Contents

Undergraduate Research Articles

Controlling *Listeria monocytogenes* on ready-to-eat poultry products using carboxymethylcellulose film coatings containing green tea extract (GTE) combined with nisin and malic acid

*Brittany Adams, N.S. Hettiarachchy, and M.G. Johnson* ........................................................................3

The roles, needs, and challenges of Arkansas women in agriculture

*Carmen C. Albright and Jennie S. Popp* ................................................................................................11

Gender and other social effects in people’s perceptions of domesticated animals

*Clayton W. Bell and A. Hayden Brown* .................................................................................................19

Design of a bioreactor to study the role of red blood cells in the transport of nitric oxide in the microcirculation

*Nupura Bhise and Mahendra Kavdia* ....................................................................................................29

Arkansas producers’ attitudes toward the 2002 Farm Bill and preferences for the 2007 Farm Bill

*Misti Clark and Eric Wailes* .................................................................................................................41

Mycorrhizal infection rates in RoundupReady® row crops in response to glyphosate and phosphorus applications

*Aaron L. Daigh, Mary C. Savin, and Larry C. Purcell* ..........................................................................50

PTO performance and NO\(_x\) emissions with D2, B20, and B100 fuels in a John Deere 3203 compact tractor

*Matthew K. Hardin, Tonya Brown, Melanie R. Roller, Donald Johnson, and George Wardlow* ........56

Evaluation of three tractor-guidance methods for parallel swathing at two field speeds

*Garris Hudson, Robby Shofner, George W. Wardlow, and Donald M. Johnson* ..............................61

A computational model for analysis of uncoupled NO synthase on nitric oxide and superoxide interaction in microcirculation

*William J. Richardson and Mahendra Kavdia* ......................................................................................67

Comparison of instrumental methods for measuring seed hardness of food-grade soybean

*Mioko Tamura, Bo Zhang, Joyce Berger-Doyle, and Pengyin Chen* ......................................................77

Instructions for Authors .........................................................................................................................85

Cover: Compact and larger tractors are adaptable and indispensable to production agriculture, fulfilling central roles in a wide range of on-farm tasks. (Photo by John Crone)
