; structure and properties of solutions, chemical potential,
and chemical kinetics. Lecture and recitation 4 hours per week. Students cannot
earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors
and chemistry minors must enroll in CHEM 3512L concurrently. Prerequisite:
CHEM 3504. (Typically offered: Spring)

CHEM 3601L. Organic Chemistry I Laboratory. 1 Hour.
Introduction to basic techniques for separation, purification, and identification of
organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per
week. Corequisite: CHEM 3603 and related course component drill for CHEM 3603.
(Typically offered: Fall and Summer)

CHEM 3602M. Honors Organic Chemistry I Laboratory. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of
organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing
component. Required drill. Corequisite: CHEM 3603H and related course component
drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy.
(Typically offered: Fall and Summer)
This course is equivalent to CHEM 3601L.

CHEM 3603. Organic Chemistry I. 3 Hours.
Introduction to organic compounds including alkanes, haloalkanes, alkenes
and alkydes; properties including basic stereochemistry and reactions including
nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture
3 hours per week. Corequisite: CHEM 3601L and related course component
drill section for CHEM 3603. Prerequisite: (CHEM 1123 and CHEM 1121L) or
(CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically
offered: Fall and Summer)

CHEM 3603H. Honors Organic Chemistry I. 3 Hours.
In-depth introduction to organic compounds; properties and reactions. Including
alkanes, haloalkanes, alkenes and alkydes; nucleophilic substitution, elimination,
and electrophilic addition reactions. Lecture 3 hours per week. Corequisite:
CHEM 3602M and related course component drill sections for CHEM 3603H and
CHEM 3602M. Prerequisite: Honors candidacy and ((CHEM 1123 and
CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and
CHEM 1221L)). (Typically offered: Fall and Summer)
This course is equivalent to CHEM 3603.

CHEM 3611L. Organic Chemistry II Laboratory. 1 Hour.
Continuation of CHEM 3601L and introduction to basic techniques of synthesis,
isolation, and determination of structure and reactivity of organic compounds.
Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite:
CHEM 3613 and related course component drill for CHEM 3613. Prerequisite:
CHEM 3601L. (Typically offered: Spring and Summer)

CHEM 3612M. Honors Organic Chemistry II Laboratory. 2 Hours.
Continuation of CHEM 3602M and introduction to basic techniques of synthesis,
isolation, and determination of structure and reactivity of organic compounds. Drill
lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component.
Drill required. Corequisite: CHEM 3613H and related course component drill
sections for CHEM 3612M and CHEM 3613H. Prerequisite: Honors candidacy
and CHEM 3602M. (Typically offered: Spring and Summer)
This course is equivalent to CHEM 3611L.
CHEM 3613. Organic Chemistry II. 3 Hours.
Basic chemistry of aromatic and carbonyl compounds: properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3611L and related course component drill section for CHEM 3613. Prerequisite: (CHEM 3603 and CHEM 3601L) or (CHEM 3603H and CHEM 3602M) or (CHEM 3703 and CHEM 3702L). (Typically offered: Spring and Summer)

CHEM 3613H. Honors Organic Chemistry II. 3 Hours.
In-depth coverage of the basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3612M and related course component drill sections for CHEM 3613H and CHEM 3612M. Prerequisite: Honors candidacy and CHEM 3603H and CHEM 3602M. (Typically offered: Spring and Summer)

This course is equivalent to CHEM 3613.

CHEM 3702L. Organic Chemistry I Lab for Chemistry Majors. 2 Hours.
Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3703 and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor. (Typically offered: Fall)

CHEM 3703. Organic Chemistry I Lecture for Chemistry Majors. 3 Hours.
In-depth introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition. Lecture 3 hours per week. Corequisite: CHEM 3702L and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor and (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall)

This course is equivalent to CHEM 3603.

CHEM 3712L. Organic Chemistry II Lab for Chemistry Majors. 2 Hours.
Continuation of CHEM 3702L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3713 and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3702L. (Typically offered: Spring)

CHEM 3713. Organic Chemistry II Lecture for Chemistry Majors. 3 Hours.
Continuation of in-depth coverage of the basic chemistry of the compounds of carbon. Properties and reactions of aromatic and carbonyl functional groups. Lecture 3 hours per week. Corequisite: CHEM 3712L and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3703 and CHEM 3702L. (Typically offered: Spring)

This course is equivalent to CHEM 3613.

CHEM 3813. Elements of Biochemistry. 3 Hours.
One semester survey course of the fundamentals of biochemistry. Structures, properties, and reactions of major classes of biomolecules. Basics of enzyme catalysis. Overview of metabolism. Credit for both CHEM 3813 and CHEM 4813 may not be counted toward a chemistry degree. Lecture 3 hours per week. Prerequisite: (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L). (Typically offered: Fall, Spring and Summer)

CHEM 3923H. Honors Colloquium. 3 Hours.
Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

CHEM 400V. Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 400VH. Honors Chemistry Research. 1-4 Hour.
Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 401H. Honors Seminar. 1 Hour.
Research seminar for chemistry majors enrolled in the honors program. Enrollment is required the spring semester of the junior and senior years for honors students. Senior honors students must make one research presentation to graduate with honors. Prerequisite: Honors candidacy, chemistry major and junior or senior standing. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CHEM 405V. Special Topics in Chemistry. 1-4 Hour.
Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioorganic chemistry, bioinorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. (Typically offered: Irregular)

CHEM 4123. Advanced Inorganic Chemistry I. 3 Hours.
Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3453 or CHEM 3514. (Typically offered: Fall)

CHEM 4153L. Nanotechnology Laboratory. 3 Hours.
Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostucture assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall)

This course is cross-listed with MEEG 4323L, PHYS 4793L.

CHEM 4211L. Instrumental Analysis Laboratory. 1 Hour.
Provides laboratory experience in parallel with the lecture material in CHEM 4213. Laboratory 3 hours per week. Corequisite: CHEM 4213. (Typically offered: Spring)

CHEM 4213. Instrumental Analysis. 3 Hours.
Provides students, especially those in the agricultural, biological, and physical sciences, with an understanding of modern instrumental techniques of analysis. Lecture 3 hours per week. Corequisite: CHEM 4211L. Prerequisite: (CHEM 2263 and CHEM 2261L) and ((CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L)). (Typically offered: Spring)

CHEM 4283. Energy Conversion and Storage. 3 Hours.
Fundamental and applied concepts of energy storage and conversion, with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. Prerequisite: CHEM 1123 and PHYS 2074. (Typically offered: Fall Even Years)
CHEM 4443. Physical Chemistry of Materials. 3 Hours.
Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Pre- or Corequisite: CHEM 3514. Prerequisite: CHEM 3453 or CHEG 3713 or MEEG 2403. (Typically offered: Spring Odd Years)

CHEM 4723. Experimental Methods in Organic Chemistry. 3 Hours.
Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Other laboratory techniques applicable to chemical research will be included. Lecture 3 hours and laboratory 3 hours per week. Lecture only meets the first half of the term. Laboratory meets the entire term. Corequisite: Lab component. Prerequisite: CHEM 3613 and CHEM 3611L (or CHEM 3613H or CHEM 3612M), (or CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

CHEM 4813H. Honors Biochemistry I. 3 Hours.
The first of a two-course series covering biochemistry for undergraduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Credit cannot be earned in both CHEM 3813 and CHEM 4813H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

CHEM 4843H. Honors Biochemistry II. 3 Hours.
A continuation of CHEM 4813H covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure, structure and synthesis, and molecular biology. Credit cannot be earned in both CHEM 3813 and CHEM 4813H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and CHEM 4813H. (Typically offered: Spring)

CHEM 4853. Biochemical Techniques. 3 Hours.
Techniques for handling, purifying and analyzing enzymes, structural proteins, and nucleic acids. Lecture 1 hour, laboratory 6 hours per week. Corequisite: Lab component. Pre or Corequisite: CHEM 3813 or CHEM 4843H. (Typically offered: Spring)

Classical Studies (CLST)
Daniel B. Levine
Chair of Studies
502 Kimpel Hall
479-575-2951

Classical Studies Website (http://fulbright.uark.edu/departments/world-languages/undergraduate/our-languages/classics.php)

The Classical Studies Program offers a major leading to a Bachelor of Arts degree. The program also offers a minor in classical studies.
