ARKANSAS SOYBEAN PERFORMANCE TESTS¹ 2008

D.G. Dombek,² R.D. Bond,³ I.L. Eldridge,⁴ and R.M. Pryor⁵

INTRODUCTION

Soybean cultivar performance tests are conducted each year in Arkansas by the University of Arkansas Division of Agriculture. The tests provide information to companies developing cultivars and/or marketing seed within the state, and aid the Arkansas Cooperative Extension Service in formulating cultivar recommendations for soybean producers.

The 2008 soybean Commercial Cultivar Tests (CCTs) were conducted at the Northeast Research and Extension Center (NEREC) at Keiser, the Lon Mann Cotton Research Station (LMCRS) near Marianna, the Rice Research and Extension Center (RREC) near Stuttgart, the Southeast Research and Extension Center - Rohwer Division (SEREC - RD) near Rohwer, and the Vegetable Substation (VSS) near Kibler. A test location map can be found inside the back cover.

MATERIALS AND METHODS

Soybean cultivars were entered by commercial seed companies, state and federal institutions. Recommended cultural practices were used at each location and all data were taken from a uniform set of instructions.

Cultivars were grouped by maturity groups based on information provided by the originating company or institution. To facilitate field operations and to allow for fairer comparisons between cultivars, entries in the Group IV and V CCTs were separated into "early" cultivars and "late" cultivars. Cultivars in the "early" Group IV test had a relative maturity range of 4.0 to 4.6 and in the Group V test, a range of 5.0 to 5.5. Cultivars in the "late" Group IV test had a relative maturity range of 4.7 or 4.9 and in the "late" Group V test, a range of 5.6 to 5.9.

In addition to the CCTs, Early Planted Tests (EPT) were established at NEREC, SEREC-RD, LMCRS, and at the Scott Matthews farm near Weiner in Poinsett County. Entries were separated into four groups: Maturity Group IIIs, Maturity Group IV, relative maturity 4.0-4.6, 4.7-4.9, and Maturity Group Vs.

Within each test, entries were arranged as a randomized complete block design with three or four replications. Plots in all tests were 4 or 5 rows wide depending on between-row spacing and 20-25 feet in length. Seeds were packaged for recommended planting rates and were planted with a cone planter. Specific location and cultural practice information accompany each table.

Interior rows of each plot were harvested for yield determination. Percent moisture was recorded for all harvested seed and plot weights were adjusted to thirteen percent moisture. Plot weights of all tests were converted to yield in bushels per acre (bu/A).

Plots were visually rated for shattering and lodging. Shattering ratings were carried out on border rows according to the following scale:

1. No shattering
2. 1-3% shattered
3. 4-8% shattered
4. 9-19% shattered
5. 20% or more shattered

Lodging ratings were recorded on a scale from 1 to 5 based on the following criteria:

1. Almost all plants erect
2. Either all plants leaning slightly, or a few plants down
3. Either all plants leaning moderately, or 25-50% of the plants down
4. Either all plants leaning considerably, or 50-80% of the plants down
5. All plants down badly

Average plant height was recorded in inches for each plot.

¹Keiser Irrigated = Northeast Research and Extension Center. Soil series = Sharkey silty clay.
 Keiser Nonirrigated = Northeast Research and Extension Center. Soil series = Sharkey silty clay.
 Marianna Irrigated = Lon Mann Cotton Research Station. Soil series = Calloway silt loam.
 Stuttgart Irrigated = Rice Research and Extension Center. Soil series = Crowley silt loam.
 Rohwer Irrigated = Southeast Research and Extension Center - Rohwer Division. Soil series = Sharkey clay.
 Kibler Irrigated = Vegetable Substation. Soil series = Roxanna silt loam.

²This location received over nine inches of rain in August. Waterlogged soil may have contributed to lower-than-expected yields.

³Average yields from Keiser Irrigated, Keiser Nonirrigated and Rohwer locations.

⁴Average yields from Marianna, Stuttgart and Kibler locations.
