Effect of pig weaning age and commingling after the nursery phase on humoral and behavioral indicators of well-being and on growth performance
Sarah C. Arthur, Mari E. Davis, Jason K. Apple, and Charles V. Maxwell .................................................3

Method analysis of laboratory measures of stream sediment and water phosphorus equilibrium
Anna L. Erickson, Stephanie M. Williamson, and Brian E. Haggard ...............................................................10

Laboratory-scale evaluation of incandescent and compact florescent lamps for poultry house lighting
Leanne M. Gabriel and Donald M. Johnson ........................................................................................................16

Impact of dietary changes on hepatic homocysteine metabolism in young broilers
Fauna M. Ganson, Padmakumar B. Pillai, and Jason L. Emmert .....................................................................21

Factors associated with student grades in Animal Physiology I
Margo D. Hale and Charles F. Rosenkrans .........................................................................................................27

Evaluation of post-harvest disease resistance in blackberry genotypes
John-Paul Kidd, John R. Clark, Patrick Fenn, and Barbara Smith .....................................................................31

A comparison of recently introduced instruments for measuring rice flour viscosity
Nettie K. Mathis, Linfeng Wang, and Terry J. Siebenmorgen .........................................................................35

Effects of vegetation removal on native soil quality in eastern Arkansas
Lorena Moreno and Kristofer R. Brye ................................................................................................................43

Soybean seed yield and quality under an ultra-short-season production system
Lorena Moreno, Tetsuaki Ishibashi, Pengyin Chen, and Patrick Fenn ................................................................48

Assessment and restoration of a neighborhood wetland invaded by exotic plant species
Ryan J. Neal, Kimberly R. Payne, Lorena Moreno, Graham Duffy, Jonathan Peck, and Mary C. Savin and Pengyin Chen ..........................................................53

Effects of thinking-aloud pair problem solving on the troubleshooting performance of undergraduate students in a power technology course
Michael L. Pate, George W. Wardlow, and Donald M. Johnson .....................................................................59

Microbial biomass and nitrogen availability under the invasive plant species Lonicera japonica and native grasses in wetland soil
Kimberly R. Payne, Mary C. Savin, and Peter J. Tomlinson .............................................................................65

Acaricidal efficacy of various agents in the treatment of naturally occurring Ornithonyssus sylviarum (Acari: Macronyssidae) infestations of chickens

Aerobic stability of heat and orchardgrass round-bale silage
Robert T. Rhein, Wayne K. Coblenz, Charles F. Rosenkrans, Jr., and D. Wayne Kellogg ..................................77

A survey into the prevalence of parasitic helminths in broiler breeders
Anita Sarathi, T.A. Yazwinski, C.A. Tucker, and J. Robins ................................................................................84

Characterizing bean pod rot in Arkansas and Missouri
Jeremy H. Taylor and Craig S. Rothrock ..............................................................................................................88

Propagation of thornless blackberries utilizing adventitious shoots from root cuttings
Ellen Thompson, John R. Clark, and Curt R. Rom .............................................................................................93

Instructions for Authors .................................................................................................................................98
