Contents

Undergraduate Research Articles

The characteristics of consumers and producers using farmers’ markets
W.H. Añez and M.R. Thomsen ................................................................. 3

Propagation of thornless Arkansas blackberries by hardwood cuttings
M.M. Bray, C.R. Rom, and J.R. Clark .................................................... 9

Physicochemical properties and leaching behavior of eight U.S. long-grain rice cultivars
as related to rice texture D.K. Cameron and Y.J. Wang ............................ 14

Watershed-scale agricultural land-use impact on instream physicochemical parameters
W.H. Dillahunty, I. Chaubey, and M.D. Matlock .................................. 21

Chitosanase may enhance anti-fungal defense responses in transgenic tobacco
B.L. Hendrix and J. McDaniel, Stewart ............................................... 26

The effects of classic and variant infectious bursal disease viruses on lymphocyte
populations in specific-pathogen-free White Leghorn chickens
C.L. Johnson, A.K. Cox, A.D. Keeter, W.J. Quinn, G.F. Erf, and L.A. Newberry .......................................................... 34

Phase-feeding affects crude protein intake, excretion, and retention of broilers
from 21 to 63 days L.N. Loupe, H.R. Pope, P.B. Pillai, and J.L. Emmert .......................................................... 42

Changing career paths in environmental, soil, and water science and crop management:
Survey results T.M. Madewell, K.R. Brye, and M.C. Savin ........................ 47

Effect of Triticum turgidum cytoplasm on test weight of soft red winter wheat
J. Mayta, R. Bacon, J. Kelly, and E. Gbur ............................................. 53

The effects of potential organic apple fruit thinners on gas exchange and growth of
model apple trees: A model plant study of transient photosynthetic inhibitors and
their effect on physiology and growth J.D. McAfee and C.R. Rom .................. 59

Evaluation of a new extraction system for rapid measurement of surface lipid content
of rice for degree of milling estimation A. Parker, C. Rohrer, and T. Siebenmorgen ........................................... 65

Response of blackberry cultivars to nematode transmission of Tobacco ringspot virus
A. Sanny, J.R. Clark, and R. Gergerich ............................................ 70

Effects of virus infection on release of volatile organic compounds from insect-damaged bean,
Phaseolus vulgaris S.E. Sossamon, B.K. Jackson, B.A. Drumwright, K.L. Korth, and G.F. Erf .................. 75

DNA sequence of melanocortin 1-receptor gene in Coturnix japonica: Correlation with
three E locus alleles—E, e+, and e R.B. Ugrankar, K. Cheng, and R. Okimoto ........................................ 83

Soil particle-size analysis: A comparison of two methods
L.A. Williams-Caudle, K.R. Brye, and E.M. Rutledge ............................. 89

Instructions for Authors ........................................................................ 95

Cover: Arkansas rice and soybean fields (2003 cropping season) mature in the historic
landscape of surviving farmhouses from the Roosevelt-era Plum Bayou Resettlement
Community, built as a model solution to tenant and sharecropper land-tenure grievances
in Arkansas during the Great Depression. Photo courtesy of John Crone, Professor,
Department of Landscape Architecture, School of Architecture, University of Arkansas.
